9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is within 700m of Wetley Moor SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of area, is directly adjacent to a small housing estate and species poor grasslands, and has poor connectivity to more biodiverse habitats. The site is therefore deemed as having low ecological value in terms of its loss within the wider countryside. The	-/?

SA Objective	Assessment Criteria - Does the site (WE053)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 50m of one grade II listed asset. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be within 700m from Wetley Moor SSSI and would increase external pressures on these sites. Given the location of the site, it is considered that there would be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (WE053)...?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Werrington and Cellarhead has scope to have a positive effect on the vitality and viability of Werrington and Cellarhead and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects: The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to historic assets. The site's proximity to designated assets is likely to have a negative effect, as could the development of greenfield, grade 4 ALC land.

SA Objective	Assessment Criteria - Does the site (WE069)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this site, a greenfield site that is set outside of the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located in the centre of the village and is within 800m of the village centre and the range of services and facilities that can be found here that could serve prospective residents of the site. It should be noted that the current supply of educational services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.	+
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. It should be noted that the current supply of health care services and facilities currently falls short of demand and the situation is likely to worsen in the future. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help	+

SA Objective	Assessment Criteria - Does the site (WE069)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 6 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 800m of the village centre of Werrington and Cellarhead and a GP surgery as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? The site is located in the edge of the village boundary and is more than 2,000m from the village centre and the range of services and facilities that can be found here that could serve prospective employees of the site. It should be noted that the current supply of educational services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a negative effect on this Objective.	-
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide employees with good access to areas of open space which should help to support healthy lifestyles. However, the site is more than 2,000m from a GP surgery. It should be noted that the current supply of health care services and facilities currently falls short of demand and the situation is likely to worsen in the future. Overall, this site has been assessed as having a negative effect on this Objective.	-
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?	This site has been proposed for employment uses with regards to this assessment. Therefore the development would provide no housing. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (WE001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
locations and including affordable / social /extra care housing.	• Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?		
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is more than 2,000m from the village centre of Werrington and Cellarhead and a GP surgery, but is adjacent to an area of open space. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a negative effect on this Objective.	-
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Similarly, the site is more than 2,000m from the village centre and could increase the need to travel. Overall, this site has been assessed as having a negative effect on this Objective.	-
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. It should be noted that the site is within 100m from a candidate AQMA. Overall, this site has been assessed as having an negative effect on this Objective.	-
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+

SA Objective	Assessment Criteria - Does the site (WE001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 1,900m from Churnet Valley SSSI, the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological study (2015) notes that the site has fairly species poor habitats present on site, and has been attributed low ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 400m of three grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?	The site would be more than 1,900m from Churnet Valley SSSI and would not increase external pressures on these sites. Given the	-

SA Objective	Assessment Criteria - Does the site (WE001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
landscape and other natural assets and resources.	• Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	location of the site, it is considered that there would be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed employment use of this site provides scope for the development of this site to have a positive effect on investment in culture and tourism within the town and wider district, however this is dependent on proposal specific information. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of an employment site within the village centre has the scope to have a positive effect on the vitality and viability of Werrington and Cellarhead and the wider District, as new employment could be expected to increase footfall in the nearby village centre. Overall, this site has been assessed as having a significant positive effect on this objective.	++
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Werrington and Cellarhead as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.	++
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m from existing local employment provision but the site would generate new employment provision. Overall, this site has been assessed as having a significant positive effect on this objective.	++
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (WE001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site's low ecological value is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the proximity to historic assets and distance away from services and facilities and areas of open space.			

Table 12.224

WE002

SA Objective	Assessment Criteria - Does the site (WE002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this site, a greenfield site that is remote from the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located in the edge of the village boundary and is more than 2,000m from the village centre and the range of services and facilities that can be found here that could serve prospective employees of the site. It should be noted that the current supply of educational services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (WE002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide employees with good access to areas of open space which should help to support healthy lifestyles. However, the site is more than 2,000m from a GP surgery. It should be noted that the current supply of health care services and facilities currently falls short of demand and the situation is likely to worsen in the future. Overall, this site has been assessed as having a negative effect on this Objective.	-
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	This site has been proposed for employment uses with regards to this assessment. Therefore the development would provide no housing. Overall, this site has been assessed as having a neutral effect on this Objective.	0
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is more than 2,000m from the village centre of Werrington and Cellarhead and a GP surgery, but is adjacent to an area of open space. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a negative effect on this Objective.	-

To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m from existing local employment provision but the site would generate new employment provision. Overall, this site has been assessed as having a significant positive effect on this objective.	++

SA Objective	Assessment Criteria - Does the site (WE003)...?	Commentary on likely nature of effects of site allocation	Overall assessment
Summary of overall assessment and likely significant effects: The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. However, the remote nature of the site is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the proximity to historic assets, ecological value and distance away from services and facilities and areas of open space.

12.5 Smaller villages: Bagnall to Checkley

Bagnall

Potentially suitable sites (5+ dwellings) - within the Green Belt

BG008

SA Objective	Assessment Criteria - Does the site (BG008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	SOCIAL		
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this site, a greenfield site that is outside of the settlement boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Bagnall does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Bagnall does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (BG008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?		
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 10 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Bagnall as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (BG008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 1,500m from Bagnall Road Wood (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site itself has four trees with bat potential and a species rich hedgerow and is attributed some ecological value, although it is fairly poorly connected to other biodiverse habitats within the locality. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (BG008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 400m from ten grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 1,500m of Bagnall Road Wood (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Bagnall has scope to have a positive effect on the vitality and viability of Bagnall and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (BG008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
Summary of overall assessment and likely significant effects: The proposed delivery of circa 10 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land and the ecological value of the site is likely to also have a negative effect.

Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 1,250m of Bagnall Road Wood (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (BG015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Bagnall has scope to have a positive effect on the vitality and viability of Bagnall and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
Summary of overall assessment and likely significant effects: The proposed delivery of circa 10 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land and the ecological value of the site is likely to also have a negative effect.			

Table 12.229

Blackshaw Moor

Potentially suitable sites (5+ dwellings) - within the draft Infill Boundary

BL006

SA Objective	Assessment Criteria - Does the site (BL006)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this site, a greenfield site that is outside of the settlement boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Blackshaw Moor does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Blackshaw Moor does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (BL006)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 12 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Blackshaw Moor as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

SA Objective	Assessment Criteria - Does the site (BL006)...?	Commentary on likely nature of effects of site allocation	Overall assessment
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 1,250m from Thorncliffe Moor SSSI, the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site has potential for protected species to be present due to the buildings present on site and has been deemed to have some ecological value despite fairly poor connectivity to the wider countryside. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (BL006)...?	Commentary on likely nature of effects of site allocation	Overall assessment
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is more than 400m from any listed assets. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 1,250m of Thorncliffe Moor SSSI and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact on the South West Peak National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+

The site is more than 2,000m from Coyney Woods (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site contains fairly species poor habitats and common species, although it is fairly well connected to the wider countryside. As two buildings are present with the potential to support roosting bats the site is deemed to have some ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 3 ALC land so development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (CV005)...?	Commentary on likely nature of effects of site allocation	Overall assessment
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 50m of one grade II listed asset and 400m from one grade II* listed asset and fourteen grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 2,000m from Coyney Woods (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Caverswall has scope to have a positive effect on the vitality and viability of Caverswall and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (CV005)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects: The proposed delivery of circa 10 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land and the site's proximity to historic assets. The ecological value of the site is likely to have a negative effect.

Potentially suitable sites (5+ dwellings) - within the Green Belt

CV004

SA Objective	Assessment Criteria - Does the site (CV004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this site, a greenfield site that is outside the settlement boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (CV004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Caverswall does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Caverswall does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 8 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Caverswall as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (CV004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 2,000m from Coyney Woods (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the majority of the site contains fairly species poor habitats although they are well connected to the wider countryside they have been deemed to have low ecological value overall. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (CL004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is within 1,250m of Coyney Woods (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site mostly contains fairly species poor habitats but with some potential to support European and UK protected species along the dry ditch and connecting hedgerow, which is well connected to potentially biodiverse habitats and able to support European and UK protected species. Therefore the site is considered to have ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve	• Help safeguard the best and most versatile agricultural land?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 3 ALC land so	--/?

SA Objective	Assessment Criteria - Does the site (CL004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
soil and land resources; and protect and enhance geological resources.	• Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is more than 400m from a listed asset. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be within 1,250m from Coyney Woods (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (CL004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Cookshill has scope to have a positive effect on the vitality and viability of Cookshill and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects: The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and location away from historic assets is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land. The ecological value of the site is likely to have a negative effect.

CL007

SA Objective	Assessment Criteria - Does the site (CL007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			

SA Objective	Assessment Criteria - Does the site (CL007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure?	The development of this site, a greenfield site that is outside the settlement boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Cookshill does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Cookshill does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 30 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++

SA Objective	Assessment Criteria - Does the site (CL007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Cookshill as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management? 2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Checkley does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Checkley does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 7 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (CK008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?		
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Checkley as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+

SA Objective	Assessment Criteria - Does the site (CK008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management?		
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 4,500m from Cecilly Brook (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of area, is adjacent to a main road to the south and dwellings to the east west and species poor grasslands to the north, and has poor connectivity. Therefore the site is considered to have low ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 3 ALC land so development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
12. To minimise the use of non-renewable resources.	● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns	The site is within 400m from one scheduled monument, one grade I listed asset and eight grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?

SA Objective	Assessment Criteria - Does the site (CK008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	and villages and maintain and strengthen local distinctiveness and sense of place?		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 4,500m from Cecilly Brook (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact on the Needwood and South Derbyshire Claylands National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Checkley has scope to have a positive effect on the vitality and viability of Checkley and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (CK008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects: The proposed delivery of circa 7 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and low ecological value is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land. The site's proximity to historic assets is likely to have a negative effect.

The proposed development of a residential site with good access to the village centre of Dilhorne has scope to have a positive effect on the vitality and viability of Dilhorne and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects: The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and distance from designated assets is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land is likely to have a negative effect.

DH018

SA Objective	Assessment Criteria - Does the site (DL018)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this site, a greenfield site could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Dilhorne does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Dilhorne does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (DL018)...?	Commentary on likely nature of effects of site allocation	Overall assessment
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 7 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Dilhorne as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to	+

SA Objective	Assessment Criteria - Does the site (DL018)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 4,500m from Cecilly Brook (LNR) and Churnet Valley SSSI, the nearest designated assets, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site has potential for protected species to be present due to proximity of ponds and wetland habitats and the good connectivity to these potentially biodiverse habitats and the wider countryside. Therefore the site is attributed some ecological importance. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic	The site is within 50m of one grade II listed asset and within 400m from one grade II* listed asset and ten grade II listed assets.	--/?

SA Objective	Assessment Criteria - Does the site (DL018)...?	Commentary on likely nature of effects of site allocation	Overall assessment
heritage and archaeological assets along with their settings.	heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 4,500m from Cecilly Brook (LNR) and Churnet Valley SSSI and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Dilhorne has scope to have a positive effect on the vitality and viability of Dilhorne and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 50m from one grade II listed asset and within 400m from one grade II* listed asset and three grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?

SA Objective	Assessment Criteria - Does the site (DC003)...?	Commentary on likely nature of effects of site allocation	Overall assessment
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 4,000m from Cecilly Brook (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Needwood and South Derbyshire Claylands National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Draycott has scope to have a positive effect on the vitality and viability of Draycott and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (DC003)...?	Commentary on likely nature of effects of site allocation	Overall assessment
The proposed delivery of circa 10 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect, as could the site's proximity to historic assets and development of greenfield, grade 3 ALC land. The site's ecological value is likely to have a negative effect.			

Table 12.243

Potentially suitable sites (5+ dwellings) - outside the draft Infill Boundary

FO008

SA Objective	Assessment Criteria - Does the site (FO008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	SOCIAL		
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this site, a greenfield site outside the development boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Foxt does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--

SA Objective	Assessment Criteria - Does the site (FO008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	/ civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.		
3. To improve health and reduce health inequalities.	● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Foxt does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 8 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Foxt as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (FO008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is within 500m from Churnet Valley SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. This site has not been subject to an ecology survey, so the exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (FO008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?		
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 400m from four grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be within 500m from Churnet Valley SSSI and would increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC

To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?	The site is more than 3,500m from Dimmings Dale and The Ranger SSSI and Saltersford Lane Meadows SSSI, the nearest designated assets, and, as such, is not considered to have an effect on this asset. This site has not been subject to an ecology survey, so the	+/?

SA Objective	Assessment Criteria - Does the site (HO003)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 50m of one grade II listed asset and within 400m from five grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?	The site would be more than 3,500m from Dimmings Dale and The Ranger SSSI and Saltersford Lane Meadows SSSI and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the	+

SA Objective	Assessment Criteria - Does the site (HO003)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Hollington has scope to have a positive effect on the vitality and viability of Hollington and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (HO003)...?	Commentary on likely nature of effects of site allocation	Overall assessment
The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and location away from designated assets is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land is likely to have a negative effect.

SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this site, a brownfield site outside of the development boundary could help to improve the social and environmental quality of the village centre. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage /	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Hulme does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--

SA Objective	Assessment Criteria - Does the site (HU002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.		
3. To improve health and reduce health inequalities.	● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Hulme does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 5 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Hulme as well as being adjacent to an area of open space which should reduce the need to travel within the village. However, the site is circa 1,500m from a bus stop or other form of public transport. Overall, this site has been assessed as having a neutral effect on this Objective.	0
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (HU002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management? However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 9 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Kingsley Holt as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (KH009)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is within 400m of Froghall Meadow and Pastures SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity with numerous non-native and coniferous species present, is adjacent to a road to the west and buildings to the north and species poor grasslands, with fairly good connectivity to the wider countryside. The site is deemed to have some value from an ecological perspective. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
11. To safeguard the best and most versatile agricultural land; improve	• Help safeguard the best and most versatile agricultural land?	As noted, this site has been assessed as being on brownfield land. However, the land has also been assessed as grade 4 ALC land so	+

SA Objective	Assessment Criteria - Does the site (KH009)...?	Commentary on likely nature of effects of site allocation	Overall assessment
soil and land resources; and protect and enhance geological resources.	• Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a positive effect on this Objective.	
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	The development of this brownfield site could enable the re-use of existing buildings within the village centre. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.	+
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is more than 400m from any listed assets. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be within 500m from Froghall Meadow and Pastures SSSI and would increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural	+

SA Objective	Assessment Criteria - Does the site (KH009)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Kingsley Holt has scope to have a positive effect on the vitality and viability of Kingsley Holt and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 1,000m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects: The proposed delivery of circa 9 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and areas of existing employment is likely to have a positive effect, as could its location away from historic assets and the development of brownfield land. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to designated assets.

Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (LB006)...?	Commentary on likely nature of effects of site allocation	Overall assessment
The site's accessibility to areas of existing employment is likely to have a significant positive effect. Similarly, the proposed delivery of circa 6 dwellings is considered to have a positive effect, as could the site's accessibility to areas of open space and its location away from designated and historic assets. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect.			

Table 12.251

Potentially suitable sites (5+ dwellings) - outside the Infill Boundary

LB011

SA Objective	Assessment Criteria - Does the site (LB011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	SOCIAL		
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure?	The development of this site, a greenfield site outside the development boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Leekbrook does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It	+

SA Objective	Assessment Criteria - Does the site (LB011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	should be noted that Leekbrook does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 6 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Leekbrook as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (LB011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	Part of the site is located within a flood zone 2 area and, as such, it can be considered that the site would be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to an increased is water demand within the District. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.	-
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is within 1,750m of Ladderedge Country Park (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. This site has not been subject to an ecology survey, so the exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope	0

SA Objective	Assessment Criteria - Does the site (LB011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is more than 400m from any listed assets. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be within 1,750m from Ladderedge Country Park (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Leekbrook has scope to have a positive effect on the vitality and viability of Leekbrook and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (LB011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
Summary of overall assessment and likely significant effects: The site's accessibility to areas of existing employment is likely to have a significant positive effect. Similarly, the proposed delivery of circa 6 dwellings is considered to have a positive effect, as could the site's accessibility to areas of open space and its location away from designated and historic assets. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect.

15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural	+

SA Objective	Assessment Criteria - Does the site (LO002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Longsdon has scope to have a positive effect on the vitality and viability of Longsdon and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects: The proposed delivery of circa 10 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to designated and historic assets.

SOCIAL			

SA Objective	Assessment Criteria - Does the site (LO007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure?	The development of this site, a greenfield site within the development boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Longsdon does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Longsdon does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 5 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (LO007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Longsdon as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?	The site is within 400m of Ladderedge Country Park (LNR), the nearest designated asset, and, as such, is considered to have an effect on this	-/?

SA Objective	Assessment Criteria - Does the site (LO007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
plan's policies and proposals on European Sites and SSSIs	• Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	asset. This site has not been subject to an ecology survey, so the exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 400m one grade II* listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement	The site would be within 400m from Ladderedge Country Park (LNR) and could increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (LO007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	of the natural environment identified in the NCA profiles?		
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. 10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 3,500m from Cecilly Brook (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of the improved grassland area and is also directly adjacent to a housing estate and species poor grasslands. The hedgerow however has very good connectivity to the wider countryside becoming more diverse further north and should be retained and potentially qualify for SBI status, hence the site itself being attributed ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 3 ALC land so development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?

SA Objective	Assessment Criteria - Does the site (LT001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 50m of two grade II listed assets and within 400m of one scheduled monument and eight grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 3,500m from Cecilly Brook (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Needwood and South Derbyshire Claylands National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Lower Tean has scope to have a positive effect on the vitality and viability of Lower Tean and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (LT001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,000m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
Summary of overall assessment and likely significant effects: The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land and proximity to historic assets. The site's proximity to designated assets and the inaccessibility of areas of existing employment are likely to have a negative effect.

LT002

SA Objective	Assessment Criteria - Does the site (LT002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure?	The development of this site, a greenfield site outside the development boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (LT002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?		
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Lower Tean does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Lower Tean does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 6 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion?	As noted previously, the site is within 400m of the village centre of Lower Tean as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site	+

SA Objective	Assessment Criteria - Does the site (LT002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?	The site is more than 3,500m from Cecilly Brook (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of area, is adjacent to	-/?

SA Objective	Assessment Criteria - Does the site (LT002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	a main road to the south and farm buildings to the east and species poor grasslands to the north and west, but has good connectivity to the wider countryside through networks of species rich hedgerows. The presence of a species rich hedgerow attributes the site some ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 3 ALC land so development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 50m of two grade II listed assets and within 400m of one scheduled monument and seven grade II listed assets. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?	The site is within 800m of Bath Pasture SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of area, despite its proximity to	-/?

SA Objective	Assessment Criteria - Does the site (OA016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	Cotton Dell LWS. The main features of ecological interest are the semi-natural broadleaved woodland and the potential to support reptiles which warrants the site being attributed ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 400m of six grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?	The site would be within 800m of Bath Pasture SSSI and could increase external pressures on these sites. Given the location of the	-

SA Objective	Assessment Criteria - Does the site (OA016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
and other natural assets and resources.	• Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Oakamoor has scope to have a positive effect on the vitality and viability of Oakamoor and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (OA016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
The proposed delivery of circa 9 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to designated and historic assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.			

Table 12.260

OA030

SA Objective	Assessment Criteria - Does the site (OA030)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this site, a greenfield site outside the infill boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Oakamoor does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--

SA Objective	Assessment Criteria - Does the site (OA030)...?	Commentary on likely nature of effects of site allocation	Overall assessment
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Oakamoor does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 23 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Oakamoor as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+

8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is within 900m of Bath Pasture SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The Ecological Study (2015) notes that the site has high potential biodiversity and very good connectivity to the wider countryside through broadleaved woodland to the north. The area is attributed high biodiversity value, especially the unimproved calcareous grassland. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. 	/ civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.		
3. To improve health and reduce health inequalities.	● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Rudyard does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 13 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Rudyard as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (RU016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 3,000m from Brough Park (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site has potential for protected species to be present due to the mosaic of habitats and habitat structure present, especially as the site is well connected to the wider countryside. The site is considered to have ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil	• Help safeguard the best and most versatile agricultural land?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so	-

SA Objective	Assessment Criteria - Does the site (RU016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
and land resources; and protect and enhance geological resources.	• Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	There are no listed assets within 400m of the site. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 3,000m from Brough Park (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural	+

SA Objective	Assessment Criteria - Does the site (RU016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Rudyard has scope to have a positive effect on the vitality and viability of Rudyard and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects: The proposed delivery of circa 13 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and location away from historic assets are likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to designated assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects: The proposed delivery of circa 7 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to historic assets, the ecological value of the site and the development of greenfield, grade 4 ALC land are likely to have a negative effect.			

Table 12.265

Potentially suitable sites (5+ dwellings) - within Green Belt

RS009

SA Objective	Assessment Criteria - Does the site (RS009)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this site, a greenfield site outside of the development boundary could be expected to have an effect on the Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Rushton Spencer does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Rushton Spencer does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would	+

SA Objective	Assessment Criteria - Does the site (RS009)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 30 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Rushton Spencer as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to	+

SA Objective	Assessment Criteria - Does the site (RS009)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 4,500m from Peak District Moors (South Pennine Moors Phase 1) SPA, the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site has potential to support protected species, though the site is fairly poorly connected to the wider countryside but is considered to have some ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic	The site is within 400m of five grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a	-/?

SA Objective	Assessment Criteria - Does the site (RS009)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	negative effect on this Objective, however the exact effects are uncertain.	
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 4,500m from Peak District Moors (South Pennine Moors Phase 1) SPA and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the South West Peak National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Rushton Spencer has scope to have a positive effect on the vitality and viability of Rushton Spencer and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient	--

	maintain and strengthen local distinctiveness and sense of place?		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 4,500m from Peak District Moors (South Pennine Moors Phase 1) SPA and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the South West Peak National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Rushton Spencer has scope to have a positive effect on the vitality and viability of Rushton Spencer and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--

SA Objective	Assessment Criteria - Does the site (RS015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
Summary of overall assessment and likely significant effects: The proposed delivery of circa 12 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to historic assets, the ecological value of the site and the development of greenfield, grade 4 ALC land are likely to have a negative effect.			

Table 12.268

12.5.4 Smaller villages: Stockton Brook to Whiston and other areas

Stockton Brook

Potentially suitable sites (5+ dwellings) - within the Green Belt

SB014

SA Objective	Assessment Criteria - Does the site (SB014)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	SOCIAL		
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this site, a greenfield site outside of the development boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Stockton Brook does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Stockton Brook does not have a GP surgery.	+

SA Objective	Assessment Criteria - Does the site (SB014)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	Overall, this site has been assessed as having a positive effect on this Objective.	
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 10 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Stockton Brook as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (SB014)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 2,000m from Bagnall Road Wood (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of area, is adjacent to a main road with buildings to the west and species poor grasslands, with fairly good connectivity to the wider countryside. The site is deemed to have some ecological value for both its woodland assemblage and two trees with potential to support roosting bats. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (SB014)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	There are no listed assets within 400m of the site. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 2,000m from Bagnall Road Wood (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Stockton Brook has scope to have a positive effect on the vitality and viability of Stockton Brook and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (SB014)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects: The proposed delivery of circa 10 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and location away from historic assets are likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's ecological importance and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

The site is within 2,000m from Bagnall Road Wood (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. This site has not been subject to an ecology survey, so the exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
11. To safeguard the best and most versatile agricultural land; improve soil and land	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most	-

SA Objective	Assessment Criteria - Does the site (ADD08)...?	Commentary on likely nature of effects of site allocation	Overall assessment
resources; and protect and enhance geological resources.	• Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 400m of five grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would within 2,000m from Bagnall Road Wood (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			

SA Objective	Assessment Criteria - Does the site (ADD08)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Stockton Brook has scope to have a positive effect on the vitality and viability of Stockton Brook and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects: The proposed delivery of circa 40 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and location away from designated assets are likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to historic assets and ecological value are likely to have a negative effect.

Whiston

Potentially suitable sites (5+ dwellings) - outside the infill boundary

WH002

SA Objective	Assessment Criteria - Does the site (WH002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	SOCIAL		
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure?	The development of this site, a mixed brownfield and greenfield site outside of the development boundary could help to improve the social and environmental quality of the village centre. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Whiston does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Whiston does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help	+

SA Objective	Assessment Criteria - Does the site (WH002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 10 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Whiston as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate	+

SA Objective	Assessment Criteria - Does the site (WH002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	against this. Overall, this site has been assessed as having a positive effect on this objective.	
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is within 500m from Churnet Valley SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The Ecological Study (2015) notes that the site has high potential biodiversity and fairly good connectivity to the wider countryside through the broadleaved woodland to the north. Therefore the site is attributed ecological value. The site may have potential to qualify for SBI status. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on mixed brownfield and greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a neutral effect on this Objective.	0
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	The development of this brownfield site could enable the re-use of existing buildings within the village. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.	+
13. To protect and enhance the character of towns / villages and other heritage and	• Deliver development that helps ensure the continued protection and enhancement of cultural	The site is within 50m of one grade II listed asset and within 400m of six grade II listed assets. The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+

SA Objective	Assessment Criteria - Does the site (WH015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is within 750m from Churnet Valley SSSI, Froghall Meadow and Pastures SSSI and Whiston Eaves SSSI, the nearest designated assets, and, as such, is considered to have an effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of area, is adjacent to a road to the west and buildings to the north and species poor grasslands but has good connectivity to the wider countryside through networks of hedgerows. The site also has low potential to support protected species therefore has been attributed low ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 400m of six grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?

SA Objective	Assessment Criteria - Does the site (WH015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site is within 750m from Churnet Valley SSSI, Froghall Meadow and Pastures SSSI and Whiston Eaves SSSI and could increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Whiston has scope to have a positive effect on the vitality and viability of Whiston and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (WH015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
The site's proximity to areas of existing employment is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and the proposed delivery of circa 6 dwellings are likely to have a positive effect. However, the site is inaccessible to services and facilities is likely to have a significant negative effect. The site's proximity to designated and historic assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.			

Table 12.274

WH016

SA Objective	Assessment Criteria - Does the site (WH016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this site, a greenfield site outside of the development boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Whiston does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles?	The location of this site should provide residents with good access to areas of open space which should help to support healthy	+

SA Objective	Assessment Criteria - Does the site (WH016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	lifestyles. It should be noted that Whiston does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 6 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Whiston as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (WH016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is within 500m from Churnet Valley SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The Ecological Study (2015) notes that the site has a mosaic of habitats contained within an area of garden and derelict garden with good connectivity to other more biodiverse habitats, therefore the site has been attributed some ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features? 4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 6 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 1,200m of the village centre of Hulme as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 1,000m of a bus stop. Overall, this site has been assessed as having a negative effect on this Objective.	-
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Similarly, the site is more than 1,200m from the village centre and could increase the need to travel. Overall, this site has been assessed as having a negative effect on this Objective.	-
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The	+

SA Objective	Assessment Criteria - Does the site (OC003)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is within 600m of Hulme Quarry SSSI, the nearest designated assets, and, as such, is considered to have an effect on this asset. This site has not been subject to an ecology survey, so the exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on brownfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a positive effect on this Objective.	+
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	The development of this brownfield site could enable the re-use of existing buildings within the village. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.	+
13. To protect and enhance the character of towns / villages and other heritage and	• Deliver development that helps ensure the continued protection and enhancement of cultural	The site is within 400m of one grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of historical heritage assets and	-/?

SA Objective	Assessment Criteria - Does the site (OC003)...?	Commentary on likely nature of effects of site allocation	Overall assessment
archaeological assets along with their settings.	and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site is within 600m of Hulme Quarry SSSI and could increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Hulme has scope to have a positive effect on the vitality and viability of Hulme and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (OC003)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects: The development of brownfield, grade 4 ALC land is considered to have a positive effect, as could the site's accessibility to areas of open space and the proposed delivery of circa 6 dwellings. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to designated and historic assets are likely to have a negative effect.			

Table 12.277

Potentially suitable sites (5+ dwellings) - outside Infill Boundary

OC055

SA Objective	Assessment Criteria - Does the site (OC055)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure?	The site is on the edge of Cresswell and is outside of the infill boundary. The development of this site a greenfield site, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (OC055)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?		
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located within 800m of the village centre of Cresswell which has insufficient services and facilities to meet the needs of the community. It should be noted that Creswell does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide employees with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Cresswell does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	This site has been proposed for employment uses with regards to this assessment. Therefore the development would provide no housing. Overall, this site has been assessed as having a neutral effect on this Objective.	0
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion?	As noted previously, the site is within 800m of the village centre of Creswell and adjacent to the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m	+

SA Objective	Assessment Criteria - Does the site (OC055)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	Part of the site is located within flood zone 3. The development of this site could lead to an increase in waste water and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?	The site is more than 5,000m from Barlaston and Rough Close Common (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. This site has not been subject to an ecology survey, so the exact effects are uncertain.	+/?

SA Objective	Assessment Criteria - Does the site (OC055)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is more than 400m away from a listed asset. Although dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of this historical heritage assets. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?	The site would avoid development within 5,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Needwood and South	+

SA Objective	Assessment Criteria - Does the site (OC055)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	Derbyshire Clalyands National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed employment use of this site provides scope for the development of this site to have a positive effect on investment in culture and tourism within the town and wider district, however this is dependent on proposal specific information. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of an employment site within the village centre has the scope to have a positive effect on the vitality and viability of Cresswell and the wider District, as new employment could be expected to increase footfall in the nearby village centre. Overall, this site has been assessed as having a significant positive effect on this objective.	++
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The proposed development of an employment site within the village centre has the scope to have a positive effect on the vitality and viability of Cresswell and the wider District, as new employment could be expected to increase footfall in the nearby village centre. Overall, this site has been assessed as having a significant positive effect on this objective.	++
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is proximity to areas of existing local employment provision as well as new employment provision generated by this site. Overall, this site has been assessed as having a significant positive effect on this objective.	++
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (OC055)...?	Commentary on likely nature of effects of site allocation	Overall assessment
The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site is located away from designated and historic assets. However, the site is inaccessible to services and facilities, is partially within a flood zone which are both assessed to have a significant negative effect. The development of greenfield, grade 4 ALC land is considered to have a negative effect.			

Table 12.278

12.6 Gypsy and Traveller sites TR001-TR016

TR001: Land south of Uttoxeter Road, Blythe Bridge (BB021)

SA Objective	Assessment Criteria - Does the site (TR001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 1ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. Some industrial uses to SE/builders merchants to NW/ railway line to SW and housing to N and E. But site large enough to accommodate buffers as necessary, including from road (and also amenity internally between pitches). Site well screened from outside given surrounding uses. Overall, this site has been assessed as having a positive effect on this Objective	++
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located in the centre of the village, it is within 400m of the village centre and the range of services and facilities that can be found here that could serve prospective residents of the site. The site is in proximity to Blythe Bridge High School and Sixth Form. It should be noted that the current supply of educational and community services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 400m of a GP surgery. It should be noted that the current supply of health care services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.	++

SA Objective	Assessment Criteria - Does the site (TR001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward a minimum of 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	The site is within 400m of the village centre of Blythe Bridge and Forsbrook as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop and train station. Overall, this site has been assessed as having a positive effect on this Objective.	++
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. Overall, this site has been assessed as having a neutral impact on this Objective.	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk?	That part of the site located within a flood zone 2 and 3 area has been excluded, but there may be some remaining flood risk. The	--/?

SA Objective	Assessment Criteria - Does the site (TR001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to an increase in water demand within the District. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.	
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 3,000m from Barlaston and Rough Close Common (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. The Ecological Study (2015) notes that the site as a whole contains a fairly diverse mosaic of wet grassland, riparian habitat, unmanaged semi-improved grassland and pockets of willow scrub, adjacent to a large pond, which could potentially support populations of amphibians, reptiles, raptors, owls, ground nesting birds and foraging bats. It is also deemed that the site could potentially qualify as an SBI for its potential floral diversity. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as non-agricultural land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a positive effect on this Objective.	+
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (TR001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is more than 600m from a listed asset. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 3,000m of Barlaston and Rough Close Common (LNR). Given the location of the site, it is considered that there could be no effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver a minimum of 8 pitches and with good access to the village centre of Blythe Bridge and Forsbrook has scope to have a positive effect on the vitality and viability of Blythe Bridge and Forsbrook and the wider District, since new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver a minimum of 8 pitches however the opportunities for direct economic benefits would be limited. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (TR001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 500m of an existing area of employment within the village or District which could provide accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects: The site has the potential to bring forward a minimum of 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect, as is the accessibility of the site to services and facilities and public transport. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect, as could the site's location away from historic assets. The development of this approx 1ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However, there is scope that the site could be designated SBI land which would have a significant negative effect and there may be some remaining flood risk which is also likely to have a negative effect.			

Table 12.279

TR002: Land at 459 Uttoxeter Road, Blythe Bridge (BB087)

SA Objective	Assessment Criteria - Does the site (TR002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. Storage building adjacent to SW (SMD/2014/0342) approved as dwelling. Some other dwellings further west on Uttoxeter Road. But site large enough to accommodate buffers as necessary, including from road (and also amenity internally between pitches). Site is well screened from roadside. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is within 800m of the village centre and the range of services and facilities that can be found here that could serve prospective residents of the site. It should be noted that the current supply of educational and community services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.	+
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. It should be noted that the current supply of health care services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward a minimum of 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 800m of the village centre of Blythe Bridge and Forsbrook as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop and 1,000m of a train station. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (TR002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. However the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a neutral impact on this Objective.	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of a brownfield site could lead to an increase in wastewater, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a negative effect on this objective, although the exact effects are uncertain.	-/?
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 3,500m from Barlaston and Rough Close Common (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. The Ecological Study (2015) notes that the site consists of a working yard and its associated buildings with 76% of the site being hard standing. The remaining habitats present on site are particularly common in the UK and have low biodiversity value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/?
11. To safeguard the best and most versatile agricultural land; improve soil	• Help safeguard the best and most versatile agricultural land?	As noted, this site has been assessed as being on previously developed land so development of this site would not result in the	+

SA Objective	Assessment Criteria - Does the site (TR002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
and land resources; and protect and enhance geological resources.	• Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	loss of best and most versatile land. Overall, this site has been assessed as having a positive effect on this Objective.	
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 50m of one grade II listed asset. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the historical heritage assets and its setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 3,500m of Barlaston and Rough Close Common (LNR). Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.	0
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver a minimum of 8 pitches and with good access to the village centre of Blythe Bridge and Forsbrook has scope to have a positive effect on the vitality and viability of Blythe Bridge and Forsbrook and the wider District, since new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver a minimum of 8 pitches however the opportunities for direct economic benefits would be limited. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 500m of existing areas of employment within the village or District would could provide accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects: The site has the potential to bring forward a minimum of 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect as is the use of a plot currently given to hard-standing. The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However, the site's proximity to historic assets is likely to have a negative effect.

SA Objective	Assessment Criteria - Does the site (TR003)...?	Commentary on likely nature of effects of site allocation	Overall assessment
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 0.1ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity, although careful layout and design would need to be considered due to small site size. Site is adjacent to car repairs garage. Nearest dwelling approx 50m to east. Other dwellings to west are further away. Small site, limited opportunity to accommodate buffers, including from busy A521. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is around 1km of the village centre and the range of services and facilities that can be found here that could serve prospective residents of the site. Overall, this site has been assessed as having a neutral effect on this Objective.	0
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 1km of a GP surgery. It should be noted that the current supply of health care services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?	The site has the potential to bring forward approximately 6 pitches and contribute towards meeting the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR003)...?	Commentary on likely nature of effects of site allocation	Overall assessment
locations and including affordable / social /extra care housing.	• Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?		
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 1km of the village centre of Blythe Bridge and Forsbrook which should reduce the need to travel. Similarly, the site is within 500m of a bus stop and 1,500m of a train station. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. However the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a neutral impact on this Objective.	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (TR003)...?	Commentary on likely nature of effects of site allocation	Overall assessment
The site has the potential to bring forward approximately 6 pitches and make a contribution towards meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect as is the use of a previously developed plot, although it may entail the loss of an existing building. The development of this approx 0.1ha site is considered sufficient to provide for adequate on site facilities for parking, storage, play and residential amenity. However the potential displacement of a business and the site's proximity to historic assets are likely to have negative effects.			

Table 12.281

TR004: Disused premises north of Knights of Cheadle / south of A T Moss, off the Green / Dilhorne Road, Cheadle (CH020)

SA Objective	Assessment Criteria - Does the site (TR004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is mixed brownfield and greenfield and is largely surrounded by development on all four sides. The site is considered large enough to accommodate buffering in design layout, including internally between pitches, and from the main road to the south. It is not generally visible from the road and includes established foliage, in particular between dwellings on the west (Brookhouse Road) and along the eastern side. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located within the settlement boundary and is within 800m of the town centre and the wide range of key services and facilities that can be found here that could serve prospective residents of the site. It should be noted that the supply of community facilities and services is currently adequate but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. However, the site is more than 1,200m from a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a neutral effect on this Objective.	0
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward 6 - 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 800m of the town centre of Cheadle and in proximity to the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. However the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective	+

SA Objective	Assessment Criteria - Does the site (TR004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	Part of the site is located within a flood zone 3 area and, as such, it can be considered that the site would be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant negative effect on this objective.	--
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is over 1,500m from Cecilly Brook (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. The Ecological Study (2015) notes that the site itself has one building that is deemed to have potential to support roosting bats, noxious weeds and a range of 'brownfield' habitats albeit fairly species poor in terms of floral diversity. However the fairly large size of the site and the potential to support protected species warrants it being attributed some ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on brownfield and greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (TR004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	Use of the site may entail the loss of a building. Overall, this site has been assessed as having a negative effect on this Objective.	-
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is circa 600m away from a grade II historical heritage asset. Although dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of this historical heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.	0
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver 6 - 8 pitches and with good access to the town centre of Cheadle has scope to have a positive effect on the vitality and viability of Cheadle and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver 6 - 8 pitches however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
Summary of overall assessment and likely significant effects: The site has the potential to bring forward 6 - 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect, as is the site's proximity to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect, as could its location away from historic assets. The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However, the site is partly within a flood zone which is likely to have a significant negative effect. The potential ecological value of the site is also likely to have a negative effect.			

Table 12.282

TR005: Checkley Rose Cottage

SA Objective	Assessment Criteria - Does the site (TR005)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure?	The development of this approx 0.08ha site is not considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. There are a number of dwellings within 50m of the site. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (TR005)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?		
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site lies approx 650m from First School/playing fields (Checkley); 500m from Primary School (Upper Tean, via rights of way); another is about 1km (Upper Tean). Village Halls within 500m - 650m. Medical centre and shops in Upper Tean approx 2270m away. Further facilities and shops in Cheadle centre under 6km away. Churches/chapels at Fole/Lower Tean/Checkley/Upper Tean; pubs at Checkley/Lower Tean/Upper Tean. Overall, this site has been assessed as having a neutral effect on this Objective.	0
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. However, the site is more than 2km from a GP surgery. Overall, this site has been assessed as having a neutral effect on this Objective.	0
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward 3 pitches and contribute towards meeting the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 1km of a town or village centre which should reduce the need to travel. The site is on the 32 bus route (Hanley - Uttoxeter), with an hourly or better service and a bus stop is within 500m of the site. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR005)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. However the site is within 1km of the town/ village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.	-/i
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	There are no known biodiversity constraints. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land?	The site is not in current agricultural use so development for residential pitches is not expected to result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR005)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?		
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	Development of the site for pitches would not enable any re-use of existing buildings. However, there is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	Although dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of any heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	Proposal specific information is required to assess any impact on landscape character. Overall, this site has been assessed as having a neutral effect on this Objective, although the exact effects are uncertain.	0/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+

TR007: Fole Dairy, Uttoxeter Road, Fole

SA Objective	Assessment Criteria - Does the site (TR007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 2ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. Some existing housing is located within 20-30m of the boundary to the north of the site, however the site is well screened. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is adjacent to a Chapel. Further churches are at Checkley / Lower Tean /Upper Tean. First School / playing fields are under 1.5km to the west in Checkley; primary schools are in Upper Tean approx 3.9 - 4.4km away (via public rights of way). The village centre of Upper Tean with shops and facilities is also within around 4km. There are pubs at Checkley and Lower Tean. The site sits on the 32 bus route (Hanley - Uttoxeter), with an hourly or better service. There are bus stops near the site. In addition there are a range of shops and facilities in Uttoxeter centre within 6km. Overall,	-

SA Objective	Assessment Criteria - Does the site (TR007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		this site has been assessed as having a negative effect on this Objective.	
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. However, the site is more than 2km from a GP surgery. Overall, this site has been assessed as having a neutral effect on this Objective.	0
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward a minimum of 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is around 4km of a town or village centre which should have a limited role in helping to reduce the need to travel. The site is on the 32 bus route (Hanley - Uttoxeter), with an hourly or better service. Overall, this site has been assessed as having a negative effect on this Objective.	-
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. However the site is on a bus route and this may help to reduce the need to travel by car. Overall, this site has been assessed as having a neutral effect on this Objective	0

8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	The southern edge of the site is in flood zone 3 and is likely to be affected to some degree by flood risk. Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant negative effect on this objective, however the exact effects are uncertain.	--/i
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	There are no known biodiversity constraints however there is potential for bird nesting on site and for the existing building to support roosting bats. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	The site is an established "industrial" dairy premises in countryside consisting of largely hard standed areas within premises. Since the site is not in current agricultural use, development for pitches is not expected to result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a positive effect on this Objective.	+
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation?	Development of the site for pitches would not enable any re-use of existing buildings. However, there is scope that development	0

SA Objective	Assessment Criteria - Does the site (TR007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	There are listed buildings across the road, to the north and east; however the site is heavily screened. Although dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	Proposal specific information is required to assess any impact on landscape character. Overall, this site has been assessed as having a neutral effect on this Objective, although the exact effects are uncertain.	0/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver a minimum of 8 pitches and with access to a town / village centre has scope to have a positive effect on the vitality of the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver a minimum of 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 2km from existing areas of employment within the District and, as such, would not provide readily accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
Summary of overall assessment and likely significant effects: The site has the potential to bring forward a minimum of 8 pitches meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. The development of this approx 2ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However the southern edge of the site is in flood zone 3 and the site is likely to be affected to some degree by flood risk, this is likely to have a significant negative effect. Similarly the site's inaccessibility to services and facilities, including areas of existing employment, is also likely to have a negative effect, as is the site's proximity to historic assets.			

Table 12.285

TR008: Farm buildings / land west of 75 Uttoxeter Road , Blythe Bridge

SA Objective	Assessment Criteria - Does the site (TR008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure?	The development of this approx 0.7ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. Given the scale of site, it is considered large enough to accommodate buffering in design layout, including internally between pitches, and from the main road to the south. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?		
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is across the road from local shops. The Meir Park retail area is within 900m; Blythe Bridge centre with shops and facilities including a library is within1.3km. A primary school is 800m to the south-east; a high school with sixth form, a library and two further primary schools are within 2km to the east. Blythe Bridge railway station and a medical centre are within 1km. The site is within 500m of a bus stop. Bus service 6A between Blythe Bridge, Longton and Hanley passes the site every 20 minutes. Additional journeys on route 31 operate past the site every 2 hours between Cheadle, Blythe Bridge, Longton and Hanley. Overall, this site has been assessed as having a positive effect on this Objective.	+
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. The site is within 1km of a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward a minimum of 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms	• Offer opportunities to minimise impacts on existing traffic congestion?	As noted previously, the site is within 1km of a town or village centre which may help to reduce the need to travel. Bus service	+

SA Objective	Assessment Criteria - Does the site (TR008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
of transport and reduce the number of journeys made by car.	• Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	6A between Blythe Bridge, Longton and Hanley passes the site every 20 minutes. Overall, this site has been assessed as having a positive effect on this Objective.	
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. However the site is on a bus route and this may help to reduce the need to travel by car. Overall, this site has been assessed as having a neutral effect on this Objective	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.	-/i
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	There are no known biodiversity constraints. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i

SA Objective	Assessment Criteria - Does the site (TR008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	Whilst this site has been assessed as being greenfield, the land has also been assessed as non-agricultural land so development for pitches is not expected to result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a positive effect on this Objective.	+
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	Development of the site for pitches would not enable any re-use of existing buildings. However, there is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	Although dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	This is a greenfield site within the Green Belt and further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i

SA Objective	Assessment Criteria - Does the site (TR008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver a minimum of 8 pitches and with access to a town / village centre has scope to have a positive effect on the vitality of the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver a minimum of 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is around 1km from existing areas of employment within the District and, as such, could provide accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects: The site has the potential to bring forward a minimum of 8 pitches meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. The development of this approx 0.7ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The accessibility of the site to services and facilities, including areas of existing employment and public transport is likely to have a positive effect. However the location of this greenfield site within the Green Belt requires further assessment to identify any impact on landscape character.

The site is brownfield, mostly comprising hard standing with a single two-storey building so development for pitches is not expected to result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a positive effect on this Objective.	+
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation?	Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development	0

SA Objective	Assessment Criteria - Does the site (TR010)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	Although dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	This is a brownfield site within the Green Belt and further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver 6 - 8 pitches but lacks good access to a town / village centre, however there is some scope to have a positive effect on the vitality of the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (TR010)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver 6 - 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 2km from existing areas of employment within the District and, as such, would not provide readily accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
Summary of overall assessment and likely significant effects: The site has the potential to bring forward 6 - 8 pitches, making a contribution to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.2ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However the location of this brownfield site within the Green Belt requires further assessment to identify any impact on landscape character. Similarly the site's inaccessibility to services and facilities, including areas of existing employment, is also likely to have a negative effect.

SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure?	The development of this approx 1.2ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. Overall, this site has been assessed as having a positive effect on this Objective.	++

SA Objective	Assessment Criteria - Does the site (TR011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?		
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is within 1km of a village centre to the east with a range of facilities including shops, pubs, medical centre, village hall, petrol station and a recreation ground. Two primary schools and a church are within 1.5km. Cheadle centre and Blythe Bridge centre are both within 4.5km. There are no direct bus routes along this stretch of Draycott Road - however the 32 bus route (Hanley - Uttoxeter) passes through Upper Tean, with an hourly service or better; and Draycott village to the west is on the 12 bus route (Fulford - Longton -Stone, with less than an hourly service. Overall, this site has been assessed as having a neutral to negative effect on this Objective.	0/-
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. The site is within 1km of a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward a minimum of 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms	• Offer opportunities to minimise impacts on existing traffic congestion?	As noted previously, the site is within 1km of a town or village centre which may help to reduce the need to travel. However	-

SA Objective	Assessment Criteria - Does the site (TR011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
of transport and reduce the number of journeys made by car.	• Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	there are no direct bus routes along this stretch of Draycott Road - although the 32 bus route (Hanley - Uttoxeter) passes through Upper Tean, with an hourly service or better. Overall, this site has been assessed as having a negative effect on this Objective.	
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. However the site is on a bus route and this may help to reduce the need to travel by car. Overall, this site has been assessed as having a neutral effect on this Objective	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	A small area at the northern boundary of the site is in flood zone 3 and the site is likely to be affected to some degree by flood risk. Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant negative effect on this objective, however the exact effects are uncertain.	--/i
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	There are no known biodiversity constraints. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i

SA Objective	Assessment Criteria - Does the site (TR011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	This site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development for pitches is not expected to result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	Although dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	Proposal specific information is required to assess any impact on landscape character. Overall, this site has been assessed as having a neutral effect on this Objective, although the exact effects are uncertain.	0/i

SA Objective	Assessment Criteria - Does the site (TR011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver a minimum of 8 pitches and being within reasonable proximity (1km) to a town / village centre, has scope to have a positive effect on the vitality of the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver a minimum of 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 2km from existing areas of employment within the District and, as such, would not provide readily accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
Summary of overall assessment and likely significant effects: The site has the potential to bring forward a minimum of 8 pitches, meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. The development of this approx 1.2ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. Whilst the site is within 1km of a village centre with some facilities and this is considered to have a positive effect, a lack of access to public transport and the site's inaccessibility to areas of existing employment are likely to have a negative effect. A small area at the northern boundary of the site is in flood zone 3 and the site is likely to be affected to some degree by flood risk, this is likely to have a significant negative effect.

8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	A small part to the west of the site is in Flood Zone 3 and the site is likely to be affected to some degree by flood risk. Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant negative effect on this objective, however the exact effects are uncertain.	--/i
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	There are no known biodiversity constraints however areas of the site are heavily wooded. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	This site has been assessed as being on greenfield land. However, it is considered that the site is used as overflow parking for the industrial units to the south, so development for pitches is not expected to result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a positive effect on this Objective.	+
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation?	Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development	0

SA Objective	Assessment Criteria - Does the site (TR013)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	could use sustainable materials. There is a mining history on the site. Overall, this site has been assessed as having a neutral effect on this Objective.	
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	Although dependent on proposal specific information, there is little scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	This is a greenfield site within the Green Belt and further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver 6 - 8 pitches and with access to a town / village centre, has scope to have a positive effect on the vitality of the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR013)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver 6 - 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is adjacent to an existing area of employment within the District and, as such, would provide readily accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects: The site has the potential to bring forward 6 - 8 pitches, contributing towards meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site's accessibility to an area of existing employment is likely to have a positive effect. However part of the site to the west is within flood zone 3 and the site is likely to be affected to some degree by flood risk and this is likely to have a significant negative effect. Also the site's inaccessibility to services and facilities is likely to have a negative effect, as is the presence of mature trees. In addition, the location of this greenfield site within the Green Belt requires further assessment to identify any impact on landscape character.

SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure?	The development of this approx 0.7ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is large enough to allow for separation between pitches. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR014)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?		
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is within 1.5km of a village centre with a range of facilities including shops, pubs, medical centre, village hall, petrol station and recreation ground. Cheadle centre is within 5km and Blythe Bridge centre within 4.5km. However there are no direct bus routes along this stretch of Draycott Road. Overall, this site has been assessed as having a negative effect on this Objective.	0/-
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. The site is within 2km of a GP surgery. Overall, this site has been assessed as having a neutral effect on this Objective.	0
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward 6 - 8 pitches making a contribution to meeting the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 1.5km of a village centre which may help to reduce the need to travel. However there are no direct bus routes along this stretch of Draycott Road. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (TR014)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. However the site is not on a bus route and this may lead to an increase in the need to travel by car. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.	-/i
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	There are no known biodiversity constraints however the eastern boundary of the site includes mature trees. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land?	This site has been assessed as being on greenfield land. The site is also considered to be classified as Grade 3 Agricultural Land and so further work is necessary to determine whether development for pitches may result in the loss of best and most	--/i

SA Objective	Assessment Criteria - Does the site (TR014)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	versatile agricultural land. Overall, this site has been assessed as having a potentially significant negative effect on this Objective.	
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	Although dependent on proposal specific information, there is little scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	This is a greenfield site in open countryside with potential for visual intrusion. Further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+

TR016: Former Timber Yard off Draycott Cross Road, Cheadle

SA Objective	Assessment Criteria - Does the site (TR016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 0.3ha site is considered sufficient to provide for adequate on site facilities for parking, storage, play and residential amenity. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is within 3km of Cheadle town centre with its shops, hospital, library, medical centre and primary / secondary / 6th form schools. The site is around 1km from bus route 31 with a less than hourly service. A more regular bus route (32) passes through Cheadle town centre. Overall, this site has been assessed as having a significant negative effect on this Objective.	--

SA Objective	Assessment Criteria - Does the site (TR016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. The site is within 3km of a GP surgery. Overall, this site has been assessed as having a neutral effect on this Objective.	0
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward 6 - 8 pitches making a contribution to meeting the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is relatively distant from Cheadle (within 3km of the town centre) and relatively isolated from the public transport network. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. However the site is relatively distant from a town or village centre and not on a bus route and this may lead to an increase in the need to travel by car. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (TR016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.	-/i
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	There are no known biodiversity constraints. A Biodiversity Alert Site is within 100m to the south. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	This site has been assessed as being previously developed land (former timber yard) and so development for pitches is not expected to result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a positive effect on this Objective.	+
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation?	There are buildings on site. Development of the site for pitches may not enable any re-use of existing buildings. However, there	0

SA Objective	Assessment Criteria - Does the site (TR016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	Although dependent on proposal specific information, there is little scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	This is a brownfield site in the Green Belt. Further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver around 6 pitches and with limited access to a town / village centre, has little scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (TR016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	Development for pitches would lead to the loss of employment land. The site could deliver 6 - 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a negative effect on this Objective.	-
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 100m of an existing area of employment within the District and, as such, would provide readily accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects: The site has the potential to bring forward 6 - 8 pitches, contributing towards meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.3ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is close to an area of existing employment and its development is not expected to result in the loss of best and most versatile agricultural land, and these are likely to have positive effects. However the site's inaccessibility to services and facilities and isolation from the public transport network are likely to have a significant negative effect. Development for pitches would lead to the loss of employment land and this is also likely to have a negative effect. In addition, the location of this brownfield site in the Green Belt requires further assessment to identify any impact on landscape character.

SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 0.8ha site is considered sufficient to provide for adequate on site facilities for parking, storage, play and residential amenity. Overall, this site has been assessed as having a significant positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	Site about 1km from edge of town centre (shops, medical centre, library etc within 1- 1.4km); hospital approx 1.6km from site. A number of schools (primary/secondary/6th form) within 750 - 2300m south. Rec ground under 1km east. No bus route passes site, but numerous bus services are available from town centre, including frequent Hanley-Uttoxeter (via Kingsley) no. 32 route; and less frequent routes to Stoke, Leek (via Froghall, via Cauldon) etc. Nearest bus stop 700m south. Within 500m to JCB factory on A522. Overall, this site has been assessed as having a positive effect on this Objective as it is in close proximity to a employment source,school and recreation ground with access to bus services.	+
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles?	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. The site is within 1.5km of a GP surgery. Overall, this	0

SA Objective	Assessment Criteria - Does the site (TR017)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	site has been assessed as having a neutral effect on this Objective.	
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 1km - 1.4 of Cheadle town with the nearest bus stop being approximately 700m from the site. Overall, this site has been assessed as having a negative effect on this Objective.	0/-
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

SA Objective	Assessment Criteria - Does the site (TR017)...?	Commentary on likely nature of effects of site allocation	Overall assessment
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.	-/i
10. As noted previously, the site is within 2km of Cheadle town centre and has a limited access to bus services. Overall, this site has been assessed as having a neutral effect on this Objective.	0
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?	The eastern portion of the site is in flood zone 2 / 3 and is likely to be affected to some degree by flood risk. Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this.	--/i

SA Objective	Assessment Criteria - Does the site (TR019)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	Overall, this site has been assessed as having a significant negative effect on this objective, however the exact effects are uncertain.	
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	There are no known biodiversity constraints. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	This site has been assessed as mixed greenfield / brownfield and is considered to have an ALC classification of 4 so development for pitches may not result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	There is a two storey, possibly commercial unit on site. Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and	Although dependent on proposal specific information, there is little scope that development of this site could lead to the deterioration or enhancement of a heritage asset and/or it's setting. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i

SA Objective	Assessment Criteria - Does the site (TR019)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	maintain and strengthen local distinctiveness and sense of place?		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	This is a largely greenfield site in the Green Belt. Further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver a minimum of 8 pitches and with access to a town centre, has scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver a minimum of 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 2km of a town centre and as such, would provide limited accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a neutral effect on this Objective.	0
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (TR019)...?	Commentary on likely nature of effects of site allocation	Overall assessment
The site has the potential to bring forward a minimum of 8 pitches, meeting the identified housing needs of the Gypsy and Traveller communities, and this is considered to have a positive effect. The development of this approx 2.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. There are no known biodiversity or heritage constraints (although there are some mature trees on site) and this is also considered to have a positive effect. However the eastern portion of the site is in flood zone 2 / 3 and the site is likely to be affected to some degree by flood risk, this is likely to have a significant negative effect. In addition, the location of this largely greenfield site in the Green Belt requires further assessment to identify any impact on landscape character.			

Table 12.297

TR020: Land between "Serendipity" and Bank House Farm, Leek Road, nr Weston Coyney

SA Objective	Assessment Criteria - Does the site (TR020)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 0.4ha site is considered sufficient to provide for adequate on site facilities for parking, storage, play and residential amenity. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	Weston Coyney centre 3.2 - 3.9km to S (infants/junior/primary schools, shops, church, pub). Meir centre has wider range of shops and facilities including medical centre and supermarkets, 1.4 - 1.8km further S. Werrington centre (primary school/ medical centre/shops/library) around 3.2km NW (Werrington High School and some other commercial premises at Cellarhead) within 1.6km N. Wetley Rocks centre (primary school/shop/church/pub) within 3.2km N. Shukers Farm shop and sports pitches around 1km SW. The A520 is not served by a bus route at all in between	0

SA Objective	Assessment Criteria - Does the site (TR020)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		Cellarhead and Weston Coyney. However the frequent Hanley-Kingsley-Cheadle-Uttoxeter no. 32 route passes the Cellarhead crossroads under 400m N; there also appears to be a regular service in between Cellarhead and Wetley Rocks onto Leek. There are bus stops at this crossroads. There also numerous services through Meir. Overall, this site has been assessed as having a neutral effect on this Objective.	
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. The site is over 1.2km of a GP surgery. Overall, this site has been assessed as having a neutral effect on this Objective.	0
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward a minimum of 8 pitches and help to meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL

The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. The site is over 1.2km of a GP surgery. Overall, this site has been assessed as having a neutral effect on this Objective.	0
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward a minimum of 8 pitches and help to meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is close to bus services. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR022)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.	-/i
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	There are no known biodiversity constraints. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land?	This site has been assessed as greenfield and is considered to have an ALC classification of 4 so development for pitches may not result in the loss of best and most versatile agricultural land.	-

SA Objective	Assessment Criteria - Does the site (TR022)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	Overall, this site has been assessed as having a neutral effect on this Objective.	
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	Although dependent on proposal specific information, there is little scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	This is a greenfield site in the Green Belt. Further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR022)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver a minimum of 8 pitches and with access to a town centre, has scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver a minimum of 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 3km of a town centre and there are bus services and as such, would provide limited accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a neutral effect on this Objective.	0
Summary of overall assessment and likely significant effects: The site has the potential to bring forward 6 - 8 pitches and contribute to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. There are no known biodiversity or heritage constraints and this is also considered to have a neutral effect. However the site's relative inaccessibility to services and facilities, including areas of existing employment opportunities is likely to result in a negative effect. In addition, the location of this greenfield site in the Green Belt requires further assessment to identify any impact on landscape character.

TR023: Land at Anzio Camp, Buxton Road, Blackshaw Moor

SA Objective	Assessment Criteria - Does the site (TR023)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			

SA Objective	Assessment Criteria - Does the site (TR023)...?	Commentary on likely nature of effects of site allocation	Overall assessment
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 1.25ha site is considered sufficient to provide for adequate on site facilities for parking, storage, play and residential amenity. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	Parcels are approx 720 - 920m from centre of smaller village Blackshaw Moor to N, which contains a pub/hotel, and primary school (playing fields). Smaller village Meerbrook (pub,village hall, church) approx 3.4km W. NE of Leek (Haregate area) is 2-2.3km S (supermarkets, shops, First-/High-/Special- schools, community centre, pubs, rec grounds are all within 3.5km); the town centre is within 3.2 - 4.3km (further shops, schools, supermarkets, medical centres, churches, bus station etc). One bus route (X15 Leek - Buxton) passes site but less than hourly service. No service to Meerbrook. Bus stops at Blackshaw Moor. Overall, this site has been assessed as having a positive effect on this Objective as it is just under 1000m from the Blackshaw Moorbut some distance from larger centres.	+
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. The site is over 1.2km of a GP surgery. Overall, this site has been assessed as having a neutral effect on this Objective	0

8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk?	Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has	-/i

SA Objective	Assessment Criteria - Does the site (TR023)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	been assessed as having a negative effect on this objective, however the exact effects are uncertain.	
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is adjacent to an SBI and further assessment is required to identify any effects and potential mitigation measures. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	This site is mainly brownfield and not in agricultural use. Overall, this site has been assessed as having a neutral effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	The site is a former camp with derelict buildings. Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic	There is a small listed milestone near the A53 entrance. Although dependent on proposal specific	0/i

SA Objective	Assessment Criteria - Does the site (TR023)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	information, there is little scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are unknown.	
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	Further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a neutral effect on this Objective, although the exact effects are uncertain.	0/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver a minimum of 8 pitches and with access to a town centre, has scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver a minimum of 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (TR023)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is close to Blackshaw Moor and there are bus services to Leek, as such, would provide accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects: The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approximately 1.25ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is close to Blackshaw Moor which has limited services/facilities with services/facilities in Leek being over 3km. There is a bus services. Overall this is considered to have positive impact. The site is adjacent to an SBI and and there is a small listed milestone near the site this is considered to have a negative impact although the exact effects are uncertain.

and land resources; and protect and enhance geological resources.	• Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	not result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a negative effect on this Objective.	
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	There are listed buildings close to the site. Although dependent on proposal specific information, there is little scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	This is a brownfield site in the Green Belt. Further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR024)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver a minimum of 8 pitches and with access to a town centre, has scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is close to employment opportunities and has bus services to the wider area as such, would provide accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects: This is a small site with existing trees which may not be able to provide a total of 8 pitches this is a negative impact. It is close to services/facilities and a bus stop and this is a positive impact. There trees on the site and some buildings with a potential to support nesting birds this is considered to be a negative impact. . The site's development could result in the loss of best and most versatile agricultural land and this is likely to result in a negative effect. In addition, the location of this site in the Green Belt requires further assessment to identify any impact on landscape character.

SA Objective	Assessment Criteria - Does the site (TR025)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 0.43ha site is considered sufficient to provide for adequate on site facilities for parking, storage, play and residential amenity. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is within 620m of the centre of Werrington which has a range of services including shops, medical centre Village Hall, library and Primary School. The recreation grounds are slightly further from the site. A High School and further shops and pubs lie within 2.3km within the village. There are regular bus routes along Ash Bank Road (no. 16 Hanley-Werrington_Leek and no. 32 Hanley-Cheadle_Uttoexter) and less frequent routes to the other parts of the District. The bus stops are in Werrington town centre. Overall, this site has been assessed as having a positive effect on this Objective.	+
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. The site is within 640m of a GP surgery. Overall, this site has been assessed as having a significant positive effect on this Objective.	++

SA Objective	Assessment Criteria - Does the site (TR025)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward a minimum of 8 pitches and help to meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 640m of the village centre of Werrington as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 1000m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

SA Objective	Assessment Criteria - Does the site (TR025)...?	Commentary on likely nature of effects of site allocation	Overall assessment
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	The site is not within flood zone 3. Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.	-/i
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	There are no known biodiversity constraints, however it is a mixed greenfield/brownfield site with some buildings and could provide opportunities for roosting bats/owls or nesting birds. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	This site has been assessed as a mixed brownfiled/greenfield site and is not in agricultural use so development for pitches may not result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a neutral effect on this Objective.	0
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic	Although dependent on proposal specific information, there is little scope that development of this site could lead to the	0/i

SA Objective	Assessment Criteria - Does the site (TR025)...?	Commentary on likely nature of effects of site allocation	Overall assessment
heritage and archaeological assets along with their settings.	heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	This is a mixed brownfield/greenfield site in the Green Belt. Further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver a minimum of 8 pitches and with access to a town centre, has scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver a minimum of 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	● Help meet the employment needs of local people? ● Help increase economic activity levels?	The site is within 620m of a village centre and as such, would have access to some employment opportunities for prospective	+

SA Objective	Assessment Criteria - Does the site (TR025)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Improve physical accessibility to jobs? • Support higher income levels for local residents?	residents. Overall, this site has been assessed as having a positive effect on this Objective.	
Summary of overall assessment and likely significant effects: The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.4ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. It is in close proximity to Werrington centre which has a range of services/facilities access to bus services which is a positive impact There are no known heritage or biodiversity constraints and but some of the buildings on the site may have potential to support nesting birds the impact on these is therefore neutral although the exact impact is unknown. The site is a mix of brownfield and greenfield and is not in agricultural use. It is in the Green Belt and would not lead to a loss of agricultural land. The location of this site in the Green Belt requires further assessment to identify any impact on landscape character.

The development of this approx 0.19ha site is considered insufficient to provide for adequate on site facilities for parking, storage, play and residential amenity for the number of pitches required in the Preferred Options consultation. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is adjacent to Draycott College and playing field. Medical centre, village hall and playing field are within 1.5km-1.6km. Blythe Bridge centre with shops, High School/6th Form and facilities is under 2km. There are 2 primary schools within 2.2km and Blythe Bridge railway station is approximately 2.4km.Forsbrook village centre is about 1.6km W (shops,chapel, pubs). Bus stop for regular 6A Hanley/Longton/Meir/Blythe Bridge route is about 1.56m (less frequent Fulford - Longton - Stone route 12 also stops here). There also a number of bus stops along the Uttoxeter Rd at Draycott. Overall, this site has been assessed as having a neutral effect on this Objective.	0
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The site is adjacent to playing fields and countryside and is within 1.5km -1.6km of a Medical Centre. The location of this site should provide residents with good access to the playing fields and open countryside and help to support healthy lifestyles. Overall, this site has been assessed as having a neutral effect on this Objective.	0
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?	The site has the potential to bring forward some but not all the pitches and help to meet the identified housing needs of the Gypsy	+

SA Objective	Assessment Criteria - Does the site (TR028)...?	Commentary on likely nature of effects of site allocation	Overall assessment
locations and including affordable / social /extra care housing.	• Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 1.5km-1.6km of village centres of Blythe Bridge and Forsbrook and a bus route and 2.4km from Blythe Bridge train station. There are almost continuous pavements along Uttoxeter Rd (on at least one side of road) between Blythe Bridge Draycott/Upper Tean/Fole; and to north to Freehay and Cheadle.Overall, this site has been assessed as having a neutral effect on this Objective.	0
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?	The site is not within flood zone 3. Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.	-/i

SA Objective	Assessment Criteria - Does the site (TR028)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?		
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	There are no known biodiversity constraints, site is poor semi improved grassland. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	This site is not in agricultural use so development for pitches may not result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a neutral effect on this Objective.	0
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and	Although dependent on proposal specific information, there is little scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i

SA Objective	Assessment Criteria - Does the site (TR028)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	maintain and strengthen local distinctiveness and sense of place?		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	This site is part of the disused used Special School which is in the Green Belt. Further assessment is required to identify any impact on landscape character. It is relatively well related to the existing adjacent development. Overall, this site has been assessed as having a neutral effect on this Objective, although the exact effects are uncertain.	0/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver pitches and with access to a village centre, has scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 1.5km-1.6km of local centres and as such, would not provide readily accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative/neutral effect on this Objective.	-/0
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (TR028)...?	Commentary on likely nature of effects of site allocation	Overall assessment
This is a small site which has the potential to bring forward some pitches but not all the pitches required to meet the identified needs of the Gypsy and Traveller communities and this is considered to have a negative effect. It is approximately 1.5km form Blythe Bridge which has a range of services/facilities employment access to bus services which is a neutral impact. There are no known biodiversity or heritage constraints, and the site are not in agricultural use would not lead to a loss of agricultural land.

TR029 Land between 11 Whiston Eaves Lane and children's play area Whiston

SA Objective	Assessment Criteria - Does the site (TR029)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 0.81ha site is considered sufficient to provide for adequate on site facilities for parking, storage, play and residential amenity. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	There are some facilities in Whiston. There is a play area and village hall immediately adjacent to the site. Churches and Whiston Hall and accommodation/ golf course on edges of village (within 600m). There is also a petrol station and pub in village which has been approved for other uses. However most services and facilities are some distance from the site. Froghall village around 2km distance with a pub and industrial works. Oakamoor is within 3.4km with facilities (shop, pubs, village hall, church). Kingsley Holt is within 3.7km (church,pub,rec ground) Kingsley is within a similar distance (village hall, primary school, playing fields, pub, shop).	0

SA Objective	Assessment Criteria - Does the site (TR029)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		There is an infrequent bus route (no 31) serving Whiston via A52. Overall, this site has been assessed as having a neutral effect on this Objective.	
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the open countryside which would help to support healthy lifestyles however it is distant from healthcare facilities. Overall, this site has been assessed as having a neutral effect on this Objective.	0
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward a minimum of 8 pitches and help to meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, there are some services in Whiston and some in the nearby settlements overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (TR029)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?		
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	The site is not within flood zone 3. Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.	-/i
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	There are no known biodiversity constraints, the site is species poor semi improved grassland/hedgerows with scattered trees with fairly good connections to the wider countryside. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability?	This site has been assessed as greenfield and is considered to have an ALC classification of 4 so development for pitches may not result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (TR029)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?		
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	Although dependent on proposal specific information, there is little scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	This is a greenfield site. Further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			

SA Objective	Assessment Criteria - Does the site (TR029)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver a minimum of 8 pitches and with access to a village centre, has scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver 6 - 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is close to some employment opportunities and has bus services to the wider area as such, would provide limited accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a neutral effect on this Objective.	0
Summary of overall assessment and likely significant effects: The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.8ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The are some services/facilities in Whiston with a larger range of services/facilities in the nearby centres at Froghall, Oakamoor and Kingsley between 2-3.7km. Access to employment nearby is limited. There is a limited bus service. Overall this has been assessed as having a neutral impact. There are no known biodiversity constraints

SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 1.01ha site is considered sufficient to provide for adequate on site facilities for parking, storage, play and residential amenity. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment,	The site is adjacent to Country Park and golf course adjacent. Barnfields industrial estate is within 500m; Morrisons/B&M Homestore/petrol station and the Wallbridge precint shops are within approximately 1km; Leek town centre with a range of shops, supermarkets, bus station, community hall, churches, medical centres, college is within 1.45km-2.6km. Schools (first-, primary, middle, high- and special- within 0.9km - 3.5km. There are regular bus routes (such as no. 18 Hanley - Leek around 3 buses/hour) along A53; connections to other bus routes at Leek bus station (eg to Cheadle-Uttoxeter).	+

SA Objective	Assessment Criteria - Does the site (TR031)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	shopping and other key services and facilities.	Other less frequent bus routes also from Leek to other parts of the District. Bus stops adjacent to site. Overall, this site has been assessed as having a positive effect on this Objective.	
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the playing fields and open countryside and help to support healthy lifestyles. The site is within 1km of the town centre which has GP surgeries. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring a minimum of 8 pitches and help to meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	The site is 500m from Barnfields industrial estate, 1km from Morrsons/B & M Homestore/petrol station and 1.45km-2.6km of Leek town centre. There is a regular and frequent bus service along the A53 with bus stops close to the site. There are continuous pavements to Leek centre and to Longson along the A53, more intermittent between Longson and Endon. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (TR031)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	The site is partially within flood zone 3 but. Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.	-/i
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	There are no known biodiversity constraints, however the site is adjacent to a County Park and Caldon Canal, it is 15% planted broadleaved woodland. It is unlikely that the site would support protected species but great crested newts have been recorded adjacent to the site. The edge of the site may have some ecological value. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i

SA Objective	Assessment Criteria - Does the site (TR031)...?	Commentary on likely nature of effects of site allocation	Overall assessment
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	This site is previously developed and is not in agricultural use so development for pitches may not result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a neutral effect on this Objective.	0
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	Although dependent on proposal specific information, there is little scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	This is a brownfield site within the built up area. Further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	0/i

SA Objective	Assessment Criteria - Does the site (TR031)...?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver a minimum of 8 pitches and with access to a town centre, has scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver a minimum of 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 500m of an industrial estate1km of a town centre and as such, would provide readily accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects: The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 1ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is relatively close to Leek with a range of services /facilities access to public transport and employment opportunities and this is assessed as a positive impact. There are no known heritage or biodiversity constraints on the site but it is next to the Country Park which has biodiversity value.

SA Objective	Assessment Criteria - Does the site (TR032)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 8.13ha site is considered sufficient to provide for adequate on site facilities for parking, storage, play and residential amenity. Overall, this site has been assessed as having a significant positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is approximately 3.1-4km from Leek town centre which has a range of shops and facilities. The Barnfields industrial area and supermarket are within 3.3km on foot, schools are 2.4km-5.2km. Cheddleton which is within 3.4km-3.7km has a some facilities (shops, first school,village hall, pubs, churches and playing fields). There is an infrequent bus service around Leekbrook - the circular 116, the 16 route Leek-Cheddleton_Werrington -Hanley passes through Leekbrook but the stop is approximately 1930m distant. Overall, this site has been assessed as having a negative effect on this Objective.	-
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. However the site is more than 1200m from a GPs surgery. Overall, this site has been assessed as having a neutral effect on this Objective.	0
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i

SA Objective	Assessment Criteria - Does the site (TR032)...?	Commentary on likely nature of effects of site allocation	Overall assessment
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring a minimum of 8 pitches and help to meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is distant the nearest settlements - Leek and Cheddleton - with limited public transport. Overall, this site has been assessed as having a positive effect on this Objective.	-
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?	Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.	-/i

	maintain and strengthen local distinctiveness and sense of place?		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	This is a greenfield site. Further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The site could deliver a minimum of 8 pitches and with access to a village centre, has scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The site could deliver a minimum of 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 5km of a town centre and as such, would not provide readily accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (TR032)...?	Commentary on likely nature of effects of site allocation	Overall assessment
This is a large site which has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 8.13ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is some distance from to Leek/Cheddleton and services/facilities and employment opportunities, there is a bus but not in close proximity to the site. This is considered to have a negative impact. It has biodiversity importance most of it being within a SBI. In addition, the location of this greenfield site requires further assessment to identify any impact on landscape character.			

Table 12.310

TR033 Triangular field by Old Quarry Works Uttoxeter Road Blythe Bridge

SA Objective	Assessment Criteria - Does the site (TR033)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this approx 0.44ha site is considered sufficient to provide for adequate on site facilities for parking, storage, play and residential amenity. Overall, this site has been assessed as having a significant positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	Bus services from Blythe Bridge to Longton & Hanley bus stop 500m from site.Services to Fulford Stallington & Longton bus stop 700m. Blythe Bridge close by within approx 650m village hall medical centre & playing fields. Approx 1km distance is shops library & schools. Railway station 1.4km Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR033)...?	Commentary on likely nature of effects of site allocation	Overall assessment
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the playing fields and open countryside and help to support healthy lifestyles. The site is within 650m of a medical centre. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	The site has the potential to bring forward a minimum of 8 pitches and help to meet the identified housing needs of the Gypsy and Traveller communities. SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this greenfield site could be expected to have an effect on the Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Leekbrook does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide employees with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Leekbrook does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could	+

SA Objective	Assessment Criteria - Does the site (ADD09)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	This site has been proposed for employment uses with regards to this assessment. Therefore the development would provide no housing. Overall, this site has been assessed as having a neutral effect on this Objective.	0
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 400m of the village centre of Leekbrook as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?	The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant neutral effect on this objective.	0

SA Objective	Assessment Criteria - Does the site (ADD09)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?		
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is within 1,000m of Combes Valley SSSI, the nearest designated asset, and, as such, is considered to have a potential effect on this asset. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. Further ecological study should be undertaken.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been indicated on Natural England's predictive map of Best and Most Versatile land as having a "Moderate" (20 - 60% area bmv) of being predictive BMV land so development of this site may result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and	The site is within 400m from one grade II listed asset. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?

SA Objective	Assessment Criteria - Does the site (ADD09)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	maintain and strengthen local distinctiveness and sense of place?		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be within 1,000m from Combes Valley SSSI and could increase external pressures on this site. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed employment use of this site provides scope for the development of this site to have a positive effect on investment in culture and tourism within the town and wider district, however this is dependent on proposal specific information. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of an employment site close to the village centre has the scope to have a positive effect on the vitality and viability of Leekbrook and the wider District, as new employment could be expected to increase footfall in the nearby town centre. Overall, this site has been assessed as having a significant positive effect on this objective.	++
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Leekbrook as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.	++
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is close to areas of proposed and existing local employment provision as well as new employment provision generated by this site. Overall, this site has been assessed as having a significant positive effect on this objective.	++

SA Objective	Assessment Criteria - Does the site (ADD09)...?	Commentary on likely nature of effects of site allocation	Overall assessment
Summary of overall assessment and likely significant effects: The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. The site's accessibility to open space is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities which is likely to have a significant negative effect. The development of greenfield, potentially BMV land, is assessed as being a negative effect, as could the site's proximity to historic assets.			

Table 12.312

LE154 Adams Foods

SA Objective	Assessment Criteria - Does the site (LE154)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	As the site is located on the edge of the town centre of Leek it could be considered that the redevelopment of this previously developed site could make a positive contribution to the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	Given the edge of town centre location of this site, it can be considered that the site would be in relatively proximity to a wide range of key services and facilities. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (LE154)...?	Commentary on likely nature of effects of site allocation	Overall assessment
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The site is within 800m of a GP surgery and a number of areas of open space within the town. The residential development of this should also have a positive effect on health, as would the nearby open space area to the east of the site. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 60 dwellings and could contribute to meeting the housing need of the District. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	The town centre location of this site means that it is within 500m of a number of bus stops as well as a range of other services and facilities. It could be considered that The site could have a positive effect on walking and cycling given the proximity of open space to the site. Overall, the site has been assessed as having a positive effect on this objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.	++

SA Objective	Assessment Criteria - Does the site (LE154)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?		
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is over 500m away from Brough Park Fields (LNR) and, as such, is considered to have no effect on this asset. There are areas of mature woodland in the west of the site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability?	The site has been assessed as being a brownfield site, similarly it is classified as urban ALC land. As such, the development of this site could avoid the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a significant positive effect on this Objective.	++

SA Objective	Assessment Criteria - Does the site (LE154)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?		
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.	+
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 400m of one grade II listed asset. It is considered that the development of this site might affect the setting of this asset. It should be noted that the site is within 400m of Leek Conservation Area which has been placed on the Heritage at Risk register by Historic England. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact upon the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	Given the proposed employment use of this site and its location, there is scope that the site could support opportunities for investment in culture and tourism and should have a positive effect on the local economy. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this objective.	+
ECONOMIC			

SA Objective	Assessment Criteria - Does the site (LE154)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed loss of an employment site within the town centre has the scope to have a negative effect on the vitality and viability of Leek and the wider District. Overall, this site has been assessed as having a negative effect on this objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site and the proposed loss of employment use of the site could be considered to have a negative effect on businesses and the residents of Leek. Overall, this has been assessed as having a significant negative effect on this Objective.	--
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	Development of the site for residential use would result in the loss of an area of potential employment within the town. Overall, this site has been assessed as having a negative effect on this Objective.	-
Summary of overall assessment and likely significant effects: The proposed delivery of circa 60 dwellings is considered to have a significant positive effect, as is avoidance of the loss of best and most versatile agricultural land and the edge of town centre location. However, the site's proximity to historic assets and mature woodland is likely to have a negative effect, as is the loss of potential employment use.			

Table 12.313

LE138 Land at Macclesfield Road

SA Objective	Assessment Criteria - Does the site(LE138)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			

SA Objective	Assessment Criteria - Does the site(LE138)...?	Commentary on likely nature of effects of site allocation	Overall assessment
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The site is outside the current settlement boundary of Leek. The development of this site, a greenfield site that is not well related to the existing town could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	As noted, the site is 500 metres by road from the existing town boundary with the Cricket Club separating the two. The site is more than 1,200m away from the town centre which could result in existing services and facilities being inaccessible. Overall, this site has been assessed as having a negative effect on this Objective.	-
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. However, the site is in excess of 1,200m of a GP surgery. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a neutral effect on this Objective.	0
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site(LE138)...?	Commentary on likely nature of effects of site allocation	Overall assessment
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of the registered area of this site, it is considered that the site could accommodate circa 25 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is further than 1,200m of the town centre of Leek, which could be expected to increase the need to travel within the town. However, it is adjacent to the open countryside. Similarly, the site is on the A523 which has a number of bus stops and services serving it. Overall, this site has been assessed as having a negative effect on this Objective.	-
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Similarly, the site is more than 1,200m of the town centre and could increase the need to travel. Overall, this site has been assessed as having a negative effect on this Objective.	-
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+

SA Objective	Assessment Criteria - Does the site(LE138)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management?		
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is approx 1,200m from Brough Park Fields (LNR) and Back Hills and Abbey Woods SBI, the nearest designated assets, and as such, it is considered that development could have no effect on these assets. The site is agricultural grassland with trees along the road frontage - ecological assessment will be required. New housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on European sites. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. Similarly, the land is indicated on the predictive map of Best and Most Versatile agricultural land as within an area where over 60% of the land is likely to be BMV, so development of this site could result in the loss of best and most versatile land. The site is within a mineral safeguarding area. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
12. To minimise the use of non-renewable resources.	● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and undesignated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns	The site is within 500m of a grade II listed asset - a boundary stone. Dependent on proposal specific information, there is little scope that development of this site could lead to the deterioration of this heritage asset or its setting. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/?

SA Objective	Assessment Criteria - Does the site(LE138)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	and villages and maintain and strengthen local distinctiveness and sense of place?		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Further assessment is required. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/?
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration although its location adjacent to the open countryside could detract from this. Overall, this site has been assessed as having a neutral effect on this Objective.	0
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Leek and the wider District, however the Leek town centre is not easily accessible from the site which may reduce the effect on this objective. Overall, this has been assessed as having a neutral effect on this Objective.	0
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels?	The site is over 1,000m to existing areas of employment within the town or District and, as such, could fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site(LE138)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Improve physical accessibility to jobs? • Support higher income levels for local residents?		
Summary of overall assessment and likely significant effects: The proposed delivery of circa 25 dwellings is considered to have a significant positive effect, location outside flood zones 2 or 3 is also likely to lead to positive effects. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area where over 60% of the land is likely to be BMV, could have a significant negative effect. Similarly, the site is relatively inaccessible to services, facilities and areas of existing employment. New housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on European sites. Further assessment is required to identify potential for ecological or landscape impacts.

12.8.2 Biddulph

Part of BD143 Land between Brook Street and BVW (Victoria Colliery)

SA Objective	Assessment Criteria - Does the site (Victoria Colliery)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The site is located outside of the existing town boundary. The development of greenfield land within the open countryside could reduce the quality of the Green Infrastructure of the Town. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	As noted, the site is located outside of the settlement boundary on the south west edge of Biddulph. The site is more than 1,000m away from the town centre which could result in existing services and facilities being inaccessible. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a neutral effect on this Objective.	0
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The site's location would provide good access to areas of open space and the countryside which could help to support healthy lifestyles. However, the site is more than 1,000m from a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (Victoria Colliery)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA assessment this site might accommodate up to 100 dwellings depending on the site boundary. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted, the site is more than 1,000m from the town centre of Biddulph and a GP surgery this could be expected to increase the need to travel. However, the site is near to the open country side and an area of open space and a number of bus stops. Similarly, the development of this site may lead to the provision of additional public transport services. Overall, this site has been assessed as having a neutral effect on this Objective.	0
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is more than 1,000m from the town centre and could increase the need to travel. Overall, this site has been assessed as having a negative effect on this Objective.	-
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

SA Objective	Assessment Criteria - Does the site (Victoria Colliery)...?	Commentary on likely nature of effects of site allocation	Overall assessment
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. However it is considered that surface water may be an issue on site that would need to be addressed via FRA. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a neutral effect on this objective.	0
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is over 1,500m from Whitfield Valley (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. Ecological assessment is required. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been indicated on Natural England's predictive map of Best and Most Versatile land as having a "Moderate" (20 - 60% area bmv) of being predictive BMV land so development of this site may result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic	The site is more than 400m away from any heritage asset, the nearest asset is grade II* listed Knypersley Hall which is circa 1000m to the	+/?

SA Objective	Assessment Criteria - Does the site (Victoria Colliery)...?	Commentary on likely nature of effects of site allocation	Overall assessment
heritage and archaeological assets along with their settings.	heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	north east of the site. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of this heritage asset. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The potential residential use of this site provides limited scope for the development of this site to have a positive effect on investment in culture and tourism within the town and wider district, however this is dependent on proposal specific information. Overall, this site has been assessed as having a neutral effect on this Objective.	0
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Biddulph and the wider District. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	+
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels?	The site is within 500m of local employment provision and, as such, would provide sufficient accessible employment opportunities for	+

	SOCIAL		
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The site is located outside the settlement boundary. The development of this greenfield site could reduce the quality of Green Infrastructure of the Town. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage	Given the location of this site in relation to the town centre (within 800m) it can be considered that the site would be in proximity to a wide range of key services and facilities. For example, the site is in proximity to Biddulph Valley Leisure Centre and Kingsfield First	+

SA Objective	Assessment Criteria - Does the site (Land at BD116)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	/ civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	School. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.	
3. To improve health and reduce health inequalities.	● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to the nearby open space, the Biddulph Valley Way and countryside which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
4. To minimise opportunities for crime and reduce the fear of crime.	● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 80 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 800m of the town centre of Biddulph and a GP surgery and it is adjacent to the Biddulph Valley Way. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL

7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. However there may be limited areas of surface water flooding on site currently. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is over 1,750m from Gannister Quarry SSSI, the nearest designated asset and, as such, is considered to have no effect on these assets. Ecological assessment is required. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability?	The site has been assessed as being a greenfield, it has also been indicated on Natural England's predictive map of Best and Most Versatile land as having a "Moderate" (20 - 60% area bmv) of being predictive BMV land so development of this site may result in the loss of best and most versatile land. It is considered that the land may	-

SA Objective	Assessment Criteria - Does the site (Land at BD116)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	have formerly been used for open cast mining. Overall, this site has been assessed as having a negative effect on this Objective.	
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The nearest historical asset is circa 500m south east from the site. Given the distance of the site form this asset, there is limited scope that development of this site could lead to the deterioration of the setting of this heritage asset. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. However given the location of the site, it is considered that effects on landscape character would be likely. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			

SA Objective	Assessment Criteria - Does the site (Land at BD116)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good potential access to the town centre of Biddulph has scope to have a positive effect on the vitality and viability of Biddulph and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 800m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects: The site's proximity to services, facilities and existing areas of employment and proposed delivery of circa 80 dwellings should have a significant positive effect. However there is scope that development of this site could have negative effects due to the site's potential ecological value, its contribution to the Biddulph Valley Way and impacts on landscape character.

	• Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?		
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been indicated on Natural England's predictive map of Best and Most Versatile land as having a "Moderate" (20 - 60% area bmv) of being predictive BMV land so development of this site may result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is more than 400m away from any heritage asset, the nearest asset is grade II* listed Knypersley Hall which is circa 1000m to the north east of the site. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of this heritage asset. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?	The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National	-

SA Objective	Assessment Criteria - Does the site (BD011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The potential residential use of this site provides limited scope for the development of this site to have a positive effect on investment in culture and tourism within the town and wider district, however this is dependent on proposal specific information. Overall, this site has been assessed as having a neutral effect on this Objective.	0
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Biddulph and the wider District. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	+
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 500m of local employment provision and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects: The proposed delivery of circa 100 dwellings should have a significant positive effect. The site is also accessible to areas of employment which is likely to have a positive effect. However, the greenfield nature of this site and its location outside of the settlement boundary, coupled with its potential ecological value and relationship to the Biddulph Valley Way could have a negative effect.			

Table 12.317

BD138c (Marsh Green Nursery)

SA Objective	Assessment Criteria - Does the site (BD138c)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The site borders the settlement boundary of Biddulph but is outside of the boundary. The development of this site, a greenfield site that is set within the open countryside, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	As noted, the site is outside of the settlement boundary of Biddulph. The site would be within 800m of a wide range of services and facilities but not within 400m of the town centre of Biddulph. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.	+
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site, on the border of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. Similarly, the site is within 1,200m of a GP surgery and is close to the Biddulph Valley Way. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help	+

SA Objective	Assessment Criteria - Does the site (BD138c)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 85 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 800m of the town centre of Biddulph and 1,200m of a GP surgery and within the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. However there are considered to be existing surface water issues on site. The development of this site could lead to an increase in	+

SA Objective	Assessment Criteria - Does the site (BD138c)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is within 1,000m of Biddulph Valley Way (Whitemoor) (LNR), the nearest designated asset, and, as such, is considered that development is likely to have limited effect on this asset. Ecological assessment is required. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on greenfield land. However, the land has also been indicated on Natural England's predictive map of Best and Most Versatile land as being predictive "urban" land so development of this site may not result in the loss of best and most versatile land. Overall, this site has been assessed as having a neutral effect on this Objective.	0
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and	The site is within 700m of one grade II* listed asset, the Church of St. Lawrence and Coffin Lids and Benches and three grade II listed assets. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of these heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/?

SA Objective	Assessment Criteria - Does the site (BD138c)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	villages and maintain and strengthen local distinctiveness and sense of place?		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site within the important landscape setting to the settlement, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a neutral effect on this Objective.	0
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Biddulph and the wider District. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is within 600m of local employment provision and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (BD138c)...?	Commentary on likely nature of effects of site allocation	Overall assessment
The proposed delivery of circa 85 dwellings should have a significant positive effect. The site is also accessible to existing services, facilities and areas of employment which is likely to have a positive effect. However, the site's location in the wider countryside and important landscape setting to the settlement are considered to have a significant negative effect.

4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on Core Strategy Policy SS6c, it is considered that the site could accommodate some dwellings and extra care facilities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within open countryside with no services in close proximity. Overall, this site has been assessed as having a negative effect on this Objective.	-
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

SA Objective	Assessment Criteria - Does the site (OC050)...?	Commentary on likely nature of effects of site allocation	Overall assessment
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 1,250m from Thorncliffe Moor SSSI, the nearest designated asset, and, as such, is not considered to have an effect on this asset. The site is adjacent to an SBI to the north east. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on brownfield land and development of this site is not likely result in the loss of best and most versatile land. Overall, this site has been assessed as having a positive effect on this Objective.	+
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	There is scope to enable the re-use of existing buildings or that the development could use sustainable materials or increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic	The site is within 400m of a grade ii listed asset (milepost). Dependent on proposal specific information, there is limited scope	+/?

SA Objective	Assessment Criteria - Does the site (OC050)...?	Commentary on likely nature of effects of site allocation	Overall assessment
heritage and archaeological assets along with their settings.	heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	that development of this site could lead to the deterioration of this heritage asset and its setting. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 1,250m of Thorncliffe Moor SSSI and would not increase external pressures on these sites. Given the location of the site, it is considered that effects on landscape character and the setting of the Peak District National Park are likely. Proposal specific information is required to assess the impact on the South West Peak National Character Area. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy?	A mixed use of this site in line with Core Strategy policy may support investment in culture and tourism. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed mixed use development of a site close to the village centre of Blackshaw Moor has scope to have a positive effect on the vitality and viability of Blackshaw Moor and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (OC050)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	Mixed use development may support some employment opportunities. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects: The proposed delivery of some housing and extra care units is considered to have a positive effect, as could the site's accessibility to areas of open space and possible contribution to investment in tourism. However the site is inaccessible to services and facilities which is likely to have a significant negative effect, as is the potential impact on landscape character and the setting of the Peak District National Park. Similarly the proximity to an SBI is likely to lead to negative effects.			

Blythe Bridge and Forsbrook

Northern Gateway Opportunity Site (Identified in Core Strategy as Policy SS8 Blythe Bridge Regional Investment Site) - potential mixed use including residential

SA Objective	Assessment Criteria - Does the site (Northern Gateway Opportunity Site)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	SOCIAL		
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	Large scale opportunity site located on greenfield land either side of the A50 to the south of Blythe Bridge and inside the settlement boundary. Development could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective	-

SA Objective	Assessment Criteria - Does the site (Northern Gateway Opportunity Site)...?	Commentary on likely nature of effects of site allocation	Overall assessment
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located on the edge of the village, it is around 1,000m of the village centre and the range of services and facilities that can be found here that could serve prospective residents or users of the site. Depending on site specific proposals, a mixed use scheme might deliver improved access to jobs and services for existing and new residents. It should be noted that the current supply of educational and community services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.	+
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 1,000m of a GP surgery. There is opportunity for the site to contribute to the development of green infrastructure to support health and well-being. It should be noted that the current supply of health care services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a neutral effect on this Objective.	0
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on initial masterplan proposals for this site, it is considered that the site could accommodate circa 360 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 1,000m of the village centre of Blythe Bridge and Forsbrook as well as being adjacent to areas of open space. Whilst the site is within 500m of a bus stop and 1,200m of a train station, allocation is not likely to contribute to helping minimise an increase in car journeys. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (Northern Gateway Opportunity Site)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 1,000m of the village centre and the nearest main service centre is Cheadle 5 miles away. The location of the site is likely to encourage journeys being made by car. Overall, this site has been assessed as having a negative effect on this Objective.	-
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	The western boundary of the site is adjacent to a flood zone 2 and 3 area and, as such, it may be considered that the site would need to address risk from flooding. The development of a greenfield site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to an increased is water demand within the District. Overall, this site has been assessed as having a neutral effect on this objective, however the exact effects are uncertain.	0/?
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is more than 4,000m from Coyney Woods (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. There are a number of ponds and mature trees on site. Ecological assessment is required. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land?	As noted, this site has been assessed as being on greenfield land. However, the land has also been indicated on Natural England's predictive map of Best and Most Versatile land as having a "High" (over 60% area bmv) of being predictive BMV land so development of	--

SA Objective	Assessment Criteria - Does the site (Northern Gateway Opportunity Site)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	this site may result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective.	
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	There is one designated heritage asset (Grade II listed) within 500m of the site. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of this heritage asset and its setting.Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be more than 4,000m of Coyney Woods (LNR). Given the location of the site, it is considered that there could be effects on landscape character. The northern part of the site is within the important landscape setting to settlement. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential and mixed use of this site provides scope for investment in culture and tourism within the district and the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			

SA Objective	Assessment Criteria - Does the site (Northern Gateway Opportunity Site)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential and mixed use site with a good strategic location considered to have regional significance has scope to have a positive effect on the vitality and viability of the wider District. Overall, this has been assessed as having a significant positive effect on this Objective.	++
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure and is considered an excellent employment location for premium uses. Overall, this site has been assessed as having a positive effect on this Objective.	+
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	This is a large site with good access to the strategic road network with opportunity to provide both new homes and employment opportunities, including for premium uses. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects: The proposed delivery of circa 360 dwellings is considered to have a significant positive effect. Similarly, the site's good strategic location (with regional significance) has scope to have a positive effect on the vitality and viability of the wider District and could encourage investment in people, jobs and infrastructure. However, the development of greenfield land, partly within the important landscape setting to the settlement, and indicated on the predictive map of Best and Most Versatile land as an area where more than 60% of the land is likely to be BMV, is assessed as having a significant negative effect, similarly the potential ecological value of the site and the effects on climate change resulting from the likelihood of the location supporting journeys made by car are assessed as negative.

SA Objective	Assessment Criteria - Does the site (OC001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			

SA Objective	Assessment Criteria - Does the site (OC001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
1. To improve community cohesion and the quality of where people work and live.	• Make a positive contribution towards community cohesion? • Offer opportunity to improve neighbourhood quality? • Offer opportunity to provide open space and support Green Infrastructure? • Risk unacceptable light and noise pollution? • Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	The development of this major developed rural site that is outside of the proposed infill boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	The site is located within 500m of the village core of Froghall, but the village has insufficient services and facilities to meet the needs of the community. However a mixed use development is proposed. It should be noted that Froghall does not have a secondary school. The nearest service centre is Cheadle, 4km to the south. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Froghall does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?	Based on Core Strategy Policy SS6c, it is considered that the site could accommodate 50 dwellings. Overall, this site has been assessed as having a significant positive effect on this Objective.	++

SA Objective	Assessment Criteria - Does the site (OC001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
locations and including affordable / social /extra care housing.	• Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?		
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within open countryside with no services in close proximity. Overall, this site has been assessed as having a negative effect on this Objective. Highway improvements and traffic calming measures will be required. It will be important to maximise opportunities to develop green infrastructure.	-
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency? • Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	The masterplan shows development on land in Flood Zones 2 and 3. It also shows a diversion of Black Brook and the breaking out of the brook from its existing culvert. Site remediation and potential ground water contamination need to be addressed. The development could be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a significant negative effect on this objective. There will need to be a creative approach to flood risk potentially locating car parking, employment	--

SA Objective	Assessment Criteria - Does the site (OC001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		and visitor attractions within the flood zones to make most effective use of available land.	
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is adjacent to Churnet Valley SSSI (including ancient woodland) the nearest designated asset, and potential effects on this asset need to be considered. The site is also adjacent to Harston Hill SBI Froghall Wharf to the north east. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability? • Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	As noted, this site has been assessed as being on brownfield land and development of this site is not likely result in the loss of best and most versatile land. However whilst the scale and nature of contamination on the site resulting from its previous use remains uncertain, it is considered to be a high risk in some areas. Overall, this site has been assessed as having a neutral effect on this Objective.	0
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	There is scope to enable the re-use of existing buildings or that the development could use sustainable materials or increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	There is one Grade II Listed Building within the site boundary and an additional five Listed Buildings in the 400m buffer. The Caldon Canal Conservation Area is adjacent to the northern boundary of the site. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these heritage assets and their settings. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?

SA Objective	Assessment Criteria - Does the site (OC001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site is located within the Churnet Valley, a high quality natural environment. There are areas of woodland and tree belts within the site, particularly in the south. Given the location of the site, it is considered that effects on landscape character are likely. Proposal specific information is required to assess the significance of any impact and identify any mitigation measures. Overall, this site has been assessed as having a significant negative effect on this Objective however the exact effects are uncertain.	--/?
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	A mixed use of this site in line with Core Strategy policy may support investment in culture and tourism. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed mixed use development of a site close to the village centre of Froghall has scope to have a positive effect on the vitality and viability of the rural economy and the wider District, as new residents and visitors could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure, including through the delivery of new employment, leisure and tourist-related retail and accommodation facilities. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a positive effect on this Objective.	+
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	Mixed use development may support some new employment opportunities. The existing Thomas Bolton operation on site should be safeguarded. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (OC001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
The proposed delivery of a mixed use development including the potential for housing, employment, leisure and tourist-related retail and accommodation is considered to have a significant positive effect, as could the site's accessibility to areas of open space and possible contribution to investment in tourism. Re-development of a previously developed site, now under-used, is also considered to have positive effects. However the site is inaccessible to services and facilities which is likely to have a significant negative effect, as is the potential impact on landscape character and heritage assets. Similarly the proximity to a SSSI and SBI and proposals for development on land in Flood Zones 2 and 3 are likely to lead to negative effects.

3. To improve health and reduce health inequalities.	• Help improve health or access to health facilities? • Help promote healthy lifestyles? • Help to reduce health inequalities? • Offer opportunities to participate in leisure and recreational activities including access to the countryside?	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. It should be noted that the current supply of health care services and facilities currently falls short of demand and the situation is likely to worsen in the future. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	• Deliver development that reduces actual levels of crime? • Deliver development that helps to reduce fear of crime?	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? • Offer opportunities to enable people to meet their needs within their existing communities? • Offer opportunities to ensure that people can afford their housing?	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 105 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?	As noted previously, the site is within 800m of the village centre of Werrington and Cellarhead and a GP surgery as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	• Offer opportunities to reduce emissions of greenhouse gases, particularly CO_2? • Offer opportunities to increase energy efficiency?	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (WE042/WE043) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Offer opportunities to increase the use of renewable energy? • Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?		
8. To improve air quality.	• Offer opportunities to minimise emissions of airborne pollutants? • Offer opportunities to remove air pollutants (e.g. by trees)?	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	• Deliver development directed towards areas of least flood risk? • Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? • Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Offer opportunities to encourage water efficiency and demand management?	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? • Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? • Offer opportunities to help deliver networks of biodiversity and green infrastructure?	The site is within 500m from Wetley Moor SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. Ecological survey is required.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Help safeguard the best and most versatile agricultural land? • Deliver development that helps to minimise the loss of greenfield land? • Offer opportunities to reduce land contamination / instability?	As noted, this site has been assessed as being on greenfield land. However, the land has also been indicated on Natural England's predictive map of Best and Most Versatile land as having a "moderate" likelihood (20- 60% area bmv) of being predictive BMV land so development of this site may result in the loss of best and most versatile	-

SA Objective	Assessment Criteria - Does the site (WE042/WE043) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
	• Deliver development that helps reduce the amount of derelict land? • Offer opportunities to protect notable geological and geomorphological features?	land. Overall, this site has been assessed as having a negative effect on this Objective.	
12. To minimise the use of non-renewable resources.	• Offer opportunities to reduce waste generation? • Offer opportunities to maximise the re-use of existing buildings? • Offer opportunities to increase the use of building materials from sustainable sources?	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	The site is within 100m of the grade II listed asset Ash Hall. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of this historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Deliver development that maximises re-use of brownfield land? • Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	The site would be within 500m of Wetley Moor SSSI and would increase external pressures on this sites. The site is within the area considered to be important landscape setting to the settlement. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? • Offer opportunities to help support tourism and the visitor economy?	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			

SA Objective	Assessment Criteria - Does the site (WE042/WE043) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Deliver development that helps to safeguard shops and services in existing centres? • Deliver development that helps to safeguard and improve the retail, leisure and service provision?	The proposed development of a residential site with good access to the village centre of Werrington and Cellarhead has scope to have a positive effect on the vitality and viability of Werrington and Cellarhead and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Help provide a balanced portfolio of employment land in sustainable locations? • Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	• Help meet the employment needs of local people? • Help increase economic activity levels? • Improve physical accessibility to jobs? • Support higher income levels for local residents?	The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects: The proposed delivery of circa 105 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated assets. Similarly, the development of greenfield land with the potential for loss of best and most versatile agricultural land and the site's proximity to historic assets is assessed as having a negative effect.			

Table 12.321

Appraisal of alternative housing requirement options

13 Appraisal of alternative housing requirement options

13.1 The matrices below set out the likely significant effects on sustainability of the alternative options considered by the Council for a housing requirement. The assessments are based on the methodology proposed and consulted on in the SA Scoping Report and use the SA Framework also developed through consultation as part of the SA Scoping stage.

13.2 As part of the SA appraisal of options, consideration has been given to effects on sustainability over time (in the short, medium and long term) along with any cumulative impacts of implementing each option and possible mitigation measures where appropriate.

13.3 In comparing options with one another, consideration has also been given to the geographical scale of effect, whether any identified effects would be permanent or temporary, reversible or irreversible and the assumptions made, or justification for the assessment recorded.

13.4 Definitions of significance are provided in Section 3 Appraisal Methodology.

Scoring of options

Score	
++	The requirement will have a very positive impact on the sustainability objective
+	The requirement will have a slightly positive impact on the sustainability objective
0	The requirement will have a negligible or neutral impact on the sustainabiity objective. A recorded neutral effect does not necessarily mean that there will be no effect at the project level, but shows that at this strategic level there are no identifiable effects.
-	The requirement will have a slightly negative impact on the sustainability objective
--	The requirement will have a very negative impact on the sustainability objective
i	The outcome could be dependent on implementation, or more detail is required to make an assessment
?	The impact of an issue cannot be predicted at this stage

Table 13.1 Scoring of options

13.5 Different components within an option may generate varying impacts. This is indicated by "/".

Key to Table

- ST: Short term = 0 - 5 years
- MT: Medium term = 5 - 10 years
- LT: Long term = over 10 years

Housing Requirement Option 1

SA Objective	Option 1: 235 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure? • Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. There is a balance between loss of countryside as a result of development and provision of new, accessible open space as part of new developments. This requirement may offer the least opportunity for associated benefits such as new or enhanced community facilities to be delivered as a result of new development.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall housing requirement. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion /	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the least housing growth of the four options considered and thus the least opportunity to improve accessibility to key services and facilities. Despite this, lower levels of housing growth will enable a focus of growth	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. **Mitigation measures**: Local Plan policies to ensure that new developments are brought forward in sustainable locations.

SA Objective	Option 1: 235 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	belief, sex and sexual orientation? ● Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.				on small urban extensions and small sites within the existing settlement boundary which is likely to help minimise the distance people need to travel.	
3. To improve health and reduce health inequalities.	● Will it improve health or access to health facilities? ● Will it promote healthy lifestyles? ● Will it reduce health inequalities? ● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?	?/-	?/-	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the least housing growth of the four options considered and thus the least opportunity to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be a deterioration in health through lack of investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling. **Mitigation measures**: Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	● Will it reduce actual levels of crime? ● Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.

SA Objective	Option 1: 235 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Will it provide an appropriate mix of housing to enable all needs to be met? • Will it enable people to meet their needs within their existing communities? • Will it ensure that people can afford their housing?	+	+	+	This option represents the lower end of the recommended OAN range[1] and by meeting the full demographically-assessed need for housing in the District will have a direct, long-term, positive effect on this SA objective. The requirement is expected to enable the delivery of a range of housing types and tenures, making a contribution to meeting community needs. However the impact of this option on the SA objective is less significant than under all other options. This option is likely to make the least contribution to addressing the needs of an ageing population or ensuring that problems of affordability can be satisfactorily addressed, risking adverse outcomes for older people and those who still need to access the housing market.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Household projections suggest a considerable growth in the number of older people. The SHMA[2] identified a critical affordable housing need. Objectively assessed housing need for the District is between 235dpa and 330dpa. This option will meet the objectively assessed housing need of the plan area but fails fully to address affordable housing need, or offer maximum opportunity for investment in meeting the housing needs of older people. **Mitigation measures**: Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Will it minimise impacts on existing traffic congestion? • Will it support the use of public transport? • Will it support safe walking and cycling? • Will it protect and improve access to the natural environment and support Green Infrastructure?	?/+	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this requirement could have a positive effect on minimising the impact of new development on existing traffic congestion and could offer support for the use of sustainable forms of transport through delivering most new development close to town and village centres. The option could support priorities and provisions identified in the SMDC integrated transport strategy [3], including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for sustainable transport. **Mitigation measures**: Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.
ENVIRONMENTAL						

SA Objective	Option 1: 235 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
7. To minimise contributions to climate change and consider climate change adaptation.	• Will it reduce emissions of greenhouse gases particularly CO_2? • Will it increase energy efficiency? • Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?	-	-	-	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is likely to result in the smallest overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	?	?	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option represents the lowest level of growth, it is likely to give rise to the lowest level of new emissions of airborne pollutants associated with additional car journeys. In the long-term there is some potential for development to be delivered within 500m of an identified area of poor air quality.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)[(4)]. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and enhance water sources.	• Is new development directed towards areas of least flood risk? • Will it reduce risk of flooding eg by	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk.

SA Objective	Option 1: 235 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	encouraging the integration of mitigation measures such as SuDS into new development? • Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?				the SFRA[(5)] confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This option requires the least peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus poses the lowest risk of all options to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.	**Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest level of growth, this option is likely to provide most overall, long-term protection for biodiversity and natural networks. There will however be the lowest level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes. Given it will lead to the lowest recreational and other urbanising pressures on the closest European sites, of all options considered, this option is also likely to afford most protection for the integrity of European sites. However the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including potentially requiring Green Belt release and potentially sites within the zone of influence of European designated sites. **Mitigation measures**: Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.

SA Objective	Option 1: 235 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land? • Will it reduce land contamination / instability? • Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest level of growth, this option is likely to provide most overall, long-term protection for the best and most versatile agricultural land.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation? • Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However with the lowest level of growth proposed, of all options considered, this option is most likely to result in protection of cultural and historic heritage assets (designated and non-designated) along with their settings.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. **Mitigation**

SA Objective	Option 1: 235 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	strengthen local distinctiveness and sense of place?					**measures**: Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Will it promote development on brownfield land? • Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study[(6)] offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA[(7)] identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. With the lowest level of growth proposed, of all options considered, this option is the most likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and other natural assets and resources.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. With the lowest level of growth proposed, of all options considered, this option is the least likely to result in a long-term, adverse impact on local distinctiveness, potentially leading to an associated long-term positive impact on tourism and the visitor economy. However, this is	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor

SA Objective	Option 1: 235 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					balanced by the option also providing the least opportunity for investment in culture and tourism that could result in long-term negative effects on the local economy.	economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.
ECONOMIC						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	+	+	Under this option, the population of the district is projected to increase by 2,567 from 2014 to 2031. The population growth predicted arises from high levels of net in-migration which counteracts a significant decrease in population expected from natural change resulting in an excess of deaths over births. The increase in spending in the local economy this is likely to generate should result in benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. Although since this option provides for the lowest level of growth, the benefits would be lowest of all options considered.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Residents of new developments will support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	-	--	--	This option is likely to lead to a decline in the labour force of 2,141 (2014-2031) and job losses of 1,579 over the same period. This is likely to result in a significant negative effect on business, the local economy and local employment through a lack of encouragement for investment in business and infrastructure.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A local labour supply will help to deliver economic growth across the plan area. **Mitigation measures**: Local Plan policies to support sustainable economic growth.

SA Objective	Option 1: 235 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	-	--	--	It is projected that the number of people aged over 65 in the District will increase by 39% by 2031. The oldest age groups (75-84 and 85+) would see the most substantial increases of 69% and 134% respectively[8]. Under this option, the ageing profile of the population is likely to contribute to a declining labour force and job losses which could undermine economic stability in the long term. The option is likely to have a negative effect on the local economy and local employment.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.

Summary of significant effects:

This option proposes the delivery of 235 new dwellings per year (2014-2031). It will have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs since it represents the lower end of the recommended objectively assessed housing need range. However being the lower end of the range, the option makes the least contribution of all options considered to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 2,500 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages including helping to safeguard local shops and services. However since this option provides for the lowest level of growth, these benefits would be lowest of all options considered. This option is likely to lead to a decline in the labour force of 2,141 and the loss of 1,579 jobs (2014 - 2031). This is likely to undermine economic stability in the long term and lead to a significant negative effect on business, the local economy and local employment through a lack of encouragement for investment in business and infrastructure. As the lowest growth option, requiring the lowest number of site allocations, by comparison with other options considered, this alternative is likely to result in minor positive effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets. The lower level of growth is also likely to minimise the negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. The lower level of growth is also likely to help enable a focus of new development on small urban extensions and small sites within existing settlement boundaries resulting in minor positive effects on minimising the distance people need to travel to access key services and facilities and increasing the opportunities for use of sustainable forms of transport. However since this option proposes the lowest level of growth, it is also likely to result in the lowest level of investment in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to minor negative effects on the SA objective relating to supporting health improvements.

February 2017 Housing Requirement Option 2

SA Objective	February 2017 Option 2: 260 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure? • Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. There is a balance between loss of countryside as a result of development and provision of new, accessible open space as part of new developments. This requirement may offer fewer opportunities than options 3 and 4 for achieving associated benefits of investment, such as new or enhanced community facilities, but there would be more opportunities than under option 1.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall housing requirement. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Will it help to minimise the distance people	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under option 1, but less growth than proposed under options 3 or 4 and thus some opportunity to improve accessibility to key services and facilities. Lower levels of housing growth may enable a focus of growth on small urban extensions and small sites within the existing settlement boundary which is likely to help minimise the distance people need to travel.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. **Mitigation measures**: Local Plan policies to ensure that new developments are brought forward in sustainable locations.

SA Objective	February 2017 Option 2: 260 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	need to travel to access education, employment, shopping and other key services and facilities.					
3. To improve health and reduce health inequalities.	• Will it improve health or access to health facilities? • Will it promote healthy lifestyles? • Will it reduce health inequalities? • Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?	?	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under option 1, but less growth than proposed under options 3 or 4 and thus some opportunity to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be a deterioration in health through lack of investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling. **Mitigation measures**: Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	• Will it reduce actual levels of crime? • Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range of house types to meet local needs in	• Will it provide an appropriate mix of housing to enable all needs to be met?	+	+	++	This option represents the job stabilisation scenario(1) and is mid-way within the full objectively assessed needs range. By meeting the full assessed need for housing in the District, this option will have a direct, long-term, positive effect	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Household projections suggest a considerable growth in the number of older people. The SHMA(2) identified a critical affordable

SA Objective	February 2017 Option 2: 260 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
appropriate locations and including affordable / social /extra care housing.	• Will it enable people to meet their needs within their existing communities? • Will it ensure that people can afford their housing?				on the SA objective. The requirement is expected to enable the delivery of a range of housing types and tenures, making a contribution to meeting community needs. While the impact of this option on the SA objective is greater than that under option 1, it is less significant than under options 3 and 4. Whilst this option is likely to contribute to addressing the needs of an ageing population and ensuring that problems of affordability can be addressed, there is a greater risk of adverse outcomes for older people and those who still need to access the housing market than under options 3 and 4.	housing need. Objectively assessed housing need for the District is between 235dpa and 330dpa. This option will meet the objectively assessed housing need of the plan area but fails fully to address affordable housing need, or offer maximum opportunity for investment in meeting the housing needs of older people. **Mitigation measures**: Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Will it minimise impacts on existing traffic congestion? • Will it support the use of public transport? • Will it support safe walking and cycling? • Will it protect and improve access to the natural environment and support Green Infrastructure?	?/+	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement could have a long-term positive effect on minimising the impact of new development on existing traffic congestion and could offer support for the use of sustainable forms of transport through delivering new development close to town and village centres. The option could support priorities and provisions identified in the SMDC integrated transport strategy [(3)], including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for sustainable transport. **Mitigation measures**: Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.
ENVIRONMENTAL						

SA Objective	February 2017 Option 2: 260 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
7. To minimise contributions to climate change and consider climate change adaptation.	• Will it reduce emissions of greenhouse gases particularly CO_2? • Will it increase energy efficiency? • Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?	-	-	- -	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in a lower overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys. In the long-term there is likely to be a more significant negative impact than under option 1 since this proposes lower growth.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	?	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to give rise to lower levels of new emissions of airborne pollutants associated with additional car journeys. In the medium and long-term there is likely to be a more significant negative impact than under option 1 and some potential for development to be delivered within 500m of an identified area of poor air quality.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)[(4)]. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, there is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and	• Is new development directed towards areas of least flood risk?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**:

SA Objective	February 2017 Option 2: 260 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
enhance water sources.	• Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development? • Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?				on the location of development and the implementation of Local Plan policies. However the SFRA[(5)] confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. Since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in less peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus result in less risk of surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration. Although in the long-term there is likely to be a more significant negative impact than under option 1.	Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However, since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to provide overall, long-term protection for biodiversity and natural networks. However in comparison with options 3 and 4, there is likely to be a lower level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes. Given that in comparison with options 3 and 4, this requirement is likely to lead to lower recreational and other urbanising pressures on the	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including sites potentially requiring Green Belt release or within the zone of influence of European designated sites. **Mitigation measures**: Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.

SA Objective	February 2017 Option 2: 260 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					closest European sites, the option is also likely to afford long-term protection for the integrity of European sites. Whilst positive impacts are not as significant as under option 1, the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.	
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land? • Will it reduce land contamination / instability? • Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to provide overall, long-term protection for the best and most versatile agricultural land. However positive impacts are not as significant as under option 1.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation? • Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns /	• Will it ensure the continued protection and enhancement of	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide

SA Objective	February 2017 Option 2: 260 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
villages and other heritage and archaeological assets along with their settings.	cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?				implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in protection of cultural and historic heritage assets (designated and non-designated) along with their settings. Positive impacts are not as significant as under option 1.	protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Will it promote development on brownfield land? • Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study[(6)] offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA[(7)] identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. Since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and other natural assets and	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.

SA Objective	February 2017 Option 2: 260 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					resources. Positive impacts are not as significant as under option 1.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is less likely to result in a long-term, adverse impact on local distinctiveness, and this may lead to a long-term positive impact on tourism and the visitor economy. The significance is less than under option 1. The positive impacts are balanced by the requirement also providing less opportunity than under options 3 and 4 for investment in culture and tourism and this may result in long-term negative effects on the local economy.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.
ECONOMIC						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	+	++	This option assumes that the number of jobs in the District remains at its 2014 level over the plan period and since there is an ageing population, there would be a need for growth in the labour force, in-migration and ultimately housing of 259dpa to 2031. Creating a labour force large enough to support job stabilisation would result in a population increase of 6,339 (2014-31). The increase in spending in the local economy this is likely to generate should result in benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. Although since this option proposes a lower level of growth	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Residents of new developments will support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.

SA Objective	February 2017 Option 2: 260 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in less significant benefits. Benefits would be more significant than under option 1.	
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	+	+	+	This option represents the level at which the District's economy would stabilise, ie there would be zero job growth 2014 - 2031. This is likely to result in a minor positive effect on business, the local economy and local employment.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Helping to stem the decline of working age residents in the District would achieve a more balanced population structure and reduce potential future economic difficulties and the demands of services associated with an ageing population and a more limited supply of labour. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
18. To encourage and support a high and stable level of employment	• Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	0	0	+	Whilst this option is to maintain the 2014 level of jobs in the District over the plan period, a fall in the labour force of 127 is predicted. This is likely to lead to a long term minor positive impact on the local economy and local employment.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
Summary of significant effects: This option proposes the delivery of 260 new dwellings per year. Since it is within the recommended, full objectively assessed housing need range, the housing requirement would have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs. This positive effect is likely to be more significant than under option 1. However being closer to the lower end of the range than options 3 and 4, the option makes less of a contribution than options 3 and 4 to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 6,300 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and services. Under this option, these benefits are likely to be more significant than under option 1 and less significant than under options 3 and 4. This						

SA Objective	February 2017 Option 2: 260 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
option is expected to maintain the 2014 level of jobs in the district over the plan period. This is likely to result in a long term minor positive impact on business, the local economy and local employment. This compares favourably with the impacts on this objective likely under option 1, where significant negative impacts on SA objectives for supporting employment and economic growth are likely since housing delivery below 260dpa would potentially result in a reduction in jobs. However the positive impacts on economic growth under this option are less significant than those likely to result under options 3 and 4. Option 2 requires the second lowest number of site allocations of the four options considered, and consequently this alternative is likely to result in comparatively more positive effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets than options 3 and 4. Positive effects on these objectives are slightly less under this option than under option 1. The lower level of growth under option 2 compared with options 3 and 4 is also likely to minimise the negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. The lower level of growth is also likely more likely under option 2 than options 3 and 4 to enable a focus of new development on small urban extensions and small sites within existing settlement boundaries resulting in minor positive effects on minimising the distance people need to travel to access key services and facilities and increasing the opportunities for use of sustainable forms of transport. Benefits under option 2 in this regard are not likely to be as great as under option 1. However since option 2 proposes the second lowest level of growth of the four options considered, it is likely to result in a lower level of investment than under options 3 and 4 in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to possible minor negative effects on the SA objective relating to supporting health improvements. These negative effects are not likely to be as significant as under option 1.

		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure? • Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. There is a balance between loss of countryside as a result of development and provision of new, accessible open space as part of new developments. This requirement may offer more opportunities than options 1 and 2 for achieving associated benefits of investment, such as new or enhanced community facilities, but there would be less opportunities than under option 4.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall housing requirement. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Will it help to minimise the distance people	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under options 1 and 2 (but less growth than proposed under option 4) and consequently there is opportunity to improve accessibility to key services and facilities through delivering more investment into the rural areas. However under this option it is less likely than under options 1 and 2 that the focus of growth could be delivered as small urban extensions and small sites within existing settlement boundaries and this may	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. **Mitigation measures**: Local Plan policies to ensure that new developments are brought forward in sustainable locations.

SA Objective	February 2017 Option 3: 330 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	need to travel to access education, employment, shopping and other key services and facilities.				increase the distance that some people would need to travel in order to access key services and facilities.	
3. To improve health and reduce health inequalities.	• Will it improve health or access to health facilities? • Will it promote healthy lifestyles? • Will it reduce health inequalities? • Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under options 1 and 2 (but less growth than proposed under option 4) and consequently there is opportunity to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be an indirectly positive effect on health through enabling investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling. **Mitigation measures**: Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	• Will it reduce actual levels of crime? • Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate	• Will it provide an appropriate mix of housing to enable all needs to be met? • Will it enable people to meet their needs within	+	++	++	This option represents the level of housing growth necessary to provide a sufficiently large labour force to support the average level of job growth projected by two forecasting houses: Oxford Economics and Experian[(1)]. This option represents the upper end of	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Household projections suggest a considerable growth in the number of older people. The SHMA[(2)] identified a critical

SA Objective	February 2017 Option 3: 330 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
locations and including affordable / social /extra care housing.	their existing communities? ● Will it ensure that people can afford their housing?				the objectively assessed housing need range. By meeting the full assessed need for housing in the District, this option will have a direct, medium and long-term, positive effect on the SA objective. The requirement is expected to enable the delivery of a range of housing types and tenures, making a significant contribution to meeting community needs. While the impact of this option on the SA objective is greater than that under options 1 and 2, it is less significant than under option 4. As the upper end of the OAN range, this option is likely to make a significant contribution to addressing the needs of an ageing population and ensuring that problems of affordability can be addressed.	affordable housing need. Objectively assessed housing need for the District is between 235dpa and 330dpa. This option will meet the objectively assessed housing need of the plan area and address both affordable housing need and the housing needs of older people. **Mitigation measures**: Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	● Will it minimise impacts on existing traffic congestion? ● Will it support the use of public transport? ● Will it support safe walking and cycling? ● Will it protect and improve access to the natural environment and support Green Infrastructure?	?	?	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement could have a long-term negative effect on minimising the impact of new development on existing traffic congestion. Due to the extent of sites that are likely to be allocated under this option, it is less likely than under options 1and 2 that a high proportion of new development can be delivered close to town and village centres, possibly resulting in a lower use of sustainable forms of transport. The option is likely to support priorities and provisions identified in the SMDC integrated transport strategy [(3)], including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for sustainable transport. **Mitigation measures**: Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.
ENVIRONMENTAL						

SA Objective	February 2017 Option 3: 330 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
7. To minimise contributions to climate change and consider climate change adaptation.	• Will it reduce emissions of greenhouse gases particularly CO_2? • Will it increase energy efficiency? • Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?	-	--	--	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement is likely to result in a higher overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys. Impacts are likely to be less significant than under option 4.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	?	?/-	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement is likely to give rise to higher levels of new emissions of airborne pollutants associated with additional car journeys. In the medium and long-term there is likely to be a more significant negative impact than under options 1 and 2 and some potential for development to be delivered within 500m of an identified area of poor air quality. Impacts are likely to be less significant than under option 4.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)[(4)]. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, there is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and	• Is new development directed towards areas of least flood risk?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**:

SA Objective	February 2017 Option 3: 330 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
enhance water sources.	• Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development? • Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?				location of development and the implementation of Local Plan policies. However the SFRA(5) confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. Since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement is likely to result in more peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus result in more risk of surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration. Although in the long-term there is likely to be a less significant impact than under option 4.	Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	?	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. Since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is less likely to provide long-term protection for biodiversity and natural networks. However in comparison with options 1 and 2, there is likely to be a higher level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes (but less opportunity than under option 4). Given that in comparison with options 1 and 2, this requirement is likely to lead to increased recreational and other urbanising pressures on the closest European sites,	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including sites potentially requiring Green Belt release or within the zone of influence of European designated sites. **Mitigation measures**: Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.

SA Objective	February 2017 Option 3: 330 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					the option is also less likely to afford long-term protection for the integrity of European sites. Whilst such negative impacts are not as significant as under option 4, the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.	
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land? • Will it reduce land contamination / instability? • Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?	?	?	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is less likely to provide overall, long-term protection for the best and most versatile agricultural land. However negative impacts are not as significant as under option 4.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation? • Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns / villages and other	• Will it ensure the continued protection and enhancement of cultural and historic	?	?	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for heritage and archaeological

SA Objective	February 2017 Option 3: 330 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
heritage and archaeological assets along with their settings.	heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?				higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is likely to result in less protection of cultural and historic heritage assets (designated and non-designated) along with their settings. Negative impacts are not as significant as under option 4.	assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Will it promote development on brownfield land? • Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	?	?	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study[(6)] offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA[(7)] identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. Since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is less likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and other natural assets and resources. Negative impacts are not as significant as under option 4.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.

SA Objective	February 2017 Option 3: 330 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is more likely to result in a long-term, adverse impact on local distinctiveness, and this may lead to a long-term negative impact on tourism and the visitor economy. The significance is less than under option 4. The negative impacts are balanced by the requirement also providing more opportunity than under options 1 and 2 for investment in culture and tourism and this may result in medium term positive effects on the local economy.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.
ECONOMIC						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	++	++	This option combines the job growth projected by Oxford Economics and Experian and incorporates partial catch up headship rates. It represents the "unconstrained" potential of the area based on its existing business base, mix of sectors and inherent economic qualities. There would need to be significant in-migration needed to support an increase in the size of the labour force sufficient to support the forecast job growth. This would equate to population growth of 8,471, household growth of 5,376 and a dwelling need of 329pa. The increase in spending in the local economy this would generate is likely to result in benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. Since this option proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Residents of new developments will support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.

SA Objective	February 2017 Option 3: 330 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					considered (with the exception of the highest growth option 4) this requirement is likely to result in significant benefits for the economies of existing centres. Benefits however are likely to be less significant than under option 4.	
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	+	+	++	This option is based on modelled job growth of an additional 870 jobs (794 FTEs) in the District 2014-2031 (51 annually). Although this seems modest, it is set within the context of a decline in jobs forecast under the 2014-based SNPP baseline. Job growth (while modest) is likely to result in long-term positive effects on business, the local economy and local employment.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Helping to reverse the decline of working age residents in the District would achieve a more balanced population structure and reduce potential future economic difficulties and the demand of services associated with an ageing population and a more limited supply of labour. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	+	+	++	This option represents the level of housing growth necessary to provide a sufficiently large labour force to support an average of the Oxford Economics and Experian job growth forecasts for the District 2014-2031; a labour force increase of 981. This is likely to allow for the economic potential of the district to be realised and result in medium and long term positive impacts on the local economy and local employment.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
Summary of significant effects: This option proposes the delivery of 330 new dwellings per year. Since it is the upper end of the recommended objectively assessed housing need range, the housing requirement would have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs. This positive effect is likely to be more significant than under options 1 and 2. As the upper end of the range, the option is likely to make a significant contribution to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 8,500 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and					

SA Objective	February 2017 Option 3: 330 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
services. Under this option, these benefits are likely to be more significant than under options 1 and 2, but less significant than under option 4. This option is based on expected job growth of 870 and a labour force increase of 981 in the district 2014-2031. This is likely to allow for the economic potential of the district to be realised and lead to medium and long term positive impacts on the local economy and local employment. Option 3 requires the second highest number of site allocations of the four options considered, and consequently this alternative is likely to result in comparatively more negative effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets than options 1 and 2. Negative effects on these objectives are slightly less under this option than under option 4. The higher level of growth under option 3 compared with options 1 and 2 is also likely to result in negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. Due to the extent of sites that are likely to be allocated under this option, it is less likely than under options 1 and 2 that a high proportion of new development can be delivered close to town and village centres, resulting in negative effects on minimising the distance people need to travel to access key services and facilities and reducing the opportunities for use of sustainable forms of transport. Negative effects under option 3 in this regard are not likely to be as great as under option 4. However since option 3 proposes the second highest level of growth of the four options considered, it is likely to result in a higher level of investment than under options 1 and 2 in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to possible minor positive effects on the SA objective relating to supporting health improvements. These positive effects are not likely to be as significant as under option 4.

February 2017 Housing requirement Option 4

SA Objective	Option 4: 450 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure? • Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	?	?	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. There is a balance between loss of countryside as a result of development and provision of new, accessible open space as part of new developments. This requirement is likely to offer the most opportunity for associated benefits such as new or enhanced community facilities to be delivered as a result of new development.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall housing requirement. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Will it help to minimise the distance people	?	?	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the highest level of housing growth of the four options considered and thus the greatest opportunity to improve accessibility to key services and facilities through delivering more investment into the rural areas. However, this level of new housing development is not likely to enable growth to be focused on small urban extensions and small sites within the existing settlement boundaries, which may result in increasing the distance people need to travel.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. **Mitigation measures**: Local Plan policies to ensure that new developments are brought forward in sustainable locations.

SA Objective	Option 4: 450 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	need to travel to access education, employment, shopping and other key services and facilities.					
3. To improve health and reduce health inequalities.	• Will it improve health or access to health facilities? • Will it promote healthy lifestyles? • Will it reduce health inequalities? • Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?	?	?	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the highest level of housing growth of the four options considered and thus present the most opportunities to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be an improvement in health through increased investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling. **Mitigation measures**: Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	• Will it reduce actual levels of crime? • Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations	• Will it provide an appropriate mix of housing to enable all needs to be met? • Will it enable people to meet their needs within	++	++	++	This option exceeds the upper end of the recommended OAN range[(1)] and by meeting the full, objectively assessed need for housing in the District, it will have a direct, long-term, positive effect on this SA objective. The requirement is expected to enable the delivery of a range of	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Household projections suggest a considerable growth in the number of older people. The SHMA[(2)] identified a critical affordable housing need. Objectively assessed housing need for the

SA Objective	Option 4: 450 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
and including affordable / social /extra care housing.	their existing communities? ● Will it ensure that people can afford their housing?				housing types and tenures, making a significant contribution to meeting community needs. The impact of this option on the SA objective is more significant than under all other options. This option is likely to make the most contribution to addressing the needs of an ageing population and ensuring that problems of affordability can be satisfactorily addressed, improving outcomes for older people and those who still need to access the housing market.	District is between 235dpa and 300dpa. This option will meet the objectively assessed housing need of the plan area and will go further than any other option considered towards addressing affordable housing need and offering opportunities for investment in meeting the housing needs of older people. **Mitigation measures**: Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	● Will it minimise impacts on existing traffic congestion? ● Will it support the use of public transport? ● Will it support safe walking and cycling? ● Will it protect and improve access to the natural environment and support Green Infrastructure?	?/-	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this requirement is likely to have a negative effect on minimising the impact of new development on existing traffic congestion. Due to the number of site allocations that would be required, it is likely that some new development would be delivered remote from town and village centres, making the use of sustainable forms of transport less likely. The option could support priorities and provisions identified in the SMDC integrated transport strategy [(3)], including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for walking and cycling initiatives. **Mitigation measures**: Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.
ENVIRONMENTAL						
7. To minimise contributions to climate change and consider climate change adaptation.	● Will it reduce emissions of greenhouse gases particularly CO_2? ● Will it increase energy efficiency?	--	--	--	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is likely to result in the greatest overall increase in carbon emissions from the energy	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car

SA Objective	Option 4: 450 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?				consumption and emissions arising from construction and use of new development and associated car journeys.	journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	?	?/-	--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option represents the highest level of housing growth, it is likely to give rise to the highest level of new emissions of airborne pollutants associated with additional car journeys. In the medium-term there is potential for development to be delivered within 500m of an identified area of poor air quality.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)[(4)]. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and enhance water sources.	• Is new development directed towards areas of least flood risk? • Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the SFRA[(5)] confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas

SA Objective	Option 4: 450 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?				located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This option requires the most peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus poses the greatest risk of all options to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.	of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	?/-	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the highest level of housing growth, of all options considered, this option is likely to provide least overall, long-term protection for biodiversity and natural networks. There will however be the greatest level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes. Given it will lead to the highest recreational and other urbanising pressures on the closest European sites, of all options considered, this option is also likely to afford least protection for the integrity of European sites. However the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including potentially requiring Green Belt release and potentially sites within the zone of influence of European designated sites. **Mitigation measures**: Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.
11. To safeguard the best and most versatile agricultural land; improve soil and land resources;	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land?	?/-	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for the best and most versatile agricultural land and

SA Objective	Option 4: 450 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
and protect and enhance geological resources.	• Will it reduce land contamination / instability? • Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?				as it proposes the highest level of housing growth of all options considered, this option is likely to provide least overall, long-term protection for the best and most versatile agricultural land.	geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation? • Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	?/-	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However with the highest level of housing growth proposed, of all options considered, this option is least likely to result in protection of cultural and historic heritage assets (designated and non-designated) along with their settings.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.

SA Objective	Option 4: 450 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Will it promote development on brownfield land? • Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	?/-	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study[(6)] offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA[(7)] identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. With the highest level of housing growth proposed, of all options considered, this option is the least likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and other natural assets and resources.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. With the highest level of housing growth proposed, of all options considered, this option is the most likely to result in a long-term, adverse impact on local distinctiveness, potentially leading to an associated long-term negative impact on tourism and the visitor economy. However, this is balanced by the option also providing the most opportunity for investment in culture and tourism that could result in long-term positive effects on the local economy.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. **Mitigation measures**: Local

SA Objective	Option 4: 450 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
						Plan policies to support tourism and the visitor economy.
ECONOMIC						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	++	++	++	This option uses the scenario based on past trends job growth but incorporating partial catch up headship rates. Modelling the level of housing needed were historic job growth trends set to continue over the plan period indicates there would need to be an increase in the population of 13,697 in the district 2014-31. The increase in spending in the local economy this is likely to generate should result in significant benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. However these benefits should be treated with caution since the SHMA December 2016 update notes that the population growth would primarily be achieved by very significant levels of net inward migration counteracting natural change and this is likely to require a step change in migration above the level that may be achievable in the district.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Residents of new developments will support their local retail, leisure and service provision. To achieve the 450dpa that would be required based on a continuation of past job growth rates would require a 6-fold increase in net population growth compared to the 2014-based SNPP and would require more than 10,000 additional migrants from elsewhere across the UK/abroad to move into the district. **Mitigation measures**: Local Plan policies to support town and village centres.
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	++	++	++	This projection estimates that there could be an increase in the labour force of 3,746 2014-31 (220pa). This is likely to result in a significant positive effect on business, the local economy and local employment. However these benefits should be treated with caution since SHMA December 2016 update notes that the population growth would primarily be achieved by very significant levels of net inward migration counteracting natural change and this is likely to require a step change	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A local labour supply will help to deliver economic growth across the plan area. **Mitigation measures**: Local Plan policies to support sustainable economic growth.

SA Objective	Option 4: 450 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					in migration above the level that may be achievable in the district.	
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	++	++	++	The past trends scenario provides employment growth in the district of 3,038 jobs 2014-31 (179pa). The option is likely to have a significant positive effect on the local economy and local employment. However these benefits should be treated with caution since the SHMA December 2016 update notes that the population growth required to underpin this job growth would primarily be achieved by inward migration as opposed to natural change. To achieve the 450dpa that would be required based on a continuation of past job growth rates would require a 6-fold increase in net population growth compared to the 2014-based SNPP and would require more than 10,000 additional migrants from elsewhere across the UK/abroad to move into the district.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.

Summary of significant effects:

This option proposes the delivery of 450 new dwellings per year. It will have a direct and significant positive effect on the SA objective to ensure provision of homes to meet local needs since it exceeds the upper end of the recommended objectively assessed housing need range. This option should make the greatest contribution of all options considered to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 13,700 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including helping to safeguard local shops and services. The past trends scenario provides employment growth in the district of 3,038 jobs 2014-31 (179pa) and an increase in the labour force of 3,746 2014-31 (220pa). As a result, the option is likely to have a significant positive effect on the local economy and local employment. However these predicted positive effects should be treated with caution, since the SHMA December 2016 update notes that the population growth required to underpin this job growth would primarily be achieved by inward migration as opposed to natural change. To achieve the 450dpa that would be required based on a continuation of past job growth rates would require a 6-fold increase in net population growth compared to the 2014-based SNPP and would require more than 10,000 additional migrants from elsewhere across the UK/abroad to move into the district. This is considered to be at odds with what may be reasonably expected to occur in the district. As the highest growth option, requiring the highest number of site allocations, by comparison with other options considered, this alternative is likely to result in significant negative effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets. The high level of housing growth is also likely to result in negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. This level of new housing development is not likely to enable growth to be focused on small urban extensions and small sites within the existing settlement boundaries, which

SA Objective	Option 4: 450 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
may result in increasing the distance people need to travel to access key services and facilities and makes the use of sustainable forms of transport less likely. However since this option proposes the highest level of growth, it is likely to result in the highest level of investment in community facilities, including Green Infrastructure and other measures that may help to reduce health inequalities, leading to positive effects on the SA objective relating to supporting health improvements.

January 2016 Housing Requirement Option 1

SA Objective	January 2016 Option 1: 250 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. There is a balance between loss of countryside as a result of development and provision of new, accessible open space as part of new developments. This requirement may offer the least opportunity for	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall housing requirement. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green

SA Objective	January 2016 Option 1: 250 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	and support Green Infrastructure? ● Will it minimise light and noise pollution? ● Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?				associated benefits such as new or enhanced community facilities to be delivered as a result of new development.	Infrastructure are delivered as part of new housing development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	● Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the least housing growth of the four options considered and thus the least opportunity to improve accessibility to key services and facilities. Despite this, lower levels of housing growth will enable a focus of growth on small urban extensions and small sites within the existing settlement boundary which is likely to help minimise the distance people need to travel.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. **Mitigation measures**: Local Plan policies to ensure that new developments are brought forward in sustainable locations.
3. To improve health and reduce health inequalities.	● Will it improve health or access to health facilities? ● Will it promote healthy lifestyles?	?/-	?/-	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the least housing growth of the four options considered and thus the least	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and

SA Objective	January 2016 Option 1: 250 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it reduce health inequalities? • Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?				opportunity to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be a deterioration in health through lack of investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.	cycling. **Mitigation measures**: Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	• Will it reduce actual levels of crime? • Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Will it provide an appropriate mix of housing to enable all needs to be met? • Will it enable people to meet their needs within their existing communities? • Will it ensure that people can afford their housing?	+	+	+	This option represents the lower end of the recommended OAN range[(1)] and by meeting the full demographically-assessed need for housing in the District will have a direct, long-term, positive effect on this SA objective. The requirement is expected to enable the delivery of a range of housing types and tenures, making a contribution to meeting community needs. However the impact of this option on the SA objective is less significant than under all other options. This option is likely to make the least contribution to addressing the needs of an ageing population or ensuring that problems of affordability can be satisfactorily addressed, risking adverse outcomes for older people and those who still need to access the housing market.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Household projections suggest a considerable growth in the number of older people. The SHMA[(2)] identified a critical affordable housing need. Objectively assessed housing need for the District is between 250dpa and 440dpa. This option will meet the objectively assessed housing need of the plan area but fails fully to address affordable housing need, or offer maximum opportunity for investment in meeting the housing needs of older people. **Mitigation measures**: Wider initiatives of the Council should be supported to help deliver additional affordable homes.

SA Objective	January 2016 Option 1: 250 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Will it minimise impacts on existing traffic congestion? • Will it support the use of public transport? • Will it support safe walking and cycling? • Will it protect and improve access to the natural environment and support Green Infrastructure?	?/+	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this requirement could have a positive effect on minimising the impact of new development on existing traffic congestion and could offer support for the use of sustainable forms of transport through delivering most new development close to town and village centres. The option could support priorities and provisions identified in the SMDC integrated transport strategy (3), including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for sustainable transport. **Mitigation measures**: Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.
ENVIRONMENTAL						
7. To minimise contributions to climate change and consider climate change adaptation.	• Will it reduce emissions of greenhouse gases particularly CO_2? • Will it increase energy efficiency? • Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?	-	-	-	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is likely to result in the smallest overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.

SA Objective	January 2016 Option 1: 250 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	?	?	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option represents the lowest level of growth, it is likely to give rise to the lowest level of new emissions of airborne pollutants associated with additional car journeys. In the long-term there is some potential for development to be delivered within 500m of an identified area of poor air quality.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)[(4)]. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and enhance water sources.	• Is new development directed towards areas of least flood risk? • Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development? • Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the SFRA[(5)] confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This option requires the least peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus poses the lowest risk of all options to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.

SA Objective	January 2016 Option 1: 250 new homes each year

		ST	MT	LT		
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest level of growth, this option is likely to provide most overall, long-term protection for biodiversity and natural networks. There will however be the lowest level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes. Given it will lead to the lowest recreational and other urbanising pressures on the closest European sites, of all options considered, this option is also likely to afford most protection for the integrity of European sites. However the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including potentially requiring Green Belt release and potentially sites within the zone of influence of European designated sites. **Mitigation measures**: Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land? • Will it reduce land contamination / instability? • Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest level of growth, this option is likely to provide most overall, long-term protection for the best and most versatile agricultural land.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.

SA Objective	January 2016 Option 1: 250 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation? • Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However with the lowest level of growth proposed, of all options considered, this option is most likely to result in protection of cultural and historic heritage assets (designated and non-designated) along with their settings.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Will it promote development on brownfield land? • Will it safeguard protected sites and	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study[(6)] offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. **Mitigation measures**:

SA Objective	January 2016 Option 1: 250 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	provide opportunities for the enhancement of the natural environment identified in the NCA profiles?				and in sympathy with the setting of a particular settlement. The HEA[(7)] identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. With the lowest level of growth proposed, of all options considered, this option is the most likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and other natural assets and resources.	Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. With the lowest level of growth proposed, of all options considered, this option is the least likely to result in a long-term, adverse impact on local distinctiveness, potentially leading to an associated long-term positive impact on tourism and the visitor economy. However, this is balanced by the option also providing the least opportunity for investment in culture and tourism that could result in long-term negative effects on the local economy.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.
ECONOMIC						

SA Objective	January 2016 Option 1: 250 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	+	+	Under this option, the population of the district is projected to increase by 2,882 to 2031. The population growth predicted arises from high levels of in-migration counteracted by natural change resulting from an excess of deaths over births. The increase in spending in the local economy this is likely to generate should result in benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. Although since this option provides for the lowest level of growth, the benefits would be lowest of all options considered.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Residents of new developments will support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	-	--	--	This option is likely to lead to the loss of 2,075 jobs over the plan period. This is likely to result in a significant negative effect on business, the local economy and local employment through a lack of encouragement for investment in business and infrastructure.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A local labour supply will help to deliver economic growth across the plan area. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	-	--	--	It is projected that the number of people aged over 65 in the District will increase by 39% by 2031. The oldest age groups (75-84 and 85+) would see the most substantial increases of 69% and 134% respectively[8]. Under this option, the ageing profile of the population is likely to result in a reduction in the labour force, with the working age population expected to decline by 4,058 by 2031. Taking into account overall economic activity rates of individual age groups, this option	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.

SA Objective	January 2016 Option 1: 250 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					indicates that the labour force would decline by 2,075 over the plan period. The option is likely to have a negative effect on the local economy and local employment.	

Summary of significant effects:

This option proposes the delivery of 250 new dwellings per year. It will have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs since it represents the lower end of the recommended objectively assessed housing need range. However being the lower end of the range, the option makes the least contribution of all options considered to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 2,800 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages including helping to safeguard local shops and services. However since this option provides for the lowest level of growth, these benefits would be lowest of all options considered. This option is likely to lead to the loss of 2,075 jobs over the plan period. This is likely to result in a significant negative effect on business, the local economy and local employment through a lack of encouragement for investment in business and infrastructure. As the lowest growth option, requiring the lowest number of site allocations, by comparison with other options considered, this alternative is likely to result in minor positive effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets. The low level of growth is also likely to minimise the negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. The low level of growth is also likely to help enable a focus of new development on small urban extensions and small sites within existing settlement boundaries resulting in minor positive effects on minimising the distance people need to travel to access key services and facilities and increasing the opportunities for use of sustainable forms of transport. However since this option proposes the lowest level of growth, it is also likely to result in the lowest level of investment in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to minor negative effects on the SA objective relating to supporting health improvements.

January 2016 Housing Requirement Option 2

SA Objective	January 2016 Option 2: 320 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure? • Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. There is a balance between loss of countryside as a result of development and provision of new, accessible open space as part of new developments. This requirement may offer fewer opportunities than options 3 and 4 for achieving associated benefits of investment, such as new or enhanced community facilities, but there would be more opportunities than under option 1.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall housing requirement. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Will it help to minimise the distance people	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under option 1, but less growth than proposed under options 3 or 4 and thus some opportunity to improve accessibility to key services and facilities. Lower levels of housing growth may enable a focus of growth on small urban extensions and small sites within the existing settlement boundary which is likely to help minimise the distance people need to travel.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. **Mitigation measures**: Local Plan policies to ensure that new developments are brought forward in sustainable locations.

SA Objective	January 2016 Option 2: 320 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	need to travel to access education, employment, shopping and other key services and facilities.					
3. To improve health and reduce health inequalities.	• Will it improve health or access to health facilities? • Will it promote healthy lifestyles? • Will it reduce health inequalities? • Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?	?	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under option 1, but less growth than proposed under options 3 or 4 and thus some opportunity to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be a deterioration in health through lack of investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling. **Mitigation measures**: Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	• Will it reduce actual levels of crime? • Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range of house types to meet local needs in	• Will it provide an appropriate mix of housing to enable all needs to be met?	+	+	++	This option represents the job stabilisation / past trends job growth scenario(1). It is also broadly aligned with the requirement identified in the adopted Core Strategy (300dpa). By meeting the full assessed need for housing in the District, this	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Household projections suggest a considerable growth in the number of older people. The SHMA(2) identified a critical affordable

SA Objective	January 2016 Option 2: 320 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
appropriate locations and including affordable / social /extra care housing.	• Will it enable people to meet their needs within their existing communities? • Will it ensure that people can afford their housing?				option will have a direct, long-term, positive effect on the SA objective. The requirement is expected to enable the delivery of a range of housing types and tenures, making a contribution to meeting community needs. While the impact of this option on the SA objective is greater than that under option 1, it is less significant than under options 3 and 4. Whilst this option is likely to contribute to addressing the needs of an ageing population and ensuring that problems of affordability can be addressed, there is a greater risk of adverse outcomes for older people and those who still need to access the housing market than under options 3 and 4.	housing need. Objectively assessed housing need for the District is between 250dpa and 440dpa. This option will meet the objectively assessed housing need of the plan area but fails fully to address affordable housing need, or offer maximum opportunity for investment in meeting the housing needs of older people. **Mitigation measures**: Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Will it minimise impacts on existing traffic congestion? • Will it support the use of public transport? • Will it support safe walking and cycling? • Will it protect and improve access to the natural environment and support Green Infrastructure?	?/+	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement could have a long-term positive effect on minimising the impact of new development on existing traffic congestion and could offer support for the use of sustainable forms of transport through delivering new development close to town and village centres. The option could support priorities and provisions identified in the SMDC integrated transport strategy (3), including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for sustainable transport. **Mitigation measures**: Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.
ENVIRONMENTAL						

SA Objective	January 2016 Option 2: 320 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
7. To minimise contributions to climate change and consider climate change adaptation.	• Will it reduce emissions of greenhouse gases particularly CO_2? • Will it increase energy efficiency? • Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?	-	-	- -	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in a lower overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys. In the long-term there is likely to be a more significant negative impact than under option 1 since this proposes lower growth.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	?	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to give rise to lower levels of new emissions of airborne pollutants associated with additional car journeys. In the medium and long-term there is likely to be a more significant negative impact than under option 1 and some potential for development to be delivered within 500m of an identified area of poor air quality.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)[(4)]. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, there is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and	• Is new development directed towards areas of least flood risk?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**:

SA Objective	January 2016 Option 2: 320 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
enhance water sources.	• Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development? • Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?				on the location of development and the implementation of Local Plan policies. However the SFRA[(5)] confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. Since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in less peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus result in less risk of surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration. Although in the long-term there is likely to be a more significant negative impact than under option 1.	Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However, since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to provide overall, long-term protection for biodiversity and natural networks. However in comparison with options 3 and 4, there is likely to be a lower level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes. Given that in comparison with options 3 and 4, this requirement is likely to lead to lower recreational and other urbanising pressures on the	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including sites potentially requiring Green Belt release or within the zone of influence of European designated sites. **Mitigation measures**: Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.

SA Objective	January 2016 Option 2: 320 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					closest European sites, the option is also likely to afford long-term protection for the integrity of European sites. Whilst positive impacts are not as significant as under option 1, the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.	
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land? • Will it reduce land contamination / instability? • Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to provide overall, long-term protection for the best and most versatile agricultural land. However positive impacts are not as significant as under option 1.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation? • Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns /	• Will it ensure the continued protection and enhancement of	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide

		ST	MT	LT		
					resources. Positive impacts are not as significant as under option 1.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is less likely to result in a long-term, adverse impact on local distinctiveness, and this may lead to a long-term positive impact on tourism and the visitor economy. The significance is less than under option 1. The positive impacts are balanced by the requirement also providing less opportunity than under options 3 and 4 for investment in culture and tourism and this may result in long-term negative effects on the local economy.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.
ECONOMIC						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	+	++	This option assumes that the number of jobs in the District remains at its current (2012) level over the plan period and since there is an ageing population, there would be a need for growth in the labour force, in-migration and ultimately housing. Creating a labour force large enough to support jobs would result in a population increase of 7,901. The increase in spending in the local economy this is likely to generate should result in benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. Although since this option proposes a lower level of growth than under options 3 and 4, in comparison with	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Residents of new developments will support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.

SA Objective	January 2016 Option 2: 320 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					other alternatives considered, this requirement is likely to result in less significant benefits. Benefits would be more significant than under option 1.	
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	+	+	+	This option is likely to lead to zero additional jobs (or a marginal increase from the 10% uplift for affordable housing) and is expected to help stem the decline of working age residents in the District. This is likely to result in a minor positive effect on business, the local economy and local employment.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Helping to stem the decline of working age residents in the District would achieve a more balanced population structure and reduce potential future economic difficulties and the demands of services associated with an ageing population and a more limited supply of labour. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	0	0	+	This option is expected to maintain the current number of jobs in the District. This is likely to result in a long term minor positive impact on the local economy and local employment.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
Summary of significant effects: This option proposes the delivery of 320 new dwellings per year. Since it is within the recommended objectively assessed housing need range, the housing requirement would have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs. This positive effect is likely to be more significant than under option 1. However being closer to the lower end of the range than options 3 and 4, the option makes less of a contribution than options 3 and 4 to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 7,900 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and services. Under this option, these benefits are likely to be more significant than under option 1 and less significant than under options 3 and 4. This option is expected to maintain the current number of jobs in the district over the plan period. This is likely to result in a long term minor positive impact on business, the local economy and					

SA Objective	January 2016 Option 2: 320 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
local employment. This compares favourably with the impacts on this objective likely under option 1, where significant negative impacts on SA objectives for supporting employment and economic growth are likely. However the positive impacts on economic growth under this option are less significant than those likely to result under options 3 and 4. Option 2 requires the second lowest number of site allocations of the four options considered, and consequently this alternative is likely to result in comparatively more positive effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets than options 3 and 4. Positive effects on these objectives are slightly less under this option than under option 1. The lower level of growth under option 2 compared with options 3 and 4 is also likely to minimise the negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. The lower level of growth is also likely more likely under option 2 than options 3 and 4 to enable a focus of new development on small urban extensions and small sites within existing settlement boundaries resulting in minor positive effects on minimising the distance people need to travel to access key services and facilities and increasing the opportunities for use of sustainable forms of transport. Benefits under option 2 in this regard are not likely to be as great as under option 1. However since option 2 proposes the second lowest level of growth of the four options considered, it is likely to result in a lower level of investment than under options 3 and 4 in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to possible minor negative effects on the SA objective relating to supporting health improvements. These negative effects are not likely to be as significant as under option 1.

January 2016 Housing Requirement Option 3

SA Objective	January 2016 Option 3: 440 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure? • Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. There is a balance between loss of countryside as a result of development and provision of new, accessible open space as part of new developments. This requirement may offer more opportunities than options 1 and 2 for achieving associated benefits of investment, such as new or enhanced community facilities, but there would be less opportunities than under option 4.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall housing requirement. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Will it help to minimise the distance people	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under options 1 and 2 (but less growth than proposed under option 4) and consequently there is opportunity to improve accessibility to key services and facilities through delivering more investment into the rural areas. However under this option it is less likely than under options 1 and 2 that the focus of growth could be delivered as small urban extensions and small sites within existing settlement boundaries and this may	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. **Mitigation measures**: Local Plan policies to ensure that new developments are brought forward in sustainable locations.

SA Objective	January 2016 Option 3: 440 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	need to travel to access education, employment, shopping and other key services and facilities.				increase the distance that some people would need to travel in order to access key services and facilities.	
3. To improve health and reduce health inequalities.	• Will it improve health or access to health facilities? • Will it promote healthy lifestyles? • Will it reduce health inequalities? • Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under options 1 and 2 (but less growth than proposed under option 4) and consequently there is opportunity to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be an indirectly positive effect on health through enabling investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling. **Mitigation measures**: Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	• Will it reduce actual levels of crime? • Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range of house types to meet local needs in	• Will it provide an appropriate mix of housing to enable all needs to be met?	+	++	++	This option represents the Oxford Economics Job Growth scenario(1). This option represents to upper end of the objectively assessed housing need range. By meeting the full assessed need for housing in the District, this option will have a direct, medium and	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Household projections suggest a considerable growth in the number of older people. The SHMA(2) identified a critical

SA Objective	January 2016 Option 3: 440 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
appropriate locations and including affordable / social /extra care housing.	• Will it enable people to meet their needs within their existing communities? • Will it ensure that people can afford their housing?				long-term, positive effect on the SA objective. The requirement is expected to enable the delivery of a range of housing types and tenures, making a significant contribution to meeting community needs. While the impact of this option on the SA objective is greater than that under options 1 and 2, it is less significant than under option 4. As the upper end of the OAN range, this option is likely to make a significant contribution to addressing the needs of an ageing population and ensuring that problems of affordability can be addressed.	affordable housing need. Objectively assessed housing need for the District is between 250dpa and 440dpa. This option will meet the objectively assessed housing need of the plan area and address both affordable housing need and the housing needs of older people. **Mitigation measures**: Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Will it minimise impacts on existing traffic congestion? • Will it support the use of public transport? • Will it support safe walking and cycling? • Will it protect and improve access to the natural environment and support Green Infrastructure?	?	?	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement could have a long-term negative effect on minimising the impact of new development on existing traffic congestion. Due to the extent of sites that are likely to be allocated under this option, it is less likely than under options 1and 2 that a high proportion of new development can be delivered close to town and village centres, possibly resulting in a lower use of sustainable forms of transport. The option is likely to support priorities and provisions identified in the SMDC integrated transport strategy [(3)], including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for sustainable transport. **Mitigation measures**: Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.
ENVIRONMENTAL						

SA Objective	January 2016 Option 3: 440 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
7. To minimise contributions to climate change and consider climate change adaptation.	• Will it reduce emissions of greenhouse gases particularly CO_2? • Will it increase energy efficiency? • Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?	-	--	--	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement is likely to result in a higher overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys. Impacts are likely to be less significant than under option 4.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	?	?/-	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement is likely to give rise to higher levels of new emissions of airborne pollutants associated with additional car journeys. In the medium and long-term there is likely to be a more significant negative impact than under options 1 and 2 and some potential for development to be delivered within 500m of an identified area of poor air quality. Impacts are likely to be less significant than under option 4.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)**(4)**. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, there is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and	• Is new development directed towards areas of least flood risk?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**:

SA Objective	January 2016 Option 3: 440 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
enhance water sources.	• Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development? • Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?				on the location of development and the implementation of Local Plan policies. However the SFRA(5) confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. Since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement is likely to result in more peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus result in more risk of surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration. Although in the long-term there is likely to be a less significant impact than under option 4.	Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	?	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. Since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is less likely to provide long-term protection for biodiversity and natural networks. However in comparison with options 1 and 2, there is likely to be a higher level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes (but less opportunity than under option 4). Given that in comparison with options 1 and 2, this requirement is likely to lead to increased recreational and other urbanising	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including sites potentially requiring Green Belt release or within the zone of influence of European designated sites. **Mitigation measures**: Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.

SA Objective	January 2016 Option 3: 440 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					pressures on the closest European sites, the option is also less likely to afford long-term protection for the integrity of European sites. Whilst such negative impacts are not as significant as under option 4, the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.	
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land? • Will it reduce land contamination / instability? • Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?	?	?	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is less likely to provide overall, long-term protection for the best and most versatile agricultural land. However negative impacts are not as significant as under option 4.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation? • Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns /	• Will it ensure the continued protection and enhancement of	?	?	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide

SA Objective	January 2016 Option 3: 440 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
villages and other heritage and archaeological assets along with their settings.	cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?				implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is likely to result in less protection of cultural and historic heritage assets (designated and non-designated) along with their settings. Negative impacts are not as significant as under option 4.	protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Will it promote development on brownfield land? • Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	?	?	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study[(6)] offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA[(7)] identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. Since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is less likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.

SA Objective	January 2016 Option 3: 440 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					other natural assets and resources. Negative impacts are not as significant as under option 4.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is more likely to result in a long-term, adverse impact on local distinctiveness, and this may lead to a long-term negative impact on tourism and the visitor economy. The significance is less than under option 4. The negative impacts are balanced by the requirement also providing more opportunity than under options 1 and 2 for investment in culture and tourism and this may result in medium term positive effects on the local economy.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.
ECONOMIC						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	++	++	This option uses Oxford Economics projections of future employment growth in the district. It represents the "unconstrained" potential of the area based on its existing business base, mix of sectors and inherent economic qualities. To support the increase in jobs projected by the model, the total population would need to grow by 13,393 over the plan period. The increase in spending in the local economy this would generate is likely to result in benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. Since this option proposes a higher level of growth than under	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Residents of new developments will support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.

SA Objective	January 2016 Option 3: 440 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is likely to result in significant benefits for the economies of existing centres. Benefits however are likely to be less significant than under option 4.	
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	+	+	++	This option is based on modelled job growth of an additional 2,250 jobs over the plan period. This is likely to result in long-term positive effects on business, the local economy and local employment.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Helping to reverse the decline of working age residents in the District would achieve a more balanced population structure and reduce potential future economic difficulties and the demand of services associated with an ageing population and a more limited supply of labour. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	+	+	++	This option is expected to deliver sufficient labour force levels to support the Oxford Economics job growth projections, a labour force increase of 1,549. This is likely to allow for the economic potential of the district to be realised and result in medium and long term positive impacts on the local economy and local employment.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
Summary of significant effects: This option proposes the delivery of 440 new dwellings per year. Since it is the upper end of the recommended objectively assessed housing need range, the housing requirement would have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs. This positive effect is likely to be more significant than under options 1 and 2. As the upper end of the range, the option is likely to make a significant contribution to addressing affordable housing need and the needs of an ageing population. Predicted population						

SA Objective	January 2016 Option 3: 440 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	growth of around 13,400 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and services. Under this option, these benefits are likely to be more significant than under options 1 and 2, but less significant than under option 4. This option is based on expected job growth of 2,250 in the district over the plan period. This is likely to allow for the economic potential of the district to be realised and result in medium and long term positive impacts on the local economy and local employment. Option 3 requires the second highest number of site allocations of the four options considered, and consequently this alternative is likely to result in comparatively more negative effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets than options 1 and 2. Negative effects on these objectives are slightly less under this option than under option 4. The higher level of growth under option 3 compared with options 1 and 2 is also likely to result in negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. Due to the extent of sites that are likely to be allocated under this option, it is less likely than under options 1 and 2 that a high proportion of new development can be delivered close to town and village centres, resulting in negative effects on minimising the distance people need to travel to access key services and facilities and reducing the opportunities for use of sustainable forms of transport. Negative effects under option 3 in this regard are not likely to be as great as under option 4. However since option 3 proposes the second highest level of growth of the four options considered, it is likely to result in a higher level of investment than under options 1 and 2 in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to possible minor positive effects on the SA objective relating to supporting health improvements. These positive effects are not likely to be as significant as under option 4.

January 2016 Housing requirement option 4

SA Objective	January 2016 Option 4: 520 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure? • Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	?	?	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. There is a balance between loss of countryside as a result of development and provision of new, accessible open space as part of new developments. This requirement is likely to offer the most opportunity for associated benefits such as new or enhanced community facilities to be delivered as a result of new development.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall housing requirement. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Will it help to minimise the distance people	?	?	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the highest level of housing growth of the four options considered and thus the greatest opportunity to improve accessibility to key services and facilities through delivering more investment into the rural areas. However, this level of new housing development is not likely to enable growth to be focused on small urban extensions and small sites within the existing settlement boundaries, which may result in increasing the distance people need to travel.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. **Mitigation measures**: Local Plan policies to ensure that new developments are brought forward in sustainable locations.

SA Objective	January 2016 Option 4: 520 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	need to travel to access education, employment, shopping and other key services and facilities.					
3. To improve health and reduce health inequalities.	• Will it improve health or access to health facilities? • Will it promote healthy lifestyles? • Will it reduce health inequalities? • Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?	?	?	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the highest level of housing growth of the four options considered and thus present the most opportunities to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be an improvement in health through increased investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling. **Mitigation measures**: Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	• Will it reduce actual levels of crime? • Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations	• Will it provide an appropriate mix of housing to enable all needs to be met? • Will it enable people to meet their needs within	++	++	++	This option exceeds the upper end of the recommended OAN range[(1)] and by meeting the full, objectively assessed need for housing in the District, it will have a direct, long-term, positive effect on this SA objective. The requirement is expected to enable the delivery of a range of	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Household projections suggest a considerable growth in the number of older people. The SHMA[(2)] identified a critical affordable housing need. Objectively assessed housing

SA Objective	January 2016 Option 4: 520 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
and including affordable / social /extra care housing.	their existing communities? ● Will it ensure that people can afford their housing?				housing types and tenures, making a significant contribution to meeting community needs. The impact of this option on the SA objective is more significant than under all other options. This option is likely to make the most contribution to addressing the needs of an ageing population and ensuring that problems of affordability can be satisfactorily addressed, improving outcomes for older people and those who still need to access the housing market.	need for the District is between 250dpa and 440dpa. This option will meet the objectively assessed housing need of the plan area and will go further than any other option considered towards addressing affordable housing need and offering opportunities for investment in meeting the housing needs of older people. **Mitigation measures**: Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	● Will it minimise impacts on existing traffic congestion? ● Will it support the use of public transport? ● Will it support safe walking and cycling? ● Will it protect and improve access to the natural environment and support Green Infrastructure?	?/-	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this requirement is likely to have a negative effect on minimising the impact of new development on existing traffic congestion. Due to the number of site allocations that would be required, it is likely that some new development would be delivered remote from town and village centres, making the use of sustainable forms of transport less likely. The option could support priorities and provisions identified in the SMDC integrated transport strategy **(3)**, including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for walking and cycling initiatives. **Mitigation measures**: Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.
ENVIRONMENTAL						
7. To minimise contributions to climate change and consider climate change adaptation.	● Will it reduce emissions of greenhouse gases particularly CO_2? ● Will it increase energy efficiency?	--	--	--	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is likely to result in the greatest overall increase in carbon emissions from the energy	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car

SA Objective	January 2016 Option 4: 520 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?				consumption and emissions arising from construction and use of new development and associated car journeys.	journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	?	?/-	--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option represents the highest level of housing growth, it is likely to give rise to the highest level of new emissions of airborne pollutants associated with additional car journeys. In the medium-term there is potential for development to be delivered within 500m of an identified area of poor air quality.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)[(4)]. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and enhance water sources.	• Is new development directed towards areas of least flood risk? • Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the SFRA[(5)] confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas

SA Objective	January 2016 Option 4: 520 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?				located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This option requires the most peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus poses the greatest risk of all options to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.	of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	?/-	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the highest level of housing growth, of all options considered, this option is likely to provide least overall, long-term protection for biodiversity and natural networks. There will however be the greatest level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes. Given it will lead to the highest recreational and other urbanising pressures on the closest European sites, of all options considered, this option is also likely to afford least protection for the integrity of European sites. However the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including potentially requiring Green Belt release and potentially sites within the zone of influence of European designated sites. **Mitigation measures**: Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land?	?/-	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the highest level of housing growth of all options considered, this option is likely to	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater

SA Objective	January 2016 Option 4: 520 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
enhance geological resources.	• Will it reduce land contamination / instability? • Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?				provide least overall, long-term protection for the best and most versatile agricultural land.	the need to allocate agricultural (greenfield) sites. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation? • Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	?/-	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However with the highest level of housing growth proposed, of all options considered, this option is least likely to result in protection of cultural and historic heritage assets (designated and non-designated) along with their settings.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement for the character of towns /

SA Objective	January 2016 Option 4: 520 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
						villages; heritage and archaeological assets along with their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Will it promote development on brownfield land? • Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	?/-	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study[(6)] offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA[(7)] identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. With the highest level of housing growth proposed, of all options considered, this option is the least likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and other natural assets and resources.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. With the highest level of housing growth proposed, of all options considered, this option is the most likely to result in a long-term, adverse impact on local distinctiveness, potentially leading to an associated long-term negative impact on tourism and the visitor economy. However, this is balanced by the option also providing the most opportunity for investment	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most

SA Objective	January 2016 Option 4: 520 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					in culture and tourism that could result in long-term positive effects on the local economy.	opportunities for investment that may support tourism and the visitor economy. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.
ECONOMIC						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	++	++	++	This option uses the scenario based on job creation figures set out in the Council's ELR(8). To underpin a level of job growth based on projecting increasing growth in targeted industrial sectors in line with regional averages there would need to be an increase in the population of 17,202 in the district over the plan period. The increase in spending in the local economy this is likely to generate should result in significant benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. However these benefits should be treated with caution since the 2012-based SNHP update notes that the population growth would primarily be achieved by inward migration as opposed to natural change and this would require a step change in migration above the level that is likely to be achievable in the district.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Residents of new developments will support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or	++	++	++	This option is based on an objective forecast of how the district could perform in economic terms based on the nature of its economy and current expectations of future national and regional economic performance. This projection estimates that there could be a total (net additional) job growth of around 3,878 over the plan period. This is likely to result in a significant positive effect on business, the local economy and local employment. However these benefits should be	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A local labour supply will help to deliver economic growth across the plan area. **Mitigation measures**: Local Plan policies to support sustainable economic growth.

SA Objective	January 2016 Option 4: 520 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	displacement of existing businesses?				treated with caution since the 2012-based SNHP update notes that the population growth required to underpin this job growth would primarily be achieved by inward migration as opposed to natural change and this would require a step change in migration above the level that is likely to be achievable in the district.	
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	++	++	++	This option is based on a scenario factoring in increased economic growth in the key sectors in line with the regional average and provides unconstrained employment growth in the district of 3,878 jobs over the course of the plan period. The option is likely to have a significant positive effect on the local economy and local employment. However these benefits should be treated with caution since the 2012-based SNHP update notes that the population growth required to underpin this job growth would primarily be achieved by inward migration as opposed to natural change. Net migration would need to increase from +7,373 to +20,645 - over 13,000 net additional in migrants to achieve the required population level (all other assumptions remaining constant). This is considered to be at odds with what may be reasonably expected to occur in the district.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
Summary of significant effects: This option proposes the delivery of 520 new dwellings per year. It will have a direct and significant positive effect on the SA objective to ensure provision of homes to meet local needs since it exceeds the upper end of the recommended objectively assessed housing need range. This option should make the greatest contribution of all options considered to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 17,000 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including helping to safeguard local shops and services. This option is based on an objective forecast of how the district could perform in economic terms based on the nature of its economy and current expectations of future national and regional economic performance and provides unconstrained employment growth in the district of 3,878 jobs over the plan period. As a result, the option is likely to have a significant positive effect on the local economy and local employment. However these predicted positive effects should be treated with caution, since the 2012-based SNHP update notes that the population growth required to underpin this job growth would primarily be achieved by inward						

SA Objective	January 2016 Option 4: 520 new homes each year					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
migration as opposed to natural change. Net migration would need to increase from +7,373 to +20,645 - over 13,000 net additional in migrants to achieve the required population level (all other assumptions remaining constant). This is considered to be at odds with what may be reasonably expected to occur in the district. As the highest growth option, requiring the highest number of site allocations, by comparison with other options considered, this alternative is likely to result in significant negative effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets. The high level of housing growth is also likely to result in negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. This level of new housing development is not likely to enable growth to be focused on small urban extensions and small sites within the existing settlement boundaries, which may result in increasing the distance people need to travel to access key services and facilities and makes the use of sustainable forms of transport less likely. However since this option proposes the highest level of growth, it is likely to result in the highest level of investment in community facilities, including Green Infrastructure and other measures that may help to reduce health inequalities, leading to positive effects on the SA objective relating to supporting health improvements.

Appraisal of alternative options for an employment land requirement

14 Appraisal of alternative options for an employment land requirement

February 2017 Option 1: 13 hectares

SA Objective	Option 1: 13 hectares to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure? • Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall employment land requirement. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new employment development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Will it help to minimise the distance people need to travel to access education, employment, shopping and	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies. This option represents the lower end of the range and as such may provide less opportunities than under all other options to allocate employment space across the district and thus help to minimise the distance people may need to travel to access jobs.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs. **Mitigation measures**: Local Plan policies to ensure that new employment developments are brought forward in sustainable locations.

SA Objective	Option 1: 13 hectares to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	other key services and facilities.					
3. To improve health and reduce health inequalities.	• Will it improve health or access to health facilities? • Will it promote healthy lifestyles? • Will it reduce health inequalities? • Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies. However this option represents the lower end of the range and as such may provide less opportunities than under all other options to allocate employment space across the district and thus deliver associated opportunities to increase take up of sustainable transport choices and support improvements to healthy travel networks.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The more hectares of employment land allocated, the more opportunities are provided for increasing healthy travel networks. **Mitigation measures**: Local Plan policies to ensure that new employment developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks.
4. To minimise opportunities for crime and reduce the fear of crime.	• Will it reduce actual levels of crime? • Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new employment developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range of house types to meet local needs in	• Will it provide an appropriate mix of housing to enable all needs to be met?	-	-	-	In contrast to the other scenarios, this approach (labour supply) focuses on the future supply of labour rather than the demand for labour. The scenario projects the amount of new jobs needed	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Whilst there may not be a direct causal link

SA Objective	Option 1: 13 hectares to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
appropriate locations and including affordable / social /extra care housing.	• Will it enable people to meet their needs within their existing communities? • Will it ensure that people can afford their housing?				to match the future working-age population and how much employment space would be needed to accommodate these jobs. The demographic scenarios identified in the emerging SHMA result in a need for 170dpa and 196dpa. Overall the labour supply scenario is considered likely to lead to negative effects on this SA objective.	between housing and employment land requirements, there is nevertheless a need to ensure that the two dovetail together to avoid any unsustainable outcomes. **Mitigation measures**: The Local Plan may need to set out a strong policy intervention to ensure that the housing implications of the preferred employment land requirement are addressed.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Will it minimise impacts on existing traffic congestion? • Will it support the use of public transport? • Will it support safe walking and cycling? • Will it protect and improve access to the natural environment and support Green Infrastructure?	?/-	?/-	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The district has high levels of out commuting to Stoke-on-Trent, East Staffordshire and Newcastle-under-Lyme. This option represents the lower end of the range and as such may provide less opportunities than under all other options to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Reducing out commuting will help to reduce the number of journeys made by car overall. **Mitigation measures**: Local Plan policies to ensure that employment developments are brought forward in sustainable locations and support safe walking and cycling.
ENVIRONMENTAL						
7. To minimise contributions to climate change and consider climate change adaptation.	• Will it reduce emissions of greenhouse gases particularly CO_2? • Will it increase energy efficiency?	-	-	-	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is likely to lead to the lowest overall increase in carbon emissions from the	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if employment developments are built to high environmental performance standards and

SA Objective	Option 1: 13 hectares to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?				energy consumption and emissions arising from construction and use of new development and associated car journeys.	delivered in sustainable locations, the total increase in employment opportunity and related car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	?	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option represents the lowest end of the employment land requirement range, it is likely to lead to the lowest level of new emissions of airborne pollutants associated with additional car journeys. In the long-term there is potential for development to be delivered within 500m of an identified area of poor air quality.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)**(1)**. The allocation of new employment land and car journeys from increased local employment opportunities is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate

SA Objective	Option 1: 13 hectares to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
						landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and enhance water sources.	• Is new development directed towards areas of least flood risk? • Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development? • Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the SFRA(2) confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This option requires the least allocation of employment land, and thus poses the lowest risk of all options to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance. **Mitigation measures**: Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.

SA Objective	Option 1: 13 hectares to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land? • Will it reduce land contamination / instability? • Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to most overall, long-term protection for geological resources.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for geological resources including the best and most versatile agricultural land. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation? • Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to most overall, long-term protection for the character of settlements along with heritage assets and their settings.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. **Mitigation measures**: Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.

SA Objective	Option 1: 13 hectares to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Will it promote development on brownfield land? • Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study[3] offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA[4] identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to most overall, long-term protection for landscape character and other natural assets.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for landscape character and natural assets. **Mitigation measures**: Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term support for sustainable tourism.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A thriving district with a robust cultural and visitor economy will require sufficient supply of local employment land. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.
ECONOMIC						

SA Objective	Option 1: 13 hectares to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	+	+	Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and a positive contribution being made to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term support for the vitality and viability of the district's towns and villages.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Employees of expanding and incoming businesses will support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	+	+	++	This option would help to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term support for strengthening, modernising and diversifying the district economy.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A local supply of employment land will help to deliver economic growth across the plan area. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	+	+	-	The labour supply scenario forecasts workforce jobs to be 35,485 in 2031 (a decline of 1,637 since 2014). As it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term support for encouraging a high and stable level of employment.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Ensuring a sufficient supply of employment land is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
Summary of significant effects:						

SA Objective	Option 1: 13 hectares to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
This option is based on labour supply projections and proposes the delivery of 13ha of employment land to 2031 (gross). This option represents the lower end of the range and as such may provide less opportunities than under all other options to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow. However It is still likely to lead to a positive effect on the local economy and local employment through helping to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term support for strengthening, modernising and diversifying the district economy. The labour supply scenario forecasts workforce jobs to be 35,485 in 2031 (a decline of 1,637 since 2014), of all options considered, this option is likely to lead to least overall, long-term support for encouraging a high and stable level of employment. Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and make a positive contribution to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. However this option makes the least positive contribution to this of all options considered. The option is considered likely to lead to negative effects on meeting housing need since the scenario projects the amount of new jobs needed to match the future working-age population and how much employment space would be needed to accommodate these jobs. The demographic scenarios identified in the emerging SHMA result in a need for 170dpa and 196dpa and housing supply at this level is not considered sufficient to meet objectively assessed need. Further negative effects are likely to result on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys. Since the option represents the lowest allocation of new employment land there is less opportunity to deliver employment close to where people live, potentially increasing the distance people need to travel to access key services and facilities and making the use of sustainable forms of transport less likely. In addition, this option offers least opportunity to address the high levels of out commuting from the district, leading to negative effects predicted for the objective to reduce the number of journeys made by car. Uncertain effects are recorded on a number of SA objectives including those relating to community cohesion, the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets as the effect will be dependent on the location of employment land allocations and the implementation of Local Plan policies.					

Table 14.1 Assessment Table for Option 1: 13 hectares

Option 2: 16 hectares

SA Objective	Option 2: 16 hectares 2014 - 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure? • Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall employment land requirement. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new employment development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Will it help to minimise the distance people need to travel to access education, employment, shopping and	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies. This option is lower-mid range and as such may provide more opportunity than option 1, but less opportunity than under options 3 and 4 to allocate employment space across the district and thus help to minimise the distance people may need to travel to access jobs.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs. **Mitigation measures**: Local Plan policies to ensure that new employment developments are brought forward in sustainable locations.

SA Objective	Option 2: 16 hectares 2014 - 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	other key services and facilities.					
3. To improve health and reduce health inequalities.	• Will it improve health or access to health facilities? • Will it promote healthy lifestyles? • Will it reduce health inequalities? • Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies. However this option is lower-mid range and as such may provide more opportunity than option 1, but less opportunity than under options 3 and 4 to allocate employment space across the district and thus deliver associated opportunities to increase take up of sustainable transport choices and support improvements to healthy travel networks.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The more hectares of employment land allocated, the more opportunities are provided for increasing healthy travel networks. **Mitigation measures**: Local Plan policies to ensure that new employment developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks.
4. To minimise opportunities for crime and reduce the fear of crime.	• Will it reduce actual levels of crime? • Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new employment developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Will it provide an appropriate mix of housing to enable all needs to be met? • Will it enable people to meet their needs within their existing communities? • Will it ensure that people can afford their housing?	+	+	++	This option is based on demand-led projections. For this scenario it has been assumed that the district's overall job growth will stabilise over the coming years (ie zero job growth post 2014). To ensure labour supply to meet the job stabilisation forecasts, higher levels of housing delivery will be required. Overall the demand-led projections	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Whilst there may not be a direct causal link between housing and employment land requirements, there is nevertheless a need to ensure that the two dovetail together to avoid any unsustainable outcomes. **Mitigation measures**: The Local Plan may need to set out a strong policy intervention

SA Objective	Option 2: 16 hectares 2014 - 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					are considered likely to lead to positive effects on this SA objective, particularly in the long term.	to ensure that the housing implications of the preferred employment land requirement are addressed.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Will it minimise impacts on existing traffic congestion? • Will it support the use of public transport? • Will it support safe walking and cycling? • Will it protect and improve access to the natural environment and support Green Infrastructure?	?/+	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The district has high levels of out commuting to Stoke-on-Trent, East Staffordshire and Newcastle-under-Lyme. This option is lower-mid range and as such may provide more opportunity than option 1, but less opportunity than under options 3 and 4 to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Reducing out commuting will help to reduce the number of journeys made by car overall. **Mitigation measures**: Local Plan policies to ensure that employment developments are brought forward in sustainable locations and support safe walking and cycling.
ENVIRONMENTAL						
7. To minimise contributions to climate change and consider climate change adaptation.	• Will it reduce emissions of greenhouse gases particularly CO_2? • Will it increase energy efficiency? • Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?	-	-	--	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is lower-mid range and as such is likely to lead to more impacts than option 1, but less than under options 3 and 4, in terms of overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if employment developments are built to high environmental performance standards and delivered in sustainable locations, the total increase in employment opportunity and related car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.

SA Objective	Option 2: 16 hectares 2014 - 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	?	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option is lower-mid the employment land requirement range, it is likely to lead to more impacts than option 1, but fewer impacts than under options 3 and 4 in relation to new emissions of airborne pollutants associated with additional car journeys. In the long-term there is potential for development to be delivered within 500m of an identified area of poor air quality.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)[(1)]. The allocation of new employment land and car journeys from increased local employment opportunities is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and enhance water sources.	• Is new development directed towards areas of least flood risk? • Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development? • Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the SFRA[(2)] confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This options is lower-mid range, and thus poses more risk than option 1, but less risk than under options 3 and 4 to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.

SA Objective	Option 2: 16 hectares 2014 - 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance. **Mitigation measures**: Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land? • Will it reduce land contamination / instability? • Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option is lower-mid range, it is likely to lead to less opportunity than option 1, but more opportunity than under options 3 and 4, to offer long-term protection for geological resources.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for geological resources including the best and most versatile agricultural land. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation? • Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.

SA Objective	Option 2: 16 hectares 2014 - 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option is lower-mid range, it is likely to lead to less opportunity than option 1, but more opportunity than under options 3 and 4, to offer long-term protection for the character of settlements along with heritage assets and their settings.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. **Mitigation measures**: Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Will it promote development on brownfield land? • Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study[(3)] offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA[(4)] identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. However as this option is lower-mid range, it is likely to lead to less opportunity than option 1, but more opportunity than under options 3 and 4, to offer long-term protection for landscape character and other natural assets.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for landscape character and natural assets. **Mitigation measures**: Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.

SA Objective	Option 2: 16 hectares 2014 - 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option is lower-mid range, it is likely to lead to more opportunity than option 1, but less opportunity than under options 3 and 4, to offer long-term support for sustainable tourism.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A thriving district with a robust cultural and visitor economy will require sufficient supply of local employment land. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.
ECONOMIC						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	+	++	Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and a positive contribution being made to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. However as this option is lower-mid range, it is likely to lead to more opportunity than option 1, but less opportunity than under options 3 and 4, to offer long-term support for the vitality and viability of the district's towns and villages.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Employees of expanding and incoming businesses will support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	+	+	++	This option would help to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). However as this option is lower-mid range, it is likely to lead to more opportunity than option 1, but less opportunity than under options 3 and 4, to offer long-term support for strengthening, modernising and diversifying the district economy.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A local supply of employment land will help to deliver economic growth across the plan area. **Mitigation measures**: Local Plan policies to support sustainable economic growth.

SA Objective	Option 2: 16 hectares 2014 - 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	+	+	+	For this scenario it has been assumed that the district's overall job growth will stabilise over the coming years, ie zero job growth post 2014. To maintain an overall zero job growth it is assumed that B-class job growth will reduce by 433 to 2031. This option is lower-mid range and is likely to lead to more opportunity than option 1, but less opportunity than under options 3 and 4, to offer long-term support for encouraging a high and stable level of employment.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Ensuring a sufficient supply of employment land is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.

Summary of significant effects:

This option is based on a demand-led projection and proposes the delivery of 16ha of employment land 2014 to 2031 (gross). This job stabilisation scenario provides a lower-mid range employment land requirement option and as such may provide more opportunity than option 1, but less opportunity than under options 3 and 4 to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow. However the option is likely to lead to a positive effect on the local economy and local employment through helping to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). As lower-mid-range, this option is likely to lead to more opportunity than under option 1, but less opportunity than under options 3 and 4, to offer long-term support for strengthening, modernising and diversifying the district economy. The scenario assumes that the district's overall job growth will stabilise over the coming years, ie zero job growth post 2014 and the option is likely to lead to more opportunity than option 1, but less opportunity than under options 3 and 4, to offer long-term support for encouraging a high and stable level of employment. Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and make a positive contribution to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. The option makes a more positive contribution to this than option 1, but less of a positive contribution than is likely under options 3 and 4. The option is considered likely to lead to positive effects on meeting housing need since to ensure labour supply meets the job stabilisation forecast, higher levels of housing delivery will be required and this is likely to lead to meeting objectively assessed need. Negative effects are likely to result for objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys. Since the option is lower-mid range, there is more opportunity to deliver employment close to where people live than under option 1 but less opportunity than under options 3 and 4, influencing the distance people need to travel to access key services and facilities and impacting on the likelihood of people being enabled to use sustainable forms of transport. In addition, the option offers some opportunity to address the high levels of out commuting from the district, leading to less significant negative effects than under option 1, but more negative impacts than under options 3 and 4 predicted for the objective to reduce the number of journeys made by car. Uncertain effects are recorded on a number of SA objectives including those relating to community cohesion, the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets as the effect will be dependent on the location of employment land allocations and the implementation of Local Plan policies.

		ST	MT	LT		
	belief, sex and sexual orientation? ● Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.				help to minimise the distance people may need to travel to access jobs.	
3. To improve health and reduce health inequalities.	● Will it improve health or access to health facilities? ● Will it promote healthy lifestyles? ● Will it reduce health inequalities? ● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies. However this option is upper-mid range and as such may provide more opportunity than under options 1 and 2 but less opportunity than option 4 to allocate employment space across the district and thus deliver associated opportunities to increase take up of sustainable transport choices and support improvements to healthy travel networks.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The more hectares of employment land allocated, the more opportunities are provided for increasing healthy travel networks. **Mitigation measures**: Local Plan policies to ensure that new employment developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks.
4. To minimise opportunities for crime and reduce the fear of crime.	● Will it reduce actual levels of crime? ● Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new employment developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision	● Will it provide an appropriate mix of	+	++	++	This option is based on demand-led projections. Past trends in FTE job growth	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions**

SA Objective	Option 3: 25 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	housing to enable all needs to be met? ● Will it enable people to meet their needs within their existing communities? ● Will it ensure that people can afford their housing?				over the period 2014-2031 were considered (2,609) in addition to past take up rates of employment sites in the district, reflecting market demand. To ensure labour supply is sufficient to support the net land requirement produced by this approach (around 3ha - 3.9ha to 2031) high levels of housing delivery will be required. Overall the scenario is considered likely to lead to positive effects on this SA objective.	**made**: Whilst there may not be a direct causal link between housing and employment land requirements, there is nevertheless a need to ensure that the two dovetail together to avoid any unsustainable outcomes. **Mitigation measures**: The Local Plan may need to set out a strong policy intervention to ensure that the housing implications of the preferred employment land requirement are addressed.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	● Will it minimise impacts on existing traffic congestion? ● Will it support the use of public transport? ● Will it support safe walking and cycling? ● Will it protect and improve access to the natural environment and support Green Infrastructure?	?/+	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The district has high levels of out commuting to Stoke-on-Trent, East Staffordshire and Newcastle-under-Lyme. This option is upper-mid range and as such may provide more opportunity than under options 1 and 2 but less opportunity than option 4 to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Reducing out commuting will help to reduce the number of journeys made by car overall. **Mitigation measures**: Local Plan policies to ensure that employment developments are brought forward in sustainable locations and support safe walking and cycling.
ENVIRONMENTAL						
7. To minimise contributions to climate change and consider climate change adaptation.	● Will it reduce emissions of greenhouse gases particularly CO_2? ● Will it increase energy efficiency?	-	-	--	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is is upper-mid range and as such may lead to higher impacts than under	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if employment developments are built to high environmental performance standards and delivered in sustainable locations, the total increase

SA Objective	Option 3: 25 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?				options 1 and 2 but less impact than option 4 in relation to overall increases in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys.	in employment opportunity and related car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	?	?/-	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option is upper-mid range and as such may lead to higher impacts than under options 1 and 2 but less impact than option 4 in relation to the level of new emissions of airborne pollutants associated with additional car journeys. In the long-term there is potential for development to be delivered within 500m of an identified area of poor air quality.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)[(1)]. The allocation of new employment land and car journeys from increased local employment opportunities is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and enhance water sources.	• Is new development directed towards areas of least flood risk? • Will it reduce risk of flooding eg by	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development will be permitted only where schemes meet development plan requirements for management of flood

SA Objective	Option 3: 25 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	encouraging the integration of mitigation measures such as SuDS into new development? • Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?				However the SFRA(2) confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. However this option is upper-mid range and as such may lead to higher impacts than under options 1 and 2 but less impact than option 4 in relation to any increase in surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.	risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance. **Mitigation measures**: Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land? • Will it reduce land contamination / instability?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option is upper-mid range and as such may lead to higher impacts than under options 1 and 2 but less impact than option 4	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for geological resources including the best and most versatile agricultural land. **Mitigation measures**: Local Plan policies to ensure

		ST	MT	LT		
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	++	++	Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and a positive contribution being made to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. This option is upper-mid range and as such may lead to higher impacts than under options 1 and 2 but less impact than option 4 in relation to overall, long-term support for the vitality and viability of the district's towns and villages.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Employees of expanding and incoming businesses will support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	+	++	++	This option would help to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). However this option is upper-mid range and as such may lead to higher impacts than under options 1 and 2 but less impact than option 4 in relation to overall, long-term support for strengthening, modernising and diversifying the district economy.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A local supply of employment land will help to deliver economic growth across the plan area. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	+	+	++	The past trends job growth scenario suggests growth in office FTE jobs (B1a) but declining FTE jobs in industrial (B1c/B2) and warehousing (B8) land use. Consideration of past take up rates suggests limited prospects for growth in the B-class employment sectors. The practical physical constraints and relative inaccessibility of certain areas and the current lack of viability of employment development schemes suggests that realistically an upsurge in large developments in the district is unlikely for the forseeable future. However this option	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Ensuring a sufficient supply of employment land is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.

SA Objective	Option 3: 25 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					is upper-mid range and as such may lead to higher impacts than under options 1 and 2 but less impact than option 4 in relation to overall, long-term support for encouraging a high and stable level of employment.	

Summary of significant effects:

This option is based on demand-led projections informed by past take up rates and past trends, proposing the delivery of 25ha of employment land to 2031 (gross). This option is upper-mid range and as such may provide more opportunities than under options 1 and 2, but less opportunity than option 4 to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow. This option is likely to lead to a significantly positive effect on the local economy and local employment through helping to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). As this option is upper-mid range it may provide more opportunities than under options 1 and 2, but less opportunity than option 4 to lead to overall, long-term support for strengthening, modernising and diversifying the district economy. The past trends job growth scenario suggests growth in office FTE jobs (B1a) but declining FTE jobs in industrial (B1c/B2) and warehousing (B8) land use. Consideration of past take up rates suggests limited prospects for growth in the B-class employment sectors. The practical physical constraints and relative inaccessibility of certain areas and the current lack of viability of employment development schemes suggests that realistically an upsurge in large developments in the district is unlikely for the forseeable future. However as this option is upper-mid range it may provide more opportunities than under options 1 and 2, but less opportunity than option 4 to lead to long-term support for encouraging a high and stable level of employment. Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and make a positive contribution to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. This option makes a more positive contribution to this than options 1 and 2, but less of a contribution than option 4. The option is also considered likely to lead to positive effects on meeting housing need. Past trends in FTE job growth over the period 2014-2031 were considered (2,609) in addition to past take up rates of employment sites in the district, reflecting market demand. To ensure labour supply is sufficient to support the net land requirement produced by this approach (around 3ha - 3.9ha to 2031) high levels of housing delivery will be required, likely to be considered sufficient to meet objectively assessed need. Since the option is upper-mid range, there is most opportunity to deliver employment close to where people live than under options 1 and 2, potentially reducing the distance people need to travel to access key services and facilities and making the use of sustainable forms of transport more likely, however the option offers less of a positive contribution to this than option 4. In addition, this option offers more opportunity than options 1 and 2 to address the high levels of out-commuting from the district, leading to positive effects predicted for the objective to reduce the number of journeys made by car; although the significance is less than under option 4. However negative effects are likely to result on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys, these effects are likely to be greater than under options 1 and 2 , but less significant than under option 4. Uncertain effects are recorded on a number of SA objectives including those relating to community cohesion, the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets as the effect will be dependent on the location of employment land allocations and the implementation of Local Plan policies.

Table 14.3 Assessment Table for Option 3: 25 hectares

1. 2014 Air Quality Progress Report for Staffordshire Moorlands District Council In fulfillment of Part IV of the Environment Act 1995 Local Air Quality Management; SMDC; November 2014
2. Staffordshire Moorlands Level 1 Strategic Flood Risk Assessment (SFRA) Update; AECOM Infrastructure and Environment UK Ltd; October 2015
3. Landscape and Settlement Character Assessment Study; Wardell Armstrong; 2008

Option 4: 27 hectares

SA Objective	Option 4: 27 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure? • Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall employment land requirement. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new employment development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Will it help to minimise the distance people need to	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies. This option represents the upper end of the range and as such may provide more opportunities than under all other options to allocate employment space across the district and thus help to minimise the distance people may need to travel to access jobs.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs. **Mitigation measures**: Local Plan policies to ensure that new employment developments are brought forward in sustainable locations.

SA Objective	Option 4: 27 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	travel to access education, employment, shopping and other key services and facilities.					
3. To improve health and reduce health inequalities.	• Will it improve health or access to health facilities? • Will it promote healthy lifestyles? • Will it reduce health inequalities? • Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies. However this option represents the upper end of the range and as such may provide more opportunities than under all other options to allocate employment space across the district and thus deliver associated opportunities to increase take up of sustainable transport choices and support improvements to healthy travel networks.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The more hectares of employment land allocated, the more opportunities are provided for increasing healthy travel networks. **Mitigation measures**: Local Plan policies to ensure that new employment developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks.
4. To minimise opportunities for crime and reduce the fear of crime.	• Will it reduce actual levels of crime? • Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new employment developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range of house types	• Will it provide an appropriate mix of housing	++	++	++	This option is based on demand-led projections combining Oxford Economics and Experian job growth projections. To ensure labour supply is	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Whilst there

SA Objective	Option 4: 27 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
to meet local needs in appropriate locations and including affordable / social /extra care housing.	to enable all needs to be met? ● Will it enable people to meet their needs within their existing communities? ● Will it ensure that people can afford their housing?				sufficient to support the net land requirement produced by this approach (around 6.5ha 2014 to 2031) significant levels of housing delivery will be required. Overall the scenario is considered likely to lead to positive effects on this SA objective.	may not be a direct causal link between housing and employment land requirements, there is nevertheless a need to ensure that the two dovetail together to avoid any unsustainable outcomes. **Mitigation measures**: The Local Plan may need to set out a strong policy intervention to ensure that the housing implications of the preferred employment land requirement are addressed.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	● Will it minimise impacts on existing traffic congestion? ● Will it support the use of public transport? ● Will it support safe walking and cycling? ● Will it protect and improve access to the natural environment and support Green Infrastructure?	?/+	?/++	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The district has high levels of out commuting to Stoke-on-Trent, East Staffordshire and Newcastle-under-Lyme. This option represents the upper end of the range and as such may provide more opportunities than under all other options to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Reducing out commuting will help to reduce the number of journeys made by car overall. **Mitigation measures**: Local Plan policies to ensure that employment developments are brought forward in sustainable locations and support safe walking and cycling.
ENVIRONMENTAL						
7. To minimise contributions to climate change and consider climate change adaptation.	● Will it reduce emissions of greenhouse gases particularly CO_2? ● Will it increase energy efficiency?	-	--	--	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is likely to lead to the highest overall increase in carbon emissions from the	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if employment developments are built to high environmental performance standards and

SA Objective	Option 4: 27 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?				energy consumption and emissions arising from construction and use of new development and associated car journeys.	delivered in sustainable locations, the total increase in employment opportunity and related car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	?	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option represents the upper end of the employment land requirement range, it is likely to lead to the highest level of new emissions of airborne pollutants associated with additional car journeys. In the long-term there is potential for development to be delivered within 500m of an identified area of poor air quality.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)**(1)**. The allocation of new employment land and car journeys from increased local employment opportunities is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate

SA Objective	Option 4: 27 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
						landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and enhance water sources.	• Is new development directed towards areas of least flood risk? • Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development? • Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the SFRA(2) confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This option requires the greatest allocation of employment land, and thus poses the highest risk of all options to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance. **Mitigation measures**: Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.

SA Objective	Option 4: 27 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land? • Will it reduce land contamination / instability? • Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the greatest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term protection for geological resources.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for geological resources including the best and most versatile agricultural land. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation? • Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the greatest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term protection for the character of settlements along with heritage assets and their settings.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. **Mitigation measures**: Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.

SA Objective	Option 4: 27 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Will it promote development on brownfield land? • Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study[3] offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA[4] identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. However as it proposes the greatest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term protection for landscape character and other natural assets.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for landscape character and natural assets. **Mitigation measures**: Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the greatest allocation of new employment land of all options considered, this option is likely to lead to most overall, long-term support for sustainable tourism.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A thriving district with a robust cultural and visitor economy will require sufficient supply of local employment land. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.
ECONOMIC						

SA Objective	Option 4: 27 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	++	++	Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and a positive contribution being made to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. As it proposes the greatest allocation of new employment land of all options considered, this option is likely to lead to most overall, long-term support for the vitality and viability of the district's towns and villages.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Employees of expanding and incoming businesses will support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	++	++	++	This option would help to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). However as it proposes the greatest allocation of new employment land of all options considered, this option is likely to lead to most overall, long-term support for strengthening, modernising and diversifying the district economy.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A local supply of employment land will help to deliver economic growth across the plan area. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	++	++	++	This scenario represents a combination of Oxford Economics and Experian job growth forecasts. Whilst both projections indicate growth over the plan period, the projected scales vary considerably. OE suggest a net growth of +228 jobs 2014 - 2031 whilst Experian projections forecast +1,300 over the same period. A key difference between them relates to the projections for manufacture of machinery and equipment and of transport equipment with OE projections suggesting a decline of -427 FTE jobs for these two sectors and Experian projections suggesting a growth of 1,676 FTE jobs net. Given the presence of successful companies in the district	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Ensuring a sufficient supply of employment land is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.

SA Objective	Option 4: 27 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					specialising in these advanced manufacturing sectors, the NLP report considers there is merit in taking forward a combination of the two job growth scenarios providing a net increase of 435 B-Class FTE jobs 2014-2031 (794 FTEs in total). The report notes that allocation of this level of employment land would require policy intervention and close monitoring to ensure that the associated scale of job growth is realistic. However as it proposes the greatest allocation of new employment land of all options considered, this option has the potential to lead to most overall, long-term support for encouraging a high and stable level of employment.	

Summary of significant effects:

This option is based on demand-led projections informed by Oxford Economics and Experian job growth forecasts, proposing the delivery of 27ha of employment land to 2031 (gross). This option represents the upper end of the range and as such may provide more opportunities than under all other options to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow. This option is likely to lead to a significantly positive effect on the local economy and local employment through helping to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). The scenario represents a combination of Oxford Economics (OE) and Experian job growth forecasts. Whilst both projections indicate growth over the plan period, the magnitude of this varies considerably. OE suggest a net growth of +228 jobs 2014 - 2031 whilst Experian projections forecast +1,300 over the same period. A key difference between them relates to the projections for manufacture of machinery and equipment and of transport equipment with OE projections suggesting a decline of -427 FTE jobs for these two sectors and Experian projections suggesting a growth of 1,676 FTE jobs net. Given the presence of successful companies in the district specialising in these advanced manufacturing sectors, the NLP report considers there is merit in taking forward a combination of the two job growth scenarios providing a net increase of 435 B-Class FTE jobs 2014-2031 (794 FTEs in total). The report notes that allocation of this level of employment land would require policy intervention via the emerging Local Plan and close monitoring to ensure that the associated scale of job growth is realistic. However as it proposes the greatest allocation of new employment land of all options considered, this option has the greatest potential to lead to overall, long-term support for strengthening, modernising and diversifying the district economy and encouraging a high and stable level of employment. Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and make a positive contribution to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. This option makes the most positive contribution to this of all options considered. The option is also considered likely to lead to positive effects on meeting housing need. To ensure labour supply is sufficient to support the net land requirement produced by this approach (around 6.5ha 2014 to 2031) significant levels of housing delivery will be required, likely to be considered sufficient to meet objectively assessed need. Since the option represents the greatest allocation of new employment land there is most opportunity to deliver employment close to where people live, potentially reducing the distance people need to travel to access key services and facilities and making the use of sustainable forms of transport more likely. In addition, this option offers most opportunity to address the high levels of out-commuting from the district, leading to positive effects predicted for the objective to reduce the number of journeys made by car. However negative effects are likely to result on objectives relating to climate change contributions and air quality that are

SA Objective	Option 4: 27 hectares 2014 to 2031 (gross)					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys. Uncertain effects are recorded on a number of SA objectives including those relating to community cohesion, the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets as the effect will be dependent on the location of employment land allocations and the implementation of Local Plan policies.

Appraisal of alternative development approaches for Cheadle

15 Appraisal of alternative development approaches for Cheadle

15.1 The matrices below set out the likely significant effects on sustainability of the three alternative options considered by the Council for a development approach for Cheadle. The assessments are based on the methodology proposed and consulted on in the SA Scoping Report and use the SA Framework also developed through consultation as part of the SA Scoping stage.

15.2 As part of the SA appraisal of options, consideration has been given to effects on sustainability over time (in the short, medium and long term) along with any cumulative impacts of implementing each option and possible mitigation measures where appropriate.

15.3 In comparing options with one another, consideration has also been given to the geographical scale of effect, whether any identified effects would be permanent or temporary, reversible or irreversible and the assumptions made, or justification for the assessment recorded.

15.4 Definitions of significance are provided in Section 3 Appraisal Methodology.

15.5 Scoring of options is as set out in Table 8.1.

Option 1: Northern Focus

SA Objective	Option 1: Northern Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure?	+/-	+/-	+/-	Development of the sites comprising the "northern focus" include sites both within and outside the existing settlement boundary. The option could enable the delivery of a new school, and this is likely to result in positive effects on this objective. However sites CH002A, CH002B, CH006, CH009, CH024 and CH129 are within 100m of Cecilly Brook LNR or Hales Hall Pool LNR; sites CH73B and CH081 are within 200m of Cecilly Brook LNR	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are dependent on the design and tenure mix, as well as the location of new development. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.

SA Objective	Option 1: Northern Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?				and Hales Hall Pool LNR respectively and it is considered that this is likely to result in a negative effect arising from the potential for adverse impacts on the District's GI network. Overall the assessment against this objective is considered to be mixed and uncertain as in addition it will be partly dependent on the implementation of Local Plan policies.	
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	+	++	++	This option could enable the delivery of new development in good proximity to a wide range of services and facilities. Sites CH009, CH013 and CH015 are within 400m of the town centre; sites CH001, CH002A, CH002B, CH006, CH020, CH024 and CH073B are within 800m of the centre. Sites CH004 and CH129 are within 1,200m of the town centre. Of this option, only sites CH080, CH081 and CH132 are more than 1,200m from the centre. This is likely to result in very positive effects on improving access to jobs, services and facilities which could be expected to contribute to the advancement of equality of opportunity.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. **Mitigation measures**: Local Plan policies to help ensure that the needs of all members of the community can be addressed by helping to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.
3. To improve health and reduce health inequalities.	• Will it improve health or access to health facilities? • Will it promote healthy lifestyles? • Will it reduce health inequalities? • Will it provide opportunities to participate in leisure and recreational	+	+	++	This option could enable the delivery of new development in proximity to a range of healthcare facilities (eg within 1,200m from a GP surgery and open space). Development on the edge of settlement may offer opportunities to enable improved recreational access to the countryside. Overall this option has been assessed as having a positive effect on this objective in the medium and long term.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Delivering new homes in proximity to existing healthcare services and open space will have a positive effect on health. **Mitigation measures**: Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel

SA Objective	Option 1: Northern Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	activities including access to the countryside?					networks, including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	• Will it reduce actual levels of crime? • Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Will it provide an appropriate mix of housing to enable all needs to be met? • Will it enable people to meet their needs within their existing communities? • Will it ensure that people can afford their housing?	+	++	++	The sites comprising the northern focus option are a range of sizes, four are large enough to yield over 100 homes each, a further three are each expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the needs of the whole community. This option has been assessed as having a very positive effect on this objective in the medium and long term.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Larger sites offer the most potential to deliver a range of types and tenures of new homes. **Mitigation measures**: Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Will it minimise impacts on existing traffic congestion? • Will it support the use of public transport? • Will it support safe walking and cycling? • Will it protect and improve access to the natural environment and support Green Infrastructure?	+	+	++	All the sites comprising this option could deliver development within 500m of a bus stop and this is likely to result in a positive effect from supporting the use of public transport. Ten of the fifteen sites making up the option are within the settlement boundary and all but one (CH004) are within 800m of the town centre, this could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Five sites are outside the existing	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development delivered close to existing services and facilities will help to reduce the number of journeys made by car. **Mitigation measures**: Local Plan policies to ensure that developments support safe walking and cycling and improve access to the natural environment.

SA Objective	Option 1: Northern Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					settlement boundary, two within 1,200m of the centre and three sites (CH080, CH081 and CH132) over 1,200m from the centre and its services and facilities. Overall this option has been assessed as having a long term positive effect on this objective.	
ENVIRONMENTAL						
7. To minimise contributions to climate change and consider climate change adaptation.	• Will it reduce emissions of greenhouse gases particularly CO_2? • Will it increase energy efficiency? • Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?	-	-	-	Development of the sites comprising this option could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. All the sites comprising this option could deliver development within 500m of a bus stop. Ten of the fifteen sites making up the option are within the settlement boundary and all but one of these are within 800m of the town centre, this could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Five sites are outside the existing settlement boundary, two within 1,200m of the centre and three sites (CH080, CH081 and CH132) over 1,200m from the centre and its services and facilities. Whilst this may help to reduce the need to travel by car, overall this option has been assessed as having a negative effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	-	-	--	This option includes site CH015 which is an edge of town centre site within100m of a candidate Air Quality Management Area. This	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The main areas identified in the District as being of poor air quality are the Cellarhead junction (between the A52 and A520); Ball

SA Objective	Option 1: Northern Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					option has been assessed as having a negative effect on this objective.	Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)(1). The increase in number of dwellings and car journeys across Cheadle is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants and provide support for the Cheadle Transport Package(2).
9. To reduce flood risk, protect and enhance water sources.	• Is new development directed towards areas of least flood risk? • Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development? • Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?	--	--	--	This option includes sites CH002a, CH006, CH020, CH080, CH081 and CH132 all of which are partly located within a flood zone 3 area. It can be considered that this option is likely to result in the development of sites subject to risk from flooding. Development of sites could be expected to lead to an increase in wastewater and reduction of natural drainage. Mitigation measures are possible however. Overall this option has been assessed as having a significant negative effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.

SA Objective	Option 1: Northern Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	--	--	--	This option includes sites CH002a and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles in Staffordshire (water voles are a protected species). In addition sites CH002b, CH006 and CH009 are within 100m of the Reserve. CH129 is within 100m of Hales Hall Pool LNR. Sites CH073b and CH081 are within 200m of one of these Reserves. There is potential for development to result in disturbance of habitats, either singly or in combination with other sites. A number of these sites have the potential to support protected species(3) due to the proximity of the mosaic of stream habitats and presence of species rich hedgerows. Overall this option has been assessed as having a significant negative effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the cumulative impact of the development of a number of sites which border, or are in close proximity to, a Local Nature Reserve pose risks of disturbance that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible.
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land? • Will it reduce land contamination / instability? • Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?	--	--	--	This option includes sites CH001, CH002A,CH002B, CH004, CH006, CH009, CH024, CH073B, CH080, CH081 CH129 and CH132 that are assessed as Agricultural Land Classification (ALC)Grade 3 land, so the proposal could result in the loss of best and most versatile agricultural land.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Further work is required to establish the quality of agricultural land at site specific level and the proportion of Grade 3 land classified as Grade 3a. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation?	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the

SA Objective	Option 1: Northern Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?				dependent on the implementation of Local Plan policies.	re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	-	-	--	This option includes sites CH009, CH013, CH015, CH024, CH080 and CH081 that are assessed as sites within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Dependent on proposal specific information, there is scope that this option could lead to the deterioration of the setting of designated heritage assets. This option has been assessed as having an overall negative effect on this objective although the exact nature of effects are uncertain.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk of development resulting in harm or loss to the significance of a designated heritage asset that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Will it promote development on brownfield land? • Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment	-	-	--	This option includes a number of greenfield sites outside the current development boundary: CH073B, CH080, CH081, CH129 and CH132 that are assessed as having potential for effects on landscape character if developed, although the exact nature of effects are uncertain as they are dependent on proposal specific information. It should be noted that none of the above sites fall within the area identified as "important landscape setting to settlement"[(4)]. Overall this option has been assessed as having a negative effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for landscape character and natural assets. However options that include a number of sites that contribute to the current landscape setting to the settlement increases the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement of the character

SA Objective	Option 1: Northern Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	identified in the NCA profiles?					and appearance of the landscape including historic landscape and other natural assets and resources.
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	+	+	+	This option envisages locating the focus of growth to the north of the town. Delivery of a new school in the north of Cheadle could be expected to ease some pressure on peak time journeys to school that are currently concentrated in the south west of the town and this may help support opportunities for investment in culture and tourism that could result in positive effects on the local economy.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Proposals that have a positive effect on the town centre are likely to result in support for tourism and the visitor economy. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.
ECONOMIC						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	+	+	The majority of sites comprising this option are located within 1,200m of the town centre and the wide range of key services and facilities that can be found here. Sites CH080, CH081 and CH132 are more than 1,200m away from the town centre which could result in existing services and facilities being inaccessible for new residents of developments here. Overall the proposal has been assessed as having a minor positive effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development of residential sites with good access to the town centre is likely to result in a positive effect on the vitality and viability of Cheadle as residents of new developments could be expected to support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or	0	0	0	Developments of the sites comprising this option could encourage investment in people and infrastructure through developer contributions although this would be limited. This proposal has been assessed as having a neutral effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A local labour supply will help to deliver economic growth across the plan area. **Mitigation measures**: Local Plan policies to support sustainable economic growth.

SA Objective	Option 1: Northern Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	minimise the loss or displacement of existing businesses?					
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	+	+	+	The proposal could facilitate residential development within 30 minutes travel time of existing employment provision. This proposal has been assessed as having a positive effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.

Summary of significant effects:

Sites comprising the option "northern focus" are located both within and outside the existing settlement boundary. The sites are a range of sizes, four are large enough to yield over 100 homes each, a further three are each expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community. A further positive effect of the option is the opportunity it provides for the delivery of a new school. A new school in the north of Cheadle could be expected to ease some pressure on peak time journeys to the existing schools that are concentrated in the south west of the town. This is likely to result in positive effects on the town centre and may help support opportunities for investment in culture and tourism with positive effects on the local economy. All the sites comprising this option could deliver development within 500m of a bus stop and all but three sites are within 1,200m of the town centre with its wide range of key services and facilities. This is likely to result in positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of the town centre, providing support for walking and cycling and reducing the need to travel by car. However sites CH080, CH081 and CH132 are more than 1,200m away from the town centre, so this option could result in existing services and facilities being inaccessible for residents of some new developments. There is potential for the cumulative impacts of development to result in the disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated. The option includes sites CH002a and CH024 which border Cecilly Brook Local Nature Reserve (LNR), one of the most important sites for water voles (a protected species) in Staffordshire. In addition, sites CH002b, CH006 and CH009 are within 100m of the Reserve. CH129 is within 100m of Hales Hall Pool LNR. Sites CH073b and CH081 are within 200m of one of these Local Nature Reserves. This option is also likely to result in the development of sites subject to risk from flooding, the option includes sites CH002a, CH006, CH020, CH080, CH081 and CH132 all of which are partly located within a flood zone 3 area. Dependent on proposal specific information, there is scope that the cumulative impact of development under this option may result in harm or loss to the significance of designated heritage assets. Sites CH009, CH013, CH015, CH024, CH080 and CH081 are within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Likely negative effects on landscape character have also been identified, sites

		ST	MT	LT		
CH073B, CH080, CH081, CH129 and CH132 are all greenfield sites outside the current development boundary, however none are within the area identified as "important landscape setting to settlement". The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.

SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure?	+/-	+/-	+/-	Development of the sites comprising the "south-western focus" include sites both within and outside the existing settlement boundary. The option could help support the delivery of a southern link road between A522 Tean Road and A521 Delphouse Road, which could result in positive effects on this objective. However sites CH002A, CH002B, CH006, CH009 and CH024 are within 100m of Cecilly Brook LNR and it is considered that this is likely to result in a negative effect arising from the potential for	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are dependent on the design and tenure mix, as well as the location of new development. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.

SA Objective	Option 2: South-Western Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?				adverse impacts on the District's GI network. Overall the assessment against this objective is considered to be mixed and uncertain as in addition it will be partly dependent on the implementation of Local Plan policies.	
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.	+	++	++	This option could enable the delivery of new development in good proximity to a wide range of services and facilities. Sites CH009, CH013 and CH015 are within 400m of the town centre; sites CH001, CH002A, CH002B, CH006, CH020 and CH024 are within 800m of the centre. Sites CH004 and sites CH085A, B, C and D are within 1,200m of the town centre. Of this option, only sites CH093 and CH128 are more than 1,200m from the centre. This is likely to result in very positive effects on improving access to jobs, services and facilities which could be expected to contribute to the advancement of equality of opportunity.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. **Mitigation measures**: Local Plan policies to help ensure that the needs of all members of the community can be addressed by helping to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.
3. To improve health and reduce health inequalities.	• Will it improve health or access to health facilities? • Will it promote healthy lifestyles? • Will it reduce health inequalities? • Will it provide opportunities to participate in leisure and	+	+	++	This option could enable the delivery of new development in proximity to a range of healthcare facilities (eg within 1,200m from a GP surgery and open space). Development on the edge of settlement may offer opportunities to enable improved recreational access to the countryside. Overall this option has been assessed as having a positive effect on this objective in the medium and long term.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Delivering new homes in proximity to existing healthcare services and open space will have a positive effect on health. **Mitigation measures**: Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks,

SA Objective	Option 2: South-Western Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	recreational activities including access to the countryside?					including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	• Will it reduce actual levels of crime? • Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Will it provide an appropriate mix of housing to enable all needs to be met? • Will it enable people to meet their needs within their existing communities? • Will it ensure that people can afford their housing?	+	++	++	The sites comprising the south-western focus option are a range of sizes, five are large enough to yield over 100 homes each, a further two are expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the needs of the whole community. This option has been assessed as having a very positive effect on this objective in the medium and long term.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Larger sites offer the most potential to deliver a range of types and tenures of new homes. **Mitigation measures**: Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Will it minimise impacts on existing traffic congestion? • Will it support the use of public transport? • Will it support safe walking and cycling? • Will it protect and improve access to the natural environment and	+	+	++	All the sites comprising this option could deliver development within 500m of a bus stop and this is likely to result in a positive effect from supporting the use of public transport. Ten of the sixteen sites making up the option are within the settlement boundary (and all but one within 800m from the town centre) which could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Six sites are outside the existing	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development delivered close to existing services and facilities will help to reduce the number of journeys made by car. **Mitigation measures**: Local Plan policies to ensure that developments support safe walking and cycling and improve access to the natural environment.

	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	support Green Infrastructure?				settlement boundary, four of these within 1,200m of services and facilities and two - CH093 and CH128 - more than 1,200m. Overall this option has been assessed as having a long term positive effect on this objective.	
ENVIRONMENTAL						
7. To minimise contributions to climate change and consider climate change adaptation.	• Will it reduce emissions of greenhouse gases particularly CO_2? • Will it increase energy efficiency? • Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?	-	-	-	Development of the sites comprising this option could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. All of the sites comprising this option could deliver development within 500m of a bus stop. Ten of the sixteen sites making up the option are within the settlement boundary (and all but one of these within 800m from the town centre) which could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Six sites are outside the existing settlement boundary, four of these within 1,200m of services and facilities and two - CH093 and CH128 - more than 1,200m. Whilst this may help reduce the need to travel by car, overall this option has been assessed as having a negative effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	-	-	--	This option includes site CH015 which is an edge of town centre site within100m of a candidate Air Quality Management Area. This option has been assessed as having a negative effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The main areas identified in the District as being of poor air quality are the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a

SA Objective	Option 2: South-Western Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
						primary link road from Stoke on Trent)[(1)]. The increase in number of dwellings and car journeys across Cheadle is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants and provide support for the Cheadle Transport Package[(2)].
9. To reduce flood risk, protect and enhance water sources.	• Is new development directed towards areas of least flood risk? • Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development? • Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?	-	--	--	This option includes sites CH002A, CH006, CH020 and CH85B all of which are partly located within a flood zone 3 area. Also sites CH085A and CH093 that are partly within flood zone 2. It can be considered that this option is likely to result in the development of sites subject to risk from flooding. Development of sites could be expected to lead to an increase in wastewater and reduction of natural drainage. Mitigation measures are possible however. Overall this option has been assessed as having a significant negative effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test	• Will it protect and promote effective management of the district's sites of	-	--	--	This option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles in Staffordshire (water voles are a	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of

SA Objective	Option 2: South-Western Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
the plan's policies and proposals on European Sites and SSSIs	ecological and nature conservation importance? ● Will it help contribute to Staffordshire Biodiversity Action Plan objectives? ● Will it help deliver networks of biodiversity and green infrastructure?				protected species). In addition sites CH002b, CH006 and CH009 are within 100m of the Reserve. There is potential for development to result in disturbance of habitats, either singly or in combination with other sites. A number of these sites have the potential to support protected species[3] due to the proximity of the mosaic of stream habitats and presence of species rich hedgerows. Overall this option has been assessed as having a significant negative effect on this objective.	ecological and nature conservation importance, but the cumulative impact of the development of a number of sites which border, or are in close proximity to, a Local Nature Reserve pose risks of disturbance that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible.
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	● Will it safeguard the best and most versatile agricultural land? ● Will it minimise the loss of greenfield land? ● Will it reduce land contamination / instability? ● Will it reduce the amount of derelict land? ● Will it protect notable geological and geomorphological features?	--	--	--	This option includes sites CH001, CH002A, CH002B, CH004, CH006, CH009, CH024, CH085A, B, C and D, CH093 and CH128 that are assessed as Agricultural Land Classification (ALC) Grade 3 land, so the proposal could result in the loss of best and most versatile agricultural land.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Further work is required to establish the quality of agricultural land at site specific level and the proportion of Grade 3 land classified as Grade 3a. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	● Will it reduce waste generation? ● Will it maximise the re-use of existing buildings? ● Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.

SA Objective	Option 2: South-Western Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	-	-	--	This option includes sites CH009, CH013, CH015, CH024, CH085C, CH085D, CH093 and CH128 that are assessed as sites within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Dependent on proposal specific information, this option could lead to the deterioration of the setting of designated heritage assets. This option has been assessed as having an overall negative effect on this objective although the exact nature of effects are uncertain.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk that the cumulative impact of development may result in harm or loss to the significance of designated heritage assets that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Will it promote development on brownfield land? • Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	-	-	--	This option includes a number of greenfield sites outside the current development boundary: CH085A, B, C and D, CH093 and CH128 that are assessed as having potential for effects on landscape character if developed, although the exact nature of effects are uncertain as they are dependent on proposal specific information. It should be noted that none of the above sites fall within the area identified as "important landscape setting to settlement"[(4)]. The overall impact of development of site CH093 on the purposes of the Green Belt was assessed as moderate and of site CH128 as limited[(5)]; with the report recommendation that the Council consider both sites for Green Belt release under exceptional circumstances. Overall this option has been assessed as having a negative effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for landscape character and natural assets. However options that include a number of sites that contribute to the current landscape setting to the settlement increases the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.

SA Objective	Option 2: South-Western Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	0	0	-	This option envisages locating the focus of growth to the south west of the town, close to existing school sites. If this resulted in more journeys to school being made on foot, this could lead to positive effects. However if additional journeys to key sites such as schools are principally made by car, focusing development around the existing cluster of schools may exacerbate congestion at peak times due to the concentration of journeys to school into one area of the town. This may have a neutral or long-term negative effect on the further development of sustainable tourism and local distinctiveness.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Proposals that have a positive effect on the town centre are likely to result in support for tourism and the visitor economy. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.
ECONOMIC						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	+	+	The County Council assessment of travelling conditions in Cheadle notes that there are significant delays along Leek Road and Froghall Road (in bound) that can be related to capacity constraints at the Leek Road / High Street / Tape Street junction between 8am and 9am[6]. However, over the majority of Cheadle's road network journey times are considered to be reliable and delays relatively modest. A further transport study[7] was commissioned to assess impacts of additional housing and employment land provision on the highway network. Whilst the study predicted that the impacts of planned new development would still enable the overall network in Cheadle to generally remain operating within capacity, a number of further actions were recommended. In addition the County Council has proposed a study to consider the potential impacts on town centre traffic levels of a southern link road between A522 Tean Road	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development of residential sites with good access to the town centre is likely to result in a positive effect on the vitality and viability of Cheadle as residents of new developments could be expected to support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.

SA Objective	Option 2: South-Western Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					and A521 Delphouse Road. Sites comprising this option may provide the opportunity to deliver a southern link road. The majority of sites comprising this option are located within 1,200m of the town centre and the wide range of key services and facilities that can be found here. Only sites CH093 and CH128 are more than 1,200m away from the town centre which could result in existing services and facilities being inaccessible for new residents of developments here. Overall the proposal has been assessed as having a minor positive effect on this objective.	
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	0	0	0	Developments of the sites comprising this option could encourage investment in people and infrastructure through developer contributions. This proposal has been assessed as having a neutral effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A local labour supply will help to deliver economic growth across the plan area. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	+	+	+	The proposal could facilitate residential development within 30 minutes travel time of existing employment provision. This proposal has been assessed as having a positive effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.

SA Objective	Option 2: South-Western Focus					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
Summary of significant effects: Sites comprising the option "south western focus" are located both within and outside the existing settlement boundary. The sites are a range of sizes, five are large enough to yield over 100 homes each, a further two are expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community. A further positive effect of the option is the opportunity it provides for the delivery of a southern link road to help relieve traffic congestion in the town centre. However focusing new development where there is an existing cluster of schools may exacerbate congestion at peak times from concentrating journeys to school into one area of town. Unless the new journeys to school are mainly made on foot, this may result in negative effects on the town centre. All of the sites comprising this option could deliver development within 500m of a bus stop and all but two are within 1,200m of the town centre with its wide range of key services and facilities. This is likely to result in positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of the town centre, providing support for walking and cycling and reducing the need to travel by car. However sites CH093 and CH128 are more than 1,200m away from the town centre, so this option could result in existing services and facilities being inaccessible for residents of some new developments. There is potential for the cumulative impacts of development to result in the disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated. The option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles (a protected species) in Staffordshire. In addition, sites CH002B, CH006 and CH009 are within 100m of the Reserve. This option is also likely to result in the development of sites subject to risk from flooding, the option includes sites CH002A, CH006, CH020 and CH085B all of which are partly located within a flood zone 3 area; and sites CH085A and CH093 that are partly within flood zone 2. Dependent on proposal specific information, the cumulative impact of development under this option may result in harm or loss to the significance of designated heritage assets. Sites CH009, CH013, CH015, CH024, CH085C, CH085D, CH093 and CH128 are within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Likely negative effects on landscape character have also been identified; sites CH085A, B, C and D, CH093 and CH128 are all greenfield sites outside the current development boundary, however none are within the area identified as "important landscape setting to settlement". Sites CH093 and CH128 have been recommended as appropriate to consider for release from the Green Belt under exceptional circumstances. The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.						

Table 15.2 Assessment Table for Option 2: South-Western Focus

Option 3: Scattered approach

SA Objective	Option 3: Scattered approach						
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure? • Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	+/-	+/-	+/-	Development of the sites comprising the "scattered approach" include sites both within and outside the existing settlement boundary. Through the inclusion of site CH132, the option could enable the delivery of a new school and this is likely to result in positive effects on this objective. However sites CH002A, CH002B, CH006, CH009 and CH024 are within 100m of Cecilly Brook LNR and it is considered that this is likely to result in a negative effect arising from the potential for adverse impacts on the District's GI network. Overall the assessment against this objective is considered to be mixed and uncertain as in addition it will be partly dependent on the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are dependent on the design and tenure mix, as well as the location of new development. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? • Will it help to minimise the distance people need to travel to access education, employment, shopping and	+	++	++	This option could enable the delivery of new development in good proximity to a wide range of services and facilities. Sites CH009, CH013 and CH015 are within 400m of the town centre; sites CH001, CH002A, CH002B, CH006, CH020 and CH024 are within 800m of the centre. Sites CH004, CH075A, B and C, 85A and 85D are within 1,200m of the town centre. Of this option, only sites CH081, CH128 and CH132 are more than 1,200m from the centre. This is likely to result in very positive effects on improving access to jobs, services and facilities which could be	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. **Mitigation measures**: Local Plan policies to help ensure that the needs of all members of the community can be addressed by helping to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.

SA Objective	Option 3: Scattered approach					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	other key services and facilities.				expected to contribute to the advancement of equality of opportunity.	
3. To improve health and reduce health inequalities.	• Will it improve health or access to health facilities? • Will it promote healthy lifestyles? • Will it reduce health inequalities? • Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?	+	+	++	This option could enable the delivery of new development in proximity to a range of healthcare facilities (eg within 1,200m from a GP surgery and open space). Development on the edge of settlement may offer opportunities to enable improved recreational access to the countryside. Overall this option has been assessed as having a positive effect on this objective in the medium and long term.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Delivering new homes in proximity to existing healthcare services and open space will have a positive effect on health. **Mitigation measures**: Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	• Will it reduce actual levels of crime? • Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	• Will it provide an appropriate mix of housing to enable all needs to be met? • Will it enable people to meet their needs within their existing communities? • Will it ensure that people can afford their housing?	+	++	++	The sites comprising the scattered approach option are a range of sizes, three are large enough to yield over 100 homes each, a further six are each expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the needs of the whole community. This option has been assessed as having a very positive effect on this objective in the medium and long term.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Larger sites offer the most potential to deliver a range of types and tenures of new homes. **Mitigation measures**: Wider initiatives of the Council should be supported to help deliver additional affordable homes.

SA Objective	Option 3: Scattered approach					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	• Will it minimise impacts on existing traffic congestion? • Will it support the use of public transport? • Will it support safe walking and cycling? • Will it protect and improve access to the natural environment and support Green Infrastructure?	+	+	++	All the sites comprising this option could deliver development within 500m of a bus stop and this is likely to result in a positive effect from supporting the use of public transport. Ten of the eighteen sites making up the option are within the settlement boundary (and all but one within 800m from the town centre) which could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Eight sites are outside the existing settlement boundary, five of these are within 1,200m of services and facilities and three - CH081, CH128 and CH132 - more than 1,200m. Overall this option has been assessed as having a long term positive effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development delivered close to existing services and facilities will help to reduce the number of journeys made by car. **Mitigation measures**: Local Plan policies to ensure that developments support safe walking and cycling and improve access to the natural environment.
ENVIRONMENTAL						
7. To minimise contributions to climate change and consider climate change adaptation.	• Will it reduce emissions of greenhouse gases particularly CO_2? • Will it increase energy efficiency? • Will it increase the use of renewable energy? • Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?	-	-	-	Development of the sites comprising this option could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. All of the sites comprising this option could deliver development within 500m of a bus stop. Ten of the eighteen sites making up the option are within the settlement boundary (and all but one of these within 800m from the town centre) which could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Eight sites are outside the existing settlement boundary, five of these within 1,200m of	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.

SA Objective	Option 3: Scattered approach					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					services and facilities and three - CH081, CH128 and CH132 - more than 1,200m. Whilst this may help reduce the need to travel by car, overall this option has been assessed as having a negative effect on this objective.	
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	-	-	--	This option includes site CH015 which is an edge of town centre site within100m of a candidate Air Quality Management Area. This option has been assessed as having a negative effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The main areas identified in the District as being of poor air quality are the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)**(1)**. The increase in number of dwellings and car journeys across Cheadle is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants and provide support for the Cheadle Transport Package**(2)**.
9. To reduce flood risk, protect and enhance water sources.	• Is new development directed towards areas of least flood risk? • Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development? • Will it protect, maintain and improve the quality of water	-	--	--	This option includes sites CH002A, CH006, CH020, CH081 and CH132 all of which are partly located within a flood zone 3 area. Also site CH085A is partly within flood zone 2. It can be considered that this option is likely to result in the development of sites subject to risk from flooding. Development of sites could be expected to lead to an increase in wastewater and reduction of natural drainage. Mitigation measures are possible however. Overall this option has been	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.

SA Objective	Option 3: Scattered approach					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?				assessed as having a significant negative effect on this objective.	
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	-	--	--	This option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles in Staffordshire (water voles are a protected species). In addition sites CH002B, CH006 and CH009 are within 100m of the Reserve and sites CH075A, B and C are within 200-400m. There is potential for development to result in disturbance of habitats, either singly or in combination with other sites. A number of these sites have the potential to support protected species[3] due to the proximity of the mosaic of stream habitats and presence of species rich hedgerows. Overall this option has been assessed as having a significant negative effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the cumulative impact of the development of a number of sites which border, or are in close proximity to, a Local Nature Reserve pose risks of disturbance that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible.
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land? • Will it reduce land contamination / instability?	--	--	--	This option includes sites CH001, CH002A, CH002B, CH004, CH006, CH009, CH024, CH075A, B and C, CH081, CH085A and D, CH128 and CH132 that are assessed as Agricultural Land Classification (ALC) Grade 3 land, so the proposal could result in the loss of best and most versatile agricultural land.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Further work is required to establish the quality of agricultural land at site specific level and the proportion of Grade 3 land classified as Grade 3a. **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.

SA Objective	Option 3: Scattered approach					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?					
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation? • Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	-	-	--	This option includes sites CH009, CH013, CH015, CH024, CH075C, CH081, CH085D and CH128 that are assessed as sites within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Dependent on proposal specific information, this option could lead to the deterioration of the setting of designated heritage assets. This option has been assessed as having an overall negative effect on this objective although the exact nature of effects are uncertain.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk that the cumulative impact of development may result in harm or loss to the significance of designated heritage assets that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?	--	--	--	This option includes a number of greenfield sites outside the current development boundary: CH075A, B and C, CH081, CH085A and D, CH128 and CH132 that are	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for

SA Objective	Option 3: Scattered approach					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
other natural assets and resources.	• Will it promote development on brownfield land? • Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?				assessed as having potential for effects on landscape character if developed, although the exact nature of effects are uncertain as they are dependent on proposal specific information. Sites CH075A, B and C lie in the area identified as "important landscape setting to settlement"(4); and are described as small scale landscape with strong vegetation to field boundaries. The overall impact of development of site CH128 on the purposes of the Green Belt was assessed as limited(5); with the report recommendation that the Council consider this site for Green Belt release under exceptional circumstances. Overall this option has been assessed as having a negative effect on this objective.	landscape character and natural assets. However options that include a number of sites that contribute to the current landscape setting to the settlement increases the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	0	0	-	This option envisages small scale extensions to the periphery of the town. The option includes site CH132 which may help to deliver a new school to the north and this could be expected to ease some pressure on peak time journeys to school currently concentrated in the south west of the town. A positive impact on the town centre may help to support opportunities for investment in the visitor economy. However the option also includes sites comprising a small scale extension to the south west that may contribute to "school-run" congestion in this part of the town. Unlike the south-west focus option, the scattered approach may not deliver the necessary sites to enable a potential link road. Overall this option has been assessed as having a neutral or long-term negative effect on the further	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Proposals that have a positive effect on the town centre are likely to result in support for tourism and the visitor economy. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.

SA Objective	Option 3: Scattered approach					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					development of sustainable tourism and local distinctiveness.	
ECONOMIC						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	+	+	The County Council assessment of travelling conditions in Cheadle notes that there are significant delays along Leek Road and Froghall Road (in bound) that can be related to capacity constraints at the Leek Road / High Street / Tape Street junction between 8am and 9am[6]. However, over the majority of Cheadle's road network journey times are considered to be reliable and delays relatively modest. A further transport study[7] was commissioned to assess impacts of additional housing and employment land provision on the highway network. Whilst the study predicted that the impacts of planned new development would still enable the overall network in Cheadle to generally remain operating within capacity, a number of further actions were recommended. In addition the County Council has proposed a study to consider the potential impacts on town centre traffic levels of a southern link road between A522 Tean Road and A521 Delphouse Road. Although the option includes sites CH128 and CH085A and D, this may be insufficient development in this part of the town to provide opportunity to deliver a southern link road. The majority of sites comprising this option are located within 1,200m of the town centre and the wide range of key services and facilities that can be found here. Only sites CH081, CH128 and CH132 are more than 1,200m away from the town centre which	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development of residential sites with good access to the town centre is likely to result in a positive effect on the vitality and viability of Cheadle as residents of new developments could be expected to support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres.

SA Objective	Option 3: Scattered approach					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					could result in existing services and facilities being inaccessible for new residents of developments here. Overall the proposal has been assessed as having a minor positive effect on this objective.	
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	• Will it provide a balanced portfolio of employment land in sustainable locations? • Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?	0	0	0	Developments of the sites comprising this option could encourage investment in people and infrastructure through developer contributions. This proposal has been assessed as having a neutral effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: A local labour supply will help to deliver economic growth across the plan area. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
18. To encourage and support a high and stable level of employment	• Will it meet the employment needs of local people? • Will it increase economic activity levels? • Will it improve physical accessibility to jobs? • Will it support higher income levels for local residents?	+	+	+	The proposal could facilitate residential development within 30 minutes travel time of existing employment provision. This proposal has been assessed as having a positive effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
Summary of significant effects: Sites comprising the option "scattered approach" are located both within and outside the existing settlement boundary. The sites are a range of sizes, three are large enough to yield over 100 homes each, a further six are each expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community. A further positive effect of the option is the opportunity it provides for the delivery of a new school. A new school in the north of Cheadle could be expected to ease some pressure on peak tine journeys to the existing schools that are concentrated in the south west of the town. However this option also includes some sites comprising a small scale extension to the south west, where there is an existing cluster of schools and this may contribute to "school run congeston" issues in this part of the town. All of the sites comprising this option could deliver development within 500m of a bus stop and all but three are within 1,200m of the town centre with its wide range of key services and facilities. This is likely to result in positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of the town centre, providing support for walking and cycling and reducing the need to travel by car. However sites					

SA Objective	Option 3: Scattered approach					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
CH081, CH128 and CH132 are more than 1,200m away from the town centre, so this option could result in existing services and facilities being inaccessible for residents of some new developments. There is potential for the cumulative impacts of development to result in the disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated. The option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles (a protected species) in Staffordshire. In addition, sites CH002B, CH006 and CH009 are within 100m of the Reserve. This option is also likely to result in the development of sites subject to risk from flooding, the option includes sites CH002A, CH006, CH020, CH81 and CH132 all of which are partly located within a flood zone 3 area; and site CH085A that is partly within flood zone 2. Dependent on proposal specific information, the cumulative impact of development under this option may result in harm or loss to the significance of designated heritage assets. Sites CH009, CH013, CH015, CH024, CH075C, CH081, CH085D, and CH128 are within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Likely negative effects on landscape character have also been identified; sites CH075A, B and C, CH081, CH085A and D, CH128 and CH132 are all greenfield sites outside the current development boundary; sites CH075A, B and C lie in the area identified as "important landscape setting to settlement, where impacts may be most significant. Site CH128 has been recommended as appropriate to consider for release from the Green Belt under exceptional circumstances. The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.						

Table 15.3 Assessment Table for Option 3: Scattered approach

1. 2014 Air Quality Progress Report for Staffordshire Moorlands District Council In fulfillment of Part IV of the Environment Act 1995 Local Air Quality Management; SMDC; November 2014

Option 4: North-South clusters with small sites scattered through town

SA Objective	Option 4: North-South clusters with small sites scattered through town					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
SOCIAL						
1. To improve community cohesion and the quality of where people work and live.	• Will it make a positive contribution towards community cohesion? • Will it improve neighbourhood quality? • Will it ensure that there is adequate open space and support Green Infrastructure? • Will it minimise light and noise pollution? • Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?	+/?	+/?	+/?	Development of the sites comprising a north-south focus with small sites scattered through town include sites both within and outside the existing settlement boundary. The option could help support the delivery of a southern link road between A522 Tean Road and A521 Delphouse Road, which could result in positive effects on this objective. However sites CH002A, CH002B and CH024 are within 100m of Cecilly Brook LNR and it is considered that this is likely to result in a negative effect arising from the potential for adverse impacts on the District's GI network. However this option does not include two sites (CHOO6 and CH009) which were also within 100m of the LNR which may help to reduce potential for cumulative impacts. Overall the assessment against this objective is considered to be uncertain as it will be partly dependent on the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Community cohesion and local environmental quality are dependent on the design and tenure mix, as well as the location of new development. **Mitigation measures**: Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	• Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity,	+	++	++	This option could enable the delivery of new development in good proximity to a wide range of services and facilities. Sites CH013 and CH015 are within 400m of the town centre; sites CH001, CH002A, CH002B, CH020 and CH024 are within 800m of the centre. Sites CH004 and sites CH085A, B, C and D are within 1,200m of the town centre. Of this option, only sites CH132 and CH128 are more than 1,200m from the	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. **Mitigation measures**: Local Plan policies to help ensure that the needs of all members of the community can be addressed by helping to

SA Objective	Option 4: North-South clusters with small sites scattered through town					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	race, religion / belief, sex and sexual orientation? ● Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.				centre. This is likely to result in very positive effects on improving access to jobs, services and facilities which could be expected to contribute to the advancement of equality of opportunity.	minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.
3. To improve health and reduce health inequalities.	● Will it improve health or access to health facilities? ● Will it promote healthy lifestyles? ● Will it reduce health inequalities? ● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?	0	+	++	This option could enable the delivery of new development in proximity to a range of healthcare facilities (eg within 1,200m from a GP surgery and open space). Development on the edge of settlement may offer opportunities to enable improved recreational access to the countryside. Overall this option has been assessed as having a positive effect on this objective in the medium and long term.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Delivering new homes in proximity to existing healthcare services and open space will have a positive effect on health. **Mitigation measures**: Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	● Will it reduce actual levels of crime? ● Will it reduce fear of crime?	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Good design will help minimise opportunities for crime and reduce the fear of crime. **Mitigation measures**: Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
5. To ensure adequate quality and provision of a range	● Will it provide an appropriate mix of	+	++	++	The sites comprising the north-south cluster option are a range of sizes, three are large enough to yield over 100 homes each, a further	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Larger sites offer the most potential to

SA Objective	Option 4: North-South clusters with small sites scattered through town					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	housing to enable all needs to be met? ● Will it enable people to meet their needs within their existing communities? ● Will it ensure that people can afford their housing?				four are expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the needs of the whole community. This option has been assessed as having a very positive effect on this objective in the medium and long term.	deliver a range of types and tenures of new homes. **Mitigation measures**: Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	● Will it minimise impacts on existing traffic congestion? ● Will it support the use of public transport? ● Will it support safe walking and cycling? ● Will it protect and improve access to the natural environment and support Green Infrastructure?	+	+	++	All the sites comprising this option could deliver development within 500m of a bus stop and this is likely to result in a positive effect from supporting the use of public transport. Eight of the fourteen sites making up the option are within the settlement boundary (and all but two within 800m from the town centre) which could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Overall this option has been assessed as having a long term positive effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development delivered close to existing services and facilities will help to reduce the number of journeys made by car. **Mitigation measures**: Local Plan policies to ensure that developments support safe walking and cycling and improve access to the natural environment.
ENVIRONMENTAL						
7. To minimise contributions to climate change and consider climate change adaptation.	● Will it reduce emissions of greenhouse gases particularly CO_2? ● Will it increase energy efficiency? ● Will it increase the use of renewable energy? ● Will it ensure new development is in accessible locations in order to reduce the need	-	-	-	Development of the sites comprising this option could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. All of the sites comprising this option could deliver development within 500m of a bus stop. Eight of the fourteen sites making up the option are within the settlement boundary (and all but two of these within 800m from the town centre) which could be expected to support the delivery of new development in close proximity to a wide range	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. **Mitigation measures**: Local Plan policies to ensure that high environmental design standards are supported and that

SA Objective	Option 4: North-South clusters with small sites scattered through town					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	for car use and / or encourage sustainable forms of transport?				of services and facilities, helping to support the use of walking and cycling. Whilst this may help reduce the need to travel by car, overall this option has been assessed as having a negative effect on this objective.	developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	• Will it minimise emissions of airborne pollutants? • Will it maximise the removal of air pollutants (e.g. by trees)?	-	-	--	This option includes site CH015 which is an edge of town centre site within100m of a candidate Air Quality Management Area. This option has been assessed as having a negative effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: The main areas identified in the District as being of poor air quality are the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)**(1)**. The increase in number of dwellings and car journeys across Cheadle is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. **Mitigation measures**: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants and provide support for the Cheadle Transport Package**(2)**.
9. To reduce flood risk, protect and enhance water sources.	• Is new development directed towards areas of least flood risk? • Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?	-/?	-/?	-/?	This option includes sites CH002A, CH020, CH085A and CH85B where small areas of flood zones 2 or 3 at the edge of each site have been excluded from the boundary of each proposed allocation (these areas could however form part of open space / surface water mitigation). However it can be considered that this option is likely to result in the development of sites subject to some remaining risk from flooding. Development of sites could be expected to lead	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development will be permitted only where schemes meet development plan requirements for management of flood risk. **Mitigation measures**: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.

SA Objective	Option 4: North-South clusters with small sites scattered through town					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? • Will it encourage water efficiency and demand management?				to an increase in wastewater and reduction of natural drainage. Mitigation measures are possible however. Overall this option has been assessed as having an uncertain effect on this objective.	
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	• Will it protect and promote effective management of the district's sites of ecological and nature conservation importance? • Will it help contribute to Staffordshire Biodiversity Action Plan objectives? • Will it help deliver networks of biodiversity and green infrastructure?	-	--	--	This option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles in Staffordshire (water voles are a protected species). In addition site CH002B is within 100m of the Reserve. There is potential for development to result in disturbance of habitats, either singly or in combination with other sites. Sites have the potential to support protected species[3] due to the proximity of the mosaic of stream habitats and presence of species rich hedgerows. Overall this option has been assessed as having a significant negative effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the cumulative impact of the development of a number of sites which border, or are in close proximity to, a Local Nature Reserve pose risks of disturbance that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible.
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	• Will it safeguard the best and most versatile agricultural land? • Will it minimise the loss of greenfield land? • Will it reduce land contamination / instability?	-	-	-	This option includes sites CH001, CH013, CH020, CH0132, CH085A, B, C and D and CH128 indicated on the predictive map of Best and Most Versatile (BMV) agricultural land as partly or wholly within an area where 20 - 60% of the land is likely to be BMV; whilst parts of sites CH085A, B and C are indicated on the predictive map of Best and Most Versatile agricultural land as within an area where over 60% of the land is likely to	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: **Mitigation measures**: Local Plan policies to ensure protection and enhancement of geologically important sites.

SA Objective	Option 4: North-South clusters with small sites scattered through town					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	• Will it reduce the amount of derelict land? • Will it protect notable geological and geomorphological features?				be BMV and overall this is likely to have a negative effect.	
12. To minimise the use of non-renewable resources.	• Will it reduce waste generation? • Will it maximise the re-use of existing buildings? • Will it increase the use of building materials from sustainable sources?	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. **Mitigation measures**: Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	• Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? • Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?	-/?	-/?	-/?	This option includes sites CH013, CH015, CH024, CH085C, CH085D and CH128 that are assessed as sites within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Dependent on proposal specific information, this option could lead to the deterioration of the setting of designated heritage assets. This option has been assessed as having an overall negative effect on this objective although the exact nature of effects are uncertain.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk that the cumulative impact of development may result in harm or loss to the significance of designated heritage assets that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.

SA Objective	Option 4: North-South clusters with small sites scattered through town					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	• Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? • Will it promote development on brownfield land? • Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?	-/?	-/?	-/?	This option includes a number of greenfield sites outside the current development boundary: CH085A, B, C and D, CH128 and CH132 that are assessed as having potential for effects on landscape character if developed, although the exact nature of effects are uncertain as they are dependent on proposal specific information. It should be noted that none of the above sites fall within the area identified as "important landscape setting to settlement"[4]. The overall impact of development of site CH128 on the purposes of the Green Belt was assessed as limited[5]; with the report recommendation that the Council consider the site for Green Belt release under exceptional circumstances. Overall this option has been assessed as having an uncertain negative effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Policies in the Local Plan will provide protection for landscape character and natural assets. However options that include a number of sites that contribute to the current landscape setting to the settlement increases the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. **Mitigation measures**: Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	• Will it support the development of a vibrant cultural economy and local distinctiveness? • Does it help support tourism and the visitor economy?	+	+	++	This option envisages locating two main clusters of development, one to the north and one to the south of the town, providing some development close to existing school sites in the south and delivering land for the provision of a new school in the north. This may result in more journeys to school being made on foot, which is likely to lead to positive effects. Avoiding focusing development around the existing cluster of schools and enabling delivery of a new school to the north, may avoid exacerbating congestion at peak times due to the existing concentration of journeys to school into one area of the town. This may help support opportunities for investment in culture and tourism that are likely to lead to long-term positive effects on sustainable tourism and local distinctiveness.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Proposals that have a positive effect on the town centre are likely to result in support for tourism and the visitor economy. **Mitigation measures**: Local Plan policies to support tourism and the visitor economy.
ECONOMIC						

SA Objective	Option 4: North-South clusters with small sites scattered through town					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	• Will it safeguard shops and services in existing centres? • Will it safeguard and improve the retail, leisure and service provision?	+	+	+	The County Council assessment of travelling conditions in Cheadle notes that there are significant delays along Leek Road and Froghall Road (in bound) that can be related to capacity constraints at the Leek Road / High Street / Tape Street junction between 8am and 9am[6]. However, over the majority of Cheadle's road network journey times are considered to be reliable and delays relatively modest. A further transport study[7] was commissioned to assess impacts of additional housing and employment land provision on the highway network. Whilst the study predicted that the impacts of planned new development would still enable the overall network in Cheadle to generally remain operating within capacity, a number of further actions were recommended. This study was updated in April 2017[8] and provides a package of mitigation measures. In addition the County Council has proposed a study to consider the potential impacts on town centre traffic levels of a southern link road between A522 Tean Road and A521 Delphouse Road. Sites comprising this option may provide the opportunity to deliver a southern link road. The majority of sites comprising this option are located within 1,200m of the town centre and the wide range of key services and facilities that can be found here. Only sites CH132 and CH128 are more than 1,200m away from the town centre which could result in existing services and facilities being inaccessible for new residents of developments here. Overall the proposal has been assessed as having a minor positive effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Development of residential sites with good access to the town centre is likely to result in a positive effect on the vitality and viability of Cheadle as residents of new developments could be expected to support their local retail, leisure and service provision. **Mitigation measures**: Local Plan policies to support town and village centres. Developers of strategic sites should be required to liaise with SCC and bus operators through the planning process to ensure developments have good access to public transport provision.
17. To strengthen, modernise and	• Will it provide a balanced portfolio of employment	0	0	0	Developments of the sites comprising this option could encourage investment in people and	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**:

SA Objective	Option 4: North-South clusters with small sites scattered through town					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
diversify the District economy, and promote sustainable economic growth	land in sustainable locations? ● Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?				infrastructure through developer contributions. This proposal has been assessed as having a neutral effect on this objective.	A local labour supply will help to deliver economic growth across the plan area. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
18. To encourage and support a high and stable level of employment	● Will it meet the employment needs of local people? ● Will it increase economic activity levels? ● Will it improve physical accessibility to jobs? ● Will it support higher income levels for local residents?	+	+	+	The proposal could facilitate residential development within 30 minutes travel time of existing employment provision. This proposal has been assessed as having a positive effect on this objective.	**Geographical scale**: Local Plan area; **Effects**: Permanent; **Assumptions made**: Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. **Mitigation measures**: Local Plan policies to support sustainable economic growth.
Summary of significant effects: Sites comprising the option "north-south clusters with small scattered sites" are located both within and outside the existing settlement boundary. The sites are a range of sizes, three are large enough to yield over 100 homes each, a further four are expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community. A further positive effect of the option is the opportunity it provides for the delivery of a southern link road to help relieve traffic congestion in the town centre. In addition, enabling a cluster of new development to the south where there are existing school sites whilst also providing land for a new school to the north of the town is expected to spread journeys to school and help to avoid exacerbating congestion at peak times and this is likely to lead to positive effects on the town centre. All of the sites comprising this option could deliver development within 500m of a bus stop and all but two are within 800m of the town centre with its wide range of key services and facilities. This is likely to result in further positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of the town centre, providing support for walking and cycling and reducing the need to travel by car. However sites CH128 and CH132 are more than 1,200m away from the town centre, so this option could also result in existing services and facilities being less accessible for residents of some new developments. This option (in comparison with other options) minimises potential for the cumulative impacts of development to result in the disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated. Whilst the option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles (a protected species) in Staffordshire, sites CH006 and CH009 (within 100m of the Reserve) are not identified as preferred options. This option is also less likely than previous options to result in the development of sites subject to risk from flooding - the option includes sites CH002A, CH020, CH085A and CH85B where small areas of flood					

SA Objective	Option 4: North-South clusters with small sites scattered through town					
	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	zones 2 or 3 at the edge of each site have been excluded from the boundary of each proposed allocation. Dependent on proposal specific information, the cumulative impact of development under this option may result in harm or loss to the significance of designated heritage assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Likely negative effects on landscape character have also been identified; sites CH085A, B, C and D, CH128 and CH132 are all greenfield sites outside the current development boundary, however none are within the area identified as "important landscape setting to settlement". The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.

Appraisal of preferred option policies

16 Appraisal of preferred option policies

16.1 The methodology used to appraise policies in the Local Plan was drawn from that set out in the SA Scoping report and based on the SA Framework. These appraisals were carried out on initial policy drafts in November and December 2016.

Scoring of options

Score	
++	The allocation will have a very positive impact on the sustainability objective
+	The allocation will have a slightly positive impact on the sustainability objective
0	The allocation will have a negligible or neutral impact on the sustainability objective. A recorded neutral effect does not necessarily mean that there will be no effect at the project level, but shows that at this strategic level there are no identifiable effects.
-	The allocation will have a slightly negative impact on the sustainability objective
--	The allocation will have a very negative impact on the sustainability objective
i	The outcome could be dependent on implementation, or more detail is required to make an assessment
?	The impact of an issue cannot be predicted at this stage

Table 16.1 Scoring of options

16.2 Different components within an option may generate varying impacts. This is indicated by "/".

Key to Table

- ST: Short term = 0 - 5 years
- MT: Medium term = 5 - 10 years
- LT: Long term = over 10 years

16.1 Strategic policies

Preferred Option Policy SS1 Development Principles

SA Framework		Preferred Option Policy: SS1 Development Principles				
Summary of Baseline Situation	**SA Objective**	**Predicted Effects**				**Assumptions and mitigation**
		Nature of Effect	**ST**	**MT**	**LT**	**Justification for assessment**
Social: Need to address: Implications of an increasingly ageing population; Meeting identified housing need, including the need for affordable homes and provision of an appropriate mix of house types and tenures; Reducing health inequalities; Opportunities to improve the health of older people through appropriate housing and access to community facilities and services;	1 Community cohesion and neighbourhood quality	Development principles are designed to secure high quality, attractive and well maintained environments, this could enable significant improvements to the social and environmental quality of the neighbourhood in the medium to long term.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent:** Permanent **Assumptions made**:Design principles enforced at planning application stage will implement policy intentions. **Mitigation**: The policy could make reference to enhancement of the District's GI network.
	2 Improving access to jobs, services and facilities	Policy seeks to deliver easy access to jobs, shops and transport services by all sections of the community, this is likely to lead to significant positive effects.	++	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Principles enforced at planning application stage will implement policy intentions.
	3 Improve health and reduce health inequalities	Policy seeks to deliver quality local health-care which could result in the delivery of new health-care facilities.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Appropriate proposals come forward in the plan period.
	4 Minimise opportunities for crime and reduce fear of crime	Policy seeks to deliver a safe environment and may lead to a reduction in the level of crime and fear of crime through design and or other safety measures.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Design principles enforced at planning application stage will implement policy intentions.
	5 Ensure supply new homes to meet local needs including affordable / social / extra care	Policy intention is to secure a mix of types and tenures of quality, affordable homes, including starter homes to meet needs and	++	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions**

SA Framework		Preferred Option Policy: SS1 Development Principles				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Quantity, quality and accessibility of sports and recreation facilities, including open space; Any shortfall in school places; Creation of accessible and safe public and private environments; Modal shift away from journeys by car; Measures that reduce the need to travel; Accessibility for those without a car is maintained and improved.		could make a significant contribution to meeting the needs of the whole community.				**made**:Principles enforced at planning application stage will implement policy intentions. **Mitigation**: The policy could reference needs of older people, including for extra care provision.
	6 Reduce number of journeys made by car	Policy requires a sequential approach to the sustainable location of development and easy access to services and facilities which could help to reduce the number of journeys made by car.	+	+	+	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: A sequential approach will help to focus development close to existing communities. **Mitigation**: Policy could refer to strengthening links between rural areas and towns by sustainable forms of transport.

SA Framework		Preferred Option Policy: SS1 Development Principles				
Summary of Baseline Situation	**SA Objective**	**Predicted Effects**				**Assumptions and mitigation**
		Nature of Effect	**ST**	**MT**	**LT**	**Justification for assessment**
Environmental Need to address: Climate change as a key sustainability issue; Use of areas in flood zone 1 and away from sources of risk; Support for the re-use of construction or construction waste materials; Retention of the distinctive character of the landscape with any change managed positively; Requirement to carry out an Appropriate Assessment of land use plans affecting Natura 2000 sites (HRA);	7 Minimise contributions to climate change, consider climate change adaptation	Policy requires development that contributes effectively to tackling climate change and reduced carbon emissions. More information is required in order to assess the impact of the policy on greenhouse gas emissions and energy consumption.	i	i	i	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: New development will lead to an increase in energy use and carbon emissions. Energy efficiency of new build development will be addressed at planning application stage and through building regulations. **Mitigation**: Policy should seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy.
	8 Improve air quality	Policy intention is the creation of a healthy environment. More information is required to assess how the delivery of new development under this policy would impact on air quality targets and the performance of identified areas of poor air quality.	i	i	i	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: No Air Quality Management Areas have been declared in the district. **Mitigation**: The location of identified areas of poor air quality should be a factor in considering preferred locations for new development. Delivery of significant soft landscape features should be required.
	9 Reduce flood risk, protect and enhance water sources	All new development will address flood risk mitigation / adaptation.	i	i	i	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: The impact of new development on flood risk will be managed through the planning application progress and using other policies in this Local Plan.
	10 Conserve and enhance biodiversity	The policy seeks to make effective use of previously developed land and to secure development that protects and enhances the natural and historic environment. Significance of effect is dependent on implementation of the policy.	i	i	i	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Any impacts on biodiversity will be managed through the planning application process and using other policies in this Local Plan.

SA Framework		Preferred Option Policy: SS1 Development Principles				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Scope for protecting and enhancing habitats of importance for nature conservation, with creation of new habitats where possible; The risk of adverse effects on historic assets; Need for better quality facilities for tourists including serviced accommodation and improved evening economy in towns.	11 Safeguard geological resources including the best and most versatile agricultural land	The policy seeks to make effective use of previously developed land and to secure development that protects and enhances the natural and historic environment. Significance of effect is dependent on implementation of the policy.	i	i	i	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Any impacts on geological resources will be managed through the planning application process and using other policies in this Local Plan.
	12 Minimise the use of non-renewable resources	Policy requires development that secures effective use of resources including making best use of existing buildings.	+	+	+	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Principles enforced at planning application stage will implement policy intentions.
	13 Protect and enhance character of towns / villages; heritage assets and their settings	Policy requires development that maintains the distinctive character of the District's towns and villages and their settings.	++	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Principles enforced at planning application stage will implement policy intentions.
	14 Protect and enhance character / appearance of landscape including historic landscape and other natural assets	Policy requires development that protects and enhances the natural and historic environment of the District.	++	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Principles enforced at planning application stage will implement policy intentions.

SA Framework		Preferred Option Policy: SS1 Development Principles				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
	15 Encourage sustainable tourism, cultural heritage and local distinctiveness	Taking account of the distinctive character of the District, including its natural and historic environment will support and strengthen Staffordshire Moorlands tourism attraction and help to maintain the visitor economy.	+	+	+	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Tourism would be negatively impacted by a decline in the natural and built environment.
Economic Need to address Meeting local employment needs to achieve self-sufficient communities; Initiatives to encourage further employment development and retention / expansion of existing businesses; Diversification of the economic base to improve employment opportunities; Safeguarding good quality employment sites	16 Safeguard vitality of towns and sustain vibrant rural economy	Policy intent is to create sustainable, self-sufficient settlements encouraging a strong, prosperous and diverse economy and this could lead to enhancing the vitality and viability of the District's towns and villages.	+	+	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale of effect**: Local Plan area **Temporary / Permanent** Permanent **Assumptions made**:Principles enforced at planning application stage will implement policy intentions.
	17 Sustainable economic growth and diversification of the economy	Policy intent is to create sustainable, self-sufficient settlements encouraging a strong, prosperous and diverse economy and this could lead to investment in business, people and infrastructure, resulting in a strengthened and more diversified economy.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Principles enforced at planning application stage will implement policy intentions.
	18 High and stable level of employment	Policy intent is to create sustainable, self-sufficient settlements encouraging a strong, prosperous and diverse economy and this could facilitate the delivery of new employment opportunities, or residential development in close proximity to existing local employment provision, depending on implementation.	i	i	i	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Principles enforced at planning application stage will implement policy intentions.

SA Framework		Preferred Option Policy: SS1 Development Principles

		Nature of Effect	ST	MT	LT	Justification for assessment
from development for other uses; Provision of relevant employment skills, training and support to help retain and develop a local workforce; Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						

SA Framework		Preferred Option Policy: SS1 Development Principles				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Summary of significant effects of policy: Policy SS1 Development Principles expects development to contribute positively to the social, economic and environmental improvement of the District in partnership with other agencies and services. All proposals for development will be considered in the context of the District-wide spatial strategy. Significant positive effects include the likelihood of improvements to the social and environmental quality of the neighbourhood and improved access to jobs, services and facilities. Policy intent is to secure a mix of types and tenures of quality, affordable homes, including starter homes and this could make a significant contribution to meeting the needs of the whole community. Further positive effects are likely to result from the intentions to maintain the distinctive character of the District's towns and villages and their settings; to protect and enhance the natural and historic environment of the District and to create sustainable, self-sufficient settlements encouraging a strong, prosperous and diverse economy. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows: **Mitigation:** The policy could make reference to enhancement of the District's GI network and to the needs of older people, including for extra care provision. The policy should seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy. The location of identified areas of poor air quality should be a factor in considering preferred locations for new development and the delivery of significant soft landscape features should be required to help maximise the removal of air pollutants where necessary. The Policy could refer to strengthening links between rural areas and towns by sustainable forms of transport.					

Table 16.2 Assessment Table for Preferred Option Policy SS1

Preferred Option Policy SS2 Presumption in Favour of Sustainable Development

SA Framework		SS2 Presumption in Favour of Sustainable Development				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Social: Need to address: Implications of an increasingly ageing population;	1 Community cohesion and neighbourhood quality	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF, this could enable significant improvements to the social and environmental quality of the neighbourhood in the medium to long term.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent:** Permanent **Assumptions made**:Design principles enforced at planning application stage will implement policy intentions.

SA Framework		SS2 Presumption in Favour of Sustainable Development				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Meeting identified housing need, including the need for affordable homes and provision of an appropriate mix of house types and tenures; Reducing health inequalities; Opportunities to improve the health of older people through appropriate housing and access to community facilities and services; Quantity, quality and accessibility of sports and recreation facilities, including open space; Any shortfall in school places;	2 Improving access to jobs, services and facilities	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF, this is likely to lead to significant positive effects to advance equality of opportunity and reduce social exclusion.	++	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Principles enforced at planning application stage will implement policy intentions.
	3 Improve health and reduce health inequalities	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF and this could result in the delivery of new health-care facilities.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Appropriate proposals come forward in the plan period.
	4 Minimise opportunities for crime and reduce fear of crime	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF, and this may lead to a reduction in the level of crime and fear of crime through design and or other safety measures.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Design principles enforced at planning application stage will implement policy intentions.
	5 Ensure supply new homes to meet local needs including affordable / social / extra care	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF, and this could make a significant contribution to meeting the housing needs of the whole community.	++	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Principles enforced at planning application stage will implement policy intentions.
	6 Reduce number of journeys made by car	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF which could help to reduce the number of journeys made by car.	+	+	+	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: A sequential approach will help to focus development close to existing communities.

SA Framework		SS2 Presumption in Favour of Sustainable Development				
Summary of Baseline Situation	**SA Objective**	**Predicted Effects**				**Assumptions and mitigation**
		Nature of Effect	**ST**	**MT**	**LT**	**Justification for assessment**
Creation of accessible and safe public and private environments; Modal shift away from journeys by car; Measures that reduce the need to travel; Accessibility for those without a car is maintained and improved.						
Environmental Need to address: Climate change as a key sustainability issue; Use of areas in flood zone 1 and away from sources of risk;	7 Minimise contributions to climate change, consider climate change adaptation	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF, however more information is required in order to assess the impact of the policy on greenhouse gas emissions and energy consumption.	i	i	i	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: New development will lead to an increase in energy use and carbon emissions. Energy efficiency of new build development will be addressed at planning application stage and through building regulations.
	8 Improve air quality	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF however more information is required to assess how the delivery of new development under this policy would impact on air quality targets and the performance of identified areas of poor air quality.	i	i	i	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: No Air Quality Management Areas have been declared in the district.

SA Framework		SS2 Presumption in Favour of Sustainable Development				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Support for the re-use of construction or construction waste materials; Retention of the distinctive character of the landscape with any change managed positively; Requirement to carry out an Appropriate Assessment of land use plans affecting Natura 2000 sites (HRA); Scope for protecting and enhancing habitats of importance for nature conservation, with creation of new habitats where possible;	9 Reduce flood risk, protect and enhance water sources	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF and all new development will address flood risk mitigation / adaptation.	i	i	i	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: The impact of new development on flood risk will be managed through the planning application progress and using other policies in this Local Plan.
	10 Conserve and enhance biodiversity	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF which is likely to help protect and enhance the natural and historic environment.	+	+	+	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Any impacts on biodiversity will be managed through the planning application process and using other policies in this Local Plan.
	11 Safeguard geological resources including the best and most versatile agricultural land	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF which is likely to secure development that protects and enhances geological resources. Significance of effect is dependent on implementation of the policy.	i	i	i	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Any impacts on geological resources will be managed through the planning application process and using other policies in this Local Plan.
	12 Minimise the use of non-renewable resources	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF and this is likely to lead to development that secures effective use of resources including making best use of existing buildings.	+	+	+	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Principles enforced at planning application stage will implement policy intentions.
	13 Protect and enhance character of towns / villages; heritage assets and their settings	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF and this is likely to lead to development that maintains the distinctive character of the District's towns and villages and their settings.	++	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Principles enforced at planning application stage will implement policy intentions.

SA Framework		SS2 Presumption in Favour of Sustainable Development				
Summary of Baseline Situation	**SA Objective**	**Predicted Effects**				**Assumptions and mitigation**
		Nature of Effect	**ST**	**MT**	**LT**	**Justification for assessment**
The risk of adverse effects on historic assets; Need for better quality facilities for tourists including serviced accommodation and improved evening economy in towns.	14 Protect and enhance character / appearance of landscape including historic landscape and other natural assets	Policy requires development that protects and enhances the natural and historic environment of the District.	++	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Principles enforced at planning application stage will implement policy intentions.
	15 Encourage sustainable tourism, cultural heritage and local distinctiveness	The Council will take a positive approach that reflects the presumption in favour of sustainable development contained in the NPPF which is likely to help support and strengthen Staffordshire Moorlands tourism attraction and help to maintain the visitor economy.	+	+	+	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Tourism would be negatively impacted by a decline in the natural and built environment.

		Nature of Effect	ST	MT	LT	Justification for assessment
Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: Policy SS2 Presumption in favour of sustainable development sets out how the Council will work with applicants to facilitate development that improves the economic, social and environmental conditions of Staffordshire Moorlands. Significant positive effects were identified. Since the Policy reflects the presumption in favour of sustainable development set out in the NPPF, no mitigation measures were identified.						

Table 16.3 Assessment Table for Preferred Option Policy SS2

Preferred Option Policy SS3 Future Provision and Distribution of Development

SA Framework		SS3 Future provision and distribution of development				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Social: Need to address: Implications of an increasingly ageing population; Meeting identified housing need, including the need for affordable homes and provision of an appropriate mix of house types and tenures; Reducing health inequalities; Opportunities to improve the health of older people through appropriate housing and access to community facilities and services;	1 Community cohesion and neighbourhood quality	Provision will be made for new retail, transport, recreational and community facilities and this could enable significant improvements to the social and environmental quality of the neighbourhood in the medium to long term.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent:** Permanent **Assumptions made**: Appropriate proposals come forward.
	2 Improving access to jobs, services and facilities	Development will be located in accordance with the spatial strategy which supports the focus of growth in the towns with adequate provision in the rural areas to support local communities.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Principles enforced at planning application stage will implement policy intentions.
	3 Improve health and reduce health inequalities	Provision will be made for new recreational and community facilities and this may help to support healthy lifestyles.	+	+	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Appropriate proposals come forward in the plan period.
	4 Minimise opportunities for crime and reduce fear of crime	This SA objective will be addressed through other policies in the Local Plan.	0	0	0	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Design principles enforced at planning application stage will address this objective.
	5 Ensure supply new homes to meet local needs including affordable / social / extra care	Provision of new homes to meet the objectively assessed needs of the District is likely to make a significant contribution to meeting the needs of the whole community.	++	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Delivery of affordable homes will be managed through other policies in the Plan.

SA Framework		SS3 Future provision and distribution of development				
Summary of Baseline Situation	**SA Objective**	**Predicted Effects**				**Assumptions and mitigation**

		Nature of Effect	ST	MT	LT	Justification for assessment
Meeting local employment needs to achieve self-sufficient communities; Initiatives to encourage further employment development and retention / expansion of existing businesses; Diversification of the economic base to improve employment opportunities; Safeguarding good quality employment sites from development for other uses; Provision of relevant employment skills, training and support to help retain and develop a local workforce;						
	17 Sustainable economic growth and diversification of the economy	Provision will be made for at least 35 hectares of additional employment land during the period 2011 - 2031, and this is likely to encourage investment in business, people and infrastructure.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Allocation of employment land will help deliver a strengthened and more diversified economy.
	18 High and stable level of employment	Provision of new homes and employment land to meet identified need could facilitate the delivery of new employment opportunities or residential development in close proximity to existing employment provision. A lack of new homes to accommodate growth may limit economic development through a fall in the labour force.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: A good proportion of the residents of new homes will work locally and a proportion of new businesses will employ local people.

SA Framework		SS3 Future provision and distribution of development				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: Policy SS3 Future Provision and Distribution of Development sets out that provision will be made for 6,080 additional dwellings in the plan area during the period 2012 to 2031. Provision will also be made for at least 35 hectares of additional employment land between 2011 and 2031 and for new retail, transport, recreational, community and tourism facilities and services to meet the identified needs of settlements. Significant positive effects include the likelihood of improvements to the social and environmental quality of the neighbourhood and improved access to jobs, services and facilities. Meeting objectively assessed housing need could make a significant contribution to meeting the needs of the whole community. Provision of new homes will help to enhance the vitality and viability of the District's towns and villages. Lower housing targets would have less of a positive impact on vitality and viability. Provision of new homes and employment land to meet identified need could facilitate the delivery of new employment opportunities or residential development in close proximity to existing employment provision. A lack of new homes to accommodate growth may limit economic development through a fall in the labour force. No mitigation measures were identified.

retain and develop a local workforce; Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: Policy SS6 Leek Area Strategy seeks to consolidate the role of Leek as the principal service centre and a market town and to support its regeneration. Policy intent is to increase the range of available and affordable house types, especially for first time buyers and older people and this is likely to make a significant contribution to meeting the housing needs of the whole community. Further positive effects are likely to result from the intentions to create employment growth and increase the diversity of employment opportunities; strengthen the role of Leek as a principal service and retailing centre for the District and to promote Leek's special character and heritage. Significant positive effects also include the likelihood of improvements to the social and environmental quality of neighbourhoods and improved access to jobs, services and facilities. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:						

SA Framework		SS6 Leek Area Strategy				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Mitigation: The policy should refer to the District's GI Strategy and to strengthening links between rural areas and the town by sustainable forms of transport. The policy should seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy. The policy should also refer to taking opportunities to enhance the character and appearance of the landscape, including the historic landscape, paying particular attention to the quality of the urban / rural interface.

		Nature of Effect	ST	MT	LT	Justification for assessment
Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: Policy SS7 Biddulph Area Strategy seeks to enhance the role of Biddulph as a significant service centre and a market town and to support its regeneration. Policy intent is to increase the range of available and affordable house types, especially for first time buyers, families and older people and this is likely to make a significant contribution to meeting the housing needs of the whole community. Further positive effects are likely to result from the intentions to create employment growth and increase the diversity of employment opportunities; strengthen the role of Biddulph as a significant service and retailing centre for the District and to improve the image and identity of Biddulph and strengthen its role as a visitor destination. Significant positive effects also include the likelihood of improvements to the social and environmental quality of neighbourhoods and improved access to jobs, services and facilities. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows: **Mitigation:** The policy should refer to the District's GI Strategy, in particular to supporting measures to encourage walking and cycling, improving and creating pedestrian and cycle links in the town and to increasing access into the countryside by foot, cycling and horse riding. The policy should seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy. The policy should also refer to taking opportunities to enhance the character and appearance of the landscape, including the historic landscape, paying particular attention to the quality of the urban / rural interface and to increasing tourist opportunities for visitors.

Safeguarding good quality employment sites from development for other uses; Provision of relevant employment skills, training and support to help retain and develop a local workforce; Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						

SA Framework		SS9 Rural Areas				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Summary of significant effects of policy: Policy SS9 Rural Areas establishes a development requirement for the rural areas defined as larger villages, smaller villages and other rural areas and ensures that development in the rural areas reflects the spatial strategy. Positive effects are noted as follows. The policy categorises villages based on their population, services, facilities and capacity for development and this is likely to contribute to maintaining and strengthening local distinctiveness and sense of place. The policy also seeks to deliver the employment land necessary to provide sufficient local employment opportunities in the villages and to enhance and diversify employment provision at existing employment sites in the rural areas and this is likely to facilitate the delivery of new employment opportunities. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows: **Mitigation:** Option 2 for the policy should make clear that "local" infrastructure includes social infrastructure.						

Table 16.10 Assessment Table for Preferred Option Policy SS9 Rural Areas

Preferred Option Policy SS10 Larger Villages Areas Strategy

		Nature of Effect	ST	MT	LT	Justification for assessment
Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: Policy SS10 Larger Villages Area Strategy identifies the larger villages and seeks to retain and enhance their role as rural service centres, providing for the bulk of the local housing needs of the rural areas and also for limited employment needs of a scale and type appropriate to each settlement having regard to local needs, infrastructure capacity and character. Policy intent is to increase the range of available and affordable house types, especially for first time buyers and families and this is likely to make a significant contribution to meeting housing needs. Further positive effects are likely to result from the intentions to enable small scale new employment development and improve the use of existing employment areas; retain and enhance the role of rural areas as rural service centres and to ensure that new development reflects and enhances each village's special character and heritage. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows: **Mitigation:** The policy should support environmental enhancements, including the improvement and creation of Local Green Spaces. It should refer to the District's GI Strategy and improving pedestrian and cycle links through the villages and to surrounding towns and villages and into the countryside, as well as to meeting the needs of older people, including with extra care housing. Policy could refer to taking opportunities to enhance the character and appearance of the landscape, including the historic landscape, paying particular attention to the edge of settlements.

support to help retain and develop a local workforce; Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: Policy SS11 Smaller Villages Area Strategy identifies the smaller villages and seeks to ensure these settlements provide only for appropriate development which enhances community vitality or meets a social or economic need of the settlement and its hinterland. Policy intent is to enable new housing development which meets a need, including affordable housing, and this is likely to make a positive contribution to meeting housing needs. Further positive effects are likely to result from the intentions to enable small scale new employment development including live-work units; protect and enable services and facilities which are essential to sustain rural living and to ensure that new development does not undermine the character and life of the settlement. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:						

SA Framework		SS11 Smaller Villages Area Strategy				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Mitigation: The policy should support environmental enhancements, including the improvement and creation of Local Green Spaces. It should refer to the District's GI Strategy and improving pedestrian and cycle links through the villages and to surrounding towns and villages and into the countryside, as well as to meeting the needs of older people, including with extra care housing. Policy should seek to ensure that new development reflects and enhances each village's special character and heritage. The policy could also refer to taking opportunities to enhance the character and appearance of the landscape, including the historic landscape, paying particular attention to the edge of settlements.

Safeguarding good quality employment sites from development for other uses; Provision of relevant employment skills, training and support to help retain and develop a local workforce; Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						

SA Framework		SS12 Other Rural Areas Strategy				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Summary of significant effects of policy: Policy SS12 Other Rural Areas Strategy identifies the other rural areas as comprising the countryside and the green belt outside settlement boundaries and including those small settlements and dispersed developments not identified in policies SS10 and SS11. Policy intent is that these areas will provide only for development which has an essential need to be located in the countryside, supports rural diversification, contributes to sustainability of the rural areas, promotes sutainable tourism or enhances the countryside. Significant positive effects include enhancing and conserving the quality of the countryside, including recognising and conserving the special quality of the landscape in the Peak District National Park and limiting uses which generate a substantial number of regular trips in areas that are not well served by public transport - as this is likely to help to reduce the number of journeys made by car. Further positive effects are likely to result from encouraging measures which protect and enhance the biodiversity and geological resources, as well as the heritage of the district. Also, from measures to sustain the rural economy and enhance tourist opportunities. Whilst no significant negative effects were predicted, a policy improvement was identified as follows: **Mitigation:** The policy should refer to the District's GI Strategy and improving pedestrian and cycle links, including into the countryside, as well as improving opportunities for related leisure activities such as horse riding.

Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: Policy SS13 Churnet Valley Strategy manages development according to the aims of the strategy for the Churnet Valley and the Churnet Valley Masterplan SPD. Policy intent is enable the Churnet Valley to provide a strong focus for sustainable rural regeneration across the district and this may help to advance equality of opportunity as well as to enhance the vitality and viability of the area's towns and villages. Further positive effects for health and for reducing the need for car use are likely to result from the intentions to enhance and develop links to strategic footpaths, cycle and horse riding routes and to improve connectivity and accessibility to and within the Churnet Valley by all forms of sustainable transport. In addition support for measures to protect and enhance the biodiversity, landscape character and heritage assets of the valley are all likely to lead to additional positive effects. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows: **Mitigation:** The policy should refer to the District's GI Strategy and to meeting the needs of older people, including with extra care housing. The policy should seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy. The policy should also refer to taking opportunities to enhance the character and appearance of the landscape, including the historic landscape, paying particular attention to the quality of the urban / rural interface and to increasing tourist opportunities for visitors.						

Table 16.14 Assessment Table for Preferred Option Policy SS13 Churnet Valley Strategy

Preferred Option Policy SS14 Northern Gateway Opportunity Site

SA Framework		SS14 Northern Gateway Opportunity Site				
Summary of Baseline Situation	**SA Objective**	**Predicted Effects**				**Assumptions and mitigation**
		Nature of Effect	**ST**	**MT**	**LT**	**Justification for assessment**
Social: Need to address: Implications of an increasingly ageing population; Meeting identified housing need, including the need for affordable homes and provision of an appropriate mix of house types and tenures; Reducing health inequalities; Opportunities to improve the health of older people through appropriate housing and access to community facilities and services;	1 Community cohesion and neighbourhood quality	The policy could enable the provision of new community facilities and services.	+	+	+	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Northern Gateway **Temporary / Permanent:** Permanent **Assumptions made**:Design principles enforced at planning application stage will implement policy intentions. **Mitigation**: Policy should specify the need to have regard to the Green Infrastructure Strategy for the district.
	2 Improving access to jobs, services and facilities	Serving a regional need for employment and potentially other community requirements may help to advance equality of opportunity and address need.	+	+	+	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Northern Gateway **Temporary / Permanent**: Permanent **Assumptions made**:Principles enforced at planning application stage will implement policy intentions.
	3 Improve health and reduce health inequalities	Policy addresses need for high quality employment development. This objective will be addressed by other policies in the plan.	0	0	0	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Northern Gateway **Temporary / Permanent**: Permanent **Assumptions made**: Appropriate proposals come forward in the plan period. **Mitigation**: Policy should require measures to improve connectivity and accessibility to the site by sustainable transport means having regard to the GI strategy.
	4 Minimise opportunities for crime and reduce fear of crime	This will be managed through other policies in the Local Plan.	0	0	0	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Northern Gateway **Temporary / Permanent**: Permanent **Assumptions made**:Design principles enforced at planning application stage will implement policy intentions.

Safeguarding good quality employment sites from development for other uses; Provision of relevant employment skills, training and support to help retain and develop a local workforce; Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						

SA Framework		SS14 Northern Gateway Opportunity Site				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Summary of significant effects of policy: Policy SS14 Northern Gateway Opportunity Site supports the development of a Regional Investment Site for high quality employment development at this location and in line with the Northern Gateway. This is a large site (the northern area is approximately 19.28 ha and the southern area is approximately 29.3 ha) on the south-eastern outskirts of Blythe Bridge. The A50 runs through the middle of the site from the north-west to the south-east. The site as a whole is extensively surrounded by farm land to the east, south and west and by housing and built environment to the north. However, it is effectively isolated from the wider landscape because it is encircled by major roads (the A50 and A521) to the north and east, Cresswell Lane to the south and the Crewe to Derby railway line to the west. The river Blithe runs adjacent to the railway line further to the west. The majority of the site consists of uniform, improved grassland used for pasture. This habitat is common and widespread both locally and throughout the UK. Policy intent is to deliver high quality employment development and this is likely to encourage investment in businesses, people and infrastructure leading to a strengthened and more diversified economy, and facilitating the delivery of new employment opportunities. Further positive effects for minimising disadvantages are likely as a result of the site serving a regional need for employment and potentially other community requirements as this may help to advance equality of opportunity and address community need. However potentially significant negative effects on climate change were predicted as the proposal could significantly increase the need to travel by less sustainable forms of transport, increasing road traffic and congestion. Also the site is partially located within a mineral consultation area - bedrock sand. A number of policy improvements were identified as follows: **Mitigation:** The policy should require measures to improve connectivity and accessibility to the site by sustainable transport means having regard to the GI strategy. The policy should also seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy and should support measures to enhance, protect and interpret landscape character. In addition, appropriate consultation will need take place to ensure sand resources are safeguarded from unnecessary sterilisation by non-mineral development.

Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: Policy SS15 Planning Obligations and Community Infrastructure Levy provides clarity regarding the Council's approach to developer contributions. The policy could enable the provision of new, or the significant enhancement of existing, community facilities and services and this is likely to make a positive contribution towards community cohesion and the quality of where people work and live. Further positive effects on health and the supply of new homes to meet need were identified, as developer contributions may help to ensure the delivery of an appropriate quantity and quality of open space, sport and recreation facilities and an increase in the supply of affordable homes. No policy improvements were identified.

		Nature of Effect	ST	MT	LT	Justification for assessment
retain and develop a local workforce; Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: Policy SD1 Sustainable Use of Resources sets out a range of measures in relation to the sustainable use of resources and measures to address climate change. These include encouragement to be given to development on previously developed land and a requirement for major developments to demonstrate consideration given to energy efficiency, water conservation, sourcing of construction materials, site orientation and integration of micro-renewables. Significant positive effects on minimising contributions to climate change are predicted to arise from the policy requirement that all development should adapt to climate change and encouragement for the re-use of construction or construction waste materials. Further positive effects are likely to result from the support for development that is located to minimise energy needs as this is likely to result in the location of development in proximity to existing services and facilities. Whilst no significant negative effects were predicted, a policy improvement was identified as follows:						

SA Framework		Preferred Option Policy: SD1 Sustainable Use of Resources				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Mitigation: Policy should clarify that any remediation of brownfield land should pay particular attention to the need to identify, conserve and enhance biodiversity resources.

Provision of relevant employment skills, training and support to help retain and develop a local workforce; Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy SD2 Renewable / low-carbon energy** gives support to new renewable energy development whilst recognising that the siting and design of all stand-alone renewables installations requires careful consideration to protect the natural and built environment and other amenities. Significant positive effects on minimising contributions to climate change are predicted to arise from the policy intent to meet part of the District's future energy demand through renewable or low-carbon energy sources. Whilst no significant negative effects were predicted, a policy improvement was identified as follows:						

SA Framework		Preferred Option Policy: SD2 Renewable / low carbon energy				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Mitigation: The policy should clarify that impacts on the landscape includes the historic landscape and other natural assets and resources.

Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Provision of relevant employment skills, training and support to help retain and develop a local workforce; Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy SD3 Sustainability Measures in Development** supports a number of measures which can improve the sustainability of new or existing development, including exceeding thermal efficiency or water conservation standards, contributing to District Heating networks or the installation of micro-renewables. Significant positive effects on minimising contributions to climate change are predicted to arise from the policy intent to support further carbon- or water-saving measures. No significant negative effects were predicted however a policy improvement was identified as follows:

	14 Protect and enhance character / appearance of landscape including historic landscape and other natural assets	This objective will be addressed by other policies in the Local Plan. In exceptional circumstances developments outside the settlement boundary may be supported where a rural location can be justified.	0	0	0	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Any impacts on landscape character and natural assets will be managed through the planning application process and using other policies in this Local Plan.
	15 Encourage sustainable tourism, cultural heritage and local distinctiveness	This objective will be addressed by other policies in the Local Plan.	0	0	0	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Any impacts on sustainable tourism and the cultural economy will be managed through the planning application process and using other policies in this Local Plan.
Economic Need to address	16 Safeguard vitality of towns and sustain vibrant rural economy	Policy will help ensure that there is a choice of sustainably located employment sites and this is likely to lead to significant enhancement of the vitality and viability of the District's towns	++	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale of effect**: Local Plan area **Temporary / Permanent** Permanent **Assumptions made**: Principles enforced at planning application stage will implement policy intentions.

SA Framework		Preferred Option Policy: E1 New Employment Development				
Summary of Baseline Situation	**SA Objective**	**Predicted Effects**				**Assumptions and mitigation**
		Nature of Effect	**ST**	**MT**	**LT**	**Justification for assessment**
Meeting local employment needs to achieve self-sufficient communities; Initiatives to encourage further employment development and retention / expansion of existing businesses; Diversification of the economic base to improve employment opportunities; Safeguarding good quality employment sites from development for other uses; Provision of relevant employment skills, training and support to help retain and develop a local workforce;		and villages, contributing to the safeguarding and improvement of shops and services.				
	17 Sustainable economic growth and diversification of the economy	Policy supports proposals that help to maintain or enhance an appropriate range of employment premises and sites across the District and this is likely to encourage investment leading to a strengthened and more diversified economy.	++	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Principles enforced at planning application stage will implement policy intentions.
	18 High and stable level of employment	Policy proposes local labour agreements where appropriate to contribute towards training programmes and employment support and access schemes and this is likely to contribute to meeting the employment needs of local people.	+	++	++	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Principles enforced at planning application stage will implement policy intentions.

SA Framework		Preferred Option Policy: E1 New Employment Development				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy E1 New Employment Development** will ensure that there is a choice of sustainably located employment sites, attractive to developers and operators and appropriate to market needs. In order to ensure that the local workforce and businesses benefit from new development, the policy also proposes local labour agreements where appropriate to contribute towards training programmes and employment support and access schemes. Significant positive effects on advancing equality of opportunity; safeguarding the vitality of towns and sustaining a vibrant rural economy are predicted to result. Further positive effects on sustainable economic growth, diversification of the economy and high and stable level of employment were identified. There is potential for negative effects on contribution to climate change arising from policy support for new business developments, as this is likely to result in greater energy use.

support to help retain and develop a local workforce; Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy E4 Tourism and Cultural Development** supports the development of the tourist industry with new development proposals to be assessed according to the extent to which they support the local economy and promote the distinctive character and quality of the District. Significant positive effects on encouraging sustainable tourism, cultural heritage and local distinctiveness are likely to result from this. Further positive effects on reducing the number of journeys made by car and advancing equality of opportunity, sustainable economic growth, diversification of the economy, high and stable level of employment and safeguarding the vitality of towns were identified. There is potential for negative effects on contribution to climate change arising from new development, as this is likely to result in greater energy use.

Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy H1 New Housing Development** seeks to ensure that an appropriate range of sizes, types and tenures of housing is provided, supporting the provision of flexible accommodation delivered in accordance with the nationally described space standard and to meet accessibility standards set out in the Optional Requirement M4(2) of building regulations. Significant positive effects on ensuring the supply new homes meet local needs including affordable / social / extra care are likely to result from enabling the Plan's objectively assessed housing need to be delivered. Further positive effects on enhancing the vitality and viability of the District's towns and villages and supporting stable levels of employment were identified. There is potential for negative effects on contribution to climate change arising from new development, as this is likely to result in greater energy use. No mitigation measures were identified.

Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy H2 Housing Allocations** identifies sites as suitable for housing development in order to meet the housing target set out in Policy SS3. Significant positive effects on ensuring the supply of new homes to meet local needs are likely to result from site allocations. Further positive effects on enhancing the vitality and viability of the District's towns and villages and supporting stable levels of employment were also identified. Further detail relating to any predicted impacts on biodiversity, landscape or townscape character is provided in the specific sites appraisals. There is potential for negative effects on contribution to climate change arising from supply of land for new development, as this is likely to result in greater energy use. No mitigation measures were identified.

		Nature of Effect	ST	MT	LT	Justification for assessment
Meeting local employment needs to achieve self-sufficient communities; Initiatives to encourage further employment development and retention / expansion of existing businesses; Diversification of the economic base to improve employment opportunities; Safeguarding good quality employment sites from development for other uses; Provision of relevant employment skills, training and support to help retain and develop a local workforce;						
	17 Sustainable economic growth and diversification of the economy	This SA objective will be addressed through other policies in the Local Plan.	0	0	0	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Provision of new homes across the plan area will help to support the continued economic growth of the District.
	18 High and stable level of employment	Provision of affordable housing will help to maintain a local labour force.	0	0/+	+	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: A good proportion of the residents of new homes will work locally and a proportion of new businesses will employ local people.

SA Framework		H3 Affordable Housing				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy H3 Affordable Housing** identifies thresholds for an affordable housing target of 33% in towns and the larger villages; in or on the edge of smaller villages, small schemes for 100% affordable housing will be permitted on suitable rural exception sites; the policy also sets a starter homes target. Significant positive effects on ensuring the supply of new homes to meet local needs are likely to result from provision of affordable housing. Further positive effects on enhancing the vitality and viability of the District's towns and villages and supporting stable levels of employment were also identified. There is potential for negative effects on contribution to climate change arising from new development, as this is likely to result in greater energy use. No mitigation measures were identified.

		Nature of Effect	ST	MT	LT	Justification for assessment
Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy H4 Rural Housing** recognises that the re-use of rural buildings for commercial purposes is preferable to that of residential uses and establishes criteria for re-use, the policy also recognises the need to safeguard rural buildings considered to be of particular merit in terms of their contribution to local character or heritage and the need to deliver affordable homes. Positive effects on ensuring the supply of new homes to meet local needs are likely to result from provision of affordable housing, provision of rural housing is also likely to benefit the development of sustainable communities and community cohesion. Further positive effects on helping sustain the rural economy were identified from helping to meet rural housing need. There is potential for negative effects on contribution to climate change arising from new development, as this is likely to result in greater energy use; and from a likely increased use of private transport. Policy improvements were identified as follows: **Mitigation**: Policy should require housing to remain affordable for successive occupiers in perpetuity and include a requirement for sites to be adequately served by existing services and facilities.

Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy H5 Gypsy and Traveller Sites and Sites for Travelling Showpeople** sets out the criteria for determination of applications for gypsy and traveller sites or for making future site allocations. Significant positive effects on meeting identified housing need is likely to result from the policy intent to meet the needs of the gypsy, traveller and travelling show people community. Access to accommodation and local services and facilities is likely to lead to further positive impacts on health and well-being for gypsies and travellers and establishing the considerations that will be taken into account for determining applications or future allocations is likely to lead to positive effects on helping ensure community safety and local environmental quality.

Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Social: Need to address: Implications of an increasingly ageing population; Meeting identified housing need, including the need for affordable homes and provision of an appropriate mix of house types and tenures; Reducing health inequalities; Opportunities to improve the health of older people through appropriate housing and access to community facilities and services;	1 Community cohesion and neighbourhood quality	Policy refers to setting out design principles including minimising the risk of crime.	+	+	+	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent:** Permanent **Assumptions made**: Principles enforced at planning application stage will manage impacts on the quality of neighbourhoods. **Mitigation**: Policy should encourage proposals that deliver high quality public spaces.
	2 Improving access to jobs, services and facilities	The three towns will accommodate the greatest proportion of the District's housing, employment and retail needs, the towns accommodate 50% of the District's current population and the majority of existing services and facilities.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Principles enforced at planning application stage will implement policy intentions.
	3 Improve health and reduce health inequalities	This SA objective will be addressed through other policies in the Local Plan.	0	0	0	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Principles enforced at planning application stage will manage impacts on health and inequalities.
	4 Minimise opportunities for crime and reduce fear of crime	Policy refers to setting out design principles including minimising the risk of crime.	+	+	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Design principles enforced at planning application stage will address this objective. **Mitigation**: Policy should require active ground floor frontages to be maintained and created within town centres with appropriate town centre uses.

SA Framework		TCR1 Development in the Town Centres				
Summary of Baseline Situation	**SA Objective**	**Predicted Effects**				**Assumptions and mitigation**
		Nature of Effect	**ST**	**MT**	**LT**	**Justification for assessment**
Quantity, quality and accessibility of sports and recreation facilities, including open space; Any shortfall in school places Creation of accessible and safe public and private environments; Modal shift away from journeys by car; Measures that reduce the need to travel; Accessibility for those without a car is maintained and improved.	5 Ensure supply new homes to meet local needs including affordable / social / extra care	Policy includes measures aimed at maintaining the vitality and viability of town centres, neutral impact likely on supply of new homes.	0	0	0	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Delivery of new homes will be managed through other policies in the Plan.
	6 Reduce number of journeys made by car	Policy requires good access to the town centres by those using public transport, cycling or walking.	+	+	+	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Principles enforced at planning application stage will manage impacts on accessibility for those without a car.
Environmental Need to address:	7 Minimise contributions to climate change, consider climate change adaptation	New development will result in increased energy use and greenhouse gas emissions.	i/-	i/-	i/--	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: New

SA Framework		TCR1 Development in the Town Centres				
Summary of Baseline Situation	**SA Objective**	**Predicted Effects**				**Assumptions and mitigation**
		Nature of Effect	**ST**	**MT**	**LT**	**Justification for assessment**
Climate change as a key sustainability issue; Use of areas in flood zone 1 and away from sources of risk; Support for the re-use of construction or construction waste materials; Retention of the distinctive character of the landscape with any change managed positively; Requirement to carry out an Appropriate Assessment of land use plans affecting Natura 2000 sites (HRA); Scope for protecting and enhancing habitats						development will lead to an increase in energy use and carbon emissions. Energy efficiency of new build development will be addressed at planning application stage and through building regulations.
	8 Improve air quality	Town centre developments may result in localised poor air quality.	?/-	?/-	?/-	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: No Air Quality Management Areas have been declared in the district.
	9 Reduce flood risk, protect and enhance water sources	All new development will address flood risk mitigation / adaptation.	i	i	i	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: The impact of new development on flood risk will be managed through the planning application progress and using other policies in this Local Plan.
	10 Conserve and enhance biodiversity	Policy relates to town centre development. This SA objective will be addressed through other policies in the Local Plan.	0	0	0	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Any impacts on biodiversity will be managed through the planning application process and using other policies in this Local Plan.
	11 Safeguard geological resources including the best and most versatile agricultural land	Policy relates to town centre development. This SA objective will be addressed through other policies in the Local Plan.	0	0	0	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Any impacts on geological resources will be managed through the planning application process and using other policies in this Local Plan.

SA Framework		TCR1 Development in the Town Centres				
Summary of Baseline Situation	**SA Objective**	**Predicted Effects**				**Assumptions and mitigation**
		Nature of Effect	**ST**	**MT**	**LT**	**Justification for assessment**
of importance for nature conservation, with creation of new habitats where possible; The risk of adverse effects on historic assets; Need for better quality facilities for tourists including serviced accommodation and improved evening economy in towns.	12 Minimise the use of non-renewable resources	This SA objective will be addressed through other policies in the Local Plan.	0	0	0	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Principles enforced at planning application stage will address this objective.
	13 Protect and enhance character of towns / villages; heritage assets and their settings	Policy refers to setting out design principles to improve and enhance the distinctive heritage of the town centres.	+	+	+	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Design principles and policies enforced at planning application stage will help to ensure protection of townscape, heritage assets and their settings.
	14 Protect and enhance character / appearance of landscape including historic landscape and other natural assets	Policy relates to town centre development. This SA objective will be addressed through other policies in the Local Plan.	0	0	0	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Design principles and policies enforced at planning application stage will help to ensure protection of the character of the landscape and natural assets.
	15 Encourage sustainable tourism, cultural heritage and local distinctiveness	Policy supports positive measures which enhance the town centres and promote their tourism potential.	+	+	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Principles enforced at planning application stage will deliver policy objectives.
Economic Need to address	16 Safeguard vitality of towns and sustain vibrant rural economy	This is policy intent. However it will be important to help strengthen links between rural areas and towns, including by sustainable forms of transport, to help sustain a vibrant rural economy also.	++	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale of effect**: Local Plan area **Temporary / Permanent** Permanent **Assumptions made**: Principles enforced at planning application stage will deliver policy objectives.

SA Framework		TCR1 Development in the Town Centres				
Summary of Baseline Situation	**SA Objective**	**Predicted Effects**				**Assumptions and mitigation**
		Nature of Effect	**ST**	**MT**	**LT**	**Justification for assessment**
Meeting local employment needs to achieve self-sufficient communities; Initiatives to encourage further employment development and retention / expansion of existing businesses; Diversification of the economic base to improve employment opportunities; Safeguarding good quality employment sites from development for other uses; Provision of relevant employment skills, training and support to help retain and develop a local workforce;						
	17 Sustainable economic growth and diversification of the economy	Policy supports development in the town centres and this is likely to lead to significant positive effects.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Principles enforced at planning application stage will deliver policy objectives.
	18 High and stable level of employment	Policy supports development in the town centres and this is likely to lead to significant positive effects.	+	+	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Principles enforced at planning application stage will deliver policy objectives.

SA Framework		TCR1 Development in the Town Centres				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy TCR1 Development in the Town Centres** seeks to maintain the vitality and viability of town centres by supporting measures that lead to the enhancement and regeneration of the shopping and town centre environment, promoting their tourism potential and maintaining local distinctiveness by supporting proposals that help to retain and attract independent retailers. Significant positive effects were predicted for Improving access to jobs, services and facilities. Further positive effects were identified for maintaining the vitality and viability of the towns, protecting the towns as service centres, promoting sustainable economic growth and diversification of the economy and on supporting high and stable levels of employment. **Mitigation**: Whilst no significant negative effects were predicted, the appraisal notes that the Policy might be improved by including a reference to helping strengthen links between rural areas and towns, including by sustainable forms of transport, in order to help sustain a vibrant rural economy also. The policy should encourage proposals that deliver high quality public spaces and require active ground floor frontages to be maintained and created within town centres with appropriate town centre uses.

						should require development that retains the distinctive character of the landscape (including historic landscape) with any change managed positively.
	15 Encourage sustainable tourism, cultural heritage and local distinctiveness	Taking account of the distinctive character of the District, including its natural and historic environment will support and strengthen Staffordshire Moorlands tourism attraction and help to maintain the visitor economy.	+	+	+	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Tourism would be negatively impacted by a decline in the natural and built environment.
Economic Need to address Meeting local employment needs to achieve self-sufficient communities; Initiatives to encourage further employment development and retention / expansion of existing businesses; Diversification of the economic base to improve employment opportunities;	16 Safeguard vitality of towns and sustain vibrant rural economy	Policy intent is to create high quality development with attractive, accessible and safe environments and this is likely to lead to positive effects on the vitality and viability of the District's towns and villages.	+	+	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale of effect**: Local Plan area **Temporary / Permanent** Permanent **Assumptions made**:Principles enforced at planning application stage will implement policy intentions.
	17 Sustainable economic growth and diversification of the economy	Policy intent is to deliver well designed development and high quality built environment and public realm and this is likely to lead to investment in business, people and infrastructure, resulting in a strengthened and more diversified economy.	+	++	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Principles enforced at planning application stage will implement policy intentions.
	18 High and stable level of employment	Policy intent is to deliver well designed development and high quality built environment and public realm and this is likely to support inward investment, contributing to sustaining local employment. Significance of effect is dependent on implementation of the policy.	i/+	i/+	i/+	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Principles enforced at planning application stage will implement policy intentions.

SA Framework		DC1 Design Considerations				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Safeguarding good quality employment sites from development for other uses; Provision of relevant employment skills, training and support to help retain and develop a local workforce; Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						

SA Framework		DC1 Design Considerations				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Summary of significant effects of policy: **Policy DC1 Design Considerations** includes measures to promote locally distinctive, creative and sensitive design solutions to delivering new development, including incorporating sustainable construction techniques and design concepts to reduce the impact of development. Significant positive effects include the likelihood of improvements to the social and environmental quality of neighbourhoods and positive impacts on health and well-being. The policy seeks to promote the maintenance, enhancement, restoration and re-creation of biodiversity and geological heritage where appropriate and this could make a significant contribution to the protection of natural assets, although the significance of effect is dependent on implementation of the policy. Further positive effects are likely to result from the policy intent to deliver well designed development and high quality built environment and public realm as this is likely to lead to investment in business, people and infrastructure, resulting in a strengthened and more diversified economy, more vibrant town and village centres and sustained levels of employment. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows: **Mitigation:** Policy should include a requirement for developments to be well integrated for car, pedestrian and cycle use as well as other sustainable transport links. It should also seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy and include a requirement for the creation of healthy environments (to address potential impacts of air pollution). The Policy should require development that secures the effective use of resources, including making best use of existing buildings, and that retains the distinctive character of the landscape (including historic landscape) with any change managed positively.

Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy DC2 The Historic Environment** seeks to ensure that sites and areas of particular heritage value are safeguarded for the future and where possible enhanced, both for their own heritage merits and as part of wider heritage led regeneration proposals. Significant positive effects include protection and enhancement of the character of towns and villages, as well as heritage assets and their settings and the character of historic landscapes. Further positive effects are likely to result from the policy intent to safeguard the District's historic environment as heritage led regeneration schemes may lead to investment in business, people and infrastructure, resulting in a strengthened and more diversified economy, more vibrant town and village centres and sustained levels of local employment. No significant negative effects were predicted.

Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy C1 Creating Sustainable Communities** supports proposals which protect, retain or enhance existing community facilities in towns and villages and includes measures to resist proposals that involve the loss of local facilities. There is a requirement to incorporate the infrastructure required as a result of any scheme or to make provision for financial contributions. Significant positive effects for community cohesion, neighbourhood quality and access to services are anticipated from the policy intent to ensure that new development contributes to the creation of safe, livable and mixed communities with good access to jobs and key services including recreation facilities. Further positive effects are likely to arise from new community facilities, particularly in smaller villages and other rural areas contributing to the viability of communities. Creation of sustainable communities is likely to lead to improvements in health and well-being in the long term. No significant negative effects were predicted however a policy improvement was identified as follows. **Mitigation**: Policy should clarify that community infrastructure includes health services.						

Table 16.39 Assessment Table for Preferred Option Policy C1 Creating Sustainable Communities

Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy C2 Sport, Recreation and Open Space** provides continued protection from development for existing areas identified for recreational land and buildings including school playing fields and amenity space and supports the provision of new sport, recreation and open space facilities consistent with guidance in the Council's SPD. Significant positive effects for health and well-being and creating and maintaining high quality local neighbourhoods are anticipated and this is also likely to lead to positive effects on townscape quality, helping to maintain the visitor economy. Further positive effects are likely to arise from new recreation facilities, particularly in smaller villages and other rural areas contributing to the viability of communities. Provision of new facilities is also likely to have positive effects on improving access to services in the long term. No significant negative effects were predicted however a policy improvement was identified as follows: **Mitigation**: Policy should require new sport, recreation and open space facilities to be accessible by a choice of means of transport.

Economic Need to address Meeting local employment needs to achieve self-sufficient communities Initiatives to encourage further employment development and retention / expansion of existing businesses; Diversification of the economic base to improve employment opportunities; Safeguarding good quality employment sites from development for other uses; Provision of relevant employment skills, training and	16 Safeguard vitality of towns and sustain vibrant rural economy	Policy intent is to contribute to the diversification of the local economy and tourist development through provision of new facilities as part of the GI network.	+	+	+	**Likelihood/certainty** of effect occurring: Likely **Geographical scale of effect**: Local Plan area **Temporary / Permanent** Permanent **Assumptions made**: Development of high quality and multi-functional GI network will attract visitors and provide recreation opportunities.
	17 Sustainable economic growth and diversification of the economy	Policy intent is to contribute to the diversification of the local economy and tourist development through provision of new facilities as part of the GI network. Overall the effect has been assessed as largely neutral.	0	0/+	0/+	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Development of high quality and multi-functional GI network will attract visitors and provide recreation opportunities.
	18 High and stable level of employment	Overall the effect has been assessed as neutral.	0	0	0	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Development of high quality and multi-functional GI network will attract visitors and provide recreation opportunities.

SA Framework		C3 Green Infrastructure				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
support to help retain and develop a local workforce; Maintaining the vitality and viability of the towns and protection of the towns as service centres; Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						

Summary of significant effects of policy:
Policy C3 Green Infrastructure is supported by a Green Infrastructure strategy and recognises that the District's wide range of existing and potential green infrastructure assets will benefit from a strategic approach ensuring that adequate protection is given to key features; areas are identified where new linkages and assets need to be created and guidance and management is provided for development that may impact on such areas. Significant positive effects on a wide range of SA objectives were identified, including for health and well-being; creating and maintaining high quality local neighbourhoods and improving connectivity to a range of facilities via helping to establish or improve green travel links. Further positive effects on biodiversity and geodiversity are likely to arise from support for the creation of new wildlife habitats; enhancement of existing sites and creating links between them. Use of green infrastructure for effective flood risk and waterways management is likely to result in positive effects on water quality and climate change adaptation.Development of a high quality and multi-functional GI network that attracts visitors and provides recreation opportunities is also likely to have positive effects on sustainable economic growth and diversification of the economy. No significant negative effects were predicted however policy improvements were identified as follows:

SA Framework		C3 Green Infrastructure				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Mitigation: Policy should require support for improving green travel links to existing and new services and facilities, as well as formal and informal recreation opportunities, and should refer to support for the development of ecological networks in line with the GI strategy. The Policy should also explicitly include geodiversity as a green infrastructure asset.

Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
nature conservation, with creation of new habitats where possible; The risk of adverse effects on historic assets; Need for better quality facilities for tourists including serviced accommodation and improved evening economy in towns.	13 Protect and enhance character of towns / villages; heritage assets and their settings	Support for sustainable transport is likely to lead to positive effects on townscape and the character and appearance of towns and villages.	+	+	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Principles enforced at planning application stage will implement policy intentions.
	14 Protect and enhance character / appearance of landscape including historic landscape and other natural assets	Overall it is considered that a neutral impact on landscape character is likely.	0	0	0	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**:Any impacts on landscape character will be managed through the planning application process and using other policies in this Local Plan.
	15 Encourage sustainable tourism, cultural heritage and local distinctiveness	Improving transport provision by a range of modes is likely to contribute towards the District's tourism attraction and help to maintain the visitor economy.	+	+	++	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**: Permanent **Assumptions made**: Support for sustainable transport will attract visitors and provide recreation opportunities.
Economic Need to address Meeting local employment needs to achieve self-sufficient communities;	16 Safeguard vitality of towns and sustain vibrant rural economy	Whilst support for sustainable transport may help increase access to recreation opportunities, this SA Objective will principally be addressed through other policies in the Local Plan.	0	0	0	**Likelihood/certainty** of effect occurring: Likely **Geographical scale of effect**: Local Plan area **Temporary / Permanent** Permanent **Assumptions made**: Support for sustainable transport will help support the tourism industry and help sustain the rural economy.
	17	This SA Objective will be addressed through other policies in the Local Plan.	0	0	0	**Likelihood/certainty** of effect occurring: Likely **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Support for sustainable transport will help support the tourism industry and help sustain the rural economy.

SA Framework		T2 Other Sustainable Transport Measures				
Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Initiatives to encourage further employment development and retention / expansion of existing businesses; Diversification of the economic base to improve employment opportunities; Safeguarding good quality employment sites from development for other uses; Provision of relevant employment skills, training and support to help retain and develop a local workforce; Maintaining the vitality and viability of the towns and protection of the towns as service centres;	Sustainable economic growth and diversification of the economy					
	18 High and stable level of employment	Overall the effect has been assessed as neutral.	0	0	0	**Likelihood/certainty** of effect occurring: Uncertain **Geographical scale** of effect: Local Plan area **Temporary / Permanent**:Permanent **Assumptions made**: Support for sustainable transport will help support the tourism industry and help sustain the rural economy.

Summary of Baseline Situation	SA Objective	Predicted Effects				Assumptions and mitigation
		Nature of Effect	ST	MT	LT	Justification for assessment
Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.						
Summary of significant effects of policy: **Policy T2 Other Sustainable Transport Measures** supports measures which promote better accessibility, creates safer roads, reduces the impact of traffic or facilitates highway improvements. Significant positive effects on a wide range of SA objectives were identified, including for health and well-being; creating and maintaining high quality local neighbourhoods; reducing the need to travel by car and increasing access to a range of services and facilities. Further positive effects are likely to arise from seeking improvements to the existing road, bus and rail networks generally, including in relation to air quality, help to support healthy, inclusive and sustainable communities and supporting the visitor economy. No significant negative effects were predicted.
