- The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). The west side of Leek is Green Belt and the study recommends that housing development should not take place on this side of the town to avoid adverse impacts. This means that sites at the eastern side of the town (which is not within the Green Belt) require consideration to meet Leek's future development needs.

Preferred Options Consultation April 2016

Environmental Health: No significant Issues

SCC Local Education Authority: Advise that in Leek education contributions will be required to fund additional school places. At least a minimum of 1FE of first school provision and 1FE of middle school

Leek

LE066 Kniveden Hall, Mount Road

provision will be required in Leek Town during the Local Plan period. The High Schools in the Leek Planning Area are projected to have limited capacity to accommodate any children generated from housing allocated in Leek.

Coal Authority: Welcome the fact that the site assessment documents covering the site options does identify ground instability arising from mining legacy and as such The Coal Authority supports the broad approach taken to site selection. We have no views on the actual sites chosen as this is a matter for local determination following consideration of all relevant factors.

Latest Coal Authority data 27/04/2016. Site does not fall within any coal risk area.

Severn Trent Water: As a water company we have an obligation to provide water supplies and sewage treatment capacity for future development... We will complete any necessary improvements to provide additional capacity once we have sufficient confidence that a development will go ahead...We expect surface water to be managed in line with the Government's Water Strategy, Future Water. Surface water needs to be managed sustainably. For new developments we would not expect surface water to be conveyed to our foul or combined sewage system and, where practicable, we support the removal of surface water already connected to foul or combined sewer. Water Quality: Any proposals should take into account the principles of the Water Framework Directive and River Basin Management Plan for the Severn River basin unit as prepared by the Environment Agency.

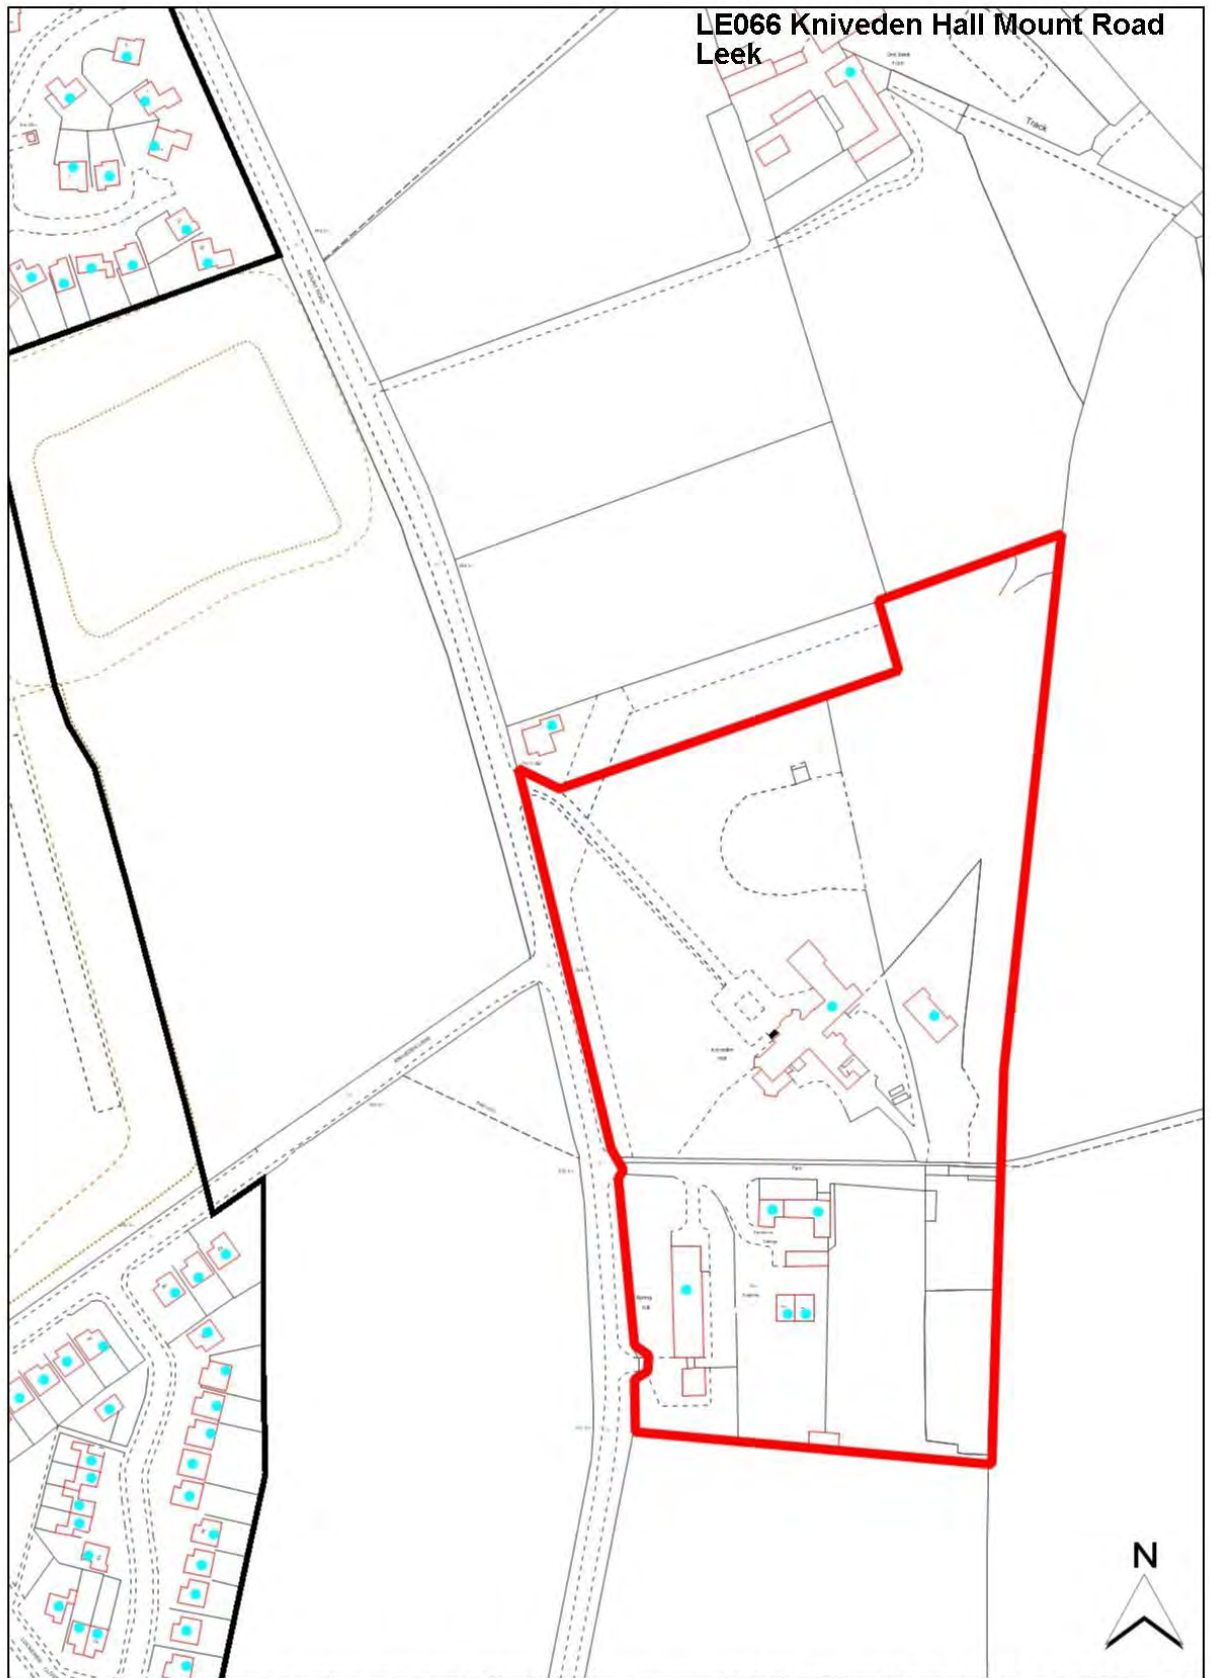

Council Response –

- Sites affected by mining legacy to have a policy criterion to clarify that developers should recognise mining legacy problems and demonstrate how they can be positively addressed by new development. Policy also to clarify that no development should take place over mine entries even when treated.

No public comments received as site did not form part of preferred options.

Leek

LE066 Kniveden Hall, Mount Road

© Crown copyright and database rights 2017 Ordnance Survey 100018384. **MAP SCALE: 1:2000**

Leek

LE102 Land North of Macclesfield Road

Local Plan Process

- Site suggestion from the SHLAA
- Included in the site options consultation July 2015
- Site included in Preferred Options Local Plan after 2016 Preferred Options

Current Position

Site taken forward into Preferred Options Local Plan as:

- Owner suggested site and is supportive of residential allocation
- small site abutting town boundary in west of town
- not in Green Belt
- does not form part of important landscape setting to town

Key Issues

- **Topography** – visual/landscape impact
- Sustainability appraisal states site is relatively inaccessible to services etc
- **Ecology** - ecological survey states site is of District ecological importance. Further survey work needed in order to establish SBI/BAS status.
- **Protected habitats** - HRA states new housing/employment development in Leek could potentially increase recreational pressure and air pollution from increased road traffic which could have an effect on SPAs and SACs and this requires further investigation in the HRA. LSEs relating to air quality are identified in relation to all of the allocation sites in Leek because they may increase traffic. Potential in combination effect with employment allocations in Leek and development in neighbouring areas.

Site Information

Greenfield/ brownfield	Built up area boundary/ countryside	Est. housing capacity / density	Area (ha)	Ownership status	Site details
Greenfield	Countryside (abuts town development boundary).	20 (based on 33.9 dwellings per ha)	0.59	Owner suggested site and is supportive of residential allocation	<ul style="list-style-type: none">• Access via Bridge End• Site slopes up to north/west

Studies

Extended Phase 1 Habitat Survey 2015 (FID38)

Conclusion

The site itself has mostly low biodiversity value overall in terms of area as it consists solely of species poor improved grassland with adjacent semi-natural broadleaved woodland. The site is considered to have district ecological importance due to the presence of tree with bat roosting potential and the adjacent broadleaved woodland. Therefore the following surveys/ actions are recommended prior to any potential development works being carried out:

- A bat survey regime to ascertain whether bats roost in the trees
- Vegetation removal at the appropriate time of year

Local Wildlife Assessment (ECUS, 2017)

Site was not included in 2017 assessments as was not included in 2016 Preferred Options sites that formed the basis for assessment.

Landscape & Settlement Character Assessment (2008)

Does not form part of important landscape setting to town.

Landscape, Local Green Space & Heritage Impact Study (August 2016)

Site was not included in 2016 assessments as was not included in 2016 Preferred Options sites that formed the basis for assessment.

Green Belt Review (November 2015)

Not applicable.

Leek

LE102 Land North of Macclesfield Road

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. However, the development of greenfield, grade 3 ALC land could have a significant negative effect, as could the site's proximity to historic assets. Similarly, the site is relatively inaccessible to services, facilities and areas of existing employment, has district ecological value which is likely to have a negative effect.

Initial HRA Screening

New housing development in Leek could potentially increase recreational pressure and air pollution from increased road traffic which could have an effect on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC and this requires further investigation in the HRA. The screening has also identified that new employment sites could also increase traffic and air pollution near to the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC and this also requires further investigation in the HRA. The closest part of the SAC/SPA (Leek Moss SSSI) is approx. 4km from the western edge of Leek.

Updated HRA Screening of Preferred Options Sites June 2017

The purpose of screening is to identify whether the elements of a plan (i.e. policies, site allocations) could result in Likely Significant Effects (LSE) on European sites.

Further investigation has been undertaken in relation to potential urban effects resulting from these allocation sites. Urban effects on European sites typically have an adverse effect on sites within 500m of residential areas (primarily due to cat predation and fire risk due to arson etc). Other urban effects (primarily dog walking from the site to the SPA/SAC) can have an adverse effect on European sites up to 1.6km from residential areas. All allocated sites identified as preferred options are further than 1.6km from the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC.

LSEs relating to urban effects are identified resulting from the following allocation sites:

- Allocated sites on the eastern edge of Leek (LE066, LE140, LE128a, LE142 a and b) located between 3.8km and 4.2km from the Peak District SPA and the South Pennine Moors SAC.

LSEs relating to air quality are identified in relation to all of the allocation sites in Leek because they may increase traffic. Potential in combination effect with employment allocations in Leek and development in neighbouring areas.

Options Consultation July 2015

SCC Highways: Access should be gained off Bridge End with Bridge End reconstructed as far as proposed access. Additional access onto Macclesfield Road is undesirable.

SMDC Conservation: Site on raised ground & marks the edge of the settlement.

Leek and Moorlands Historic Buildings Trust - LE102 lies on raised ground and marks the edge of the settlement. The probable site of the medieval rabbit warren known to have existed in 1430 (VCH Staffs Vol. VII). Visually very prominent and unrelated to the adjacent settlement which nestles in a valley.

Developer/Agent/Owner – Land available.

Public response 11 comments - 10 objections and 1 support

Issues raised:

Objections

- Infrastructure - Traffic / Transport- highway safety issues, access to A52 would increase risk on it
- Infrastructure - Other
- Landscape- will be visually intrusive, steeply sloping site,
- Nature Conservation- wildlife, feeding area for bats
- Government Policy
- Other- beyond natural boundary of Leek, lead to urban sprawl

Support

- Infrastructure - Schools - Infrastructure -Traffic / Transport
- Infrastructure – other
- Landscape
- Nature Conservation
- Flood Risk

Leek

LE102 Land North of Macclesfield Road

- Amenity (e.g. noise, privacy, loss of light)

Council Response –

- The Highway Authority does not raise any issues which would prevent the development of this site.
- County Education advise that there are capacity issues affecting Leek First-, Middle- and High Schools; and given the scale of housing proposed across this catchment, new capacity will be required within Leek. The District Council will work with the County Council to identify an appropriate solution.
- The Council has a Landscape & Settlement Setting Study and this site is not identified as being important landscape setting to the settlement, though it is considered that there are topography issues due to the sloping nature of the site which make its development undesirable.
- The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process.
- The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. Mitigation measures will be taken as part of the site development to address any surface water issues.

Preferred Options Consultation April 2016

Environmental Health: Some constraints on residential development: Possible industrial noise source as adjacent to Chemical works

SCC Local Education Authority: Advise that in Leek education contributions will be required to fund additional school places. At least a minimum of 1FE of first school provision and 1FE of middle school provision will be required in Leek Town during the Local Plan period. The High Schools in the Leek Planning Area are projected to have limited capacity to accommodate any children generated from housing allocated in Leek.

Coal Authority: Welcome the fact that the site assessment documents covering the site options does identify ground instability arising from mining legacy and as such The Coal Authority supports the broad approach taken to site selection. We have no views on the actual sites chosen as this is a matter for local determination following consideration of all relevant factors.

Latest Coal Authority data 27/04/2016. Site does not fall within any coal risk area.

Severn Trent Water: As a water company we have an obligation to provide water supplies and sewage treatment capacity for future development... We will complete any necessary improvements to provide additional capacity once we have sufficient confidence that a development will go ahead...We expect surface water to be managed in line with the Government's Water Strategy, Future Water. Surface water needs to be managed sustainably. For new developments we would not expect surface water to be conveyed to our foul or combined sewage system and, where practicable, we support the removal of surface water already connected to foul or combined sewer. Water Quality: Any proposals should take into account the principles of the Water Framework Directive and River Basin Management Plan for the Severn River basin unit as prepared by the Environment Agency.

Council response:

- Sites affected by mining legacy to have a policy criterion to clarify that developers should recognise mining legacy problems and demonstrate how they can be positively addressed by new development. Policy also to clarify that no development should take place over mine entries even when treated.

No public comments received as site did not form part of preferred options.

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

Local Plan Process

All above sites:

- Identified in the SHLAA
- Included in the site options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Sites LE127/LE128/LE140/part of LE142A, and LE142B taken forward to Preferred Options Local Plan because:

- They are available in the short term, with landowner support.
- no highways objections subject to necessary highway improvements for example road widening, provision of footways, completing Kniveden Lane to adoptable standard, possible (probable) junction improvements at one or both ends.
- abut or very close to current town boundary
- in the case of sites with high landscape impact sensitivity, effects can be mitigated by site-specific policy requirements regarding landscaping measures.
- Sites are generally low ecological value however further surveys are recommended for sites LE142A&LE142B in order to establish SBI/BAS status.
- According to S.A. sites have good accessibility to services and facilities and in some cases, employment.

Note whole of site LE128 (including LE128a & LE128B) taken forward as per original 2015 site option. Owner has indicated support for this.

Part of site LE142A taken forward as only part of this site is available (about 0.82ha), as only one of the two owners wishes their land to be allocated in the Local Plan.

Studies

Ecology

The Mount sites LE127/ LE128/ LE140/ LE142A/ LE142B were subject to a Phase I ecological survey in 2015 and a later 2017 ecology study considered the scope for 'local wildlife site' (ie.SBI) designation for (any elements of) all preferred option sites against Staffordshire Wildlife Trust criteria. Their conclusions/recommendations are set out below:

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

Site	2014 Phase 1 Survey Conclusions (Lockwood Hall Associates)	Results of 2017 Local Wildlife Site Assessment (Ecus Ltd)
LE127 (FID 40)	<p>The site has very low biodiversity value overall in terms of area as it consists of species poor improved grassland, one small area of scattered scrub with one species poor hedgerow. Therefore the site is considered to have low ecological value. The following surveys/ actions are consequently recommended prior to any potential development works being carried out:</p> <ul style="list-style-type: none"> Vegetation removal at the appropriate time of year. 	<p>The site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance.</p> <p>The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status: None required.</p>
LE128 (FID39)	<p>The site has mostly low biodiversity value overall in terms of area as it consists solely of species poor improved grassland with one species poor hedgerow. Therefore the site has been deemed to have low ecological importance. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:</p> <ul style="list-style-type: none"> Vegetation removal at the appropriate time of year. 	<p>The site has low ecological value in its potential to support protected species. The site could be used potentially as foraging habitat by bats, badgers and west European hedgehog. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance.</p> <p>The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status: None required.</p>
LE140 (FID41)	<p>The site has a fairly diverse sward of flora and grasses; however there is not enough diversity or rare flora indicative of more unimproved grasslands to warrant recommending it being protected. Certainly the habitat mosaic and fairly well connected habitats would support a fairly diverse range of fauna and therefore the site as a whole is considered to have district ecological importance. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:</p> <ul style="list-style-type: none"> Vegetation removal at the appropriate time of year. 	<p>The site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at local level only.</p> <p>The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status: None required.</p>
LE142A (FID72)	<p>The site has 12 trees with bat potential and is given district ecological importance as a result, though the site and its species poor grassland is poorly connected to other more biodiverse habitats. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:</p> <ul style="list-style-type: none"> a bat survey regime to ascertain whether bats roost in the trees; vegetation removal at the appropriate time of year. 	<p>The site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the potential for bats roosts on the site.</p> <p>The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status: Identification and assessment of relevant trees for their potential to support roosting bats. Bat survey.</p>
LE142B (FID73)	<p>The site contains fairly species poor habitats and is poorly connected to other more biodiverse habitats. However as polecat are recorded within 2km and the site has</p>	<p>The site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation</p>

Leek

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

	<p>potential to support their populations the site is deemed as having district ecological importance. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:</p> <ul style="list-style-type: none"> • polecat survey; • vegetation removal at the appropriate time of year. 	<p>value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance</p> <p>The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status: Polecat survey required.</p>

Landscape & Settlement Character Assessment (2008)

- LE127 does not form part of important landscape setting to Leek
- LE128 does not form part of important landscape setting to Leek
- LE140 forms part of important landscape setting to Leek
- LE142A forms part of important landscape setting to Leek and close to ridgeline running N-S
- Part of LE142B forms part of important landscape setting to Leek

Landscape, Local Green Space & Heritage Impact Study (August 2016)

Site	Landscape Impact Results	Heritage Impact Results
LE127	<p>Site comprises a large field on the south-eastern edge of Leek, enclosed by Mount Road to the south and east. The site slopes up from the settlement edge to the ridge on Mount Road, and is visually prominent. In addition, the site is elevated above the adjacent development and therefore screens the settlement edge when viewed from the east and north-east. Development within the site would likely be visible from the PDNP and could therefore affect its setting. It is likely that development within the site would also be visible from Ashbourne Road to the south, and would affect the rural approach to Leek along this road.</p> <p>Site is of high landscape sensitivity.</p>	<p>There are five Grade II Listed Buildings within the 400m buffer. Due to the topography of the surrounding landscape as well as intervening buildings and vegetation, there would be no intervisibility between the assets and the site. Development would be highly unlikely to adversely affect the setting of the assets. Although the HEA states that HLC zone LLHECZ 2 is sensitive to change, with appropriate development, this could be accommodated on the site (Historic Environment Character Assessment 2010).</p> <p>Site suitable for development in heritage terms.</p>
LE128A	<p>The site comprises the northern half of a field (southern half is site LE128b) which slopes up from the eastern edge of Leek to Mount Road. The existing settlement edge is well-defined but urban, and only at a slightly lower elevation than the site, and so is visible across it. The site is currently screened from the PDNP by the ridge of Mount Road, the existing tree planting on Mount Road and the woodland surrounding Knivedon Hall. However building heights should be limited in the east of the site to reduce the prominence of the development. In addition planting and landscaping could be undertaken on the eastern edge of the site, to create a strong, vegetated settlement edge and ensure the development is further screened from the PDNP.</p> <p>Site is of medium landscape sensitivity. Site-specific landscape mitigation</p>	<p>There is one Grade II Listed Building within the 400m buffer. Due to the topography of the surrounding landscape as well as intervening buildings and vegetation, there would be no intervisibility between the asset and the site. Setting is considered not to extensively contribute to the significance of the asset and therefore development would be highly unlikely to adversely affect the setting of the asset. Although the HEA states that HLC zone LLHECZ 2 is sensitive to change, with appropriate development, this could be accommodated on the site (Historic Environment Character Assessment 2010).</p> <p>Site suitable for development in heritage terms.</p>

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

	<i>measures could include advanced planting and landscaping on the eastern boundary, and limited building heights in the eastern half of the site.</i>	
LE128B	<p>The site comprises the southern half of a field (northern half is site LE128a) which slopes up from the eastern edge of Leek to Mount Road. The existing settlement edge is well-defined but urban, and only at a slightly lower elevation than the site, and so is visible across it. The site is currently screened from the PDNP by the ridge of Mount Road, and the existing tree planting on Mount Road. However if the site were to be developed building heights should be limited in the east of the site to reduce the prominence of the development. In addition advanced planting and landscaping should be undertaken on the eastern edge of the site, to create a strong, vegetated settlement edge and ensure the development is screened from the PDNP.</p> <p><i>Site is of medium landscape sensitivity. Site-specific landscape mitigation measures could include advanced planting and landscaping on the eastern boundary, and limited building heights in the eastern half of the site.</i></p>	<p>There are two Grade II Listed Buildings within the 400m buffer. Due to the topography of the landscape as well as intervening buildings and vegetation, development would be highly unlikely to adversely affect the settings of the assets. Although the HEA states that HLC zone LLHECZ 2 is sensitive to change, with appropriate development, this could be accommodated on the site (Historic Environment Character Assessment 2010).</p> <p><i>Site suitable for development in heritage terms.</i></p>
LE140	<p>Site comprises land sloping down from Mount Road to the settlement edge, and is enclosed by tree belts on the northern and western boundaries. There are also trees on the eastern boundary, however these are more sparse. The site slopes down from Mount Road and so views from the PDNP are screened by the ridge and intervening vegetation on the site boundary and on the land on the opposite side of Mount Road (including the woodland surrounding Knivedon Hall). However building heights should be limited in the east of the site to reduce the prominence of the development. In addition planting and landscaping should be undertaken on the eastern edge of the site, to create a strong, vegetated settlement edge and ensure the development is further screened from the PDNP.</p> <p><i>Site is of medium landscape sensitivity. Site-specific landscape mitigation measures could include advanced planting and landscaping on the eastern boundary, and limited building heights in the eastern half of the site.</i></p>	<p>There are three Grade II Listed Buildings within the 400m buffer. Due to the topography of the surrounding landscape as well as intervening buildings and vegetation, there would be no intervisibility between the assets and the site. Development would be highly unlikely to adversely affect the settings of the assets. The site is located within the Leek Extensive Urban Survey report (2011) in HUCA 12. Development would be highly unlikely to adversely affect the zone.</p> <p><i>Site suitable for development in heritage terms.</i></p>
LE142A	<p>Site comprises land to the east of Mount Road, on the north-eastern edge of Leek. The site is visually prominent and visible from the PDNP, as it is located atop of the ridge that screens views of Leek. Development within the site would adversely affect the existing well-defined, vegetated settlement edge, and could affect the setting of the PDNP.</p> <p><i>Site is of high landscape sensitivity. Please note that this study forms part of a wider evidence base to support SMDC's Local Plan. Therefore the conclusions within this report will be weighed against other evidence when determining the overall suitability of a site for development.</i></p>	<p>There are two Grade II Listed Buildings within the 400m buffer. Due to the topography of the surrounding landscape as well as intervening buildings and vegetation, there would be no intervisibility between the assets and the site. Development would be highly unlikely to adversely affect the setting of the assets. Although the HEA states that HLC zone LLHECZ 2 is sensitive to change, with appropriate development, this could be accommodated on the site (Historic Environment Character Assessment 2010).</p> <p><i>Site suitable for development in heritage terms.</i></p>
LE142B	<p>The site comprises an existing farmstead and paddocks, and the access track which extends north to Thornccliffe Road. Existing development within the site does not contribute to a well-defined settlement edge. However the existing development is</p>	<p>There is one Grade II Listed Building within the 400m buffer. Due to the topography of the surrounding landscape as well as intervening buildings and vegetation, there would be no intervisibility between the asset and the site.</p>

Leek

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

	<p>located within the areas of the site with the lowest visual prominence. Development across the entire site would likely be visible from the PDNP and could affect its setting. Development, particularly in the north of the site, could also affect the rural approach to Leek from the PDNP.</p> <p><i>Site is of high landscape sensitivity. Please note that this study forms part of a wider evidence base to support SMDC's Local Plan. Therefore the conclusions within this report will be weighed against other evidence when determining the overall suitability of a site for development.</i></p>	<p>Development would be highly unlikely to adversely affect the setting of the asset. Although the HEA states that HLC zone LLHECZ 2 is sensitive to change, with appropriate development, this could be accommodated on the site (Historic Environment Character Assessment 2010).</p> <p><i>Site suitable for development in heritage terms.</i></p>

Green Belt Review (November 2015)

Not applicable

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

Site	Summary Results
LE127	The proposed delivery of circa 100 dwellings is considered to have a significant positive effect. Similarly, the site has low ecological value and has good accessibility to services and facilities which is likely to have a positive effect. However, the development of mixed greenfield and brownfield, grade 4 ALC land and the proximity of the site to historic assets is likely to have a negative effect as well as the inaccessibility of existing areas of employment.
LE128	The proposed delivery of circa 95 dwellings is considered to have a significant positive effect. Similarly, the site has low ecological value and good accessibility to services and facilities which is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land and the proximity of the site to historic assets is likely to have a negative effect as well as the inaccessibility of existing areas of employment.
LE140	The proposed delivery of circa 95 dwellings is considered to have a significant positive effect. Similarly, the site has low ecological value and good accessibility to services, facilities and areas of employment which is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land and the proximity of the site to historic assets is likely to have a negative effect.
LE142A	The proposed delivery of circa 140 dwellings is considered to have a significant positive effect. Similarly, the site good accessibility to services, facilities and areas of employment which is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land, the district ecological importance of the site and the proximity to historic assets is likely to have a negative effect.
LE142B	The proposed delivery of circa 40 dwellings is considered to have a significant positive effect. Similarly, the site good accessibility to services, facilities and areas of employment which is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land, the district ecological importance of the site and the proximity to historic assets is likely to have a negative effect.

Initial HRA Screening

Leek

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

New housing development in Leek could potentially increase recreational pressure and air pollution from increased road traffic which could have an effect on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC and this requires further investigation in the HRA. The screening has also identified that new employment sites could also increase traffic and air pollution near to the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC and this also requires further investigation in the HRA. The closest part of the SAC/SPA (Leek Moss SSSI) is approx. 4km from the western edge of Leek.

Updated HRA Screening of Preferred Options Sites June 2017

The purpose of screening is to identify whether the elements of a plan (i.e. policies, site allocations) could result in Likely Significant Effects (LSE) on European sites.

Further investigation has been undertaken in relation to potential urban effects resulting from these allocation sites. Urban effects on European sites typically have an adverse effect on sites within 500m of residential areas (primarily due to cat predation and fire risk due to arson etc). Other urban effects (primarily dog walking from the site to the SPA/SAC) can have an adverse effect on European sites up to 1.6km from residential areas. All allocated sites identified as preferred options are further than 1.6km from the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC.

LSEs relating to urban effects are identified resulting from the following allocation sites:

- Allocated sites on the eastern edge of Leek (LE066, LE140, LE128a, LE142 a and b) located between 3.8km and 4.2km from the Peak District SPA and the South Pennine Moors SAC.

LSEs relating to air quality are identified in relation to all of the allocation sites in Leek because they may increase traffic. Potential in combination effect with employment allocations in Leek and development in neighbouring areas.

Playing Pitch Strategy Interim Report April 2017

Consultants KKP consulted with Leek High School who did not raise many key issues - school is considered to have adequate playing field to accommodate curricular demand.

Leek High School converted to academy status in April 2016. During the conversion, the School was required to renegotiate its former lease agreement with Staffordshire County Council regarding the School's footprint and in doing so the School lost access to LE140. The field itself is extremely uneven and unsafe in places for any form of school based activity as well as being inadequate to accommodate any form of playing pitch (and historically has not accommodated any form of playing pitch). Through consultation with the School, it was identified that there is little requirement for the field with it only previously being utilised for cross-country running, which is now restricted to its other playing field land due to a perimeter fence causing segregation. The School suggests that whilst there is possible land available to be utilised for any potential first school (as part of the development of Mount Road), this would have to be negotiated with its governing board

Options Consultation July 2015

Statutory bodies/stakeholders

SCC Highways:

- **LE127:** Access to this site is likely to be from Mount Road although this has not been clarified. Mount Road is rural in nature and pedestrian and cycle links would need to be delivered connecting to the local network. Mount Road is identified as an advisory on-road cycle route, linking into the town centre via Kniveden Lane. Assessment of the Mount Road/Buxton Road, Mount Road/Ashbourne Rd and Kniveden Lane junctions will be required as well as potential carriageway improvements. Access to the smaller site (16 units) may be from Ashbourne Rd although this is not clear. TA required.

Leek

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

- **LE128 / LE140/ LE142A /LE142B:** Access to the main site is likely to be from Mount Road (capacity 100 units) although this has not been clarified. Mount Road is rural in nature and pedestrian and cycle links would need to be delivered connecting to the local network. Mount Road is identified as an advisory on-road cycle route, linking into the town centre via Novi Lane and through the Haregate residential area.

Leek and Moorlands Historic Buildings Trust

- LE127 lies west of Mount Road which provides a much valued walk for many people with fine views across the town and out to open countryside. Likely to prove controversial.
- LE128 lies west of Mount Road which provides a much valued walk for many people with fine views across the town and out to open countryside. Likely to prove controversial.
- LE140 is adjacent to Mount Road but has no major views out. Large area of rough and relatively flat ground behind Leek High School. Suitable for development provided there are no environmental issues. Newts have been mentioned.
- LE142A the north-eastern end behind existing housing might be appropriate, but the bulk of the land provides the one clear view from Mount Road out to open countryside to the east making development inappropriate

Summary of Public responses

Site	Objections	Support	Council response
LE127	<p>87 objections</p> <ul style="list-style-type: none"> • Infrastructure – Schools already at capacity • Infrastructure - Traffic / Transport- road will not support an additional 500 homes if all sites come forward Route of Staffordshire Moorlands walk, become rat run 	1 support	<ul style="list-style-type: none"> • County Highways do not raise any issues which would prevent development. • County Education advise that there are capacity issues affecting Leek First-, Middle- and High Schools; and given the scale of housing proposed across this catchment, new capacity will be required within Leek. The District Council will work with the County Council to identify an appropriate solution. • The Council has a Landscape & Settlement Setting Study and this site has been identified as being important to the landscape setting of the settlement. • The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed. • Amenity – issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. • The Council is required to meet its housing needs to 2031 and there are not enough brown field sites in Leek to achieve this so the Council needs to

			enough brown field sites in Leek to achieve this so the Council needs to consider both brownfield and green field sites.

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane**Preferred Options Consultation April 2016****Environmental Health:**

Site	Site Comments
LE127	Some constraints on residential development: Minor contamination from filled in ground on site (former clay works) in part of site
LE128	No significant Issues
LE140	No significant Issues
LE142A	No significant Issues; possible odour/nuisance from adjacent farm
LE142B	No significant Issues

SCC Lead Local Flood Risk Officer:

Site	Site comments	Flood Risk Assessment Required?
LE127	Pond and floodplain on site. Existing flooding problem downstream at Ashbourne Road. Not sure where surface water will go but this site offers a possibility to solve flooding problem downstream. Please get developer to contact us as early as possible.	Yes
LE128A	Not sure where surface water will go.	Yes
LE140	Not sure where surface water will go.	Yes
LE142A	Not sure where surface water will go.	Yes
LE142B	Not sure where surface water will go.	Yes

SCC Local Education Authority: Advise that in Leek education contributions will be required to fund additional school places. At least a minimum of 1FE of first school provision and 1FE of middle school provision will be required in Leek Town during the Local Plan period. The High Schools in the Leek Planning Area are projected to have limited capacity to accommodate any children generated from housing allocated in Leek.

Council response: Comments noted.

Severn Trent Water: As a water company we have an obligation to provide water supplies and sewage treatment capacity for future development... We will complete any necessary improvements to provide additional capacity once we have sufficient confidence that a development will go ahead...We expect surface water to be managed in line with the Government's Water Strategy, Future Water. Surface water needs to be managed sustainably. For new developments we would not expect surface water to be conveyed to our foul or combined sewage system and, where practicable, we support the removal of surface water already connected to foul or combined sewer. Water Quality: Any proposals should take into account the principles of the Water Framework Directive and River Basin Management Plan for the Severn River basin unit as prepared by the Environment Agency.

Council response: Comments noted.

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

SCC Highways: The allocations proposed around Mount Road will necessitate highway improvements for example road widening, provision of footways, completing Kniveden Lane to adoptable standard, possible (probable) junction improvements at one or both ends. The removal of the sites between LE127 and LE128a could make the delivery of the required scheme more complicated and therefore requires further consideration including the reinstatement of sites LE069 & LE128b.

LE127 - Scope to improve the Mount Rd/Ashbourne Road junction is limited and the approach angle of Mount Road is very acute. A footway would be required to link to the rest of the developments along Mount Road and the possible school. However, there are verges along Mount Road where it is likely possible that a footway could be provided and Mount Road itself could be widened on both arms of the frontage. Regarding the other sites on Mount road, I would be looking for the unadopted length of Kniveden Lane to brought up to adoptable standard (and adopted); Mount Road itself to be widened, with footways; Mount Road/Buxton Road junction to be improved (though investigations would be required to establish feasibility of what could be achieved.

Council response: Comments noted. The Council will need to carefully consider whether it would be justified and expedient to include these two other Mount sites either in addition to or in lieu of those set out in the Preferred Options.

SCC Transportation:

Area	Comments	Public Transport Comments
Southern end of Mount Rd, Leek	Access to this site is likely to be from Mount Road although this has not been clarified. Mount Road is rural in nature and pedestrian and cycle links would need to be delivered connecting to the local network. Mount Road is identified as an advisory on-road cycle route, linking into the town centre via Kniveden Lane. Assessment of the Mount Road/Buxton Road, Mount Road/Ashbourne Rd and Kniveden Lane junctions will be required as well as potential carriageway improvements. Access to the smaller site (16 units) may be from Ashbourne Rd although this is not clear.	Services 30 (Leek to Cheadle - from 12th June 2016) and 108 (Leek to Ashbourne) operate along Ashbourne Road, roughly every 2 hours on both services, the nearest bus stops are 250m or less from the edges of the sites on Mount Road, less from site LE022. The sites are around 1km or more from Leek Bus Station.
Northern end of Mount Road, Leek	Access to the main site is likely to be from Mount Road (capacity 100 units) although this has not been clarified. Mount Road is rural in nature and pedestrian and cycle links would need to be delivered connecting to the local network. Mount Road is identified as an advisory on-road cycle route, linking into the town centre via Novi Lane and through the Haregate residential area.	Service X15 between Buxton, Leek and Hanley operates every 3 hours along the A53 Buxton Road, otherwise the closest services are the 18 and 165/166 which operate along Abbots Road in Haregate and along Springfield Road at the frequencies shown above.

Council response: Comments noted. The above issues will be reflected in the site-specific policy for the Mount sites in the Local Plan.

Leek & District Civic Society: protest in the strongest possible terms against the decision to include The Mount' Leek as a preferred option for housing development. This area is heavily used by recreational walkers and is the sort of local amenity which would be absolutely spoilt by additional building. Leek has few enough open spaces as it is and the loss of The Mount would be completely unjustifiable. Of all the site options in the Leek area, The Mount is the one which we feel should be absolutely sacrosanct and protected for the present populace and future generations.

Natural England: We note that the following preferred sites are located close to and/or adjoining existing areas of open space and green infrastructure:

- LE249 Housing

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

- LE235 Mixed use development
- LE140 Housing
- LE128a Housing
- LE142a Housing
- LE142b Housing

Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.

Council Response - Comments noted. The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy.

Coal Authority: Welcome the fact that the site assessment documents covering the site options does identify ground instability arising from mining legacy and as such The Coal Authority supports the broad approach taken to site selection. We have no views on the actual sites chosen as this is a matter for local determination following consideration of all relevant factors.

Latest Coal Authority data 27/04/2016. None of the Mount sites fall within any coal risk area.

Council Response – Sites affected by mining legacy to have a policy criterion to clarify that developers should recognise mining legacy problems and demonstrate how they can be positively addressed by new development. Policy also to clarify that no development should take place over mine entries even when treated.

Public responses to LE127 / LE128A / LE140 / LE142A / LE142B

Issues raised:

- Loss of important local amenity – The Mount is a very important open space close to the town. Mount Road is a route of Staffordshire Moorlands Walk a very popular route for Leisure activities such as running, cycling and walking.
- High quality Landscape – unsympathetic to landscape and the character and quality of the area. Urbanisation of the country lane that is mount road – if all 6 developments proceed then the 500 houses would be constructed. Visual impact – restrict important skyline and further afield. Currently, attractive views towards Leek conservation area. New street lighting – loss of dark skies. Overlook from the National Park - building as designated will adversely affect the view from the National Park. So many houses would destroy what is designated a special landscape area. The Mount is an area of outstanding natural beauty.
- If building must take place on the Mount, the least environmentally damaging sites are LE142b and LE140
- The spatial distribution of the proposed access sites across leek is unbalanced – there will not be sufficient demand to build all of these houses on one side of the town so the council will not meet its housing needs in any event.
- Impact for infrastructure – primary schools in particular (Leek 1 st school and Beresford Memorial School) will struggle to keep up demand and the situation where some children already have to school in the west of leek will become more common. Lack of Health Care provision in respect to GP services and hospital care for the area
- Traffic generation/inadequate roads. Most commuters work in Stoke/Manchester/Macclesfield (as opposed to Buxton/Ashbourne). Traffic will need to pass through town centre. Kniveden Lane will become rat run. Noise and air pollution caused by new cars.
- Develop Kniveden Hall (LE066) instead- well screened brownfield site.
- Wildlife/ecological impacts of new development

Leek

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

- No reason for new houses on green space that should be available for all to enjoy. Develop alternative sites such as Macclesfield Road/Home Farm/Anzio Camp/unused land at Sainsburys Leek/Britannia premises on Cheadle Road/ Barnfields Industrial Estate, or the area around Foker Grange instead. Develop brownfield sites/empty derelict mills in Leek instead. Such alternative sites have not been identified or consulted upon.
- Develop sites within Leek boundary first: LE 219, LE220, LE070, LE073, LE067, LE147, LE037 and LE063. The release of brown field sites ahead of green field sites cannot be justified.
- Loss of views/privacy from adjacent properties
- Council made decisions about the Mount in secret denying people of the Moorland the chance to put forward their views
- The beautiful location will command high prices, therefore no affordable houses will be built
- Question what "affordable" housing means
- Have serious concerns about the effects on the water run off if large areas of the Mount are built upon. The Mount is the highest point in our town, and huge amounts of water drain off it down towards Leek on a daily basis. Without the ground to soak up this water concerned the water table may be affected causing flooding. There would be a significant cost to put in mains services as the existing water and drainage are inadequate
- Sets a precedent for further sites at the Mount in future
- There is a significant discrepancy between between SMDC & Government figures for required housing. Believe you are seriously over-estimating the local housing need. The Council are only motivated by the new homes bonus. There are hundreds of empty properties throughout the Staffordshire Moorlands/Leek.
- Sites are good quality farmland. We need to protect our green spaces and farming land that is producing us with our local food.
- Mismatch between local employment opportunities and amount of new housing.
- Development would lead to homogenisation of the town
- Loss of property values
- In 2006 New York took the far sighted decision to turn a disused elevated railway in a linear park (the high lane). Would that Leek had planners and leader of similar vision to develop mount road into a high lane for the benefit all off the community
- All Mount sites would be constructed on the Natural Zone land surrounding the town of Leek.
- Traffic congestion deters visitors to the town, reducing the amount of tourist trade.
- Development will have negative effects on tourism
- Leek has few enough open spaces as it is and the loss of The Mount would be completely unjustifiable
- access to LE127 will be through the south end of High View Road with services readily available
- Sites ref: LE066 & LE128 will be in close proximity to an approved 35mtr high wind turbine
- Public transport via the bus service would be totally inadequate for new residents
- The future population of Leek is predicted to rise by a few thousand over the next couple of decades or so. This is mainly due to an ageing population. Therefore, planning for the future should be focused on local services for local people.
- Refer to the 'Bimby Housing Toolkit' which was drawn up by the Prince's Foundation for Building Community (bimby.org.uk).
- [Redevelop] rundown old mills for example (which may be protected by outdated listing orders) and other unsightly structures causing blots on the "townscape". Not enough positive action to clean up the interior of this town has been taken over the years. Use compulsory purchase orders where difficult site owners will not cooperate and make the Queen worthy of her name.
- The first part of the consultation document says the following: They should, as far as possible, reflect the aspirations of local communities and should strive to contribute towards their wider social, economic and environmental objectives. The document, doesn't succeed in any of these fundamental objectives. Economic damage to town caused by housebuilding.
- Development will start happening before the Local Plan is adopted.

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

- **WYG Planning:** The allocation of Mount sites, ahead of available brownfield/previously developed sites, is not in compliance Policy SS5a of the Core Strategy, which sets out the overarching strategy for development in Leek....None of the proposed allocations are considered likely to come forward in the short term based on the findings set out in the SHLAA (2015). However, we [WYG] suggest that the allocation of sites which are deliverable within the short term should have been considered to a greater extent in formulating the preferred options due to the significant shortfall of housing delivery across the district. WYG consider that sites in Leek, such as LE243, are suitable to contribute to the short term delivery of housing in Staffordshire Moorlands. Furthermore, the spatial distribution of the draft potential allocations weighs heavily on this eastern stretch of agricultural land and it is noted that no potential allocations have been selected within the core urban area.
- **LE140 First School Site:** If we need another primary school increase extend Beresford Memorial school there is about 3 acres of fields behind the school.

Council Response:

- The public/visual open spaces proposed by the Council are those mapped in the Preferred Options consultation document. The Council's adopted Core Strategy policies seek to improve public access to open spaces/recreation generally where this is consistent with other policies; and subject to landowner agreement. Note there is no automatic public right to cross privately owned land beyond public rights of way. Development proposals affecting the routes of recognised public rights of way would need to make allowance for them.
- The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes landscape impact evidence. The most recent 2016 landscape impact study assessed impacts from the Peak Park, and concluded that the various Mount sites exhibited low- through to high- landscape sensitivity; also providing recommendations regarding mitigatory measures. Note that landscape evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites. Site LE022 is of low landscape sensitivity. Site LE066 [Kniveden Hall] and LE142B are of high landscape sensitivity. LE140 is of medium landscape sensitivity.
- Note that since adoption of the 2014 Core Strategy, there is no longer a 'special landscape area' designation. None of the Mount sites attract an AONB designation.
- Issues such as external lighting in schemes can be controlled by the Council's amenity policies. Streetlighting is a matter controlled by SCC Highways.
- The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This includes consideration of heritage impacts, following consultation with the Council's Conservation Officer, and the heritage impact recommendations of the most recent 2016 landscape impact study. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).
- The Council is preparing a viability study that assesses the general financial viability of broad 'typologies' of development site. All Mount sites are considered to be broadly viable.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. Additional school capacity has been identified at both LE140 and ADD01, as set out in the proposals maps.. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

- The Council consults with service providers including Clinical Commissioning Groups during Plan preparation; and is also preparing an Infrastructure Delivery Plan, which considers the extent of public services across the District. Note that this evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.
- The Council consults with SCC Highways during Local Plan preparation. SCC did not raise any objections to Preferred Options sites LE022/ LE127/ LE128A/ LE140/ LE142A/ LE142B subject to development in this area contributing to the improvement of Mount Road including provision of footways and pedestrian links. Also Kniveden Lane should be brought up to adoptable standard with the implementation of footways. Further junction improvements at Mount Road/Ashbourne Road may also be appropriate. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to provide highways improvements where deemed appropriate).
- Highways Officer comments are predicated on a Mount Road access arrangement to LE127 (not High View Road).
- Notwithstanding current commuting patterns, the District as a whole has residual general employment land requirement, and Leek has a requirement (of around 8ha to 2031) and the Council must demonstrate that it will fully meet these along with its housing requirements, to have a sound Local Plan in place. Government Policy promotes mixed land uses, subject to proper consideration of amenity impacts (such as noise). The Council works with neighbouring planning authorities under its duty to cooperate, to explore opportunities for the meeting of development requirements cross-border. However neighbouring authorities must also address their own development requirements. The Council consults with SCC Transport (regarding strategic impacts) during Local Plan preparation; and has regard to SCC's Local Transport Plan Integrated Transport Strategy for the District.
- The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites, including ecological evidence: The Mount sites LE022/ LE127/ LE128/ LE140/ LE142A/ LE142B were subject to a Phase I ecological survey in 2014 and a later 2017 ecology study considered the scope for 'local wildlife site' (ie.SBI) designation for all preferred option sites. These studies set out evaluations of the sites followed by recommended further surveys/actions in the event of future development. The Council would expect subsequent schemes to take account of this evidence; further Policy NE1 allows for the Council to require ecological mitigatory or compensatory measures where appropriate. **Site LE022** was deemed mostly low biodiversity value overall in terms of the species poor grassland area but has some fairly biodiverse areas connected by hedgerows to the south and north [some predevelopment species surveys recommended]. Note that ecology evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.
- Note that none of the Mount sites falls within the Green Belt, whereas the western edge of Leek has Green Belt status. Whilst Councils can allocate within the Green Belt National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). The Council recently completed a Green Belt Review which assessed the suitability for retention of all areas of Green Belt in the District, against the five Green Belt 'purposes' set out in the NPPF. This will be used by the Council alongside other evidence in progressing its Local Plan. The NPPF also allows for consideration of development proposals that would represent 'limited infilling', or in some cases redevelopment of 'brownfield' sites in the Green Belt.
- Green Belt is a long established designation that serves a number of important functions in separating settlements, and preserving 'openness'. Whilst Councils can allocate/make boundary amendments within the Green Belt, National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). Note that landscape quality/character, and public access characteristics, are not in themselves 'purposes' of Green Belt laid out in national guidance. The NPPF allows for consideration of development proposals upon 'brownfield' Green Belt sites.
- The Council must demonstrate that it will fully meet residual housing (and education) requirements for Leek to have a sound Local Plan in place. However this requirement does not have to be met 100% from land allocations – unanticipated development of other urban brownfield/greenfield sites counts too – the Council factors in an assumed windfall allowance (resulting in a lower requirement). However there is insufficient capacity to meet this requirement entirely from sites within the Leek town boundary alone resulting in

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

proposed sites both within the urban area, and greenfield peripheral “urban extensions”. The Council uses evidence to justify its selection of ‘Preferred’ allocation sites from wider sites including landscape impact evidence). The Council must balance all relevant evidence when deciding over preferred allocations.

- LE073 is now a residential commitment
- Residential schemes within the urban area involving employment land or buildings not allocated for housing, would be assessed against Core Strategy Pol E2, and other relevant Core Strategy and NPPF policies
- The former Britannia premises on Cheddleton Road are earmarked for two sites for mixed alternative uses (LE150 and LE235), in response to the town's residual employment land requirements to 2031.
- Note that Anzio Camp received planning consent for erection of extra care housing, live work units, ancillary social centre and facilities building and change of use to holiday park in November 2015.
- The Sainsburys site as part of its mixed use consent SMD/2013/1098 still enjoys residential consent on part of the site. Note Environmental Health Officer did not object to that scheme. The Council would assess residential schemes on sites affected by contamination in line with Local Plan Policy SD4 and NPPF paras 120-121 NPPF. The responsibility of funding remediation rests with the developer.
- The Council maintains a database of housing site suggestions (SHLAA). This database formed the basis of the 2015 ‘Site Options’ consultation as all SHLAA sites above a minimum size threshold, and attracting a ‘B’ deliverability rating, were included in that consultation. Subsequently 2016 ‘Preferred Options’ were narrowed down from this (plus additional sites emerging through the call for sites process, deemed suitable).
- The Council consulted upon all potential sites (of a minimum size) deemed deliverable for housing, as part of the Site Options consultation in July 2015. The results of this consultation (including the call for sites), alongside other relevant evidence, has informed the subsequent Preferred Options.
- The Council's design and amenity Policies and standards will be applied to subsequent planning schemes across allocated sites.
- The Council must conduct public consultation concerning its emerging Local Plan as set out in the Local Plan regulations (or exceeding these requirements); and in also in accordance with the Council's adopted Statement of Community Involvement. All stages of the Local Plan (including consultations) must be agreed by the elected Council Assembly; and all meetings of the Council Assembly are open to the public..
- An element of affordable housing will be required for all major housing schemes in the District, as set out in Local Plan Policies. The Council may also require an element of starter homes, and self-build plots on such sites. The Council's housing/design policies and the NPPF expect that housing schemes provide for variegation in design; and a mix of house types to meet differing socio-economic needs, including affordable housing.
- The Council consults with its Housing Officer when setting definitions of ‘affordable’ in relation to affordable housing. This usually equates to a percentage of open market value which represents the upper limit that the house can be sold/resold for; and is based upon analysis of average earnings to open market house value ratios.

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

- The Council consults with utilities providers, the Environment Agency, and the SCC Lead Local Flood Risk Officer during Local Plan preparation. These bodies did not object to any of the Mount sites. The SFRA provides an overview of flood risk from all sources across the District, and will be used alongside formal EA responses regarding proposed allocations. Note that subsequent development proposals would be required to integrate sustainable drainage features into layouts, as required by the Flood and Water Management Act.
- Each stage of Local Plan preparation must be agreed by Full Council Assembly. The Council must demonstrate to a Planning inspector that they have produced a Local Plan preferably covering a 15-year time horizon, to take account of longer term requirements.
- All Planning Authorities are eligible to receive New Homes Bonus which was introduced by the Government to reflect and incentivise housing growth in their areas. It is based on the amount of extra Council Tax revenue raised for new homes and is payable annually over a 6 year period.
- The NPPF directs that where development is necessary, lower grade agricultural land be used ahead of higher grade. Note that the various site options around Leek appear to fall within the same ALC (Grade 4 'poor'). Agricultural land quality must be weighed against all other relevant evidence when the Council selects 'Preferred' sites. The NPPF expects Councils to meet objectively assessed development requirements, and also encourages brownfield development, subject to wider Policies.
- Property values are not considered as material considerations under the Planning Acts.
- Note that there is not a 'natural zone' designation for open countryside in the Staffordshire Moorlands.
- In relation to comments on economic impact, new housing has a proven positive economic benefit to an area, generated both by expenditure of construction industry and through longer term residential spend.
- The Council is currently preparing a review of its 2009 PPG17 audit which will assess the extent and quality of different typologies of public open space currently across the District; and therefore whether further provision is required across different settlements. Where there is a proven deficiency (in accordance with Core Strategy Policy C2) future housing schemes would need to contribute towards additional open space...
- The Council would assess residential schemes in proximity to approved wind turbines in accordance with Core Strategy and NPPF amenity Policies, and ETSU (as amended) noise criteria etc.
- Leek is already served by a number of frequent or less frequent bus routes, connecting to centres such as Hanley, Cheadle, Buxton and Macclesfield. A number of these use main arterial routes such as Buxton Road/Ashbourne Road/Springfield Road. In some circumstances, major residential developments may be required to contribute to improved bus routes/bus facilities in accordance with Core Strategy Pol T1/Staffordshire Local Transport Plan.
- The Council's own housing need assessments are set out in its evidence base on the website. Note these assess the needs of 'older people' and other groups. The June 2014 SHMA concluded the number and proportion of older person households is expected to increase in the District over the period to 2031 (46% increase between 2011 and 2031) which has implications such as increased demand for both specialist/extra-care accommodation for older people, and for adaptable homes. Owing to an ageing population and other factors, the need for smaller units will in future exceed the need for larger, family units. For these reasons the SHMA recommends that 60% of future housing should be 1- or 2-bed. The Council's current Core Strategy Policies expect larger housing schemes to provide for a mix of housing across all locations, to respond to identified local needs such as housing for older people. Note that where there is a policy requirement for affordable housing provision upon such sites, the nature of provision may reflect the above.

Leek

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

- The BIMBY toolkit is noted. The Council will work with communities seeking to introduce (or influence the preparation of) Neighbourhood Plans, in accordance with the Neighbourhood Planning Regulations.
- The Localism Act provides for local communities to draw up their own 'Neighbourhood Plans'; however their content must be in conformity with Government and adopted Council Policies; and they must be adopted by Government Inspector. Note that the Council has not to date received applications from Leek residents to draw such Plans.
- The Secretary of State for Culture, Media and Sport is responsible for the listing of buildings on the advice of Historic England. Apart from being consulted, the Council does not have any say in which buildings are added to the statutory list. The Council, however, is charged with protecting listed buildings insofar as it is possible and managing any changes to them through the planning system. In discharging this responsibility, the Council has to work to the government's advice set out in the National Planning Policy Framework which requires every effort to be made to preserve listed buildings and either keep them, or return them, to active use.
- Whilst Councils do retain CPO powers in principle, these are generally used (if at all) as a last resort where it is expedient and in the public interest for the Council to do so, where agreement with landowners is not possible. As explained in para response to PO89 about Leek housing requirements and windfall allowance the Council makes assumptions that development schemes will come forward within the Leek development boundary to contribute to its housing need to 2031, which could include historic premises etc. Applications affecting listed or non-listed "heritage assets" would be assessed against Section 12 NPPF and Council Policies. The Council would also assess schemes in the town centre against the aspirations of the adopted Leek Town Centre Masterplan.
- The Council must demonstrate to planning inspector that its Local Plan is based on the principles of sustainable development. The NPPF is clear that this means three roles – economic, social, and environmental, and that they are considered simultaneously. The Council's submitted Policies and objectives would therefore have to satisfy this.
- The emerging Local Plan is not yet finalised and needs to undergo independent public examination by Government appointed Planning Inspector before it can become adopted. Planning applications arising before this happens must be determined against the NPPF and current Council planning policies.
- If the Council considered that a development may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts. In addition the Council continually monitors air quality across the district and regularly undertakes review and assessments of this data to identify areas where the traffic could have an unacceptable impact on local air quality.
- **WYG response:**
 - The Council will be reviewing its current Core Strategy Policies following public consultation later in 2017...
 - All of the [preferred options] sites referenced are identified as either available now, or potentially available in the SHLAA, and have some form of owner confirmation.
 - As set out in the Options site assessment tables on the website, a number of sites within the Leek development boundary are not proposed as either preferred allocations or 'reserve' sites owing to the fact that these sites could come forward at any time and be assessed against relevant Core Strategy and NPPF policies.

LE140 First School Site response:

- The existing land at Beresford First School is needed as playing fields for that school. SCC Education indicated support for the proposed first school location at LE140.

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

Petition with 1092 signatures opposing development on the Mount stating the following:

“Dear Miss Ralphs,

Building four hundred plus houses on the area known by everyone in Leek as The Mount and used by countless generations as a gateway to the countryside would be against everything that ‘Localism’ intended to bring.

The enclosed petition goes some way to demonstrate the strength of feeling that there is against the proposed building plots as set out in the Local Plan.

The area is mainly agricultural and offers amazing views of the town and its surrounding countryside. Indeed the views of Leek’s conservation area is unrivalled and the area as a whole acts as a buffer between the town the Peak District National Park.

The road itself could not cope with the estimated 600 to 800 extra cars that the proposed housing would generate. The Mount is a narrow road with no footpaths and the junctions at either end of the Mount would become even more dangerous.

Historically people travelling out of Leek to work use the Stoke on Trent and Macclesfield roads with few travelling to Buxton or Ashbourne. This would mean that the roads in Leek’s Town centre would become even more congested at peak times as these people make their way through town.

We urge the Council to think again and produce alternative sites for the houses thereby saving this precious area for the future generations to enjoy.”

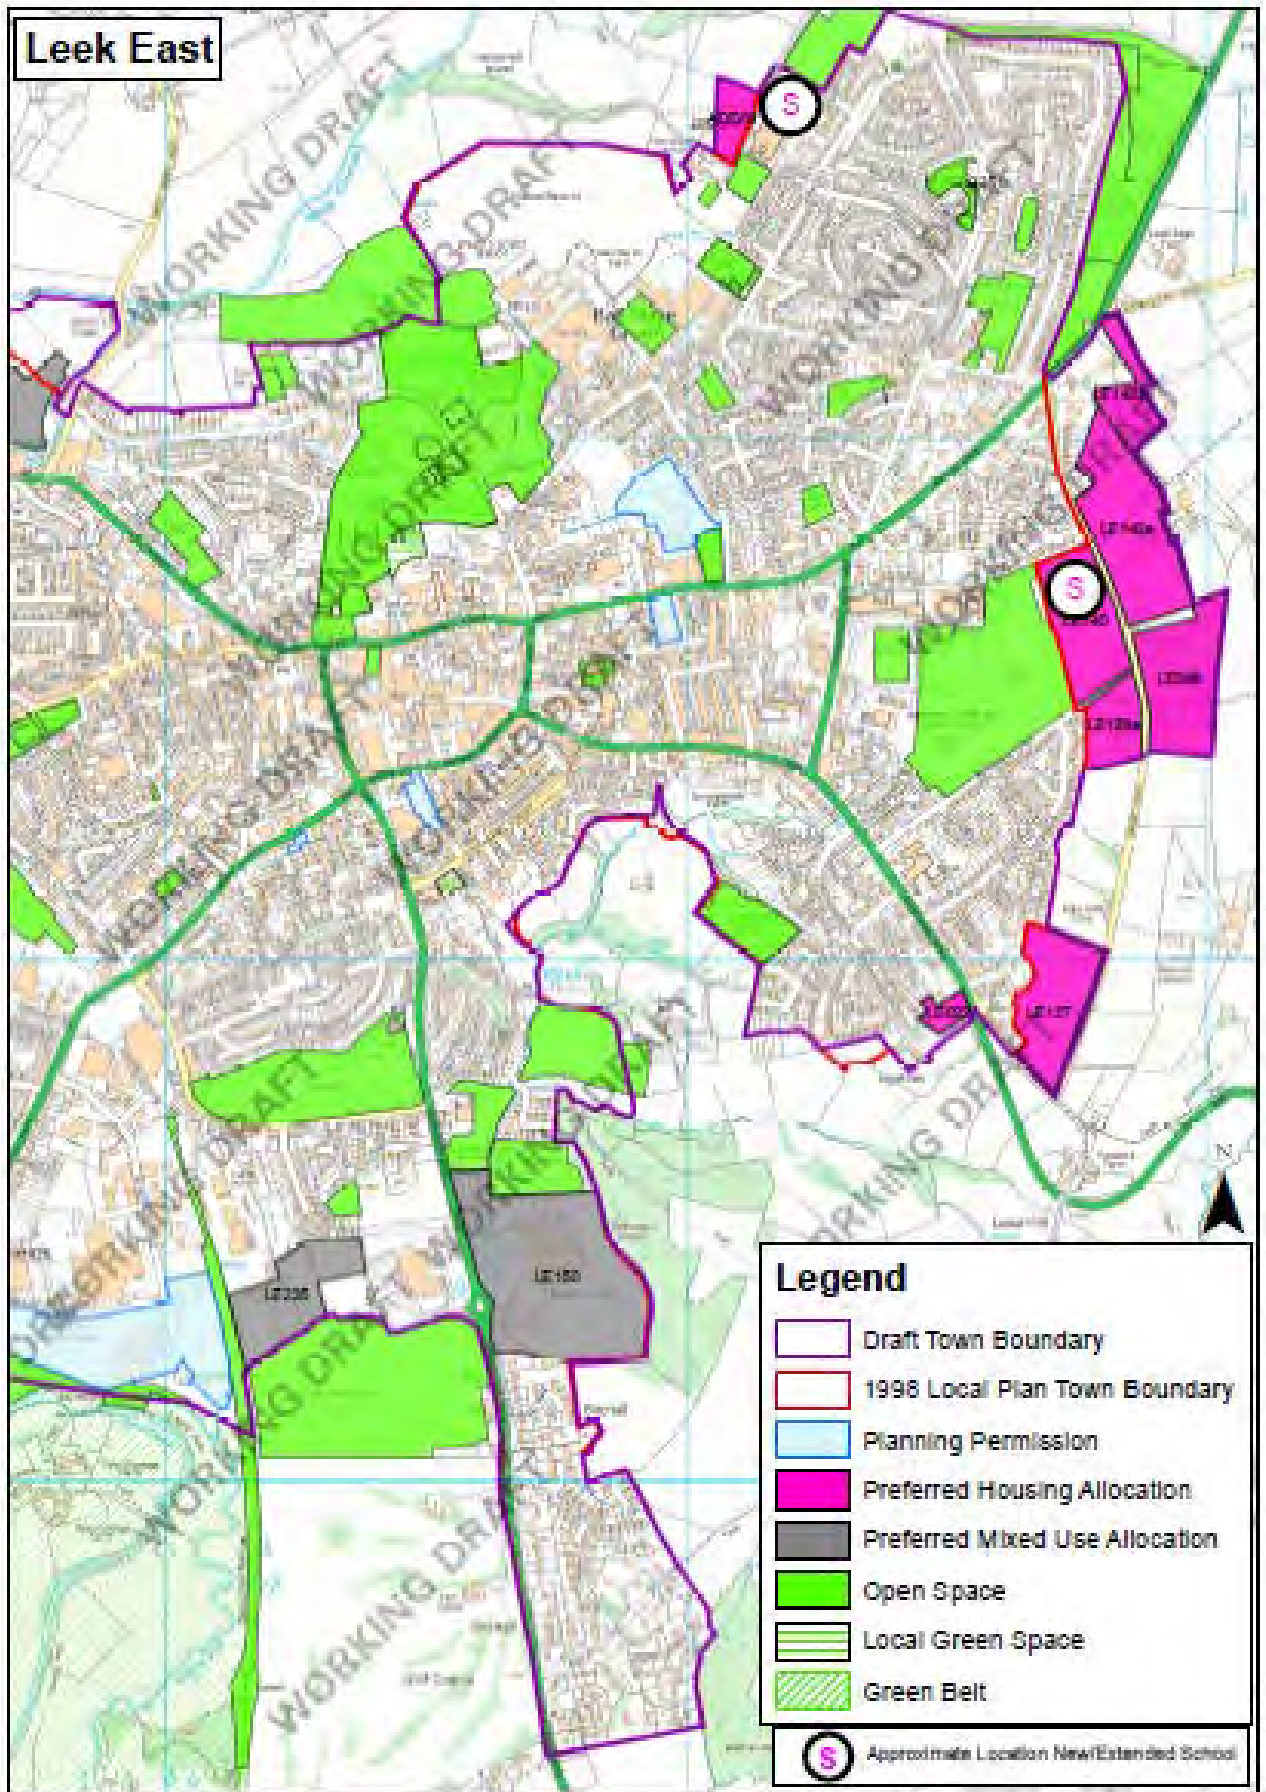

Council Response:

- The Council considers all petitions it receives in relation to formal planning consultations. They are also publicised on the Council’s website including the action the Council proposes to take in relation to it.
- The Council must conduct public consultation concerning its emerging Local Plan as set out in the Local Plan regulations (or exceeding these requirements); and in also in accordance with the Council’s adopted Statement of Community Involvement. All stages of the Local Plan (including consultations) must be agreed by the elected Council Assembly; and all meetings of the Council Assembly are open to the public
- The Localism Act provides for local communities to draw up their own ‘Neighbourhood Plans’; however their content must meet certain Basic Conditions such as being in conformity with national and adopted Council Strategic Policies; and they are subject to Examination and Referendum. Note that the Council has not to date received any application from Leek residents to draw up such a Plan.
- The Council uses evidence to justify its selection of ‘Preferred’ allocation sites from wider sites. This includes landscape impact evidence. The most recent 2016 landscape impact study assessed impacts from the Peak Park, and concluded that the various Mount sites exhibited low- through to high- landscape sensitivity; it also provided recommendations regarding mitigatory measures. Note that landscape evidence must be weighed against all other relevant evidence when the Council selects ‘Preferred’ sites.

Leek

Sites LE127 / LE128 / LE140 / LE142A / LE142B off Mount Road/ Kniveden Lane

- The Council consults with SCC Highways during Local Plan preparation. SCC did not raise any objections to Preferred Options sites LE022/LE127/LE128A/LE140/LE142A/LE142B subject to development in this area contributing to the improvement of Mount Road including provision of footways and pedestrian links. Also Kniveden Lane should be brought up to adoptable standard with the implementation of footways. Further junction improvements at Mount Road/Ashbourne Road may also be appropriate. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to submit transport statements, and provide highways improvements where deemed appropriate).
- Notwithstanding current commuting patterns, the District as a whole has residual general employment land requirement, and Leek has a requirement (of around 8ha to 2031) and the Council must demonstrate that it will fully meet these along with its housing requirements, to have a sound Local Plan in place. Government Policy promotes mixed land uses, subject to proper consideration of amenity impacts (such as noise). The Council works with neighbouring planning authorities under its duty to cooperate, to explore opportunities for the meeting of development requirements cross-border. However neighbouring authorities must also address their own development requirements. The Council consults with SCC Transport (regarding strategic impacts) during Local Plan preparation; and has regard to SCC's Local Transport Plan Integrated Transport Strategy for the District.

Leek

LE150 Land adjacent Newton House Cheddleton Road

Local Plan Process

- Site suggestion from the SHLAA
- Site included in the SELAA on basis of its identification in the Council's 2008 District Employment Land Study as an existing employment site.
- Included in the site options consultation July 2015
- Included in the Preferred Options consultation April 2016 for mixed uses (enlarged site area following 2015 site representations from owner's agent).

Current Position

Site taken forward into Preferred Options Local Plan as:

- Within town boundary with good vehicular access
- Owner support for mixed use allocation
- Large brownfield site which can accommodate much residential and business development
- Part of a suite of employment allocations across different areas of Leek to provide choice

Key Issues

- **Ecology** – Further survey work recommended in order to establish SBI/BAS status. Given proximity to ancient woodland and SBIs (Ballington Wood/Ladydale) to the east, Council to give consideration to requiring 'buffer' along east of site
- **Topography** – site raises to NE. LLGSHIS recommends development be concentrated to north of site
- **Protected habitats** - HRA states potential increase in traffic associated with this new employment site could potentially increase air pollution near to the SPA/SAC - require further investigation in the HRA. LSEs relating to air quality are identified in relation to all of the allocation sites in Leek because they may increase traffic. Potential in combination effect with employment allocations in Leek and development in neighbouring areas.

Site Information

Greenfield / brownfield	Built up area boundary/ countryside	Est. housing capacity / density	Area (ha)	Ownership status	Site details
Brownfield	Built up area	179 (34.1 dwellings per hectare based on agent's assumption that 5.25ha is actual developable area for residential).	9.27 (including 1.5ha for employment use. Estimated capacity 600m ² .	Owner are supportive of mixed residential / employment allocation	<ul style="list-style-type: none"> • Topography - LLGSHIS recommends development be concentrated to north of site • Council to consider case for eastern 'buffer' strip to protect ecology.

Studies

Extended Phase 1 Habitat Survey 2015 (part of site within FID 207)

Conclusion

The site has mostly low biodiversity value overall in terms of area but has had badger field signs recorded in one area, and is adjacent to a large area of semi-natural broadleaved woodland, Ladydale SBI and rough grassland to the south. Therefore the site is given district ecological value as the site abuts Ladydale SBI/ Ballington Wood. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- Badger survey
- Reptile survey
- Creation of a buffer zone between the development and Ladydale SBI/ Ballington Wood
- Vegetation removal at the appropriate time of year

LE150 Land adjacent Newton House Cheddleton Road

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at district level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance, and the potential to support a population of reptiles and badgers.

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- Badger surveys
- Reptile surveys.

Landscape & Settlement Character Assessment (2008)

Does not form part of important landscape setting to Leek.

Landscape, Local Green Space & Heritage Impact Study (August 2016)

Landscape Results

Site comprises existing offices, parking and surrounding land on the southern edge of Leek, east of Cheddleton Road. The land slopes up to woodland to the east of the site, with a high point in the south-east corner of the site. The existing landscaping within the site is attractive and should be retained as far as possible if the site were to be developed, including existing trees, in order to prevent adverse effects on local landscape character. The existing frontage of tree planting and landscaping on Cheddleton Road should be maintained. The high point at the south-east corner of the site is currently undeveloped and should remain so as it would be visually prominent. Development should be concentrated in the north of the site where visual prominence is lowest. ***Site is of low landscape sensitivity.***

Heritage Results

There are nine Grade II Listed Buildings within the 400m buffer. There was no intervisibility with the assets to the north of the site due to intervening vegetation and buildings. Therefore, development would be highly unlikely to adversely affect the settings of those assets. The settings of the three assets to the south of the site are not considered to contribute greatly to their significance. However, adverse effects could be reduced by stepping development back and using vegetation screening along the south-western edge of the site. Development would be highly unlikely to adversely affect HUCA 13 (Leek Extensive Urban Survey report 2011). ***Site suitable for development in heritage terms subject to appropriate masterplanning.***

Green Belt Review (November 2015)

Not applicable.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the proposed delivery of circa 120 is likely to have a significant positive effect. However, the development of greenfield, grade 3 ALC land is likely to have a significant negative effect. The site's proximity to historic assets and district ecological importance is likely to have a significant negative effect.

Initial HRA Screening

New housing development in Leek could potentially increase recreational pressure and air pollution from increased road traffic which could have an effect on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC and this requires further investigation in the HRA. The screening has also identified that new employment sites could also increase traffic and air pollution near to the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC and this also requires further investigation in the HRA. The closest part of the SAC/SPA (Leek Moss SSSI) is approx. 4km from the western edge of Leek.

Potential increase in traffic associated with this new employment site could potentially increase air pollution near to the SPA/SAC thereby increasing nitrogen and acid deposition. These potential effects require further investigation in the HRA.

Leek

LE150 Land adjacent Newton House Cheddleton Road

Updated HRA Screening of Preferred Options Sites June 2017

The purpose of screening is to identify whether the elements of a plan (i.e. policies, site allocations) could result in Likely Significant Effects (LSE) on European sites.

Further investigation has been undertaken in relation to potential urban effects resulting from these allocation sites. Urban effects on European sites typically have an adverse effect on sites within 500m of residential areas (primarily due to cat predation and fire risk due to arson etc). Other urban effects (primarily dog walking from the site to the SPA/SAC) can have an adverse effect on European sites up to 1.6km from residential areas. All allocated sites identified as preferred options are further than 1.6km from the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC.

LSEs relating to urban effects are identified resulting from the following allocation sites:

- Allocated sites on the eastern edge of Leek (LE066, LE140, LE128a, LE142 a and b) located between 3.8km and 4.2km from the Peak District SPA and the South Pennine Moors SAC.

LSEs relating to air quality are identified in relation to all of the allocation sites in Leek because they may increase traffic. Potential in combination effect with employment allocations in Leek and development in neighbouring areas.

Options Consultation July 2015

Statutory bodies/stakeholders

SCC Highways: Plot outline does not directly connect to the highway. Access road could be upgraded to adoptable standard depending on final proposal. Good access from existing roundabout. Transport Assessment will be required which should look at capacity and operation of existing roundabout and effect on Leek town centre.

Woodlands Trust – site adjacent to ancient woodland and unsound and should not be taken forward.

Natural England - Allocation adjoins Birchall Wood Ancient Given the proposed allocation's proximity the following policy material will need to be addressed: Policy DC1 Design considerations and Policy NE1.

Developer/Agent/Owner – Land available.

Public response No comments.

Council response –

- The Highway Authority does not raise any issues which would deem the site undevelopable.
- The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed. The Study recommends if the site is put forward for development that a buffer is created between the site and Ballington Wood/ Ladydale SBI, possibly as an area of fenced off vegetation or newly planted broadleaved trees. It also recommends that badger and reptile surveys be conducted in advance of development.

Preferred Options Consultation April 2016

Statutory bodies/stakeholders

Staffordshire County Council Transportation - Access to site via existing roundabout junction which will require assessment. Links into town centre for pedestrians and cyclists will require consideration. Public transport comments: Service 16 between Hanley, Cheddleton and Leek operates every 30 minutes along the A520 Cheddleton Road. Service 116 also provides 3 additional journeys per day between Leek and Cheddleton.

Council response – Comments noted. The above will be reflected in a site-specific policy, including any requirement to submit a TA.

LE150 Land adjacent Newton House Cheddleton Road

Woodland Trust - Ballington Wood is adjacent. Are concerned that proposed development adjacent or in proximity to the wood will have negative impacts on it, causing damage and potential loss. Ancient woodland is defined as an irreplaceable natural resource that has remained constantly wooded since at least AD1600. The length at which ancient woodland takes to develop and evolve (centuries, even millennia), coupled with the vital links it creates between plants, animals and soils accentuate its irreplaceable status. The varied and unique habitats ancient woodland sites provide for many of the UK's most important and threatened fauna and flora species cannot be re-created and cannot afford to be lost. With Staffordshire Moorlands District Council showing a valuable above average ancient woodland resource at 3.09% of land area compared to a UK average of 2.5%, it is critical that this irreplaceable natural resource is absolutely protected in this Document and highlighted appropriately. Development impacts on ancient woodland in a number of ways: Chemically through acidification, eutrophication and toxic pollution, Disturbance by noise, light, trampling and other human activity, Fragmentation as a result of the destruction of adjacent semi-natural habitats, Development provides a source of non-native plants and aids their colonisation, Any effect of development can impact cumulatively on ancient woodland - this is much more damaging than individual effects. We would recommend a buffer zone of at least 50 metres of semi-natural vegetation would be required to protect the woodland from the change in land use on the site for each allocation. This 50m should be included as part of the policy for each site.

Staffordshire County Council - LE150 is immediately adjacent to a Site of Biological Importance which is also Ancient Woodland and supports a habitat of principal importance. Appropriate layout and design will be required to avoid impacts on this woodland.

Council response - The site was subject to a Phase I ecological survey in 2015. The site report acknowledges the site's proximity to this ancient woodland (and Ladydale SBI etc); and factors this into subsequent evaluation/conclusions, recommending a number of further surveys/actions would be appropriate prior to development, including the creation of a buffer zone with the woodland given its AWI status. Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at district level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance, and the potential to support a population of reptiles and badgers.

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- Badger surveys
- Reptile surveys.

The Council would expect subsequent schemes to take account of this evidence; further Policy NE1 allows for the Council to require ecological mitigatory or compensatory measures where appropriate. The Council would assess all schemes against both this Policy and relevant NPPF policy (para 118): both provide protection to ancient woodland, requiring that the need for, and benefits of, harmful development be demonstrated to outweigh loss. According to the 2006 NERC Act, the Council must in its Planmaking, have regard to the purpose of conserving biodiversity. Note that ecology evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites, including for example, landscape impact evidence .

The Council will consider the scope for including requirement for an eastern buffer within the emerging site-specific policy for the site.

Leek Town Council - It's not an industrial location and the area would be spoilt if used for industrial purposes - it should be used for housing only.

Council response - Leek has residual general employment land requirement (of around 8ha to 2031) and the Council must demonstrate that it will fully meet this to have a sound Local Plan in place. General employment purposes encompasses light industry/officing through to general industry and warehousing. Government Policy promotes mixed land uses and sustainable development patterns, subject to proper consideration of amenity impacts (such as noise). The site will attract a dedicated Local Plan policy, and subsequent proposals will be assessed this and the NPPF.

Sport England - This mixed use allocation will involve the loss of tennis courts. This needs to be justified in terms of NPPF Par 74 or the tennis courts replaced by the developer and required by supporting text in the allocations document.

LE150 Land adjacent Newton House Cheddleton Road

Council response – The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy.

Environmental Health: No significant constraints on residential development - minor contamination expected from light industrial buildings but easily dealt with

Council response – Comments noted.

SCC Lead Local Flood Risk Officer: Mixed Alternative Uses. Not sure where surface water will go. FRA required.

Coal Authority: Welcome the fact that the site assessment documents covering the site options does identify ground instability arising from mining legacy and as such The Coal Authority supports the broad approach taken to site selection. We have no views on the actual sites chosen as this is a matter for local determination following consideration of all relevant factors.

Latest Coal Authority data 27/04/2016. Site does not fall within any coal risk area.

Council response – Sites affected by mining legacy to have a policy criterion to clarify that developers should recognise mining legacy problems and demonstrate how they can be positively addressed by new development. Policy also to clarify that no development should take place over mine entries even when treated.

Public response-

Objections:

- The construction of the 179 houses would cause us considerable congestion on the main Cheddleton Road and the A520 together with traffic from the Co-op (Britannia) buildings at peak times. This could be a safety issue for the schools opening and closing times.
- Newton House has a preservation order on it as a 1960's construction and the Sir Hubbert Newton placed restrictions/regulations on it the building this needs to be addressed. Surely the land by the canal / scrapyard would be a more suitable place to be built. Cornhill Site LE235 what happened to the affordable housing which is supposed to be built on the Sainsbury's site? Happened as part of the Sainsbury's deal then there would be no need for this development.
- Consider the development here should be limited to housing to fit in with surroundings and be in place of housing on several sites Leek East thus retaining the Green Belt area on the mount. This would also give a lesser impact on the road infrastructure.
- The build of these houses is going to put a great strain on the resources, esp Compton School resources and the A520 at the moment the volume of the traffic is horrendous, queuing back to the railway bridge very often at 8 am onwards and between 3.30- 4pm and 5- 6.30.
- Leek has many areas which could be regenerated to bring standards up in the community. We should want visitors to look at town and say how wonderful this it is. When so much can be improved within the town why spend the money destroying the already pleasant and ambient areas outside the town? However due there my house is and its current environment I find I do not feel safe. There is good and bad everywhere but building affordable houses will bring more people, more problems, more anti-social behaviour. Not bothered if offices, a cinema, a hotel, a super markets even a McDonald's is put on this site. If the same or similar footprint to Newton House was kept it would retain some wildlife to continue to enjoy. I am however completely against any houses being built. I agree people should have a right to affordable housing but people have the right to affordable housing but people should also have the right to live in a more select area should they wish to work hard enough to achieve it.
- This is indicated as being a mixed-use or employment site yet has a housing allocation of 180 dwellings. The congestion of traffic on this road with the Co-op head office and All Saints school is very heavy. Even crossing the road at a non peak time is difficult, impossible in the rush hours. Add to that another 180 houses. What are the proposals to address this and why is it down as mixed use when the plan says 179 dwellings.

Support:

- This area appears suitable for this purpose.
- Agent **HOW Planning** - submission seeks to promote the exceptional opportunity at Newton House, a highly sustainable brownfield site that is suitable for a residential-led mix of uses; and to provide detailed information to the Council which can be accurately reflected in the emerging

Leek

LE150 Land adjacent Newton House Cheddleton Road

Local Plan. [The following 4 attachments are submitted: A completed Preferred Options Sites and Development Boundaries Consultation Response Form A summary letter which outlines the basis for these representations A Development Statement (prepared by HOW Planning and Masterplanners 3DReid) that fully demonstrates the development capacity of land at Newton House and the exceptional opportunity it presents to utilise a site that is suitable, available and deliverable for a mix of uses An executive summary of an Employment Market Demand Review (undertaken by Cushman and Wakefield) which assesses the redevelopment potential of the site in terms of suitable land uses (bearing in mind its historic use for employment purposes), taking into account market considerations and supply and demand factors.

General Comments:

- **WYG** - This is a prominent existing employment site located within a viable employment location and the site is considered to be more appropriate for employment expansion than for housing. Additionally, the development of the agricultural land to the south of Newton House would result in the merging of Leek with Birchall to the south. [Report questions the stated housing yield/density on this site; and the %age split between housing and employment uses]. The over-optimistic density is likely to result in further under delivery of housing in Leek and across the district as a whole, further increasing the shortfall.

Council response –

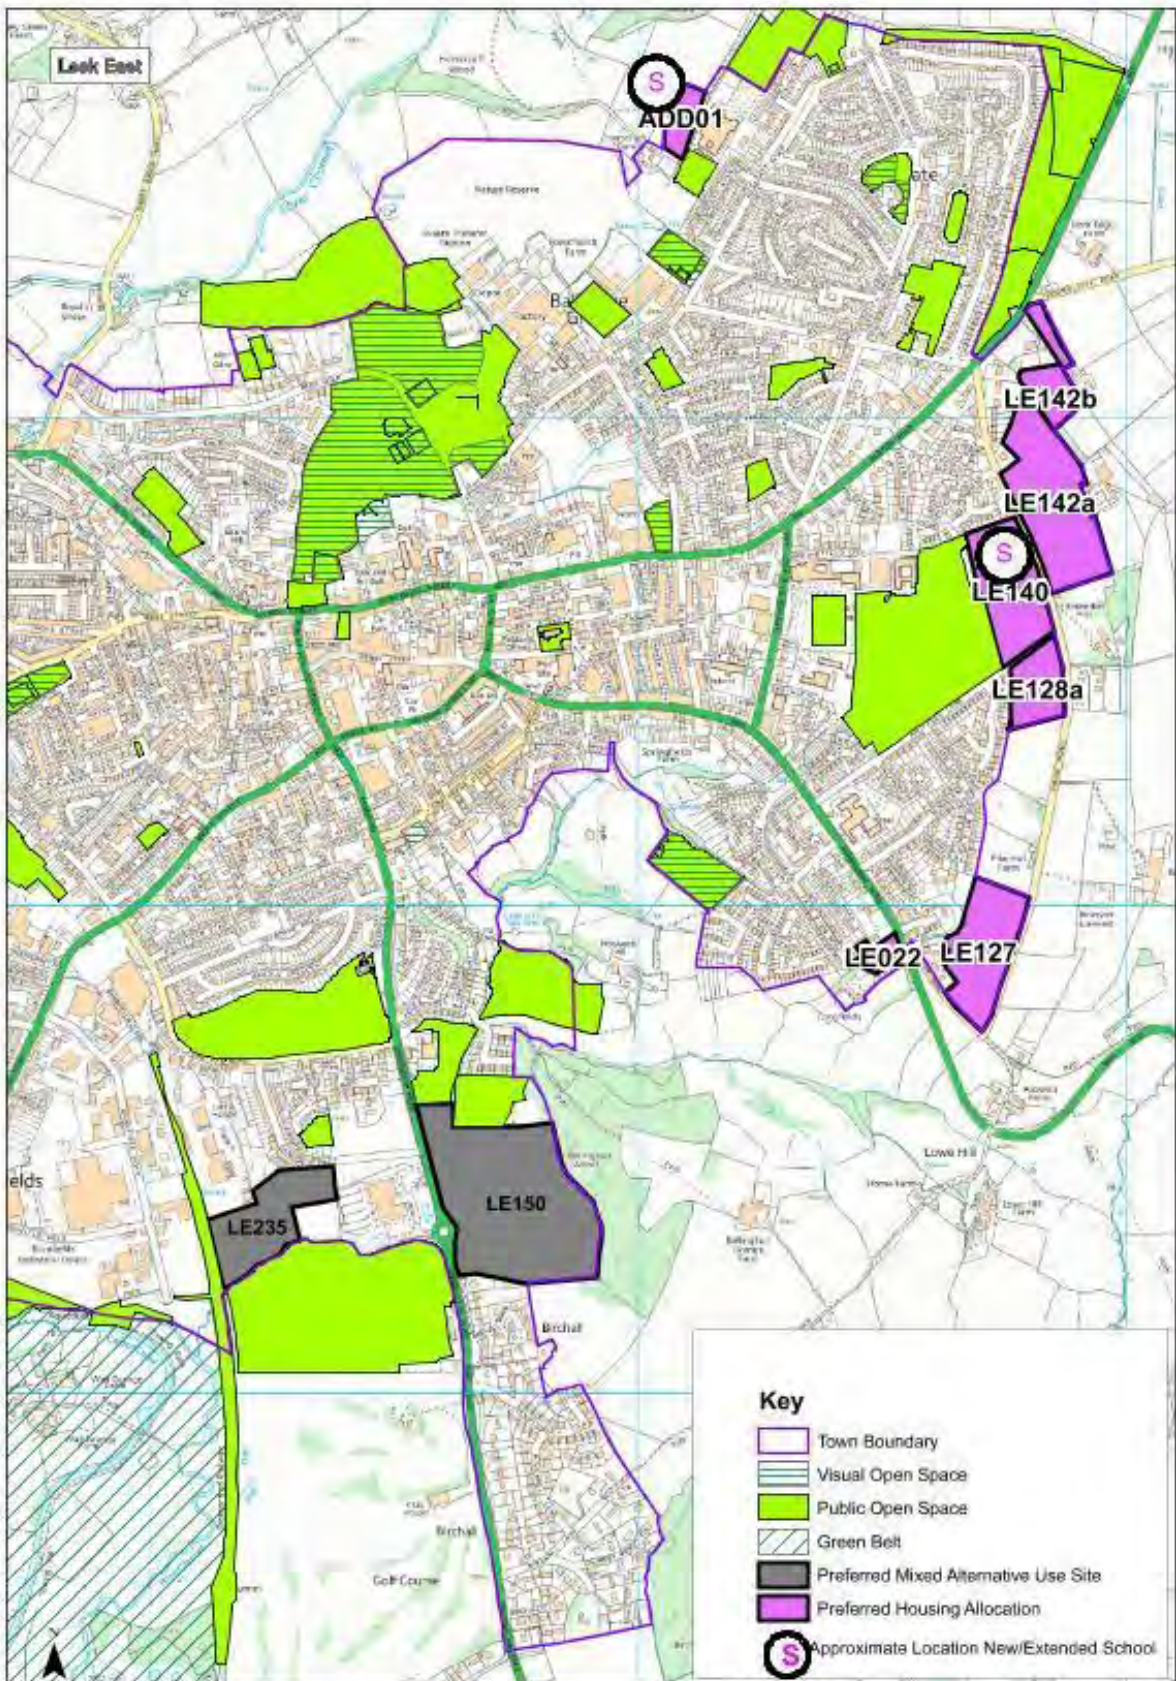

- The Council consults with SCC Highways and SCC Transportation during Local Plan preparation. SCC Highways did not raise any objections to this site, however advise that the existing access road into the site could be upgraded to adoptable standard depending on the final proposal; and advise there is good access from the existing roundabout. A Transport Assessment will be required with any proposed scheme, which should look at capacity and operation of existing roundabout and effect on Leek town centre. SCC Transportation also advise that links into the town centre for pedestrians and cyclists would also require consideration. Note that the Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement for the developer to provide highways improvements where deemed appropriate).
- The Council is not aware that the site is presently affected by legal restrictions for the uses proposed.
- A 6.59 hectare industrial site off Barnfield Road, Leek near the Caldon canal was granted outline consent in August 2015 for redevelopment for residential, employment, tourism and leisure uses, retail units and pub, including railway station and marina. However existing industrial areas in use would not generally be allocated to other uses unless re-provision of equivalent or improved floorspace was involved.
- Site LE235 is also proposed for mixed employment and residential uses in the Council's Preferred Options.
- The Sainsburys site as part of its mixed use consent SMD/2013/1098 still enjoys residential consent on part of the site. Note Environmental Health Officer did not object to that scheme. The Council would assess residential schemes on sites affected by contamination in line with its adopted Policy SD4 and NPPF paras 120-121 NPPF. The responsibility of funding remediation rests with the developer.
- Page 25 of the Preferred Options consultation document sets out the residual housing requirement for Leek to 2031 (pursuant to Policy SS3 of the adopted Core Strategy). The Council must demonstrate that it will fully meet residual housing requirements for Leek to have a sound Local Plan in place. This requirement does not have to be met 100% from land allocations – unanticipated development of other urban brownfield/greenfield sites counts too – Table 4.1 factors in assumptions about future windfall housing (resulting in a lower residual requirement). This windfall would include urban sites not formally identified on the map. Applications for residential uses arising on such sites would be assessed on their merits against NPPF and Council Policies. As there is insufficient capacity to meet this residual need entirely from sites within the Leek town boundary, the remaining requirement is to be met from a combination of urban (brownfield and greenfield) sites, and peripheral “urban extensions” around Leek as set out in Tables 4.2 and 4.3.
- Any new developments would need to adhere to design policies to ensure character of the District is maintained.
- The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This includes consideration of heritage impacts, following consultation with the Council's Conservation Officer, and the heritage impact recommendations of the most recent 2016 landscape impact study. All proposed sites must

LE150 Land adjacent Newton House Cheddleton Road

also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).

- Note that none of the Mount sites falls within the Green Belt, whereas the western edge of Leek has Green Belt status. Whilst Councils can allocate within the Green Belt National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). The Council recently completed a Green Belt Review which assessed the suitability for retention of all areas of Green Belt in the District, against the five Green Belt 'purposes' set out in the NPPF. This will be used by the Council alongside other evidence in progressing its Local Plan. The NPPF also allows for consideration of development proposals that would represent 'limited infilling', or in some cases redevelopment of 'brownfield' sites in the Green Belt.
- The Council consults with SCC Education during Local Plan preparation, and SCC have indicated a need for additional first- and middle- school land provision in Leek resulting from the town's development requirements. These are laid out in the Preferred Options consultation document.
- An element of affordable housing will be required for all major housing schemes in the District, as set out in Local Plan Policies. The Council may also require an element of starter homes, and self-build plots on such sites. The Council's housing/design policies and the NPPF expect that housing schemes provide for variegation in design; and a mix of house types to meet differing socio-economic needs, including affordable housing.
- Table 4.4 of the consultation booklet explains that 35% of the site is anticipated for employment use; the remaining site area could accommodate approximately 179 dwellings, based on realistic housing density assumptions.
- The Council consults SCC Highways during every stage of Local Plan preparation; you can view their responses over proposed allocations on the Council's Site Allocations portal, including the 'Site Options Assessment' tables. In the event of development proposals upon this site, the Council would need to be satisfied that adequate and safe access to the public highway could be achieved and schemes having significant transport impacts would be assessed against relevant NPPF policy (including scope for contributions for highway improvements, where appropriate).
- Leek has both residual housing- and general employment- land requirements and the Council must demonstrate that it will fully meet these to have a sound Local Plan in place. Government Policy promotes mixed land uses, subject to proper consideration of amenity impacts. The site only encompasses curtilage to Newton House, so is not agricultural land, and already falls within the town development boundary (as does Birchall). The housing yield is based on a 29.8/ha density – a standard approach. However the yield in the consultation document is intended as a guide and future proposals must have regard to landscape (and other) evidence – the Council's 2016 landscape impact study concluded that the site is of low landscape sensitivity however the high point in the SE of the site should not be developed.

LE150 Land adjacent Newton House Cheddleton Road

© Crown copyright and database rights 2016 Ordnance Survey 100018384

Leek

LE235 Cornhill

Local Plan Process

- Site suggestion from the SHLAA
- Site included in Council's SELAA employment database on basis of its current employment allocation in 1998 Local Plan, and identification in the Council's 2008 District Employment Land Study as employment opportunity land
- Site was identified within the adopted Churnet Valley Masterplan SPD (2014) as a mixed use site within an opportunity area
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016
- Site-specific Cornhill East Masterplan (across most of site) and public consultation on draft development (July 2016).

Current Position

Site taken forward into Preferred Options Local Plan as:

- SMDC is a majority landowner of this site
- Part of a suite of employment allocations across different areas of Leek to provide choice
- Roughly corresponds to existing employment allocation from 1998 Local Plan
- The Cornhill East Masterplan report refers to how the proposed road will unlock access to the Council site and provide a new access to Leek Auctions from the roundabout on the A520, Cheddleton Road. It will form the first phase of the planned link road between Cheddleton Road and Leek Road.
- Within town development boundary
- accessible to services, facilities and open space.

Key Issues

- **Ecology** – 1.12ha of site at SW (Birchall Meadow) is a Biodiversity Alert Site. ECUS assessments 2016 concluded that Birchall Meadow continues to support diverse grassland that is likely to be of sufficient value to qualify as an SBI. It is suggested that connecting habitat should be maintained as much as possible along the southern and western boundaries of the site. A number of other actions and surveys are recommended in the case of development upon this site. Therefore Council would need to consider compensation measures against Local and National Policy were this site allocated.
- **Protected habitats** - HRA states potential increase in traffic associated with this new employment site could potentially increase air pollution near to the SPA/SAC thereby increasing nitrogen and acid deposition. These potential effects require further investigation in the HRA. LSEs relating to air quality are identified in relation to all of the allocation sites in Leek because they may increase traffic. Potential in combination effect with employment allocations in Leek and development in neighbouring areas.

Site Information

Greenfield/ brownfield	Built up area boundary/ countryside	Est. housing capacity/ density	Area (ha)	Ownership status	Site details
May be a mixture of brownfield (curtilage to Britannia House) and greenfield	Built up area	50 (based on 37.14 dwellings per ha assuming 1.346 ha Masterplan residential area).	3.13ha – Cornhill East Masterplan covers 2.176ha of this (comprised 0.83ha employment) Masterplan illustrates 3825m ² employment.	2xowners: SMDC (majority of site) and 1x other private owner. Both are supportive of Masterplan proposals.	<ul style="list-style-type: none"> • Proposed development of small business units and business hub. • the proposed road would unlock access to the Council site and provide a new access to Leek. • 1.12ha BAS to SW of site. Ecus conclude this could qualify as an SBI. Therefore Council would need to consider compensation measures against Local and National Policy were this site allocated.

Leek

LE235 Cornhill

Studies

Extended Phase 1 Habitat Survey and Local Wildlife Assessment (ECUS, 2016)

Ecus Ltd conducted Phase 1 ecological survey of the site (incorporating Local Wildlife Assessment) in 2016. It concluded that Britannia House and landscaped habitat to the east of the site is not rich in native species and is habitat widespread throughout the country. It is therefore considered of importance for nature conservation at the site level only. The parcel of land in between Britannia House and Sandon Street is habitat which is not rich in native species and is widespread throughout the country. It is therefore considered of importance for nature conservation at the site level only. The small parcel of land adjacent to the south-east corner of the cattle market is habitat not rich in native species and is widespread throughout the country. It is therefore considered of importance for nature conservation at the site level only. All other habitats remain as described in the Ecological Appraisal report produced by Amey, October 2015. Birchall Meadow continues to support diverse grassland that is likely to be of sufficient value to qualify as an SBI.

The main areas of ecological interest are Birchall meadow and the immediately adjoining scrub / rank grassland, the railway corridor and the watercourse running along the southern boundary of the site. These areas provide the best habitat for bats, birds, badgers and, potentially, reptiles, as well as other flora and fauna. As much site habitat will be lost under the current development proposals, it is suggested that connecting habitat should be maintained as much as possible along the southern and western boundaries of the site. A number of other actions and surveys are recommended in the case of development upon this site.

Landscape & Settlement Character Assessment (2008)

Site does not form part of important landscape setting to Leek.

Landscape, Local Green Space & Heritage Impact Study (August 2016)

Landscape Results

Site comprises land to the west of existing offices south of Leek on Cheddleton Road, which includes paddocks, some tree planting and a small farmstead adjacent to the northern boundary. The site is bound by a dismantled railway to the west, beyond which Barnfields Industrial Estate is located. The site rises up to Sandon Street to the north, and is bound by Birchall Playing Fields to the south. The site is partially screened by surrounding vegetation, development, and changes in topography. The site fits well within the existing settlement pattern as it does not extend south of the existing adjacent development. Existing development to the north of the site does not contribute to a welldefined settlement edge, and development of the site could strengthen the settlement edge. Planting on the southern boundary could create a vegetated edge and reduce visual prominence. **Site is of low landscape sensitivity.**

Heritage Results

There are six Grade II Listed Buildings and one Conservation Area within the 400m buffer. Development would be highly unlikely to adversely affect the settings of the heritage assets due to intervening buildings and vegetation. The site is within HUCA 14 which, with appropriate development, would be highly unlikely to be adversely affected by development (Leek Extensive Urban Survey report 2011). **Site suitable for development in heritage terms.**

Green Belt Review (November 2015)

Not applicable.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the proposed delivery of circa 244 dwellings is considered to have a significant positive effect. The site's accessibility to services, facilities and open space is likely to have a positive effect. However, the site is located within a flood zone which is likely to have a significant negative effect, as could its proximity to designated and historic assets.

Initial HRA Screening

New housing development in Leek could potentially increase recreational pressure and air pollution from increased road traffic which could have an effect on the Peak District Moors (South Pennine Moors

Leek

LE235 Cornhill

Phase 1) SPA and South Pennine Moors SAC and this requires further investigation in the HRA. The screening has also identified that new employment sites could also increase traffic and air pollution near to the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC and this also requires further investigation in the HRA. The closest part of the SAC/SPA (Leek Moss SSSI) is approx. 4km from the western edge of Leek.

Potential increase in traffic associated with this new employment site could potentially increase air pollution near to the SPA/SAC thereby increasing nitrogen and acid deposition. These potential effects require further investigation in the HRA.

Updated HRA Screening of Preferred Options Sites June 2017

The purpose of screening is to identify whether the elements of a plan (i.e. policies, site allocations) could result in Likely Significant Effects (LSE) on European sites.

Further investigation has been undertaken in relation to potential urban effects resulting from these allocation sites. Urban effects on European sites typically have an adverse effect on sites within 500m of residential areas (primarily due to cat predation and fire risk due to arson etc). Other urban effects (primarily dog walking from the site to the SPA/SAC) can have an adverse effect on European sites up to 1.6km from residential areas. All allocated sites identified as preferred options are further than 1.6km from the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC.

LSEs relating to urban effects are identified resulting from the following allocation sites:

- Allocated sites on the eastern edge of Leek (LE066, LE140, LE128a, LE142 a and b) located between 3.8km and 4.2km from the Peak District SPA and the South Pennine Moors SAC.

LSEs relating to air quality are identified in relation to all of the allocation sites in Leek because they may increase traffic. Potential in combination effect with employment allocations in Leek and development in neighbouring areas.

Options Consultation July 2015

Not consulted on as an option in 2015, because identified as an opportunity site in the adopted Churnet Valley Masterplan .

Council response –

- County Education advise that there are capacity issues affecting Leek First-, Middle- and High Schools; and given the scale of housing proposed across this catchment, new capacity will be required within Leek. The District Council will work with the County Council to identify an appropriate solution.
- This is a new suggested site. The site is well related to the settlement. Considered site could be suitable for mixed housing and employment use.
- SCC highway comments awaited.

Preferred Options Consultation April 2016

Natural England - Natural England notes the proposed preferred site for allocation in Leek. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.

Council response: The Council is currently progressing a Green Infrastructure Strategy for the District (as per Green Infrastructure Policy C3) which seeks to provide strategic linkages for such areas, and enhance public access to them. Further, the Council's open space policy sets out protection for existing public open spaces, as per NPPF policy. The Council liaises with Sport England and SCC when it considers what open space contributions development proposals should be required to make.

Leek

LE235 Cornhill

SCC Highways - Site LE235 has no obvious access route that can be determined from the plan. This should not be through the existing residential streets.

SCC Transportation - Access arrangements yet to be finalised, and should not ideally be considered via residential area, consideration of link road between A520 and A53 although this may not be found essential. Connectivity for pedestrians and cyclists into the town centre should be considered. Consideration of access from A520 via existing roundabout. Public Transport comments: Service 16 between Hanley, Cheddleton and Leek operates every 30 minutes along the A520 Cheddleton Road. Service 116 also provides 3 additional journeys per day between Leek and Cheddleton. Otherwise, service 18 operates along the A53 Newcastle Road every 20 minutes between Leek and Hanley, along with other less frequent services such as 109, 165/166, 93 and X15.

Council response: Comments noted. The above will be reflected in a site-specific policy, including any requirement to submit a TA.

SCC - LE235 includes a Biodiversity Alert Site supporting a habitat of principal importance. Off-site mitigation of loss of this habitat would be required to meet NPPF biodiversity policy guidance.

Council response:

The Council's NE1 Policy (Biodiversity and Geological Resources) sets out the circumstances when mitigatory or compensatory measures would be required for development proposals affecting regional/local designated sites. The Council commissioned ecological consultants in 2016 to carry out a detailed phase I ecological survey for the Cornhill site, including the western BAS. It also considers the scope for LWS designation across the site. It concluded that connecting habitat should be maintained as much as possible along the southern and western boundaries of the site; and made recommendations for further actions/survey work in the event of future development.

Subsequent development proposals on this site will therefore have to conform to the site-specific policy, policy NE1, Cornhill masterplan, and ecological report for the site.

Environmental Health: Some constraints on residential development: Possible industrial noise sources from the adjacent barnfields / cattle market / playing fields. Possible contamination from adjacent barnfields/ landfill site, would require investigation but unlikely to be a significant constraint.

Council response: Comments noted. Any site-specific policy will address these issues.

SCC Lead Local Flood Risk Officer: Watercourse at south of site, would need assessment & hydraulic modelling to ensure site is safe. FRA required.

Council response: Comments noted. Any site-specific policy will address these issues including requirement to submit a FRA.

Coal Authority: Welcome the fact that the site assessment documents covering the site options does identify ground instability arising from mining legacy and as such The Coal Authority supports the broad approach taken to site selection. We have no views on the actual sites chosen as this is a matter for local determination following consideration of all relevant factors.

Latest Coal Authority data 27/04/2016. Site does not fall within any coal risk area.

Council response: Sites affected by mining legacy to have a policy criterion to clarify that developers should recognise mining legacy problems and demonstrate how they can be positively addressed by new development. Policy also to clarify that no development should take place over mine entries even when treated.

Public response-

Issues raised:

- Better all employment natural extension to Leek Brook and Barnfield areas.

Council response:

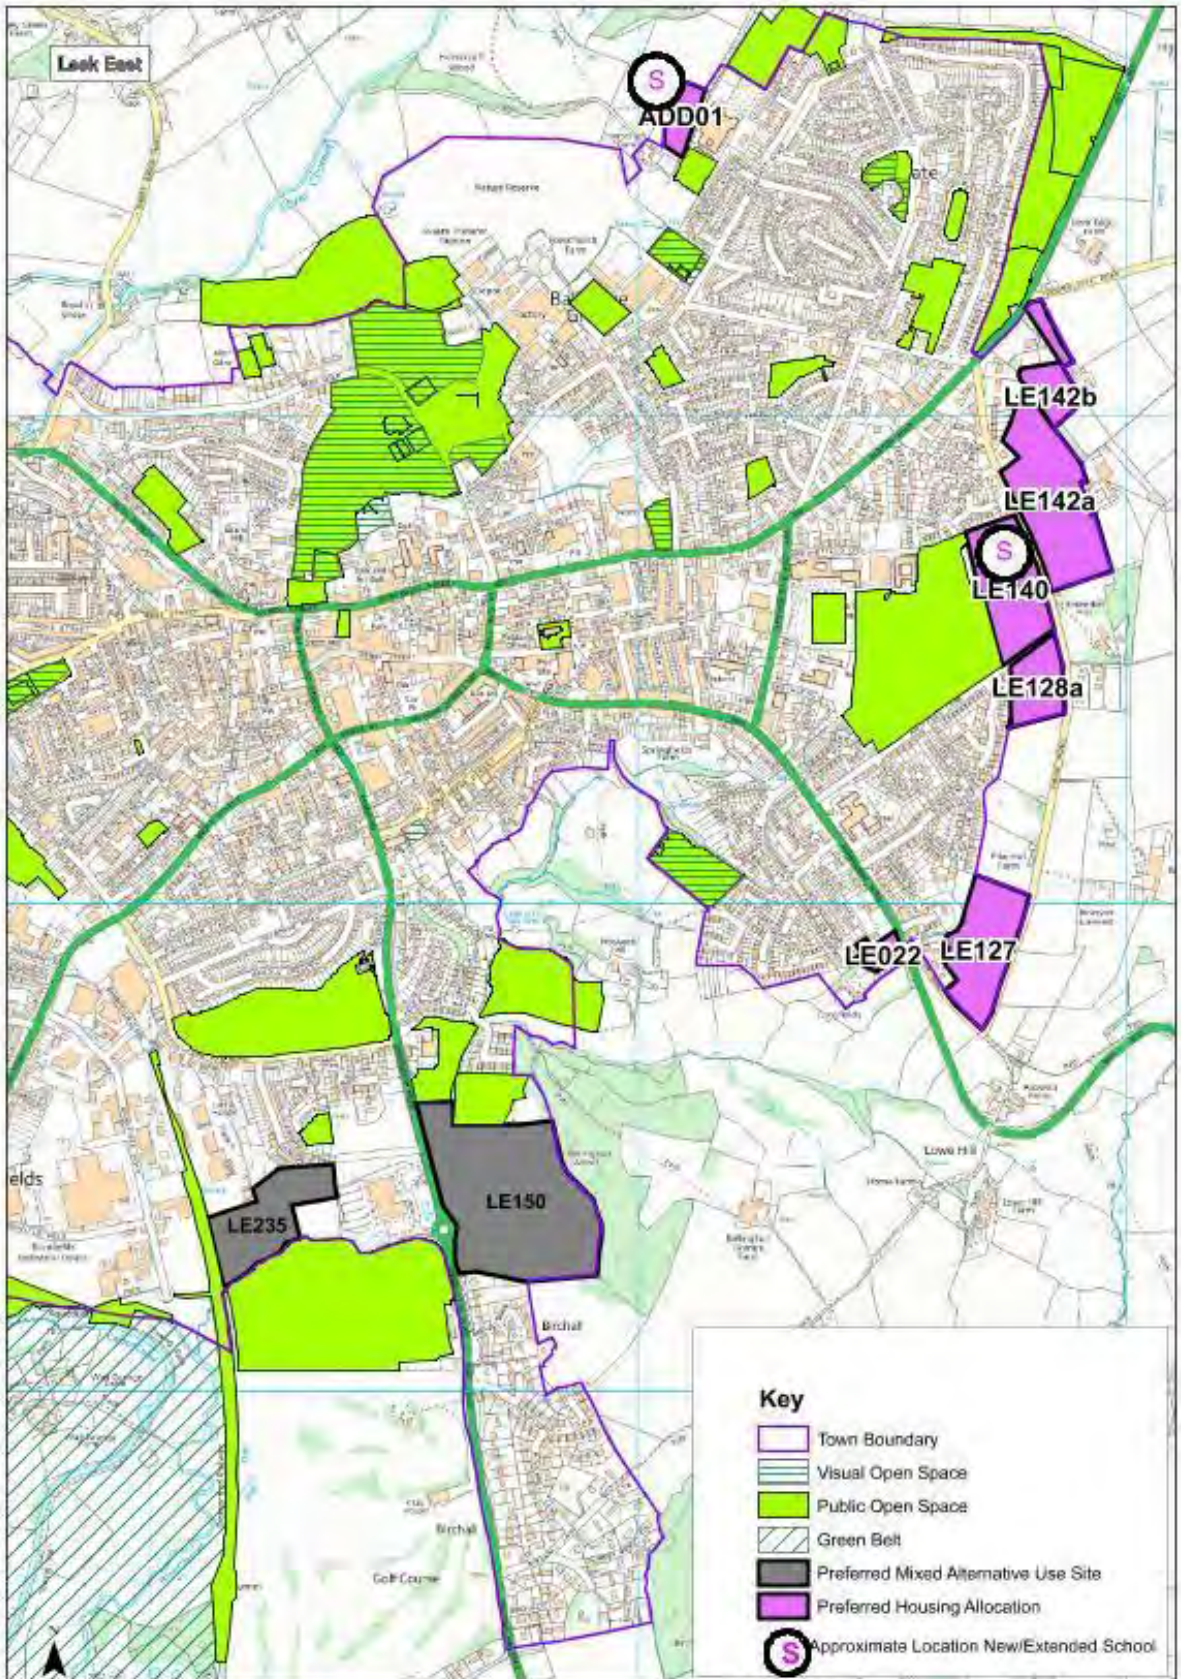

- Leek has a residual general employment land requirement (of around 8ha to 2031) and the Council must demonstrate that it will fully meet this to have a sound Local Plan in place. Whilst

Leek

LE235 Cornhill

the Council is proposing an allocation at Leekbrook (Leek EM2) it is considered more appropriate to 'spread' provision for the town across the Leek wards (along good road links) to better serve the market. Also LE150 would benefit from proximity to the proposed southern link road at Cornhill.

LE235 Cornhill

© Crown copyright and database rights 2016 Ordnance Survey 100018384

LE249 Staffordshire County Council Depot

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016
- Not taken forward to Preferred Options Local Plan.

Current Position

Site **not** taken forward into Preferred Options Local Plan as:

- Flood risk concerns (see below)
- Contamination concerns (see below)
- Site lies in town development boundary so any schemes arising would be assessed against Development Plan policies

Key Issues

- **Flood risk** – site immediately south of functional floodplain (and E.A. ‘Flood Alert Area’ in SFRA); contains a subterranean culverted watercourse (see E.A. comments below); and is identified as a location which has experienced historical ‘overtopping’/surface water flooding according to SFRA.
- **Contamination:** SMDC EH advise may be some constraints on residential development: Contamination from industrial use (haulage depot)
- **Ecology** – Adjacent to Ladderedge Country Park Local Nature Reserve. Further survey work recommended in order to establish SBI/BAS status.
- Parts of site form important landscape setting to Leek.
- **Protected habitats** - HRA states new housing/employment development in Leek could potentially increase recreational pressure and air pollution from increased road traffic which could have an effect on SPAs and SACs and this requires further investigation in the HRA. LSEs relating to air quality are identified in relation to all of the allocation sites in Leek because they may increase traffic. Potential in combination effect with employment allocations in Leek and development in neighbouring areas.
- Currently used as SCC haulage depot
- Inaccessible to services and facilities

Site Information

Greenfield/ brownfield	Built up area boundary /countryside	Est. housing capacity /density	Area (ha)	Ownership status	Site details
Brownfield	Built up area	35 (based on 32.11 dwellings/ha)	1.09	Understood SCC are still promoting this site for residential use	<ul style="list-style-type: none"> • Public right of way runs along perimeter • Currently used as SCC haulage depot • Understood SCC are still promoting this site for residential use

Studies

Extended Phase 1 Habitat Survey 2015 (FID 43)

Conclusion

The site has very low biodiversity value overall, however as the site is adjacent to Ladderedge Country Park the site’s edge habitats and hence the site as a whole are considered to have district ecological importance. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- Reptile survey and removal of potential refugia under a watching brief.
- Vegetation removal at an appropriate time of year

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at local level only. However, more information is required requiring the presence/absence of reptiles.

Leek

LE249 Staffordshire County Council Depot

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

Reptile survey required.

Landscape & Settlement Character Assessment (2008)

Southern and western parts of site form important landscape setting to Leek.

Landscape, Local Green Space & Heritage Impact Study (August 2016)

Landscape Results

Site comprises the council depot on the south-western edge of Leek, west of the A53 (Ladderedge). The site is previously developed with low visual prominence due to the hedgerows and tree belts which enclose the site. Redevelopment of the site could improve local landscape character. Consideration should be given to planting and landscaping on the eastern boundaries in order to limit effects on views from Ladderedge Country Park. ***Site is of low landscape sensitivity.***

Heritage Results

There is one Grade II Listed Building within the 400m buffer. Setting is not considered to extensively contribute to the significance of the asset. Development would be highly unlikely to adversely affect the setting of the asset. Development would be highly unlikely to adversely affect the HLC zone LLHECZ 4 (Historic Environment Character Assessment 2010). ***Site suitable for development in heritage terms.***

Green Belt Review (November 2015)

Not applicable.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 35 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment. However, the site is within flood zone 3 which is likely to have a significant negative effect, as could its proximity to historic assets. Similarly, the proximity a Local Nature Reserve is assessed as being negative effects, as could the inaccessibility of services and facilities.

Initial HRA Screening

New housing development in Leek could potentially increase recreational pressure and air pollution from increased road traffic which could have an effect on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC and this requires further investigation in the HRA. The screening has also identified that new employment sites could also increase traffic and air pollution near to the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC and this also requires further investigation in the HRA. The closest part of the SAC/SPA (Leek Moss SSSI) is approx. 4km from the western edge of Leek.

Updated HRA Screening of Preferred Options Sites June 2017

The purpose of screening is to identify whether the elements of a plan (i.e. policies, site allocations) could result in Likely Significant Effects (LSE) on European sites.

Further investigation has been undertaken in relation to potential urban effects resulting from these allocation sites. Urban effects on European sites typically have an adverse effect on sites within 500m of residential areas (primarily due to cat predation and fire risk due to arson etc). Other urban effects (primarily dog walking from the site to the SPA/SAC) can have an adverse effect on European sites up to 1.6km from residential areas. All allocated sites identified as preferred options are further than 1.6km from the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC.

LSEs relating to urban effects are identified resulting from the following allocation sites:

- Allocated sites on the eastern edge of Leek (LE066, LE140, LE128a, LE142 a and b) located between 3.8km and 4.2km from the Peak District SPA and the South Pennine Moors SAC.

LSEs relating to air quality are identified in relation to all of the allocation sites in Leek because they may increase traffic. Potential in combination effect with employment allocations in Leek and development in neighbouring areas.

LE249 Staffordshire County Council Depot

Options Consultation July 2015

Statutory bodies/stakeholders

SCC Highways: Acceptable subject to access design.

Environment Agency – The site has a culverted watercourse flowing beneath it which should be renaturalised through redevelopment to contribute towards WFD objectives. This may take up space within the site, however it may be possible to divert the channel round the edge to create more developable space.

Public response No comments

Council response – Comments noted

Preferred Options Consultation April 2016

Environmental Health: Some constraints on residential development: Contamination from industrial use (haulage depot)

Council response – Comments noted. Site not taken forward to Preferred Options Local Plan. In general if the Council has reason to believe contamination could be an issue, developers will be required to provide proportionate but sufficient site investigation/ information (a risk assessment) with a planning application, to determine the existence or otherwise of contamination, its nature and extent, and the risks it may pose and to whom/what (the 'receptors') so that these risks can be assessed and satisfactorily reduced to an acceptable level. The Council would assess schemes on sites affected by contamination in line with its adopted Policy SD4 and NPPF paras 120-121 NPPF. The responsibility of funding remediation rests with the developer.

Natural England - Natural England notes the proposed preferred site for allocation in Leek. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.

Council response - The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy. Site not taken forward to Preferred Options Local Plan.

SCC Lead Local Flood Risk Officer: Culverted ordinary watercourse and floodplain through site. May need modelling, certainly survey of culvert. Please get developer to contact us as soon as possible. FRA required.

Council response - Site not taken forward to Preferred Options Local Plan. In the event of an application the Council would apply advice in paras 99-104 NPPF and consult with both SCC LLFA and EA, as appropriate.

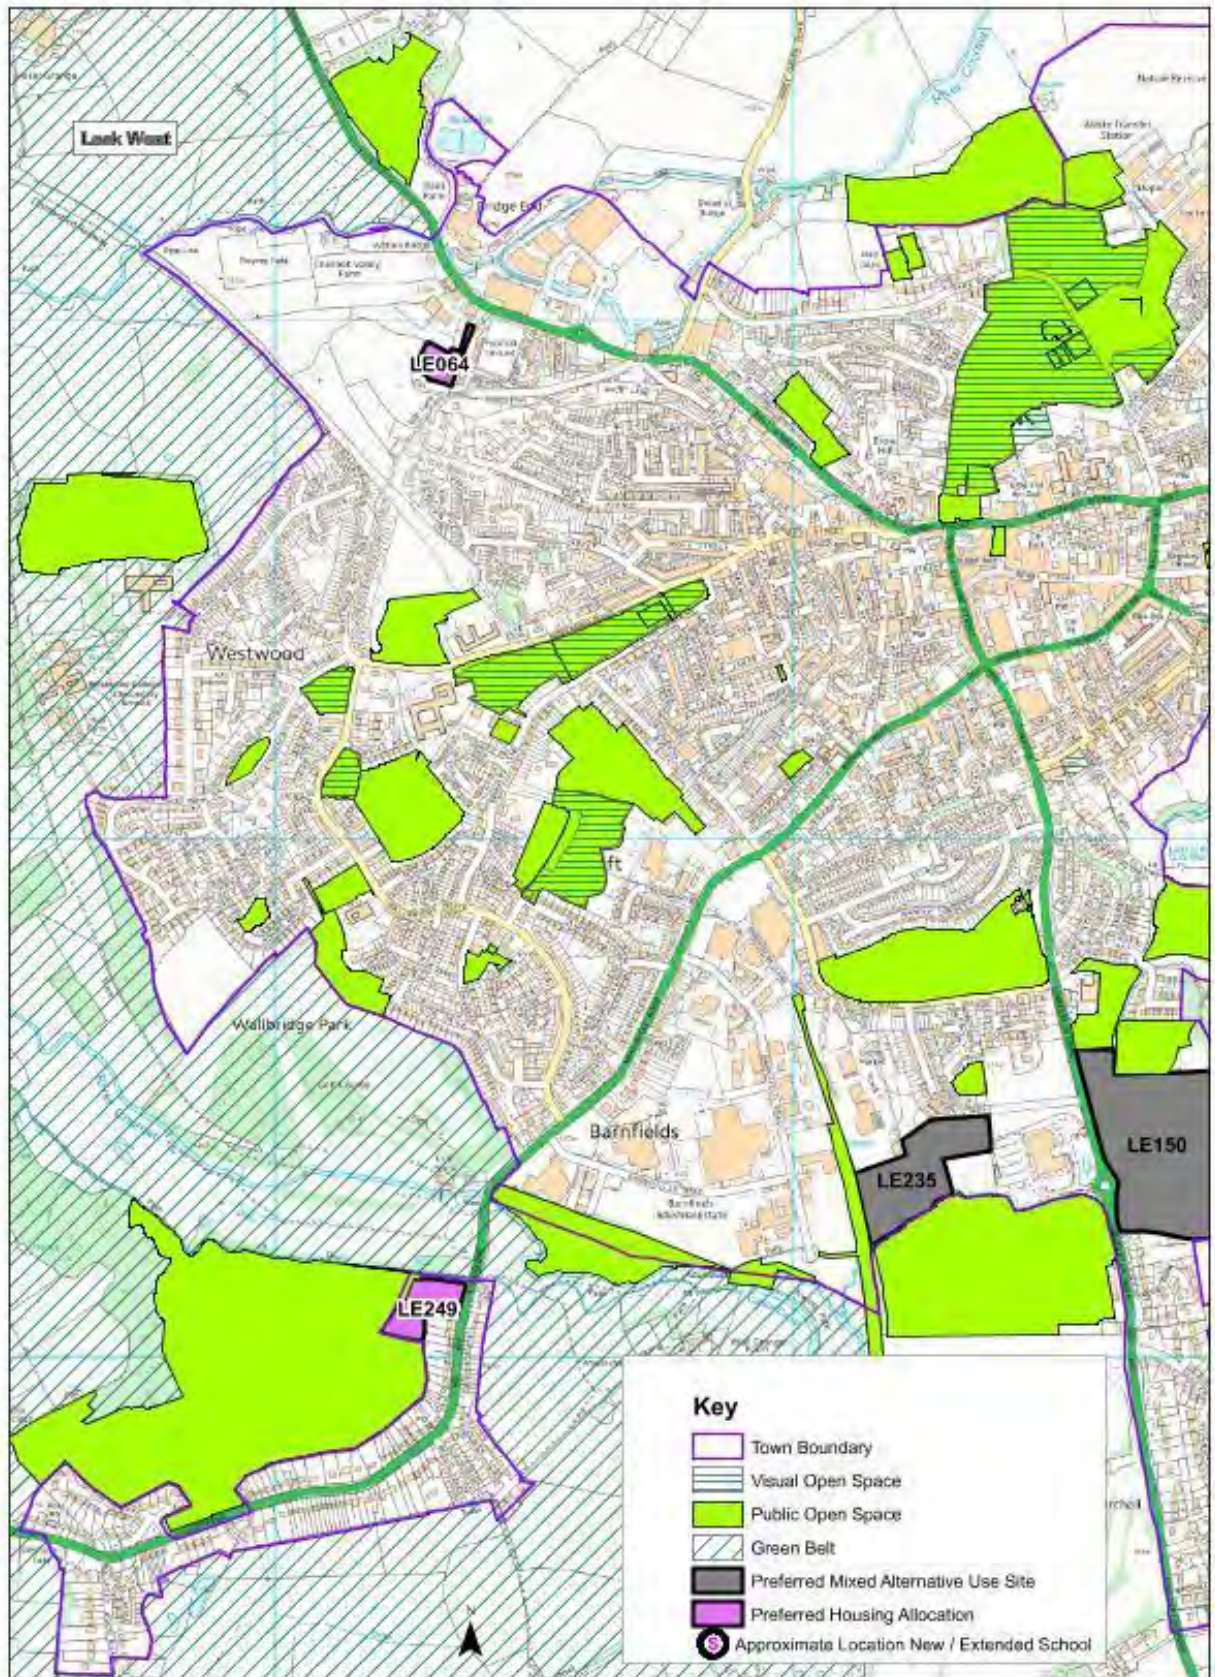

Coal Authority: Welcome the fact that the site assessment documents covering the site options does identify ground instability arising from mining legacy and as such The Coal Authority supports the broad approach taken to site selection. We have no views on the actual sites chosen as this is a matter for local determination following consideration of all relevant factors.

Latest Coal Authority data 27/04/2016. Site does not fall within any coal risk area.

Council response – Sites affected by mining legacy to have a policy criterion to clarify that developers should recognise mining legacy problems and demonstrate how they can be positively addressed by new development. Policy also to clarify that no development should take place over mine entries even when treated.

No public comments received.

Leek EM2 – Land east of Brooklands Way Leekbrook

Local Plan Process

- Site included in Council's SELAA employment database on basis of a 2006 outline industrial consent; and its identification in the Council's 2008 District Employment Land Study as employment opportunity land
- Included in the site options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken forward into Preferred Options Local Plan as:

- Resolution to approve outline planning application SMD/2014/0678 in August 2016 (awaiting legal agreement) for the erection of B2 and B8 units
- Abuts long established industrial area
- Part of a suite of employment allocations across different areas of Leek to provide choice
- Existing perimeter screening

Key Issues

- **Heritage** – listed building within 60m to south
- **Ecology**- Vast majority of site currently part of wider SBI designation however both ecological surveys concluded site had low biodiversity value. Development of site would need to include ecological mitigation measures. Site has resolution to approve above planning application following demonstration of appropriate mitigation measures.
- Large undulating greenfield site in open countryside
- site relatively inaccessible to services and facilities
- **Flood Risk** - northern strip of site along brook is Floodzone 2/ FZ3
- **Protected habitats** - HRA states potential increase in traffic associated with this new employment site could potentially increase air pollution near to the SPA/SAC - require further investigation in the HRA.

Site Information

Greenfield /brownfield	Built up area boundary/ countryside	Est. housing capacity	Area (ha)	Ownership status	Site details
Greenfield	Countryside (abuts Leekbrook boundary)	NIL (employment consent/ proposed allocation)	5.42 (Consent illustrates 9x units at 5000-1000m ² each)	Vast majority of site owned by applicant apart from western access (3 x owners listed on planning application)	<ul style="list-style-type: none"> • Vast majority of site is a designated SBI (Twinney Wood and Grassland) • Includes woodland and group TPOs • Undulating topography • Proximity to listed Fynney lane Farm • Public rights of way along perimeters • northern strip of site along brook is Floodzone 2/FZ3

Studies

Extended Phase 1 Habitat Survey 2015 (FID 208)

Conclusion

The site at the time of survey appeared to have mostly low biodiversity value overall in terms of the marshy grassland area, however given the precautionary principle to ecological protection, and given the sub-optimal time of year the survey was carried out, it is recommended that another full floral survey is conducted at an appropriate time of year. The site also has some broadleaved woodland, scrub and riparian vegetation within its boundary, and is adjacent to an important mosaic of semi-natural broadleaved woodland, scrub, a stream and grasslands.

Leek EM2 – Land east of Brooklands Way Leekbrook

Given that the SBI covers the majority of the site, and owing to the ecological importance of a third tier site designated for its ecological assemblage, it is recommended that any future development of this site is considered in line with paras 7, 9, 17, 109, 114 and 117 NPPF; and also in relation to the Council's own Core Strategy Policy NE1.

The following surveys/actions are therefore recommended if development works are to be carried out.

- Floral survey at an appropriate time of year, preferably between mid-June to July
- Badger survey
- Reptile survey
- Vegetation removal at the appropriate time of year.

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance.

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- Further survey of the 2 trees identified as potential bat roosts
- Further badger surveys
- Reptile survey.

Landscape & Settlement Character Assessment (2008)

Forms part of important landscape setting to Leek.

Landscape, Local Green Space & Heritage Impact Study (August 2016)

Landscape Results

The site comprises grassland, adjacent to a stream on the northern boundary, which gradually slopes up to woodland on the southern boundary. The site is large and open however it is enclosed by woodland and located at the bottom of a valley, and so has low visual prominence. The character of the site is affected by the adjacent industrial development, which is visually prominent from within the site. The site forms part of an SBI (which also includes the woodland to the south) and this must be considered; ecology surveys will be required to determine the value of the site for biodiversity. However, in landscape terms, the site is a logical extension to the existing industrial development, and the woodland which encloses the site will limit development and thus prevent encroachment on the surrounding countryside. ***Site is of low landscape sensitivity. However, the value of the site for biodiversity should be determined prior to allocation.***

Heritage Results

There is one Grade II* Listed Building within the 400m buffer. The site lies in a valley with an existing industrial estate adjacent to the west. Due to the topography of the surrounding landscape and the dense screening of vegetation, there was no intervisibility between the site and the asset. Despite this, the site is part of the setting of the asset. The setting contributes to the significance of the heritage asset and it would be likely that development of the site would adversely affect its setting. Affects may be reduced if development was kept in the western half of the site only so as to not infringe on the setting of the asset. The site is within the HLC type of small irregular fields. This type is post-medieval in date and not sensitive to change. ***Site suitable for development in heritage terms, subject to suitable masterplanning; if development is limited to the western half of the site and an appropriate mitigation strategy is put in place.***

Green Belt Review (November 2015)

Not applicable.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. The site's accessibility to open space is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities and the site is located within a flood zone which is likely

Leek

Leek EM2 – Land east of Brooklands Way Leekbrook

to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as being a negative effect, as could the site's proximity to historic assets and a partial SBI designation.

Initial HRA Screening

Potential increase in traffic associated with this new employment site could potentially increase air pollution near to the SPA/SAC thereby increasing nitrogen and acid deposition. These potential effects require further investigation in the HRA.

Updated HRA Screening of Preferred Options Sites June 2017

The purpose of screening is to identify whether the elements of a plan (i.e. policies, site allocations) could result in Likely Significant Effects (LSE) on European sites.

Further investigation has been undertaken in relation to potential urban effects resulting from these allocation sites. Urban effects on European sites typically have an adverse effect on sites within 500m of residential areas (primarily due to cat predation and fire risk due to arson etc). Other urban effects (primarily dog walking from the site to the SPA/SAC) can have an adverse effect on European sites up to 1.6km from residential areas. All allocated sites identified as preferred options are further than 1.6km from the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC.

LSEs relating to urban effects are identified resulting from the following allocation sites:

- Allocated sites on the eastern edge of Leek (LE066, LE140, LE128a, LE142 a and b) located between 3.8km and 4.2km from the Peak District SPA and the South Pennine Moors SAC.

LSEs relating to air quality are identified in relation to all of the allocation sites in Leek because they may increase traffic. Potential in combination effect with employment allocations in Leek and development in neighbouring areas.

Options Consultation July 2015

Environment Agency – Site is likely to be affected to some degree by flood risk and if taken forward will require the support of the Sequential Test and a Level 2 SFRA.

Natural England – Proposed allocation Leek EM2 (Employment) coincides entirely with the local wildlife site Twinney Wood and Grassland. Recommend Council address local plan and NPPF policies to see if the site goes forward to the next stage. DC1, 110, 113, 117 and 118 NPPF.

SCC Highways: Subject to satisfactory design.

Public response

2 comments - 2 objections

Issues raised:

- Infrastructure - Traffic / Transport
- Landscape
- Nature Conservation- DEFRA environmentally sensitive area
- Amenity (e.g. noise, privacy, loss of light)
- Scale of development- destabilise existing property
- Listed Building / Conservation Area- impact on grade II* listed Fynneylane Farm
- Other- as evidence shows a reduction in demand for B2 units and as permission was granted over 10 years ago the situation should be reassessed.

Council response –

- Any planning application would have to satisfactorily address any access issues raised by SCC Highways Officer and SMDC Environmental Health Officer regarding amenity/noise.
- The Council has a Landscape & Settlement Setting Study and this site is identified as being important landscape setting to the settlement. The impact on the National Park requires consideration and also Habitat Regulations Assessment of this site would be required if it is taken forward to test impact on European protected habitats.

Leek

Leek EM2 – Land east of Brooklands Way Leekbrook

- The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. The Study recommends that any future development of this site is considered in line with relevant NPPF and Core Strategy Policies. A number of precautionary surveys/actions are also recommended in the case of development.
- The Council holds recent evidence which demonstrates that there is need for additional employment land across the District (including B2 uses). The Spatial Strategy of the Core Strategy breaks down this requirement into sub-requirements, including a requirement for the Leek Wards. Leek EM2 is proposed under the Core Strategy Spatial Policy for Leek as a 'Broad Location for Employment' to contribute to meeting this need. Consequently this has been taken forward into the Site Allocations process.
- Due to the proximity to the Grade II* listed building a Heritage Impact Assessment will be undertaken during the plan production process if the site is taken forward.

Preferred Options Consultation April 2016

SCC Transportation - Access via Brooklands Way may not be achievable and access from A520 should be considered. A520/Basford Lane will require assessment as well as Basford Lane/Brooklands Way. Sustainable transport links may require improvement. Public Transport comments: Service 16 between Hanley, Cheddleton and Leek operates every 30 minutes along the A520 Cheddleton Road. Service 116 also provides 3 additional journeys per day between Leek and Cheddleton.

Council response – Comments noted. The above will be reflected in any site-specific policy, including any requirement to submit a TA.

Heritage England - It is not clear how the impact of the proposed LEEK EM2 site on the Grade II* Listed Building Fynneylane Farm and its setting has been assessed. Further information on this is required.

Council response – The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes a 2016 landscape and heritage impact study. This concluded that development of this site would not affect the setting of the listed building, and development of the site would be suitable in heritage terms. Note that heritage evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.

Natural England - Our previous advice letter dated 14.9.15 refers regarding preferred site allocation EM2. However please refer to our generic representation on local wildlife Sites and related information. We also note that the allocation would overlay a public footpath and refer the Council to our previous advice regarding NPPF para 75 dealing with public rights of way and access. Given the site's close proximity to lowland deciduous woodland the local plan process should seek to ensure that the provisions of policies NE1 Biodiversity and Geological Resources and C3 Green Infrastructure are implemented.

Council response – The site was subject to a Phase I ecological survey in 2014. The site report acknowledges the site's SBI status (and surrounding features etc); and factors this status into subsequent evaluation/conclusions, recommending the site be considered regionally important, and recommending a number of further surveys/actions would be appropriate prior to development. The Council would ensure development proposals respect the routes of public rights of way; stating this in site allocations policies, where relevant. Note that Policies NE1 and C3 already seek to enhance public access to the countryside (subject to landowner agreement, where relevant).

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, a number of further surveys are recommended to establish SBI/BAS status.

Note site Leek EM2 was granted outline industrial consent in 2016.

Environment Agency - Contrary to our previous advice, a Level 2 SFRA will not be required for Leekbrook EM2. This is due to the size of the site and the fact that any floodplain is unlikely to impact on its deliverability. The watercourse running along the majority of the northern edge will still need to be modelled in detail at the application stage and the site is still subject to the Sequential Test.

Leek

Leek EM2 – Land east of Brooklands Way Leekbrook

Council response – Comments noted. Note site Leek EM2 was granted outline industrial consent in 2016.

Staffordshire County Council - Leek EM2 is mainly within a Site of Biological Importance. This SBI supports several habitats of principal importance. The site has added value due to the diversity of habitats. In regard of NPPF biodiversity policy this site should not be included as a preferred option. If this site is taken forward the Local Plan should include policy requirement for off-site mitigation meeting Defra biodiversity offsetting requirements with replacement habitats demonstrating similar ecological connectivity.

Council response – The site was subject to a Phase I ecological survey in 2014. The site report acknowledges the site's SBI status (and surrounding features etc); and factors this status into subsequent evaluation/conclusions, recommending the site be considered regionally important, and recommending a number of further surveys/actions would be appropriate prior to development.

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, a number of further surveys are recommended to establish SBI/BAS status.

Note that ecological evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.

Note site Leek EM2 was granted outline industrial consent in 2016. Full proposals would be assessed against the findings of this study, and relevant Local Plan and NPPF policy.

Environmental health: No significant Issues; loss of greenfield land ; possible noise impacts on Fynneylane Farm

Council response – Comments noted.

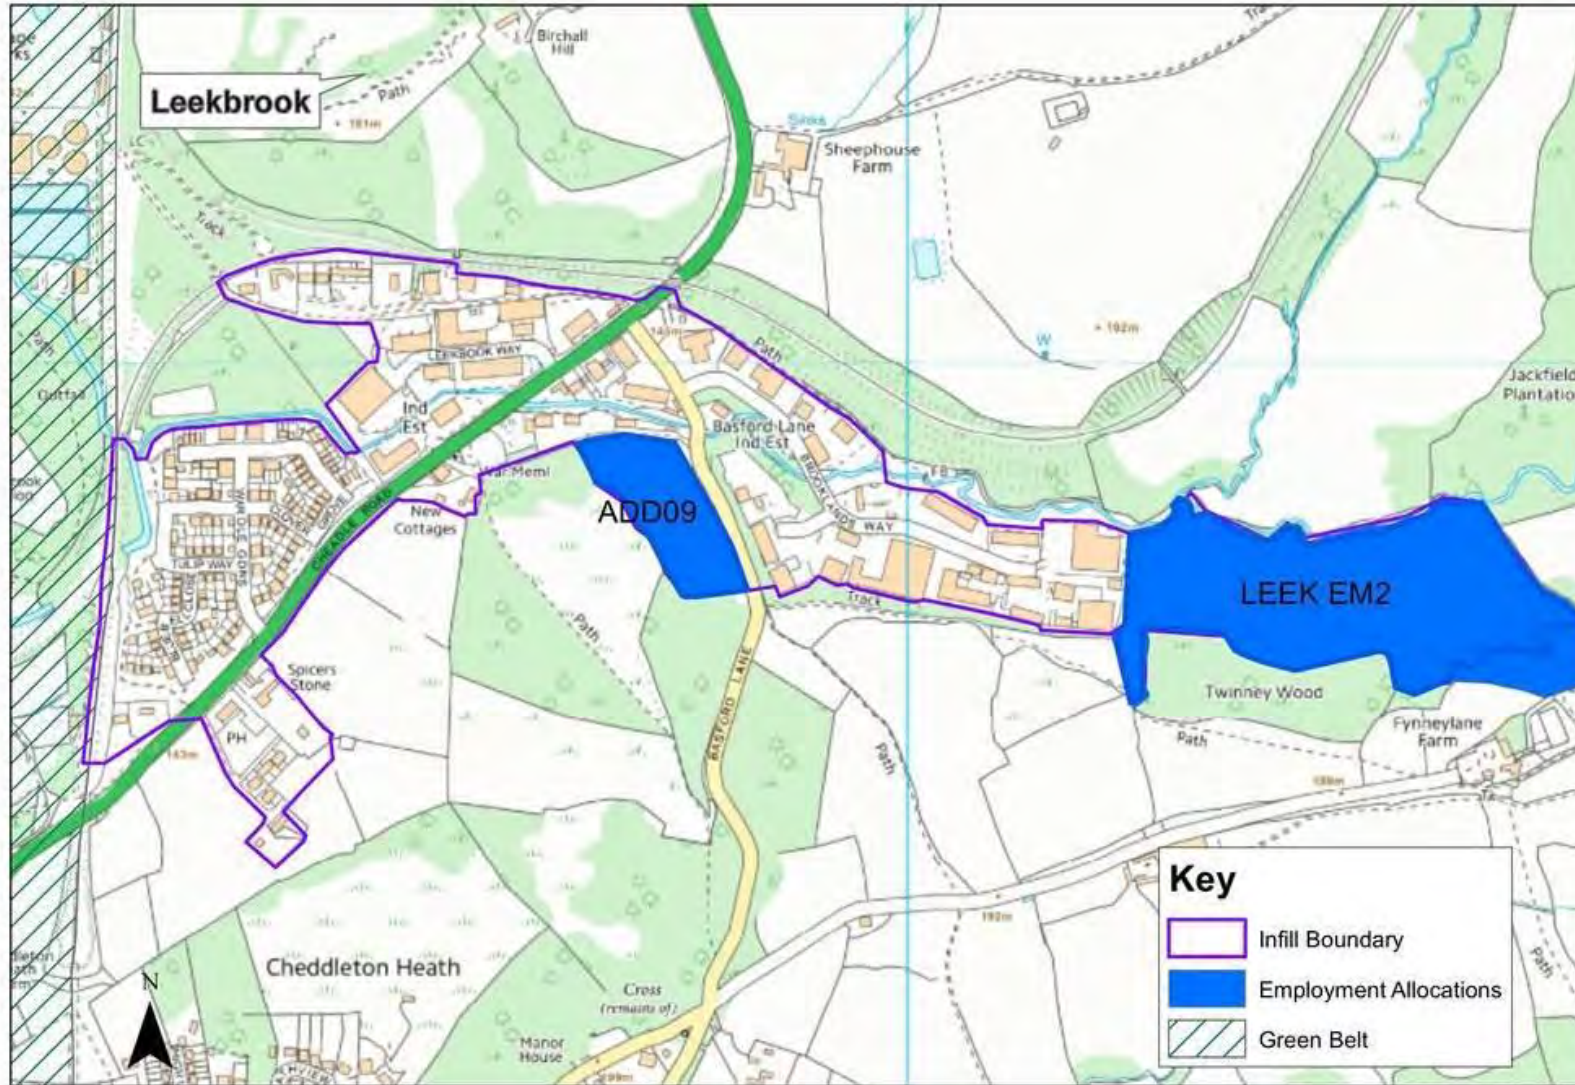

SCC Lead local Flood Risk Officer: Employment. Main river floodplain. Consult EA. Surface water floodplain. Consult SCC as early as possible. Known problems downstream. FRA required.

Council response – Comments noted. Note that application SMD/2014/0678 included an NPPF-compliant site-specific FRA. Any site-specific policy for this site will reference the above, including the requirement to submit an FRA.

Coal Authority: Welcome the fact that the site assessment documents covering the site options does identify ground instability arising from mining legacy and as such The Coal Authority supports the broad approach taken to site selection. We have no views on the actual sites chosen as this is a matter for local determination following consideration of all relevant factors.

Latest Coal Authority data 27/04/2016. Site does not fall within any coal risk area.

Council response – Sites affected by mining legacy to have a policy criterion to clarify that developers should recognise mining legacy problems and demonstrate how they can be positively addressed by new development. Policy also to clarify that no development should take place over mine entries even when treated.

Leek

Leek EM2 – Land east of Brooklands Way Leekbrook

to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as being a negative effect, as could the site's proximity to historic assets and a partial SBI designation.

Initial HRA Screening

Potential increase in traffic associated with this new employment site could potentially increase air pollution near to the SPA/SAC thereby increasing nitrogen and acid deposition. These potential effects require further investigation in the HRA.

Updated HRA Screening of Preferred Options Sites June 2017

The purpose of screening is to identify whether the elements of a plan (i.e. policies, site allocations) could result in Likely Significant Effects (LSE) on European sites.

Further investigation has been undertaken in relation to potential urban effects resulting from these allocation sites. Urban effects on European sites typically have an adverse effect on sites within 500m of residential areas (primarily due to cat predation and fire risk due to arson etc). Other urban effects (primarily dog walking from the site to the SPA/SAC) can have an adverse effect on European sites up to 1.6km from residential areas. All allocated sites identified as preferred options are further than 1.6km from the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC.

LSEs relating to urban effects are identified resulting from the following allocation sites:

- Allocated sites on the eastern edge of Leek (LE066, LE140, LE128a, LE142 a and b) located between 3.8km and 4.2km from the Peak District SPA and the South Pennine Moors SAC.

LSEs relating to air quality are identified in relation to all of the allocation sites in Leek because they may increase traffic. Potential in combination effect with employment allocations in Leek and development in neighbouring areas.

Options Consultation July 2015

Environment Agency – Site is likely to be affected to some degree by flood risk and if taken forward will require the support of the Sequential Test and a Level 2 SFRA.

Natural England – Proposed allocation Leek EM2 (Employment) coincides entirely with the local wildlife site Twinney Wood and Grassland. Recommend Council address local plan and NPPF policies to see if the site goes forward to the next stage. DC1, 110, 113, 117 and 118 NPPF.

SCC Highways: Subject to satisfactory design.

Public response

2 comments - 2 objections

Issues raised:

- Infrastructure - Traffic / Transport
- Landscape
- Nature Conservation- DEFRA environmentally sensitive area

Council response –

- Any planning application would have to satisfactorily address any access issues raised by SCC Highways Officer and SMDC Environmental Health Officer regarding amenity/noise.
- The Council has a Landscape & Settlement Setting Study and this site is identified as being important landscape setting to the settlement. The impact on the National Park requires consideration and also Habitat Regulations Assessment of this site would be required if it is taken forward to test impact on European protected habitats.

Leek

Leek EM2 – Land east of Brooklands Way Leekbrook

- The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. The Study recommends that any future development of this site is considered in line with relevant NPPF and Core Strategy Policies. A number of precautionary surveys/actions are also recommended in the case of development.
- The Council holds recent evidence which demonstrates that there is need for additional employment land across the District (including B2 uses). The Spatial Strategy of the Core Strategy breaks down this requirement into sub-requirements, including a requirement for the Leek Wards. Leek EM2 is proposed under the Core Strategy Spatial Policy for Leek as a 'Broad Location for Employment' to contribute to meeting this need. Consequently this has been taken forward into the Site Allocations process.
- Due to the proximity to the Grade II* listed building a Heritage Impact Assessment will be undertaken during the plan production process if the site is taken forward.

Preferred Options Consultation April 2016

SCC Transportation - Access via Brooklands Way may not be achievable and access from A520 should be considered. A520/Basford Lane will require assessment as well as Basford Lane/Brooklands Way. Sustainable transport links may require improvement. Public Transport comments: Service 16 between Hanley, Cheddleton and Leek operates every 30 minutes along the A520 Cheddleton Road. Service 116 also provides 3 additional journeys per day between Leek and Cheddleton.

Council response – Comments noted. The above will be reflected in any site-specific policy, including any requirement to submit a TA.

Heritage England - It is not clear how the impact of the proposed LEEK EM2 site on the Grade II* Listed Building Fynneylane Farm and its setting has been assessed. Further information on this is required.

Council response – The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes a 2016 landscape and heritage impact study. This concluded that development of this site would not affect the setting of the listed building, and development of the site would be suitable in heritage terms. Note that heritage evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.

Natural England - Our previous advice letter dated 14.9.15 refers regarding preferred site allocation EM2. However please refer to our generic representation on local wildlife Sites and related information. We also note that the allocation would overlay a public footpath and refer the Council to our previous advice regarding NPPF para 75 dealing with public rights of way and access. Given the site's close proximity to lowland deciduous woodland the local plan process should seek to ensure that the provisions of policies NE1 Biodiversity and Geological Resources and C3 Green Infrastructure are implemented.

Council response – The site was subject to a Phase I ecological survey in 2014. The site report acknowledges the site's SBI status (and surrounding features etc); and factors this status into subsequent evaluation/conclusions, recommending the site be considered regionally important, and recommending a number of further surveys/actions would be appropriate prior to development. The Council would ensure development proposals respect the routes of public rights of way; stating this in site allocations policies, where relevant. Note that Policies NE1 and C3 already seek to enhance public access to the countryside (subject to landowner agreement, where relevant).

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, a number of further surveys are recommended to establish SBI/BAS status.

Note site Leek EM2 was granted outline industrial consent in 2016.

Environment Agency - Contrary to our previous advice, a Level 2 SFRA will not be required for Leekbrook EM2. This is due to the size of the site and the fact that any floodplain is unlikely to impact on its deliverability. The watercourse running along the majority of the northern edge will still need to be modelled in detail at the application stage and the site is still subject to the Sequential Test.

Leek

Leek EM2 – Land east of Brooklands Way Leekbrook

Council response – Comments noted. Note site Leek EM2 was granted outline industrial consent in 2016.

Staffordshire County Council - Leek EM2 is mainly within a Site of Biological Importance. This SBI supports several habitats of principal importance. The site has added value due to the diversity of habitats. In regard of NPPF biodiversity policy this site should not be included as a preferred option. If this site is taken forward the Local Plan should include policy requirement for off-site mitigation meeting Defra biodiversity offsetting requirements with replacement habitats demonstrating similar ecological connectivity.

Council response – The site was subject to a Phase I ecological survey in 2014. The site report acknowledges the site's SBI status (and surrounding features etc); and factors this status into subsequent evaluation/conclusions, recommending the site be considered regionally important, and recommending a number of further surveys/actions would be appropriate prior to development.

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, a number of further surveys are recommended to establish SBI/BAS status.

Note that ecological evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.

Note site Leek EM2 was granted outline industrial consent in 2016. Full proposals would be assessed against the findings of this study, and relevant Local Plan and NPPF policy.

Environmental health: No significant Issues; loss of greenfield land ; possible noise impacts on Fynneylane Farm

Council response – Comments noted.

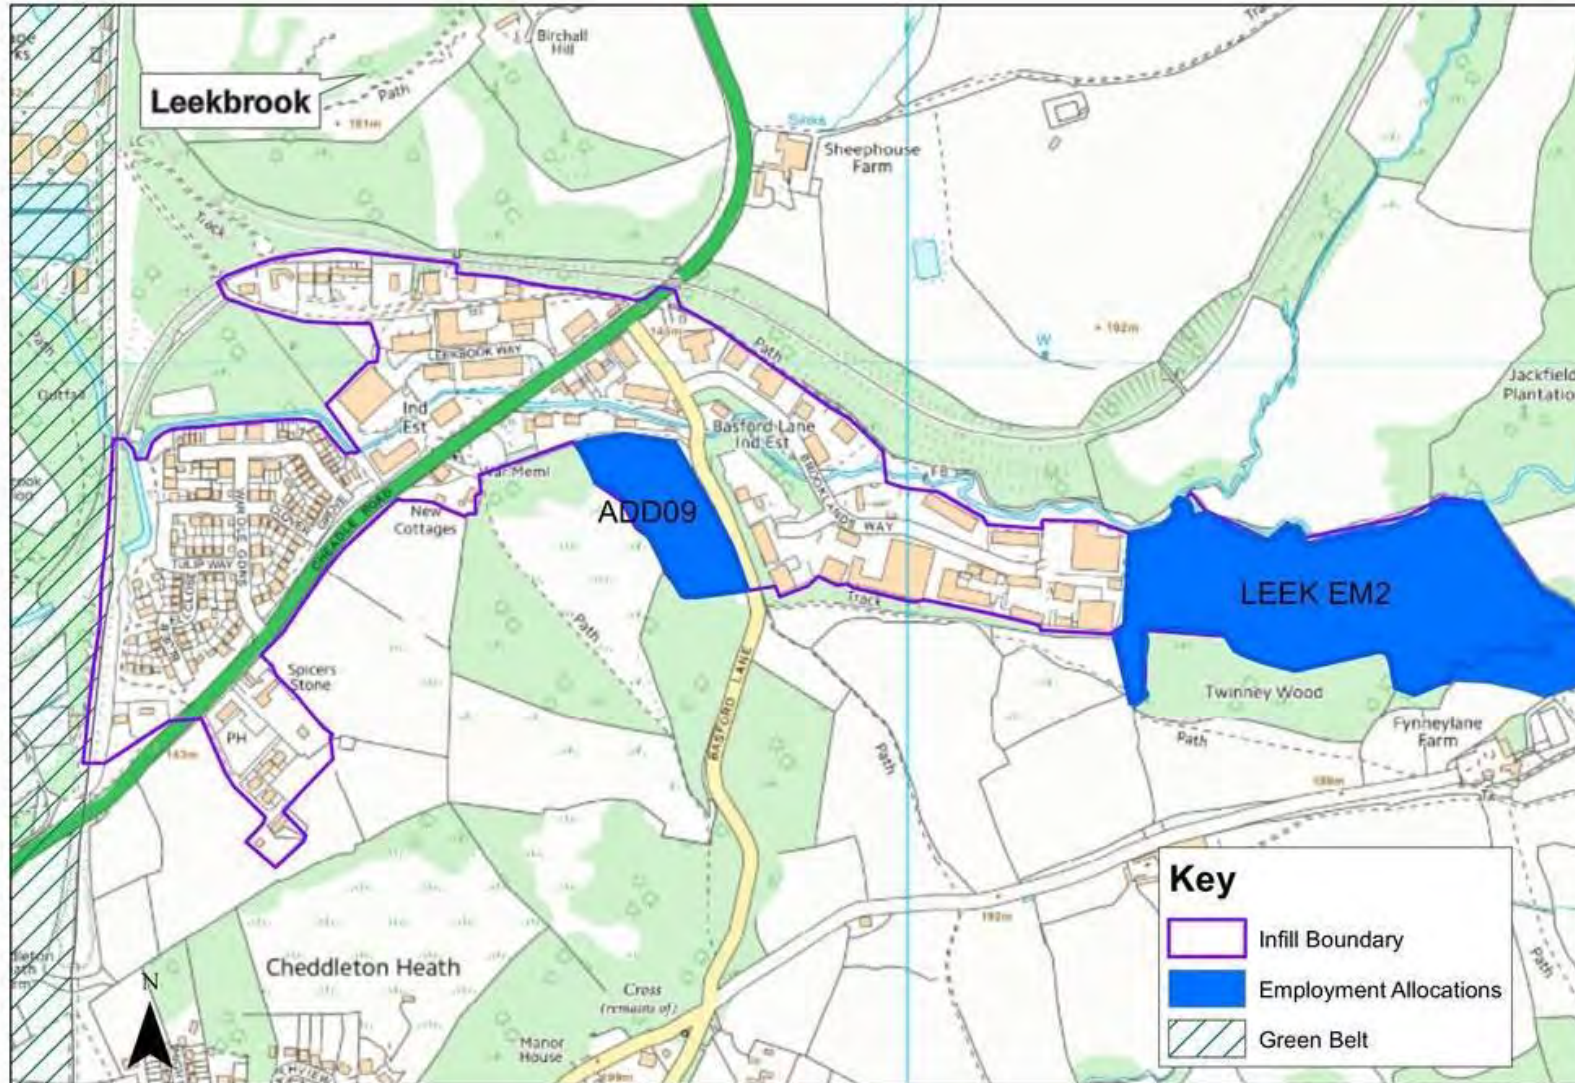

SCC Lead local Flood Risk Officer: Employment. Main river floodplain. Consult EA. Surface water floodplain. Consult SCC as early as possible. Known problems downstream. FRA required.

Council response – Comments noted. Note that application SMD/2014/0678 included an NPPF-compliant site-specific FRA. Any site-specific policy for this site will reference the above, including the requirement to submit an FRA.

Coal Authority: Welcome the fact that the site assessment documents covering the site options does identify ground instability arising from mining legacy and as such The Coal Authority supports the broad approach taken to site selection. We have no views on the actual sites chosen as this is a matter for local determination following consideration of all relevant factors.

Latest Coal Authority data 27/04/2016. Site does not fall within any coal risk area.

Council response – Sites affected by mining legacy to have a policy criterion to clarify that developers should recognise mining legacy problems and demonstrate how they can be positively addressed by new development. Policy also to clarify that no development should take place over mine entries even when treated.

AL012 Land at Capri Gallows Green

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken forward into Preferred Options Local Plan:

- Site has planning permission pending – awaiting S106 agreement

Key Issues

- Has pending planning permission
- Species rich hedgerow on the site identified in the Extended Phase 1 Habitat Survey 2015. SWT consider hedgerow may merit site designation needs survey to assess impact of development/mitigation measures
- Access Allotment Lane needs improvement/realignment
- Spring/watercourse nearby

Site Information

Greenfield/br ownfield	Built up area boundary/countryside	Est. housing capacity	Area (ha)	Ownership status	Site details
Greenfield Brownfield	Countryside	18 in Options consultati on 13 in Preferred Options	0.6	Site available in single ownership. Agent acting for land owner	<ul style="list-style-type: none"> • Large modern house within level site, southern area is paddock • Mature trees/hedgerows on boundary • Footpath runs adjacent to site • Five Grade II Listed Building & Conservation Area within 400m

Studies

Extended Phase 1 Habitat Survey 2015 (FID 129)

Conclusion

The site itself has 3 trees and 1 building with bat potential, species rich hedgerows, and species poor grasslands which are connected to a series of other hedgerows and other habitats. Therefore the site is attributed at least district ecological importance.

The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- A bat survey regime to ascertain whether bats roost in the trees and buildings
- Hedgerow survey
- Vegetation removal at the appropriate time of year

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at local and site level. However, more information is required regarding the species rich hedgerow and the potential for bat roosts in the building and trees.

AL012 Land at Capri Gallows Green

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- Hedgerow survey following the modified HEGS methodology.
- Further assessment of the trees and the building for their potential to support roosting bats.
- Possible bat survey required.

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement

Landscape, Local Green Space and Heritage Impact Study (August 2016)

Landscape Assessment

The site is located on the southern edge of the village, comprising an individual property (and surrounding gardens) located on the B5032, and the adjacent field to the south. An existing strong, vegetated settlement edge is defined by a thick hedgerow on the southern boundary of the field to the south of the site. Development of the site would not affect this edge, and would not be visually prominent. Consideration should be given to the frontage of the development to prevent potential adverse effects on local landscape character.

Site is of low landscape sensitivity.

Heritage Assessment

There are five Grade II Listed Buildings and one Conservation Area within the 400m buffer. The site was well screened with vegetation on the east, west and southern sides. To the north, there was no intervisibility between the site and the Conservation Area due to the intervening buildings. Development would be unlikely to cause adverse effects to their settings. Whilst the HEA states that the HLC zone ALHECZ 5 cannot absorb large or medium scale development, development in the site would be a small change to the zone as a whole (Historic Environment Character Assessment 2010).

Site is suitable for development in heritage terms.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 18 dwellings is considered to have a significant positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The site's proximity to historic assets and ecological value is likely to have a negative effect.

Initial HRA Screening

No Likely Significant Effects (LSEs) have been identified in relation to this preferred option site.

Options Consultation July 2015

Statutory bodies/stakeholders

SCC Highways - Acceptable subject to access design and provision of appropriate visibility splay. Visibility from Allotment Lane should be provided across frontage.

Developer/Agent – site is available

Historic England: Made no comments on individual sites recommended that a heritage impact assessment of sites is carried out.

Coal Authority: Staffordshire Moorlands is an area where there have been significant coal mining activities which have left a legacy. Recommend that sites are assessed to determine if there coal related hazards which require remediation and the likely impact on mineral resources. Previous coal workings do not prevent development of sites and therefore do not wish to recommend any sites are excluded from assessment on mining legacy grounds.

AL012 Land at Capri Gallows Green

United Utilities, Severn Trent, Natural England, Network Rail; no site specific comments

Public response : 2 comments – 2 objections

Issues raised:

Planning consent for 13 dwellings already granted; should not be included

Objections

- Infrastructure – transport
- Infrastructure – school, services
- Landscape – within Churnet Valley, urban sprawl
- Loss of amenity
- Nature Conservation
- Flood Risk

Council response –

OUTLINE PLANNING PERMISSION PENDING (13 DWELLINGS). SMD/2014/0824

Preferred Options Consultation April 2016

Statutory bodies/stakeholders

Historic England, Severn Trent, Natural England, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Environment Agency- No site specific comments Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

SCC Transport - improvement/realignment to Allotment Lane should be included.

SCC LLFA: Spring or watercourse/ditch nearby

SCC Education In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded, which is covered in more detail below under the heading 'infrastructure provision'.

Agent- acting for landowner supports development of site

Staffordshire Wildlife Trust-, needs further survey prior to formal allocation; the species-rich hedges identified in the Extended Phase 1 Habitat Surveys (site FID 129) need assessment against the current Staffordshire Local Wildlife Site criteria for hedges, as they may well deserve designation. This may not impact on the allocation but the presence of a locally designated site would need to be considered before making a formal decision.

Public response : comments – 3 objections 1 comment

Issues raised:

Objections

- Infrastructure – transport
- Infrastructure – school, services

AL012 Land at Capri Gallows Green

- Ecology

Landowner/developer - This representation is made on behalf of the owners of site AL012. The site is in single ownership and the site owners are willing and able to release the site for housing. The site has no technical or other planning obstacles preventing housing from being built within the plan period. Moreover the council have already resolved to grant planning permission (SMD/2014/0824) residential development on all of the allocated site. The site owner wishes to reserve their right to object to this matter as the plan progresses and information comes to light.

Public Response

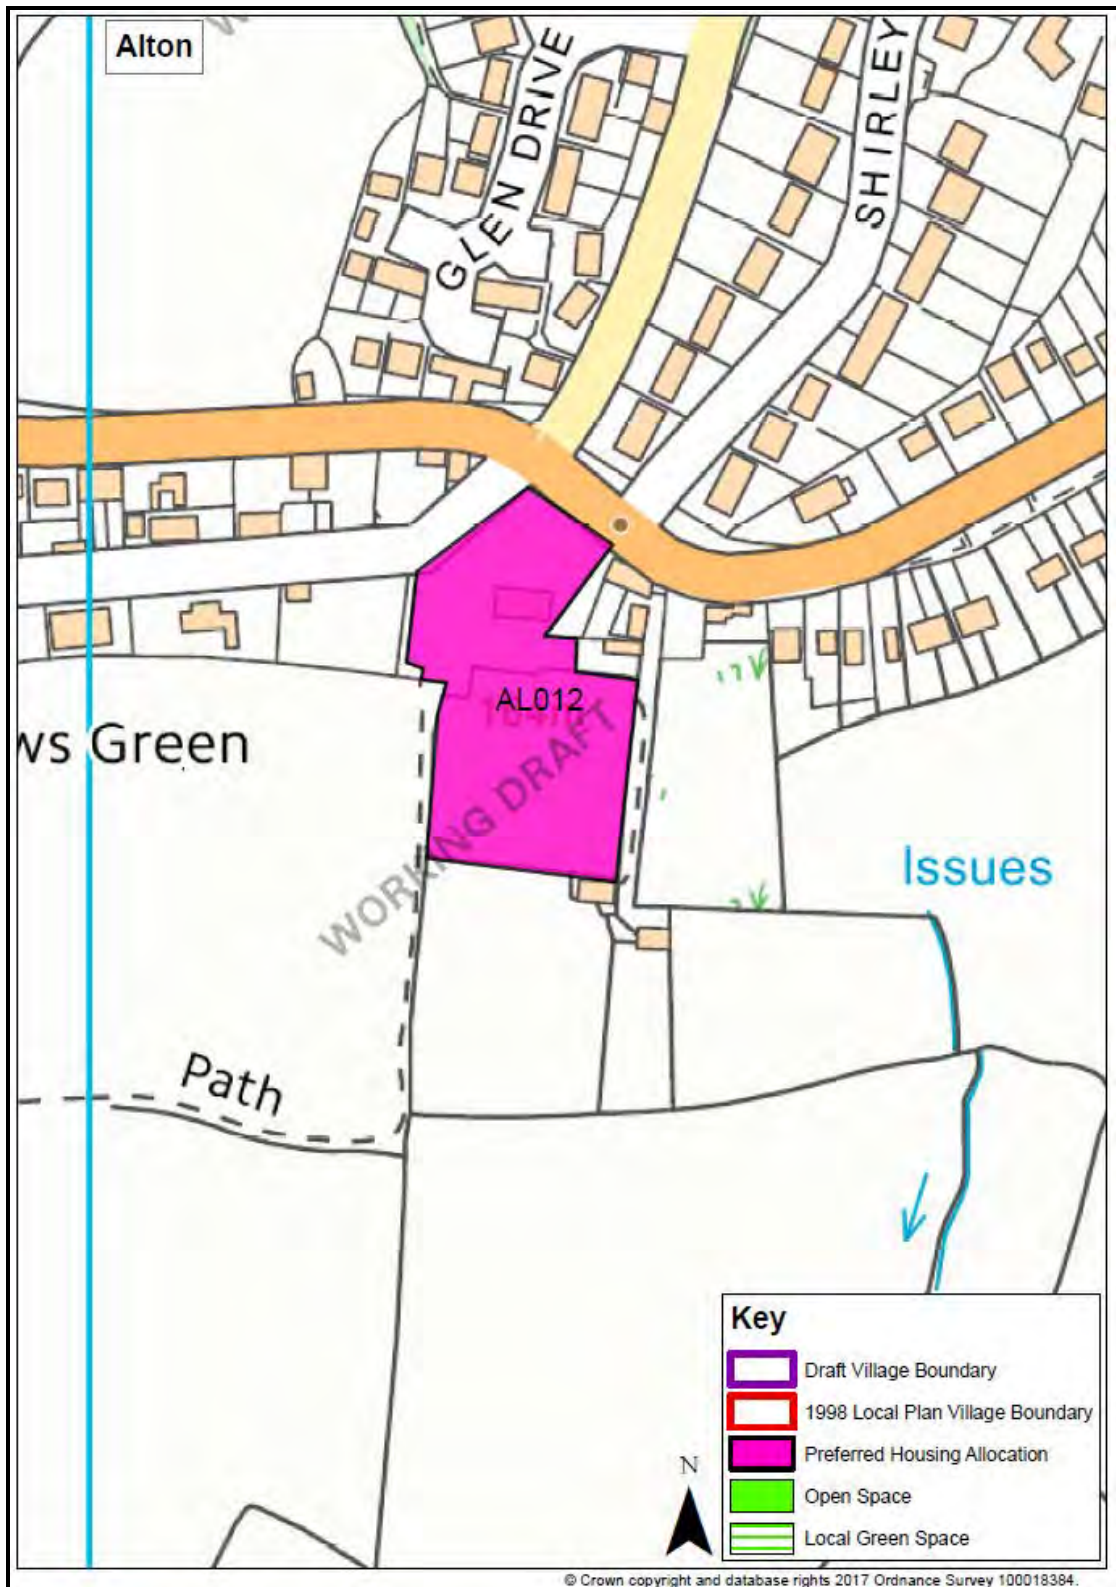

Issues raised

- Infrastructure inadequate
- Traffic congestion
- Disturbing wildlife
- Spoiling countryside
- Drainage
- Flooding

Council response –

- Outline planning permission pending for 13 dwellings SMD/2014/0824
- The Highways Authority have not raised any issues that would prevent the development of the site. They consider the site is acceptable subject to access design and provision of appropriate visibility splay. Visibility from Allotment Lane should be provided across frontage.
- The Environment Agency has not identified any site specific issues. They recommend that the ecological value of watercourses is enhanced where possible and the impact on water quality is assessed. The Council has completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. Mitigation measures will be taken as part of the site development to address any surface water issues.
- Policies for sites affected by watercourses should require that early discussions with the Environment Agency and the Lead Local Flood Authority are undertaken
- The Council has recently undertaken a Landscape, Local Green Space and Heritage Impact Study 2016 to form part of the evidence base to support the Local Plan and assess the potential landscape impacts of the development allocations, the study found the site is of low landscape sensitivity
- The Extended Phase 1 habitat Survey 2015 assessed the present and potential ecological value of the proposed site allocations. It found that the site had 3 trees and 1 building with bat potential and also species rich hedgerows and species poor grasslands connected to other habitats. A further ecological study is being undertaken the results of which will inform the site allocation and policies in the Local Plan

AL012 Land at Capri Gallows Green

Blythe Bridge

BB041 (ADD11) Land to the south west of Caverswall Road

Local Plan Process

- Included in the Preferred Options consultation April 2016 site was identified following public consultation Options consultation

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances.
- See key issues below.

Key Issues

- Green Belt site. Impact on the Green Belt - Study recommended released phased beyond plan period and would require masterplanning which incorporates extensive Green Infrastructure
- Landscape, Local Green Space and Heritage Impact Study found the site had low landscape sensitivity and is suitable for development in heritage terms.
- Site has potential wildlife value.
- Access unclear/ key junctions will require assessment.
- Public footpath crosses the site.

Site Information

Greenfield/ brownfield	Built up area boundary/country side	Est. housin g capacit y	Area (ha)	Density	Ownersh i p status	Site details
Greenfield	Countryside green belt	50	3.71	13 per hectare	Owner not promoting development	<ul style="list-style-type: none">• Mainly rough grassland• Trees and hedgerows on site• Public footpath runs through site

Studies

Extended Phase 1 Habitat Survey 2015

Not assessed

Landscape & Settlement Character Assessment 2008

Within important landscape setting to the settlement

Landscape, Local Green Space and Heritage Impact Study August 2016

Blythe Bridge

BB041 (ADD11) Land to the south west of Caverswall Road

Caverswell Old Road (south)

Site comprises fields to the north of the settlement, sloping down from Caverswell Old Road towards the settlement edge (rear of properties on Caverswell Road). The site is generally screened by existing development; vegetation (particularly the hedgerow on Caverswell Old Road); and topography, as the land continues to rise to a ridge to the north of the site, thus screening long distance views from this direction. Development of the site would fit in well within the existing settlement form, and would create a well defined, vegetated settlement edge.

Site is of low landscape sensitivity.

Caverswell Old Road (south)

No designated heritage assets within the 400m buffer. Whilst the HEA states that HLC zone BFHECZ 5 has little capacity to absorb change, with sensitive development, this could be accommodated on the site (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms.

Green Belt Review (November 2015)

Green Belt Review (November 2015)

Land to the South of Caverswall Old Road

(Appraised sites according to their contribution to Green Belt Purposes)

Check Sprawl: Limited contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: Limited

The high degree of enclosure of this land both physically and visually means that damage to the overall openness of the Green Belt in this location would be limited.

Identified in the LCA as making a contribution to the setting of the settlement.

Recommendation: Consider for Release. Release under Exceptional Circumstances should be accompanied by extension of the Village Boundary. Could be phased for beyond the Plan period, but given its potential scale would require comprehensive masterplanning which incorporates extensive Green Infrastructure

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect, as could the site's location away from historic assets. However, the development of greenfield, urban ALC land is assessed as having a negative effect

Options Consultation July 2015

Statutory bodies/stakeholders

Site was identified following public consultation – comments awaited.

Developer/Agent/Landowner – landowner currently unknown.

Public response – none, site identified following public consultation

Council response –

Blythe Bridge

BB041 (ADD11) Land to the south west of Caverswall Road

The land in question is within the Green Belt. In order for Blythe Bridge and Forsbrook to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering this land for release from the Green Belt.

It is considered that further investigations are required to determine the suitability of this site for inclusion in the draft list of preferred options for consideration by Councillors.

Preferred Options Consultation April 2016

Statutory Bodies

Historic England - Q37 - Map 4.13 - Blythe Bridge and Forsbrook - Forsbrook green belt release site – It is not clear how the impact of the site allocation has been assessed in respect of the Grade II listed building Forsbrook Hall Farmhouse. Further information is required.

SCC Education In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded, which is covered in more detail below under the heading 'infrastructure provision'.

SCC Transport No access specified. Key junctions will require assessment including Caverswall Rd/A521 and Caverswall Old Rd/A521. Pedestrian links into Blythe Bridge will require consideration.

Staffordshire Wildlife Trust • Re Blythe Bridge and Forsbrook: Site BB041 has not been covered by the Extended Phase 1 Habitat Surveys. MAGIC <http://www.magic.gov.uk> shows the two north-western fields within this site to be 'Good quality semi-improved grassland'. The entire site is in a Higher Level Stewardship scheme, indicating that habitat quality and diversity could be higher than on average farmland. From aerial photos and photos sent to us by residents, all the fields within the site look to be potentially diverse, or at least not intensively managed. From aerial photos and Google Streetview, the hedgerows look to be potentially diverse, with good structure and contain mature trees. There are two ponds on the site, which could potentially support great crested newts and other amphibians such as Common Toad (priority species). A number of birds have been recorded in the area including priority species Dunnock, Bullfinch, good populations

Blythe Bridge

BB041 (ADD11) Land to the south west of Caverswall Road

of House sparrow and Skylark. The site could potentially be of high environmental value and needs to be assessed against the Staffordshire LWS criteria.

Severn Trent, Natural England, United Utilities, Sport England, Woodland Trust, Coal Authority, No site specific comments

Environment Agency- No site specific comments Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

SCC Education- . In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded. We acknowledge that the Plan states an Infrastructure Delivery Plan is being produced and we would be keen to work with you to develop this to ensure there is clarity over infrastructure requirements and delivery.

Public Response

Issues raised

- Site a late addition giving residents less time to be aware of proposed allocation
- Question sustainable viability of sites in Blythe Bridge
- Increased traffic pressure on Cheadle Road to Blythe Bridge, close to existing junctions, impact on pedestrians, cyclists, horse riders, disabled
- Will enough green space be provided in Forsbrook conurbation for both sites
- Flooding issues
- Need improvement to drains sewage and rainwater
- Impact on wildlife
- School capacity – schools already overcrowded
- Disruption during building work
- Loss of property value
- Loss of view
- Loss of open space/area used for recreation
- Loss of residential amenity overlooking from development
- Pollution
- Countryside should not be built on when there are brownfield sites available
- Local Plan boundary has been changed and does not include other fields adjoining BB041 and former brick yard why has this been done without informing residents?
- Consultation inadequate
- Will houses be restricted to local people

Blythe Bridge

BB041 (ADD11) Land to the south west of Caverswall Road

- Affordable housing would not fit in with the area
- Detriment effect on rural landscape
- Alternative site to the east of BB041

Council Response

- The preparation of the Local Plan is an ongoing process which takes account of consultation responses, the evidence base and national planning policy. The site was suggested following the Site Options stage and was therefore included in the Preferred Options consultation to enable people to comment on it.
- The Highway Authority does not raise any objections to the development of this site. They recommend that key junctions will require assessment including Caverswall Rd/A521 and Caverswall Old Rd/A521 and pedestrian links into Blythe Bridge will require consideration
- New housing schemes will need to incorporate areas of open space and landscaping
- The Council is undertaking Local Plan viability work which will consider the viability of preferred option sites.
- The land in question is within the Green Belt. The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a more detailed site-based assessment of land which could be considered for review. The Green Belt review considered the overall impact on Green Belt purposes of the development to be limited. It found “The high degree of enclosure of this land both physically and visually means that damage to the overall openness of the Green Belt in this location would be limited. Identified in the LCA as making a contribution to the setting of the settlement.” and recommended the site was considered for release it said the site “Could be phased for beyond the Plan period, but given its potential scale would require comprehensive masterplanning which incorporates extensive Green Infrastructure” In order to release a site from the Green Belt the Council must be able to demonstrate that exceptional circumstances exist. Consideration needs to be given to all the relevant evidence to determine the overall suitability of the site for release from the Green Belt.
- The Environment Agency has not identified any site specific issues. They recommend that the ecological value of watercourses is enhanced where possible and the impact on water quality is assessed. The Council has completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. Mitigation measures will be taken as part of the site development to address any surface water issues
- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children’s play areas.
- The site was not included in the Extended Phase 1 Habitat Survey. Staffordshire Wildlife Trust consider the site to be good quality semi improved grassland consider it could potentially be of high environmental value & note it is covered by a higher level stewardship scheme. They recommend the site is assessed against the Staffordshire LWS criteria. The results of the ecological assessment of the site will be taken into consideration in determining the suitability of the site for development

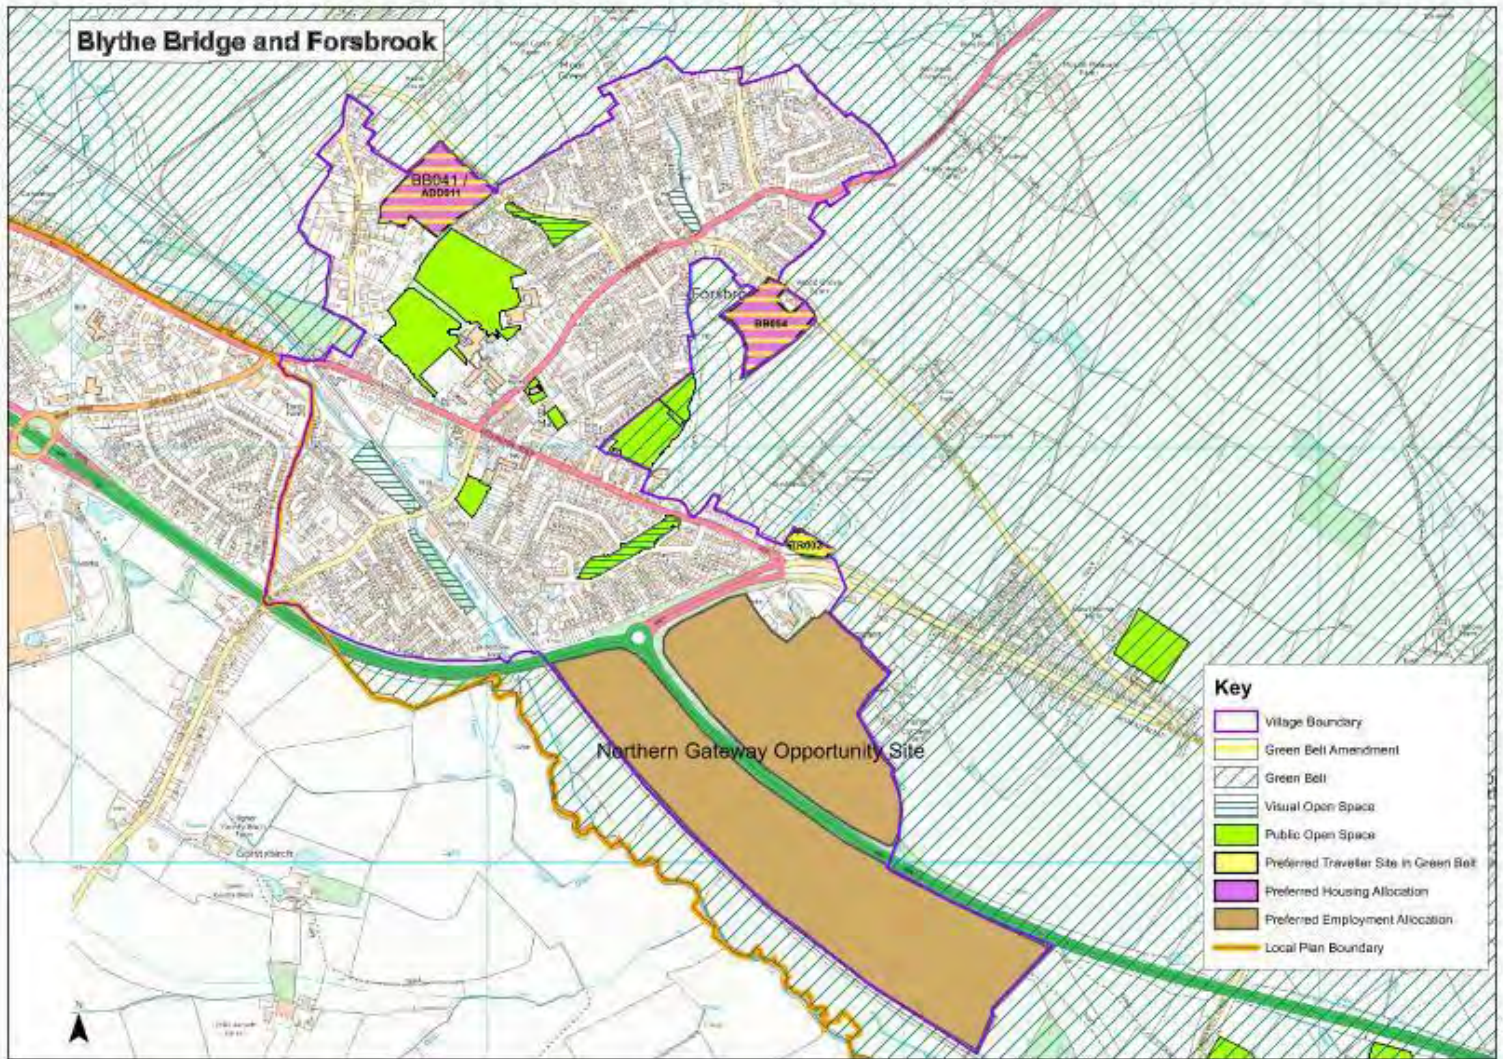

Blythe Bridge

BB041 (ADD11) Land to the south west of Caverswall Road

- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered
- Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations
- Property values are not a material planning consideration.
- Loss of view is not a material planning consideration
- New housing schemes will maintain existing pedestrian links as well as considering new links where appropriate. Depending on size developments may need to incorporate areas of open space and landscaping.
- Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application
- Site allocations are required to meet the District's proposed housing requirement. There is not enough brownfield land or sites or infill sites in settlements to meet the District's proposed housing requirements so green field sites have been proposed. Prioritising brown field land over greenfield in all circumstances is not part of Government policy
- The consultation is to seek residents views on the proposed changes including those the village boundary and site allocations
- The consultation was widely publicised and included a flyer being sent to all households and businesses in the District through Royal Mail. High levels of responses have been received by the Council from residents which suggests that a significant number of residents knew about the consultation.
- The Local Plan will contain an affordable housing policy requiring a percentage of houses to be affordable
- Any new development taking place will be subject to design policies contained within the new Local Plan which seek to ensure that the development is appropriate for the location and does not harm the character of the area
- The Landscape, Local Green Space & Heritage Impact Study concluded the site was of low landscape sensitivity it stated "*Site comprises fields to the north of the settlement, sloping down from Caverswell Old Road towards the settlement edge (rear of properties on Caverswell Road). The site is generally screened by existing development; vegetation (particularly the hedgerow on Caverswell Old Road); and topography, as the land continues to rise to a ridge to the north of the site, thus screening long distance views from this direction. Development of the site would fit in well within the existing settlement form, and would create a well defined, vegetated settlement edge.*"
- If the district council considered that a development they may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts
- There is a policy in the Local Plan regarding the pollution

Blythe Bridge

BB041 (ADD11) Land to the south west of Caverswall Road

Blythe Bridge

BB054 Land to the south west of Draycott Old Road

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances. The Green Belt Study recommended the site was only released in the context of the wider land in this location.
- Landscape, Local Green Space and Heritage Impact Study August 2016 found the site was of high landscape sensitivity.
- See key issues below.

Key Issues

- Green Belt site. Impact on Green Belt study recommended release only in the context of wider land in this location.
- Not well related to settlement and pattern of development.
- Impact on the landscape. Landscape, Local Green Space and Heritage Impact Study August 2016 found the site was of high landscape sensitivity . Development was suitable in heritage terms subject to masterplanning. Impact on listed building would need heritage masterplanning.
- Potential flooding issues. Flood zone 2 part of site is in the flood plain of main river.
- Access issues large level differences with Draycott Old Road which is narrow in places with no footway. Junction with A521 and Uttoxeter Rd will require assessment. Local pedestrian and cycle links will require consideration and pedestrian crossing facilities on the A521 should also be considered.

Site Information

Greenfield/ brownfield	Built up area boundary/country side	Est. housing capacity	Area (ha)	Density	Ownership status	Site details
Green field	Countryside green belt	70	2.9	24 per ha	Land available	<ul style="list-style-type: none"> • Agricultural land – grassland • Some mature trees. Hedgerows along the boundary • Edge of settlement • Small electricity

Blythe Bridge

BB054 Land to the south west of Draycott Old Road

						sub station in site • Listed building close to site
--	--	--	--	--	--	---

Studies

Extended Phase 1 Habitat Survey 2015 (FID 57)

Conclusion

The site itself has 2 trees with bat potential and species poor hedgerows which are connected to a series of other hedgerows and habitats within a rural landscape, so is therefore attributed district ecological importance. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- A bat survey regime to ascertain whether bats roost in the trees
- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement

Landscape, Local Green Space and Heritage Impact Study August 2016

Wood Grove Farm

Landscape

Site comprises agricultural land surrounding Wood Grove Farm on the southeastern edge of the settlement, south-west of Draycott Old Road. The site is adjacent to the end of linear development on Draycott Old Road, but is otherwise separated from the edge of the settlement by agricultural land.

Therefore the site does not relate to the existing settlement form. Development of the site would adversely affect the settlement pattern, adversely affecting the existing vegetated settlement edge and encroaching on the countryside.

Site is of high landscape sensitivity.

Please note that this study forms part of a wider evidence base to support SMDC's Local Plan. Therefore the conclusions within this report will be weighed against other evidence when determining the overall suitability of a site for development.

Heritage

Wood Grove Farm

There is one Grade II Listed Building within the 400m buffer. Mitigation including screening along the northern boundary would reduce adverse effects to the setting of the asset. Whilst the HEA states that HLC zone BFHECZ 4 has little capacity to absorb change, with sensitive development, this could be accommodated on the site (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms subject to appropriate masterplanning.

Green Belt Review (November 2015)

(Appraised sites according to their contribution to Green Belt Purposes)

Check Sprawl: Limited contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Contribution

Preserve Setting: Contribution

Blythe Bridge

BB054 Land to the south west of Draycott Old Road

Overall Impact of development on Green Belt Purposes: Limited

Not physically well enclosed (being hedgerows on three sites) but reasonably visually well enclosed from Draycott Old Road. Development would create an incongruous eastward extension, leaving an illogical tongue of Green Belt to the west. See also wider land to the south of Draycott Old Road/East of Tater Lane for a more comprehensive masterplanned approach to this area.

Recommendation: Consider for Release under exceptional circumstances only in context of wider land in this location.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 70 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect. However, the site's partial location within a flood zone is assessed as having a significant negative effect. The development of greenfield, urban ALC land is assessed as having a negative effect, as is the ecological value of the site and the proximity of historic assets.

Options Consultation July 2015

Statutory bodies/stakeholders

SCC Highways - Access from Draycott Old Road will be difficult to achieve from the western end of the site due to the large level differences. Access at the eastern end of the site looks possible as levels are less of an issue. Adjacent to the site Draycott Old Road is only single vehicle width in places and has no footway provision. Given this, access via a new residential road through the adjacent proposal sites of BB050 and BB081 would be better to serve any development on this site if this is possible.

Environment Agency – Site is likely to be affected to some degree by flood risk and if taken forward will require the support of the Sequential Test and a Level 2 SFRA.

Developer/Agent/Landowner – Landowner confirms would consider releasing the land for development.

Public response 18 comments - 17 objections and 1 support

Issues raised:

Objections

- Infrastructure – Schools – would not be able to cope with additional pupils and medical services.
- Infrastructure - Traffic / Transport –
- Roads are country lanes with bends, narrow and few pavements.
- Junction of Uttoxeter Rd and Caverswall Road busy and dangerous near level crossing and on school route.
- The Junction of Draycott Old Road and Cheadle Road will be at high risk of road traffic collision.
- Impact of 70 houses on traffic and no crossing in Forsbrook.
- Impact on road safety for pedestrians as no pavement from site into village.
- Congestion through village.
- Draycott Old Road turn into rat run but very narrow.
- Infrastructure – Other – there is a gas station on site.
- Landscape –

Blythe Bridge

BB054 Land to the south west of Draycott Old Road

- Building on green sites not allowed we need to keep environment attractive and contrary to SMDC plans to protect this.
- Development would change the visual appearance of diverse landscape.
- Nature Conservation – impact on and loss of local wildlife.
- Flood Risk –
- Flooding on Caverswall Road.
- Land acts as soak away.
- Impact of 70 houses on flooding.
- Site is boggy after minimal rainfall and has flooded in the past.
- Amenity (e.g. noise, privacy, loss of light) –
- site is not well screened and will be very visible.
- Loss of privacy, increased traffic, noise and pollution.
- Scale of development – part of site is raised overlooking into existing houses it would be very intrusive in the landscape.
- Government Policy – against govt policy to build in greenbelt.
- Other –
- already adequate starter homes in area.
- Just an opportunity for large houses landlords and Council making money.
- Lose public footpath.
- No longer living in village but urban estate.
- No proof of housing numbers required.
- Use brownfield sites first.
- Concerns about construction traffic and provision of services to site causing disruption.
- Village identity lost and be one conurbation of Forsbrook, Blythe Bridge and Draycott.

Support

- Other – support subject to provision of a walkway along the line of the public footpath, minimum width 6m; with improved access to Draycott Old Road.

Council response –

- Highways Authority advises that access at the eastern end of the site looks possible as levels are less of an issue than from the west. Adjacent to the site Draycott Old Road is only single vehicle width in places and has no footway provision. However development of the site has not been ruled out.
- The Council has a Landscape & Settlement Setting Study and this site is not identified as being important landscape setting to the settlement.
- The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed.
- The land in question is within the Green Belt. In order for Blythe Bridge and Forsbrook to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined

Blythe Bridge

BB054 Land to the south west of Draycott Old Road

- in government planning guidance). This study recommends considering site BB054 for release from the Green Belt.
- New development is the main way to deliver new or improved infrastructure e.g. more residents may support an improved bus service, and provision of a mains gas supply. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. childrens' play areas, footpaths. Similarly, doctors and dentists in Blythe Bridge and Forsbrook will assess their capacity needs as a result of new development in Blythe Bridge and Forsbrook so that provision can be made to accommodate new residents
 - Severn Trent have stated that they have a duty to complete necessary improvements to sewers to provide the capacity for new development. The Council will continue to liaise with the EA and Severn Trent regarding this issue.
 - Given the housing requirements of the village, it is not possible to meet this need upon brownfield sites in the village alone. Therefore a number of greenfield options have been proposed. National/Local Policy does not rule out allocating upon greenfield sites.
 - The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. The Council also fully consults with both the Environment Agency and County Council Lead Local Flood Risk Officer during the Plan preparation process.
 - Amenity – issues such as overlooking and loss of light will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. The Council would expect that any development proposals affecting a public right of way would avoid impacting upon its route (or require appropriate re-routing as required under legislation).
 - Housing requirements in the Staffordshire Moorlands are in addition to existing properties even if these are for sale or derelict. The new Local Plan will cover a period to 2031 so lack of demand (perceived or actual) at one point in time is not a valid reason for not meeting the area's objectively assessed housing needs.
 - The development requirements for the different villages stem from the rural housing requirement set out within Policy SS3 of the Core Strategy, then split based on a combination of factors including existing village population/ assessed development capacities/ access to facilities and services etc.

Preferred Options Consultation April 2016

Statutory Bodies

Severn Trent, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

SCC Transport: No specified access although likely to require use of Draycott Old Rd. Junction with A521 and Uttoxeter Rd will require assessment. Improvements may be required to Draycott Old Rd as it is a fairly narrow lane in places. Local pedestrian and cycle links will require consideration. Pedestrian crossing facilities on the A521 should also be considered, especially given the location of schools. Draycott Old Road is currently part of the advisory cycle route network, linking into Caverswall Old Rd.

Blythe Bridge

BB054 Land to the south west of Draycott Old Road

Service 31 operates close to the site 3 times per day between Cheadle, Blythe Bridge and Hanley. Otherwise, service 6A to Blythe Bridge, Longton and Hanley stops just over 1km from the site

SCC Education In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded, which is covered in more detail below under the heading 'infrastructure provision'.

SCC LLFA Flood zone 2 FRA required Part of site in floodplain of main river, reference in policy to early engagement with EA.

Historic England- Forsbrook Green Belt release site it is not clear how the impact of this site has been assessed in relation to Grade II Listed building. Further information required

Environment Agency

No specific site comments. Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

Public Response

Issues raised

- Inadequate consultation site notice removed
- Land used for informal recreation public footpath on site
- Loss of residential amenity
- Impact of on amenity of increased traffic
- Flooding
- Highway safety for pedestrians no pavement/lane is too narrow/no safe walking route, no safe walking route to school leading to additional car use and increase in traffic
- Highway safety for vehicles bend in road causing poor visibility/ lane is single track in most places
- Excessive scale of development
- Harm to wildlife
- Lack of infrastructure
- Green Belt site, other non green belt sites available in Blythe Bridge
- Impact on landscape
- Loss of views

Blythe Bridge

BB054 Land to the south west of Draycott Old Road

- Scale of development especially with two sites - out of character with the area

Council Response

- The consultation was widely publicised and included a flyer being sent to all households and businesses in the District through Royal Mail. High levels of responses have been received by the Council from residents which suggests that a significant number of residents knew about the consultation. The Council cannot be held responsible for the removal of site notices by third parties.
- Public footpaths can be maintained or redirected
- Issues such as overlooking, traffic generated will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application
- The Environment Agency have not raised any issues with this site. SCC as Lead Local Flood Authority state that part of the site is within a floodplain. They do not object to the site subject to a condition requiring early engagement with the Environment Agency and a flood risk assessment.
- Highways Authority advises that access at the eastern end of the site looks possible as levels are less of an issue than from the west. Adjacent to the site Draycott Old Road is only single vehicle width in places and has no footway provision.
- There is not enough brownfield land or sites or infill sites in settlements to meet the District's proposed housing requirements so green field sites have been proposed. Prioritising brown field land over greenfield in all circumstances is not part of Government policy
- Any new development taking place will be subject to design policies contained within the new Local Plan which seek to protect the character of the area, consideration will be given to the scale of development and its impact on the surrounding area.
- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
- The Green Belt review considered the overall impact on Green Belt purposes of the development to be limited. However it recommended the site was considered for release (under exceptional circumstances only in context of wider land in this location. It stated that the site was "*Not physically well enclosed (being hedgerows on three sites) but reasonably visually well enclosed from Draycott Old Road. Development would create an incongruous eastward extension, leaving an illogical tongue of Green Belt to the west. See also wider land to the south of Draycott Old Road/East of Tater Lane for a more comprehensive masterplanned approach to this area.*"

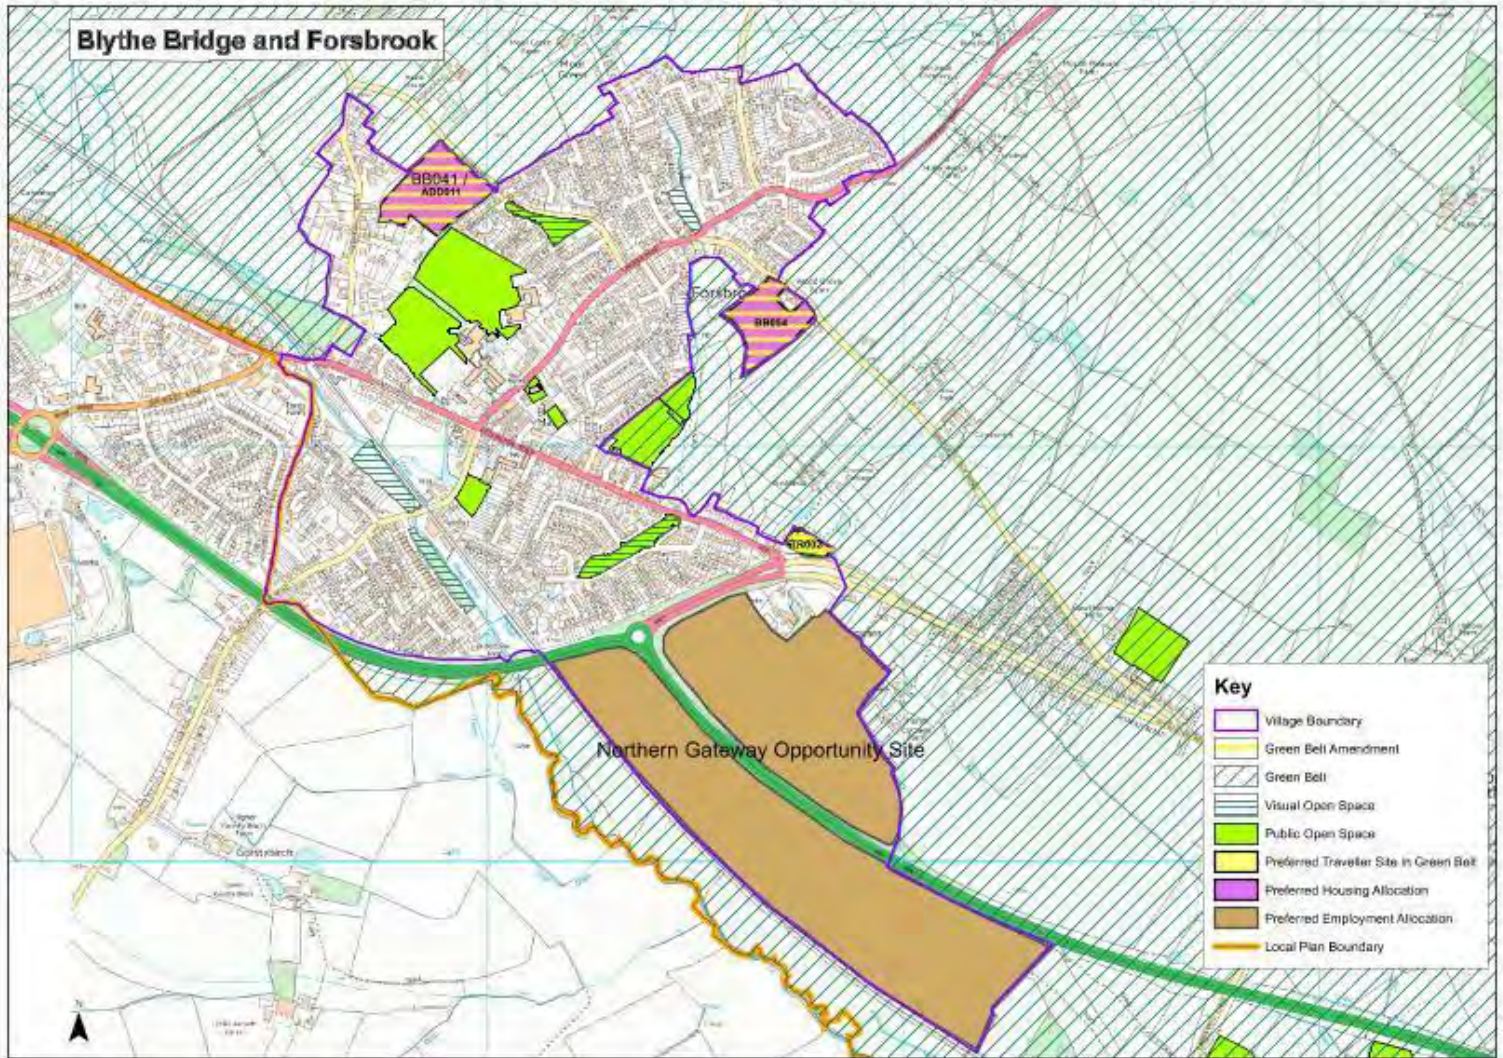

Blythe Bridge

BB054 Land to the south west of Draycott Old Road

- Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations
- Loss of views is not a material planning consideration
- The Landscape, Local Green Space & Heritage Impact Study acknowledged that the site had a high landscape sensitivity and any development will have to take account of the impact on the wider landscape to ensure it does not have a harmful impact.
- Policies in the Local Plan will require an element of new housing provision to be affordable
- The Extended Phase 1 Habitat Survey 2015 assessed the present and potential ecological value of the proposed site allocations. It found that the site was mainly species poor improved grassland grazed by cows with 2 trees with bat potential.
- Responses to the comments received to the Site Options consultation in 2015 were reported to the Council Assembly on 13 April 2016 and are available on the Council's website. The sites were assessed taking into account the consultation responses and evidence relating to the site. The site assessments provided a summary of the key issues and responses
- If the district council considered that a development they may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts.
- There is a policy in the Local Plan regarding the pollution

Blythe Bridge

BB054 Land to the south west of Draycott Old Road

Brown Edge

BE041 East of Willfield Lane

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances.
- See key issues below.

Key Issues

- Green Belt site. Green Belt Review considers it is acceptable for release. Exceptional circumstances would need to be demonstrated.
- Landscape, Local Green Space and Heritage Impact Study found the site was of low landscape sensitivity and suitable for development in heritage terms.
- Well related to built up area.
- Potential to enhance recreational access to the countryside well used footpath to Stockton Brook.
- Site has low to medium biodiversity value – good connectivity to surrounding countryside, mature trees and areas of floral diversity.
- Would need access improvements. Willfield Lane would need widening.

Site Information

Greenfield/ brownfield	Built up area boundary/country side	Est. housin g capacit y	Area (ha)	Density per hectare	Ownersh p status	Site details
Greenfield	Countryside Green Belt	50	2.2	23	Land available	<ul style="list-style-type: none"> • Overgrown meadow • Greenfield site on edge of settlement well related to existing development • Footpath to the east • Need access to Willfield Lane • TPO on site

Brown Edge

BE041 East of Willfield Lane

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the species rich hedgerow and the potential for roosting bats on site. The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- Hedgerow survey following modified HEGS methodology.
- Further assessment of the trees for their potential to support roosting bats.
- Bat survey possibly required.
- Reptile survey required.

Extended Phase 1 Habitat Survey 2015 (FID 98)

Conclusion

The site has mostly low to medium biodiversity value overall in terms of area. It is surrounded by domestic dwellings and species poor grassland with fairly good connectivity to the wider countryside, therefore is deemed to have at least district importance due to the presence of some areas of floral diversity and the assemblage of mature trees of which 8 are deemed to have potential to support roosting bats. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- Bat survey of the trees with bat roosting potential
- Hedgerow survey
- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment 2008

Within important landscape setting to the settlement

Green Belt Review (November 2015)

(Appraised sites according to their contribution to Green Belt Purposes)

Check Sprawl: Limited contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: Moderate

Whilst the outer boundary is relatively weak (being a hedgerow), development would create a rounding off of the settlement, provided there was particular attention to the treatment of the landscaping of external boundaries. The land has been identified in the LCA as being part of the landscape setting of the village.

Recommendation: Consider for Release under exceptional circumstances

Development could be part of the enhancement of recreational opportunities in this location, the site bordering scrubland and well-used footpaths running southwards towards Stockton Brook.

Landscape, Local Green Space and Heritage Impact Study August 2016

**Land east of Willfield Lane
Landscape**

Brown Edge

BE041 East of Willfield Lane

Site comprises a field on the southern edge of Brown Edge, enclosed by a combination of existing residential development, or trees and hedgerows. The site slopes down from a track on the north-east boundary to Willfield Lane on the south-west boundary. Thus the higher land to the north-east of the site has higher visual prominence, with long distance views available to the south-west. However development would be viewed behind and adjacent to existing development. The existing settlement edge is strong but urbanised, existing established vegetation on the south-eastern boundary could be strengthened in order to create a vegetated edge to the settlement.

Site is of low landscape sensitivity.

Heritage

There are no designated heritage assets within the 400m buffer. Whilst the HEA states that the HLC zone BEEHECZ 5 has little capacity to absorb change, with sensitive development, this could be accommodated on the site (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's distance away from historic assets is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the ecological value of the site.

Options Consultation July 2015

Statutory bodies/stakeholders:

SCC Highways – No objection in principle to the development of land for housing, subject to provision of adequate access, visibility, internal layout and design. As the land and that of the neighbouring field is highway land, an appropriate visibility splay should be achievable. A carriageway improvement, widening of Willfield Lane and extension of the footway along the frontage should also be provided. If satisfactory highway layout is achieved up to 50 units could be served off the access.

Brown Edge Parish Council – within Green Belt, flood risk, surface & foul drainage inadequate, traffic.

Developer/Agent/Owner – Land available. Evidence prepared to support the development of this land includes:- landscape and visual assessment, Phase 1 Habitat Survey, indicative masterplan demonstrating suitability and deliverability of site, access information to indicate that access is technically deliverable and information showing the accessibility of the site to local services and facilities.

Public response – 10 comments – 9 objections and 1 part-support
1 conditional support – on part of site only

Objections

- Infrastructure – traffic /transport congestion & safety
- Infrastructure – other
- Landscape

Brown Edge

BE041 East of Willfield Lane

- Loss of amenity
- Scale of development
- Nature Conservation

Council response –

The land in question is within the Green Belt. In order for Brown Edge to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site BE041 for release from the Green Belt.

Land is identified as being important to the setting of the settlement in the Council's Landscape & Settlement Character Assessment.

The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. Mitigation measures will be taken as part of the site development to address any surface water issues.

Amenity – issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.

It is not considered that development of this particular site would be out of proportion with the rest of the village. Any new development taking place will be subject to design policies contained within the new Local Plan – which will be subject to public consultation next year.

The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process.

The Council will shortly commission a Landscape Impact Assessment, which will include suggested mitigation measures relating to development on preferred options sites. The results of the study will inform the Submission Version of the Local Plan.

Preferred Options Consultation April 2016

Statutory bodies/stakeholders

Coal Authority, Historic England, Natural England, Severn Trent, United Utilities, Sport England -No site specific comments

Environment Agency- No site specific comments Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks.

Brown Edge

BE041 East of Willfield Lane

Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

SCC Education- . In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded. We acknowledge that the Plan states an Infrastructure Delivery Plan is being produced and we would be keen to work with you to develop this to ensure there is clarity over infrastructure requirements and delivery.

SCC LLFA; No issues FRA required

Brown Edge Parish Council- Question the total number of houses allocated to Brown Edge which seems to change with every plan we receive. Does the quoted figure of 50, which is not shown on the latest plan include those that have already been approved?

BE041

- Green Belt should be preserved to keep the natural boundary between Brown Edge (Staffs Moorlands) and the City of Stoke on Trent.
- Site is within green belt area. Existing storm and foul sewer systems are already overloaded (subject to overflowing and flooding).
- Increased highway traffic create problems on Willfield Lane and dangerous junction with the B5051 High Lane.
- Numerous infill sites around the village which could be utilised to develop and count towards the total number of houses required.

Landowner - Knights (Alan Knott) `PO 10249 on behalf of Harlequin Development Strategies (Crewe) Limited support the site (Summary of comments) Support inclusion of this site in the plan for housing development (on behalf of client) for the following reasons: Have previously sent technical information to the Council in response to the Site Options 2015 consultation supporting the development of this site, namely - access plan (re: services and facilities), landscape and visual appraisal, ecology study, vehicular access drawing and an indicative layout for 48 dwellings; Site has a willing landowner and willing developer; Highway Authority has no objections to development of 50 dwellings in principle; Green Belt Review recommends site is considered for release from Green Belt; An updated site specific landscape and visual appraisal has been prepared and concludes that the release of the site would have the least impact on landscape and visual amenity compared with the other sites which are potentially available and would have a limited impact on the wider landscape being barely visible from long range receptors on the Staffordshire Moorlands Walks and other footpaths; Further drainage investigations have been undertaken and demonstrate that foul and surface water can be discharged from the site in a suitable manner and a drainage system to adoptable standards can be achieved on this site without increasing flood risk or drainage issues elsewhere; Ecology - species specific studies for reptiles and bats are attached and conclude

Brown Edge

BE041 East of Willfield Lane

that there would be no constraint on the proposed allocation in this respect; Whilst the site is located within the Green Belt, it is required to meet the open market and affordable housing needs of Brown Edge given that opportunities to deliver housing on previously developed land and infill sites within the existing settlement boundary are severely limited; and Brown Edge is a large village in the rural area but with a good relationship to higher order settlements and as part of the overall strategy cannot be excluded from helping to meet the housing requirement for the rural area and the release of land from the Green Belt would also enable local affordable housing needs to be met.

Public Response

Main issues raised

- Highway issues Willfield Lane is not suitable for additional traffic, too narrow, development would cause highway safety issues, have already been accidents on the road, road is congested struggles to cope with traffic, no scope to improve the road
- Loss of habitat for wildlife.
- Loss of trees
- Site has archeologically interest
- Site is in the green belt
- Site prevents village merging with Stockton Brook/Endon
- Disturbance from building work
- Development would overlook existing properties cause a loss of amenity
- Flooding issues, inadequate drainage system, are two natural springs on the site
- Lack of infrastructure/services - schools
- Loss of land used for recreation purposes
- New housing should be on brownfield sites and/or in Stoke on Trent
- Houses are not needed
- One site of 50 houses is too large should be smaller sites spread across the village
- Would harm the character of the village
- Prefer BE032, BE060

Council Response

- Highway Authority have no objection in principle to the development of land for housing, subject to provision of adequate access, visibility, internal layout and design.
- The Extended Phase 1 Habitat Survey 2015 assessed the present and potential ecological value of the proposed site allocations. It found that the site has low to medium biodiversity value overall in terms of the area recommend trees and hedgerows are retain if the site is developed.
- The Environment Agency has not identified any site specific issues. They recommend that the ecological value of watercourses is enhanced where possible and the impact on water quality is assessed. The Council has completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. Mitigation measures will be taken as part of the site development to address any surface water issues.

Brown Edge

BE041 East of Willfield Lane

- The land in question is within the Green Belt. The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a more detailed site-based assessment of land which could be considered for review. The review found that the overall impact of development on the site on Green Belt purposes was moderate and recommended the site could be considered for release under exceptional circumstances and that development could be part of the enhancement of recreational opportunities in this location, the site bordering scrubland and well-used footpaths running southwards towards Stockton Brook. In order to release a site from the Green Belt the Council must be able to demonstrate that exceptional circumstances exist. Consideration needs to be given to all the relevant evidence to determine the overall suitability of the site for release from the Green Belt.
- Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations
- The site options assessments provided a summary of the key issues and responses. Responses to the comments received to the Site Options consultation in 2015 were reported to the Council Assembly on 13 April 2016 and are available on the Council's website. BE032/BE052/BE060 were not taken forward after the Site Options consultations.
- Site allocations are required to meet the District's proposed housing requirement. There is not enough brownfield land or sites or infill sites in settlements to meet the District's proposed housing requirements so green field sites have been proposed. Prioritising brown field land over greenfield in all circumstances is not part of Government policy. Any new development taking place will be subject to design policies contained within the new Local Plan.
- The Local Plan will provide certainty for local communities and developers through policies guiding the overall level and location of development. Planning applications must be determined in accordance with the Local Plan unless material considerations indicate otherwise.
- The Council has recently undertaken a Landscape, Local Green Space and Heritage Impact Study 2016 to form part of the evidence base to support the Local Plan and assess the potential heritage and landscape impacts of the development allocations. The Study found the site is of low landscape sensitivity and is suitable for development in heritage terms. There are no designated heritage assets within the 400m buffer. It states that "Site comprises a field on the southern edge of Brown Edge, enclosed by a combination of existing residential development, or trees and hedgerows. The site slopes down from a track on the north-east boundary to Willfield Lane on the south-west boundary. Thus the higher land to the north-east of the site has higher visual prominence, with long distance views available to the south-west. However development would be viewed behind and adjacent to existing development. The existing settlement edge is strong but urbanised, existing established vegetation on the south-eastern boundary could be strengthened in order to create a vegetated edge to the settlement."

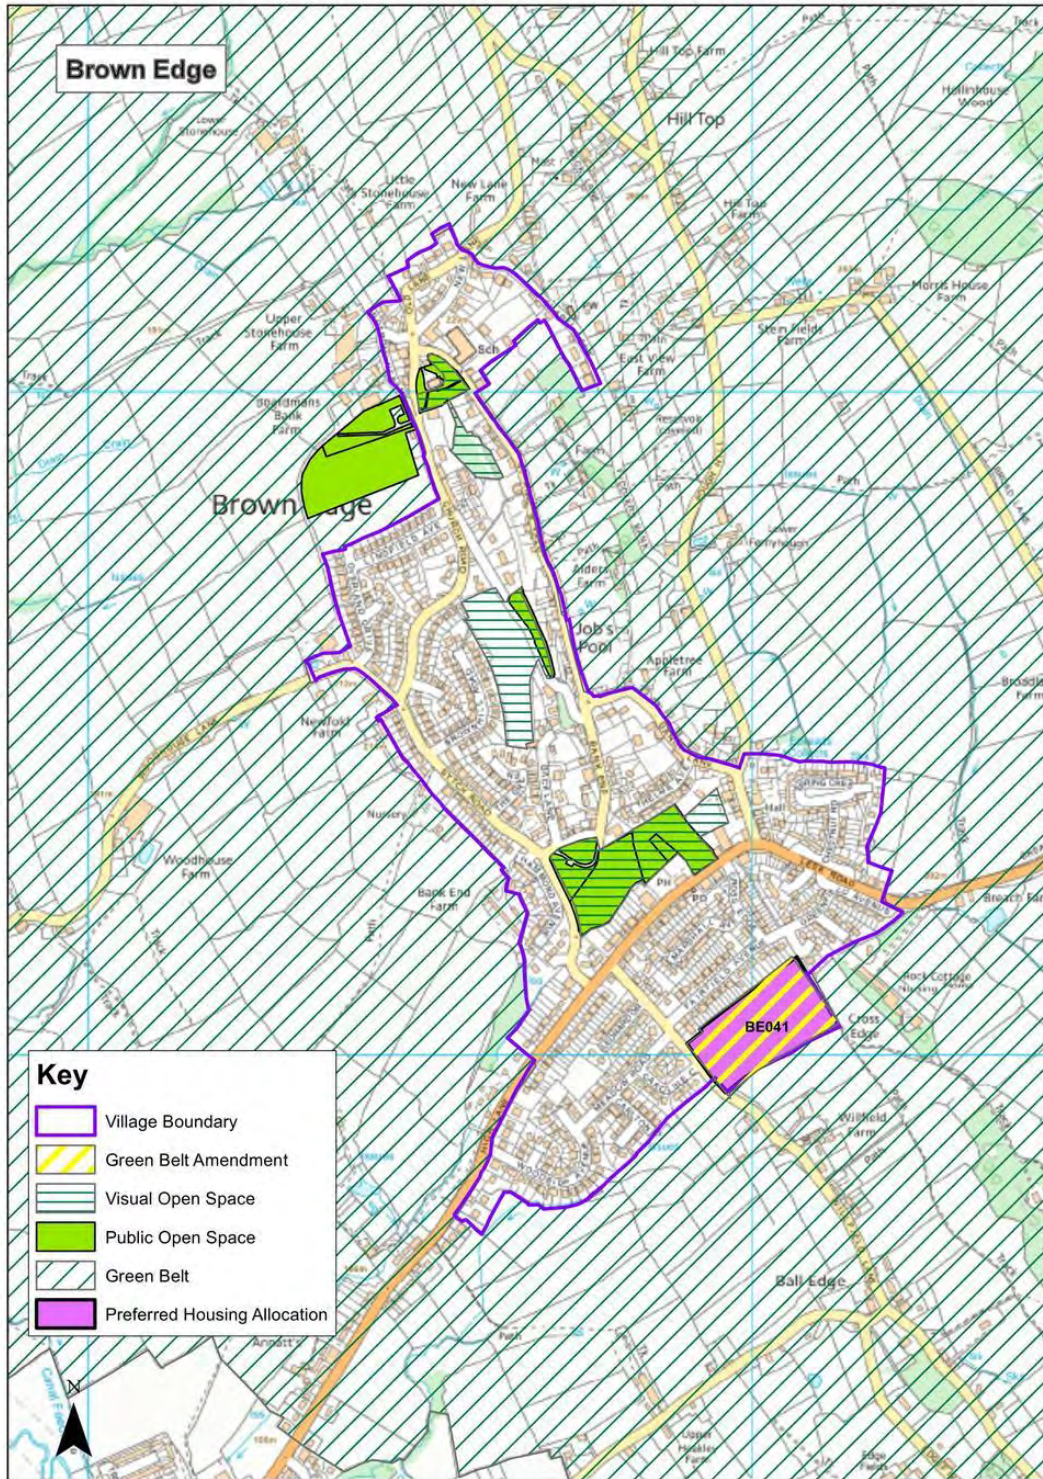

Brown Edge

BE041 East of Willfield Lane

- Brown Edge is classed as a larger village in the adopted Core Strategy.
- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure/schools to meet forecast demands. An Infrastructure/schools Delivery Plan is being prepared which will identify the infrastructure/schools necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure/schools providers is ongoing and their feedback will inform the Infrastructure/schools Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
- The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district's full housing needs, including affordable housing, whilst taking into account migration and demographic change.
- The proposals do not include a sports ground or for existing dwellings to give up their gardens
- Policies in the Local Plan will require an element of new housing provision to be affordable.
- An Open Space Sport and Recreation study is underway covering all designated public open spaces in the Staffordshire Moorlands, it will provide an audit of existing provision and highlight areas where there is a shortfall. New housing schemes depending on their size will need to incorporate areas of open space and landscaping, and also maintain existing pedestrian links as well as the consideration of new links in line with Local Plan policy.
- Public footpaths can be maintained or redirected.

Brown Edge

BE041 East of Willfield Lane

Blythe Bridge

Blythe Vale Site

Local Plan Process

- Site is designated as a Regional Investment site in the Core Strategy (Policy SS8)
- Included in the Preferred Options consultation April 2016 as proposed employment allocation

Current Position

Site taken forward into Preferred Options Local Plan:

- Site to be considered for mixed use employment and housing
- 300 houses on the northern part of the site

Key Issues

- Site is allocated for development in the Core Strategy
- Landscape, Local Green Space and Heritage Impact Study considered the site was of medium/high landscape sensitivity and recommended site specific landscape mitigation measures. Suitable for development in heritage terms
- Large site with good road & rail access
- Sustainable location
- Potential flooding issues – culvert on site/flooding hotspots nearby FRA required
- Part of the site is within the ground water source protection zones 1 & 2 identified by the Environment Agency within these zones there are limits to pollutants from entering the groundwater will require site-specific information to complete a detailed assessment of the potential effects of any planned activity.

Site Information

Greenfield/brownfield	Built up area boundary/countryside	Est. housing capacity	Area (ha)	Ownership status	Site details
Greenfield	Countryside	300	48.58	Land available. Studies

Extended Phase 1 Habitat Survey 2015 (FID 129)

Not assessed

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria.

Blythe Bridge

Blythe Vale Site

The improved grassland, arable, hardstanding, tall ruderal vegetation, buildings, species-poor hedgerow and scattered trees were of importance to nature conservation at the site level only and are not listed as important habitats in the Staffordshire SBI guidelines. However, the single length of species-rich hedgerow in the northern area of the site was considered to be of importance at the local level. There is reasonable potential that it may qualify as an SBI or a BAS dependent on further survey following the hedgerow evaluation and grading system outlined in the Staffordshire SBI guidelines. The ponds are of at least local importance to nature conservation and appear to qualify as both an SBI or a BAS. Further survey using the PSYM methodology (Predictive SYstem for Multimetrics) (Pond Conservation, 2002) would be required in order to determine the true ecological value of the site ponds.

Species recorded on site were common and widespread both at a county and national level and, subject to further survey, it is considered unlikely that the site significantly supported any notable protected species. No species listed as important in the Staffordshire SBI guidelines were recorded and therefore the site does not currently qualify for consideration as an SBI or as a BAS under these criteria. However, prior to any future development there would be a need for ponds 2 and 6 to be surveyed for great crested newts, further survey for badgers, survey for bat activity and use of trees and buildings for roosting and survey across the site for reptiles. It would be necessary to conduct nesting bird checks before vegetation clearance or other disturbance during the bird breeding season.

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement

Landscape, Local Green Space and Heritage Impact Study (August 2016)

Landscape Assessment

This site is a long standing allocation, having been allocated in the Staffordshire Moorlands Local Plan which was adopted in 1998 and subsequently included as an allocation in the Staffordshire Moorlands Core Strategy, which was adopted in 2014.

The site comprises large areas of agricultural land extending south-east from Blythe Bridge (at the junction of the A50 and A521), and located either side of the A50. The site contains some previous development, comprising residential properties and Stone House Farm on Woodlands Lane, and Woodlands farm to the south of the A50. The site is enclosed by a railway line to the south-west. The existing settlement edge to Blythe Bridge is well-defined and vegetated, with the A50 and A521 providing a strong limit to development. Development of the site could lead to coalescence between Blythe Bridge and Draycott, with physical and visual coalescence potentially arising in the northern section of the site, and visual coalescence between these two settlements arising in the southern section of the site (especially when viewed from higher ground to the south-west). Development of the site could encroach on the countryside, and adversely affect the existing settlement edge and settlement pattern.

The section of site to the south of the A50 is open with high visual prominence, particularly when viewed from the higher ground to the south-west. The section of the site to the north of A50 is semi-enclosed, with low visual prominence in the north of this section due to screening provided by hedgerows on field boundaries and the tree belts adjacent to the roads. However visual prominence increases to the south of this section as screening reduces, and this section of the site is also visible in long distance views from higher ground to the south-west. Landscape sensitivity of the site is high to the south of the A50. Sensitivity is slightly lower to the north of the A50, and lowest in the northern corner of the site (north of the A50 and to the north-west of Woodlands Lane). In order to limit potential landscape impacts additional planting could be undertaken on the edges of, and within the development, to create a strong vegetated edge and soften the appearance of the development in long distance views. Limits on the size and scale of buildings would also soften the appearance of the development. The development could also be set back from Draycott, with additional planting on this boundary, in order to limit potential coalescence issues.

Blythe Bridge

Blythe Vale Site

Section of the site to the north of the A50 and Woodlands Lane (Section A) is of medium landscape sensitivity, remainder of the section north of the A50 (Section B) is of medium-high sensitivity. Section of the site to the south of the A50 (also Section B) is of high landscape sensitivity. Site-specific landscape mitigation measures could include planting within and on the edges of the development, and limits on building sizes and scale. Please note that this study forms part of a wider evidence base to support SMDC's Local Plan. Therefore the conclusions within this report will be weighed against other evidence

Heritage Assessment

There is one Grade II Listed Building within the 400m buffer. Due to the topography of the landscape, there was no intervisibility between the site and the asset. Development would be highly unlikely to adversely affect the setting of the heritage asset. Development in this area would not adversely affect upon the HLC zone BFHECZ 2 as a whole (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms..

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 300 dwellings is considered to have a significant positive effect. Similarly, the site's good strategic location (with regional significance) has scope to have a positive effect on the vitality and viability of the wider District and could encourage investment in people, jobs and infrastructure. However, the development of greenfield land, partly within the important landscape setting to the settlement, and indicated on the predictive map of Best and Most Versatile land as an area where more than 60% of the land is likely to be BMV, is assessed as having a significant negative effect, similarly the potential ecological value of the site and the effects on climate change resulting from the likelihood of the location supporting journeys made by car, are assessed as negative.

This site is a long standing allocation, having been allocated in the Staffordshire Moorlands Local Plan which was adopted in 1998 and subsequently included as an allocation in the Staffordshire Moorlands Core Strategy, which was adopted in 2014. The site comprises large

Blythe Bridge

Blythe Vale Site

areas of agricultural land extending south-east from Blythe Bridge (at the junction of the A50 and A521), and located either side of the A50. The site contains some previous development, comprising residential properties and Stone House Farm on Woodlands Lane, and Woodlands farm to the south of the A50. The site is enclosed by a railway line to the south-west. There is one Grade II Listed Building within the 400m buffer.

The Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) considered that due to the topography of the landscape, there was no inter-visibility between the site and the asset and that development would be highly unlikely to adversely affect the setting of the heritage asset.

The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium or high landscape sensitivity. The study found that the existing settlement edge to Blythe Bridge is well-defined and vegetated, with the A50 and A521 providing a strong limit to development. It was considered that development of the site could lead to coalescence between Blythe Bridge and Draycott, with physical and visual coalescence potentially arising in the northern section of the site, and visual coalescence between these two settlements arising in the southern section of the site (especially when viewed from higher ground to the south-west). Site-specific landscape mitigation measures recommended included planting within and on the edges of the development, and limits on building sizes and scale.

Initial HRA Screening

No Likely Significant Effects (LSEs) have been identified in relation to this preferred option site.

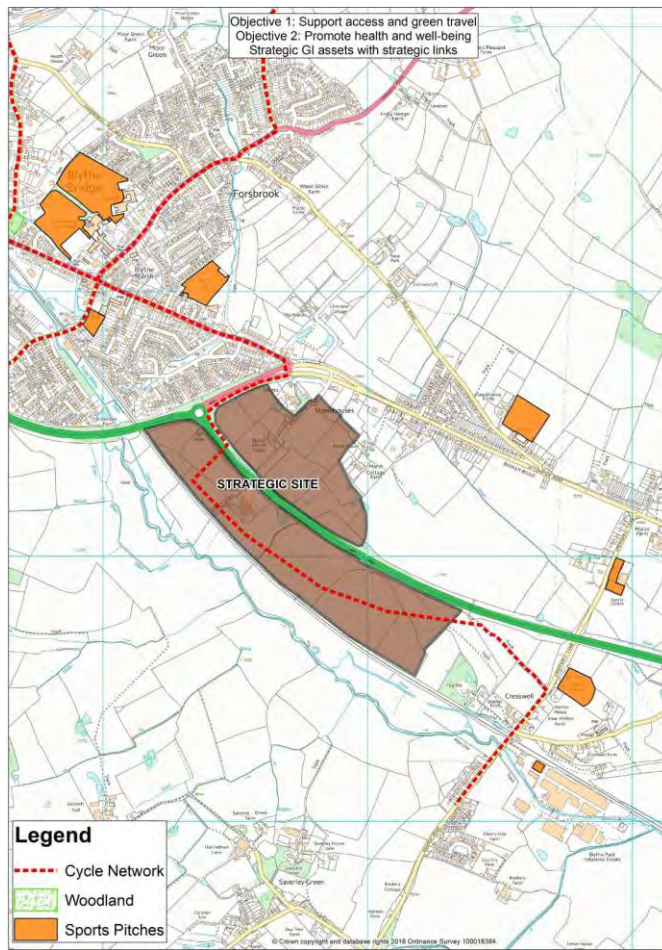

Green Infrastructure Strategy (2017)

Is within the Blythe Bridge Opportunity - a corridor linking the Bromley Wood and Hose Wood SBIs in the south with Cresswell and the proposed development site through to Forsbrook, and running north along the Foxfield Steam Railway linking Little Eaves Farm SBI with important habitats at Dilhorne Park and Godley Brook.

The potential corridor has scope to create and contribute to significant GI networks for people and wildlife as part of any development at Blythe Vale. Protect and extend green infrastructure within the corridor to improve access to surrounding settlements and links out to the surrounding countryside,

Blythe Bridge

Blythe Vale Site

Options Consultation July 2015

Not included in the consultation

Preferred Options Consultation April 2016

Statutory bodies/stakeholders

Historic England, Severn Trent, Natural England, United Utilities, Sport England, , Woodland Trust, Coal Authority, No site specific comments

Environment Agency Northern Gateway Opportunity Site (Preferred Employment Allocation). The south eastern part of this site is within Source Protection Zones 1 and 2. In line with the position statements in our 'Groundwater Protection: Principles and Practice' document (available from our website at www.gov.uk/environment-agency), there would be restrictions on the activities that can take place within Source Protection Zones 1 and 2. For example we would object to any storage of hazardous substances and would only permit the discharge to ground of clean roof water in Source Protection Zone 1.

SCC LLFA: Culvert on site recommend retains & investigate flood risk posed. Flooding hotspots nearby. Recommends early engagement with SCC and FRA.

SCC Education In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is

Blythe Bridge

Blythe Vale Site

more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded, which is covered in more detail below under the heading 'infrastructure provision'.

Agent- acting for one of the landowner objects to specific employment use suggests site should be have a flexible range of employment uses with a residential element.

Staffordshire Wildlife Trust-, Object the Northern Gateway Opportunity Site has not been covered by the Extended Phase 1 Habitat Surveys.

Stafford Borough Council Support Stafford Borough Council has a border with Staffordshire Moorlands in the Cresswell and Blythe Bridge areas. A Regional Investment Site is proposed at Blythe Vale alongside the A50 to support the Northern Gateway regeneration initiative; Stafford Borough Council supports a focus on economic development in this locality through the Regional Investment Site, an employment allocation of 8.5 hectares proposed as an extension to Blythe Business Park at Cresswell as well as the Hadleigh Park Major Developed Site within Stafford Borough.

Public response: Issues raised:

- Takes up too much Green Belt land
- Will lead to traffic problems on the Blythe Bridge roundabout & A50
- Traffic will be redirected through Blythe Bridge, Draycott & Tean
- Unnecessary in the wrong location
- This together with houses in Draycott, travellers site and houses in Cresswell will lead to chaos on the roads
- Services/facilities in Blythe Bridge inadequate for this proposal
- Will overwhelm Blythe Bridge/out of character will change from a small hamlet to urban sprawl
- Other brownfield sites that can be used for development
- Noise/light pollution
- Loss of wildlife
- Loss of views
- Impact on landscape

Council response –

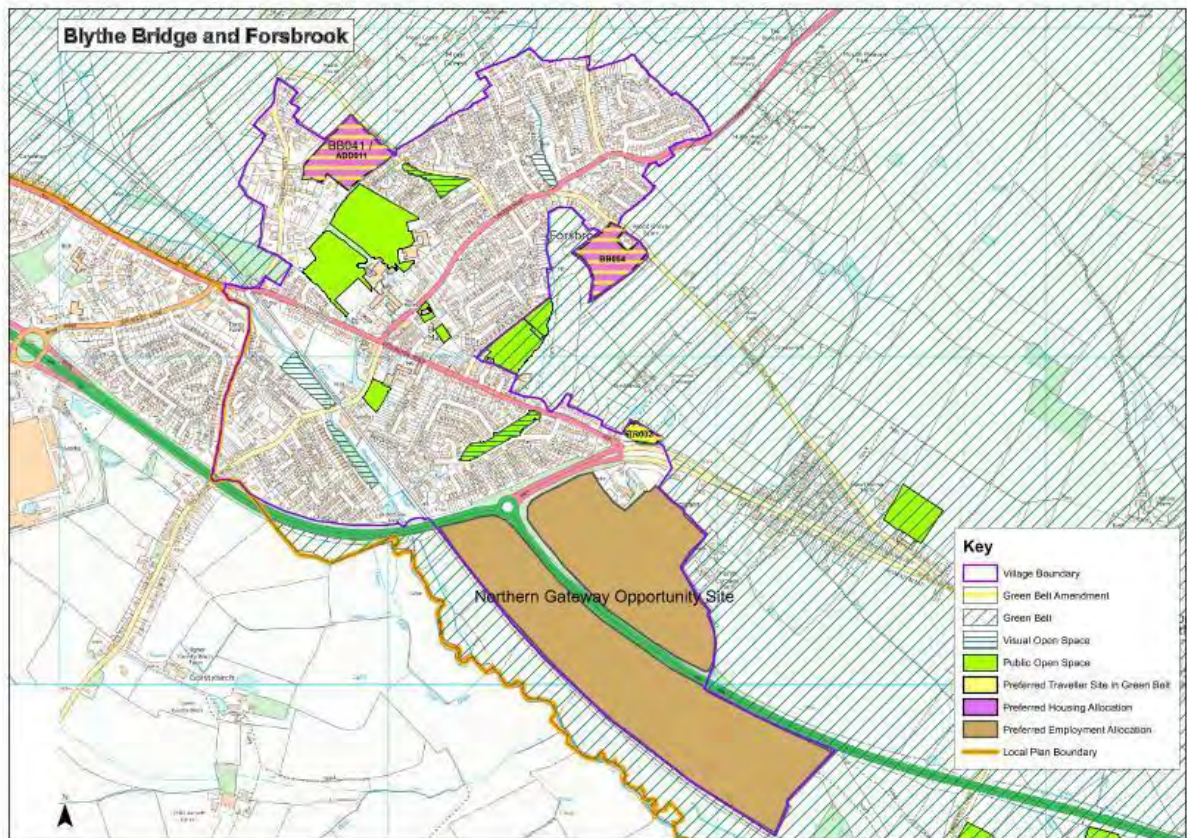

- The site is not within the Green Belt
- The site is located on a main road with substantial road frontage and it is considered subject to appropriate masterplanning it will be possible to achieve a satisfactory access to the site.
- The site is designated in the Core Strategy for high quality employment use.
- Any development will need to consider the impact on the surrounding road network
- The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district's full housing needs, including affordable housing, whilst taking into account migration and demographic change.
- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their

Blythe Bridge

Blythe Vale Site

feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.

- Development on the site would be subject to appropriate masterplanning which would consider the impact of the site on the surrounding area
- Site allocations are required to meet the District's proposed housing requirement. There is not enough brownfield land or sites or infill sites in settlements to meet the District's proposed housing requirements so green field sites need to be included.
- Any new development taking place will be subject to design policies contained within the new Local Plan
- The Council has recently undertaken a Landscape, Local Green Space and Heritage Impact Study 2016 to form part of the evidence base to support the Local Plan and assess the potential landscape impacts of the development allocations, the study found the site is of medium/high landscape sensitivity and recommended landscape mitigation measures to reduce the impact of any development.
- The Local Wildlife Assessment (2017) found the site had some biodiversity value notably one of the hedgerows and two of the ponds. The Study recommended further survey to assess the site.
- There is a policy in the Local Plan regarding the pollution

© Crown copyright and database rights 2016 Ordnance Survey 100018384.

Biddulph Moor

BM013 Land between Hot Lane & Rudyard Road

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Reduced part of the site included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances.
- Landscape, Local Green Space and Heritage Impact Study August 2016 identified that the site would have some landscape impact.
- See key issues below.

Key Issues

- Green Belt site Green Belt Review considers it is acceptable for release. Exceptional circumstances would need to be demonstrated
- Potential landscape impact on part of the site fronting Hot Lane. Suitable for in heritage terms
- Access to Parklands, Hot Lane is narrow would need to be widened
- SCC have identified potential flooding issues
- Site has potential to support to provide a habitat for amphibians and reptiles

Site Information

Greenfield/ brownfield	Built up area boundary/country side	Est. housin g capacit y	Area (ha)	Ownersh p status	Site details
Greenfield	Green Belt	45 sites BM013 BM029 BM014 a BM014 b		Land available	<ul style="list-style-type: none">• Relatively flat grass field• Road frontage to Parklands• Right of way on edge of east and west of site• One Grade II Listed Building within 400m

Studies

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has medium ecological value in its potential to support protected species. The site habitats are considered to be of medium ecological value in its potential to support protected species. The site habitats are considered to be of

Biddulph Moor

BM013 Land between Hot Lane & Rudyard Road

nature conservation value at site level only. However, more information is required regarding the potential for great crested newts and reptiles

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- Survey of the pond for the habitat suitability for great crested newts.
- Possible great crested newt survey required.
- Reptile survey required.

Extended Phase 1 Habitat Survey 2015 (is part of FID 108)

The site has fairly low potential to support protected species as the habitats are fairly newly created and fairly poorly connected to other more biodiverse habitats. However, as a pond and potential supporting habitat for amphibians and reptiles is present the site has been deemed to have district ecological importance. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- Great crested newt survey
- Reptile survey
- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment (2008)

Not within important landscape setting to the settlement

Green Belt Review 2015

(Appraised sites according to their contribution to Green Belt Purposes)

Sites BM013 & BM029 from Site Options 2015

Check Sprawl: Contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: Moderate

Together these sites would represent a significant extension of the village envelope and as such redefine the village edge against the Green Belt to the east. However, development can be contained to the east (the outer boundary being defined by substantial hedge and a footpath, and land beyond this is identified in the LCA as making a contribution to the setting of the settlement), and edge treatment would help to mitigate impact on openness in this location. Individually, BM029 would create an incoherent extension along Rudyard Road, with poor boundary definition to the north.

Recommendation: Consider for release First preference over BM014a & BM014b

Green Belt Study Additional Assessment 2016 site BM5 Land off Rudyard Road and Parklands this is part of site immediately opposite Parklands

Check Sprawl: Limited Contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Limited Contribution

Preserve Setting: Limited Contribution

Overall Impact of development on Green Belt Purposes: *The site is largely bounded and development would be modest infill. The absence of a defined northwestern boundary could be problematic*

Biddulph Moor

BM013 Land between Hot Lane & Rudyard Road

Recommendation: *Potential for release under Exceptional Circumstances reflecting the enclosed character of the site, although a northwestern boundary is absent. Extend village boundary to incorporate the site.*

Landscape, Local Green Space and Heritage Impact Study August 2016.

Landscape

The site is located on the north-eastern edge of Biddulph Moor, between Hot Lane and Rudyard Road. The site is L-shaped with arbitrary boundaries, comprising sections of fields which enclose a residential property (51 Rudyard Road). Visual prominence of the site increases to the east, as the distance from the settlement edge increases. The site is open to the north, and long distance views are available from this direction. If the site was to be developed planting should be undertaken along this boundary in order to reduce the visual prominence of the development. The western edge of site is partially enclosed by adjacent vegetation and development, and has low visual prominence. Development of site should be considered in combination with the adjacent reserve site, as this would allow a clearly defined settlement edge to be created. Development within the boundaries of this site alone would adversely affect the existing well-defined settlement edge.

Western section of the site (Section A) is of low landscape sensitivity. Eastern section of site (Section B) is of medium landscape sensitivity. Site-specific landscape mitigation measures could include phased development (ensuring site is developed in combination with the adjacent reserve site) and additional advanced planting adjacent to Hot Lane.

Heritage

There is one Grade II building within the 400m buffer. There was no intervisibility between the site and asset due to the topography and intervening buildings. Development would be highly unlikely to cause adverse effects to the setting of the asset. The site is located within the HLC zone BBHECZ 12 (Historic Environment Character Assessment 2010). Development would be highly unlikely to cause adverse effects to the zone.

Site suitable for development in heritage terms.

Biddulph Moor

BM013 Land between Hot Lane & Rudyard Road

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 65 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and the ecological value of the site.

Options Consultation July 2015

Statutory bodies/stakeholders:

SCC Highways – May be acceptable depending on access location and design and provision of visibility splays. Possibly some frontage development to Parklands. Hot Lane would need to be widened on the frontage. Pedestrian links will be required.

Developer/Agent/Owner – Land available

Public response

32 comments – all objections.

Issues raised

- Infrastructure – Schools – village school is over-capacity and so are schools in Biddulph.
- Infrastructure - Traffic / Transport – traffic from site cannot exit onto Hot Lane as this is single track so would have to access onto Rudyard Road which is very busy – could not cope with additional traffic, very narrow, in a poor state of repair, problems with speeding traffic, Woodhouse Lane is a dangerous road with steep inclines and sharp bends. HGV's cannot easily utilise without causing blockages, increased commuters, site fronts a single carriageway without footpaths – concerned about safety of pedestrians, new development needs sufficient off-road parking
- Infrastructure – Other – poor bus service, ends at 3.30pm, no mains gas so strain on electricity supply – more power cuts, lack of parks, childrens services, childcare, doctors etc., no transport funding to transport children to middle and high school in Biddulph, only 1 playground in a poor state of repair, sewers at full capacity, doctors and dentists in Biddulph struggling to cope at present.
- Landscape – Properties on Rudyard Road currently have outstanding views of the Cheshire plains.
- Nature Conservation - these sites are a haven for wildlife; the grass, hedgerows and trees provide food and cover for many species of birds and animals for example kestrels can regularly be seen hunting as can foxes.
- Flood Risk – there is a pool on the site and there is already a problem with flooding on Rudyard Road and on the site BM013. When it rains there is a torrent which runs from the farm above Farmside Lane down to Parklands because the drains cannot cope with the current surface runoff. An increase in development would make this problem even worse.
- Amenity (e.g. noise, privacy, loss of light) – query what type of housing is proposed – single storey, 2 storey, 3 storey as this needs to be in line with demand particularly for affordable housing, the roofline of any development housing should be seriously considered. Obscuring the view of long

Biddulph Moor

BM013 Land between Hot Lane & Rudyard Road

established residents must be avoided. Many house owners have chosen to live here for the view, the landscape greenness, the sense of space, increased noise levels. Human Rights of existing residents will also be compromised by the proposals with regard to the council's responsibilities under the Human Rights Act, Protocol 1, Article 1 and, in particular, with regard to Article 8 of the Human Rights Act. In the case of *Britton vs SOS* the courts reappraised the purpose of the law and concluded that the protection of the countryside falls within the interests of Article 8. Private and family life therefore encompasses not only the home but also the surroundings, adverse impact on tourism.

- Scale of development - Loss of village identity.
- Government Policy – Land is greenbelt so should be protected. Plenty of brown field land in Staffs Moorlands to develop.
- Other - over 25 houses for sale in village which have been for sale for over a year plus empty and derelict houses in the area – new houses will make it more difficult to sell these, no jobs in village, new people do not involve themselves in village life, concern about light pollution – new development will mean more street lights, suggest allowing road infill: e.g. parts of New Street, Spode Farm and the top of Woodhouse Lane between Over the Hill and Church Lane, why are 327 houses being proposed in Biddulph Moor? BMO13 would make an ideal village green• with community access to the Village Hall, the recreational, sports and play facilities. These need to be updated and enlarged. The building of a few houses encircling this (perhaps with a safe ornamental pond) and additional sensitively-arranged car-parking would make a feature ensuring its aesthetically-welcoming identity rather than being a group of faceless buildings, loss of agricultural land, confusion over consultation maps and difference between SHLAA maps and Site Options maps and consider online portal is difficult to use.

Council response –

The District Council is working with the County Council on the issue of school capacity. The County has determined that additional school provision would be required to support housing growth in Biddulph at the Primary phase of education. This also applies to Biddulph Moor. At this early stage in the site selection process there are a number of options for delivering school capacity dependant on the sites selected to take forward.

- The Highway Authority does not raise any insurmountable issues in relation to development of this site – footpaths can be provided as part of a development scheme.
- New development is the main way to deliver new or improved infrastructure e.g. more residents may support an improved bus service, and provision of a mains gas supply. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. childrens' play areas, footpaths. Similarly, doctors and dentists in Biddulph will assess their capacity needs as a result of new development at Biddulph and Biddulph Moor so that provision can be made to accommodate new residents.
- United Utilities has advised that if appropriate measures for surface water disposal are included within development schemes then there should be no detrimental impact on the capacity of their infrastructure.

Biddulph Moor

BM013 Land between Hot Lane & Rudyard Road

- The Council has a Landscape & Settlement Setting Study and this site is not identified as being important landscape setting to the settlement. Views from individual properties are not protected in planning law.

- The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed.

The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process.

- Amenity – issues such as overlooking, particular house types and off-road parking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.

- The Council has carefully considered the case of Britton and has concluded that the site selection process does not contravene Article 8 (as it now is) of the Human Rights Act 1998. The local plan process which is being followed is in accordance with the law and is not one which determines or directly affects an arguable civil right (see the case of Bovis Homes Ltd v New Forest District Council [2002] EWHC 483). The grant or refusal of planning permission would qualify (as in the Britton case) because it has direct consequences for a landowner. The local plan process is subject to a statutory process which allows for objections to be made and considered before adoption takes place. Once adopted it does not of itself determine property rights, even though it might be highly influential on the outcome of a planning application, because there always remains a discretion to the decision-maker. A local plan once adopted does not affect the current use or enjoyment of land; nor the right to seek planning permission; nor ownership rights.

- It is not considered that development of this particular site would be out of proportion with the rest of the village. Any new development taking place will be subject to design policies contained within the new Local Plan – which will be subject to public consultation next year.

- The land in question is within the Green Belt. In order for Biddulph Moor to accommodate new development, the Green Belt boundary will need adjustment as there are no sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site BM013 for release from the Green Belt.

- Housing requirements in the Staffordshire Moorlands are in addition to existing properties even if these are for sale or derelict. New employment areas are proposed in nearby Biddulph. The consultation is on site options so 327 houses are not being proposed they are just options. A village green in this location is unlikely to be deliverable as the land is privately owned.

Preferred Options Consultation April 2016

Biddulph Moor

BM013 Land between Hot Lane & Rudyard Road

Statutory Bodies

Historic England, Severn Trent, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Environment Agency- No site specific comments Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate

SCC Transport- Access should be onto Rudyard Road as Hot Lane is very narrow in places. However consideration could be given with access onto Parklands with improvements.

SCC LLFA-Flooding hotspots. Known flooding problem with highway to north of site. Pond & watercourse on site. Recommend developer has early engagement with SCC

SCC Education In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded, which is covered in more detail below under the heading 'infrastructure provision'.

Biddulph Neighbourhood Plan Working Group- As has been previously stated the requirements for the village should be met by infill. This could be using the frontage only of designated sites where they adjoin the road. The village cannot take one large development.

Sites recommended for inclusion in the Local Plan:

BM013 (fronting Rudyard Road and Parklands) - Only use land fronting parklands and Rudyard Road. Housing only 1 deep (Needs further consultation), recommended for inclusion.

BM029 - This is linked with BM013 and as has been stated there should be no large development on Biddulph Moor, only build houses 1 deep fronting onto Rudyard Road, recommended for inclusion.

BM014a - Housing only built fronting New St, recommended for inclusion.

BM014b - Housing only built fronting Chapel Lane, recommended for inclusion.

Fronting Farmhouse Lane - Build on frontage from existing houses at top to bungalows at bottom 1 deep, recommended for inclusion.

Fronting Woodhouse Lane (from Weathercock Farm) - Build on frontage 1 house deep only

Biddulph Moor

BM013 Land between Hot Lane & Rudyard Road

New site needs investigation, recommended for inclusion.

Sites not recommended for inclusion in the Local Plan:

BM013 (whole site) - As has been stated there should be no large development on Biddulph Moor, not recommended for inclusion.

Public response :

Issues raised:

Support

- Support some infill along Hot Lane, Rudyard Road, New Street & Chapel Lane

Objections

- Object to building 45 houses between Rudyard Road & Hot Lane
- Road safety issues
- Would lose village status
- 45 is too many
- Inadequate bus service
- Hot Lane is unsuitable for housing is single track in one direction
- Traffic is a problem on Rudyard Road, an increase in traffic would make the situation worse
- Lack of infrastructure bus service inadequate, village school capacity
- Would prefer development on infill sites
- Site floods and surrounding properties prone to flooding development would exacerbate this
- Site should be retained as green belt

Council Response

- The Highway Authority does not raise any insurmountable issues in relation to development of this site – footpaths can be provided as part of a development scheme.
- The total number of houses proposed on all sites for the village is 45, BM13 would only comprise part of this
- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
- Site allocations are required to meet the District's proposed housing requirement. There is not enough brownfield land or sites or infill sites in settlements to meet the District's proposed housing requirements so green field sites need to be included. Any new development taking place will be subject to design policies contained within the new Local Plan.

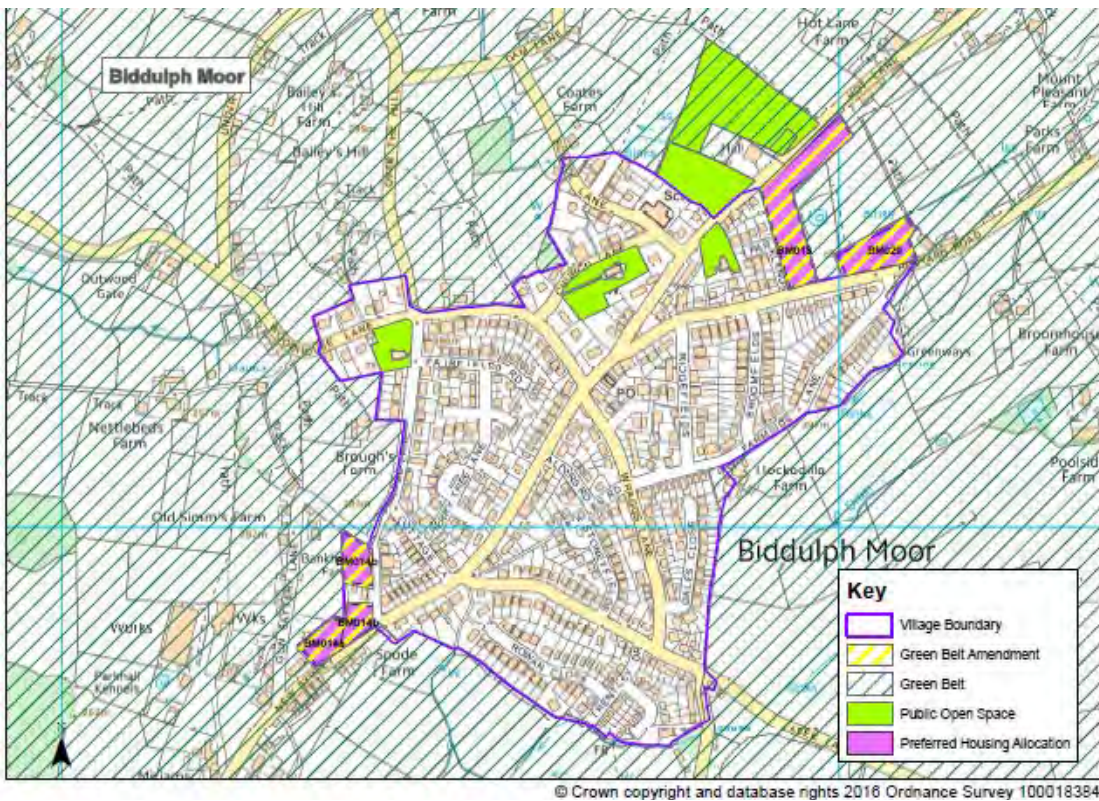

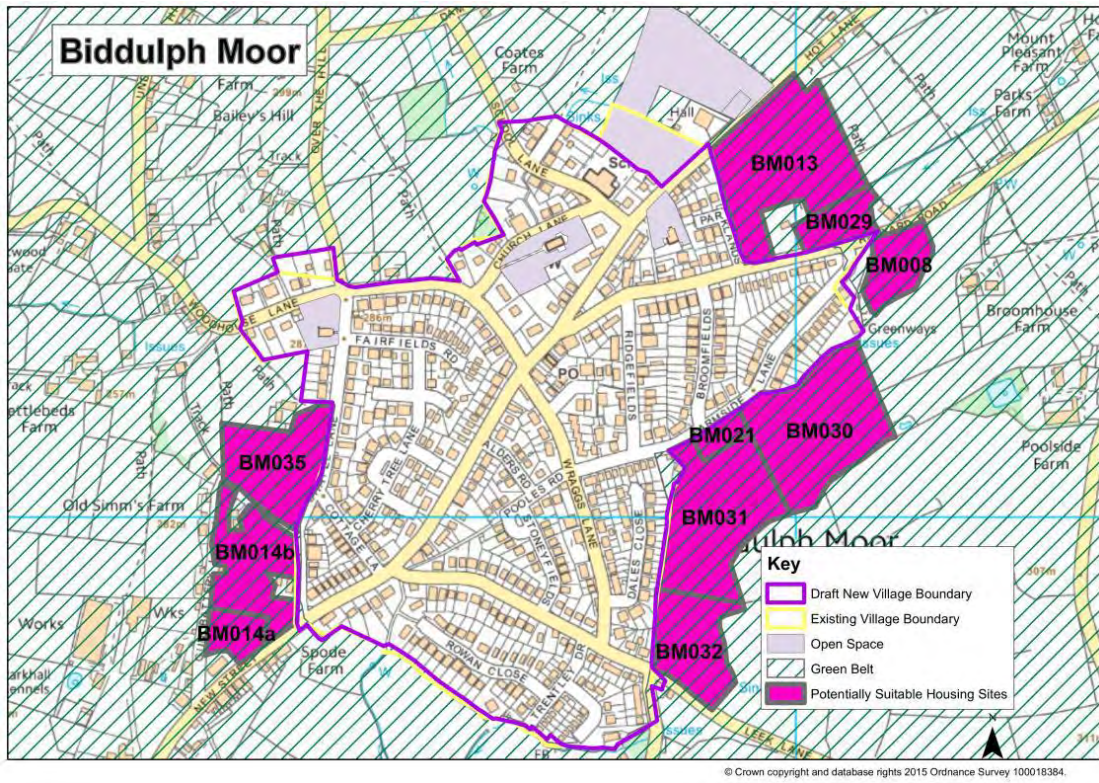

Biddulph Moor

BM013 Land between Hot Lane & Rudyard Road

- The land in question is within the Green Belt. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). Two assessments of this site were carried out; both considered there was potential to consider the site for development as its contribution to green belt purposes were moderate. The first assessment in 2015 looked at the larger site from Site Options consultations and found it was first preference for release from the green belt over sites BM014a & BM014b, the second 2016 looked at the southern half of the site opposite Parklands it recommended there was potential for Green Belt release although it recognised that the absence of a northwestern boundary could be problematic
- The Environment Agency has not identified any site specific issues. They recommend that the ecological value of watercourses is enhanced where possible and the impact on water quality is assessed. The Council has completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. Mitigation measures will be taken as part of the site development to address any surface water issues.
- SCC Lead Local Flood Authority identifies potential flooding Flooding hotspots. Known flooding problem with highway to north of site. Pond & watercourse on site. Recommend developer has early engagement with SCC
- Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations
- The land in question is in private ownership and the landowner is willing to develop the site for residential development
- Site BM013 also includes part of the land fronting Hot Lane

Biddulph Moor

BM013 Land between Hot Lane & Rudyard Road

Biddulph Moor

BM014a

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Reduced part of the site included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements.
- The site is in the Green Belt the Green Belt Review considered it had potential for release under “very special circumstances”
- Landscape, Local Green Space and Heritage Impact Study August 2016 identified that the site was of medium landscape sensitivity.
- See key issues below.

Key Issues

- Green Belt site. Green Belt Review considers it had potential for release under “very special circumstances”
- Access acceptable subject to access design & adequate visibility. May need part of BM014b.
- Potential landscape impact. Landscape, Local Green Space and Heritage Impact Study found site was of medium landscape sensitivity and should be developed with BM014b and adjacent reserve site. Site is suitable for development in heritage terms.

Studies

Local Wildlife Assessment (ECUS, 2017) BM014A & BM014B (Southern Part)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has medium ecological value in its potential to support protected species.

The site habitats are considered to be of nature conservation value at the site level only. These habitats are not listed as important habitats in the Staffordshire SBI

Biddulph Moor

BM014a

guidelines and therefore the site does not currently qualify for consideration as an SBI or as a BAS under these criteria.

Species recorded on site were common and widespread both at a county and national level and it is considered highly unlikely that the site supported notable protected species. No species listed as important in the Staffordshire SBI guidelines were recorded and therefore no part of the site currently qualifies for consideration as an SBI or as a BAS under these criteria.

Further survey for badger should be undertaken prior to any future development and it would be necessary to conduct nesting bird checks before vegetation clearance or other disturbance during the bird breeding season.

Extended Phase 1 Habitat Survey 2015

Not assessed

Landscape & Settlement Character Assessment (2008)

Within important landscape setting to settlement

Landscape, Local Green Space and Heritage Impact Study August 2016

Landscape

315 New Street

The site comprises part of the private garden of a residential property (315 New Street) on the south-western edge of the settlement. The site is generally enclosed by development. However the site in isolation does not relate to the settlement pattern. The scattered, low density development surrounding the site does not contribute to a well-defined settlement edge. Development of the site could assist in the creation of a stronger settlement edge if undertaken in combination with the adjacent reserve site, and BM014b. Development of the site in isolation would not contribute to the creation of a well-defined settlement edge.

Site is of medium landscape sensitivity. Site-specific landscape mitigation measures could include phased development (ensuring site is developed in combination with BM014b and the adjacent reserve site, accompanied by an overall landscape mitigation plan to cover these three sites)

Heritage

315 New Street

There are no designated heritage assets within the 400m buffer. The site is located within the HLC zone BBHECZ 11 (Historic Environment Character Assessment 2010). Development would be highly unlikely to cause adverse effects to the zone.

Site suitable for development in heritage terms.

Green Belt Review 2015

(Appraised sites according to their contribution to Green Belt Purposes)

Sites BM014a & BM014b (larger sites from Site Options 2015)

Check Sprawl: Limited contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Limited contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: Moderate

Two well-enclosed parcels which would provide logical infill, between Gun Battery Lane and Chapel Lane. However, they are part of a fragmented development pattern

Site 1 Land off New Street (smaller sites from Preferred Options 2016)

Check Sprawl: Limited contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Limited contribution

Preserve Setting: Limited contribution

Overall Impact of development on Green Belt Purposes: The site is largely bounded and development

would be modest infill. The absence of a defined north western boundary could be problematic

Recommendation Potential for release under Very Special Circumstances reflecting the enclosed character of the site. Retain existing village boundary.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and the ecological value of the site.

Options Consultation July 2015

Statutory bodies/stakeholders:

SCC Highways –

Acceptable subject to access design and adequate visibility. May require part of BM014b to provide visibility.

Developer/Agent/Owner – Land available

Public response

BM0014a 24 comments – all objections.

Issues raised

- Infrastructure – School in the village and Biddulph schools do not have adequate places.
- Infrastructure - Traffic / Transport – roads are very busy, very narrow, in a poor state of repair, Woodhouse Lane is a dangerous road with steep inclines and sharp bends, HGV's cannot easily utilise without causing blockages, increased commuters, area is between the main road in the village and an unadopted road.
- Infrastructure – Other – poor bus service, ends at 3.30pm, no mains gas so strain on electricity supply – more power cuts, only 1 playground in a poor state of repair, sewers at full capacity, doctors and dentists in Biddulph struggling to cope at present.
- Landscape – would spoil the approach to the village.

Biddulph Moor

BM014a

- Nature Conservation - these sites are a haven for wildlife; the grass, hedgerows and trees provide food and cover for many species of birds and animals for example kestrels can regularly be seen hunting as can foxes.
- Flood Risk - concern about surface water run off as the water table is high in this area, the fields are waterlogged and tarmac is already being eroded during wet weather. There are many underwater springs.
- Amenity (e.g. noise, privacy, loss of light) – loss of open views to Mow Cop and across the Cheshire Plain, increase noise levels, Human Rights of existing residents will also be compromised by the proposals with regard to the council's responsibilities under the Human Rights Act, Protocol 1, Article 1 and, in particular, with regard to Article 8 of the Human Rights Act. In the case of Britton vs SOS the courts reappraised the purpose of the law and concluded that the protection of the countryside falls within the interests of Article 8.
- Private and family life therefore encompasses not only the home but also the surroundings.
- Scale of development - Loss of village identity.
- Government Policy – Land is greenbelt so should be protected – would reduce gap between Biddulph and Biddulph Moor, plenty of brown field sites to develop in Staffs Moorlands instead, this is the only green space left in the village.
- Other – area appears to be garden of adjoining property, over 25 houses for sale in village which have been for sale for over a year plus empty and derelict houses in the area – new houses will make it more difficult to sell these, no jobs in village, new people do not involve themselves in village life, loss of agricultural land, online portal is not very user friendly.
- Residential development could affect nearby business (MCL Ltd) and result in pressure to restrict business use.

Council response –

The District Council is working with the County Council on the issue of school capacity. The County has determined that additional school provision would be required to support housing growth in Biddulph at the Primary phase of education. This also applies to Biddulph Moor. At this early stage in the site selection process there are a number of options for delivering school capacity dependant on the sites selected to take forward.

- The Highway Authority does not raise any difficulties in relation to development of this site – footpaths can be provided as part of a development scheme and roads can be adopted, subject to required improvements if necessary.
- New development is the main way to deliver new or improved infrastructure e.g. more residents may support an improved bus service, and provision of a mains gas supply. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. childrens' play areas, footpaths. Similarly, doctors and dentists in Biddulph will assess their capacity needs as a result of new development at Biddulph and Biddulph Moor so that provision can be made to accommodate new residents.
- United Utilities has advised that if appropriate measures for surface water disposal are included within development schemes then there should be no detrimental impact on the capacity of their infrastructure.

Biddulph Moor

BM014a

- The Council has a Landscape & Settlement Setting Study and this site is identified as being important landscape setting to the settlement. Views from individual properties are not protected in planning law.
- The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed.
- The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process.
- Amenity – issues such as overlooking, particular house types, off-road parking and proximity to other uses will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.
- The Council has carefully considered the case of Britton and has concluded that the site selection process does not contravene Article 8 (as it now is) of the Human Rights Act 1998. The local plan process which is being followed is in accordance with the law and is not one which determines or directly affects an arguable civil right (see the case of Bovis Homes Ltd v New Forest District Council [2002] EWHC 483). The grant or refusal of planning permission would qualify (as in the Britton case) because it has direct consequences for a landowner. The local plan process is subject to a statutory process which allows for objections to be made and considered before adoption takes place. Once adopted it does not of itself determine property rights, even though it might be highly influential on the outcome of a planning application, because there always remains a discretion to the decision-maker. A local plan once adopted does not affect the current use or enjoyment of land; nor the right to seek planning permission; nor ownership rights.
- It is not considered that development of this particular site would be out of proportion with the rest of the village. Any new development taking place will be subject to design policies contained within the new Local Plan – which will be subject to public consultation next year.
- The land in question is within the Green Belt. In order for Biddulph Moor to accommodate new development, the Green Belt boundary will need adjustment as there are no sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site BM014a and neighbouring BM014b for release from the Green Belt.
- Housing requirements in the Staffordshire Moorlands are in addition to existing properties even if these are for sale or derelict. New employment areas are proposed in nearby Biddulph.

Preferred Options Consultation April 2016

Statutory Bodies

Biddulph Moor

BM014a

Historic England, Severn Trent, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Environment Agency- No site specific comments Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate

SCC Education In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded, which is covered in more detail below under the heading 'infrastructure provision'.

SCC LLFA No issues FRA required

Public Response

Issues raised

- Support some infill along Hot Lane, Rudyard Road, New Street & Chapel Lane
- Insufficient infrastructure eg doctors, primary, school is full, sewers
- No employment
- Roads including approach roads to the village cannot cope with traffic
- Limited pavements
- Roads used as cut throughs
- Traffic congestion/safety
- Houses not needed are houses for dale
- No natural gas so heating costly
- Limited public transport
- Development will lead to Biddulph Moor joining Biddulph
- Site is home to a range of wildlife
- Planning applications have been refused

Council Response

- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery

Biddulph Moor

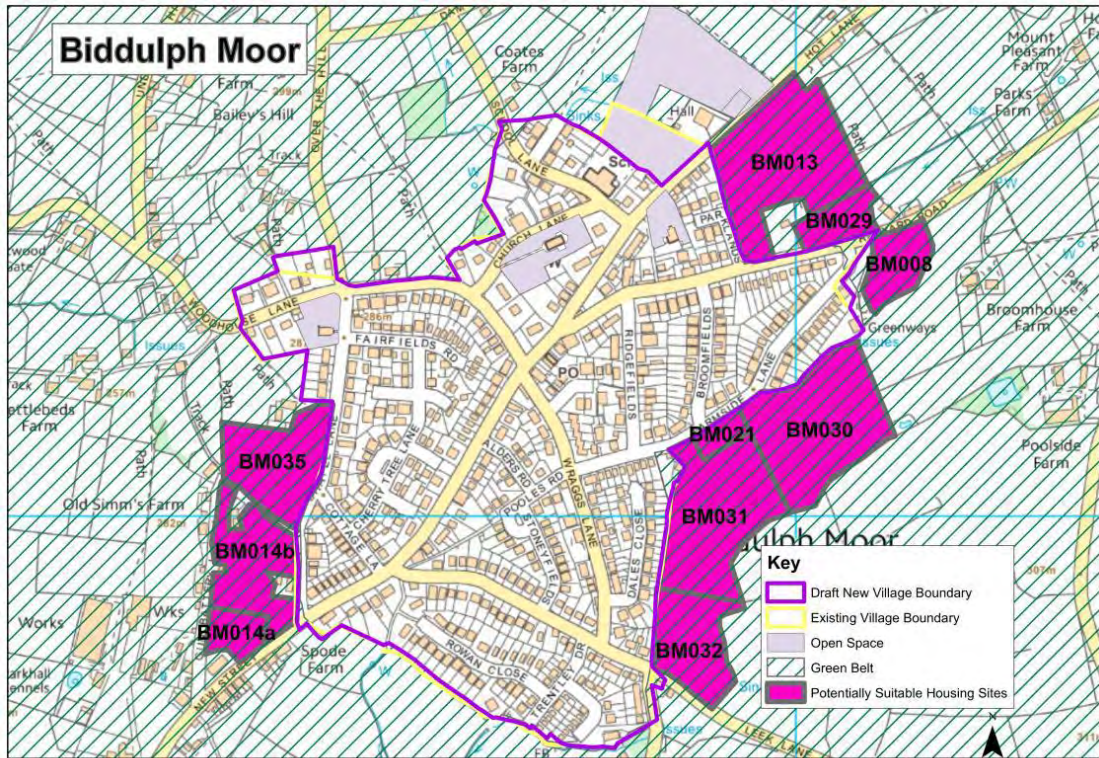

BM014a

Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered

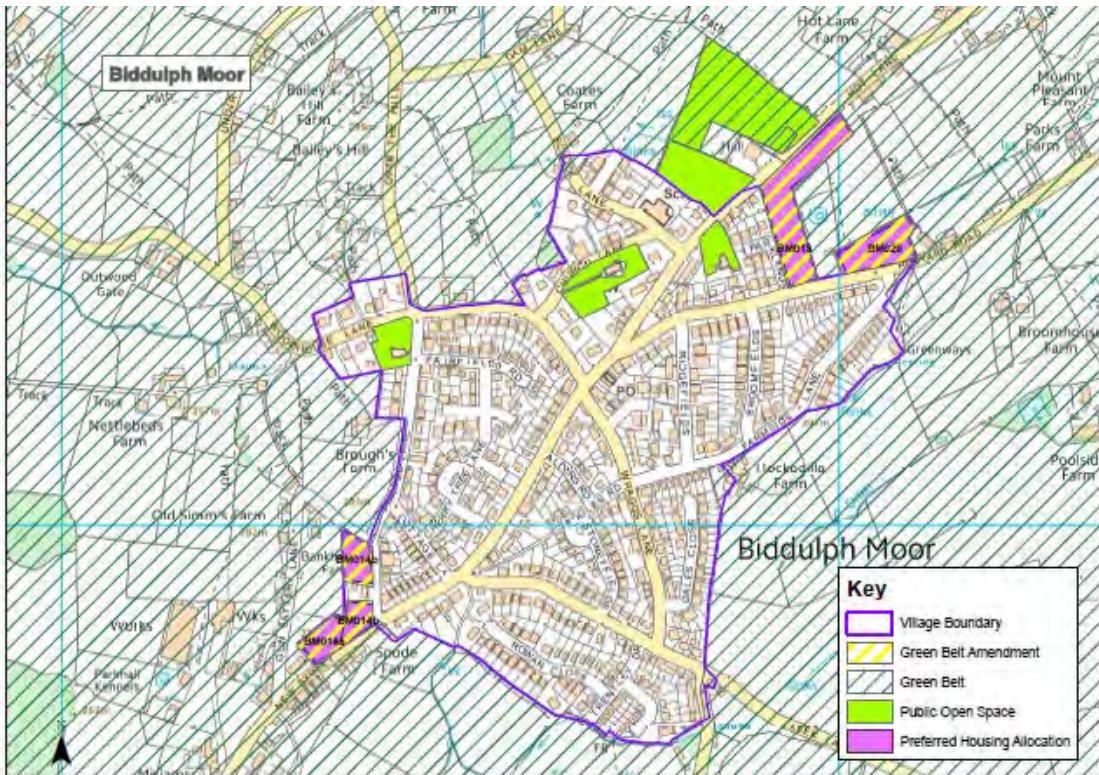

- The Highway Authority does not raise any difficulties in relation to development of this site – footpaths can be provided as part of a development scheme
- The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district's full housing needs, including affordable housing, whilst taking into account migration and demographic change.
- An assessment of the District's employment land requirements was carried out in The Employment Land Requirement Study the draft Local Plan proposes employment allocations/policies to meet this need. New employment areas are proposed in nearby Biddulph
- The land in question is within the Green Belt. The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a more detailed site-based assessment of land which could be considered for review. The review found that the overall impact of development on the site on Green Belt purposes was moderate and recommended the site could be considered for release under exceptional circumstances. Second preference after sites BM014a/BM014b
- The site was not assessed in the Extended Phase 1 Habitat Survey. An ecological assessment of the site is being undertaken and will inform the suitability of the site for allocation.
- A current planning application for development will be determined with regard to the existing policies in the Development Plan. The Preferred Options consultation is to consult on a new Local Plan for the District which will contain revised and updated policies to meet future development needs

Studies

Local Wildlife Assessment (ECUS, 2017)

BM014A & BM014B (Southern Part)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has medium ecological value in its potential to support protected species.

The site habitats are considered to be of nature conservation value at the site level only. These habitats are not listed as important habitats in the Staffordshire SBI guidelines and therefore the site does not currently qualify for consideration as an SBI or as a BAS under these criteria.

Species recorded on site were common and widespread both at a county and national level and it is considered highly unlikely that the site supported notable protected species. No species listed as important in the Staffordshire SBI guidelines

Biddulph Moor

BM014b

were recorded and therefore no part of the site currently qualifies for consideration as an SBI or as a BAS under these criteria.

Further survey for badger should be undertaken prior to any future development and it would be necessary to conduct nesting bird checks before vegetation clearance or other disturbance during the bird breeding season.

Extended Phase 1 Habitat Survey 2015 (part of the site is within FID 110)

The site has fairly low potential to support protected species as the habitats are species poor and fairly poorly connected to the wider countryside, therefore the site is considered to have low ecological value.

The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment (2008)

Green Belt Review 2015

(Appraised sites according to their contribution to Green Belt Purposes)

Sites BM014a & BM014b (larger sites from Site Options 2015)

Check Sprawl: Limited contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Limited contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: Moderate

Two well-enclosed parcels which would provide logical infill, between Gun Battery Lane and Chapel Lane. However, they are part of a fragmented development pattern on this sensitive side of the village. The land is identified in the LCA as making a contribution to the setting of the settlement.

Recommendation Consider for release under exceptional circumstances. Second preference after BM013/BM029

Green Belt Review Additional Site Appraisals 2016

(Appraised sites according to their contribution to Green Belt Purposes)

Site 2 Land off Chapel Lane (smaller sites from Preferred Options 2016)

Check Sprawl: Limited contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Limited contribution

Preserve Setting: Limited contribution

Overall Impact of development on Green Belt Purposes: The site is clearly bounded and development

would be modest infill.

Recommendation Potential for release under Very Special Circumstances reflecting the enclosed character of the site. Retain existing village boundary.

Landscape, Local Green Space and Heritage Impact Study August 2016

Bankhouse Farm

Landscape

The site comprises two small fields divided by Bankhouse Farm on Chapel Street, on the south-western edge of the settlement. The site is generally enclosed by development, and is within the settlement form. The adjacent settlement edge to the east of the site is well-defined, and development of the site could maintain this.

However the scattered, low density development surrounding to the west of the site

Biddulph Moor

BM014b

does not contribute to a well-defined settlement edge. Development of the site could assist in the creation of a stronger settlement edge if undertaken in combination with the adjacent reserve site, and BM014a.

Site is of low landscape sensitivity.

Heritage

There are no designated heritage assets within the 400m buffer. The site is located within the HLC zone BBHECZ 11 (Historic Environment Character Assessment 2010). Development would be highly unlikely to cause adverse effects to the zone.

Site suitable for development in heritage terms.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 25 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect, as could its location away from historic assets and designated assets. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect.

Options Consultation July 2015

Statutory bodies/stakeholders:

SCC Highways –

Acceptable subject to access design and provision of adequate visibility splays and pedestrian facilities. Widening of Chapel Lane will be appropriate, which may need land from Gun Battery Lane.

Developer/Agent/Owner – Land available

Public response

26 comments – all objections

Issues raised

BM014b

- Infrastructure – Schools – query whether village school could handle additional pupils, schools in Biddulph do not have capacity.
- Infrastructure - Traffic / Transport – access onto New Street from Chapel Lane and Cottage Lane is difficult, roads are very busy, very narrow, in a poor state of repair, increased commuters, site is between main road through the village and an unadopted road, issues with HGV access, pedestrian safety, speeding traffic, Woodhouse Lane is a dangerous road with steep inclines and sharp bends - HGV's cannot easily utilise without causing blockages.
- Infrastructure – Other – poor bus service, ends at 3.30pm, no mains gas so strain on electricity supply – more power cuts, problems with existing sewer, only 1 playground in a poor state of repair, sewers at full capacity, doctors and dentists in Biddulph struggling to cope at present.
- Landscape – would spoil the approach to the village and its natural beauty, impact on the skyline from Biddulph Valley.
- Nature Conservation – these sites are a haven for wildlife; the grass, hedgerows and trees provide food and cover for many species of birds and animals for example kestrels can regularly be seen hunting as can foxes.

Biddulph Moor

BM014b

- Flood Risk – Concern about surface water run off as the water table is high in this area, the fields are waterlogged and tarmac is already being eroded during wet weather. There are many underwater springs.
- Amenity (e.g. noise, privacy, loss of light) – construction work will disturb existing residents. Human Rights of existing residents will also be compromised by the proposals with regard to the council's responsibilities under the Human Rights Act, Protocol 1, Article 1 and, in particular, with regard to Article 8 of the Human Rights Act. In the case of *Britton vs SOS* the courts reappraised the purpose of the law and concluded that the
- protection of the countryside falls within the interests of Article 8. Private and family life therefore encompasses not only the home but also the surroundings.
- Scale of development - Loss of village identity.
- Government Policy – Land is greenbelt so should be protected, would significantly reduce the gap between Biddulph and Biddulph Moor, plenty of brown field sites in Staffs Moorlands to develop instead, this is the only green space left in the village.
- Other – only green space left in the village – concerned that if this is developed the village will become part of a town, over 25 houses for sale in village which have been for sale for over a year plus empty and derelict houses in the area – new houses will make it more difficult to sell these, houses already available to buy in all price brackets so no need for any more, no jobs in village, new people do not involve themselves in village life, loss of public rights of way, Chapel Lane forms a clear visual boundary to the village, housing target could be achieved by infill, loss of agricultural land, online portal is not very user friendly.
- Residential development could affect nearby business (MCL Ltd) and result in pressure to restrict business use.

Council response –

The District Council is working with the County Council on the issue of school capacity. The County has determined that additional school provision would be required to support housing growth in Biddulph at the Primary phase of education. This also applies to Biddulph Moor. At this early stage in the site selection process there are a number of options for delivering school capacity dependant on the sites selected to take forward.

- The Highway Authority does not raise any insurmountable issues in relation to development of this site – footpaths can be provided as part of a development scheme if necessary.
- New development is the main way to deliver new or improved infrastructure e.g. more residents may support an improved bus service, and provision of a mains gas supply. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. childrens' play areas, footpaths. Similarly, doctors and dentists in Biddulph will assess their capacity needs as a result of new development at Biddulph and Biddulph Moor so that provision can be made to accommodate new residents.

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Reduced site area included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements.
- The site is in the Green Belt the Green Belt Review considered it had potential for release under “very special circumstances”
- Potential landscape impact and poor relationship with the settlement edge.
- See key issues below.

Key Issues

- Green Belt site. Green Belt Review considered it had potential for release under “very special circumstances”
- Landscape impact Study found that site is of medium landscape sensitivity would in isolation adversely affect settlement edge, would need to be developed with adjacent land with landscape mitigation. Site suitable for development in heritage terms.
- Access acceptable subject to design & provision of adequate visibility splays and pedestrian connections. Visibility from neighbouring access to number 51, Rudyard Road should also be provided.
- Unclear where surface water will go.
- Possibility of a covenant on the site has been raised during the consultation this will require further investigation.

Greenfield	Green belt	12	30	0.4	Land available	• Small field

Studies

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has medium ecological value in its potential to support protected species. The site habitats are considered to be of low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance. No surveys are required.

Biddulph Moor

BM029

Extended Phase 1 Habitat Survey 2015 (FID 109)

The site has fairly low potential to support protected species as the habitats are species poor and fairly poorly connected to other more biodiverse habitats. However, there is potential for terrestrial amphibians to be present therefore the site is considered to have district ecological importance. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- Great crested newt survey of the adjacent pond
- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment (2008)

Not within important landscape setting to the settlement

Landscape, Local Green Space and Heritage Impact Study August 2016.

The site comprises a small field on the north-eastern edge of the settlement, north of Rudyard Road. The site is not visually prominent due to screening provided by vegetation on the field boundaries, and existing properties located to the east and west of the site. The western half of the site is located opposite development on Rudyard Road, however the eastern half of this site extends beyond this development. In addition the site is separated from the settlement edge to the west by 51 Rudyard Road and BM013. Therefore development of the site in isolation would be likely to adversely affect the existing settlement edge and pattern. Development of the site in combination with the adjacent reserve site and BM013 would need to be considered in order to maintain the existing well-defined settlement edge, and create a coherent landscape mitigation plan.

Site is of medium landscape sensitivity. Site-specific landscape mitigation measures could include phased development (ensuring site is developed in combination with BM013 and the adjacent reserve site, accompanied by an overall landscape mitigation plan to cover these three sites).

Green Belt Review 2015

(Appraised sites according to their contribution to Green Belt Purposes)

Sites BM013 & BM029 from Site Options 2015

Check Sprawl: Contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: Moderate

Together these sites would represent a significant extension of the village envelope and as such redefine the village edge against the Green Belt to the east. However, development can be contained to the east (the outer boundary being defined by substantial hedge and a footpath, and land beyond this is identified in the LCA as making a contribution to the setting of the settlement), and edge treatment would help to mitigate impact on openness in this location. Individually, BM029 would create an incoherent extension along Rudyard Road, with poor boundary definition to the north.

Recommendation: Consider for release under exceptional circumstances. First preference over BM014a & BM014b

Green Belt Study Additional Assessment 2016 site BM6/BM029 Land off Rudyard Road Opposite Farmside Lane

Biddulph Moor

BM029

Check Sprawl: Contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Limited Contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: The site is clearly bounded and development would be modest infill.

Recommendation: Potential for release under Very Special Circumstances reflecting the enclosed character of the site, although sequentially, land off Rudyard Road & Parklands is preferred. Retain existing village boundary reflecting the detached location of the site, although if BM5 were developed, the village boundary could be extended along Rudyard Road.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 12 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is its location near to historic assets and the ecological value of the site.

Options Consultation July 2015

Statutory bodies/stakeholders:

SCC Highways –

Acceptable subject to access design and provision of adequate visibility splays. Visibility from neighbouring access to number 51, Rudyard Road should also be provided. Pedestrian connections required.

Developer/Agent/Owner – Land available

Public response

24 comments – all objections

Issues raised

- Infrastructure – Schools – Village school and schools in Biddulph do not have capacity.
- Infrastructure - Traffic / Transport – site access would be opposite a busy junction, additional traffic joining Rudyard Road and problem with speeding, roads are very busy, very narrow, in a poor state of repair, no pavements in front of site, increased commuters, Woodhouse Lane is a dangerous road with steep inclines and sharp bends - HGV's cannot easily utilise without causing blockages.
- Infrastructure – Other – poor bus service, ends at 3.30pm, no mains gas so strain on electricity supply – more power cuts, only 3 shops and a pub in village, only 1 playground in a poor state of repair, sewers at full capacity, doctors and dentists in Biddulph struggling to cope at present.
- Landscape – loss of outstanding views across the Cheshire plains from properties on Rudyard Road.
- Nature Conservation - these sites are a haven for wildlife; the grass, hedgerows and trees provide food and cover for many species of birds and animals for example kestrels can regularly be seen hunting as can foxes.

Biddulph Moor

BM029

- Flood Risk – there is a pool / stream across the site and there is already a problem with flooding on Rudyard Road and on the site BM013. When it rains there is a torrent which runs from the farm above Farmside Lane down to Parklands because the drains cannot cope with the current surface runoff. An increase in development would make this problem even worse.
- Amenity (e.g. noise, privacy, loss of light) - Human Rights of existing residents will also be compromised by the proposals with regard to the council's responsibilities under the Human Rights Act, Protocol 1, Article 1 and, in particular, with regard to Article 8 of the Human Rights Act. In the case of Britton vs SOS the courts reappraised the purpose of the law and concluded that the protection of the countryside falls within the interests of Article 8. Private and family life therefore encompasses not only the home but also the surroundings.
- Scale of development – a high density development will be totally out of character with surroundings at the entrance to the village, properties built here would not be infill.
- Government Policy – Land is greenbelt so should be protected, plenty of brown field sites in Staffs Moorlands to develop instead, concern about
- closing the gap between Biddulph and Biddulph Moor.
- Other – light pollution due to need for street lights, over 25 houses for sale in village which have been for sale for over a year plus empty and derelict houses in the area – new houses will make it more difficult to sell these, no jobs in village, new people do not involve themselves in village life, this approach is not environmentally friendly, loss of agricultural land, adverse impact on tourism.

Council response –

The District Council is working with the County Council on the issue of school capacity. The County has determined that additional school provision would be required to support housing growth in Biddulph at the Primary phase of education. This also applies to Biddulph Moor. At this early stage in the site selection process there are a number of options for delivering school capacity dependant on the sites selected to take forward.

- The Highway Authority does not raise any difficulties in relation to development of this site – footpaths can be provided as part of a development scheme.
- New development is the main way to deliver new or improved infrastructure e.g. more residents may support an improved bus service, and provision of a mains gas supply. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. childrens' play areas, footpaths. Similarly, doctors and dentists in Biddulph will assess their capacity needs as a result of new development at Biddulph and Biddulph Moor so that provision can be made to accommodate new residents.
- United Utilities has advised that if appropriate measures for surface water disposal are included within development schemes then there should be no detrimental impact on the capacity of their infrastructure.
- The Council has a Landscape & Settlement Setting Study and this site is not identified as being important landscape setting to the settlement. Views from individual properties are not protected in planning law.

Biddulph Moor

BM029

- The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed.
- The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process.
- Amenity – issues such as overlooking, particular house types and off-road parking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.
- The Council has carefully considered the case of Britton and has concluded that the site selection process does not contravene Article 8 (as it now is) of the Human Rights Act 1998. The local plan process which is being followed is in accordance with the law and is not one which determines or directly affects an arguable civil right (see the case of Bovis Homes Ltd v New Forest District Council [2002] EWHC 483). The grant or refusal of planning permission would qualify (as in the Britton case) because it has direct consequences for a landowner. The local plan process is subject to a statutory process which allows for objections to be made and considered before adoption takes place. Once adopted it does not of itself determine property rights, even though it might be highly influential on the outcome of a planning application, because there always remains a discretion to the decision-maker. A local plan once adopted does not affect the current use or enjoyment of land; nor the right to seek planning permission; nor ownership rights.
- It is not considered that development of this particular site would be out of proportion with the rest of the village. Any new development taking place will be subject to design policies contained within the new Local Plan – which will be subject to public consultation next year.
- The land in question is within the Green Belt. In order for Biddulph Moor to accommodate new development, the Green Belt boundary will need adjustment as there are no sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site BM029 and neighbouring BM013 for release from the Green Belt.
- Housing requirements in the Staffordshire Moorlands are in addition to existing properties even if these are for sale or derelict. New employment areas are proposed in nearby Biddulph

Preferred Options Consultation April 2016

Statutory Bodies

Biddulph Moor

BM029

Historic England, Severn Trent, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Environment Agency- No site specific comments Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate

SCC Education In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded, which is covered in more detail below under the heading 'infrastructure provision'.

SCC LLFA Unclear where surface water will go

Biddulph Neighbourhood Plan Working Group- As has been previously stated the requirements for the village should be met by infill. This could be using the frontage only of designated sites where they adjoin the road. The village cannot take one large development.

Sites recommended for inclusion in the Local Plan:

BM013 (fronting Rudyard Road and Parklands) - Only use land fronting parklands and Rudyard Road. Housing only 1 deep (Needs further consultation), recommended for inclusion.

BM029 - This is linked with BM013 and as has been stated there should be no large development on Biddulph Moor, only build houses 1 deep fronting onto Rudyard Road, recommended for inclusion.

BM014a - Housing only built fronting New St, recommended for inclusion.

BM014b - Housing only built fronting Chapel Lane, recommended for inclusion.

Fronting Farmhouse Lane - Build on frontage from existing houses at top to bungalows at bottom 1 deep, recommended for inclusion.

Fronting Woodhouse Lane (from Weathercock Farm) - Build on frontage 1 house deep only

New site needs investigation, recommended for inclusion.

Sites not recommended for inclusion in the Local Plan:

BM013 (whole site) - As has been stated there should be no large development on Biddulph Moor, not recommended for inclusion.

Public response : 17 comments – 2 objections 14 support

Issues raised:

Biddulph Moor

BM029

Objections

- Insufficient infrastructure – doctors
- Lack of employment
- Traffic congestion
- Narrow roads
- Roads used as cut throughs
- Road inadequate and approach roads to village to cope with traffic – limited pavements
- Limited public transport
- No need for houses
- Rudyard Road floods regularly
- Covenant on Park Farm restricting development
- Flooding issues

Council response

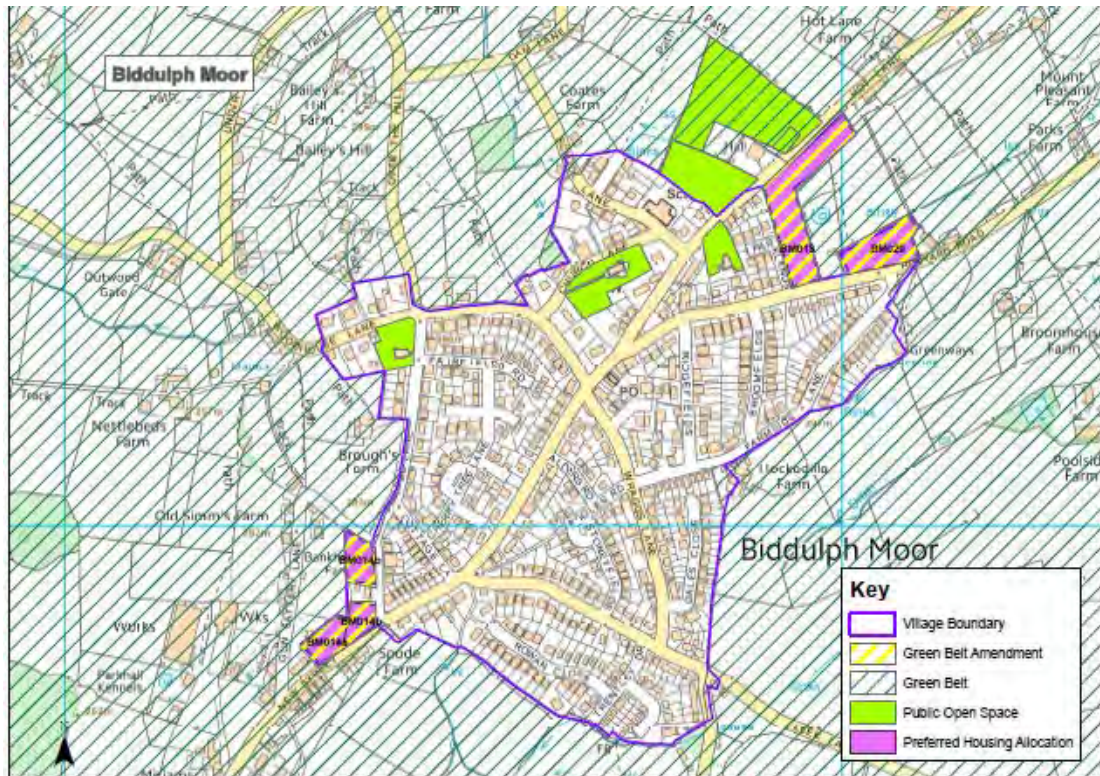

- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered
- The Highway Authority does not raise any difficulties in relation to development of this site – footpaths can be provided as part of a development scheme
- The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district's full housing needs, including affordable housing, whilst taking into account migration and demographic change.
- An assessment of the District's employment land requirements was carried out in The Employment Land Requirement Study the draft Local Plan proposes employment allocations/policies to meet this need. New employment areas are proposed in nearby Biddulph
- The Environment Agency has not identified any site specific issues. They recommend that the ecological value of watercourses is enhanced where possible and the impact on water quality is assessed. The Council has completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being

Biddulph Moor

BM029

used to inform the site selection process. Mitigation measures will be taken as part of the site development to address any surface water issues.

- The issue of a covenant on the site will require further investigation to determine if it will impact on site delivery.

© Crown copyright and database rights 2016 Ordnance Survey 100018384.

Froghall

Bolton Copperworks Site, Froghall

Local Plan Process

- Included in the site options consultation July 2015
- Included as an opportunity site on the Churnet Valley Masterplan Mar 2014
- Included as a major developed area in the countryside within the Core Strategy Mar 2014
- Included in the Preferred Options consultation April 2016

Current Position

Site not taken forward into Preferred Options Local Plan as an allocation but include as a major developed area:

- Site has considerable flood risk issues and unknown contamination.

Key Issues

- Poor ground conditions - significant unknown on-site contamination and flood risk.
- Highway and access constraints
- Remote from services and facilities
- Site partly in business use
- Sensitive landscape, areas of wildlife value
- Listed buildings & conservation area.

Site Information

Greenfield/ brownfield	Built up area boundary/ countryside	Est. housing capacity	Area (ha)	Ownership status	Site details
Brownfield	Countryside	50 Mixed use	5	Privately owned	• Large brownfield in the countryside. Part in use / part unused / part derelict

Studies

Extended Phase 1 Habitat Survey and Local Wildlife Assessment (ECUS 2017)

The majority area of the site was made up of habitats considered of conservation value at site level only (i.e. hard standing and buildings, scattered trees and scrub, tall ruderal vegetation and amenity grassland). Although relatively small in area, the river Churnet and its tributary were prominent habitat features of the site and provide excellent connectivity with the surrounding landscape to the north-east, south-east and north-west. For this reason the river habitat was considered to be of importance to conservation at the local level. Similarly, the broad-leaved semi-natural woodland running alongside the Caldon canal is an important connecting feature with the surrounding landscape and was also considered to be of importance to conservation at the local level. However, no site habitats conformed strictly to the criteria necessary for consideration as a SBI or BAS according to the Staffordshire SBI guidelines.

No species listed as important in the Staffordshire SBI guidelines were recorded during the site visit and therefore no part of site currently qualifies for consideration as an SBI or as a BAS under these criteria. Species recorded on site were common and widespread both at a county and national level. Nevertheless, the site has potential to support a number of notable protected species.

Therefore, prior to any future development, the following surveys should be conducted according to appropriate need: ponds 1 and 2 should be surveyed for great crested newts; the site should be checked for badger activity immediately prior to development; bat activity should be surveyed and buildings 1, 3, 4, 5, 10 and 11 should be surveyed for bat roosts (and buildings 7 and 8 and trees in the area of broad-leaved semi-natural woodland assessed for bat roost potential); reptiles should be surveyed for throughout the site; otter, water vole and white-clawed crayfish should be

Froghall

Bolton Copperworks Site, Froghall

surveyed for along the lengths of both watercourses. It would be necessary to conduct nesting bird checks before vegetation clearance or other disturbance during the bird breeding season. A Japanese knotweed, Indian balsam and Cotoneaster Management Plan should be developed for this site which specifies a method for eradication of these invasive species.

Landscape, Local Green Space and Heritage Impact Study (August 2016)

Landscape Assessment

The site is a former copper works, with existing industrial development in the centre of the site adjacent to Froghall Road and the A52, and hardstanding where previous development stood in the north and south of the site. There are also areas of woodland and tree belts within the site, particularly in the south, however this is generally secondary woodland on previously developed land. The site also includes a small field to the north-east, adjacent to the Foxt road. The site is located in a sensitive area, adjacent to SSSIs, Ancient Woodland and SBIs. However these designations are not located within the site, and the site itself is previously developed. The site has low visual prominence as it is located at the bottom of a wooded valley. Views of the site are available from the adjacent roads, and from sections of the Caldon Canal. Building heights should be limited and existing vegetation retained (both within and adjacent to the site) as far as possible in order to maintain the low visual prominence of the site and reduce effects on local landscape character. Consideration should be given to planting and landscaping immediately adjacent to the roads in order to minimise impacts on local landscape character and views from these roads. Planting should also be undertaken adjacent to the Caldon Canal where possible to reduce visual impacts on this receptor. *Site is of medium landscape sensitivity. Site-specific landscape mitigation measures could include planting and landscaping adjacent to the canal and roads, and parameters set for building heights.*

Heritage Assessment

There is one Grade II Listed Building within the site boundary and an additional five Listed Buildings in the 400m buffer. A Conservation Area is adjacent to the northern boundary of the site. The site is located in an area which has been predominantly used for industrial purposes in the past: the Listed Building is however set within an area of former orchard and land to its rear. The canal has a close association with the industrial and natural landscape and its setting contributes to its significance. Despite this, appropriate development can be mitigated through the setting back of development boundaries from the Listed Building and Conservation Area and through conservation of the Listed Building. Screening should be employed along the northern site boundary. The site is within the HLC type of industrial and extractive complex. Development would not affect this HLC. *Site suitable for development in heritage terms, subject to appropriate masterplanning, including possible conservation of the Listed Building.*

Bolton Copperworks Masterplan (2011)

The masterplan includes a summary of baseline information, development principles for the site, infrastructure, viability and delivery issues.

Churnet Valley Masterplan (2014)

The Churnet Valley Masterplan identifies the site as an Opportunity Site. The development strategy for the site promotes the creation of a rural centre comprising of mixed use development. It suggests appropriate uses which are indicative only and states that any development proposals should achieve a scheme which is commercially viable and deliverable taking account of site constraints, local markets and other available funding sources. Suggested uses include:

- employment – emphasis on small industrial/starter units, retention of existing businesses within site, green industry;

Froghall

Bolton Copperworks Site, Froghall

- residential – around 50 high quality units (may include extra care) but a need for flexibility due to the requirement for this to be sufficient to cross-subsidise other uses;
- provision of railway/canal heritage centre and workshops;
- provision of visitor/heritage/educational centre;
- small hotel (50 bed spaces)/pub/restaurant;
- craft/tourist-related retail uses;
- provision of outdoor activity centre; and
- extended parking to serve railway and other uses

Sustainability Appraisal

Appraisal required.

Initial HRA Screening

No Likely Significant Effects (LSEs) have been identified in relation to the mixed use site at Bolton Copperworks.

Options Consultation July 2015

The Site Options Consultation referred to the site as being already identified in the Churnet Valley Masterplan and Core Strategy Policy SS6c.

Public response – several comments suggesting site for: Housing / leisure /recreation/ retail/ employment / gypsy and traveller site

Issues raised: Redevelop the existing brownfield site for housing. This is an eyesore and would improve the local area. It would bring benefits to the local community.

Council response –

The site is identified in the Churnet Valley Masterplan as an opportunity site and identified in the Core Strategy as a major developed area in the countryside. Potentially suitable uses include housing alongside employment, tourist-related retail/accommodation; and leisure purposes). This site will be included as a preferred option for these uses (as set out in Pol SS6C(4) Core Strategy). Any subsequent applications will be expected to meet the land use expectations set out in the Churnet Valley Masterplan.

Preferred Options Consultation April 2016

SCC Highways: No fundamental issues with this site – it was a major employment site. TA would be required.

Appropriate accesses would need to be designed.

Junction onto A52 would need to be considered.

Junction of Churnet Valley Road A521/A52 (road to Cheadle) is very acute – this would need to be considered (though given topographical constraints, any improvement may be difficult.)

Sustainability of the site would need to be considered – bus routes most likely inc possible additional bus provision.

SCC Education: Although there are a number of schools which are likely to be able to accommodate the additional children generated by the allocated housing developments; St Peter's CE(A) First School, Alton, St Leonards CE(VA) First School, Ipstones and Waterhouses CE(VC) Primary School, the small site allowance of 570 dwellings could potentially have a significant impact on these and other schools within the rural Moorlands,

Froghall

Bolton Copperworks Site, Froghall

depending upon location and phasing of development. This could result in the need for additional education contributions to accommodate the additional children generated from the 570 dwellings.

SCC Other: The Froghall Preferred Mixed Use Site needs to take account of the substantial historic built, historic landscape character and archaeological potential within the area of the scheme and the general vicinity. It should be aware of the nearby historic plateways (early railways), canals, limekilns etc which play an important part in defining the unique character of the Churnet Valley. Any proposal for the development of this site should consider how to incorporate this important cultural heritage and the development of opportunities to enhance the historic character of the area.

The Froghall Preferred Mixed Use Site needs to take account of the substantial local biodiversity and of connectivity of habitats within the Churnet Valley in layout, design and distribution of use. The site should incorporate green infrastructure which maintains and enhances connectivity.

Natural England: No specific comments

Environment Agency:

Much of the site is within the floodplain. Although it is likely that the Local Authority will wish to see redevelopment here despite the flood risk, the Shirley Brook and Blackbank Brook that converge just to the north of the site bisecting the development area and running into the Churnet, are not modelled in detail and this will need to be done prior to allocation to understand what could be delivered there.

If it is decided to continue with sites in the floodplain or likely to be following the application of the Sequential Test, then further work in the form of a Level 2 SFRA will be required for this site. Reason: Much of the site is within the floodplain. Although it is likely that the Local Authority will wish to see redevelopment here despite the flood risk, the Shirley Brook and Blackbank Brook that converge just to the north of the site bisecting the development area and running into the Churnet, are not modelled in detail and this will need to be done prior to allocation to understand what could be delivered there.

This site (50) is Brownfield and according to information held by the Environment Agency it is located above a historic landfill site. The local council, as lead regulator for these sites, should be contacted for further information. The previous use also as a copper works is likely to have caused heavy contamination. There is a risk of pollution to the watercourse if not managed and remediated properly during redevelopment. So although it is unlikely that the issue of Brownfield Land will make any of the allocations undevelopable due to coast/constraint, Froghall may require lengthy remediation works, and sites within the Source Protection Zones and flagged up, will be subject to certain restrictions.

Further discussions with EA

SMDC: Due to complexity of the site, largely covered by Floodzones 2 and 3 and also significant uncertainty around contamination and deliverability. SMDC considering not allocating the site for development (and therefore not relying on the site for any contribution towards housing or employment requirements) but introducing a site specific policy supporting redevelopment of the site but requiring the developer to carry out a contamination survey and a site specific Flood Risk Assessment and provision of flood mitigation measures in consultation with the Environment Agency in relation to any future development on the site.

EA: This would seem a sensible approach in view of the complexity and nature of issues at this site. Any further work would have to model the main watercourse in detail, the tributary coming in from the north and the effect of water 'backing up' where it can't enter the main river. The assessment should also include the culverts, flood defence/storage options if necessary and an assessment of the effect they have to properties/businesses downstream.

Froghall

Bolton Copperworks Site, Froghall

A detailed assessment of the contamination on site will also be necessary and we would expect it to be remediated.

LLFA: Very constrained and difficult site. EA / SCC & Canals and Rivers Trust (CRT) need to work together. Lot of structures along river. Areas of flooding may constrain residential element of scheme to less than 50. Otherwise very expensive works required. FRA required.

Historic England: It is not clear how the impact of the site allocation has been assessed in respect of the Grade II listed building Cottage Farmhouse in addition to the Caldon Canal Conservation Area and associated listed buildings, and the listed lime kilns and their settings, individually and cumulatively. Further information is required.

SMDC Environmental Health: We would promote development of the site in order to seek remediation, however there are significant constraints on development from well known contamination issues - copper works / gas works / colour works ... any also noise issues (depending on residual industrial activities) . These should be looked at when designing a scheme to minimise the very significant remediation costs (e.g. allocating their scheme so that the lower risk to the more contaminated areas).

Public Response:

- Support for redevelopment of the site

Issues raised:

- Need to get the mix of uses right
- Keep to employment only
- Unknown contamination
- Limited facilities and services to support housing
- Site is an eyesore

Council response –

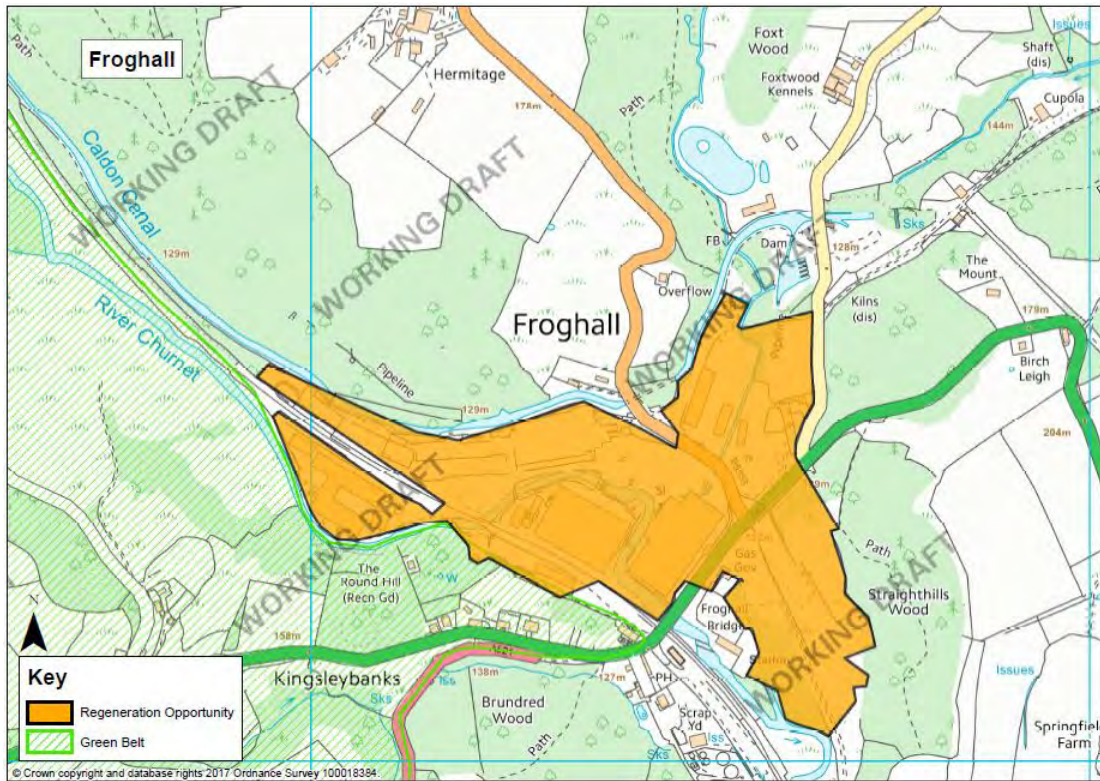

- There is one Grade II Listed Building within the site boundary and an additional five Listed Buildings in the 400m buffer. A Conservation Area is adjacent to the northern boundary of the site.
- The Council's Landscape, Green Space and Heritage Impact Study(August 2016) includes a Heritage Assessment for this site which advises that the site is located in an area which has been predominantly used for industrial purposes in the past: the Listed Building is however set within an area of former orchard and land to its rear. The canal has a close association with the industrial and natural landscape and its setting contributes to its significance. Despite this, appropriate development can be mitigated through the setting back of development boundaries from the Listed Building and Conservation Area and through conservation of the Listed Building. Screening should be employed along the northern site boundary. The site is within the HLC type of industrial and extractive complex. Development would not affect this HLC.
- The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage.
- Bolton's site is included in the Churnet Valley Masterplan as an opportunity site.
- Redevelopment of the site would require remediation of contaminated land. SMDC Environmental Health support redevelopment of the site but acknowledge that there is

Froghall

Bolton Copperworks Site, Froghall

heavy contamination and that careful design should minimise very significant remediation costs by allocating low risk uses to the more contaminated areas.

- The Core Strategy identifies the Bolton Copperworks site as a major developed area in the countryside. Due to its location and the nature of the site it states that any housing permitted should be limited to that required to cross-subsidise other uses. The Churnet valley Masterplan suggests that this should be around 50 dwellings.

Froghall

Bolton Copperworks Site, Froghall

Cheddleton

CD002 Land West & South of 70-82 Folly Lane

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances.
- Potential landscape impact.
- See key issues below.

Key Issues

- Green Belt site. Green Belt site Green Belt Review considers it is acceptable for release. Exceptional circumstances would need to be demonstrated.
- Site possibly would need to be developed with CD003
- Access needs to be clarified is possible could potentially be through CD003
- Flooding issues need to be addressed. Environment Agency consider site may be at the top of the catchment and further assessment of flood risk will be required.. SCC identifies potential flooding issue and need for flood risk assessment.
- Landscape impact needs to be considered. Landscape, Local Green Space and Heritage Impact Study found site was of medium landscape sensitivity and would require site specific landscape mitigation measures which could include site is developed with CD003. Site is suitable for development in heritage terms.

Site Information

Studies

Local Wildlife Assessment (ECUS, 2017)

Cheddleton

CD002 Land West & South of 70-82 Folly Lane

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has medium ecological value in its potential to support protected species. The site has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the species rich hedgerow and bat potential on site.

The following surveys/ actions are therefore recommended in order to establish SBI/BAS status:

- Hedgerow survey following modified HEGS methodology.
- Further assessment of the trees for their potential to support roosting bats.
- Possible bat survey required

Extended Phase 1 Habitat Survey 2015 (FID 180)

The site has mostly low biodiversity value overall in terms of area. However, the major aspects of interest are the significant bat potential in the 5 trees and the species rich hedgerow which constitutes the site being given district importance. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- A bat survey regime to ascertain whether bats roost in the trees
- Hedgerow survey
- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement

Landscape, Local Green Space and Heritage Impact Study August 2016

Land west of Folly Lane (south)

Landscape

Site comprises a small triangular field on the southern edge of the settlement. The site is immediately south of CD003 and is enclosed by linear development on Folly Lane to the east; and a strong tree belt/hedgerow to the south-west. Thus, development within the site would have low visual prominence, and the existing vegetation on the south-western boundary would create a well defined, vegetated edge to the settlement. The site should not be developed in isolation as this would adversely affect the existing settlement pattern and edge.

Site is of medium landscape sensitivity. Site-specific landscape mitigation measures could include phased development (ensuring site is developed in combination with CD003).

Heritage

There are no designated heritage assets within the 400m buffer. Whilst the HEA states that the HLC zone BEEHECZ 5 has little capacity to absorb change, with sensitive development, this could be accommodated on the site (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms.

Green Belt Review 2015

Cheddleton

CD002 Land West & South of 70-82 Folly Lane

(Appraised sites according to their contribution to Green Belt Purposes) CD002 & CD003 assessed together

Check Sprawl: Contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: Moderate

Despite being a relatively large edge-of-settlement site, development would not intrude into open countryside, being contained physically and visually by a drain and hedgerow between Folly Lane and the A520 Cheadle Road.

Recommendation: Consider for release under exceptional circumstances

Habitat Regulation Assessment Initial Findings Preferred Option 2016

No potential impact pathways identified

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 26 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment and open countryside, as well as the site's location away from historic assets is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's ecological value.

Options Consultation July 2015

Statutory bodies/stakeholders

Cheddleton Parish Council:

Object because site lies within greenbelt, outside village boundary; and is a strong need to maintain definitive village boundary between Cheddleton and Wetley Rocks
SCC Highways: Acceptable subject to access design and provision of visibility splays. Preferable for this to be developed in conjunction with CD003 with bulk of access taken through CD003.

Leek and Moorlands Historic Buildings Trust - Development of CD002 would not only encroach into the Green Belt but would start to destroy the natural/rural landscape character of the fields that serve to visually and physically separate the villages of Cheddleton and Wetley Rocks. It is important to retain this land as open fields to reinforce the identities of these two historically separate settlements.

Developer/Agent

- Argues CD002 & CD003 can be developed together, as in same ownership, with no legal/technical impediments to development
- Confirms utilities are available on/near site
- Multiple access options
- Various technical studies regarding these sites, prepared already
- Argues development would have limited landscape impacts

Public response 50 comments - 48 objections and 2 support.

- Issues raised:
- Objections:
- Infrastructure – schools

- Scale of development
- Government policy – greenbelt; sustainability
- Other:
- loss of agriculture/agricultural land;
- need for TPOs;
- drainage problems;
- coalescence of village with Wetley Rocks;
- Support:
- Need for new affordable housing in village/ associated benefits to local businesses

Council Response

The County has determined that there is limited capacity at St Edward's First School for additional pupils; however many Cheddleton pupils currently attend First Schools in Leek. Pupil numbers are expected to increase further in Cheddleton as pressure for places in Leek increases. First School places may be needed to mitigate the impact of village requirement. Cheddleton falls within Leek catchment for Middle/High Schools. The District Council will work with the County Council to identify an appropriate solution.

The Highways Authority advises that development acceptable subject to access design and provision of visibility splays. But preferable for CD002 to be developed in conjunction with CD003, with bulk of access through CD003.

New development is the main way to deliver new or improved infrastructure e.g. more residents may support an improved bus service, and provision of a mains gas supply. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. childrens' play areas, footpaths. Similarly, doctors and dentists in Cheddleton will assess their capacity needs as a result of new development in Cheddleton so that provision can be made to accommodate new residents.

Severn Trent have stated that they have a duty to complete necessary improvements to sewers to provide the capacity for new development. The Council will continue to liaise with the EA and Severn Trent regarding this issue.

The Council has a Landscape & Settlement Setting Study and this site is not identified as being important landscape setting to the settlement.

The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed. With regards on-site TPOs the Council would require future developers to demonstrate

Cheddleton

CD002 Land West & South of 70-82 Folly Lane

how proposals integrating/affecting them would not damage them, unless scheme benefits clearly outweigh loss.

The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. The Council also fully consults with both the Environment Agency and County Council Lead Local Flood Risk Officer during the Plan preparation process.

Amenity – issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.

The land in question is within the Green Belt. In order for Cheddleton to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance This study recommends considering site CD002 for release from the Green Belt.

When deciding over which site options to proceed with the Council will consider the respective comments of statutory consultees including Environment Agency, SMDC Environmental Health, SMDC Conservation, SCC Highways/ Transportation, infrastructure providers etc; and utilises the results of its sustainability appraisal work.

It is not considered that development of this particular site would be out of proportion with the rest of the village. Any new development taking place will be subject to design policies contained within the new Local Plan – which will be subject to public consultation next year.

In addition to existing areas of employment, the Core Strategy identifies broad areas for additional employment land in Leek, Biddulph, and Cheadle; and also identifies a requirement for additional employment land provision across the rural areas of the Moorlands. Further, the Larger Villages Policy in the Core Strategy supports a degree of additional economic/retail activity in settlements such as Cheddleton.

Given the housing requirements of the village, it is not possible to meet this need upon brownfield sites in the village alone. Therefore a number of greenfield options have been proposed. National/Local Policy does not rule out allocating upon greenfield sites.

Preferred Options Consultation April 2016

Statutory Bodies

Historic England, Severn Trent, Natural England, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Environment Agency-

Cheddleton

CD002 Land West & South of 70-82 Folly Lane

If it is decided to continue with sites in the floodplain or likely to be following the application of the Sequential Test, then further work in the form of a Level 2 SFRA will be required for the following site: CD002 which along with CD003 is adjacent to Watercourses with no mapped floodplain. This does not mean the site is within Flood Zone 1.

Further comments: Site maybe at the top of the catchment, the area of any floodplain could be quite small. Do not consider flood risk will prohibit development therefore an assessment of flood risk including a model of the watercourse can be undertaken at the planning application stage if allocated

Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

SCC LLFA — Potential flooding issue, watercourse and surface water floodplain along south boundary, sewer through site, need flood risk assessment recommend early engagement with County Council. FRA required

SCC Education- . In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded. We acknowledge that the Plan states an Infrastructure Delivery Plan is being produced and we would be keen to work with you to develop this to ensure there is clarity over infrastructure requirements and delivery.

SCC Transport No identified means of access at this stage although potential to access from Folly Lane. New development will need to link to existing footway network on Folly Lane with potential for new footway requirements along the A520 Cheadle Rd linking into existing local footways. Folly Lane is part of the local advisory cycle route network but further links will be required to connect to the proposed site.

Cheddleton Parish Council-

- CD002 and CD003 – both sites are within the Green Belt and outside the village boundary. Strongly object to the inclusion of both areas given that it would
 - a) effectively link two villages
 - b) there would be major road / highway issues
 - c) degrade the natural gateway to the village of Wetley Rocks.

If allocated it would go against two Green Belt Policy principles, major coalescent & the joining of two communities.

Cheddleton

CD002 Land West & South of 70-82 Folly Lane

- CD017 – opposed (Green Belt and a house would have to be demolished to provide access)
- Land at 397 Cheadle Road – support (site already has planning permission)
- CD115 – support (within Green Belt but is in centre of village)
- Staffordshire Farmers Site – support (only brownfield site, has established access)

Public Response

Issues raised

Applications on the site have previously been refused

Green Belt site

Will lead to village merging with Wetley Rocks

Traffic congestion

Traffic safety

Development should be spread over smaller areas and brownfield sites.

Prefer CD115/CD015 and Staffordshire Farmers site

Lack of infrastructure schools medical services

Loss of wildlife and wildlife habitat

Unsustainable location in terms of access by foot/cycle/access to schools

Poor bus service

Density higher than adjoining sites

Loss of open space

Loss of residential amenity

Resident Parish Council views been ignored

Do not need houses as houses for sale are not selling/empty properties

Loss of trees need TPO status

Lack of employment

Maintain attractive access to Churnet Valley

Will blight surrounding properties

Drainage problems

Council response

- The decisions on the Local Plan will be made by Staffordshire Moorlands District Councillors before it is submitted to the Secretary of State for Communities and Local Government for Examination.
- Previous applications were refused under existing planning policy the proposed Local Plan will replace existing policy and seeks to allocate housing sites to meet objectively assessed need of the District. As a part of this process the existing Green Belt boundaries are being looked at.
- The Highways Authority advises that development acceptable subject to access design and provision of visibility splays. But preferable for CD002 to be developed in conjunction with CD003, with bulk of access through CD003.
- The land in question is within the Green Belt The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a more detailed site-based assessment of land which could be considered for review. It found the site's overall impact on Green Belt's purposes were moderate "Despite being a relatively large edge-of-settlement site, development would not intrude into open countryside, being contained physically and visually

Cheddleton

CD002 Land West & South of 70-82 Folly Lane

by a drain and hedgerow between Folly Lane and the A520 Cheadle Road” and recommended the site could be considered for release under exceptional circumstances. In order to release a site from the Green Belt the Council must be able to demonstrate that exceptional circumstances exist. Consideration needs to be given to all the relevant evidence to determine the overall suitability of the site for release from the Green Belt.

- There is not enough brownfield land or sites or infill sites in settlements to meet the District’s proposed housing requirements so green field options have been proposed. Prioritising brown field land over greenfield in all circumstances is not part of Government policy
- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children’s play areas.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
- The Core Strategy defines Cheddleton as a larger village with a range of facilities and services
- Any new development taking place will be subject to policies contained within the new Local Plan, which seek to protect the character of the area consideration will be given to the scale of development and its impact on the surrounding area.
- The Council has recently undertaken a Landscape, Local Green Space and Heritage Impact Study 2016 to form part of the evidence base to support the Local Plan and assess the potential landscape impacts of the development allocations. The Study found “Site is of medium landscape sensitivity. Site-specific landscape mitigation measures could include phased development (ensuring site is developed in combination with CD003).”
- Issues such as overlooking and other impacts on existing residents will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application
- The views of residents and the Parish Council have been sought through the consultations. The Council must balance this evidence against all the other evidence relating to this site and reach a decision on whether or not to include it as a development site in the Local Plan.
- The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district’s full housing needs, including affordable housing, whilst taking into account migration and demographic change
- The Extended Phase 1 habitat Survey 2015 assessed the present and potential ecological value of the proposed site allocations. It found that “The site has mostly low biodiversity value overall in terms of area. However, the major aspects

Cheddleton

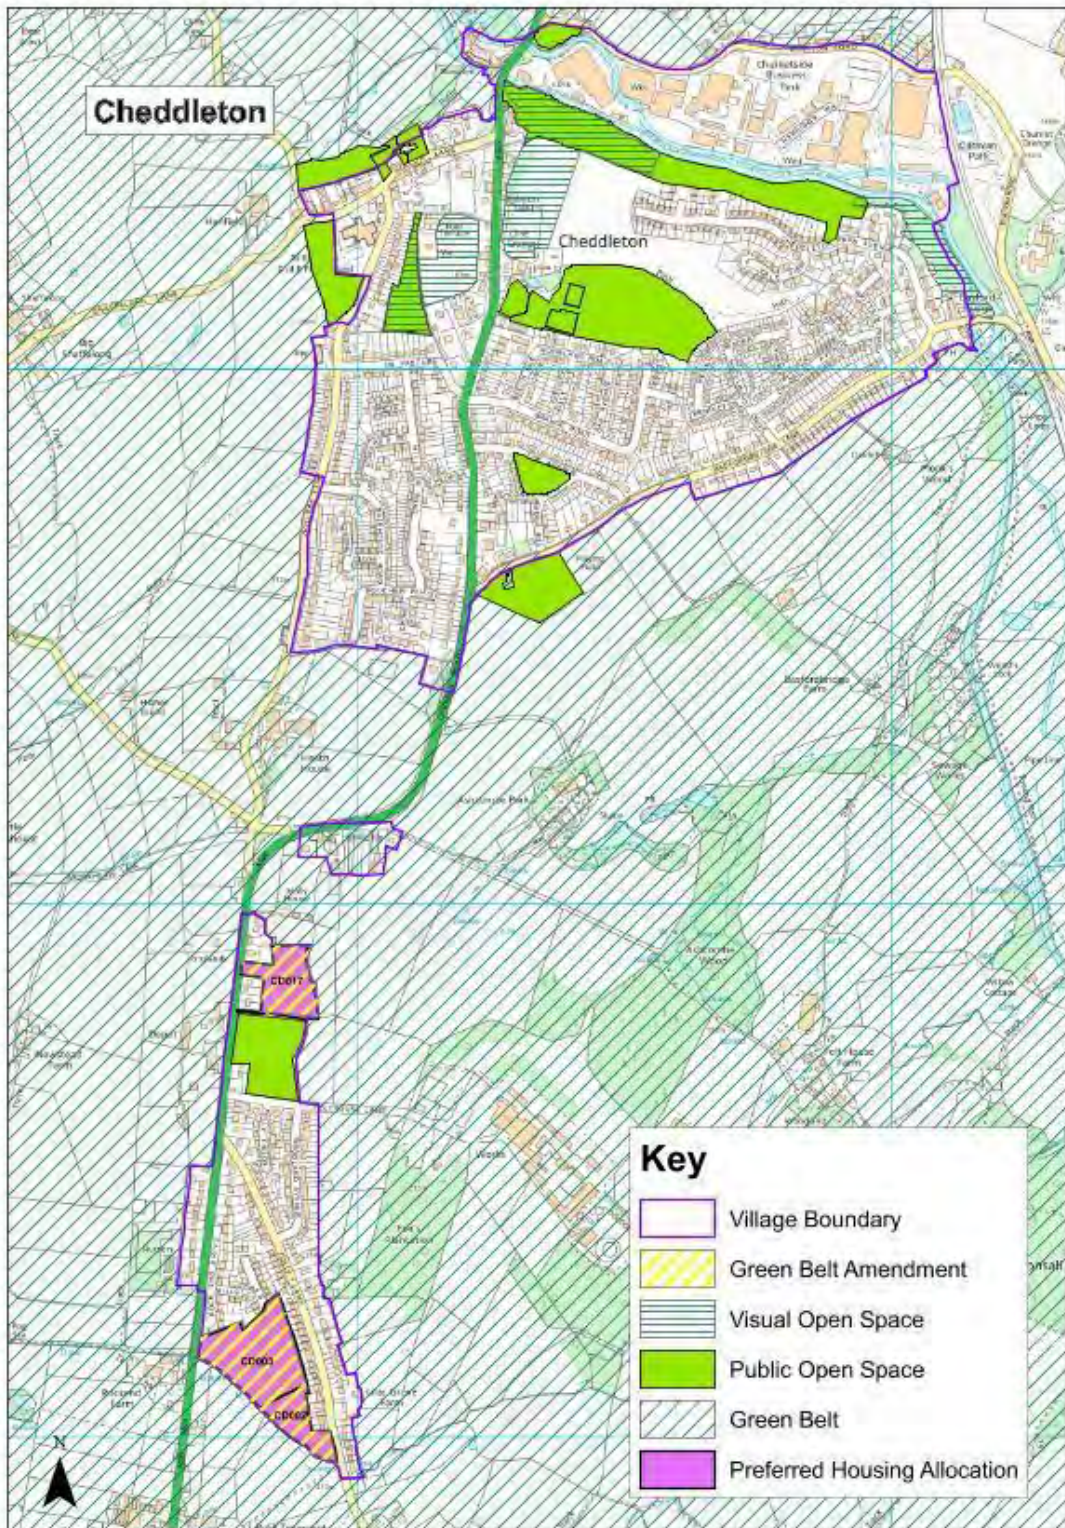

CD002 Land West & South of 70-82 Folly Lane

of interest are the significant bat potential in the 5 trees and the species rich hedgerow which constitutes the site being given district importance.”

- The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district’s full housing needs, including affordable housing, whilst taking into account migration and demographic change
- An assessment of the District’s employment land requirements was carried out in The Employment Land Requirement Study the draft Local Plan proposes employment allocations/policies to meet this need.
- The Environment Agency recognise the site maybe at the top of a catchment area, they do not think flood risk will prohibit development but consider an assessment of flood risk should be undertaken at the planning application stage. The County Council consider there is a potential flooding issue and recommend any developer should liaise with the County Council
- Responses to the comments received to the Site Options consultation in 2015 were reported to the Council Assembly on 13 April 2016 and are available on the Council’s website.

Cheddleton

CD002 Land West & South of 70-82 Folly Lane

Cheddleton

CD003 Land to the south of Rockend Drive/Millstone Edge

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances.
- See key issues below.

Key Issues

- Flooding issues need to be addressed. Flooding issues need to be addressed. Environment Agency consider site may be at the top of the catchment and further assessment of flood risk will be required. SCC identify potential flooding issue and need for flood risk assessment.
- Green Belt site Green Belt Review considers it is acceptable for release. Exceptional circumstances would need to be demonstrated
- Access should be split between Rock End Drive & Millstone Edge
- Site would need to provide access to CD002
- The Landscape, Local Green Space and Heritage Impact Study August 2016 identified that the site is of low landscape sensitivity and is suitable for development in heritage terms.

Site Information

Greenfield/ brownfield	Built up area boundary/country side	Est. housin g capacit y	Area (ha)	Ownersh p status	Site details
Greenfield	Countryside Green Belt	70		Land available	<ul style="list-style-type: none"> • Undulating meadows • Slight slope down to the west • Tree belt hedgerow to south west • Grade II listed building within 400m

Studies

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. The site has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the bat potential on site. The

Cheddleton

CD003 Land to the south of Rockend Drive/Millstone Edge

following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- Further assessment of the trees for their potential to support roosting bats.
- Possible bat survey required.

Extended Phase 1 Habitat Survey 2015 (FID181)

The site has mostly low biodiversity value overall in terms of area. However, the major aspects of interest are the significant bat potential in the 7 trees and species rich hedgerow which values the site as having district ecological importance. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- A bat survey regime to ascertain whether bats roost in the trees
- Hedgerow survey
- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement

Landscape, Local Green Space and Heritage Impact Study August 2016

Landscape

Land west of Folly Lane (north)

Site comprises fields on the southern edge of the settlement. The site is enclosed by residential development on Rock End Drive and Millstone Edge to the north; linear development on Folly Lane to the east; and a strong tree belt/hedgerow to the south-west. Thus, development within the site would

have relatively low visual prominence, and the existing vegetation on the southwestern boundary would create a well-defined, vegetated edge to the settlement. Development of the site would fit in well with the existing settlement form.

Site is of low landscape sensitivity.

Heritage

There is one Grade II Listed Building within the 400m buffer. Due to the intervening buildings between the site and the asset, there was no intervisibility. Development would be highly unlikely to adversely affect the setting of the asset. Whilst the HEA states that the HLC zone BEEHECZ 5 has little capacity to absorb change, with sensitive development, this could be accommodated on the site (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms.

Green Belt Review 2015

(Appraised sites according to their contribution to Green Belt Purposes) CD002 & CD003 assessed together)

Check Sprawl: Contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: Moderate

Despite being a relatively large edge-of-settlement site, development would not intrude into open countryside, being contained physically and visually by a drain and hedgerow between Folly Lane and the A520 Cheadle Road.

Cheddleton

CD003 Land to the south of Rockend Drive/Millstone Edge

Recommendation: Consider for release under exceptional circumstances under exceptional circumstances

Sustainability Appraisal

The proposed delivery of circa 70 dwellings is considered to have a significant positive effect, as is the site's accessibility to areas of existing employment. Similarly, the site's accessibility to the open countryside is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's ecological value and location near to historic assets.

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 70 dwellings is considered to have a significant positive effect, as is the site's accessibility to areas of existing employment. Similarly, the site's accessibility to the open countryside is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's ecological value and location near to historic assets.

Options Consultation July 2015

Statutory bodies/stakeholders

Cheddleton Parish Council:

Object because site lies within greenbelt, outside village boundary; and is a strong need to maintain definitive village boundary between Cheddleton and Wetley Rocks

SCC Highways: Acceptable subject to access design and provision of visibility splays. Accesses should be split between Rock End Drive and Millstone Edge.

Leek and Moorlands Historic Buildings Trust - Development of CD003 would not only encroach into the Green Belt but would start to destroy the natural/rural landscape character of the fields that serve to visually and physically separate the villages of Cheddleton and Wetley Rocks. It is important to retain this land as open fields to reinforce the identities' of these two historically separate settlements.

Developer/Agent

- Argues CD002 & CD003 can be developed together, as in same ownership, with no legal/technical impediments to development
- Confirms utilities are available on/near site
- Multiple access options
- Various technical studies regarding these sites, prepared already
- Argues development would have limited landscape impacts

Public response 69 comments - 67 objections and 2 support.

Issues raised:

Objections:

- Infrastructure – schools
- Infrastructure - traffic/transport
- Infrastructure – other
- Landscape
- Nature conservation

Cheddleton

CD003 Land to the south of Rockend Drive/Millstone Edge

- Flood risk
 - Amenity (e.g. noise, privacy, loss of light)
 - Scale of development
 - Government policy – greenbelt; sustainability;
 - Other:
 - proximity to animal rendering plant;
 - loss of agriculture/agricultural land;
 - TPOs on site/need for TPOs;
 - drainage issues;
 - Churnet Valley landscape;
 - empty local housing;
 - coalescence of village with Wetley Rocks;
- Support:
- Need for new affordable housing in village/ associated benefits to local businesses

Council response –

The County has determined that there is limited capacity at St Edward's First School for additional pupils; however many Cheddleton pupils currently attend First Schools in Leek. Pupil numbers are expected to increase further in Cheddleton as pressure for places in Leek increases. First School places may be needed to mitigate the impact of village requirement. Cheddleton falls within Leek catchment for Middle/High Schools. The District Council will work with the County Council to identify an appropriate solution.

The Highways Authority advises that development acceptable subject to access design and provision of visibility splays. But preferable for CD002 to be developed in conjunction with CD003, with bulk of access through CD003.

New development is the main way to deliver new or improved infrastructure e.g. more residents may support an improved bus service, and provision of a mains gas supply. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. childrens' play areas, footpaths. Similarly, doctors and dentists in Cheddleton will assess their capacity needs as a result of new development in Cheddleton so that provision can be made to accommodate new residents.

Severn Trent have stated that they have a duty to complete necessary improvements to sewers to provide the capacity for new development. The Council will continue to liaise with the EA and Severn Trent regarding this issue.

The Council has a Landscape & Settlement Setting Study and this site is not identified as being important landscape setting to the settlement. The site falls within the 'settled plateau farmlands' landscape sub-type in the subsequent Churnet Valley Landscape Character Assessment: 'threats' include the suburban influences upon villages; and planning guidelines include the retention of existing/creation of new field boundaries.

The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward

Cheddleton

CD003 Land to the south of Rockend Drive/Millstone Edge

and are potentially suitable for development will also need to be assessed. With regards on-site TPOs the Council would require future developers to demonstrate how proposals integrating/affecting them would not damage them, unless scheme benefits clearly outweigh loss.

The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. The Council also fully consults with both the Environment Agency and County Council Lead Local Flood Risk Officer during the Plan preparation process.

Amenity – issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.

The land in question is within the Green Belt. In order for Cheddleton to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance This study recommends considering site CD002 for release from the Green Belt.

It is not considered that development of this particular site would be out of proportion with the rest of the village. Any new development taking place will be subject to design policies contained within the new Local Plan – which will be subject to public consultation next year.

In addition to existing areas of employment, the Core Strategy identifies broad areas for additional employment land in Leek, Biddulph, and Cheadle; and also identifies a requirement for additional employment land provision across the rural areas of the Moorlands. Further, the Larger Villages Policy in the Core Strategy supports a degree of additional economic/retail activity in settlements such as Cheddleton.

When deciding over which site options to proceed with the Council will consider the respective comments of statutory consultees including Environment Agency, SMDC Environmental Health, SMDC Conservation, SCC Highways/ Transportation, infrastructure providers etc; and utilises the results of its sustainability appraisal work.

Given the housing requirements of the village, it is not possible to meet this need upon brownfield sites in the village alone. Therefore a number of greenfield options have been proposed. National/Local Policy does not rule out allocating upon greenfield sites.

Housing requirements in the Staffordshire Moorlands are in addition to existing properties even if these are for sale or derelict. The new Local Plan will cover a period to 2031 so lack of demand (perceived or actual) at one point in time is not a valid reason for not meeting the area's objectively assessed housing needs.

Preferred Options Consultation April 2016

Statutory Bodies

Cheddleton

CD003 Land to the south of Rockend Drive/Millstone Edge

Historic England, Severn Trent, Natural England, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Environment Agency- If it is decided to continue with sites in the floodplain or likely to be following the application of the Sequential Test, then further work in the form of a Level 2 SFRA will be required for the following site: CD003 which along with CD002 is adjacent to Watercourses with no mapped floodplain. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded. We acknowledge that the Plan states an Infrastructure Delivery Plan is being produced and we would be keen to work with you to develop this to ensure there is clarity over infrastructure requirements and delivery.

SCC Transport No identified means of access at this stage although potential to access from Folly Lane. New development will need to link to existing footway network on Folly Lane with potential for new footway requirements along the A520 Cheadle Rd linking into existing local footways. Folly Lane is part of the local advisory cycle route network but further links will be required to connect to the proposed site

Cheddleton Parish Council-

- CD002 and CD003 – both sites are within the Green Belt and outside the village boundary. Strongly object to the inclusion of both areas given that it would
 - a) effectively link two villages
 - b) there would be major road / highway issues

Cheddleton

CD003 Land to the south of Rockend Drive/Millstone Edge

- c) degrade the natural gateway to the village of Wetley Rocks.
If allocated it would go against two Green Belt Policy principles, major coalescent & the joining of two communities.
- CD017 – opposed (Green Belt and a house would have to be demolished to provide access)
- Land at 397 Cheadle Road – support (site already has planning permission)
- CD115 – support (within Green Belt but is in centre of village)
- Staffordshire Farmers Site – support (only brownfield site, has established access)

Public Response

Issues raised

Green belt site contrary to NPPF green belt policy
Green Belt Study wrong to say site C14 makes limited contribution to preventing towns merging
No exceptional circumstances demonstrated for green belt removal
Impact on wildlife as shown by Extended Phase 1 Habitat Survey 2015 (FID181) is of District importance
Loss of trees/hedges should be TPOs
Access inadequate via small minor residential roads
Potential damage to existing residents parked cars
A520 is already a dangerous stretch of road
Traffic congestion
Maintain attractive access to Churnet Valley
Infrastructure inadequate schools medical services
Lack of employment
Should build on brownfield
Will cause planning blight
Views of Parish Council & local residents have been ignored
Unsustainable location
Poor bus service
Planning permission refused
Are alternative sites
Houses not needed – houses for sale are not selling
Density too high
Degrade gateway to Wetley Rocks
Loss of privacy/views/ /impact on existing houses

Council Response

- The land in question is within the Green Belt The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a more detailed site-based assessment of land which could be considered for review. It found the site's overall impact on Green Belt's purposes were moderate *"Despite being a relatively large edge-of-settlement site, development would not intrude into open countryside, being contained physically and visually by a drain and hedgerow between Folly Lane and the A520 Cheadle Road."* and recommended the site could be considered for release under exceptional circumstances. In order to release a site from the Green Belt the Council must be

Cheddleton

CD003 Land to the south of Rockend Drive/Millstone Edge

able to demonstrate that exceptional circumstances exist. Consideration needs to be given to all the relevant evidence to determine the overall suitability of the site for release from the Green Belt.

- The Extended Phase 1 habitat Survey 2015 assessed the present and potential ecological value of the proposed site allocations. It found that “The site has mostly low biodiversity value overall in terms of area. However, the major aspects of interest are the significant bat potential in the 7 trees and species rich hedgerow which values the site as having district ecological importance”.
- The Highways Authority advises that development acceptable subject to access design and provision of visibility splays. But preferable for CD002 to be developed in conjunction with CD003, with bulk of access through CD003
- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children’s play areas.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
- The Core Strategy defines Cheddleton as a larger village with a range of facilities and services
- The Council has recently undertaken a Landscape, Local Green Space and Heritage Impact Study 2016 to form part of the evidence base to support the Local Plan and assess the potential landscape impacts of the development allocations The Study found the site was of low landscape sensitivity
- An assessment of the District’s employment land requirements was carried out in The Employment Land Requirement Study the draft Local Plan proposes employment allocations/polices to meet this need.
- The views of residents and the Parish Council have been sought through the consultations. The Council must balance this evidence against all the other evidence relating to this site and reach a decision on whether or not to include it as a development site in the Local Plan.
- The decisions on the Local Plan will be made by Staffordshire Moorlands District Councillors before it is submitted to the Secretary of State for Communities and Local Government for Examination.
- Previous applications were refused under the planning policy existing at that time the proposed Local Plan will replace existing policy and seeks to allocate housing sites to meet objectively assessed need of the District. As part of this process the existing Green Belt boundaries are being looked at.
- The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district’s full housing needs, including affordable housing, whilst taking into account migration and demographic change
- There is not enough brownfield land or sites or infill sites in settlements to meet the District’s proposed housing requirements so green field options have been

Cheddleton

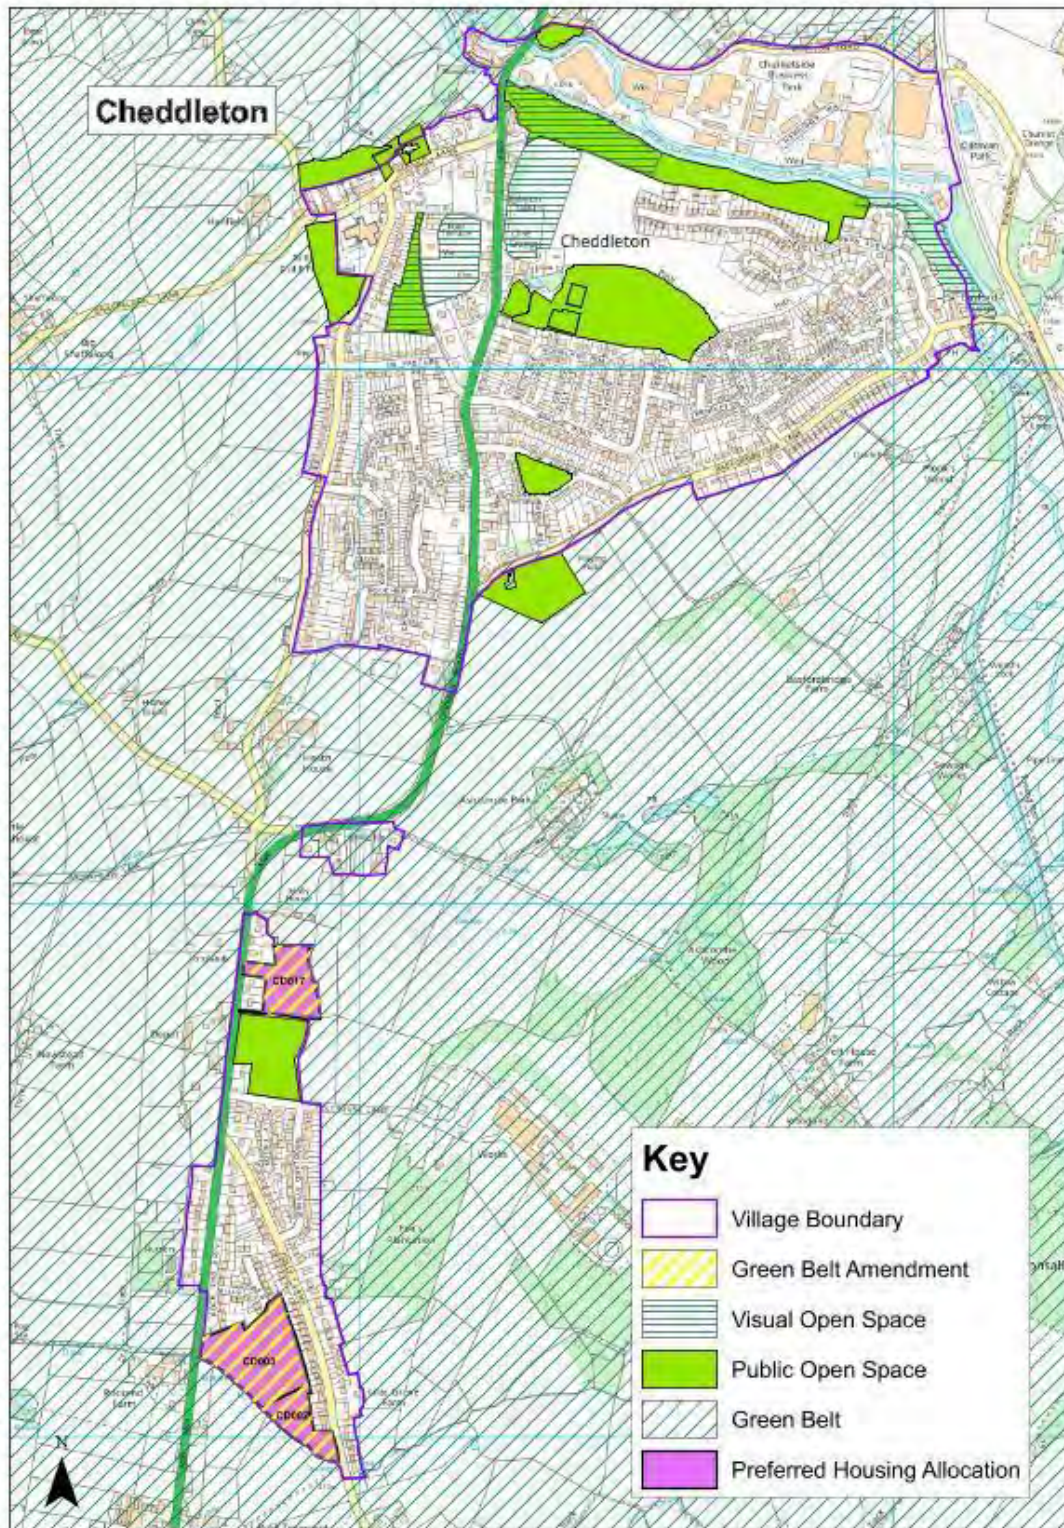

CD003 Land to the south of Rockend Drive/Millstone Edge

proposed .Prioritising brown field land over greenfield in all circumstances is not part of Government policy

- Issues such as overlooking and other impacts on existing residents will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application
- Any new development will be subject to the design policies in the new Local Plan
- Issues such as overlooking and other impacts on existing residents will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application
- Responses to the comments received to the Site Options consultation in 2015 were reported to the Council Assembly on 13 April 2016 and are available on the Council's website.

Cheddleton

CD003 Land to the south of Rockend Drive/Millstone Edge

Cheddleton

CD017 Land at/to the rear of Address of 403/399-411 Cheadle Road

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances.
- See key issues below.

Key Issues

- Green Belt site. Green Belt Review considers it is acceptable for release. Exceptional circumstances would need to be demonstrated
- Listed buildings in vicinity of the site impact of the development needs to be mitigated. The Landscape, Local Green Space and Heritage Impact Study August 2016 identified that the site is of low landscape sensitivity and is suitable for development in heritage terms subject to heritage masterplanning. Listed buildings in vicinity of the site impact of the development needs to be mitigated.
- Access needs to be clarified.

Site Information

Studies

Cheddleton

CD017 Land at/to the rear of Address of 403/399-411 Cheadle Road

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. The site has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the species rich hedgerow and the potential for bats on site.

The following surveys/ actions are therefore recommended in order to establish SBI/BAS status:

- Hedgerow survey following the modified HEGS methodology.
- Further assessment of the tree for their potential to support roosting bats.
- Possible bat survey possibly required.

Extended Phase 1 Habitat Survey 2015 (FID 182 & 184)

FID 182

The site has mostly low biodiversity value overall in terms of area. However, the major aspects of interest are the species rich hedgerow and bat potential in the oak tree which constitutes the site being considered to have district ecological importance. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- A bat survey regime is recommended to ascertain whether bats roost in the tree
- Japanese knotweed eradication
- Vegetation removal at the appropriate time of year

FID 184

The site has mostly low biodiversity value overall in terms of area. The major aspects of interest are focussed on the species rich hedgerow and bat potential in the oak and sycamore trees and general potential for supporting breeding birds in the scattered trees and hedgerows. Therefore the site is deemed to have district ecological importance. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- A bat survey regime to ascertain whether bats roost in the trees
- Hedgerow survey
- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement

Landscape, Local Green Space and Heritage Impact Study August 2016

Land north of Bones Lane

Landscape

Site comprises a residential property on Cheadle Road and the land to the rear of it, north of Bones Lane. The existing linear development on Cheadle Road and the development to the south of the site do not currently contribute to a well-defined settlement edge. The site has low visual prominence as it is generally enclosed by development and vegetation. The existing trees and hedgerows on the northern and eastern site boundaries could be strengthened form a well-defined, vegetated edge to the settlement.

Site is of low landscape sensitivity.

Heritage

Cheddleton

CD017 Land at/to the rear of Address of 403/399-411 Cheadle Road

There are three Grade II Listed Buildings within the 400m buffer. Due to the topography as well as intervening buildings and vegetation, there was no intervisibility between the site and the assets. Development would be highly unlikely to adversely affect the settings of the heritage assets. Outside of the 400m buffer, there are a group of Listed Buildings to the north-east of the site. Development may adversely affect their settings. Mitigation including screening along the north-eastern and eastern boundaries of the site would reduce any potential effects on the settings of these Listed Buildings.

Development in the site would change a small element of the HLC zone CWWHECZ 12, although for the most part, it would remain unaltered (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms subject to appropriate masterplanning.

Green Belt Review 2015

(Appraised sites according to their contribution to Green Belt Purposes)

Check Sprawl: Limited contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Contribution

Preserve Setting: Limited Contribution

Overall Impact of development on Green Belt Purposes: Limited

A visually contained site development on which would not significantly intrude into the Green Belt. The easterly and northerly boundaries of the site are weak.

Recommendation: Consider for Release under Exceptional Circumstances, including amendment of the Village Boundary.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 29 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. Similarly, the site's accessibility to areas of countryside and open space is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the site's proximity to historic assets and the ecological value of the site is likely to have a negative effect.

Options Consultation July 2015

Statutory bodies/stakeholders

Cheddleton Parish Council: Support because planning permission already granted on site

SCC Highways: Not clear how access would be gained? Drawing does seem to show an access from the highway, but this is not clear 'on the ground'. More details of this would be required before any detailed comments could be given. Could access be gained off the recently constructed Bones Lane access to Pointons? (though Bones Lane is private and land would be required from Pointons).

SMDC Conservation - Site adjoins Ashcombe Park Estate.

Developer/Agent/Landowner – Landowner confirms that still consider site [plus access tail south of no. 411 Cheadle Rd in same ownership] would be suitable for residential development and that land will be released for development within next Plan period.

Cheddleton

CD017 Land at/to the rear of Address of 403/399-411 Cheadle Road

Public response 12 comments - 10 objections and 2 support.

Issues raised:

Objections:

- Infrastructure – schools
- Infrastructure - traffic/transport
- Infrastructure – other
- Landscape
- Nature conservation
- Flood risk
- Amenity (e.g. noise, privacy, loss of light)
- Scale of development
- Government policy – greenbelt; sustainability;
- Other:
- proximity to animal rendering plant;
- historic dwelling (no. 403 Cheadle Rd);
- large backland development;

Support:

- Need for new affordable housing in village/ associated benefits to local businesses
- Support because planning permission already granted on site

Council response –

The County has determined that there is limited capacity at St Edward's First School for additional pupils; however many Cheddleton pupils currently attend First Schools in Leek. Pupil numbers are expected to increase further in Cheddleton as pressure for places in Leek increases. First School places may be needed to mitigate the impact of village requirement. Cheddleton falls within Leek catchment for Middle/High Schools. The District Council will work with the County Council to identify an appropriate solution.

The Highways Authority advises that they require more details/clarification regarding how access to site would be achieved, before can comment.

New development is the main way to deliver new or improved infrastructure e.g. more residents may support an improved bus service, and provision of a mains gas supply. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. childrens' play areas, footpaths. Similarly, doctors and dentists in Cheddleton will assess their capacity needs as a result of new development in Cheddleton so that provision can be made to accommodate new residents.

Severn Trent have stated that they have a duty to complete necessary improvements to sewers to provide the capacity for new development. The Council will continue to liaise with the EA and Severn Trent regarding this issue.

The Council has a Landscape & Settlement Setting Study and this site is not identified as being important landscape setting to the settlement.

The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will

Cheddleton

CD017 Land at/to the rear of Address of 403/399-411 Cheadle Road

be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed.

The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. The Council also fully consults with both the Environment Agency and County Council Lead Local Flood Risk Officer during the Plan preparation process.

Amenity – issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.

Most of the land in question is within the Green Belt. In order for Cheddleton to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance This study recommends considering site CD017 for release from the Green Belt.

It is not considered that development of this particular site would be out of proportion with the rest of the village. Any new development taking place will be subject to design policies contained within the new Local Plan – which will be subject to public consultation next year.

In addition to existing areas of employment, the Core Strategy identifies broad areas for additional employment land in Leek, Biddulph, and Cheadle; and also identifies a requirement for additional employment land provision across the rural areas of the Moorlands. Further, the Larger Villages Policy in the Core Strategy supports a degree of additional economic/retail activity in settlements such as Cheddleton.

When deciding over which site options to proceed with the Council will consider the respective comments of statutory consultees including Environment Agency, SMDC Environmental Health, SMDC Conservation, SCC Highways/ Transportation, infrastructure providers etc; and utilises the results of its sustainability appraisal work.

Preferred Options Consultation April 2016

Historic England, Severn Trent, Natural England, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Environment Agency- No site specific comments. Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

SCC Education- . In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity

Cheddleton

CD017 Land at/to the rear of Address of 403/399-411 Cheadle Road

at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded. We acknowledge that the Plan states an Infrastructure Delivery Plan is being produced and we would be keen to work with you to develop this to ensure there is clarity over infrastructure requirements and delivery.

SCC LLFA would suggest perimeter drain where it abuts gardens.

Cheddleton Parish Council-

- CD002 and CD003 – both sites are within the Green Belt and outside the village boundary. Strongly object to the inclusion of both areas given that it would
 - a) effectively link two villages
 - b) there would be major road / highway issues
 - c) degrade the natural gateway to the village of Wetley Rocks.If allocated it would go against two Green Belt Policy principles, major coalescent & the joining of two communities.
- CD017 – opposed (Green Belt and a house would have to be demolished to provide access)
- Land at 397 Cheadle Road – support (site already has planning permission)
- CD115 – support (within Green Belt but is in centre of village)
- Staffordshire Farmers Site – support (only brownfield site, has established access)

Public Response

Issues raised

Preferable to CD002 & CD003

Increase traffic

Prefer CD015

Traffic safety

Loss of wildlife habitat

Out of character with surrounding area

House would have to be demolished to provide access

Council Response

- The Highways Authority advises that they require more details/clarification regarding how access to site would be achieved, before can comment.
- Issues such as overlooking and other impacts on existing residents will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application
- The Extended Phase 1 Habitat Survey 2015 found the site was generally of low biodiversity value in overall terms of the area

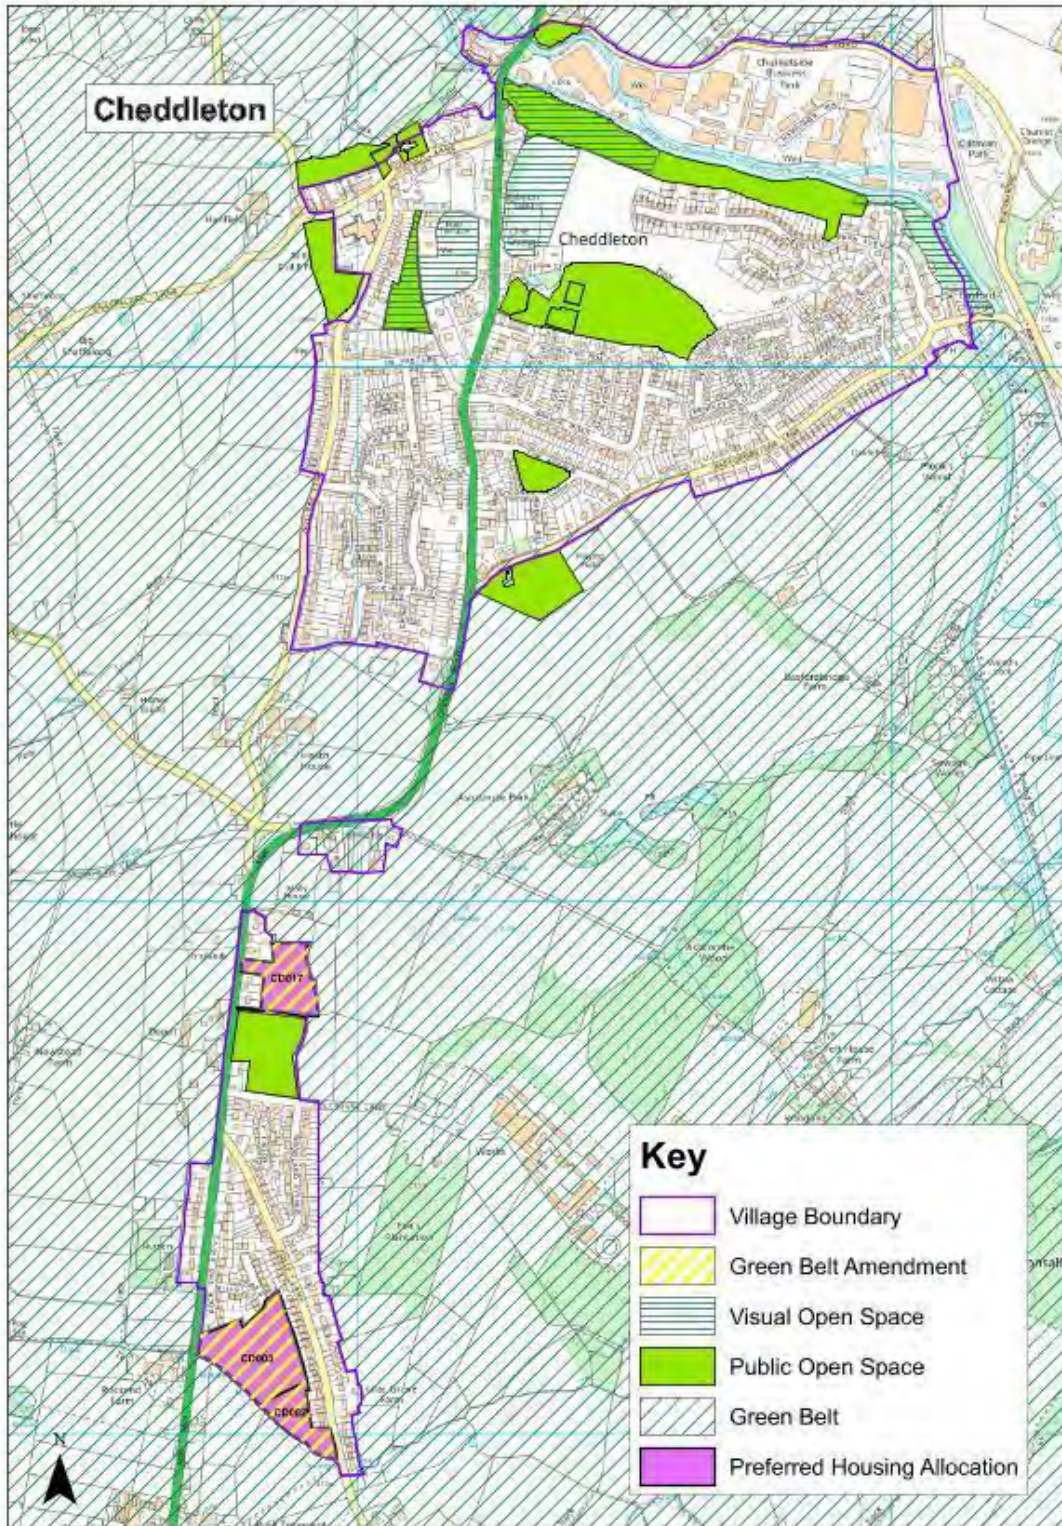

Cheddleton

CD017 Land at/to the rear of Address of 403/399-411 Cheadle Road

- The land in question is within the Green Belt. The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a more detailed site-based assessment of land which could be considered for review. The review found that the overall impact of development on the site on Green Belt purposes was limited and recommended the site could be considered for release under exceptional circumstances. In order to release a site from the Green Belt the Council must be able to demonstrate that exceptional circumstances exist. Consideration needs to be given to all the relevant evidence to determine the overall suitability of the site for release from the Green Belt.
- Any new development taking place will be subject to policies contained within the new Local Plan, which seek to protect the character of the area consideration will be given to the scale of development and its impact on the surrounding area.

Cheddleton

CD017 Land at/to the rear of Address of 403/399-411 Cheadle Road

Endon

EN012 Land North of 50 Hillswood Drive

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances. Green Belt Study 2015 (assessed larger area includes sites from Site Options) recommended for release subject to masterplan regarding settlement edge and no development north of open space which is part of this site.
- Landscape impact site is of high/medium landscape sensitivity
- See key issues below.

Key Issues

- Green Belt site. Green Belt Study 2015 (assessed larger area includes sites from Site Options) recommended for release subject to masterplan regarding settlement edge and no development north of open space. Exceptional circumstances would need to be demonstrated.
- Development would have potential landscape impact particularly the northern strip. Landscape, Local Green Space and Heritage Impact Study August 2016 found site next to the recreation ground is of medium/high landscape sensitivity. The area to the north is high landscape sensitivity and development here would adversely affect settlement edge. Recommend landscape mitigation on area to east of recreation ground. It is suitable for development in heritage terms.
- May require existing estate roads/junctions to be improved. Access possible via Hillwood Drive. Access onto A53 from existing estate roads will require improvement
- Potential flooding issues needs detailed consideration. SCC considered there were potential flood risk issues recommend early engagement with SCC & Environment Agency & FRA.

Studies

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. The habitats have limited ecological value however the site has ecological value in its potential to support protected species. Further surveys are required to establish the potential for bat roosts and the presence of reptiles and amphibians.

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- Further assessment of the trees for their potential to support roosting bats.
- Bat survey possibly required.
- Survey of the pond for the habitat suitability for great crested newts.
- Reptile survey.

Extended Phase 1 Habitat Survey 2015 (FID 3)

The site has mostly low biodiversity value overall in terms of area though the dry ditch to the east adds some extra biodiversity to the site. The major aspects of interest across the site is the significant bat potential in the 2 trees and general potential for supporting reptiles and amphibians that warrants the site being attributed district ecological importance. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- A bat survey regime to ascertain whether bats roost in the trees
- Reptile survey
- Great crested newt survey of nearby pond
- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement

Landscape, Local Green Space and Heritage Impact Study August 2016

Land north of Endon (west)

Landscape

The site comprises an L-shaped field on the northern edge of Endon, which encloses the recreation ground at the end of Hillswood Drive. Development within the eastern section of the site would be partially screened by surrounding vegetation, however further advanced planting would be needed

on the northern boundary in order to increase screening and create a vegetated edge. Development within the western section of the site, north of the recreation ground, would adversely affect the existing settlement edge and would have higher visual prominence when viewed from the surrounding countryside. Due to the narrow

Endon

EN012 Land North of 50 Hillswood Drive

width of this section of the site it is unlikely that a feasible landscape strategy to reduce this impact could be implemented.

The eastern section of the site (Section A) is of medium landscape sensitivity. Site-specific landscape mitigation measures for this section could include additional advanced planting on the northern boundary. The western section of the site (Section B) is of high landscape sensitivity. Please note that this study forms part of a wider evidence base to support SMDC's Local Plan. Therefore the conclusions within this report will be weighed against other evidence when determining the overall suitability of a site for development.

Heritage

There is one Grade II Listed Building and one Conservation Area within the 400m buffer. There was no intervisibility between the site and the assets due to the topography and intervening buildings. Development would be highly unlikely to adversely affect their settings. Whilst the HEA states that the HLC zone BEEHECZ 11 is sensitive to change as a whole, the particular HLC type is least sensitive and with a mitigation, development would be suitable (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms.

Green Belt Review 2015

(Appraised sites according to their contribution to Green Belt Purposes)

EN007, EN012, EN019 & EN101 appraised together

Check Sprawl: Contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Contribution

Preserve Setting: Limited contribution

Overall Impact of development on Green Belt Purposes: Moderate

Whilst progressive extension of the built edge into open countryside is not ideal, there is in this case the opportunity to use a reasonable boundary feature as the

Endon

EN012 Land North of 50 Hillswood Drive

clear extent of development in a location which not readily visible. These sites would need to be the subject of comprehensive masterplanning to ensure that the treatment of the outer edge is properly addressed, and built development does not extend to the north of the current open space.

Recommendation: Consider for release under Exceptional Circumstances should be accompanied by extension of the village boundary.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 24 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

Options Consultation July 2015

Statutory bodies/stakeholders

Endon with Stanley Parish Council:

EN012/EN007/EN019/EN101 have generated more reasons to object than any other potential site. Objections to all four:

- i) considerable increase in traffic volume and existing congested estate roads would need to be used to access the sites.
- ii) Only access onto A53 are at the Hillside Ave and Hillswood Drive intersections. Both junctions are currently very difficult/awkward to negotiate throughout the day due to constant heavy traffic on A53.
- iii) Current storm water drain infrastructure is inadequate and new storm water drains would need to be installed throughout current estate to cope with any increased flow.
- iv) All four sites currently in Green Belt.
- v) Any development would be "on the skyline" due to nature of the sites and would have considerable visual impact.

SCC Highways: Hillswood Drive terminates at the gated entrance to this site. This access also leads to a playground. An extension to the adopted highway should be feasible at this point and this may be the best way to obtain access to the neighbouring sites EN007, EN019 and EN101 via any new internal site roads.

SCC Education:

- All Endon/Brown Edge primary schools already over-capacity. Education contributions may be required to fund additional school places.
- Endon High School covers Endon/Bagnall/Stockton Brook/Brown Edge catchment. Current school roll just exceeds its net capacity. Combined housing requirement for these villages means High School is projected to have insufficient capacity. Potential to enlarge existing secondary schools in this area extremely limited. If it is not possible to enlarge existing schools to the level required for for proposed growth, new school allocations may be needed.
- Consultation with SoT LEA will be required as there is potential for cross-boundary impacts from level of growth in this part of Moorlands.
- In general consideration should be given to sites' proximity to essential infrastructure and services to maximise sustainable transport, eg walking to school.

Endon

EN012 Land North of 50 Hillswood Drive

Leek and Moorlands Historic Building Trust: EN012 with EN007, EN019 and EN101 would form a logical extension to the existing 20th century housing development. Despite being Green Belt and part of the former medieval field system its impact on the historic environment would be less than that of other proposals.

Developer/Agent/Landowner: Correspondence from landowner confirming support.

Public response: 183 comments:

182 objections, 1 neutral.

Issues raised:

Objections:

- Infrastructure – schools
- Infrastructure - traffic/transport
- Infrastructure – other
- Landscape
- Nature conservation
- Flood risk
- Amenity (e.g. noise, privacy, loss of light)
- Scale of development
- Listed building / conservation area
- Government policy – Greenbelt; sustainability;

Other:

- other Endon options/ SHLAA sites preferable on access/sustainability/infrastructure/ flooding/greenbelt grounds;
- develop more, smaller, sites instead;
- high density residential scheme meaning high number of children;
- develop brownfield sites in Endon/Moorlands towns first;
- develop (brownfield) sites in Stoke first to regenerate Potteries;
- ground stability concerns;
- drainage/ water run-off concerns;
- 'strong edge' in Landscape Character Assessment;
- historic landscape classification;
- loss of water meadows/farmland;
- danger to children/congestion caused by school drop offs/walking to school;
- topography;
- development should be limited to one-storey height;
- empty local properties;
- develop brownfield sites first;
- trees on site may require TPOs;
- queries SMDC housing requirements (therefore Endon requirements);
- need to expand adjacent Hillswood Drive playing fields owing to development scale;
- local schools/class sizes cannot expand further;
- need for SFRA across Endon options;
- develop local employment first;
- queries over site assessment form description;
- use sites within the village boundary first;
- air pollution (traffic);
- developing a large single site (elsewhere on edge of village) more viable for Council than this site;
- concern that sites EN007/012/019/101 combined exceeds village housing requirement;

Endon

EN012 Land North of 50 Hillswood Drive

General Comments:

- drainage/water run-off concerns;
- queries over site assessment form description

Council response –

The County has determined that there is insufficient capacity at Endon Primary and High Schools. The District Council will work with the County Council to identify an appropriate solution.

The Highways Authority advises that extension to Hillswood Drive is feasible, and may be the best way of achieving access to not just this site but also EN007/EN019/EN101.

When deciding over which site options to proceed with the Council will consider the respective comments of statutory consultees including SCC Highways/Transportation, Environment Agency, infrastructure providers etc; and utilises the results of its sustainability appraisal work.

New development is the main way to deliver new or improved infrastructure e.g. more residents may support an improved bus service, and provision of a mains gas supply. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. childrens' play areas, footpaths. Similarly, doctors and dentists in Endon will assess their capacity needs as a result of new development in Endon so that provision can be made to accommodate new residents.

Severn Trent have stated that they have a duty to complete necessary improvements to sewers to provide the capacity for new development. The Council will continue to liaise with the EA and Severn Trent regarding this issue.

The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed. With regards on-site TPOs the Council would require future developers to demonstrate how proposals integrating/affecting them would not damage them, unless scheme benefits clearly outweigh loss.

The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. The Council also fully consults with both the Environment Agency and County Council Lead Local Flood Risk Officer during the Plan preparation process.

Amenity – issues such as overlooking and loss of light will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Note that the housing capacity figures in SHLAA site records are only an estimate based on the Council's adopted housing density policy/ surrounding streetscene, but is not binding upon future development.

The land in question is within the Green Belt. In order for Endon to accommodate new development, the Green Belt boundary will need adjustment as there are not

Endon

EN012 Land North of 50 Hillswood Drive

enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site EN012 for release from the Green Belt.

Housing requirements in the Staffordshire Moorlands are in addition to existing properties even if these are for sale or derelict. The new Local Plan will cover a period to 2031 so lack of demand (perceived or actual) at one point in time is not a valid reason for not meeting the area's objectively assessed housing needs.

The Council has a Landscape & Settlement Setting Study and this site is not identified as being important landscape setting to the settlement aside from a very small segment to western boundary.

It is not considered that development of this particular site would be out of proportion with the rest of the village. Any new development taking place will be subject to design policies contained within the new Local Plan – which will be subject to public consultation next year.

- When deciding over which site options to proceed with the Council will consider the respective comments of statutory consultees including SMDC Conservation, SCC Highways/Transportation, Environment Agency, infrastructure providers etc; and utilises the results of its sustainability appraisal work.

In addition to existing areas of employment, the Core Strategy identifies broad areas for additional employment land in Leek, Biddulph, and Cheadle; and also identifies a requirement for additional employment land provision across the rural areas of the Moorlands. Further, the Larger Villages Policy in the Core Strategy supports a degree of additional economic/retail activity in settlements such as Endon.

Given the housing requirements of the village, it is not possible to meet this need upon brownfield sites in the village alone. Therefore a number of greenfield options have been proposed. National/Local Policy does not rule out allocating upon greenfield sites. Note that not all options will be required to meet Endon's requirements. Note that not all options will be required to meet Endon's requirements.

The findings of the 2010 Historic Environment Character Assessment will be taken into account by the Council alongside the other landscape evidence it holds, when deciding over 'preferred Options'.

The issue of using land in neighbouring authorities will be discussed as part of the Council's duty to co-operate obligation.

Preferred Options Consultation April 2016

Statutory Bodies

Historic England, Severn Trent, Natural England, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Endon

EN012 Land North of 50 Hillswood Drive

Environment Agency- Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

SCC Education- . In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded. We acknowledge that the Plan states an Infrastructure Delivery Plan is being produced and we would be keen to work with you to develop this to ensure there is clarity over infrastructure requirements and delivery.

SCC Transport- In relation to Site EN012 intensification of traffic flows from this estate should be avoided without an improvement of junction onto A53. However, this plot on its own may be too small to facilitate this. Also both Hillside and Hillswood Avenue junctions are complicated as are Clay Lake and Church Lane onto the A53.

SCC LLFA – potential flood risk issues, recommend flood risk assessment/modelling and early engagement with County Council & Environment Agency. FRA required

SCC Landscape - The allocation ENO 12 at Endon appears to project from the main village envelope into the wider landscape with potential wider reaching effects. This is likely to require specific policy consideration within the Plan.

Endon Parish Council

Parish Council have undertaken own consultations and base response on feedback. EN012 – most oppose site due to:

- Increase in traffic volume and access from A53
- Flooding and surface water issues could be exacerbated
- Green Belt designation

Other comments

- With the exception of sites EN033 and EN126 break the development down into smaller infill sites spread throughout the village. These are indicated on an attached plan.
- The current character of the village would be retained.
- There is less strain on existing infrastructure

Sites suggested are extensions or immediately adjacent to existing housing without need for new estates.

Public Response

Issues raised

Increased traffic

Endon

EN012 Land North of 50 Hillswood Drive

Traffic safety dangerous junction at the bottom of Hillswood Drive/dangerous in the winter/close to playing fields
Junction at Station Road/ Clay Lake needs to be redesigned to cope with additional traffic
Increase in pollution from traffic
Increase flooding
Existing issue with drains & gardens flooding
Estate roads not suitable for increased traffic
Prefer alternative sites submitted by Parish Council
Is a green belt site
Concerned other amber sites maybe granted permission
Loss of property values and negative impact on the village
Lack of infrastructure schools (take children from outside the catchment area) shops medical services
Unsustainable location houses should be located close to employment
Site on top of a hill leading to increase car use/poor disabled access/exposed to worst of inclement weather
Impact on landscape/breach the skyline
Loss of visual open space
Planning refused on in the past
Should be preserved for agricultural use
Loss of informal recreation land
Lack of employment
Existing houses empty
Site Options site adjacent to A53 is preferable
Build on brownfield sites
Development should ne infill
Build on disused railway line between Endon station & Stockton Brook
Site assessments of EN101, EN029 EN007 & EN012 are contained inaccuracies – sites not flat are rural views/Green Belt review sites are all grade 4 agricultural land site removed are also grade 4/Description said no flooding Endon is renowned for flooding/Development would increase flooding issues/Inaccuracies undermine SMDC decision making process regarding these sites
Prefer EN108/EN092/EN030
Disappointed sites not removed and they are green or amber in assessment, other areas sites have been removed eg Bagnall, Stockton Brook Stanley with no rationale given
Government projections 50% less than SMDC
Site slopes in three directions
Used for cattle grazing
Decision makers may not have visited the site
Support the need for more houses but it needs to support local area and have necessary infrastructure
Out of character with Endon
Scale of development too great for size of village

Council Response

- Hillswood Drive terminates at the gated entrance to this site. This access also leads to a playground. An extension to the adopted highway should be feasible at this point and this may be the best way to obtain access
- Potential flood risk issues, will require flood risk assessment/modelling and early engagement with County Council & Environment Agency

Endon

EN012 Land North of 50 Hillswood Drive

- The land in question is within the Green Belt The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a more detailed site-based assessment of land which could be considered for review. It found the site's overall impact on Green Belt's purposes were moderate. *" Whilst progressive extension of the built edge into open countryside is not ideal, there is in this case the opportunity to use a reasonable boundary feature as the clear extent of development in a location which not readily visible. These site would need to be the subject of comprehensive masterplanning to ensure that the treatment of the outer edge is properly addressed, and built development does not extend to the north of the current open space."* It considered the site could be considered for release under Exceptional Circumstances. In order to release a site from the Green Belt the Council must be able to demonstrate that exceptional circumstances exist. Consideration needs to be given to all the relevant evidence to determine the overall suitability of the site for release from the Green Belt.
- Property values are not a material planning consideration
- The Local Plan will allocate sites for residential development and will provide certainty for local communities and developers through policies guiding the overall level and location of development. Planning applications must be determined in accordance with the Local Plan unless material considerations indicate otherwise.
- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
- The Core Strategy defines Endon as a larger village with a range of facilities and services
- The Council has recently undertaken a Landscape, Local Green Space and Heritage Impact Study 2016 to form part of the evidence base to support the Local Plan and assess the potential landscape impacts of the development allocations The Study found the eastern section of the site is of medium landscape sensitivity. Site-specific landscape mitigation measures for this section could include additional advanced planting on the northern boundary. The western section of the site is of high landscape sensitivity.
- The Extended Phase 1 habitat Survey 2015 assessed the present and potential ecological value of the proposed site allocations. It found that "the site has mostly low biodiversity value overall in terms of area though the dry ditch to the east adds some extra biodiversity to the site."
- New housing schemes (depending on their size) will need to incorporate areas of open space and landscaping, and also maintain existing pedestrian links as well as the consideration of new links.

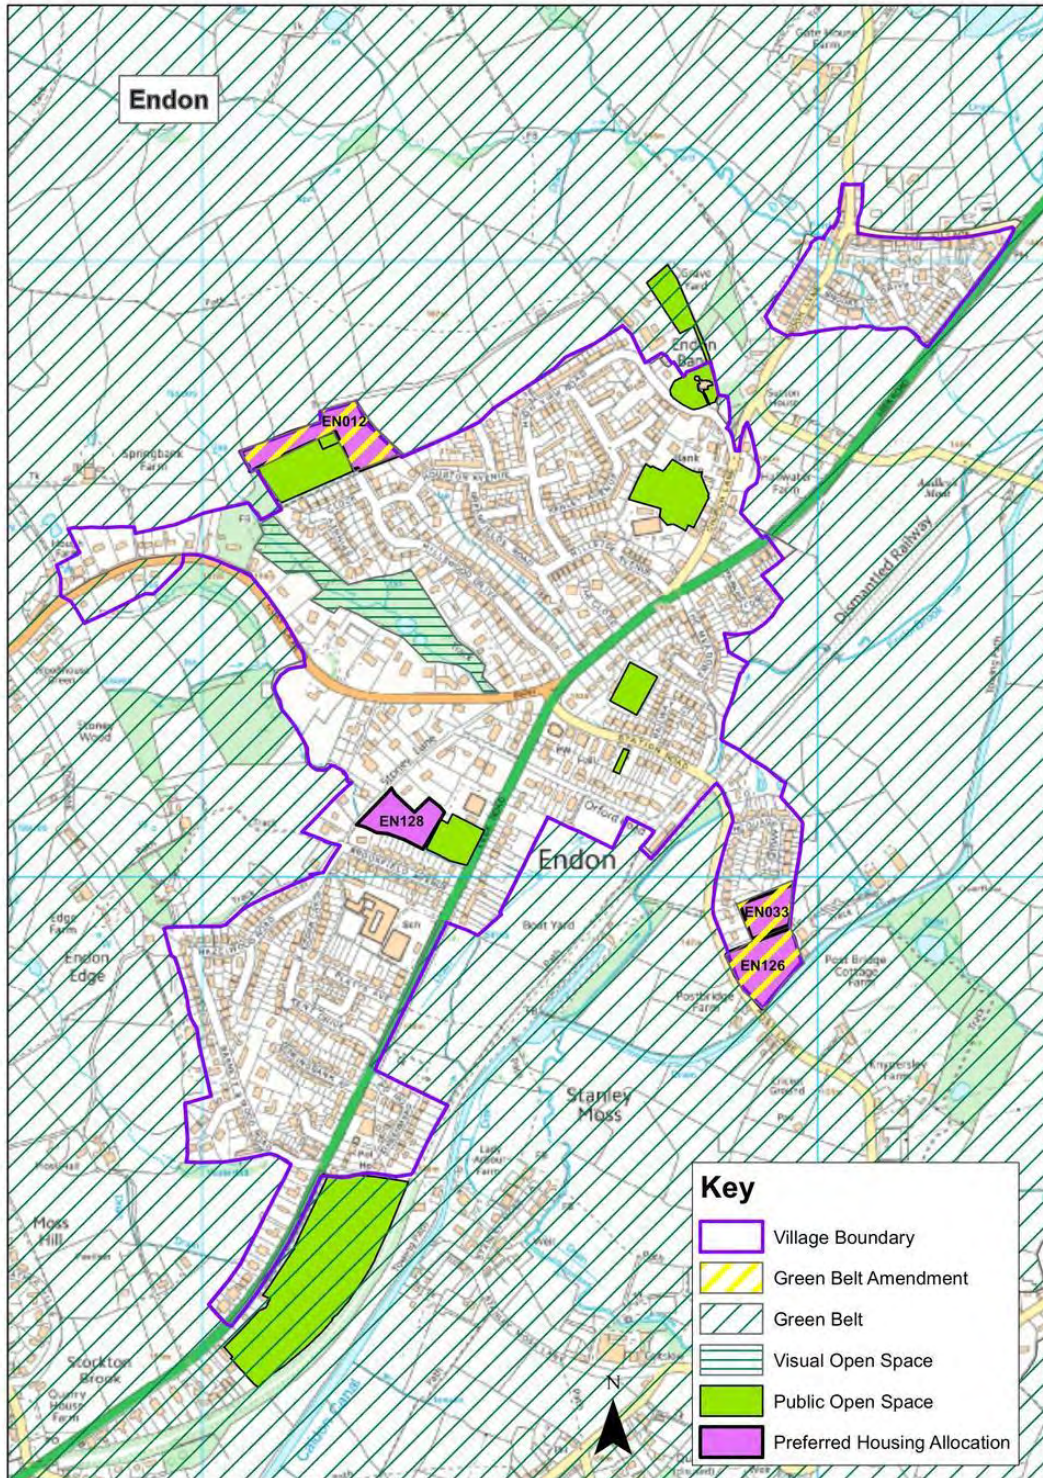

Endon

EN012 Land North of 50 Hillswood Drive

- An assessment of the District's employment land requirements was carried out in The Employment Land Requirement Study the draft Local Plan proposes employment allocations/policies to meet this need.
- Issues such as overlooking and other impacts on existing residents will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application
- The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district's full housing needs, including affordable housing, whilst taking into account migration and demographic change
- There is not enough brownfield land or sites or infill sites in settlements to meet the District's proposed housing requirements so green field options have been proposed .Prioritising brown field land over greenfield in all circumstances is not part of Government policy
- Responses to the comments received to the Site Options consultation in 2015 were reported to the Council Assembly on 13 April 2016 and are available on the Council's website.
- The site assessments provided a summary of the key issues and responses
- The Council has considered the alternative sites suggested in the responses to the previous consultation and where appropriate has included the additional sites in the proposed site allocations in the emerging Local Plan
- As part of the preparation for the emerging Local Plan the Council has assessed sites in the SHLAA and sites suggested through the consultation process
- The previous planning application refusal was under the existing planning policy at the time the consultation is on proposals to update planning policy and provide a new Local Plan
- Any new development taking place will be subject to design policies contained within the new Local Plan
- If the district council considered that a development they may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts.
- There is a policy in the Local Plan regarding the pollution

Endon

EN012 Land North of 50 Hillswood Drive

© Crown copyright and database rights 2016 Ordnance Survey 100018384.

Endon
EN033 Land South/East/Northwest of The Quadrangle/Post Lane/Post Bridge Farm

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances.
- See key issues below.

Key Issues

- Access via an unadopted track, may require third party land. Site could be developed with EN0126
- Green Belt site. Green Belt Review considers it is acceptable for release. Exceptional circumstances would need to be demonstrated.
- Landscape, Local Green Space and Heritage Impact Study August 2016 identified that the site is of low landscape sensitivity and is suitable for development in heritage terms.
- Flooding issues SCC identified existing problems with Endon Brook recommend early engagement with SCC.

Site Information

Greenfield/ brownfield	Built up area boundary /countryside	Est. housing capacity	Area (ha)	Density per hectare	Ownership status	Site details
Greenfield	Countryside Green Belt	12	0.47	25	Land available	<ul style="list-style-type: none"> • Small field • Some perimeter foliage • Grade II listed building and Conservation Area within 400m

Studies

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. The site has ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only.

Endon
EN033 Land South/East/Northwest of The Quadrangle/Post Lane/Post Bridge Farm

However, more information is required regarding the potential for reptiles and amphibians.

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- Survey of the ponds for the habitat suitability for great crested newts.
- Reptile survey.

Extended Phase 1 Habitat Survey 2015 (FID 4)

The site has mostly low biodiversity value overall in terms of area and is poorly connected to other more diverse habitats apart from 2 ponds <200m away to the east, which increases the sites ecological importance in terms of its loss within the wider countryside as district value. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- Great crested newt survey of the nearby ponds
- Reptile survey, especially due to grass snake being recorded within 100m
- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement.

Landscape, Local Green Space and Heritage Impact Study August 2016
Post Bridge Cottage Farm (north)

Landscape

Site comprises a small field on the southern edge of the settlement, to the rear of properties on Post Street. The site is bound to the south by an access track to a garage/mechanics business, which encloses the site to the east. The site is generally screened by adjacent development. Views towards the site from the south are available, however these are partially screened by intervening vegetation. The site sits well within the existing development form as it does not extend beyond existing linear development on Post Lane. Planting on the southern boundary could create a well-defined, vegetated settlement boundary, and provide further screening of views from the south.

Site is of low landscape sensitivity.

Heritage

There is one Grade II Listed Building and one Conservation Area within the 400m buffer. The nature of the Conservation Area (canal) and associated Listed Building means that setting contributes little to their overall significance. The site was well screened along its southern boundary which limits intervisibility between the site and the Conservation Area. Therefore, with vegetation screening along the southern edge of the site, development would be unlikely to cause adverse effects to the setting of the Conservation Area. Development would be unlikely to cause adverse effects to the HLC zone BEEHECZ 10 (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms.

Green Belt Review 2015

(Appraised sites according to their contribution to Green Belt Purposes) EN033 & EN126 appraised together

Check Sprawl: Contribution

Maintain Separation: contribution

Prevent Encroachment: Contribution

Endon
EN033 Land South/East/Northwest of The Quadrangle/Post Lane/Post Bridge Farm

Preserve Setting: contribution

Overall Impact of development on Green Belt Purposes: Limited

Sites which form a reasonable extension to the south east of Endon, both of which are well contained on

all sides. Whilst development would alter the setting of Endon along this entrance, the overall effect would not be significant, not affect the wider Green Belt in this location and be a clear limit to further development.

Recommendation: Consider for release under Exceptional Circumstances should be accompanied by extension of the village boundary.

Habitat Regulation Assessment Initial Findings Preferred Option 2016

No potential impact pathways identified

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 12 dwellings is considered to have a significant positive effect, as is the accessibility of services and facilities. Similarly, the site's accessibility to health care and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

Options Consultation July 2015

Statutory bodies/stakeholders

Endon with Stanley Parish Council: Would accept 24 new houses on EN033+EN126 subject to following provisions:

- i) EN126 has a low density and a minimum 10m width along canal frontage is preserved (to enhance Caldon Canal conservation area).
- ii) If both sites developed the junction of Station Road with A53 must be improved as currently hazardous and difficult to make exit from Station Road at all times of day.

SCC Highways: Accessed via a private, unmade track leading to a Fine Feathers Farm, which is not suitable for two-way traffic. This would need third party land to widen it, therefore this may be unworkable.

SCC Education:

- All Endon/Brown Edge primary schools already over-capacity. Education contributions may be required to fund additional school places.
- Endon High School covers Endon/Bagnall/Stockton Brook/Brown Edge catchment. Current school roll just exceeds its net capacity. Combined housing requirement for these villages means High School is projected to have insufficient capacity. Potential to enlarge existing secondary schools in this area extremely limited. If it is not possible to enlarge existing schools to the level required for proposed growth, new school allocations may be needed.
- Consultation with SoT LEA will be required as there is potential for cross-boundary impacts from level of growth in this part of Moorlands.
- In general consideration should be given to sites' proximity to essential infrastructure and services to
- maximise sustainable transport, e.g. walking to school.

Endon
EN033 Land South/East/Northwest of The Quadrangle/Post Lane/Post Bridge
Farm

Leek and Moorlands Historic Building Trust – EN033 appears as a logical extension of the existing 20th century development to its north and west.

Developer/Agent/Owner:

- Landowner confirms site might be available. Argues it is a brownfield site.

Public response 11 comments:

6 objections, 5 support.

Issues raised:

Objections:

- Infrastructure – schools
- Infrastructure - traffic/transport
- Landscape
- Nature conservation
- Flood risk
- Amenity (e.g. noise, privacy, loss of light)
- Scale of development
- Listed building / conservation area
- Government policy: greenbelt;

Other:

- use sites within the village boundary first;
- new junction(traffic) would be hazardous;
- flooding/drainage concerns;
- developing a large single site (elsewhere on edge of village) more viable for Council than this site;
- concern over proximity to Caldon Canal conservation area;
- narrow bridge in weak condition [Post Lane];
- develop (brownfield) sites in Stoke first to regenerate Potteries;

Support:

- Low density/small-scale housing;
- natural extension to village;
- would be partially screened by existing development;
- site size/yield more manageable than alternative options
- good vehicular access and parking
- traffic impact here more manageable than other parts of Endon;
- Access to core shopping area

Council response –

The County has determined that there is insufficient capacity at Endon Primary and High Schools. The District Council will work with the County Council to identify an appropriate solution.

The Highways Authority advises current access [to Fine Feathers Farm] is not currently wide enough; would need widening with third party land – therefore access may be unworkable. However, access through no. 2 Post Lane may be feasible [comments awaited].

When deciding over which site options to proceed with the Council will consider the respective comments of statutory consultees including SMDC Conservation, SCC Highways/Transportation, Environment Agency, infrastructure providers etc; and utilises the results of its sustainability appraisal work.

Endon
EN033 Land South/East/Northwest of The Quadrangle/Post Lane/Post Bridge
Farm

New development is the main way to deliver new or improved infrastructure e.g. more residents may support an improved bus service, and provision of a mains gas supply. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. childrens' play areas, footpaths. Similarly, doctors and dentists in Endon will assess their capacity needs as a result of new development in Endon so that provision can be made to accommodate new residents.

Severn Trent have stated that they have a duty to complete necessary improvements to sewers to provide the capacity for new development. The Council will continue to liaise with the EA and Severn Trent regarding this issue.

The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed.

The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. The Council also fully consults with both the Environment Agency and County Council Lead Local Flood Risk Officer during the Plan preparation process.

Amenity – issues such as overlooking and loss of light will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.

The land in question is within the Green Belt. In order for Endon to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance This study recommends considering site EN033 for release from the Green Belt.

The Council has a Landscape & Settlement Setting Study and this site is not identified as being important landscape setting to the settlement.

Given the housing requirements of the village, it is not possible to meet this need upon brownfield sites in the village alone. Therefore a number of greenfield options have been proposed. National/Local Policy does not rule out allocating upon greenfield sites. Note that not all options will be required to meet Endon's requirements. Note that not all options will be required to meet Endon's requirements.

The issue of using land in neighbouring authorities will be discussed as part of the Council's duty to co-operate obligation.

Preferred Options Consultation April 2016
Statutory Bodies

Endon
EN033 Land South/East/Northwest of The Quadrangle/Post Lane/Post Bridge
Farm

Historic England, Severn Trent, Natural England, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Environment Agency- No site specific comments Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

SCC Education- . In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded. We acknowledge that the Plan states an Infrastructure Delivery Plan is being produced and we would be keen to work with you to develop this to ensure there is clarity over infrastructure requirements and delivery.

SCC Transport- Site EN033/EN126 will need to consider the Station Road/A53 junction.

SCC LLFA- existing problems in Endon Brook recommend early engagement with County Council

Endon Parish Council

Parish Council have undertaken own consultations and base response on feedback. EN033 & EN126 – suitable for development subject to:

- Station Road/A53 junction needs improving.
- Conservation Area must be enhanced and respected (EN126)

Other comments

- With the exception of sites EN033 and EN126 break the development down into smaller infill sites spread throughout the village. These are indicated on an attached plan.
- The current character of the village would be retained.
- There is less strain on existing infrastructure

Sites suggested are extensions or immediately adjacent to existing housing without need for new estates.

Public Response
Issues raised

Site is suitable for development

Green Belt site

Area floods

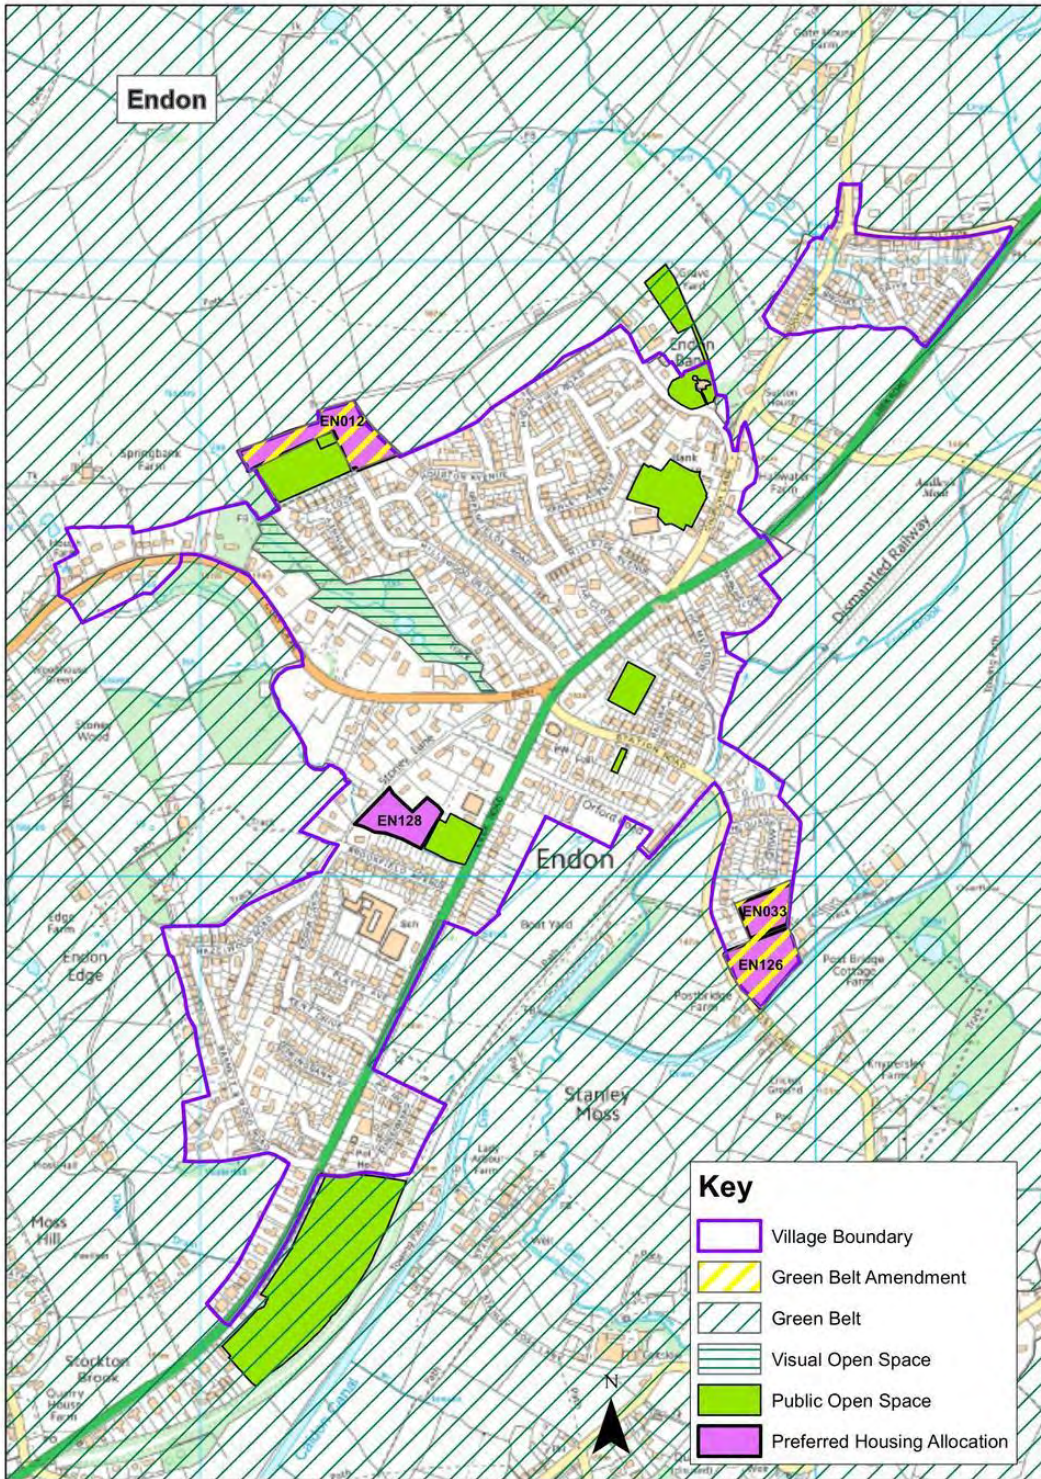

Traffic congestion

Endon
EN033 Land South/East/Northwest of The Quadrangle/Post Lane/Post Bridge
Farm

Council Response

- The Environment Agency has not identified any site specific issues. They recommend that the ecological value of watercourses is enhanced where possible and the impact on water quality is assessed. The Council has completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. Mitigation measures will be taken as part of the site development to address any surface water issues.
- The land in question is within the Green Belt. The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a more detailed site-based assessment of land which could be considered for review. The review found that the overall impact of development on the site was limited “Sites which form a reasonable extension to the south east of Endon, both of which are well contained on all sides. Whilst development would alter the setting of Endon along this entrance, the overall effect would not be significant, not affect the wider Green Belt in this location and be a clear limit to further development.” Recommended site could be considered for release under exceptional circumstances. In order to release a site from the Green Belt the Council must be able to demonstrate that exceptional circumstances exist. Consideration needs to be given to all the relevant evidence to determine the overall suitability of the site for release from the Green Belt.
- The Highway Authority advise the site is accessed via a private, unmade track leading to a Fine Feathers Farm, which is not suitable for two-way traffic. This would need third party land to widen it.

Endon

EN126 Field between Canal/Post Cottage Farm/Wolfstanton Ho Post Lane

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances.
- Landscape impact site is of high landscape sensitivity.
- See key issues below.

Key Issues

- Green Belt site. Green Belt Review considers it is acceptable for release. Exceptional circumstances would need to be demonstrated.
- Access would require new junction and footway
- Adjacent to canal.
- Landscape impact – Landscape, Local Green Space and Heritage Impact Study August 2016 identified that the site is of high landscape sensitivity and is suitable for development in heritage terms subject to heritage masterplanning, potential impact on the Conservation Area.

Site Information

Greenfield/ brownfield	Built up area boundary/country side	Est. housin g capacit y	Area (ha)	Ownershi p status	Site details
Green field	Countryside Green Belt	12	0.83		<ul style="list-style-type: none">• Flat arable field• Peripheral trees/hedges• Canal along southern boundary• Grade Listed building and Conservation Area within 400m

Studies

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. The site has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the potential for bats, reptiles and amphibians.

Endon

EN126 Field between Canal/Post Cottage Farm/Wolfstanton Ho Post Lane

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- Further assessment of the trees for their potential to support roosting bats.
- Possible bat survey required.

Extended Phase 1 Habitat Survey 2015 (FID 172)

The site has fairly poor biodiversity and has poor connectivity to the wider countryside. However, as the site has a number of trees with bat roosting potential and habitats that could support reptiles and terrestrial amphibians the site has been attributed district ecological importance. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- Great crested newt survey of the nearby ponds
- Bat survey of the 5 trees marked as having bat roosting potential
- Reptile survey
- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement.

Landscape, Local Green Space and Heritage Impact Study August 2016 Post Bridge Cottage Farm (south)

Landscape

The site comprises a field on the southern edge of the settlement, north of the canal. The site is adjacent to linear development on Post Lane but otherwise separated from the settlement edge by EN033. The site is currently open, and an important contribution to existing rural approach to the settlement from the south. Development within the site would be visually prominent and would adversely affect local landscape character and the rural approach to Endon.

Site is of high landscape sensitivity.

Please note that this study forms part of a wider evidence base to support SMDC's Local Plan. Therefore the conclusions within this report will be weighed against other evidence when determining the overall suitability of a site for development

Heritage

There is one Grade II Listed Building and one Conservation Area within the 400m buffer. The nature of the Conservation Area (canal) and associated Listed Building means that setting contributes little to their overall significance. However, due to the location of the site along the edge of the Conservation Area, mitigation should include stepping development back from the southern boundary, as well as employing vegetation screening along the southern boundary. Development would be unlikely to cause adverse effects to the HLC zone BEEHECZ 10 (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms subject to appropriate masterplanning.

Green Belt Review 2015

(Appraised sites according to their contribution to Green Belt Purposes) EN033 & EN126 appraised together

Check Sprawl: Contribution

Maintain Separation: contribution

Endon

EN126 Field between Canal/Post Cottage Farm/Wolfstanton Ho Post Lane

Overall Impact of development on Green Belt Purposes: Limited

Sites which form a reasonable extension to the south east of Endon, both of which are well contained on

all sides. Whilst development would alter the setting of Endon along this entrance, the overall effect would not be significant, not affect the wider Green Belt in this location and be a clear limit to further development.

Recommendation: Consider for release under Exceptional Circumstances should be accompanied by extension of the village boundary.

Habitat Regulation Assessment Initial Findings Preferred Option 2016

No potential impact pathways identified

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 12 dwellings is considered to have a significant positive effect, as could its accessibility to services and facilities. Similarly, the site's accessibility to health care and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect, as could its partial location within a flood zone. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

Options Consultation July 2015

Statutory bodies/stakeholders

Endon with Stanley Parish Council: Would accept 24 new houses on EN033+EN126 subject to following provisions:

- i) EN126 has a low density and a minimum 10m width along canal frontage is preserved (to enhance Caldon Canal conservation area).
- ii) If both sites developed the junction of Station Road with A53 must be improved as currently hazardous and difficult to make exit from Station Road at all times of day.

SCC Highways: Informal access has been created off Post Lane for maintenance and cutting etc. There is no footway along the boundary of the site. Sited on inside of a bend therefore appropriate visibility will be needed for any new junction and a footway provided. Located on the approach to signals for the single span canal bridge.

SCC Education:

- All Endon/Brown Edge primary schools already over-capacity. Education contributions may be required to fund additional school places.
- Endon High School covers Endon/Bagnall/Stockton Brook/Brown Edge catchment. Current school roll just exceeds its net capacity. Combined housing requirement for these villages means High School is projected to have insufficient capacity. Potential to enlarge existing secondary schools in this area extremely limited. If it is not possible to enlarge existing schools to the level required for proposed growth, new school allocations may be needed.
- Consultation with SoT LEA will be required as there is potential for cross-boundary impacts from level of growth in this part of Moorlands.
- In general consideration should be given to sites' proximity to essential infrastructure and services to maximise sustainable transport, eg walking to school.

Endon

EN126 Field between Canal/Post Cottage Farm/Wolfstanton Ho Post Lane

Environment Agency – advise that site is partial FZ, and that EA may have more information.

SMDC Conservation - Adjoins Cauldon Canal Conservation Area. Detrimentially affects rural setting.

Leek and Moorlands Historic Building Trust –

EN126 adjoins Cauldon Canal Conservation Area and would detrimentally affect its rural setting.

Developer/Agent/Landowner – Owners have confirmed interest in residential allocation.

Public response 10 comments:

5 objections, 5 support.

Issues raised:

Objections:

- Infrastructure – schools
- Infrastructure - traffic/transport
- Infrastructure – other
- Landscape
- Nature conservation
- Flood risk
- Amenity (e.g. noise, privacy, loss of light)
- Scale of development
- Listed building / conservation area
- Government policy

Other:

- avoid impacting on Caldun Canal/local rural character;
- flooding concerns;
- use sites within the village boundary first;
- develop brownfield areas in Potteries instead of greenbelt;
- developing a large single site (elsewhere on edge of village) more viable for Council than this site;

Support:

- Low density housing
- Site size/yield more manageable than alternative options
- Good vehicular access and parking
- Access to core shopping area

Council response –

The County has determined that there is insufficient capacity at Endon Primary and High Schools. The District Council will work with the County Council to identify an appropriate solution.

• The Highways Authority advises that sited on inside of a bend therefore appropriate visibility will be needed for any new junction and a footway provided. But otherwise, development is not ruled out.

• When deciding over which site options to proceed with the Council will consider the respective comments of statutory consultees including SMDC Conservation, SCC Highways/Transportation, Environment Agency, infrastructure providers etc; and utilises the results of its sustainability appraisal work.

Endon

EN126 Field between Canal/Post Cottage Farm/Wolfstanton Ho Post Lane

- New development is the main way to deliver new or improved infrastructure e.g. more residents may support an improved bus service, and provision of a mains gas supply. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. childrens' play areas, footpaths. Similarly, doctors and dentists in Endon will assess their capacity needs as a result of new development in Endon so that provision can be made to accommodate new residents.
- Severn Trent have stated that they have a duty to complete necessary improvements to sewers to provide the capacity for new development. The Council will continue to liaise with the EA and Severn Trent regarding this issue.
- The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed.
- The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District the results of which are being used to inform the site selection process. The Council also fully consults with both the Environment Agency and County Council Lead Local Flood Risk Officer during the Plan preparation process.
- Amenity – issues such as overlooking and loss of light will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.
- The land in question is within the Green Belt. In order for Endon to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site EN126 for release from the Green Belt.
- The Council has a Landscape & Settlement Setting Study and this site is not identified as being important landscape setting to the settlement.
- Given the housing requirements of the village, it is not possible to meet this need upon brownfield sites in the village alone. Therefore a number of greenfield options have been proposed. National/Local Policy does not rule out allocating upon greenfield sites. Note that not all options will be required to meet Endon's requirements. Note that not all options will be required to meet Endon's requirements.
- The issue of using land in neighbouring authorities will be discussed as part of the Council's duty to co-operate obligation.

Preferred Options Consultation April 2016

Endon

EN126 Field between Canal/Post Cottage Farm/Wolfstanton Ho Post Lane

Statutory Bodies

Historic England, Severn Trent, Natural England, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Environment Agency- No site specific comments Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

SCC Education- . In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded. We acknowledge that the Plan states an Infrastructure Delivery Plan is being produced and we would be keen to work with you to develop this to ensure there is clarity over infrastructure requirements and delivery.

SCC Transport- Site EN033/EN126 will need to consider the Station Road/A53 junction.

SCC LLFA – Part of site in flood zone – flood zone 2 & 3, surface water flooding. Main river flood plain unclear where surface water will go. Recommend flood risk assessment and early engagement with County Council & Environment Agency

Endon Parish Council

Parish Council have undertaken own consultations and base response on feedback. EN033 & EN126 – suitable for development subject to:

- Station Road/A53 junction needs improving.
- Conservation Area must be enhanced and respected (EN126)

Other comments

- With the exception of sites EN033 and EN126 break the development down into smaller infill sites spread throughout the village. These are indicated on an attached plan.
- The current character of the village would be retained.
- There is less strain on existing infrastructure

Sites suggested are extensions or immediately adjacent to existing housing without need for new estates.

Public Response Issues raised

Endon

EN126 Field between Canal/Post Cottage Farm/Wolfstanton Ho Post Lane

Site suitable for development – access good/less impact on countryside than other sites/good public transport/low density

Green Belt

Lose village feel

Flooding/increase in surface water

Traffic congestion

Access via narrow country lane, close to a single bridge is dangerous

Conservation Area

Should build on brownfield sites in Leek & Stoke

Better site would be Conservation Area either side of Post Lane to north of A53

Council Response

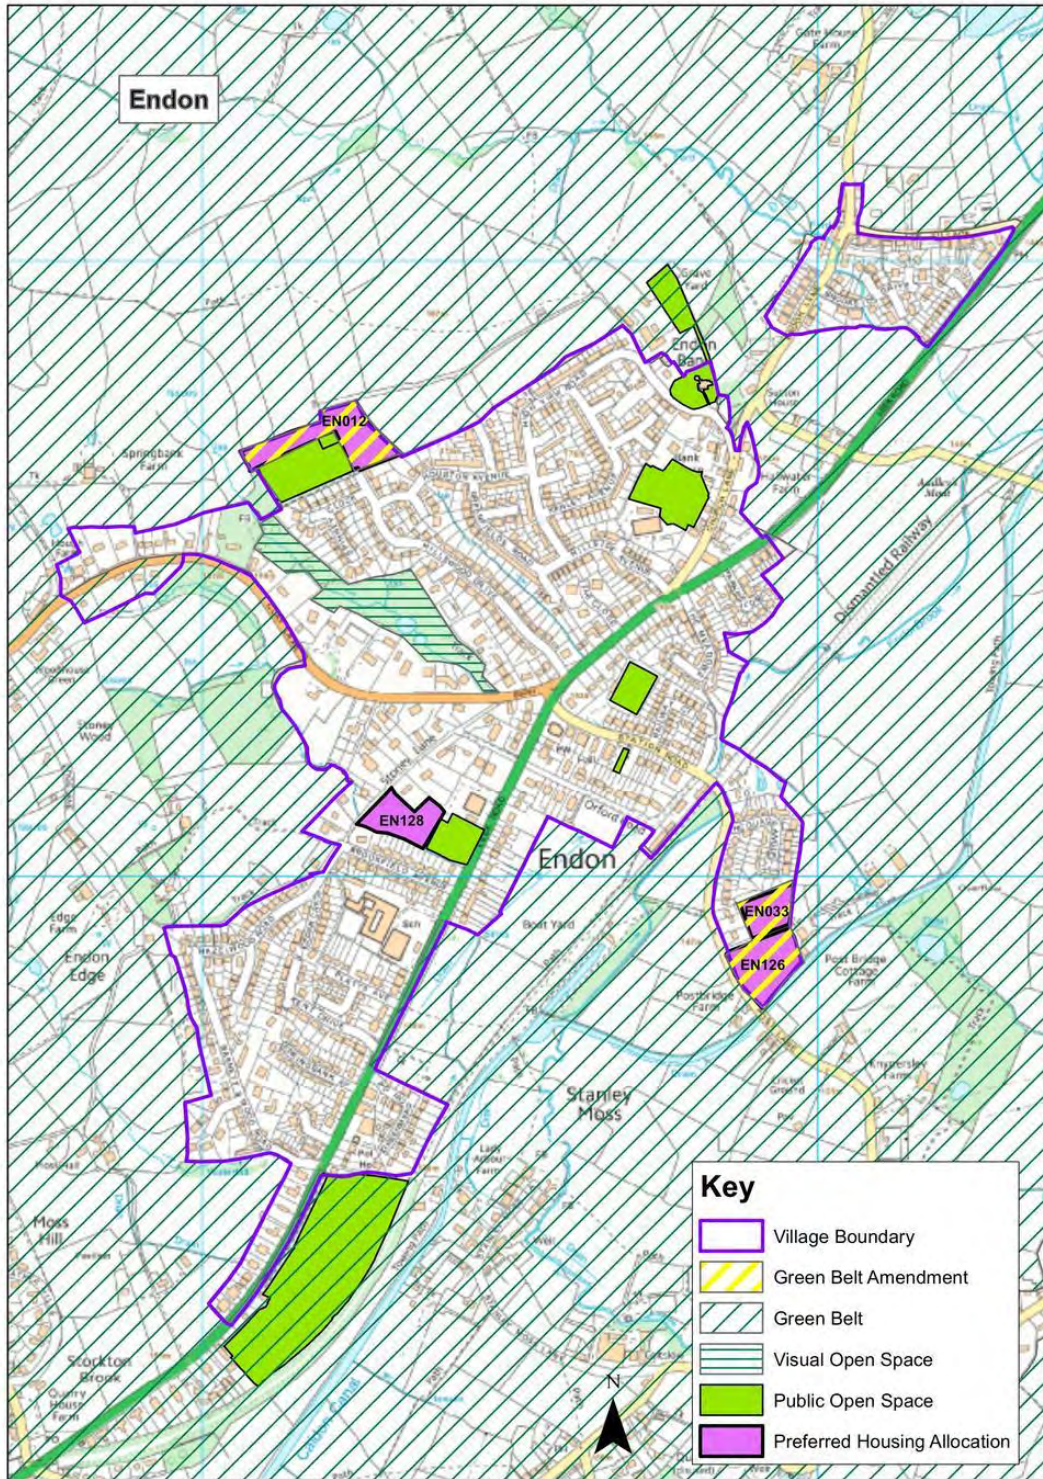

- The land in question is within the Green Belt. The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a more detailed site-based assessment of land which could be considered for review. The review found that the overall impact of development on the site was limited *“Sites which form a reasonable extension to the south east of Endon, both of which are well contained on all sides. Whilst development would alter the setting of Endon along this entrance, the overall effect would not be significant, not affect the wider Green Belt in this location and be a clear limit to further development.”* Recommended site could be considered for release under exceptional circumstances. . In order to release a site from the Green Belt the Council must be able to demonstrate that exceptional circumstances exist. Consideration needs to be given to all the relevant evidence to determine the overall suitability of the site for release from the Green Belt.
- Any new developments would need to adhere to design policies to ensure character of the area is maintained.
- The Highways Authority advises that sited on inside of a bend therefore appropriate visibility will be needed for any new junction and a footway provided. But otherwise, development is not ruled out.
- Potential flood risk issues, recommend flood risk assessment and early engagement with County Council & Environment Agency
- Any new developments would need to adhere to design policies in the Local Plan regarding the Conservation Area
- There is not enough brownfield land or sites or infill sites in settlements to meet the District’s proposed housing requirements so green field sites have been proposed. Prioritising brown field land over greenfield in all circumstances is not part of Government policy
- National planning guidance states that the Council should seek to meet the development needs of their area. Housing allocations are needed to ensure the Districts housing requirement is met.

Endon

EN126 Field between Canal/Post Cottage Farm/Wolfstanton Ho Post Lane

Endon

EN126 Field between Canal/Post Cottage Farm/Wolfstanton Ho Post Lane

© Crown copyright and database rights 2016 Ordnance Survey 100018384.

Endon

EN128 Open land at corner of Brookfield Avenue/Stoney Lane

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken forward into Preferred Options Local Plan:

- Site is within the settlement boundary
- See key issues below.

Key Issues

- Greenfield site within the built up area.
- Access from Brookfield Avenue will require demolition of a dwelling. Access from Stoney Lane will require third party land.
- Potential flooding issues need to be considered.
- Landscape, Local Green Space and Heritage Impact Study August 2016 identified that the site is of low landscape sensitivity and is suitable for development in heritage terms.

Site Information

Greenfield/ brownfield	Built up area boundary/country side	Est. housin g capacit y	Area (ha)	Ownersi p status	Site details
Greenfield	Within village boundary	20	0.71	Land available. Land owner owns adjacent residential dwelling which can provide access to the site	<ul style="list-style-type: none"> • Flat grassed open space within settlement boundary • Low level perimeter dwarf wall/hedging along Stoney Lane & school boundary • Individual TPOs along southern boundary • Designated as VOS in Local Plan • Three Grade II listed buildings and Conservation Area within 400m

Studies

Extended Phase 1 Habitat Survey 2015 (FID)

The site has fairly low biodiversity value overall and the site is set within a mainly urban environment with poor connectivity to the wider countryside. However, the site has been given district ecological importance due to the presence of 1 tree with bat roosting potential and a species rich hedgerow. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

Endon

EN128 Open land at corner of Brookfield Avenue/Stoney Lane

- A bat survey regime to ascertain whether bats roost in the tree.
- Hedgerow survey
- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement. Visual open space

Landscape, Local Green Space and Heritage Impact Study August 2016

Landscape

Stoney Lane

Site comprises a small field of rough grassland within the settlement, which slopes down from Stoney Lane to the playing field of St Luke's primary school. The site comprises a gap in development within the settlement and is enclosed by vegetation, and thus development would fit well within the existing settlement pattern and would have low visual prominence.

Site is of low landscape sensitivity.

Heritage

There are three Grade II Listed Buildings and one Conservation Area within the 400m buffer. The site was well screened and there was no intervisibility between the site and heritage assets. Development would be highly unlikely to adversely affect the settings of the heritage assets. The site is located within the HLC zone BEEHECZ 7 (Historic Environment Character Assessment 2010). Development would be highly unlikely to adversely affect the zone.

Site suitable for development in heritage terms.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 27 dwellings is considered to have a significant positive effect, as is the site's proximity to services and facilities. Similarly, the site's accessibility to health care and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The site's proximity to historic assets and ecological value is likely to have a negative effect.

Options Consultation July 2015

Statutory bodies/stakeholders

Endon with Stanley Parish Council: Many consider site contributes considerably to the open/semi-rural nature of the neighbourhood. There is no clear access to site available as Stoney Lane is unadopted; and because single semi-detached property [14 Brookfield Ave] would not be wide enough for a suitable access. Brookfield Ave is the only adopted road to serve the housing estate; already suffers from considerable traffic congestion and further development would increase this/create further access problems to A53. Also consider that density proposed too high/out of keeping with surrounding area.

SCC Highways: Access should ideally be from Stoney Lane, though this will require improvements and third party land (subject of SMD/2015/0284). Current access proposal would require demolition of a dwelling. Either way appropriate access design and provision of visibility will be required.

SCC Education:

Endon

EN128 Open land at corner of Brookfield Avenue/Stoney Lane

- All Endon/Brown Edge primary schools already over-capacity. Education contributions may be required to fund additional school places.
- Endon High School covers Endon/Bagnall/Stockton Brook/Brown Edge catchment. Current school roll just exceeds its net capacity. Combined housing requirement for these villages means High School is projected to have insufficient capacity. Potential to enlarge existing secondary schools in this area extremely limited. If it is not possible to enlarge existing schools to the level required for proposed growth, new school allocations may be needed.
- Consultation with SoT LEA will be required as there is potential for cross-boundary impacts from level of growth in this part of Moorlands.
- In general consideration should be given to sites' proximity to essential infrastructure and services to maximise sustainable transport, eg walking to school.

Leek and Moorlands Historic Building Trust: A logical part to infill.

Developer/Agent/Owner: Confirms owner support for residential allocation, and that also owns roadside dwelling (access option). Grounds for support include:

- (only) Endon option entirely within village boundary, and central to village;
- Two access options;
- Site not recommended for retention as visual open space in SMDC LSCA, and not very visible;
- Believe no longer TPO on site.

Public response 50 comments:

50 objections.

Issues raised:

Objections:

- Infrastructure – schools
- Infrastructure - traffic/transport
- Infrastructure – other
- Landscape
- Nature conservation
- Flood risk
- Amenity (e.g. noise, privacy, loss of light)
- Scale of development
- Government policy

Other:

- site currently visual open space;
- contributes to Endon's semi-rural character;
- will necessitate demolition of property (access/new pavements would not be wide enough);
- will affect TPOs;
- danger to children (school drop offs)- sited between two schools;
- query drainage capacities (brook crosses site); loss of natural soakaway creating flood risk;
- suggest expand (adjacent) school grounds instead;
- on-street parking problems; local unadopted/poor quality/ narrow roads;
- other Endon options/SHLAA sites preferable on access/ sustainability/ infrastructure/ flooding/ greenbelt grounds;
- develop brownfield sites first;

Endon

EN128 Open land at corner of Brookfield Avenue/Stoney Lane

- developing a large single site (elsewhere on edge of village) more viable for Council than this site;
- suggested density too high/queries justification of this;
- additional affordable housing increases demand for school places;

Council response –

The County has determined that there is insufficient capacity at Endon Primary and High Schools. The District Council will work with the County Council to identify an appropriate solution.

The Highways Authority advises that the site is developable subject to adequate visibility although will require access improvements/ third party land; or demolition of property if via Brookfield Avenue (and has not ruled out the latter as an option).

New development is the main way to deliver new or improved infrastructure e.g. more residents may support an improved bus service, and provision of a mains gas supply. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. childrens' play areas, Endon will assess their capacity needs as a result of new development in Endon so that provision can be made to accommodate new residents.

Severn Trent have stated that they have a duty to complete necessary improvements to sewers to provide the capacity for new development. The Council will continue to liaise with the EA and Severn Trent regarding this issue.

The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed.

With regards on-site TPOs the Council would require future developers to demonstrate how proposals integrating/affecting them would not damage them, unless scheme benefits clearly outweigh loss.

The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. The Council also fully consults with both the Environment Agency and County Council Lead Local Flood Risk Officer during the Plan preparation process.

Amenity – issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Off-street parking expectations are based on national policy in the NPPF. Note that the housing capacity figure in the SHLAA site record is only an estimate based on the Council's adopted housing density policy/ surrounding street scene but is not binding upon future development.

Whilst the site is currently identified as Visual Open Space, the site was not identified for retention as such in the 2008 Landscape and Settlement Character Assessment. The Council is not obliged to retain this designation. Therefore the site was included as a potential housing option.

Endon

EN128 Open land at corner of Brookfield Avenue/Stoney Lane

It is not considered that development of this particular site would be out of proportion with the rest of the village. Any new development taking place will be subject to design policies contained within the new Local Plan – which will be subject to public consultation next year.

The broad economic viability of housing sites is already addressed in the SHLAA database – there is no minimum or maximum allocation size; however only those sites deemed broadly viable/deliverable have been forwarded as ‘options’ in the current consultation.

Given the housing requirements of the village, it is not possible to meet this need upon brownfield sites in the village alone. Therefore a number of greenfield options have been proposed. National/Local Policy does not rule out allocating upon greenfield sites.

When deciding over which site options to proceed with the Council will consider the respective comments of statutory consultees including SCC Highways/Transportation, Environment Agency, infrastructure providers etc; and utilises the results of its sustainability appraisal work.

Preferred Options Consultation April 2016

Statutory Bodies

Historic England, Severn Trent, Natural England, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Environment Agency- No site specific comments Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

SCC Education- . In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded. We acknowledge that the Plan states an Infrastructure Delivery Plan is being produced and we would be keen to work with you to develop this to ensure there is clarity over infrastructure requirements and delivery.

Endon

EN128 Open land at corner of Brookfield Avenue/Stoney Lane

SCC LLFA – potential flood risk issues, recommend flood risk assessment and early engagement with County Council & Environment Agency. Watercourse and surface water floodplain along south boundary

Endon Parish Council

Parish Council have undertaken own consultations and base response on feedback. EN128 – large number of objections

- Contributes to open and semi-rural nature of village
- No clear access
- Prefer use as a playing field for school and use existing playing field as communal car park for village use. Which would solve the biggest single problem.

Other comments

- With the exception of sites EN033 and EN126 break the development down into smaller infill sites spread throughout the village. These are indicated on an attached plan.
- The current character of the village would be retained.
- There is less strain on existing infrastructure

Sites suggested are extensions or immediately adjacent to existing housing without need for new estates.

Public Response

Issues raised

- Will increase traffic/traffic safety/close to school/unsafe for children to play outside
- Brookfield minor residential road inadequate to cope with increased traffic roads in the area already cater for High School & Primary School and surrounding houses.
- On street parking especially at school drop off/pick up times
- Access issues with demolition semi detached house 14 Brookfield Avenue Insufficient room at 14 Brookfield Avenue to achieve access. Stoney Lane would need to become adopted is currently a narrow lane. If adopted Stoney Lane would become a rat run
- Noise pollution from traffic
- Light pollution from traffic particularly using new access on Brookfield
- Flooding issues area low lying & floods/Site close to watercourse
- Drainage issues
- Insufficient infrastructure doctors/school places
- Loss of residential amenity for houses next to new access
- Loss of open space would change semi rural neighbourhood. Brookfield Avenue is an attractive avenue
- children need playing fields
- Is valuable green space
- Perverse to demolish house to solve housing shortage
- Residents & Parish Council views have been ignored
- Should listen to Parish Council views
- Scale of development
- Contrary to government policy
- Loss of wildlife habitat

Endon

EN128 Open land at corner of Brookfield Avenue/Stoney Lane

- Site is designated visual open space to protect semi rural feel of the village and provide break in development Core Strategy directs open spaces should be retained
- Should build on brownfield sites
- Planning application refused 20 years ago upheld on appeal acknowledged importance of open space
- Need to build road bridge over the brook for access
- Density too high out of keeping with surroundings, also need to take account of the brook and build some distance from it
- Low density would impact on site viability
- Playing fields would be overlooked by new houses
- Alternative sites infill around the village. EN137 EN130 & EN024 & sites suggested by Parish Council
- Site assessments are contradictory
- Loss of property value
- If allocated Bassnetts Wood Road should be required to be made up to highway authority standard
- Why do we need all these houses?
- Are properties for sale or empty
- VOS changed with little or no consultation
- Consultation says access from Brookfield Avenue this is incorrect it is from Stoney Lane narrow unadopted Road Would need to demolish a house for access from Brookfield Avenue
- Noise/pollution

Council Response

- The Highways Authority advises that the site is developable subject to adequate visibility although will require access improvements/ third party land; or demolition of property if via Brookfield Avenue (and has not ruled out the latter as an option).
- The Environment Agency did not raise any site specific issues. Staffordshire County Council as LLFA identified potential flood risk issues, recommend flood risk assessment and early engagement with County Council
- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
- Issues such as overlooking and other impacts on existing residents will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application
- Any new developments would need to adhere to design policies to ensure character of the area is maintained.

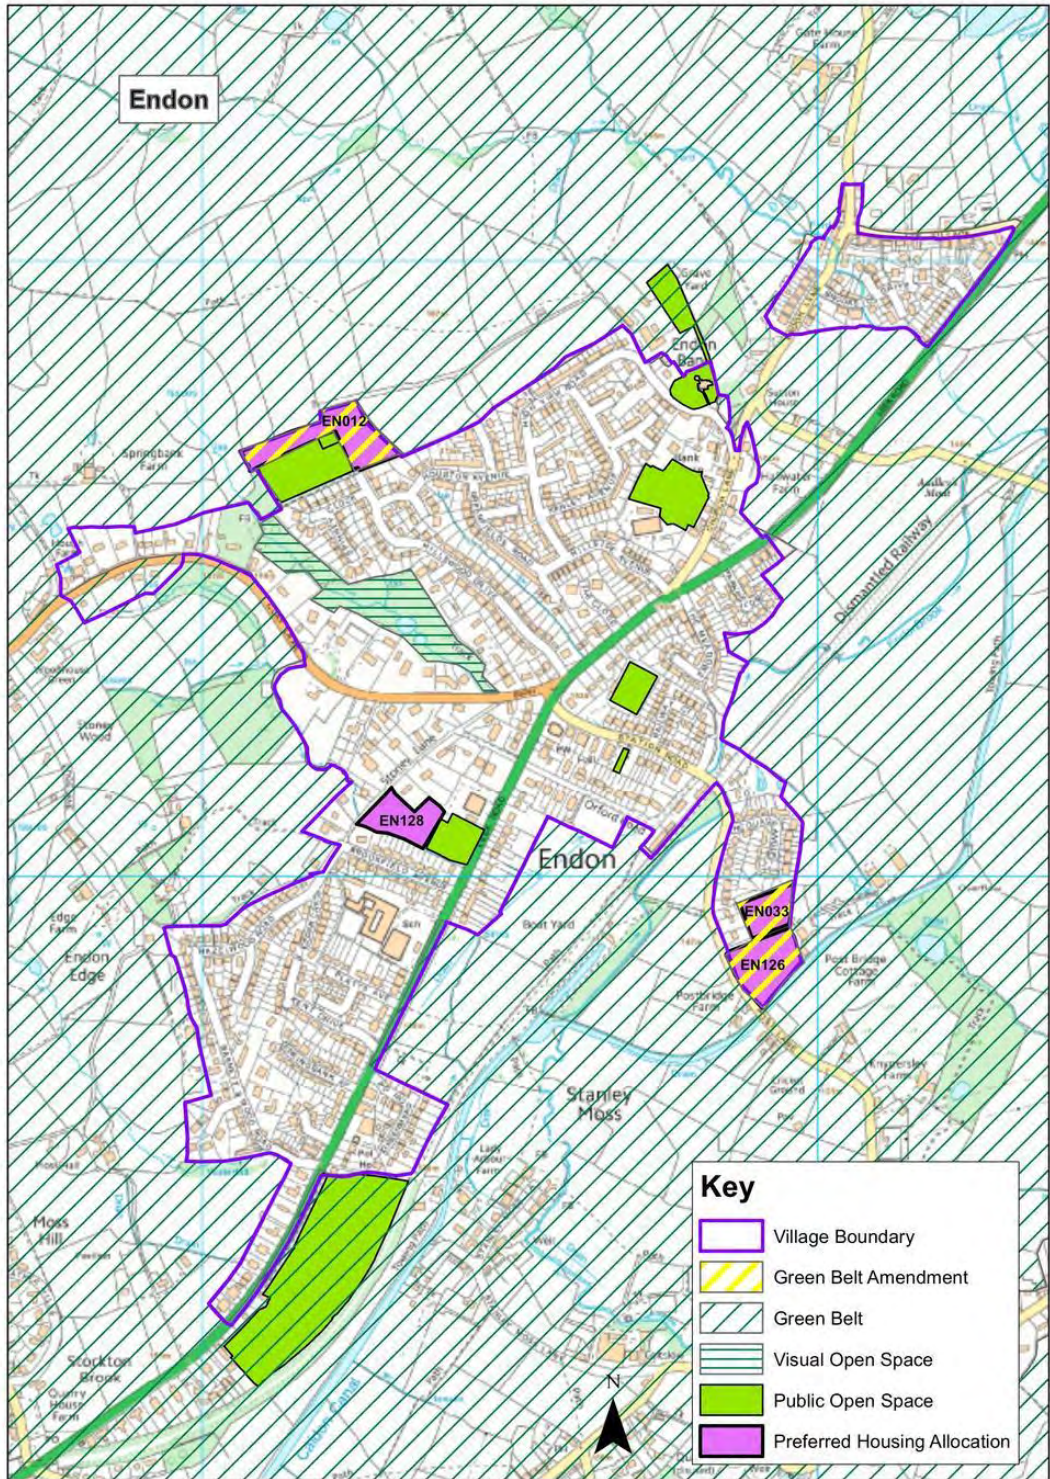

Endon

EN128 Open land at corner of Brookfield Avenue/Stoney Lane

- Whilst the site is currently identified as Visual Open Space, the site was not identified for retention as such in the 2008 Landscape and Settlement Character Assessment. The Council is not obliged to retain this designation. Therefore the site was included as a potential housing option.
- New housing schemes depending on their size will need to incorporate areas of open space and landscaping, and also maintain existing pedestrian links as well as the consideration of new links in line with Local Plan policy.
- The Extended Phase 1 habitat Survey 2015 assessed the present and potential ecological value of the proposed site allocations. It found that the site had fairly low biodiversity value *“The site has fairly low biodiversity value overall and the site is set within a mainly urban environment with poor connectivity to the wider countryside.”*
- The Council has considered the alternative sites suggested in the responses to the previous consultation and where appropriate has included the additional sites in the proposed site allocations in the emerging Local Plan.
- Resident’s views have been sought as part of the consultation. The Council must balance this evidence against all the other evidence relating to this site and reach a decision on whether or not to include it as a development site in the Local Plan.
- The previous planning application refusal was under the existing planning policy at the time the consultation is on proposals to update planning policy and provide a new Local Plan
- The site assessments provided a summary of the key issues and responses.
- Loss of property values are not a material planning consideration
- There is not enough brownfield land or sites or infill sites in settlements to meet the District’s proposed housing requirements so green field sites have been proposed. Prioritising brown field land over greenfield in all circumstances is not part of Government policy
- The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district’s full housing needs, including affordable housing, whilst taking into account migration and demographic change
- If the district council considered that a development they may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts
- There is a policy in the Local Plan regarding the pollution

Endon

EN128 Open land at corner of Brookfield Avenue/Stoney Lane

Ipstones

IP019 Land to north of recreation ground Church Lane

Local Plan Process

- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site not taken forward into Preferred Options Local Plan due to:

- Land availability unknown.
- Heritage impact.

Key Issues

- Landowner intentions unknown.
- Used for the Ipstones Agricultural Show
- Medium heritage impacts and medium landscape impacts – reduce building to eastern part of site.
- HRA - Following the precautionary principle, an Likely Significant Effect (LSE) is identified.
- Flexible 'infill' policy

Site Information

Greenfield/br ownfield	Built up area boundary/countryside	Est. housing capacity	Area (ha)	Ownership status	Site details
Greenfield	Only small part within the development boundary	35	1.3	Unknown	Greenfield site well related to existing settlement.

Studies

Extended Phase 1 Habitat Survey 2015 (FID 135)

Conclusion

Apart from roosting bats the site has little potential to support protected species and fairly poorly connected to the wider countryside, but their presence gives the site at least district ecological importance.

The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- Bat survey of the trees with bat roosting potential
- Vegetation removal at the appropriate time of year

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site and local level. However, more information is required regarding the potential bat roosts.

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- Relevant trees to be identified and further surveyed for their potential to support roosting bats.
- Bat survey possibly required.

Landscape & Settlement Character Assessment 2008

Within important landscape setting to the settlement.

Ipstones

IP019 Land to north of recreation ground Church Lane

Landscape, Local Green Space and Heritage Impact Study (August 2016)

Landscape Assessment

Site comprises a field on the north-western settlement edge, bound by a recreation ground to the south and a cemetery to the north. The site is enclosed by a tree belt to the south, and generally screened from Church Lane by intervening development and vegetation. However, the site is visually prominent when viewed from the cemetery, and from land to the west. In order to reduce visual prominence development could be limited to the eastern half of the site, not extending beyond the gardens of development to the north. This would also create a stronger settlement edge, which could be vegetated if planting were undertaken on a re-aligned western site boundary. Alternatively, substantial advanced planting would need to be undertaken on the current northern and western site boundaries in order to screen views prior to the development of the whole site.

Site is of medium landscape sensitivity. Site-specific landscape mitigation measures could include advance tree planting on the northern and western boundaries, or limiting development to the eastern half of the site.

Heritage Assessment

There is one Grade II* and 27 Grade II Listed Buildings, and one Conservation Area within the 400m buffer. Setting is considered to contribute to the overall significance of the heritage assets, in particular the Grade II* listed church and the Conservation Area. Development would be likely to adversely affect the setting of the church to the north of the site. These effects could be reduced by restricting development to the eastern half of the site, in line with the existing development to the north, and the use of vegetation screening along the northern boundary. Whilst the HEA states that the HLC zone IHECZ 3 has little capacity to absorb change, with sensitive development, this could be accommodated on the site (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms subject to appropriate masterplanning.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 35 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of existing employment is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to designated and historic assets and ecological value.

Habitat Regulation Assessment Initial Findings Preferred Option 2016

Potential likely significant effect on European Site

Site is approx. 7.4 km from the Hamps and Manifold Valleys SSSI component site of the Peak District Dales SAC. Following the precautionary principle, an Likely Significant Effect (LSE) is identified because development of this site could increase recreational pressure on the SAC in combination with the allocation site for 36 homes at Waterhouses.

Conclusion - allocation sites WA004 (Waterhouses) and IP019 (Ipstones) require further investigation in the HRA due to their proximity to a component of the Peak District Dales SAC and the potential for effects of development to result in an in combination effect in relation to recreational pressure.

Options Consultation July 2015

Statutory bodies/stakeholders

SCC Highways - Acceptable subject to access design and provision of visibility.

Ipstones

IP019 Land to north of recreation ground Church Lane

Leek and Moorlands Historic Buildings Trust – IP019 is the least damaging of the development options, although maintaining the existing building line would be more appropriate than full development.

Developer/Agent – Site is in two ownerships. Owner of land adj to main access confirmed that it is not available. Rest of site - land owner unknown.

Public response: 20 comments – 19 objections and 1 support

Issues

Support:

- Scale of development – good infill plot, does not harm character of village
- Government policy

Objections:

Infrastructure - schools

- Infrastructure – traffic - congestion, state of road, parking
- Infrastructure – other – utilities (water)
- Landscape – effect on Green Belt
- Nature conservation
- Flood risk
- Scale of development
- Listed building/conservation area

Other

- loss of field used for agricultural show

Council response –

Most of the land adjacent to the highway is in separate ownership to the main site and is not available. The Highway Authority has stated that access to the site could be difficult but not impossible.

The site is identified as being important to the setting of the settlement in the Council's Landscape & Settlement Setting Assessment. The site is not located within Green Belt. A Landscape & Visual Impact Assessment will be undertaken during the plan production process if the site is taken forward.

The First School currently has sufficient capacity to accommodate any children generated from the estimated housing to be allocated in this area.

New development is the main way to deliver new or improved infrastructure e.g. more residents may support more local facilities. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.

The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed.

The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. The site is within Flood Zone 1 – Low probability.

Severn Trent do not anticipate capacity issues with water supply.

Scale of development is greater than the estimated village requirement however the site relates well to the existing development boundary.

Ipstones

IP019 Land to north of recreation ground Church Lane

The site is not adjacent to a listed building or within the Conservation Area. A Heritage Impact Assessment will be undertaken during the plan production process if the site is taken forward.

There may be other locations available for the agricultural show.

Preferred Options Consultation April 2016

Ipstones Parish Council: Consider very strongly that the proposed sites for Ipstones are not suitable for development and a 'flexible infill' policy would be suitable. Church Lane is totally unsuitable for the increase in traffic. Belmont Road is unsuitable as it is a narrow lane. Where would sewerage pipes go?

SCC Highways: The site will require alterations to the carriageway to achieve visibility, which should be acceptable subject to detailed design.

SCC Education: St Leonards CE(VA) First School is likely to be able to accommodate additional children generated by the allocated housing developments – although small site allowance could also have an impact.

LLFA: FRA required, consult SCC. Not sure where the surface water will go.

Natural England: No specific comments.

Environment Agency: No specific comments.

Historic England: No specific comments.

SMDC Environmental Health: No significant Issues

Public response – issues raised:

- Site used for the Ipstones agricultural show
- Highways and access
- Enough small sites 'infill' within the village. Flexible 'infill' policy.
- Affect property values
- Amenity issues – overlooking, privacy
- Landscape impact
- Need for new housing
- Build in Stoke instead
- Capacity of village school.
- Use the existing employment site on Froghall Road
- Suggest other sites

Council response –

- Comments noted regarding the location of the Agricultural Show. There may be other sites in the village which could accommodate this event.
- The Highways Authority consider that highways & access to the site is acceptable subject to design and provision of visibility.
- Loss of view and property values are non-material planning considerations.
- Small infill sites that can accommodate residential development within the village boundary can contribute to the small site windfall allowance for the Rural Area.
- Amenity – issues such as overlooking, screening will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.
- The Landscape, Local Green Space and Heritage Impact Study (2016) has considered the site and suggests some site-specific landscape mitigation measures. There are also

Ipstones

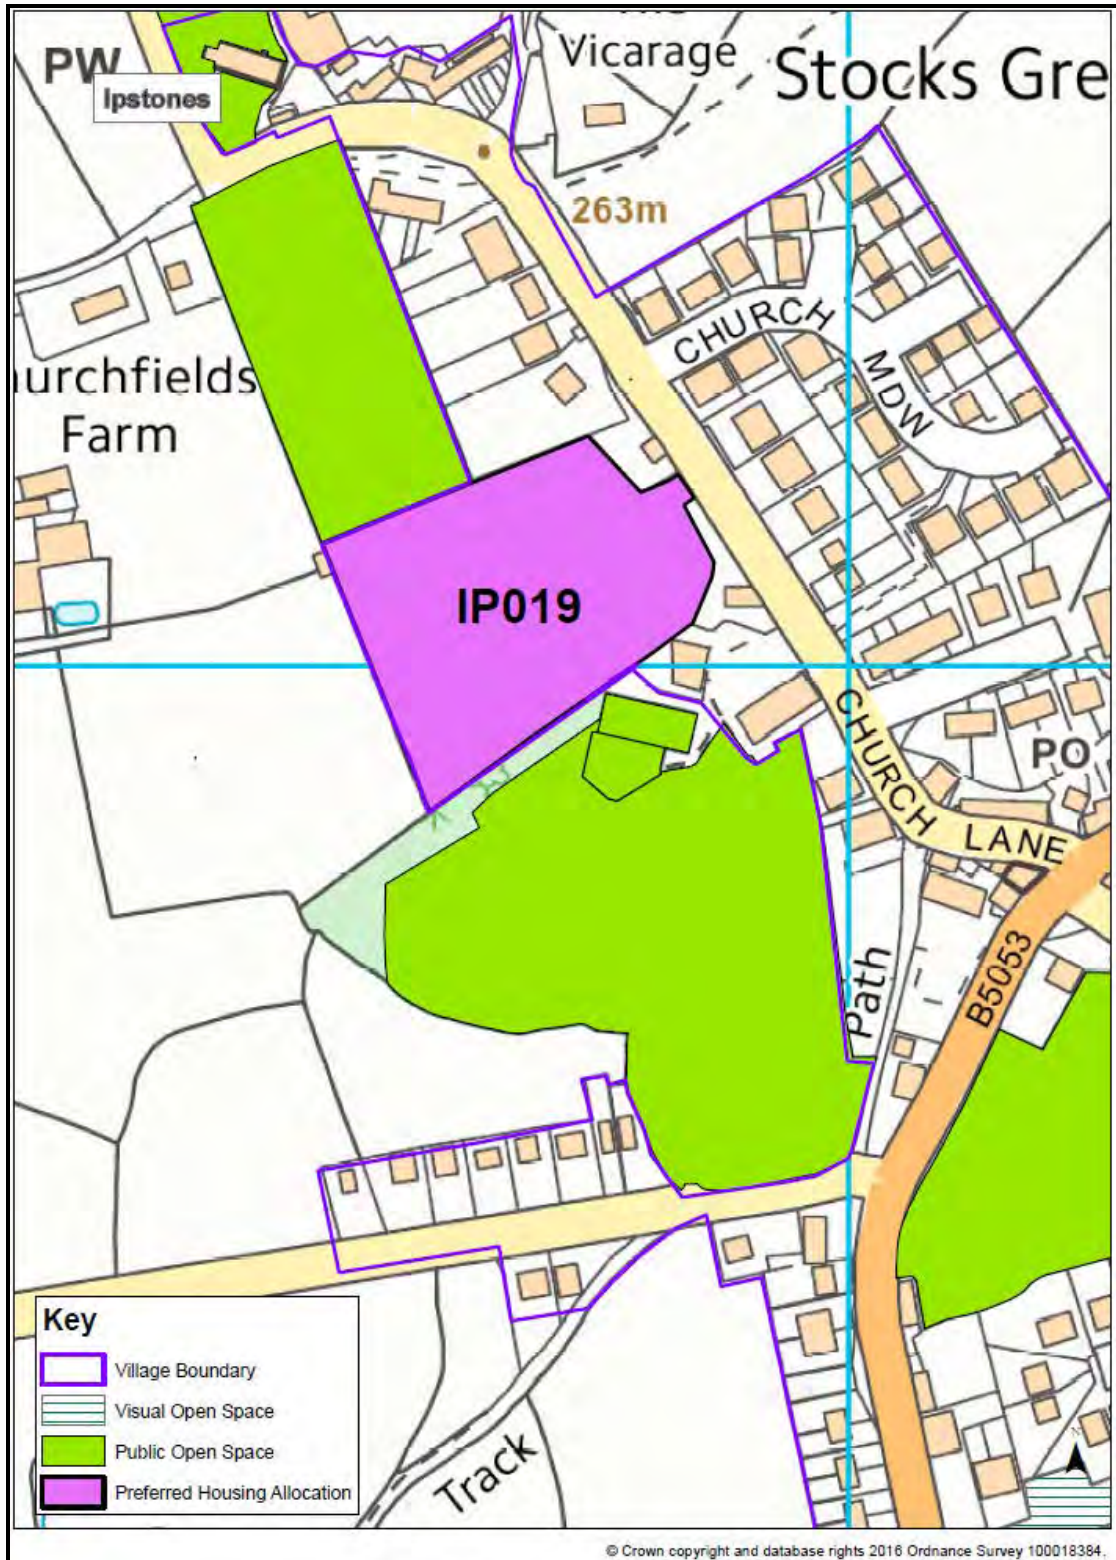

IP019 Land to north of recreation ground Church Lane

potential heritage impacts associated with the development of the site. It suggests that these could be reduced by restricting development to the eastern half of the site.

- The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district's full housing needs, including affordable housing, whilst taking into account migration and demographic change.
- National planning guidance states that the Council should seek to meet the development needs of their area. Housing allocations are needed to ensure the District's housing requirement is met.
- Staffordshire County Council have indicated that St Leonards CE(VA) First School is likely to be able to accommodate the additional children generated by the proposed allocated housing although there may be a need for education contributions to accommodate additional children.
- Other suggested sites:
 - Far Lane Industrial Estate provides an opportunity for local businesses and employment and the Core Strategy safeguards good quality employment sites. Part re-development of the site for residential use could cause amenity issues.
 - IP014a was considered at the Site options stage. There are a number of constraints to this site such as no pedestrian access, affected by historic landfill and potential contamination issues, and important landscape to the setting of the village.
 - Sites off High Street, close to Daisy Bank Farm have been assessed in the Strategic Housing Land Availability (SHLAA). This area makes an important contribution to the Conservation Area including historic boundaries and walls and was not taken forward to the site options stage.
 - IP015 (land adjacent to the fire station) was considered at the Site options stage. There are a number of constraints to this site such as the adverse impact on adjacent New House Farm and Tearn Farmhouse opposite which are both listed buildings, the land is identified as important landscape to the setting of the village and the availability of the site is unknown.
 - Refer to responses to QU37 relating to the Bolton Copperworks site at Froghall .
- The Phase I Ecological survey states that the site has little potential to support protected species and fairly poorly connected to the wider countryside, however recommends a bat survey and vegetation removal at the appropriate time of year.

Ipstones

IP019 Land to north of recreation ground Church Lane

Kingsley

KG049a Land off Moreton Avenue

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances.
- See key issues below.

Key Issues

- Green Belt site. Green Belt Review considers it is acceptable for release. Exceptional circumstances would need to be demonstrated.
- Potential landscape impact. Landscape, Local Green Space and Heritage Impact Study August 2016 identified that the site is of high landscape sensitivity and is suitable for development in heritage terms.
- Highways will need to consider the impact of development on Moreton Avenue.
- Site has potential wildlife interest.

Site Information

Studies

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. The habitats on site were of nature conservation value at the site level only. These habitats are not listed as important habitats in the Staffordshire SBI guidelines and therefore the site does not currently qualify for consideration as an SBI or as a BAS under these criteria.

Kingsley

KG049a Land off Moreton Avenue

Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site supported notable protected species. No species listed as important in the Staffordshire SBI guidelines were recorded and therefore no part of the site currently qualifies for consideration as an SBI or as a BAS under these criteria. However, great crested newt should be considered a potential receptor for the site subject to survey of pond 2. Consequently, prior to any future development a pre-development great crested newt presence/absence survey should be undertaken on ponds within 250 m of the site. The site should also be checked again for signs of badger activity and an activity survey should be conducted to determine the use of the site by bats. It would be necessary to conduct nesting bird checks before vegetation clearance or other disturbance during the bird breeding season.

Extended Phase 1 Habitat Survey 2015

Not assessed

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement.

Landscape, Local Green Space and Heritage Impact Study August 2016

Land at end of Moreton Avenue

Landscape

Site comprises the north-western half of a field at on the south-western edge of the village, bound by Cheadle Road (track) to the north-east and residential development to the north-west. The site is visually prominent and extends beyond the existing settlement edge, and therefore development of the site would encroach into the surrounding countryside and could adversely affect the existing settlement pattern and edge.

Site is of high landscape sensitivity.

Please note that this study forms part of a wider evidence base to support SMDC's Local Plan. Therefore the conclusions within this report will be weighed against other evidence when determining the overall suitability of a site for development.

Heritage

There are six Grade II Listed Buildings within the 400m buffer. The Listed Buildings are situated along the main road through the village. Although there may be some intervisibility, development would be unlikely to cause high adverse effects to their settings. Development would be highly unlikely to adversely affect the HLC zone KHECZ 1 (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms.

Green Belt Review November 2015

(Appraised sites according to their contribution to Green Belt Purposes)

Check Sprawl: Contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Significant contribution

Preserve Setting: Limited contribution

Overall Impact of development on Green Belt Purposes: Moderate

Development would intrude into open countryside, creating a new settlement edge on land where there is no clear outer boundary. However, Cheadle Road leading to the

Kingsley

KG049a Land off Moreton Avenue

Dams is a strong eastern boundary and the single field is reasonably well contained visually. Significant boundary treatment would be required. Second choice to KG019
Recommendation: Consider for release.

Habitat Regulation Assessment Initial Findings Preferred Option 2016

No potential impact pathways identified

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 35 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. Similarly, development of greenfield, grade 3 ALC land is likely to also have a significant negative effect. The site's proximity to designated and historic assets is likely to have a negative effect.

Options Consultation July 2015

Statutory bodies/stakeholders

SCC Highways: acceptable subject to access design and visibility. Impact on Moreton Avenue would need to be considered.

Taken together, KG005, 026a, 026b, 030a, 031 and 049a would have an impact on the Barnfields Road/The Green junction. These should be considered together and an assessment of the impact on this junction made.

Developer/Agent/Owner – Land available.

Public response

11 comments – all objections.

Issues raised:

- Infrastructure - Lack school places/doctors
- Infrastructure - Traffic / Transport - Only one road access, Road too narrow (turning space, parking/restrict emergency vehicles, maintenance),
- Infrastructure Other - Lack of village amenities (shops all gone – only one pub), Impact on sewage/electricity
- Landscape
- Amenity (e.g. noise, privacy, loss of light) - Spoil view from home, Lower house value, Elderly residents/loss of quiet if family houses
- Scale of development
- Government Policy - greenbelt
- Other - Amenities in village all on other site – better to develop there, No demand – lots for sale.

Council response –

The District Council is working with the County Council on the issue of school capacity. At this early stage in the site selection process there are a number of options for delivering school capacity dependant on the sites selected to take forward.

The Highway Authority has not raised any issues which would prevent the development of this site.

Kingsley

KG049a Land off Moreton Avenue

New development is the main way to deliver new or improved infrastructure e.g. more residents may support more local facilities. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.

The Council has a Landscape & Settlement Setting Study and this site is not identified as being important landscape setting to the settlement, though some significant footpaths cross the site. The Council will shortly be commissioning a Landscape Impact Study, the results of which will inform the Submission Version of the Local Plan. It will explore landscape mitigation measures for preferred options development sites.

The land in question is within the Green Belt. In order for Kingsley to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends that KG049a is considered for release from the Green Belt.

The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process.

The Council has recently completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. Mitigation measures will be taken as part of the site development to address any surface water issues.

Amenity – issues such as noise and impact on the Listed Building will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Views from individual properties are not protected in planning law.

The new Local Plan will cover a period to 2031 so lack of demand (perceived or actual) at one point in time is not a valid reason for not meeting the area's objectively assessed housing needs.

Preferred Options Consultation April 2016

Statutory Bodies

Historic England, Severn Trent, Natural England, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Environment Agency- No site specific comments Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-

Kingsley

KG049a Land off Moreton Avenue

culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

SCC LLFA FRA required, unclear where surface water will go. May need to cross third party land to access watercourse

SCC Education In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded, which is covered in more detail below under the heading 'infrastructure provision'.

Kingsley Parish Council

- Fully recognise the need for development in the villages including Kingsley Parish.
- Development should be proportionate with minimal impact upon the Green Belt and the environment.
- Submit comments from previous parish meeting regarding sites options.
- SMDC largely ignored views of the Parish and local residents.
- Request clarification over government financial incentives?

Preferred Options Sites

Kingsley – KG49A – Greenfield site outside the existing village boundary. Concerns expressed with regard to existing infrastructure supporting extra development. Not suitable for residential development. No special circumstances.

Public Response

Issues raised

Petition 184 signatures

- Green Belt site
- Village infrastructure
- Traffic congestion/health & safety issues
- Environment flooding on field/contamination from building work
- Conservation (biodiversity)
- Right of way footpath/heritage significance
- General comments- Brownfield sites in Stoke
- Need to maintain green space

Public response

- Traffic congestion
- Through traffic to Alton Towers, quarry and tourists
- Access approach roads not wide enough
- Junction with Barnfields Lane and A52 hazardous
- Road safety

Kingsley

KG049a Land off Moreton Avenue

- Green belt site – no special circumstances for its removal will lead to irregular village boundary
- Build on brownfield sites
- Lack of infrastructure school capacity shops/ services/medical services
- Have been power cuts
- Alternative site rear of The Rectory Holt Lane/Hazles Cross Road/by Youth Club Holt Lane
- Should build a new town
- Loss of residential amenity
- Loss of views
- Why greenfield sites
- Views of Parish Council have been ignored suggested number of smaller sites instead of one large one
- Not against new houses want them integrated into the village
- Loss of wildlife habitat
- Are houses for sale
- Plans not on show in Kinglsey
- Conservation
- Public footpath
- Heritage significance

Council response

- The Highway Authority has not raised any issues which would prevent the development of this site. They consider development is acceptable subject to access design and visibility. Impact on Moreton Avenue would need to be considered.
- The land in question is within the Green Belt. The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a more detailed site-based assessment of land which could be considered for review. The review found that the overall impact of development on the site was moderate. It found *“Development would intrude into open countryside, creating a new settlement edge on land where there is no clear outer boundary. However, Cheadle Road leading to the Dams is a strong eastern boundary and the single field is reasonably well contained visually. Significant boundary treatment would be required.”* Considered the site was suitable for release under exceptional circumstances In order to release a site from the Green Belt the Council must be able to demonstrate that exceptional circumstances exist. Consideration needs to be given to all the relevant evidence to determine the overall suitability of the site for release from the Green Belt.
- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children’s play areas.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the

Kingsley

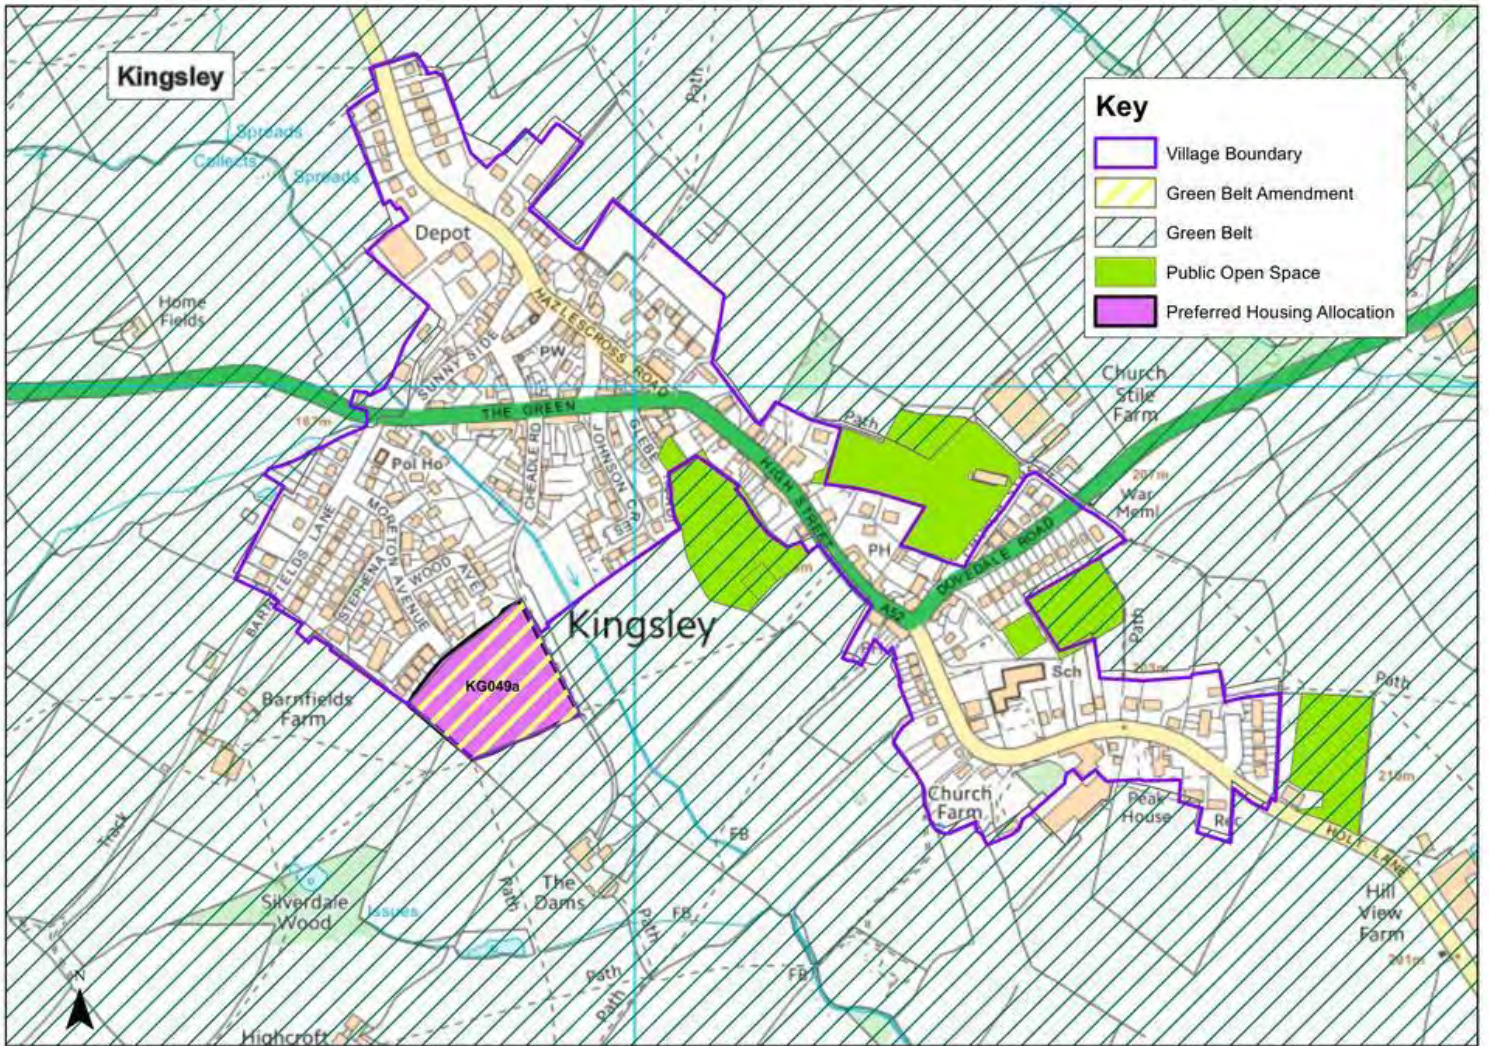

KG049a Land off Moreton Avenue

Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.

- There is not enough brownfield land or sites or infill sites in settlements to meet the District's proposed housing requirements so green field sites have been proposed. Prioritising brown field land over greenfield in all circumstances is not part of Government policy
- The Council has considered the alternative sites suggested in the responses to the previous consultation and where appropriate has included the additional sites in the proposed site allocations in the emerging Local Plan. The site assessments provided a summary of the key issues and responses. Responses to the comments received to the Site Options consultation in 2015 were reported to the Council Assembly on 13 April 2016 and are available on the Council's website.
- The Extended Phase 1 habitat Survey 2015 assessed the present and potential ecological value of the proposed site allocations. It found that
- Loss of view is not a material planning considerations.
- Issues such as overlooking and other impacts on existing residents will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application
- There is not enough brownfield land or sites or infill sites in settlements to meet the District's proposed housing requirements so green field sites have been proposed. Prioritising brown field land over greenfield in all circumstances is not part of Government policy
- Views have been sought as part of the consultation. The Council must balance this evidence against all the other evidence relating to this site and reach a decision on whether or not to include it as a development site in the Local Plan.
- The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district's full housing needs, including affordable housing, whilst taking into account migration and demographic change.
- The consultation documents were available for view on the Councils website and in Council Offices and libraries
- Any development will need to be in accord with Local Plan polices regarding Heritage Assets
- Existing public footpaths will be maintained or where appropriate redirected
- Loss of property value is not a material planning consideration

KG049a Land off Moreton Avenue

© Crown copyright and database rights 2016 Ordnance Survey 100018384.

Kingsley

KG049a Land off Moreton Avenue

Upper Tean

UT019 Haulage Depot St Thomas's Road

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken forward into Preferred Options Local Plan due to:

- Site within current development boundary and no significant issues.
- Land is available.

Key Issues

- Previously developed and potential contamination.
- Heritage – adversely affects character of Conservation Area. Close proximity to listed buildings. Redevelopment could enhance CA.

Site Information

Greenfield/brownfield	Built up area boundary/countryside	Est. housing capacity	Area (ha)	Ownership status	Site details
Brownfield	Built up area	15	0.4	Available	<ul style="list-style-type: none">• In active employment use.• Within Conservation Area.• Possible contamination

Studies

Extended Phase 1 Habitat Survey 2015 (FID 65)

Conclusion

The site is set within an urban environment with little connectivity to the wider countryside which lowers the biodiversity of the area considerably. The site has mostly low biodiversity value overall and is therefore deemed to have low ecological importance.

The following surveys/ actions are therefore recommended prior to any potential development works being carried out

- Vegetation removal at the appropriate time of year

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance.

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- None required

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement.

Landscape, Local Green Space and Heritage Impact Study (August 2016)

Upper Tean

UT019 Haulage Depot St Thomas's Road

Landscape Assessment

Existing depot within the centre of the settlement, south of St Thomas's Road. The site is enclosed by development on all sides, and so it is not visually prominent and fits within the settlement pattern. Re-development of the site could improve local landscape character.

Site is of low landscape sensitivity.

Heritage Assessment

The site is located within a Conservation Area. There are two Grade II* and ten Grade II Listed Buildings within the 400m buffer. The site is currently used as a work yard which adversely affects the character of the Conservation Area and the Listed Buildings. Sensitive development could enhance the Conservation Area. Mitigation including vegetation screening along the southern boundary would reduce effects to the settings of the Listed Buildings. Development would be unlikely to cause adversely effects to the HLC zone UTHECZ 3 (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms subject to appropriate masterplanning.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the site is located in proximity to historic assets which is likely to have a significant negative effect, as could the development of grade 3 ALC land. The site's inaccessibility to areas of existing employment is likely to have a negative effect.

Initial HRA Screening

No Likely Significant Effects (LSEs) have been identified in relation to this preferred option site.

Options Consultation July 2015

Statutory bodies/stakeholders

SCC Highways: Acceptable depending on visibility and access design. Footway should be widened on frontage.

Leek and Moorlands Historic Buildings Trust – UT019 is sited within Upper Tean Conservation Area and adjoins several properties on the High Street that are Grade II Listed Buildings. Acceptable for development but sensitive.

Developer/Agent – land available

Public response: 5 comments – 2 objections and 3 support

Issues raised:

- Infrastructure - Traffic / Transport
- Amenity (e.g. noise, privacy, loss of light)
- Government Policy

Positive comments

- Improve aesthetic of area
- Loss of Haulage business would reduce traffic/noise
- Inside built up boundary
- More suitable than UT21/UT041
- Brownfield site

Council response –

Upper Tean

UT019 Haulage Depot St Thomas's Road

The Highway Authority has not raised any issues which would prevent the development of this site.

Due to location within the Conservation Area and proximity to Grade II listed buildings on High Street a Heritage Impact Assessment will be undertaken during the plan production process if the site is taken forward.

Amenity – issues such as overlooking, screening and other impacts on existing residents will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.

Preferred Options Consultation April 2016

SCC Highways: See previous comments.

SCC Education: Great Wood Primary, Upper Tean, the estimated level of housing in this catchment may result in the need for additional school places.

LLFA: FRA required. Looks ok

Environment Agency: The site appears to be brownfield. Although it is unlikely that the issue of Brownfield Land will make any of the allocations undevelopable due to cost/constraint, sites within the Source Protection Zones and flagged up, will be subject to certain restrictions.

Natural England: No specific comments

Historic England: It is not clear how the impact of the site allocation has been assessed in relation to the Upper Tean Conservation Area. Further information is required

SMDC Environmental Health: Some constraints on residential development: Contamination from former depot/ haulage yard

Issues raised - public responses:

None raised.

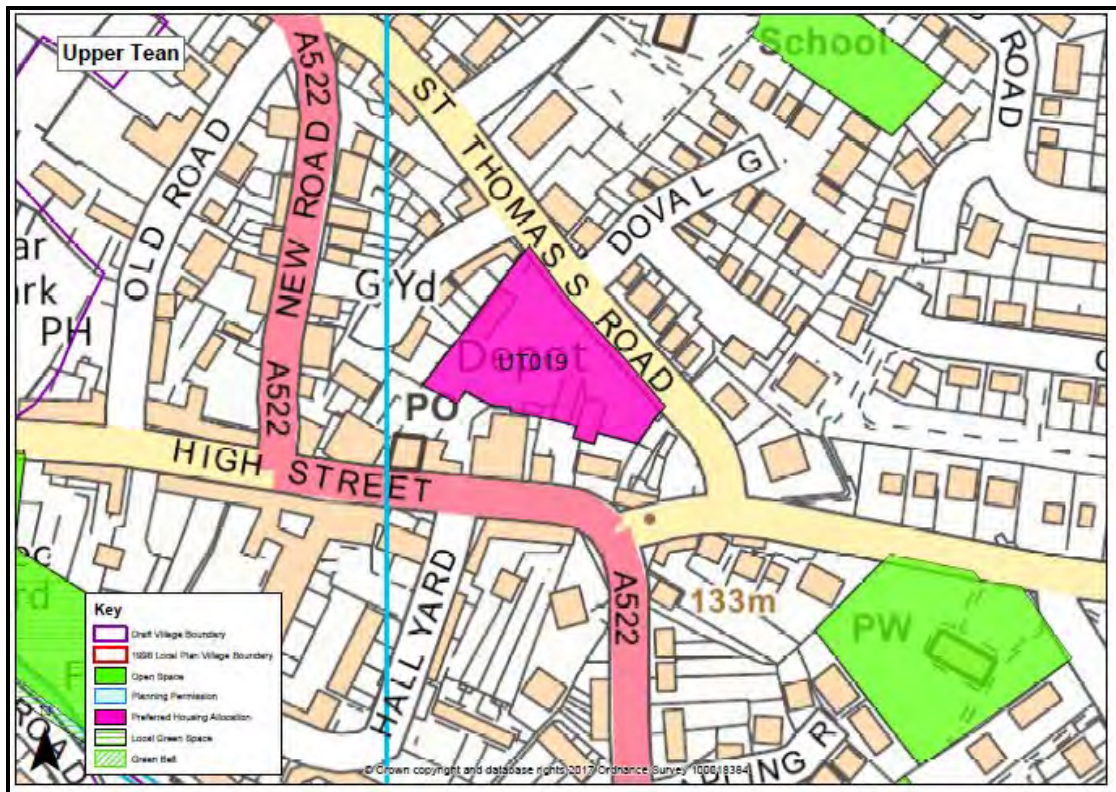

1 comment (support)

Council response –

- The site is located within a Conservation Area. There are two Grade II* and ten Grade II Listed Buildings within the 400m buffer.
- The Council's Landscape, Green Space and Heritage Impact Study(August 2016) includes a Heritage Assessment for this site which advises that the site is currently used as a work yard which adversely affects the character of the Conservation Area and the Listed Buildings. Sensitive development could enhance the Conservation Area. Mitigation including vegetation screening along the southern boundary would reduce effects to the settings of the Listed Buildings. Development would be unlikely to cause adversely effects to the HLC zone UTHECZ 3 (Historic Environment Character Assessment 2010) and the Site is suitable for development in heritage terms with appropriate masterplanning.

Upper Tean

UT019 Haulage Depot St Thomas's Road

Waterhouses

WA004 Land adj to Waterhouses Enterprise Centre Leek Road

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken forward into Preferred Options Local Plan due to:

- Site within current development boundary and no significant issues.
- Land is available.

Key Issues

- Keep employment site within the allocation.
- Close to the Peak District National Park
- Potential likely significant effect on European Site
- Medium landscape sensitivity – open to the west of the settlement
- Semi-improved grassland.

Site Information

Greenfield/ brownfield	Built up area boundary/ countryside	Est. housing capacity	Area (ha)	Ownership status	Site details
Greenfield / brownfield	Within settlement boundary	Mixed use - existing employment site reprovided 0.4ha and 36 dwellings	2	Available (2 separate owners)	<ul style="list-style-type: none"> • Flat field and existing employment site. • Within settlement boundary

Studies

Extended Phase 1 Habitat Survey 2015 (FID 205)

Conclusion

The site is not recommended to be put forward for development. The site has little potential to support protected species apart from roosting/ foraging bats, badger and breeding birds, but connected adjacent to other species rich grasslands. Semi-improved species rich grasslands are uncommon and should be preserved, therefore the site is attributed regional ecological importance.

The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- Bat survey of the highlighted building
- Floral survey within the survey season
- Vegetation removal at the appropriate time of year

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. It concluded that the site has medium ecological value in its potential to support protected species. The semi-improved species rich neutral grassland has been given district importance as it is fairly uncommon within the locality. The other site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the semi-improved species rich neutral grassland.

Waterhouses

WA004 Land adj to Waterhouses Enterprise Centre Leek Road

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- Detailed grassland vegetation survey.

Landscape & Settlement Character Assessment 2008

Within important landscape setting to the settlement.

Landscape, Local Green Space and Heritage Impact Study (August 2016)

Landscape Assessment

The site comprises Waterhouses Enterprise Centre and the adjacent fields on the western edge of the village, north of the A523. The site is open and located beyond the existing settlement edge, however due to the topography and vegetation within the surrounding landscape, and the existing development within Waterhouses, views of the site are limited. If the site were to be developed, development within the site would be partially visible from the PDNP, however it would be viewed behind existing development in Waterhouses. Development within the site should be similar in character to the existing Enterprise Centre, i.e. relatively small scale, low buildings. Larger buildings would not be in keeping with the area and could have substantial adverse effects on local landscape character, and the setting of the PDNP. Advanced additional planting on the western and northern site boundaries could reduce the visual prominence of the site and create a strong, vegetated edge to the settlement, improving the approach to the settlement on the A523.

Site is of medium landscape sensitivity. Site-specific landscape mitigation measures could include additional advanced planting on the western and northern boundaries, and limited building heights and sizes.

Heritage Assessment

There are four Grade II Listed Buildings within the 400m buffer. Development would be highly unlikely to cause adverse effects to the settings of the assets due to the intervening buildings and vegetation. The site is across the HLC zones WHECZ 2 and WHECZ 6 (Historic Environment Character Assessment 2010). Although the HEA states that zone WHECZ 6 is sensitive to medium to large scale development, with appropriate sensitive development, this could be accommodated on the site and development would be highly unlikely to adversely affect the HLC as a whole.

Site suitable for development in heritage terms subject to appropriate masterplanning.

Habitat Regulation Assessment Initial Findings Preferred Option 2016

Potential likely significant effect on European Site

Site is approx. 1.8 km from the Hamps and Manifold Valleys SSSI component site of the Peak District Dales SAC. Footpath access provides a route to the SAC from the allocation sites of approx. 2.2km. Development of the allocation site could increase recreational pressure on the SAC.

Conclusion - allocation sites WA004 (Waterhouses) and IP019 (Ipstones) require further investigation in the HRA due to their proximity to a component of the Peak District Dales SAC and the potential for effects of development to result in an in combination effect in relation to recreational pressure.

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 36 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the site's proximity to a designated asset is likely to have a negative effect. The

Waterhouses

WA004 Land adj to Waterhouses Enterprise Centre Leek Road

development of greenfield, grade 4 ALC land is likely to also have a negative effect, as could the site's proximity to historic assets and the inaccessibility of areas of existing employment.

Habitat Regulation Assessment Initial Findings Preferred Option 2016

Potential likely significant effect on European Site

Site is approx. 1.8 km from the Hamps and Manifold Valleys SSSI component site of the Peak District Dales SAC. Footpath access provides a route to the SAC from the allocation sites of approx. 2.2km. Development of the allocation site could increase recreational pressure on the SAC.

Conclusion - allocation sites WA004 (Waterhouses) and IP019 (Ipstones) require further investigation in the HRA due to their proximity to a component of the Peak District Dales SAC and the potential for effects of development to result in an in combination effect in relation to recreational pressure.

HRA Update – June 2017

The preferred options site allocations were screened between 15th and 27th June 2017. LSEs were identified in relation to the following site:

- Waterhouses (WA004) located approx. 1950m from the Peak District Dales SAC. Potential for urban effects

Urban Effects

Further investigation has been undertaken in relation to potential urban effects resulting from this allocation. Urban effects on European sites typically have an adverse effect on sites within 500m of residential areas (primarily due to cat predation and fire risk due to arson etc). Other urban effects (primarily dog walking from the site to the SPA/SAC) can have an adverse effect on European sites up to 1.6km from residential areas.

The housing allocation at Waterhouses occurs approximately 270m to the north of a watercourse that flows into the River Hamps that flows through the Peak District Dales SAC. There is a small risk that pollutants created during construction could enter this watercourse if construction is not undertaken in accordance with the precautionary measures detailed in Ciria 20011.

On the basis of the precautionary principle, the HRA therefore concludes that the allocation at Waterhouse (WA004) could result in an adverse effect on the Peak District Dales SAC. No other adverse effects on the European sites are predicted due to Urban Effects arising from the above-mentioned allocation sites.

Mitigation:

Either:

- Add a policy to the Local Plan for this allocation site which contains a requirement for the development to be constructed in accordance with the precautionary measures detailed in Ciria 20012; or
- Add the following text to the first bullet of Policy NE1 within the Local Plan:

“Any development with a potential to adversely affect a European site/s through construction activities should ensure that Ciria construction guidelines are followed including environmental good practice on control of dust and water pollution.”

¹ CIRIA C532. Control of Water Pollution from Construction Sites

² CIRIA C532. Control of Water Pollution from Construction Sites

Waterhouses

WA004 Land adj to Waterhouses Enterprise Centre Leek Road

Options Consultation July 2015

Statutory bodies/stakeholders

SCC Highways - Acceptable subject to access design and provision of adequate visibility. Footway required on frontage and linking across the frontage of the Enterprise centre to connect to existing. If combined with WA005 and WA006, Transport Assessment will be required.

Developer/Agent – land is available

Public response: no comments.

Council response -

The Highway Authority has not raised any issues which would prevent the development of this site.

The ecological study has indicated that the northern section of the site has some semi-improved grassland which is of importance. Appropriate conservation and mitigation measures will need to be considered.

A mixed use scheme would have the benefit of providing modern employment units on the site.

Preferred Options Consultation April 2016

Waterhouses Parish Council: Object to loss of existing industrial units on site WA004 – provides opportunity for local businesses and employment. Do not wish to see village boundary extended.

SCC Highways: Not clear how site will be accessed although could be considered via existing entrance to Enterprise Centre, this will require assessment. Site should link in with existing footway and advisory cycle routes.

Taxico service 108 passes the site along the A523 with 6 journeys per day between Leek and Ashbourne. The nearest bus stops are just under 200m from the site.

SCC Education: Waterhouses CE(VC) Primary School is likely to be able to accommodate additional children generated by the allocated housing developments – although small site allowance could also have an impact.

LLFA: FRA required. Looks ok

Natural England: No specific comments

Environment Agency: This site appears to be Brownfield. Although it is unlikely that the issue of Brownfield Land will make any of the allocations undevelopable due to cost/constraint, sites within the Source Protection Zones and flagged up, will be subject to certain restrictions.

Historic England: No specific comments

SMDC Environmental Health: No significant Issues, next to industrial units some noise issue possible.

Issues raised - public responses:

None

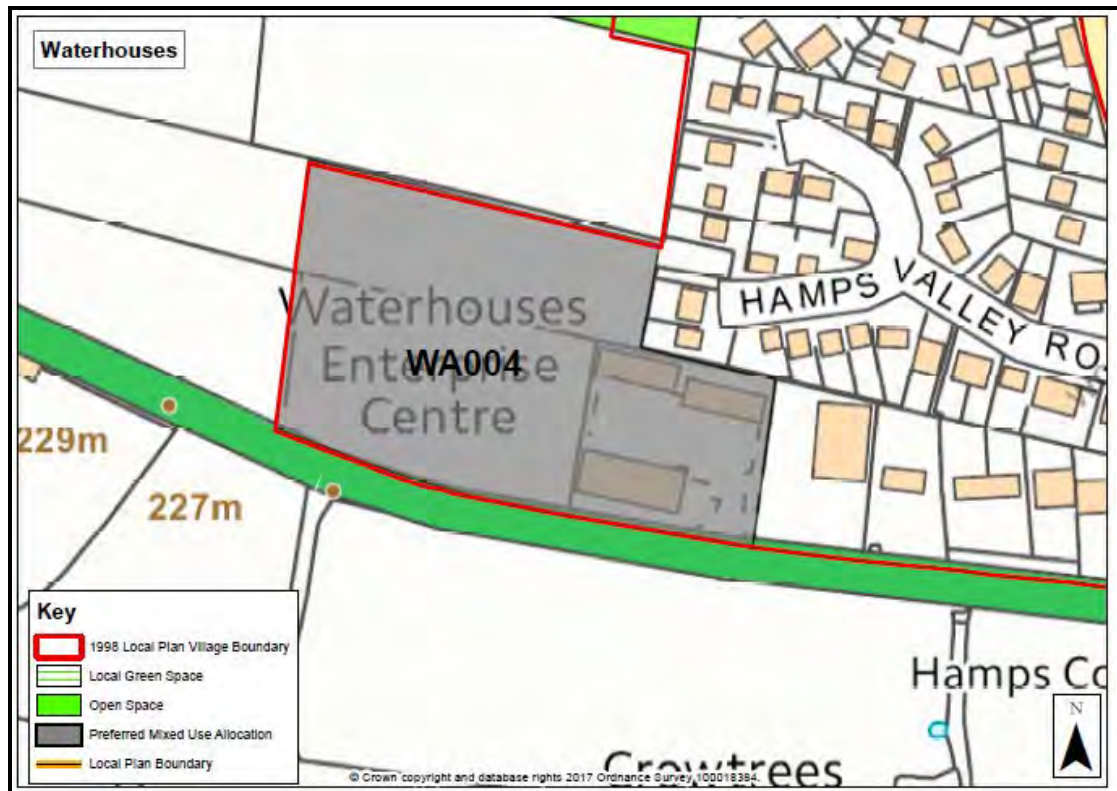

Waterhouses

WA004 Land adj to Waterhouses Enterprise Centre Leek Road

Council response -

- Site WA004 is a mixed use allocation and includes the re-provision of employment within the site. Agreed that this provides an opportunity for local businesses and employment.
- The preferred option site is located within the 1998 Local Plan village boundary.
- The following text has been added to the first bullet of Policy NE1 within the Preferred Options Local Plan to mitigate potential adverse effects identified in the HRA Update :

“Any development with a potential to adversely affect a European site/s through construction activities should ensure that Ciria construction guidelines are followed including environmental good practice on control of dust and water pollution.”

Werrington

WE003 Land adj Stonehouses Farm Ash Bank Road

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken forward into Preferred Options Local Plan:

- The site is in the Green Belt the Green Belt Review considers the site is suitable for release (with a caveat on development footprint) the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are exceptional circumstances.
- The Council needs to meet the development needs of their area. Housing allocations are needed to ensure the Districts housing requirement is met.
- The Green Belt is tightly drawn around Werrington and there is limited capacity in the settlement for further growth.
- Werrington is defined as a larger village in the Core Strategy and it has a number of facilities and services and is considered to be a sustainable location to support some growth.
- The site is in public ownership.
- See key issues below.

Key Issues

- Site is one of the few gaps on the A52 development footprint would need to maintain this.
- Landscape, Local Green Space and Heritage Impact Study August 2016 identified that the site is of medium landscape sensitivity and is suitable for development in heritage terms. Would need site specific landscape mitigation measures could include planting on south and south east boundary.
- Green Belt site. Green Belt Review considers it is acceptable for release with a caveat on the development footprint Exceptional circumstances would need to be demonstrated.
- Access to the site needs to be clarified.
- Proximity to YOI may require noise impact assessment.

Werrington

WE003 Land adj Stonehouses Farm Ash Bank Road

						building within 400m
--	--	--	--	--	--	-------------------------

Studies

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. The site has low-medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the potential for bat roost on site.

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- The relevant trees need to be identified and further assessed for their potential to support roosting bats.
- Bat survey possibly required.

Extended Phase 1 Habitat Survey 2015 (FID 12)

The site has mostly low biodiversity value overall in terms of area, is directly adjacent to a domestic housing estate and species poor grasslands. The site has some connectivity to more biodiverse adjacent habitats such as scattered trees, tall ruderal vegetation and hedgerows to the south and scattered scrub to the south east. The site is deemed as having district ecological importance in terms of its loss within the wider countryside due to the presence of species rich hedgerows and trees with bat roosting potential. The following surveys/ actions are therefore recommended prior to any potential

development works being carried out:

- A bat survey regime to ascertain whether bats roost in the trees
- Hedgerow survey
- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement.

Landscape, Local Green Space and Heritage Impact Study August 2016

Stonehouse Farm

Landscape

A relatively large site on the southern edge of Werrington, comprising three fields generally enclosed by development except for the southern edge which is open. Vegetation is located on this boundary, however due to the sloping nature of the site it provides limited screening. Additional planting on the southern boundary should be considered to reduce the visual prominence of the site and create a well-defined, settlement edge. In addition development within the site would be viewed in the context of the existing surrounding development. The site forms a gap in existing development and fits well within the existing settlement pattern.

Site is of medium landscape sensitivity. Site-specific landscape mitigation measures could include planting on the south-eastern and southern boundaries.

Werrington

WE003 Land adj Stonehouses Farm Ash Bank Road

Heritage

There is one Grade II Listed Building within 400m. Due to the intervening buildings, there was no intervisibility between the site and the asset. Development would be highly unlikely to adversely affect the setting of the asset. The site lies within the HLC zone CWWHECZ 1 (Historic Environment Character Assessment 2010). Development in this area would unlikely adversely affect the HLC as a whole.

Site suitable for development in heritage terms.

Green Belt Review November 2015

(Appraised sites according to their contribution to Green Belt Purposes)

Check Sprawl: Contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Limited contribution

Preserve Setting: Significant contribution

Overall Impact of development on Green Belt Purposes: Moderate

A substantial infill parcel between Ash Bank Road and HMYOI. The difficulty with this site is the long distance view from Ash Bank Road, through what is the one of the few remaining gaps in almost continuous sprawl along the A52. Development on the top third of the site would remove a significant gap entirely, and therefore retention of open space on this part of the site is recommended.

Recommendation: Consider for release (with caveat on development footprint)

Release under

Exceptional Circumstances should be accompanied by extension of the Village Boundary

Habitat Regulation Assessment Initial Findings Preferred Option 2016

No potential impact pathways identified

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 85 dwellings is considered to have a significant positive effect, as is the accessibility of services and facilities. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated assets. Similarly, the development of greenfield, grade 4 ALC land and the site's proximity to historic assets is assessed as having a negative effect.

Options Consultation July 2015

Statutory bodies/stakeholders

Werrington PC – Object proximity to Young Offenders' Institute and encroachment into greenbelt.

SCC Highways: Access onto Ash Bank Road would be very difficult because of location of signalised junction and location of an existing access (Oakmount Road), Could struggle to provide adequate visibility because of the brow of the hill. TA would be required.

Developer/Agent/Owner – Land available.

Public response - 57 comments - 49 objections and 8 support.

Werrington

WE003 Land adj Stonehouses Farm Ash Bank Road

Issues raised:

Objections

Infrastructure – Schools – full to capacity

- Infrastructure - Traffic / Transport – No access to fields from Ashbank Rd and track in private ownership and discharge path for HMYOI. Any access from Ashbank rd very dangerous.
- Infrastructure – Other – too far from village amenities, dentist, doctors full to capacity.
- Landscape – Land is in green belt develop brownfield sites first. Residents originally attracted to area due to greenfield location and extensive views.
- Substantial encroachment into greenbelt.
- Nature Conservation – profound impact on wildlife including natural spring and bird population and footpath across site.
- Amenity (e.g. noise, privacy, loss of light) – Due to elevated position of land impact on Salters Close in terms of privacy and light. Impact of noise from HMYOI on residents of new housing.
- Scale of development – visual intrusion into countryside and visible from Salters Close which is not well screened.
- Other – Land is not for sale. Rumoured closure of HMYOI make ideal brownfield site for entire SHLAA quota. Werrington would blur into Stoke on Trent. Compensation for drop in property values. Strategy to develop brownfield sites in Stoke many of which up for sale. Develop larger amenities on greenfield sites freeing up current sites for housing. Once greenfield sites gone lost forever. Proximity to HMYOI . Other suitable sites at Tregaron Court/Langton Court, Werrington and off Hillside Road/Lansdowne Crescent, Field currently acts as buffer zone between HYMOI is it wise to place young families so close. Alternative site at glassworks, sandyfields, Winterfeld Lane, old school depot at Salters Lane and old school site at Radley Way.

Support

- Transport – directly accessible from main road
- Other – minimum impact on heart of village

Council response –

Staffordshire County Council say that Werrington Primary School currently has sufficient capacity for the likely number of pupils generated from the overall level of development. Werrington High School is projected to have insufficient capacity and the District Council will work with the County Council to identify an appropriate solution.

The Highway Authority has expressed concerns about site access which require consideration to determine whether a solution is possible.

New development is the main way to deliver new or improved infrastructure e.g. more residents may support additional medical facilities. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.

The Council has a Landscape & Settlement Setting Study and this site is not identified as being important landscape setting to the settlement. Views from individual properties are not protected in planning law. The Council will shortly be commissioning a Landscape Impact Study to assess all sites selected as preferred

Werrington

WE003 Land adj Stonehouses Farm Ash Bank Road

options and suggest mitigation measures where appropriate. The results of this will feed into the Submission Version of the Local Plan.

The land in question is within the Green Belt. In order for Werrington to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site WE003 for release from the Green Belt with the northern part of the site being open space to preserve its openness. The capacity of this site has been lowered from 85 to 50 dwellings to take this into account.

The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed.

Amenity – issues such as overlooking, loss of light and any potential noise issue from the Young Offender's Institute will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.

The suitability of alternative development sites will be considered (e.g. Young Offenders Institute) if it becomes available.

The issue of using land in neighbouring authorities will be discussed as part of the Council's duty to co-operate obligation.

In terms of the suggested areas for development – land adjacent to Tregaron Court/Langton Court has been assessed and is not considered suitable for development due to constraints. Land off Hillside Road/Lansdowne Crescent is public open space, Winterfield Lane and the old school depot at Salters Lane are too remote from Werrington to meet the needs of the settlement, Radley Way – if the site is not open space it could come forward in any case as it is within the existing settlement boundary. Any other sites suggested will be considered.

Preferred Options Consultation April 2016

Statutory Bodies

Historic England, Severn Trent, Natural England, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

SCC Highways: access off the west frontage closest to the lights would not be supported. It would be too close to the lights and likely cause problems at the traffic light controlled junction. Access at the eastern length of frontage may be acceptable if adequate visibility splays can be achieved. It should not form a crossroads with Oak Mount Road. Look at third party land to provide access. TA is required to look at the effect of traffic from the development on Ash Bank Road.

Werrington

WE003 Land adj Stonehouses Farm Ash Bank Road

Environment Agency- No site specific comments Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

SCC Education In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded, which is covered in more detail below under the heading 'infrastructure provision'.

SCC LLFA No issues FRA required

Werrington Parish Council

- Concerned about traffic problems especially along Ash Bank Road, capacity of local infrastructure such as schools and doctors, protection of Green Belt from large scale housing development, prefer that the potential for infill sites should be explored together with additional sites (land off Whitmore Avenue and land off Radley Way) as an alternative to those put forward in the Preferred Options Document, disagree with some of the conclusions from the Green Belt Review. (Table included with their letter stating which sites they agree and disagree with).

Preferred Options Sites

Support – WE069, WE013, WE027

Object – WE053, WE052, WE003

Other sites supported (WE048, Field in Ash Bank Rd [close to Stoke boundary / Brookhouse Lane], Former Builders Yard in Winterfield Lane, Open Space off Whitmore Ave, Open land off Radley Way).

Public Response

Issues raised

- Impact on wildlife
- Loss of privacy
- Access is dangerous
- Traffic busy road/junction
- Impact of prison on new housing
- Green belt site
- Green field site
- Land off Ash Bank Road this has not been considered approach to sites in the green belt is inconsistent
- Other infill sites at top of Hillside Road suggested but rejected
- Officers don't know the area
- Infrastructure insufficient capacity schools/drainage/sewage

Werrington

WE003 Land adj Stonehouses Farm Ash Bank Road

- Lack of facilities in Werrington
- No jobs to support increased population
- Landscape impact SCC document describes the heritage values of the landscape as of high historical value, high aesthetic and high evidential value.
- Site has heritage value
- Flood risk
- Impact on cenotaph
- Impact on human rights – right to private family life
- SA said positive impact but would have negative impact site is inaccessible to facilities
- SA details negative impacts
- Loss of agricultural land
- Loss of views
- Residents have objected to this site in the previous consultation this has been ignored
- Alternative site bottom of Werrington road right hand side going down still within the moorland boundary
- Should build in Stoke or on brownfield land
- WE033 been dropped 3 houses have recently been built on it is a suitable site
- Loss of property value
- Build large new village towards Tean Blythe Bridge
- Werrington has had enough development
- Should be affordable housing for local residents
- Should be linear development/infill sites
- Out of character with open nature
- New residents could lead to increase in anti social behaviour rise in crime
- Loss of trees
- Build on land south of the housing estate on Chatsworth Drive
- Alternative sites suggested by PC and residents not considered
- Out of character with scale and pattern of settlement
- Inaccessible to jobs and services

Council response

- The Extended Phase 1 habitat Survey 2015 assessed the present and potential ecological value of the proposed site allocations ,the Local Wildlife Assessment (2017) assessed sites to establish their potential SBI/BAS status against Staffordshire Wildlife Trust criteria They found that the site had mostly low biodiversity value overall with the exception of the trees which may have the potential to support roosting bats and recommended that a bat survey was carried out
- Issues such as overlooking and other impacts on existing residents will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application
- The Highway Authority has expressed concerns about site access which require consideration to determine whether a solution is possible
- Any development of this site would be required to submit a noise impact assessment to consider the effect of the YOI and any mitigation measures.
- The land in question is within the Green Belt. The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a

Werrington

WE003 Land adj Stonehouses Farm Ash Bank Road

more detailed site-based assessment of land which could be considered for review. The review found that the overall impact of development on the site on Green Belt purposes moderate. It recommends considering site WE003 for release from the Green Belt in exceptional circumstances with the northern part of the site being open space to preserve its openness. The capacity of this site has been lowered from 85 to 50 dwellings to take this into account. In order to release a site from the Green Belt the Council must be able to demonstrate that exceptional circumstances exist. Consideration needs to be given to all the relevant evidence to determine the overall suitability of the site for release from the Green Belt.

- The Council has considered the alternative sites suggested in the responses to the previous consultation and where appropriate has included the additional sites in the proposed site allocations in the emerging Local Plan.
- A number of sites were dropped from the emerging Local Plan after the Site Options consultation. Not all sites were required to meet the Districts housing requirements. The site options assessments provided a summary of the key issues and responses. Responses to the comments received to the Site Options consultation in 2015 were reported to the Council Assembly on 13 April 2016 and are available on the Council's website.
- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
- An assessment of the District's employment land requirements was carried out in The Employment Land Requirement Study the draft Local Plan proposes employment allocations/policies to meet this need
- The Council has recently undertaken a Landscape, Local Green Space and Heritage Impact Study 2016 to form part of the evidence base to support the Local Plan and assess the potential landscape and heritage impacts of the development allocations. It found the site was suitable for development in heritage terms. It was of medium landscape sensitivity. It recognised the site forms a gap with the existing development and fits well within the existing settlement pattern. It recommended landscape mitigation on the south-eastern and southern boundaries
- The Environment Agency has not identified any site specific issues. They recommend that the ecological value of watercourses is enhanced where possible and the impact on water quality is assessed. The Council has completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. Mitigation measures will be taken as part of the site development to address any surface water issues.
- Any development will need to take account of the Cenotaph and the policies in the Local Plan regarding heritage assets
- Loss of views is not a material planning consideration

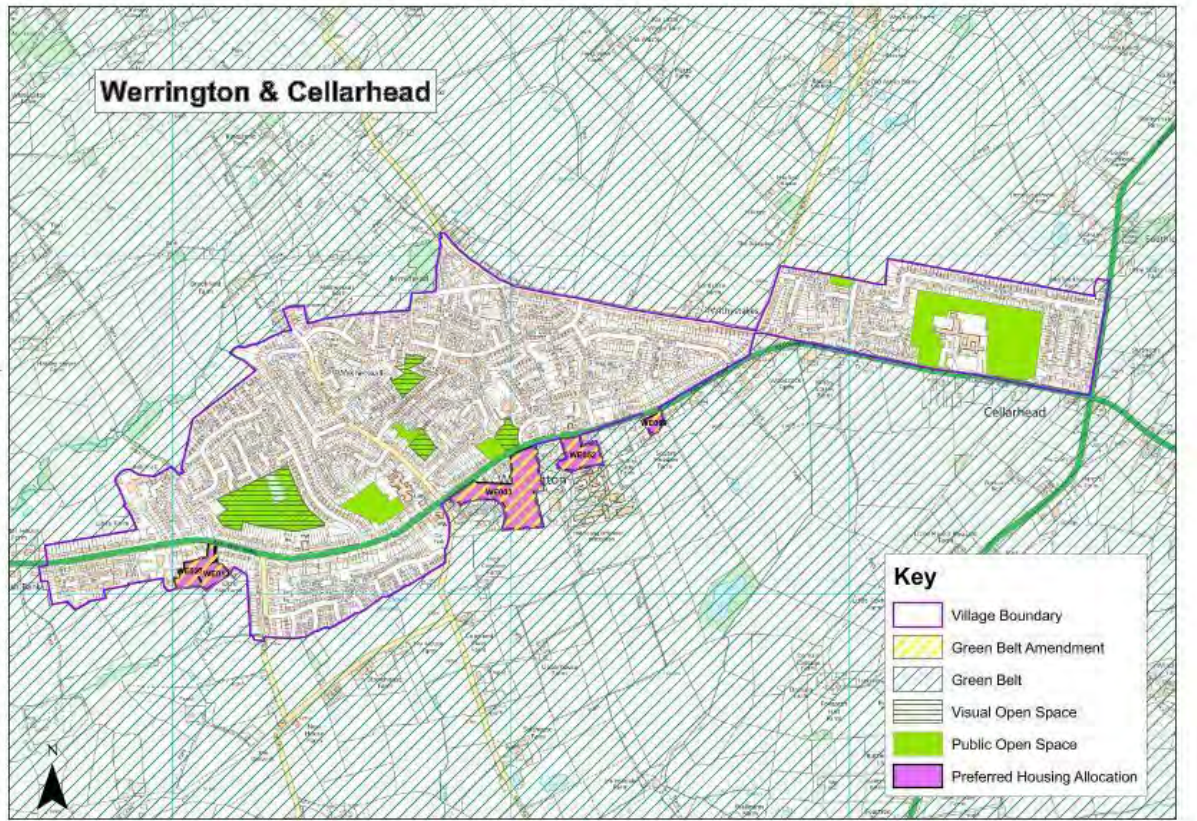

Werrington

WE003 Land adj Stonehouses Farm Ash Bank Road

- Resident's views have been sought as part of the consultations. The Council must balance this evidence against all the other evidence relating to this site and reach a decision on whether or not to include it as a development site in the Local Plan.
- There is not enough brownfield land or sites or infill sites in settlements to meet the District's proposed housing requirements so green field sites have been proposed. Prioritising brown field land over greenfield in all circumstances is not part of Government policy
- National planning guidance states that the Council should seek to meet the development needs of their area. Housing allocations are needed to ensure the Districts housing requirement is met.
- Loss of property value is not a material planning consideration
- Policies in the Local Plan will require an element of new housing provision to be affordable
- It is not considered that development of this particular site would be out of proportion with the rest of the village. Any new development taking place will be subject to design policies contained within the new Local Plan
- If the district council considered that a development they may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts.
- There is a policy in the Local Plan regarding the control of pollution, which includes noise.
- Any development of this would be required to submit a noise impact assessment to consider the effect of the YOI and any mitigation measures.
- The Green Belt Review recommended that site WE033 was not released from the Green Belt

Werrington

WE003 Land adj Stonehouses Farm Ash Bank Road

© Crown copyright and database rights 2016 Ordnance Survey 100018384.

Werrington

WE013 Land west of Little Ash Farm Ash Bank Road

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances.
- Environment Agency have identified flooding issues and requested SFRA level 2.
- See key issues below.

Key Issues

- Green Belt site. Green Belt Review considers it is acceptable for release. Exceptional circumstances would need to be demonstrated.
- Landscape impact Landscape, Local Green Space and Heritage Impact Study August 2016 identified that the site is of medium landscape sensitivity and is suitable for development in heritage terms would require landscape mitigation measures.
- Significant potential flooding issues EA requested SFRA level 2
- Should be developed WE027
- Access can be achieved site would need to be developed with WE027

Studies

Local Wildlife Assessment (ECUS, 2017) (WE013 & WE027)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria.

Werrington

WE013 Land west of Little Ash Farm Ash Bank Road

The habitats on site were of nature conservation value at the site level only. These habitats are not listed as important habitats in the Staffordshire SBI guidelines and therefore the site does not currently qualify for consideration as an SBI or as a BAS under these criteria.

Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site supported notable protected species. No species listed as important in the Staffordshire SBI guidelines were recorded and therefore no part of the site currently qualifies for consideration as an SBI or as a BAS under these criteria.

Prior to any future development, the site should be checked again for signs of badger activity and an activity survey should be conducted to determine the use of the site by bats. It would be necessary to conduct nesting bird checks before vegetation clearance or other disturbance during the bird breeding season. Japanese knotweed and Indian balsam occurred on site.

Extended Phase 1 Habitat Survey 2015

Not assessed

Landscape & Settlement Character Assessment 2008

Within important landscape setting to the settlement.

Landscape, Local Green Space and Heritage Impact Study August 2016

Little Ash Farm

Landscape

Site comprises Little Ash Farm, a single residential property, and the surrounding grounds. The site is located to the rear of linear development on the A52 and is enclosed by trees and hedgerows to the south, resulting in low visual prominence. There are gaps in the vegetation on the south-eastern boundary and these should be planted up in order to screen views of the development and create a vegetated settlement edge.

Site is of medium landscape sensitivity. Site-specific landscape mitigation measures could include planting on the south-eastern boundary.

Heritage

There are two Grade II Listed Buildings within the 400m buffer. Due to the intervening buildings, there was no intervisibility between the site and the assets. Development would be highly unlikely to adversely affect the settings of the assets. The site lies within the HLC zone CWWHECZ 1 (Historic Environment Character Assessment 2010). Development in this area would unlikely adversely affect the HLC as a whole.

Site suitable for development in heritage terms.

Green Belt Review November 2015

(Appraised sites according to their contribution to Green Belt Purposes) Sites WE013 & WE027 assessed together.

Check Sprawl: Limited contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: Limited

Two parcels which are part of the southern extent of Werrington, and development of which would be part of the visual envelope of the settlement. The southern boundary of the sites is weak, being a discontinuous tree belt, but development would not

Werrington

WE013 Land west of Little Ash Farm Ash Bank Road

create a significant intrusion into open countryside. Part of the land identified in the LCA as making a contribution to the setting of the settlement

Recommendation: Consider for release. Release under Exceptional Circumstances should be accompanied by extension of the Village Boundary

Habitat Regulation Assessment Initial Findings Preferred Option 2016

No potential impact pathways identified

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 10 dwellings is considered to have a significant positive effect, as is the accessibility of services and facilities. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated assets. Similarly, the development of greenfield, grade 4 ALC land and the site's proximity to historic assets is assessed as having a negative effect.

Options Consultation July 2015

Statutory bodies/stakeholders

Werrington PC – support – generally maintains line of building and not substantial encroachment into green belt.

SCC Highways: may be acceptable subject to detail of access design and visibility. Would need to be developed with WE027 to be adequate for adoption as highway.

Developer/Agent - Ken Wainman Ass Ltd – Support (summarised below)

Public response - 99 comments - 98 support, 1 objections

Issues raised:

Objections

- Infrastructure – Other – demands on schools and GP's
- Landscape – Protection of footpaths and wildlife required. Loss of unobstructed views to Stoke.
- Amenity (e.g. noise, privacy, loss of light) – detrimental effect on enjoyment of existing rear gardens, restricting views and market value of existing houses.
- Scale of development – Planning Creep on adjacent sites on rural areas.
- Other - other suitable sites at Tregaron Court/Langton Court, Werrington and off Hillside Road/Lansdowne Crescent.

Support

- Infrastructure -Traffic / Transport – Existing access suitable and could potentially serve WE027 if widened.
Site accessible from major road network.
- Infrastructure – other – well located for services.
- Landscape – development does not extend past the southern most edge of Werrington
Development either side of HMYOI does not extend settlement boundary significantly.
Maintains existing building line.
Not substantial development into greenbelt.
Mature trees screen west and south.
- Flood Risk – no risk of flooding

Werrington

WE013 Land west of Little Ash Farm Ash Bank Road

- Scale of development – HMYOI already prominent feature in landscape. Suitable for small devt offering start homes or affordable homes.
- Other – site already contains 1 house and 2 ancillary bldgs, lawns and tennis court.
SHLAA identified site as suitable for housing 6 – 10 years. Owner could bring forward in 5 years. Limited impact on heart of village.

Council response –

Primary School currently has sufficient capacity for the likely number of pupils generated from the overall level of development. Werrington High School is projected to have insufficient capacity and the District Council will work with the County Council to identify an appropriate solution.

□ New development is the main way to deliver new or improved infrastructure e.g. more residents may support additional medical facilities. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.

- The Council has a Landscape & Settlement Setting Study and this site has been identified as being important to the landscape setting of the settlement. The Council will shortly be commissioning a Landscape Impact Study to assess all sites selected as preferred options and suggest mitigation measures where appropriate. The results of this will feed into the Submission Version of the Local Plan.

- The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed.

- Public footpaths can be maintained or re-directed.

- Views from individual properties are not protected in planning law.

Amenity – issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.

- The land in question is within the Green Belt. In order for Werrington to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site WE013 for release from the Green Belt.

- In terms of the suggested areas for development – land adjacent to Tregaron Court/Langton Court has been assessed and is not considered suitable for development due to constraints. Land off Hillside Road/Lansdowne Crescent is public open space

Preferred Options Consultation April 2016

Werrington

WE013 Land west of Little Ash Farm Ash Bank Road

Statutory Bodies

Historic England, Severn Trent, Natural England, United Utilities, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Sport England WE013 and WE027 - The proposal appears to lead to the loss of a football pitch and tennis court. This is not in accordance with NPPF 74 unless the sports facilities are going to be replaced. If so this needs to be a requirement in the Local Plan document

SCC Education In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded, which is covered in more detail below under the heading 'infrastructure provision'.

SCC LLFA – Flooding hotspots nearby, potential flood risk issues, recommend reference in policy to early engagement with County Council, need for flood risk assessment. Sites WE013 & WE027 need to be developed together

Environment Agency- If it is decided to continue with sites in the floodplain or likely to be following the application of the Sequential Test, then further work in the form of a Level 2 SFRA will be required for the following site: WE013 which along with WE027 is adjacent to Watercourses with no mapped floodplain. This does not mean the site is within Flood Zone 1. It is imperative that the flood risk to these sites is quantified prior to final submission as it may affect the deliverability of the sites, particularly the smaller ones in Werrington. Because in both cases the sites are adjacent to each other, producing one model for each is more cost effective than needing to for individual sites.

Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

Werrington Parish Council

- Concerned about traffic problems especially along Ash Bank Road, capacity of local infrastructure such as schools and doctors, protection of Green Belt from large scale housing development, prefer that the potential for infill sites should be explored together with additional sites (land off Whitmore Avenue and land off Radley Way) as an alternative to those put forward in the Preferred Options Document, disagree with some of the conclusions from the Green Belt Review. (Table included with their letter stating which sites they agree and disagree with).

Werrington

WE013 Land west of Little Ash Farm Ash Bank Road

Preferred Options Sites

Support – WE069, WE013, WE027

Object – WE053, WE052, WE003

Other sites supported (WE048, Field in Ash Bank Rd [close to Stoke boundary / Brookhouse Lane], Former Builders Yard in Winterfield Lane, Open Space off Whitmore Ave, Open land off Radley Way).

Public Response

Issues raised

Impact on wildlife

Disturbance to residents during construction

Loss of privacy

Loss of property value

Reduce gap between Werrington & Stoke

Could lead to further development

Traffic/congestion already an issue on A52- A52 A53 are at capacity

Dangerous for school children walking on narrow footpath

Need speed reduction measures

Will increase traffic

Green Belt site

If Young Offenders Institute closes a large site will become available

Lack of infrastructure

Do not want more shops takeaways which will lead to an urban environment

Build new village towards Tean/Bythe Bridge with easy access from A50 to surrounding areas

Lack of facilities and infrastructure - school capacity doctors shops

Drains inadequate

Flooding an issue

Development should be spread through the village not concentrated at the top. Could be linear development inline with existing housing on Ashbank Road and by Winterfield Lane & Clough Lane

Reduce open space in Werrington and effect quality of life

By filling the gaps will lose the village feel

Council response

- The is not a designated wildlife site. It was not been assessed in Extended Phase 1 Habitat Survey 2015 if it is taken forward as an allocation consideration will need to be given to the biodiversity of the site.
- Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations
- The land in question is within the Green Belt. The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a more detailed site-based assessment of land which could be considered for review. The review found that the overall impact of development on the site on Green Belt purposes was limited. It recommended that the site could be considered for release under exceptional circumstances In order to release a site from the Green Belt the Council must be able to demonstrate that exceptional circumstances exist. Consideration needs to be given to all the relevant evidence to determine the overall suitability of the site for release from the Green Belt.

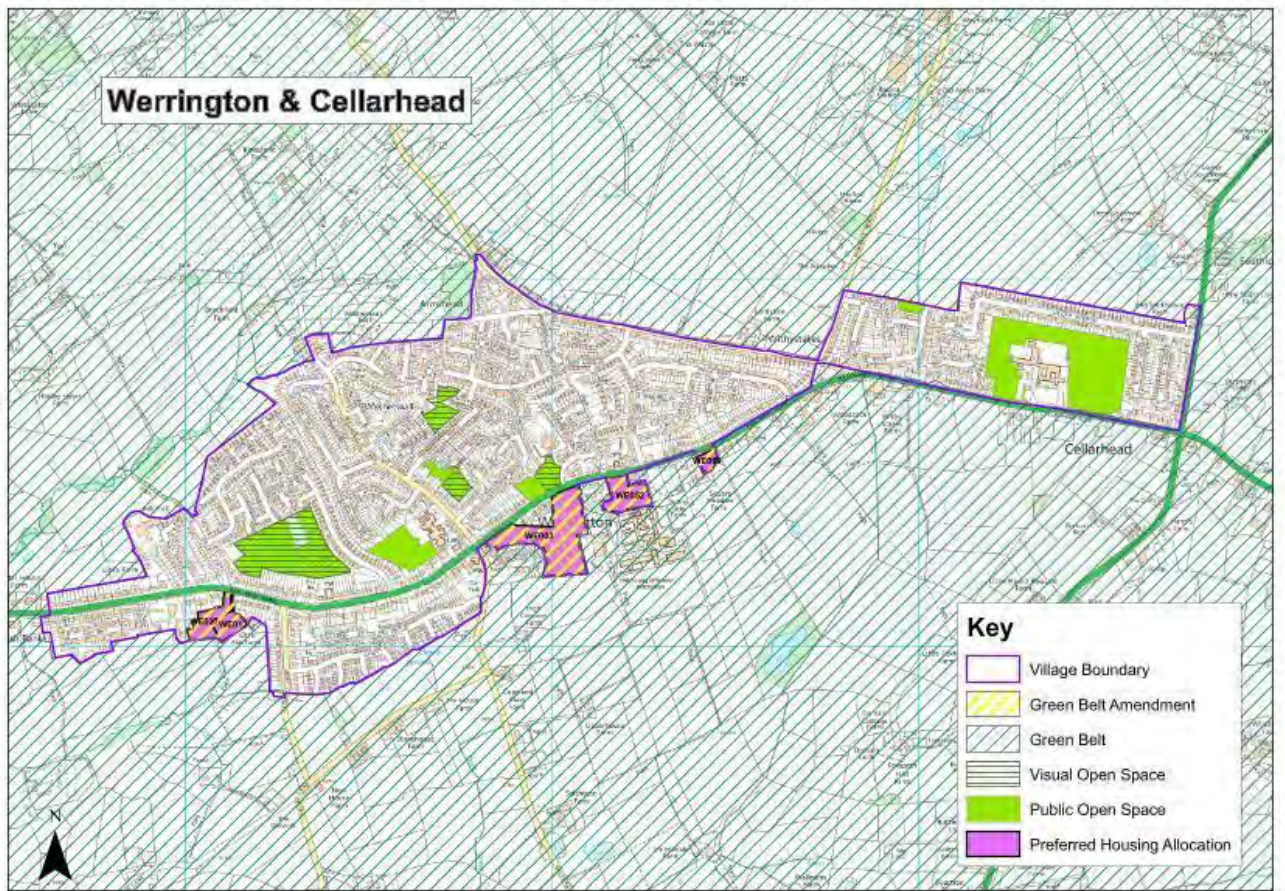

Werrington

WE013 Land west of Little Ash Farm Ash Bank Road

- Issues such as overlooking, screening and other impacts on existing residents will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.
- The Local Plan will provide certainty for local communities and developers through policies guiding the overall level and location of development. Planning applications must be determined in accordance with the Local Plan unless material considerations indicate otherwise.
- The Highway Authority consider the site may be acceptable subject to detail of access design and visibility. It would need to be developed with WE027 to be adequate for adoption as highway.
- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
- Any new development taking place will be subject to policies contained within the new Local Plan, which seek to protect the character of the area is considered
- The Environment Agency consider there are known flooding issues in the area and The Staffordshire Local Lead Flood Authority have it on their records as a flooding hotspot. The EA have requested a level 2 SFRA to be completed if the site is to be considered for allocation.
- There is not enough brownfield land or sites or infill sites in settlements to meet the District's proposed housing requirements so green field sites have been proposed.
- Policies in the Local Plan will require an element of new housing provision to be affordable
- If the district council considered that a development they may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts
- There is a policy in the Local Plan regarding the pollution

Werrington

WE013 Land west of Little Ash Farm Ash Bank Road

Werrington

WE027 Land at Little Ash Farm Ash Bank Road

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances.
- Environment Agency have identified flooding issues and requested SFRA level 2.
- See key issues below

Key Issues

- Green Belt site. Green Belt Review considers it is acceptable for release. Exceptional circumstances would need to be demonstrated.
- Landscape, Local Green Space and Heritage Impact Study August 2016 identified that the site is of low landscape sensitivity and is suitable for development in heritage terms,
- Access can be achieved site would need to be developed with WE013,
- Significant potential flooding issues EA requested SFRA level 2.

Greenfield/ brownfield	Built up area boundary/country side	Est. housin g capacit y	Area (ha)	Density per hectare	Ownersh ip status	Site details
Greenfield	Green belt	20	0.64	31	Land available	<ul style="list-style-type: none"> • Vacant grassland • Mature trees along boundary • Stream to the east • Site slopes down to the stream • Public footpath • Two grade II listed buildings within 400m

Studies

Local Wildlife Assessment (ECUS, 2017) (WE013 & WE027)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria.

Werrington

WE027 Land at Little Ash Farm Ash Bank Road

The habitats on site were of nature conservation value at the site level only. These habitats are not listed as important habitats in the Staffordshire SBI guidelines and therefore the site does not currently qualify for consideration as an SBI or as a BAS under these criteria.

Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site supported notable protected species. No species listed as important in the Staffordshire SBI guidelines were recorded and therefore no part of the site currently qualifies for consideration as an SBI or as a BAS under these criteria.

Prior to any future development, the site should be checked again for signs of badger activity and an activity survey should be conducted to determine the use of the site by bats. It would be necessary to conduct nesting bird checks before vegetation clearance or other disturbance during the bird breeding season. Japanese knotweed and Indian balsam occurred on site.

Extended Phase 1 Habitat Survey 2015

Not assessed

Landscape & Settlement Character Assessment 2008

Within important landscape setting to the settlement.

Landscape, Local Green Space and Heritage Impact Study August 2016

Ash Farm

Landscape

Land to the rear of linear development on the A52, to the east of Ash Farm. The site has low visual prominence and is generally enclosed by development and vegetation, although the vegetation on the southern boundary is more sparse. Additional planting could be undertaken on this boundary to create a vegetated edge to the settlement. Existing development surrounding the site does not contribute towards a well-defined settlement edge, and development of the site could improve this.

Site is of low landscape sensitivity.

Heritage

There are two Grade II Listed Buildings within the 400m buffer. Due to the intervening buildings, there was no intervisibility between the site and the assets. Development would be highly unlikely to adversely affect the settings of the assets. The site lies within the HLC zone CWWHECZ 1 (Historic Environment Character Assessment 2010). Development in this area would unlikely adversely affect the HLC as a whole.

Site suitable for development in heritage terms.

Green Belt Review November 2015

(Appraised sites according to their contribution to Green Belt Purposes) Sites WE013 & WE027 assessed together.

Check Sprawl: Limited contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: Limited

Two parcels which are part of the southern extent of Werrington, and development of which would be part of the visual envelope of the settlement. The southern boundary of the sites is weak, being a discontinuous tree belt, but development would not

Werrington

WE027 Land at Little Ash Farm Ash Bank Road

create a significant intrusion into open countryside. Part of the land identified in the LCA as making a contribution to the setting of the settlement

Recommendation: Consider for release. Release under Exceptional Circumstances should be accompanied by extension of the Village Boundary

Habitat Regulation Assessment Initial Findings Preferred Option 2016

No potential impact pathways identified

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 20 dwellings is considered to have a significant positive effect, as could the site's accessibility to services and facilities. Similarly, the site's to areas of open space is likely to have a positive effect. However, the site's accessibility to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated assets. Similarly, the development of greenfield, grade 4 ALC land and the site's proximity to historic assets is assessed as having a negative effect.

Options Consultation July 2015

Statutory bodies/stakeholders

Werrington PC - object – If developed with WE013 would not maintain building line and encroachment into green belt.

SCC Highways: may be acceptable subject to detail of access design and visibility. Would need to be developed with WE013 to be adequate for adoption as highway.

Developer/Agent – Land available (2 agents comments summarised below on behalf of 2 owners)

Public response 102 comments - 98 support and 4 objections.

Issues raised:

Objections

- Infrastructure - Schools
- Infrastructure - Traffic / Transport – entrance to the site is a busy main road.
- Infrastructure – Other – Impact on doctor's surgery and schools.
- Landscape - Protection of footpaths and wildlife required. Loss of unobstructed views to Stoke.
- Nature Conservation fields home to wildlife
- Flood Risk
- Amenity (e.g. noise, privacy, loss of light) – Loss of privacy from rear gardens. Detrimental affect on enjoyment of existing rear gardens, restricting views
- Scale of development - Planning Creep on adjacent sites on rural areas.
- Other – Decrease value of housing. Much larger areas suitable for housing. If developed with WE013 would not maintain building line and be substantial encroachment into greenbelt. Other suitable sites at Tregaron Court/Langton Court, Werrington and off Hillside Road/Lansdowne Crescent,

Support

- Infrastructure -Traffic / Transport – site accessible from major road network) Existing footpath potential to offer access and egress onto Ash Bank Rd has good visibility.
- Infrastructure – other – close to local services and good public transport links.

Werrington

WE027 Land at Little Ash Farm Ash Bank Road

- Landscape - development does not extend past the southern most edge of Werrington. Development either side of HMYOI does not extend settlement boundary significantly.
- Flood Risk – unaffected by flooding
- Scale of development - HMYOI already prominent feature in landscape. Site well enclosed by surrounding devt and existing vegetation means limited impact on wider landscape.
- Other – limited impact on heart of village. Accords with spatial aims of core strategy. Site is economically viable. If whole site not taken forward northern part could be considered as possible infill. Owner happy to develop this site for housing

Council response –

Staffordshire County Council say that Werrington Primary School currently has sufficient capacity for the likely number of pupils generated from the overall level of development. Werrington High School is projected to have insufficient capacity and the District Council will work with the County Council to identify an appropriate solution.

The Highway Authority has highlighted that land would need to be developed in conjunction with WE013.

New development is the main way to deliver new or improved infrastructure e.g. more residents may support additional medical facilities. Infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.

The Council has a Landscape & Settlement Setting Study and this site has been identified as being important to the landscape setting of the settlement. The Council will shortly be commissioning a Landscape Impact Study to assess all sites selected as preferred options and suggest mitigation measures where appropriate. The results of this will feed into the Submission Version of the Local Plan.

The land in question is within the Green Belt. In order for Werrington to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends that WE027 is considered for release from the Green Belt.

The Council has recently completed a Phase 1 Ecological Study for the District. This assessed sites included in the Site Options consultation. The site survey results will be used as part of the site selection process. Any other sites which come forward and are potentially suitable for development will also need to be assessed.

Amenity – issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Views from individual properties are not protected in planning law.

Werrington

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken forward into Preferred Options Local Plan:

- The site is in the Green Belt the Green Belt Review considers the site is suitable for release the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are exceptional circumstances.
- The Council needs to meet the development needs of their area. Housing allocations are needed to ensure the Districts housing requirement is met.
- The Green Belt is tightly drawn around Werrington and there is limited capacity in the settlement for further growth.
- Werrington is defined as a larger village in the Core Strategy and it has a number of facilities and services and is considered to be a sustainable location to support some growth.
- The site is in public ownership
- See key issues below.

Key Issues

- Landscape, Local Green Space and Heritage Impact Study August 2016 identified that the site is of low landscape sensitivity and is suitable for development in heritage terms.
- Green Belt site. Green Belt Review considers it is acceptable for release; Exceptional circumstances would need to be demonstrated.
- Access to the site needs to be clarified.
- Proximity to YOI may require noise impact assessment

Studies

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria.

The site habitats are considered to be of nature conservation value at site level only and are not eligible for possible SBI/ BAS status. However, the five trees on site have the potential to support bats and as such, require further assessment.

The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:

- Assessment of the five trees for their potential to support roosting bats

Extended Phase 1 Habitat Survey 2015 (FID 11)

The site is directly adjacent to a domestic housing estate and species poor grasslands, and has poor connectivity to more bio diverse habitats. However, the site is deemed as having district ecological importance in terms of its loss within the wider countryside due to having 5 trees that have potential to support roosting bats. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- A bat survey regime to ascertain whether bats roost in the trees
- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement.

Landscape, Local Green Space and Heritage Impact Study August 2016

Werrington House Farm

Landscape

Single field within the south of the settlement enclosed by a thick hedgerow on the eastern boundary, and development on the remaining sides including HM Youth Offenders to the south. Therefore the site has low visual prominence and fits well within the settlement form, as it comprises a gap in development.

Site is of low landscape sensitivity.

Heritage

There is one Grade II Listed Building within 400m. Due to the intervening buildings, there was no intervisibility between the site and the asset. Development would be highly unlikely to adversely affect the setting of the asset. The site lies within the HLC zone CWWHECZ 2 (Historic Environment Character Assessment 2010). Development in this area would unlikely adversely affect the HLC as a whole.

Site suitable for development in heritage terms.

Green Belt Review November 2015

(Appraised sites according to their contribution to Green Belt Purposes)

Check Sprawl: Contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Limited contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: Limited

Werrington

WE052 Land to north of HM Young Offenders Institute Ash Bank Road

A site immediately adjacent to the Ash Bank Road which are 'remnant' spaces which have escaped the wider expansion of the settlement, including linear sprawl from Werrington into the Stoke conurbation. Long-distance views are severely compromised by the HMYOI immediately to the south of the site.

Recommendation: Consider for release under Exceptional Circumstances should be accompanied by extension of the village boundary.

Habitat Regulation Assessment Initial Findings Preferred Option 2016

No potential impact pathways identified

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 25 dwellings is considered to have a significant positive effect, as is the site's accessibility to services and facilities. Similarly, the site's accessibility to open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect. The site's proximity to designated and historic assets is likely to have a negative effect, as could the development of greenfield, grade 4 ALC land.

Options Consultation July 2015

Statutory bodies/stakeholders

Werrington PC – Object – would not maintain building line and encroach in to green belt.

SCC Highways: Access will be difficult onto Ash Bank Road, there is a bus lay-by on road frontage that could impede an access. The site is also at the top of a hill, so any access may not be visible to existing traffic on Ash Bank Road.

Additional comments. Would need to check visibility can be achieved

Developer/Agent/ Owner – Land available.

Public response

11 comments – 8 support and 3 objections.

Issues raised:

Objections

- Landscape – Does not maintain building line and substantial encroachment into greenbelt.
- Other - other suitable sites at Tregaron Court/Langton Court, Werrington and off Hillside Road/Lansdowne Crescent.

Support

- Infrastructure -Traffic / Transport - site accessible from major road network)
- Other – Limited impact on heart of village

Council response –

The Highway Authority has expressed concerns about site access which require consideration to determine whether a solution is possible.

The Council has a Landscape & Settlement Setting Study and this site has not been identified as being important to the landscape setting of the settlement. The Council will shortly be commissioning a Landscape Impact Study to assess all sites selected as preferred options and suggest mitigation measures where appropriate. The results of this will feed into the Submission Version of the Local Plan.

Werrington

WE052 Land to north of HM Young Offenders Institute Ash Bank Road

The land in question is within the Green Belt. In order for Werrington and Cellarhead to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends that WE052 is considered for release from the Green Belt.

In terms of the suggested areas for development – land adjacent to Tregaron Court/Langton Court has been assessed and is not considered suitable for development due to constraints. Land off Hillside Road/Lansdowne Crescent is public open space.

Preferred Options Consultation April 2016

Historic England, Severn Trent, Natural England, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

SCC Highways: Access will be difficult onto Ash Bank Road, there is a bus lay-by on road frontage that could impede an access. The site is also at the top of a hill, so any access may not be visible to existing traffic on Ash Bank Road. Would need to check visibility can be achieved

Environment Agency- No site specific comments Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. Every effort should be made to re-naturalize watercourses, including de-culverting & easements to help promote blue and green corridors and networks. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate.

SCC Education In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded, which is covered in more detail below under the heading 'infrastructure provision'.

SCC LLFA No issues FRA required

Werrington Parish Council

- Concerned about traffic problems especially along Ash Bank Road, capacity of local infrastructure such as schools and doctors, protection of Green Belt from large scale housing development, prefer that the potential for infill sites should be explored together with additional sites (land off Whitmore Avenue and land off

Werrington

WE052 Land to north of HM Young Offenders Institute Ash Bank Road

Radley Way) as an alternative to those put forward in the Preferred Options Document, disagree with some of the conclusions from the Green Belt Review. (Table included with their letter stating which sites they agree and disagree with).

Preferred Options Sites
Support – WE069, WE013, WE027
Object – WE053, WE052, WE003

Other sites supported (WE048, Field in Ash Bank Rd [close to Stoke boundary / Brookhouse Lane], Former Builders Yard in Winterfield Lane, Open Space off Whitmore Ave, Open land off Radley Way).

Public Response

Issues raised

Impact on war memorial
Extra traffic will make it dangerous for children walking to school
Impact on wildlife
Disturbance to residents during construction
Loss of privacy
Loss of property value
Reduce gap between Werrington & Stoke
Could lead to further development
Traffic/congestion already an issue on A52- A52 A53 are at capacity
Dangerous for school children walking on narrow footpath
Need speed reduction measures
Will increase traffic
Green Belt site
If Young Offenders Institute closes a large site will become available
Lack of infrastructure
Do not want more shops takeaways which will lead to an urban environment
Build new village towards Tean/Bythe Bridge with easy access from A50 to surrounding areas
Lack of facilities and infrastructure - school capacity doctors shops
Drains inadequate
Flooding an issue
Development should be spread through the village not concentrated at the top. Could be linear development inline with existing housing on Ashbank Road and by Winterfield Lane & Clough Lane
Reduce open space in Werrington and effect quality of life
By filling the gaps will lose the village feel
Noise disturbance from theYOI
Noise/pollution from traffic
Look again at previous sites identified

Council Response

- The Highway Authority has expressed concerns about site access which require consideration to determine whether a solution is possible.
- The land in question is within the Green Belt. The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a more detailed site-based assessment of land which could be considered for review. The review found that the overall impact of development on the site on Green Belt

Werrington

WE052 Land to north of HM Young Offenders Institute Ash Bank Road

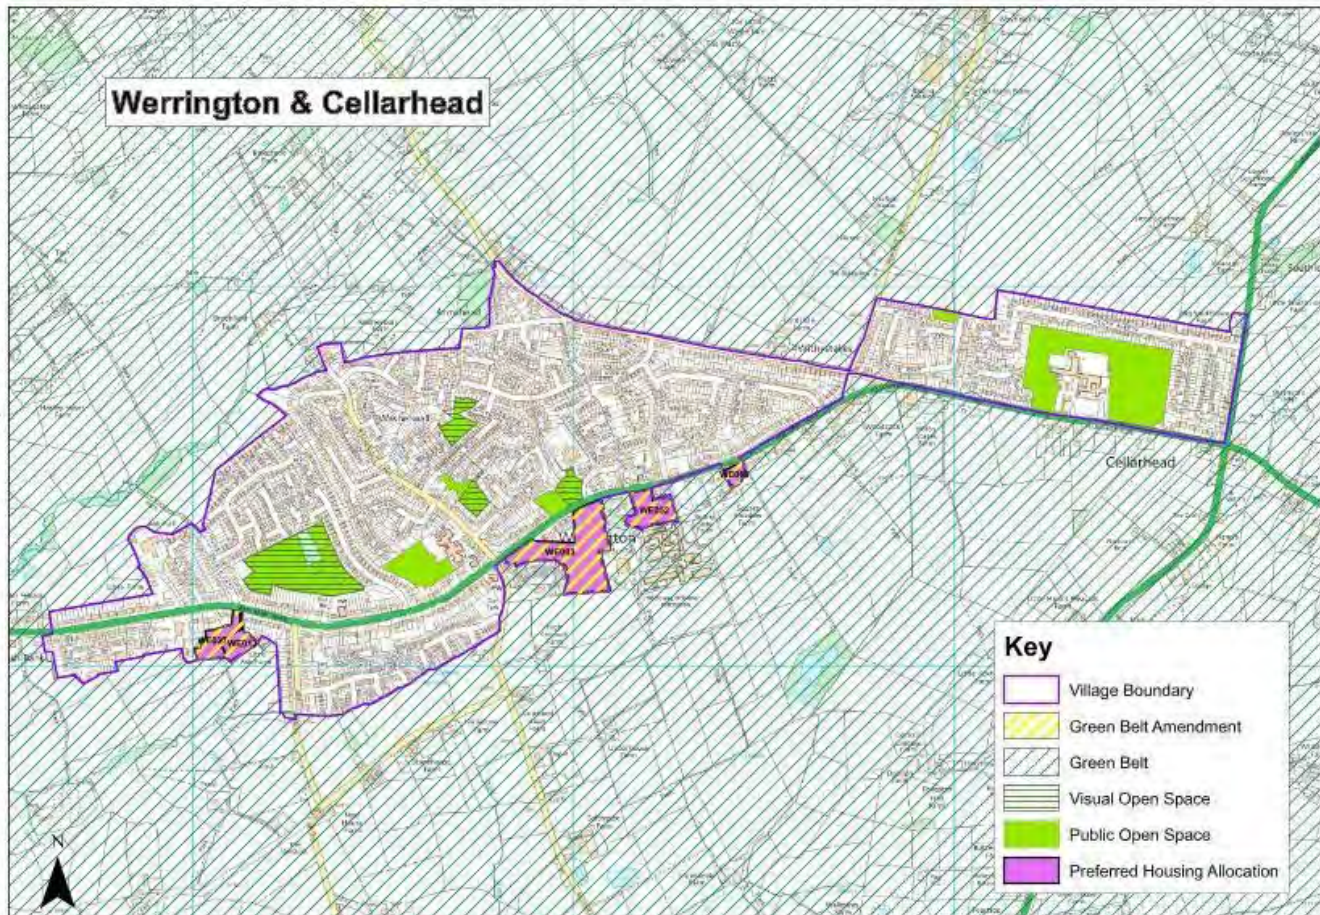

purposes was limited and considered the site could be considered for release under exceptional circumstances. In order to release a site from the Green Belt the Council must be able to demonstrate that exceptional circumstances exist. Consideration needs to be given to all the relevant evidence to determine the overall suitability of the site for release from the Green Belt.

- The Extended Phase 1 habitat Survey 2015 assessed the present and potential ecological value of the proposed site allocations ,the Local Wildlife Assessment (2017) assessed sites to establish their potential SBI/BAS status against Staffordshire Wildlife Trust criteria They found that the site had mostly low biodiversity value overall with the exception of the trees which may have the potential to support roosting bats and recommended that a bat survey was carried out
- There is not enough brownfield land or sites or infill sites in settlements to meet the District's proposed housing requirements so green field sites have been proposed.
- The Local Plan will provide certainty for local communities and developers through policies guiding the overall level and location of development. Planning applications must be determined in accordance with the Local Plan unless material considerations indicate otherwise.
- New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas.
- National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
- The Local Plan contains polices regarding heritage assets and the impact on any development on the war memorial will be taken into consideration.
- The Environment Agency has not identified any site specific issues. They recommend that the ecological value of watercourses is enhanced where possible and the impact on water quality is assessed. The Council has completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. Mitigation measures will be taken as part of the site development to address any surface water issues.
- Any new development taking place will be subject to policies contained within the new Local Plan, which seek to protect the character of the area
- Policies in the Local Plan will require an element of new housing provision to be affordable
- If the district council considered that a development they may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts.
- There is a policy in the Local Plan regarding the control of pollution
- Any development of this would be required to submit a noise impact assessment to consider the effect of the YOI and any mitigation measures.

Werrington

WE052 Land to north of HM Young Offenders Institute Ash Bank Road

- A number of sites were dropped from the emerging Local Plan after the Site Options consultation. Not all sites were required to meet the Districts housing requirements. The site options assessments provided a summary of the key issues and responses. Responses to the comments received to the Site Options consultation in 2015 were reported to the Council Assembly on 13 April 2016 and are available on the Council's website.

Werrington

WE052 Land to north of HM Young Offenders Institute Ash Bank Road

Werrington

WE069 Land to north east of Square Meadow Farm Ash Bank Road

Local Plan Process

- Site suggestion from the SHLAA
- Included in the options consultation July 2015
- Included in the Preferred Options consultation April 2016

Current Position

Site taken not forward into Preferred Options Local Plan:

- Recent household projections show that the level of development needed has reduced not all sites are required to meet the Districts housing requirements. The site is in the Green Belt the NPPF states sites should only be released if there are exceptional circumstances, in this case it is considered there are no exceptional circumstances.
- See key issues below

Key Issues

- Green Belt site. Green Belt Review considers it is acceptable for release. Exceptional circumstances would need to be demonstrated.
- Landscape, Local Green Space and Heritage Impact Study August 2016 identified that the site is of low landscape sensitivity and is suitable for development in heritage terms
- Access can be achieved.

Greenfield	Green Belt	6	0.21	28	Land available Agent acting for landown er	<ul style="list-style-type: none">• Rough grassland• Mature trees/hedgerow along road frontage• Forms a gap in existing development• One Grade II Listed building within 400m

Studies

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. The site habitats are considered to be of nature conservation value at site level only and are not eligible for possible SBI/ BAS status. However, the 5 trees on site have the potential to support bats and as such, require further assessment. The site has

Werrington

WE069 Land to north east of Square Meadow Farm Ash Bank Road

limited ecological value and is unlikely support any protected species other than foraging bats, birds and badgers.

Extended Phase 1 Habitat Survey 2015 (FID 71)

The site has low biodiversity value overall in terms of area and is directly adjacent to a small domestic housing estate and species poor grasslands, it also has poor connectivity to more biodiverse habitats and therefore is considered to have low ecological value. The following surveys/ actions are therefore recommended prior to any potential development works being carried out:

- Vegetation removal at the appropriate time of year

Landscape & Settlement Character Assessment 2008

Not within important landscape setting to the settlement.

Landscape, Local Green Space and Heritage Impact Study August 2016

Square Meadow Farm

Landscape

Small field on the southern edge of Werrington, north-east of Square Meadow Farm; and enclosed by linear development on the A52 to the east and west. The site is bound to the north by the A52, however a thick hedgerow on the northern boundary generally screens views from the road. Therefore the site has low visual prominence, including when viewed from the south as screening is provided by intervening vegetation and development. The site fits well within the existing settlement pattern as it forms a gap in development.

Site is of low landscape sensitivity.

Heritage

There is one Grade II Listed Building within 400m. Due to the intervening buildings, there was no intervisibility between the site and the asset. Development would be highly unlikely to adversely affect the setting of the asset. The site lies within the HLC zone CWWHECZ 2 (Historic Environment Character Assessment 2010). Development in this area would unlikely adversely affect the HLC as a whole.

Site suitable for development in heritage terms.

Green Belt Review November 2015

(Appraised sites according to their contribution to Green Belt Purposes)

Check Sprawl: Contribution

Maintain Separation: Limited Contribution

Prevent Encroachment: Limited Contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: Limited

A well enclosed site which is a 'remnant' space which has escaped the wider expansion of the settlement, including linear sprawl from Werrington into the Stoke conurbation

Recommendation: Consider for release under Exceptional Circumstances should be accompanied by extension of the village boundary.

Habitat Regulation Assessment Initial Findings Preferred Option 2016

No potential impact pathways identified

Sustainability Appraisal

Werrington

WE069 Land to north east of Square Meadow Farm Ash Bank Road

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to services and facilities and areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to historic assets. The site's proximity to designated assets is likely to have a negative effect, as could the development of greenfield, grade 4 ALC land.

Options Consultation July 2015

Statutory bodies/stakeholders

Werrington PC – Support – Generally maintains building line and not substantial encroachment into green belt.

SCC Highways: Individual units may be acceptable fronting onto Ash Bank Road, each unit would require sufficient space to provide turning facilities in addition to parking. Gradients of the drives would need to be agreed.

Developer/Agent/Owner – Land available.

Public response

10 comments – 9 supports and 1 objection.

Issues raised:

Objections

- Other - other suitable sites at Tregaron Court/Langton Court, Werrington and off Hillside Road/Lansdowne Crescent.

Support

- Infrastructure -Traffic / Transport – site accessible from major road network)
- Landscape – Maintains building line and not substantial encroachment into greenbelt.
- Other – limited impact on heart of village

Council response –

The Highway Authority has not raised any issues which would prevent development of this site.

The Council has a Landscape & Settlement Setting Study and this site has not been identified as being important to the landscape setting of the settlement. The Council will shortly be commissioning a Landscape Impact Study to assess all sites selected as preferred options and suggest mitigation measures where appropriate. The results of this will feed into the Submission Version of the Local Plan.

The land in question is within the Green Belt. In order for Werrington and Cellarhead to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends that WE069 is considered for release from the Green Belt.

Werrington

WE069 Land to north east of Square Meadow Farm Ash Bank Road

In terms of the suggested areas for development – land adjacent to Tregaron Court/Langton Court has been assessed and is not considered suitable for development due to constraints. Land off Hillside Road/Lansdowne Crescent is public open space.

Preferred Options Consultation April 2016

Historic England, Severn Trent, Natural England, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Studies

Local Wildlife Assessment (ECUS, 2017)

Ecus Ltd conducted Local Wildlife Site (LWS) Assessment of the site in 2017 in order to establish potential SBI/BAS status against Staffordshire Wildlife Trust criteria. The site habitats are considered to be of nature conservation value at local level only, although they have some potential to support protected species such as Badger, Brown hare, Hedgehog and foraging bats. No further actions are therefore required.

Extended Phase 1 Habitat Survey 2015 FID 7)

The site has mostly low biodiversity value overall in terms of area, is directly adjacent to a domestic housing estate and species poor grasslands, and has poor connectivity to the wider countryside. Therefore the site is deemed as having low ecological

Wetley Rocks

WR015 Land south of Mill Lane

importance in terms of its loss within the wider countryside. The only recommended action is for vegetation removal at the appropriate time of year to negate any effects on breeding birds within this site.

Landscape, Local Green Space and Heritage Impact Study 2016

Landscape

Land south of Mill Lane

Site comprises a field within the north-east of the settlement, located to the rear of linear development on the A520 and south of Mill Lane. The site is also enclosed by development to the west, resulting in relatively low visual prominence. The site fits well within the existing settlement form as it forms a gap in development on Mill Lane. Planting on the southern site boundary could create a strong, vegetated edge to the settlement.

Site is of low landscape sensitivity.

Heritage

Land south of Mill Lane

There are three Grade II Listed Buildings within the 400m buffer. Development would have the potential to adversely affect the setting of the church to the north-west of the site. A mitigation strategy including the use of vegetation screening along the north-west and southern boundaries of the site would reduce effects to the heritage assets. Development would be unlikely to adversely affect the HLC zone CWWHECZ 5 (Historic Environment Character Assessment 2010).

Site suitable for development in heritage terms subject to appropriate masterplanning.

Landscape & Settlement Character Assessment 2008

Within important landscape setting to the settlement.

Green Belt Review November 2015

(Appraised sites according to their contribution to Green Belt Purposes)

Check Sprawl: Contribution

Maintain Separation: Limited contribution

Prevent Encroachment: Limited contribution

Preserve Setting: Contribution

Overall Impact of development on Green Belt Purposes: Moderate

This location of this site, bounded by the development to east and west and Mill Lane to the north, means that it could be considered to be infill. The southern boundary is weak, being a field boundary only, but development would form a new substantial boundary and would not compromise the wider openness of the Green Belt in this location. Identified in the LCA as making a contribution to the setting of the settlement.

Recommendation: Consider for release

Habitat Regulation Assessment Initial Findings Preferred Option 2016

No potential impact pathways identified

Sustainability Appraisal

Initial Sustainability Appraisal Report April 2016

The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and low

Wetley Rocks

WR015 Land south of Mill Lane

ecological value of the site is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to historic assets.

Options Consultation July 2015

Statutory bodies/stakeholders

Parish Council – oppose (greenbelt – no suitable access from Mill lane).

SCC Highways - Any development of this site would need to ensure that there is adequate visibility out of Mill Lane onto Leek Road.

Developer/Agent/Landowner – Landowner has confirmed interest in developing this site. Current planning application for housing on part of site.

Public response: 4 comments - 2 support and 2 objections

Objections:

- Greenbelt
- Not required if 20 homes built on 002

Support:

- I would be affected in that houses would be built on land next to me but I have no objection to this. – would support village sustainability

Council response –

The Highways Authority advises that there would be visibility requirements at Leek Road junction but otherwise, do not rule out the development of this site.

The land in question is mostly within the Green Belt. In order for Wetley Rocks to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site WR015 for release from the Green Belt.

The Council has a Landscape & Settlement Setting Study and this site has been identified as being important to the landscape setting of the settlement

Preferred Options Consultation April 2016

Historic England, Severn Trent, Natural England, United Utilities, Sport England, Staffordshire Wildlife Trust, Woodland Trust, Coal Authority, No site specific comments

Environment Agency- No site specific comments Biodiversity – ecological appraisal needed. Evaluate the ecological features of interest and potential impacts upon them. SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
IN DEVELOPMENT BOUNDARY			
BD004	In the settlement boundary See RAG table for site details	<p><u>SCC Highways</u> Access off City Bank requires visibility over third party land. There can be no intensification of use of this access without a visibility improvement. Can this plot be combined with BD064 and BD138a?</p> <p><u>Contamination</u> Possible contamination from former mill?</p> <p><u>Ownership</u> No certainty over owner – appears to be one individual for part of site but large part unregistered. Have written to him several times most recently 12/8/16 to establish whether he would be willing to release land for development or not? Awaiting reply.</p>	No
Chells Builders Merchants	In town boundary Existing employment use but business has been asked to move.	<p><u>Ownership</u> Landowner won't release (18/08/2016). Without owner support the land cannot be taken forward as an allocation.</p>	No
Land on east side of Biddulph Bypass (currently designated Visual Open Space)	In town boundary. <u>VOS Designation</u> Allocated as VOS in Biddulph Town Centre AAP. The Visual Open Space (VOS) next to Chells has been re-assessed along with all the other VOS designations as part of the Landscape, Heritage and Local Green Space Study as this	<p><u>Ownership</u> Landowner won't release (18/08/2016). Without owner support the land cannot be taken forward as an allocation.</p>	No

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
	is now an old designation which is not included within National Planning Policy Guidance. The NPPF allows Council's to allocate 'Local Green Space' which meets specific criteria within Local Plans. This particular site is not considered suitable for a Local Green Space designation as it does not meet the criteria so there is an opportunity to consider it as a development site.		
Brown Lees Chapel	Too small for an allocation. Could come forward independently from the plan as it is within the development boundary.		No
Jackson's Nursery BD108	See site pro-forma – already included as a proposed allocation.		Yes
Meadows Playing Field	Sport England would object and it would need to be replaced elsewhere, needed as open space for new housing.		No
Redundant and under-utilised buildings around Congleton Rd/Cross St/ Stringer St/ Walley St and Station Rd. (photograph attached)	<u>Supporter's Comments</u> This is a brownfield urban site which requires regeneration and redevelopment, existing businesses could be re-located within a mixed use development of affordable starter homes and business units, similar to the development in Fairfax Close opposite the site - this is an area of the town that is constantly referred to by Biddulph Residents as a reason to object to ANY greenfield development.		See response on mills – Yarn Mill, Minster Mill, Albion Mills, Gas Yard and Town Councils Masterplan.

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
			
BD101 Yarn Mill	Owner supports (email of 9/8/2016)	See RAG table for site details	Yes
BD102 Minster Mill	Owner supports (email of 16/5/14)	See RAG table for site details	Yes
Albion Mills, Station Road	<p><u>Planning history</u></p> <ul style="list-style-type: none"> • 93/00639/OLD – Change of use to gym and fitness centre APPROVED • SMD/2010/0777 – Demolition of existing building and construction of 9 town houses (outline) to include access and layout. REFUSED • SMD/2011/0783 - Demolition of existing building and construction of 9 town houses (outline) APPROVED (expired in 2014) • SMD/2013/0894 – Change of use to 6 self contained flats INVALID 	<p>Allocations need to be for a minimum of 10 dwellings in the towns. This is too small and could come forward independently of the plan as a windfall.</p> <p>Biddulph Town Council’s Masterplan is considering this area and this could assist in bringing the site forward. There is clearly developer interest as this is reflected in the planning history.</p>	No
Gas Works Station Road	<p>(Land is apparently up for sale)</p> <p>Gas works yard has had planning approval in the past for 2 dwellings SMD/2007/1063. A subsequent attempt was made for 4 dwellings also in 2007 which was refused.</p>	<p>Contamination</p> <p>Allocations need to be for a minimum of 10 dwellings in the towns. This is too small and could come forward independently of the plan as a windfall.</p>	No

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
<p>Site adjacent Victoria Court, Brown Lees Rd, Brown Lees (photograph attached)</p>	<p>A small site that could mirror the Victoria Court Apartments on Brown Lees Rd which would have good links to A527, the BVW NCR55 and new primary school at Brown Lees.</p> 	<p>Allocations need to be for a minimum of 10 dwellings in the towns. This is too small and could come forward independently of the plan as a windfall.</p> <p>Owner intent - unknown Viability of apartments - unknown</p>	<p>No</p>
<p>IN GREEN BELT</p>			
<p>Former Quarry off Tunstall Road / Bemersley Road</p>		<p>Green Belt</p> <p><u>Green Belt Review (Site 8 – 2016)</u> Not recommended for release reflecting the absence of an outer boundary, with no clear feature to contain development which would contribute to sprawl along the A527 Biddulph Road towards Brindley Ford.</p> <p><u>Mining legacy</u> Statmap layers provided by Coal Authority show it's a high risk development area but no</p>	<p>No</p>

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
		<p>mine entries are shown on the site. Coal Authority (general response – not site specific) “it is important to note that land instability and mining legacy is not always a complete constraint on new development; rather it can be argued that because mining legacy matters have been addressed the new development is safe, stable and sustainable.” (Viability issue – investigative work required by developer).</p> <p><u>Owner</u> Unknown</p> <p><u>Contamination</u> May be an issue due to previous use.</p>	
Land East of Childerplay Road		<p>Green Belt</p> <p><u>Green Belt Review (Site 1 – 2016)</u> Not recommended for release because of the role of Green Belt in containing Biddulph, the scale and poorly bounded character of the site on its eastern extent.</p> <p><u>Mining legacy</u> Statmap layers provided by Coal Authority show that around two thirds of the site is a high risk development area but no mine entries are shown on the site. Coal Authority (general response – not site specific) “it is important to note that land</p>	No

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
		<p>instability and mining legacy is not always a complete constraint on new development; rather it can be argued that because mining legacy matters have been addressed the new development is safe, stable and sustainable.” (Viability issue – investigative work required by developer).</p> <p><u>Ownership</u> Unknown</p>	
<p>The old Bemersley Road council tip site adjoining Childerplay Road.</p>	<p><u>Supporter’s Comments</u> Childerplay Lane (photograph attached) This area, is the old industrial centre of Biddulph South, on both sides of the road straddle the old Whiston Slag Company, discharged with disposing and processing iron ore slag from Robert Heath's iron works and latterly on the south side, an opencast coal mine. As a consequence, the land quality is very poor. I would propose that the northern side of the road is utilised for open air business use - re-locating the hauliers from Wharf Road in Biddulph Town, whilst the southern side bordered by Bemersley Road from "The Matador" is used as a business industrial estate.</p>	<p>Green Belt</p> <p><u>Green Belt Review (Site 7 – 2016)</u> Not recommended for release reflecting its separation from the built edge of Biddulph and effect on openness.</p> <p><u>Contamination</u> Due to previous use.</p> <p><u>Mining Legacy</u> Statmap layers provided by Coal Authority show that vast majority of site is a high risk development area but no mine entries are shown on the site. Coal Authority (general response – not site specific) “it is important to note that land instability and mining legacy is not always a complete constraint on new development; rather it can be argued that because mining legacy matters have been addressed the new</p>	<p>No</p>

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
		<p>development is safe, stable and sustainable.” (Viability issue – investigative work required by developer).</p>	
<p>Land North of Woodhouse Lane, between Woodhouse Middle School and Woodhouse Farm</p>	<p><u>Supporter’s Comments</u> A small but significant parcel of land about the same size as Newpool which has excellent connectivity to the A527 via Woodhouse Lane, local schools and shops on Smithy Lane/Congleton Rd. Considering the land lost off Pennine Way, this would be the only development within this sector of Biddulph North.</p>	<p>Green Belt. Considered in SHLAA but C Class due to potential impact on Registered Park and Garden and National Trust property. Was not a site option.</p>	<p>No</p>

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
			
<p>Derelict farm buildings and Pottery on Mow Lane, Gillow Heath (photograph attached)</p>	<p><u>Supporter's Comments</u> This is small but significant site within the greenbelt, but consists of two areas of dereliction either side of Mow Lane, this would be ideal for an "Executive Home/ Barn Conversion to produce 8 - 12 quality units, the development of which would remove a crumbling eyesore, and allow for footpath instigation on this section of Mow Lane. The footprint of the plot would be within the "brown" land with current trees being retained as a screen.</p>	<p>Not suitable for allocation - In the Green Belt and open countryside – does not directly adjoin the town boundary.</p> <p>Could possibly be developed under existing NPPF policy if brownfield and new development not having a greater impact on openness of Green Belt than what is already on the site.</p>	<p>No</p>

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
			
<p>Derelict farm buildings and Pottery on Mow Lane, Gillow Heath (photograph attached)</p>	<p><u>Supporter's Comments</u> This is small but significant site within the greenbelt, but consists of two areas of dereliction either side of Mow Lane, this would be ideal for an "Executive Home/ Barn Conversion to produce 8 - 12 quality units, the development of which would remove a crumbling eyesore, and allow for footpath instigation on this section of Mow Lane. The footprint of the plot would be within the "brown" land with current trees being retained as a screen;</p>	<p>Not suitable for allocation - In the Green Belt and open countryside – does not directly adjoin the town boundary.</p> <p>Could possibly be developed under existing NPPF policy if brownfield and new development not having a greater impact on openness of Green Belt than what is already on the site.</p>	<p>No</p>

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
			
<p>Change of status from Mixed Use to Affordable Housing (photograph attached)</p>	<p><u>Supporter's Comments</u> This site was originally allocated to Mixed Use - business and housing, the close proximity to Victoria Row and Mill Hayes recreational area and the potential primary school nearby would render the site eminently more suited to 100% housing, this would be a far more acceptable proposition, with business being reallocated to the poor land at A036/A036a</p>	<p>Childerplay Lane sites are not considered suitable for Green Belt Release (see above) so employment could not be moved there.</p> <p>There is a demand for employment units in the town and this is considered to be the most suitable site to achieve this, having good road links and being adjacent to the Victoria Business Park as well as being considered suitable for Green Belt Release. The housing element on the site will assist with viability. Therefore, it is recommended that the mixed use allocation on this site remains.</p>	<p>Yes – retain as mixed use employment / housing site.</p>

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
			
<p>ALTERNATIVE BROWN LEES SITE / Site Known as 'Victoria Colliery' (photographs attached)</p>	<p><u>Supporter's Comments</u> This site was promoted during and after the opencast and subsequent land reclamation as mixed business and housing with a significant public open space together with an improved former railway trackbed into the Biddulph Valley Way NCR55 - little of this has happened. The fields within the SMDC boundary adjacent to the A527 can provide a significant number of housing, the BVW NCR55 could be metalled and made into a safer route to the town centre and Brown Lees, whilst servicing a Primary School built on land at A050/A051 below.</p> <p>This is a potentially large site with excellent access to Brown Lees Rd at the head of the BVW NCR55, leading up to Brook St, if the site incorporates the unmodernised farm and outbuildings at the western head of the site. The site is large</p>	<p>(SHLAA record says - FRA needed. SW floodplain and watercourses on site. Surface Water sewer seems to discharge to site)</p> <p>Mining legacy – former open cast mining area. Statmap layers provided by Coal Authority show it's a high risk development area (surface mining) but no mine entries are shown on the site.</p> <p>Coal Authority (general response – not site specific) "it is important to note that land instability and mining legacy is not always a complete constraint on new development; rather it can be argued that because mining legacy matters have been addressed the new</p>	<p>No</p>

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
	<p>enough - especially with the potential of building a school and providing playing fields on NuL Administered Land adjacent to the site. Access could also be considered opposite Lyneside Road aside the Gardener's Arms Public House.</p> <p><u>Green Belt Review (Site 9 – 2016)</u> “Potential for release under Exceptional Circumstances but proposed outer boundary does not extend to the valley/brook boundary and careful master planning would be required to ensure sensitive modelling of the built edge of Biddulph in this location. Development would have an impact on openness but this is considered not to be significant in light of topography and vegetation cover. Extend town boundary.”</p> <p>Landowner – Willing to release land for development.</p>	<p>development is safe, stable and sustainable.” (Viability issue – investigative work required by developer).</p> <p>Highways – Brook St not acceptable as main access as there are already issues at the Brook St / Brown Lees Road junction but suitable as a secondary access. Primary access should be further towards Tunstall Road but can't achieve this without acquiring third party land. Only other option is to re-direct Biddulph Valley Way to achieve access there. This approach is ok with County Highways.</p> <p>Access not likely adjacent to Gardener's Arms PH as the land is under 3 different titles so multiple owners are involved.</p> <p>Location of site in relation to the town centre – on the southern edge.</p> <p>Site not recommended for taking forward into Preferred Options Local Plan due to:</p> <ul style="list-style-type: none"> • An alternative Green Belt site exists adjacent to Wharf Road which will assist with bringing forward a large strategic mixed use regeneration site which is well related to the town centre and its key services and facilities. 	

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
	 <p>The first photograph shows a two-story stone house with a gabled roof and two chimneys. A green field is in the foreground, and a utility wire runs across the sky. The second photograph shows a dirt road or driveway leading to a field, with a wooden fence on the right side.</p>

BD109/118/ Land off Brook St - Alternative to BD063a?	See RAG table	GBR says not suitable for release.	No
BD144 West of Towerhill Road - Possible alternative to BD063a?	See RAG table	GBR says not suitable for release.	No
Larger part of BD063a	Owner supports - (see agents response)	<p>Green Belt</p> <p><u>Green Belt Review (Site 3 – 2016)</u> The site is on gently rising land to the rear of Newpool Road and as such presents relatively limited visual intrusion and hence limited impact on openness, but has no significant outer boundary with which to contain development. The site appears to seek to</p>	No

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
		<p>'round off' the settlement edge in this location between Tower Hill Road and Newpool Farm, but in so doing cuts across fields and in only one instance uses a recognisable field boundary. In addition, the site does not abut existing development off Meadowside, leaving a remnant field. Not recommended for release due to the absence of a clear outer boundary with which to properly contain development, thus preventing localised sprawl. More modest rounding-off to the east of the site could be considered, using a farm track as a boundary to development.</p>	
BD137	Owner supports	<p>Green Belt Review Parcel N7 (Land to North West of Biddulph) – Contribution towards the following GB purposes:</p> <ul style="list-style-type: none"> • significant contribution to preventing neighbouring towns merging; <p>Contribution to checking the unrestricted sprawl of large built – up areas;</p> <ul style="list-style-type: none"> • contribution to safeguarding countryside from encroachment; • Contribution to preserving the setting and special character of historic towns; <p>Permanence of GB – current boundaries are firm and largely logical. Sustainable patterns of development – “development would produce an over-extended linear settlement pattern with a limited relationship to Biddulph town proper.”</p>	No

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
		<p><u>SHLAA</u> “Eastern part of site (and north) affected by Flood Zones 2 and 3 due to stream. Blanket TPOs to northern part of site (Baileys Wood). This is also identified in PPG17 audit as natural and semi natural open space. Also historic earthwork here. BVW west” (c class)</p>	
BD083	See RAG table	<p>A meeting was held with the Green Belt Consultants and officers on 18th August 2016. Site BD083 was discussed at that meeting and the consultant’s view was that the site is on rising land, the sense of openness would be compromised by development and it is disconnected from urban area, (the Biddulph Valley Way separates it from nearby residential development).</p>	No
Land at Conway House off Harlech Drive	Owner supports if adjacent land is developed.	Same issue as ADD04 – impact on Heritage.	No
Land associated with 62 Mill Hayes Road	<p><u>Supporter’s Comments</u> Request that land associated with 62 Mill Hayes Road (your reference BD131 - see attached map) be considered for release from the Green Belt. The land extends to 6.35 acres and has a road frontage which would provide the best point of access into land north of Mill Hayes Road.</p>	<p>Green Belt. <u>Green Belt Review</u> Allows for release of the land if exceptional circumstances can be demonstrated. <u>Other Issues</u> If developed alone appears incongruous – would have to be part of a wider development for this area. Close to a site of geological importance.</p>	No

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
		An alternative site exists which will help to bring forward a key regeneration area in a central part of the town so land on this site is not needed.	
Underwood Farm, Gillow Heath, Biddulph	Owner supports	<p><u>Green Belt Review Assessment – April 2017</u> Not recommended for release. Development would be a clear intrusion into open countryside, without substantial boundaries with which it could be contained. A new built edge to Gillow Heath (and Biddulph) would be created which would be of a linear character and not constitute a logical rounding-off of the settlement.</p> <p><u>SHLAA</u> Part A – divorced from settlement. Not assessed in SHLAA Part B – Partial SHLAA assessment – BD123 (old coal yard only – divorced from settlement – may be NPPF compliant as it is brownfield?) C class in SHLAA. BD139 – “The whole of the site has been identified in the Landscape & Settlement Setting Study as being important to the setting of the settlement. Rural character of the area. Wedgewood Lane provides a strong edge to the settlement at this point. FRA needed.” – C class.</p>	No
Marsh Green Nursery off Well Lane Gillow Heath	Promoted by agent on behalf of owner.	<p><u>Green Belt Review Assessment – April 2017</u> Consider for release under Exceptional Circumstances. Notwithstanding the</p>	No

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
		<p>contribution of the land to the Green Belt in this locality, development would not cause significant harm to the openness of the Green Belt, reflecting the bounded nature of the site and the character of existing built form, combining both residential properties and the garden nursery. Of the two options, the smaller would be less damaging, being more closely related to the current built edge at Well Lane and limiting the interface with open countryside to the north west. However, there is no obvious significant feature between the two options which would serve as a reasonable long term boundary.</p> <p><u>SCC Highways</u> Marsh Green Road is poor and would really need some improvement before I could be comfortable with development using it as access. It would need at least widening but if sites BD068 and BD083 are still proposed, these would be significantly beneficial. All sites could then contribute to improvements at Marsh Green Road/Congleton Road junction. BD083 would be essential. The existing traffic generation of the existing use as nursery could be taken into account to offset against the proposed residential use. Transport Statement would be required. However, given the poor geometry and alignment of Marsh Green Road, some</p>	

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
		<p>improvement would be essential for any sizeable development.</p> <p>An alternative site exists which will help to bring forward a key regeneration area in a central part of the town so land on this site is not needed.</p>	
BD067a-c	See RAG table	GBR does not support.	No
BD138a and BD138b	See agent's comments (2 owners and 2 agents) See RAG table	GBR does not support.	No
Hurst Quarry, Hurst Road	<p>Owner supports – see agent's comments</p> <p><u>Recent planning application</u> SMD/2016/0127 - withdrawn</p>	<p><u>Green Belt Review:</u> Parcel N8 (Land to north east of Biddulph) – Contribution towards the following GB purposes:</p> <ul style="list-style-type: none"> • Check unrestricted sprawl; • Assist in safeguarding countryside from encroachment; • Preserve the setting and special character of historic towns. <p>Permanence of GB – Characterised by strong logical boundaries along inner and outer edges. Sustainable patterns of development – development not appropriate.</p> <p>Impact on Green Belt and unsustainable location. (Would have to argue on brownfield land NPPF policy)</p>	No
BD064	<p><u>Owner supports</u> Recent email from owner's representative.</p>	<p><u>Included at Site Options Stage</u> Not included at Preferred Options Stage because not recommended for release from</p>	No

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
		<p>GB in GB Review. See RAG table for site details</p> <p><u>Green Belt Review</u> “The land (including BD138a and BD138b) retains a clear open countryside character, development of which would create visual intrusion and compromise openness, notwithstanding the boundaries provided by Wedgewood Lane / Marshfield Lane/ and an unmade track to Congleton Edge Road”. Not recommended for release.</p> <p><u>Highways</u> The Highway Authority has no difficulties with this development from their point of view. Cumulative impact of several developments in this area would be assessed through a TA.</p>	
Newpool Rd Caravan site	Owner willing to release land for development.	<p><u>Green Belt Review Assessment – April 2017</u></p> <p>Consider for release under Exceptional Circumstances, reflecting no change in the built footprint of development in this location. The site is clearly bounded by the current extent of development, with no risk of sprawl or encroachment into the wider open countryside to the north, and is attached to development at Newpool Road.</p> <p>Difficult to justify exceptional circumstances for release from Green Belt of such a small</p>	No

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
		site. An alternative site exists which will help to bring forward a key regeneration area in a central part of the town so land on this site is not needed.	
Forge Colour Works, Congleton Road	Has planning permission and developers are working to implement it – has contamination issues so have been talking to Environmental Health.	Significant contamination issues.	No
Land on the west side of Biddulph bypass at Woodside Farm	<p>Land available, next to proposed acceptable site, close to town centre, easy access via already proposed site. Needs investigation and consultation according to NP WP.</p> <p><u>Ownership</u> 2 owners – willing to release for development.</p>	<p><u>Green Belt Review Assessment – April 2017</u> Consider for release under Exceptional Circumstances. Development could be considered without significant damage to the wider Green Belt, although there would be an impact on openness given the location of the land. The site largely sits within low-lying land and is clearly bounded to the north and to the east. The south western boundary is problematic, however, comprising various insubstantial hedgerows as well as being arranged by field pattern and not a clear feature which would constitute a logical and permanent external boundary. This would constitute a new settlement edge which would have to be created, without which there would be a danger of sprawl into open countryside over the longer term.</p> <p><u>SCC Highways</u> Alternative access - crossing Biddulph Valley Way in central part of site and integrate with BD071 scheme is acceptable to County Highways.</p>	Yes

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	RECOMMENDED ALLOCATION? Y/N
		<p><u>Biddulph Valley Way Crossing</u> There are covenants in place associated with crossing this former railway line to gain access and these are being investigated with Network Rail.</p> <p>(See site proforma for full details)</p>	
Former industrial site (formerly an old steel mill)	Located within the urban area. Part of Brown Lees Industrial Estate.		No
OUTSIDE STAFFORDSHIRE MOORLANDS DISTRICT			
Brownfield sites in SOT e.g. Brindley Ford old minerals sites within Stoke and Newcastle.		Stoke-on-Trent City Council and Newcastle Borough Council have both been asked whether they would consider development on the old minerals sites within their boundary to meet Staffordshire Moorlands housing requirements. The feedback received in response to this has been negative. Also, circumstances have changed since last year and it is considered that the District can meet its own development needs without using land outside its boundary.	No

OTHER SUGGESTED CHEADLE SITES FROM PREFERRED SITES AND BOUNDARIES CONSULTATION APRIL 2016

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	INCLUDE AS ALLOCATION? Y/N
OUTSIDE GREEN BELT			
Thorley Drive (Keepmoat) Nor submitted as part of consultation.	Suggested for housing . SMD/2016/0083 has outline for 60 dwellings. Land to south and west suggested as extension to existing planning approval.	<ul style="list-style-type: none"> • Important to the setting of the settlement in the Council’s Landscape & Settlement Character Assessment. • Landscape, Local Green Space and Heritage Study consider that the site is of high sensitivity, unlikely that the site could be developed without adversely affecting the settlement pattern and encroaching on the wider countryside. Development of the site could also affect the rural approach to Cheadle as views of development • Wider site previously refused by Planning Committee. 	No – previously considered as options site.
IN GREEN BELT			
Harewood Grange Farm (Gregory Grey) PO7032	Suggested for housing. Close proximity to JCB employment site.	Green Belt – no exceptional circumstances to release this area from the GB. GB review states that land in this area is vulnerable to urbanisation. Land identified as important setting to the settlement.	No – other non GB sites available.
Land west of Friars Close (Ken Wainman on behalf of Mr and Mrs Harrison) PO334	Suggested for housing. Sustainable location close to the town centre and of a relatively small size.	Green Belt – no exceptional circumstances to release this area from the GB. GB review states that land in this area is vulnerable to urbanisation. Land identified as important setting to the settlement	No – other non GB sites available.

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	INCLUDE AS ALLOCATION? Y/N
Park Lane (CH168) Ben Weatherley PO6934	Suggested for housing. Sustainable location close to the town centre and of a relatively small size (5 dwellings).	Green Belt – no exceptional circumstances to release this area from the GB. GB review states that the overall impact of development on the purposes of Green Belt was considered to be significant and would create an unacceptable intrusion into the countryside. Land identified as important setting to the settlement.	No – other non GB sites available
Park Lane (CH016b) Mrs Wilshaw PO99	Suggested for housing. Sustainable location close to the town centre and of a relatively small size.	Green Belt – no exceptional circumstances to release this area from the GB. GB review states that land in this area is vulnerable to urbanisation. Land identified as important setting to the settlement	No – other non GB sites available.
Nursery Close (Gez Willard) PO6843 (Brown area)	Suggested for housing. Sustainable location close to the town centre and of a relatively small size (10 dwellings).	Green Belt – no exceptional circumstances to release this area from the GB. GB review states that land in this area is vulnerable to urbanisation. Land identified as important setting to the settlement	No- other non GB sites available.
CH093 (John Wren on behalf of Mr Campbell) PO479	Suggested for housing. Land should be taken out of the GB.	Green Belt – no exceptional circumstances to release this area from the GB. GB review states that the overall impact of development on the purposes of Green Belt was considered to be moderate. Landscape, Local Green Space and Heritage Impact Study identified land as high landscape sensitivity and would not fit in well with the existing settlement pattern and encroach into open countryside.	No- other non GB sites available.
Ms Harrison	Suggested for employment uses.	Green Belt – no exceptional circumstances to	No- other non GB

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	INCLUDE AS ALLOCATION? Y/N
(3 areas) PO6936		<p>release these areas from the GB.</p> <p>Areas 1 & 2 fall within parcel S15 of the Green Belt review and there is some evidence of a role in helping to contain the various industrial intrusions.</p> <p>Area 3 falls within parcel S17 of the Green Belt review which comprises a complex parcel and is seen to check unrestricted sprawl and safeguard from encroachment.</p>	sites available.

OTHER SUGGESTED LEEK SITES FROM PREFERRED SITES AND BOUNDARIES CONSULTATION APRIL 2016

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	INCLUDE AS ALLOCATION? Y/N
IN DEVELOPMENT BOUNDARY			
Hughes Concrete/	Outline planning permission SMD/2014/0750 on this site for housing and other uses. Could come forward independently from the plan as it is within the development boundary. Also area is identified as part of the Cornhill opportunity site in the adopted Churnet Valley Masterplan SPD.	<u>No need to allocate – site has permission</u>	No – already has planning approval
Land at Barnfields Industrial Estate	Could come forward independently from the plan as it is within the development boundary	Existing industrial areas in use would not generally be allocated to other uses unless re-provision of equivalent or improved floorspace was involved.	No – existing industrial area
“Use disused mills in the town”	[Unspecified].	<u>Included in Large Site Windfall Allowance:</u> unidentified sites in the town boundary are already considered as part of the windfall assumptions in the Local Plan. Schemes arising upon such sites would be treated against relevant Development Plan policies on their own merits. No need to allocate. Note that the following urban mills already enjoy planning consent: <ul style="list-style-type: none"> • Portland Mill- redevelopment for 35 dwellings (SMD/2015/0523) • London Mill (London St)- redevelopment for 93 dwellings (SMD/2015/0586) 	No – included within large site windfall allowance. Some urban mills already enjoy residential consent.

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	INCLUDE AS ALLOCATION? Y/N
		<ul style="list-style-type: none"> • London Mill (Ashbourne Rd)- conversion for 21 light industrial units (SMD/2016/0113) • Big Mill/Shade Mill/Print Works (Belle Vue)- conversion to apartments across all three buildings [and subsequent consents for extensions].(SMD/2004/0254). 	
“Unused land at Sainsburys”	<p>9+ha site, mostly within town boundary; with 3.1ha lying in open countryside to north (1.5ha open space plus car parking and other areas).</p> <p>Major outline consent 10/00041/OMAJEI for supermarket, retail, business units, housing, petrol station and open space across entire site has been partially completed. The disused remainder could therefore be completed at any time. Applications for alternative schemes on the disused remainder would be assessed on their merits.</p> <p>A third party agent responded to 2016 consultation proposing entire undeveloped Churnet Works area be allocated for mixed uses including retail, employment, housing, hotel, leisure with a consequential amendment to the town boundary line to include this (including northern open space area).</p>	<p><u>Northern open space heavily affected by floodplain (FZ3+FZ2). Western parts of undeveloped area also affected by Floodzone2/3.</u></p> <p>Consent contained remediation conditions (ground gas).</p>	<p>No - Site already has mixed use consent.</p> <p>Town boundary to be amended at this location to north, to encompass entire area covered by 10/00041/ OMAJEI consent.</p>
Churnet Valley Farm, off Macclesfield Road (LE002)	<p>Flat fields/hockey pitch in NW of Leek.</p> <p>In FZ2 (Churnet River).</p>	<p>Site is <u>FLOODZONE 2</u>.The Council would need to justify pursuant to the sequential test set out in the NPPF, why this site in FZ2 was selected before other sites outside FZ2/3.</p>	<p>No - Floodzone</p>

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	INCLUDE AS ALLOCATION? Y/N
		<p><u>Landscape</u> Identified as important landscape setting to settlement.</p> <p><u>Availability</u> Unknown</p>	
Land off Westwood Park Drive (LE126a)	<p>Very steeply sloping site within development boundary. Adjacent to TPOs. Approx. 2.76ha.</p> <p>SCC Highways: The access track off Westwood Park Drive appears too narrow...Access off Davenport Close may be acceptable if the garages could be acquired and demolished (and replacement parking provided). Either access route would seem to need additional land.</p>	<p><u>Access</u> Site appears to be landlocked by existing development. Narrow agricultural access – insufficient for large scale residential development.</p> <p><u>Landscape</u> Identified as important landscape setting to settlement. Visually prominent site.</p> <p><u>Topography</u> Potentially too steep to develop.</p> <p><u>Availability</u> Unknown</p>	No – topography / access (although some small scale windfall development may be possible.). No owner support.
Adams Foods (LE154)	Outline planning permission SMD/2013/0561 approved for 60 units lapsed November 2016.	Site has been sold for employment use.	No – Sold for employment
Bode Business Park (LE243)	Representation submitted by WYG on behalf of landowner. Suggest re-location of the Key Plant Automation Limited business and considers residential use is suitable. Considers that new employment land opportunities offer an oversupply and therefore loss of LE243 will have no detrimental impact.	<p><u>Employment Use</u> Loss of employment use. Site is of a good size 2ha and protected by CS Policy E2. Need to retain range of employment sites in Leek.</p> <p>Possible contamination</p>	No – retain for employment

SITE LOCATION	SITE INFO	KNOWN CONSTRAINTS	INCLUDE AS ALLOCATION? Y/N
	<p>Site Area - approx. 2ha Capacity – approx 50 – 60 dwellings (WYG)</p> <p><u>SMDC Environmental health</u>: Some constraints on residential development: Contamination from industrial use, gas issues from adjacent fowlchurch tip</p>		
Former Working Mens Club and sports pitch, Ball Haye Green (LE259)	<p>Representation submitted by Steven Abbot Assocs on behalf of landowner.</p> <p>Access available off Ball Haye Green road.</p>	<p><u>Outdoor Sports Facility</u> Forms part of the supply of outdoor sports provision for Leek. Future balance of outdoor sports facilities (AMR) shows a shortfall for Leek. This is currently being reviewed (Playing Pitch and Open Space update).</p> <p>Sports facilities are protected by Core Strategy Policy C2 and Section 8 NPPF.</p> <p><u>Local Green Space</u> Landscape, LGS & Heritage Impact Study identified area as potential Local Green Space and will be protected from development.</p>	No – sports pitch and Local Green Space
IN GREEN BELT			
Land around Foker Grange, Macclesfield Rd, Leek (LE144)	<p>Agricultural fields abutting town development boundary and west of Macclesfield Road, before Foker Grange Farm access, in Green Belt.</p> <p>Not identified as important landscape setting to settlement</p>	<p><u>Green Belt</u> Green Belt review considers this parcel (N15) forms the northern gateway to Leek and is potentially vulnerable to urbanisation along the A523 with some evidence of this occurring.</p> <ul style="list-style-type: none"> • Check unrestricted sprawl – significant contribution • Prevent towns merging – limited contribution 	No – Green Belt

BE032	<ul style="list-style-type: none"> • The site was previously included in the Site Options consultation 2015 and was not taken forward. • A number of sites were dropped from the emerging Local Plan after the Site Options consultation. Not all sites were required to meet the Districts housing requirements. The site options assessments provided a summary of the key issues and responses. Responses to the comments received to the Site Options consultation in 2015 were reported to the Council Assembly on 13 April 2016 and are available on the Council’s website. • The Environment Agency informed the Council that the site has a culverted watercourse flowing beneath it which should be re-naturalised through redevelopment to contribute towards WFD (Water Framework Directive) objectives. They stated that this may take up space within the site, however it may be possible to divert the channel round the edge to create more developable space. The County Council’s Lead Local Flood Officer stated that “there is an existing significant flooding problem in this area, which SCC are suggesting a future project for. The problem leads to flooding of the southern part of this site.” Although it seems likely that this issue can be overcome, there is uncertainty at this stage as to how this will affect the capacity and viability of the site. • The site is in the Green Belt. The NPPF states that once established Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. Please note that responses to Question 1 regarding the proposed housing requirement and Question 2 regarding the proposed employment land requirement were reported to the Council Assembly on the 8th March 2017

Question 3 – Do you have comments regarding the proposed retail requirements for the Local Plan?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General Comments	Consultee Comments	Officer Response
PO610	Mrs Ellen Faulkner				Support	Jobs must be created for any new residents or whats the point on building houses. People need jobs near to where they live. We should not be encouraging people to travel.	Support noted.
PO404	Mr David John Allen				Support	None at present	Comments noted.
PO551	Mr Terry Barber				Support	There is a great need for further employment areas in Biddulph, or else how are Biddulph people going to afford the new houses that are earmarked to be built in the area?	Comments noted. There are employment allocations included for Biddulph in the Preferred Sites and Boundaries document.
PO55	Mr Wiggins Wiggins				Object	This is a small village community and should stay as such it's why people live here....retail is just down the road by car or bus for those that need it.	Comments noted. The need for retail development in the District is highlighted in the Council's Retail Study. Retail development has economic and social benefits particularly for those who don't have easy access to private transport.
PO389	Mrs Joanne Chadwick				Object	I am concerned that Cheadle has not been allocated any retail requirements yet you are proposoing 1300+ houses. Cheadle town centre has been ruined over the last decade and if anything we need retail development to improve the town and help it to thrive. Please reconsider and encourage some of the larger stores to invest in cheadle.	The need for retail development in the District is highlighted in the Council's Retail Study. For Cheadle, the study concludes that no further foodstores or non-food retail development are required in the early and mid part of the plan period. A further study at a later date will consider the need in the latter part of the plan period.
PO344	Councillor Christopher Wood				Object	The site at childerplay lane is purpose built for employment land and would alleviate the pressure to build in green belt and have better road access.	Refer to Question 19 for response.
PO363	Miss Jenna Woolliscroft				Object	(No reasons given)	-
PO602	DR William Callender				Object	The concentration of retail into large towns adds to traffic flows and environmental damage because of the need to travel to them. Local, perhaps community supported, retail outlets should be encouraged to provide a centre to smaller villages and a meeting point for local residents. Retail outlets, including post offices could be located within existing amenities such as village halls or public houses.	New community facilities are welcomed as long as they are not so large as to undermine town centres. This approach is supported in planning policy.
PO1622	Mr John Steele				Object	There is significant evidence that a rupture is occurring between the trends of the latter half of the 20 th Century and the new patterns of consumer behaviour. The impacts seem to be the decreasing relevance of the high street shopping experience and the lower frequentation of the supermarkets especially the larger units. The modern trends are veering sharply toward the internet with click and collect or home delivery, and more frequent but smaller convenience store shopping. Looking at the high streets of Staffs Moorlands towns it would appear there is already more than enough property and that the surplus would be better tuned over to residential which itself would improve our town centre environments.	Comments noted. The town centre retail boundaries have been tightly drawn to reflect the trends you refer to and policy has a flexible approach to the uses of peripheral properties. Residential development is also encouraged on upper floors in town centres.
PO44	Mr P Rushton				General comment	The comments at question 2 applies together with the fact that the Moorlands area will quite obviously continue to rely upon the City for major retail outlets.	Comments noted.
PO626	Ms Alison Conybeare				General comment	I do not have enough knowledge of Biddulph to comment.	Comment noted.

Page 3 of 82

Question 3 – Do you have comments regarding the proposed retail requirements for the Local Plan?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General Comments	Consultee Comments	Officer Response
PO643	Mrs Christine Bratt				General comment	Serious consideration needs to be given to this site. The existing A50 has become an overcrowded urban motorway and can often be described as a car park due to the number of accidents that occur on a regular basis closing the road and diverting traffic down the old road causing chaos and mayhem for all who try to go about their daily routines. It would cost millions to improve the roadways and would offer very little employment to justify the cost.	Comments noted.
PO937	Mrs Kathleen Bradshaw				General comment	Retail opportunities are always good. How about looking again at the costs of car parking in towns such as Leek and Cheadle. I purposely wait for visit these towns until after 3.30 to avoid having to pay.	Car parking charges are reviewed by the Council every year – though this is an issue outside the remit of the Local Plan.
PO843	Dr Anthony Shallcross				General comment	Hollington is a working village with jobs in agriculture, quarrying and increasingly recreation and tourism. The main problem is that young people who were born in the village cannot afford to buy properties in the village. An affordable housing development and/or a relaxation of planning restrictions on building on homesteads (see Housing) would make the village a more vibrant community with a lower age profile.	Comments noted – refer to policy in the Preferred Options Local Plan.
PO902	Dr Anthony Shallcross				General comment	The village has lost 2 shops, a mobile library and a post office in the last thirty years. A recent application to open a shop in the village was refused. The Hollington Residents' Steering Group are interested in creating an opportunity to develop markets for the sale of local produce in the village hall but a limitation to this development is the limited public car parking space near the hall. It would also be appropriate to revisit the application to SMDC for permission to open a shop in the village.	New community facilities are welcomed as long as they are not so large as to undermine town centres. This approach is supported in planning policy.

Question 4 – Do you have any comments regarding the proposed gypsy and traveller accommodation requirements for the Local Plan?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee Comments	Officer Response
PO45	Mr P Rushton				General comment	Travellers require sites which provide ease of access to facilities and services. It follows that sites should be situated in close vicinity to commercial centres.	<p>Note that site TR002 has been removed from the emerging Local Plan.</p> <p>Note that Preferred Option site TR002 is located off the Uttoxeter Road in close proximity to the A50 roundabout; and also on the edge of 'larger village' Blythe Bridge. Other centres such as Meir and Cheadle are a short distance further. Local bus services also operate to these centres; and there is a railway station at Blythe Bridge.</p> <p>The Council formulated a series of options sites for traveller allocation, which appear on the website. These were the subject of sustainability appraisal, which considered road links, access to facilities etc. This assisted the Council in its decisionmaking with regards TR002.</p> <p>Proposals arising for travellers sites within the District, would be assessed against relevant policies set out in the Government's NPPF, and its resultant 'Planing Policy for Traveller Sites', as well as the Council's own Local Plan policy. These set out the importance of sustainability/accessibility of sites, to enable provision of suitable accommodation from which travellers can access education, health, welfare and employment infrastructure etc.</p>
PO627	Ms Alison Conybeare				General comment	Travellers requirements are a National Government requirement and I am not knowledgable on the subject to comment further, other than the proposed sittings require very careful consideration.	<p>Traveller requirements are calculated by Local Authorities as part of their duty under Government policy to make their own assessment of traveller need: using 'GTAAs', or similar assessments as part of wider Housing market Assessments.</p> <p>The policy expectations concerning location of new traveller sites, is set out in the Government's NPPF, and its resultant 'Planing Policy for Traveller Sites', as well as the Council's own Local Plan Policy. These set out the importance of sustainability/accessibility of sites, to enable provision of suitable accommodation from which travellers can access education, health, welfare and employment infrastructure; and that development in open countryside that is away from existing settlements should be very strictly limited. Councils must also consider local amenities and impacts upon landscape and local infrastructure; and the scale of sites should relate to their surroundings. Brownfield sites are also preferred. In the case of sites within the Green belt (such as here) the Council would need to demonstrate exceptional circumstances to justify their allocation at Examination.</p> <p>Note that site TR002 has been removed from the emerging Local Plan.</p>

Question 4 – Do you have any comments regarding the proposed gypsy and traveller accommodation requirements for the Local Plan?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee Comments	Officer Response
PO405	Mr David John Allen				General comment	Consider small sites spread out throughout the district is better than one super site. They are travellers.	<p>Comments noted.</p> <p>Note that site TR002 has been removed from the emerging Local Plan.</p> <p>Councils can meet their residual traveller requirements across one or more sites. National traveller policy does not state that sites must be either large or small, but does state for example that the number of pitches proposed should relate to the circumstances of the specific size and location of the site and the surrounding population's size and density; and Councils should consider local environmental quality, and avoid undue pressure on local infrastructure.</p>
PO56	Mr Wiggins Wiggins				Object	More people not enough schools, doctors etc it's a village leave it as it should be	<p>Note that site TR002 has been removed from the emerging Local Plan.</p> <p>The Government's PPTS states that new traveller sites should relate to the circumstances of the specific size and location of the site and the surrounding population's size and density; and Councils should consider local environmental quality, and avoid undue pressure on local infrastructure.</p> <p>The role and scale of villages across the District are set out in the Local Plan. For example Blythe Bridge is a larger village, where further growth is justified.</p> <p>New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas. National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.</p>
PO97	Mr Edward Hulse				Object	The proposed Travellers site in Forsbrook - Quabbs Lane. During the meeting at Greatwood Community Hall, Tean, on Thursday 12th May, the Officer confirmed that the preferred site TR002 would not be sold by Mr Jackson as a	<p>Note that site TR002 has been removed from the emerging Local Plan.</p> <p>Note that the Preferred Options does not contain any site</p>

Question 4 – Do you have any comments regarding the proposed gypsy and traveller accommodation requirements for the Local Plan?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee Comments	Officer Response
						Travellers site and there would be NO compulsory purchase. If Quabbs Lane is reconsidered as a preferred site, we would wish to object most strongly. This would be in a Green Belt area and access to it would be dangerous as it is only metres away from a blind bend. Any slow moving vehicles, ie caravans, carts etc turning onto an unmade lane opposite the Cemetery would be a major concern on this fast road. Over the past few years there have been several fatalities. Travellers children would be at risk near this road. The site has poor access to major roads. (A50). Many family members and friends are buried in this Cemetery and the thought of it being opposite a Travellers Site is totally inappropriate and insensitive. This is a sanctuary of peace and quiet which the village appreciates greatly. Mr E W Hulse. Mrs L M Hulse.	proposals at Quabbs Lane. Every future stage of the emerging Local Plan must be subject to full public consultation, and Council Assembly approval.
PO100	Mr Anthony Keith Simcock				Object	I would like to object to this proposed site on the grounds of lack of school places shops and road safety. There seems to be no plans to extend schools in Blythe Bridge or Forsbrook and we have other housing I in progress. We have only a small village of shops in walking distance of this proposed site. As the local milkman I used the entrance to this site on a regular basic, and many times when I signal left to turn into the site, traffic pulling out of Uttoxter Road, Blthe Bridge pull out in front of me causing me to brake sharply. The location of the entrance after Blythe Bridge turning is not ideal for addition traffic, which the site would bring, and it would be an accident waiting to happen. If you delay your left signal ,following traffic blow their horn at you for last minute notice. It just a junction that is just not suitable for extra traffic. Further more it has been said that complusary purchase would not be used, so how do you expect to get the site as the current owners are not willing to sell it.	<ul style="list-style-type: none"> Refer to PO56 reponse above. <p>The Council consults with SCC Highways/SCC Transportation during Local Plan preparation. SCC did not raise any objections to development of TR002 for traveller use. In the event of future planning applications the Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to submit transport statements, and provide highways improvements where deemed appropriate).</p> <p>Note that site TR002 has been removed from the emerging Local Plan.</p> <p>The Council will consider all public responses to the Preferred Options consultation, including responses from landowners of sites. Sites must have landowner support to be deemed 'deliverable' to carry forward to Examination. The Council will have to reach a view regarding the number of outstanding traveller pitches it is required to provided for (as per its GTAA evidence), whether it is expedient to allocate a site(s); and if so the best location to do so.</p>
PO173	Miss Suzanne Cope				Object	I completely oppose to these sites in our greenbelt areas and believe that the sites would be better suited to a brown belt area. We should be protecting this land as published on the goverment website under planning practice guidance and i quote "Green belt serves 5 purposes 1. to check unrestricted sprawl of large built up areas. 2. to prevent neighbouring towns merging into one another. 3 To assist in safeguarding the countryside from enroachment. 4. to preserve the setting and special character of historic towns. 5. to assist in urban regeneration by encouraging the recycling of derelict and other urban land. Section 87 As with previous Green Belt policy, inappropriate	<p>Site TR002 is a brownfield site.</p> <p>Note that site TR002 has been removed from the emerging Local Plan.</p> <ul style="list-style-type: none"> See response to PO627

Question 4 – Do you have any comments regarding the proposed gypsy and traveller accommodation requirements for the Local Plan?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee Comments	Officer Response
						development is, by definition harmful to the green belt and should NOT be approved EXCEPT is very special circumstances.	
PO212	Mr Jason Harrison				Object	I have seen at 1st hand the disruption the travelers can cause when they just are passing through the area and how much resource be it public or private resource to clear up after said visits. I also think these spaces will put extra strain on our local schools as I had to fight to get my child into Forsbrook primary school due to lack of spaces Bringing extra people into an already over subscribed schools can not be good for our children, who can get broken up from established friends they made at nursery school. (Speaking from personal experience). There is also a ready made site in Newcastle under Lyme, which is not to far away, so why not either extend that or make that the travelers site for the area?	<ul style="list-style-type: none"> • see para response to PO56 about infrastructure <p>Note that site TR002 has been removed from the emerging Local Plan.</p> <p>Traveller requirements are calculated by Local Authorities as part of their duty under Government policy to make their own assessment of traveller need: using 'GTAA's', or similar assessments as part of wider Housing market Assessments.</p> <p>Note that neighbouring authorities have their own traveller requirements to provide for, and whilst a general duty to cooperate exists between neighbouring planning authorities, the Council cannot rely on the existence of sites in neighbouring authorities to contribute to meeting its own needs.</p>
PO364	Miss Jenna Woolliscroft				Object		Comments noted.
PO651	Mrs Christine Bratt				Object	I strongly object to the proposal to site a traveller site at the junction of the A50 with the old road to Blythe Bridge and Tean. This site is privately owned and the owner would not b willing to sell. The site is unsuitable as it would create further traffic problems on a road that is greatly overused. The local schools are virtually full as are the doctors surgeries. It leads on to a very narrow country lane that is unsuitable for the number of vehicles a traveller site would bring if the entrance was put on this side. The road is liable to flooding and major work would be needed to improve this.	<ul style="list-style-type: none"> • See response to PO100 • see para response to PO56 about infrastructure <p>Note that site TR002 has been removed from the emerging Local Plan.</p> <p>Disposal of surface water upon public highways is the legal responsibility of the Highways Authority or Highways England.</p>
PO1272	Mr Roger Yarwood	Planning Officer National Federation of Gypsy Liaison Groups			Object	We comment as follows on the above Plan. We consider the provision proposed for Traveller sites to be inadequate. Whilst the site identified at Blythe Bridge (TR002) may have some merits, it is located in the Green Belt, it has a history of enforcement action and refusals for various types of development and it is located very close to housing development and immediately adjacent to a site approved for a house. On these grounds, the delivery of the site may be problematic. Putting forward only one site denies choice. A single site for 8 pitches is too large. Sites should not exceed 5 pitches as larger sites give rise to management problems. Small family sized pitches present the best option for assimilation into the community and minimise conflict. If site TR002 is allocated, the Council should not attempt to satisfy the total need for Traveller provision at this site. This is clearly a contrivance to satisfy the GTAA requirement whilst avoiding making adequate provision.	<p>Comments noted.</p> <p>In the case of sites within the Green belt (such as here) the Council would need to demonstrate exceptional circumstances to justify their allocation at Examination.</p> <p>Note that site TR002 has been removed from the emerging Local Plan.</p> <ul style="list-style-type: none"> • See response to PO627 • See response to PO405 • The Council refers to relevant guidance, such as DCLG 2008 Designing Gypsy and Traveller Sites <p>Current traveller policy does not preclude the location of traveller sites next to other forms of housing.</p>

Question 4 – Do you have any comments regarding the proposed gypsy and traveller accommodation requirements for the Local Plan?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee Comments	Officer Response
						The number of pitches should be limited to 5 and additional site(s) should be allocated.	Were the Council to allocate a single site; this would not preclude fair determination of schemes arising in other areas of the District, as per PPTS and other relevant policy.
PO940	Mrs Kathleen Bradshaw				Object	TR002 is the nearest potential traveller site. It is said to be useful as it is close to the A50 and makes it possible for the travellers to easily access the site. Has anyone asked travellers where they would like to have permanent sites? It seems to me that travellers like to park where they will rather than be directed to an "approved" location.	The Council consults with relevant traveller groups during all stages of the Local Plan. In the case of unauthorised encampments, the Council retains enforcement powers. Note that site TR002 has been removed from the emerging Local Plan.
PO1269	Mr W Harper				Object	We comment as follows on the above Plan. We consider the provision proposed for Traveller sites to be inadequate. Whilst the site identified at Blythe Bridge (TR002) may have some merits, it is located in the Green Belt, it has a history of enforcement action and refusals for various types of development and it is located very close to housing development and immediately adjacent to a site approved for a house. On these grounds, the delivery of the site may be problematic. Putting forward only one site denies choice. A single site for 8 pitches is too large. Sites should not exceed 5 pitches as larger sites give rise to management problems. Small family sized pitches present the best option for assimilation into the community and minimise conflict. If site TR002 is allocated, the Council should not attempt to satisfy the total need for Traveller provision at this site. This is clearly a contrivance to satisfy the GTAA requirement whilst avoiding making adequate provision. The number of pitches should be limited to 5 and additional site(s) should be allocated. In our previous submissions we proposed the allocation of a site at Checkley. It is disappointing and surprising that our suggested allocation has not been included. The site is already in use as a Traveller site with a temporary planning permission (application ref. 2014/0572). It has the advantage of being located outside the Green Belt. It should be allocated as a permanent site to partly address the Council's obligation to provide a choice of Traveller pitches.	Note that site TR002 has been removed from the emerging Local Plan. <ul style="list-style-type: none"> Refer to PO1272 response The Council would consider any subsequent proposals at the Checkley site against relevant National and Local Traveller Policies.
PO837	Mr Peter Davies				Object	The proposal to establish a permanent gypsy site in the Werrington area is totally wrong. I have had dealings with these people through my work over the years and they destroy any area they inhabit. Rural villages are places where people aspire to live. Having gypsy sites in such areas just degrades the whole area until it becomes a run down area.	Note that the Preferred Options does not contain any traveller site proposals at Werrington. Every future stage of the emerging Local Plan must be subject to full public consultation, and Council Assembly approval.
PO898	mrs diane broadhurst		mrs diane broadhurst		Object	This site would be better for housing development. It is too close to residential areas.	Note that site TR002 has been removed from the emerging Local Plan. The Council applies relevant policies set out in the Government's NPPF, and its resultant 'Planing Policy for Traveller Sites', as well as the Council's own Local Plan

Question 4 – Do you have any comments regarding the proposed gypsy and traveller accommodation requirements for the Local Plan?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee Comments	Officer Response
							<p>policies. These set out the importance of sustainability/accessibility of sites, to enable provision of suitable accommodation from which travellers can access education, health, welfare and employment infrastructure etc.</p> <p>Current traveller policy does not preclude the location of traveller sites next to other forms of housing.</p> <p>In the case of sites within the Green belt (such as here) the Council would need to demonstrate exceptional circumstances to justify their allocation (for either traveller use, or residential development) at Examination.</p> <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p>
PO1028	Mrs Shelagh Wood		Mrs Shelagh Wood	Chairperson VVSM	Object	On top of a huge amount of traffic close to the Blythe Bridge roundabout this will add to the congestion.	<ul style="list-style-type: none"> • See para response to PO100 about highways.

Question 5 – Do you have any comments regarding the potential infrastructure requirements for the Local Plan?

ID	Full Name	Company / Org	Agent Full Name	Company / Org	Object / Support/ General Comment	General comment - reasons - Please explain your views.	Officer Response
General							
PO130 2		Severn Trent Water Limited			General comment	(Summary - please see attached file for full version). As a water company we have an obligation to provide water supplies and sewage treatment capacity for future development. It is important for us to work collaboratively with Local Planning Authorities to provide relevant assessments of the impacts of future developments. For outline proposals we are able to provide general comments. Once detailed developments and site specific locations are confirmed by local councils, we are able to provide more specific comments and modelling of the network if required. For most developments we do not foresee any particular issues. Where we consider there may be an issue we would discuss in further detail with the Local Planning Authority. We will complete any necessary improvements to provide additional capacity once we have sufficient confidence that a development will go ahead. Once detailed plans are available and we have modelled the additional capacity, in areas where sufficient capacity is not currently available and we have sufficient confidence that developments will be built, we will complete necessary improvements to provide the capacity. Surface water needs to be managed sustainably. For new developments we would not expect surface water to be conveyed to our foul or combined sewage system and, where practicable, we support the removal of surface water already connected to foul or combined sewer. We would not anticipate capacity problems within the urban areas of our network regarding water supply, any issues can be addressed through reinforcing our network. However, the ability to support significant development in the rural areas is likely to have a greater impact and require greater reinforcement to accommodate greater demands.	Comments noted. Severn Trent Water Limited is a statutory consultee and the Council will continue to liaise with the organisation through the Local Plan process.
PO130 9	Mr Andrew Leysens	United Utilities Water Limited			General comment	(Summary - full version is attached) United Utilities wishes to highlight that we will seek to work closely with the Council during the Local Plan process to develop a coordinated approach for delivering sustainable growth in sustainable locations. New development should be focussed in sustainable locations which are accessible to local services and infrastructure. United Utilities will continue to work with the Council to identify any infrastructure issues and appropriate resolutions throughout the development of the Local Plan. One of the roles of the Local Plan is to allocate sites to deliver specific types of development. The Council is aware from past discussions that a fuller understanding of the impact on water and wastewater infrastructure can only be achieved once more details are known, such as the timescales for development, the approach to surface water management and the chosen points of connection. Once more information is available with respect to specific development sites, which is often only at planning application stage, we will be able to better understand the potential impacts of development on infrastructure and, as a result, it may be necessary to coordinate the delivery of development with the timing for delivery of infrastructure improvements. Please note that United Utilities seeks to undertake further discussions with the Council on technical matters relating to site-specific development, such as site drainage and the Surface Water Hierarchy, once the Council identifies its preferred site allocations. In your selection criteria, we would encourage the Council to consider the availability of alternatives to the public sewerage system for surface water discharges. For example, sites with land drains or near to watercourses are a more sustainable alternative to the public sewer. United Utilities has the following comments/recommendations for consideration by the Council in preparing its detailed policies. We recommend that you include detailed policy wording in respect of any site allocations so that applicants can be clear of planning application requirements as soon as possible. Surface Water Drainage In accordance with the NPPF, the NPPG and the Ministerial Statement on Sustainable Urban Drainage Systems (December 2014) United	Comments noted. United Utilities is a statutory consultee and the Council will continue to liaise with the organisation through the Local Plan process. Note that emerging Local Plan policy SD5 requires that: <ul style="list-style-type: none"> • where sites are affected by the presence of watercourses, the Council expects developers to undertake early discussions with the Environment Agency and the Lead Local Flood Authority; and • wherever possible SuDS will be expected to contribute to on-site flood alleviation, as well as taking opportunities to contribute to wider Council objectives such as its emerging Green infrastructure Network; to enhancing biodiversity and recreation opportunities; landscape character etc. In some cases site-specific policies specify the requirement for the submission of an FRA. Note that emerging Local Plan policy SD3 sets

				<p>Utilities recommends that the Council includes a policy in the emerging Local Plan on surface water management, and suggests including the following draft policy (highlighted in red) in the draft version of the document: "Surface water should be discharged in the following order of priority: 1. An adequate soakaway or some other form of infiltration system; 2. An attenuated discharge to a surface water body such as a watercourse; 3. An attenuated discharge to public surface water sewer, highway drain or another drainage system; 4. An attenuated discharge to public combined sewer. Applicants wishing to discharge to public sewer will need to submit clear evidence demonstrating why alternative options are not available. Approved development proposals will be expected to be supplemented by appropriate maintenance and management regimes for surface water drainage schemes. On large sites it may be necessary to ensure the drainage proposals are part of a wider, holistic strategy which coordinates the approach to drainage between phases, between developers, and over a number of years of construction. On greenfield sites, applicants will be expected to demonstrate that the current natural discharge solution from a site is at least mimicked. On previously developed land, applicants should target a reduction of surface water discharge in accordance with the non-statutory technical standards for sustainable drainage produced by DEFRA. In demonstrating a reduction, applicants should include clear evidence of existing positive connections from the site with associated calculations on rates of discharge. Landscaping proposals should consider what contribution the landscaping of a site can make to reducing surface water discharge. This can include hard and soft landscaping such as permeable surfaces. The treatment and processing of surface water is not a sustainable solution. Surface water should be managed at source and not transferred. Every option should be investigated before discharging surface water into a public sewerage network. A discharge to groundwater or watercourse may require the consent of the Environment Agency." Infrastructure Provision As detailed above, in some instances it may be necessary to coordinate infrastructure improvements with the delivery of development. In accordance with paragraphs 156 and 162 of the National Planning Policy Framework (NPPF), we recommend the following detailed policy is included as part of the Joint Local Plan in relation to infrastructure provision: "Once more details are known on development sites, for example the approach to surface water management and proposed connection points to the foul sewer network, it may be necessary to coordinate the delivery of development with timing for the delivery of infrastructure improvements. At the larger development sites, it may be necessary to ensure that the delivery of development is guided by strategies for infrastructure which ensure coordination between phases of development over lengthy time periods and by numerous developers. The Council will support the principle of investment in infrastructure to respond to development and environmental needs. Infrastructure is key to the delivery of sustainable development and economic growth and meeting the development needs of the Borough." We encourage the Council to carefully consider the deliverability issues and practical issues associated with sites in fragmented ownership. On such sites, we would strongly encourage the council to challenge the site promoters to present a clear site wide infrastructure strategy in advance of examination of the plan. On larger sites, it should be clearly demonstrated there is a formal mechanism in place which will ensure the landowners will work together to deliver a coordinated approach to infrastructure over the whole site. This is a key element of delivering sustainable development and is in the best interests of good planning. We strongly recommend this is addressed in advance of allocating specific sites. Water Efficiency Whilst we appreciate the Code for Sustainable Homes has now been scrapped as a result of the Government's 'Housing Standards Review' consultation, we suggest the emerging Local Plan includes a new policy regarding water efficiency measures and the design of new development as follows: "The design of new development should incorporate water efficiency measures. New development should maximise the use of permeable surfaces and the most sustainable form of drainage, and should encourage water efficiency measures including water saving and recycling measures to minimise water usage." United Utilities wishes to highlight the importance of incorporating water efficiency measures as part of the design process for all new</p>	<p>out the Council's support for water- (and other) sustainability measures within new or existing buildings, that exceed current regulations; and Policy SD1 expects the submission of information with major proposals, to demonstrate that the water sourcing, and other environmental impacts of the scheme, have been considered by the applicant.</p> <p>Emerging Local Plan Policy SD4 sets out the Council's approach to protecting amenity through controlling various forms of pollution.</p>
--	--	--	--	---	---

Question 5 – Do you have any comments regarding the potential infrastructure requirements for the Local Plan?

					development. There are a number of methods that developers can implement to ensure their proposals are water efficient, such as utilising rainwater harvesting and greywater harvesting for example. Improvements in water efficiency help to reduce pressure on water supplies whilst also reducing the need for treatment and pumping of both clean and wastewater. Water efficiency measures contribute to the delivery of sustainable development. Health and Well-Being United Utilities recommends the following text is included as part of the Council's proposed development management policies in relation to health, well-being and residential amenity: "The proposed development of sensitive uses (such as residential) adjacent to existing sources of pollution (e.g. noise, odour, traffic etc.) must demonstrate through the submission of appropriate impact assessments that there would be no detrimental impact on future amenity."	
PO2574	Mrs Maggie Taylor	Sport England		Object	Par 3.33 Refers to NPPF 73 and a study that was undertaken to inform the Core Strategy. This study is not named – was it the (now out of date) Playing Pitch Strategy (PPS), an open space assessment and or an indoor sports assessment (e.g. relating to the SASSOT Sports Framework perhaps? I am wondering if the reference only to designating new open space means there is an adequate supply of indoor and outdoor sports facilities – this is not clear? I am aware that (although not been directly involved in) a refresh of the PPS/Sports Strategy being undertaken jointly with North Derbyshire – has this progressed or been adopted? Should it not be referred to and used to guide this element of the Local Plan?	<ul style="list-style-type: none"> The Council is currently undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy. Any outcomes will be fed into the Publication Version of the Local Plan.
PO2779	Mr Martin Ross	Environment Agency		General comment	The following comments relate solely to the protection of 'Controlled Waters' receptors. Government Policy, as detailed in the National Planning Policy Framework (paragraph 120), states that 'where a site is affected by contamination or land stability issues, responsibility for securing a safe development rests with the developer and/or landowner'. Consequently any proposal to develop land which has been subject to a previous use which may have caused contamination of the underlying soils and groundwater will need to be supported by a Preliminary Risk Assessment. This should demonstrate that the risks posed to 'Controlled Waters' by any contamination are understood by the applicant and can be safely managed. We will object when a Planning Application is submitted without a Preliminary Risk Assessment and we believe there is potential for contamination and a possible risk to 'Controlled Waters' receptors. Depending on the findings of the Preliminary Risk Assessment subsequent site investigation, risk assessment and remediation may be required. Appropriate conditions can be attached to any Planning Permission granted to require these works to be completed.	Emerging Local Plan Policy SD1 Part(2) already sets out the Council's approach to development of land affected by contamination. The supporting text already clarifies that pre-application information is required in these circumstances. However for clarity further information will be added into the supporting text.
PO2846	James Chadwick	Staffordshire County Council		General comment	We have provided to you previously a detailed education assessment of the District to inform the plan making process. Attached is a Technical Appendix that provides an update to be read alongside the original report and is based on the proposed sites and residual housing numbers in the consultation booklet. We acknowledge that the Plan provides for land to be allocated for education use in the three main towns. In order to advise on the actual size of the new school sites we will need to have further discussions with you on any likely Local Plan design requirements and potential aspirations for community use as these could affect layout and ultimately the overall site size. This would then help in framing policy for the sites. We will also need to ensure that the Plan provides a clear understanding of how the new schools will be provided and funded. (Site specific comments in Leek, Cheadle and Biddulph can be found under the relevant site heading) It is noted that table 3.6 of the consultation document only lists new education infrastructure where there is a requirement for land to be allocated. As previously advised and reiterated in the Technical Appendix enclosed there are further education infrastructure requirements for the planned growth. In the three main towns there will be a need for additional Middle and High school places in Biddulph to be delivered through expansions of existing schools. In the rural area there may be a necessity for additional Primary and First school places in Brown Edge, Endon and Forsbrook due to limited capacity at schools in those areas. There is also likely to be pressure on Middle school places in the rural area and at Blythe Bridge, Endon and Moorside High Schools. As around 46% of the housing requirement for the rural area is proposed to be delivered through small sites provision it is not easy to	<ul style="list-style-type: none"> Comments noted. The Council is working with Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.

					predict which schools the children from those houses will seek to attend. This is more acute at Primary/First school level where the geographical area that school draws from is smaller than that of a Middle/High school that draw from a wider area. We will need to work through this with you in more detail to understand the potential infrastructure projects required and how they may be funded, which is covered in more detail below under the heading 'infrastructure provision'.	
PO286 7	James Chadwick	Staffordsh ire County Council		General comment	As noted in our response to the Site Options consultation the delivery of the housing requirement in the Local Plan will bring with it requirements for new and/or improved infrastructure to support that growth e.g. schools and transport. The restrictions placed on the use of S106 obligations through Community Infrastructure Levy (CIL) regulations tend to favour the delivery of larger site allocations due to the pooling restrictions. It is noted that the Plan does not contain large individual sites or urban extensions. Therefore, careful consideration of how infrastructure will be delivered and funding will be required. In particular we are keen to understand: 1. how policy will be used to ensure the comprehensive development of sites (land parcels) that adjoin one another to provide a larger allocation overall; and 2. how infrastructure proposed is to be funded and the role a CIL charging schedule will play in this. On point 2 above the period of time between adoption of the Plan and implementation of a charging schedule could have implications for the amount of funding that can be collected via S106 and may result in either development being rendered unacceptable in planning terms as it is not possible to secure the necessary planning obligation or there is a shortfall in funding for infrastructure. We would therefore suggest that the preparation of a CIL charging schedule is seen as a priority and to be prepared alongside the Plan. However, we are mindful the Government is undertaking a review of CIL and the findings are due to be published shortly so this position may change dependent on any amendments Government proposes to the CIL legislation. We acknowledge that the Plan states an Infrastructure Delivery Plan is being produced and we would be keen to work with you to develop this to ensure there is clarity over infrastructure requirements and delivery.	<ul style="list-style-type: none"> • Draft Local Plan Policy SS12 sets out the Council's approach to planning obligations and the Community Infrastructure Levy.
PO289 5	James Chadwick	Staffordsh ire County Council		General comment	Comments on each of the sites have been provided previously from a transport planning perspective. We have now updated some of those comments and these are appended. With regard to proposed housing sites to the south west of Cheadle and their potential to deliver the Mobberley Link Road (western bypass), the benefits of this will need to be demonstrated through the study work identified in the Core Strategy section 8.1.53 Policy SS5c. Appended is a plan showing the protected line for this route. Presumably the access road to these proposed development sites could form the southern section of this route, although it would need to be designed to allow the required capacity for a bypass. This may be difficult to achieve if, for instance, the access road is designed in accordance with the Department for Transport's Manual for Streets. There is also the question of how many forms of access would be required to this development area which is intended to accommodate in excess of 400 dwellings. Paragraph 3.32 of the Plan refers to the safeguarding of a potential indicative route to enable provision of the bypass. However it is difficult to see how this together with the Adopted Core Strategy Policy SS5c can effectively achieve this. The policy contains the phrase: improve environmental quality and accessibility by: reducing levels of through traffic in the town centre and along the A521 and A522 promoting the longer term provision of a bypass to the west of the town. The explanatory text of the Core Strategy reads: '8.1.53 One of the most significant challenges is identifying the need and viability of a bypass to relieve through traffic in the town and provide improved access to existing and planned housing and employment areas. Whilst some junction improvements have been implemented, there remains a strong need to investigate and identify other potential solutions to improve traffic flows through the town particularly in the light of the growth aspirations for the town. A Transportation Study will therefore be required to investigate the need and viability of a bypass and/or other traffic management solutions, including a link from the A50 at Blythe Bridge to Cheadle, the implications for surrounding villages and the wider area and the scope for funding from proposed developments. This will be undertaken as part of the review of the Core	<ul style="list-style-type: none"> • Comments noted. • The Cheadle Town Centre Phase 2 Study (2017) considers the potential SW link road. Currently there is no link between the A522 Tean Road and Brookhouse Way / A521 due to it being severed by a disused railway line. The railway line is in third party ownership and a bridge will be required to connect a link road through. The proposed link road would allow a percentage of predicted trips from the SW area to traverse Brookhouse Way / A521 opposed to solely the A522, however the level of trips which would use the A521 from this area would have a minimal effect in improving congestion within Cheadle Town Centre. The study considers that the proposed Link Road would not be a solution on its own.

Question 5 – Do you have any comments regarding the potential infrastructure requirements for the Local Plan?

						Strategy.’ The bypass is also not shown on the Core Strategy Key Diagram and Inset Maps. It is noted that paragraph 3.31 of the Plan refers to a further study to explore the case and feasibility of a bypass. Therefore, currently the Core Strategy says that the need / viability for a Bypass has yet to be established and all that’s shown on Map 47 Cheadle as a ‘potential link road’ is part of the historic route of the A521-A522 Cheadle Western Bypass afforded protection by SCC in 2002 and currently declared on searches. It needs to be appreciated that in these circumstances the ‘protection’ afforded by SCC to this route may be insufficient to resist a challenge from a developer.	
PO611	MRS ELLEN FAULKNER				General comment	Can't really comment on this. Just hope a lot of thought goes into any plans.	Comments noted.
PO612	MRS ELLEN FAULKNER				General comment	No plans seem to have made re Health care, police, schools and other public services.	<ul style="list-style-type: none"> National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
PO406	Mr David John Allen				General comment	I will leave this to the experts , other than I feel access onto the road nodes and any associated reduction in the speed limit need to be considered.	Comments noted.
PO629	Ms Alison Conybear				Object	I object strongly strongly to the alteration of the green belt, particularly to enable development. The reason the green belt is in existence is to restrict development and protect the urban boundaries and surrounding countryside. Has the provision for future schools taken into account the fact that most of the baby-boom children are now in their 40s and hence additional children increases will be through immigration only, an issue that is not prominent in this area of Britain. Therefore is suggest that there will not be a requirement for an increase in schooling. The Valley School in Oakamoor, for example, has a lack of children attending the school, not a surplus.	<ul style="list-style-type: none"> The NPPF states that once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. The Green Belt Review Study provides a strategic review of Green Belt purposes and a more detailed site-based assessment of land which could be considered for review. See response to PO612 regarding school capacity.
PO884	Mr Elliot Broadhurst		mrs diane broadhurst		Object	I don't agree with the proposals to change the green belt boundaries in order to create more housing sites. We should be using brownfield sites instead.	<ul style="list-style-type: none"> See response to PO629 regarding Green Belt. There is not enough brownfield land or sites or infill sites in settlements to meet the District's proposed housing requirements so green field sites have been proposed.
PO1623	Mr John Steele				Object	This is almost laughable, all the larger elements of housing allocation require significant improvements to our roads to eliminate or reduce hazards, but we know that the Highway Authority, namely SCC, will blandly wave aside all objections from the safety of their	<ul style="list-style-type: none"> Advice has been taken from the Highways Authority regarding all proposed sites. See response to PO612 regarding the

Question 5 – Do you have any comments regarding the potential infrastructure requirements for the Local Plan?

					desktop simulations. See also the lack of provision for, schools, doctors, health care facilities, open spaces and leisure facilities.	Infrastructure Delivery Plan.
Leek						
PO856	Mr Daniel Noble				General comment In relation to the potential and reserve housing allocation at the east end of Leek and as per the Options Site Assessments - Towns.pdf document, " County Education advise that there are capacity issues affecting Leek First-, Middle- and High Schools; and given the scale of housing proposed across this catchment, new capacity will be required within Leek." I have been unable to find any proposed plans to address this concern. The comments on Options Site Assessments - Towns.pdf ("T he District Council will work with the County Council to identify an appropriate solution.") suggest no plans have been proposed. Without this important infrastructure investment I suggest that the housing consultation cannot be taken further. Surely if the school capacity problem is not solved, new housing cannot and should not be built if the intent is for affordable (family) housing.	<ul style="list-style-type: none"> The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered. In Leek a new First School is proposed and an extension to the existing middle school.
PO2040	Mrs Taylor	Leek Town Council			Object The plans indicate an extension to Churnet View Middle School and a new First School on the Mount - there has been no consultation with the First Schools and maybe better to expand existing First Schools.	<ul style="list-style-type: none"> The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered
Biddulph						
PO17	Mr Robert Moseley				Object There is no proposed infrastructure improvement to Biddulph apart from another supermarket and 1 primary school. No mention of investment in current schools, roads or rail conections to Biddulph.	See response to PO612 regarding the Infrastructure Delivery Plan.
PO811	Mr Timothy Sproston				Object I have concerns that the current infrastructure (Sewage, Schools and Roads) of the town will not be able to cope with the need related to additional housing. This is demonstrated most clearly around site BD062. It is proposed to put 40 homes onto, what is currently green belt land, right up to the boundary of the main sewage treatment works for the town. The impact on infrastucture here is obvious. Highways The only access to this site is via Mow lane -> Essex Drive -> York Close. Mow lane (width 4.6 meters) does not meet current design standards. There is no footpath on Mow Lane and it is already already hazardous for pedestrians and drivers. The raduis of the roads on both Essex drive and York close do not meet the minimum standard in the SCC Highways design guide policy. There is no other access to this site and no feasible way of improving Mow lane to accomodate the machinery to even build on BD062 as well as the additional traffic of new residents. Sewage works United Utilities have previously stated that the sewage works are currently working over capacity, additional housing around Biddulph would exacerbate this problem and the land around the sewage works may be vital if there was a need to expand. It seems insane that someone with some Planning experience or insight would be proposing to build new properties (expensive 4, 3 bed or even 2 bed social housing) in such close proximity to the main sewage works in the town - to enjoy the sights, sounds and smells.	See response to Question 19 regarding site BD062.
PO553	MRS ANGELA Turner				General comment I think this is poorly researched, poorly understand and requires the input of thrid party organisations which in some cases have not shared information. In Biddulph, United Utilities is one such example. They urgently need to share their DG5 register as you state in your FRA document pg. 26/27. Properties around the sewage works suffer from sewer flooding on a regular basis and this information is missing. The pipework infrastructure cannot cope, with junctions between pipes blowing manhole covers off the top and overspilling raw sewage into the field and into the Brook causing pollution incidents. This network is over capapcity (as evidence in a Case Study regarding an upgrade in 2009 designed for approx.17000 population). The National Trust at Biddulph Grange are about to feed into this system as well as any proposed new housing development. Enforcement	See response to Question 19 relating to sites BD062, BD068 and BD087.

Question 5 – Do you have any comments regarding the potential infrastructure requirements for the Local Plan?

						of any amenity issues ultimately rests with SMDC. Make sure the research evidence base is correct otherwise people living in proximity to this works will suffer. This is just one example where the actual infrastructure improvement needed (on site and across the pipe network) is totally unknown.	
PO849	mr alan brown				Object	The development of ADDO3 would have a severe effect on the bio-diversity of the surrounding areas. at the consultation meeting in the Town Hall it was said a desk top survey of the area had taken place. A full Environmental Impact Assessment of the area needs to be carried out and the results made public before any decisions are made.	See response to Question 19 relating to site ADD03.
PO828	mr alan brown				Object	I believe the upgrading of Akesmore Lane to provide access for the proposed development of ADD03 in Biddulph. Will create a "ratrun" that will cause Mow Lane and Tower Hill Road to become over congested. This will have a detrimental effect on area's that are predominantly occupied by elderly people making driving and pedestrian conditions on restricted country lanes unnecessarily dangerous. Also the council has just spent a lot of money upgrading the playing fields at Halls Lane (less than 500m from Akesmore Lane) in the hope of attracting more people to use them which will also increase the traffic flow of vehicles, children on bicycle's and all ages on foot. Also the current sewerage system is not able to take any further development and would have to be upgraded has this cost been taken into account?	See response to Question 19 relating to site ADD03
PO1024	Mr Peter Barnett				Object	As mentioned previously, Akesmore lane would have to be widened and Halls Road/Station road would have to,be strengthened before any building work could commence.	See response to Question 19 relating to site ADD03
Cheadle							
PO390	Mrs Joanne Chadwick				General comment	Cheadle Town centre cannot cope with anymore traffic. It would be difficult to alter due to the limited options available. A link road is a consideration but as far as i can see it goes half way through a proposed new estate. Two points here: - if the road does go through to Brookhouse industrial estate the heavy duty traffic will using it will be considerable and not appropriate for an estate road. - if the above link road is put in it would be useless unless the second half is constructed which would link Brookhouses the leek Road, where e JCB factories are.	<ul style="list-style-type: none"> The Cheadle Town Centre Phase 2 Study (2017) considers the potential SW link road. Currently there is no link between the A522 Tean Road and Brookhouse Way / A521 due to it being severed by a disused railway line. The railway line is in third party ownership and a bridge will be required to connect a link road through. The proposed link road would allow a percentage of predicted trips from the SW area to traverse Brookhouse Way / A521 opposed to solely the A522, however the level of trips which would use the A521 from this area would have a minimal effect in improving congestion within Cheadle Town Centre. The study considers that the proposed Link Road would not be a solution on its own.
PO1060	Mr John Bevan	Cheadle Unite			General comment	See our comments/ answer to Question1 ie New link road in Green belt from JCB (built in Green belt) Leek Rd to Brookhouses, Cheadle and on over New Haden bank to Draycott & hence the A50. Perhaps JCB would contribute.	<ul style="list-style-type: none"> The Cheadle Town Centre Phase 2 Study (2017) considers that in the future further connections to a link road around the town, would potentially offer a longer term solution providing a more suitable alternative. The rationale being that additional highway infrastructure could be funded by the developer, as specified as part of the development. This could be implemented so that over a period of time, such roads would connect, forming an Outer Distributor Road network around Cheadle which could reduce vehicle throughput and congestion in the

							town centre.
Blythe Bridge							
PO101	Mr Anthony Keith Simcock				Object	As I said before the junction of Draycott Road, Uttoxter Road, Blythe Bridge and entrance to the site is not suitable for additional traffic.	See response to Question 37 relating to site BB054.
PO900	mrs diane broadhurst		mrs diane broadhurst		Object	This plan has come out of the blue. New areas have appeared that weren't included in the previous consultation - BB041 was not on. This isn't a fair consultation as people may have expressed different views on the last consultation if it had been included at the same time. This site would be much more of an ecological loss than some of the other sites.	See response to Question 37 relating to site BB041.
PO9941	St Modwen Development Ltd	St Modwen Developments Limited	Ms Stacey Green	Barton Willmore	General comment	Email containing letter and Evidence Report submitted [both attached to PO9838]: We note that the Consultation Document refers to the future preparation of an Infrastructure Delivery Plan and we reserve our position to comment on that in due course. We have reviewed the availability of services and facilities within Blythe Bridge and Forsbrook and these are highlighted within Section 5.0 to our Evidence Base Report. We consider that there are services and facilities within the settlement that can support new homes and employment opportunities proposed by St Modwen on their site.	Comments regarding the Infrastructure Delivery Plan are noted.
Brown Edge							
PO46	Mr P Rushton				Object	The housing development plans for the SMDC area have generally scant regard for the infrastructure of areas selected. It is nonsensical to impose a housing estate on the already over-populated village of Brown Edge in a location where roads are inadequate for additional traffic, sewers and drainage problematic, school at capacity level and facilities plus services are insufficient for the present population.	National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
Cheddleton							
PO15	Dr Gordon Foulkes				Object	From reading the document it would seem that the previous consultation has not been considered as I can find no reference to the plethora of comments objecting to elements of the plan and no indication that any weight has been given to these. My response to that consultation was in respect of sites CD001 and CD 002 on the Cheddleton plan. That response remains my view on the basis thatto increase the traffic entering the A520 would be foolhardy. Having lived on the road for 35 years I have seen the nature and volume of traffic increase year on year with many heavy commercial vehicles using the road and the traffic volumes significantly increasing. In the place where the inevitable additional traffic would enter the road (known locally as Williamson's Hollow) there has been at least one fatality and several lesser accidents. the land in question was designated as green belt and is on the edge of the parish boundary between Weltey Rocks and Cheddleton and would blur the distinct nature of these two communities. I do hope that the term 'consultation' lives up to its name before any irreversible decisions are taken.	<ul style="list-style-type: none"> • Responses to the comments received to the Site Options consultation in 2015 were reported to the Council Assembly on 13 April 2016 and are available on the Council's website. • See responses to Question 37 relating to sites CD001 and CD002.

Question 5 – Do you have any comments regarding the potential infrastructure requirements for the Local Plan?

Endon							
PO390 5	Mr J Silitlitoe				Object	Any large scale development in Endon must address the flooding issues, currently being discussed with the Nation Flood Forum. The major junction at Station Road/Clay Lake must be resigned to cope with additional traffic – this is a hazardous junction and will become more so with increased traffic. Any development without solving these problems will be insensitive and lacking any common sense.	<ul style="list-style-type: none"> Comments noted. A Level 1 SFRA has been undertaken for the district and discussions held with both the Environment Agency and the Lead Local Flood Authority.
Upper Tean							
PO102 9	Mrs Shelagh Wood		Mrs Shelagh Wood	VVSM	Object	Infrastructure in Cressswell and roads between Draycott and Tean are totally inadequate and there is neither the land nor the capacity to widen these roads.	<ul style="list-style-type: none"> Comments noted.
Draycott							
PO941	Mrs Kathleen Bradshaw				General comment	My village of Draycott has no shops, no school, no medical services, How does the Local Plan think to address this? The hamlet of Cresswell is to get 168 new houses - surely that will just compound the misery for local residents? And then of course the Blythe Park development has to have better access to its site. Talk of two large roundabouts on roads where they go from wide to narrow in a few yards - where two large vehicles cannot safely pass seems to me to be folly of the first order. Every road leaving Draycott has at least one pinch point!! Uttoxeter Road Draycott is the only safe bypass for the A50 when it is closed. Add roundabouts and we might as well become hermits in our own homes.	<ul style="list-style-type: none"> The site has outline planning approval.
Hollington							
PO903	Dr Anthony Shallcross				General comment	Traffic is the major issue here. The ridiculous situation we have now is that three speed limits meet at the Quarry Bank- Main Road junction. Going east is a 30 mph, going west is 40 mph and going north it is national speed limit. Ironically the roads get narrower going north and west and there are no pavements in the village. There should be a rationalisation of the limit to 30 mph supported by traffic calming measures to combat speeding along Main Road. A speedwatch survey recently identified a traffic flow of 166 cars in an hour of which around 17% were exceeding the 30 mph limit. The narrowness of the roads in the village combined with blind junctions on Main Road at Quarry Bank, the Cross, Ground Hollow and Firbob Lane are all accident spots. Appropriate measures such as mini roundabouts should be put in place to reduce car speeds and the associated accident risk. The planning process needs to be looked at as part of the social infrastructure. Residents of the village feel that they are caught in a catch 22 situation where residential facilities are approved for tourism but not for long term occupation.	<ul style="list-style-type: none"> Roads and traffic calming are the responsibility of Staffordshire County Council.
PO606	DR William Callender				General comment	Once again the plan is focussed entirely on the road infrastructure of larger towns and on major routes. However, there are significant problems to address in roads through smaller rural villages such as Hollington that are on commuter routes. Excessive (for the capability of the roads) levels of traffic and speeding, lack of footpaths, force local residents to be prisoners in their own homes at certain times of the day. The plan also appears to make no mention of broadband infrastructure development which is becoming increasingly important if we want to support rural businesses and farming.	See response to PO903 regarding Hollington.

Question 6 – Do you have any comments on the proposed town boundary for Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO47	Mr P Rushton				General comment	Disappointed that the SMDC do not seem able to follow through on their initial innovative plans for the development of Leek into a market town to rival Derbyshire and Cheshire centres; for the development of a Churnet Valley tourism corridor; for a railway link with Stoke-on-Trent and Alton Towers; and for the tourism potential of a canal basin.	Comment noted. The Preferred Options consultation only sought views on the extent of new development boundaries for Leek and other identified settlements, and regarding proposed site allocations. The earlier adopted 2014 Core Strategy and Leek Town Centre Masterplan already set out Policy to guide the future development of the town and also the Churnet Valley (in conjunction with adopted Churnet Valley Masterplan). Both also contain references to the potential railway link/canal basin. Development proposals will continue to be assessed against these policy documents.
PO188 PO381	Mr John Pigott Mrs Brenda Pigott				Object	The town boundary on the east side of Leek should remain basically as it is at present. The proposal to build along both sides of Mount Road should be removed as the Mount is a very important open space close to the town centre and is a very popular route for walking, jogging and cycling. It is also the route of the Staffordshire Moorlands Walk giving panoramic views over the centre of Leek and the hills beyond. Instead of building along Mount Road, the brownfield sites and other sites within the town boundary should be developed first. These include the following sites which were shown on the original plans but now taken out : LE 219, LE073, LE067, LE147, LE037 and LE063.	<p>Page 25 of the Preferred Options consultation document sets out the residual housing requirement for Leek to 2031 (pursuant to Policy SS3 of the adopted Core Strategy). The Council must demonstrate that it will fully meet residual housing requirements for Leek to have a sound Local Plan in place. This requirement does not have to be met 100% from land allocations – unanticipated development of other urban brownfield/greenfield sites counts too – Table 4.1 factors in assumptions about future windfall housing (resulting in a lower residual requirement). This windfall would include urban sites not formally identified on the map. As there is insufficient capacity to meet this residual need entirely from sites within the Leek town boundary, the remaining requirement is to be met from a combination of urban (brownfield and greenfield) sites, and peripheral “urban extensions” around Leek as set out in Tables 4.2 and 4.3.</p> <p>The Council uses evidence to justify its selection of ‘Preferred’ allocation sites from wider sites. This includes landscape impact evidence and a Green Belt Review [refer to the “Options Sites Assessments” on the site allocations portal]. The western edge of Leek is covered by Green Belt (requiring more onerous justification to allocate compared to non-Green Belt). The most recent 2016 landscape impact study assessed impacts from the Peak Park, and concluded that the various Mount sites exhibited low- through to high- landscape sensitivity; it also provided recommendations regarding mitigatory measures. Note that landscape evidence must be weighed against all other relevant evidence when the Council selects ‘Preferred’ sites.</p>
PO114	Mrs Alison Campion				Object	I do not think the boundary of the town should be extended just to allow housing to be built on green spaces.	<ul style="list-style-type: none"> • See first para response to PO188

Question 6 – Do you have any comments on the proposed town boundary for Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO225	Miss Alicia Guy				Object	Building nearly 400 houses in the Mount area will totally ruin the lovely breathtaking scenery and peace and quiet that you get up there, increased traffic will spoil the area also	<ul style="list-style-type: none"> See second para response to PO188
PO187	Mrs Shirley Barlow					Not my town cannot comment	Comments noted.
PO634	Ms Alison Conybeare				General comment	I have no comments other than why is there a need to change the boundary?	<ul style="list-style-type: none"> See first para response to PO188
PO407	Mr David John Allen				Support	Leek town boundary looks fine.	Comments noted.
PO3912	Mr R Duncan	Rob Duncan Planning Consultancy			Object	On behalf of my client I wish to object to the continued exclusion of my client's land from the proposed residential infill boundary for Ladderedge. [Representation Report and site plan attached].	<p>Comments noted</p> <p>The site lies in the Green Belt. Note that the Council's 2015 Green Belt Review concluded that land parcel 'C3' which includes this land, overall makes a 'contribution' to the function of the Green Belt, when measured against the five Green Belt purposes (including a 'significant contribution' to checking unrestricted sprawl).</p> <p>Site is not immediately adjacent to the Leek town boundary.</p> <p>The site appears to have on-site trees, that would be the subject of protection (or compensation) under the Council's emerging Local Plan Policy NE2.</p>
PO3919		Hourigan Connolly			Object	Hourigan Connolly is promoting land at Buxton Road, Leek for inclusion in the Staffordshire Moorlands District Local Plan as a housing allocation. [Refer to Report attached to Question 1 which includes response to Question 6].	<p>Comments and confirmation of owner position, noted.</p> <p>The emerging Local Plan sets out how the residual housing requirement for Leek will be achieved by a combination of allocations within the urban area, and along the Mount (making allowance for windfall/small sites allowances). Additional housing sites around Leek are not required.</p> <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. A sustainability appraisal report is being published for consultation alongside the Preferred Options Local Plan July 2017. The SA Report considers the economic, social and environmental effects of proposed development site allocations including access to services and facilities.</p>
PO3917	Ms Linda Tweats	Leek Cricket Club			Object	The cricket club would wish for the town boundary to be amended to include that area at the extreme south of its land (on the map shown in white with the name of Bank Farm in it) We would like the town boundary to be extended to include this area.	The emerging Local Plan now includes SHLAA site LE102 as a housing allocation, with a consequent amendment to the town boundary to include the site within the town.

Question 6 – Do you have any comments on the proposed town boundary for Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO4394	Mr Andy Frost				Object	Boundary should be redefined to include ALL land within our client's ownership and thereby create a more logical and defensible new urban boundary. [Refer to Supporting Statement attached to Question 1].	<ul style="list-style-type: none"> • See response to POPO3919
PO3913	Ms Mairead Kiely				Object	We note that planning permission (ref. 10/00042/OMAJEI) was granted on Churnet Works, Macclesfield Road, Leek back in 2011. This granted full planning permission for a new superstore, retail units, employment units and a petrol filling station as well as outline permission for residential development. This permission has been part implemented, for example the foodstore has been built out and is now occupied by Sainsbury's. Although the residential permission has now lapsed, other elements of the scheme such as the retail units could still be implemented under this permission. We note that the red line boundary for this planning permission extends beyond the town settlement boundary proposed in Map 4.1 'Leek West'. We also note that the Churnet Works site is not allocated for development. We consider that the town settlement boundary proposed in Map 4.1 should be extended to include the land contained within the Churnet Works planning permission. We also consider that the site should be allocated for mixed use development, having regard to its planning history and ability to meet planning needs. Given its previously proven acceptability we would suggest this allocation should encompass a range of uses including retail, employment and residential (as previously permitted and considered acceptable at this location) but also to include hotel and leisure uses.	<p>Comments noted. The emerging Local Plan includes an amendment to the Leek town boundary to include all that land covered by the original Sainsburys approval SMD/2010/0201.</p> <p>This consent is still extant (with later approvals on site, eg pub) so could still be completed. Alternative schemes for mixed uses arising on the site would be assessed against relevant Local Plan and NPPF Policy.</p>
PO3929	Mr Phil Bamford	Gladman Developments			Object	This submission provides Gladman Development's written representations on the Staffordshire Moorlands Preferred Option Sites and Boundaries Consultation. These representations concern the following matters. Duty to Cooperate Sustainability Appraisal Objectively Assessed Housing Need Development Requirements and Distribution Green Belt Review Preferred Option Sites and Boundaries - Leek. [Refer to 2 submitted attachments to Question 1].	<ul style="list-style-type: none"> • Refer to Council response to Q1 • See response to PO3919 above
PO9365	Mr David & Ros Barnes & Tyrrell				Object	Response form submitted [attached] that objects to proposed town boundary amendment at ADD01.	<ul style="list-style-type: none"> • Refer to response to PO9367 under Question 11 Table

Question 6 – Do you have any comments on the proposed town boundary for Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9111	Mr Robert Barker				Object	<p>I do not believe that it is necessary to extend the town boundary into farmland as there are still many available brownfield sites within the locality. It is also important to note that TOURISM is a significant driver to the local Economy! Therefore the Town Gateway, especially from the PEAK PARK Buxton Road A53, needs rigorous protection from urban sprawl in order to maintain the 'Queen of The Moorlands' identity. The point of entry into Leek from A53 Buxton Road is the most attractive and picturesque and is a key Tourist route. The proposal area, particularly as it approaches the A53 Buxton Road junction with Thorncliffe Road and The Mount, is immediately adjacent to the SPECIAL LANDSCAPE AREA which presumes against intrusive developments in order to protect its Historic Landscape nature. I would personally feel that the Special Landscape Area and environs ought to receive the highest priority in its protection. The designation encompasses the fact that it is 'Special' in nature and cannot therefore be replaced once lost or damaged. There are a number of 'brown' sites within the town which could be very effectively used for housing development. [Question why] for some reason these are not shown on the accompanying Consultation Maps. However from attending a consultation meeting the existence of several sites is a matter of common knowledge along with the fact that these would be "The Preferred Option Housing Sites" in the view of the residents of Leek. The proposal is completely unbalanced as it places virtually all the "housing requirement"[queried as unjustified] along 1 narrow lane at the most Flagship side of Leek renowned for its visual beauty and recreational amenity. Please utilise the "brown sites" and protect Leek's Heritage and inheritance!</p>	<ul style="list-style-type: none"> • See first para response to PO188 • See second para response to PO188 • Note that since adoption of the 2014 Core Strategy, there is no longer a 'special landscape area' designation. • The Council consults with its own Heritage Conservation Officer, and with Heritage England, during Local Plan preparation.
PO9363	Mr and Mrs David and Rosalind Barnes and Tyrrell				Object	Response form submitted [attached] that objects to proposed town boundary amendment at ADD01.	<ul style="list-style-type: none"> • Refer to response to PO9367 under Question 11 Table

Question 6 – Do you have any comments on the proposed town boundary for Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9548	Mr J Grindley				Object	<p>Letter submitted [attached] objecting to proposed town boundary amendment [to the draft shown in 2015 Options consultation] that now includes 'Westwood Field' [LE126A]: Aesthetically the field matches/complements the grazing and mowing fields above Ladderedge Country Park and Longsdon Wood on the opposite side of the Churnet Valley. The field is owned by 12 x 'frontagers' to the field and Bluebell Wood is owned by a ..farm. The frontagers have a right of way to the field access road at all times. Because of steep gradients, access to the wood (if needed) would need to be from its south side. substantial housing development could substantially increase the flooding at the bottom of Ladderedge, River Churnet, Westwood Golf Course. A 65 dwelling development might generate 150 cars etc. This could turn current traffic congestion during school times, into gridlock [on certain streets].</p>	<p>The land described as Westwood Field currently lies within the development boundary of Leek and is unallocated (Blue Bell wood lies in the Green Belt). The emerging Local Plan proposed boundary shows no change at this location. The Council is only proposing Green Belt amendments where exceptional circumstances are considered to apply.</p> <p>The Council uses evidence to justify its 'Preferred' development boundaries. This includes landscape impact evidence and a Green Belt Review. Note that landscape evidence must be weighed against all other relevant evidence when the Council considers boundary amendments. This evidence may also be used in the determination of planning applications. In the event of development proposals upon this site, the Council would need to be satisfied that adequate access to the public highway could be achieved and schemes having significant transport impacts would be assessed against relevant NPPF policy. Major schemes would also need to incorporate appropriate sustainable drainage features.</p>

Question 7: Do you have any comments on the proposed visual and public open spaces for Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Identified open space	Support/Object/General Comment	Consultee Comments	Officer Response
PO382 PO189	Mrs Brenda Pigott Mr John Pigott				Mount Road as an open space	Object General comment	<p>The proposal to build along both sides of Mount Road should be removed as the Mount is a very important open space close to the town centre and is a very popular route for walking, jogging and cycling. It is also the route of the 9 mile circular walk created by SMDC - the Staffordshire Moorlands Walk. Groups of walkers come to Leek in order to walk this rural route. Walking along Mount Road with many new houses obliterating any views and fumes from increased traffic will not encourage this activity. Panoramic views over the centre of Leek and the hills beyond - including one of the highest hills in Cheshire - 500 m high Shuttlingsloe known as the 'Matterhorn of Cheshire'. Also, the Cloud hill which is seen behind Leek towards Congleton/Cheshire. The rare phenomenon of a 'double sunset' on days around midsummers day is viewed by hundreds of people from Mount Road. The Mount is a very important local amenity which the planners have completely underestimated and simply do not understand. A local resident carried out a head count on Sun 8th May between 0700 and 2000 and counted a total of 217 people using the road for recreation : 190 walkers (44 with dogs, 8 with prams), 12 cyclists, 12 joggers and 3 horse riders. These were not in organised groups but simply people enjoying the exercise, the views and the fresh air in a safe and sustainable way – no need to get the car out. If the developments proceed then inevitably Mount Road which is now a country lane would be widened and become a busy estate road and people would not want to use it for recreation.</p>	<p>The public/visual open spaces proposed by the Council are those mapped in the Preferred Options consultation document. The Council's Local Plan policies seek to improve public access to open spaces/recreation generally where this is consistent with other policies.</p> <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes landscape impact evidence [refer to the "Options Sites Assessments" on the Council website]. The most recent 2016 landscape impact study assessed impacts from the Peak Park, and concluded that the various Mount sites exhibited low- through to high- landscape sensitivity; also providing recommendations regarding mitigatory measures. Note that landscape evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p> <p>Development proposals affecting the routes of recognised public rights of way would need to make allowance for them. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to submit transport statements, and provide highways improvements where deemed appropriate).</p>
PO121	Mrs Alison Campion				The Mount	General comment	<p>By building hundreds of new houses in the Mount Road area, views and public spaces will be spoilt, more traffic will be created on an already narrow road. Leave this space alone for walkers and cyclists to enjoy.</p>	<ul style="list-style-type: none"> • See first para response to PO382 • See second para response to PO382 • See third para response to PO382 • Development proposals affecting the routes of recognised public rights of way would need to make allowance for them.

Question 7: Do you have any comments on the proposed visual and public open spaces for Leek?

PO635	Ms Alison Conybeare			General	General comment	The comments related to Leek should be restricted to those more knowledgeable of the area, in the local residents.	Comments noted. The Council considers all comments received during public consultations.
PO696	Mr John Burnett			The Land currently in use by Leek High school above Springfield Road	General comment	Is this really Public Open Space? As far as I'm aware this is land used by the High school and is not available for use by the general public in the same way a public park would be. Listing it as so inaccurately defines the public open space available to the East of the town.	Not all the open spaces marked on the map are accessible to the public and should be indicated as 'open space' rather than 'public open space'.
PO409	Mr David John Allen			General - all	General comment	non- at present	Comments noted.
PO1287	Justin Milward	Woodland Trust		All sites	Support	Support provision of Open Space in the Local Plan. (Further detail in the attached comments).	Support noted.
PO2039	Mrs Taylor	Leek Town Council		Leek Cricket Club	General comment	Not all the areas marked green are "public open spaces" e.g. Leek Cricket Club is a recreational space.	<ul style="list-style-type: none"> • See response to PO696 above
PO2042	Mrs Taylor	Leek Town Council		Ball Haye Green Club	General comment	This site needs to be retained for recreational use.	Comments noted. The Preferred Options map currently displays this site as public open space. All public open space is protected by virtue of Local Plan policies and Section 8 NPPF.
PO2566	Mrs Maggie Taylor	Sport England		All	Object	I note some of the open space designations are formal sports facilities (which is supported) but it is very important that all sports sites are captured otherwise those excluded will have lesser protection. I note that the Football Ground off Orchard Court/Grace Street for example is not designated whereas the cricket club site just to the north is - why? I also note that the playing fields associated with the secondary school are not designated – should they not be? It will be important to clarify what is designated and why (or why not) and to ensure all playing fields are clearly protected (as it is a defined function/use of open space), whether it is in Council ownership or not (Birchhall Playing Fields appears to be included?) so there is a consistent level of protect for all open space, whatever its use. This principle applies across ALL THE PROPOSED PLANS.	The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy. Any inconsistencies will be investigated as part of this updated work.

Question 7: Do you have any comments on the proposed visual and public open spaces for Leek?

PO2861	James Chadwick	Staffordshire County Council			All	Object	In relation to the areas of Open Space identified throughout the site options document it is noted that all school playing fields have been categorised as open space, some in their entirety and others appear to only include certain parts. There is no definition in the plan as to what 'Open Space' constitutes or whether it needs to be accessible to the general public. As the Plan progresses it is unclear what policy restrictions may be imposed to such land. We therefore reserve our position on 'Open Space' at school fields and suggest that further discussion is required on whether the identification of school playing fields as 'Open Space' is required given the protection afforded to playing fields already through National Planning legislation and school premises legislation?	<ul style="list-style-type: none"> • See response to PO2566
PO3916	Ms Linda Tweats	Leek Cricket Club			Leek Cricket Club	Object	On the draft site allocations map the cricket club is shown coloured green i.e. public open space. Strictly speaking this is not the case. The cricket club is owned by its members, though membership is of course open to the general public. However it is privately owned and not in public ownership. Should it therefore be shown on the allocations map as public open space?	<ul style="list-style-type: none"> • See response to PO696

Question 8 Do you have any comments on the Green Belt boundary for Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO190	Mr John Pigott				General comment	The Local Authority is considering the release of Green Belt sites in Biddulph because "the town is heavily constrained by the Green Belt so identification of a suitable site is not straightforward". The same can be said of Leek. Foker Grange and Home Farm on the western side of Leek are Green Belt sites which could be developed. Whilst the Green Belt Review identifies them as being important to the Green Belt the council has to make tough decisions about the location of new development. Foker Grange and Home Farm do not have the high public amenity value of The Mount and would provide balance to the future development of Leek.	Green Belt is a long established designation that serves a number of important functions in separating settlements, and preserving 'openness'. Whilst Councils can allocate within the Green Belt National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). Biddulph differs from Leek in that it is entirely surrounded by Green Belt, whereas Leek is not. Both towns attract a housing requirement pursuant to Policy SS3 of the adopted Core Strategy Spatial Strategy. The Council's landscape evidence considers landscape impacts across both non-Green Belt, and Green Belt land. Note that landscape evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites. Note that Home Farm does not lie within the Green Belt.
PO383	mrs Brenda pigott				Object	The Local Authority is considering the release of Green Belt sites in Biddulph because "the town is heavily constrained by the Green Belt so identification of a suitable site is not straightforward". The same can be said of Leek. The Peak District National Park is only a few miles away from Mount Road so people walking on the Roaches and Ramshaw Rocks looking towards Leek do not want to see housing estates between Morridge ridge and Mount Road ridge. Foker Grange is a Green Belt site which could be developed. It is adjacent to the main Leek to Macclesfield road so a small estate could easily be built there. Whilst the Green Belt Review identifies them as being important to the Green Belt the council has to make tough decisions about the location of new development. Foker Grange does not have the high public amenity value of The Mount and would provide balance to the future development of Leek. We can't have all the houses being built on the East side of Leek.	<ul style="list-style-type: none"> • See response to PO190 <p>The most recent 2016 landscape impact study took into account views from the Peak Park/ eastern approaches to the town, and concluded that the various Mount sites exhibited low- through to high- landscape sensitivity; and provided accompanying recommendations regarding mitigatory measures. Note that landscape evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p>
PO637	Ms Alison Conybeare				Object	The greenbelt boundary should not be altered.	No Green Belt amendments are proposed for Leek.
PO697	Mr John Burnett				General comment	The lack of Green belt definition to the East of Leek Town Boundary severely restricts the notion that this area is beneficial to the community for its open space and leisure uses.	The broad extent of the Green Belt is established nationally (however local authorities can propose at Examination alterations to their boundaries for allocations or minor amendments). The east of Leek has never been covered by Green Belt. Green Belt is a long established designation that serves a number of important functions in

Question 8 Do you have any comments on the Green Belt boundary for Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
							separating settlements, and preserving 'openness'. Note that landscape quality/character, and public access characteristics, are not in themselves 'purposes' of Green Belt laid out in national guidance. However authorities should consider scope for improving access/recreation in the Green Belt. The Council's Local Plan policies seek to improve public access to open spaces/recreation generally where this is consistent with other policies.
PO410	Mr David John Allen				Object	I feel the Greenbelt boundary should be maintained and full advantage taken with regards to infill site, with the relaxation on the overall development boundary	Page 25 of the Preferred Options consultation document sets out the residual housing requirement for Leek to 2031 (pursuant to Policy SS3 of the adopted Core Strategy). The Council must demonstrate that it will fully meet residual housing requirements for Leek to have a sound Local Plan in place. However there is insufficient capacity to meet this need entirely from sites within the Leek town boundary alone resulting in proposed sites both within the urban area, and peripheral "urban extensions". Note that Table 4.1 makes allowance for unanticipated "windfall" development within the town (resulting in a lower residual requirement). The Council would still require exceptional circumstances to justify allocating land in the Green Belt.
PO961	Mr Alistair McLoughlin				Object	Do not build on the Mount. More suitable sites are available.	<ul style="list-style-type: none"> • See response to PO410 • See response to PO190 • See response to PO383
PO4396	Mr Andy Frost	Frost Planning			General comment	Green Belt boundary around Leek should not be altered. Opportunities for urban extensions in non-Green Belt locations should be maximised and prioritised. [Refer to Supporting Statement attached to Question 1].	<p>Comments noted. Note the Preferred Options did not propose any amendments at all to the Green Belt boundary of Leek.</p> <ul style="list-style-type: none"> • See response to PO410 • See response to PO190 • See response to PO383
PO9114	Mr Robert Barker				Object	There are..pockets of greenbelt land (designated such primarily for the purposes of town separation and quite often having no other particular beauty or amenity), which in common with other Towns in the country could be effectively utilised to expand the town boundary with selective use and sensitivity to the environment. This would be better than destroying the areas which are highly valued by the Leek Community for beauty and recreation [at the Mount] and which give the Town of Leek its identity.	<p>Note that landscape quality/character, and public access characteristics, are not in themselves 'purposes' of Green Belt laid out in national guidance. The NPPF allows for consideration of development proposals upon 'brownfield' Green Belt sites.</p> <ul style="list-style-type: none"> • See response to PO383

Question 8 Do you have any comments on the Green Belt boundary for Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9125	Mr Richard Pigott				Object	<p>Letter submitted [attached] objecting to Mount sites: Mount Rd is local amenity LE128 is the most elevated of the sites being considered LE066 is a brownfield site and should be considered ahead of LE128 Concentrating housing allocations on east side of town would raise deliverability problems compared to other areas of town Some western Leek sites in the Green Belt are nevertheless preferable to allocate for housing, than sites at the Mount.</p>	<p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This includes consideration of landscape, highways etc impacts. All proposed sites must also be the subject of sustainability appraisal. A sustainability appraisal report is being published for consultation alongside the Preferred Options Local Plan July 2017. The SA Report considers the economic, social and environmental effects of proposed development site allocations including access to services and facilities.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p> <p>The Council consults with SCC Highways during Local Plan preparation. SCC did not raise any objections to Preferred Options sites LE022/LE127/LE128/LE140/LE142A/LE142B subject to development in this area contributing to the improvement of Mount Road including provision of footways and pedestrian links. Also Kniveden Lane should be brought up to adoptable standard with the implementation of footways. Further junction improvements at Mount Road/Ashbourne Road may also be appropriate. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to submit transport statements, and provide highways improvements where deemed appropriate).</p> <ul style="list-style-type: none"> • See response to PO190 • See response to PO383

Question 8 Do you have any comments on the Green Belt boundary for Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9231	MRS KAREN BARKER				Object	SITES LE142a LE142b LE140 LE128a LE127 OBJECTION I do not believe that it is necessary to extend the town boundary into farmland as there are still many available brownfield sites within the locality. There are also pockets of greenbelt land (designated such primarily for the purposes of town separation and quite often having no other particular beauty or amenity), which in common with other Towns in the country could be effectively utilised to expand the town boundary with selective use and sensitivity to the environment. This would be better than destroying the areas which are highly valued by the Leek Community for beauty and recreation and which give the Town of Leek its identity.	<ul style="list-style-type: none"> • See para response to PO9114

Question 9 Do you have any comments on the proposed mixed-use or employment sites in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Allocation	Support/Object/General Comment	Consultee Comments	Officer Response
PO870 PO461	Mr Steven Hugh Proffitt				ADD09 (Leekbrook)	Object Object	<p>I strongly object to the proposal to include site ADD09 (land off Basford Lane, Leekbrook) in the local plan for employment land/industrial development as...</p> <p>...it be damaging to a beautiful part of the Staffordshire Moorlands countryside and the wildlife habitats contained therein,</p> <p>...given the elevated position of the site, the creation of a hardstanding area of development will greatly contribute to the risk of flash flooding via the brook below and shortly downstream to the new residential development adjacent to the A520 which has been built on the natural flood plain, previously occupied by Joshua Wardles textiles factory. N.B. this area has previous history of flooding.</p> <p>...due to it being outside the existing development boundary for Leekbrook; being adjacent to the ancient heathland and mature woodland of Cheddleton Heath - I believe development would have an adverse impact on the natural wildlife habitats contained within the heathland, and would serve as a visual intrusion into the green open space currently observed on the rise towards Cheddleton Heath, which would be highly visible to travellers along the A520 from Leek;</p> <p>...furthermore access to the site would be highly impracticable due to the narrow road bridge crossing the brook, which sits just above the current industrial estate, on Basford Lane. The bridge is single track and is just wide enough to allow access from an average sized van, it would certainly not accommodate heavy road transport.</p>	<p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes landscape impact evidence, ecological evidence, and a Strategic Flood Risk Assessment for the District.</p> <p>The most recent 2016 landscape impact study concluded the site is of medium landscape sensitivity; it also provided recommendations regarding mitigatory measures including restricted development and building heights on the higher ground.</p> <p>All current Preferred Options sites were subject to Phase I ecological surveys between 2014 and 2016; a 2016 ecology study also considered the scope for 'local wildlife site' (ie.SBI) designation for all of these preferred options. These studies set out ecological evaluations of the sites followed by recommended further surveys/actions in the event of future development. The Council would expect subsequent schemes to take account of this evidence; further Core Strategy Policy NE1 allows for the Council to require ecological mitigatory or compensatory measures where appropriate. The 2016 survey concluded that most of the site (improved grassland) was of 'site level' nature conservation value only; however the perimeter hedgerow habitat was of higher nature conservation importance (and may qualify as a local-level nature designation, subject to further survey). A number of pre-development surveys/actions are also recommended in relation to badgers, bats and birds. Note that ecology evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites. According to the 2006 NERC Act, the Council must in its Planmaking, have regard to the purpose of conserving biodiversity.</p> <p>The SFRA provides an overview of flood risk from all sources across the District, and will be used alongside formal EA</p>

Question 9 Do you have any comments on the proposed mixed-use or employment sites in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Allocation	Support/Object/General Comment	Consultee Comments	Officer Response
								<p>responses regarding proposed allocations. Local Plan Policy will require that, wherever possible, development will promote the reduction of flood risk by the use of sustainable drainage techniques.</p> <p>Note that all evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p> <p>Vehicular access to the site is anticipated via the Dockseys haulage company to the west, onto the A520, not from Basford Lane. The SCC Highways comments to the consultation are based upon this.</p>
PO374	Mr William Battersby	Cheddleton Estates Ltd.			ADD09 (Leekbrook)	Support	I am a Director of the company which owns this site. We support this change of use and will be delighted to support the community in using it to provide employment.	Comments noted.
PO3911						Support	Cheddleton Estates Ltd wish to confirm our agreement to the proposed designation of ADD09, which we own. We would have preferred the land to be designated for housing, and in lieu of this, we would like to renew our previous offer to gift 14.85hectares of heathland in return for residential permission [Letter correspondence with District Council to 2008 attached].	The Council's Spatial Strategy in its emerging Local Plan sets out the more limited scope for expansion in 'smaller villages' such as Leekbrook, given their scale. Therefore it would be inappropriate to pursue the allocation of this 1.67ha site for housing. However the site (in combination with Leek EM2 nearby) is considered appropriate to contribute to a range of employment sites across the Leek Wards to provide choice, responding to the residual employment land requirements for the town to 2031.

Question 9 Do you have any comments on the proposed mixed-use or employment sites in Leek?

ID	Consultee Name	Company Organisation /	Agent Name	Company / Organisation	Allocation	Support/Object/General Comment	Consultee Comments	Officer Response
PO2623	Consultation Service	Natural England			ADD09 (Leekbrook)	General comment	<p>With regard to preferred site ADD 09 please refer to our generic representation on local wildlife Sites and related information. We advise that the Council checks on this site's status accordingly. Our 'priority habitat' records (Ref – Section 41 of the Natural Environment and Rural Communities Act 2006) show the adjoining land to the west and south of this site as a block of deciduous woodland and lowland grassland of good quality. Given the site's close proximity to lowland deciduous woodland the local plan process should seek to ensure that the provisions of policies NE1 Biodiversity and Geological Resources and C3 Green Infrastructure are implemented.</p>	<p>Comments noted. Note this site was the subject of a Phase I survey incorporating LWS Assessment, as part of the Council's 2016 Ecological Study. The site report concludes that:</p> <p><i>“The hedgerow habitat on site was considered of nature conservation value at the local level. Furthermore, there is reasonable potential that it may qualify as an SBI or a BAS dependent on further survey following the hedgerow evaluation and grading system outlined in the Staffordshire SBI guidelines. The improved grassland habitat on site was considered of nature conservation value at the site level only. This habitat is not listed as an important habitat in the Staffordshire SBI guidelines.</i></p> <p><i>Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site significantly supported any notable protected species. No species listed as important in the Staffordshire SBI guidelines were recorded and therefore no part of the site currently qualifies for consideration as an SBI or as a BAS under these criteria. However, badger may use the site and further survey for badger should be undertaken prior to any future development. Similarly, bats may also use the site and bat activity surveys should be undertaken prior to any future development. Mature trees should be further investigated to determine whether they host bat roosts.”</i> In addition, a number of pre-development surveys are recommended.</p> <p>The Council will weigh the ecological evidence against all other relevant evidence when it selects 'preferred sites'. Note that Local Plan policies will set out for any appropriate ecological protection measures across site allocations.</p>
PO2910	James Chadwick	Staffordshire County Council			ADD09 (Leekbrook)	General comment	<p>In Leekbrook site ADD09 should be required to take access off the A520.</p>	<p>Comments noted. The Council anticipates that development would be accessed off the A520 - this expectation may be set out in a site-specific policy.</p>

Question 9 Do you have any comments on the proposed mixed-use or employment sites in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Allocation	Support/Object/General Comment	Consultee Comments	Officer Response
PO3924	Mr John Coxon	Emery Planning Partnership			ADD09 (Leekbrook)	Support	Emery Planning is instructed by Wainhomes (North West) Limited to submit representations to the Preferred Option Site and Boundaries Consultation Booklet. The representations are made specifically with regard to our client's site adjacent to Wardle Gardens, Leekbrook. [Refer to Report attached to Question 1 which also covers this question].	Comments noted.
PO1356	Ms Rosamund Worrall	Heritage England			Broad Area EM2 (Leekbrook)	Object	Map 4.3 Leekbrook (and also Map 4.34 in Rural Areas) - It is not clear how the impact of the proposed LEEK EM2 site on the Grade II* Listed Building Fynneylane Farm and its setting has been assessed. Further information on this is required.	<p>The maps in the consultation booklet are intended to provide summary information only; more detailed consultee responses (concerning heritage etc) are set out on the Council's Site Allocations portal, including within the 'Site Options Assessment' tables.</p> <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes a 2016 landscape and heritage impact study. This concluded that development of this site would not affect the setting of the listed building, and development of the site would be suitable in heritage terms. Note that heritage evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p>
PO2622	Consultation Service	Natural England			Broad Area EM2 (Leekbrook)	General comment	Our previous advice letter dated 14.9.15 refers regarding preferred site allocation EM2. However please refer to our generic representation on local wildlife Sites and related information. We also note that the allocation would overlay a public footpath and refer the Council to our previous advice regarding NPPF para 75 dealing with public rights of way and access. Given the site's close proximity to lowland deciduous woodland the local plan process should seek to ensure that the provisions of policies NE1 Biodiversity and Geological Resources and C3 Green Infrastructure are implemented.	<p>[Refer to response to comment PO2623 above].</p> <p>The site was subject to a Phase I ecological survey in 2014. The site report acknowledges the site's SBI status (and surrounding features etc); and factors this status into subsequent evaluation /conclusions, recommending the site be considered regionally important, and recommending a number of further surveys/actions would be appropriate prior to development.</p> <p>Note that the site was the subject of LWS Assessment in 2017. The study concluded that:</p>

Question 9 Do you have any comments on the proposed mixed-use or employment sites in Leek?

								<p><i>"The site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance."</i> A number of further surveys are recommended to establish SBI status.</p> <p>The Council would ensure development proposals respect the routes of public rights of way; stating this in site allocations policies, where relevant. Note that Policies NE1 and C3 already seek to enhance public access to the countryside (subject to landowner agreement, where relevant).</p> <p>Development proposals affecting the routes of recognised public rights of way would need to make allowance for them.</p> <p>Note there is a resolution to approve outline planning application SMD/2014/0678 in August 2016 (awaiting legal agreement) for the erection of B2 and B8 units on this site.</p>
PO2711	Mr Martin Ross	Environment Agency			Broad Area EM2 (Leekbrook)	General comment	<p>Contrary to our previous advice, a Level 2 SFRA will not be required for Leekbrook EM2. This is due to the size of the site and the fact that any floodplain is unlikely to impact on its deliverability. The watercourse running along the majority of the northern edge will still need to be modelled in detail at the application stage and the site is still subject to the Sequential Test.</p>	<p>Comments noted.</p> <p>Note there is a resolution to approve outline planning application SMD/2014/0678 in August 2016 (awaiting legal agreement) for the erection of B2 and B8 units on this site. This included the submission of an FRA.</p>

Question 9 Do you have any comments on the proposed mixed-use or employment sites in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Allocation	Support/Object/General Comment	Consultee Comments	Officer Response
PO2885	James Chadwick	Staffordshire County Council			Broad Area EM2 (Leekbrook)	General comment	Leek EM2 is mainly within a Site of Biological Importance. This SBI supports several habitats of principal importance. The site has added value due to the diversity of habitats. In regard of NPPF biodiversity policy this site should not be included as a preferred option. If this site is taken forward the Local Plan should include policy requirement for off-site mitigation meeting Defra biodiversity offsetting requirements with replacement habitats demonstrating similar ecological connectivity.	<ul style="list-style-type: none"> • See response PO2622 above <p>Note that ecological evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p> <p>Note there is a resolution to approve outline planning application SMD/2014/0678 in August 2016 (awaiting legal agreement) for the erection of B2 and B8 units on this site. The committee report refers to the applicant's proposed ecological compensatory measures and submitted Habitat Management Plan in response to Pol NE1; which were material factors in determination, as were the area's prior identification as a 'broad location for employment' in the Core Strategy, and the District's general residual employment and requirements for Leek.</p> <p>For the above reasons the site is proposed as an employment allocation in the emerging Local Plan. The site-specific policy will require schemes include appropriate ecological impact mitigation/compensation measures.</p>
PO3923	Mr John Coxon	Emery Planning Partnership			Broad Area EM2 (Leekbrook)	Support	Emery Planning is instructed by Wainhomes (North West) Limited to submit representations to the Preferred Option Site and Boundaries Consultation Booklet. The representations are made specifically with regard to our client's site adjacent to Wardle Gardens, Leekbrook. [Refer to Report attached to Question 1 which also covers this question].	Comments noted.
PO698	Mr John Burnett				LE150 (Newtown House)	Support	This area appears suitable for this purpose.	Comments noted.
PO906	Mrs Tracy McMullen				LE150 (Newtown House)	Object	This is indicated as being a mixed-use or employment site yet has a housing allocation of 180 dwellings. The congestion of traffic on this road with the Co-op head office and All Saints school is very heavy. Even crossing the road at a non peak time is difficult, impossible in the rush hours. Add to that another 180 houses?? What are the proposals to address this and	<p>The emerging Local Plan anticipates that around 1.5ha of the site is anticipated for employment use; the remaining site area could accommodate approximately 179 dwellings, based on realistic housing density assumptions.</p> <p>The Council consults SCC Highways during every stage of Local Plan</p>

Question 9 Do you have any comments on the proposed mixed-use or employment sites in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Allocation	Support/Object/General Comment	Consultee Comments	Officer Response
							<p>why is it down as mixed use when the plan says 179 dwellings?</p>	<p>preparation; you can view their responses over proposed allocations on the Council's Site Allocations portal, including the 'Site Options Assessment' tables.</p> <p>SCC Highways did not object to mixed use development of this site subject to upgrading of access road to adoptable standard, submission of transport assessment, and further pedestrian/cycle links. In the event of development proposals upon this site, the Council would need to be satisfied that adequate and safe access to the public highway could be achieved and schemes having significant transport impacts would be assessed against relevant NPPF policy (including scope for contributions for highway improvements, where appropriate).</p>

Question 9 Do you have any comments on the proposed mixed-use or employment sites in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Allocation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1296	Justin Milward	Woodland Trust			LE150 (Newtown House)	Object	<p>(Summary - please see attached document for full version) ASNW - Ballington Wood at Grid Ref SJ989553 is adjacent. We are concerned that proposed development adjacent or in proximity to the wood will have negative impacts on it, causing damage and potential loss. Ancient woodland is defined as an irreplaceable natural resource that has remained constantly wooded since at least AD1600. The length at which ancient woodland takes to develop and evolve (centuries, even millennia), coupled with the vital links it creates between plants, animals and soils accentuate its irreplaceable status. The varied and unique habitats ancient woodland sites provide for many of the UK's most important and threatened fauna and flora species cannot be re-created and cannot afford to be lost. With Staffordshire Moorlands District Council showing a valuable above average ancient woodland resource at 3.09% of land area compared to a UK average of 2.5%, it is critical that this irreplaceable natural resource is absolutely protected in this Document and highlighted appropriately. Development impacts on ancient woodland in a number of ways: Chemically through acidification, eutrophication and toxic pollution, Disturbance by noise, light, trampling and other human activity, Fragmentation as a result of the destruction of adjacent semi-natural habitats, Development provides a source of non-native plants and aids their colonisation, Any effect of development can impact cumulatively on ancient woodland - this is much more damaging than individual effects. We would recommend a buffer zone of at least 50 metres of semi-natural vegetation would be required to protect the woodland from the change in land use on the site for each allocation. This 50m should be included as part of the policy for each site.</p>	<p>According to the 2006 NERC Act, the Council must in its Planmaking, have regard to the purpose of conserving biodiversity.</p> <p>The site was subject to a Phase I ecological survey in 2014. The site report acknowledges the site's proximity to this ancient woodland (and Ladydale SBI etc); and factors this into subsequent evaluation/conclusions, recommending a number of further surveys/actions would be appropriate prior to development, including the creation of a buffer zone with the woodland given its AWI status.</p> <p>Also the Council's 2016 ecology study considers the scope for 'local wildlife site' (ie.SBI) designation for all preferred option sites, concluding that LE150 "<i>has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at district level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance, and the potential to support a population of reptiles and badgers.</i>"</p> <p>Development proposals will need to consider the findings of these reports and will be assessed against relevant Local Plan and NPPF ecological policy including Pol NE1. Note that the emerging Local Plan will contain policies specific to tree/foliage protection and already cover ancient woodland protection.</p> <p>The site-specific policy fro LE150 will require schemes incorporate an eastern buffer.</p>
PO2043	Mrs Taylor	Leek Town Council			LE150 (Newtown House)	Object	<p>It's not an industrial location and the area would be spoilt if used for industrial purposes - it should be used for housing only.</p>	<p>Leek has residual general employment land requirement (of around 8ha to 2031) and the Council must demonstrate that it will fully meet this to have a sound Local Plan in place.</p>

Question 9 Do you have any comments on the proposed mixed-use or employment sites in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Allocation	Support/Object/General Comment	Consultee Comments	Officer Response
								General employment purposes encompasses light industry/officing through to general industry and warehousing. Government Policy promotes mixed land uses and sustainable development patterns, subject to proper consideration of amenity impacts (such as noise). The site will attract a dedicated Local Plan policy, and subsequent proposals will be assessed this and the NPPF. Strategic Policy SS4 in the emerging Local Plan provides an indication of the split between office and other industrial land requirements generally.
PO2572	Mrs Maggie Taylor	Sport England			LE150 (Newtown House)	Object	This mixed use allocation will involve the loss of tennis courts. This needs to be justified in terms of NPPF Par 74 or the tennis courts replaced by the developer and required by supporting text in the allocations document.	The tennis courts were not included on the map as open space as they were a private facility associated with the nearby office complex. They are now disused and in poor condition.
PO2884	James Chadwick	Staffordshire County Council			LE150 (Newtown House)	General comment	LE150 is immediately adjacent to a Site of Biological Importance which is also Ancient Woodland and supports a habitat of principal importance. Appropriate layout and design will be required to avoid impacts on this woodland.	<ul style="list-style-type: none"> • See response to PO1296
PO3927	Mr Jon Power				LE150 (Newtown House)	Support	HOW Planning has been instructed by the Co-operative Bank to submit representations to the Preferred Options in relation to its land ownership at Newton House in Leek (Draft Site Reference: LE150). This submission seeks to promote the exceptional opportunity at Newton House, a highly sustainable brownfield site that is suitable for a residential-led mix of uses; and to provide detailed information to the Council which can be accurately reflected in the emerging Local Plan. [The following 4 attachments are submitted: A completed Preferred Options Sites and Development Boundaries Consultation Response Form A summary letter which outlines the basis for these representations A Development Statement (prepared by HOW Planning and Masterplanners 3DReid) that fully demonstrates the development capacity of land at Newton House and the exceptional opportunity it presents to utilise a site that is suitable,	<p>Support and attachments noted.</p> <p>The emerging Local Plan will contain a site-specific policy for LE150 which will provide for at least 1.5ha employment land alongside housing land; and will require incorporation of eastern wildlife buffer.</p>

Question 9 Do you have any comments on the proposed mixed-use or employment sites in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Allocation	Support/Object/General Comment	Consultee Comments	Officer Response
							available and deliverable for a mix of uses An executive summary of an Employment Market Demand Review (undertaken by Cushman and Wakefield) which assesses the redevelopment potential of the site in terms of suitable land uses (bearing in mind its historic use for employment purposes), taking into account market considerations and supply and demand factors.	
PO3933	Mr Mike O Brien	WYG			LE150 (Newtown House)	General comment	[Refer to submitted Representations Report attached to Question 1 which states]: This is a prominent existing employment site located within a viable employment location and the site is considered to be more appropriate for employment expansion than for housing. Additionally, the development of the agricultural land to the south of Newton House would result in the merging of Leek with Birchall to the south. [Report questions the stated housing yield/density on this site; and the %age split between housing and employment uses]. The over-optimistic density is likely to result in further under delivery of housing in Leek and across the district as a whole, further increasing the shortfall.	Leek has both residual housing- and general employment- land requirements and the Council must demonstrate that it will fully meet these to have a sound Local Plan in place. Government Policy promotes mixed land uses, subject to proper consideration of amenity impacts. The site only encompasses curtilage to Newton House, so is not agricultural land, and already falls within the town development boundary (as does Birchall). The housing yield is based on a 34.1/ha density. However the yield in the emerging Local Plan is intended as a guide and future proposals must have regard to landscape (and other) evidence – the Council's 2016 landscape impact study concluded that the site is of low landscape sensitivity however the high point in the SE of the site should not be developed. The Council will also require the incorporation of eastern wildlife buffer within schemes. The Council must demonstrate to an inspector that the sites contained in the Local Plan are likely to come forward and viability is a key issue.
PO411	Mr David John Allen				LE235 (Cornhill)	Object	Better all employment natural extension to Leek Brook and Barnfield areas.	Leek has a residual general employment land requirement (of around 8ha to 2031) and the Council must demonstrate that it will fully meet this to have a sound Local Plan in place. Whilst the Council is proposing an allocation at Leekbrook (Leek EM2) it is considered more appropriate to 'spread' provision for the town across the Leek wards (along good road links) to better serve the market. Also LE150 would benefit from proximity to a southern link road at Cornhill.

Question 9 Do you have any comments on the proposed mixed-use or employment sites in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Allocation	Support/Object/General Comment	Consultee Comments	Officer Response
PO2583	Consultation Service	Natural England			LE235 (Cornhill)	General comment	Natural England notes the proposed preferred site for allocation in Leek. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.	The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.
PO2900	James Chadwick	Staffordshire County Council			LE235 (Cornhill)	General comment	Site LE235 has no obvious access route that can be determined from the plan. This should not be through the existing residential streets.	SCC Highways advise that access to the site should (whether or not via link road) be onto the existing roundabout junction onto A520, not via Sandon Street. Connectivity measures for pedestrians and cyclists into the town centre may also be appropriate. The 2016 Council Masterplan for the site similarly shows vehicular access onto this roundabout only.
PO2883	James Chadwick	Staffordshire County Council			LE235 (Cornhill)	General comment	LE235 includes a Biodiversity Alert Site supporting a habitat of principal importance. Off-site mitigation of loss of this habitat would be required to meet NPPF biodiversity policy guidance.	The Council's Core Strategy Policy NE1 (Biodiversity and Geological Resources) sets out the circumstances when mitigatory or compensatory measures would be required for development proposals affecting regional/local designated sites. The Council commissioned ecological consultants in 2016 to carry out a detailed phase I ecological survey for the Cornhill site, including LWS assessment of the western BAS. It concluded that connecting habitat should be maintained as much as possible along the southern and western boundaries of LE235; and that the BAS area continues to support diverse grassland of sufficient value to qualify as an SBI. Therefore

Question 9 Do you have any comments on the proposed mixed-use or employment sites in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Allocation	Support/Object/General Comment	Consultee Comments	Officer Response
								<p>compensation for development of the BAS should be made (alternative habitat area). The study also made recommendations for further actions/survey work in the event of future development.</p> <p>The site-specific policy in the emerging Local Plan will require that appropriate mitigatory/compensatory measures apply to development of the BAS. Proposals would also have to conform to the Biodiversity and Geological Resources policy in the emerging Local Plan, Cornhill masterplan, and ecological report for the site.</p>

Question 10 Do you have any comments on the proposed housing allocation ADD01 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO77	MR DARREN HOOLEY				Support	This site is ideally situated next to new and existing housing and is in a sustainable location, a short walk from Leek town centre and less than 200m from a bus stop. Development of this site will ease the pressure to build on more sensitive sites. Staffordshire highways have been consulted and raise no issues with the development of this site.	Support from the owner of the site noted.
PO1424	Mrs A Williams				Support	This site is ideal for both the school expansion and a new housing development. In addition the development of this site would reduce pressure to build on more sensitive sites elsewhere. The site is less than 200 metres from a bus stop and also a very short walk from the amenities of Leek which would restrict the need/use of vehicles.	<p>Comments noted. The Council considers the sustainability/accessibility of all potential housing sites. A sustainability appraisal report is being published for consultation alongside the Preferred Options Local Plan July 2017. The SA Report considers the economic, social and environmental effects of proposed development site allocations including access to services and facilities.</p> <p>If additional middle school space within Leek is required it is considered this site could be suitable to expand the existing Churnet View Middle School.</p> <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes landscape impact evidence and other studies. The Council must balance all relevant evidence when deciding over preferred allocations.</p>

<p>PO936 6</p>	<p>Mr David & Ros Barnes & Tyrrell</p>				<p>Object</p>	<p>Response form submitted [attached] that objects to proposed housing allocation at ADD01: access via Ball Hays Road already full to capacity any further development would worsen traffic levels The re-drafting of the town boundary to encompass ADD01 is taking away more greenfield site from the town perimeter, an unacceptable encroachment on public countryside there is a right of way to enable access for agricultural vehicles and livestock which runs across ADD01 from the track to Wardle Barn Farm to land owned by Horsecroft Farm. Question how will vehicles access land associated with Horsecroft Farm Nightingale Estate mostly unoccupied. This questions the need for further development in this area, particularly when open countryside is being used instead of the many brownfield sites.</p>	<p>The Council consults SCC Highways during every stage of Local Plan preparation; you can view their responses over proposed allocations on the Council's Site Allocations portal, including the 'Site Options Assessment' tables. They raise no objection to allocation of this site. In the event of development proposals upon this site, the Council would need to be satisfied that adequate and safe access to the public highway could be achieved and schemes having significant transport impacts would be assessed against relevant NPPF policy (including scope for contributions for highway improvements, where appropriate).</p> <p>The Council must demonstrate that it will fully meet residual housing (and education) requirements for Leek to have a sound Local Plan in place. However this requirement does not have to be met 100% from land allocations – unanticipated development of other urban brownfield/greenfield sites counts too – the Local Plan explains how assumptions about future windfall housing are factored in (resulting in a lower requirement). However there is insufficient capacity to meet this requirement entirely from sites within the Leek town boundary alone resulting in proposed sites both within the urban area, and greenfield peripheral “urban extensions”. The Council would ensure development proposals respect the routes of public rights of way; stating this in site allocations policies, where relevant.</p> <p>Local Plan Policy T2 supports and promotes the development of a network of safe walking, horse riding and cycling routes, linking communities and recreational/tourist areas; and requires that all legally recognised public rights of way affected by development are protected (or diverted where necessary) and, where possible, enhanced.</p>
--------------------	--	--	--	--	---------------	--	---

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO115	Mrs Alison Campion				Object	No reason for new houses on green space that should be available for all to enjoy.	<p>The Council must demonstrate that it will fully meet residual housing (and education) requirements for Leek to have a sound Local Plan in place. However this requirement does not have to be met 100% from land allocations – unanticipated development of other urban brownfield/greenfield sites counts too – The emerging Local Plan explains how assumptions about future windfall housing have been factored in (resulting in a lower requirement). However there is insufficient capacity to meet this requirement entirely from sites within the Leek town boundary alone resulting in proposed sites both within the urban area, and greenfield peripheral “urban extensions”. The Council uses evidence to justify its selection of ‘Preferred’ allocation sites from wider sites including landscape impact evidence). The Council must balance all relevant evidence when deciding over preferred allocations.</p> <p>The public/visual open spaces proposed by the Council are those mapped in the emerging Local Plan. Local Plan policies seek to improve public access to open spaces/recreation generally where this is consistent with other policies. Note there is no automatic public right to cross privately owned land beyond public rights of way.</p> <p>The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy. Any inconsistencies will be investigated as part of this updated work.</p>
PO1679	Mr N A Brundrett				Object	I am writing to protest against the latest version of the site allocation plan for the SMDC. The site references of particular interest are: LE022, LE127, LE128a, LE140, LE142A, LE142B. The grounds for that are:	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access <p>The Council consults with SCC Education during Local Plan preparation, and SCC have indicated a need for additional first- and middle- school land provision in Leek resulting from the town’s development requirements. These are laid out in the emerging Local Plan.</p>
PO1673	MRS A Staton				Loss of important local amenity – The Mount is a very important open space close to the town.		
PO1649	Mrs G Webster				Visual impact – restrict important skyline and further afield. The proposed sites are near or run on particularly at night with street lighting.		
PO1643	Mrs J Lownds						

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1638	Mr W Johnson					Impact for infrastructure – primary schools in particular (Leek 1 st school and Beresford Memorial School) will struggle to keep up demand and the situation where some children already have to school in the west of leek will become more common.	<p>The Council uses evidence to justify its selection of ‘Preferred’ allocation sites from wider sites. This includes landscape impact evidence. The most recent 2016 landscape impact study assessed impacts from the Peak Park, and concluded that the various Mount sites exhibited low-through to high- landscape sensitivity; also providing recommendations regarding mitigatory measures. Site LE022: the site fits well within the existing settlement pattern, as it is adjacent to existing development and enclosed by these tree belts to the south. Development of the site could potentially improve the approach to Leek on Ashbourne Road, as it could screen existing views of the service station to the north. <i>Site is of low landscape sensitivity.</i> Note that landscape evidence must be weighed against all other relevant evidence when the Council selects ‘Preferred’ sites.</p> <p>Issues such as external lighting in schemes can be controlled by the Council’s amenity policies. Streetlighting is a matter controlled by SCC Highways.</p> <p>Development proposals affecting the routes of recognised public rights of way would need to make allowance for them.</p> <p>The Council consults with SCC Highways during Local Plan preparation. SCC did not raise any objections to Preferred Options sites LE022/LE127/LE128/LE140/LE142A/LE142B subject to development in this area contributing to the improvement of Mount Road including provision of footways and pedestrian links. Also Kniveden Lane should be brought up to adoptable standard with the implementation of footways. Further junction improvements at Mount Road/Ashbourne Road may also be appropriate. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to</p>
PO1667	Mr S Panek						
PO1661	Mr A Panek					Mount Road is a route of Staffordshire Moorlands Walk a very popular route for Leisure activities such as running, cycling and walking.	
PO1655	Miss J Panek					High quality Landscape – unsympathetic to landscape and the character and quality of the area. Urbanisation of the country lane that is mount road – if all 6 developments proceed then the 500 houses would be constructed.	
PO4766	Mrs A Lomas					Mount Road would be linking the Ashbourne and Buxton Roads. The spatial distribution of the proposed access sites across leek is unbalance – there will not be sufficient demand to build all of these houses on one side of the town so the council will not meet its housing needs in any event.	
PO4755	Mr & Mrs P & J Whitehurst					The Mount is, and has been a great source of pleasure for many people over years. It needs to stay that way in order that the future generations have as much enjoyment out of this as our generation has.	
PO4750	Miss L Whitehurst						

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
							<p>provide highways improvements where deemed appropriate).</p> <p>The Council is undertaking Local Plan viability work which will consider the viability of preferred option sites.</p>
PO1746	Mr Anthony Clark				Object	<p>LE142b, le142a, le140, Le128a, Le022, Le127 I write to object to the proposal to all the building of housed along mount road as set out in the preferred options doc. My 2 main objections are based on the implications for the environment and the traffic.</p> <p>Environment – For generations Mount Road has been a favourite walking/cycling/horse riding route for many residents of Leek. It is easily accessible (not requiring a car to reach it) and is quiet safe place by way which can be used by all people of all ages in all weathers. The major attraction is walkers are the outstanding vista the road provides both town and county. The proposed building at the north would destroy the turn the road into a noisy, busy thoroughfare, that would be unsafe and unpleasant for walkers and all over leisure users. The proposed housing at the southern end of the road would mean the views of the town would be lost. At a time when all our members of society are being encouraged to take more exercise the destruction of the mount is free, natural gym, seems very short sighted. Immediate area Mount road is not a wide enough area to safely take a major increase in traffic. The existing access points to this area off Buxton Road and Ashbourne Road are adequate for the present level of traffic but are wholly inadequate and dangerous for the high volume of vehicles. If as is most likely, Kniveden Lane was upgraded at its top end to allow access by vehicles the consequences for its junction with Ashbourne Road causes minimal amount of problems. An increase in traffic will queues will lead to frustration and rash decisions by drivers. This in turn would lead to calls for the removal of the trees and the destruction of a wonderful entrance to the town. Town Residents living in the proposed housing development will need to work and shop. Where will they go to do these activities? Traffic The consequences of the traffic of building many houses both in the immediate area and the town as whole will be very marked. Work Very few work in Buxton or Ashbourne which re easily accessible from the mount. The vast majority work in the town centre, the barn field's industrial estate or on Cheadle road. Those commuting out of the town centre will be heading mostly to stoke Macclesfield/Manchester. All these people will have to drive through the town centre. One look at the map would tell anyone that the major building works to the east of leek will cause major traffic problems. If building must take place on the mount, though I doubt there is a need, the least environmentally damaging site LE142b and LE140. Is there not a possibility of the building on the site existing site of Kniveden Hall (which is screened of by</p>	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access <p>The Council's emerging Local Plan already contains a policy (T2) protecting existing railway lines from development; and supporting recreational re-use etc. The Mount does not contain any such routes.</p> <p>The Council consults with SCC Highways during Local Plan preparation. SCC did not raise any objections to Preferred Options sites LE022/LE127/LE128/LE140/LE142A/LE142B subject to development in this area contributing to the improvement of Mount Road including provision of footways and pedestrian links. Also Kniveden Lane should be brought up to adoptable standard with the implementation of footways. Further junction improvements at Mount Road/Ashbourne Road may also be appropriate. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to provide highways improvements where deemed appropriate).</p> <p>The Preferred Options also set out the Council's proposals for additional retail floorspace, and employment land across the District, where there is an identified need for these.</p> <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes landscape impact evidence and a Green Belt Review. The western edge of Leek is covered by Green Belt (requiring more onerous justification to allocate compared</p>

						trees) and the old Social Services building? These sites would be the least invasive environmentally but would still generate major traffic problems both locally and still generate a lot more traffic throughout the town. In 2006 New York took the far sighted decision to turn a disused elevated railway in a linear park (the high lane). Would that Leek had planners and leader of similar vision to develop mount road into a high lane for the benefit all off the community	<p>to non-Green Belt land). The most recent 2016 landscape impact study concluded that the various Mount sites exhibited low-through to high- landscape sensitivity; it also provided recommendations regarding mitigatory measures. They concluded Site LE066: is located beyond the ridge of Mount Road, which currently screens views of Leek from the PDNP. The woodland within the site provides screening of existing development within Leek. Development within the site would be visually prominent and could potentially affect the setting of the PDNP. Site is of high landscape sensitivity. Note that landscape and Green Belt evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p> <ul style="list-style-type: none"> Note that Kniveden Hall LE066, is included as a residential allocation in the Local Plan.
PO1600	Mrs J Smith				Object	I wish to firmly object to any housing development on the mount as this is a natural beauty spot with open views into the countryside and it should need to be protected	<ul style="list-style-type: none"> See para response to PO115 about Leek housing requirements and windfall allowance <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes landscape impact evidence. PO4824	Mrs L Scragg				Object	I would like for to make it known that I oppose the above on numerous grounds. The Mount in Leek has always been somewhere for the people of Leek to walk, cycle, jog, ride around not just people up end of the Town but people from all areas, young and old and in-between. The views, the Countryside is there for all to enjoy and appreciate, and we do. The road is not big enough now for all the extra traffic that is using it never mind more homes and a school. The Government wants to be healthier, do more exercise, get out and move, where will the joggers, cyclist go? If you sat up there for 24hours you would understand how used The Mount is used for recreation, pleasure and socializing, it's a free beautiful gymnasium – its where the children go to see their 1 st lamb or donkey walkers go to remember their youth and reflect on their lives, it's a place that puts lives into prospective and brings the troubled some peace. Please let we and our children's children keep the mount	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access • See para response to P1600 about landscape evidence • See para response to PO1746 about highways
PO9161	Mrs Kath Fernyhough				Object	Please note that this email is an objection to the following site references regarding the development of Mount Road Leek., LE142b, LE142a, LE140, LE128a, LE127, LE022 We are residents of Kniveden Lane leek, and so we feel that we are well qualified to tell you why this development would be so disastrous for Leek. The Mount is an area of natural beauty which is used every single day of the year, by walkers, joggers, sightseers, cyclists, and people who enjoy it just for the sheer pleasure of the calm, peaceful area it provides us with. It is used by our senior citizens, who use the Mount as a daily walk to help keep them fit, and they enjoy sitting on one of the benches that have been left by the people of Leek for the people of Leek, to sit and chat or pass the time of day with other walkers. Good for the body and soul. It is an area that we, our parents, grandparents and children have enjoyed for many years, and if this development goes ahead our grandchildren and future generations will be denied this. It is an area of natural beauty that is home to a wide selection of wildlife. From hearing the owls hooting late evening and into the night, to the woodpeckers tapping away in the woods. From the bats swooping past in search of food to the kestrels that hover over the ground looking for their next meal. And the home of badgers and foxes. To name but a few. If this development goes ahead the homes of these beautiful animals and birds will be lost. Another loss for future generations and the townspeople of Leek, who you are supposed to represent the views of, so please take the time to read this and understand how passionate the people of Leek are about our beautiful green open space. As well as the above losses, the development will cause many problems. Namely access to and from Mount road. If planning permission is granted for all these new homes, imagine how many extra cars, delivery vans, school buses and refuse collectors will have to use Mount Road. If in excess of 400 homes are built, that will mean that there will probably be in excess of 800 extra cars on a daily basis. Mount road can not deal with this.	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access • See para response to P1600 about landscape evidence <p>Note that none of the Mount sites falls within the Green Belt, whereas the western edge of Leek has Green Belt status. Whilst Councils can allocate within the Green Belt National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). The Council recently completed a Green Belt Review which assessed the suitability for retention of all areas of Green Belt in the District, against the five Green Belt 'purposes' set out in the NPPF. This will be used by the Council alongside other evidence inprogressing its Local Plan. The NPPF also allows for consideration of development proposals that would represent 'limited infilling', or in some cases redevelopment of 'brownfield' sites in the Green Belt.</p> <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites, including ecological evidence: The Mount sites LE022/ LE127/ LE128/ LE140/ LE142A/ LE142B were subject to a Phase I ecological survey in 2014 and a later 2017 ecology study</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>Our worries are as follows :- The exit from Mount road onto Buxton Road goes straight out into a 40mph area, opposite another junction with Novi Lane. The exit and entry from Ashbourne Road is even worse. To exit from the Mount onto Ashbourne Road you again have to exit into a 40mph area If you want to travel to Ashbourne you have to negotiate a 30% bend onto a very busy road If you want to exit Mount Road onto Ashbourne Road and travel down into town, you still have to join the traffic that is traveling at speed around Lowe Hill bends. This plan is dangerous, foolhardy and beyond belief. As the majority of people who will purchase property on Mount road will work in Stoke on Trent or Macclesfield, this will bring even more traffic that has to negotiate the town centre, which is often gridlocked now, let alone with a further 800 cars a day travelling through Leek town centre. The only other access to Mount Road is from Kniveden Lane, via the unadopted road at the top of the lane. If this road is adopted to improve access onto the Mount, Kniveden Lane will become a rat run, along with Moorland Road. And it will not only be used by the new developments on the Mount, but by the estate accessed from Novi Lane, known as the Haregate estate. Kniveden Lane and Moorland road are residential roads in a residential area, and have not been built for vast amounts of traffic. The noise and level of traffic if this should happen would be very detrimental to a beautiful residential area, not to mention the dangers of traffic moving at speed to residents. Also the exit from Kniveden Lane is notoriously difficult due to the trees which line both sides of the junction reducing visibility to less than 50 yards in either direction. What will you do then, cut down the trees to improve visibility and in the process removing more natural vegetation along with the fields on Mount Road that you are proposing to develop. As an alternative site, why do you not look at Macclesfield Road, the area around Foker Grange. Or develop some of the derelict mills that are lying empty and are nothing but eyesores. This way you would rid the area of the derelict buildings and build new more pleasing structures. We ask you to do the job you were voted in to do, which is to represent the views of the people of Leek.</p>	<p>considered the scope for 'local wildlife site' (ie.SBI) designation for all preferred option sites. These studies set out evaluations of the sites followed by recommended further surveys/actions in the event of future development. The Council would expect subsequent schemes to take account of this evidence; further Policy NE1 allows for the Council to require ecological mitigatory or compensatory measures where appropriate. Site LE022 was deemed mostly low biodiversity value overall in terms of the species poor grassland area but has some fairly biodiverse areas connected by hedgerows to the south and north [Some predevelopment species surveys recommended]. Note that ecology evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p> <p>Note that landscape, ecology and Green Belt evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p> <ul style="list-style-type: none"> • See para response to PO1746 about highways <p>The Preferred Options also set out the Council's proposals for additional retail floorspace, and employment land across the District, where there is an identified need for these. PO9076	Mr Simon Tansley				Object	I am registering my objection to the leek plan proposals for building anywhere along the mount (le 142a,b,140,128a,022,127. To destroy this public amenity would be an outrageous and nigh on irreparable act of vandalism. Any one who is even considering this to be a way forwards for leek town should walk from ashbourne road to buxton road to see precisely what we would lose in terms of beauty and nature. This is an asset that Leek should be celebrating not destroying.	<ul style="list-style-type: none"> • See para response to PO115 about Leek housing requirements and windfall allowance • See para response to PO115 about open spaces and countryside access • See para response to P1600 about landscape evidence • See para response to PO9161 about western Green Belt
PO9085	Mr Simon Halliday	Eclipse Broadcast Ltd			Object	I'm writing to you to let you know about my concerns for the proposed house building scheme. I live [near] LE022, a small field which is earmarked for development. Our house is a little strange in that we only have a small front garden, and no windows on the rear, meaning our only outlook is on this field, which provides us with some privacy and a buffer from the main Ashbourne road. We derive a great deal of pleasure from our view, we also spend a lot of time watching birds in our garden, a large proportion of which live in the trees bordering the field. Theres also a few goats and pigs in the field, which are very popular with all the local residents, every day there are people feeding them, looking at them and bringing children to see them, my partner in particular has a great affinity with them, treating them like pets. We moved to this house from Ball Green where we were living in an estate, and have really enjoyed the quiet country aspect to the location. Another aspect to this is the top of Ashbourne Road where the field entrance is, is where the speed limit reduces from 50 to 30, meaning this is a fast section of road as cars either accelerate towards the 50 sign, or are still travelling at speed past the field. If this site is developed, it will make this section even more dangerous. If this site is developed, it means we will lose our privacy and our house/garden will be completely overlooked, we lose our view, noise levels will increase and the animals will have to either be moved or put down. We feel this will completely destroy our quality of life. [Photograph submitted showing the view out of rear garden to LE022].	<p>The Council's design and amenity Policies and standards will be applied to subsequent planning schemes across allocated sites.</p> <ul style="list-style-type: none"> • See para response to PO9161 on ecology evidence <p>The ecological evidence deemed LE022 to be of 'local' importance only, and of low biodiversity value.</p> <ul style="list-style-type: none"> • See para response to PO1746 about highways

PO9129	Mr Richard Harding				Object	<p>It is shocking to think that a much valued area of Leek, enjoyed by many thousands of people each year that gives stunning views over many hundreds of acres of Moorland, is a valued place for recreation by the people to walk, hike, cycle, enjoy or just to rest with the freedom of a tranquil setting over the land of the Moorlands will be destroyed forever and what for, the offer of cash to the Council for each new house to be built to be spent by the Council that we all know will be wasted in ways only Councils inimitably can do whilst the result will be a beauty spot for Leek people will be destroyed forever. The Council can sit back and think the money was worth it yet they sit in splendid isolation allowing the areas they are elected to protect be destroyed. I wonder how the local and Staffs Council can think that the huge increase in housing is necessary bearing in mind that the shameful destruction of a much loved part of Leek will be replaced by huge housing estates on The Mount making it appear like a mini version of the Berlin Wall. I regularly see hundreds of people on weekends and on summer days, walking, dog walking, jogging and horse riding along Mount Road and if these awful plans are put in place The Mount will be a danger to all road users and will take on an ugly factor that is part and parcel of building on rural fields loved by so many people and all imposed without once allowing the voters of Leek the change to have their say on the planning issues that have secretly been imposed. Where is the democratic right of the people of Leek in this issue? Sold out to building firms who look on greedily at the profits they can make with help from a submissive Council who dare not fight for Leek people. It is worrying is that all the planning proposals for the Leek Moorlands were taken in secrecy denying people of the Moorland the chance to put forward their views and objections for all these houses to be built without ever once considering that there is not sufficient employment in the town to employ even 1 in 100 of people who might live in these imposed properties and there clearly seems to be a total lack of schools to educate the huge increase in children and a lack of Health Care provision in respect to GP services and hospital care for the area. There is also the huge impact on the roads and the congestion that is already a great problem in Leek. It is as if the Council is blind or inept at seeing the problems that all these extra houses will cause but it seems that everything will be decided in the same manner as the destruction of the old town centre round about we were informed would ease traffic but contrary to all Council ideas the reverse is true. I cannot have any faith in a system that has denied us the vote on these extra 6000 houses or that the much loved Mount will be destroyed in the same cavalier and unthinking way as many planning issues have been allowed to go ahead even when so many Leek people do not want or need these homes to destroy The Mount. I therefore wish to state that I am against the building on any land along Mount Road AKA The Mount, so please register my objection.</p>	<ul style="list-style-type: none"> • See para response to PO115 about Leek housing requirements and windfall allowance • See para response to PO115 about open spaces and countryside access <p>All Planning Authorities are eligible to receive New Homes Bonus which was introduced by the Government to reflect and incentivise housing growth in their areas. It is based on the amount of extra Council Tax revenue raised for new homes and is payable annually over a 6 year period.</p> <ul style="list-style-type: none"> • See para response to P1600 about landscape evidence <p>New development is the main way to deliver new or improved infrastructure/local facilities e.g. more residents may support more local facilities, shops and services. Some infrastructure needs specifically related to a new development will be provided as part of that development e.g. children's play areas. National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.</p> <ul style="list-style-type: none"> • See para response to PO1746 about highways • See para response to PO1746 about additional retail and

PO9402 PO9311 PO9403	Carla Hodgkinson Ms Emily Hodgkinson Ms and Mr Carla and Anthony Hodgkinson and Bury				Object	<p>I would like to register my opposition to the plans for development along The Mount. I was born and raised in Leek as are most of my family. I remember being taken for long walks as child, and now take my nephew for those same walks; only having so much more appreciation for the stunning views and wildlife to be found in this area. As an adult, I love going round the mount. I appreciate the openness, the air and the views and as I have grown up have learnt to value and cherish this local area. I know it is valued by many local people for similar reasons. It is a wonderful asset to Leek which cannot be found elsewhere. In this age of government encouraging activity and reduction of population obesity, locals can walk their dog, go for a run or walk whilst savouring the views and see nature on the doorstep. Something to be encouraged and supported. Leek is very lucky to have such a wonderful asset as part of its town and councillors would be well advised to recognise its importance to their locality. If councillors wish to see houses, roads and urbanisation as part of their tenure, I suggest they visit 'The Potteries' or move to the nearest loss of urban space to understand the impact of building for the short-term gain. As well as the benefits to Leek having such a widely used and accessible area, one should consider the risks and very real hazards to creating such estates in a position where traffic flow, at both access points to the Mount, is at best, difficult. On exiting Mount Road, on to Ashbourne Road and Buxton Road, there is extremely limited vision in both directions. Whilst currently the traffic flow is steady, and reasonably quiet, my concerns lie with the difficulties which will only grow with increased cars, placing those increased pedestrians walking to the proposed development, at a genuine risk. I am not against the development of affordable housing; what I am against is the travesty of those decisions, by councillors which we elect, to take green belt land, before brown belt land, for potential profit, before the views of their constituency and the future of generations to come. I understand that I am far from alone in my views- I feel they should be taken into deep consideration before this gem in</p>	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access • See para response to P1600 about landscape evidence • See para response to PO1746 about highways • See para response to PO115 about Leek housing requirements and windfall allowance

						the town is lost forever.	
PO9192	Mrs M Motum				Object	<p>I would like to strongly object to more houses being built on The Mount. This very popular location is just a short walk from the town centre where you are in the countryside with far reaching views. The beautiful location will command high prices, therefore no affordable houses will be built. It would be a travesty of justice to build in such a well-loved area, used by dog walkers, walkers, courting couples, and car drivers. I don't think the infrastructure could sustain the number of houses envisaged. Please do not include this area in the local plan.</p>	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access • See para response to P1600 about landscape evidence <p>An element of affordable housing will be required for all major housing schemes in the District, as set out in Local Plan Policies. The Council may also require an element of starter homes, and self-build plots on such sites. The Council's housing/design policies and the NPPF expect that housing schemes provide for variegation in design; and a mix of house types to meet differing socio-economic needs, including affordable housing.</p> <p>National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered. A sustainability appraisal report is being published for consultation alongside the Preferred Options Local Plan July 2017. The SA Report considers the economic, social and environmental effects of proposed development site allocations including access to services and facilities.</p> <ul style="list-style-type: none"> • See para response to PO1746 about highways

Question 10 Do you have any comments on the proposed housing allocation LE022 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9298	Mr and Ms Gary and Elaine Turner				Object	I wish to object to the proposed housing development at the mount (all of the sites) as this is a high quality amenity area enjoyed by all for its views, indeed, if ever Leek is featured on TV programmes the cameras usually end up doing a view of the town from the mount, which says it all.	<ul style="list-style-type: none"> • See para response to PO115 about Leek housing requirements and windfall allowance • See para response to P1600 about landscape evidence
PO9235	Mr John Burnett				Object	<p>I wish to formally object to the plans currently in consultation to allocate land for housing around the Mount Road in Leek. Some background. I have lived in Leek all my life, as have my parents and Grandparents. Throughout my life I have always viewed the Mount as the 'Countryside' and the border between Leek and the Peak district. Since I can remember I have spent many happy hours walking the Mount as it is an accessible area of natural beauty. What makes this area important to me and to anyone who lives in the East end of town. There are very few circular walks that take in such a wide variety of terrain and views as the Mount does. Whichever way its walked theres uphill and down dale terrain that has to be completed. What makes this worth while for many people is the wide open vista that is presented to the walker as you reach the top of the Mount. I complete this walk most days in the Summer, and every week in the Winter, and strongly believe it has added to my health and well being in immeasurable ways. I know and speak to the many others who also make this part of their leisure and health routines and know that a large proportion of the residents of both Haregate and Moorland Road estates rely on this open space as much as I do. So - my main objection is the destruction of some beautiful greenfield leisure location on the outskirts of our town. However I have other concerns about the wider impact to others who may not view this as important. Leeks infrastructure is already at breaking point. In particular the road system is literally not fit for purpose. Since the short sighted decision to alter the traffic flow through our town was taken, the flow of traffic particularly from West to East has been severely curtailed resulting in large traffic build ups through a normal working day. I can only imagine the building of 100's of new houses on the East End of Leeks existing boundary will at best double the misery already experienced by hundreds of travellers each day and cause untold economic and environmental damage to our market town. Additionally, I have serious concerns about the effects on the water run off if large areas of the Mount are built upon. The Mount is the highest point in our town, and huge amounts of water drain off it down towards Leek on a daily basis. Without the ground to soak up this water Im concerned the water table may be affected causing flooding and other damage to residents and infrastructure further down towards Leek centre. The first part of the consultation document says the following: They should, as far as possible, reflect the aspirations of local communities and should strive to contribute towards their wider social, economic and environmental objectives. Based on what I have seen of the document, I don't believe it succeeds in any of these fundamental objectives. Our</p>	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access • See para response to P1600 about landscape evidence • See para response to PO1746 about highways <p>The Council consults with utilities providers, the Environment Agency, and the SCC Lead Local Flood Risk Officer during Local Plan preparation. These bodies did not object to any of the Mount sites. The SFRA provides an overview of flood risk from all sources across the District, and will be used alongside formal EA responses regarding proposed allocations.</p> <p>Note that Local Plan Policy will require that, wherever possible, development will promote the reduction of flood risk by the use of sustainable drainage techniques as per the Flood and Water Management Act., as well as taking opportunities to contribute to wider Council objectives such as its emerging Green infrastructure Network; to enhancing biodiversity and recreation opportunities etc.</p>

						local community want a town that is prosperous but also one in which people want to live and work. We should strive to be better than what we are but not to the detriment of what makes people want to live in Leek in the first place. I hope you seriously take on board my views as well as the views of other community members. We live in a democracy and as such I genuinely believe that if a decision doesn't have the backing of the community it shouldn't be pushed through.	
PO9211	Mrs E Adams				Object	I wish to place my strong objections to the proposals to build house on the mount, leek. It would devastate this beautiful area which benefits tourists and residents alike. Objections also relate to roads, schools, doctors etc. Please please rethink your plans.	<ul style="list-style-type: none"> • See para response to PO115 about Leek housing requirements and windfall allowance • See para response to PO1746 about highways • See para response to PO1679 about educational requirements • See para response to PO9129 about infrastrure delivery plan
PO9178	Mrs E Adams				Object	We would like to object to the developments proposed around The Mount. This is a very popular safe area to walk. It has a high quality landscape which would be restricted by the developments and traffic would increase significantly on the roads linking Buxton road and Ashbourne road. Visitors to the area also like this walk.	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access • See para response to P1600 about landscape evidence • See para response to PO1746 about highways

Question 10 Do you have any comments on the proposed housing allocation LE022 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9249	Ms Joan Hobster				Object	<p>I am writing to plead for the preservation of Mount Road, Leek, as an undeveloped open space and public amenity, available to all residents of the town. Any building on the farmland that borders this road will destroy the ambience and far-reaching views of this delightful area. It has been shown by a headcount (see Leek Post letters May 11 2016) how well used it is by walkers, joggers, horse-riders etc and I would like to add to that, the small but regular number of cars that are parked on Mount Road by elderly residents. They may no longer be physically able to walk far but can still take a short stroll, sit on a bench, enjoy the fresh air and admire the views. I understand that Mount Road is part of the Staffordshire Moorland 's Way and is walked regularly by individuals and organised groups. Surely a designated "Way" cannot be allowed to pass through a housing estate. In addition I see on the Council website, a leaflet suggesting a walk entitled "Leek Landscapes, A Country Walk" which includes Mount Road. I quote from this leaflet "The route passes through attractive farmland and offers many interesting views of Leek and its setting." If the proposed houses are built, this leaflet will have to be amended. I suggest, "The route passes through a new housing estate which obscures many interesting views of Leek and its setting" If building does take place, Mount Road itself would have to be upgraded and widened, to accommodate increased traffic use. An estimated 600 extra cars daily has been suggested. No doubt street lighting would be installed and this would destroy one of the few "dark sky" areas in the town. I have observed the night sky regularly from this location on winter evenings and enjoyed seeing the eastern constellations, planet alignments, meteor showers, the occasional comet and the monthly spectacle of the full moon rising. All this would be lost by light pollution. I understand that planners did take note of objections raised about the development of Mount Road in 2015 and have reduced the proposed site allocations to either end of the road, thus preserving some of the views. For example, the field referenced LE128 will be split in two and only half of it built on. While appreciating this gesture to public opinion it would surely be only a matter of time before the inevitable "infill" would take place and the whole area would be lost for ever. PLEASE PLEASE PLEASE – SAVE THE MOUNT for future generations to enjoy.</p>	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access • See para response to P1600 about landscape evidence • See para response to PO1679 about public rights of way • See para response to PO1746 about highways • See para response to PO1679 about streetlighting <p>The Council must demonstrate to Planning inspector that it proposes to allocate sufficient land to meet its objectively assessed housing needs for the town.</p> <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p>
PO9086	Ms Sarah Griffiths				Object	<p>I am objecting to the planning of new housing at Mount rd, Leek. The area is enjoyed by young and old alike for generations. We do not need new housing in this peaceful wonderful area. [2015 Options consultation representation also submitted with email].</p>	<ul style="list-style-type: none"> • See para response to PO115 about Leek housing requirements and windfall allowance • See para response to P1600 about landscape evidence

Question 10 Do you have any comments on the proposed housing allocation LE022 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9375	Cllr Dani Ogden				Object	<p>An area of natural beauty should never have been considered for planning application in the local plan. The outrage this has caused with local people has been overwhelming. The Mount is an area accessible to open countryside for local people, it is used for recreational purpose and attracts visitors coming to Leek. One lady told me that she could walk safely with a group of people with learning difficulties, the volume of traffic from four hundred dwellings would have a severe impact on those using The Mount for recreation, the infrastructure alone would not only cause a dramatic difference to the landscape it would also affect the wildlife in this area. That said, LE142a [landowner] are against development on this land, also there appears to be no indication on the map as to where the boundary is belonging to [the landowner]. LE127 and LE128a is not suitably distributed to urban infrastructure. It has been suggested LE066 where Kniveden Hall is, Folker Grange and Holme Farm on the west side of Leek are developable.</p>	<ul style="list-style-type: none"> • See para response to PO115 about Leek housing requirements and windfall allowance • See para response to PO115 about open spaces and countryside access • See para response to PO1746 about highways • See para response to PO9161 on ecology evidence • See para response to PO9121 about development capacity study <p>The Council communicates with landowners of affected sites to ensure they are available, prior to selection. Note that the owner of site LE142A, as indicated on the Local Plan proposals map, has confirmed site availability.</p> <ul style="list-style-type: none"> • Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan. <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is set out in the 'Options Site Assessments' on the website.</p> <ul style="list-style-type: none"> • See para response to PO9161 about western Green Belt

PO9092	Ms Sarah Bishop				Object	<p>I would like to register my opposition to the plans for development along The Mount. I was born and raised in Leek as are all my family. I remember being dragged "round the mount" as a child and hated every minute of it. I left Leek in 1986 to pursue my career in nursing and I still return to Leek every weekend and Public Holiday. As an adult, I love going round the mount! I appreciate the openness, the air and the local views. I know it is valued by many local people for similar reasons. It is a wonderful asset to Leek which cannot be found elsewhere. In this age of government encouraging activity and reduction of population obesity, I can walk my dog, savour the views and see nature on the doorstep. Something to be encouraged and supported. Leek is very lucky indeed to have such a wonderful asset as part of its town and councillors would be well advised to recognise its importance to their locality. If councillors wish to see houses, roads and urbanisation as part of their tenure, I suggest they visit "The Potteries" or move to the nearest loss of urban space to understand the impact of building for the short term gain. I live still in the city I came to all those years ago. Back then, it was a new city with limits. Now, every route I can take from the centre is urbanised and each area is stuck "in its time" as architecture and design move on creating areas of decline and disrepair bringing new problems with the passing of time. For the love of Leek and its title of "Queen of the Staffordshire Moorlands" , Councillors need to appreciate what qualities give Leek that title and do their utmost to maintain them. Councillors have the opportunity to do the right thing for the future of Leek, not to bring in a fast buck for a short term gain. I hope the people of Leek are listened to when they say "Save The Mount"!</p>	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access • See para response to P1600 about landscape evidence • See para response to PO1746 about highways • See para response to PO115 about Leek housing requirements and windfall allowance
PO9263	Mr Jeff Davies				Object	<p>I am writing to object to the designation of land on Mount Road, Leek as "Preferred Housing Allocation". There are a number of problems with this intended designation:</p> <ol style="list-style-type: none"> 1) Overlook from the National Park - building as designated will adversely affect the view from the National Park 2) Access - to increase traffic along the Mount would cause significant traffic problems and hazard at its junctions with both the Buxton and Ashbourne Roads. If Knivden Lane is paved then this would also cause problems with access to the hospital and cause a hazard at its junction with Ashbourne Road where there is poor visibility. Improving Mount Road is likely to be self-defeating as it will then become a rat-run between Ashbourne and Buxton Roads further increasing the traffic load. 3) Services - there would be a significant cost to put in mains services as the existing water and drainage up Mount Road towards Padwick Farm are unlikely to adequate to service the proposed housing 4) Amenity - the Mount is a much loved local resource, heavily used by walkers (including dog-walkers) and runners. 	<ol style="list-style-type: none"> 1. See para response to P1600 about landscape evidence 2. See para response to PO1746 about highways 3. See para response in PO9235 about utilities and flood risk 4. See para response to PO115 about open spaces and countryside access 5. Notwithstanding current commuting patterns, the District as a whole has residual general employment land requirement, and Leek has a requirement (of around 8ha to 2031) and the Council must demonstrate that it will fully meet these along with its housing requirements, to have a sound Local Plan in place. Government Policy promotes mixed land uses, subject to proper

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>5) Location - the bulk of working residents would probably work in Stoke or Macclesfield and the development is on the wrong side of Leek as it would then increase the traffic 'flow' through the centre of town</p> <p>6) Brownfield first - development on green fields should only occur when all the available brownfield sites have been used. There are multiple opportunities for in-fill housing developments within Leek (e.g. Prince St) as well as numerous mills that are currently eyesores (e.g. both Macclesfield & Ashbourne Roads)</p> <p>7) Size of housing allocation - there is a significant discrepancy between between SMDC & Government figures for required housing. I believe you are seriously over-estimating the local housing need. By doing this you are making it easier for developers to cherry-pick which bits they want to develop rather than encouraging development where it would be most beneficial to and have the least adverse impact on the town</p> <p>8) Unnecessary blight - by over-allocating housing designation you will have an unnecessary adverse impact on the value of properties which may not in practice be affected by housing development throughout the life of the plan</p>	<p>consideration of amenity impacts (such as noise). The Council works with neighbouring planning authorities under its duty to cooperate, to explore opportunities for the meeting of development requirements cross-border. However neighbouring authorities must also address their own development requirements. The Council consults with SCC Transport (regarding strategic impacts) during Local Plan preparation; and has regard to SCC's Local Transport Plan Integrated Transport Strategy for the District.</p> <ul style="list-style-type: none"> • See para response to PO9161 about western Green Belt <p>6. See para response to PO115 about Leek housing requirements and windfall allowance.</p> <p>7. Need for additional housing stems from a number of factors, for example household formation, in-migration, linkages with future workforce, and other factors. The NPPF makes clear that housing projections are the starting point for assessing housing needs; however these additional factors should also be taken in to account in Council SHMAs. The Council's own housing need assessments are set out in its evidence base on the website. Note that this already takes into consideration empty properties in the Moorlands.</p> <p>8. The Council would not seek to over-allocate. In any event, the property values are not a matter covered by the Planning Acts.</p>

Question 10 Do you have any comments on the proposed housing allocation LE022 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9170	Mr and Mrs S A Hodkinson				Object	<p>We are writing as a young couple concerned about the prospect of many more houses being built on good quality farming green field sites in Leek and throughout the Staffordshire Moorlands, especially over the Mount Road in Leek. We use the Mount as many people of all ages do on a regular basis, whether it's to walk the dog or to go out for a run. The Mount is used by many and if lost would be greatly missed. The main issue that concerns me with the proposed building of houses over the Mount is that the council & planners feel it is acceptable to potentially build houses on what is good quality farming green field sites. We need to protect our green spaces and farming land that is producing us with our food and local food at that. Another point to make is there are hundreds of empty properties throughout the Staffordshire Moorlands therefore if there is really a great need for additional housing which there is no evidence to suggest this. Also in this day and age we as a country are very conscious trying to reduce our carbon footprint and recycling everything possible. Therefore question why does this not apply to housing. There are all these properties sitting empty and you are wanting to build more, do we really need more if we already have so many empty. This includes new builds that have being built in the past twelve months that are vacant. Also question who are you expecting to buy these properties or live in them. There is obviously no jobs or prospects for people to want to move into Leek otherwise they would be here now. You only need to open the local paper or look on the internet there are always hundreds of properties at all prices for sale and up for rent in Leek. If you by some miracle find hundreds of families to live in these houses then question how do you propose to improve the infrastructure. It already takes up to twenty minutes to drive from one end of Leek town to the other and this isn't even in 'rush hour'. We certainly don't have enough schools and the GP's are already stretched to capacity. I also have a worry over the wildlife over the Mount there are many different species of birds and animals that are present around the Mount and the building of houses would interrupt them and significantly reduce the numbers of some already endangered species. Finally I urge you think very carefully before allowing these houses to be built in Leek, with a special thought to the Mount, once you have let properties be built there Leek as a lovely small market town will be spoilt and the beautiful uninterrupted views will be gone forever.</p>	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access <p>The NPPF directs that where development is necessary, lower grade agricultural land be used ahead of higher grade. Note that the various site options around Leek appear to fall within the same ALC (Grade 4 'poor'). Agricultural land quality must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p> <ul style="list-style-type: none"> • See para response to PO9263 on housing needs evidence • See para response to PO115 about Leek housing requirements and windfall allowance • See para response to PO1746 about additional retail and employment land requirements • See para response to PO1746 about highways • See para response to PO1679 about educational requirements <p>The Council consults with service providers including Regional Clinical Commissioning Groups during Plan preparation; and is also preparing a Development Capacity Study, which considers the extent of public services across the District. Note that this evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p> <ul style="list-style-type: none"> • See para response to PO9161 on ecology evidence

Question 10 Do you have any comments on the proposed housing allocation LE022 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9185	Ms Michele Rushton				Object	<p>I wish to register my disapproval re the above development and quite the following points. Loss of an important local amenity – the Mount is a very important open space close to the town centre which is enjoyed by people across the town. Visual impact - restricting important and highly valued panoramic views across the Leek skyline and further afield. Impact on infrastructure - primary schools in particular (East Street, Beresford) will struggle to keep up with demand and the situation where some children already have to travel to schools in the west of Leek will become more and more common Mount Road is on the route of the Staffordshire Moorlands Walk – a very popular route for leisure activities such as walking, cycling and jogging High quality landscape – unsympathetic to the landscape character and quality of the area Urbanisation of the country lane that is Mount Road – if all the 6 developments proceed then in excess of 500 houses would be constructed. Mount Road would likely become a main road linking the Ashbourne and Buxton roads. The spatial distribution of proposed sites across Leek is unbalanced - there will not be sufficient demand to build all of these houses on one side of town so the council will not meet its housing needs in any event The volume and speed of traffic is likely to increase on Kniveden Lane where my family have been residents for over 25years. Please for the sake of Leek and her people, review your proposal.</p>	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access • See para response to PO1679 about educational requirements • See para response to P1600 about landscape evidence • See para response to PO1679 about streetlighting • See para response to PO1679 about public rights of way • See para response to PO1679 about viability study • See para response to PO1746 about highways
PO9217	Ms Lisa Milward				Object	<p>I wish to register my disapproval to the above development My objection has little to do with extra traffic and infrastructure but a lot to do with losing a place that is very dear to people's hearts. The Mount has always been a favourite short walk of mine and my family's. It is peaceful, has beautiful views and friendly people of all ages make a point of speaking. The Mount is somewhere that I spend a lot of time walking each week, a place that has been a part of my life since childhood. I have very fond memories of spending time walking over The Mount with family when we didn't have a car and little money to take buses elsewhere. The Mount is perfect for a short walk, it's somewhere that I have always felt safe to walk alone and not too far for a morning walk before work and for those people who perhaps struggle to walk longer distances. By developing housing on this land I believe that it will take away one of the town's best assets, one that people of Leek have enjoyed for many, many generations. So as councillors and planners who are in office for a relatively short period of time in comparison making a decision that will remove this for everyone who loves to walk here, I hope that you really consider how much The Mount means to people like me. It will be a huge shame if this goes ahead.</p>	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access • See para response to P1600 about landscape evidence • See para response to PO1746 about highways

PO9277	Mr Ian McFaul				Object	<p>i am writing to protest against the latest version of the site allocations plan for th Staffs Moorlands, in particular the mount area of Leek. the following objections should be considered</p> <p>a)maintaining the individuality of our market town rather than going down the homogenisation route</p> <p>b)I'm not sure where the demand for these house is coming from - where is the research on households forecasted to require this</p> <p>c)The area of most concern to myself is particularly LE127 and the terrible prospect of houses being built on the town horizon, the entrance to Buxton makes me shudder and we should not go down that route</p> <p>d)there are lots of brownfield sites ripe for development in town that should be exhausted first rather than taking the easy option short term option.</p> <p>e)where i the visionary leader on the council who can set out a plan for the town not driven by short termism</p>	<p>a) The Council's housing/design policies and the NPPF expect that housing schemes provide for variegation in design; and a mix of house types to meet differing socio-economic needs, including affordable housing. The Council may also require an element of starter homes, and self-build plots on such sites.</p> <p>b) / d)</p> <ul style="list-style-type: none"> • See para response to PO9263 on housing needs evidence • See para response to PO115 about Leek housing requirements and windfall allowance <p>c) See para response to P1600 about landscape evidence</p> <p>e) Each stage of Local Plan preparation must be agreed by Full Council Assembly. The Council must demonstrate to a Planning inspector that have produced a Local Plan preferably covering a 15-year time horizon, to take account of longer term requirements.</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9320	Ms Elizabeth Stretton				Object	<p>I am writing to voice my opposition to the proposed housing development on the Mount Road, Leek - ie Plots IE140, LE128a, LE127, LE142a, LE142b, and LEO22. On the edge of the Peak District, this area of Leek can only be described as an extension of this National Park and one which holds a special place in the hearts of Leek residents. The number of walkers and cyclists using this area each week must be in the hundreds with many, like myself, enjoying the walk over The Mount on a daily basis. This walk commands beautiful views of the surrounding countryside, providing a "country" experience for so many walkers, cyclists and drivers, as well as a place to sit and watch, for example, the sunsets, weather conditions unfold, or simply just to sit and ponder. For years it has provided a walk within a few minutes walking distance, for families, courting couples, dog walkers and anyone else who wants to escape from the town and enjoy the views and the experience pleasures of a "country " walk without having to travel by car and park in an over-priced car park! There are even opportunities for people to drive from anywhere in Leek within minutes to the Mount and then enjoy all the attractions described above. The loss of this walk and seats would deprive many people of the opportunity to enjoy panoramic views across the town and the surrounding skyline: these vistas would be lost and replaced with houses instead - reducing the area to just another street of the kind to found anywhere and out of character with the landscape. It also seems that all the attention has been focused on this area and side of Leek, when there are other areas around Leek which could be made use of. One of the most important problems, as I see it, is the strain on the local infrastructure. Up to, or in excess of, 500 houses could be built along this road and all these new residents will need employment - already a problem in Leek and the surrounding areas and towns - as well as schools for their children. Leek primary schools are already experiencing problems and some children are already having to travel across Leek to receive their education. Recently trees have been cut down on the top field of the High School - now work has started on fencing this area, apparently towards the building of a new primary school on this site. I cannot remember being made aware of this possibility, although it may have been mentioned somewhere, but it seems that the building of this school means that councillors are confident that the housing development will take place and they will be able to wave aside any objections pertaining to education and say that a school is already being built . There are many houses in Leek which are empty, as there are many sites which could be used to provide areas for new homes, and it would make more sense to utilize these possibilities before taking away an important , local amenity which is used every day by so many people and which is our own area of "outstanding natural beauty" and which is available to everyone.</p>	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access • See para response to P1600 about landscape evidence • See para response to PO1746 about highways • See para response to PO1746 about additional retail and employment land requirements • See para response to PO1679 about educational requirements <p>All proposed sites in the Preferred Options consultation, will require approval from Government planning inspector following examination, before the Council can formally adopt them as part of its replacement Local Plan.</p> <ul style="list-style-type: none"> • See para response to PO115 about Leek housing requirements and windfall allowance

Question 10 Do you have any comments on the proposed housing allocation LE022 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9329	Dr Tracey Cole				Object	<p>I would like to hereby object to the areas of local interest around The Mount being developed (LE142b; LE142a; LE140; LE128a; LE127; LE022). As I am sure you are aware, there is considerable public opposition to the proposed building of 400 houses on these sites. The area is well used, at all times of day for cyclists, walkers and horse-riders. It is an quiet oasis for the people of Leek to experience the calm of the countryside and look down on the splendid views of the town and further afield. As such, it is an extremely highly valued area in the town of Leek. As a resident of Pitcher Lane..building on The Mount would seriously impact on me and my neighbours. The building of so many houses will bring at least 400-800 cars with it. Access for these vehicles will no doubt run straight past my house, causing noise and air pollution. I moved to Leek from Cheshire for exactly the same reasons: the road I lived on became unbearably busy. I noticed that sitting in the garden was impossible with the constant noise of the cars and the smell of the fumes, not to mention the health consequences of nitrogen oxides, carbon monoxide and particulate matter. I am also concerned that with so many vehicles, the junctions of Kniveden/Ashbourne Rd and The Mount/Buxton Rd will easily generate queues during rush hours. Getting off my estate will be far more tricky and the increased risk of traffic and pedestrian accidents is not a pleasant thought. A town like Leek is quite a jewel, but it could so easily be ruined forever if we don't seriously consider all the consequences of our actions.</p>	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access • See para response to P1600 about landscape evidence • See para response to PO1746 about highways
PO9368	Councillor Rebecca Done				Object	<p>On the proposed planning for the Mount in Leek..I do not agree with and my reasons are stated below: The Mount is a very important open space close to the town centre which is enjoyed by a lot of people across the town including myself. There will be a massive impact on infrastructure, I think primary schools in particular would suffer (East Street, Beresford) and will struggle to keep up with demand. Mount Road is on the route of the Staffordshire Moorlands Walk – a very popular route for leisure activities such as walking, cycling and jogging` If all the 6 developments proceed then in excess of 500 houses would be constructed. Mount Road would likely become a main road linking the Ashbourne and Buxton roads. The proposed sites across Leek are unbalanced - there will not be sufficient demand to build all of these houses on one side of town.</p>	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access • See para response to PO9129 about infrastrure delivery plan • See para response to PO1679 about educational requirements • See para response to PO1746 about highways • See para response to PO1679 about viability study

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9417	Mr Anthony Clark				Object	<p>I am writing to make you aware of the concerns I have over the housing proposals for the Mount Road area, Leek, set out in Staffordshire Moorlands Preferred Options and Development Boundaries Consultation. The consequence on traffic of building many houses in the Mount Road area will be very marked both in the immediate area and the town as a whole . Immediate area Mount Road is not wide enough to safely take a major increase in traffic. The road is very popular with walkers, horse riders and cyclists. Increased traffic will discourage such use and be a danger to those leisure users who do continue to use the road. The existing access points to the area off Buxton Road and Ashbourne Road are adequate for the present level of traffic but are woefully inadequate and dangerous for high volumes of vehicles. If, as is most likely ,Kniveden Lane was upgraded at its top end to allow access by vehicles the consequences for its junction with Ashbourne Road would be great. At present the limited amount of traffic means that the restricted visibility due to the trees on Ashbourne Road causes minimal problems. An increase in traffic queues would lead to frustration and rash decisions by drivers. This in turn would lead to calls for the removal of the trees and the consequent destruction of a wonderful entrance to the town. Town Residents living in the proposed housing development will need to work and shop. Question where will they go to do these two activities. Work Very few will work in Buxton or Ashbourne which are easily accessible from Mount Road. The vast majority will work in the town centre, the Barnfields industrial estate or on Cheadle Road. Those commuting out of town will be mostly heading for Stoke or Macclesfield/Manchester. All these people will have to drive through the centre of town at least twice a day at peak times as there are no alternative routes they can use. Shopping To reach the two large supermarkets in Leek (Morrisons and Sainsbury's) residents of the Mount Road area would be forced, by the road system, to travel through the centre of town. Those shopping further afield will, in the main, be heading for Stoke and Macclesfield and again will need to travel through the town centre. One look at the map would tell anyone that major building to the east of Leek will cause major traffic problems. If building must take place on the Mount, though I doubt there is a need, the least environmentally damaging sites are LE142b and LE140. Question is there not a possibility of building on the existing sites of Kniveden Hall (which is well screened by trees) and the old Social Services site. These sites would be the least invasive environmentally but would still generate major traffic problems both locally and in town. In 2006 New York took the far sighted decision to turn a disused elevated railway into an linear park (The High Line). Would that Leek had planners and leaders of similar vision to develop Mount Road into The High Lane for the benefit of all the community.</p>	<ul style="list-style-type: none"> • See para response to PO1746 about highways • See para response to PO1746 about additional retail and employment land requirements • See para response to P1600 about landscape evidence • See para response to PO9161 on ecology evidence • See para response to PO115 about open spaces and countryside access • See para response to PO1746 about Council's railway line protection policy <p>• Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9383	Councillor Charlotte Atkins				Object	<p>I am writing to object to the four development sites on The Mount as identified in the proposed SMDC Local Plan. My reasons for doing so are: The Mount provides unique and much valued panoramic views over Leek and its skyline as well as over parts of the National Peak Park The openness of The Mount makes it a hugely important local asset for public recreation and for biodiversity. This is particularly important at present when lack of physical exercise is creating a public health crisis. The Mount is very popular among walkers, cyclists, horse riders and joggers as well encouraging families to be active and enjoy the natural attractions of the area. The roads up to The Mount are totally unsuited to increased traffic. But if they were improved, that would encourage rat running between the Ashbourne and Buxton Roads totally destroying the quiet rural nature of the area. With increased traffic, the junctions at either end of Mount Road would be highly dangerous. The Mount is a developer's dream and would attract developers who want to build expensive executive homes. These would attract buyers from outside Leek rather than providing the affordable homes we need for both local young and older residents. If 400 houses are built on the Mount, they could potentially generate 800 cars driving through the centre of Leek as the prevailing flow of traffic out of Leek is to Stoke on Trent and Macclesfield. That would create even more gridlock than we experience already. More suitable development sites exist within Leek eg along the Macclesfield Road. But they have not been identified or consulted upon.</p> <p>I urge the Council to drop its plans to destroy The Mount and look elsewhere to develop affordable homes for local residents.</p>	<ul style="list-style-type: none"> • See para response to P1600 about landscape evidence • See para response to PO9161 on ecology evidence • See para response to PO115 about open spaces and countryside access • See para response to PO1746 about highways <p>An element of affordable housing will be required for all major housing schemes in the District, as set out in Local Plan Policies. The Council may also require an element of starter homes, and self-build plots on such sites. The Council's housing/design policies and the NPPF expect that housing schemes provide for variegation in design; and a mix of house types to meet differing socio-economic needs, including affordable housing.</p> <p>The Council consulted upon all potential sites (of a minimum size) deemed deliverable for housing, as part of the Site Options consultation in July 2015. The results of this consultation (including the call for sites), alongside other relevant evidence, has informed the subsequent Preferred Options.</p> <ul style="list-style-type: none"> • See para response to PO115 about Leek housing requirements and windfall allowance • See para response to PO9161 about western Green Belt
PO9409	Mr Alan Percival				Object	<p>I wish to object to the proposed house building on The Mount. Along with many other people I walk along Mount Road several times a week winter and summer. It is a lovely country walk and the only one on the eastern side of the town that is away from traffic fumes. There are many other reasons why building should not be allowed on The Mount which I am sure you have been made aware of.</p>	<ul style="list-style-type: none"> • See para response to PO115 about open spaces and countryside access

Question 10 Do you have any comments on the proposed housing allocation LE022 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
	Petition from Mount residents (1092 signatures)				Object	<p>Dear Miss Ralphs,</p> <p>Building four hundred plus houses on the area known by everyone in Leek as The Mount and used by countless generations as a gateway to the countryside would be against everything that 'Localism' intended to bring. The enclosed petition goes some way to demonstrate the strength of feeling that there is against the proposed building plots as set out in the Local Plan.</p> <p>The area is mainly agricultural and offers amazing views of the town and its surrounding countryside. Indeed the views of Leek's conservation area is unrivalled and the area as a whole acts as a buffer between the town the Peak District National Park.</p> <p>The road itself could not cope with the estimated 600 to 800 extra cars that the proposed housing would generate. The Mount is a narrow road with no footpaths and the junctions at either end of the Mount would become even more dangerous.</p> <p>Historically people travelling out of Leek to work use the Stoke on Trent and Macclesfield roads with few travelling to Buxton or Ashbourne. This would mean that the roads in Leek's Town centre would become even more congested at peak times as these people make their way through town.</p> <p>We urge the Council to think again and produce alternative sites for the houses thereby saving this precious area for the future generations to enjoy.</p>	<ul style="list-style-type: none"> • See para response to PO1679 about landscape evidence <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This includes consideration of heritage impacts, following consultation with the Council's Conservation Officer, and the heritage impact recommendations of the most recent 2016 landscape impact study. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p> <ul style="list-style-type: none"> • See para response to PO1679 on highways • See para response to PO9129 about Council Assembly and statement of community involvement • See para response to PO9263 about Leek employment land requirements

Question 10 Do you have any comments on the proposed housing allocation LE064 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO412	Mr David John Allen				General comment	Care needs to be given to number of properties and access to main road. Also, potential to flooding. Consider more linear development and the potential slight expansion of the development boundary for infill sites such as Highfield / Lowfield and around the cricket club should be added without encroaching the green belt.	<p>Site ref LE064 was recently granted outline planning permission for 11x dwellings (SMD/2013/1201). Note that the applicant submitted a site-specific flood risk assessment; and the permission contained a number of conditions requiring flood measures be designed into the scheme, including sustainable drainage (SuDS).</p> <p>Any boundary alterations involving loss of Green Belt (even if just for infill) would require demonstration of exceptional circumstances to Planning Inspector. The NPPF allows for consideration of 'limited infilling' in villages and development proposals upon 'brownfield' sites, in the Green Belt.</p>

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO89	Mr Bill Reid				Object	<p>This area is a most popular area for walkers, runners, drivers and strollers. It has been, for as long as I can remember, an area that provides views over Leek town and the surrounding area which cannot be equalled. It is a beautiful peaceful part of Leek which should not be spoilt by housing estates and the disruption that goes with it. The top of Kniveden Lane has a piece of unadopted road which deters motorists from using it as a thoroughfare and I am sure that this would become adopted if the proposed plans go ahead causing untold traffic, noise and pollution, as well as the dangers to residents from the traffic. There are many areas around Leek which would be far more suitable.</p>	<p>The public/visual open spaces proposed by the Council are those mapped in the emerging Local Plan. Local Plan policies seek to improve public access to open spaces/recreation generally where this is consistent with other policies. Note there is no automatic public right to cross privately owned land beyond public rights of way.</p> <p>Page 25 of the Preferred Options consultation document sets out the residual housing requirement for Leek to 2031 (pursuant to Policy SS3 of the adopted Core Strategy). The Council must demonstrate that it will fully meet residual housing requirements for Leek to have a sound Local Plan in place. This requirement does not have to be met 100% from land allocations – unanticipated development of other urban brownfield/greenfield sites counts too – explains how assumptions about future windfall housing have been factored in (resulting in a lower residual requirement). This windfall would include urban sites not formally identified on the map. Applications for residential uses arising on such sites would be assessed on their merits against NPPF and Council Policies. As there is insufficient capacity to meet this residual need entirely from sites within the Leek town boundary, the remaining requirement is to be met from a combination of urban (brownfield and greenfield) sites, and peripheral “urban extensions” around Leek as set out in Tables 4.2 and 4.3.</p> <p>The Council uses evidence to justify its selection of ‘Preferred’ allocation sites from wider sites. This includes landscape impact evidence. The most recent 2016 landscape impact study assessed impacts from the Peak Park, and and concluded that the various Mount sites exhibited low- through to high- landscape sensitivity; it also provided recommendations regarding mitigatory measures. It concluded LE127 to be of high landscape sensitivity; development within the site would likely be visible from the PDNP and could therefore affect its setting. Note that landscape evidence must be weighed against all other relevant evidence when the Council selects ‘Preferred’ sites.</p> <p>The Council consults with SCC Highways during Local Plan preparation. SCC did not raise any objections to Preferred Options sites LE022/LE127/LE128/LE140/LE142A/LE142B subject to development in this area contributing to the improvement of Mount Road including provision of footways and pedestrian links. Also Kniveden Lane</p>

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

							<p>should be brought up to adoptable standard with the implementation of footways. Further junction improvements at Mount Road/Ashbourne Road may also be appropriate. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to submit transport statements, and provide highways improvements where deemed appropriate).</p> <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This includes consideration of heritage impacts, following consultation with the Council's Conservation Officer, and the heritage impact recommendations of the most recent 2016 landscape impact study. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p>
PO116	Mrs Alison Campion				Object	New houses will spoil view for residents of Moorland Road Extra traffic will be using Mount Road which is very narrow in places Why can't old mills be converted for residential use?	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 on highways • See para response to PO89 about Leek housing requirements and windfall allowance

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO384 PO191	Mrs Brenda pigott Mr John Pigott				Object	<p>The following comments apply to three areas allocated for housing development on Mount Road: LE127, LE128a and LE142a</p> <p>The proposal to build in these three blocks along both sides of Mount Road should be removed as the Mount is a very important open space close to the town centre and is a very popular route for walking with or without dogs, jogging and cycling. It is also on the route of the Staffordshire Moorlands Walk giving panoramic views over the centre of Leek and the hills beyond. The Mount is a very important local amenity which has been completely underestimated and its value not understood.. A local resident carried out a head count on Sun 8 th May between 0700 and 2000 and counted a total of 217 people using the road for recreation : 190 walkers (44 with dogs, 8 with prams), 12 cyclists, 12 joggers and 3 horse riders. These were not in organised groups but simply people enjoying the exercise, the views and the fresh air in a safe and sustainable way – no need to get the car out. If the developments proceed then inevitably Mount Road, which is now a country lane, would be widened and become a busy estate road and people would not want to use it for recreation. Instead of building along Mount Road, the brownfield sites and other sites within the town boundary should be developed first. These include the following sites which were shown on the original plans but now taken out : LE 219, LE220, LE070, LE073, LE067, LE147, LE037 and LE063. The release of brown field sites ahead of green field sites cannot be justified.</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO89 on highways • See para response to PO89 about Leek housing requirements and windfall allowance (note sites LE219 /LE067/LE147/LE037A and LE063 would already be covered by this windfall allowance; and LE073 is now a residential commitment)
PO123 PO124	B & M Bentley B & M Bentley				Object	<p>Urban extension for New Housing is opposed on Mount Road. The relevant issues are</p> <ol style="list-style-type: none"> 1. Landscape & historic character 2. Health & quality of life 'The Mount' is a known cultural and unique feature for Leek folk and visitors gained over many generations. Offering: Visual beauty, health and community amenity. The many attractions of a 'trip around the mount' would be largely lost. <p>These comments refer to LE127, LE128a and LE140.</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access
PO226 PO231	Miss Alicia Guy Mr Daniel Frith				Object	<p>Building nearly 400 houses in the Mount area will totally ruin the lovely breathtaking scenery and peace and quiet that you get up there, increased traffic will spoil the area also. It could bring house prices down as at the moment it is such a lovely peaceful area and this no doubt will change</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 on highways • Property values are not considered as material considerations under the Planning Acts.
PO256	Rachel Fairbanks				Object	<p>This objection applies to proposed sites LE127, LE128a, LE140, LE142a and LE142b. The Mount is a beautiful area and deserves to be protected from development. Many people from across Leek regularly use it for walking and enjoying the views of the surrounding moorland and hills - there is nowhere else like it in Leek, and it's important for towns to have such green areas that are easily accessible. Building the proposed number of houses</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites, including</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>(or indeed any number of houses) along Mount Road would lead to the loss of a valued and much loved area of countryside and a loss of habitat for wildlife, not to mention the inevitable increase in traffic, pollution and litter.</p> <p>I also question what the projected number of required new houses for the Staffordshire Moorlands is based on. Does the area really need 6000 new houses? If recent articles in the Leek Post & Times are correct, there are already nearly 4000 houses in the Moorlands area that are for sale or lying empty.</p> <p>If new developments are required, brownfield sites should be redeveloped first such as the old army camp at Blackshaw Moor, the derelict mill on Mill Street, and the area next to Sainsbury's, the planning application for which was supposed to include provision for new houses. We can't keep building on fields and other green areas - we need to protect valuable spaces such as The Mount for future generations as once they've been built on, we'll never get them back.</p>	<p>ecological evidence: the Mount sites LE022/ LE127/ LE128/ LE140/ LE142A/ LE142B were subject to a Phase I ecological survey in 2014 and a later 2017 ecology study considered the scope for 'local wildlife site' (ie.SBI) designation for all preferred option sites. These studies set out ecological evaluations of the sites followed by recommended further surveys/actions in the event of future development. The Council would expect subsequent schemes to take account of this evidence; further Policy NE1 allows for the Council to require ecological mitigatory or compensatory measures where appropriate. Note that ecology evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites. According to the 2006 NERC Act, the Council must in its Planmaking, have regard to the purpose of conserving biodiversity.</p> <ul style="list-style-type: none"> • See para response to PO89 on highways <p>If the Council considered that a development may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts. In addition the Council continually monitors air quality across the District and regularly undertakes review and assessments of this data to identify areas where the traffic could have an unacceptable impact on local air quality. Policy SD4 in the emerging Local Plan covers controls of all forms of pollution arising from development.</p> <p>Need for additional housing stems from a number of factors, for example household formation, in-migration, linkages with future workforce, and other factors. The NPPF makes clear that housing projections are the starting point for assessing housing needs; however these additional factors should also be taken in to account in Council SHMAs. The Council's own housing need assessments are set out in its evidence base on the website. Note that this already takes into consideration empty properties in the Moorlands.</p> <ul style="list-style-type: none"> • See para response to PO89 about Leek housing requirements and windfall allowance <p>Note that Anzio Camp received planning consent for erection of extra care housing, live work units, ancillary social centre and facilities building and change of use to holiday park in November 2015.</p>

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO222	Mr Andrew Bodiam				Object	Like many others I have enjoyed walking on the Mount for 12 years and the planned housing site allocations in this area will completely destroy one of Leek's most valuable assets. Just take a walk along Mount Road and imagine what it would be like with the planned housing in place. I appreciate the Governments requirements but I am far from convinced that Leek's rural countryside should be sacrificed to their cause when there are so many brown field sites available. Furthermore, Leek is not a commuter town and I wonder if there is really the demand for 600 houses especially when those that are for sale take forever to do so. I would therefore ask you to think again.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO89 about landscape evidence • See para response to PO256 on housing needs evidence
PO1012	Mrs Sue Paulukiewicz				Object	My objection is to the developments planned on The Mount. This is a local beauty spot, and the number of houses planned will significantly harm the environment and spoil what is for many a delightful spot for walking. The number of cars that such a development would add to an already congested town is also a significant concern. The access at either end of The Mount is poor, and without substantial road alterations, either end could not be used safely in such numbers. There are plenty of empty mills and business accommodation that could be earmarked for development, so please leave this greenfield site as what it should be.....green fields!	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO89 on highways • See para response to PO89 about Leek housing requirements and windfall allowance
PO679	Andy McGraw				Object	<p>Extension of the Town Boundary into the Natural Zone The following blocks identified as, potentially suitable housing sites, all appear to be outside the town boundary on the maps supplied by the Staffordshire Moorlands District Council, on this second housing consultation June 2016 Block numbers; LE 127, LE128a, LE140, LE142a, LE142b All the above mentioned blocks are therefore proposed to be constructed on the Natural Zone land surrounding the town of Leek.</p> <p>Public Amenity The small narrow lane known as Mount Road which travels between the A53 Leek/ Buxton road and A523 Leek/ Ashbourne road along which the following blocks appear, LE127, LE128a, LE140 and LE142a, are used on a daily basis as a public amenity. The lane is constantly used by locals and visitors to walk, ride and enjoy the views in relative safety at present. If the proposed housing goes ahead, with the number of houses planned on these sites, this road will undoubtedly suffer a dramatic increase in the number of vehicles using it, by averaging 2 cars per household, thus reducing its safety and relative quiet enjoyment. The views over the town of Leek and its surrounding countryside will also be affected detrimentally.</p> <p>I also note that the lane is included as part of the Staffordshire Moorlands Walks, advertised and mapped by the Ordnance Survey as a recreational path but not highlighted as such on the SMDC consultation map. Surely the increase in vehicular traffic would compromise this route. Other public rights of way, public footpaths, are either not shown or seem now to stop at the new</p>	<ul style="list-style-type: none"> • Note that there is not a 'natural zone' designation for open countryside in the Staffordshire Moorlands. • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO89 on highways • Development proposals affecting the routes of recognised public rights of way would need to make allowance for them. • The consultation map is intended to depict summary information only; it does not for example illustrate public rights of way. • See para response to PO256 on ecology evidence <p>National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>development. When I raised the question of this fact at consultation the officer was unable to answer my query. In these times of austerity and the constant cut backs to local government, areas of free enjoyment and recreational use which also merit health benefits need to be conserved.</p> <p>Wildlife Concerns The blocks shown as, LE127, LE128a, LE140 and LE142a are frequently used by several bird species, especially during the winter months, as important feeding grounds. Some of these bird species are afforded special protection under the Wildlife and Countryside Act 1981 (W&CA81) as Schedule 1 protected species, identified by BirdLife International as Globally Threatened species and are listed as Red List species of birds of conservation concern by organisations, the RSPB (Royal Society for the Protection of Birds), the British Ornithologists Union, Natural England and the British Trust of Ornithology, to name a few. The birds in question are; Fieldfare Turdus pilaris, Schedule 1 W&CA 81 and Red List species Redwing Turdus iliacus , Schedule 1 W&CA81 and Red List Species Starling Sturnus vulgaris, Red List species The small block of land between blocks LE127 and LE128a is also important to wildlife in particular bird species. Although this land is not earmarked for development I feel that the disturbance of the development would compromise the species using it. This small wooded block is used during the winter months as an important winter roost for a small number of Raven Corus corax, a species again afforded a certain amount of protection. Species using this block to breed include, Little Owl Athene noctua , although not afforded any specific protection via acts of Parliament or listed as a concern yet, it is a species showing major decline, UK population estimated to be down by 24%, as highlighted by the RSPB breeding bird data 1995 – 2008. Great Spotted Woodpecker Dendrocopos major , Nuthatch Sitta europaea, are other examples of regular breeding species in this area. Due to disturbance I predict that many of these species will refrain from using this important area.</p> <p>Infrastructure As mentioned previously the numbers of new houses proposed in the areas of Mount Road and Thorncliffe Road, blocks LE127, LE128a, LE140, LE142a and LE142b, will put an enormous strain on the local infrastructure and road system. We all constantly experience the difficulties whilst travelling through the town of Leek caused by any one road closure. Both junctions from Mount Road can be difficult to negotiate now with the small amount of traffic using it with the A523 being particularly dangerous in its present form. Problems with access at both these junctions will be severely increased with the increased volume of traffic. At the original consultation July 2015 there was no mention of increasing employment opportunities even when the question was raised. I still feel that these concerns have yet to be addressed. It was implied but not</p>	<p>proposed development on school capacity, what additional capacity is needed and how this can be delivered.</p> <p>A sustainability appraisal report is being published for consultation alongside the Preferred Options Local Plan July 2017. The SA Report considers the economic, social and environmental effects of proposed development site allocations including access to services and facilities.</p> <p>Both the 2015 site options consultation, and the 2016 Preferred Options consultation, mapped sites for various land uses across the District including housing, employment, and mixed uses.</p> <p>Notwithstanding current commuting patterns, the District as a whole has residual general employment land requirement, and Leek has a requirement (of around 8ha to 2031) and the Council must demonstrate that it will fully meet these along with its housing requirements, to have a sound Local Plan in place. Government Policy promotes mixed land uses, subject to proper consideration of amenity impacts (such as noise). The Council works with neighbouring planning authorities under its duty to cooperate, to explore opportunities for the meeting of development requirements cross-border. However neighbouring authorities must also address their own development requirements. The Council consults with SCC Transport (regarding strategic impacts) during Local Plan preparation; and has regard to SCC's Local Transport Plan Integrated Transport Strategy for the District.</p> <ul style="list-style-type: none"> • See para response to PO89 about Leek housing requirements and windfall allowance

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>confirmed that most of the individuals who would be residing in the new development would be commuter based, travelling to nearby cities to seek their employment. This surely is contrary to most local government policies that are tasked with reducing this activity to contribute towards climate change and global warming issues. These planned developments will also have a visual, probably a negative impact from the adjoining Peak District National Park as it will be observed from the iconic Roaches and the boundary road of Morridge.</p> <p>There seems to be little or no mention of the use of brown field sites throughout the proposal. With the relaxation of planning rules for developing these sites should the Council look to these sites first. Removing deteriorating buildings and areas within the town that look unsightly and replacing with new developments would surely enhance the town, and, as they are close to amenities within the town centre, reduce the need for occupants to use their motor vehicles on shopping trips or evening entertainment. There are also a number of old mills and factories within the existing town boundary that could and should be transformed and upgraded into apartment blocks, as they have in other towns and cities in the UK, which would save those buildings from further degradation, provide perfect housing within the town and help to keep the overall feel of the town and its history.</p> <p>Conclusion In conclusion it is my belief that the proposed development and size of that development will have a serious and negative impact on the market town of Leek and its Natural Zone boundary. As a society in general we are loosing touch with nature and the great outdoors. There are Government initiatives to reverse and combat this trend. Organisations, funded by the National Lottery, Government, County and Local councils including SMDC, are tasked to promote these initiatives assisting people to re-engage with nature. We are also constantly reminded these days of heath, well-being and mental heath issues that our society is increasingly subject too due to the pressures of our modern living and the need for places for people to unwind. With this in mind how can we justify increasing the urban zone into our countryside. We have a duty to protect iconic landscapes, open spaces and the biodiversity such as can be found within the Mount Road area for the future generations of this fantastic town, so that they too, can experience quiet and peaceful recreation as we have enjoyed over the years . Maybe the Officers involved in making the final decisions should take an early morning walk along the Mount Road to experience these quiet and peaceful surroundings with the only noise being provided by the local bird-life with their dawn chorus. Once we loose these areas they are lost forever.</p>	

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO673	Mr Jonathan Hulme				Object	<p>The mount is an important, free, extensively used recreation facility for Leek. The proximity of the mount to the town makes it easily accessible, providing a rural escape for walkers, cyclists, joggers and families alike. This invaluable resource contributes to the physical and mental health and wellbeing of all who use it. The mount provides panoramic views of the town and surrounding moor land including the Roches, and housing developments should not encroach on this. The junctions with the A53 and the A523 are also quite dangerous and unsuited to large amounts of traffic. Some form of traffic management would need to be added to these junctions, increasing congestion in and around the town to even higher levels than currently (which is already too high!!). This deters visitors to the town, reducing the amount of tourist trade. The area is also important ecologically and accommodates a variety of species, some of which appear on the UK Biodiversity Action Plan. This excessive allocation of sites appears to be national policy implemented at a local level without consideration of local needs and demographics. The infrastructure in the east of the town is insufficient to cope with a population influx. For instance, the schools and health facilities are already full. Housing development should be concentrated on brownfield sites in the town such as Davenport mill on Mill Street and the mill on Ashbourne Road. The developers who own these sites should be incentivised to commence development. Redevelop eyesores, don't diminish beauty spots.</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO89 on highways • Note that there is not a 'natural zone' designation for open countryside in the Staffordshire Moorlands. • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO256 on housing needs evidence • See para response PO679 about identification of sites during 2015 and 2016 public consultations <p>The Council consults with SCC Education during Local Plan preparation, and SCC have indicated a need for additional first- and middle- school land provision in Leek resulting from the town's development requirements. These are laid out in the emerging Local Plan.</p> <p>All Planning Authorities are eligible to receive New Homes Bonus which was introduced by the Government to reflect and incentivise housing growth in their areas. It is based on the amount of extra Council Tax revenue raised for new homes and is payable annually over a 6 year period.</p>
PO699	Mr John Burnett				Object	<p>This existing field forms an intrinsic part of the open space known as the Mount. As such it provides views over the town out to the Macclesfield area and for users of the Mount affords an area of outstanding natural beauty. Building on this plot of land would severely restrict the views available and would mean that use of the Mount Road as an exercise and recreation facility would be severely restricted. I would also object based on my concerns that building in this location would have severe impact on both existing infrastructure including roads and schools and would affect the ground water run off causing issues in other areas of the town. Building on this land would demonstrably damage the aspirations of the local community and would have severe economic and environmental consequences - completely at odds with the objectives of the consultation.</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response PO679 about identification of sites during 2015 and 2016 public consultations • See para response to PO673 about educational requirements <p>The Council consults with utilities providers, the Environment Agency, and the SCC Lead Local Flood Risk Officer during Local Plan preparation. These bodies did not object to any of the Mount sites. The SFRA provides an overview of flood risk from all sources across the District, and will be used alongside formal EA responses regarding proposed allocations. Note that subsequent development proposals would be required to integrate sustainable drainage features into layouts, as required by the Flood and Water Management Act.</p>

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
							<ul style="list-style-type: none"> • See para response to PO673 about new homes bonus <p>In relation to comments on economic impact, new housing has a proven positive economic benefit to an area, generated both by expenditure of construction industry and through longer term residential spend.</p>
PO379	Mr Dennis Cartlidge				Object	<p>Eighteen months ago I was a very active sporty person. I could provide a quite a long list of sporting activities I was involved with back then and found all them to be great 'stress-busters'. This changed around last year when I was struck down by a serious medical condition. I had to put all my previous activities to one side. Dealing with the condition also left me feeling stressed and depressed. I would have previously dealt with such issues through sport, but this option was no longer available to me. About the only thing I could still do was walk and one day a friend suggested I take a stroll up 'the mount'. Although I'd lived in Leek for nearly twenty years, I'm afraid I have to admit that I'd never been up there before so my friend had to give me directions. I am so glad I discovered 'the mount'. I take regular walks up there (4-5 times every week) and it really is no exaggeration on my part to say that it has been a real lifesaver for me. Not only as it given me a place where I can exercise, it's proximity to peaceful countryside has helped me to deal with the many worries I have about my current health. I've been a regular visitor the mount now for the last year or so (in all weathers) and I can honestly say that I have never been up there and not found myself in the company of fellow walkers, dog-walkers, runners, families out for a stroll and cyclists. It really does seem to be a special place for Leekensians and I can now fully understand why so many people value it as a local amenity. For many (including me) 'the mount' is a place where they can find superb views and a breath of country air, without the need to drive out into the Peaks or moorlands. I would like to emphasise that I am not a 'NIMBY'. I agree that there is a need for more accomodation locally. However, I cannot believe there are not more suitable and accessible potential sites that could be used in Leek. The scale of development also makes me think we could be stocking up potentially dangerous future traffic problems, regards access to both Ashbourne and Buxton Road. Before development is considered for such an iconic part of Leek's landscape heritage, surely it would make sense for the council to conduct a review of brownfield sites WITHIN Leek that could solve any housing needs. Some developers have already shown the way with the reuse of some of Leek's former mills, but even a layman (like me) can see that there are still many of these types of building that could still be utilised, for example: the huge mill on the Macclesfield Road. If the council was to conduct such a review, I am sure there would welcome feedback from a wide</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO89 on highways

						range of constituents. In conclusion, I would like to emphasise how many I value Leek's 'green lung'. I know I not alone in hoping this great public amenity can be saved. I hope the council will see sense and review it's existing plans as soon as possible.	
PO466	Mr Richard Wagstaff				Object	I am appalled at your decision to earmark the Mount as a preferred option. The road is used by, and has been used by many people of the town over the years as a beautiful leisurely walk in the countryside with remarkable views over Leek. We have unprecedented views all around Leek. The Roaches, Hillswood, Shutlingslow, Bosley Cloud, Ladderedge etc which will be lost for ever if this land is developed. We cannot allow such an invasion to happen. Apart from the desecration you have to consider the road junctions at both ends, Buxton Rd and Ashbourne Rd. These are dangerous now so what will it be like when vehicles from 400 houses occur. This area must be deleted from the plan	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO89 about Leek housing requirements and windfall allowance
PO1324	Mr Stapleton	Leek And District Civic Society			Object	I write on behalf of Leek & District Civic Society to protest in the strongest possible terms against the decision to include The Mount' Leek as a preferred option for housing development. This area is heavily used by recreational walkers and is the sort of local amenity which would be absolutely spoilt by additional building. Leek has few enough open spaces as it is and the loss of The Mount would be completely unjustifiable. Of all the site options in the Leek area, The Mount is the one which we feel should be absolutely sacrosanct and protected for the present populace and future generations.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access <p>The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy.</p> <p>The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy. Any inconsistencies will be investigated as part of this updated work.</p>

PO1353	Mr A Birks				Object	<p>This morning whilst taking my constitutional stroll around mount road I happened upon a group of people considering the best plots to build houses in this beauty spot. One member of the group introduced herself as a local councillor. My heart sank as it became clear that some minds at least, against the wishes of the local people, the decision to build seems to have been taken. It is outrageous that the local community is once again to be ignored by those elected to serve us. Mount Road is a very important part of the social scene of Leek as local people use it daily to enjoy the countryside which is within their homes. It would be an ecological and social outrage to remove this facility from the people of Leek. This area is more important to the wellbeing of residents from across the town than any other area around leek as it is their gateway to a relaxed walk in the fresh air in the countryside.</p> <p>Any development of this area would change the nature of Leek as it would necessitate the widening of the road, the installation of lighting and the uprooting of that special commodity trees. The Mount Road would be a major thoroughfare between the Ashbourne Road, and Buxton Road, Kniveden Lane Would be a conduit between the same roads meaning heavy traffic rushing through the estate and there would be a problems caused by necessary construction of major road junctions at each end of the Mount Road. Local residents this would be a disaster. There is a concern too that, with the addition of a large number of houses in this area, the infrastructure at this end of town would be challenged beyond its ability to cope. Schools and doctors surgeries are already very full and recent queues of vehicles to get into town were horrendous during the roadworks in the town. Imagine the chaos should we add another 500 families in the queue.</p> <p>In the unlikely event that Leek should actually need extra accommodation, consideration should be given to brownfields or less intrusive sites first. There are several derelict mills which could be utilised for apartments or demolished for housing. The infrastructure of drains, electricity and gas is readily available near these 2 areas too. I appeal to the council to reflect on the wishes of those who elected them to serve their needs and reject the idea of developing this area and retain it for enjoyment and health of the many people of leek who appreciate it.</p>	<p>The Council must conduct public consultation concerning its emerging Local Plan as set out in the Local Plan regulations (or exceeding these requirements); and in also in accordance with the Council's adopted Statement of Community Involvement. All stages of the local Plan (including consultations) must be agreed by the elected Council Assembly; and all meetings of the Council Assembly are open to the public.</p> <ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO256 on ecology evidence • See para response to PO89 on highways <p>Issues such as external lighting in schemes can be controlled by the Council's amenity policies. PO1145	Mr R Harrison				Object	I have recently looked at the site plans and talked to one of your officers concerning the location: This is a narrow road, used by many recreational purposes such as walking, cycling The views over Leek Conservation area and its surrounding area are 2nd to none both night and day There have been lots of houses built on the east side of Leek in recent years mainly off Ashbourne road. As the majority of people travel to Macclesfield, Manchester and Stoke on Trent to work, this means they have to travel through the centre and often Leek is gridlocked at busy times The exits from the Mount onto Buxton and the Ashbourne Roads are both very narrow and difficult to negotiate. Schools at the end of the town are already full to capacity and young children have to be taken across Leek early in the morning and collected in the evening. Dr's Lists are so full. We are told that some of these houses are possible affordable housing. What does this mean? There are plenty of small terrace houses on the market which I would consider as affordable. So do we need more? In fact do we need a 1000 new houses to in Leek at all anywhere? If so I would like to think that there are possible sites in Leek - West End could be given consideration before further action is taken. Leek is a beautiful small town with easy access to countryside. By allowing building on The Mount Road that access will be diminished as more of our green fields turned into housing developments and country roads become clogged with vehicles. Where will it end?	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways • See para response to PO679 about Leek employment land requirements • See para response to PO89 about option sites assessments and sustainability appraisal • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO673 about educational requirements <p>The Council consults with its Housing Officer when setting definitions of 'affordable' in relation to affordable housing. This usually equates to a percentage of open market value which represents the upper limit that the house can be sold/resold for.</p> <ul style="list-style-type: none"> • See para response to PO256 on housing needs evidence • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO1732 about western Green Belt
PO930	Mr Chris Clark				Object	Building houses adjacent to Mount Road would permanently destroy the panoramic view of Leek from this location. Mount Road is used every day by walkers, with easy access to those living towards the north and east of the town. If houses were to be built in this location, most occupants would have employment in Stoke-on-Trent (or Macclesfield) and would therefore add to the already congested traffic through the town	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO679 about Leek employment land requirements
PO1681	Mr N A Brundrett				Object	I am writing to protest against the latest version of the site allocation plan for the SMDC. The site references of particular interest are: LE022, LE127, LE128a, LE140, LE142A, LE142B.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO1353 about streetlighting • See para response to PO679 about Infrastructure Delivery Plan
PO1674	MRS A Staton				The grounds for that are: Loss of important local amenity – The Mount is a very important open space close to the town.		
PO1650	Mrs G Webster				Visual impact – restrict important skyline and further afield. The proposed sites are near or run on particularly at night with street lighting.		
PO9369	Councillor Rebecca Done				High quality Landscape – unsympathetic to landscape and the character and quality of the area.		
PO9256	Mrs Jane Harrison				Impact for infrastructure – primary schools in particular (Leek 1st school and Beresford Memorial School) will struggle to keep up		

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

							<p>spaces and countryside access</p> <ul style="list-style-type: none"> • See para response to PO89 about landscape evidence
PO1689	Mr David Morgan				Object	<p>I am writing to express my strong objection to the proposal to build houses on the Mount. I specifically object to the building off houses on sites: LE022, LE127, LE128a, LE140, LE142A, LE142B. When I first heard about the proposal to build in this area. I was genuinely shocked and still cannot believe that the proposal have been submitted to build on such beautiful landscape which has helped to shape leeks identity as Queen Of the moorlands.</p> <p>I work in the local community and I have not heard a single resident of Leek express support for these proposals – they have expressed deep anger and concern. I live locally to the Mount and regularly take walks there and it is very clearly, a popular destination for walkers and cyclist. However, I do not feel that this is area that is solely of Leek by these who live in its vicinity. I believe that the mount is an area that the people of Leek genuinely cherish and it would be a tragedy if a major housing development were built along it, The Mount does provide an important amenity for local residents including Hargate estate. I feel it would be unacceptable to build houses on it, spoiling the unspoilt beauty of the area and leading to a huge increase in the traffic which would obviously cause a major hazard to walkers and cyclist.</p> <p>I feel it is unacceptable to deprive residents of a very built up area such as Haregate estate of the opportunity to enjoy the beautiful country side and open space this that the mount offers. If this proposal is passed then I feel that the character and identity of Leek will be very adversely affected and this will have a very detrimental impact on its image in terms of visitors and attracting business</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways • See para response to PO699 about economic benefits of housebuilding

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1284	Mrs B Ward				Object	I write once again to protest against the proposed development of housing along and off mount road. We have already had 2 public enquires and each time the inspector has upheld the decision not to allow these fields to develop along mount road. This is a great amenity for the town, especially for residents this side of Leek. I feel that we have been left a short stretch off mount road but with all the roads going off it Mount Road itself will probably have to be widened and will become a bi pass for traffic between Buxton Road. Walking along a country lane enjoying the views. Do people walk as much on the other side of town? Aren't there still places for the development within the town? Not touching our open spaces. Where are 600 new houses on Mount Road going to work?	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO679 about Leek employment land requirements
PO1405	Mrs M Smith				Object	With regard to the proposed 400 plus houses to be built on the mount, I would like to express my concerns on the matter. I can't help but for see the problems 400 to 800 cars will create, trying to leave Mount Road to gain access to the Buxton Road. They will be queuing up! Most families these days have at least one car some have two. Mount Road was not built for such traffic	<ul style="list-style-type: none"> • See para response to PO89 on highways
PO1483	Mrs C Lane				Object	I object to any housing being built in this area. It is an area used by many people for walking etc. – many for health reasons e.g. for me. We must keep our open spaces that are in walking distance of our town, once lost – gone forever. Don't let us loose it	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access
PO1714	Mr G Carding				Object	I would like to object to the proposed housing sites on Mount Road Leek. The Mount has been a historic to the people of Leek for generations for its 360 degree panoramic views of natural beauty. Being born in Leek I have walked over the mount all my life and always enjoyed the peace and quiet surrounded by the countryside views which are irreplaceable building housing in this area would also destroy the wildlife and a result in the loss of open space. This road is unsuitable for the large volume of traffic which would be generated by all the new houses and is narrow in places with dangerous junctions at both end of the road. The roads in this part cannot take any more traffic. Please find more suitable site within the town, if we keep building out into the countryside where will the border of Leek End? Ashbourne	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO256 on ecology evidence • See para response to PO89 on highways • See para response to PO89 about option sites assessments and sustainability appraisal

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1997	Mr D And L Robinson				Object	<p>I am writing to protest against the latest site allocation plan for the SMDC. To build upwards of 4000 house in our beautiful area is criminal. It is obvious a Central Government ploy, of threats, then offer of £1000.00/house has worked. For the SMDC to deny the £1000 donation has no bearing on the decision is pure fantasy. The area most concerned is to myself is the site allocated off Mount Road, Leek. At present most of the estates west of Mount Road are below the crest of the Mount, the proposed sites in places near or near to the crest, which will make them highly visible over a large area, particularly at night with street lighting. The site ref LE127 is of particular interest to me, it is obvious access to the site will be through the south end of High View Road with services readily available. If we are building approx. 100 houses on LE127, we can expect a large increase in traffic along High View Road and Moorland Road. Sites ref: LE066 & LE128 will be close proximity to a 35mtr high wind turbine and the plans already approved, which is highly undesirable. The building off 800 houses mainly on the eastern flank of the Town does not seem logical. There must be other sites in the Southern and Western flank of Leek which could be exploited; the advantage of this would be to reduce the great impact on schools & amenities in the Mount catchment area. Other problems concern electrical supply, gas supply, water supply sewage disposal, which can create serious problems due to the massive local increase in demand.</p>	<p>All Planning Authorities are eligible to receive New Homes Bonus which was introduced by the Government to reflect and incentivise housing growth in their areas. It is based on the amount of extra Council Tax revenue raised for new homes and is payable annually over a 6 year period. However irrespective of this the Council must demonstrate to Government Inspector that it will fully meet residual housing and employment requirements for the District as a whole, and for Leek, to have a sound Local Plan in place.</p> <ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO1353 about streetlighting • See para response to PO89 on highways (these comments are predicated on a Mount Road access arrangement) <p>The Council would assess residential schemes in proximity to approved wind turbines in accordance with Local Plan and NPPF amenity Policies, and ETSU (as amended) noise criteria etc.</p> <ul style="list-style-type: none"> • See para response to PO89 about option sites assessments and sustainability appraisal • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO673 about educational requirements • See para response in PO699 about utilities and flood risk

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1732 PO1722	Mrs Mary Emery Mr & Mrs V and J Emery				Object	<p>LE066, LE067, LE068, LE143a, LE127, LE128, LE140, LE142A, LE142B. I wish to register my objection to the proposed development of the land on The Mount My reasons are as follows. There are sufficient brown field site available, such as The former Just juice site on Prince Street is now vacant The former Big Mill on Mill Street, ripe for development The former Brough, Nicolson and Hall Mill on Ashbourne Road A reasonable plot of land on the Organ Ground which was the former East Street Nursery which is now vacant. Shortly to become available the former Britannia Building Society plot of land on Cheddleton Road Land on Foker Grange on Macclesfield road The Mount is a valued area of outstanding beauty and must be kept for future generations to enjoy. It is supposed to be green belt land; consideration that seems to have been overlooked. I would like to point out the impact of the proposed development would have on local services i.e. schools, GP services, the road infrastructure and employment needs. I am also very concerned about the effect on the local wildlife,, the increase in traffic, and noise levels this development will bring. I would like to know what happened to the housing development at the Sainsbury's site, which never seems to have transpired</p>	<ul style="list-style-type: none"> • See para response to PO89 about Leek housing requirements and windfall allowance <p>Residential schemes within the urban area involving employment land or buildings not allocated for housing, would be assessed against Core Strategy Pol E2, and other relevant Core Strategy and NPPF policies</p> <p>The former Britannia premises on Cheddleton Road are earmarked for two sites for mixed alternative uses (LE150 and LE235), in response to the town's residual employment land requirements to 2031 [see table 4.4 consultation document].</p> <p>Note that none of the Mount sites falls within the Green Belt, whereas the western edge of Leek has Green Belt status. Whilst Councils can allocate within the Green Belt National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). The Council recently completed a Green Belt Review which assessed the suitability for retention of all areas of Green Belt in the District, against the five Green Belt 'purposes' set out in the NPPF. This will be used by the Council alongside other evidence inprogressing its Local Plan. The NPPF also allows for consideration of development proposals that would represent 'limited infilling', or in some cases redevelopment of 'brownfield' sites in the Green Belt.</p> <ul style="list-style-type: none"> • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO673 about educational requirements • See para response to PO89 on highways • See para response to PO679 about Leek employment land requirements • See para response to PO256 on ecology evidence • See para response to PO256 about air pollution and environmental health considerations of development <p>Part of the Sainsburys site attracted reserved matters approval for 39 dwellings as part of SMD/2013/1098.</p>

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1750 PO1772 PO1757 PO3641	Mr and Mrs W Lovatt Mr S Lovatt Mrs J Lovatt Mr and Mrs Jones				Object	<p>LE069, LE143a, LE128, LE140, LE142A, LE142B. We would like to submit our comments concerning the above consultations with the specific regard to Leek east. These consultations with specific regard to Leek East and the area of mount road. This is a semi-rural area outside the town development boundary. One of the attractions of this area of Leek is that the boundaries for development are very closely defined. This means that within 10minutes walk of the town centre you have access to open space, which makes the mount area very popular for leisure activities such as walking jogging and cycling. This is a important when considering what opportunities there are for leisure and exercise so close to town. The fields provide a home for various types of wildlife and this together with the farm animals that graze them, provide access to a nature very close to the heart of leek. The views from the mount are spectacular and largely unspoilt. Any developments of any of all the listed developments of the type proposed would totally alter the area, as it has with the Buxton Road end of Mount road. If all the development listed above were to proceed. In excess 400 houses would be constructed on what is pleasant open countryside. The access along Ashbourne Road and Mount road provide a road infrastructure that would be totally inadequate with the volume of traffic generated by such a development especially on the bad junction where mount road meets Ashbourne road near Poplar Service Station.. Access via the already existing estate off kniveden lane and or High View road and Moorland Road would be impossible to sustain, given the narrow nature off the roads in question and the cars parked on either side of the roads in what is a already busy residential area. Creation of a rat run would have serious consequences Public transport via the bus service would be totally inadequate. There are significant areas of land that would be ideal for development that are presently brown field sites within the town centre and the town development boundary. Development would be ideal of these sites would not impact on local wildlife and leisure activities and would be more sustainable as they would result from a increase in traffic in outlying areas. Given to the employment situation in Leek, a large proportion of these would inevitably be homes for communities for the potteries conurbation and or Macclesfield and greater Manchester. This would ruin the character and community feel of the area. Given the recent headlines concerning the lack of affordable housing in rural locations, more consideration should be given this type of development, rather than encouraging urban sprawl which would ruin the character of this town.</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO256 on ecology evidence • See para response to PO89 on highways <p>Leek is already served by a number of frequent or less frequent bus routes, connecting to centres such as Hanley, Cheadle, Buxton and Macclesfield. A number of these use main arterial routes such as Buxton Road/Ashbourne/Springfield Road. In some circumstances, major residential developments may be required to contribute to improved bus routes/bus facilities in accordance with Core Strategy Pol T1/Staffordshire Local Transport Plan.</p> <ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO679 about Leek employment land requirements <p>An element of affordable housing will be required for all major housing schemes in the District, as set out in Local Plan Policies. The Council may also require an element of starter homes, and self-build plots on such sites. The Council's housing/design policies and the NPPF expect that housing schemes provide for variegation in design; and a mix of house types to meet differing socio-economic needs, including affordable housing.</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1474	Mrs G Armstrong				Object	<p>As a resident of Moorland Road since 1975, I write to you to express my concerns over the appalling plan to yet again to destroy an area of the town much loved and frequented by its residents for countless generations. I can assure you that the contents of the letter not only reflect the views of me and the residents of moorland road and Kniveden Lane but those of Leek in general. The proposal to build 400 houses on the Mount came as a shock to the town. Whilst I am not opposed to the idea of providing some housing in the Leek area, I cannot equate with the requirement for the number your department are planning. As regards the location, how can you say that a beautiful location like the Mount is in need of development when there are numerous locations that in the area that are an eyesore and would be more than fit the bill for re development? If your department were to take the time to canvas the people of Leek you would find that it is considered an asset to this town. The Mount is an area of outstanding rural beauty with great views across the town, supporting an abundance of wildlife whose habitat would be destroyed if the plan goes ahead. It has long been a source of relaxation, leisure, exercise, and even welcomes retreats for courting couples and families with children or people exercising their pets can be seen walking the Mount in complete safety without the fear of being subjected to danger from large numbers of cars. This would change if the whole scheme goes ahead. Is it right that future generations should be denied the pleasure their forebears derived from this beautiful road, With an average of each household owning 2 cars each the plan to build 400 residents could unleash about 800 vehicles all trying to support those numbers. Mount road would be saturated with vehicles all trying to leave either via the junction with the A523 Ashbourne Road or the A53 Buxton Road. Both roads are very busy main roads. After frustration of accessing these knock on effect would choke the town centre which struggles now at certain times to maintain a smooth flow. No doubt the un adapted and unmade section of Kniveden Lane would be upgraded encouraging it to be used as a short cut between Ashbourne Road and Buxton Road. The only thing that stops it being a rat track now is that it is unmade and has ruts and pot holes. Also of concern is that with this sort of development you require to provide a proportion for social housing. We all know who are housed in these and what effect it has on the surrounding area. I need say no more. Can you explain why there seems determination within the planning bodies to destroy what is beautiful and precious to the people of Leek with total disregard to the preservation of the environment and wishes of the Leek populace. If they want to improve this town why don't they concentrate on some of those areas in dire need of redevelopment and of which there are many in this town. I along with the majority of the other house owners in the vicinity, share at the lack of the thought that has obviously not being thought that has gone into this project. I ask the question; have any of the councillors or those on the planning dep actually</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO89 about landscape evidence • See para response to PO256 on housing needs evidence • See para response PO679 about identification of sites during 2015 and 2016 public consultations • See para response to PO256 on ecology evidence • See para response to PO89 on highways • See para response to PO1750 about affordable housing • See para response to PO89 about option sites assessments and sustainability appraisal • See para response to PO1353 about public consultation and Statement of Community Involvement

						bothered to walk to location, to see for themselves what they would be destroying and ask residents for their thoughts. No, I doubt it very much if this is the case.is it just a figure on the map to them? I understand that the majority are not from Leek and so don't really have its best interests at heart. These so called councillors were voted in to represent the towns folk and listen to their view. This has not obviously been thought out thoroughly and it makes me wonder what sort of people will be running the council. Is it yet again something to their advantage and not that of the town. Their priorities do not appear to be the people of leek there to represent them. I make this representation not only on behalf of those directly affected but also the people of Leek who are totally opposed to this desecration of one of the most beautiful and well-loved areas.	
PO1520	Ms Angie Guest				Object	Detrimental impact on an important & much valued amenity area. The location provides a green space accessible to and used by the wider population of Leek for walking cycling and jogging. The mount follows part of the route of the Staffs Moorlands walk 'Leek Landscapes' managed by the SDMC and marked on the OS 1:25000 map. Described in the leaflet published by the district council as offering a walk 'through attractive farmland with interesting views over Leek. This would be compromised by the development. The panoramic views from The Mount over the skyline of Leek and countryside beyond are 2 nd to none. These would be severely restricted. The scale and the unbalanced distribution of this development sites, concentrated in this part of the town will lead to increase traffic in making the mount a busy road between the Ashbourne & Buxton roads as well as loss of a rural environment outside the town's boundary.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • Development proposals affecting the routes of recognised public rights of way would need to make allowance for them. • See para response to PO89 about landscape evidence • See para response to PO89 on highways

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1690	Mrs C Wainscott				Object	<p>We write to reinforce grave concerns regarding the development of these 2 sites. LE127 and LE128a Firstly our primary objection to these 2 sites being development for housing is the impact of the traffic movements along mount road which would inevitably result. We have been residents on Mount Road for 47 years and during that time I have seen a significant increase in the usage of this road which has become somewhat of a rat run linking the main A53 Leek to Buxton Road with the A523 to Ashbourne Road. It hardly needs us to remind the local authority of the tragic road traffic accident a few years ago and this resulted in loss of life of a pedestrian following a collision with a vehicle and the regular use on the roads for recreational walks by many residents of leek coupled with preposterous 60mph speed limit already creates a recipe for further incidents. Further to the junctions connecting mount road to the A53 and A523 are already of poor standard with limited visibility when emerging particularly onto the A53 opposite novi lane.</p> <p>Secondly the area of Mount Road currently provides a buffer between existing development and open countryside and valuable interface between the 2, which is conveniently located to provide a much enjoyed amenity to many local amenities to many local residents who enjoy the tranquillity of the area for its beauty. From the planning policy perspective we understand that Governmental priority is given to brownfield site for future development and as Leek still exhibits the remnants of its industrial past with numerous redundant mills and industrial site still undeveloped it is hard to fathom how the logic that suggests the prominent greenfield site on mount road adjacent to open countryside should be developed in preference to multiple redundant industrial site in the area could ever be defended. We respectfully request therefore that the above concerns are considered by the local authority when deciding on the appropriateness for housing development of sites LE127 and LE128a for inclusion in the emerging SMDC local plans</p>	<ul style="list-style-type: none"> • See para response to PO89 on highways • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO89 about Leek housing requirements and windfall allowance
PO1561	Miss A Hampson				Object	<p>Any development in the Mount on proposed sites will be visible from some distance, thereby impacting not just on leek, but also the wider area. The infrastructure is inadequate I am not convinced the possibility of infill sites in Leek</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO673 about educational requirements • See para response to PO89 about Leek housing requirements and windfall allowance

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1569	Miss L Sheldon				Object	I wish to object the proposed development on Mount Road for the following reasons: Serious damage to the natural habitat of endangered wildlife changing the entire environment forever. Increase traffic would cause major traffic issues not only cause major issues on the Mount itself but having a knock on effect on the town where congestion is already a issues. For generations the Mount has been a popular venue for walker's biker's families in general. It has provided a safe and pleasant environment and giving access to some of the finest views across Leek and Staffordshire Moorlands.	<ul style="list-style-type: none"> • See para response to PO256 on ecology evidence • See para response to PO89 on highways • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access
PO1557	Mrs G Webster				Object	I have never protested before but I feel compelled to write this let reg the proposed developments across the mount. When I was young I lived on Haregate Est and many times my parents took my siblings and I across the mount it was something we enjoyed seeing all the farm animal and wildlife. As I got older I would still walk the mount and dream of one day owning one of the houses which were only a couple of minutes' walk away from being in the countryside. That dream was realised in 1976. Now I am retired it is wonderful to be able to stroll round the mount each day. My husband twice a day come rain or shine, and able to do just that take in the views or have conversations with people we meet, not just from this area but from other parts of town. It is good for the soul as well as the mind. It is a marvellous asset for the town for young and old alike a great place to relax and exercise. It is precious and should be protected for future generations 'never know what you have got till it's gone' comes to mind as was the case with what was a beautiful roundabout which stood proud at the top off Derby St. Do we need so many more houses in leek if so we do not build on the field opposite the cricket club on Macclesfield Road which would not have the catastrophic impact of hundreds of houses on the mount or why not build them on Blackshaw Moor where there is already a small estate. I hope this marvellous asset treasured by so many can be saved for the town and the people of Leek.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO256 on housing needs evidence • See para response to PO1732 about western Green Belt • Note that Anzio Camp received planning consent for erection of extra care housing, live work units, ancillary social centre and facilities building and change of use to holiday park in November 2015.
PO1549	Mr P Sinclair				Object	Would like to object to the development of the 350+homes on sites across the Mount. The area is used by lots of people walkers, families with young and older children dog walkers, cyclist, runners, horse riders, all enjoying the wonderful views over the Leek, which has been enjoyed for many years. I've been coming around the mount since I moved to leek in the late 60's, building more houses will mean the loss of this lovely scenery for ever. Also the health & safety factors of all these extra cars 600-700 trying to get out at either end of the mount, onto the Ashbourne Road and Buxton Road which is already busy without adding additional traffic. Then pollution of the air	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways • See para response to PO256 about air pollution and environmental health considerations of development

PO1538	Mrs C Whitehurst				Object	I am disappointed that local objections to development along Mount Road leek have been ignored by those who claim to represent us, and I must once again voice my objections. The Mount is one of our most beautiful and well-loved amenities for local walkers, cyclist, runners and dog walkers. A short walk from town which I personally use at least 3 times a week whenever I walk around I meet at least 10-12 others. It is also a safe route to take children of all ages to appreciate the country side, farm use and wonderful views – all of which will disappear. Many habitats for small animals and birds will go along the grass verges and lost trees, so much for our greener landscapes. Who is going to buy these obviously very expensive houses not my children who can hardly afford to rent never mind buy? But I'm sure the overspill from Macclesfield, Manchester + Buxton will appreciate these cheaper houses than they can afford there. Where will all the children go to school our local ones are full and have little or no space to expand, more Drs and Dentists will be needed. Traffic along the mount will be busy. It has already increased during times of the road closures repairs etc, and now this new short out has been found it will continue to be used. As there are now plans in place to convert several old apartments such as old Mills in the town a large number of houses will not be needed by local people and smaller brown field sites can be found in and around leek for a much more acceptable amount rather than such a large estate. If the £1000 per house built is so tempting why not just ask us for more council tax – I'm sure most people would be willing to pay to save this precious area for our children and grandchildren. I would. Please please listen to our objections regarding this atrocity in our wonderful town.	<ul style="list-style-type: none"> • See para response to PO1353 about public consultation and the Statement of Community Involvement • See para response to PO89 about open spaces and countryside access • See para response to PO256 on ecology evidence • See para response to PO1750 about affordable housing • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO673 about educational requirements • See para response to PO89 on highways • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO673 about educational requirements
PO1547 PO1542	Mrs C Keates Mr B Day				Object	The Mount is a very important area for the town of Leek. This whole area is an important amenity area for the town – it was promised a few years ago that there will be no further development after the completion of Mountside gardens. Further developments will destroy the open views of the Morridge from the town. Some of the areas highlighted for development was gifted to the town presumably to protect them and for agricultural use. Development of the Mount will lead to greatly increased traffic on what is basically a country lane. Safety issues at both junctions. The importance of the local people who use it. Young walkers, runners, joggers, cyclist, horse riding, dog walkers. These include singles, couple. Family groups and organised walking groups aside. We urge you to look at these plans very carefully before you decide to ruin this beautiful area. Surely there are other smaller areas which could be utilized for future needs.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO89 about landscape evidence <p>The Council communicates with landowners of affected sites to ensure they are available, prior to selection.</p> <ul style="list-style-type: none"> • See para response to PO89 on highways

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

PO1492	Ms Dawn Garrett				Object	I write with reference to the planning proposals along The Mount in Leek. I moved to Leek last August, the countryside being one of the big draws. I'm dismayed to find that my favourite dog walk is earmarked for extensive development. The absolutely magnificent views would be lost forever. The birdsong drowned out by the inevitable increased traffic load. The wildflowers at the side of the road and the sheep peacefully grazing, all gone. The creeping urbanisation of such a lovely country town is a big worry. Surely it would be better environmental sense to deal with the falling-down mills and derelict housing in the town before building any further? Regeneration is a much more modern concept and would further revitalise the town itself. For me and my family access to the views, the fresh air and the wildlife is balm against our stressful and hectic working lives. I live on Ashbourne Road so this is not NIMBYism at work, it is a genuine plea to save this lovely area for everyone. Now and in the future.	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 on highways • See para response to PO89 about Leek housing requirements and windfall allowance
PO1581	Mr C Chauveau				Object	I wish to firmly object to any housing development on the mount as I love to go running there with my dad and really enjoy the view into open countryside.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence
PO1586	Mr J Jones				Object	I wish to firmly object to any housing development on the mount as I often go there cycling and walking there with my family and I think it is very special place and would be completely spoiled by houses.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence
PO1591	Mr L Emerick				Object	I wish to firmly object to any housing development on the mount as this is a natural beauty spot with open views into the countryside and it should need to be protected. My family often take our dog for walks there and feel it should be protected	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1692	Ms K Machin				Object	I would like to object to the proposed housing sites on the mount road, leek as outlined in the preferred options site and boundaries of staffs moorlands local plans – sites LE127, LE128a, LE140, LE142A, LE142B. This area should not be built on as it will ruin the lovely views over Leek and the Horizon and has been enjoyed for generations by walker’s cyclist etc, who on a nice day vastly outnumber cars on this stretch of road. This road also appears to be outside the site boundary. By building approx. 400 houses it will no longer be a country walk yet another housing est. The council should be committed to maintaining green belt land and encouraging people to get fresh air and exercise in an age increasing obesity. There are surely plenty of empty mills and brownfield or former industrial sites within the town which could be developed for housing instead of building on open fields. There is also no development proposed in the west end of leek-why not? The planners need to go back to their drawing board and identify more suitable sites across the whole leek instead of concentrating on the one unsuitable area. Please save the mount	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO1732 about western Green Belt
PO1706	Mr C Hoggarth				Object	Ref: LE127, LE128a, LE140, LE142A I am writing to you with regards to you with my objection to the proposed sites above for housing development that I consider will result in loss of countryside e an recreational amenity to local residents. My objections consist of 3 main concerns: The loss of green field sites. The enclosure of the open space that is mount road. The loss of recreational amenity of Mount Road through the amount of additional traffic. The areas of land in question is border Mount Road, a low traffic route with broad open views across countryside to the east over the town of Leek and beyond to its west. Mount Road well known locally for the pleasurable route for exercise it provides and is much used by local residents and visitors. Enclosure with housing development would turn an open country lane into just another urban roadway and would destroy the views reducing the attraction of the area. The associated increase in the traffic would severely reduce the safety route. I consider that the cumulative effect would be to destroy the area as a recreational amenity. Of the area surrounding the current town boundaries, I think that this is one that would constitute the greatest loss, both with respect to the beauty of the outlook and the loss of its use for recreation. Mount Road is a beautiful location; visitors jealously comment how lucky I am to have such an area on my doorstep. To destroy it would be a disgrace and I hope you will reconsider the proposals	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1705	Mrs J McGuinness				Object	<p>Ref: LE127, LE128a, LE140, LE142A. As a local resident in objection to the above proposed plans For the Mount in Leek. I object to the scale of development for this beautiful country lane on the outskirts of our town. It is a area of outstanding beauty, boasting much wildlife, flora and fauna. The woodland and hedgerows are home to valued wildlife and birds. In addition there are farm animals, bats, foxes, stoats, mice all of which inhabit this area has been identified over existing brownfield sites in town. Could the planners not relax the rules and allow sites in town that have been previously been refused for development? Do we really need 400 houses? Do we really need another 1 st school, at this end of the town? I am dubious as there are as many properties in the town already for sale, unoccupied or derelict. Where are all the people coming from to buy these 400 houses? My main objection is the sheer volume of traffic. The roads are totally unsuitable to accommodate the amount of traffic that's will be generated by a school and 400 houses. This development has the potential to create at least 800 cars from the proposed housing development (average 2 cars per house hold) and even more generated from schools with staff and pupils, including the cars school buses . The lane is already suffers from many vehicles using the lane, as a rat run and this will increase. In addition to being a resident The Mount I am also a daily dog walker and I am concerned for the safety of those using the lane for leisure, i.e walker, dog walkers, joggers, mums with little ones, cyclists, horse riders and those coming to sit on the seats provided to take in the beautiful views. If development goes ahead these activities will come to an end and once again our green landscape will disappear with the town boundaries being pushed out further and further. Where will local people be able to go without getting into these cars and causing more traffic congestion on the roads, and what about those without transport? The road junction at either end of the Mount are not without difficulties. The Buxton Road junctions Is a staggered cross roads with Novi Lane and needs to be approached with caution. At school times It is used by parents/carers/school buses. I cannot imagine the chaos that will transpire if another school is permitted on the Mount – it will certainly become a lot busier and more dangerous. Do we really want to put our children at risk? Walking to and from school will not be a solution as it will be to dangerous. Let us not forget that in additions to this road junction, a short distance down the same road Churnet View transport comes onto the Buxton Road via Abbots Road, and Leek High/The Meadows/East St 1 st School all feed into and use Buxton Road via Springfield Road. Each school has buses/taxis and cars transporting pupils and the volume using the roads at the same time of day has potential to cause bottle necks on this busy main road. Another school shall mean 7 school all using the same road – local residents will have to keep of the road to the volume of traffic down. The other end of the mount leads to Ashbourne road and this junction not only has obscured visual</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO256 on ecology evidence • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO673 about educational requirements • See para response to PO256 on housing needs evidence • See para response to PO89 on highways • See para response to PO89 about open spaces and countryside access

						<p>access but a difficult angled junction. Surely this is totally unsuitable to transport large volumes of traffic which will be generated from 400 houses and a school! If a alternative junction is proposed this can only be achieved by sacrificing another green field. The Mount, Ashbourne Road are all used by big lorries, buses, tractors, trailers, farm stock to and from stock market, farm machinery, lorries transporting goods to and from Buxton, Ashbourne, and Surrounding areas. These are very busy roads! Can we really add to this without causing major problems? I urge the council to consider these proposals very carefully giving due time and consideration to alternative sites in town, because once the boxes are ticked it will be irreversible and the mount will be changed forever.</p>	
PO1738	Mr Martin Armstrong				Object	<p>LE127, LE128A, LE142A, LE142B Why turn a place of beauty into an eyesore when the council should be concentrating on transforming areas which are an eyesore into places of beauty. There are so many alternatives to the proposed sites for housing development around leek is without having to take away Leeks most cherished leisure route. Mount Road has long been a source of relaxation, leisure and exercise to the residents of Leek It is used daily by scores of locals who walk, run, cycle, and enjoy the tranquillity of this country lane which provides fantastic views across Leek and towards the peak district. Where else in the area is there such an amenity so conveniently within walking distance and safe for people to enjoy. The Mount is also a natural habitat for wildlife including many endangered species. The like of owls, woodpeckers and many more other birds and small mammals would be severely put to risk and their habitat will be seriously damaged. This proposed totally unnecessary housing development would not only destroy all this but also a place extra stress on the town centre already, struggling to cope with congestion. The large number of extra stress owns the town struggling to cope with congestion. The large number of extra vehicles would adversely affect road safety and be a danger to the public particularly on both exits from Mount Road. These are but a few of the issues generated by this ill thought out scheme</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO89 about open spaces and countryside access • See para response to PO256 on ecology evidence • See para response to PO89 on highways
PO2905	James Chadwick	Staffordshire County Council			General comment	<p>The allocations proposed around Mount Road will necessitate highway improvements for example road widening, provision of footways, completing Kniveden Lane to adoptable standard, possible (probable) junction improvements at one or both ends. The removal of the sites between LE127 and LE128a could make the delivery of the required scheme more complicated and therefore requires further consideration including the reinstatement of sites LE069 & LE128b.</p>	<p>The emerging Local Plan sets out how the residual housing requirement for Leek will be achieved by a combination of allocations within the urban area, and along the Mount (making allowance for windfall/small sites allowances). Additional housing sites along the Mount not required.</p> <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p>

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO3658	Mr P Ash				Object	<p>My husband and I most strongly oppose the number of sites on Mount Road, Leek as preferred option for new homes. Both of us have lived in Leek all our lives and for the past 50 years have resided on the Moorland Road. Mount Road is acknowledged as an area of open space for walking, cycling, and jogging and it is a area of free from volumes of traffic? I know my mother exercised, pushing me in my pram walking round the Mount. Building houses either side of the road would most likely make the Mount Road into a main road linking Ashbourne Road to Buxton Road. This road is not sustainable not wide enough to take heavy vehicles and constant stream of Traffic, if numerous houses were to be built either side for Health and Safety reason would require pavements, gutters and drainage all of which will narrow, the width of the road for vehicles, in all probability each house will have 2 cars, which again will increase the flow of traffic. To surface the top of Kniveden lane would make this road a rat race and a highway leading to an increase of even more traffic may I remind the council that when the developers applied for planning permission to build homes on the land behind sunny view at the end of Ashbourne Road – grave concern was exposed by Staffordshire County Council of traffic from the houses converging onto a busy main road, would that not also apply to traffic from the houses converging onto 2 main roads – Ashbourne road,, and at the other end of Buxton road. I would like to draw your attention to the fact when Mr William Milnes gave the land he owned to the council, land where now stands Leek High School, and is playing fields which borders Kniveden Lane and extend on the Mount, there was a clause in the gift of land that this land would be only used for educational purposes. One may also ask the council “where are all families and buyers that require these houses? Leek has not the facilities to accommodate such a huge increase in its population. The Dr’s are already working to their full capacity, which schools primary and senior have places for an increase in children of school age? And where will the new comers to the area, travelling from the Mount to Macclesfield or to the potteries will increase the flow of traffic though the centre of the town these were problems with planning permission to build house on ?? At Leek brook on the site of Joshua Wardens factory, as to the nature of the ground and the fact the earth may have become contaminated from factory work etc. These problems were overcome and rectified and houses were built. Now houses cannot build on this land surrounding Sainsbury’s Supermarket because of problems with the land – if land at Leekbrook can overcome the problems with the land around Sainsbury’s overcome the problem? And houses can be built on land previously occupied and accommodating buildings.</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways <p>The Council is not aware of any legal encumbrances upon this site.</p> <ul style="list-style-type: none"> • See para response to PO256 on housing needs evidence • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO673 about educational requirements • See para response to PO679 about Leek employment land requirements <p>The Sainsburys site as part of its mixed use consent SMD/2013/1098 still enjoys residential consent on part of the site. Note Environmental Health Officer did not object to that scheme (subject to conditions). The Council would assess residential schemes on sites affected by contamination in line with its adopted Policy SD4 and NPPF paras 120-121 NPPF. The responsibility of funding remediation rests with the developer.</p> <ul style="list-style-type: none"> • See para response to PO89 about Leek housing requirements and windfall allowance

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO3692	Mrs C Ryan				Object	<p>I am writing to express my objection to recently published plans to build on a large area of the Mount in Leek. Whilst understanding there is a need for some new housing, I feel this area is the wrong place and definitely too extensive. A few points I would like to share which may not take into account the professional opinion but a certainly take a common sense view. The Sainsbury's site was passed as a area for retail and business development with a to build on a small housing estate. This has not been fully developed and I understand it may because there are issues with asbestos and or some other contamination. Yet it seems it is fit for a pub selling food, a children's party play area and a supermarket selling some other consumable goods. If it is the case that there have been some bad decisions made around this site, the council officers responsible for passing this plan should own up and ensure this site is cleaned up. Enabling the plans many locals objected to, be completed. Of course this will mean a cost to the taxpayers whom are left carrying the financial burden of bad decisions made. I have no objection Education Land boarding Mount Road being to extend or build a primary school as have a shortage of places, the concern would be of increased traffic and the requirement for good provision of off road parking at the school if there were to be an entrance on that road. There is a site on the Buxton road Blackshaw Moor which has stood unused for many years since the Army ceased training there. It must have drainage, electrics and water on this site. This would be ideal for a small scale affordable housing site. It would also benefit the local school which has a small numbers of pupils and probably in danger of being closed in years to come Transport should not be a issue because there some buses to Buxton and local bus companies can benefit by providing peak time services. There must be other sites within Leek area suitable for developing. I tried to locate brownfield site on SMDC website but it shows many wordy documents but nothing is clearly stating where these sites lie. This could be my ineptitude but there could be more clarity for the lay person on these issues Building in such a large scale on The Mount would devalue housing already there. This may be viewed as a narrow minded but many people have worked hard and taken out huge loans to secure there desired homes. To effect there in such a drastic way I think is unfair and unnecessary. Most of the housing is currently at the higher end of the market and build social or low cost housing amongst his could be problematic from all prospective. If housing is built at the current level at these sites then who shall benefit those on low paid jobs, where I understand the most need is there are many units built as affordable part share homes unsold and many more privately owed sites of apartments etc. standing empty in Leek.</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO3658 about Sainsburys consent • See para response to PO673 about educational requirements • See para response to PO89 on highways • See para response to PO256 about Anzio Camp • See para response to PO89 about Leek housing requirements and windfall allowance • Property values are not considered material in planning law. • See para response to PO1750 about affordable housing

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO3942	Mr Alan Knott	Knights LLP			Support	<p>[See Location Plan attached to Question 1]. [Letter attached to representation, stating:] Land at Mount Road, Leek Firstly, it should be noted that Renew Land Developments Limited are aware of third party opposition to potential housing development of land at Mount Road, Leek. Many objections to the proposed allocations object to the principle of development, in addition to other site specific matters such as visual impact, highways, drainage, biodiversity, etc. This representation comments on these various matters in turn. Principle of Allocating Land to the East of Leek for Housing Development The bulk of housing allocations suggested for Leek are proposed to the east of the town. The principle of allocating sites in this general area is supported for a number of reasons as set out below.</p> <p>Firstly, with regard to the principle of such an allocation, the LPA, in accordance with national policy, has to allocate a sufficient number of suitable, available and deliverable housing sites in order to ensure that objectively assessed housing needs can be addressed over the plan period. Failure to do so would render the Local Plan unsound at examination.</p> <p>Secondly, Leek is one of the largest towns across the District, so should be taking a significant proportion of the overall housing requirement because it already has significant infrastructure, services and facilities to meet the needs of additional development.</p> <p>Thirdly, if development needs are to be met, then sites outside of the existing settlement boundaries will be required to meet additional housing needs. The LPA has already confirmed that it will be conducting a Green Belt Review as part of the current Local Plan process. If the LPA is having to review its Green Belt boundaries around rural settlements and other towns, then Leek cannot be excluded from that process.</p> <p>Fourthly, much opposition to the proposed allocation of land currently designated as open countryside to the east of Leek is founded on the assumption that other previously developed sites are available. The site options consultation does identify a number of infill sites within the boundary of Leek, and many of these are former mill buildings or other vacant industrial or employment sites. However, these sites would not be sufficient on their own to meet the overall development requirements for Leek.</p> <p>Fifthly, land to the west of Leek is currently designated as Green Belt, and land to the north and west of the town is constrained as a result of them being located in areas at risk of flooding. Land to the south of the town is also covered by public open spaces / playing fields, as well as a large golf course, which limits development opportunities in these areas further. The above</p>	Comments in support of this site, and clarification of landowner position, noted.

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>views are supported by the LPA, who state that: The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). The west side of Leek is Green Belt and the study recommends that housing development should not take place on this side of the town to avoid adverse impacts. This means that sites at the eastern side of the town (which is not within the Green Belt) require consideration to meet Leek's future development needs. The Council is required to meet its housing needs to 2031 and there are not enough brown field sites in Leek to achieve this so the Council needs to consider both brownfield and green field sites. In light of the above considerations, it is considered that land to the east of Leek, including land at Mount Road, is considered to be a suitable location for housing development. Visual Impact The Landscape and Settlement Character Assessment identifies land to the west of Mount Road to sit below the ridge line that is situated further to the east of the town and outside of any area identified as having an "important landscape setting to the settlement". The sites at Mount Road otherwise adjoin the urban area and would be viewed in the context of the built form of the town, rather than as an isolated residential development. Highways The four parcels of land proposed as Draft Potential Allocations and Draft Reserve Sites are located to the west of Mount Road, and each site could be accessed directly off Mount Road. Site LE128A could also be potentially accessed off Kniveden Lane to the north (subject to further detailed investigations, and a secondary access to site LE127 could potentially be provided off Thornfield Avenue / High View Road. Any development of this site could facilitate the wider improvement of the local highway network as a result of developer contributions. Mount Road is part of a longer distance walking route and the site is located within 500 metres of local bus stops and is within a reasonable distance to primary and secondary education, such as Leek First School and Leek High School. Otherwise, the site is considered to be located in an accessible location. The supporting documentation provided with the current consultation states that " County Highways do not raise any issues which would prevent development of this site ". It is therefore concluded that access is achievable, and subject to further detailed design work, would not be a constraint to delivering housing on this site. Drainage The site is located within flood zone 1, and has a low risk of fluvial flooding compared with land to the north and west of Leek, which has a much higher risk of flooding. There have also been few recorded incidents of sewer flooding in the surrounding area as confirmed by the Council's own Strategic Flood Risk Assessment. In light of the above conclusions, drainage or flood risk is unlikely to be a constraint to the development of this site. Biodiversity As part of the evidence base, the Council has commissioned a phase 1</p>	

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>ecological study of the district. Within this study, the sites have been studied and have been grouped into three parcels. The three land parcels in the study are identified as 35, 39, and 40. All three sites were identified as having very low biodiversity value overall, comprising of species poor improved grassland, scattered scrub and poor hedgerow. The study recommends vegetation clearance at the appropriate time of year, and in the case of site 35, a bat survey of an existing outbuilding to the east. In light of the supporting evidence, it is concluded that biodiversity or the presence of protected species would not be a constraint to the development of land to the east of Mount Road.</p> <p>Conclusion Knights are making representations on behalf of Renew Land Developments Limited who are promoting their interest in land to the east of Mount Road for housing development. The site is being promoted by a willing landowner and a willing developer and is otherwise technically deliverable. It is concluded that all of the land to the east [west] of Mount Road, as shown on the attached plan by Renew Land Developments Limited, should be developed. The site is located in open countryside, but not Green Belt, and the site is required to meet the open market and affordable housing needs of Leek given that opportunities to deliver housing on previously developed land and infill sites within the existing settlement are severely limited, and other areas of the town are constrained because of Green Belt, Flood Risk or because of landscape sensitivity. The council's own evidence base supports the potential allocation of land to the east of Mount Road. Leek is a large town at the top of the settlement hierarchy for the District, and cannot be excluded from helping to meet the housing requirement for the area. The release of land for housing on the eastern side of Leek is justified by the evidence base, and there are limited alternative options elsewhere around the town. The proposed release of land to the west of Mount Road through the Local Plan is therefore supported. The allocation the site would therefore ensure that the Council has a Local Plan that is positively prepared, justified, effective and consistent with national policy. Trust that this letter is clear in expressing our supportive views of the Local Plan and the proposed allocation of land at Mount Road, Leek for housing development. Otherwise, Renew Land Developments support the proposed increase in the annual housing requirement to 320 dwellings per annum.</p>

PO3934	Mr Mike O'Brien	WYG			Object	<p>[Refer to submitted Representations Report attached to Question 1] which states: The proposed urban extension to the east of the town...- LE127(100), LE128a(47), LE140(63), LE142a(140) and LE142b(40). The proposed extension also accommodates draft reserve sites LE069(42), LE128b(48) and LE066(50). These sites contribute a significant proportion of the proposed housing for Leek. The allocation of these sites, ahead of available brownfield/previously developed sites, is not in compliance Policy SS5a of the Core Strategy, which sets out the overarching strategy for development in Leek. ...None of the proposed allocations are considered likely to come forward in the short term based on the findings set out in the SHLAA (2015). However, we suggest that the allocation of sites which are deliverable within the short term should have been considered to a greater extent in formulating the preferred options due to the significant shortfall of housing delivery across the district. WYG consider that sites in Leek, such as LE243, are suitable to contribute to the short term delivery of housing in Staffordshire Moorlands. Furthermore, the spatial distribution of the draft potential allocations weighs heavily on this eastern stretch of agricultural land and it is noted that no potential allocations have been selected within the core urban area.</p>	<ul style="list-style-type: none"> • See para response to PO89 about Leek housing requirements and windfall allowance • The Council will be publishing emerging Local Plan policies for consultation in 2017 <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p> <p>The Council communicates with landowners of affected sites to ensure they are available, prior to selection.</p> <ul style="list-style-type: none"> • See para response to PO1681 about viability study <p>As set out in the Options site assessment tables on the website, a number of sites within the Leek development boundary are not proposed as either preferred allocations or 'reserve' sites owing to the fact that these sites could come forward at any time and be assessed against relevant Local Plan and NPPF policies.</p> <ul style="list-style-type: none"> • See para response to PO1732 about western Green Belt

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO4695	Mr And Mrs C and P Deighton				Object	<p>We are writing to register our very deep concern about the proposal to build on the land at the Mount in Leek. Those involved in the making such decisions do not all live in Leek and probably unaware of the enormous importance of The Mount to the people living around it in Leek. The implications of losing this much loved countryside walk are very serious, and far reaching. The close proximity of The Mount to the homes of so many local people means that it is a place used regularly, often daily, for exercise and relaxation, and is vital to their health and mental well-being. A large number of local residents are elderly, and often unable to drive: there are young families who cannot afford a car: there are several care homes that residents come for walks with their careers. What make The Mount so important is that is so very close to people. It offers beautiful views across the fields and means that people, who cannot get out into the countryside further away, can still enjoy seeing the birds and animals here only just a small walk from where they live. People walking their dogs have a natural means of contact and conversation with others – so important especially for those who live alone. To sum up, we all be deeply distressed to lose this place. So many have been walking there all through their lives, the disruption, and seeing the gradual destruction of a cherished part of their lives will bring an increased sense of isolation, and the feeling of depression faced by those in their later years as they become less able to things without outside help. Having the ability to step outside and walk in open surroundings without having to ask for a lift means a lot to someone struggling to retain their independence and enjoyment for life. To build on The Mount is clearly not necessary. There are as we have all been made aware recently, many alterations for example: various Brown Field sites empty buildings such as factories and offices: disused mills, empty houses apparently unoccupied for long periods. In view of the very unpopular bad decisions made, and the continuing loss of trust in the judgement made and continuing loss of and motives, of the planning department many now suspect that the decisions are influenced mainly by financial incentives from Government or other sources. We do not know whether this is true, but it seems obvious to us that a prompt decision to abandon the idea of building The Mount would bring peace of mind to many Leek Residents and go a long way to restoring the publics belief that members of the Planning Department actually do care about, and will respond to, consider and respect the views, the well-being and even the happiness, of the town they responsible for looking after, both now and the future.</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO256 on housing needs evidence • See para response to PO673 about new homes bonus • See para response to PO1353 about public consultation and Statement of Community Involvement

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

PO4826	Mrs L Scragg				Object	I would like for to make it known that I oppose the above on numerous grounds. The Mount in Leek has always been somewhere for the people of Leek to walk, cycle, jog, ride around not just people up end of the Town but people from all areas, young and old and in-between. The views, the Countryside is there for all to enjoy and appreciate, and we do. The road is not big enough now for all the extra traffic that is using it never mind more homes and a school. The Government wants to be healthier, do more exercise, get out and move, where will the joggers, cyclist go? If you sat up there for 24hours you would understand how used The Mount is used for recreation, pleasure and socializing, it's a free beautiful gymnasium – its where the children go to see their 1 st lamb or donkey walkers go to remember their youth and reflect on their lives, it's a place that puts lives into prospective and brings the troubled some peace. Please let we and our children's children keep the mount	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO89 on highways
PO4704	Mr and Mrs A & N Waterhouse				Object	Building 400+ houses on the area known by everyone as The Mount and used by countless generations as a gate way to the countryside would be against everything that "localism" would bring. The enclosed petition goes some way to demonstrate the strength of feeling that there is against the proposed building plots as set out in the Local Plan. The area is mainly agricultural and offers amazing views of the town and it's unrivalled and area as a whole acts as a buffer, between the town and the Peak District National Park. The road itself could not cope with the estimated 600 to 800 extra houses would generate. The Mount is a narrow road with no footpaths and junctions at either end of The Mount would become even more dangerous. Historically people travelling out of Leek to work, use the Stoke-on-Trent and Macclesfield Road with few travelling to Buxton or Ashbourne. This would mean that the roads in Leek Town Centre would become even more congested at peak times as these people make their way through town. We urge the Council to think again and produce alternative sites for houses thereby saving this precious area for future generations to enjoy	<p>The Council considers all petitions it receives in relation to formal planning consultations. They are also publicised on the Council's website including the action the Council proposes to take in relation to it.</p> <ul style="list-style-type: none"> • See para response to PO1353 about public consultation and Statement of Community Involvement <p>The Localism Act provides for local communities to draw up their own 'Neighbourhood Plans'; however their content must meet certain Basic Conditions such as being in conformity with national and adopted Council Strategic Policies; and they are subject to Examination and Referendum. Note that the Council has not to date received applications from Leek residents to draw such Plans.</p> <ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 on highways • See para response to PO679 about Leek employment land requirements

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO5884	Ms Linda M Beighton				Object	<p>I am writing to object to the proposed plan to allocate the following sites along Mount Road for housing: LE127, LE128a, and LE142a. Mount Road is used by hundreds of people every day of the week as a safe, sustainable leisure route something the council should be encouraging not removing. The current road for much of its length is too narrow for 2 cars to pass. Development would cause urbanisation & widening with the potential destruction of mature trees and dry stone walls. Exits particularly onto Ashbourne Road are already problematic and would need expensive, major work to cope with the extra traffic. People occupying houses at the moment would in the main work on the western side of the town in Cheshire-Manchester and Stoke. Major supermarkets are in the western side of town. Daily trips would further exacerbate the congestion which already chokes Leek. So many houses would destroy what is designated a special landscape area. They would impact on the views from the Peak Park and destroy an amenity area. Extending the own boundary to accommodate the proposed sites is undesirable. Using green field sites may be expected and enable larger profits for developers but there are still brown field sites and infill land available within the moorlands district.</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways <p>The emerging Local Plan policy NE2 protects all existing trees on site, or where this is not possible, expects a 2 for 1 replacement.</p> <ul style="list-style-type: none"> • See para response to PO679 about Leek employment land requirements <p>Note that since adoption of the 2014 Core Strategy, there is no longer a 'special landscape area' designation.</p> <ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about Leek housing requirements and windfall allowance
PO9099	Ms S Naisbett				Object	<p>I am writing to strongly object to the council's draft plan to build on the following area along Mount Road in Leek, Reference number LE127a; LE128a; LE140. There are many other brown field sites in Leek such as Foker Grange and Home Farm that are available for development, and where houses could be built. Surely these sites should be used first for any planned housing development. The area along Mount Road should remain as it is. Beautiful open green fields. There should be no need to build further homes in the green belt of Leek when there are approximately 1,170 homes that are currently empty in the Staffordshire Moorlands, and an additional 2500 homes for sale. Leek is a Market Town, and this is its great appeal to the people who live here, and also to those who travel to the town to shop, as well as tourists who come to visit. If the town keeps growing due to more and more houses being built, it will no longer be an attractive historic market town, it will become a very large town centered around housing, and if the building continues year on year it will eventually result in Leek becoming a modern day city. Mount Road is a wonderful area of natural beauty that is also very educational for young children. My daughter and I often walk along Mount Road because she likes to be surrounded by the green open fields and the nature it holds. She loves seeing and learning about the different types of wild flowers, butterflies, wildlife and farm animals we see in the fields along Mount Road. If houses were built on Reference number LE127a; LE128a; LE140 there would be nowhere locally for children who live in the area to experience this kind of nature and wildlife. Mount Road is also an extremely popular place for walkers, joggers, and cyclists, because it is currently a very quiet area, (has low noise pollution), and also has</p>	<ul style="list-style-type: none"> • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO1732 about western Green Belt • See para response to PO256 on housing needs evidence • See para response to PO89 about option sites assessments and sustainability appraisal • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways • See para response to PO256 about air pollution and environmental health considerations of development • See para response to PO256 on ecology evidence • See para response to PO1750 about affordable housing <p>The Council maintains a database of housing site suggestions (SHLAA). This database formed the basis of the 2015 'Site Options' consultation as all SHLAA sites above a minimum size threshold, and attracting a 'B' deliverability rating, were included in that consultation. Subsequently 2016 'Preferred Options' were narrowed down from this (plus additional sites emerging through the call for sites process, deemed</p>

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>few vehicles currently passing through it, hence is an area with low levels of air pollution. The green open spaces make it a very relaxing area, with wonderful views. If 380 houses were to be built in the area, it is estimated that over 750 more cars will be travelling along Mount Road on a daily basis, causing high levels of noise pollution and high levels of air pollution to the area. Thus making it a noisy, unhealthy, stressful area to walk, jog etc. This could lead to less people in the area going for walks etc/carrying out physical exercise. This goes against government efforts encourage people to be active and get fitter in order to fight against illness and obesity, e.g fit for life, and yet the Council is planning to build on a green field area which is ridiculous. Wildlife will be lost if houses are built on Mount road. My friends and I have seen wide variety of wild animals in the fields along Mount Road including wild rabbits, hedgehogs, badgers and buzzards. These areas of wildlife would be lost if houses were built here. The roads in the town are extremely busy with traffic. This makes them unsafe for young children to ride their bikes and scooters along. Mount Road is located on the very edge of town, and due to the current low traffic levels of traffic, this makes it an ideal area for children to safely ride their scooters and bikes. If 380 houses were built along Mount Road the road would become extremely busy with traffic making it another road which is not safe for young children to ride their bicycles. Question why don't disused buildings in Leek such as old mills be converted to affordable housing for young people, instead of allowing of 3, 4 or five bedroom luxury homes to be built along Mount Road- which is what developers will build along areas LE127a; LE128a; LE140. An example of this are the houses built relatively recently by Amos Group on land adjacent to Mount Road which were priced at over £230,000 each. All of the above reasons clearly show why the area along Mount Road Reference number should not be built on.</p>	<p>suitable). Home Farm site LE138 attracted a 'C' deliverability rating.</p>

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9141	Mr Ramon West				Object	<p>We wish to object to the 4 preferred housing allocation sites on the Mount, Leek. It would be an outrage to proceed with residential development on any of these sites: LE127, LE128a, LE140 and LE142a. The Council must take into consideration: Loss of local amenity - the Mount is a popular amenity enjoyed and cherished by walkers, joggers, cyclists, nature-lovers and dog-walkers. There is no comparable open countryside leisure amenity so close to the town centre. There is no comparable alternative within easy walking distance on the east side of town. Loss of such amenity would have an adverse effect on the health and wellbeing of a great many local people. Visual impact - the Mount is a classic example of outstanding moorland scenery. It provides unique and wonderful views over the town and beyond. Leek prides itself, and markets itself, as the Queen of the Moorlands. If this is to mean anything, the Council must do everything it can to halt the expansion of the town into the surrounding countryside and work to preserve the proximity and integrity of some of our finest moorlands scenery. Impact on infrastructure - hundreds of new houses will bring thousands of people. Nearby schools and GP surgeries will be put under further strain. Council services, social services and emergency services are already all under great strain. Traffic problems will be made worse. The future - the population of Leek is predicted to rise by a few thousand over the next couple of decades or so. This is mainly due to an ageing population. We are living longer. That means more of the people who are living here now will still be around in 20 or 30 years time. Therefore, planning for the future should be focused on local services for local people. We hope that the Council will heed our objections and explore alternative approaches to housing needs and development in our town. In particular, we wish to draw your attention to the 'Bimby Housing Toolkit' which was drawn up by the Prince's Foundation for Building Community (bimby.org.uk).</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO673 about educational requirements • See para response to PO89 on highways • See para response to PO1750 about affordable housing <p>The Council's own housing need assessments are set out in its evidence base on the website. Note these assess the needs of 'older people' and other groups. The June 2014 SHMA concluded the number and proportion of older person households is expected to increase in the District over the period to 2031 (46% increase between 2011 and 2031) which has implications such as increased demand for both specialist/extra-care accommodation for older people, and for adaptable homes. Owing to an ageing population and other factors, the need for smaller units will in future exceed the need for larger, family units. For these reasons the SHMA recommends that 60% of future housing should be 1- or 2-bed. The Council's emerging Local Plan Policies expect larger housing schemes to provide for a mix of housing across all locations, to respond to identified local needs such as housing for older people. Note that where there is a policy requirement for affordable housing provision upon such sites, the nature of provision may reflect the above.</p> <p>The BIMBY toolkit is noted. The Council will continue to work with communities seeking to introduce (or influence the preparation of) Neighbourhood Plans, in accordance with the Neighbourhood Planning Regulations.</p>

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

PO9102	Mr Robert McGuinness				Object	Email with representation form [attached] objecting to Preferred Options sites LE127/LE128A/LE140/LE142A and 'School Site' [presumed LE140] alongside 2015 'Options' sites LE066/LE069/LE128B with the following text: Overdevelopment, traffic congestion issues, inadequate infrastructure, inadequate road network. Brownfield sites and redundant mills should be brought into use first.	<p>It is not considered that development of these particular sites would be out of proportion with the rest of the town. Any new development taking place will be subject to design and landscape protection policies contained within the new Local Plan, and having regard to the Council's landscape evidence such as the 2016 Landscape Impact study.</p> <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p> <p>Note that the local Plan does not allocate site LE069.</p> <ul style="list-style-type: none"> • See para response to PO89 on highways • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO89 about Leek housing requirements and windfall allowance
PO9087	Ms Sarah Griffiths				Object	I am objecting to the planning of new housing at Mount rd, Leek. The area is enjoyed by young and old alike for generations. We do not need new housing in this peaceful wonderful area. [2015 Options consultation representation also submitted with email].	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about Leek housing requirements and windfall allowance
PO9062	Mrs Suzanne Dimmick				Object	I am writing to put forward my opposition to the building of houses on Mount Road in Leek. It upsets me greatly to think that an important local amenity could be lost forever if these proposals go ahead. "The Mount" as we fondly know it, is a valuable asset to the East side of Leek, a wonderful place to take our families for walks and bike rides. In our busy lives, it is vital for our health, both mental and physical to have somewhere to go to relax and unwind. What better place than a walk along the Mount with views over Bradnop and Morridge, so accessible from our homes. If the fields in the planning proposals-LE127, LE128, LE140 and most worryingly on the opposite side LE142 were to be built on then the landscape of our beautiful town will be lost forever. For those arriving in to Leek from Ashbourne Road, they would be met with yet another sprawling housing estate, replacing the picturesque fields full of animals that are so welcoming to see. The road will become a main thoroughfare from the Ashbourne Road to Buxton Road and will lose its charm for us all. Lets protect the gateway to LEEK for generations to come. SAVE THE MOUNT.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO256 on ecology evidence • See para response to PO89 on highways

PO9057	Mr Terence Gee				Object	I wish to object to the proposal to build housing on sites LE127,LE128,LE140,LE142a on mount road. This is a green field site with a rural road with unspoilt views only five minutes walk from Pick wood avenue. This road is used regularly by myself and often meet other walkers, cyclists in the area. Also the road would have extra traffic for 500 houses with poor access. There would be increased pressure on local schools,doctors,etc and I feel it would spoil the area with increased urbanisation.	<ul style="list-style-type: none"> • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO89 about landscape evidence • See para response to PO89 on highways • See para response to PO89 about open spaces and countryside access • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO673 about educational requirements
PO9070	Mr Stewart Johnson				Object	I am writing to protest against the proposed plans to build 4000 houses in the Leek area:- 1, question how many unoccupied properties are there in the area 2, Loss of beautiful countryside. 3, Work vacancies in the local area. 4, Local infrastructure . 5, Places at local schools. The list is just a few of the considerations the planners seem to be ignoring. Of particular concern is the proposed development along Mount Road. Not only would this destroy a beautiful part of the town used by many residents,it would also cause serious traffic problems both in the immediate vicinity and the rest of the town. These new residents would have to commute,and the main routes would be right through the centre of town adding to an already serious congestion problem. Why do the planners want to destroy the treasure that is The Queen of the Moorlands!	<ul style="list-style-type: none"> • See para response to PO256 on housing needs evidence • See para response to PO89 about landscape evidence • See para response to PO679 about Leek employment land requirements • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO673 about educational requirements • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways
PO9077	Mr Simon Tansley				Object	I am registering my objection to the leek plan proposals for building anywhere along the mount (le 142a,b,140,128a,022,127. To destroy this public amenity would be an outrageous and nigh on irreparable act of vandalism. Any one who is even considering this to be a way forwards for leek town should walk from ashbourne road to buxton road to see precisely what we would lose in terms of beauty and nature. This is an asset that Leek should be celebrating not destroying.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO256 on ecology evidence

<p>PO9093</p> <p>PO9313</p> <p>PO9404</p>	<p>Ms Sarah Bishop</p> <p>Ms Emily Hodgkinson</p> <p>Ms and Mr Carla and Anthony Hodgkinson and Bury</p>				<p>Object</p>	<p>I would like to register my opposition to the plans for development along The Mount. I was born and raised in Leek as are all my family. I remember being dragged "round the mount" as a child and hated every minute of it. I left Leek in 1986 to pursue my career in nursing and I still return to Leek every weekend and Public Holiday. As an adult, I love going round the mount! I appreciate the openness, the air and the local views. I know it is valued by many local people for similar reasons. It is a wonderful asset to Leek which cannot be found elsewhere. In this age of government encouraging activity and reduction of population obesity, I can walk my dog, savour the views and see nature on the doorstep. Something to be encouraged and supported. Leek is very lucky indeed to have such a wonderful asset as part of its town and councillors would be well advised to recognise its importance to their locality. If councillors wish to see houses, roads and urbanisation as part of their tenure, I suggest they visit "The Potteries" or move to the nearest loss of urban space to understand the impact of building for the short term gain. I live still in the city I came to all those years ago. Back then, it was a new city with limits. Now, every route I can take from the centre is urbanised and each area is stuck "in its time" as architecture and design move on creating areas of decline and disrepair bringing new problems with the passing of time. For the love of Leek and its title of "Queen of the Staffordshire Moorlands" , Councillors need to appreciate what qualities give Leek that title and do their utmost to maintain them. Councillors have the opportunity to do the right thing for the future of Leek, not to bring in a fast buck for a short term gain. I hope the people of Leek are listened to when they say "Save The Mount"!</p> <p>As well as the benefits to Leek having such a widely used and accessible area, one should consider the risks and very real hazards to creating such estates in a position where traffic flow, at both access points to the Mount, is at best, difficult. On exiting Mount Road, on to Ashbourne Road and Buxton Road, there is extremely limited vision in both directions. Whilst currently the traffic flow is steady, and reasonably quiet, my concerns lie with the difficulties which will only grow with increased cars, placing those increased pedestrians walking to the proposed development, at a genuine risk. I am not against the development of affordable housing; what I am against is the travesty of those decisions, by councillors which we elect, to take green belt land, before brown belt land, for potential profit, before the views of their constituency and the future of generations to come. I understand that I am far from alone in my views- I feel they should be taken in to deep consideration before this gem in the town is lost forever.</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO679 about Leek employment land requirements • See para response to PO673 about new homes bonus • See para response to PO89 on highways • See para response to PO1732 about western Green Belt • See para response to PO1353 about public consultation and Statement of Community Involvement • See para response to PO89 about Leek housing requirements and windfall allowance

PO9115	Mr Robert Barker				Object	<p>I do not believe that it is necessary to extend the town boundary into farmland as there are still many available brownfield sites within the locality. It is also important to note that TOURISM is a significant driver to the local Economy! Therefore the Town Gateway, especially from the PEAK PARK Buxton Road A53, needs rigorous protection from urban sprawl in order to maintain the 'Queen of The Moorlands' identity. The point of entry into Leek from A53 Buxton Road is the most attractive and picturesque and is a key Tourist route. It is also a highly utilised public amenity for local residents of Leek who very regularly make use of the whole area incorporating the A53 towards Tittesworth Reservoir/Blackshaw Moor, along Thorncliffe Road and its' adjoining lanes, and The Mount Road, as a place to exercise by walking, rambling, cycling, horseriding, dog-walking, sightseeing, picnicing, and general enjoyment for health and wellbeing. The proposal area, particularly as it approaches the A53 Buxton Road junction with Thorncliffe Road and The Mount, is immediately adjacent to the SPECIAL LANDSCAPE AREA which presumes against intrusive developments in order to protect its Historic Landscape nature. I would personally feel that the Special Landscape Area and environs ought to receive the highest priority in its protection. The designation encompasses the fact that it is 'Special' in nature and cannot therefore be replaced once lost or damaged. There are a number of 'brown' sites within the town which could be very effectively used for housing development. [Question why] these are not shown on the accompanying Consultation Maps. However from attending a consultation meeting the existence of several sites is a matter of common knowledge along with the fact that these would be "The Preferred Option Housing Sites" in the view of the residents of Leek. There are also pockets of greenbelt land (designated such primarily for the purposes of town separation and quite often having no other particular beauty or amenity), which in common with other Towns in the country could be effectively utilised to expand the town boundary with selective use and sensitivity to the environment. This would be better than destroying the areas which are highly valued by the Leek Community for beauty and recreation and which give the Town of Leek its identity. The proposal to build almost 400 houses off the junction of the A53 as it joins Thorncliffe Road and The Mount Road is a Major Intrusion into the public amenity and is unsupported in terms of the additional infrastructure requiring a need for development of roads, sewers, schools etc.. It would put a major strain onto the area and have significantly adverse effects on the locality. The proposal is completely unbalanced as it places virtually all the "housing requirement"[queries this as unjustified] along 1 narrow lane at the most Flagship side of Leek renowned for its visual beauty and recreational amenity. Please utilise the "brown sites" and protect Leek's Heritage and inheritance!</p>	<ul style="list-style-type: none"> • See para response to PO89 about Leek housing requirements and windfall allowance <p>Any new developments would need to adhere to design policies to ensure character of the District is maintained.</p> <p>Green Belt is a long established designation that serves a number of important functions in separating settlements, and preserving 'openness'. Whilst Councils can allocate/make boundary amendments within the Green Belt, National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). Note that landscape quality/character, and public access characteristics, are not in themselves 'purposes' of Green Belt laid out in national guidance. The NPPF allows for consideration of development proposals upon 'brownfield' Green Belt sites.</p> <ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO4704 about special landscape area • See para response to PO89 on highways • See para response to PO679 about Leek employment land requirements • See para response to PO673 about new homes bonus • See para response to PO256 on housing needs evidence • See para response to PO89 about option sites assessments and sustainability appraisal

PO9122	Mr Richard Pigott				Object	<p>Letter submitted [attached] objecting to Mount sites: Mount Rd is local amenity LE128 is the most elevated of the sites being considered LE066 is a brownfield site and should be considered ahead of LE128 Concentrating housing allocations on east side of town would raise deliverability problems compared to other areas of town Some western Leek sites in the Green Belt are nevertheless preferable to allocate for housing, than sites at the Mount.</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence <p>Note the 2016 Landscape impact study concludes that LE128A and LE128B are both of medium landscape sensitivity and recommends that site-specific landscape mitigation measures could include advanced planting and landscaping on the eastern boundary, and limited building heights in the eastern half of the site. Whereas LE066 is assessed of high landscape sensitivity owing to its location, despite the presence of site screening.</p> <ul style="list-style-type: none"> • Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan. • See para response to PO1732 about western Green Belt • See para response to PO1681 about viability study
PO9130	Mr Richard Harding				Object	<p>It is shocking to think that a much valued area of Leek, enjoyed by many thousands of people each year that gives stunning views over many hundreds of acres of Moorland, is a valued place for recreation by the people to walk, hike, cycle, enjoy or just to rest with the freedom of a tranquil setting over the land of the Moorlands will be destroyed forever and what for, the offer of cash to the Council for each new house to be built to be spent by the Council that we all know will be wasted in ways only Councils inimitably can do whilst the result will be a beauty spot for Leek people will be destroyed forever. The Council can sit back and think the money was worth it yet they sit in splendid isolation allowing the areas they are elected to protect be destroyed. I wonder how the local and Staffs Council can think that the huge increase in housing is necessary bearing in mind that the shameful destruction of a much loved part of Leek will be replaced by huge housing estates on The Mount making it appear like a mini version of the Berlin Wall. I regularly see hundreds of people on weekends and on summer days, walking, dog walking, jogging and horse riding along Mount Road and if these awful plans are put in place The Mount will be a danger to all road users and will take on an ugly factor that is part and parcel of building on rural fields loved by so many people and all imposed without once allowing the voters of Leek the change to have their say on the planning issues that have secretly been imposed. Where is the democratic right of the people of Leek in this issue? Sold out to building firms who look on greedily at the profits they can make with help from a submissive Council who dare not fight for Leek people. It is worrying is that all the planning proposals for</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO673 about new homes bonus • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO89 on highways • See para response to PO1353 about public consultation and Statement of Community Involvement • See para response to PO679 about Leek employment land requirements • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO673 about educational requirements

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>the Leek Moorlands were taken in secrecy denying people of the Moorland the chance to put forward their views and objections for all these houses to be built without ever once considering that there is not sufficient employment in the town to employ even 1 in 100 of people who might live in these imposed properties and there clearly seems to be a total the lack of schools to educate the huge increase in children and a the lack of Health Care provision in respect to GP services and hospital care for the area. There is also the huge impact on the roads and the congestion that is already a great problem in Leek. It is as if the Council is blind or inept at seeing the problems that all these extra houses will cause but it seems that everything will be decided in the same manner as the destruction of the old town centre round about we were informed would ease traffic but contrary to all Council ideas the reverse is true. I cannot have any faith in a system that has denied us the vote on these extra 6000 houses or that the much loved Mount will be destroyed in the same cavalier and unthinking way as many planning issues have been allowed to go ahead even when so many Leek people do not want or need these homes to destroy The Mount. I therefore wish to state that I am against the building on any land along Mount Road AKA The Mount, so please register my objection.</p>	
PO9394	Mr Chris Taylor				Object	<p>Land ref LE127: Development will block the broad view towards Leek, and will impact on the character and amenity of Mount road as a leisure walk. In any event it would seem to make sense, for a number of reasons, not least infrastructure considerations, to focus development at this stage towards the Buxton Road end of Mount road.</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO89 about option sites assessments and sustainability appraisal • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO89 on highways
PO9193	Mrs M Motum				Object	<p>I would like to strongly object to more houses being built on The Mount. This very popular location is just a short walk from the town centre where you are in the countryside with far reaching views. The beautiful location will command high prices, therefore no affordable houses will be built. It would be a travesty of justice to build in such a well-loved area, used by dog walkers, walkers, courting couples, and car drivers. I don't think the infrastructure could sustain the number of houses envisaged. Please do not include this area in the local plan.</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO1750 about affordable housing • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO89 on highways

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9243 PO9198	Mr John Belfield Mrs Maureen Belfield				Object	The rural fringe of Leek, and specifically Mount Road, would become urbanised. The Mount is a very popular route for leisure activities and exercise for many people and this would be lost. With the enormous number of proposed new houses there would be a massive increase in the amount of traffic both on the mount and also in the surrounding area. Kniveden Lane is already a busy road as it gives access to the small car park at the Moorlands Hospital. This car park is already insufficient for the needs of the hospital and many cars currently park on Kniveden Lane. If hundreds of houses are built on the mount Kniveden Lane would become a significant means of access to Ashbourne Road. The road network would need to be considerably enhanced and part of Kniveden Lane would need to be properly surfaced. This would lead to a major change in traffic patterns in the area which would lead to a loss of public amenity. This would not only cause traffic chaos but would also pollute the surrounding area. It would also make the smaller residential streets of Pitcher Lane and Trafford Close a potential car park for those who currently use Kniveden Lane for this purpose. There are brownfield sites available for building and also more suitable greenfield sites, for example Foker Grange and Home Farm, which have much easier access to the main road network. I therefore object to the building plans on the Mount which are numbered LE142a, LE140, LE128a and LE127.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO1732 about western Green Belt • See para response to PO9099 about Home Farm
PO9336	Mr Derek Kay				Object	Herewith are my objections yet again about building proposals affecting open greenbelt land on Mount Road. I strongly object to delimitations LE127, LE128a, LE140, LE142a and LE142b, on the grounds of unnecessary and deleterious incursion into valuable scenic amenities. The fringes of this town (Queen of the Moorlands) must be preserved at all costs. Open aspects across towards the Peak District are essential for our spiritual wellbeing; unwelcome development of additional traffic flow and population density would be the corollary of this building project, were it to succeed. Conversely, there is much brownfield potential within the town boundary itself; rundown old mills for example (which may be protected by outdated listing orders) and other unsightly structures causing blots on the "townscape". Not enough positive action to clean up the interior of this town has been taken over the years. Use compulsory purchase orders where difficult site owners will not cooperate and make the Queen worthy of her name.	<ul style="list-style-type: none"> • See para response to PO1732 about western Green Belt • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO89 on highways • See para response to PO89 about Leek housing requirements and windfall allowance <p>The Secretary of State for Culture, Media and Sport is responsible for the listing of buildings on the advice of Historic England. Apart from being consulted, the Council does not have any say in which buildings are added to the statutory list. The Council, however, is charged with protecting listed buildings insofar as it is possible and managing any changes to them through the planning system. In discharging this responsibility, the Council has to work to the government's advice set out in the National Planning Policy Framework which requires every effort to be made to preserve listed buildings and either keep them, or return them, to active use.</p> <p>Whilst Councils do retain CPO powers in principle, these are generally used (if at all) as a last resort</p>

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
							<p>where it is expedient and in the public interest for the Council to do so, where agreement with landowners is not possible. As explained in para response to PO89 about Leek housing requirements and windfall allowance the Council makes assumptions that development schemes will come forward within the Leek development boundary to contribute to its housing need to 2031, which could include historic premises etc. Applications affecting listed or non-listed "heritage assets" would be assessed against Section 12 NPPF and Council Policies. The Council would also assess schemes in the town centre against the aspirations of the adopted Leek Town Centre Masterplan.</p>
PO9236	Mr John Burnett				Object	<p>I wish to formally object to the plans currently in consultation to allocate land for housing around the Mount Road in Leek. Some background. I have lived in Leek all my life, as have my parents and Grandparents. Throughout my life I have always viewed the Mount as the 'Countryside' and the border between Leek and the Peak district. Since I can remember I have spent many happy hours walking the Mount as it is an accessible area of natural beauty. What makes this area important to me and to anyone who lives in the East end of town. There are very few circular walks that take in such a wide variety of terrain and views as the Mount does. Whichever way its walked theres uphill and down dale terrain that has to be completed. What makes this worth while for many people is the wide open vista that is presented to the walker as you reach the top of the Mount. I complete this walk most days in the Summer, and every week in the Winter, and strongly believe it has added to my health and well being in immeasurable ways. I know and speak to the many others who also make this part of their leisure and health routines and know that a large proportion of the residents of both Haregate and Moorland Road estates rely on this open space as much as I do. So - my main objection is the destruction of some beautiful greenfield leisure location on the outskirts of our town. However I have other concerns about the wider impact to others who may not view this as important. Leeks infrastructure is already at breaking point. In particular the road system is literally not fit for purpose. Since the short sighted decision to alter the traffic flow through our town was taken, the flow of traffic particularly from West to East has been severely curtailed resulting in large traffic build ups through a normal working day. I can only imagine the building of 100's of new houses on the East End of Leeks existing boundary will at best double the misery already experienced by hundreds of travellers each day and cause untold economic and environmental damage to our market town. Additionally, I have serious concerns about the effects on the water run off if large areas of the Mount are built upon. The Mount is the highest point in our town, and huge amounts of water drain off it down towards Leek on a daily basis. Without the ground to soak up this water</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO89 about landscape evidence • See para response to PO89 on highways • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO679 about Leek employment land requirements • See para response to PO699 about economic benefits of housebuilding • See para response to PO89 about option sites assessments and sustainability appraisal • See para response to PO256 about air pollution and environmental health considerations of development • See para response in PO699 about utilities and flood risk • See para response to PO1353 about public consultation and Statement of Community Involvement <p>The Council must demonstrate to planning inspector that its Local Plan is based on the principles of sustainable development. The NPPF is clear that this means three roles – economic, social, and environmental, and that they are considered simultaneously. The Council's submitted Policies and objectives would therefore have to satisfy this.</p>

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						Im concerned the water table may be affected causing flooding and other damage to residents and infrastructure further down towards Leek centre. The first part of the consultation document says the following: They should, as far as possible, reflect the aspirations of local communities and should strive to contribute towards their wider social, economic and environmental objectives. Based on what I have seen of the document, I don't believe it succeeds in any of these fundamental objectives. Our local community want a town that is prosperous but also one in which people want to live and work. We should strive to be better than what we are but not to the detriment of what makes people want to live in Leek in the first place. I hope you seriously take on board my views as well as the views of other community members. We live in a democracy and as such I genuinely believe that if a decision doesn't have the backing of the community it shouldn't be pushed through.	
PO9179	Mrs E Adams				Object	We would like to object to the developments proposed around The Mount. This is a very popular safe area to walk. It has a high quality landscape which would be restricted by the developments and traffic would increase significantly on the roads linking Buxton road and Ashbourne road. Visitors to the area also like this walk.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways • See para response to PO89 about landscape evidence
PO9212	Mrs E Adams				Object	I wish to place my strong objections to the proposals to build house on the mount, leek. It would devastate this beautiful area which benefits tourists and residents alike. Objections also relate to roads, schools, doctors etc. Please please rethink your plans.	<ul style="list-style-type: none"> • See para response to PO699 about economic benefits of housebuilding • See para response to PO89 about landscape evidence • See para response to PO89 on highways • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO673 about educational requirements

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9250	Ms Joan Hobster				Object	<p>I am writing to plead for the preservation of Mount Road, Leek, as an undeveloped open space and public amenity, available to all residents of the town. Any building on the farmland that borders this road will destroy the ambience and far-reaching views of this delightful area. It has been shown by a headcount (see Leek Post letters May 11 2016) how well used it is by walkers, joggers, horse-riders etc and I would like to add to that, the small but regular number of cars that are parked on Mount Road by elderly residents. They may no longer be physically able to walk far but can still take a short stroll, sit on a bench, enjoy the fresh air and admire the views. I understand that Mount Road is part of the Staffordshire Moorland 's Way and is walked regularly by individuals and organised groups. Surely a designated "Way" cannot be allowed to pass through a housing estate. In addition I see on the Council website, a leaflet suggesting a walk entitled "Leek Landscapes, A Country Walk" which includes Mount Road. I quote from this leaflet "The route passes through attractive farmland and offers many interesting views of Leek and its setting." If the proposed houses are built, this leaflet will have to be amended. I suggest, "The route passes through a new housing estate which obscures many interesting views of Leek and its setting" If building does take place, Mount Road itself would have to be upgraded and widened, to accommodate increased traffic use. An estimated 600 extra cars daily has been suggested. No doubt street lighting would be installed and this would destroy one of the few "dark sky" areas in the town. I have observed the night sky regularly from this location on winter evenings and enjoyed seeing the eastern constellations, planet alignments, meteor showers, the occasional comet and the monthly spectacle of the full moon rising. All this would be lost by light pollution. I understand that planners did take note of objections raised about the development of Mount Road in 2015 and have reduced the proposed site allocations to either end of the road, thus preserving some of the views. For example, the field referenced LE128 will be split in two and only half of it built on. While appreciating this gesture to public opinion it would surely be only a matter of time before the inevitable "infill" would take place and the whole area would be lost for ever. PLEASE PLEASE PLEASE – SAVE THE MOUNT for future generations to enjoy.</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • Development proposals affecting the routes of recognised public rights of way would need to make allowance for them. • See para response to PO89 on highways • See para response to PO1353 about streetlighting • See para response to PO89 about Leek housing requirements and windfall allowance

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9292	Mrs Gwen Gledhill				Object	<p>Re sites LE127,128,140.142a I wish to object strongly to the proposal to make these sites on The Mount available for housing on the following grounds:</p> <p>1. Traffic The Mount is a narrow country lane with no pavements and little or no street lighting. There are narrow and dangerous junctions at both ends on to the Buxton and Ashbourne roads and a dangerous bend by LE127. The traffic generated by the proposed 400 houses will completely overload these junctions at busy times and generate a major risk to pedestrians on the lane itself, especially as there is not sufficient width for two cars to pass each other for most of the length of the lane. Commuters travelling from these house to Manchester, Macclesfield or Stoke will only add to the town centre traffic congestion at busy times.</p> <p>2. The Local Housing Need It is well documented that the local need is for starter homes for young people and 'downsizing' homes for older people. These are not required on the edge of town but need to be closer to the centre where there are shops, amenities and better public transport links. Whatever developers initially propose re 'affordable housing' on The Mount, the reality is that they will ultimately build executive homes attractive to commuters travelling to Manchester, Stoke and beyond at prices cheaper than can be found in Cheshire East! I believe that the buyers will not be local people and thus the developments will not answer the local housing need. There are other sites that could address this need to the south and north west of the town and via infill in the centre itself. Planners should look more carefully at these and not settle quickly for 'easier' options.</p> <p>3 Our Environment The Mount is a long standing area of natural beauty, accessible to most town residents on foot with views equal to those enjoyed across the Peak District. The developments will ruin this aspect and destroy a major, free, leisure experience for local people right on the edge of The Peak District National Park - their officers will (I'm sure) be objecting too!</p>	<ul style="list-style-type: none"> • See para response to PO89 on highways • See para response to PO679 about Leek employment land requirements • See para response to PO1750 about affordable housing • See para response to PO256 on housing needs evidence • See para response to PO9141 about housing for older people • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO89 about option sites assessments and sustainability appraisal • See para response to PO1732 about western Green Belt • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9163	Mrs Kath Fernyhough				Object	<p>Please note that this email is an objection to the following site references regarding the development of Mount Road Leek., LE142b, LE142a, LE140, LE128a, LE127, LE022 We are residents of Kniveden Lane leek, and so we feel that we are well qualified to tell you why this development would be so disastrous for Leek. The Mount is an area of natural beauty which is used every single day of the year, by walkers, joggers, sightseers, cyclists, and people who enjoy it just for the sheer pleasure of the calm, peaceful area it provides us with. It is used by our senior citizens, who use the Mount as a daily walk to help keep them fit, and they enjoy sitting on one of the benches that have been left by the people of Leek for the people of Leek, to sit and chat or pass the time of day with other walkers. Good for the body and soul. It is an area that we, our parents, grandparents and children have enjoyed for many years, and if this development goes ahead our grandchildren and future generations will be denied this. It is an area of natural beauty that is home to a wide selection of wildlife. From hearing the owls hooting late evening and into the night, to the woodpeckers tapping away in the woods. From the bats swooping past in search of food to the kestrels that hover over the ground looking for their next meal. And the home of badgers and foxes. To name but a few. If this development goes ahead the homes of these beautiful animals and birds will be lost. Another loss for future generations and the townspeople of Leek, who you are supposed to represent the views of, so please take the time to read this and understand how passionate the people of Leek are about our beautiful green open space. As well as the above losses, the development will cause many problems. Namely access to and from Mount road. If planning permission is granted for all these new homes, imagine how many extra cars, delivery vans, school buses and refuse collectors will have to use Mount Road. If in excess of 400 homes are built, that will mean that there will probably be in excess of 800 extra cars on a daily basis. Mount road can not deal with this. Our worries are as follows :- The exit from Mount road onto Buxton Road goes straight out into a 40mph area, opposite another junction with Novi Lane. The exit and entry from Ashbourne Road is even worse. To exit from the Mount onto Ashbourne Road you again have to exit into a 40mph area If you want to travel to Ashbourne you have to negotiate a 30% bend onto a very busy road If you want to exit Mount Road onto Ashbourne Road and travel down into town, you still have to join the traffic that is traveling at speed around Lowe Hill bends. This plan is dangerous, foolhardy and beyond belief. As the majority of people who will purchase property on Mount road will work in Stoke on Trent or Macclesfield, this will bring even more traffic that has to negotiate the town centre, which is often gridlocked now, let alone with a further 800 cars a day travelling through Leek town centre. The only other access to Mount Road is from Kniveden Lane, via the unadopted road at the top of the lane. If this road is adopted to improve access onto the Mount, Kniveden</p>	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO256 on ecology evidence • See para response to PO89 on highways • See para response to PO679 about Leek employment land requirements • See para response to PO256 about air pollution and environmental health considerations of development • See para response to PO5884 about tree protection • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO1732 about western Green Belt • See para response to PO1353 about public consultation and Statement of Community Involvement

						<p>Lane will become a rat run, along with Moorland Road. And it will not only be used by the new developments on the Mount, but by the estate accessed from Novi Lane, known as the Haregate estate. Kniveden Lane and Moorland road are residential roads in a residential area, and have not been built for vast amounts of traffic. The noise and level of traffic if this should happen would be very detrimental to a beautiful residential area, not to mention the dangers of traffic moving at speed to residents. Also the exit from Kniveden Lane is notoriously difficult due to the trees which line both sides of the junction reducing visibility to less than 50 yards in either direction. What will you do then, cut down the trees to improve visibility and in the process removing more natural vegetation along with the fields on Mount Road that you are proposing to develop. As an alternative site, why do you not look at Macclesfield Road, the area around Foker Grange. Or develop some of the derelict mills that are lying empty and are nothing but eyesores. This way you would rid the area of the derelict buildings and build new more pleasing structures. We ask you to do the job you were voted in to do, which is to represent the views of the people of Leek.</p>	
PO9228	MRS KAREN BARKER				Object	<p>I do not believe that it is necessary to extend the town boundary into farmland as there are still many available brownfield sites within the locality. There is much greater need for jobs/employment as priority in the town if people are to be enticed to come to live here by large scale housing developments. There are presently not enough jobs locally to adequately provide for the current housing occupants. There is likely to be an increased need for Housing Benefits affecting the local economy together with significant increased pressure on infrastructure due to need for travel in and out of the area for work. It is also important to note tourism is a significant driver to the local economy! Therefore the town gateway, especially from the Peak Park Buxton road A53, needs to be rigorous protection from the urban sprawl in order to maintain the 'Queen of the moorlands' identity. The point of entry into Leek from A53 Buxton Road is the most attractive picturesque and Tourist Route. It is also highly utilised public amenity for local residents of Leek who regularly make use of the whole area incorporating the A53 towards Tittesworth Reservoir/Blackshaw Moor, along Thorncliffe Road and its adjoining lanes, the Mount Road, as a place to exercise by walking, rambling, cycling, horse-riding, dog-walking, sightseeing, picnicking and general enjoyment of for health and well-being. The proposed areas particularly as it approaches the a53 Buxton Road junction with Thorncliffe Road and The Mount Road, is immediately adjacent to a landscape area which presumes against intrusive developments in order to protect its historic landscape nature. I would personally feel that the Special Landscape Area and environs ought to receive the highest priority protection. The designation encompasses the fact that it is special in nature and cannot therefore be replaced once lost or damaged. There is a number of brownfield sites within the town</p>	<ul style="list-style-type: none"> • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO679 about Leek employment land requirements • See para response to PO89 on highways • See para response to PO89 about landscape evidence • See para response to PO9115 about design policies • See para response to PO89 about open spaces and countryside access • See para response to PO4704 about special landscape area • See para response to PO1732 about western Green Belt • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO673 about educational requirements

						<p>which could be very effectively used for housing development. For some reason? These are not shown on the accompanying consultation maps. However from attending a consultation meeting the existence of several sites a is a matter of common knowledge along with the fact that these would be 'the preferred option housing sites' in view of the residents of leek. There are also pockets of green belt land (designated such primarily for the purposes of town separation and quite often having no particular beauty or amenity), which in common with other towns in the country could be effectively utilised to expand the town boundary with selective use and sensitively to the environment. This would be better than destroying the areas which are highly valued by the Leek Community for beauty and recreation and which give the town of Leek its identity. The proposal to build almost 400 houses off the junction of the A53 as it joins Thorncliffe Road and The Mount Road is a major intrusion into the public amenity and is unsupported in terms of the additional infrastructure requiring a need for development of roads, sewers, schools etc. The proposal will is completely unbalanced as it places virtually all the housing requirement? Unjustified along 1 narrow lane at the most flagship side of leek renowned for its visual beauty and recreational amenity. Please utilise the brownfield sites and protect leeks heritage and inheritance!</p>	

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9269	Mr Jeff Davies				Object	<p>I am writing to object to the designation of land on Mount Road, Leek as "Preferred Housing Allocation". There are a number of problems with this intended designation:</p> <p>1) Overlook from the National Park - building as designated will adversely affect the view from the National Park</p> <p>2) Access - to increase traffic along the Mount would cause significant traffic problems and hazard at its junctions with both the Buxton and Ashbourne Roads. If Knivden Lane is paved then this would also cause problems with access to the hospital and cause a hazard at its junction with Ashbourne Road where there is poor visibility. Improving Mount Road is likely to be self-defeating as it will then become a rat-run between Ashbourne and Buxton Roads further increasing the traffic load.</p> <p>3) Services - there would be a significant cost to put in mains services as the existing water and drainage up Mount Road towards Padwick Farm are unlikely to be adequate to service the proposed housing</p> <p>4) Amenity - the Mount is a much loved local resource, heavily used by walkers (including dog-walkers) and runners.</p> <p>5) Location - the bulk of working residents would probably work in Stoke or Macclesfield and the development is on the wrong side of Leek as it would then increase the traffic 'flow' through the centre of town</p> <p>6) Brownfield first - development on green fields should only occur when all the available brownfield sites have been used. There are multiple opportunities for in-fill housing developments within Leek (e.g. Prince St) as well as numerous mills that are currently eyesores (e.g. both Macclesfield & Ashbourne Roads)</p> <p>7) Size of housing allocation - there is a significant discrepancy between SMDC & Government figures for required housing. I believe you are seriously over-estimating the local housing need. By doing this you are making it easier for developers to cherry-pick which bits they want to develop rather than encouraging development where it would be most beneficial to and have the least adverse impact on the town</p> <p>8) Unnecessary blight - by over-allocating housing designation you will have an unnecessary adverse impact on the value of properties which may not in practice be affected by housing development throughout the life of the plan</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 on highways • See para response in PO699 about utilities and flood risk • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO89 about open spaces and countryside access • See para response to PO679 about Leek employment land requirements • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO256 on housing needs evidence • See para response to PO256 on housing needs evidence

PO9172	Mr and Mrs S A Hodkinson				Object	<p>We are writing as a young couple concerned about the prospect of many more houses being built on good quality farming green field sites in Leek and throughout the Staffordshire Moorlands, especially over the Mount Road in Leek. We use the Mount as many people of all ages do on a regular basis, whether it's to walk the dog or to go out for a run. The Mount is used by many and if lost would be greatly missed. The main issue that concerns me with the proposed building of houses over the Mount is that the council & planners feel it is acceptable to potentially build houses on what is good quality farming green field sites. We need to protect our green spaces and farming land that is producing us with our food and local food at that. Another point to make is there are hundreds of empty properties throughout the Staffordshire Moorlands therefore if there is really a great need for additional housing which there is no evidence to suggest this. Also in this day and age we as a country are very conscious trying to reduce our carbon footprint and recycling everything possible. Therefore question why does this not apply to housing. There are all these properties sitting empty and you are wanting to build more, do we really need more if we already have so many empty. This includes new builds that have being built in the past twelve months that are vacant. Also question who are you expecting to buy these properties or live in them. There is obviously no jobs or prospects for people to want to move into Leek otherwise they would be here now. You only need to open the local paper or look on the internet there are always hundreds of properties at all prices for sale and up for rent in Leek. If you by some miracle find hundreds of families to live in these houses then question how do you propose to improve the infrastructure. It already takes up to twenty minutes to drive from one end of Leek town to the other and this isn't even in 'rush hour'. We certainly don't have enough schools and the GP's are already stretched to capacity. I also have a worry over the wildlife over the Mount there are many different species of birds and animals that are present around the Mount and the building of houses would interrupt them and significantly reduce the numbers of some already endangered species. Finally I urge you think very carefully before allowing these houses to be built in Leek, with a special thought to the Mount, once you have let properties be built there Leek as a lovely small market town will be spoilt and the beautiful uninterrupted views will be gone forever.</p>	<ul style="list-style-type: none"> • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO256 on housing needs evidence <p>The NPPF expects Councils to meet objectively assessed development requirements, and also encourages brownfield development, subject to wider Policies.</p> <ul style="list-style-type: none"> • See para response to PO679 about Leek employment land requirements • See para response to PO89 on highways • See para response to PO673 about educational requirements • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO256 on ecology evidence

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9203	Mr Martin Bagshaw				Object	<p>I would like to register my objection to the proposed housing development on the mount area of Leek. I have lived in Leek for all of my life and I and many others , have spent many happy hours enjoying the scenery and tranquility that this area of the town offers to residents of the town. To develop in this area will drastically reduce the local amenity for the residents of the town. It is a lovely picturesque area that is within easy reach of the town centre. And I believe that to destroy it would be an absolute travesty. The area has many amenity uses, such as walking, horse riding, cycling and jogging, let alone just sitting on the benches and chilling. I think the existing schools will struggle to cope with the increased demand for places. The increase the traffic on the roads surrounding the mount will be significant, and traffic calming measures will need to be considered for safety reasons and quality of life of the existing residents in the area. There also be an increase in commuter traffic from this development. I think the majority of which will have to cross the town towards either Stoke on Trent or Cheshire. This will add to the already considerable traffic issues in the town. I believe the Barnfields, the rear of Sainsbury and Foker Grange Farm would be much better locations, so that the increase in traffic is kept away from the town centre. It was my understanding the houses were proposed for the rear of Sainsbury's. But I understand this has hit commercial difficulties with residual contamination.</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO673 about educational requirements • See para response to PO89 on highways • See para response to PO679 about Leek employment land requirements <p>Existing industrial areas in use would not generally be allocated to other uses unless re-provision of equivalent or improved floorspace was involved.</p> <ul style="list-style-type: none"> • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO1732 about western Green Belt • See para response PO2905 about other sites at the Mount
PO9218	Ms Lisa Milward				Object	<p>I wish to register my disapproval to the above development My objection has little to do with extra traffic and infrastructure but a lot to do with losing a place that is very dear to people's hearts. The Mount has always been a favourite short walk of mine and my family's. It is peaceful, has beautiful views and friendly people of all ages make a point of speaking. The Mount is somewhere that I spend a lot of time walking each week, a place that has been a part of my life since childhood. I have very fond memories of spending time walking over The Mount with family when we didn't have a car and little money to take buses elsewhere. The Mount is perfect for a short walk, it's somewhere that I have always felt safe to walk alone and not too far for a morning walk before work and for those people who perhaps struggle to walk longer distances. By developing housing on this land I believe that it will take away one of the town's best assets, one that people of Leek have enjoyed for many, many generations. So as councillors and planners who are in office for a relatively short period of time in comparison making a decision that will remove this for everyone who loves to walk here, I hope that you really consider how much The Mount means to people like me. It will be a huge shame if this goes ahead.</p>	<ul style="list-style-type: none"> • See para response to PO89 on highways • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence

PO9278	Mr Ian McFaul				Object	<p>i am writing to protest against the latest version of the site allocations plan for th Staffs Moorlands, in particular the mount area of Leek. the following objections should be considered</p> <p>a)maintaining the individuality of our market town rather than going down the homogenisation route</p> <p>b)I'm not sure where the demand for these house is coming from - where is the research on households forecasted to require this</p> <p>c)The area of most concern to myself is particularly LE127 and the terrible prospect of houses being built on the town horizon, the entrance to Buxton makes me shudder and we should not go down that route</p> <p>d)there are lots of brownfield sites ripe for development in town that should be exhausted first rather than taking the easy option short term option.</p> <p>e)where i the visionary leader on the council who can set out a plan for the town not driven by short termism</p>	<ul style="list-style-type: none"> • See para response to PO9115 about design policies • See para response to PO256 on housing needs evidence • See para response to PO89 about landscape evidence • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO1353 about public consultation and Statement of Community Involvement
PO9286	Mr Ian Harrison				Object	<p>I hereby which to object to the building of houses etc on The Mount, Leek. This road, used by many is the last place to admire the scenic views of both Leek and the surrounding areas. It is an area of outstanding natural beauty. If one site is given permission for house building, then all others will follow and question where will it end. There must be countless brown field sites in the leek area which can be built on first and foremost. If 500 houses were to be built, what happens to Leek. The jobs aren't there, infrastructure, the existing roads can't cope with todays traffic (constant gridlocks in the town centre, never mind 1000 further cars. No hope of a ring road around leek. Junior schools, can't cope with further numbers of school pupils. My wife and I continue to walk over the mount and admire the scenery, as well as the many more who walk, cycle, run and horse ride over it. The new housing would block the outstanding views people go the the mount to view.</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence <p>None of the Mount sites attract an AONB designation.</p> <ul style="list-style-type: none"> • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO679 about Leek employment land requirements • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO89 on highways • See para response to PO673 about educational requirements
PO9306	Councillor Gail Lockett				Object	<p>I would like to objections to site allocations LE127 and LE128a, these two sites are completely unsuitable for development as the road would not be able to sustain the mount of traffic and the junctions at both end are dangerous, we should be looking at urban infill to distribute the number of houses required.</p>	<ul style="list-style-type: none"> • See para response to PO89 on highways • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO89 about option sites assessments and sustainability appraisal

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9321	Ms Elizabeth Stretton				Object	<p>I am writing to voice my opposition to the proposed housing development on the Mount Road, Leek - ie Plots IE140, LE128a, LE127, LE142a, LE142b, and LEO22. On the edge of the Peak District, this area of Leek can only be described as an extension of this National Park and one which holds a special place in the hearts of Leek residents. The number of walkers and cyclists using this area each week must be in the hundreds with many, like myself, enjoying the walk over The Mount on a daily basis. This walk commands beautiful views of the surrounding countryside, providing a "country" experience for so many walkers, cyclists and drivers, as well as a place to sit and watch, for example, the sunsets, weather conditions unfold, or simply just to sit and ponder. For years it has provided a walk within a few minutes walking distance, for families, courting couples, dog walkers and anyone else who wants to escape from the town and enjoy the views and the experience pleasures of a "country " walk without having to travel by car and park in an over-priced car park! There are even opportunities for people to drive from anywhere in Leek within minutes to the Mount and then enjoy all the attractions described above. The loss of this walk and seats would deprive many people of the opportunity to enjoy panoramic views across the town and the surrounding skyline: these vistas would be lost and replaced with houses instead - reducing the area to just another street of the kind to found anywhere and out of character with the landscape. It also seems that all the attention has been focused on this area and side of Leek, when there are other areas around Leek which could be made use of. One of the most important problems, as I see it, is the strain on the local infrastructure. Up to, or in excess of, 500 houses could be built along this road and all these new residents will need employment - already a problem in Leek and the surrounding areas and towns - as well as schools for their children. Leek primary schools are already experiencing problems and some children are already having to travel across Leek to receive their education. Recently trees have been cut down on the top field of the High School - now work has started on fencing this area, apparently towards the building of a new primary school on this site. I cannot remember being made aware of this possibility, although it may have been mentioned somewhere, but it seems that the building of this school means that councillors are confident that the housing development will take place and they will be able to wave aside any objections pertaining to education and say that a school is already being built . There are many houses in Leek which are empty, as there are many sites which could be used to provide areas for new homes, and it would make more sense to utilize these possibilities before taking away an important , local amenity which is used every day by so many people and which is our own area of "outstanding natural beauty" and which is available to everyone.</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO1732 about western Green Belt • See para response to PO679 about Leek employment land requirements • See para response to PO673 about educational requirements • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO9115 about design policies <p>The emerging Local Plan is not yet finalised and needs to undergo independent public examination by Government appointed Planning Inspector before it can become adopted. Planning applications arising before this happens must be determined against the NPPF and current Council planning policies.</p> <ul style="list-style-type: none"> • See para response to PO256 on housing needs evidence

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9347	Mr David Rowe				Object	I am writing to object to the selection of all sites on Mount Road, LE127, LE128, LE140 and LE142a. This road is of great value to local people as a very accessible place to experience and benefit from the surrounding countryside. Many people walk, cycle, exercise their dogs along this road every day, and this would be completely lost if development was allowed to take place. There are several brownfield sites in the town that should be considered instead, e.g. the old mills, Barnfields site.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about Leek housing requirements and windfall allowance
PO9328	Dr Tracey Cole				Object	I would like to hereby object to the areas of local interest around The Mount being developed (LE142b; LE142a; LE140; LE128a; LE127; LE022). As I am sure you are aware, there is considerable public opposition to the proposed building of 400 houses on these sites. The area is well used, at all times of day for cyclists, walkers and horse-riders. It is an quiet oasis for the people of Leek to experience the calm of the countryside and look down on the splendid views of the town and further afield. As such, it is an extremely highly valued area in the town of Leek. As a resident of Pitcher Lane..building on The Mount would seriously impact on me and my neighbours. The building of so many houses will bring at least 400-800 cars with it. Access for these vehicles will no doubt run straight past my house, causing noise and air pollution. I moved to Leek from Cheshire for exactly the same reasons: the road I lived on became unbearably busy. I noticed that sitting in the garden was impossible with the constant noise of the cars and the smell of the fumes, not to mention the health consequences of nitrogen oxides, carbon monoxide and particulate matter. I am also concerned that with so many vehicles, the junctions of Kniveden/Ashbourne Rd and The Mount/Buxton Rd will easily generate queues during rush hours. Getting off my estate will be far more tricky and the increased risk of traffic and pedestrian accidents is not a pleasant thought. A town like Leek is quite a jewel, but it could so easily be ruined forever if we don't seriously consider all the consequences of our actions.	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways • See para response to PO256 about air pollution and environmental health considerations of development

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9418	Mr Anthony Clark				Object	<p>I am writing to make you aware of the concerns I have over the housing proposals for the Mount Road area, Leek, set out in Staffordshire Moorlands Preferred Options and Development Boundaries Consultation. The consequence on traffic of building many houses in the Mount Road area will be very marked both in the immediate area and the town as a whole . Immediate area Mount Road is not wide enough to safely take a major increase in traffic. The road is very popular with walkers, horse riders and cyclists. Increased traffic will discourage such use and be a danger to those leisure users who do continue to use the road. The existing access points to the area off Buxton Road and Ashbourne Road are adequate for the present level of traffic but are woefully inadequate and dangerous for high volumes of vehicles. If, as is most likely ,Kniveden Lane was upgraded at its top end to allow access by vehicles the consequences for its junction with Ashbourne Road would be great. At present the limited amount of traffic means that the restricted visibility due to the trees on Ashbourne Road causes minimal problems. An increase in traffic queues would lead to frustration and rash decisions by drivers. This in turn would lead to calls for the removal of the trees and the consequent destruction of a wonderful entrance to the town. Town Residents living in the proposed housing development will need to work and shop. Question where will they go to do these two activities. Work Very few will work in Buxton or Ashbourne which are easily accessible from Mount Road. The vast majority will work in the town centre, the Barnfields industrial estate or on Cheadle Road. Those commuting out of town will be mostly heading for Stoke or Macclesfield/Manchester. All these people will have to drive through the centre of town at least twice a day at peak times as there are no alternative routes they can use. Shopping To reach the two large supermarkets in Leek (Morrisons and Sainsbury's) residents of the Mount Road area would be forced, by the road system, to travel through the centre of town. Those shopping further afield will, in the main, be heading for Stoke and Macclesfield and again will need to travel through the town centre. One look at the map would tell anyone that major building to the east of Leek will cause major traffic problems. If building must take place on the Mount, though I doubt there is a need, the least environmentally damaging sites are LE142b and LE140. Question is there not a possibility of building on the existing sites of Kniveden Hall (which is well screened by trees) and the old Social Services site. These sites would be the least invasive environmentally but would still generate major traffic problems both locally and in town. In 2006 New York took the far sighted decision to turn a disused elevated railway into an linear park (The High Line). Would that Leek had planners and leaders of similar vision to develop Mount Road into The High Lane for the benefit of all the community.</p>	<ul style="list-style-type: none"> • See para response to PO89 on highways • See para response to PO5884 about tree protection • See para response to PO679 about Leek employment land requirements • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO256 on housing needs evidence • See para response to PO89 about option sites assessments and sustainability appraisal • See para response to PO9122 about landscape evidence <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <p>The Council's emerging Local Plan contains a policy protecting existing railway lines from development; and supporting recreational re-use etc. The Mount does not contain any such routes.</p>

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9299	Mr and Ms Gary and Elaine Turner				Object	I wish to object to the proposed housing development at the mount (all of the sites) as this is a high quality amenity area enjoyed by all for its views, indeed, if ever Leek is featured on TV programmes the cameras usually end up doing a view of the town from the mount, which says it all.	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access
PO9423	Mr Michael Harvey				Object	To whom this may concern. I would like to raise my strongest objections to the proposed plans to build across the mount - LE142A, LE140, LE128 & LE127. This is a beautiful and precious area for the people of Leek who currently enjoy leisure activities such as walking etc which is easily accessed by many, both old and young. The fantastic views of this high quality landscape and the therapeutic benefits it offers are easily available to all who want to enjoy the beauty and peacefulness of the countryside without having to travel far from their doorstep, and who may not be in a position to! To lose this lovely countryside would be a tragic and very sad loss to the people of Leek. The Mount is a narrow county lane and is totally unsuitable for increasing the flow of traffic. Having Buxton Road at one end of The Mount and Ashbourne Road at the other, this would create a massive increase in the volume of traffic using it, and increase the risk of accidents - it's totally unsuitable! In addition to this, the increase in homes would ruin what is currently a peaceful retreat and a habitat for our wildlife which I have seen loads of rare birds when walking our dogs, these birds would go away and would not be seen again. Also foxes and badgers. Concern that fatal traffic accidents will occur. Leave our mount and all it has to offer well alone!! There are loads of other areas in Leek that are within the boundaries of leek and not on green field sites (Huge's Concrete site for one) Leek dose not need this amount of housing there is not the work/jobs for the increase in people. This is all about money in the pocket for the council. If we need another primary school increase extend Beresford Memorial school there is about 3 acres of fields behind the school.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO89 about landscape evidence • See para response to PO89 on highways • See para response to PO256 on ecology evidence • See para response to PO9203 about existing industrial areas • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO256 on housing needs evidence • See para response to PO679 about Leek employment land requirements • See para response to PO673 about new homes bonus • See para response to PO673 about Leek educational requirements
PO9376	Cllr Dani Ogden				Object	An area of natural beauty should never have been considered for planning application in the local plan. The outrage this has caused with local people has been overwhelming. The Mount is an area accessible to open countryside for local people, it is used for recreational purpose and attracts visitors coming to Leek. One lady told me that she could walk safely with a group of people with learning difficulties, the volume of traffic from four hundred dwellings would have a severe impact on those using The Mount for recreation, the infrastructure alone would not only cause a dramatic difference to the landscape it would also affect the wildlife in this area. That said, LE142a [landowner] are against development on this land, also there appears to be no indication on the map as to where the boundary is belonging to [the landowner]. LE127 and LE128a is not suitably distributed to urban infrastructure. It has been suggested LE066 where Kniveden Hall is, Folker Grange and Holme Farm on the west	<ul style="list-style-type: none"> • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways • See para response to PO256 on ecology evidence <p>The Council communicates with landowners of affected sites to ensure they are available, prior to selection. Note that the owner of site LE142A, as indicated on the Local Plan proposals map, has confirmed site availability.</p> <ul style="list-style-type: none"> • Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.

						side of Leek are developable.	<p>The map in the Preferred Options consultation document is intended to illustrate proposed allocations and development boundaries and other summary information, not the extent of land ownerships.</p> <ul style="list-style-type: none"> • See para response to PO673 about educational requirements • See para response to PO679 about Infrastructure Delivery Plan • See para response to PO1732 about western Green Belt • See para response to PO9122 about landscape evidence
PO9384	Councillor Charlotte Atkins				Object	<p>I am writing to object to the four development sites on The Mount as identified in the proposed SMDC Local Plan. My reasons for doing so are: The Mount provides unique and much valued panoramic views over Leek and its skyline as well as over parts of the National Peak Park The openness of The Mount makes it a hugely important local asset for public recreation and for biodiversity. This is particularly important at present when lack of physical exercise is creating a public health crisis. The Mount is very popular among walkers, cyclists, horse riders and joggers as well encouraging families to be active and enjoy the natural attractions of the area. The roads up to The Mount are totally unsuited to increased traffic. But if they were improved, that would encourage rat running between the Ashbourne and Buxton Roads totally destroying the quiet rural nature of the area. With increased traffic, the junctions at either end of Mount Road would be highly dangerous. The Mount is a developer's dream and would attract developers who want to build expensive executive homes. These would attract buyers from outside Leek rather than providing the affordable homes we need for both local young and older residents. If 400 houses are built on the Mount, they could potentially generate 800 cars driving through the centre of Leek as the prevailing flow of traffic out of Leek is to Stoke on Trent and Macclesfield. That would create even more gridlock than we experience already. More suitable development sites exist within Leek eg along the Macclesfield Road. But they have not been identified or consulted upon. I urge the Council to drop its plans to destroy The Mount and look elsewhere to develop affordable homes for local residents.</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways • See para response to PO1750 about affordable housing • See para response to PO679 about Leek employment land requirements • See para response to PO1732 about western Green Belt • See para response to PO89 about Leek housing requirements and windfall allowance • See para response PO679 about identification of sites during 2015 and 2016 public consultations

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9395	Ms Katie Giddings				Object	<p>I wish to register my strong objection to the sites identified for development along The Mount, Leek. The site reference numbers are LE127, LE128, LE140 & LE142a. The Mount is highly valued by the people of Leek. Hundreds of people use it every day & enjoy the landscape and views. These people cover a broad mix - there are walkers & strollers, hikers & joggers, dog walkers, horse riders, cyclists - and they range through all ages, from young to old. Generations have taken the air along The Mount and future generations deserve the same opportunity. Chance and regular encounters with this variety of people whose paths would probably otherwise not cross creates the sense of community so often lacking elsewhere but celebrated in Leek. The view of Leek from The Mount creates a sense of belonging to and connection with the whole town, enhancing this sense of belonging. I may not live the other side of Leek but I can see it every time I walk the Mount and feel part of its whole. The town is visible from The Mount & I can enjoy the view of its special architecture & character. This natural landscape is free for everyone to enjoy and is accessible within minutes of the town centre. It is a landscape and community which would be lost forever should the developments go ahead. Such things are irreplaceable and I despair that The Mount is even being considered as a suitable option. I am a recent newcomer to Leek having moved here three years ago. I have never lived anywhere more welcoming and cheerful and full of people appreciating and making the most of living in such a beautiful place. The Mount is at present a country lane offering peace and tranquil exercise. Its urbanisation would completely change its character and make it a main road connecting Ashbourne & Buxton Roads. The traffic increase would be beyond that contributed to by extra housing as it would become a highly attractive route for those seeking to avoid Leek town centre. The access to and from Ashbourne Road would also radically change the character of that end of town. The increased housing would alter the balance of the town and there is simply not that level of demand for housing in that area. The figures of required housing also appear to be based on doubtful statistics so that the very need for this level of housing in the Moorlands is questionable. It would really be dreadful if this so very important natural landscape were to disappear forever from Leek. In conversation with the people I meet along the Mount, there is a strong feeling of being threatened by changes beyond their control & of losing something very precious. Many people have said they have no faith that their feelings and needs will be valued. Please change their minds and show that local people will be listened to and their objections acted upon. Please don't build on The Mount.</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways • See para response to PO89 about Leek housing requirements and windfall allowance • See para response to PO256 on housing needs evidence • See para response to PO1353 about public consultation and Statement of Community Involvement

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9410	Mr Alan Percival				Object	I wish to object to the proposed house building on The Mount. Along with many other people I walk along Mount Road several times a week winter and summer. It is a lovely country walk and the only one on the eastern side of the town that is away from traffic fumes. There are many other reasons why building should not be allowed on The Mount which I am sure you have been made aware of.	<ul style="list-style-type: none"> • See para response to PO89 about open spaces and countryside access • See para response to PO256 about air pollution and environmental health considerations of development
PO9428	Ms Catherine Harvey				Object	To whom this may concern. I would like to raise my strongest objections to the proposed plans to build across the mount - LE142A, LE140, LE128 & LE127. This is a beautiful and precious area for the people of Leek who currently enjoy leisure activities such as walking etc which is easily accessed by many, both old and young. The fantastic views of this high quality landscape and the therapeutic benefits it offers are easily available to all who want to enjoy the beauty and peacefulness of the countryside without having to travel far from their doorstep, and who may not be in a position to! To lose this lovely countryside would be a tragic and very sad loss to the people of Leek. The Mount is a narrow county lane and is totally unsuitable for increasing the flow of traffic. Having Buxton Road at one end of The Mount and Ashbourne Road at the other, this would create a massive increase in the volume of traffic using it, and increase the risk of accidents - it's totally unsuitable! In addition to this, the increase in homes would ruin what is currently a peaceful retreat and a habitat for our wildlife which I have seen loads of rare birds when walking our dogs, these birds would go away and would not be seen again. Also foxes and badgers. Concern that fatal traffic accidents will occur. Leave our mount and all it has to offer well alone!!	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence • See para response to PO89 about open spaces and countryside access • See para response to PO89 on highways • See para response to PO256 on ecology evidence
	Petition from Mount residents (1092 signatures)				Object	<p>Dear Miss Ralphs,</p> <p>Building four hundred plus houses on the area known by everyone in Leek as The Mount and used by countless generations as a gateway to the countryside would be against everything that 'Localism' intended to bring.</p> <p>The enclosed petition goes some way to demonstrate the strength of feeling that there is against the proposed building plots as set out in the Local Plan.</p> <p>The area is mainly agricultural and offers amazing views of the town and its surrounding countryside. Indeed the views of Leek's conservation area is unrivalled and the area as a whole acts as a buffer between the town the Peak District National Park.</p> <p>The road itself could not cope with the estimated 600 to 800 extra cars that the proposed housing would generate. The Mount is a narrow road with no footpaths and the junctions at either end of the Mount would become even more dangerous.</p> <p>Historically people travelling out of Leek to work use the Stoke on Trent and Macclesfield roads with few travelling to Buxton or Ashbourne. This would mean that the roads in Leek's Town centre would become even more congested at peak times as these people make their way through town.</p>	<ul style="list-style-type: none"> • See para response to PO89 about landscape evidence <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This includes consideration of heritage impacts, following consultation with the Council's Conservation Officer, and the heritage impact recommendations of the most recent 2016 landscape impact study. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p> <ul style="list-style-type: none"> • See para response to PO89 on highways • See para response to PO1353 about Council Assembly and statement of community involvement

Question 10: Do you have any comments on the proposed housing allocations LE127 in Leek?

						We urge the Council to think again and produce alternative sites for the houses thereby saving this precious area for the future generations to enjoy.	<ul style="list-style-type: none"> • See para response to PO679 about Leek employment land requirements

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO35	MRS KATRINA KEMSHEAD		MR COLIN KEMSHEAD		Support	This allocated area has now been reduced. I could see no reason why the whole of plot LE128 has not been allocated as housing. The original scheme was for approximately 93 units. Reducing it down to 47 does not make it such a viable economic proposition, bearing in mind the requirement for affordable housing. I would have preferred for the whole site to be allocated.	<p>Comments and confirmation of owner position, noted. The emerging Local Plan sets out how the residual housing requirement for Leek will be achieved by a combination of allocations within the urban area, and along the Mount (making allowance for windfall/small sites allowances). Additional housing sites along the Mount are not required.</p> <p>The Council is undertaking Local Plan viability work which will consider the viability of preferred option sites.</p>
PO4399	Mr Andy Frost	Frost Plannin g			Object	On behalf of our client, The Kemshead Family, we wish to make Representations in respect of the above parcel of land. The aim is to secure the allocation of the entire site within their ownership for residential development in the emerging Local Plan. Preferred Housing Allocation LE128A should be extended further southwards to include all land within our client's ownership. We consider there is a compelling case to support this given the level of housing need identified, the proposed distribution of housing, and the characteristics of the site. The Plan is therefore 'unsound' at present. [Refer to full Supporting Statement attached to Question 1].	<ul style="list-style-type: none"> Refer to PO35 response above <p>Table 4.1 in the preferred Options consultation document explains how the set of Preferred Options housing sites for Leek would satisfy the town's OAN (as per Policy SS3 Core Strategy).</p>
PO90	Mr Bill Reid				Object	This area is a most popular area for walkers, runners, drivers and strollers. It has been, for as long as I can remember, an area that provides views over Leek town and the surrounding area which cannot be equalled. It is a beautiful peaceful part of Leek which should not be spoilt by housing estates and the disruption that goes with it. The top of Kniveden Lane has a piece of unadopted road which deters motorists from using it as a thoroughfare and I am sure that this would become adopted if the proposed plans go ahead causing untold traffic, noise and pollution, as well as the dangers to residents from the traffic. There are many areas around Leek which would be far more suitable.	<p>The public/visual open spaces proposed by the Council are those mapped in the Preferred Options consultation document. The Council's adopted Core Strategy policies seek to improve public access to open spaces/recreation generally where this is consistent with other policies. Note there is no automatic public right to cross privately owned land beyond public rights of way.</p> <p>Page 25 of the Preferred Options consultation document sets out the residual housing requirement for Leek to 2031 (pursuant to Policy SS3 of the adopted Core Strategy). The Council must demonstrate that it will fully meet residual housing requirements for Leek to have a sound Local Plan in place. This requirement does not have to be met 100% from land allocations – unanticipated development of other urban brownfield/greenfield sites counts too – Table 4.1 factors in assumptions about future windfall housing (resulting in a lower residual requirement). This windfall</p>

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
							<p>would include urban sites not formally identified on the map. Applications for residential uses arising on such sites would be assessed on their merits against NPPF and Council Policies. As there is insufficient capacity to meet this residual need entirely from sites within the Leek town boundary, the remaining requirement is to be met from a combination of urban (brownfield and greenfield) sites, and peripheral “urban extensions” around Leek as set out in Tables 4.2 and 4.3.</p> <p>The Council uses evidence to justify its selection of ‘Preferred’ allocation sites from wider sites. This includes landscape impact evidence. The most recent 2016 landscape impact study assessed impacts from the Peak Park, and and concluded that the various Mount sites exhibited low-through to high- landscape sensitivity; it also provided recommendations regarding mitigatory measures. It concluded that both LE128Aa and LE128B are of medium landscape sensitivity and recommends that site-specific landscape mitigation measures could include advanced planting and landscaping on the eastern boundary, and limited building heights in the eastern half of the site. Note that landscape evidence must be weighed against all other relevant evidence when the Council selects ‘Preferred’ sites.</p> <p>The Council consults with SCC Highways during Local Plan preparation. SCC did not raise any objections to Preferred Options sites LE022/LE127/LE128/LE140/LE142A/LE142B subject to development in this area contributing to the improvement of Mount Road including provision of footways and pedestrian links. Also Kniveden Lane should be brought up to adoptable standard with the implementation of footways. Further junction improvements at Mount Road/Ashbourne Road may also be appropriate. The Council would assess schemes having significant transport</p>

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>2. Health & quality of life 'The Mount' is a known cultural and unique feature for Leek folk and visitors gained over many generations. Offering: Visual beauty, health and community amenity. The many attractions of a 'trip around the mount' would be largely lost. These comments refer to LE127, LE128a and LE140.</p>	<p>All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p> <ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access
PO192	Mr John Pigott				Object	<p>The following comments apply to three areas allocated for housing development on Mount Road: LE127, LE128a and LE142a The proposal to build in these three blocks along both sides of Mount Road should be removed as the Mount is a very important open space close to the town centre and is a very popular route for walking, jogging and cycling. It is also on the route of the Staffordshire Moorlands Walk giving panoramic views over the centre of Leek and the hills beyond. The Mount is a very important local amenity which has been completely underestimated and its value not understood.. A local resident carried out a head count on Sun 8 th May between 0700 and 2000 and counted a total of 217 people using the road for recreation : 190 walkers (44 with dogs, 8 with prams), 12 cyclists, 12 joggers and 3 horse riders. These were not in organised groups but simply people enjoying the exercise, the views and the fresh air in a safe and sustainable way – no need to get the car out. If the developments proceed then inevitably Mount Road, which is now a country Lane, would be widened and become a busy estate road and people would not want to use it for recreation. Instead of building along Mount Road, the brownfield sites and other sites within the town boundary should be developed first. These include the following sites which were shown on the original plans but now taken out : LE 219, LE073, LE067, LE147, LE037 and LE063</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access <p>Development proposals affecting the routes of recognised public rights of way would need to make allowance for them.</p> <ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about highways <p>Page 25 of the Preferred Options consultation document sets out the residual housing requirement for Leek to 2031 (pursuant to Policy SS3 of the adopted Core Strategy). 							<p>extensions" around Leek as set out in Tables 4.2 and 4.3.</p> <p>Note that site LE073 has since been granted residential planning consent under SMD/2015/0523.</p>
PO117	Mrs Alison Campion				Object	New houses will create more traffic on Mount Road which is very narrow in places. Housing will spoil the views of residents already in the area. The Mount should be left for public to enjoy open spaces.	<ul style="list-style-type: none"> • See para response to PO90 about highways • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access
PO227	Miss Alicia Guy				Object	Building nearly 400 houses in the Mount area will totally ruin the lovely breathtaking scenery and peace and quiet that you get up there, increased traffic will spoil the area also. It could bring house prices down as at the moment it is such a lovely peaceful area and this no doubt will change	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about highways
PO232	Mr Daniel Frith						Property values are not considered as material considerations under the Planning Acts.
PO220	Mr Andrew Bodiam				Object	Like many others I have enjoyed walking on the Mount for 12 years and the planned housing site allocations in this area will completely destroy one of Leek's most valuable assets. Just take a walk along Mount Road and imagine what it would be like with the planned housing in place. I appreciate the Governments requirements but I am far from convinced that Leek's rural countryside should be sacrificed to their cause when there are so many brown field sites available. Furthermore, Leek is not a commuter town and I wonder if there is really the demand for 600 houses especially when those that are for sale take forever to do so. I would therefore ask you to think again.	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO192 about Leek housing requirements and windfall allowance <p>Need for additional housing stems from a number of factors, for example household formation, in-migration, linkages with future workforce, and other factors. The NPPF makes clear that housing projections are the starting point for assessing housing needs; however these additional factors should also be taken in to account in Council SHMAs. The Council's own housing need assessments are set out in its evidence base on the website. Note that this already takes into consideration empty properties in the Moorlands.</p>
PO678	Andy McGraw				Object	Extension of the Town Boundary into the Natural Zone The following blocks identified as, potentially suitable housing sites, all appear to be outside the town boundary on the maps supplied by	Note that there is not a 'natural zone' designation for open countryside in the Staffordshire Moorlands.

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>the Staffordshire Moorlands District Council, on this second housing consultation June 2016 Block numbers; LE 127, LE128a, LE140, LE142a, LE142b All the above mentioned blocks are therefore proposed to be constructed on the Natural Zone land surrounding the town of Leek.</p> <p>Public Amenity The small narrow lane known as Mount Road which travels between the A53 Leek/ Buxton road and A523 Leek/ Ashbourne road along which the following blocks appear, LE127, LE128a, LE140 and LE142a, are used on a daily basis as a public amenity. The lane is constantly used by locals and visitors to walk, ride and enjoy the views in relative safety at present. If the proposed housing goes ahead, with the number of houses planned on these sites, this road will undoubtedly suffer a dramatic increase in the number of vehicles using it, by averaging 2 cars per household, thus reducing its safety and relative quiet enjoyment. The views over the town of Leek and its surrounding countryside will also be affected detrimentally. I also note that the lane is included as part of the Staffordshire Moorlands Walks, advertised and mapped by the Ordnance Survey as a recreational path but not highlighted as such on the SMDC consultation map. Surely the increase in vehicular traffic would compromise this route. Other public rights of way, public footpaths, are either not shown or seem now to stop at the new development. When I raised the question of this fact at consultation the officer was unable to answer my query. In these times of austerity and the constant cut backs to local government, areas of free enjoyment and recreational use which also merit health benefits need to be conserved.</p> <p>Wildlife Concerns The blocks shown as, LE127, LE128a, LE140 and LE142a are frequently used by several bird species, especially during the winter months, as important feeding grounds. Some of these bird species are afforded special protection under the Wildlife and Countryside Act 1981 (W&CA81) as Schedule 1 protected species, identified by BirdLife International as Globally Threatened species and are listed as Red List species of birds of conservation concern by organisations, the RSPB (Royal Society for the Protection of Birds), the British Ornithologists Union, Natural England and the British Trust of Ornithology, to name a few. The birds in question are; Fieldfare Turdus pilaris, Schedule 1 W&CA 81 and Red List species Redwing Turdus iliacus , Schedule 1 W&CA81 and Red List Species Starling Sturnus vulgaris, Red List species The small block of land between blocks LE127 and LE128a is also important to wildlife in particular bird species. Although this land is not earmarked for development I feel that the disturbance of the development would compromise the species using it. This small wooded block is used during the winter months as an important winter roost for a small number of Raven Corus corax, a species again afforded a certain amount of protection. Species using this</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO90 about landscape evidence • See para response to PO192 about public rights of way <p>The consultation map is intended to depict summary information only; it does not for example illustrate public rights of way.</p> <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites, including ecological evidence: the Mount sites LE022/ LE127/ LE128/ LE140/ LE142A/ LE142B were subject to a Phase I ecological survey in 2014 and a later 2017 ecology study considered the scope for 'local wildlife site' (ie.SBI) designation for all preferred option sites. These studies set out ecological evaluations of the sites followed by recommended further surveys/actions in the event of future development. The Council would expect subsequent schemes to take account of this evidence; further Policy NE1 allows for the Council to require ecological mitigatory or compensatory measures where appropriate. Note that ecology evidence must be weighed against all</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>block to breed include, Little Owl <i>Athene noctua</i> , although not afforded any specific protection via acts of Parliament or listed as a concern yet, it is a species showing major decline, UK population estimated to be down by 24%, as highlighted by the RSPB breeding bird data 1995 – 2008. Great Spotted Woodpecker <i>Dendrocopos major</i> , Nuthatch <i>Sitta europaea</i>, are other examples of regular breeding species in this area. Due to disturbance I predict that many of these species will refrain from using this important area.</p> <p>Infrastructure As mentioned previously the numbers of new houses proposed in the areas of Mount Road and Thorncliffe Road, blocks LE127, LE128a, LE140, LE142a and LE142b, will put an enormous strain on the local infrastructure and road system. We all constantly experience the difficulties whilst travelling through the town of Leek caused by any one road closure. Both junctions from Mount Road can be difficult to negotiate now with the small amount of traffic using it with the A523 being particularly dangerous in its present form. Problems with access at both these junctions will be severely increased with the increased volume of traffic. At the original consultation July 2015 there was no mention of increasing employment opportunities even when the question was raised. I still feel that these concerns have yet to be addressed. It was implied but not confirmed that most of the individuals who would be residing in the new development would be commuter based, travelling to nearby cities to seek their employment. This surely is contrary to most local government policies that are tasked with reducing this activity to contribute towards climate change and global warming issues. These planned developments will also have a visual, probably a negative impact from the adjoining Peak District National Park as it will be observed from the iconic Roaches and the boundary road of Morridge.</p> <p>There seems to be little or no mention of the use of brown field sites throughout the proposal. With the relaxation of planning rules for developing these sites should the Council look to these sites first. Removing deteriorating buildings and areas within the town that look unsightly and replacing with new developments would surely enhance the town, and, as they are close to amenities within the town centre, reduce the need for occupants to use their motor vehicles on shopping trips or evening entertainment. There are also a number of old mills and factories within the existing town boundary that could and should be transformed and upgraded into apartment blocks, as they have in</p>	<p>other relevant evidence when the Council selects 'Preferred' sites. According to the 2006 NERC Act, the Council must in its Planmaking, have regard to the purpose of conserving biodiversity.</p> <p>Both the 2015 site options consultation, and the 2016 Preferred Options consultation, mapped sites for various land uses across the District including housing, employment, and mixed uses.</p> <p>Notwithstanding current commuting patterns, the District as a whole has residual general employment land requirement, and Leek has a requirement (of around 8ha to 2031) and the Council must demonstrate that it will fully meet these along with its housing requirements, to have a sound Local Plan in place. Government Policy promotes mixed land uses, subject to proper consideration of amenity impacts (such as noise). The Council works with neighbouring planning authorities under its duty to cooperate, to explore opportunities for the meeting of development requirements cross-border. However neighbouring authorities must also address their own development requirements. The Council consults with SCC Transport (regarding strategic impacts) during Local Plan preparation; and has regard to SCC's Local Transport Plan Integrated Transport Strategy for the District.</p> <ul style="list-style-type: none"> • See para response to PO192 about Leek housing requirements and windfall allowance

						<p>other towns and cities in the UK, which would save those buildings from further degradation, provide perfect housing within the town and help to keep the overall feel of the town and its history.</p> <p>Conclusion In conclusion it is my belief that the proposed development and size of that development will have a serious and negative impact on the market town of Leek and its Natural Zone boundary. As a society in general we are losing touch with nature and the great outdoors. There are Government initiatives to reverse and combat this trend. Organisations, funded by the National Lottery, Government, County and Local councils including SMDC, are tasked to promote these initiatives assisting people to re-engage with nature. We are also constantly reminded these days of health, well-being and mental health issues that our society is increasingly subject too due to the pressures of our modern living and the need for places for people to unwind. With this in mind how can we justify increasing the urban zone into our countryside. We have a duty to protect iconic landscapes, open spaces and the biodiversity such as can be found within the Mount Road area for the future generations of this fantastic town, so that they too, can experience quiet and peaceful recreation as we have enjoyed over the years. Maybe the Officers involved in making the final decisions should take an early morning walk along the Mount Road to experience these quiet and peaceful surroundings with the only noise being provided by the local bird-life with their dawn chorus. Once we lose these areas they are lost forever.</p>	<p>In relation to comments on economic impact, new housing has a proven positive economic benefit to an area, generated both by expenditure of construction industry and through longer term residential spend.</p>
PO674	Mr Jonathan Hulme				Object	<p>The mount is an important, free, extensively used recreation facility for Leek. The proximity of the mount to the town makes it easily accessible, providing a rural escape for walkers, cyclists, joggers and families alike. This invaluable resource contributes to the physical and mental health and wellbeing of all who use it. The mount provides panoramic views of the town and surrounding moor land including the Roches, and housing developments should not encroach on this. The junctions with the A53 and the A523 are also quite dangerous and unsuited to large amounts of traffic. Some form of traffic management would need to be added to these junctions, increasing congestion in and around the town to even higher levels than currently (which is already too high!!). This deters visitors to the town, reducing the amount of tourist trade. The area is also important ecologically and accommodates a variety of species, some of which appear on the UK Biodiversity Action Plan. This excessive allocation of sites appears to be national policy implemented at a local level without consideration of local needs and demographics. The infrastructure in the east of the town is insufficient to cope with a population influx. For instance, the schools and health facilities are already full. Housing development should be concentrated on brownfield sites in the town such as Davenport mill on Mill Street and the mill on Ashbourne Road. The developers who own</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO90 about highways <p>Any new developments would need to adhere to design policies to ensure character of the District is maintained.</p> <ul style="list-style-type: none"> • See para response to PO678 on ecology evidence • See para response to PO220 on housing needs evidence <p>National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. PO700	Mr John Burnett				Object	<p>This existing field forms an intrinsic part of the open space known as the Mount. As such it provides views over the town out to the Macclesfield and Ladderedge areas and for users of the Mount affords an area of outstanding natural beauty. Building on this plot of land would severely restrict the views available and would mean that use of the Mount Road as an exercise and recreation facility would be severely restricted. I would also object based on my concerns that building in this location would have severe impact on both existing infrastructure including roads and schools and would affect the ground water run off causing issues in other areas of the town. Building on this land would demonstrably damage the aspirations of the local community and would have severe economic and environmental consequences - completely at odds with the objectives of the consultation.</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence <p>None of the Mount sites attract an AONB designation.</p> <ul style="list-style-type: none"> • See para response to PO90 about highways • See para response to PO674 about educational requirements <p>The Council consults with utilities providers, the Environment Agency, and the SCC Lead Local Flood Risk Officer during Local Plan preparation. These bodies did not object to any of the Mount sites. The SFRA provides an overview of flood risk from all sources across the District, and will be used alongside formal EA responses regarding proposed allocations. Note that subsequent development proposals would be required to integrate sustainable drainage features into layouts, as required by the Flood and Water Management Act.</p>

PO1352	Mr A Birks				Object	<p>This morning whilst taking my constitutional stroll around Mount Road I happened upon a group of people considering the best plots to build houses in this beauty spot. One member of the group introduced herself as a local councillor. My heart sank as it became clear that some minds at least, against the wishes of the local people, the decision to build seems to have been taken. It is outrageous that the local community is once again to be ignored by those elected to serve us. Mount Road is a very important part of the social scene of Leek as local people use it daily to enjoy the countryside which is within their homes. It would be an ecological and social outrage to remove this facility from the people of Leek. This area is more important to the wellbeing of residents from across the town than any other area around Leek as it is their gateway to a relaxed walk in the fresh air in the countryside.</p> <p>Any development of this area would change the nature of Leek as it would necessitate the widening of the road, the installation of lighting and the uprooting of that special commodity trees. The Mount Road would be a major thoroughfare between the Ashbourne Road, and Buxton Road, Kniveden Lane would be a conduit between the same roads meaning heavy traffic rushing through the estate and there would be a problem caused by necessary construction of major road junctions at each end of the Mount Road. Local residents this would be a disaster. There is a concern too that, with the addition of a large number of houses in this area, the infrastructure at this end of town would be challenged beyond its ability to cope. Schools and doctors surgeries are already very full and recent queues of vehicles to get into town were horrendous during the roadworks in the town. Imagine the chaos should we add another 500 families in the queue.</p> <p>In the unlikely event that Leek should actually need extra accommodation, consideration should be given to brownfields or less intrusive sites first. There are several derelict mills which could be utilised for apartments or demolished for housing. The infrastructure of drains, electricity and gas is readily available near these 2 areas too. I appeal to the council to reflect on the wishes of those who elected them to serve their needs and reject the idea of developing this area and retain it for enjoyment and health of the many people of Leek who appreciate it.</p>	<p>The Council must conduct public consultation concerning its emerging Local Plan as set out in the Local Plan regulations (or exceeding these requirements); and in also in accordance with the Council's adopted Statement of Community Involvement. All stages of the local Plan (including consultations) must be agreed by the elected Council Assembly; and all meetings of the Council Assembly are open to the public.</p> <ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO678 on ecology evidence • See para response to PO90 about highways <p>Issues such as external lighting in schemes can be controlled by the Council's amenity policies. Streetlighting is a matter controlled by SCC Highways.</p> <p>The emerging Local Plan policy NE2 protects all existing trees on site, or where this is not possible, expects a 2 for 1 replacement.</p> <ul style="list-style-type: none"> • See para response to PO674 about Infrastructure Delivery Plan • See para response to PO674 about educational requirements • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO220 on housing needs evidence

PO1323	Mr Stapleton	Leek And District Civic Society			Object	I write on behalf of Leek & District Civic Society to protest in the strongest possible terms against the decision to include The Mount' Leek as a preferred option for housing development. This area is heavily used by recreational walkers and is the sort of local amenity which would be absolutely spoilt by additional building. Leek has few enough open spaces as it is and the loss of The Mount would be completely unjustifiable. Of all the site options in the Leek area, The Mount is the one which we feel should be absolutely sacrosanct and protected for the present populace and future generations.	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access <p>The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy.</p> <ul style="list-style-type: none"> • See para response to PO90 about 'Options Site Assessments'
PO1146	Mr R Harrison				Object	I have recently looked at the site plans and talked to one of your officers concerning the location: This is a narrow road, used by many recreational purposes such as walking, cycling The views over Leek Conservation area and its surrounding area are 2nd to none both night and day There have been lots of houses built on the east side of Leek in recent years mainly off Ashbourne road. As the majority of people travel to Macclesfield, Manchester and Stoke on Trent to work, this means they have to travel through the centre and often Leek is gridlocked at busy times The exits from the Mount onto Buxton and the Ashbourne Roads are both very narrow and difficult to negotiate. Schools at the end of the town are already full to capacity and young children have to be taken across Leek early in the morning and collected in the evening. Dr's Lists are so full. We are told that some of these houses are possible affordable housing. What does this mean? There are plenty of small terrace houses on the market which I would consider as affordable. So do we need more? In fact do we need a 1000 new houses to in Leek at all anywhere? If so I would like to think that there are possible sites in Leek - West End could be given consideration before further action is taken. Leek is a beautiful small town with easy access to countryside. By allowing building on The Mount Road that access will be diminished as more of our green fields turned into housing developments and country roads become clogged with vehicles. Where will it end?	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO678 about Leek employment land requirements • See para response to PO125 about 'Options Site Assessments' • See para response to PO674 about Infrastructure Delivery Plan • See para response to PO674 about educational requirements <p>The Council consults with its Housing Officer when setting definitions of 'affordable' in relation to affordable housing. This usually equates to a percentage of open market value which represents the upper limit that the house can be sold/resold.</p> <ul style="list-style-type: none"> • See para response to PO220 on housing needs evidence • See para response to PO192 about Leek housing requirements and windfall allowance <p>Note that none of the Mount sites falls within the Green Belt, whereas the western edge of Leek has Green Belt status. Whilst Councils can allocate within the Green Belt National Planning policy is</p>

							<p>clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). The Council recently completed a Green Belt Review which assessed the suitability for retention of all areas of Green Belt in the District, against the five Green Belt 'purposes' set out in the NPPF. This will be used by the Council alongside other evidence in progressing its Local Plan. The NPPF also allows for consideration of development proposals that would represent 'limited infilling', or in some cases redevelopment of 'brownfield' sites in the Green Belt.</p>
PO863	Mr Daniel Noble				Object	<p>There are three main topics on which I object to and reserve sites along Mount Road including site LE128. Concerns that the local infrastructure cannot support the level of building proposed The spoiling of a popular amenity Concerns over flood risk Many of the proposed potentially developable sites are in the East of Leek, suggesting a large quantity of housing will be built in the east end to fulfill the proposed housing requirements. The east side of Leek is already stretched when it comes to critical amenities such as schools and County Education acknowledged this in the 2015 consultation. However I don't believe that any suggestions have been put forward by the District and County Council. I believe this to be a significant roadblock and should be addressed before continuing with the housing consultation. It should be clear that any significant building on this or any of the Mount sites will require improvements to the road including, but not limited to, widening and creation of pavements and better access from the Ashbourne Road end. Access for residents on this site will make the Mount much busier - especially considering my comments above that multiple proposed sites will need to be built on to support the plan. This will mean a popular "quiet lane" will become not only much busier but a "rat run" from the Buxton Road to the Ashbourne Road. This would be a hugely negative impact on an important local amenity i.e. The Mount. The Options Site Assessments report (Options Site Assessments - Towns.pdf) acknowledges that building on this site will require improvements to the badly potholed eastern end of Kniveden Lane, thus creating a through access for motor vehicles that doesn't currently exist in a satisfactory form. The estate taking in Kniveden Lane and Moorland Road is currently very quiet and is not generally used as a through route. This makes it a relatively safe place for children to play outside and I have significant concerns that losing this sense of security would be another reason to discourage children from playing outside. Our children need encouragement to be active, not discouragement through reduced safety. The Mount - particularly south of Kniveden Lane -</p>	<ul style="list-style-type: none"> • See para response to PO90 about highways • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO90 about open spaces and countryside access • See para response in PO700 about utilities and flood risk • See para response to PO674 about educational requirements • See para response to PO90 about landscape evidence <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p>

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>is an extremely popular semi-rural location which is used by many for walking, cycling, horse-riding and running. It is a sound surface with superb far-reaching views, offering uniquely easy access to enjoy a stunning countryside location. Any building on the proposed LE128 site will spoil the views that extend to the Roaches, Shutlingsloe, the Cloud and beyond. With well-recognised concern that many people are not maintaining a satisfactorily healthy lifestyle, any spoiling or removal of a locally and culturally important leisure amenity would be a huge blow to not just the east end of Leek but the whole town. Severn Trent Water have acknowledged that "they have a duty to complete necessary improvements to sewers to provide the capacity for new development." However I've not seen any specifics in the Options Site Assessments - Towns.pdf and this concerns me in relation to plot LE128a/b which continues to have significant drainage issues. Frequently rainwater can be seen draining off LE128b at the SW corner and onto Moorland Road. My concern is that if draft potential allocation LE128a is built on (regardless of whether reserve allocation LE128b is built on) this drainage problem will be exacerbated and I've seen no plan or evidence of how that will be remedied. As per my 2015 consultation response I should re-iterate that the land drains that lead off LE128 into the culvert under the gardens of the easterly Moorland Road properties already struggle to cope with the water run-off from LE128. I have grave concerns that the existing drains will not support the necessary drainage of the proposed housing development. This is especially pertinent since I'm resident at the SW corner of the proposed plot on the Moorland Road side and get the bulk of the water draining under and across our plot.</p>	
PO935	Mr Chris Clark				Object	<p>Building houses adjacent to Mount Road would premanently destroy the panoramic view of Leek from this location. Mount Road is used daily by walkers, providing easy access to those living towards the north and east of the town. Kniveden Lane is virtually a no-through-road, as it is currently very rough at the top (Mount Road) end. As such, Kniveden Lane is relatively safe for children and elderly residents. Buiding house here would open up Kniveden Lane to a large amount of through traffic, including others trying to avoid current conjection sites closer to the town centre. If houses were to be built in this location, most residents would work in Stoke-on-Trent (or Macclesfield), which would add to traffic conjection through the town at peak times.</p>	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO678 about Leek employment land requirements

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1017	Mrs Julia McGraw				Object	<p>Proposed Housing Leek East I wish to record my objection to the proposed housing allocations in the area known as the Mount Road, Leek. Block numbers LE127, LE128a, LE140, LE142a Justification As a resident of Moorland Road I own 3 dogs that I walk daily around the Mount and surrounding areas. I enjoy the tranquillity that these walks offer as at present there is minimal disturbance from vehicular traffic. I enjoy meeting others whilst walking as well as watching the areas wildlife that I spot on my walks and savour the ever changing landscape and views on offer. I have health issues and exercise is an important part of my daily regime. If the planned housing goes ahead then I feel that the tranquillity and aesthetic value of the area will be lost. I also feel that there will be a greater use of the road by vehicular traffic thus making it less safe to walk with my dogs. My health issues make life difficult but I know that my daily walks help me to cope by lifting my spirits. Loosing this fabulous public amenity to housing, when there are other more favourable and practical sites within the town boundary that could be used, could have a detrimental effect on my health and well-being, I'm sure many other users will feel the same. I really hope that you listen to your residents and constituents as I truly believe that our lives will be somewhat poorer with this planned urbanisation of our countryside which will reduce further our places to walk locally and safely. The Mount provides local people with somewhere to walk, dream and escape the demands of our busy lives locally without having to use our motor vehicles, accompanied by our families, friends and dogs and is of paramount importance to all its users. A walk around a housing development will not offer the same enjoyment and pleasantness.</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO90 about landscape evidence • See para response to PO192 about Leek housing requirements and windfall allowance
PO1713	Mr G Carding				Object	<p>I would like to object to the proposed housing sites on Mount Road leek. The Mount has been a historic to the people of leek for generations for its 360 degree panoramic views of natural beauty. Being born in Leek I have walked over the mount all my life and always enjoyed the peace and quiet surrounded by the countryside views which are irreplaceable building housing in this area would also destroy the wildlife and a result in the loss of open space. This road is unsuitable for the large volume of traffic which would be generated by all the new houses and is narrow in places with dangerous junctions at both end of the road. The roads in this part cannot take any more traffic. Please find more suitable site within the town, if we keep building out into the countryside where will the border of Leek End? Ashbourne</p>	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO678 on ecology evidence • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways

PO1572 PO1579	Mrs S Chauveau Mr PJ Chauveau				Object	I wish to firmly object to any housing development on the mount. It is a beauty spot, Leek's gateway into the open country side and has been popular with walkers, joggers, cyclist and horse riding for generations and should be protected for future generations. I strongly recommend further consideration be given to the developing the empty mills, brownfield Sites and making use of the many vacant homes in the Moorlands before surrendering our precious Greenfields to hungry developers	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO220 on housing needs evidence
PO1482	mrs Brenda pigott				Object	Mount Road is an important amenity for local people who walk, jog, cycle, walk dogs etc along this country road. The field (LE128a) is the most elevated of the fields being considered & across the best views over the greatest sense of tranquillity. LE066 is a brownfield site which has lower public amenity value & should be considered ahead of LE128a. People walk both ways along the road best views are seen when walking from Ashbourne Road and towards the Roaches. You can see the 500m, high 'Matterhorn of Cheshire' called Shuttingstoe as you walk towards the Roaches. Also lovely views across fields with sheep or cows in the distance to Leek's Skyline with many Churches and landmarks. The road forms a part of a 9 miles circular walk called Staffordshire Moorlands. I regularly walk or cycle along Mount Road and have done for more than 40 years as my 3 sons and my husband. This road would need upgrading & with so much extra traffic the attraction/amenity that is now, would be lost.	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence <p>Note the 2016 Landscape impact study concludes that LE128A and LE128B are of medium landscape sensitivity and recommends that site-specific landscape mitigation measures could include advanced planting and landscaping on the eastern boundary, and limited building heights in the eastern half of the site. Whereas LE066 is assessed of high landscape sensitivity owing to its location, despite the presence of site screening.</p> <ul style="list-style-type: none"> • Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan. • See para response to PO90 about highways

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1688	Mr David Morgan				Object	<p>I am writing to express my strong objection to the proposal to build houses on the Mount. I specifically object to the building off houses on sites: LE022, LE127, LE128a, LE140, LE142A, LE142B. When I first heard about the proposal to build in this area. I was genuinely shocked and still cannot believe that the proposal have been submitted to build on such beautiful landscape which has helped to shape leeks identity as Queen Of the moorlands. I work in the local community and I have not heard a single resident of Leek express support for these proposals – they have expressed deep anger and concern. I live locally to the Mount and regularly take walks there and it is very clearly, a popular destination for walkers and cyclist. However, I do not feel that this is area that is solely of Leek by these who live in its vicinity. I believe that the mount is an area that the people of Leek genuinely cherish and it would be a tragedy if a major housing development were built along it, The Mount does provide an important amenity for local residents including Hargate estate. I feel it would be unacceptable to build houses on it, spoiling the unspoilt beauty of the area and leading to a huge increase in the traffic which would obviously cause a major hazard to walkers and cyclist. I feel it is unacceptable to deprive residents of a very built up area such as Haregate estate of the opportunity to enjoy the beautiful country side and open space this that the mount offers. If this proposal is passed then I feel that the character and identity of Leek will be very adversely affected and this will have a very detrimental impact on its image in terms of visitors and attracting business</p>	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • In relation to comments on economic impact, new housing has a proven positive economic benefit to an area, generated both by expenditure of construction industry and through longer term residential spend. • See para response to PO674 on design • Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.
PO1280	Mrs B Ward				Object	<p>I write once again to protest against the proposed development of housing along and off mount road. We have already had 2 public enquires and each time the inspector has upheld the decision not to allow these fields to develop along mount road. This is a great amenity for the town, especially for residents this side of leek. I feel that we have been left a short stretch off mount road but with all the roads going off it Mount Road itself will probably have to be widened and will become a bi pass for traffic between Buxton Road. Walking along a country lane enjoying the views. Do people walk as much on the other side of town? Aren't there still places for the development within the town? Not touching our open spaces. Where are 600 new houses on Mount Road going to work?</p>	<p>The Council must justify proposed land allocations which form part of its new Local Plan to planning inspector during public examination of the Local Plan. The Inspector must consider the 'soundness' of the Plan as per para 182 NPPF. Note that as part of this process the Council must demonstrate that it meets its objectively assessed development requirements for housing (and other land uses) for the District.</p> <ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO90 about highways • See para response to PO678 about Leek employment land requirements

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1404	Mrs M Smith				Object	With regard to the proposed 400 plus houses to be built on the mount, I would like to express my concerns on the matter. I can't help but for see the problems 400 to 800 cars will create, trying to leave Mount Road to gain access to the Buxton Road. They will be queuing up! Most families these days have at least one car some have two. Mount Road was not built for such traffic	<ul style="list-style-type: none"> • See para response to PO90 about highways
PO1484	Mrs C Lane				Object	I object to any housing being built in this area. It is an area used by many people for walking etc. – many for health reasons e.g. for me. We must keep our open spaces that are in walking distance of our town, once lost – gone forever. Don't let us loose it	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access
PO1745	Mr Anthony Clark				Object	<p>LE142b, le142a, le140, Le128a, Le022, Le127 I write to object to the proposal to all the building of housed along mount road as set out in the preferred options doc. My 2 main objections are based on the implications for the environment and the traffic.</p> <p>Environment – For generations Mount Road has been a favourite walking/cycling/horse riding route for many residents of Leek. It is easily accessible (not requiring a car to reach it) and is quiet safe place by way which can be used by all people of all ages in all weathers. The major attraction is walkers are the outstanding vista the road provides both town and county. The proposed building at the north would destroy the turn the road into a noisy, busy thoroughfare, that would be unsafe and unpleasant for walkers and all over leisure users. The proposed housing at the southern end of the road would mean the views of the town would be lost. At a time when all our members of society are being encouraged to take more exercise the destruction of the mount is free, natural gym, seems very short sighted. Immediate area Mount road is not a wide enough area to safely take a major increase in traffic. The existing access points to this area off Buxton Road and Ashbourne Road are adequate for the present level of traffic but are wholly inadequate and dangerous for the high volume of vehicles. If as is most likely, Kniveden Lane was upgraded at its top end to allow access by vehicles the consequences for its junction with Ashbourne Road causes minimal amount of problems. An increase in traffic will queues will lead to frustration and rash decisions by drivers. This in turn would lead to calls for the removal of the trees and the destruction of a wonderful entrance to the town. Town Residents living in the proposed housing development will need to work and shop. Where will they go to do these activities? Traffic The consequences of the traffic of building many houses both in the immediate area and the town as whole will be very marked. Work Very few work in Buxton or Ashbourne which re easily accessible from the mount. The vast majority work in the town centre, the barn field's industrial estate or on Cheadle road. Those commuting out of the town centre will be heading mostly to stoke Macclesfield/Manchester. All these people will have to drive</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO192 about public rights of way • See para response to PO90 about landscape evidence • See para response to PO674 on design • See para response to PO90 about highways <p>The emerging Local Plan policy NE2 protects all existing trees on site, or where this is not possible, expects a 2 for 1 replacement.</p> <ul style="list-style-type: none"> • See para response to PO678 about Leek employment land requirements • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO125 about option sites assessments and sustainability appraisal

						<p>through the town centre. One look at the map would tell anyone that the major building works to the east of leek will cause major traffic problems.</p> <p>If building must take place on the mount, though I doubt there is a need, the least environmentally damaging site LE142b and LE140. Is there not a possibility of the building on the site existing site of Kniveden Hall (which is screened of by trees) and the old Social Services building? These sites would be the least invasive environmentally but would still generate major traffic problems both locally and still generate a lot more traffic throughout the town. In 2006 New York took the far sighted decision to turn a disused elevated railway in a linear park (the high lane). Would that Leek had planners and leader of similar vision to develop mount road into a high lane for the benefit all off the community</p>	<p>The 2016 Landscape impact study concludes that:</p> <ul style="list-style-type: none"> - LE142B is of high landscape sensitivity and development could be visible from the peak Park, and the rural approach to Leek; - LE140 is of medium landscape sensitivity and site-specific mitigation measures including boundary landscaping, and controlled building heights, are recommended; - LE066 is of high landscape sensitivity owing to its location, despite the presence of site screening. <p>Note the findings of this study form part of a wider evidence base to support SMDC's Local Plan. Its conclusions must be weighed against other evidence.</p> <ul style="list-style-type: none"> • Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan. <p>The Council's emerging Local Plan already contains a policy (T2) protecting existing railway lines from development; and supporting recreational re-use etc. The Mount does not contain any such routes.</p>
PO1700	Mr Michael Owen				Object	<p>My wife and I would like to tender our personal objections to any proposed house building along Mount Road Leek. We don't feel that the area has infrastructure to cope with the number of houses proposed and would spoil the landscape of a very popular and picturesque area used extensively by Leek residents</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO90 about highways • See para response to PO674 about Infrastructure Delivery Plan • See para response to PO674 about educational requirements

PO1675 PO1651 PO1645 PO1642 PO1669 PO1666 PO1657 PO4768 PO4757	MRS A Staton Mrs G Webster Mrs J Lownds Mr W Johnson Mr S Panek Mr A Panek Miss J Panek Mrs A Lomas Mr & Mrs P & J Whitehurst				Object	I am writing to protest against the latest version of the site allocation plan for the SMDC. The site references of particular interest are: LE022, LE127, LE128a, LE140, LE142A, LE142B. The grounds for that are: Loss of important local amenity – The Mount is a very important open space close to the town. Visual impact – restrict important skyline and further afield. The proposed sites are near or run on particularly at night with street lighting. Impact for infrastructure – primary schools in particular (Leek 1 st school and Beresford Memorial School) will struggle to keep up demand and the situation where some children already have to school in the west of leek will become more common. Mount Road is a route of Staffordshire Moorlands Walk a very popular route for Leisure activities such as running, cycling and walking. High quality Landscape – unsympathetic to landscape and the character and quality of the area. Urbanisation of the country lane that is mount road – if all 6 developments proceed then the 500 houses would be constructed. Mount Road would be linking the Ashbourne and Buxton Roads. The spatial distribution of the proposed access sites across leek is unbalance – there will not be sufficient demand to build all of these houses on one side of the town so the council will not meet its housing needs in any event. The Mount is, and has been a great source of pleasure for many people over years. It needs to stay that way in order that the future generations have as much enjoyment out of this as our generation has.	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO1352 about streetlighting • See para response to PO674 about educational requirements • See para response to PO192 about public rights of way • See para response to PO90 about highways • See para response to PO35 about viability study
PO1473	Mrs G Armstrong				Object	As a resident of Moorland Road since 1975, I write to you to express my concerns over the appalling plan to yet again to destroy an area of the town much loved and frequented by its residents for countless generations. I can assure you that the contents of the letter not only reflect the views of me and the residents of moorland road and Kniveden Lane but those of leek in general. The proposal to build 400 houses on the Mount came as a shock to the town. Whilst I am not opposed to the idea of providing some housing In the Leek area, I cannot equate with the requirement for the number your department are planning. As regards the location, how can you say that a beautiful location like the Mount is in need of development when there are numerous locations that in the area that are an eyesore and would be more than fit the bill for re development? If your department were to take the time too canvas the people of leek you would find that it is considered an asset to this town. The Mount is an area of outstanding rural beauty with great views across the town, supporting an abundance of wildlife whose habitat would be	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO220 on housing needs evidence • See para response to PO90 about landscape evidence • See para response to PO678 on ecology evidence • See para response to PO90 about highways <p>An element of affordable housing will be required for all major housing schemes in</p>

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>destroyed if the plan goes ahead. It has long been a source of relaxation, leisure, exercise, and even welcomes retreats for courting couples and families with children or people exercising their pets can be seen walking the Mount in complete safety without the fear of being subjected to danger from large numbers of cars. This would change if the whole scheme goes ahead. Is it right that future generations should be denied the pleasure their forebears derived from this beautiful road, With an average of each household owning 2 cars each the paln to build 400 residents could unleash about 800 vehicles all trying to support those numbers. Mount road would be saturated with vehicles al trying to leave either via the junction with the A523 Ashbourne Road or the A53 Buxton Road. Both roads are very busy main roads. After frustration of accessing these knock on effect would choke the town centre which struggles now at certain times to maintain a smooth flow. No doubt the un adapted and unmade section of Kniveden Lane would be upgraded encouraging it to be used as a short cut between Ashbourne Road and Buxton Road. The only thing that stops it being a rat track now is that it is unmade and has ruts and pot holes. Also of concern is that with this sort of development you re require to provide a proportion for social housing. We all know who are housed in these and what effect it has on the surrounding area. I need say no more. Can you explain why there seems determination within the planning bodies to destroy what is beautiful and precious to the people of Leek with total disregard to the preservation of the environment and wishes of the Leek populace. If they want to improve this town why don't they concentrate on some off those areas in dire need of redevelopment and of which there are many in this town. I along with the majority of the other house owners in the vicinity, share at the lack of the thought the has obviously not being thought that has gone into this project. I ask the question; have any of the councillors or those on the planning dep actually bothered to walk to location, to see for themselves what they would be destroying and ask residents for their thoughts. No, I doubt it very much if this is the case.is it just a figure on the map to them? I understand that the majority are not from leek and so don't really have its best interests at heart. These so called councillors were voted in to represent the towns folk and listen to their view. This has not obviously been thought out thoroughly and it makes me wonder what sort of people will be running the council. Is it yet again something to their advantage and not that of the town. Their priorities do not appear to be the people of leek there to represent them. I make this representation not only on behalf of those directly affected but also the people of leek who are totally opposed to this desecration of one of the most beautiful and well-loved areas.</p>	<p>the District, as set out in Local Plan Policies. The Council may also require an element of starter homes, and self-build plots on such sites. The Council's housing/design policies and the NPPF expect that housing schemes provide for variegation in design; and a mix of house types to meet differing socio-economic needs, including affordable housing.</p> <ul style="list-style-type: none"> • See para response to PO1352 about Council Assembly and statement of community involvement

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1521	Ms Angie Guest				Object	Detrimental impact on an important & much valued amenity area. The location provides a green space accessible to and used by the wider population of leek for walking cycling and jogging. The mount follows part of the route of the Staffs Moorlands walk 'Leek Landscapes' managed by the SDMC and marked on the OS 1:25000 map. Described in the leaflet published by the district council as offering a walk 'through attractive farmland with interesting views over Leek. This would be compromised by the development. The panoramic views from The Mount over the skyline of Leek and countryside beyond are 2 nd to none. These would be severely restricted. The scale and the unbalanced distribution of this development sites, concentrated in this part of the town will lead to increase traffic in making the mount a busy road between the Ashbourne & Buxton roads as well as loss of a rural environment outside the town's boundary.	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO192 about public rights of way • See para response to PO90 about highways
PO1691	Mrs C Wainscott				Object	We write to reinforce grave concerns regarding the development of these 2 sites. LE127 and LE128a Firstly our primary objection to these 2 sites being development for housing is the impact of the traffic movements along mount road which would inevitably result. We have been residents on Mount Road for 47 years and during that time I have seen a significant increase in the usage of this road which has become somewhat of a rat run linking the main A53 Leek to Buxton Road with the A523 to Ashbourne Road. It hardly needs us to remind the local authority of the tragic road traffic accident a few years ago and this resulted in loss of life of a pedestrian following a collision with a vehicle and the regular use on the roads for recreational walks by many residents of leek coupled with preposterous 60mph speed limit already creates a recipe for further incidents. Further to the junctions connecting mount road to the A53 and A523 are already of poor standard with limited visibility when emerging particularly onto the A53 opposite novi lane. Secondly the area of Mount Road currently provides a buffer between existing development and open countryside and valuable interface between the 2, which is conveniently located to provide a much enjoyed amenity to many local amenities to many local residents who enjoy the tranquillity of the area for its beauty. From the planning policy perspective we understand that Governmental priority is given to brownfield site for future development and as Leek still exhibits the remnants of its industrial past with numerous redundant mills and industrial site still undeveloped it is hard to fathom how the logic that suggests the prominent greenfield site on mount road adjacent to open countryside should be developed in preference to multiple redundant industrial site in the area could ever be defended. We respectfully request therefore that the above concerns are considered by the local authority when deciding on the appropriateness for housing development of sites LE127 and LE128a for inclusion in the emerging SMDC local plans	<ul style="list-style-type: none"> • See para response to PO90 about highways • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO192 about Leek housing requirements and windfall allowance

PO1568	Miss Sheldon L				Object	I wish to object the proposed development on Mount Road for the following reasons: Serious damage to the natural habitat of endangered wildlife changing the entire environment forever. Increase traffic would cause major traffic issues not only cause major issues on the Mount itself but having a knock on effect on the town where congestion is already a issues. For generations the Mount has been a popular venue for walker's biker's families in general. It has provided a safe and pleasant environment and giving access to some of the finest views across Leek and Staffordshire Moorlands.	<ul style="list-style-type: none"> • See para response to PO678 on ecology evidence • See para response to PO90 about highways • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence
PO1556	Mrs Webster G				Object	I have never protested before but I feel compelled to write this let reg the proposed developments across the mount. When I was young I lived on Haregate Est and many times my parents took my siblings and I across the mount it was something we enjoyed seeing all the farm animal and wildlife. As I got older I would still walk the mount and dream of one day owning one of the houses which were only a couple of minutes' walk away from being in the countryside. That dream was realised in 1976. Now I am retired it is wonderful to be able to stroll round the mount each day. My husband twice a day come rain or shine, and able to do just that take in the views or have conversations with people we meet, not just from this area but from other parts of town. It is good for the soul as well as the mind. It is a marvellous asset for the town for young and old alike a great place to relax and exercise. It is a marvellous asset for the town for young and old alike a great place to relax and exercise. It is precious and should be protected for future generations 'never know what you have got till it's gone' comes to mind as was the case with what was a beautiful roundabout which stood proud at the top off Derby St. Do we need so many more houses in leek if so we do not build on the field opposite the cricket club on Macclesfield Road which would not have the catastrophic impact of hundreds of houses on the mount or why not build them on Blackshaw Moor where there is already a small estate. I hope this marvellous asset treasured by so many can be saved for the town and the people of Leek.	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO1146 about western Green Belt <p>Blackshaw Moor is identified as a 'smaller village' in the Council's emerging Local Plan and should only attract a limited amount of additional housing within or around the built up area. Note that Anzio Camp received planning consent for erection of extra care housing, live work units, ancillary social centre and facilities building and change of use to holiday park in November 2015.</p>
PO1551	Mr Sinclair P				Object	Would like to object to the development of the 350+homes on sites across the Mount. The area is used by lots of people walkers, families with young and older children dog walkers, cyclist, runners, horse riders, all enjoying the wonderful views over the Leek, which has been enjoyed for many years. I've been coming around the mount since I moved to leek in the late 60's, building more houses will mean the loss of this lovely scenery for ever. Also the health & safety factors of all these extra cars 600-700 trying to get out at either end of the mount, onto the Ashbourne Road and Buxton Road which is already busy without adding additional traffic. Then pollution of the air	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways <p>If the Council considered that a development may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts. In addition the Council continually monitors air quality across the District and</p>

							regularly undertakes review and assessments of this data to identify areas where the traffic could have an unacceptable impact on local air quality. Policy SD4 in the emerging Local Plan covers controls of all forms of pollution arising from development.
PO1545 PO1540	Mrs C Keates Mr B Day				Object	The Mount is a very important area for the town of Leek. This whole area is an important amenity area for the town – it was promised a few years ago that there will be no further development after the completion of Mountside gardens. Further developments will destroy the open views of the Morridge from the town. Some of the areas highlighted for development was gifted to the town presumably to protect them and for agricultural use. Development of the Mount will lead to greatly increased traffic on what is basically a country lane. Safety issues at both junctions. The importance of the local people who use it. Young walkers, runners, joggers, cyclist, horse riding, dog walkers. These include singles, couple. Family groups and organised walking groups aside. We urge you to look at these plans very carefully before you decide to ruin this beautiful area. Surely there are other smaller areas which could be utilized for future needs.	<ul style="list-style-type: none"> See para response to PO90 about landscape evidence <p>The Council communicates with landowners of affected sites to ensure they are available, prior to selection.</p> <ul style="list-style-type: none"> See para response to PO90 about highways See para response to PO90 about open spaces and countryside access See para response to PO192 about Leek housing requirements and windfall allowance
PO1491	Ms Dawn Garrett				Object	I write with reference to the planning proposals along The Mount in Leek. I moved to Leek last August, the countryside being one of the big draws. I'm dismayed to find that my favourite dog walk is earmarked for extensive development. The absolutely magnificent views would be lost forever. The birdsong drowned out by the inevitable increased traffic load. The wildflowers at the side of the road and the sheep peacefully grazing, all gone. The creeping urbanisation of such a lovely country town is a big worry. Surely it would be better environmental sense to deal with the falling-down mills and derelict housing in the town before building any further? Regeneration is a much more modern concept and would further revitalise the town itself. For me and my family access to the views, the fresh air and the wildlife is balm against our stressful and hectic working lives. I live on Ashbourne Road so this is not NIMBYism at work, it is a genuine plea to save this lovely area for everyone. Now and in the future.	<ul style="list-style-type: none"> See para response to PO90 about landscape evidence See para response to PO90 about highways See para response to PO192 about Leek housing requirements and windfall allowance See para response to PO90 about open spaces and countryside access
PO1582	Mr C Chauveau				Object	I wish to firmly object to any housing development on the mount as I love to go running there with my dad and really enjoy the view into open countryside.	<ul style="list-style-type: none"> See para response to PO90 about open spaces and countryside access See para response to PO90 about landscape evidence

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1592	Mr Emerick L				Object	I wish to firmly object to any housing development on the mount as this is a natural beauty spot with open views into the countryside and it should need to be protected. My family often take our dog for walks there and feel it should be protected	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence
PO1598	Mrs Smith J						
PO1693	Ms Machin K				Object	I would like to object to the proposed housing sites on the mount road, leek as outlined in the preferred options site and boundaries of staffs moorlands local plans – sites LE127, LE128a, LE140, LE142A, LE142B. This area should not be built on as it will ruin the lovely views over Leek and the Horizon and has been enjoyed for generations by walker's cyclist etc, who on a nice day vastly outnumber cars on this stretch of road. This road also appears to be outside the site boundary. By building approx. 400 houses it will no longer be a country walk yet another housing est. The council should be committed to maintaining green belt land and encouraging people to get fresh air and exercise in an age increasing obesity. There are surely plenty of empty mills and brownfield or former industrial sites within the town which could be developed for housing instead of building on open fields. There is also no development proposed in the west end of leek-why not? The planners need to go back to their drawing board and identify more suitable sites across the whole leek instead of concentrating on the one unsuitable area. Please save the mount	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO192 about public rights of way • See para response to PO1146 about western Green Belt • See para response to PO192 about Leek housing requirements and windfall allowance
PO1707	Mr Hoggarth C				Object	Ref: LE127, LE128a, LE140, LE142A I am writing to you with regards to you with my objection to the proposed sites above for housing development that I consider will result in loss of countryside e an recreational amenity to local residents. My objections consist of 3 main concerns: The loss of green field sites. The enclosure of the open space that is mount road. The loss of recreational amenity of Mount Road through the amount of additional traffic. The areas of land in question is border Mount Road, a low traffic route with broad open views across countryside to the east over the town of Leek and beyond to its west. Mount Road well known locally for the pleasurable route for exercise it provides and is much used by local residents and visitors. Enclosure with housing development would turn an open country lane into just another urban roadway and would destroy the views reducing the attraction of the area. The associated increase in the traffic would severely reduce the safety route. I consider that the cumulative effect would be to destroy the area as a recreational amenity. Of the area surrounding the current town boundaries, I think that this is one that would constitute the greatest loss, both with respect to the beauty of the outlook and the loss of its use for recreation. Mount Road is a beautiful location; visitors jealously comment how lucky I am to have such an area on my doorstep. To destroy it would be a disgrace and I hope you will reconsider the proposals	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO90 about highways • See para response to PO90 about landscape evidence

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1704	Mrs J McGuinness				Object	<p>Ref: LE127, LE128a, LE140, LE142A. As a local resident in objection to the above proposed plans For the Mount in Leek. I object to the scale of development for this beautiful country lane on the outskirts of our town. It is a area of outstanding beauty, boasting much wildlife, flora and fauna. The woodland and hedgerows are home to valued wildlife and birds. In addition there are farm animals, bats, foxes, stoats, mice all of which inhabit this area has been identified over existing brownfield sites in town. Could the planners not relax the rules and allow sites in town that have been previously been refused for development? Do we really need 400 houses? Do we really need another 1 st school, at this end of the town? I am dubious as there are as many properties in the town already for sale, unoccupied or derelict. Where are all the people coming from to buy these 400 houses? My main objection is the sheer volume of traffic. The roads are totally unsuitable to accommodate the amount of traffic that's will be generated by a school and 400 houses. This development has the potential to create at least 800 cars from the proposed housing development (average 2 cars per house hold) and even more generated from schools with staff and pupils, including the cars school buses . The lane is already suffers from many vehicles using the lane, as a rat run and this will increase. In addition to being a resident The Mount I am also a daily dog walker and I am concerned for the safety of those using the lane for leisure, i.e walker, dog walkers, joggers, mums with little ones, cyclists, horse riders and those coming to sit on the seats provided to take in the beautiful views. If development goes ahead these activities will come to an end and once again our green landscape will disappear with the town boundaries being pushed out further and further. Where will local people be able to go without getting into these cars and causing more traffic congestion on the roads, and what about those without transport? The road junction at either end of the Mount are not without difficulties. The Buxton Road junctions Is a staggered cross roads with Novi Lane and needs to be approached with caution. At school times It is used by parents/carers/school buses. I cannot imagine the chaos that will transpire if another school is permitted on the Mount – it will certainly become a lot busier and more dangerous. Do we really want to put our children at risk? Walking to and from school will not be a solution as it will be to dangerous. Let us not forget that in additions to this road junction, a short distance down the same road Churnet View transport comes onto the Buxton Road via Abbots Road, and Leek High/The Meadows/East St 1 st School all feed into and use Buxton Road via Springfield Road. Each school has buses/taxis and cars transporting pupils and the volume using the roads at the same time of day has potential to cause bottle necks on this busy main road. Another school shall mean 7 school all using the same road – local residents will have to keep of the road to the volume of traffic down. The other end of the mount leads to Ashbourne road and this junction not only has obscured visual</p>	<p>It is not considered that development of this particular site would be out of proportion with the rest of the town. Any new development taking place will be subject to design policies contained within the new Local Plan; and having regard to the Council's landscape impact evidence.</p> <ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO220 on housing needs evidence • See para response to PO674 about educational requirements • See para response to PO90 about highways • See para response to PO90 about open spaces and countryside access

						<p>access but a difficult angled junction. Surely this is totally unsuitable to transport large volumes of traffic which will be generated from 400 houses and a school! If a alternative junction is proposed this can only be achieved by sacrificing another green field. The Mount, Ashbourne Road are all used by big lorries, buses, tractors, trailers, farm stock to and from stock market, farm machinery, lorries transporting goods to and from Buxton, Ashbourne, and Surrounding areas. These are very busy roads! Can we really add to this without causing major problems? I urge the council to consider these proposals very carefully giving due time and consideration to alternative sites in town, because once the boxes are ticked it will be irreversible and the mount will be changed forever.</p>	
PO1739	Mr Martin Armstrong				Object	<p>LE127, LE128A, LE142A, LE142B Why turn a place of beauty into an eyesore when the council should be concentrating on transforming areas which are an eyesore into places of beauty. There are so many alternatives to the proposed sites for housing development around leek is without having to take away Leeks most cherished leisure route. Mount Road has long been a source of relaxation, leisure and exercise to the residents of Leek It is used daily by scores of locals who walk, run, cycle, and enjoy the tranquillity of this country lane which provides fantastic views across Leek and towards the peak district. Where else in the area is there such an amenity so conveniently within walking distance and safe for people to enjoy. The Mount is also a natural habitat for wildlife including many endangered species. The like of owls, woodpeckers and many more other birds and small mammals would be severely put to risk and their habitat will be seriously damaged. This proposed totally unnecessary housing development would not only destroy all this but also a place extra stress on the town centre already, struggling to cope with congestion. The large number of extra vehicles would adversely affect road safety and be a danger to the public particularly on both exits from Mount Road. These are but a few of the issues generated by this ill thought out scheme</p>	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO90 about open spaces and countryside access • See para response to PO678 on ecology evidence • See para response to PO90 about highways • See para response to PO678 about Leek employment land requirements

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO2585	Consultation Service	Natural England			General comment	Natural England notes the proposed preferred site for allocation in Leek. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.	The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.
PO2907	James Chadwick	Staffordshire County Council			General comment	The allocations proposed around Mount Road will necessitate highway improvements for example road widening, provision of footways, completing Kniveden Lane to adoptable standard, possible (probable) junction improvements at one or both ends. The removal of the sites between LE127 and LE128a could make the delivery of the required scheme more complicated and therefore requires further consideration including the reinstatement of sites LE069 & LE128b.	Comments noted. See para response to PO90 about highways. The emerging Local Plan sets out how the residual housing requirement for Leek will be achieved by a combination of allocations within the urban area, and along the Mount (making allowance for windfall/small sites allowances). Additional housing sites along the Mount are not required. Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.

PO3657	Mr P Ash				Object	<p>My husband and I most strongly oppose the number of sites on Mount Road, Leek as preferred option for new homes. Both of us have lived in Leek all our lives and for the past 50 years have resided on the Moorland Road. Mount Road is acknowledged as an area of open space for walking, cycling, and jogging and it is a area of free from volumes of traffic? I know my mother exercised, pushing me in my pram walking round the Mount. Building houses either side of the road would most likely make the Mount Road into a main road linking Ashbourne Road to Buxton Road. This road is not sustainable not wide enough to take heavy vehicles and constant stream of Traffic, if numerous houses were to be built either side for Health and Safety reason would require pavements, gutters and drainage all of which will narrow, the width of the road for vehicles, in all probability each house will have 2 cars, which again will increase the flow of traffic. To surface the top of Kniveden lane would make this road a rat race and a highway leading to an increase of even more traffic may I remind the council that when the developers applied for planning permission to build homes on the land behind sunny view at the end of Ashbourne Road – grave concern was exposed by Staffordshire County Council of traffic from the houses converging onto a busy main road, would that not also apply to traffic from the houses converging onto 2 main roads – Ashbourne road,, and at the other end of Buxton road. I would like to draw your attention to the fact when Mr William Milnes gave the land he owned to the council, land where now stands Leek High School, and is playing fields which borders Kniveden Lane and extend on the Mount, there was a clause in the gift of land that this land would be only used for educational purposes. One may also ask the council “where are all families and buyers that require these houses? Leek has not the facilities to accommodate such a huge increase in its population. The Dr’s are already working to their full capacity, which schools primary and senior have places for an increase in children of school age? And where will the new comers to the area, travelling from the Mount to Macclesfield or to the potteries will increase the flow of traffic though the centre of the town these were problems with planning permission to build house on ?? At Leek brook on the site of Joshua Wardens factory, as to the nature of the ground and the fact the earth may have become contaminated from factory work etc. These problems were overcome and rectified and houses were built. Now houses cannot build on this land surrounding Sainsbury’s Supermarket because of problems with the land – if land at Leekbrook can overcome the problems with the land around Sainsbury’s overcome the problem? And houses can be built on land previously occupied and accommodating buildings.</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways <p>The Council is not aware of any legal encumbrances upon this site.</p> <ul style="list-style-type: none"> • See para response to PO220 on housing needs evidence • See para response to PO674 about Infrastructure Delivery Plan • See para response to PO674 about educational requirements • See para response to PO678 about Leek employment land requirements <p>The Sainsburys site as part of its mixed use consent SMD/2013/1098 still enjoys residential consent on part of the site. Note Environmental Health Officer did not object to that scheme subject to conditions. The Council would assess residential schemes on sites affected by contamination in line with its adopted Policy SD4 and NPPF paras 120-121 NPPF. The responsibility of funding remediation rests with the developer.</p> <ul style="list-style-type: none"> • See para response to PO192 about Leek housing requirements and windfall allowance

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO4724	Mr D And L Robinson				Object	<p>I am writing to protest against the latest site allocation plan for the SMDC. To build upwards of 4000 house in our beautiful area is criminal. It is obvious a Central Government ploy, of threats, then offer of £1000.00/house has worked. For the SMDC to deny the £1000 donation has no bearing on the decision is pure fantasy. The area most concerned is to myself is the site allocated off Mount Road, Leek. At present most of the estates west of Mount Road are below the crest of the Mount, the proposed sites in places near or near to the crest, which will make them highly visible over a large area, particularly at night with street lighting. The site ref LE127 is of particular interest to me, it is obvious access to the site will be through the south end of High View Road with services readily available. If we are building approx. 100 houses on LE127, we can expect a large increase in traffic along High View Road and Moorland Road. Sites ref: LE066 & LE128 will be close proximity to a 35mtr high wind turbine and the plans already approved, which is highly undesirable. The building off 800 houses mainly on the eastern flank of the Town does not seem logical. There must be other sites in the Southern and Western flank of Leek which could be exploited; the advantage of this would be to reduce the great impact on schools & amenities in the Mount catchment area. Other problems concern electrical supply, gas supply, water supply sewage disposal, which can create serious problems due to the massive local increase in demand.</p>	<ul style="list-style-type: none"> • See para response to PO674 about new homes bonus • See para response to PO90 about landscape evidence • See para response to PO1352 about streetlighting • See para response to PO1352 about public consultation and the Statement of Community Involvement • See para response to PO90 about highways <p>Note that vehicular access to LE127 is anticipated off Mount Road; SCC Higwhays response was predicated on this.</p> <p>The Council would assess residential schemes in proximity to approved wind turbines in accordance with Core Strategy and NPPF amenity Policies, and ETSU (as amended) noise criteria etc.</p> <ul style="list-style-type: none"> • See para response to PO125 about option sites assessments and sustainability appraisal • See para response to PO1146 about western Green Belt • See para response to PO674 about Infrastructure Delivery Plan • See para response to PO674 about educational requirements • See para response in PO700 about utilities and flood risk

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO3943	Mr Alan Knott	Knights LLP			Support	<p>[See Location Plan attached to Question 1]. [Letter attached to representation, stating:] Land at Mount Road, Leek Firstly, it should be noted that Renew Land Developments Limited are aware of third party opposition to potential housing development of land at Mount Road, Leek. Many objections to the proposed allocations object to the principle of development, in addition to other site specific matters such as visual impact, highways, drainage, biodiversity, etc. This representation comments on these various matters in turn. Principle of Allocating Land to the East of Leek for Housing Development The bulk of housing allocations suggested for Leek are proposed to the east of the town. The principle of allocating sites in this general area is supported for a number of reasons as set out below. Firstly, with regard to the principle of such an allocation, the LPA, in accordance with national policy, has to allocate a sufficient number of suitable, available and deliverable housing sites in order to ensure that objectively assessed housing needs can be addressed over the plan period. Failure to do so would render the Local Plan unsound at examination. Secondly, Leek is one of the largest towns across the District, so should be taking a significant proportion of the overall housing requirement because it already has significant infrastructure, services and facilities to meet the needs of additional development. Thirdly, if development needs are to be met, then sites outside of the existing settlement boundaries will be required to meet additional housing needs. The LPA has already confirmed that it will be conducting a Green Belt Review as part of the current Local Plan process. If the LPA is having to review its Green Belt boundaries around rural settlements and other towns, then Leek cannot be excluded from that process. Fourthly, much opposition to the proposed allocation of land currently designated as open countryside to the east of Leek is founded on the assumption that other previously developed sites are available. The site options consultation does identify a number of infill sites within the boundary of Leek, and many of these are former mill buildings or other vacant industrial or employment sites. However, these sites would not be sufficient on their own to meet the overall development requirements for Leek. Fifthly, land to the west of Leek is currently designated as Green Belt, and land to the north and west of the town is constrained as a result of them being located in areas at risk of flooding. Land to the south of the town is also covered by public open spaces / playing fields, as well as a large golf course, which limits development opportunities in these areas further. The above views are supported by the LPA, who state that: The Council has recently completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). The west side of Leek is Green Belt and the study recommends that housing development should not take place on this side of the town to avoid adverse impacts. This means that sites at the</p>	Comments in support of this site, and clarification of landowner position, noted.

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>eastern side of the town (which is not within the Green Belt) require consideration to meet Leek's future development needs. The Council is required to meet its housing needs to 2031 and there are not enough brown field sites in Leek to achieve this so the Council needs to consider both brownfield and green field sites. In light of the above considerations, it is considered that land to the east of Leek, including land at Mount Road, is considered to be a suitable location for housing development. Visual Impact The Landscape and Settlement Character Assessment identifies land to the west of Mount Road to sit below the ridge line that is situated further to the east of the town and outside of any area identified as having an "important landscape setting to the settlement". The sites at Mount Road otherwise adjoin the urban area and would be viewed in the context of the built form of the town, rather than as an isolated residential development. Highways The four parcels of land proposed as Draft Potential Allocations and Draft Reserve Sites are located to the west of Mount Road, and each site could be accessed directly off Mount Road. Site LE128A could also be potentially accessed off Kniveden Lane to the north (subject to further detailed investigations, and a secondary access to site LE127 could potentially be provided off Thornfield Avenue / High View Road. Any development of this site could facilitate the wider improvement of the local highway network as a result of developer contributions. Mount Road is part of a longer distance walking route and the site is located within 500 metres of local bus stops and is within a reasonable distance to primary and secondary education, such as Leek First School and Leek High School. Otherwise, the site is considered to be located in an accessible location. The supporting documentation provided with the current consultation states that " County Highways do not raise any issues which would prevent development of this site ". It is therefore concluded that access is achievable, and subject to further detailed design work, would not be a constraint to delivering housing on this site. Drainage The site is located within flood zone 1, and has a low risk of fluvial flooding compared with land to the north and west of Leek, which has a much higher risk of flooding. There have also been few recorded incidents of sewer flooding in the surrounding area as confirmed by the Council's own Strategic Flood Risk Assessment. In light of the above conclusions, drainage or flood risk is unlikely to be a constraint to the development of this site. Biodiversity As part of the evidence base, the Council has commissioned a phase 1 ecological study of the district. Within this study, the sites have been studied and have been grouped into three parcels. The three land parcels in the study are identified as 35, 39, and 40. All three sites were identified as having very low biodiversity value overall, comprising of species poor improved grassland, scattered scrub and poor hedgerow. The study recommends vegetation clearance at the appropriate time of year, and in the case of site 35, a bat survey of an existing outbuilding to the east.</p>	

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>In light of the supporting evidence, it is concluded that biodiversity or the presence of protected species would not be a constraint to the development of land to the east of Mount Road. Conclusion Knights are making representations on behalf of Renew Land Developments Limited who are promoting their interest in land to the east of Mount Road for housing development. The site is being promoted by a willing landowner and a willing developer and is otherwise technically deliverable. It is concluded that all of the land to the east of Mount Road, as shown on the attached plan by Renew Land Developments Limited, should be developed. The site is located in open countryside, but not Green Belt, and the site is required to meet the open market and affordable housing needs of Leek given that opportunities to deliver housing on previously developed land and infill sites within the existing settlement are severely limited, and other areas of the town are constrained because of Green Belt, Flood Risk or because of landscape sensitivity. The council's own evidence base supports the potential allocation of land to the east of Mount Road. Leek is a large town at the top of the settlement hierarchy for the District, and cannot be excluded from helping to meet the housing requirement for the area. The release of land for housing on the eastern side of Leek is justified by the evidence base, and there are limited alternative options elsewhere around the town. The proposed release of land to the west of Mount Road through the Local Plan is therefore supported. The allocation the site would therefore ensure that the Council has a Local Plan that is positively prepared, justified, effective and consistent with national policy. Trust that this letter is clear in expressing our supportive views of the Local Plan and the proposed allocation of land at Mount Road, Leek for housing development. Otherwise, Renew Land Developments support the proposed increase in the annual housing requirement to 320 dwellings per annum.</p>

PO3693	Mrs Ryan	C			Object	<p>I am writing to express my objection to recently published plans to build on a large area of the Mount in Leek. Whilst understanding there is a need for some new housing, I feel this area is the wrong place and definitely too extensive. A few points I would like to share which may not take into account the professional opinion but a certainly take a common sense view. The Sainsbury's site was passed as a area for retail and business development with a to build on a small housing estate. This has not been fully developed and I understand it may because there are issues with asbestos and or some other contamination. Yet it seems it is fit for a pub selling food, a children's party play area and a supermarket selling some other consumable goods. If it is the case that there have been some bad decisions made around this site, the council officers responsible for passing this plan should own up and ensure this site is cleaned up. Enabling the plans many locals objected to, be completed. Of course this will mean a cost to the taxpayers whom are left carrying he financial burden of bad decisions made. I have no objection Education Land boarding Mount Road being to extend or build a primary school as have a shortage of places, the concern would be of increased traffic and the requirement for good provision of off road parking at the school if there were to be an entrance on that road. There is a site on the Buxton road Blackshaw Moor which has stood unused for many years since the Army ceased training there. It must have drainage, electrics and water on this site. This would be ideal for a small scale affordable housing site. It would also benefit the local school which has a small numbers of pupils and probably in danger of being closed in years to come Transport should not be a issue because there some buses to Buxton and local bus companies can benefit by providing peak time services. There must be other sites within Leek area suitable for developing. I tried to locate brownfield site on SMDC website but it shows many wordy documents but nothing is clearly stating where these sites lie. This could be my ineptitude but there could be more clarity for the lay person on these issues Building in such a large scale on The Mount would devalue housing already there. This may be viewed as a narrow minded but many people have worked hard and taken out huge loans to secure there desired homes. To effect there in such a drastic way I think is unfair and unnecessary. Most of the housing is currently at the higher end of the market and build social or low cost housing amongst his could be problematic from all prospective. If housing is built at the current level at these sites then who shall benefit those on low paid jobs, where I understand the most need is there are many units built as affordable part share homes unsold and many more privately owed sites of apartments etc. standing empty in Leek.</p>	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO3657 about Sainsburys consent • See para response to PO674 about educational requirements • See para response to PO90 about highways • See para response to PO1556 about Anzio Camp • See para response to PO192 about Leek housing requirements and windfall allowance • Property values are not considered material in planning law. • See para response to PO1473 about affordable housing • See para response to PO220 on housing needs evidence

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO4696	Mr And Mrs C and P Deighton				Object	<p>We are writing to register our very deep concern about the proposal to build on the land at the Mount in Leek. Those involved in the making such decisions do not all live in Leek and probably unaware of the enormous importance of The Mount to the people living around it in Leek. The implications of losing this much loved countryside walk are very serious, and far reaching. The close proximity of The Mount to the homes of so many local people means that it is a place used regularly, often daily, for exercise and relaxation, and is vital to their health and mental well-being. A large number of local residents are elderly, and often unable to drive: there are young families who cannot afford a car: there are several care homes that residents come for walks with their careers. What make The Mount so important is that is so very close to people. It offers beautiful views across the fields and means that people, who cannot get out into the countryside further away, can still enjoy seeing the birds and animals here only just a small walk from where they live. People walking their dogs have a natural means of contact and conversation with others – so important especially for those who live alone. To sum up, we all be deeply distressed to lose this place. So many have been walking there all through their lives, the disruption, and seeing the gradual destruction of a cherished part of their lives will bring an increased sense of isolation, and the feeling of depression faced by those in their later years as they become less able to things without outside help. Having the ability to step outside and walk in open surroundings without having to ask for a lift means a lot to someone struggling to retain their independence and enjoyment for life. To build on The Mount is clearly not necessary. There are as we have all been made aware recently, many alterations for example: various Brown Field sites empty buildings such as factories and offices: disused mills, empty houses apparently unoccupied for long periods. In view of the very unpopular bad decisions made, and the continuing loss of trust in the judgement made and continuing loss of and motives, of the planning department many now suspect that the decisions are influenced mainly by financial incentives from Government or other sources. We do not know whether this is true, but it seems obvious to us that a prompt decision to abandon the idea of building The Mount would bring peace of mind to many Leek Residents and go a long way to restoring the publics belief that members of the Planning Department actually do care about, and will respond to, consider and respect the views, the well-being and even the happiness, of the town they responsible for looking after, both now and the future.</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO220 on housing needs evidence • See para response to PO674 about new homes bonus

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO3935	Mr Mike O'Brien	WYG			Object	[Refer to submitted Representations Report attached to Question 1] which states: The proposed urban extension to the east of the town...- LE127(100), LE128a(47), LE140(63), LE142a(140) and LE142b(40). The proposed extension also accommodates draft reserve sites LE069(42), LE128b(48) and LE066(50). These sites contribute a significant proportion of the proposed housing for Leek. The allocation of these sites, ahead of available brownfield/previously developed sites, is not in compliance Policy SS5a of the Core Strategy, which sets out the overarching strategy for development in Leek. ...None of the proposed allocations are considered likely to come forward in the short term based on the findings set out in the SHLAA (2015). However, we suggest that the allocation of sites which are deliverable within the short term should have been considered to a greater extent in formulating the preferred options due to the significant shortfall of housing delivery across the district. WYG consider that sites in Leek, such as LE243, are suitable to contribute to the short term delivery of housing in Staffordshire Moorlands. Furthermore, the spatial distribution of the draft potential allocations weighs heavily on this eastern stretch of agricultural land and it is noted that no potential allocations have been selected within the core urban area.	<ul style="list-style-type: none"> Refer to Council response to PO3934 under LE127 table Question 10. <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p>
PO4825	Mrs L Scragg				Object	I would like for to make it known that I oppose the above on numerous grounds. The Mount in Leek has always been somewhere for the people of Leek to walk, cycle, jog, ride around not just people up end of the Town but people from all areas, young and old and in-between. The views, the Countryside is there for all to enjoy and appreciate, and we do. The road is not big enough now for all the extra traffic that is using it never mind more homes and a school. The Government wants to be healthier, do more exercise, get out and move, where will the joggers, cyclist go? If you sat up there for 24hours you would understand how used The Mount is used for recreation, pleasure and socializing, it's a free beautiful gymnasium – its where the children go to see their 1 st lamb or donkey walkers go to remember their youth and reflect on their lives, it's a place that puts lives into prospective and brings the troubled some peace. Please let we and our children's children keep the mount	<ul style="list-style-type: none"> See para response to PO90 about open spaces and countryside access See para response to PO90 about landscape evidence See para response to PO90 about highways

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO4705	Mr and Mrs A & N Waterhouse				Object	Building 400+ houses on the area known by everyone as The Mount and used by countless generations as a gate way to the countryside would be against everything that "localism" would bring. The enclosed petition goes some way to demonstrate the strength of feeling that there is against the proposed building plots as set out in the Local Plan. The area is mainly agricultural and offers amazing views of the town and it's unrivalled and area as a whole acts as a buffer, between the town and the Peak District National Park. The road itself could not cope with the estimated 600 to 800 extra houses would generate. The Mount is a narrow road with no footpaths and junctions at either end of The Mount would become even more dangerous. Historically people travelling out of Leek to work, use the Stoke-on-Trent and Macclesfield Road with few travelling to Buxton or Ashbourne. This would mean that the roads in Leek Town Centre would become even more congested at peak times as these people make their way through town. We urge the Council to think again and produce alternative sites for houses thereby saving this precious area for future generations to enjoy.	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO90 about highways • See para response to PO678 about Leek employment land requirements
PO5885	Ms Linda M Beighton				Object	I am writing to object to the proposed plan to allocate the following sites along Mount Road for housing: LE127, LE128a, and LE142a. Mount Road is used by hundreds of people every day of the week as a safe, sustainable leisure route something the council should be encouraging not removing. The current road for much of its length I too narrow for 2 cars to pass. Development would cause urbanisation & widening with the potential destruction of mature trees and dry stone walls. Exits particularly onto Ashbourne Road are already problematic and would need expensive, major work to cope with the extra traffic. People occupying houses at the moment would in the main work on the western side of the town in Cheshire-Manchester and Stoke. Major supermarkets are in the western side of town. Daily trips would further exacerbate the congestion which already chokes Leek. So many houses would destroy what is designated a special landscape area. They would impact on the views from the Peak Park and destroy an amenity area. Extending the own boundary to accommodate the proposed sites is undesirable. Using green field's sites may be expected and enable larger profits for developers but there are still brown field sites and infill land available within the moorlands district.	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO1352 about tree protection • See para response to PO674 on design • See para response to PO678 about Leek employment land requirements • Note that since adoption of the 2014 Core Strategy, there is no longer a 'special landscape area' designation. • See para response to PO90 about landscape evidence • See para response to PO192 about Leek housing requirements and windfall allowance
PO9100	Ms S Naisbett				Object	I am writing to strongly object to the councils draft plan to build on the following area along Mount Road in Leek, Reference number LE127a; LE128a; LE140 There are many other brown field sites in Leek such as Foker Grange and Home Farm that are available for development, and where houses could be built. Surely these sites should be used first for any planned housing development. The area along Mount Road should remain as it is. Beautiful open green fields. There should be no need to build further homes in the green belt of Leek when there are approximately 1,170	<ul style="list-style-type: none"> • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO1146 about western Green Belt • See para response to PO220 on housing needs evidence • See para response to PO90 about landscape evidence

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>homes that are currently empty in the Staffordshire Moorlands, and an additional 2500 homes for sale. Leek is a Market Town, and this is its great appeal to the people who live here, and also to those who travel to the town to shop, as well as tourists who come to visit. If the town keeps growing due to more and more houses being built, it will no longer be an attractive historic market town, it will become a very large town centered around housing, and if the building continues year on year it will eventually result in Leek becoming a modern day city. Mount Road is a wonderful area of natural beauty that is also very educational for young children. My daughter and I often walk along Mount Road because she likes to be surrounded by the green open fields and the nature it holds. She loves seeing and learning about the different types of wild flowers, butterflies, wildlife and farm animals we see in the fields along Mount Road. If houses were built on Reference number LE127a; LE128a; LE140 there would be nowhere locally for children who live in the area to experience this kind of nature and wildlife. Mount Road is also an extremely popular place for walkers, joggers, and cyclists, because it is currently a very quiet area, (has low noise pollution), and also has few vehicles currently passing through it, hence is an area with low levels of air pollution. The green open spaces make it a very relaxing area, with wonderful views. If 380 houses were to be built in the area, it is estimated that over 750 more cars will be travelling along Mount Road on a daily basis, causing high levels of noise pollution and high levels of air pollution to the area. Thus making it a noisy, unhealthy, stressful area to walk, jog etc. This could lead to less people in the area going for walks etc/carrying out physical exercise. This goes against government efforts encourage people to be active and get fitter in order to fight against illness and obesity, e.g fit for life, and yet the Council is planning to build on a green field area which is ridiculous. Wildlife will be lost if houses are built on Mount road. My friends and I have seen wide variety of wild animals in the fields along Mount Road including wild rabbits, hedgehogs, badgers and buzzards. These areas of wildlife would be lost if houses were built here. The roads in the town are extremely busy with traffic. This makes them unsafe for young children to ride their bikes and scooters along. Mount Road is located on the very edge of town, and due to the current low traffic levels of traffic, this makes it an ideal area for children to safely ride their scooters and bikes. If 380 houses were built along Mount Road the road would become extremely busy with traffic making it another road which is not safe for young children to ride their bicycles. Question why don't disused buildings in Leek such as old mills be converted to affordable housing for young people, instead of allowing of 3, 4 or five bedroom luxury homes to be built along Mount Road- which is what developers will build along areas LE127a; LE128a; LE140. An example of this are the houses built relatively recently by Amos Group on land adjacent to Mount Road which were priced at over £230,000 each. All of the above reasons clearly</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO90 about air quality • See para response to PO678 on ecology evidence • See para response to PO1473 about affordable housing • See para response to PO125 about heritage impact considerations <p>The Council maintains a database of housing site suggestions (SHLAA). This database formed the basis of the 2015 'Site Options' consultation as all SHLAA sites above a minimum size threshold, and attracting a 'B' deliverability rating, were included in that consultation. Subsequently 2016 'Preferred Options' were narrowed down from this. Note that Home Farm LE138 attracted a 'C' deliverability rating.</p>

						show why the area along Mount Road Reference number should not be built on.	
PO9143	Mr Ramon West				Object	<p>We wish to object to the 4 preferred housing allocation sites on the Mount, Leek. It would be an outrage to proceed with residential development on any of these sites: LE127, LE128a, LE140 and LE142a. The Council must take into consideration: Loss of local amenity - the Mount is a popular amenity enjoyed and cherished by walkers, joggers, cyclists, nature-lovers and dog-walkers. There is no comparable open countryside leisure amenity so close to the town centre. There is no comparable alternative within easy walking distance on the east side of town. Loss of such amenity would have an adverse effect on the health and wellbeing of a great many local people. Visual impact - the Mount is a classic example of outstanding moorland scenery. It provides unique and wonderful views over the town and beyond. Leek prides itself, and markets itself, as the Queen of the Moorlands. If this is to mean anything, the Council must do everything it can to halt the expansion of the town into the surrounding countryside and work to preserve the proximity and integrity of some of our finest moorlands scenery. Impact on infrastructure - hundreds of new houses will bring thousands of people. Nearby schools and GP surgeries will be put under further strain. Council services, social services and emergency services are already all under great strain. Traffic problems will be made worse. The future - the population of Leek is predicted to rise by a few thousand over the next couple of decades or so. This is mainly due to an ageing population. We are living longer. That means more of the people who are living here now will still be around in 20 or 30 years time. Therefore, planning for the future should be focused on local services for local people. We hope that the Council will heed our objections and explore alternative approaches to housing needs and development in our town. In particular, we wish to draw your attention to the 'Bimby Housing Toolkit' which was drawn up by the Prince's Foundation for Building Community (bimby.org.uk).</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO674 about educational requirements • See para response to PO90 about highways • See para response to PO1473 about affordable housing <p>The Council's own housing need assessments are set out in its evidence base on the website. Note these assess the needs of 'older people' and other groups. The June 2014 SHMA concluded the number and proportion of older person households is expected to increase in the District over the period to 2031 (46% increase between 2011 and 2031) which has implications such as increased demand for both specialist/extra-care accommodation for older people, and for adaptable homes. Owing to an ageing population and other factors, the need for smaller units will in future exceed the need for larger, family units. For these reasons the SHMA recommends that 60% of future housing should be 1- or 2-bed. The Council's current Core Strategy Policies expect larger housing schemes to provide for a mix of housing across all locations, to respond to identified local needs such as housing for older people. Note that where there is a policy requirement for affordable housing provision upon such sites, the nature of provision may reflect the above.</p>
							<p>The BIMBY toolkit is noted. The Council will continue to work with communities</p>

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

							seeking to introduce (or influence the preparation of) Neighbourhood Plans, in accordance with the Neighbourhood Planning Regulations.
PO9088	Ms Sarah Griffiths				Object	I am objecting to the planning of new housing at Mount rd, Leek. The area is enjoyed by young and old alike for generations. We do not need new housing in this peaceful wonderful area. [2015 Options consultation representation also submitted with email].	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO192 about Leek housing requirements and windfall allowance
PO9063	Mrs Suzanne Dimmick				Object	I am writing to put forward my opposition to the building of houses on Mount Road in Leek. It upsets me greatly to think that an important local amenity could be lost forever if these proposals go ahead. "The Mount" as we fondly know it, is a valuable asset to the East side of Leek, a wonderful place to take our families for walks and bike rides. In our busy lives, it is vital for our health, both mental and physical to have somewhere to go to relax and unwind. What better place than a walk along the Mount with views over Bradnop and Morr ridge, so accessible from our homes. If the fields in the planning proposals-LE127, LE128, LE140 and most worryingly on the opposite side LE142 were to be built on then the landscape of our beautiful town will be lost forever. For those arriving in to Leek from Ashbourne Road, they would be met with yet another sprawling housing estate, replacing the picturesque fields full of animals that are so welcoming to see. The road will become a main thoroughfare from the Ashbourne Road to Buxton Road and will lose its charm for us all. Lets protect the gateway to LEEK for generations to come. SAVE THE MOUNT.	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence
PO9058	Mr Terence Gee				Object	I wish to object to the proposal to build housing on sites LE127,LE128,LE140,LE142a on mount road. This is a green field site with a rural road with unspoilt views only five minutes walk from Pick wood avenue. This road is used regularly by myself and often meet other walkers, cyclists in the area. Also the road would have extra traffic for 500 houses with poor access. There would be increased pressure on local schools,doctors,etc and I feel it would spoil the area with increased urbanisation.	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO90 about highways • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO674 about educational requirements

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9071	Mr Stewart Johnson				Object	I am writing to protest against the proposed plans to build 4000 houses in the Leek area:- 1, question how many unoccupied properties are there in the area 2, Loss of beautiful countryside. 3, Work vacancies in the local area. 4, Local infrastructure . 5, Places at local schools. The list is just a few of the considerations the planners seem to be ignoring. Of particular concern is the proposed development along Mount Road. Not only would this destroy a beautiful part of the town used by many residents,it would also cause serious traffic problems both in the immediate vicinity and the rest of the town. These new residents would have to commute,and the main routes would be right through the centre of town adding to an already serious congestion problem. Why do the planners want to destroy the treasure that is The Queen of the Moorlands!	<ul style="list-style-type: none"> • See para response to PO220 on housing needs evidence • See para response to PO90 about landscape evidence • See para response to PO678 about Leek employment land requirements • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO674 about educational requirements • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways
PO9078	Mr Simon Tansley				Object	I am registering my objection to the leek plan proposals for building anywhere along the mount (le 142a,b,140,128a,022,127. To destroy this public amenity would be an outrageous and nigh on irreparable act of vandalism. Any one who is even considering this to be a way forwards for leek town should walk from ashbourne road to buxton road to see precisely what we would lose in terms of beauty and nature. This is an asset that Leek should be celebrating not destroying.	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO678 on ecology evidence

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9094 PO9314 PO9405	Ms Sarah Bishop Ms Emily Hodgkinson Ms and Mr Carla and Anthony Hodgkinson and Bury				Object	<p>I would like to register my opposition to the plans for development along The Mount. I was born and raised in Leek as are all my family. I remember being dragged "round the mount" as a child and hated every minute of it. I left Leek in 1986 to pursue my career in nursing and I still return to Leek every weekend and Public Holiday. As an adult, I love going round the mount! I appreciate the openness, the air and the local views. I know it is valued by many local people for similar reasons. It is a wonderful asset to Leek which cannot be found elsewhere. In this age of government encouraging activity and reduction of population obesity, I can walk my dog, savour the views and see nature on the doorstep. Something to be encouraged and supported. Leek is very lucky indeed to have such a wonderful asset as part of its town and councillors would be well advised to recognise its importance to their locality. If councillors wish to see houses, roads and urbanisation as part of their tenure, I suggest they visit "The Potteries" or move to the nearest loss of urban space to understand the impact of building for the short term gain. I live still in the city I came to all those years ago. Back then, it was a new city with limits. Now, every route I can take from the centre is urbanised and each area is stuck "in its time" as architecture and design move on creating areas of decline and disrepair bringing new problems with the passing of time. For the love of Leek and its title of "Queen of the Staffordshire Moorlands" , Councillors need to appreciate what qualities give Leek that title and do their utmost to maintain them. Councillors have the opportunity to do the right thing for the future of Leek, not to bring in a fast buck for a short term gain. I hope the people of Leek are listened to when they say "Save The Mount"!</p> <p>As well as the benefits to Leek having such a widely used and accessible area, one should consider the risks and very real hazards to creating such estates in a position where traffic flow, at both access points to the Mount, is at best, difficult. On exiting Mount Road, on to Ashbourne Road and Buxton Road, there is extremely limited vision in both directions. Whilst currently the traffic flow is steady, and reasonably quiet, my concerns lie with the difficulties which will only grow with increased cars, placing those increased pedestrians walking to the proposed development, at a genuine risk. I am not against the development of affordable housing; what I am against is the travesty of those decisions, by councillors which we elect, to take green belt land, before brown belt land, for potential profit, before the views of their constituency and the future of generations to come. I understand that I am far from alone in my views- I feel they should be taken in to deep consideration before this gem in the town is lost forever.</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO674 about new homes bonus • See para response to PO90 about highways • See para response to PO1146 about western Green Belt • See para response to PO1352 about public consultation and the Statement of Community Involvement • See para response to PO192 about Leek housing requirements and windfall allowance

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9117	Mr Robert Barker				Object	<p>I do not believe that it is necessary to extend the town boundary into farmland as there are still many available brownfield sites within the locality. It is also important to note that TOURISM is a significant driver to the local Economy! Therefore the Town Gateway, especially from the PEAK PARK Buxton Road A53, needs rigorous protection from urban sprawl in order to maintain the 'Queen of The Moorlands' identity. The point of entry into Leek from A53 Buxton Road is the most attractive and picturesque and is a key Tourist route. It is also a highly utilised public amenity for local residents of Leek who very regularly make use of the whole area incorporating the A53 towards Tittesworth Reservoir/Blackshaw Moor, along Thorncliffe Road and its' adjoining lanes, and The Mount Road, as a place to exercise by walking, rambling, cycling, horseriding, dog-walking, sightseeing, picnicing, and general enjoyment for health and wellbeing. The proposal area, particularly as it approaches the A53 Buxton Road junction with Thorncliffe Road and The Mount, is immediately adjacent to the SPECIAL LANDSCAPE AREA which presumes against intrusive developments in order to protect its Historic Landscape nature. I would personally feel that the Special Landscape Area and environs ought to receive the highest priority in its protection. The designation encompasses the fact that it is 'Special' in nature and cannot therefore be replaced once lost or damaged. There are a number of 'brown' sites within the town which could be very effectively used for housing development. [Question why] these are not shown on the accompanying Consultation Maps. However from attending a consultation meeting the existence of several sites is a matter of common knowledge along with the fact that these would be "The Preferred Option Housing Sites" in the view of the residents of Leek. There are also pockets of greenbelt land (designated such primarily for the purposes of town separation and quite often having no other particular beauty or amenity), which in common with other Towns in the country could be effectively utilised to expand the town boundary with selective use and sensitivity to the environment. This would be better than destroying the areas which are highly valued by the Leek Community for beauty and recreation and which give the Town of Leek its identity. The proposal to build almost 400 houses off the junction of the A53 as it joins Thorncliffe Road and The Mount Road is a Major Intrusion into the public amenity and is unsupported in terms of the additional infrastructure requiring a need for development of roads, sewers, schools etc.. It would put a major strain onto the area and have significantly adverse effects on the locality. The proposal is completely unbalanced as it places virtually all the "housing requirement"[queries this as unjustified] along 1 narrow lane at the most Flagship side of Leek renowned for its visual beauty and recreational amenity. Please utilise the "brown sites" and protect Leek's Heritage and inheritance!</p>	<ul style="list-style-type: none"> • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO674 about design policies <p>Green Belt is a long established designation that serves a number of important functions in separating settlements, and preserving 'openness'. Whilst Councils can allocate/make boundary amendments within the Green Belt, National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). Note that landscape quality/character, and public access characteristics, are not in themselves 'purposes' of Green Belt laid out in national guidance. The NPPF allows for consideration of development proposals upon 'brownfield' Green Belt sites.</p> <ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access • Note that since adoption of the 2014 Core Strategy, there is no longer a 'special landscape area' designation. • See para response to PO90 about highways • See para response to PO678 about Leek employment land requirements • See para response to PO674 about new homes bonus • See para response to PO220 on housing needs evidence • See para response to PO125 about heritage impact considerations

PO9124	Mr Richard Pigott				Object	<p>Letter submitted [attached] objecting to Mount sites: Mount Rd is local amenity LE128 is the most elevated of the sites being considered LE066 is a brownfield site and should be considered ahead of LE128 Concentrating housing allocations on east side of town would raise deliverability problems compared to other areas of town Some western Leek sites in the Green Belt are nevertheless preferable to allocate for housing, than sites at the Mount.</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence <p>Note the 2016 Landscape impact study concludes that LE128A and LE128B are of medium landscape sensitivity and recommends that site-specific landscape mitigation measures could include advanced planting and landscaping on the eastern boundary, and limited building heights in the eastern half of the site. Whereas LE066 is assessed of high landscape sensitivity owing to its location, despite the presence of site screening.</p> <ul style="list-style-type: none"> • Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan. • See para response to PO1146 about western Green Belt • See para response to PO35 about viability study
PO9131	Mr Richard Harding				Object	<p>It is shocking to think that a much valued area of Leek, enjoyed by many thousands of people each year that gives stunning views over many hundreds of acres of Moorland, is a valued place for recreation by the people to walk, hike, cycle, enjoy or just to rest with the freedom of a tranquil setting over the land of the Moorlands will be destroyed forever and what for, the offer of cash to the Council for each new house to be built to be spent by the Council that we all know will be wasted in ways only Councils inimitably can do whilst the result will be a beauty spot for Leek people will be destroyed forever. The Council can sit back and think the money was worth it yet they sit in splendid isolation allowing the areas they are elected to protect be destroyed. I wonder how the local and Staffs Council can think that the huge increase in housing is necessary bearing in mind that the shameful destruction of a much loved part of Leek will be replaced by huge housing estates on The Mount making it appear like a mini version of the Berlin Wall. I regularly see hundreds of people on weekends and on summer days, walking, dog walking, jogging and horse riding along Mount Road and if these awful plans are put in place The Mount will be a danger to all road users and will take on an ugly factor that is part and parcel of building on rural fields loved by so many people and all imposed without once allowing the voters of Leek the change to have their say on the planning issues that have secretly been imposed.</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO674 about new homes bonus • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO90 about highways • See para response to PO1352 about public consultation and the Statement of Community Involvement • See para response to PO678 about Leek employment land requirements • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO674 about educational requirements

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>Where is the democratic right of the people of Leek in this issue? Sold out to building firms who look on greedily at the profits they can make with help from a submissive Council who dare not fight for Leek people. It is worrying is that all the planning proposals for the Leek Moorlands were taken in secrecy denying people of the Moorland the chance to put forward their views and objections for all these houses to be built without ever once considering that there is not sufficient employment in the town to employ even 1 in 100 of people who might live in these imposed properties and there clearly seems to be a total the lack of schools to educate the huge increase in children and a the lack of Health Care provision in respect to GP services and hospital care for the area. There is also the huge impact on the roads and the congestion that is already a great problem in Leek. It is as if the Council is blind or inept at seeing the problems that all these extra houses will cause but it seems that everything will be decided in the same manner as the destruction of the old town centre round about we were informed would ease traffic but contrary to all Council ideas the reverse is true. I cannot have any faith in a system that has denied us the vote on these extra 6000 houses or that the much loved Mount will be destroyed in the same cavalier and unthinking way as many planning issues have been allowed to go ahead even when so many Leek people do not want or need these homes to destroy The Mount. I therefore wish to state that I am against the building on any land along Mount Road AKA The Mount, so please register my objection.</p>	
PO9194	Mrs M Motum				Object	<p>I would like to strongly object to more houses being built on The Mount. This very popular location is just a short walk from the town centre where you are in the countryside with far reaching views. The beautiful location will command high prices, therefore no affordable houses will be built. It would be a travesty of justice to build in such a well-loved area, used by dog walkers, walkers, courting couples, and car drivers. I don't think the infrastructure could sustain the number of houses envisaged. Please do not include this area in the local plan.</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO1473 about affordable housing • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO90 about highways
PO9103	Mr Robert McGuinness				Object	<p>Email with representation form [attached] objecting to Preferred Options sites LE127/LE128A/LE140/LE142A and 'School Site' [presumed LE140] alongside 2015 'Options' sites LE066/LE069/LE128B with the following text: Overdevelopment, traffic congestion issues, inadequate infrastructure, inadequate road network. Brownfield sites and redundant mills should be brought into use first.</p>	<p>It is not considered that development of these particular sites would be out of proportion with the rest of the town. Any new development taking place will be subject to design and landscape protection policies contained within the new Local Plan, and having regard to the Council's landscape evidence such as the 2016 Landscape Impact study.</p> <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p>

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
							<p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <p>Note that sites LE069 is not included as allocations in the Local Plan.</p> <ul style="list-style-type: none"> • See para response to PO90 about highways • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO192 about Leek housing requirements and windfall allowance
<p>PO9245</p> <p>PO9199</p>	<p>Mr John Belfield</p> <p>Mrs Maureen Belfield</p>				<p>Object</p>	<p>The rural fringe of Leek, and specifically Mount Road, would become urbanised. The Mount is a very popular route for leisure activities and exercise for many people and this would be lost. With the enormous number of proposed new houses there would be a massive increase in the amount of traffic both on the mount and also in the surrounding area. Kniveden Lane is already a busy road as it gives access to the small car park at the Moorlands Hospital. This car park is already insufficient for the needs of the hospital and many cars currently park on Kniveden Lane. If hundreds of houses are built on the mount Kniveden Lane would become a significant means of access to Ashbourne Road. The road network would need to be considerably enhanced and part of Kniveden Lane would need to be properly surfaced. This would lead to a major change in traffic patterns in the area which would lead to a loss of public amenity. This would not only cause traffic chaos but would also pollute the surrounding area. It would also make the smaller residential streets of Pitcher Lane and Trafford Close a potential car park for those who currently use Kniveden Lane for this purpose. There are brownfield sites available for building and also more suitable greenfield sites, for example Foker Grange and Home Farm, which have much easier access to the main road network. I therefore object to the building plans on the Mount which are numbered LE142a, LE140, LE128a and LE127</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO1146 about western Green Belt • See para response to PO90 about air quality • See para response to PO9100 about Home farm

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9337	Mr Derek Kay				Object	<p>Herewith are my objections yet again about building proposals affecting open greenbelt land on Mount Road. I strongly object to delinations LE127, LE128a, LE140, LE142a and LE142b, on the grounds of unnecessary and deleterious incursion into valuable scenic amenities. The fringes of this town (Queen of the Moorlands) must be preserved at all costs. Open aspects across towards the Peak District are essential for our spiritual wellbeing; unwelcome development of additional traffic flow and population density would be the corollary of this building project, were it to succeed. Conversely, there is much brownfield potential within the town boundary itself; rundown old mills for example (which may be protected by outdated listing orders) and other unsightly structures causing blots on the "townscape". Not enough positive action to clean up the interior of this town has been taken over the years. Use compulsory purchase orders where difficult site owners will not cooperate and make the Queen worthy of her name.</p>	<ul style="list-style-type: none"> • See para response to PO1146 about western Green Belt • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO90 about highways • See para response to PO192 about Leek housing requirements and windfall allowance <p>The Secretary of State for Culture, Media and Sport is responsible for the listing of buildings on the advice of Historic England. Apart from being consulted, the Council does not have any say in which buildings are added to the statutory list. The Council, however, is charged with protecting listed buildings insofar as it is possible and managing any changes to them through the planning system. In discharging this responsibility, the Council has to work to the government's advice set out in the National Planning Policy Framework which requires every effort to be made to preserve listed buildings and either keep them, or return them, to active use.</p> <p>Whilst Councils do retain CPO powers in principle, these are generally used (if at all) as a last resort where it is expedient and in the public interest for the Council to do so, where agreement with landowners is not possible. As explained in response to PO192 the Council makes assumptions that development schemes will come forward within the Leek development boundary to contribute to its housing need to 2031, which could include historic premises etc. Applications affecting listed or non-listed "heritage assets" would be assessed against Section 12 NPPF and Council Policies. The Council would also assess schemes in the town centre against the aspirations of the adopted Leek Town Centre Masterplan.</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9237	Mr John Burnett				Object	<p>I wish to formally object to the plans currently in consultation to allocate land for housing around the Mount Road in Leek. Some background. I have lived in Leek all my life, as have my parents and Grandparents. Throughout my life I have always viewed the Mount as the 'Countryside' and the border between Leek and the Peak district. Since I can remember I have spent many happy hours walking the Mount as it is an accessible area of natural beauty. What makes this area important to me and to anyone who lives in the East end of town. There are very few circular walks that take in such a wide variety of terrain and views as the Mount does. Whichever way its walked theres uphill and down dale terrain that has to be completed. What makes this worth while for many people is the wide open vista that is presented to the walker as you reach the top of the Mount. I complete this walk most days in the Summer, and every week in the Winter, and strongly believe it has added to my health and well being in immeasurable ways. I know and speak to the many others who also make this part of their leisure and health routines and know that a large proportion of the residents of both Haregate and Moorland Road estates rely on this open space as much as I do. So - my main objection is the destruction of some beautiful greenfield leisure location on the outskirts of our town. However I have other concerns about the wider impact to others who may not view this as important. Leeks infrastructure is already at breaking point. In particular the road system is literally not fit for purpose. Since the short sighted decision to alter the traffic flow through our town was taken, the flow of traffic particularly from West to East has been severely curtailed resulting in large traffic build ups through a normal working day. I can only imagine the building of 100's of new houses on the East End of Leeks existing boundary will at best double the misery already experienced by hundreds of travellers each day and cause untold economic and environmental damage to our market town. Additionally, I have serious concerns about the effects on the water run off if large areas of the Mount are built upon. The Mount is the highest point in our town, and huge amounts of water drain off it down towards Leek on a daily basis. Without the ground to soak up this water Im concerned the water table may be affected causing flooding and other damage to residents and infrastructure further down towards Leek centre. The first part of the consultation document says the following: They should, as far as possible, reflect the aspirations of local communities and should strive to contribute towards their wider social, economic and environmental objectives. Based on what I have seen of the document, I don't believe it succeeds in any of these fundamental objectives. Our local community want a town that is prosperous but also one in which people want to live and work. We should strive to be better than what we are but not to the detriment of what makes people want to live in Leek in the first place. I hope you seriously take on board my views as well as the views of other community members. We live in a democracy and as such I</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO90 about landscape evidence • See para response to PO90 about highways • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO678 about Leek employment land requirements • See para response to PO678 about economic benefits of housebuilding • See para response to PO125 about options site assessments • See para response to PO90 about air quality • See para response in PO700 about utilities and flood risk • See para response to PO1352 about public consultation and the Statement of Community Involvement <p>The Council must demonstrate to planning inspector that its Local Plan is based on the principles of sustainable development. The NPPF is clear that this means three roles – economic, social, and environmental, and that they are considered simultaneously. The Council's submitted Policies and objectives would therefore have to satisfy this.</p>

						genuinely believe that if a decision doesn't have the backing of the community it shouldn't be pushed through.	
PO9213	Mrs Adams E				Object	I wish to place my strong objections to the proposals to build house on the mount, leek. It would devastate this beautiful area which benefits tourists and residents alike. Objections also relate to roads, schools, doctors etc. Please please rethink your plans.	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO90 about landscape evidence
PO9180	Mrs Adams E				Object	We would like to object to the developments proposed around The Mount. This is a very popular safe area to walk. It has a high quality landscape which would be restricted by the developments and traffic would increase significantly on the roads linking Buxton road and Ashbourne road. Visitors to the area also like this walk.	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO90 about highways <p>Any new developments would need to adhere to design policies to ensure character of the District is maintained.</p>
PO9251	Ms Joan Hobster				Object	I am writing to plead for the preservation of Mount Road, Leek, as an undeveloped open space and public amenity, available to all residents of the town. Any building on the farmland that borders this road will destroy the ambience and far-reaching views of this delightful area. It has been shown by a headcount (see Leek Post letters May 11 2016) how well used it is by walkers, joggers, horse-riders etc and I would like to add to that, the small but regular number of cars that are parked on Mount Road by elderly residents. They may no longer be physically able to walk far but can still take a short stroll, sit on a bench, enjoy the fresh air and admire the views. I understand that Mount Road is part of the Staffordshire Moorland 's Way and is walked regularly by individuals and organised groups. Surely a designated "Way" cannot be allowed to pass through a housing estate. In addition I see on the Council website, a leaflet suggesting a walk entitled "Leek Landscapes, A Country Walk" which includes Mount Road. I quote from this leaflet "The route passes through attractive farmland and offers many interesting views of Leek and its setting." If the proposed houses are built, this leaflet will have to be amended. I suggest, "The route passes through a new housing estate which obscures many interesting views of Leek and its setting" If building does take place, Mount Road itself would have to be upgraded and widened, to accommodate increased traffic use. An estimated 600 extra cars daily has been suggested. No doubt street lighting would be installed and this would destroy one of the few "dark sky" areas in the town. I have observed the night sky regularly from this location on winter evenings and enjoyed seeing the eastern constellations, planet alignments, meteor showers, the occasional comet and the	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • Development proposals affecting the routes of recognised public rights of way would need to make allowance for them. • See para response to PO90 about highways • See para response to PO1352 about public consultation and the Statement of Community Involvement • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO1352 about streetlighting

						<p>monthly spectacle of the full moon rising. All this would be lost by light pollution. I understand that planners did take note of objections raised about the development of Mount Road in 2015 and have reduced the proposed site allocations to either end of the road, thus preserving some of the views. For example, the field referenced LE128 will be split in two and only half of it built on. While appreciating this gesture to public opinion it would surely be only a matter of time before the inevitable "infill" would take place and the whole area would be lost for ever. PLEASE PLEASE PLEASE – SAVE THE MOUNT for future generations to enjoy.</p>	
PO9294	Mrs Gwen Gledhill				Object	<p>Re sites LE127,128,140.142a I wish to object strongly to the proposal to make these sites on The Mount available for housing on the following grounds:</p> <p>1. Traffic The Mount is a narrow country lane with no pavements and little or no street lighting. There are narrow and dangerous junctions at both ends on to the Buxton and Ashbourne roads and a dangerous bend by LE127. The traffic generated by the proposed 400 houses will completely overload these junctions at busy times and generate a major risk to pedestrians on the lane itself, especially as there is not sufficient width for two cars to pass each other for most of the length of the lane. Commuters travelling from these house to Manchester, Macclesfield or Stoke will only add to the town centre traffic congestion at busy times.</p> <p>2. The Local Housing Need It is well documented that the local need is for starter homes for young people and 'downsizing' homes for older people. These are not required on the edge of town but need to be closer to the centre where there are shops, amenities and better public transport links. Whatever developers initially propose re 'affordable housing' on The Mount, the reality is that they will ultimately build executive homes attractive to commuters travelling to Manchester, Stoke and beyond at prices cheaper than can be found in Cheshire East! I believe that the buyers will not be local people and thus the developments will not answer the local housing need. There are other sites that could address this need to the south and north west of the town and via infill in the centre itself. Planners should look more carefully at these and not settle quickly for 'easier' options.</p> <p>3 Our Environment The Mount is a long standing area of natural beauty, accessible to most town residents on foot with views equal to those enjoyed across the Peak District. The developments will ruin this aspect and destroy a major, free, leisure experience for local people right on the edge of The Peak District National Park - their officers will (I'm sure) be objecting too!</p>	<ul style="list-style-type: none"> • See para response to PO90 about highways • See para response to PO678 about Leek employment land requirements • See para response to PO1473 about affordable housing • See para response to PO220 on housing needs evidence • See para response to PO9143 about ageing District population • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO125 about options site assessments • See para response to PO1146 about western Green Belt • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9164	Mrs Kath Fernyhough				Object	<p>Please note that this email is an objection to the following site references regarding the development of Mount Road Leek., LE142b, LE142a, LE140, LE128a, LE127, LE022 We are residents of Kniveden Lane leek, and so we feel that we are well qualified to tell you why this development would be so disastrous for Leek. The Mount is an area of natural beauty which is used every single day of the year, by walkers, joggers, sightseers, cyclists, and people who enjoy it just for the sheer pleasure of the calm, peaceful area it provides us with. It is used by our senior citizens, who use the Mount as a daily walk to help keep them fit, and they enjoy sitting on one of the benches that have been left by the people of Leek for the people of Leek, to sit and chat or pass the time of day with other walkers. Good for the body and soul. It is an area that we, our parents, grandparents and children have enjoyed for many years, and if this development goes ahead our grandchildren and future generations will be denied this. It is an area of natural beauty that is home to a wide selection of wildlife. From hearing the owls hooting late evening and into the night, to the woodpeckers tapping away in the woods. From the bats swooping past in search of food to the kestrels that hover over the ground looking for their next meal. And the home of badgers and foxes. To name but a few. If this development goes ahead the homes of these beautiful animals and birds will be lost. Another loss for future generations and the townspeople of Leek, who you are supposed to represent the views of, so please take the time to read this and understand how passionate the people of Leek are about our beautiful green open space. As well as the above losses, the development will cause many problems. Namely access to and from Mount road. If planning permission is granted for all these new homes, imagine how many extra cars, delivery vans, school buses and refuse collectors will have to use Mount Road. If in excess of 400 homes are built, that will mean that there will probably be in excess of 800 extra cars on a daily basis. Mount road can not deal with this. Our worries are as follows :- The exit from Mount road onto Buxton Road goes straight out into a 40mph area, opposite another junction with Novi Lane. The exit and entry from Ashbourne Road is even worse. To exit from the Mount onto Ashbourne Road you again have to exit into a 40mph area If you want to travel to Ashbourne you have to negotiate a 30% bend onto a very busy road If you want to exit Mount Road onto Ashbourne Road and travel down into town, you still have to join the traffic that is traveling at speed around Lowe Hill bends. This plan is dangerous, foolhardy and beyond belief. As the majority of people who will purchase property on Mount road will work in Stoke on Trent or Macclesfield, this will bring even more traffic that has to negotiate the town centre, which is often gridlocked now, let alone with a further 800 cars a day travelling through Leek town centre. The only other access to Mount Road is from Kniveden Lane, via the unadopted road at the top of the lane. If this road is adopted to improve access onto the Mount, Kniveden</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO678 on ecology evidence • See para response to PO90 about highways • See para response to PO678 about Leek employment land requirements • See para response to PO90 about air quality • See para response to PO1352 about tree protection • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO1146 about western Green Belt • See para response to PO1352 about public consultation and the Statement of Community Involvement

						Lane will become a rat run, along with Moorland Road. And it will not only be used by the new developments on the Mount, but by the estate accessed from Novi Lane, known as the Haregate estate. Kniveden Lane and Moorland road are residential roads in a residential area, and have not been built for vast amounts of traffic. The noise and level of traffic if this should happen would be very detrimental to a beautiful residential area, not to mention the dangers of traffic moving at speed to residents. Also the exit from Kniveden Lane is notoriously difficult due to the trees which line both sides of the junction reducing visibility to less than 50 yards in either direction. What will you do then, cut down the trees to improve visibility and in the process removing more natural vegetation along with the fields on Mount Road that you are proposing to develop. As an alternative site, why do you not look at Macclesfield Road, the area around Foker Grange. Or develop some of the derelict mills that are lying empty and are nothing but eyesores. This way you would rid the area of the derelict buildings and build new more pleasing structures. We ask you to do the job you were voted in to do, which is to represent the views of the people of Leek.	
PO9229	MRS KAREN BARKER				Object	I do not believe that it is necessary to extend the town boundary into farmland as there are still many available brownfield sites within the locality. There is much greater need for jobs/employment as priority in the town if people are to be enticed to come to live here by large scale housing developments. There are presently not enough jobs locally to adequately provide for the current housing occupants. There is likely to be an increased need for Housing Benefits affecting the local economy together with significant increased pressure on infrastructure due to need for travel in and out of the area for work. It is also important to note tourism is a significant driver to the local economy! Therefore the town gateway, especially from the Peak Park Buxton road A53, needs to be rigorous protection from the urban sprawl in order to maintain the 'Queen of the moorlands' identity. The point of entry into Leek from A53 Buxton Road is the most attractive picturesque and Tourist Route. It is also highly utilised public amenity for local residents of Leek who regularly make use of the whole area incorporating the A53 towards Tittesworth Reservoir/Blackshaw Moor, along Thorncliffe Road and its adjoining lanes, the Mount Road, as a place to exercise by walking, rambling, cycling, horse-riding, dog-walking, sightseeing, picnicking and general enjoyment of for health and well-being. The proposed areas particularly as it approaches the a53 Buxton Road junction with Thorncliffe Road and The Mount Road, is immediately adjacent to a landscape area which presumes against intrusive developments in order to protect its historic landscape nature. I would personally feel that the Special Landscape Area and environs ought to receive the highest priority protection. The designation encompasses the fact that it is special in nature and cannot therefore be replaced once lost or damaged. There is a number of brownfield sites within the town	<ul style="list-style-type: none"> • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO678 about Leek employment land requirements • See para response to PO90 about highways • See para response to PO90 about landscape evidence • See para response to PO674 about design policies • See para response to PO90 about open spaces and countryside access • See para response to PO5885 about special landscape area • See para response to PO1146 about western Green Belt • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO674 about educational requirements

						<p>which could be very effectively used for housing development. For some reason? These are not shown on the accompanying consultation maps. However from attending a consultation meeting the existence of several sites a is a matter of common knowledge along with the fact that these would be 'the preferred option housing sites' in view of the residents of leek. There are also pockets of green belt land (designated such primarily for the purposes of town separation and quite often having no particular beauty or amenity), which in common with other towns in the country could be effectively utilised to expand the town boundary with selective use and sensitively to the environment. This would be better than destroying the areas which are highly valued by the Leek Community for beauty and recreation and which give the town of Leek its identity. The proposal to build almost 400 houses off the junction of the A53 as it joins Thorncliffe Road and The Mount Road is a major intrusion into the public amenity and is unsupported in terms of the additional infrastructure requiring a need for development of roads, sewers, schools etc. The proposal will is completely unbalanced as it places virtually all the housing requirement? Unjustified along 1 narrow lane at the most flagship side of leek renowned for its visual beauty and recreational amenity. Please utilise the brownfield sites and protect leeks heritage and inheritance!</p>	
PO9270	Mr Jeff Davies				Object	<p>I am writing to object to the designation of land on Mount Road, Leek as "Preferred Housing Allocation". There are a number of problems with this intended designation:</p> <ol style="list-style-type: none"> 1) Overlook from the National Park - building as designated will adversely affect the view from the National Park 2) Access - to increase traffic along the Mount would cause significant traffic problems and hazard at its junctions with both the Buxton and Ashbourne Roads. If Knivden Lane is paved then this would also cause problems with access to the hospital and cause a hazard at its junction with Ashbourne Road where there is poor visibility. Improving Mount Road is likely to be self-defeating as it will then become a rat-run between Ashbourne and Buxton Roads further increasing the traffic load. 3) Services - there would be a significant cost to put in mains services as the existing water and drainage up Mount Road towards Padwick Farm are unlikely to adequate to service the proposed housing 4) Amenity - the Mount is a much loved local resource, heavily used by walkers (including dog-walkers) and runners. 5) Location - the bulk of working residents would probably work in Stoke or Macclesfield and the development is on the wrong side of Leek as it would then increase the traffic 'flow' through the 	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about highways • See para response in PO700 about utilities and flood risk • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO90 about open spaces and countryside access • See para response to PO678 about Leek employment land

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>centre of town</p> <p>6) Brownfield first - development on green fields should only occur when all the available brownfield sites have been used. There are multiple opportunities for in-fill housing developments within Leek (e.g. Prince St) as well as numerous mills that are currently eyesores (e.g. both Macclesfield & Ashbourne Roads)</p> <p>7) Size of housing allocation - there is a significant discrepancy between between SMDC & Government figures for required housing. I believe you are seriously over-estimating the local housing need. By doing this you are making it easier for developers to cherry-pick which bits they want to develop rather than encouraging development where it would be most beneficial to and have the least adverse impact on the town</p> <p>8) Unnecessary blight - by over-allocating housing designation you will have an unnecessary adverse impact on the value of properties which may not in practice be affected by housing development throughout the life of the plan</p>	<p>requirements</p> <ul style="list-style-type: none"> • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO220 on housing needs evidence <p>Property values are not considered as material considerations under the Planning Acts.</p>
PO9157	Mr Paul Birks				Object	<p>I would like to have recorded my very strong objections to the proposed development of site reference LE128a. I have for many years now enjoyed a lovely, peaceful and relaxing walk along the mount on the edge of Leek. In my humble opinion it is the most beautiful place in all of England and the thought of destroying it is simply abominable! When there are other places even in and around the town of Leek that could be developed instead, I implore you to please drop this crazy scheme immediately! I understand that there is another potential site that you can develop that you have referenced as 'LE066', not to mention the numerous abandoned factories that, though possibly listed, are essentially nothing more than an eyesore waiting for an entrepreneurial company or government body to redevelop in the same mind set as the original builder of the buildings.</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO192 about Leek housing requirements and windfall allowance <p>The 2016 Landscape impact study concludes that: LE066 is of high landscape sensitivity owing to its location, despite the presence of site screening.</p> <ul style="list-style-type: none"> • Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan. • See para response to PO9337 on listed buildings

PO9173	Mr and Mrs S A Hodkinson				Object	<p>We are writing as a young couple concerned about the prospect of many more houses being built on good quality farming green field sites in Leek and throughout the Staffordshire Moorlands, especially over the Mount Road in Leek. We use the Mount as many people of all ages do on a regular basis, whether it's to walk the dog or to go out for a run. The Mount is used by many and if lost would be greatly missed. The main issue that concerns me with the proposed building of houses over the Mount is that the council & planners feel it is acceptable to potentially build houses on what is good quality farming green field sites. We need to protect our green spaces and farming land that is producing us with our food and local food at that. Another point to make is there are hundreds of empty properties throughout the Staffordshire Moorlands therefore if there is really a great need for additional housing which there is no evidence to suggest this. Also in this day and age we as a country are very conscious trying to reduce our carbon footprint and recycling everything possible. Therefore question why does this not apply to housing. There are all these properties sitting empty and you are wanting to build more, do we really need more if we already have so many empty. This includes new builds that have being built in the past twelve months that are vacant. Also question who are you expecting to buy these properties or live in them. There is obviously no jobs or prospects for people to want to move into Leek otherwise they would be here now. You only need to open the local paper or look on the internet there are always hundreds of properties at all prices for sale and up for rent in Leek. If you by some miracle find hundreds of families to live in these houses then question how do you propose to improve the infrastructure. It already takes up to twenty minutes to drive from one end of Leek town to the other and this isn't even in 'rush hour'. We certainly don't have enough schools and the GP's are already stretched to capacity. I also have a worry over the wildlife over the Mount there are many different species of birds and animals that are present around the Mount and the building of houses would interrupt them and significantly reduce the numbers of some already endangered species. Finally I urge you think very carefully before allowing these houses to be built in Leek, with a special thought to the Mount, once you have let properties be built there Leek as a lovely small market town will be spoilt and the beautiful uninterrupted views will be gone forever.</p>	<ul style="list-style-type: none"> • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access • See para response to PO220 on housing needs evidence <p>The NPPF expects Councils to meet objectively assessed development requirements, and also encourages brownfield development, subject to wider Policies.</p> <ul style="list-style-type: none"> • See para response to PO678 about Leek employment land requirements • See para response to PO90 about highways • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO674 about educational requirements • See para response to PO678 on ecology evidence

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9187 PO9257	Ms Michele Rushton Mrs Jane Harrison				Object	<p>I wish to register my disapproval re the above development and quite the following points. Loss of an important local amenity – the Mount is a very important open space close to the town centre which is enjoyed by people across the town. Visual impact - restricting important and highly valued panoramic views across the Leek skyline and further afield. Impact on infrastructure - primary schools in particular (East Street, Beresford) will struggle to keep up with demand and the situation where some children already have to travel to schools in the west of Leek will become more and more common Mount Road is on the route of the Staffordshire Moorlands Walk – a very popular route for leisure activities such as walking, cycling and jogging High quality landscape – unsympathetic to the landscape character and quality of the area Urbanisation of the country lane that is Mount Road – if all the 6 developments proceed then in excess of 500 houses would be constructed. Mount Road would likely become a main road linking the Ashbourne and Buxton roads. The spatial distribution of proposed sites across Leek is unbalanced - there will not be sufficient demand to build all of these houses on one side of town so the council will not meet its housing needs in any event The volume and speed of traffic is likely to increase on Kniveden Lane where my family have been residents for over 25years. Please for the sake of Leek and her people, review your proposal.</p> <p>Question where are the jobs to support people buying new houses Traffic & congestion through & around Leek is already critical without the addition of more vehicles. Question why can't brownfield sites/old mills etc be converted to housing · I chose to live near Mount Road because I like it as it is, please do not change it!</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about landscape evidence • See para response to PO674 about educational requirements <p>Development proposals affecting the routes of recognised public rights of way would need to make allowance for them.</p> <ul style="list-style-type: none"> • See para response to PO90 about highways • See para response to PO35 about viability study • See para response to PO678 about Leek employment land requirements • See para response to PO192 about Leek housing requirements and windfall allowance

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

PO9205	Mr Martin Bagshaw				Object	<p>I would like to register my objection to the proposed housing development on the mount area of Leek. I have lived in Leek for all of my life and I and many others , have spent many happy hours enjoying the scenery and tranquility that this area of the town offers to residents of the town. To develop in this area will drastically reduce the local amenity for the residents of the town. It is a lovely picturesque area that is within easy reach of the town centre. And I believe that to destroy it would be an absolute travesty. The area has many amenity uses, such as walking, horse riding, cycling and jogging, let alone just sitting on the benches and chilling. I think the existing schools will struggle to cope with the increased demand for places. The increase the traffic on the roads surrounding the mount will be significant, and traffic calming measures will need to be considered for safety reasons and quality of life of the existing residents in the area. There also be an increase in commuter traffic from this development. I think the majority of which will have to cross the town towards either Stoke on Trent or Cheshire. This will add to the already considerable traffic issues in the town. I believe the Barnfields, the rear of Sainsbury and Foker Grange Farm would be much better locations, so that the increase in traffic is kept away from the town centre. It was my understanding the houses were proposed for the rear of Sainsbury's. But I understand this has hit commercial difficulties with residual contamination.</p>	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access • See para response to PO674 about educational requirements • See para response to PO90 about highways • See para response to PO678 about Leek employment land requirements • Existing industrial areas in use would not generally be allocated to other uses unless re-provision of equivalent or improved floorspace was involved. • See para response to PO3657 about Sainsburys consent • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO1146 about western Green Belt • See response to PO35

PO9279	Mr Ian McFaul				Object	<p>i am writing to protest against the latest version of the site allocations plan for th Staffs Moorlands, in particular the mount area of Leek. the following objections should be considered</p> <p>a)maintaining the individuality of our market town rather than going down the homogenisation route</p> <p>b)I'm not sure where the demand for these house is coming from - where is the research on households forecasted to require this</p> <p>c)The area of most concern to myself is particularly LE127 and the terrible prospect of houses being built on the town horizon, the entrance to Buxton makes me shudder and we should not go down that route</p> <p>d)there are lots of brownfield sites ripe for development in town that should be exhausted first rather than taking the easy option short term option.</p> <p>e)where i the visionary leader on the council who can set out a plan for the town not driven by short termism</p>	<ul style="list-style-type: none"> • See para response to PO674 about design policies • See para response to PO220 on housing needs evidence • See para response to PO90 about landscape evidence • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO1352 about public consultation and the Statement of Community Involvement
PO9287	Mr Ian Harrison				Object	<p>I hereby which to object to the building of houses etc on The Mount, Leek. This road, used by many is the last place to admire the scenic views of both Leek and the surrounding areas. It is an area of outstanding natural beauty. If one site is given permission for house building, then all others will follow and question where will it end. There must be countless brown field sites in the leek area which can be built on first and foremost. If 500 houses were to be built, what happens to Leek. The jobs aren't there, infrastructure, the existing roads can't cope with todays traffic (constant gridlocks in the town centre, never mind 1000 further cars. No hope of a ring road around leek. Junior schools, can't cope with further numbers of school pupils. My wife and I continue to walk over the mount and admire the scenery, as well as the many more who walk, cycle, run and horse ride over it. The new housing would block the outstanding views people go the the mount to view.</p>	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence <p>None of the Mount sites attract an AONB designation.</p> <ul style="list-style-type: none"> • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO678 about Leek employment land requirements • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO90 about highways • See para response to PO674 about educational requirements • See para response to PO90 about open spaces and countryside access

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9219	Ms Lisa Milward				Object	<p>I wish to register my disapproval to the above development My objection has little to do with extra traffic and infrastructure but a lot to do with losing a place that is very dear to people's hearts. The Mount has always been a favourite short walk of mine and my family's. It is peaceful, has beautiful views and friendly people of all ages make a point of speaking. The Mount is somewhere that I spend a lot of time walking each week, a place that has been a part of my life since childhood. I have very fond memories of spending time walking over The Mount with family when we didn't have a car and little money to take buses elsewhere. The Mount is perfect for a short walk, it's somewhere that I have always felt safe to walk alone and not too far for a morning walk before work and for those people who perhaps struggle to walk longer distances. By developing housing on this land I believe that it will take away one of the town's best assets, one that people of Leek have enjoyed for many, many generations. So as councillors and planners who are in office for a relatively short period of time in comparison making a decision that will remove this for everyone who loves to walk here, I hope that you really consider how much The Mount means to people like me. It will be a huge shame if this goes ahead.</p>	<ul style="list-style-type: none"> • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO90 about highways • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access
PO9307	Councillor Gail Lockett				Object	<p>I would like to objections to site allocations LE127 and LE128a, these two sites are completely unsuitable for development as the road would not be able to sustain the amount of traffic and the junctions at both end are dangerous, we should be looking at urban infill to distribute the number of houses required.</p>	<ul style="list-style-type: none"> • See para response to PO90 about highways • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO125 about option sites assessments and sustainability appraisal

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9322	Ms Elizabeth Stretton				Object	<p>I am writing to voice my opposition to the proposed housing development on the Mount Road, Leek - ie Plots IE140, LE128a, LE127, LE142a, LE142b, and LEO22. On the edge of the Peak District, this area of Leek can only be described as an extension of this National Park and one which holds a special place in the hearts of Leek residents. The number of walkers and cyclists using this area each week must be in the hundreds with many, like myself, enjoying the walk over The Mount on a daily basis. This walk commands beautiful views of the surrounding countryside, providing a "country" experience for so many walkers, cyclists and drivers, as well as a place to sit and watch, for example, the sunsets, weather conditions unfold, or simply just to sit and ponder. For years it has provided a walk within a few minutes walking distance, for families, courting couples, dog walkers and anyone else who wants to escape from the town and enjoy the views and the experience pleasures of a "country " walk without having to travel by car and park in an over-priced car park! There are even opportunities for people to drive from anywhere in Leek within minutes to the Mount and then enjoy all the attractions described above. The loss of this walk and seats would deprive many people of the opportunity to enjoy panoramic views across the town and the surrounding skyline: these vistas would be lost and replaced with houses instead - reducing the area to just another street of the kind to found anywhere and out of character with the landscape. It also seems that all the attention has been focused on this area and side of Leek, when there are other areas around Leek which could be made use of. One of the most important problems, as I see it, is the strain on the local infrastructure. Up to, or in excess of, 500 houses could be built along this road and all these new residents will need employment - already a problem in Leek and the surrounding areas and towns - as well as schools for their children. Leek primary schools are already experiencing problems and some children are already having to travel across Leek to receive their education. Recently trees have been cut down on the top field of the High School - now work has started on fencing this area, apparently towards the building of a new primary school on this site. I cannot remember being made aware of this possibility, although it may have been mentioned somewhere, but it seems that the building of this school means that councillors are confident that the housing development will take place and they will be able to wave aside any objections pertaining to education and say that a school is already being built . There are many houses in Leek which are empty, as there are many sites which could be used to provide areas for new homes, and it would make more sense to utilize these possibilities before taking away an important , local amenity which is used every day by so many people and which is our own area of "outstanding natural beauty" and which is available to everyone.</p>	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access • See para response to PO1146 about western Green Belt • See para response to PO678 about Leek employment land requirements • See para response to PO674 about educational requirements • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO674 about design policies <p>The emerging Local Plan is not yet finalised and needs to undergo independent public examination by Government appointed Planning Inspector before it can become adopted. Planning applications arising before this happens must be determined against the NPPF and current Council planning policies.</p> <ul style="list-style-type: none"> • See para response to PO220 on housing needs evidence

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9348	Mr David Rowe				Object	I am writing to object to the selection of all sites on Mount Road, LE127, LE128, LE140 and LE142a. This road is of great value to local people as a very accessible place to experience and benefit from the surrounding countryside. Many people walk, cycle, exercise their dogs along this road every day, and this would be completely lost if development was allowed to take place. There are several brownfield sites in the town that should be considered instead, e.g. the old mills, Barnfields site.	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO9205 about existing industrial areas
PO9330	Dr Tracey Cole				Object	I would like to hereby object to the areas of local interest around The Mount being developed (LE142b; LE142a; LE140; LE128a; LE127; LE022). As I am sure you are aware, there is considerable public opposition to the proposed building of 400 houses on these sites. The area is well used, at all times of day for cyclists, walkers and horse-riders. It is an quiet oasis for the people of Leek to experience the calm of the countryside and look down on the splendid views of the town and further afield. As such, it is an extremely highly valued area in the town of Leek. As a resident of Pitcher Lane..building on The Mount would seriously impact on me and my neighbours. The building of so many houses will bring at least 400-800 cars with it. Access for these vehicles will no doubt run straight past my house, causing noise and air pollution. I moved to Leek from Cheshire for exactly the same reasons: the road I lived on became unbearably busy. I noticed that sitting in the garden was impossible with the constant noise of the cars and the smell of the fumes, not to mention the health consequences of nitrogen oxides, carbon monoxide and particulate matter. I am also concerned that with so many vehicles, the junctions of Kniveden/Ashbourne Rd and The Mount/Buxton Rd will easily generate queues during rush hours. Getting off my estate will be far more tricky and the increased risk of traffic and pedestrian accidents is not a pleasant thought. A town like Leek is quite a jewel, but it could so easily be ruined forever if we don't seriously consider all the consequences of our actions.	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO90 about air quality

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9385	Councillor Charlotte Atkins				Object	I am writing to object to the four development sites on The Mount as identified in the proposed SMDC Local Plan. My reasons for doing so are: The Mount provides unique and much valued panoramic views over Leek and its skyline as well as over parts of the National Peak Park The openness of The Mount makes it a hugely important local asset for public recreation and for biodiversity. This is particularly important at present when lack of physical exercise is creating a public health crisis. The Mount is very popular among walkers, cyclists, horse riders and joggers as well encouraging families to be active and enjoy the natural attractions of the area. The roads up to The Mount are totally unsuited to increased traffic. But if they were improved, that would encourage rat running between the Ashbourne and Buxton Roads totally destroying the quiet rural nature of the area. With increased traffic, the junctions at either end of Mount Road would be highly dangerous. The Mount is a developer's dream and would attract developers who want to build expensive executive homes. These would attract buyers from outside Leek rather than providing the affordable homes we need for both local young and older residents. If 400 houses are built on the Mount, they could potentially generate 800 cars driving through the centre of Leek as the prevailing flow of traffic out of Leek is to Stoke on Trent and Macclesfield. That would create even more gridlock than we experience already. More suitable development sites exist within Leek eg along the Macclesfield Road. But they have not been identified or consulted upon. I urge the Council to drop its plans to destroy The Mount and look elsewhere to develop affordable homes for local residents.	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO1473 about affordable housing • See para response to PO678 about Leek employment land requirements • See para response to PO1146 about western Green Belt • See para response to PO192 about Leek housing requirements and windfall allowance <p>Both the 2015 site options consultation, and the 2016 Preferred Options consultation, mapped sites for various land uses across the District including housing, employment, and mixed uses.</p> <ul style="list-style-type: none"> • See para response to PO125 about 'Options Site Assessments'
PO9300	Mr and Ms Gary and Elaine Turner				Object	I wish to object to the proposed housing development at the mount (all of the sites) as this is a high quality amenity area enjoyed by all for its views, indeed, if ever Leek is featured on TV programmes the cameras usually end up doing a view of the town from the mount, which says it all.	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9424	Mr Michael Harvey				Object	<p>To whom this may concern. I would like to raise my strongest objections to the proposed plans to build across the mount - LE142A, LE140, LE128 & LE127. This is a beautiful and precious area for the people of Leek who currently enjoy leisure activities such as walking etc which is easily accessed by many, both old and young. The fantastic views of this high quality landscape and the therapeutic benefits it offers are easily available to all who want to enjoy the beauty and peacefulness of the countryside without having to travel far from their doorstep, and who may not be in a position to! To lose this lovely countryside would be a tragic and very sad loss to the people of Leek. The Mount is a narrow county lane and is totally unsuitable for increasing the flow of traffic. Having Buxton Road at one end of The Mount and Ashbourne Road at the other, this would create a massive increase in the volume of traffic using it, and increase the risk of accidents - it's totally unsuitable! In addition to this, the increase in homes would ruin what is currently a peaceful retreat and a habitat for our wildlife which I have seen loads of rare birds when walking our dogs , these birds would go away and would not be seen again. Also foxes and badgers. Concern that fatal traffic accidents will occur. Leave our mount and all it has to offer well alone!! There are loads of other areas in Leek that are within the boundaries of leek and not on green field sites (Huge's Concrete site for one) Leek dose not need this amount of housing there is not the work/jobs for the increase in people. This is all about money in the pocket for the council. If we need another primary school increase extend Beresford Memorial school there is about 3 acres of fields behind the school.</p>	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO678 on ecology evidence • See para response to PO9205 about existing industrial areas • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO220 on housing needs evidence • See para response to PO678 about Leek employment land requirements • See para response to PO674 about new homes bonus • See para response to PO674 about Leek education requirements.
PO9377	Cllr Dani Ogden				Object	<p>An area of natural beauty should never have been considered for planning application in the local plan. The outrage this has caused with local people has been overwhelming. The Mount is an area accessible to open countryside for local people, it is used for recreational purpose and attracts visitors coming to Leek. One lady told me that she could walk safely with a group of people with learning difficulties, the volume of traffic from four hundred dwellings would have a severe impact on those using The Mount for recreation, the infrastructure alone would not only cause a dramatic difference to the landscape it would also affect the wildlife in this area. That said, LE142a [landowner] are against development on this land, also there appears to be no indication on the map as to where the boundary is belonging to [the landowner]. LE127 and LE128a is not suitably distributed to urban infrastructure. It has been suggested LE066 where Kniveden Hall is, Folker Grange and Holme Farm on the west side of Leek are developable.</p>	<ul style="list-style-type: none"> • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO678 on ecology evidence <p>The Council communicates with landowners of affected sites to ensure they are available, prior to selection. Note that the owner of site LE142A, as indicated on the Local Plan proposals map, has confirmed site availability.</p> <ul style="list-style-type: none"> • Note that Kniveden Hall LE066 is

							<p>included as a residential allocation in the Local Plan.</p> <p>The map in the Preferred Options consultation document is intended to illustrate proposed allocations and development boundaries and other summary information, not the extent of land ownerships.</p> <ul style="list-style-type: none"> • See para response to PO674 about educational requirements • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO1146 about western Green Belt • See para response to PO678 about Leek employment land requirements <p>The 2016 Landscape impact study concludes that: LE066 is of high landscape sensitivity owing to its location, despite the presence of site screening. Note the findings of this study form part of a wider evidence base to support SMDC's Local Plan. Its conclusions must be weighed against other evidence.</p>
PO9370	Councillor Rebecca Done				Object	<p>On the proposed planning for the Mount in Leek..I do not agree with and my reasons are stated below: The Mount is a very important open space close to the town centre which is enjoyed by a lot of people across the town including myself. There will be a massive impact on infrastructure, I think primary schools in particular would suffer (East Street, Beresford) and will struggle to keep up with demand. Mount Road is on the route of the Staffordshire Moorlands Walk – a very popular route for leisure activities such as walking, cycling and jogging` If all the 6 developments proceed then in excess of 500 houses would be constructed. Mount Road would likely become a main road linking the Ashbourne and Buxton roads. The proposed sites across Leek are unbalanced - there will not be sufficient demand to build all of these houses on one side of town.</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO674 about educational requirements • See para response to PO674 on Infrastructure Delivery Plan • See para response to PO192 about public rights of way • See para response to PO35 about viability study

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/ General Comment	Consultee Comments	Officer Response
PO9390	Ms Claudia Hill				Object	I am very disappointed to hear of the plans to build upon the site known as the Mount in Leek. This area is undoubtedly one enjoyed by all walks of life within Leek and it would be a great shame to destroy it with housing. The views and walks currently enjoyed would be eradicated and this would impact on the wellbeing of the people of Leek. As you can see from this article: http://www.thetimes.co.uk/article/a4555184-30c7-11e6-9c43-b579056ef2e5 - published today in the Times: "Nature lovers are more conscientious, emotionally stable and open to new experiences than those addicted to technology, academics claim." Taking away this green land would not be in the interest of the people of Leek. Traffic is also a major problem within Leek. The current infrastructure of roads and schools could not cope with more cars and people, the number of which would undoubtedly augment if new houses were built. There is a lot of opposition to the plans to build on the Mount, and there is no reason for this to go ahead.	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO192 about Leek housing requirements and windfall allowance
PO9396	Ms Katie Giddings				Object	I wish to register my strong objection to the sites identified for development along The Mount, Leek. The site reference numbers are LE127, LE128, LE140 & LE142a. The Mount is highly valued by the people of Leek. Hundreds of people use it every day & enjoy the landscape and views. These people cover a broad mix - there are walkers & strollers, hikers & joggers, dog walkers, horse riders, cyclists - and they range through all ages, from young to old. Generations have taken the air along The Mount and future generations deserve the same opportunity. Chance and regular encounters with this variety of people whose paths would probably otherwise not cross creates the sense of community so often lacking elsewhere but celebrated in Leek. The view of Leek from The Mount creates a sense of belonging to and connection with the whole town, enhancing this sense of belonging. I may not live the other side of Leek but I can see it every time I walk the Mount and feel part of its whole. The town is visible from The Mount & I can enjoy the view of its special architecture & character. This natural landscape is free for everyone to enjoy and is accessible within minutes of the town centre. It is a landscape and community which would be lost forever should the developments go ahead. Such things are irreplaceable and I despair that The Mount is even being considered as a suitable option. I am a recent newcomer to Leek having moved here three years ago. I have never lived anywhere more welcoming and cheerful and full of people appreciating and making the most of living in such a beautiful place. The Mount is at present a country lane offering peace and tranquil exercise. Its urbanisation would completely change its character and make it a main road connecting Ashbourne & Buxton Roads. The traffic increase would be beyond that contributed to by extra housing as it would become a highly attractive route for those seeking to avoid Leek town centre. The access to and from Ashbourne Road	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence • See para response to PO90 about open spaces and countryside access • See para response to PO90 about highways • See para response to PO192 about Leek housing requirements and windfall allowance • See para response to PO220 on housing needs evidence • See para response to PO1352 about public consultation and the Statement of Community Involvement

						<p>would also radically change the character of that end of town. The increased housing would alter the balance of the town and there is simply not that level of demand for housing in that area. The figures of required housing also appear to be based on doubtful statistics so that the very need for this level of housing in the Moorlands is questionable. It would really be dreadful if this so very important natural landscape were to disappear forever from Leek. In conversation with the people I meet along the Mount, there is a strong feeling of being threatened by changes beyond their control & of losing something very precious. Many people have said they have no faith that their feelings and needs will be valued. Please change their minds and show that local people will be listened to and their objections acted upon. Please don't build on The Mount.</p>	
PO9411	Mr Alan Percival				Object	<p>I wish to object to the proposed house building on The Mount. Along with many other people I walk along Mount Road several times a week winter and summer. It is a lovely country walk and the only one on the eastern side of the town that is away from traffic fumes. There are many other reasons why building should not be allowed on The Mount which I am sure you have been made aware of.</p>	<ul style="list-style-type: none"> • See para response to PO90 about open spaces and countryside access • See para response to PO90 about air quality

	Petition from Mount residents (1092 signatures)				Object	<p>Dear Miss Ralphs,</p> <p>Building four hundred plus houses on the area known by everyone in Leek as The Mount and used by countless generations as a gateway to the countryside would be against everything that 'Localism' intended to bring.</p> <p>The enclosed petition goes some way to demonstrate the strength of feeling that there is against the proposed building plots as set out in the Local Plan.</p> <p>The area is mainly agricultural and offers amazing views of the town and its surrounding countryside. Indeed the views of Leek's conservation area is unrivalled and the area as a whole acts as a buffer between the town the Peak District National Park.</p> <p>The road itself could not cope with the estimated 600 to 800 extra cars that the proposed housing would generate. The Mount is a narrow road with no footpaths and the junctions at either end of the Mount would become even more dangerous.</p> <p>Historically people travelling out of Leek to work use the Stoke on Trent and Macclesfield roads with few travelling to Buxton or Ashbourne. This would mean that the roads in Leek's Town centre would become even more congested at peak times as these people make their way through town.</p> <p>We urge the Council to think again and produce alternative sites for the houses thereby saving this precious area for the future generations to enjoy.</p>	<ul style="list-style-type: none"> • See para response to PO90 about landscape evidence <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This includes consideration of heritage impacts, following consultation with the Council's Conservation Officer, and the heritage impact recommendations of the most recent 2016 landscape impact study. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p> <ul style="list-style-type: none"> • See para response to PO90 on highways • See para response to PO1352 about Council Assembly and statement of community involvement • See para response to PO678 about Leek employment land requirements

Question 10 Do you have any comments on the proposed housing allocation LE128 in Leek?

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO91	Mr Bill Reid				Object	<p>This area is a most popular area for walkers, runners, drivers and strollers. It has been, for as long as I can remember, an area that provides views over Leek town and the surrounding area which cannot be equalled. It is a beautiful peaceful part of Leek which should not be spoilt by housing estates and the disruption that goes with it. The top of Kniveden Lane has a piece of unadopted road which deters motorists from using it as a thoroughfare and I am sure that this would become adopted if the proposed plans go ahead causing untold traffic, noise and pollution, as well as the dangers to residents from the traffic. There are many areas around Leek which would be far more suitable.</p>	<p>The public/visual open spaces proposed by the Council are those mapped in the Preferred Options consultation document. The Council's emerging Local Plan policies seek to improve public access to open spaces/recreation generally where this is consistent with other policies. Note there is no automatic public right to cross privately owned land beyond public rights of way.</p> <p>Page 25 of the Preferred Options consultation document sets out the residual housing requirement for Leek to 2031 (pursuant to Policy SS3 of the adopted Core Strategy). The Council must demonstrate that it will fully meet residual housing requirements for Leek to have a sound Local Plan in place. This requirement does not have to be met 100% from land allocations – unanticipated development of other urban brownfield/greenfield sites counts too – Table 4.1 factors in assumptions about future windfall housing (resulting in a lower residual requirement). This windfall would include urban sites not formally identified on the map. Applications for residential uses arising on such sites would be assessed on their merits against NPPF and Council Policies. As there is insufficient capacity to meet this residual need entirely from sites within the Leek town boundary, the remaining requirement is to be met from a combination of urban (brownfield and greenfield) sites, and peripheral “urban extensions” around Leek as set out in Tables 4.2 and 4.3.</p> <p>The Council uses evidence to justify its selection of ‘Preferred’ allocation sites from wider sites. This includes landscape impact evidence. The most recent 2016 landscape impact study also assessed impacts from the Peak Park, and concluded that the various Mount sites exhibited low- through to high- landscape sensitivity; it also provided recommendations regarding mitigatory measures where appropriate. It concluded</p>

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

							<p>site LE140 to be of medium landscape sensitivity; recommending that site-specific landscape mitigation measures could include advanced planting and landscaping on the eastern boundary, and limited building heights in the eastern half of the site. Note that landscape evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p> <p>The Council consults with SCC Highways during Local Plan preparation. SCC did not raise any objections to Preferred Options sites LE022 /LE127 /LE128 /LE140 /LE142A /LE142B subject to development in this area contributing to the improvement of Mount Road including provision of footways and pedestrian links. Also Kniveden Lane should be brought up to adoptable standard with the implementation of footways. Further junction improvements at Mount Road/Ashbourne Road may also be appropriate. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to submit transport statements, and provide highways improvements where deemed appropriate).</p> <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is set out in the 'Options Site Assessments' on the website. This includes consideration of heritage impacts, following consultation with the Council's Conservation Officer, and the heritage impact recommendations of the most recent 2016 landscape impact study. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p> <p>If the Council considered that a development may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and</p>

							develop options to mitigate these impacts. In addition the Council continually monitors air quality across the District and regularly undertakes review and assessments of this data to identify areas where the traffic could have an unacceptable impact on local air quality. Policy SD4 in the emerging Local Plan covers controls of all forms of pollution arising from development.
PO118	Mrs Alison Campion				Object	Already enough housing in the area. More houses will lead to increased traffic on Mount Road which is very narrow in places. Open spaces and views should be left for public to enjoy when out walking or cycling.	<ul style="list-style-type: none"> • See para response to PO91 on highways • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence
PO122	B & M Bentley				Object	Urban extension for New Housing is opposed on Mount Road. The relevant issues are 1. Landscape & historic character 2. Health & quality of life 'The Mount' is a known cultural and unique feature for Leek folk and visitors gained over many generations. Offering: Visual beauty, health and community amenity. The many attractions of a 'trip around the mount' would be largely lost. These comments refer to LE127, LE128a and LE140.	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about option sites assessments and sustainability appraisal • See para response to PO91 about open spaces and countryside access • See para response to PO91 about air quality
PO228 PO233	Miss Alicia Guy Mr Daniel Frith				Object	Building nearly 400 houses in the Mount area will totally ruin the lovely breathtaking scenery and peace and quiet that you get up there, increased traffic will spoil the area also. It could bring house prices down as at the moment it is such a lovely peaceful area and this no doubt will change	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 on highways <p>Property values are not considered as material considerations under the Planning Acts.</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO680	Andy McGraw				Object	<p>Extension of the Town Boundary into the Natural Zone The following blocks identified as, potentially suitable housing sites, all appear to be outside the town boundary on the maps supplied by the Staffordshire Moorlands District Council, on this second housing consultation June 2016 Block numbers; LE 127, LE128a, LE140, LE142a, LE142b All the above mentioned blocks are therefore proposed to be constructed on the Natural Zone land surrounding the town of Leek.</p> <p>Public Amenity The small narrow lane known as Mount Road which travels between the A53 Leek/ Buxton road and A523 Leek/ Ashbourne road along which the following blocks appear, LE127, LE128a, LE140 and LE142a, are used on a daily basis as a public amenity. The lane is constantly used by locals and visitors to walk, ride and enjoy the views in relative safety at present. If the proposed housing goes ahead, with the number of houses planned on these sites, this road will undoubtedly suffer a dramatic increase in the number of vehicles using it, by averaging 2 cars per household, thus reducing its safety and relative quiet enjoyment. The views over the town of Leek and its surrounding countryside will also be affected detrimentally. I also note that the lane is included as part of the Staffordshire Moorlands Walks, advertised and mapped by the Ordnance Survey as a recreational path but not highlighted as such on the SMDC consultation map. Surely the increase in vehicular traffic would compromise this route. Other public rights of way, public footpaths, are either not shown or seem now to stop at the new development. When I raised the question of this fact at consultation the officer was unable to answer my query. In these times of austerity and the constant cut backs to local government, areas of free enjoyment and recreational use which also merit health benefits need to be conserved.</p> <p>Wildlife Concerns The blocks shown as, LE127, LE128a, LE140 and LE142a are frequently used by several bird species, especially during the winter months, as important feeding grounds. Some of these bird species are afforded special protection under the Wildlife and Countryside Act 1981 (W&CA81) as Schedule 1 protected species, identified by BirdLife International as Globally Threatened species and are listed as Red List species of birds of conservation concern by organisations, the RSPB (Royal Society for the Protection of Birds), the British Ornithologists Union, Natural England and the British Trust of Ornithology, to name a few. The birds in question are; Fieldfare Turdus pilaris, Schedule 1 W&CA 81 and Red List species Redwing Turdus iliacus, Schedule 1 W&CA81 and Red List Species Starling Sturnus vulgaris, Red List species The small block of land between blocks LE127 and LE128a is also important to wildlife in particular bird species. Although this land is not earmarked for development I feel that the disturbance of the development would compromise the species using it. This small</p>	<p>Note that there is not a 'natural zone' designation for open countryside in the Staffordshire Moorlands.</p> <ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about highways • See para response to PO91 about landscape evidence <p>Development proposals affecting the routes of recognised public rights of way would need to make allowance for them.</p> <p>The consultation map is intended to depict summary information only; it does not for example illustrate public rights of way.</p> <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites, including ecological evidence: the Mount sites LE022/ LE127/ LE128/ LE140/ LE142A/ LE142B were subject to a Phase I ecological survey in 2014 and a later 2017 ecology study considered the scope for 'local wildlife site' (ie.SBI) designation for all preferred option sites. These studies set out ecological evaluations of the sites followed by recommended further surveys/actions in the event of future development. The Council would expect subsequent schemes to take account of this evidence; further Policy NE1 allows for the Council to require ecological</p>

						<p>wooded block is used during the winter months as an important winter roost for a small number of Raven <i>Corvus corax</i>, a species again afforded a certain amount of protection. Species using this block to breed include, Little Owl <i>Athene noctua</i>, although not afforded any specific protection via acts of Parliament or listed as a concern yet, it is a species showing major decline, UK population estimated to be down by 24%, as highlighted by the RSPB breeding bird data 1995 – 2008. Great Spotted Woodpecker <i>Dendrocopos major</i>, Nuthatch <i>Sitta europaea</i>, are other examples of regular breeding species in this area. Due to disturbance I predict that many of these species will refrain from using this important area.</p> <p>Infrastructure As mentioned previously the numbers of new houses proposed in the areas of Mount Road and Thorncliffe Road, blocks LE127, LE128a, LE140, LE142a and LE142b, will put an enormous strain on the local infrastructure and road system. We all constantly experience the difficulties whilst travelling through the town of Leek caused by any one road closure. Both junctions from Mount Road can be difficult to negotiate now with the small amount of traffic using it with the A523 being particularly dangerous in its present form. Problems with access at both these junctions will be severely increased with the increased volume of traffic. At the original consultation July 2015 there was no mention of increasing employment opportunities even when the question was raised. I still feel that these concerns have yet to be addressed. It was implied but not confirmed that most of the individuals who would be residing in the new development would be commuter based, travelling to nearby cities to seek their employment. This surely is contrary to most local government policies that are tasked with reducing this activity to contribute towards climate change and global warming issues. These planned developments will also have a visual, probably a negative impact from the adjoining Peak District National Park as it will be observed from the iconic Roaches and the boundary road of Morridge.</p> <p>There seems to be little or no mention of the use of brown field sites throughout the proposal. With the relaxation of planning rules for developing these sites should the Council look to these sites first. Removing deteriorating buildings and areas within the</p>	<p>mitigatory or compensatory measures where appropriate. Note that ecology evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites. According to the 2006 NERC Act, the Council must in its Planmaking, have regard to the purpose of conserving biodiversity.</p> <ul style="list-style-type: none"> See para response to PO675 on Infrastructure Delivery Plan <p>Both the 2015 site options consultation, and the 2016 Preferred Options consultation, mapped sites for various land uses across the District including housing, employment, and mixed uses.</p> <p>Notwithstanding current commuting patterns, the District as a whole has residual general employment land requirement, and Leek has a requirement (of around 8ha to 2031) and the Council must demonstrate that it will fully meet these along with its housing requirements, to have a sound Local Plan in place. Government Policy promotes mixed land uses, subject to proper consideration of amenity impacts (such as noise). The Council works with neighbouring planning authorities under its duty to cooperate, to explore opportunities for the meeting of development requirements cross-border. However neighbouring authorities must also address their own development requirements. The Council consults with SCC Transport (regarding strategic impacts) during Local Plan preparation; and has regard to SCC's Local Transport Plan Integrated Transport Strategy for the District.</p> <ul style="list-style-type: none"> See para response to PO91 about Leek housing requirements and windfall allowance

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

						<p>town that look unsightly and replacing with new developments would surely enhance the town, and, as they are close to amenities within the town centre, reduce the need for occupants to use their motor vehicles on shopping trips or evening entertainment. There are also a number of old mills and factories within the existing town boundary that could and should be transformed and upgraded into apartment blocks, as they have in other towns and cities in the UK, which would save those buildings from further degradation, provide perfect housing within the town and help to keep the overall feel of the town and its history.</p> <p>Conclusion In conclusion it is my belief that the proposed development and size of that development will have a serious and negative impact on the market town of Leek and its Natural Zone boundary. As a society in general we are losing touch with nature and the great outdoors. There are Government initiatives to reverse and combat this trend. Organisations, funded by the National Lottery, Government, County and Local councils including SMDC, are tasked to promote these initiatives assisting people to re-engage with nature. We are also constantly reminded these days of health, well-being and mental health issues that our society is increasingly subject too due to the pressures of our modern living and the need for places for people to unwind. With this in mind how can we justify increasing the urban zone into our countryside. We have a duty to protect iconic landscapes, open spaces and the biodiversity such as can be found within the Mount Road area for the future generations of this fantastic town, so that they too, can experience quiet and peaceful recreation as we have enjoyed over the years. Maybe the Officers involved in making the final decisions should take an early morning walk along the Mount Road to experience these quiet and peaceful surroundings with the only noise being provided by the local bird-life with their dawn chorus. Once we lose these areas they are lost forever.</p>	<p>In relation to comments on economic impact, new housing has a proven positive economic benefit to an area, generated both by expenditure of construction industry and through longer term residential spend.</p>

PO675	Mr Jonathan Hulme				Object	<p>The mount is an important, free, extensively used recreation facility for Leek. The proximity of the mount to the town makes it easily accessible, providing a rural escape for walkers, cyclists, joggers and families alike. This invaluable resource contributes to the physical and mental health and wellbeing of all who use it. The mount provides panoramic views of the town and surrounding moor land including the Roches, and housing developments should not encroach on this. The junctions with the A53 and the A523 are also quite dangerous and unsuited to large amounts of traffic. Some form of traffic management would need to be added to these junctions, increasing congestion in and around the town to even higher levels than currently (which is already too high!!). This deters visitors to the town, reducing the amount of tourist trade. The area is also important ecologically and accommodates a variety of species, some of which appear on the UK Biodiversity Action Plan. This excessive allocation of sites appears to be national policy implemented at a local level without consideration of local needs and demographics. The infrastructure in the east of the town is insufficient to cope with a population influx. For instance, the schools and health facilities are already full. Housing development should be concentrated on brownfield sites in the town such as Davenport mill on Mill Street and the mill on Ashbourne Road. The developers who own these sites should be incentivised to commence development. Redevelop eyesores, don't diminish beauty spots.</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO91 about highways <p>Any new developments would need to adhere to design policies to ensure character of the District is maintained.</p> <ul style="list-style-type: none"> • See para response to PO680 on ecology evidence <p>Need for additional housing stems from a number of factors, for example household formation, in-migration, linkages with future workforce, and other factors. The NPPF makes clear that housing projections are the starting point for assessing housing needs; however these additional factors should also be taken into account in Council SHMAs. The Council's own housing need assessments are set out in its evidence base on the website. Note that this already takes into consideration empty properties in the Moorlands.</p> <p>National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.</p> <p>A sustainability appraisal report is being published for consultation alongside the</p>

PO701	Mr John Burnett				Object	<p>This existing field forms an intrinsic part of the open space known as the Mount. This field which I believe is still in use by the local high school is also used by many dog walkers as part of their daily routine. Building on this plot of land would mean that use of the Mount Road as an exercise and recreation facility would be severely restricted. I would also object based on my concerns that building in this location would have severe impact on both existing infrastructure including roads and schools and would affect the ground water run off causing issues in other areas of the town. Building on this land would demonstrably damage the aspirations of the local community and would have severe economic and environmental consequences - completely at odds with the objectives of the consultation.</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO680 about public rights of way • See para response to PO91 about highways • See para response to PO675 about Infrastructure Delivery Plan • See para response to PO675 about educational requirements <p>Council's interim Playing Pitch Strategy 2017 explains that Leek High School lost access to field LE140 during recent lease renegotiation with SCC. LE140 is physically inadequate to accommodate any form of playing pitch. The School identified little requirement for the field.</p> <p>The Council consults with utilities providers, the Environment Agency, and the SCC Lead Local Flood Risk Officer during Local Plan preparation. These bodies did not object to any of the Mount sites. The SFRA provides an overview of flood risk from all sources across the District, and will be used alongside formal EA responses regarding proposed allocations. Note that Local Plan Policy will require that, wherever possible, development will promote the reduction of flood risk by the use of sustainable drainage techniques as per the Flood and Water Management Act., as well as taking opportunities to contribute to wider Council objectives such as its emerging Green Infrastructure Network; to enhancing biodiversity and recreation opportunities etc.</p> <ul style="list-style-type: none"> • See para response to PO680 about economic benefits of housebuilding

PO1322	Mr Stapleton	Leek And District Civic Society			Object	I write on behalf of Leek & District Civic Society to protest in the strongest possible terms against the decision to include The Mount' Leek as a preferred option for housing development. This area is heavily used by recreational walkers and is the sort of local amenity which would be absolutely spoilt by additional building. Leek has few enough open spaces as it is and the loss of The Mount would be completely unjustifiable. Of all the site options in the Leek area, The Mount is the one which we feel should be absolutely sacrosanct and protected for the present populace and future generations.	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access <p>The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy.</p> <ul style="list-style-type: none"> • See para response to PO91 about option sites assessments and sustainability appraisal
PO1351	Mr A Birks				Object	<p>This morning whilst taking my constitutional stroll around Mount Road I happened upon a group of people considering the best plots to build houses in this beauty spot. One member of the group introduced herself as a local councillor. My heart sank as it became clear that some minds at least, against the wishes of the local people, the decision to build seems to have been taken. It is outrageous that the local community is once again to be ignored by those elected to serve us. Mount Road is a very important part of the social scene of Leek as local people use it daily to enjoy the countryside which is within their homes. It would be an ecological and social outrage to remove this facility from the people of Leek. This area is more important to the wellbeing of residents from across the town than any other area around Leek as it is their gateway to a relaxed walk in the fresh air in the countryside.</p> <p>Any development of this area would change the nature of Leek as it would necessitate the widening of the road, the installation of lighting and the uprooting of that special commodity trees. The Mount Road would be a major thoroughfare between the Ashbourne Road, and Buxton Road, Kniveden Lane would be a conduit between the same roads meaning heavy traffic rushing through the estate and there would be a problem caused by necessary construction of major road junctions at each end of the Mount Road. Local residents this would be a disaster. There is a concern too that, with the addition of a large number of houses in this area, the infrastructure at this end of town would be challenged beyond its ability to cope. Schools and doctors surgeries are already very full and recent queues of vehicles to get into town were horrendous during the roadworks in the town. Imagine the chaos should we add another 500 families in the queue.</p> <p>In the unlikely event that Leek should actually need extra accommodation, consideration should be given to brownfields or less intrusive sites first. There are several derelict mills which could be utilised for apartments or demolished for housing. The infrastructure of drains, electricity and gas is readily available</p>	<p>The Council must conduct public consultation concerning its emerging Local Plan as set out in the Local Plan regulations (or exceeding these requirements); and in also in accordance with the Council's adopted Statement of Community Involvement. All stages of the local Plan (including consultations) must be agreed by the elected Council Assembly; and all meetings of the Council Assembly are open to the public.</p> <ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO680 on ecology evidence • See para response to PO91 about highways <p>Issues such as external lighting in schemes can be controlled by the Council's amenity policies. 						near these 2 areas too. I appeal to the council to reflect on the wishes of those who elected them to serve their needs and reject the idea of developing this area and retain it for enjoyment and health of the many people of leek who appreciate it.	<ul style="list-style-type: none"> See para response to PO675 on housing needs evidence
PO1143	Mr R Harrison				Object	<p>I have recently looked at the site plans and talked to one of your officers concerning the location: This is a narrow road, used by many recreational purposes such as walking, cycling The views over leek Conservation area and its surrounding area are 2 nd to none both night and day There have been lots of houses built on the east side of leek in recent years mainly off Ashbourne road. As the majority of people travel to Macclesfield, Manchester and Stoke on Trent to work, this means they have to travel through the centre and often Leek is gridlocked at busy times The exits from the Mount onto Buxton and the Ashbourne Roads are both very narrow and difficult to negotiate. Schools at the end of the town are already full to capacity and young children have to be taken across Leek early in the morning and collected in the evening. Drs Lists are so full. We are told that some of these houses are possible affordable housing. What does this mean? There are plenty of small terrace house on the market which I would consider as affordable. So do we need more? In fact do we need a 1000 new houses to in Leek at all anywhere? If so I would like to think that there are possible sites in Leek - West End could be given consideration before further action is taken. Leek is a beautiful small town with easy access to countryside. By allowing building on The Mount Road that access will be diminished as more of our green fields turned into housing developments and country roads become clogged with vehicles. Where will it end?</p>	<ul style="list-style-type: none"> See para response to PO91 about open spaces and countryside access See para response to PO91 about landscape evidence See para response to PO91 about highways See para response to PO680 about Leek employment land requirements See para response to PO91 about 'Options Site Assessments' See para response to PO675 about Infrastructure Delivery Plan See para response to PO675 about educational requirements <p>The Council consults with its Housing Officer when setting definitions of 'affordable' in relation to affordable housing. This usually equates to a percentage of open market value which represents the upper limit that the house can be sold/resold.</p> <ul style="list-style-type: none"> See para response to PO675 on housing needs evidence See para response to PO91 about Leek housing requirements and windfall allowance <p>Note that none of the Mount sites falls within the Green Belt, whereas the western edge of Leek has Green Belt status. Whilst Councils can allocate within the Green Belt National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). The Council recently completed a Green Belt Review which assessed the suitability for retention of all areas of Green Belt in the District, against the five Green Belt 'purposes' set out in the NPPF. This will be used by the Council alongside other evidence</p>

							inprogressing its Local Plan. The NPPF also allows for consideration of development proposals that would represent 'limited infilling', or in some cases redevelopment of 'brownfield' sites in the Green Belt.
PO938	Mr Chris Clark				Object	Building houses at location LE140 is undesirable, as it would permanently destroy the rural aspect of Mount Road (used on a daily basis by walkers, etc). Whilst the need for a school extension may, at some time, be necessary, this is the wrong location for housing. Kniveden Lane is virtually a no-through-road, as it is currently very rough at the top (Mount Road) end. This makes Kniveden Lane very safe for the children and elderly people who live there. A substantial housing development here would open up Kniveden Lane to through traffic, also creating a "rat-run" for other traffic trying to bypass known bottlenecks.	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO675 about educational requirements • See para response to PO91 about highways
PO1573 PO1578	Mrs S Chauveau Mr PJ Chauveau				Object	I wish to firmly object to any housing development on the mount. It is a beauty spot, Leek's gateway into the open country side and has been popular with walkers, joggers, cyclist and horse riding for generations and should be protected for future generations. I strongly recommend further consideration be given to the developing the empty mills, brownfield Sites and making use of the many vacant homes in the Moorlands before surrendering our precious Greenfields to hungry developers	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO675 on housing needs evidence • See para response to PO91 about Leek housing requirements and windfall allowance

PO1676	Mr Price				Object	I am writing to protest against the latest version of the site allocation plan for the SMDC. The site references of particular interest are: LE022, LE127, LE128a, LE140, LE142A, LE142B. The grounds for that are:	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO1351 about streetlighting • See para response to PO675 about educational requirements • See para response to PO680 about public rights of way • See para response to PO675 about design policies • See para response to PO91 about highways <p>The Council is undertaking Local Plan viability work which will consider the viability of preferred option sites.</p>
PO1682	Mr N A Brundrett						
PO1652	Mrs G Webster					Loss of important local amenity – The Mount is a very important open space close to the town.	
PO1646	Mrs J Lownds					Visual impact – restrict important skyline and further afield. The proposed sites are near or run on particularly at night with street lighting.	
PO1641	Mr W Johnson					Impact for infrastructure – primary schools in particular (Leek 1 st school and Beresford Memorial School) will struggle to keep up demand and the situation where some children already have to school in the west of leek will become more common. Mount Road is a route of Staffordshire Moorlands Walk a very popular route for Leisure activities such as running, cycling and walking.	
PO1670	Mr S Panek						
PO1663	Mr A Panek						
PO1658	Miss J Panek						
PO4769	Mrs A Lomas					High quality Landscape – unsympathetic to landscape and the character and quality of the area. Urbanisation of the country lane that is mount road – if all 6 developments proceed then the 500 houses would be constructed. Mount Road would be linking the Ashbourne and Buxton Roads. The spatial distribution of the proposed access sites across leek is unbalance – there will not be sufficient demand to build all of these houses on one side of the town so the council will not meet its housing needs in any event. The Mount is, and has been a great source of pleasure for many people over years. It needs to stay that way in order that the future generations have as much enjoyment out of this as our generation has.	
PO4753	Miss L Whitehurst						

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1687	Mr David Morgan				Object	I am writing to express my strong objection to the proposal to build houses on the Mount. I specifically object to the building of houses on sites: LE022, LE127, LE128a, LE140, LE142A, LE142B. When I first heard about the proposal to build in this area. I was genuinely shocked and still cannot believe that the proposal have been submitted to build on such beautiful landscape which has helped to shape Leek's identity as Queen Of the Moorlands. I work in the local community and I have not heard a single resident of Leek express support for these proposals – they have expressed deep anger and concern. I live locally to the Mount and regularly take walks there and it is very clearly, a popular destination for walkers and cyclist. However, I do not feel that this is an area that is solely of Leek by those who live in its vicinity. I believe that the Mount is an area that the people of Leek genuinely cherish and it would be a tragedy if a major housing development were built along it, The Mount does provide an important amenity for local residents including Hargate estate. I feel it would be unacceptable to build houses on it, spoiling the unspoilt beauty of the area and leading to a huge increase in the traffic which would obviously cause a major hazard to walkers and cyclist. I feel it is unacceptable to deprive residents of a very built up area such as Hargate estate of the opportunity to enjoy the beautiful country side and open space that the Mount offers. If this proposal is passed then I feel that the character and identity of Leek will be very adversely affected and this will have a very detrimental impact on its image in terms of visitors and attracting business	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access • See para response to PO91 about highways • See para response to PO680 about economic benefits of housebuilding • See para response to PO675 on design policies
PO1603	Mr T A Taylor				Object	I wish to firmly object to any housing development on the Mount as I often go there cycling and walking there with my family and I think it is a very special place and would be completely spoiled by houses.	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1282	Mrs B Ward				Object	I write once again to protest against the proposed development of housing along and off mount road. We have already had 2 public enquires and each time the inspector has upheld the decision not to allow these fields to develop along mount road. This is a great amenity for the town, especially for residents this side of leek. I feel that we have been left a short stretch off mount road but with all the roads going off it Mount Road itself will probably have to be widened and will become a bi pass for traffic between Buxton Road. Walking along a country lane enjoying the views. Do people walk as much on the other side of town? Aren't there still places for the development within the town? Not touching our open spaces. Where are 600 new houses on Mount Road going to work?	<p>The Council must justify proposed land allocations which form part of its new Local Plan to planning inspector during public examination of the Local Plan. The Inspector must consider the 'soundness' of the Plan as per para 182 NPPF. Note that as part of this process the Council must demonstrate that it meets its objectively assessed development requirements for housing (and other land uses) for the District.</p> <ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO91 about highways • See para response to PO680 about Leek employment land requirements
PO1403	Mrs M Smith				Object	With regard to the proposed 400 plus houses to be built on the mount, I would like to express my concerns on the matter. I can't help but for see the problems 400 to 800 cars will create, trying to leave Mount Road to gain access to the Buxton Road. They will be queuing up! Most families these days have at least one car some have two. Mount Road was not built for such traffic	<ul style="list-style-type: none"> • See para response to PO91 about highways
PO1485	Mrs C Lane				Object	I object to any housing being built in this area. It is an area used by many people for walking etc. – many for health reasons e.g. for me. We must keep our open spaces that are in walking distance of our town, once lost – gone forever. Don't let us loose it	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1528	Mr E Weston				Object	I totally object the development of green belt land in Leek and the surrounding areas this includes the mount and elsewhere but morally wrong. It is just wrong to build on the green belt land the town can't cope now, never mind the extra traffic this would create. What are the planners thinking of even including these areas? If all councillors and planners have regard for the environment in question, they would not be included. What difference is there between Pickwood, The Mount and other green belt sites? You threw the recent planning applications out for Pickwood, what's the difference? Surely there are enough brownfield sites in Leek and the surrounding areas, plus existing housing stock for the needs of Leek, now and the future? Leek is a small market town not an extension of the city, (well not at the moment). Who decided we need all these extra houses? Am I right in saying the SMDC will be getting a hefty amount of cash for each dwelling built, from central government? As I have said before you the planners and councillors should get together and try your utmost to encourage more business and industry to come to Leek, offering them incentives of some sort. The people of Leek need work and industry to come to Leek, offering incentives of some sort. The people of Leek need work, full not parttime) and not more houses. Leek is fast becoming a dormitory town.	<ul style="list-style-type: none"> • See para response to PO1143 about western Green Belt • See para response to PO91 about highways • See para response to PO91 about option sites assessments and sustainability appraisal • See para response to PO91 about Leek housing requirements and windfall allowance <p>Planning applications are assessed against the current Development Plan including the NPPF and adopted Core Strategy Policies.</p> <ul style="list-style-type: none"> • See para response to PO675 on housing needs evidence • See para response to PO675 about new homes bonus • See para response to PO680 about Leek employment land requirements
PO1712	Mr G Carding				Object	I would like to object to the proposed housing sites on Mount Road Leek. The Mount has been a historic to the people of Leek for generations for its 360 degree panoramic views of natural beauty. Being born in Leek I have walked over the mount all my life and always enjoyed the peace and quiet surrounded by the countryside views which are irreplaceable building housing in this area would also destroy the wildlife and a result in the loss of open space. This road is unsuitable for the large volume of traffic which would be generated by all the new houses and is narrow in places with dangerous junctions at both end of the road. The roads in this part cannot take any more traffic. Please find more suitable site within the town, if we keep building out into the countryside where will the border of Leek End? Ashbourne	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO680 on ecology evidence • See para response to PO91 about open spaces and countryside access • See para response to PO91 about highways
PO1699	Mr Michael Owen				Object	My wife and I would like to tender our personal objections to any proposed house building along Mount Road Leek. We don't feel that the area has infrastructure to cope with the number of houses proposed and would spoil the landscape of a very popular and picturesque area used extensively by Leek residents	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access • See para response to PO675 about Infrastructure Delivery Plan • See para response to PO675 about educational requirements
PO1744	Mr Anthony Clark				Object	LE142b, le142a, le140, Le128a, Le022, Le127 I write to object to the proposal to all the building of houses along mount road as set	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>out in the preferred options doc. My 2 main objections are based on the implications for the environment and the traffic. Environment – For generations Mount Road has been a favourite walking/cycling/horse riding route for many residents of Leek. It is easily accessible (not requiring a car to reach it) and is quiet safe place by way which can be used by all people of all ages in all weathers. The major attraction is walkers are the outstanding vista the road provides both town and county. The proposed building at the north would destroy the turn the road into a noisy, busy thoroughfare, that would be unsafe and unpleasant for walkers and all over leisure users. The proposed housing at the southern end of the road would mean the views of the town would be lost, whilst the proposed housing at the southern end of the road would mean views of the town would be lost. At a time when all our members of society are being encouraged to take more exercise the destruction of the mount is free, natural gym, seems very short sighted. Immediate area Mount road is not a wide enough area to safely take a major increase in traffic. The existing access points to this area off Buxton Road and Ashbourne Road are adequate for the present level of traffic but are wholly inadequate and dangerous for the high volume of vehicles. If as is most likely, Kniveden Lane was upgraded at its top end to allow access by vehicles the consequences for its junction with Ashbourne Road causes minimal amount of problems. An increase in traffic will queues will lead to frustration and rash decisions by drivers. This in turn would lead to calls for the removal of the trees and the destruction of a wonderful entrance to the town. Town Residents living in the proposed housing development will need to work and shop. Where will they go to do these activities? Traffic The consequences of the traffic of building many houses both in the immediate area and the town as whole will be very marked. Work Very few work in Buxton or Ashbourne which re easily accessible from the mount. The vast majority work in the town centre, the barn field's industrial estate or on Cheadle road. Those commuting out of the town centre will be heading mostly to stoke Macclesfield/Manchester. All these people will have to drive through the town centre. One look at the map would tell anyone that the major building works to the east of leek will cause major traffic problems. If building must take place on the mount, though I doubt there is a need, the least environmentally damaging site LE142b and LE140. Is there not a possibility of the building on the site existing site of Kniveden Hall (which is screened of by trees) and the old Social Services building? These sites would be the least invasive environmentally but would still generate major traffic problems both locally and still generate a lot more traffic throughout the town. In 2006 New York took the far sighted decision to turn a disused elevated railway in a linear park (the high lane). Would that Leek had planners and leader of similar vision to develop mount road into a high lane for the benefit all off the community</p>	<p>access</p> <ul style="list-style-type: none"> • See para response to PO680 about public rights of way • See para response to PO91 about landscape evidence • See para response to PO675 on design policies • See para response to PO91 about highways • See para response to PO1351 about tree protection • See para response to PO680 about Leek employment land requirements • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO91 about option sites assessments and sustainability appraisal <p>The 2016 Landscape impact study concludes that:</p> <ul style="list-style-type: none"> - LE142B is of high landscape sensitivity and development could be visible from the peak Park, and the rural approach to Leek; - LE140 is of medium landscape sensitivity and site-specific mitigation measures including boundary landscaping, and controlled building heights, are recommended; - LE066 is of high landscape sensitivity owing to its location, despite the presence of site screening. <p>Note the findings of this study form part of a wider evidence base to support SMDC's Local Plan. Its conclusions must be weighed against other evidence.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <p>The Council's emerging local Plan already contains a policy (T2) protecting existing railway lines from development; and supporting recreational re-use etc. The Mount does not contain any such routes.</p>

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1751 PO1758 PO1773	Mr and Mrs W Lovatt Mrs J Lovatt Mr S Lovatt				Object	<p>LE069, LE143a, LE128, LE140, LE142A, LE142B. We would like to submit our comments concerning the above consultations with the specific regard to Leek East. These consultations with specific regard to Leek East and the area of Mount Road. This is a semi-rural area outside the town development boundary. One of the attractions of this area of Leek is that the boundaries for development are very closely defined. This means that within 10 minutes walk of the town centre you have access to open space, which makes the Mount area very popular for leisure activities such as walking, jogging and cycling. This is an important area when considering what opportunities there are for leisure and exercise so close to town. The fields provide a home for various types of wildlife and this together with the farm animals that graze them, provide access to a nature very close to the heart of Leek. The views from the Mount are spectacular and largely unspoilt. Any developments of any of all the listed developments of the type proposed would totally alter the area, as it has with the Buxton Road end of Mount Road. If all the development listed above were to proceed, in excess of 400 houses would be constructed on what is pleasant open countryside. The access along Ashbourne Road and Mount Road provide a road infrastructure that would be totally inadequate with the volume of traffic generated by such a development especially on the bad junction where Mount Road meets Ashbourne Road near Poplar Service Station. Access via the already existing estate off Kniveden Lane and or High View Road and Moorland Road would be impossible to sustain, given the narrow nature of the roads in question and the cars parked on either side of the roads in what is already a busy residential area. Creation of a rat run would have serious consequences. Public transport via the bus service would be totally inadequate. There are significant areas of land that would be ideal for development that are presently brown field sites within the town centre and the town development boundary. Development on these sites would not impact on local wildlife and leisure activities and would be more sustainable as they would result from an increase in traffic in outlying areas. Given the employment situation in Leek, a large proportion of these would inevitably be homes for communities for the potteries conurbation and or Macclesfield and greater Manchester. This would ruin the character and community feel of the area. Given the recent headlines concerning the lack of affordable housing in rural locations, more consideration should be given to this type of development, rather than encouraging urban sprawl which would ruin the character of this town.</p>	<p>Note that the Preferred Options do not currently include sites LE069/LE143A.</p> <ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO91 about highways <p>Leek is already served by a number of frequent or less frequent bus routes, connecting to centres such as Hanley, Cheadle, Buxton and Macclesfield. A number of these use main arterial routes such as Buxton Road/Ashbourne/Springfield Road. In some circumstances, major residential developments may be required to contribute to improved bus routes/bus facilities in accordance with Core Strategy Pol T1/Staffordshire Local Transport Plan.</p> <ul style="list-style-type: none"> • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO680 on ecology evidence • See para response to PO680 about Leek employment land requirements • See para response to PO675 about design policies <p>An element of affordable housing will be required for all major housing schemes in the District, as set out in Local Plan Policies. The Council may also require an element of starter homes, and self-build plots on such sites. The Council's housing/design policies and the NPPF expect that housing schemes provide for variation in design; and a mix of house types to meet differing socio-economic needs, including affordable housing.</p>

PO1472	Mrs G Armstrong				Object	<p>As a resident of Moorland Road since 1975, I write to you to express my concerns over the appalling plan to yet again to destroy an area of the town much loved and frequented by its residents for countless generations. I can assure you that the contents of the letter not only reflect the views of me and the residents of moorland road and Kniveden Lane but those of leek in general. The proposal to build 400 houses on the Mount came as a shock to the town. Whilst I am not opposed to the idea of providing some housing In the Leek area, I cannot equate with the requirement for the number your department are planning. As regards the location, how can you say that a beautiful location like the Mount is in need of development when there are numerous locations that in the area that are an eyesore and would be more than fit the bill for re development? If your department were to take the time too canvas the people of leek you would find that it is considered an asset to this town. The Mount is an area of outstanding rural beauty with great views across the town, supporting an abundance of wildlife whose habitat would be destroyed if the plan goes ahead. It has long been a source of relaxation, leisure, exercise, and even welcomes retreats for courting couples and families with children or people exercising their pets can be seen walking the Mount in complete safety without the fear of being subjected to danger from large numbers of cars. This would change if the whole scheme goes ahead. Is it right that future generations should be denied the pleasure their forebears derived from this beautiful road, With an average of each household owning 2 cars each the paln to build 400 residents could unleash about 800 vehicles all trying to support those numbers. Mount road would be saturated with vehicles al trying to leave either via the junction with the A523 Ashbourne Road or the A53 Buxton Road. Both roads are very busy main roads. After frustration of accessing these knock on effect would choke the town centre which struggles now at certain times to maintain a smooth flow. No doubt the un adapted and unmade section of Kniveden Lane would be upgraded encouraging it to be used as a short cut between Ashbourne Road and Buxton Road. The only thing that stops it being a rat track now is that it is unmade and has ruts and pot holes. Also of concern is that with this sort of development you re require to provide a proportion for social housing. We all know who are housed in these and what effect it has on the surrounding area. I need say no more. Can you explain why there seems determination within the planning bodies to destroy what is beautiful and precious to the people of Leek with total disregard to the preservation of the environment and wishes of the Leek populace. If they want to improve this town why don't they concentrate on some off those areas in dire need of redevelopment and of which there are many in this town. I along with the majority of the other house owners in the vicinity, share at the lack of the thought the has obviously not being thought that has gone into this project. I ask the question; have any of the councillors or those on the planning dep actually</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO675 on housing needs evidence • See para response to PO91 about landscape evidence • See para response to PO680 on ecology evidence • See para response to PO91 about highways • See para response to PO1751 about affordable housing • See para response to PO1351 about Council Assembly and statement of community involvement

						bothered to walk to location, to see for themselves what they would be destroying and ask residents for their thoughts. No, I doubt it very much if this is the case. Is it just a figure on the map to them? I understand that the majority are not from Leek and so don't really have its best interests at heart. These so-called councillors were voted in to represent the townsfolk and listen to their view. This has not obviously been thought out thoroughly and it makes me wonder what sort of people will be running the council. Is it yet again something to their advantage and not that of the town. Their priorities do not appear to be the people of Leek there to represent them. I make this representation not only on behalf of those directly affected but also the people of Leek who are totally opposed to this desecration of one of the most beautiful and well-loved areas.	
PO1523	Ms Angie Guest				Object	Detrimental impact on an important & much valued amenity area. The location provides a green space accessible to and used by the wider population of Leek for walking cycling and jogging. The mount follows part of the route of the Staffs Moorlands walk 'Leek Landscapes' managed by the SDMC and marked on the OS 1:25000 map. Described in the leaflet published by the district council as offering a walk 'through attractive farmland with interesting views over Leek. This would be compromised by the development. The panoramic views from The Mount over the skyline of Leek and countryside beyond are 2nd to none. These would be severely restricted. The scale and the unbalanced distribution of this development sites, concentrated in this part of the town will lead to increase traffic in making the mount a busy road between the Ashbourne & Buxton roads as well as loss of a rural environment outside the town's boundary.	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO680 about public rights of way • See para response to PO91 about highways
PO1560	Miss A Hampson				Object	Any development in the Mount on proposed sites will be visible from some distance, thereby impacting not just on Leek, but also the wider area. The infrastructure is inadequate I am not convinced the possibility of infill sites in Leek	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about highways • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO675 about Infrastructure Delivery Plan
PO1570	Miss L Sheldon				Object	I wish to object the proposed development on Mount Road for the following reasons: Serious damage to the natural habitat of endangered wildlife changing the entire environment forever. Increase traffic would cause major traffic issues not only cause major issues on the Mount itself but having a knock on effect on the town where congestion is already an issue. For generations the Mount has been a popular venue for walker's biker's families in general. It has provided a safe and pleasant environment and giving access to some of the finest views across Leek and Staffordshire Moorlands.	<ul style="list-style-type: none"> • See para response to PO680 on ecology evidence • See para response to PO91 about highways • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access

PO1555	Mrs G Webster				Object	I have never protested before but I feel compelled to write this letter regarding the proposed developments across the mount. When I was young I lived on Haregate Est and many times my parents took my siblings and I across the mount it was something we enjoyed seeing all the farm animal and wildlife. As I got older I would still walk the mount and dream of one day owning one of the houses which were only a couple of minutes' walk away from being in the countryside. That dream was realised in 1976. Now I am retired it is wonderful to be able to stroll round the mount each day. My husband twice a day come rain or shine, and able to do just that take in the views or have conversations with people we meet, not just from this area but from other parts of town. It is good for the soul as well as the mind. It is a marvellous asset for the town for young and old alike a great place to relax and exercise. It is a marvellous asset for the town for young and old alike a great place to relax and exercise. It is precious and should be protected for future generations 'never know what you have got till it's gone' comes to mind as was the case with what was a beautiful roundabout which stood proud at the top off Derby St. Do we need so many more houses in leek if so we do not build on the field opposite the cricket club on Macclesfield Road which would not have the catastrophic impact of hundreds of houses on the mount or why not build them on Blackshaw Moor where there is already a small estate. I hope this marvellous asset treasured by so many can be saved for the town and the people of Leek.	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO675 on housing needs evidence • See para response to PO1143 about western Green Belt <p>Blackshaw Moor is identified as a 'smaller village' in the Council's emerging Local Plan and should only attract a limited amount of additional housing within or around the built up area. Note that Anzio Camp received planning consent for erection of extra care housing, live work units, ancillary social centre and facilities building and change of use to holiday park in November 2015.</p>
PO1550	Mr P Sinclair				Object	Would like to object to the development of the 350+homes on sites across the Mount. The area is used by lots of people walkers, families with young and older children dog walkers, cyclist, runners, horse riders, all enjoying the wonderful views over the Leek, which has been enjoyed for many years. I've been coming around the mount since I moved to leek in the late 60's, building more houses will mean the loss of this lovely scenery for ever. Also the health & safety factors of all these extra cars 600-700 trying to get out at either end of the mount, onto the Ashbourne Road and Buxton Road which is already busy without adding additional traffic. Then pollution of the air	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO91 about highways • See para response to PO91 about air quality

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1536	Mrs C Whitehurst				Object	<p>I am disappointed that local objections to development along Mount Road Leek have been ignored by those who claim to represent us, and I must once again voice my objections. The Mount is one of our most beautiful and well-loved amenities for local walkers, cyclist, runners and dog walkers. A short walk from town which I personally use at least 3 times a week whenever I walk around I meet at least 10-12 others. It is also a safe route to take children of all ages to appreciate the country side, farm use and wonderful views – all of which will disappear. Many habitats for small animals and birds will go along the grass verges and lost trees, so much for our greener landscapes. Who is going to buy these obviously very expensive houses not my children who can hardly afford to rent never mind buy? But I'm sure the overspill from Macclesfield, Manchester + Buxton will appreciate these cheaper houses than they can afford there. Where will all the children go to school our local ones are full and have little or no space to expand, more Drs and Dentists will be needed. Traffic along the mount will be busy. It has already increased during times of the road closures repairs etc, and now this new short cut has been found it will continue to be used. As there are now plans in place to convert several old apartments such as old Mills in the town a large number of houses will not be needed by local people and smaller brown field sites can be found in and around Leek for a much more acceptable amount rather than such a large estate. If the £1000 per house built is so tempting why not just ask us for more council tax – I'm sure most people would be willing to pay to save this precious area for our children and grandchildren. I would. Please please listen to our objections regarding this atrocity in our wonderful town.</p>	<ul style="list-style-type: none"> • See para response to PO1351 about public consultation and Statement of Community Involvement • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO680 on ecology evidence • See para response to PO1351 about tree protection • See para response to PO1751 about affordable housing • See para response to PO680 about Leek employment land requirements • See para response to PO675 about educational requirements • See para response to PO91 about highways • See para response to PO675 about Infrastructure Delivery Plan • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO675 about new homes bonus
PO1532	Mr B Day				Object	<p>The Mount is a very important area for the town of Leek. This whole area is an important amenity area for the town – it was promised a few years ago that there will be no further development after the completion of Mountside gardens. Further developments will destroy the open views of the Morridge from the town. Some of the areas highlighted for development was gifted to the town presumably to protect them and for agricultural use. Development of the Mount will lead to greatly increased traffic on what is basically a country lane. Safety issues at both junctions. The importance of the local people who use it. Young walkers, runners, joggers, cyclist, horse riding, dog walkers. These include singles, couple. Family groups and organised walking groups aside. We urge you to look at these plans very carefully before you decide to ruin this beautiful area. Surely there are other smaller areas which could be utilized for future needs.</p>	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence <p>The Council communicates with landowners of affected sites to ensure they are available, prior to selection.</p> <ul style="list-style-type: none"> • See para response to PO91 about highways • See para response to PO91 about open spaces and countryside access • See para response to PO91 about Leek housing requirements and windfall allowance

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1490	Ms Dawn Garrett				Object	I write with reference to the planning proposals along The Mount in Leek. I moved to Leek last August, the countryside being one of the big draws. I'm dismayed to find that my favourite dog walk is earmarked for extensive development. The absolutely magnificent views would be lost forever. The birdsong drowned out by the inevitable increased traffic load. The wildflowers at the side of the road and the sheep peacefully grazing, all gone. The creeping urbanisation of such a lovely country town is a big worry. Surely it would be better environmental sense to deal with the falling-down mills and derelict housing in the town before building any further? Regeneration is a much more modern concept and would further revitalise the town itself. For me and my family access to the views, the fresh air and the wildlife is balm against our stressful and hectic working lives. I live on Ashbourne Road so this is not NIMBYism at work, it is a genuine plea to save this lovely area for everyone. Now and in the future.	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about highways • See para response to PO91 about Leek housing requirements and windfall allowance
PO1583	Mr C Chauveau				Object	I wish to firmly object to any housing development on the mount as I love to go running there with my dad and really enjoy the view into open countryside.	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence
PO1588	Mr J Jones				Object	I wish to firmly object to any housing development on the mount as I often go there cycling and walking there with my family and I think it is very special place and would be completely spoiled by houses.	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1708	Mr C Hoggarth				Object	Ref: LE127, LE128a, LE140, LE142A I am writing to you with regards to you with my objection to the proposed sites above for housing development that I consider will result in loss of countryside and a recreational amenity to local residents. My objections consist of 3 main concerns: The loss of green field sites. The enclosure of the open space that is Mount Road. The loss of recreational amenity of Mount Road through the amount of additional traffic. The areas of land in question is border Mount Road, a low traffic route with broad open views across countryside to the east over the town of Leek and beyond to its west. Mount Road well known locally for the pleasurable route for exercise it provides and is much used by local residents and visitors. Enclosure with housing development would turn an open country lane into just another urban roadway and would destroy the views reducing the attraction of the area. The associated increase in the traffic would severely reduce the safety route. I consider that the cumulative effect would be to destroy the area as a recreational amenity. Of the area surrounding the current town boundaries, I think that this is one that would constitute the greatest loss, both with respect to the beauty of the outlook and the loss of its use for recreation. Mount Road is a beautiful location; visitors jealously comment how lucky I am to have such an area on my doorstep. To destroy it would be a disgrace and I hope you will reconsider the proposals	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO91 about highways • See para response to PO91 about landscape evidence • See para response to PO680 about public rights of way
PO1717	Miss JM Botham				Object	With reference to the proposal for the mount new housing development This is and has been a delightful walk for the people of Leek for many years. The older generation will have fond and lasting memories of the courtships over the mount. We as children used it for walking and horse riding in safety to go further afield to Cheddleton Heath. We know in recent times it is an it is a popular route of the Staffordshire moorlands walk. We believe more ought to be done with the brown fields site this would clear unsightly buildings and in most cases be more convenient to the town allowing for less use of vehicles and allowing for less use of vehicles and allowing for the green areas to be maintained for leisure pursuits.	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO680 about public rights of way • See para response to PO91 about Leek housing requirements and windfall allowance

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1694	Ms K Machin				Object	I would like to object to the proposed housing sites on the mount road, leek as outlined in the preferred options site and boundaries of staffs moorlands local plans – sites LE127, LE128a, LE140, LE142A, LE142B. This area should not be built on as it will ruin the lovely views over Leek and the Horizon and has been enjoyed for generations by walker's cyclist etc, who on a nice day vastly outnumber cars on this stretch of road. This road also appears to be outside the site boundary. By building approx. 400 houses it will no longer be a country walk yet another housing est. The council should be committed to maintaining green belt land and encouraging people to get fresh air and exercise in an age increasing obesity. There are surely plenty of empty mills and brownfield or former industrial sites within the town which could be developed for housing instead of building on open fields. There is also no development proposed in the west end of leek-why not? The planners need to go back to their drawing board and identify more suitable sites across the whole leek instead of concentrating on the one unsuitable area. Please save the mount	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access • See para response to PO1143 about western Green Belt • See para response to PO91 about Leek housing requirements and windfall allowance
PO1703	Mrs J McGuinness				Object	Ref: LE127, LE128a, LE140, LE142A. As a local resident in objection to the above proposed plans For the Mount in Leek. I object to the scale of development for this beautiful country lane on the outskirts of our town. It is a area of outstanding beauty, boasting much wildlife, flora and fauna. The woodland and hedgerows are home to valued wildlife and birds. In addition there are farm animals, bats, foxes, stoats, mice all of which inhabit this area has been identified over existing brownfield sites in town. Could the planners not relax the rules and allow sites in town that have been previously been refused for development? Do we really need 400 houses? Do we really need another 1 st school, at this end of the town? I am dubious as there are as many properties in the town already for sale, unoccupied or derelict. Where are all the people coming from to buy these 400 houses? My main objection is the sheer volume of traffic. The roads are totally unsuitable to accommodate the amount of traffic that's will be generated by a school and 400 houses. This development has the potential to create at least 800 cars from the proposed housing development (average 2 cars per house hold) and even more generated from schools with staff and pupils, including the cars school buses . The lane is already suffers from many vehicles using the lane, as a rat run and this will increase. In addition to being a resident The Mount I am also a daily dog walker and I am concerned for the safety of those using the lane for leisure, i.e walker, dog walkers, joggers, mums with little ones, cyclists, horse riders and those coming to sit on the seats provided to take in the beautiful views. If development goes ahead these activities will come to an end and once again our green landscape will disappear with the town boundaries being pushed out further and further. Where will local people be able to go without getting into these cars and causing more traffic	<p>It is not considered that development of this particular site would be out of proportion with the rest of the town. Any new development taking place will be subject to design policies contained within the new Local Plan; and having regard to the Council's landscape impact evidence.</p> <ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO675 on housing needs evidence • See para response to PO675 about educational requirements • See para response to PO91 about highways • See para response to PO91 about open spaces and countryside access

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>congestion on the roads, and what about those without transport? The road junction at either end of the Mount are not without difficulties. The Buxton Road junctions is a staggered cross roads with Novi Lane and needs to be approached with caution. At school times It is used by parents/carers/school buses. I cannot imagine the chaos that will transpire if another school is permitted on the Mount – it will certainly become a lot busier and more dangerous. Do we really want to put our children at risk? Walking to and from school will not be a solution as it will be to dangerous. Let us not forget that in additions to this road junction, a short distance down the same road Churnet View transport comes onto the Buxton Road via Abbots Road, and Leek High/The Meadows/East St 1 st School all feed into and use Buxton Road via Springfield Road. Each school has buses/taxis and cars transporting pupils and the volume using the roads at the same time of day has potential to cause bottle necks on this busy main road. Another school shall mean 7 school all using the same road – local residents will have to keep of the road to the volume of traffic down. The other end of the mount leads to Ashbourne road and this junction not only has obscured visual access but a difficult angled junction. Surely this is totally unsuitable to transport large volumes of traffic which will be generated from 400 houses and a school! If a alternative junction is proposed this can only be achieved by sacrificing another green field. The Mount, Ashbourne Road are all used by big lorries, buses, tractors, trailers, farm stock to and from stock market, farm machinery, lorries transporting goods to and from Buxton, Ashbourne, and Surrounding areas. These are very busy roads! Can we really add to this without causing major problems? I urge the council to consider these proposals very carefully giving due time and consideration to alternative sites in town, because once the boxes are ticked it will be irreversible and the mount will be changed forever.</p>	
PO2584	Consultation Service	Natural England			General comment	<p>Natural England notes the proposed preferred site for allocation in Leek. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.</p>	<p>The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the</p>

							NPPF and the Council will seek to facilitate improvements to these areas where required.
PO2908	James Chadwick	Staffordshire County Council			General comment	The allocations proposed around Mount Road will necessitate highway improvements for example road widening, provision of footways, completing Kniveden Lane to adoptable standard, possible (probable) junction improvements at one or both ends. The removal of the sites between LE127 and LE128a could make the delivery of the required scheme more complicated and therefore requires further consideration including the reinstatement of sites LE069 & LE128b.	<p>Comments noted. See para response to PO91 about highways.</p> <p>The emerging Local Plan sets out how the residual housing requirement for Leek will be achieved by a combination of allocations within the urban area, and along the Mount (making allowance for windfall/small sites allowances). Additional housing sites along the Mount are not required.</p> <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p>
PO3656	Mr P Ash				Object	<p>My husband and I most strongly oppose the number of sites on Mount Road, Leek as preferred option for new homes. Both of us have lived in Leek all our lives and for the past 50 years have resided on the Moorland Road. Mount Road is acknowledged as an area of open space for walking, cycling, and jogging and it is a area of free from volumes of traffic? I know my mother exercised, pushing me in my pram walking round the Mount. Building houses either side of the road would most likely make the Mount Road into a main road linking Ashbourne Road to Buxton Road. This road is not sustainable not wide enough to take heavy vehicles and constant stream of Traffic, if numerous houses were to be built either side for Health and Safety reason would require pavements, gutters and drainage all of which will narrow, the width of the road for vehicles, in all probability each house will have 2 cars, which again will increase the flow of traffic. To surface the top of Kniveden lane would make this road a rat race and a highway leading to an increase of even more traffic may I remind the council that when the developers applied for planning permission to build homes on the land behind sunny view at the end of Ashbourne Road – grave concern was exposed by Staffordshire County Council of traffic from the houses converging onto a busy main road, would that not also apply to traffic from the houses converging onto 2 main roads – Ashbourne road,, and at the other end of Buxton road. I would like to draw your attention to the fact when Mr William Milnes gave the land he owned to the council, land where now stands Leek High School, and is playing fields which borders Kniveden Lane and extend on the Mount, there was a clause in the gift of land that this land would be only used for educational purposes. One may also ask the council “where are all families and buyers that require these houses? Leek has not the facilities to accommodate such a huge increase in its population. The Dr’s</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about highways <p>The Council is not aware of any legal encumbrances upon this site.</p> <ul style="list-style-type: none"> • See para response to PO675 on housing needs evidence • See para response to PO675 about Infrastructure Delivery Plan • See para response to PO675 about educational requirements • See para response to PO680 about Leek employment land requirements <p>The Sainsburys site as part of its mixed use consent SMD/2013/1098 still enjoys residential consent on part of the site. Note Environmental Health Officer did not object to that scheme subject to conditions. The Council would assess residential schemes on sites affected by contamination in line with its adopted Policy SD4 and NPPF paras 120-121 NPPF. The responsibility of funding remediation rests with the developer.</p>

						<p>are already working to their full capacity, which schools primary and senior have places for an increase in children of school age? And where will the new comers to the area, travelling from the Mount to Macclesfield or to the potteries will increase the flow of traffic though the centre of the town these were problems with planning permission to build house on ?? At Leek brook on the site of Joshua Wardens factory, as to the nature of the ground and the fact the earth may have become contaminated from factory work etc. These problems were overcome and rectified and houses were built. Now houses cannot build on this land surrounding Sainsbury's Supermarket because of problems with the land – if land at Leekbrook can overcome the problems with the land around Sainsbury's overcome the problem? And houses can be built on land previously occupied and accommodating buildings.</p>	<ul style="list-style-type: none"> • See para response to PO91 about Leek housing requirements and windfall allowance
PO3694	Mrs C Ryan				Object	<p>I am writing to express my objection to recently published plans to build on a large area of the Mount in Leek. Whilst understanding there is a need for some new housing, I feel this area is the wrong place and definitely too extensive. A few points I would like to share which may not take into account the professional opinion but a certainly take a common sense view. The Sainsbury's site was passed as a area for retail and business development with a to build on a small housing estate. This has not been fully developed and I understand it may because there are issues with asbestos and or some other contamination. Yet it seems it is fit for a pub selling food, a children's party play area and a supermarket selling some other consumable goods. If it is the case that there have been some bad decisions made around this site, the council officers responsible for passing this plan should own up and ensure this site is cleaned up. Enabling the plans many locals objected to, be completed. Of course this will mean a cost to the taxpayers whom are left carrying the financial burden of bad decisions made. I have no objection Education Land boarding Mount Road being to extend or build a primary school as have a shortage of places, the concern would be of increased traffic and the requirement for good provision of off road parking at the school if there were to be an entrance on that road. There is a site on the Buxton road Blackshaw Moor which has stood unused for many years since the Army ceased training there. It must have drainage, electrics and water on this site. This would be ideal for a small scale affordable housing site. It would also benefit the local school which has a small numbers of pupils and probably in danger of being closed in years to come Transport should not be a issue because there some buses to Buxton and local bus companies can benefit by providing peak time services. There must be other sites within Leek area suitable for developing. I tried to locate brownfield site on SMDC website but it shows many wordy documents but nothing is clearly stating where these sites lie. This could be my ineptitude but there could be more clarity for the lay person on these issues Building in such a large scale on The Mount would devalue housing already there.</p>	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO3656 about Sainsburys consent • See para response to PO675 about educational requirements • See para response to PO91 about highways • See para response to PO1555 about Anzio Camp • See para response to PO91 about Leek housing requirements and windfall allowance • Property values are not considered material in planning law. • See para response to PO1751 about affordable housing • See para response to PO675 on housing needs evidence

						<p>This may be viewed as a narrow minded but many people have worked hard and taken out huge loans to secure their desired homes. To effect there in such a drastic way I think is unfair and unnecessary. Most of the housing is currently at the higher end of the market and build social or low cost housing amongst this could be problematic from all prospective. If housing is built at the current level at these sites then who shall benefit those on low paid jobs, where I understand the most need is there are many units built as affordable part share homes unsold and many more privately owned sites of apartments etc. standing empty in Leek.</p>	
PO3642	Mr and Mrs Jones				Object	<p>We would like to formally submit our comment concerning the above consultation with specific regard to Leek East LE127, LE069, LE128, LE066, LE142a and LE142b. These consultations relate to Leek East and the area of Mount Road. This semi-rural area outside the town development boundary. One of its attractions of this area of Leek is that the boundaries for development are very closely defined. This means that within 10 minutes' walk of the town centre you have access to open space, which makes the Mount area very popular for leisure activities such as walking, jogging and cycling. This is important when considering what opportunities there are for leisure and exercise so close to town. The fields provide a home for various types of wildlife and this, together with the farm animals that graze them, provide access to nature very close to the heart of Leek. The combination of these two aspects make an early morning walk or late evening jog across Mount a uplifting and almost spiritual experience. The views from the Mount over Leek are spectacular and are largely unspoilt. Any development of the type and proposed would totally alter the character of the area, as it has with Buxton road end of the Mount. If all of the developments listed above were to proceed in excess of 400 houses would be constructed on what is pleasant open countryside. The access along Ashbourne Road and Mount Road provide a road infrastructure that would be totally inadequate with the volume of traffic generated by such a development, especially on the bad junction where Mount Road meets Ashbourne Rad, given the development has taken place from an old development that has already taken place on an old Quarry site and the proposed development on the other side of Ashbourne Road, near to the Poplar Service station, access via the already existing estate off either Kniveden Lane and or High View Road and or Moorland Road would be impossible to sustain, given the narrow nature of roads in question are busy residential area. Creation of a rat run would have serious safety consequences. Public transport via the bus service would be totally inadequate. There are significant areas of land which would be ideal for the development that are presently brown field sites within the town centre and the town development boundary. Development of these sites would not impact on local wildlife and leisure activities, and would be more sustainable as they would not involve significant damage to the environment that would result from an increase of traffic outlying</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO675 on design policies • See para response to PO91 about landscape evidence • See para response to PO91 about highways • See para response to PO1751 about bus routes • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO680 on ecology evidence • See para response to PO675 about Infrastructure Delivery Plan • See para response to PO675 on housing needs evidence • See para response to PO1751 about affordable housing <p>It is standard practice for residential schemes which generate a requirement for 'local needs' affordable housing to have future occupation of those dwellings controlled via legal agreement linked to conditions upon the planning consent.</p> <p>Planning applications are assessed against the current Development Plan including the NPPF and adopted Core Strategy Policies.</p> <p>Note site LE069 is not included as an allocation in the Local Plan.</p>

						<p>areas. Given the department from Leek of major employers such as the Britannia Building Society, a large proportion of these houses would inevitably be home for commuters from the potteries conurbation and or Macclesfield and greater Manchester. This would totally ruin the character and community feeling of the area, and further issues in relation to the sustainable investment in local infrastructure. Planning conditions stating that the occupiers should have a connection with the local area have repeatedly been shown to be unenforceable in the contexts of the urban development. There have been applications for planning permission relating to these areas before, most notably, in 2007. This was refused on appeal, given the strength of feeling within the local community against this development. Any temptation to alter the town development boundary to facilitate these proposals should be resisted as there is no proven case that the type or amount of development proposed is justifiable. Given in the recent headlines concerning the lack of affordable houses in rural locations, more consideration should be given to this type of development, rather than encouraging urban sprawl which would ruin the character of the town.</p>	
PO4725	Mr D And L Robinson				Object	<p>I am writing to protest against the latest site allocation plan for the SMDC. To build upwards of 4000 house in our beautiful area is criminal. It is obvious a Central Government ploy, of threats, then offer of £1000.00/house has worked. For the SMDC to deny the £1000 donation has no bearing on the decision is pure fantasy. The area most concerned is to myself is the site allocated off Mount Road, Leek. At present most of the estates west of Mount Road are below the crest of the Mount, the proposed sites in places near or near to the crest, which will make them highly visible over a large area, particularly at night with street lighting. The site ref LE127 is of particular interest to me, it is obvious access to the site will be through the south end of High View Road with services readily available. If we are building approx. 100 houses on LE127, we can expect a large increase in traffic along High View Road and Moorland Road. Sites ref: LE066 & LE128 will be close proximity to a 35mtr high wind turbine and the plans already approved, which is highly undesirable. The building off 800 houses mainly on the eastern flank of the Town does not seem logical. There must be other sites in the Southern and Western flank of Leek which could be exploited; the advantage of this would be to reduce the great impact on schools & amenities in the Mount catchment area. Other problems concern electrical supply, gas supply, water supply sewage disposal, which can create serious problems due to the massive local increase in demand.</p>	<ul style="list-style-type: none"> • See para response to PO675 about new homes bonus • See para response to PO91 about landscape evidence • See para response to PO1351 about streetlighting • See para response to PO1351 about public consultation and Statement of Community Involvement • See para response to PO91 about highways <p>Note that vehicular access to LE127 is anticipated off Mount Road; SCC Highways response was predicated on this (not High View Road).</p> <p>The Council would assess residential schemes in proximity to approved wind turbines in accordance with Core Strategy and NPPF amenity Policies, and ETSU (as amended) noise criteria etc.</p> <ul style="list-style-type: none"> • See para response to PO91 about option sites assessments and sustainability appraisal • See para response to PO1143 about western Green Belt • See para response to PO675

							about Infrastructure Delivery Plan <ul style="list-style-type: none"> • See para response to PO675 about educational requirements • See para response in PO701 about utilities and flood risk
PO4697	Mr And Mrs C and P Deighton				Object	<p>We are writing to register our very deep concern about the proposal to build on the land at the Mount in Leek. Those involved in the making such decisions do not all live in Leek and probably unaware of the enormous importance of The Mount to the people living around it in Leek. The implications of losing this much loved countryside walk are very serious, and far reaching. The close proximity of The Mount to the homes of so many local people means that it is a place used regularly, often daily, for exercise and relaxation, and is vital to their health and mental well-being. A large number of local residents are elderly, and often unable to drive: there are young families who cannot afford a car: there are several care homes that residents come for walks with their careers. What make The Mount so important is that it is so very close to people. It offers beautiful views across the fields and means that people, who cannot get out into the countryside further away, can still enjoy seeing the birds and animals here only just a small walk from where they live. People walking their dogs have a natural means of contact and conversation with others – so important especially for those who live alone. To sum up, we all be deeply distressed to lose this place. So many have been walking there all through their lives, the disruption, and seeing the gradual destruction of a cherished part of their lives will bring an increased sense of isolation, and the feeling of depression faced by those in their later years as they become less able to things without outside help. Having the ability to step outside and walk in open surroundings without having to ask for a lift means a lot to someone struggling to retain their independence and enjoyment for life. To build on The Mount is clearly not necessary. There are as we have all been made aware recently, many alterations for example: various Brown Field sites empty buildings such as factories and offices: disused mills, empty houses apparently unoccupied for long periods. In view of the very unpopular bad decisions made, and the continuing loss of trust in the judgement made and continuing loss of and motives, of the planning department many now suspect that the decisions are influenced mainly by financial incentives from Government or other sources. We do not know whether this is true, but it seems obvious to us that a prompt decision to abandon the idea of building The Mount would bring peace of mind to many Leek Residents and go a long way to restoring the publics belief that members of the Planning Department actually do care about, and will respond to, consider and respect the views, the well-being and even the happiness, of the town they responsible for looking after, both now and the future.</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO675 on housing needs evidence • See para response to PO675 about new homes bonus

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO3936	Mr Mike O'Brien	WYG			Object	[Refer to submitted Representations Report attached to Question 1] which states: The proposed urban extension to the east of the town...- LE127(100), LE128a(47), LE140(63), LE142a(140) and LE142b(40). The proposed extension also accommodates draft reserve sites LE069(42), LE128b(48) and LE066(50). These sites contribute a significant proportion of the proposed housing for Leek. The allocation of these sites, ahead of available brownfield/previously developed sites, is not in compliance Policy SS5a of the Core Strategy, which sets out the overarching strategy for development in Leek. ...None of the proposed allocations are considered likely to come forward in the short term based on the findings set out in the SHLAA (2015). However, we suggest that the allocation of sites which are deliverable within the short term should have been considered to a greater extent in formulating the preferred options due to the significant shortfall of housing delivery across the district. WYG consider that sites in Leek, such as LE243, are suitable to contribute to the short term delivery of housing in Staffordshire Moorlands. Furthermore, the spatial distribution of the draft potential allocations weighs heavily on this eastern stretch of agricultural land and it is noted that no potential allocations have been selected within the core urban area.	<ul style="list-style-type: none"> Refer to Council response to PO3934 under LE127 table Question 10 <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p>
PO4827	Mrs L Scragg				Object	I would like for to make it known that I oppose the above on numerous grounds. The Mount in Leek has always been somewhere for the people of Leek to walk, cycle, jog, ride around not just people up end of the Town but people from all areas, young and old and in-between. The views, the Countryside is there for all to enjoy and appreciate, and we do. The road is not big enough now for all the extra traffic that is using it never mind more homes and a school. The Government wants to be healthier, do more exercise, get out and move, where will the joggers, cyclist go? If you sat up there for 24hours you would understand how used The Mount is used for recreation, pleasure and socializing, it's a free beautiful gymnasium – its where the children go to see their 1 st lamb or donkey walkers go to remember their youth and reflect on their lives, it's a place that puts lives into prospective and brings the troubled some peace. Please let we and our children's children keep the mount	<ul style="list-style-type: none"> See para response to PO91 about open spaces and countryside access See para response to PO91 about highways

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO4706	Mr and Mrs A & N Waterhouse				Object	Building 400+ houses on the area known by everyone as The Mount and used by countless generations as a gate way to the countryside would be against everything that "localism" would bring. The enclosed petition goes some way to demonstrate the strength of feeling that there is against the proposed building plots as set out in the Local Plan. The area is mainly agricultural and offers amazing views of the town and it's unrivalled and area as a whole acts as a buffer, between the town and the Peak District National Park. The road itself could not cope with the estimated 600 to 800 extra houses would generate. The Mount is a narrow road with no footpaths and junctions at either end of The Mount would become even more dangerous. Historically people travelling out of Leek to work, use the Stoke-on-Trent and Macclesfield Road with few travelling to Buxton or Ashbourne. This would mean that the roads in Leek Town Centre would become even more congested at peak times as these people make their way through town. We urge the Council to think again and produce alternative sites for houses thereby saving this precious area for future generations to enjoy.	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO91 about highways • See para response to PO680 about Leek employment land requirements
PO5883	Ms Linda M Beighton				Object	While objecting to major development destroying the amenity of Mount Road. I would like to support site LE140 as potential housing site. I would also like to suggest that the land on the Macclesfield Road be considered – between High Up Lane and the cricket ground entrance. While this lovely entrance to Leek it would appear to be more appropriate to have people housed here nearer places of likely employment and avoiding daily congestion of traveling through the town from sites on the east.	<p>Support for inclusion of LE140 noted.</p> <ul style="list-style-type: none"> • See para response to PO1143 about western Green Belt • See para response to PO680 about Leek employment land requirements
PO9101	Ms S Naisbett				Object	I am writing to strongly object to the councils draft plan to build on the following area along Mount Road in Leek, Reference number LE127a; LE128a; LE140 There are many other brown field sites in Leek such as Foker Grange and Home Farm that are available for development, and where houses could be built. Surely these sites should be used first for any planned housing development. The area along Mount Road should remain as it is. Beautiful open green fields. There should be no need to build further homes in the green belt of Leek when there are approximately 1,170 homes that are currently empty in the Staffordshire Moorlands, and an additional 2500 homes for sale. Leek is a Market Town, and this is its great appeal to the people who live here, and also to those who travel to the town to shop, as well as tourists who come to visit. If the town keeps growing due to more and more houses being built, it will no longer be an attractive historic market town, it will become a very large town centered around housing, and if the building continues year on year it will eventually result in Leek becoming a modern day city. Mount Road is a wonderful area of natural beauty that is also very educational for young children. My daughter and I often walk along Mount Road because she likes to be surrounded by the green open fields and	<ul style="list-style-type: none"> • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO1143 about western Green Belt • See para response to PO675 on housing needs evidence • See para response to PO91 about landscape evidence • See para response to PO675 on design policies • See para response to PO91 about open spaces and countryside access • See para response to PO91 about highways • See para response to PO91 about air quality • See para response to PO680 on ecology evidence • See para response to PO1751

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>the nature it holds. She loves seeing and learning about the different types of wild flowers, butterflies, wildlife and farm animals we see in the fields along Mount Road. If houses were built on Reference number LE127a; LE128a; LE140 there would be nowhere locally for children who live in the area to experience this kind of nature and wildlife. Mount Road is also an extremely popular place for walkers, joggers, and cyclists, because it is currently a very quiet area, (has low noise pollution), and also has few vehicles currently passing through it, hence is an area with low levels of air pollution. The green open spaces make it a very relaxing area, with wonderful views. If 380 houses were to be built in the area, it is estimated that over 750 more cars will be travelling along Mount Road on a daily basis, causing high levels of noise pollution and high levels of air pollution to the area. Thus making it a noisy, unhealthy, stressful area to walk, jog etc. This could lead to less people in the area going for walks etc/carrying out physical exercise. This goes against government efforts encourage people to be active and get fitter in order to fight against illness and obesity, e.g fit for life, and yet the Council is planning to build on a green field area which is ridiculous. Wildlife will be lost if houses are built on Mount road. My friends and I have seen wide variety of wild animals in the fields along Mount Road including wild rabbits, hedgehogs, badgers and buzzards. These areas of wildlife would be lost if houses were built here. The roads in the town are extremely busy with traffic. This makes them unsafe for young children to ride their bikes and scooters along. Mount Road is located on the very edge of town, and due to the current low traffic levels of traffic, this makes it an ideal area for children to safely ride their scooters and bikes. If 380 houses were built along Mount Road the road would become extremely busy with traffic making it another road which is not safe for young children to ride their bicycles. Question why don't disused buildings in Leek such as old mills be converted to affordable housing for young people, instead of allowing of 3, 4 or five bedroom luxury homes to be built along Mount Road- which is what developers will build along areas LE127a; LE128a; LE140. An example of this are the houses built relatively recently by Amos Group on land adjacent to Mount Road which were priced at over £230,000 each. All of the above reasons clearly show why the area along Mount Road Reference number should not be built on.</p>	<p>about affordable housing</p> <ul style="list-style-type: none"> • See para response to PO91 about heritage impact considerations <p>The Council maintains a database of housing site suggestions (SHLAA). This database formed the basis of the 2015 'Site Options' consultation as all SHLAA sites above a minimum size threshold, and attracting a 'B' deliverability rating, were included in that consultation. Subsequently 2016 'Preferred Options' were narrowed down from this. Note that Home Farm LE138 attracted a 'C' deliverability rating.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p>
PO9145	Mr Ramon West				Object	<p>We wish to object to the 4 preferred housing allocation sites on the Mount, Leek. It would be an outrage to proceed with residential development on any of these sites: LE127, LE128a, LE140 and LE142a. The Council must take into consideration: Loss of local amenity - the Mount is a popular amenity enjoyed and cherished by walkers, joggers, cyclists, nature-lovers and dog-walkers. There is no comparable open countryside leisure amenity so close to the town centre. There is no comparable alternative within easy walking distance on the east side of town. Loss of such amenity would have an adverse effect on the health</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO675 on

						<p>and wellbeing of a great many local people. Visual impact - the Mount is a classic example of outstanding moorland scenery. It provides unique and wonderful views over the town and beyond. Leek prides itself, and markets itself, as the Queen of the Moorlands. If this is to mean anything, the Council must do everything it can to halt the expansion of the town into the surrounding countryside and work to preserve the proximity and integrity of some of our finest moorlands scenery. Impact on infrastructure - hundreds of new houses will bring thousands of people. Nearby schools and GP surgeries will be put under further strain. Council services, social services and emergency services are already all under great strain. Traffic problems will be made worse. The future - the population of Leek is predicted to rise by a few thousand over the next couple of decades or so. This is mainly due to an ageing population. We are living longer. That means more of the people who are living here now will still be around in 20 or 30 years time. Therefore, planning for the future should be focused on local services for local people. We hope that the Council will heed our objections and explore alternative approaches to housing needs and development in our town. In particular, we wish to draw your attention to the 'Bimby Housing Toolkit' which was drawn up by the Prince's Foundation for Building Community (bimby.org.uk).</p>	<p>Infrastructure Delivery Plan</p> <ul style="list-style-type: none"> • See para response to PO675 about educational requirements • See para response to PO91 about highways • See para response to PO1751 about affordable housing <p>The Council's own housing need assessments are set out in its evidence base on the website. Note these assess the needs of 'older people' and other groups. The June 2014 SHMA concluded the number and proportion of older person households is expected to increase in the District over the period to 2031 (46% increase between 2011 and 2031) which has implications such as increased demand for both specialist/extra-care accommodation for older people, and for adaptable homes. Owing to an ageing population and other factors, the need for smaller units will in future exceed the need for larger, family units. For these reasons the SHMA recommends that 60% of future housing should be 1- or 2-bed. The Council's current Core Strategy Policies expect larger housing schemes to provide for a mix of housing across all locations, to respond to identified local needs such as housing for older people. Note that where there is a policy requirement for affordable housing provision upon such sites, the nature of provision may reflect the above.</p> <p>The BIMBY toolkit is noted. The Council will continue to work with communities seeking to introduce (or influence the preparation of) Neighbourhood Plans, in accordance with the Neighbourhood Planning Regulations.</p>

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9104	Mr Robert McGuinness				Object	Email with representation form [attached] objecting to Preferred Options sites LE127/LE128A/LE140/LE142A and 'School Site' [presumed LE140] alongside 2015 'Options' sites LE066/LE069/LE128B with the following text: Overdevelopment, traffic congestion issues, inadequate infrastructure, inadequate road network. Brownfield sites and redundant mills should be brought into use first.	<ul style="list-style-type: none"> • See para response to PO1703 about scale of development • See para response to PO91 about highways • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO91 about Leek housing requirements and windfall allowance <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p> <p>Note site LE069 is not included as allocations in the Local Plan.</p>
PO9089	Ms Sarah Griffiths				Object	I am objecting to the planning of new housing at Mount rd, Leek. The area is enjoyed by young and old alike for generations. We do not need new housing in this peaceful wonderful area. [2015 Options consultation representation also submitted with email].	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about Leek housing requirements and windfall allowance
PO9064	Mrs Suzanne Dimmick				Object	I am writing to put forward my opposition to the building of houses on Mount Road in Leek. It upsets me greatly to think that an important local amenity could be lost forever if these proposals go ahead. "The Mount" as we fondly know it, is a valuable asset to the East side of Leek, a wonderful place to take our families for walks and bike rides. In our busy lives, it is vital for our health, both mental and physical to have somewhere to go to relax and unwind. What better place than a walk along the Mount with views over Bradnop and Morridge, so accessible from our homes. If the fields in the planning proposals-LE127, LE128, LE140 and most worryingly on the opposite side LE142 were to be built on then the landscape of our beautiful town will be lost forever. For those arriving in to Leek from Ashbourne Road, they would be met with yet another sprawling housing estate, replacing the picturesque fields full of animals that are so welcoming to see. The road will become a main thoroughfare from the Ashbourne Road to Buxton Road and will lose its charm for us all. Lets protect the gateway to LEEK for generations to come. SAVE THE MOUNT.	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO91 about highways

PO9059	Mr Terence Gee				Object	I wish to object to the proposal to build housing on sites LE127,LE128,LE140,LE142a on mount road. This is a green field site with a rural road with unspoilt views only five minutes walk from Pick wood avenue. This road is used regularly by myself and often meet other walkers, cyclists in the area. Also the road would have extra traffic for 500 houses with poor access. There would be increased pressure on local schools,doctors,etc and I feel it would spoil the area with increased urbanisation.	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO91 about highways • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO675 about educational requirements
PO9072	Mr Stewart Johnson				Object	<p>I am writing to protest against the proposed plans to build 4000 houses in the Leek area:-</p> <ol style="list-style-type: none"> 1, question how many unoccupied properties are there in the area 2, Loss of beautiful countryside. 3, Work vacancies in the local area. 4, Local infrastructure . 5, Places at local schools. <p>The list is just a few of the considerations the planners seem to be ignoring. Of particular concern is the proposed development along Mount Road. Not only would this destroy a beautiful part of the town used by many residents,it would also cause serious traffic problems both in the immediate vicinity and the rest of the town. These new residents would have to commute,and the main routes would be right through the centre of town adding to an already serious congestion problem. Why do the planners want to destroy the treasure that is The Queen of the Moorlands!</p>	<ul style="list-style-type: none"> • See para response to PO675 on housing needs evidence • See para response to PO91 about landscape evidence • See para response to PO680 about Leek employment land requirements • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO675 about educational requirements • See para response to PO91 about open spaces and countryside access • See para response to PO91 about highways
PO9080	Mr Simon Tansley				Object	I am registering my objection to the leek plan proposals for building anywhere along the mount (le 142a,b,140,128a,022,127. To destroy this public amenity would be an outrageous and nigh on irreparable act of vandalism. Any one who is even considering this to be a way forwards for leek town should walk from ashbourne road to buxton road to see precisely what we would lose in terms of beauty and nature. This is an asset that Leek should be celebrating not destroying.	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
<p>PO9095</p> <p>PO9315</p> <p>PO9406</p>	<p>Ms Sarah Bishop</p> <p>Ms Emily Hodgkinson</p> <p>Ms and Mr Carla and Anthony Hodgkinson and Bury</p>				<p>Object</p>	<p>I would like to register my opposition to the plans for development along The Mount. I was born and raised in Leek as are all my family. I remember being dragged "round the mount" as a child and hated every minute of it. I left Leek in 1986 to pursue my career in nursing and I still return to Leek every weekend and Public Holiday. As an adult, I love going round the mount! I appreciate the openness, the air and the local views. I know it is valued by many local people for similar reasons. It is a wonderful asset to Leek which cannot be found elsewhere. In this age of government encouraging activity and reduction of population obesity, I can walk my dog, savour the views and see nature on the doorstep. Something to be encouraged and supported. Leek is very lucky indeed to have such a wonderful asset as part of its town and councillors would be well advised to recognise its importance to their locality. If councillors wish to see houses, roads and urbanisation as part of their tenure, I suggest they visit "The Potteries" or move to the nearest loss of urban space to understand the impact of building for the short term gain. I live still in the city I came to all those years ago. Back then, it was a new city with limits. Now, every route I can take from the centre is urbanised and each area is stuck "in its time" as architecture and design move on creating areas of decline and disrepair bringing new problems with the passing of time. For the love of Leek and its title of "Queen of the Staffordshire Moorlands" , Councillors need to appreciate what qualities give Leek that title and do their utmost to maintain them. Councillors have the opportunity to do the right thing for the future of Leek, not to bring in a fast buck for a short term gain. I hope the people of Leek are listened to when they say "Save The Mount"!</p> <p>As well as the benefits to Leek having such a widely used and accessible area, one should consider the risks and very real hazards to creating such estates in a position where traffic flow, at both access points to the Mount, is at best, difficult. On exiting Mount Road, on to Ashbourne Road and Buxton Road, there is extremely limited vision in both directions. Whilst currently the traffic flow is steady, and reasonably quiet, my concerns lie with the difficulties which will only grow with increased cars, placing those increased pedestrians walking to the proposed development, at a genuine risk. I am not against the development of affordable housing; what I am against is the travesty of those decisions, by councillors which we elect, to take green belt land, before brown belt land, for potential profit, before the views of their constituency and the future of generations to come. I understand that I am far from alone in my views- I feel they should be taken in to deep consideration before this gem in the town is lost forever.</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO675 about new homes bonus • See para response to PO91 about highways • See para response to PO1143 about western Green Belt • See para response to PO1351 about public consultation and the Statement of Community Involvement • See para response to PO91 about Leek housing requirements and windfall allowance

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9118 PO9230	Mr Robert Barker MRS Karen Barker				Object	<p>I do not believe that it is necessary to extend the town boundary into farmland as there are still many available brownfield sites within the locality. It is also important to note that TOURISM is a significant driver to the local Economy! Therefore the Town Gateway, especially from the PEAK PARK Buxton Road A53, needs rigorous protection from urban sprawl in order to maintain the 'Queen of The Moorlands' identity. The point of entry into Leek from A53 Buxton Road is the most attractive and picturesque and is a key Tourist route. It is also a highly utilised public amenity for local residents of Leek who very regularly make use of the whole area incorporating the A53 towards Tittesworth Reservoir/Blackshaw Moor, along Thorncliffe Road and its' adjoining lanes, and The Mount Road, as a place to exercise by walking, rambling, cycling, horseriding, dog-walking, sightseeing, picnicing, and general enjoyment for health and wellbeing. The proposal area, particularly as it approaches the A53 Buxton Road junction with Thorncliffe Road and The Mount, is immediately adjacent to the SPECIAL LANDSCAPE AREA which presumes against intrusive developments in order to protect its Historic Landscape nature. I would personally feel that the Special Landscape Area and environs ought to receive the highest priority in its protection. The designation encompasses the fact that it is 'Special' in nature and cannot therefore be replaced once lost or damaged. There are a number of 'brown' sites within the town which could be very effectively used for housing development. [Question why] these are not shown on the accompanying Consultation Maps. However from attending a consultation meeting the existence of several sites is a matter of common knowledge along with the fact that these would be "The Preferred Option Housing Sites" in the view of the residents of Leek. There are also pockets of greenbelt land (designated such primarily for the purposes of town separation and quite often having no other particular beauty or amenity), which in common with other Towns in the country could be effectively utilised to expand the town boundary with selective use and sensitivity to the environment. This would be better than destroying the areas which are highly valued by the Leek Community for beauty and recreation and which give the Town of Leek its identity. The proposal to build almost 400 houses off the junction of the A53 as it joins Thorncliffe Road and The Mount Road is a Major Intrusion into the public amenity and is unsupported in terms of the additional infrastructure requiring a need for development of roads, sewers, schools etc.. It would put a major strain onto the area and have significantly adverse effects on the locality. The proposal is completely unbalanced as it places virtually all the "housing requirement"[queries this as unjustified] along 1 narrow lane at the most Flagship side of Leek renowned for its visual beauty and recreational amenity. Please utilise the "brown sites" and protect Leek's Heritage and inheritance!</p>	<ul style="list-style-type: none"> • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO675 about design policies <p>Green Belt is a long established designation that serves a number of important functions in separating settlements, and preserving 'openness'. Whilst Councils can allocate/make boundary amendments within the Green Belt, National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). Note that landscape quality/character, and public access characteristics, are not in themselves 'purposes' of Green Belt laid out in national guidance. The NPPF allows for consideration of development proposals upon 'brownfield' Green Belt sites.</p> <ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access • Note that since adoption of the 2014 Core Strategy, there is no longer a 'special landscape area' designation. • See para response to PO91 about highways • See para response to PO680 about Leek employment land requirements • See para response to PO675 about new homes bonus • See para response to PO675 on housing needs evidence • See para response to PO91 about heritage impact considerations • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO675 about educational requirements

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9132	Mr Richard Harding				Object	<p>It is shocking to think that a much valued area of Leek, enjoyed by many thousands of people each year that gives stunning views over many hundreds of acres of Moorland, is a valued place for recreation by the people to walk, hike, cycle, enjoy or just to rest with the freedom of a tranquil setting over the land of the Moorlands will be destroyed forever and what for, the offer of cash to the Council for each new house to be built to be spent by the Council that we all know will be wasted in ways only Councils inimitably can do whilst the result will be a beauty spot for Leek people will be destroyed forever. The Council can sit back and think the money was worth it yet they sit in splendid isolation allowing the areas they are elected to protect be destroyed. I wonder how the local and Staffs Council can think that the huge increase in housing is necessary bearing in mind that the shameful destruction of a much loved part of Leek will be replaced by huge housing estates on The Mount making it appear like a mini version of the Berlin Wall. I regularly see hundreds of people on weekends and on summer days, walking, dog walking, jogging and horse riding along Mount Road and if these awful plans are put in place The Mount will be a danger to all road users and will take on an ugly factor that is part and parcel of building on rural fields loved by so many people and all imposed without once allowing the voters of Leek the change to have their say on the planning issues that have secretly been imposed. Where is the democratic right of the people of Leek in this issue? Sold out to building firms who look on greedily at the profits they can make with help from a submissive Council who dare not fight for Leek people. It is worrying is that all the planning proposals for the Leek Moorlands were taken in secrecy denying people of the Moorland the chance to put forward their views and objections for all these houses to be built without ever once considering that there is not sufficient employment in the town to employ even 1 in 100 of people who might live in these imposed properties and there clearly seems to be a total lack of schools to educate the huge increase in children and a lack of Health Care provision in respect to GP services and hospital care for the area. There is also the huge impact on the roads and the congestion that is already a great problem in Leek. It is as if the Council is blind or inept at seeing the problems that all these extra houses will cause but it seems that everything will be decided in the same manner as the destruction of the old town centre round about we were informed would ease traffic but contrary to all Council ideas the reverse is true. I cannot have any faith in a system that has denied us the vote on these extra 6000 houses or that the much loved Mount will be destroyed in the same cavalier and unthinking way as many planning issues have been allowed to go ahead even when so many Leek people do not want or need these homes to destroy The Mount. I therefore wish to state that I am against the building on any land along Mount Road AKA The Mount, so please register my objection.</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO675 about new homes bonus • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO91 about highways • See para response to PO1351 about public consultation and the Statement of Community Involvement • See para response to PO680 about Leek employment land requirements • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO675 about educational requirements

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9393	Mr Chris Taylor				Support	Land ref LE140: I would support development of this land to the rear of Leek High school. The land is well screened by an established tree belt which must be retained, and on this basis the development would not impact greatly on Mount Road.	<p>Comments noted.</p> <p>The 2016 Landscape impact study concludes that: - LE140 is of medium landscape sensitivity and site-specific mitigation measures including boundary landscaping, and controlled building heights, are recommended. Note the findings of this study form part of a wider evidence base to support SMDC's Local Plan. Its conclusions must be weighed against other evidence.</p> <ul style="list-style-type: none"> • See para response to PO91 about highways
PO9195	Mrs M Motum				Object	I would like to strongly object to more houses being built on The Mount. This very popular location is just a short walk from the town centre where you are in the countryside with far reaching views. The beautiful location will command high prices, therefore no affordable houses will be built. It would be a travesty of justice to build in such a well-loved area, used by dog walkers, walkers, courting couples, and car drivers. I don't think the infrastructure could sustain the number of houses envisaged. Please do not include this area in the local plan.	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO1751 about affordable housing • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO91 about highways

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9246 PO9200	Mr John Belfield Mrs Maureen Belfield				Object	<p>The rural fringe of Leek, and specifically Mount Road, would become urbanised. The Mount is a very popular route for leisure activities and exercise for many people and this would be lost. With the enormous number of proposed new houses there would be a massive increase in the amount of traffic both on the mount and also in the surrounding area. Kniveden Lane is already a busy road as it gives access to the small car park at the Moorlands Hospital. This car park is already insufficient for the needs of the hospital and many cars currently park on Kniveden Lane. If hundreds of houses are built on the mount Kniveden Lane would become a significant means of access to Ashbourne Road. The road network would need to be considerably enhanced and part of Kniveden Lane would need to be properly surfaced. This would lead to a major change in traffic patterns in the area which would lead to a loss of public amenity. This would not only cause traffic chaos but would also pollute the surrounding area. It would also make the smaller residential streets of Pitcher Lane and Trafford Close a potential car park for those who currently use Kniveden Lane for this purpose. There are brownfield sites available for building and also more suitable greenfield sites, for example Foker Grange and Home Farm, which have much easier access to the main road network. I therefore object to the building plans on the Mount which are numbered LE142a LE140, LE128a and LE127</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about highways • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO1143 about western Green Belt • See para response to PO91 about air quality • See para response to PO9101 about Home Farm

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9338	Mr Derek Kay				Object	<p>Herewith are my objections yet again about building proposals affecting open greenbelt land on Mount Road. I strongly object to delinations LE127, LE128a, LE140, LE142a and LE142b, on the grounds of unnecessary and deleterious incursion into valuable scenic amenities. The fringes of this town (Queen of the Moorlands) must be preserved at all costs. Open aspects across towards the Peak District are essential for our spiritual wellbeing; unwelcome development of additional traffic flow and population density would be the corollary of this building project, were it to succeed. Conversely, there is much brownfield potential within the town boundary itself; rundown old mills for example (which may be protected by outdated listing orders) and other unsightly structures causing blots on the "townscape". Not enough positive action to clean up the interior of this town has been taken over the years. Use compulsory purchase orders where difficult site owners will not cooperate and make the Queen worthy of her name.</p>	<ul style="list-style-type: none"> • See para response to PO1143 about western Green Belt • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO91 about highways • See para response to PO91 about Leek housing requirements and windfall allowance <p>The Secretary of State for Culture, Media and Sport is responsible for the listing of buildings on the advice of Historic England. Apart from being consulted, the Council does not have any say in which buildings are added to the statutory list. The Council, however, is charged with protecting listed buildings insofar as it is possible and managing any changes to them through the planning system. In discharging this responsibility, the Council has to work to the government's advice set out in the National Planning Policy Framework which requires every effort to be made to preserve listed buildings and either keep them, or return them, to active use.</p> <p>Whilst Councils do retain CPO powers in principle, these are generally used (if at all) as a last resort where it is expedient and in the public interest for the Council to do so, where agreement with landowners is not possible. As explained in response to PO91 the Council makes assumptions that development schemes will come forward within the Leek development boundary to contribute to its housing need to 2031, which could include historic premises etc. Applications affecting listed or non-listed "heritage assets" would be assessed against Section 12 NPPF and Council Policies. The Council would also assess schemes in the town centre against the aspirations of the adopted Leek Town Centre Masterplan.</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9301	Mr and Ms Gary and Elaine Turner				Object	I wish to object to the proposed housing development at the mount (all of the sites) as this is a high quality amenity area enjoyed by all for its views, indeed, if ever Leek is featured on TV programmes the cameras usually end up doing a view of the town from the mount, which says it all.	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access
PO9238	Mr John Burnett				Object	<p>I wish to formally object to the plans currently in consultation to allocate land for housing around the Mount Road in Leek. Some background. I have lived in Leek all my life, as have my parents and Grandparents. Throughout my life I have always viewed the Mount as the 'Countryside' and the border between Leek and the Peak district. Since I can remember I have spent many happy hours walking the Mount as it is an accessible area of natural beauty. What makes this area important to me and to anyone who lives in the East end of town. There are very few circular walks that take in such a wide variety of terrain and views as the Mount does. Whichever way its walked theres uphill and down dale terrain that has to be completed. What makes this worth while for many people is the wide open vista that is presented to the walker as you reach the top of the Mount. I complete this walk most days in the Summer, and every week in the Winter, and strongly believe it has added to my health and well being in immeasurable ways. I know and speak to the many others who also make this part of their leisure and health routines and know that a large proportion of the residents of both Haregate and Moorland Road estates rely on this open space as much as I do.</p> <p>So - my main objection is the destruction of some beautiful greenfield leisure location on the outskirts of our town. However I have other concerns about the wider impact to others who may not view this as important. Leeks infrastructure is already at breaking point. In particular the road system is literally not fit for purpose. Since the short sighted decision to alter the traffic flow through our town was taken, the flow of traffic particularly from West to East has been severely curtailed resulting in large traffic build ups through a normal working day. I can only imagine the building of 100's of new houses on the East End of Leeks existing boundary will at best double the misery already experienced by hundreds of travellers each day and cause untold economic and environmental damage to our market town.</p> <p>Additionally, I have serious concerns about the effects on the water run off if large areas of the Mount are built upon. The Mount is the highest point in our town, and huge amounts of water drain off it down towards Leek on a daily basis. Without the ground to soak up this water Im concerned the water table may be affected causing flooding and other damage to residents and infrastructure further down towards Leek centre. The first part of the consultation document says the following: They should, as far as possible, reflect the aspirations of local communities and should</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO680 about public rights of way • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO91 about landscape evidence • See para response to PO91 about highways • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO91 about air quality • See para response to PO680 about economic benefits of housebuilding • See para response in PO701 about utilities and flood risk <p>The Council must demonstrate to planning inspector that its Local Plan is based on the principles of sustainable development. The NPPF is clear that this means three roles – economic, social, and environmental, and that they are considered simultaneously. The Council's submitted Policies and objectives would therefore have to satisfy this.</p> <ul style="list-style-type: none"> • See para response to PO1351 about public consultation and the Statement of Community Involvement • See para response to PO680 about Leek employment land requirements • See para response to PO91 about option sites assessments and sustainability appraisal

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

						<p>strive to contribute towards their wider social, economic and environmental objectives. Based on what I have seen of the document, I don't believe it succeeds in any of these fundamental objectives. Our local community want a town that is prosperous but also one in which people want to live and work. We should strive to be better than what we are but not to the detriment of what makes people want to live in Leek in the first place. I hope you seriously take on board my views as well as the views of other community members. We live in a democracy and as such I genuinely believe that if a decision doesn't have the backing of the community it shouldn't be pushed through.</p>	
PO9181	Mrs E Adams				Object	<p>We would like to object to the developments proposed around The Mount. This is a very popular safe area to walk. It has a high quality landscape which would be restricted by the developments and traffic would increase significantly on the roads linking Buxton road and Ashbourne road. Visitors to the area also like this walk.</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO91 about highways • See para response to PO675 on design policies
PO9252	Ms Joan Hobster				Object	<p>I am writing to plead for the preservation of Mount Road, Leek, as an undeveloped open space and public amenity, available to all residents of the town. Any building on the farmland that borders this road will destroy the ambience and far-reaching views of this delightful area. It has been shown by a headcount (see Leek Post letters May 11 2016) how well used it is by walkers, joggers, horse-riders etc and I would like to add to that, the small but regular number of cars that are parked on Mount Road by elderly residents. They may no longer be physically able to walk far but can still take a short stroll, sit on a bench, enjoy the fresh air and admire the views. I understand that Mount Road is part of the Staffordshire Moorland 's Way and is walked regularly by individuals and organised groups. Surely a designated "Way" cannot be allowed to pass through a housing estate. In addition I see on the Council website, a leaflet suggesting a walk entitled "Leek Landscapes, A Country Walk" which includes Mount Road. I quote from this leaflet "The route passes through attractive farmland and offers many interesting views of Leek and its setting." If the proposed houses are built, this leaflet will have to be amended. I suggest, "The route passes through a new housing estate which obscures many interesting views of Leek and its setting"</p> <p>If building does take place, Mount Road itself would have to be upgraded and widened, to accommodate increased traffic use. An estimated 600 extra cars daily has been suggested. No doubt street lighting would be installed and this would destroy one of the few "dark sky" areas in the town. I have observed the night sky regularly from this location on winter evenings and enjoyed</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO680 about public rights of way • See para response to PO91 about highways • See para response to PO1351 about public consultation and the Statement of Community Involvement • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO1351 about streetlighting

						<p>seeing the eastern constellations, planet alignments, meteor showers, the occasional comet and the monthly spectacle of the full moon rising. All this would be lost by light pollution. I understand that planners did take note of objections raised about the development of Mount Road in 2015 and have reduced the proposed site allocations to either end of the road, thus preserving some of the views. For example, the field referenced LE128 will be split in two and only half of it built on. While appreciating this gesture to public opinion it would surely be only a matter of time before the inevitable "infill" would take place and the whole area would be lost for ever. PLEASE PLEASE PLEASE – SAVE THE MOUNT for future generations to enjoy.</p>	
PO9295	Mrs Gwen Gledhill				Object	<p>Re sites LE127,128,140.142a I wish to object strongly to the proposal to make these sites on The Mount available for housing on the following grounds:</p> <p>1. Traffic The Mount is a narrow country lane with no pavements and little or no street lighting. There are narrow and dangerous junctions at both ends on to the Buxton and Ashbourne roads and a dangerous bend by LE127. The traffic generated by the proposed 400 houses will completely overload these junctions at busy times and generate a major risk to pedestrians on the lane itself, especially as there is not sufficient width for two cars to pass each other for most of the length of the lane. Commuters travelling from these house to Manchester, Macclesfield or Stoke will only add to the town centre traffic congestion at busy times.</p> <p>2. The Local Housing Need It is well documented that the local need is for starter homes for young people and 'downsizing' homes for older people. These are not required on the edge of town but need to be closer to the centre where there are shops, amenities and better public transport links. Whatever developers initially propose re 'affordable housing' on The Mount, the reality is that they will ultimately build executive homes attractive to commuters travelling to Manchester, Stoke and beyond at prices cheaper than can be found in Cheshire East! I believe that the buyers will not be local people and thus the developments will not answer the local housing need. There are other sites that could address this need to the south and north west of the town and via infill in the centre itself. Planners should look more carefully at these and not settle quickly for 'easier' options.</p> <p>3 Our Environment The Mount is a long standing area of natural beauty, accessible to most town residents on foot with views equal to those enjoyed across the Peak District. The developments will ruin this aspect and destroy a major, free, leisure experience for local people right on the edge of The Peak District National Park - their officers will (I'm sure) be objecting too!</p>	<ul style="list-style-type: none"> • See para response to PO91 about highways • See para response to PO680 about Leek employment land requirements • See para response to PO1751 about affordable housing • See para response to PO675 on housing needs evidence • See para response to PO9145 about ageing District population • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO91 about option sites assessments and sustainability appraisal • See para response to PO1143 about western Green Belt • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence

PO9165	Mrs Kath Fernyhough				Object	<p>Please note that this email is an objection to the following site references regarding the development of Mount Road Leek., LE142b, LE142a, LE140, LE128a, LE127, LE022 We are residents of Kniveden Lane leek, and so we feel that we are well qualified to tell you why this development would be so disastrous for Leek. The Mount is an area of natural beauty which is used every single day of the year, by walkers, joggers, sightseers, cyclists, and people who enjoy it just for the sheer pleasure of the calm, peaceful area it provides us with. It is used by our senior citizens, who use the Mount as a daily walk to help keep them fit, and they enjoy sitting on one of the benches that have been left by the people of Leek for the people of Leek, to sit and chat or pass the time of day with other walkers. Good for the body and soul. It is an area that we, our parents, grandparents and children have enjoyed for many years, and if this development goes ahead our grandchildren and future generations will be denied this. It is an area of natural beauty that is home to a wide selection of wildlife. From hearing the owls hooting late evening and into the night, to the woodpeckers tapping away in the woods. From the bats swooping past in search of food to the kestrels that hover over the ground looking for their next meal. And the home of badgers and foxes. To name but a few. If this development goes ahead the homes of these beautiful animals and birds will be lost. Another loss for future generations and the townspeople of Leek, who you are supposed to represent the views of, so please take the time to read this and understand how passionate the people of Leek are about our beautiful green open space. As well as the above losses, the development will cause many problems. Namely access to and from Mount road. If planning permission is granted for all these new homes, imagine how many extra cars, delivery vans, school buses and refuse collectors will have to use Mount Road. If in excess of 400 homes are built, that will mean that there will probably be in excess of 800 extra cars on a daily basis. Mount road can not deal with this. Our worries are as follows :- The exit from Mount road onto Buxton Road goes straight out into a 40mph area, opposite another junction with Novi Lane. The exit and entry from Ashbourne Road is even worse. To exit from the Mount onto Ashbourne Road you again have to exit into a 40mph area If you want to travel to Ashbourne you have to negotiate a 30% bend onto a very busy road If you want to exit Mount Road onto Ashbourne Road and travel down into town, you still have to join the traffic that is traveling at speed around Lowe Hill bends. This plan is dangerous, foolhardy and beyond belief. As the majority of people who will purchase property on Mount road will work in Stoke on Trent or Macclesfield, this will bring even more traffic that has to negotiate the town centre, which is often gridlocked now, let alone with a further 800 cars a day travelling through Leek town centre. The only other access to Mount Road is from Kniveden Lane, via the unadopted road at the top of the lane. If this road is adopted to improve access onto the Mount, Kniveden</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO680 on ecology evidence • See para response to PO91 about highways • See para response to PO680 about Leek employment land requirements • See para response to PO91 about air quality • See para response to PO1351 about tree protection • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO1143 about western Green Belt • See para response to PO1351 about public consultation and the Statement of Community Involvement

						<p>Lane will become a rat run, along with Moorland Road. And it will not only be used by the new developments on the Mount, but by the estate accessed from Novi Lane, known as the Haregate estate. Kniveden Lane and Moorland road are residential roads in a residential area, and have not been built for vast amounts of traffic. The noise and level of traffic if this should happen would be very detrimental to a beautiful residential area, not to mention the dangers of traffic moving at speed to residents. Also the exit from Kniveden Lane is notoriously difficult due to the trees which line both sides of the junction reducing visibility to less than 50 yards in either direction. What will you do then, cut down the trees to improve visibility and in the process removing more natural vegetation along with the fields on Mount Road that you are proposing to develop. As an alternative site, why do you not look at Macclesfield Road, the area around Foker Grange. Or develop some of the derelict mills that are lying empty and are nothing but eyesores. This way you would rid the area of the derelict buildings and build new more pleasing structures. We ask you to do the job you were voted in to do, which is to represent the views of the people of Leek.</p>	
PO9271	Mr Jeff Davies				Object	<p>I am writing to object to the designation of land on Mount Road, Leek as "Preferred Housing Allocation". There are a number of problems with this intended designation:</p> <ol style="list-style-type: none"> 1) Overlook from the National Park - building as designated will adversely affect the view from the National Park 2) Access - to increase traffic along the Mount would cause significant traffic problems and hazard at its junctions with both the Buxton and Ashbourne Roads. If Knivden Lane is paved then this would also cause problems with access to the hospital and cause a hazard at its junction with Ashbourne Road where there is poor visibility. Improving Mount Road is likely to be self-defeating as it will then become a rat-run between Ashbourne and Buxton Roads further increasing the traffic load. 3) Services - there would be a significant cost to put in mains services as the existing water and drainage up Mount Road towards Padwick Farm are unlikely to adequate to service the proposed housing 4) Amenity - the Mount is a much loved local resource, heavily used by walkers (including dog-walkers) and runners. 5) Location - the bulk of working residents would probably work in Stoke or Macclesfield and the development is on the wrong side of Leek as it would then increase the traffic 'flow' through the centre of town 6) Brownfield first - development on green fields should only 	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about highways • See para response in PO701 about utilities and flood risk • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO91 about open spaces and countryside access • See para response to PO680 about Leek employment land requirements

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>occur when all the available brownfield sites have been used. There are multiple opportunities for in-fill housing developments within Leek (e.g. Prince St) as well as numerous mills that are currently eyesores (e.g. both Macclesfield & Ashbourne Roads)</p> <p>7) Size of housing allocation - there is a significant discrepancy between between SMDC & Government figures for required housing. I believe you are seriously over-estimating the local housing need. By doing this you are making it easier for developers to cherry-pick which bits they want to develop rather than encouraging development where it would be most beneficial to and have the least adverse impact on the town</p> <p>8) Unnecessary blight - by over-allocating housing designation you will have an unnecessary adverse impact on the value of properties which may not in practice be affected by housing development throughout the life of the plan</p>	<ul style="list-style-type: none"> • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO675 on housing needs evidence <p>Property values are not considered as material considerations under the Planning Acts.</p>
PO9188	Ms Michele Rushton				Object	<p>I wish to register my disapproval re the above development and quite the following points.</p> <p>Loss of an important local amenity – the Mount is a very important open space close to the town centre which is enjoyed by people across the town.</p> <p>Visual impact - restricting important and highly valued panoramic views across the Leek skyline and further afield.</p> <p>Impact on infrastructure - primary schools in particular (East Street, Beresford) will struggle to keep up with demand and the situation where some children already have to travel to schools in the west of Leek will become more and more common</p> <p>Mount Road is on the route of the Staffordshire Moorlands Walk – a very popular route for leisure activities such as walking, cycling and jogging</p> <p>High quality landscape – unsympathetic to the landscape character and quality of the area Urbanisation of the country lane that is Mount Road – if all the 6 developments proceed then in excess of 500 houses would be constructed. Mount Road would likely become a main road linking the Ashbourne and Buxton roads. The spatial distribution of proposed sites across Leek is unbalanced - there will not be sufficient demand to build all of these houses on one side of town so the council will not meet its housing needs in any event The volume and speed of traffic is likely to increase on Kniveden Lane where my family have been residents for over 25years. Please for the sake of Leek and her people, review your proposal.</p> <p>Question where are the jobs to support people buying new houses Traffic & congestion through & around Leek is already</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO675 about educational requirements • See para response to PO680 about public rights of way • See para response to PO90 about highways • See para response to PO1676 about viability study • See para response to PO680

PO9206	Mr Martin Bagshaw				Object	<p>I would like to register my objection to the proposed housing development on the mount area of Leek. I have lived in Leek for all of my life and I and many others , have spent many happy hours enjoying the scenery and tranquility that this area of the town offers to residents of the town. To develop in this area will drastically reduce the local amenity for the residents of the town. It is a lovely picturesque area that is within easy reach of the town centre. And I believe that to destroy it would be an absolute travesty. The area has many amenity uses, such as walking, horse riding, cycling and jogging, let alone just sitting on the benches and chilling. I think the existing schools will struggle to cope with the increased demand for places. The increase the traffic on the roads surrounding the mount will be significant, and traffic calming measures will need to be considered for safety reasons and quality of life of the existing residents in the area. There also be an increase in commuter traffic from this development. I think the majority of which will have to cross the town towards either Stoke on Trent or Cheshire. This will add to the already considerable traffic issues in the town. I believe the Barnfields, the rear of Sainsbury and Foker Grange Farm would be much better locations, so that the increase in traffic is kept away from the town centre. It was my understanding the houses were proposed for the rear of Sainsbury's. But I understand this has hit commercial difficulties with residual contamination.</p>	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access • See para response to PO675 about educational requirements • See para response to PO91 about highways • See para response to PO680 about Leek employment land requirements • Existing industrial areas in use would not generally be allocated to other uses unless re-provision of equivalent or improved floorspace was involved. • See para response to PO3656 about Sainsburys consent • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO1143 about western Green Belt

PO9174	Mr and Mrs S A Hodkinson				Object	<p>We are writing as a young couple concerned about the prospect of many more houses being built on good quality farming green field sites in Leek and throughout the Staffordshire Moorlands, especially over the Mount Road in Leek. We use the Mount as many people of all ages do on a regular basis, whether it's to walk the dog or to go out for a run. The Mount is used by many and if lost would be greatly missed. The main issue that concerns me with the proposed building of houses over the Mount is that the council & planners feel it is acceptable to potentially build houses on what is good quality farming green field sites. We need to protect our green spaces and farming land that is producing us with our food and local food at that. Another point to make is there are hundreds of empty properties throughout the Staffordshire Moorlands therefore if there is really a great need for additional housing which there is no evidence to suggest this. Also in this day and age we as a country are very conscious trying to reduce our carbon footprint and recycling everything possible. Therefore question why does this not apply to housing. There are all these properties sitting empty and you are wanting to build more, do we really need more if we already have so many empty. This includes new builds that have been built in the past twelve months that are vacant. Also question who are you expecting to buy these properties or live in them. There is obviously no jobs or prospects for people to want to move into Leek otherwise they would be here now. You only need to open the local paper or look on the internet there are always hundreds of properties at all prices for sale and up for rent in Leek. If you by some miracle find hundreds of families to live in these houses then question how do you propose to improve the infrastructure. It already takes up to twenty minutes to drive from one end of Leek town to the other and this isn't even in 'rush hour'. We certainly don't have enough schools and the GP's are already stretched to capacity. I also have a worry over the wildlife over the Mount there are many different species of birds and animals that are present around the Mount and the building of houses would interrupt them and significantly reduce the numbers of some already endangered species. Finally I urge you think very carefully before allowing these houses to be built in Leek, with a special thought to the Mount, once you have let properties be built there Leek as a lovely small market town will be spoilt and the beautiful uninterrupted views will be gone forever.</p>	<ul style="list-style-type: none"> • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access • See para response to P0675 on housing needs evidence <p>The NPPF expects Councils to meet objectively assessed development requirements, and also encourages brownfield development, subject to wider Policies.</p> <ul style="list-style-type: none"> • See para response to PO680 about Leek employment land requirements • See para response to PO91 about highways • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO675 about educational requirements • See para response to PO680 on ecology evidence

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9220	Ms Lisa Milward				Object	<p>I wish to register my disapproval to the above development My objection has little to do with extra traffic and infrastructure but a lot to do with losing a place that is very dear to people's hearts. The Mount has always been a favourite short walk of mine and my family's. It is peaceful, has beautiful views and friendly people of all ages make a point of speaking. The Mount is somewhere that I spend a lot of time walking each week, a place that has been a part of my life since childhood. I have very fond memories of spending time walking over The Mount with family when we didn't have a car and little money to take buses elsewhere. The Mount is perfect for a short walk, it's somewhere that I have always felt safe to walk alone and not too far for a morning walk before work and for those people who perhaps struggle to walk longer distances. By developing housing on this land I believe that it will take away one of the town's best assets, one that people of Leek have enjoyed for many, many generations. So as councillors and planners who are in office for a relatively short period of time in comparison making a decision that will remove this for everyone who loves to walk here, I hope that you really consider how much The Mount means to people like me. It will be a huge shame if this goes ahead.</p>	<ul style="list-style-type: none"> • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO91 about highways • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access
PO9288	Mr Ian Harrison				Object	<p>I hereby which to object to the building of houses etc on The Mount, Leek. This road, used by many is the last place to admire the scenic views of both Leek and the surrounding areas. It is an area of outstanding natural beauty. If one site is given permission for house building, then all others will follow and question where will it end. There must be countless brown field sites in the leek area which can be built on first and foremost. If 500 houses were to be built, what happens to Leek. The jobs aren't there, infrastructure, the existing roads can't cope with today's traffic (constant gridlocks in the town centre, never mind 1000 further cars. No hope of a ring road around leek. Junior schools, can't cope with further numbers of school pupils. My wife and I continue to walk over the mount and admire the scenery, as well as the many more who walk, cycle, run and horse ride over it. The new housing would block the outstanding views people go the the mount to view.</p>	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence <p>None of the Mount sites attract an AONB designation.</p> <ul style="list-style-type: none"> • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO680 about Leek employment land requirements • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO91 about highways • See para response to PO675 about educational requirements • See para response to PO91 about open spaces and countryside access

PO9281	Mr Ian McFaul				Object	<p>i am writing to protest against the latest version of the site allocations plan for th Staffs Moorlands, in particular the mount area of Leek. the following objections should be considered</p> <p>a)maintaining the individuality of our market town rather than going down the homogenisation route</p> <p>b)I'm not sure where the demand for these house is coming from - where is the research on households forecasted to require this</p> <p>c)The area of most concern to myself is particularly LE127 and the terrible prospect of houses being built on the town horizon, the entrance to Buxton makes me shudder and we should not go down that route</p> <p>d)there are lots of brownfield sites ripe for development in town that should be exhausted first rather than taking the easy option short term option.</p> <p>e)where i the visionary leader on the council who can set out a plan for the town not driven by short termism</p>	<ul style="list-style-type: none"> • See para response to PO675 about design policies • See para response to PO675 on housing needs evidence • See para response to PO91 about landscape evidence • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO1351 about public consultation and the Statement of Community Involvement
PO9308	Councillor Gail Lockett				General comment	I have no objections to LE140,	Comments noted.

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9323	Ms Elizabeth Stretton				Object	<p>I am writing to voice my opposition to the proposed housing development on the Mount Road, Leek - ie Plots IE140, LE128a, LE127, LE142a, LE142b, and LEO22. On the edge of the Peak District, this area of Leek can only be described as an extension of this National Park and one which holds a special place in the hearts of Leek residents. The number of walkers and cyclists using this area each week must be in the hundreds with many, like myself, enjoying the walk over The Mount on a daily basis. This walk commands beautiful views of the surrounding countryside, providing a "country" experience for so many walkers, cyclists and drivers, as well as a place to sit and watch, for example, the sunsets, weather conditions unfold, or simply just to sit and ponder. For years it has provided a walk within a few minutes walking distance, for families, courting couples, dog walkers and anyone else who wants to escape from the town and enjoy the views and the experience pleasures of a "country " walk without having to travel by car and park in an over-priced car park! There are even opportunities for people to drive from anywhere in Leek within minutes to the Mount and then enjoy all the attractions described above. The loss of this walk and seats would deprive many people of the opportunity to enjoy panoramic views across the town and the surrounding skyline: these vistas would be lost and replaced with houses instead - reducing the area to just another street of the kind to found anywhere and out of character with the landscape. It also seems that all the attention has been focused on this area and side of Leek, when there are other areas around Leek which could be made use of. One of the most important problems, as I see it, is the strain on the local infrastructure. Up to, or in excess of, 500 houses could be built along this road and all these new residents will need employment - already a problem in Leek and the surrounding areas and towns - as well as schools for their children. Leek primary schools are already experiencing problems and some children are already having to travel across Leek to receive their education. Recently trees have been cut down on the top field of the High School - now work has started on fencing this area, apparently towards the building of a new primary school on this site. I cannot remember being made aware of this possibility, although it may have been mentioned somewhere, but it seems that the building of this school means that councillors are confident that the housing development will take place and they will be able to wave aside any objections pertaining to education and say that a school is already being built . There are many houses in Leek which are empty, as there are many sites which could be used to provide areas for new homes, and it would make more sense to utilize these possibilities before taking away an important , local amenity which is used every day by so many people and which is our own area of "outstanding natural beauty" and which is available to everyone.</p>	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access • See para response to PO1143 about western Green Belt • See para response to PO680 about Leek employment land requirements • See para response to PO675 about educational requirements • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO675 about design policies <p>The emerging Local Plan is not yet finalised and needs to undergo independent public examination by Government appointed Planning Inspector before it can become adopted. Planning applications arising before this happens must be determined against the NPPF and current Council planning policies.</p> <ul style="list-style-type: none"> • See para response to PO675 on housing needs evidence

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9331	Dr Tracey Cole				Object	<p>I would like to hereby object to the areas of local interest around The Mount being developed (LE142b; LE142a; LE140; LE128a; LE127; LE022). As I am sure you are aware, there is considerable public opposition to the proposed building of 400 houses on these sites. The area is well used, at all times of day for cyclists, walkers and horse-riders. It is an quiet oasis for the people of Leek to experience the calm of the countryside and look down on the splendid views of the town and further afield. As such, it is an extremely highly valued area in the town of Leek. As a resident of Pitcher Lane..building on The Mount would seriously impact on me and my neighbours. The building of so many houses will bring at least 400-800 cars with it. Access for these vehicles will no doubt run straight past my house, causing noise and air pollution. I moved to Leek from Cheshire for exactly the same reasons: the road I lived on became unbearably busy. I noticed that sitting in the garden was impossible with the constant noise of the cars and the smell of the fumes, not to mention the health consequences of nitrogen oxides, carbon monoxide and particulate matter. I am also concerned that with so many vehicles, the junctions of Kniveden/Ashbourne Rd and The Mount/Buxton Rd will easily generate queues during rush hours. Getting off my estate will be far more tricky and the increased risk of traffic and pedestrian accidents is not a pleasant thought. A town like Leek is quite a jewel, but it could so easily be ruined forever if we don't seriously consider all the consequences of our actions.</p>	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access • See para response to PO91 about highways • See para response to PO91 about air quality
PO9349	Mr David Rowe				Object	<p>I am writing to object to the selection of all sites on Mount Road, LE127, LE128, LE140 and LE142a. This road is of great value to local people as a very accessible place to experience and benefit from the surrounding countryside. Many people walk, cycle, exercise their dogs along this road every day, and this would be completely lost if development was allowed to take place. There are several brownfield sites in the town that should be considered instead, e.g. the old mills, Barnfields site.</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO9206 about existing industrial areas

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9420	Mr Anthony Clark				Object	<p>I am writing to make you aware of the concerns I have over the housing proposals for the Mount Road area, Leek, set out in Staffordshire Moorlands Preferred Options and Development Boundaries Consultation. The consequence on traffic of building many houses in the Mount Road area will be very marked both in the immediate area and the town as a whole . Immediate area Mount Road is not wide enough to safely take a major increase in traffic. The road is very popular with walkers, horse riders and cyclists. Increased traffic will discourage such use and be a danger to those leisure users who do continue to use the road. The existing access points to the area off Buxton Road and Ashbourne Road are adequate for the present level of traffic but are woefully inadequate and dangerous for high volumes of vehicles. If, as is most likely ,Kniveden Lane was upgraded at its top end to allow access by vehicles the consequences for its junction with Ashbourne Road would be great. At present the limited amount of traffic means that the restricted visibility due to the trees on Ashbourne Road causes minimal problems. An increase in traffic queues would lead to frustration and rash decisions by drivers. This in turn would lead to calls for the removal of the trees and the consequent destruction of a wonderful entrance to the town.</p> <p>Town Residents living in the proposed housing development will need to work and shop. Question where will they go to do these two activities. Work Very few will work in Buxton or Ashbourne which are easily accessible from Mount Road. The vast majority will work in the town centre, the Barnfields industrial estate or on Cheadle Road. Those commuting out of town will be mostly heading for Stoke or Macclesfield/Manchester. All these people will have to drive through the centre of town at least twice a day at peak times as there are no alternative routes they can use. Shopping To reach the two large supermarkets in Leek (Morrisons and Sainsbury's) residents of the Mount Road area would be forced, by the road system, to travel through the centre of town. Those shopping further afield will, in the main, be heading for Stoke and Macclesfield and again will need to travel through the town centre. One look at the map would tell anyone that major building to the east of Leek will cause major traffic problems.</p> <p>If building must take place on the Mount, though I doubt there is a need, the least environmentally damaging sites are LE142b and LE140. Question is there not a possibility of building on the existing sites of Kniveden Hall (which is well screened by trees) and the old Social Services site. These sites would be the least invasive environmentally but would still generate major traffic problems both locally and in town. In 2006 New York took the far sighted decision to turn a disused elevated railway into an linear park (The High Line). Would that Leek had planners and leaders of similar vision to develop Mount Road into The High Lane for</p>	<ul style="list-style-type: none"> • See para response to PO91 about highways • See para response to PO91 about open spaces and countryside access • See para response to PO1351 about tree protection <ul style="list-style-type: none"> • See para response to PO680 about Leek employment land requirements • Refer to paras 3.20-3.23 of the Preferred Options consultation document regarding additional retail floorspace requirements for Leek. • See para response to PO91 about option sites assessments and sustainability appraisal <ul style="list-style-type: none"> • See para response to PO675 on housing needs evidence <p>The 2016 Landscape impact study concludes that: - LE142B is of high landscape sensitivity and development could be visible from the peak Park, and the rural approach to Leek;</p>

PO9425	Mr Michael Harvey				Object	<p>To whom this may concern. I would like to raise my strongest objections to the proposed plans to build across the mount - LE142A, LE140, LE128 & LE127. This is a beautiful and precious area for the people of Leek who currently enjoy leisure activities such as walking etc which is easily accessed by many, both old and young. The fantastic views of this high quality landscape and the therapeutic benefits it offers are easily available to all who want to enjoy the beauty and peacefulness of the countryside without having to travel far from their doorstep, and who may not be in a position to! To lose this lovely countryside would be a tragic and very sad loss to the people of Leek. The Mount is a narrow county lane and is totally unsuitable for increasing the flow of traffic. Having Buxton Road at one end of The Mount and Ashbourne Road at the other, this would create a massive increase in the volume of traffic using it, and increase the risk of accidents - it's totally unsuitable! In addition to this, the increase in homes would ruin what is currently a peaceful retreat and a habitat for our wildlife which I have seen loads of rare birds when walking our dogs, these birds would go away and would not be seen again. Also foxes and badgers. Concern that fatal traffic accidents will occur. Leave our mount and all it has to offer well alone!! There are loads of other areas in Leek that are within the boundaries of Leek and not on green field sites (Huge's Concrete site for one) Leek does not need this amount of housing there is not the work/jobs for the increase in people. This is all about money in the pocket for the council. If we need another primary school increase extend Beresford Memorial school there is about 3 acres of fields behind the school.</p>	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access • See para response to PO91 about highways • See para response to PO680 on ecology evidence • See para response to PO9206 about existing industrial areas • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO675 on housing needs evidence • See para response to PO680 about Leek employment land requirements • See para response to PO675 about new homes bonus • See para response to PO675 about Leek educational requirements
PO9379	Cllr Dani Ogden				Object	<p>An area of natural beauty should never have been considered for planning application in the local plan. The outrage this has caused with local people has been overwhelming. The Mount is an area accessible to open countryside for local people, it is used for recreational purpose and attracts visitors coming to Leek. One lady told me that she could walk safely with a group of people with learning difficulties, the volume of traffic from four hundred dwellings would have a severe impact on those using The Mount for recreation, the infrastructure alone would not only cause a dramatic difference to the landscape it would also affect the wildlife in this area. That said, LE142a [landowner] are against development on this land, also there appears to be no indication on the map as to where the boundary is belonging to [the landowner]. LE127 and LE128a is not suitably distributed to urban infrastructure. It has been suggested LE066 where Kniveden Hall is, Folker Grange and Holme Farm on the west side of Leek are developable.</p>	<ul style="list-style-type: none"> • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO91 about open spaces and countryside access • See para response to PO91 about highways • See para response to PO680 on ecology evidence <p>The Council communicates with landowners of affected sites to ensure they are available, prior to selection. PO9371	Councillor Rebecca Done				Object	<p>On the proposed planning for the Mount in Leek..I do not agree with and my reasons are stated below: The Mount is a very important open space close to the town centre which is enjoyed by a lot of people across the town including myself. There will be a massive impact on infrastructure, I think primary schools in particular would suffer (East Street, Beresford) and will struggle to keep up with demand. Mount Road is on the route of the Staffordshire Moorlands Walk – a very popular route for leisure activities such as walking, cycling and jogging` If all the 6 developments proceed then in excess of 500 houses would be constructed. Mount Road would likely become a main road linking the Ashbourne and Buxton roads. The proposed sites across Leek are unbalanced - there will not be sufficient demand to build all of these houses on one side of town.</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO675 about educational requirements • See para response to PO675 on Infrastructure Delivery Plan • See para response to PO680 about public rights of way • See para response to PO1676 about viability study

PO9386	Councillor Charlotte Atkins				Object	<p>I am writing to object to the four development sites on The Mount as identified in the proposed SMDC Local Plan. My reasons for doing so are:</p> <p>The Mount provides unique and much valued panoramic views over Leek and its skyline as well as over parts of the National Peak Park. The openness of The Mount makes it a hugely important local asset for public recreation and for biodiversity. This is particularly important at present when lack of physical exercise is creating a public health crisis. The Mount is very popular among walkers, cyclists, horse riders and joggers as well as encouraging families to be active and enjoy the natural attractions of the area.</p> <p>The roads up to The Mount are totally unsuited to increased traffic. But if they were improved, that would encourage rat running between the Ashbourne and Buxton Roads totally destroying the quiet rural nature of the area. With increased traffic, the junctions at either end of Mount Road would be highly dangerous. The Mount is a developer's dream and would attract developers who want to build expensive executive homes. These would attract buyers from outside Leek rather than providing the affordable homes we need for both local young and older residents. If 400 houses are built on the Mount, they could potentially generate 800 cars driving through the centre of Leek as the prevailing flow of traffic out of Leek is to Stoke on Trent and Macclesfield. That would create even more gridlock than we experience already. More suitable development sites exist within Leek eg along the Macclesfield Road. But they have not been identified or consulted upon. I urge the Council to drop its plans to destroy The Mount and look elsewhere to develop affordable homes for local residents.</p>	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access • See para response to PO91 about highways • See para response to PO1751 about affordable housing • See para response to PO680 about Leek employment land requirements • See para response to PO1143 about western Green Belt • See para response to PO91 about Leek housing requirements and windfall allowance <p>Both the 2015 site options consultation, and the 2016 Preferred Options consultation, mapped sites for various land uses across the District including housing, employment, and mixed uses.</p> <ul style="list-style-type: none"> • See para response to PO91 about option sites assessments and sustainability appraisal

Question 10 Do you have any comments on the proposed housing allocation LE140 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9397	Ms Katie Giddings				Object	<p>I wish to register my strong objection to the sites identified for development along The Mount, Leek. The site reference numbers are LE127, LE128, LE140 & LE142a. The Mount is highly valued by the people of Leek. Hundreds of people use it every day & enjoy the landscape and views. These people cover a broad mix - there are walkers & strollers, hikers & joggers, dog walkers, horse riders, cyclists - and they range through all ages, from young to old. Generations have taken the air along The Mount and future generations deserve the same opportunity. Chance and regular encounters with this variety of people whose paths would probably otherwise not cross creates the sense of community so often lacking elsewhere but celebrated in Leek. The view of Leek from The Mount creates a sense of belonging to and connection with the whole town, enhancing this sense of belonging. I may not live the other side of Leek but I can see it every time I walk the Mount and feel part of its whole. The town is visible from The Mount & I can enjoy the view of its special architecture & character. This natural landscape is free for everyone to enjoy and is accessible within minutes of the town centre. It is a landscape and community which would be lost forever should the developments go ahead. Such things are irreplaceable and I despair that The Mount is even being considered as a suitable option. I am a recent newcomer to Leek having moved here three years ago. I have never lived anywhere more welcoming and cheerful and full of people appreciating and making the most of living in such a beautiful place. The Mount is at present a country lane offering peace and tranquil exercise. Its urbanisation would completely change its character and make it a main road connecting Ashbourne & Buxton Roads. The traffic increase would be beyond that contributed to by extra housing as it would become a highly attractive route for those seeking to avoid Leek town centre. The access to and from Ashbourne Road would also radically change the character of that end of town. The increased housing would alter the balance of the town and there is simply not that level of demand for housing in that area. The figures of required housing also appear to be based on doubtful statistics so that the very need for this level of housing in the Moorlands is questionable. It would really be dreadful if this so very important natural landscape were to disappear forever from Leek. In conversation with the people I meet along the Mount, there is a strong feeling of being threatened by changes beyond their control & of losing something very precious. Many people have said they have no faith that their feelings and needs will be valued. Please change their minds and show that local people will be listened to and their objections acted upon. Please don't build on The Mount.</p>	<ul style="list-style-type: none"> • See para response to PO91 about landscape evidence • See para response to PO91 about open spaces and countryside access • See para response to PO91 about highways • See para response to PO91 about Leek housing requirements and windfall allowance • See para response to PO675 on housing needs evidence • See para response to PO1351 about public consultation and the Statement of Community Involvement

						<p>these people make their way through town. We urge the Council to think again and produce alternative sites for the houses thereby saving this precious area for the future generations to enjoy.</p>	<ul style="list-style-type: none"> • See para response to PO1351 about Council Assembly and statement of community involvement • See para response to PO680 about Leek employment land requirements

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO11	Mr R Goldstraw				Object	<p>I strongly object to The Mount Road in Leek being allocated as a "preferred option" for the new housing allocation. If these developments go ahead it will be a complete betrayal of the people of Leek who have consistently objected to development of this area on the grounds that it would destroy an amenity that has been used for generations. It would ruin forever the far reaching views over Leek and beyond and destroy a popular country walk on the edge of Leek which very many people use on a weekly and daily basis. If this development were to go ahead it would create a rat run between Buxton Road and Ashbourne Road which will make Mount Road unsafe for pedestrians and residents alike. We all know the Councils recent form on "road improvements" in Leek.</p>	<p>The Council must conduct public consultation concerning its emerging Local Plan as set out in the Local Plan regulations (or exceeding these requirements); and in also in accordance with the Council's adopted Statement of Community Involvement. All stages of the local Plan (including consultations) must be agreed by the elected Council Assembly; and all meetings of the Council Assembly are open to the public.</p> <p>The public/visual open spaces proposed by the Council are those mapped in the Preferred Options consultation document. The Council's emerging Local Plan policies seek to improve public access to open spaces/recreation generally where this is consistent with other policies. Note there is no automatic public right to cross privately owned land beyond public rights of way.</p> <p>Development proposals affecting the routes of recognised public rights of way would need to make allowance for them.</p> <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes landscape impact evidence. The most recent 2016 landscape impact study also assessed impacts from the Peak Park, and concluded that the various Mount sites exhibited low- through to high- landscape sensitivity; it also provided recommendations regarding mitigatory measures where appropriate. It concluded site LE142A to be of high landscape sensitivity as the site is visually prominent and visible from the PDNP, as it is located atop of the ridge that screens views of Leek. Note that landscape evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p> <p>The Council consults with SCC Highways during Local Plan preparation. SCC did not raise any objections to Preferred Options sites LE022 /LE127 /LE128</p>

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

							/LE140 /LE142A /LE142B subject to development in this area contributing to the improvement of Mount Road including provision of footways and pedestrian links. Also Kniveden Lane should be brought up to adoptable standard with the implementation of footways. Further junction improvements at Mount Road/Ashbourne Road may also be appropriate. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to submit transport statements, and provide highways improvements where deemed appropriate).
PO92	Mr Bill Reid				Object	This area is a most popular area for walkers, runners, drivers and strollers. It has been, for as long as I can remember, an area that provides views over Leek town and the surrounding area which cannot be equalled. It is a beautiful peaceful part of Leek which should not be spoilt by housing estates and the disruption that goes with it. The top of Kniveden Lane has a piece of unadopted road which deters motorists from using it as a thoroughfare and I am sure that this would become adopted if the proposed plans go ahead causing untold traffic, noise and pollution, as well as the dangers to residents from the traffic. There are many areas around Leek which would be far more suitable.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO11 on highways <p>If the Council considered that a development may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts. In addition the Council continually monitors air quality across the District and regularly undertakes review and assessments of this data to identify areas where the traffic could have an unacceptable impact on local air quality. Policy SD4 in the emerging Local Plan covers controls of all forms of pollution arising from development.</p> <p>Page 25 of the Preferred Options consultation document sets out the residual housing requirement for Leek to 2031 (pursuant to Policy SS3 of the adopted Core Strategy). The Council must demonstrate that it will fully meet residual housing requirements for Leek to have a sound Local Plan in place. This requirement does not have to be met</p>

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
							<p>100% from land allocations – unanticipated development of other urban brownfield/greenfield sites counts too – Table 4.1 factors in assumptions about future windfall housing (resulting in a lower residual requirement). This windfall would include urban sites not formally identified on the map. Applications for residential uses arising on such sites would be assessed on their merits against NPPF and Council Policies. As there is insufficient capacity to meet this residual need entirely from sites within the Leek town boundary, the remaining requirement is to be met from a combination of urban (brownfield and greenfield) sites, and peripheral “urban extensions” around Leek as set out in Tables 4.2 and 4.3.</p>
PO119	Mrs Alison Campion				Object	<p>No need for more houses in the area. More housing will create more traffic on narrow Mount Road Views and opens spaces should be left as they are for all to enjoy when walking or cycling.</p>	<ul style="list-style-type: none"> • See para response to PO92 about Leek housing requirements and windfall allowance <p>Need for additional housing stems from a number of factors, for example household formation, in-migration, linkages with future workforce, and other factors. The NPPF makes clear that housing projections are the starting point for assessing housing needs; however these additional factors should also be taken in to account in Council SHMAs. The Council’s own housing need assessments are set out in its evidence base on the website. Note that this already takes into consideration empty properties in the Moorlands.</p> <ul style="list-style-type: none"> • See para response to PO11 on highways • See para response to PO11 about open spaces and countryside access • See para response to PO11 about public rights of way

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO193	Mr John Pigott				Object	<p>The following comments apply to three areas allocated for housing development on Mount Road: LE127, LE128a and LE142a The proposal to build in these three blocks along both sides of Mount Road should be removed as the Mount is a very important open space close to the town centre and is a very popular route for walking, jogging and cycling. It is also on the route of the Staffordshire Moorlands Walk giving panoramic views over the centre of Leek and the hills beyond. The Mount is a very important local amenity which has been completely underestimated and its value not understood.. A local resident carried out a head count on Sun 8 th May between 0700 and 2000 and counted a total of 217 people using the road for recreation : 190 walkers (44 with dogs, 8 with prams), 12 cyclists, 12 joggers and 3 horse riders. These were not in organised groups but simply people enjoying the exercise, the views and the fresh air in a safe and sustainable way – no need to get the car out. If the developments proceed then inevitably Mount Road, which is now a country Lane, would be widened and become a busy estate road and people would not want to use it for recreation. Instead of building along Mount Road, the brownfield sites and other sites within the town boundary should be developed first. These include the following sites which were shown on the original plans but now taken out : LE 219, LE073, LE067, LE147, LE037 and LE063</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about public rights of way • See para response to PO11 about landscape evidence <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p> <p>The 2016 Landscape impact study concludes that:</p> <ul style="list-style-type: none"> - LE127 to be of high landscape sensitivity; as development within the site would likely be visible from the PDNP and could therefore affect its setting - LE128A and LE128B are of medium landscape sensitivity and recommends that site-specific landscape mitigation measures could include advanced planting and landscaping on the eastern boundary, and limited building heights in the eastern half of the site. <ul style="list-style-type: none"> • See para response to PO11 on highways • See para response to PO92 about Leek housing requirements and windfall allowance <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. 							granted residential planning consent under SMD/2015/0523.
PO229 PO234	Miss Alicia Guy Mr Daniel Frith				Object	Building nearly 400 houses in the Mount area will totally ruin the lovely breathtaking scenery and peace and quiet that you get up there, increased traffic will spoil the area also. It could bring house prices down as at the moment it is such a lovely peaceful area and this no doubt will change	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 on highways • Property values are not considered material in planning law.
PO221	Mr Andrew Bodiam				Object	Like many others I have enjoyed walking on the Mount for 12 years and the planned housing site allocations in this area will completely destroy one of Leek's most valuable assets. Just take a walk along Mount Road and imagine what it would be like with the planned housing in place. I appreciate the Governments requirements but I am far from convinced that Leek's rural countryside should be sacrificed to their cause when there are so many brown field sites available. Furthermore, Leek is not a commuter town and I wonder if there is really the demand for 600 houses especially when those that are for sale take forever to do so. I would therefore ask you to think again.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO119 on housing needs evidence

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO682	Andy McGraw				Object	<p>Extension of the Town Boundary into the Natural Zone The following blocks identified as, potentially suitable housing sites, all appear to be outside the town boundary on the maps supplied by the Staffordshire Moorlands District Council, on this second housing consultation June 2016 Block numbers; LE 127, LE128a, LE140, LE142a, LE142b All the above mentioned blocks are therefore proposed to be constructed on the Natural Zone land surrounding the town of Leek.</p> <p>Public Amenity The small narrow lane known as Mount Road which travels between the A53 Leek/ Buxton road and A523 Leek/ Ashbourne road along which the following blocks appear, LE127, LE128a, LE140 and LE142a, are used on a daily basis as a public amenity. The lane is constantly used by locals and visitors to walk, ride and enjoy the views in relative safety at present. If the proposed housing goes ahead, with the number of houses planned on these sites, this road will undoubtedly suffer a dramatic increase in the number of vehicles using it, by averaging 2 cars per household, thus reducing its safety and relative quiet enjoyment. The views over the town of Leek and its surrounding countryside will also be affected detrimentally. I also note that the lane is included as part of the Staffordshire Moorlands Walks, advertised and mapped by the Ordnance Survey as a recreational path but not highlighted as such on the SMDC consultation map. Surely the increase in vehicular traffic would compromise this route. Other public rights of way, public footpaths, are either not shown or seem now to stop at the new development. When I raised the question of this fact at consultation the officer was unable to answer my query. In these times of austerity and the constant cut backs to local government, areas of free enjoyment and recreational use which also merit health benefits need to be conserved.</p> <p>Wildlife Concerns The blocks shown as, LE127, LE128a, LE140 and LE142a are frequently used by several bird species, especially during the winter months, as important feeding grounds. Some of these bird species are afforded special protection under the Wildlife and Countryside Act 1981 (W&CA81) as Schedule 1 protected species, identified by BirdLife International as Globally Threatened species and are listed as Red List species of birds of conservation concern by organisations, the RSPB (Royal Society for the Protection of Birds), the British Ornithologists Union, Natural England and the British Trust of Ornithology, to name a few. The birds in question are; Fieldfare Turdus pilaris, Schedule 1 W&CA 81 and Red List species Redwing Turdus iliacus , Schedule 1 W&CA81 and Red List Species Starling Sturnus vulgaris, Red List species The small block of land between blocks LE127 and LE128a is also important to wildlife in particular bird species. Although this land is not earmarked for development I feel that the disturbance of the development would compromise the species using it. This small</p>	<p>Note that there is not a 'natural zone' designation for open countryside in the Staffordshire Moorlands.</p> <ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about highways • See para response to PO11 about landscape evidence • See para response to PO11 about public rights of way <p>The consultation map is intended to depict summary information only; it does not for example illustrate public rights of way.</p> <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites, including ecological evidence: the Mount sites LE022/ LE127/ LE128/ LE140/ LE142A/ LE142B were subject to a Phase I ecological survey in 2014 and a later 2017 ecology study considered the scope for 'local wildlife site' (ie.SBI) designation for all preferred option sites. These studies set out ecological evaluations of the sites followed by recommended further surveys/actions in the event of future development. The Council would expect subsequent schemes to take account of this evidence; further Policy NE1 allows for the Council to require ecological mitigatory or compensatory measures where appropriate. Note that ecology</p>

						<p>wooded block is used during the winter months as an important winter roost for a small number of Raven <i>Corus corax</i>, a species again afforded a certain amount of protection. Species using this block to breed include, Little Owl <i>Athene noctua</i>, although not afforded any specific protection via acts of Parliament or listed as a concern yet, it is a species showing major decline, UK population estimated to be down by 24%, as highlighted by the RSPB breeding bird data 1995 – 2008. Great Spotted Woodpecker <i>Dendrocopos major</i>, Nuthatch <i>Sitta europaea</i>, are other examples of regular breeding species in this area. Due to disturbance I predict that many of these species will refrain from using this important area.</p> <p>Infrastructure As mentioned previously the numbers of new houses proposed in the areas of Mount Road and Thorncliffe Road, blocks LE127, LE128a, LE140, LE142a and LE142b, will put an enormous strain on the local infrastructure and road system. We all constantly experience the difficulties whilst travelling through the town of Leek caused by any one road closure. Both junctions from Mount Road can be difficult to negotiate now with the small amount of traffic using it with the A523 being particularly dangerous in its present form. Problems with access at both these junctions will be severely increased with the increased volume of traffic. At the original consultation July 2015 there was no mention of increasing employment opportunities even when the question was raised. I still feel that these concerns have yet to be addressed. It was implied but not confirmed that most of the individuals who would be residing in the new development would be commuter based, travelling to nearby cities to seek their employment. This surely is contrary to most local government policies that are tasked with reducing this activity to contribute towards climate change and global warming issues. These planned developments will also have a visual, probably a negative impact from the adjoining Peak District National Park as it will be observed from the iconic Roaches and the boundary road of Morridge.</p>	<p>evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites. According to the 2006 NERC Act, the Council must in its Planmaking, have regard to the purpose of conserving biodiversity.</p> <p>National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.</p> <p>A sustainability appraisal report is being published for consultation alongside the Preferred Options Local Plan July 2017. The SA Report considers the economic, social and environmental effects of proposed development site allocations including access to services and facilities.</p> <p>Both the 2015 site options consultation, and the 2016 Preferred Options consultation, mapped sites for various land uses across the District including housing, employment, and mixed uses.</p> <p>Notwithstanding current commuting patterns, the District as a whole has residual general employment land requirement, and Leek has a requirement (of around 8ha to 2031) and the Council must demonstrate that it will fully meet these along with its housing requirements,</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>There seems to be little or no mention of the use of brown field sites throughout the proposal. With the relaxation of planning rules for developing these sites should the Council look to these sites first. Removing deteriorating buildings and areas within the town that look unsightly and replacing with new developments would surely enhance the town, and, as they are close to amenities within the town centre, reduce the need for occupants to use their motor vehicles on shopping trips or evening entertainment. There are also a number of old mills and factories within the existing town boundary that could and should be transformed and upgraded into apartment blocks, as they have in other towns and cities in the UK, which would save those buildings from further degradation, provide perfect housing within the town and help to keep the overall feel of the town and its history.</p> <p>Conclusion In conclusion it is my belief that the proposed development and size of that development will have a serious and negative impact on the market town of Leek and its Natural Zone boundary. As a society in general we are losing touch with nature and the great outdoors. There are Government initiatives to reverse and combat this trend. Organisations, funded by the National Lottery, Government, County and Local councils including SMDC, are tasked to promote these initiatives assisting people to re-engage with nature. We are also constantly reminded these days of health, well-being and mental health issues that our society is increasingly subject too due to the pressures of our modern living and the need for places for people to unwind. With this in mind how can we justify increasing the urban zone into our countryside. We have a duty to protect iconic landscapes, open spaces and the biodiversity such as can be found within the Mount Road area for the future generations of this fantastic town, so that they too, can experience quiet and</p>	<p>to have a sound Local Plan in place. Government Policy promotes mixed land uses, subject to proper consideration of amenity impacts (such as noise). The Council works with neighbouring planning authorities under its duty to cooperate, to explore opportunities for the meeting of development requirements cross-border. However neighbouring authorities must also address their own development requirements. The Council consults with SCC Transport (regarding strategic impacts) during Local Plan preparation; and has regard to SCC's Local Transport Plan Integrated Transport Strategy for the District.</p> <ul style="list-style-type: none"> • See para response to PO92 about Leek housing requirements and windfall allowance <p>In relation to comments on economic impact, new housing has a proven positive economic benefit to an area, generated both by expenditure of construction industry and through longer term residential spend.</p>

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

PO676	Mr Jonathan Hulme				Object	<p>The mount is an important, free, extensively used recreation facility for Leek. The proximity of the mount to the town makes it easily accessible, providing a rural escape for walkers, cyclists, joggers and families alike. This invaluable resource contributes to the physical and mental health and wellbeing of all who use it. The mount provides panoramic views of the town and surrounding moor land including the Roches, and housing developments should not encroach on this. The junctions with the A53 and the A523 are also quite dangerous and unsuited to large amounts of traffic. Some form of traffic management would need to be added to these junctions, increasing congestion in and around the town to even higher levels than currently (which is already too high!!). This deters visitors to the town, reducing the amount of tourist trade. The area is also important ecologically and accommodates a variety of species, some of which appear on the UK Biodiversity Action Plan. This excessive allocation of sites appears to be national policy implemented at a local level without consideration of local needs and demographics. The infrastructure in the east of the town is insufficient to cope with a population influx. For instance, the schools and health facilities are already full. Housing development should be concentrated on brownfield sites in the town such as Davenport mill on Mill Street and the mill on Ashbourne Road. The developers who own these sites should be incentivised to commence development. Redevelop eyesores, don't diminish beauty spots.</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO11 on highways <p>Any new developments would need to adhere to design policies to ensure character of the District is maintained.</p> <ul style="list-style-type: none"> • See para response to PO682 on ecology evidence • See para response to PO119 on housing needs evidence • See para response to PO682 about Infrastructure Delivery Plan <p>The Council consults with SCC Education during Local Plan preparation, and SCC have indicated a need for additional first- and middle- school land provision in Leek resulting from the town's development requirements. These are laid out in the Preferred Options consultation document.</p> <ul style="list-style-type: none"> • See para response to PO92 about Leek housing requirements and windfall allowance <p>All Planning Authorities are eligible to receive New Homes Bonus which was introduced by the Government to reflect and incentivise housing growth in their areas. It is based on the amount of extra Council Tax revenue raised for new homes and is payable annually over a 6 year period.</p>

PO702	Mr John Burnett				Object	<p>This existing field forms an intrinsic part of the open space known as the Mount. As such it provides views over Morridge and out to the Peak district and for users of the Mount affords an area of outstanding natural beauty. Building on this plot of land would severely restrict the views available and would mean that use of the Mount Road as an exercise and recreation facility would be severely restricted. I would also object based on my concerns that building in this location would have severe impact on both existing infrastructure including roads and schools and would affect the ground water run off causing issues in other areas of the town. Building on this land would demonstrably damage the aspirations of the local community and would have severe economic and environmental consequences - completely at odds with the objectives of the consultation.</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about public rights of way • See para response to PO11 about landscape evidence • See para response to PO11 on highways • See para response to PO676 about educational requirements <p>The Council consults with utilities providers, the Environment Agency, and the SCC Lead Local Flood Risk Officer during Local Plan preparation. These bodies did not object to any of the Mount sites. The SFRA provides an overview of flood risk from all sources across the District, and will be used alongside formal EA responses regarding proposed allocations. Note that subsequent development proposals would be required to integrate sustainable drainage features into layouts, as required by the Flood and Water Management Act.</p> <ul style="list-style-type: none"> • See para response to PO682 about economic benefits of housebuilding
PO1320	Mr Stapleton	Leek And District Civic Society			Object	<p>I write on behalf of Leek & District Civic Society to protest in the strongest possible terms against the decision to include The Mount' Leek as a preferred option for housing development. This area is heavily used by recreational walkers and is the sort of local amenity which would be absolutely spoilt by additional building. Leek has few enough open spaces as it is and the loss of The Mount would be completely unjustifiable. Of all the site options in the Leek area, The Mount is the one which we feel should be absolutely sacrosanct and protected for the present populace and future generations.</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access <p>The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy.</p> <ul style="list-style-type: none"> • See para response to PO193 about option sites assessments and sustainability appraisal

PO1350	Mr A Birks				Object	<p>This morning whilst taking my constitutional stroll around mount road I happened upon a group of people considering the best plots to build houses in this beauty spot. One member of the group introduced herself as a local councillor. My heart sank as it became clear that some minds at least, against the wishes of the local people, the decision to build seems to have been taken. It is outrageous that the local community is once again to be ignored by those elected to serve us. Mount Road is a very important part of the social scene of Leek as local people use it daily to enjoy the countryside which is within their homes. It would be an ecological and social outrage to remove this facility from the people of Leek. This area is more important to the wellbeing of residents from across the town than any other area around Leek as it is their gateway to a relaxed walk in the fresh air in the countryside.</p> <p>Any development of this area would change the nature of Leek as it would necessitate the widening of the road, the installation of lighting and the uprooting of that special commodity trees. The Mount Road would be a major thoroughfare between the Ashbourne Road, and Buxton Road, Kniveden Lane would be a conduit between the same roads meaning heavy traffic rushing through the estate and there would be a problems caused by necessary construction of major road junctions at each end of the Mount Road. Local residents this would be a disaster. There is a concern too that, with the addition of a large number of houses in this area, the infrastructure at this end of town would be challenged beyond its ability to cope. Schools and doctors surgeries are already very full and recent queues of vehicles to get into town were horrendous during the roadworks in the town. Imagine the chaos should we add another 500 families in the queue.</p> <p>In the unlikely event that Leek should actually need extra accommodation, consideration should be given to brownfields or less intrusive sites first. There are several derelict mills which could be utilised for apartments or demolished for housing. The infrastructure of drains, electricity and gas is readily available near these 2 areas too. I appeal to the council to reflect on the wishes of those who elected them to serve their needs and reject the idea of developing this area and retain it for enjoyment and health of the many people of Leek who appreciate it.</p>	<ul style="list-style-type: none"> • See para response to PO11 about public consultation and Statement of Community Involvement • See para response to PO11 about open spaces and countryside access • See para response to PO682 on ecology evidence • See para response to PO11 about highways <p>Issues such as external lighting in schemes can be controlled by the Council's amenity policies. PO963	Mr Alistair McLoughlin				Object	Do not build on.	Comments noted.

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1142	Mr R Harrison				Object	<p>I have recently looked at the site plans and talked to one of your officers concerning the location: This is a narrow road, used by many recreational purposes such as walking, cycling The views over Leek Conservation area and its surrounding area are 2nd to none both night and day There have been lots of houses built on the east side of Leek in recent years mainly off Ashbourne road. As the majority of people travel to Macclesfield, Manchester and Stoke on Trent to work, this means they have to travel through the centre and often Leek is gridlocked at busy times The exits from the Mount onto Buxton and the Ashbourne Roads are both very narrow and difficult to negotiate. Schools at the end of the town are already full to capacity and young children have to be taken across Leek early in the morning and collected in the evening. Drs Lists are so full. We are told that some of these houses are possible affordable housing. What does this mean? There are plenty of small terrace houses on the market which I would consider as affordable. So do we need more? In fact do we need a 1000 new houses to in Leek at all anywhere? If so I would like to think that there are possible sites in Leek - West End could be given consideration before further action is taken. Leek is a beautiful small town with easy access to countryside. By allowing building on The Mount Road that access will be diminished as more of our green fields turned into housing developments and country roads become clogged with vehicles. Where will it end?</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about highways • See para response to PO682 about Leek employment land requirements • See para response to PO193 about option sites assessments and sustainability appraisal • See para response to PO682 about Infrastructure Delivery Plan • See para response to PO676 about educational requirements <p>The Council consults with its Housing Officer when setting definitions of 'affordable' in relation to affordable housing. This usually equates to a percentage of open market value which represents the upper limit that the house can be sold/resold for.</p> <p>An element of affordable housing will be required for all major housing schemes in the District, as set out in Local Plan Policies. The Council may also require an element of starter homes, and self-build plots on such sites. The Council's housing/design policies and the NPPF expect that housing schemes provide for variation in design; and a mix of house types to meet differing socio-economic needs, including affordable housing.</p> <ul style="list-style-type: none"> • See para response to PO119 on housing needs evidence • See para response to PO92 about Leek housing requirements and windfall allowance <p>Note that none of the Mount sites falls within the Green Belt, whereas the western edge of Leek has Green Belt status. Whilst Councils can allocate within the Green Belt National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). The Council recently completed a Green Belt Review which</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
							assessed the suitability for retention of all areas of Green Belt in the District, against the five Green Belt 'purposes' set out in the NPPF. This will be used by the Council alongside other evidence in progressing its Local Plan. The NPPF also allows for consideration of development proposals that would represent 'limited infilling', or in some cases redevelopment of 'brownfield' sites in the Green Belt.
PO946	Mr Chris Clark				Object	Building houses at this location would permanently destroy the rural aspect of Mount Road, which is used by walkers on a daily basis. Mount Road is easy to access by residents living towards the north and east of the town, and is an irreplaceable asset to the people of Leek. If houses were to be built here, most residents would work in Stoke-on-Trent (or Macclesfield) and therefore commute through Leek's town centre, adding to existing congestion.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO682 about Leek employment land requirements • See para response to PO11 on highways
PO1574	Mrs S Chauveau				Object	I wish to firmly object to any housing development on the mount. It is a iconic beauty spot, Leek's gateway into the open countryside and has been popular with walkers, joggers, cyclist and horse riding for generations and should be protected for future generations. I strongly recommend further consideration be given to the developing the empty mills, brownfield sites and making use of the many vacant homes in the Moorlands before surrendering our precious Greenfields to hungry developers	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO119 on housing needs evidence • See para response to PO92 about Leek housing requirements and windfall allowance
PO1577	Mr PJ Chauveau						
PO1683	Mr N A Brundrett				Object	<p>I am writing to protest against the latest version of the site allocation plan for the SMDC. The site references of particular interest are: LE022, LE127, LE128a, LE140, LE142A, LE142B. The grounds for that are:</p> <p>Loss of important local amenity – The Mount is a very important open space close to the town.</p> <p>Visual impact – restrict important skyline and further afield. The proposed sites are near or run on particularly at night with street lighting.</p> <p>Impact for infrastructure – primary schools in particular (Leek 1st school and Beresford Memorial School) will struggle to keep up demand and the situation where some children already have to school in the west of Leek will become more common. Mount Road is a route of Staffordshire Moorlands Walk a very popular</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO1350 about streetlighting • See para response to PO676 about educational requirements • See para response to PO11 about public rights of way

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
4 PO1659 PO4770 PO4758 PO4754	Panek Miss J Panek Mrs A Lomas Mr & Mrs P & J Whitehurst Miss L Whitehurst					<p>route for Leisure activities such as running, cycling and walking.</p> <p>High quality Landscape – unsympathetic to landscape and the character and quality of the area. Urbanisation of the country lane that is mount road – if all 6 developments proceed then the 500 houses would be constructed. Mount Road would be linking the Ashbourne and Buxton Roads. The spatial distribution of the proposed access sites across leek is unbalance – there will not be sufficient demand to build all of these houses on one side of the town so the council will not meet its housing needs in any event. The Mount is, and has been a great source of pleasure for many people over years. It needs to stay that way in order that the future generations have as much enjoyment out of this as our generation has.</p>	<ul style="list-style-type: none"> • See para response to PO676 about design policies • See para response to PO11 about highways <p>The Council is undertaking Local Plan viability work which will consider the viability of preferred option sites.</p>
PO1686	Mr David Morgan				Object	<p>I am writing to express my strong objection to the proposal to build houses on the Mount. I specifically object to the building off houses on sites: LE022, LE127, LE128a, LE140, LE142A, LE142B. When I first heard about the proposal to build in this area. I was genuinely shocked and still cannot believe that the proposal have been submitted to build on such beautiful landscape which has helped to shape leeks identity as Queen Of the moorlands. I work in the local community and I have not heard a single resident of Leek express support for these proposals – they have expressed deep anger and concern. I live locally to the Mount and regularly take walks there and it is very clearly, a popular destination for walkers and cyclist. However, I do not feel that this is area that is solely of Leek by these who live in its vicinity. I believe that the mount is an area that the people of Leek genuinely cherish and it would be a tragedy if a major housing development were built along it, The Mount does provide an important amenity for local residents including Hargate estate. I feel it would be unacceptable to build houses on it, spoiling the unspoilt beauty of the area and leading to a huge increase in the traffic which would obviously cause a major hazard to walkers and cyclist. I feel it is unacceptable to deprive residents of a very built up area such as Haregate estate of the opportunity to enjoy the beautiful country side and open space this that the mount offers. If this proposal is passed then I feel that the character and identity of Leek will be very adversely affected and this will have a very detrimental impact on its image in terms of visitors and attracting business</p>	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access • See para response to PO11 about highways • See para response to PO682 about economic benefits of housebuilding • See para response to PO676 on design policies

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1283	Mrs B Ward				Object	I write once again to protest against the proposed development of housing along and off mount road. We have already had 2 public enquires and each time the inspector has upheld the decision not to allow these fields to develop along mount road. This is a great amenity for the town, especially for residents this side of leek. I feel that we have been left a short stretch off mount road but with all the roads going off it Mount Road itself will probably have to be widened and will become a bi pass for traffic between Buxton Road. Walking along a country lane enjoying the views. Do people walk as much on the other side of town? Aren't there still places for the development within the town? Not touching our open spaces. Where are 600 new houses on Mount Road going to work?	<p>The Council must justify proposed land allocations which form part of its new Local Plan to planning inspector during public examination of the Local Plan. The Inspector must consider the 'soundness' of the Plan as per para 182 NPPF. Note that as part of this process the Council must demonstrate that it meets its objectively assessed development requirements for housing (and other land uses) for the District.</p> <ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO11 about highways • See para response to PO682 about Leek employment land requirements
PO1470	Mrs G Armstrong				Object	As a resident of Moorland Road since 1975, I write to you to express my concerns over the appalling plan to yet again to destroy an area of the town much loved and frequented by its residents for countless generations. I can assure you that the contents of the letter not only reflect the views of me and the residents of moorland road and Kniveden Lane but those of leek in general. The proposal to build 400 houses on the Mount came as a shock to the town. Whilst I am not opposed to the idea of providing some housing In the Leek area, I cannot equate with the requirement for the number your department are planning. As regards the location, how can you say that a beautiful location like the Mount is in need of development when there are numerous locations that in the area that are an eyesore and would be more than fit the bill for re development? If your department were to take the time too canvas the people of leek you would find that it is considered an asset to this town. The Mount is an area of outstanding rural beauty with great views across the town, supporting an abundance of wildlife whose habitat would be destroyed if the plan goes ahead. It has long been a source of relaxation, leisure, exercise, and even welcomes retreats for courting couples and families with children or people exercising their pets can be seen walking the Mount in complete safety without the fear of being subjected to danger from large numbers of cars. This would change if the whole scheme goes ahead. Is it right that future generations should be denied the pleasure their forebears derived from this beautiful road, With an average of each household owning 2 cars each the paln to build 400	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO119 on housing needs evidence • See para response to PO11 about landscape evidence • See para response to PO682 on ecology evidence • See para response to PO11 about highways • See para response to PO1142 about affordable housing • See para response to PO11 about public consultation and the Statement of Community Involvement

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>residents could unleash about 800 vehicles all trying to support those numbers. Mount road would be saturated with vehicles all trying to leave either via the junction with the A523 Ashbourne Road or the A53 Buxton Road. Both roads are very busy main roads. After frustration of accessing these knock on effect would choke the town centre which struggles now at certain times to maintain a smooth flow. No doubt the un adapted and unmade section of Kniveden Lane would be upgraded encouraging it to be used as a short cut between Ashbourne Road and Buxton Road. The only thing that stops it being a rat track now is that it is unmade and has ruts and pot holes. Also of concern is that with this sort of development you re require to provide a proportion for social housing. We all know who are housed in these and what effect it has on the surrounding area. I need say no more. Can you explain why there seems determination within the planning bodies to destroy what is beautiful and precious to the people of Leek with total disregard to the preservation of the environment and wishes of the Leek populace. If they want to improve this town why don't they concentrate on some off those areas in dire need of redevelopment and of which there are many in this town. I along with the majority of the other house owners in the vicinity, share at the lack of the thought the has obviously not being thought that has gone into this project. I ask the question; have any of the councillors or those on the planning dep actually bothered to walk to location, to see for themselves what they would be destroying and ask residents for their thoughts. No, I doubt it very much if this is the case.is it just a figure on the map to them? I understand that the majority are not from leek and so don't really have its best interests at heart. These so called councillors were voted in to represent the towns folk and listen to their view. This has not obviously been thought out thoroughly and it makes me wonder what sort of people will be running the council. Is it yet again something to their advantage and not that of the town. Their priorities do not appear to be the people of leek there to represent them. I make this representation not only on behalf of those directly affected but also the people of leek who are totally opposed to this desecration of one of the most beautiful and well-loved areas.</p>

PO1522	Ms Angie Guest				Object	Detrimental impact on an important & much valued amenity area. The location provides a green space accessible to and used by the wider population of leek for walking cycling and jogging. The mount follows part of the route of the Staffs Moorlands walk 'Leek Landscapes' managed by the SDMC and marked on the OS 1:25000 map. Described in the leaflet published by the district council as offering a walk 'through attractive farmland with interesting views over Leek. This would be compromised by the development. The panoramic views from The Mount over the skyline of Leek and countryside beyond are 2 nd to none. These would be severely restricted. The scale and the unbalanced distribution of this development sites, concentrated in this part of the town will lead to increase traffic in making the mount a busy road between the Ashbourne & Buxton roads as well as loss of a rural environment outside the town's boundary.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO11 about public rights of way • See para response to PO11 about highways
PO1500	MRS KAREN BARKER				Object	I do not believe that it is necessary to extend the town boundary into farmland as there are still many available brownfield sites within the locality. There is much greater need for jobs/employment as priority in the town if people are to be enticed to come to live here by large scale housing developments. There are presently not enough jobs locally to adequately provide for the current housing occupants. There is likely to be an increased need for Housing Benefits affecting the local economy together with significant increased pressure on infrastructure due to need for travel in and out of the area for work. It is also important to note tourism is a significant driver to the local economy! Therefore the town gateway, especially from the Peak Park Buxton road A53, needs to be rigorous protection from the urban sprawl in order to maintain the 'Queen of the moorlands' identity. The point of entry into Leek from A53 Buxton Road is the most attractive picturesque and Tourist Route. It is also highly utilised public amenity for local residents of Leek who regularly make use of the whole area incorporating the A53 towards Tittesworth Reservoir/Blackshaw Moor, along Thorncliffe Road and its adjoining lanes, the Mount Road, as a place to exercise by walking, rambling, cycling, horse-riding, dog-walking, sightseeing, picnicking and general enjoyment of for health and well-being. The proposed areas particularly as it approaches the a53 Buxton Road junction with Thorncliffe Road and The Mount Road, is immediately adjacent to a landscape area which presumes against intrusive developments in order to protect its historic landscape nature. I would personally feel that the Special Landscape Area and environs ought to receive the highest priority protection. The designation encompasses the fact that it is special in nature and cannot therefore be replaced once lost or damaged. There is a number of brownfield sites within the town which could be very effectively used for housing development. For some reason? These are not shown on the accompanying consultation maps. However from attending a consultation meeting the existence of several sites a is a matter of common	<ul style="list-style-type: none"> • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO676 about design policies <p>Green Belt is a long established designation that serves a number of important functions in separating settlements, and preserving 'openness'. Whilst Councils can allocate/make boundary amendments within the Green Belt, National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). Note that landscape quality/character, and public access characteristics, are not in themselves 'purposes' of Green Belt laid out in national guidance. The NPPF allows for consideration of development proposals upon 'brownfield' Green Belt sites.</p> <ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access • Note that since adoption of the 2014 Core Strategy, there is no longer a 'special landscape area' designation. • See para response to PO11 about highways • See para response to PO682

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

						knowledge along with the fact that these would be 'the preferred option housing sites' in view of the residents of leek. There are also pockets of green belt land (designated such primarily for the purposes of town separation and quite often having no particular beauty or amenity), which in common with other towns in the country could be effectively utilised to expand the town boundary with selective use and sensitively to the environment. This would be better than destroying the areas which are highly valued by the Leek Community for beauty and recreation and which give the town of Leek its identity. The proposal to build almost 400 houses off the junction of the A53 as it joins Thorncliffe Road and The Mount Road is a major intrusion into the public amenity and is unsupported in terms of the additional infrastructure requiring a need for development of roads, sewers, schools etc. The proposal will is completely unbalanced as it places virtually all the housing requirement? Unjustified along 1 narrow lane at the most flagship side of leek renowned for its visual beauty and recreational amenity. Please utilise the brownfield sites and protect leeks heritage and inheritance!	<p>about Leek employment land requirements</p> <ul style="list-style-type: none"> • See para response to PO676 about new homes bonus • See para response to PO119 on housing needs evidence • See para response to PO193 about heritage impact considerations • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO676 about educational requirements
PO1401	Mrs Smith	M			Object	With regard to the proposed 400 plus houses to be built on the mount, I would like to express my concerns on the matter. I can't help but for see the problems 400 to 800 cars will create, trying to leave Mount Road to gain access to the Buxton Road. They will be queuing up! Most families these days have at least one car some have two. Mount Road was not built for such traffic	<ul style="list-style-type: none"> • See para response to PO11 about highways
PO1711	Mr Carding	G			Object	I would like to object to the proposed housing sites on Mount Road leek. The Mount has been a historic to the people of leek for generations for its 360 degree panoramic views of natural beauty. Being born in Leek I have walked over the mount all my life and always enjoyed the peace and quiet surrounded by the countryside views which are irreplaceable building housing in this area would also destroy the wildlife and a result in the loss of open space. This road is unsuitable for the large volume of traffic which would be generated by all the new houses and is narrow in places with dangerous junctions at both end of the road. The roads in this part cannot take any more traffic. Please find more suitable site within the town, if we keep building out into the countryside where will the border of Leek End? Ashbourne	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access • See para response to PO682 on ecology evidence • See para response to PO11 about highways
PO1486	Mrs Lane	C			Object	I object to any housing being built in this area. It is an area used by many people for walking etc. – many for health reasons e.g. for me. We must keep our open spaces that are in walking distance of our town, once lost – gone forever. Don't let us loose it	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1698	Mr Michael Owen				Object	My wife and I would like to tender our personal objections to any proposed house building along Mount Road Leek. We don't feel that the area has infrastructure to cope with the number of houses proposed and would spoil the landscape of a very popular and picturesque area used extensively by Leek residents	<ul style="list-style-type: none"> • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access
PO9421	Mr Anthony Clark				Object	<p>LE142b, le142a, le140, Le128a, Le022, Le127 I write to object to the proposal to all the building of housed along mount road as set out in the preferred options doc. My 2 main objections are based on the implications for the environment and the traffic.</p> <p>Environment – For generations Mount Road has been a favourite walking/cycling/horse riding route for many residents of Leek. It is easily accessible (not requiring a car to reach it) and is quiet safe place by way which can be used by all people of all ages in all weathers. The major attraction is walkers are the outstanding vista the road provides both town and county. The proposed building at the north would destroy the turn the road into a noisy, busy thoroughfare, that would be unsafe and unpleasant for walkers and all over leisure users. The proposed housing at the southern end of the road would mean the views of the town would be lost. At a time when all our members of society are being encouraged to take more exercise the destruction of the mount is free, natural gym, seems very short sighted. Immediate area Mount road is not a wide enough area to safely take a major increase in traffic. The existing access points to this area off Buxton Road and Ashbourne Road are adequate for the present level of traffic but are wholly inadequate and dangerous for the high volume of vehicles. If as is most likely, Kniveden Lane was upgraded at its top end to allow access by vehicles the consequences for its junction with Ashbourne Road causes minimal amount of problems. An increase in traffic will queues will lead to frustration and rash decisions by drivers. This in turn would lead to calls for the removal of the trees and the destruction of a wonderful entrance to the town. Town Residents living in the proposed housing development will need to work and shop. Where will they go to do these activities? Traffic The consequences of the traffic of building many houses both in the immediate area and the town as whole will be very marked. Work Very few work in Buxton or Ashbourne which re easily accessible from the mount. The vast majority work in the town centre, the barn field's industrial estate or on Cheadle road. Those commuting out of the town centre will be heading mostly to stoke Macclesfield/Manchester. All these people will have to drive through the town centre at least twice a day at peak times as there are no alternative routes they can use. Shopping To reach the two large supermarkets in Leek (Morrisons and Sainsbury's) residents of the Mount Road area would be forced, by the road system, to travel through the centre of town. Those shopping</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about public rights of way • See para response to PO11 about landscape evidence • See para response to PO676 on design policies • See para response to PO11 about highways • See para response to PO1350 about tree protection • See para response to PO682 about Leek employment land requirements • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO193 about option sites assessments and sustainability appraisal <p>The 2016 Landscape impact study concludes that:</p> <ul style="list-style-type: none"> - LE142B is of high landscape sensitivity and development could be visible from the peak Park, and the rural approach to Leek; - LE140 is of medium landscape sensitivity and site-specific mitigation measures including boundary landscaping, and controlled building heights, are recommended; - LE066 is of high landscape sensitivity owing to its location, despite the presence of site screening. <p>Note the findings of this study form part of a wider evidence base to support SMDC's Local Plan. 						<p>further afield will, in the main, be heading for Stoke and Macclesfield and again will need to travel through the town centre.</p> <p>One look at the map would tell anyone that the major building works to the east of leek will cause major traffic problems. If building must take place on the mount, though I doubt there is a need, the least environmentally damaging site LE142b and LE140. Is there not a possibility of the building on the site existing site of Kniveden Hall (which is screened of by trees) and the old Social Services building? These sites would be the least invasive environmentally but would still generate major traffic problems both locally and still generate a lot more traffic throughout the town. In 2006 New York took the far sighted decision to turn a disused elevated railway in a linear park (the high lane). Would that Leek had planners and leader of similar vision to develop mount road into a high lane for the benefit all off the community</p>	<p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <p>The Council's emerging Local Plan already contains a policy (T2) protecting existing railway lines from development; and supporting recreational re-use etc. The Mount does not contain any such routes.</p>

PO1766	Mr and Mrs W Lovatt				Object	<p>LE127, LE069, LE128, LE140, LE066, LE142a, LE142b We would like to submit our comments concerning the above consultations with the specific regard to leek east. These consultations with specific regard to leek Ease and the area of mount road. This is a semi-rural area outside the town development boundary. One of the attractions of this area of leek is that the boundaries for development are very closely defined. This means that within 10minutes walk of the town centre you have access to open space, which makes the mount area very popular for leisure activities such as walking jogging and cycling. This is a important when considering what opportunities there are for leisure and exercise so close to town. The fields provide a home for various types of wildlife and this together with the farm animals that graze them, provide access to a nature very close to the heart of leek. The views from the mount are spectacular and largely unspoilt. Any developments of any of all the listed developments of the type proposed would totally alter the area, as it has with the Buxton Road end of Mount road. If all the development listed above were to proceed. In excess 400 houses would be constructed on what is pleasant open countryside. The access along Ashbourne Road and Mount road provide a road infrastructure that would be totally inadequate with the volume of traffic generated by such a development especially on the bad junction where mount road meets Ashbourne road near Poplar Service Station.. Access via the already existing estate off kniveden lane and or High View road and Moorland Road would be impossible to sustain, given the narrow nature off the roads in question and the cars parked on either side of the roads in what is a already busy residential area. Creation of a rat run would have serious consequences Public transport via the bus service would be totally inadequate. There are significant areas of land that would be ideal for development that are presently brown field sites within the town centre and the town development boundary. Development would be ideal of these sites would not impact on local wildlife and leisure activities and would be more sustainable as they would result from a increase in traffic in outlying areas. Given to the employment situation in Leek, a large proportion of these would inevitably be homes for communities for the potteries conurbation and or Macclesfield and greater Manchester. This would ruin the character and community feel of the area. Given the recent headlines concerning the lack of affordable housing in rural locations, more consideration should be given this type of development, rather than encouraging urban sprawl which would ruin the character of this town.</p>	<p>Note that the Preferred Options do not currently include site LE069.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO11 about highways <p>Leek is already served by a number of frequent or less frequent bus routes, connecting to centres such as Hanley, Cheadle, Buxton and Macclesfield. A number of these use main arterial routes such as Buxton Road /Ashbourne Road /Springfield Road. In some circumstances, major residential developments may be required to contribute to improved bus routes/bus facilities in accordance with emerging Local Plan Pol T1/Staffordshire Local Transport Plan.</p> <ul style="list-style-type: none"> • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO682 on ecology evidence • See para response to PO682 about Leek employment land requirements • See para response to PO676 about design policies • See para response to PO1142 about affordable housing

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1559	Miss A Hampson				Object	Any development in the Mount on proposed sites will be visible from some distance, thereby impacting not just on leek, but also the wider area. The infrastructure is inadequate I am not convinced the possibility of infill sites in leek	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO682 about Infrastructure Delivery Plan • See para response to PO11 on highways • See para response to PO92 about Leek housing requirements and windfall allowance
PO1554	Mrs G Webster				Object	<p>I have never protested before but I feel compelled to write this let reg the proposed developments across the mount. When I was young I lived on Haregate Est and many times my parents took my siblings and I across the mount it was something we enjoyed seeing all the farm animal and wildlife. As I got older I would still walk the mount and dream of one day owning one of the houses which were only a couple of minutes' walk away from being in the countryside. That dream was realised in 1976. Now I am retired it is wonderful to be able to stroll round the mount each day. My husband twice a day come rain or shine, and able to do just that take in the views or have conversations with people we meet, not just from this area but from other parts of town. It is good for the soul as well as the mind. It is a marvellous asset for the town for young and old alike a great place to relax and exercise. It is precious and should be protected for future generations 'never know what you have got till it's gone' comes to mind as was the case with what was a beautiful roundabout which stood proud at the top off Derby St. Do we need so many more houses in leek if so we do not build on the field opposite the cricket club on Macclesfield Road which would not have the catastrophic impact of hundreds of houses on the mount or why not build them on Blackshaw Moor where there is already a small estate. I hope this marvellous asset treasured by so many can be saved for the town and the people of Leek.</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO119 on housing needs evidence • See para response to PO1142 about western Green Belt <p>Blackshaw Moor is identified as a 'smaller village' in the Council's emerging Local Plan and should only attract a limited amount of additional housing within or around the built up area. Note that Anzio Camp received planning consent for erection of extra care housing, live work units, ancillary social centre and facilities building and change of use to holiday park in November 2015.</p>

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1515	Mrs J Pointon				Object	<p>We are writing to vehemently object to any planned housing on green fields along the Mount. This not only is a beautiful area on the edge of the town but also sustains farming and livestock crucial to our economy. There are within the town, sufficient brownfield sites and redundant mills to accommodate any development not to mention the 182 houses currently for sale within Leeks boundary together with the 56 properties up for rent. We would like to ask the council where these people are going to come from to buy these additional properties and where are they going to work being as Leek has a very little industry left. One other thing that has come to our attention is why is there is one rule for some and another ruled for someone else. I refer to the issue involving C & R Haulage at Werrington. A company which deals with agriculture and the transport of livestock who have been seeking to obtain planning permission to park their lorries on a small holding in the area to enable them to look after any livestock they have overnight but who have been refuses this application on the grounds that the property is green belt land by ac council that is contemplating building houses outside environs of the town on green belt land. There seems to be no consistency whatsoever to your planning guidelines and we ask that this should be explained.</p>	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO119 on housing needs evidence • See para response to PO682 about Leek employment land requirements <p>All planning applications must be assessed against current Local Plan Policy and the NPPF. The reasons behind individual planning decisions can be viewed at http://www.staffsmoorlands.gov.uk/smdc-aurora.</p> <p>The Council must justify proposed land allocations which form part of its new Local Plan to planning inspector during public examination of the Local Plan. The Inspector must consider the 'soundness' of the Plan as per para 182 NPPF. Note that as part of this process the Council must demonstrate that it meets its objectively assessed development requirements for housing (and other land uses) for the District.</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1535	Mrs C Whitehurst				Object	<p>I am disappointed that local objections to development along Mount Road leek have been ignored by those who claim to represent us, and I must once again voice my objections. The Mount is one of our most beautiful and well-loved amenities for local walkers, cyclist, runners and dog walkers. A short walk from town which I personally use at least 3 times a week whenever I walk around I meet at least 10-12 others. It is also a safe route to take children of all ages to appreciate the country side, farm use and wonderful views – all of which will disappear. Many habitants for small animals and birds will go along the grass verges and lost trees, so much for our greener landscapes. Who is going to buy these obviously very expensive houses not my children who can hardly afford to rent never mind buy? But I'm sure the overspill from Macclesfield, Manchester + Buxton will appreciate these cheaper houses than they can afford there. Where will all the children go to school our local ones are full and have little or no space to expand, more Drs and Dentists will be needed. Traffic along the mount will be busy. It has already increased during times of the road closures repairs etc, and now this new short out has been found it will continue to be used. As there are now plans in place to convert several old apartments such as old Mills in the town a large number of houses will not be needed by local people and smaller brown field sites can be found in and around leek for a much more acceptable amount rather than such a large estate. If the £1000 per house built is so tempting why not just ask us for more council tax – I'm sure most people would be willing to pay to save this precious area for our children and grandchildren. I would. Please please listen to our objections regarding this atrocity in our wonderful town.</p>	<ul style="list-style-type: none"> • See para response to PO11 about public consultation and Statement of Community Involvement • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO682 on ecology evidence • See para response to PO1350 about tree protection • See para response to PO1142 about affordable housing • See para response to PO682 about Leek employment land requirements • See para response to PO676 about educational requirements • See para response to PO11 about highways • See para response to PO682 about Infrastructure Delivery Plan • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO676 about new homes bonus
PO1543	Mrs C Keates				Object	<p>The Mount is a very important area for the town of leek. This whole area is an important amenity area for the town – it was promised a few years ago that there will be no further development after the completion of Mountside gardens. Further developments' will destroy the open views of the Morridge from the town. Some of the areas highlighted for development was gifted to the town presumably to protect them and for agricultural use. Development of the Mount will lead to greatly increased traffic on what is basically a country lane. Safety issues at both junctions. The importance of the local people who use it. Young walkers, runners, joggers, cyclist, horse riding, dog walkers. These include singles, couple. Family groups and organised walking groups aside. We urge you to look at these plans very carefully before you decide to ruin this beautiful area. Surely there are other smaller areas which could be utilized for future needs.</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO11 about highways • See para response to PO92 about Leek housing requirements and windfall allowance

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1489	Ms Dawn Garrett				Object	I write with reference to the planning proposals along The Mount in Leek. I moved to Leek last August, the countryside being one of the big draws. I'm dismayed to find that my favourite dog walk is earmarked for extensive development. The absolutely magnificent views would be lost forever. The birdsong drowned out by the inevitable increased traffic load. The wildflowers at the side of the road and the sheep peacefully grazing, all gone. The creeping urbanisation of such a lovely country town is a big worry. Surely it would be better environmental sense to deal with the falling-down mills and derelict housing in the town before building any further? Regeneration is a much more modern concept and would further revitalise the town itself. For me and my family access to the views, the fresh air and the wildlife is balm against our stressful and hectic working lives. I live on Ashbourne Road so this is not NIMBYism at work, it is a genuine plea to save this lovely area for everyone. Now and in the future.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO11 about highways • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO682 on ecology evidence
PO1584	Mr C Chauveau				Object	I wish to firmly object to any housing development on the mount as I love to go running there with my dad and really enjoy the view into open countryside.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence
PO1587	Mr J Jones				Object	I wish to firmly object to any housing development on the mount as I often go there cycling and walking there with my family and I think it is very special place and would be completely spoiled by houses.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence
PO1593	Mr L Emerick				Object	I wish to firmly object to any housing development on the mount as this is a natural beauty spot with open views into the countryside and it should need to be protected. My family often take our dog for walks there and feel it should be protected	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence

PO1604	Mr J Mays-Woodhead				Object	I wish to firmly object to any housing development on the mount as I often go there cycling and walking there with my family and I think it is very special place and would be completely spoiled by houses.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1695	Ms K Machin				Object	I would like to object to the proposed housing sites on the mount road, leek as outlined in the preferred options site and boundaries of staffs moorlands local plans – sites LE127, LE128a, LE140, LE142A, LE142B. This area should not be built on as it will ruin the lovely views over Leek and the Horizon and has been enjoyed for generations by walker's cyclist etc, who on a nice day vastly outnumber cars on this starch of road. This road also appears to be outside the site boundary. By building approx. 400 houses it will no longer be a country walk yet another housing est. The council should be committed to maintaining green belt land and encouraging people to get fresh air and exercise in an age increasing obesity. There are surely plenty of empty mills and brownfield or former industrial sites within the town which could be developed for housing instead of building on open fields. There is also no development proposed in the west end of leek-why not? The planners need to go back to their drawing board and identify more suitable sites across the whole leek instead of concentrating on the one unsuitable area. Please save the mount	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access • See para response to PO1142 about western Green Belt • See para response to PO92 about Leek housing requirements and windfall allowance
PO1709	Mr C Hoggarth				Object	Ref: LE127, LE128a, LE140, LE142A I am writing to you with regards to you with my objection to the proposed sites above for housing development that I consider will result in loss of countryside e an recreational amenity to local residents. My objections consist of 3 main concerns: The loss of green field sites. The enclosure of the open space that is mount road. The loss of recreational amenity of Mount Road through the amount of additional traffic. The areas of land in question is border Mount Road, a low traffic route with broad open views across countryside to the east over the town of Leek and beyond to its west. Mount Road well known locally for the pleasurable route for exercise it provides and is much used by local residents and visitors. Enclosure with housing development would turn an open country lane into just another urban roadway and would destroy the views reducing the attraction of the area. The associated increase in the traffic would severely reduce the safety route. I consider that the cumulative effect would be to destroy the area as a recreational amenity. Of the area surrounding the current town boundaries, I think that this is one that would constitute the greatest loss, both with respect to the beauty of the outlook and the loss of its use for recreation. Mount Road is a beautiful location; visitors jealously comment how lucky I am to have such an area on my doorstep. To destroy it would be a disgrace and I hope you will reconsider the proposals	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO11 about highways • See para response to PO11 about landscape evidence • See para response to PO11 about public rights of way

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1702	Mrs J McGuinness				Object	<p>Ref: LE127, LE128a, LE140, LE142A. As a local resident in objection to the above proposed plans For the Mount in Leek. I object to the scale of development for this beautiful country lane on the outskirts of our town. It is a area of outstanding beauty, boasting much wildlife, flora and fauna. The woodland and hedgerows are home to valued wildlife and birds. In addition there are farm animals, bats, foxes, stoats, mice all of which inhabit this area has been identified over existing brownfield sites in town. Could the planners not relax the rules and allow sites in town that have been previously been refused for development? Do we really need 400 houses? Do we really need another 1 st school, at this end of the town? I am dubious as there are as many properties in the town already for sale, unoccupied or derelict. Where are all the people coming from to buy these 400 houses? My main objection is the sheer volume of traffic. The roads are totally unsuitable to accommodate the amount of traffic that's will be generated by a school and 400 houses. This development has the potential to create at least 800 cars from the proposed housing development (average 2 cars per house hold) and even more generated from schools with staff and pupils, including the cars school buses . The lane is already suffers from many vehicles using the lane, as a rat run and this will increase. In addition to being a resident The Mount I am also a daily dog walker and I am concerned for the safety of those using the lane for leisure, i.e walker, dog walkers, joggers, mums with little ones, cyclists, horse riders and those coming to sit on the seats provided to take in the beautiful views. If development goes ahead these activities will come to an end and once again our green landscape will disappear with the town boundaries being pushed out further and further. Where will local people be able to go without getting into these cars and causing more traffic congestion on the roads, and what about those without transport? The road junction at either end of the Mount are not without difficulties. The Buxton Road junctions Is a staggered cross roads with Novi Lane and needs to be approached with caution. At school times It is used by parents/carers/school buses. I cannot imagine the chaos that will transpire if another school is permitted on the Mount – it will certainly become a lot busier and more dangerous. Do we really want to put our children at risk? Walking to and from school will not be a solution as it will be to dangerous. Let us not forget that in additions to this road junction, a short distance down the same road Churnet View transport comes onto the Buxton Road via Abbotts Road, and Leek High/The Meadows/East St 1 st School all feed into and use Buxton Road via Springfield Road. Each school has buses/taxis and cars transporting pupils and the volume using the roads at the same time of day has potential to cause bottle necks on this busy main road. Another school shall mean 7 school all using the same road – local residents will have to keep of the road to the volume of traffic down. The other end of the mount leads to Ashbourne road and this junction not only has obscured visual</p>	<p>It is not considered that development of this particular site would be out of proportion with the rest of the town. Any new development taking place will be subject to design policies contained within the new Local Plan; and having regard to the Council's landscape impact evidence.</p> <ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO119 on housing needs evidence • See para response to PO676 about educational requirements • See para response to PO11 about highways • See para response to PO11 about open spaces and countryside access

						access but a difficult angled junction. Surely this is totally unsuitable to transport large volumes of traffic which will be generated from 400 houses and a school! If a alternative junction is proposed this can only be achieved by sacrificing another green field. The Mount, Ashbourne Road are all used by big lorries, buses, tractors, trailers, farm stock to and from stock market, farm machinery, lorries transporting goods to and from Buxton, Ashbourne, and Surrounding areas. These are very busy roads! Can we really add to this without causing major problems? I urge the council to consider these proposals very carefully giving due time and consideration to alternative sites in town, because once the boxes are ticked it will be irreversible and the mount will be changed forever.	
PO1740	Mr Martin Armstrong				Object	LE127, LE128A, LE142A, LE142B Why turn a place of beauty into an eyesore when the council should be concentrating on transforming areas which are an eyesore into places of beauty. There are so many alternatives to the proposed sites for housing development around leek is without having to take away Leeks most cherished leisure route. Mount Road has long been a source of relaxation, leisure and exercise to the residents of Leek It is used daily by scores of locals who walk, run, cycle, and enjoy the tranquillity of this country lane which provides fantastic views across Leek and towards the peak district. Where else in the area is there such an amenity so conveniently within walking distance and safe for people to enjoy. The Mount is also a natural habitat for wildlife including many endangered species. The like of owls, woodpeckers and many more other birds and small mammals would be severely put to risk and their habitat will be seriously damaged. This proposed totally unnecessary housing development would not only destroy all this but also a place extra stress on the town centre already, struggling to cope with congestion. The large number of extra stress owns the town struggling to cope with congestion. The large number of extra vehicles would adversely affect road safety and be a danger to the public particularly on both exits from Mount Road. These are but a few of the issues generated by this ill thought out scheme	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO11 about open spaces and countryside access • See para response to PO682 on ecology evidence • See para response to PO119 on housing needs evidence • See para response to PO11 on highways
PO1716	Miss JM Botham				Object	With reference to the proposal for the mount new housing development This is and has been a delightful walk for the people of leek for many years. The older generation will have fond and lasting memories of the courtships over the mount. We as children used it for walking and horse riding in safety to go further afield to Cheddleton Heath. We know in recent times it is an it is a popular route of the Staffordshire moorlands walk. We believe more ought to be done with the brown fields site this would clear unsightly buildings and In most cases be more convenient to the town allowing for less use of vehicles and allowing for the green areas to be maintained for leisure pursuits.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about public rights of way • See para response to PO92 about Leek housing requirements and windfall allowance

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO2586	Consultation Service	Natural England			General comment	Natural England notes the proposed preferred site for allocation in Leek. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.	The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.
PO2901	James Chadwick	Staffordshire County Council			General comment	The allocations proposed around Mount Road will necessitate highway improvements for example road widening, provision of footways, completing Kniveden Lane to adoptable standard, possible (probable) junction improvements at one or both ends. The removal of the sites between LE127 and LE128a could make the delivery of the required scheme more complicated and therefore requires further consideration including the reinstatement of sites LE069 & LE128b.	Comments noted. See para response to PO91 about highways. The emerging Local Plan sets out how the residual housing requirement for Leek will be achieved by a combination of allocations within the urban area, and along the Mount (making allowance for windfall/small sites allowances). Additional housing sites along the Mount are not required. Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO3654	Mr P Ash				Object	<p>My husband and I most strongly oppose the number of sites on Mount Road, Leek as preferred option for new homes. Both of us have lived in Leek all our lives and for the past 50 years have resided on the Moorland Road. Mount Road is acknowledged as an area of open space for walking, cycling, and jogging and it is a area of free from volumes of traffic? I know my mother exercised, pushing me in my pram walking round the Mount. Building houses either side of the road would most likely make the Mount Road into a main road linking Ashbourne Road to Buxton Road. This road is not sustainable not wide enough to take heavy vehicles and constant stream of Traffic, if numerous houses were to be built either side for Health and Safety reason would require pavements, gutters and drainage all of which will narrow, the width of the road for vehicles, in all probability each house will have 2 cars, which again will increase the flow of traffic. To surface the top of Kniveden lane would make this road a rat race and a highway leading to an increase of even more traffic may I remind the council that when the developers applied for planning permission to build homes on the land behind sunny view at the end of Ashbourne Road – grave concern was exposed by Staffordshire County Council of traffic from the houses converging onto a busy main road, would that not also apply to traffic from the houses converging onto 2 main roads – Ashbourne road,, and at the other end of Buxton road. I would like to draw your attention to the fact when Mr William Milnes gave the land he owned to the council, land where now stands Leek High School, and is playing fields which borders Kniveden Lane and extend on the Mount, there was a clause in the gift of land that this land would be only used for educational purposes. One may also ask the council “where are all families and buyers that require these houses? Leek has not the facilities to accommodate such a huge increase in its population. The Dr’s are already working to their full capacity, which schools primary and senior have places for an increase in children of school age? And where will the new comers to the area, travelling from the Mount to Macclesfield or to the potteries will increase the flow of traffic though the centre of the town these were problems with planning permission to build house on ?? At Leek brook on the site of Joshua Wardens factory, as to the nature of the ground and the fact the earth may have become contaminated from factory work etc. These problems were overcome and rectified and houses were built. Now houses cannot build on this land surrounding Sainsbury’s Supermarket because of problems with the land – if land at Leekbrook can overcome the problems with the land around Sainsbury’s overcome the problem? And houses can be built on land previously occupied and accommodating buildings.</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about highways <p>The Council is not aware of any legal encumbrances upon this site.</p> <ul style="list-style-type: none"> • See para response to PO119 on housing needs evidence • See para response to PO682 about Infrastructure Delivery Plan • See para response to PO676 about educational requirements • See para response to PO682 about Leek employment land requirements • See para response to PO1731 about Sainsburys consent • See para response to PO92 about Leek housing requirements and windfall allowance

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO3695	Mrs Ryan C				Object	<p>I am writing to express my objection to recently published plans to build on a large area of the Mount in Leek. Whilst understanding there is a need for some new housing, I feel this area is the wrong place and definitely too extensive. A few points I would like to share which may not take into account the professional opinion but a certainly take a common sense view. The Sainsbury's site was passed as a area for retail and business development with a to build on a small housing estate. This has not been fully developed and I understand it may because there are issues with asbestos and or some other contamination. Yet it seems it is fit for a pub selling food, a children's party play area and a supermarket selling some other consumable goods. If it is the case that there have been some bad decisions made around this site, the council officers responsible for passing this plan should own up and ensure this site is cleaned up. Enabling the plans many locals objected to, be completed. Of course this will mean a cost to the taxpayers whom are left carrying he financial burden of bad decisions made. I have no objection Education Land boarding Mount Road being to extend or build a primary school as have a shortage of places, the concern would be of increased traffic and the requirement for good provision of off road parking at the school if there were to be an entrance on that road. There is a site on the Buxton road Blackshaw Moor which has stood unused for many years since the Army ceased training there. It must have drainage, electrics and water on this site. This would be ideal for a small scale affordable housing site. It would also benefit the local school which has a small numbers of pupils and probably in danger of being closed in years to come Transport should not be a issue because there some buses to Buxton and local bus companies can benefit by providing peak time services.</p> <p>There must be other sites within Leek area suitable for developing. I tried to locate brownfield site on SMDC website but it shows many wordy documents but nothing is clearly stating where these sites lie. This could be my ineptitude but there could be more clarity for the lay person on these issues Building in such a large scale on The Mount would devalue housing already there. This may be viewed as a narrow minded but many people have worked hard and taken out huge loans to secure there desired homes. To effect there in such a drastic way I think is unfair and unnecessary. Most of the housing is currently at the higher end of the market and build social or low cost housing amongst his could be problematic from all prospective. If housing is built at the current level at these sites then who shall benefit those on low paid jobs, where I understand the most need is there are many units built as affordable part share homes unsold and many more privately owed sites of apartments etc. standing empty in Leek.</p>	<p>It is not considered that development of this particular site would be out of proportion with the rest of the town. Any new development taking place will be subject to design policies contained within the new Local Plan; and having regard to the Council's landscape impact evidence.</p> <ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO1731 about Sainsburys consent • See para response to PO676 about educational requirements • See para response to PO11 about highways • See para response to PO1554 about Anzio Camp • See para response to PO92 about Leek housing requirements and windfall allowance • Property values are not considered material in planning law. • See para response to PO1142 about affordable housing • See para response to PO119 on housing needs evidence

PO3643	Mr and Mrs Jones				Object	<p>We would like to formally submit our comment concerning the above consultation with specific regard to Leek East LE127, LE069, LE128, LE066, LE142a and LE142b. These consultations relate to Leek East and the area of Mount Road. This semi-rural area outside the town development boundary. One of its attractions of this area of Leek is that the boundaries for development are very closely defined. This means that within 10 minutes' walk of the town centre you have access to open space, which makes the Mount area very popular for leisure activities such as walking, jogging and cycling. This is important when considering what opportunities there are for leisure and exercise so close to town. The fields provide a home for various types of wildlife and this, together with the farm animals that graze them, provide access to nature very close to the heart of Leek. The combination of these two aspects make an early morning walk or late evening jog across Mount a uplifting and almost spiritual experience. The views from the Mount over Leek are spectacular and are largely unspoilt. Any development of the type and proposed would totally after the character of the area, as it has with Buxton road end of the Mount. If all of the developments listed above were to proceed in excess of 400 houses would be constructed on what is pleasant open countryside. The access along Ashbourne Road and Mount Road provide a road infrastructure that would be totally inadequate with the volume of traffic generated by such a development, especially on the bad junction where Mount Road meets Ashbourne Rad, given the development has taken place from an old development that has already taken place on an old Quarry site and the proposed development on the other side of Ashbourne Road, near to the Poplar Service station, access via the already existing estate off either Kniveden Lane and or High View Rod and or Moorland Road would be impossible to sustain, given the narrow nature of roads in question are busy residential area. Creation of a rat run would have serious safety consequences. Public transport via the bus service would be totally inadequate. There are significant areas of land which would ideal for the development that are presently brown field sites within the town centre and the town development boundary. Development of these sites would not impact on local wildlife and leisure activities, and would be more sustainable as they would not involve significant damage to the environment that would result from an increase of traffic outlying areas. Given the department from Leek of major employers such as the Britannia Building Society, a large proportion of these houses would inevitably be home for commuters from the potteries conurbation and or Macclesfield and greater Manchester. This would totally ruin the character and community feeling of the area, and further issues in relation to the sustainable investment in local infrastructure. Planning conditions stating that the occupiers should have a connection with the local area have repeatedly been shown to be unenforceable in the contexts of the urban development. There have been applications</p>	<p>Note that the Preferred Options do not currently include site LE069.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO676 on design policies • See para response to PO11 about landscape evidence • See para response to PO11 about highways • See para response to PO1766 about bus routes • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO682 on ecology evidence • See para response to PO682 about Infrastructure Delivery Plan • See para response to PO119 on housing needs evidence • See para response to PO1142 about affordable housing <p>It is standard practice for residential schemes which generate a requirement for 'local needs' affordable housing to have future occupation of those dwellings controlled via legal agreement linked to conditions upon the planning consent.</p> <p>Planning applications are assessed against the current Development Plan including the NPPF and adopted Core Strategy Policies.</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						for planning permission relating to these areas before, most notably, in 2007. This was refused on appeal, given the strength of feeling within the local community against this development. Any temptation to alter the town development boundary to facilitate these proposals should be resisted as there is no proven case that the type or amount of development proposed is justifiable. Given in the recent headlines concerning the lack of affordable houses in rural locations, more consideration should be given to this type of development, rather than encouraging urban sprawl which would ruin the character of the town.	
PO472 6	Mr D And L Robinson				Object	<p>I am writing to protest against the latest site allocation plan for the SMDC. To build upwards of 4000 house in our beautiful area is criminal. It is obvious a Central Government ploy, of threats, then offer of £1000.00/house has worked. For the SMDC to deny the £1000 donation has no bearing on the decision is pure fantasy. The area most concerned is to myself is the site allocated off Mount Road, Leek. At present most of the estates west of Mount Road are below the crest of the Mount, the proposed sites in places near or near to the crest, which will make them highly visible over a large area, particularly at night with street lighting. The site ref LE127 is of particular interest to me, it is obvious access to the site will be through the south end of High View Road with services readily available. If we are building approx. 100 houses on LE127, we can expect a large increase in traffic along High View Road and Moorland Road. Sites ref: LE066 & LE128 will be close proximity to a 35mtr high wind turbine and the plans already approved, which is highly undesirable. The building off 800 houses mainly on the eastern flank of the Town does not seem logical. There must be other sites in the Southern and Western flank of Leek which could be exploited; the advantage of this would be to reduce the great impact on schools & amenities in the Mount catchment area. Other problems concern electrical supply, gas supply, water supply sewage disposal, which can create serious problems due to the massive local increase in demand.</p>	<ul style="list-style-type: none"> • See para response to PO676 about new homes bonus • See para response to PO11 about landscape evidence • See para response to PO1350 about streetlighting • See para response to PO11 about public consultation and Statement of Community Involvement • See para response to PO11 about highways <p>Note that vehicular access to LE127 is anticipated off Mount Road; SCC Highways response was predicated on this (not High View Road).</p> <p>The Council would assess residential schemes in proximity to approved wind turbines in accordance with Core Strategy and NPPF amenity Policies, and ETSU (as amended) noise criteria etc.</p> <ul style="list-style-type: none"> • See para response to PO193 about option sites assessments and sustainability appraisal • See para response to PO1142 about western Green Belt • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO682 about Infrastructure Delivery Plan • See para response to PO676 about educational requirements • See para response in PO702 about utilities and flood risk

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO4698	Mr And Mrs C and P Deighton				Object	<p>We are writing to register our very deep concern about the proposal to build on the land at the Mount in Leek. Those involved in the making such decisions do not all live in Leek and probably unaware of the enormous importance of The Mount to the people living around it in Leek. The implications of losing this much loved countryside walk are very serious, and far reaching. The close proximity of The Mount to the homes of so many local people means that it is a place used regularly, often daily, for exercise and relaxation, and is vital to their health and mental well-being. A large number of local residents are elderly, and often unable to drive: there are young families who cannot afford a car: there are several care homes that residents come for walks with their careers. What make The Mount so important is that is so very close to people. It offers beautiful views across the fields and means that people, who cannot get out into the countryside further away, can still enjoy seeing the birds and animals here only just a small walk from where they live. People walking their dogs have a natural means of contact and conversation with others – so important especially for those who live alone. To sum up, we all be deeply distressed to lose this place. So many have been walking there all through their lives, the disruption, and seeing the gradual destruction of a cherished part of their lives will bring an increased sense of isolation, and the feeling of depression faced by those in their later years as they become less able to things without outside help. Having the ability to step outside and walk in open surroundings without having to ask for a lift means a lot to someone struggling to retain their independence and enjoyment for life. To build on The Mount is clearly not necessary. There are as we have all been made aware recently, many alterations for example: various Brown Field sites empty buildings such as factories and offices: disused mills, empty houses apparently unoccupied for long periods. In view of the very unpopular bad decisions made, and the continuing loss of trust in the judgement made and continuing loss of and motives, of the planning department many now suspect that the decisions are influenced mainly by financial incentives from Government or other sources. We do not know whether this is true, but it seems obvious to us that a prompt decision to abandon the idea of building The Mount would bring peace of mind to many Leek Residents and go a long way to restoring the publics belief that members of the Planning Department actually do care about, and will respond to, consider and respect the views, the well-being and even the happiness, of the town they responsible for looking after, both now and the future.</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO119 on housing needs evidence • See para response to PO676 about new homes bonus

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO3937	Mr Mike O'Brien	WYG			Object	[Refer to submitted Representations Report attached to Question 1] which states: The proposed urban extension to the east of the town...- LE127(100), LE128a(47), LE140(63), LE142a(140) and LE142b(40). The proposed extension also accommodates draft reserve sites LE069(42), LE128b(48) and LE066(50). These sites contribute a significant proportion of the proposed housing for Leek. The allocation of these sites, ahead of available brownfield/previously developed sites, is not in compliance Policy SS5a of the Core Strategy, which sets out the overarching strategy for development in Leek. ...None of the proposed allocations are considered likely to come forward in the short term based on the findings set out in the SHLAA (2015). However, we suggest that the allocation of sites which are deliverable within the short term should have been considered to a greater extent in formulating the preferred options due to the significant shortfall of housing delivery across the district. WYG consider that sites in Leek, such as LE243, are suitable to contribute to the short term delivery of housing in Staffordshire Moorlands. Furthermore, the spatial distribution of the draft potential allocations weighs heavily on this eastern stretch of agricultural land and it is noted that no potential allocations have been selected within the core urban area.	<ul style="list-style-type: none"> Refer to Council response to PO3934 under LE127 table Question 10. <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p>
PO4828	Mrs Scragg L				Object	I would like for to make it known that I oppose the above on numerous grounds. The Mount in Leek has always been somewhere for the people of Leek to walk, cycle, jog, ride around not just people up end of the Town but people from all areas, young and old and in-between. The views, the Countryside is there for all to enjoy and appreciate, and we do. The road is not big enough now for all the extra traffic that is using it never mind more homes and a school. The Government wants to be healthier, do more exercise, get out and move, where will the joggers, cyclist go? If you sat up there for 24hours you would understand how used The Mount is used for recreation, pleasure and socializing, it's a free beautiful gymnasium – its where the children go to see their 1 st lamb or donkey walkers go to remember their youth and reflect on their lives, it's a place that puts lives into prospective and brings the troubled some peace. Please let we and our children's children keep the mount	<ul style="list-style-type: none"> See para response to PO11 about open spaces and countryside access See para response to PO11 about landscape evidence See para response to PO11 on highways

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO4707	Mr and Mrs A & N Waterhouse				Object	Building 400+ houses on the area known by everyone as The Mount and used by countless generations as a gate way to the countryside would be against everything that "localism" would bring. The enclosed petition goes some way to demonstrate the strength of feeling that there is against the proposed building plots as set out in the Local Plan. The area is mainly agricultural and offers amazing views of the town and it's unrivalled and area as a whole acts as a buffer, between the town and the Peak District National Park. The road itself could not cope with the estimated 600 to 800 extra houses would generate. The Mount is a narrow road with no footpaths and junctions at either end of The Mount would become even more dangerous. Historically people travelling out of Leek to work, use the Stoke-on-Trent and Macclesfield Road with few travelling to Buxton or Ashbourne. This would mean that the roads in Leek Town Centre would become even more congested at peak times as these people make their way through town. We urge the Council to think again and produce alternative sites for houses thereby saving this precious area for future generations to enjoy.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO11 about highways • See para response to PO682 about Leek employment land requirements
PO5886	Ms Linda M Beighton				Object	I am writing to object to the proposed plan to allocate the following sites along Mount Road for housing: LE127, LE128a, and LE142a. Mount Road is used by hundreds of people every day of the week as a safe, sustainable leisure route something the council should be encouraging not removing. The current road for much of its length I too narrow for 2 cars to pass. Development would cause urbanisation & widening with the potential destruction of mature trees and dry stone walls. Exits particularly onto Ashbourne Road are already problematic and would need expensive, major work to cope with the extra traffic. People occupying houses at the moment would in the main work on the western side of the town in Cheshire-Manchester and Stoke. Major supermarkets are in the western side of town. Daily trips would further exacerbate the congestion which already chokes Leek. So many houses would destroy what is designated a special landscape area. They would impact on the views from the Peak Park and destroy an amenity area. Extending the own boundary to accommodate the proposed sites is undesirable. Using green field's sites may be expected and enable larger profits for developers but there are still brown field sites and infill land available within the moorlands district.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about highways • See para response to PO1350 about tree protection • See para response to PO682 about Leek employment land requirements • See para response to PO1500 about special landscape area • See para response to PO11 about landscape evidence • See para response to PO92 about Leek housing requirements and windfall allowance

PO9144	Mr Ramon West				Object	<p>We wish to object to the 4 preferred housing allocation sites on the Mount, Leek. It would be an outrage to proceed with residential development on any of these sites: LE127, LE128a, LE140 and LE142a. The Council must take into consideration: Loss of local amenity - the Mount is a popular amenity enjoyed and cherished by walkers, joggers, cyclists, nature-lovers and dog-walkers. There is no comparable open countryside leisure amenity so close to the town centre. There is no comparable alternative within easy walking distance on the east side of town. Loss of such amenity would have an adverse effect on the health and wellbeing of a great many local people. Visual impact - the Mount is a classic example of outstanding moorland scenery. It provides unique and wonderful views over the town and beyond. Leek prides itself, and markets itself, as the Queen of the Moorlands. If this is to mean anything, the Council must do everything it can to halt the expansion of the town into the surrounding countryside and work to preserve the proximity and integrity of some of our finest moorlands scenery. Impact on infrastructure - hundreds of new houses will bring thousands of people. Nearby schools and GP surgeries will be put under further strain. Council services, social services and emergency services are already all under great strain. Traffic problems will be made worse. The future - the population of Leek is predicted to rise by a few thousand over the next couple of decades or so. This is mainly due to an ageing population. We are living longer. That means more of the people who are living here now will still be around in 20 or 30 years time. Therefore, planning for the future should be focused on local services for local people. We hope that the Council will heed our objections and explore alternative approaches to housing needs and development in our town. In particular, we wish to draw your attention to the 'Bimby Housing Toolkit' which was drawn up by the Prince's Foundation for Building Community (bimby.org.uk).</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO676 about educational requirements • See para response to PO11 about highways • See para response to PO1142 about affordable housing <p>The Council's own housing need assessments are set out in its evidence base on the website. Note these assess the needs of 'older people' and other groups. The June 2014 SHMA concluded the number and proportion of older person households is expected to increase in the District over the period to 2031 (46% increase between 2011 and 2031) which has implications such as increased demand for both specialist/extra-care accommodation for older people, and for adaptable homes. Owing to an ageing population and other factors, the need for smaller units will in future exceed the need for larger, family units. For these reasons the SHMA recommends that 60% of future housing should be 1- or 2-bed. The Council's current Core Strategy Policies expect larger housing schemes to provide for a mix of housing across all locations, to respond to identified local needs such as housing for older people. Note that where there is a policy requirement for affordable housing provision upon such sites, the nature of provision may reflect the above.</p> <p>The BIMBY toolkit is noted. The Council will continue to work with communities seeking to introduce (or influence the preparation of) Neighbourhood Plans, in accordance with the Neighbourhood Planning Regulations.</p>

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9105	Mr Robert McGuinness				Object	Email with representation form [attached] objecting to Preferred Options sites LE127/LE128A/LE140/LE142A and 'School Site' [presumed LE140] alongside 2015 'Options' sites LE066/LE069/LE128B with the following text: Overdevelopment, traffic congestion issues, inadequate infrastructure, inadequate road network. Brownfield sites and redundant mills should be brought into use first.	<ul style="list-style-type: none"> • See para response to PO1702 about scale of development • See para response to PO11 about highways • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO92 about Leek housing requirements and windfall allowance <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p> <p>Note that site LE069 is not included as an allocation in the Local Plan.</p>
PO9090	Ms Sarah Griffiths				Object	I am objecting to the planning of new housing at Mount rd, Leek. The area is enjoyed by young and old alike for generations. We do not need new housing in this peaceful wonderful area. [2015 Options consultation representation also submitted with email].	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO92 about Leek housing requirements and windfall allowance
PO9065	Mrs Suzanne Dimmick				Object	I am writing to put forward my opposition to the building of houses on Mount Road in Leek. It upsets me greatly to think that an important local amenity could be lost forever if these proposals go ahead. "The Mount" as we fondly know it, is a valuable asset to the East side of Leek, a wonderful place to take our families for walks and bike rides. In our busy lives, it is vital for our health, both mental and physical to have somewhere to go to relax and unwind. What better place than a walk along the Mount with views over Bradnop and Morridge, so accessible from our homes. If the fields in the planning proposals-LE127, LE128, LE140 and most worryingly on the opposite side LE142 were to be built on then the landscape of our beautiful town will be lost forever. For those arriving in to Leek from Ashbourne Road, they would be met with yet another sprawling housing estate, replacing the picturesque fields full of animals that are so welcoming to see. The road will become a main thoroughfare from the Ashbourne Road to Buxton Road and will lose its charm for us all. Lets protect the gateway to LEEK for generations to come. SAVE THE MOUNT.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO11 about highways

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9060	Mr Terence Gee				Object	I wish to object to the proposal to build housing on sites LE127,LE128,LE140,LE142a on mount road. This is a green field site with a rural road with unspoilt views only five minutes walk from Pick wood avenue. This road is used regularly by myself and often meet other walkers, cyclists in the area. Also the road would have extra traffic for 500 houses with poor access. There would be increased pressure on local schools,doctors,etc and I feel it would spoil the area with increased urbanisation.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO11 about highways • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO676 about educational requirements
PO9073	Mr Stewart Johnson				Object	<p>I am writing to protest against the proposed plans to build 4000 houses in the Leek area:-</p> <ol style="list-style-type: none"> 1, question how many unoccupied properties are there in the area 2, Loss of beautiful countryside. 3, Work vacancies in the local area. 4, Local infrastructure . 5, Places at local schools. <p>The list is just a few of the considerations the planners seem to be ignoring. Of particular concern is the proposed development along Mount Road. Not only would this destroy a beautiful part of the town used by many residents,it would also cause serious traffic problems both in the immediate vicinity and the rest of the town. These new residents would have to commute,and the main routes would be right through the centre of town adding to an already serious congestion problem. Why do the planners want to destroy the treasure that is The Queen of the Moorlands!</p>	<ul style="list-style-type: none"> • See para response to PO119 on housing needs evidence • See para response to PO11 about landscape evidence • See para response to PO682 about Leek employment land requirements • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO676 about educational requirements • See para response to PO11 about open spaces and countryside access • See para response to PO11 about highways
PO9081	Mr Simon Tansley				Object	I am registering my objection to the leek plan proposals for building anywhere along the mount (le 142a,b,140,128a,022,127. To destroy this public amenity would be an outrageous and nigh on irreparable act of vandalism. Any one who is even considering this to be a way forwards for leek town should walk from ashbourne road to buxton road to see precisely what we would lose in terms of beauty and nature. This is an asset that Leek should be celebrating not destroying.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence

<p>PO9096</p> <p>PO9315</p> <p>PO9407</p>	<p>Ms Sarah Bishop</p> <p>Ms Emily Hodgkinson</p> <p>Ms and Mr Carla and Anthony Hodgkinson and Bury</p>				<p>Object</p>	<p>I would like to register my opposition to the plans for development along The Mount. I was born and raised in Leek as are all my family. I remember being dragged "round the mount" as a child and hated every minute of it. I left Leek in 1986 to pursue my career in nursing and I still return to Leek every weekend and Public Holiday. As an adult, I love going round the mount! I appreciate the openness, the air and the local views. I know it is valued by many local people for similar reasons. It is a wonderful asset to Leek which cannot be found elsewhere. In this age of government encouraging activity and reduction of population obesity, I can walk my dog, savour the views and see nature on the doorstep. Something to be encouraged and supported. Leek is very lucky indeed to have such a wonderful asset as part of its town and councillors would be well advised to recognise its importance to their locality. If councillors wish to see houses, roads and urbanisation as part of their tenure, I suggest they visit "The Potteries" or move to the nearest loss of urban space to understand the impact of building for the short term gain. I live still in the city I came to all those years ago. Back then, it was a new city with limits. Now, every route I can take from the centre is urbanised and each area is stuck "in its time" as architecture and design move on creating areas of decline and disrepair bringing new problems with the passing of time. For the love of Leek and its title of "Queen of the Staffordshire Moorlands" , Councillors need to appreciate what qualities give Leek that title and do their utmost to maintain them. Councillors have the opportunity to do the right thing for the future of Leek, not to bring in a fast buck for a short term gain. I hope the people of Leek are listened to when they say "Save The Mount"!</p> <p>As well as the benefits to Leek having such a widely used and accessible area, one should consider the risks and very real hazards to creating such estates in a position where traffic flow, at both access points to the Mount, is at best, difficult. On exiting Mount Road, on to Ashbourne Road and Buxton Road, there is extremely limited vision in both directions. Whilst currently the traffic flow is steady, and reasonably quiet, my concerns lie with the difficulties which will only grow with increased cars, placing those increased pedestrians walking to the proposed development, at a genuine risk. I am not against the development of affordable housing; what I am against is the travesty of those decisions, by councillors which we elect, to take green belt land, before brown belt land, for potential profit, before the views of their constituency and the future of generations to come. I understand that I am far from alone in my views- I feel they should be taken in to deep consideration before this gem in the town is lost forever.</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO676 about new homes bonus • See para response to PO11 about highways • See para response to PO1142 about western Green Belt • See para response to PO11 about public consultation and the Statement of Community Involvement • See para response to PO92 about Leek housing requirements and windfall allowance

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9119	Mr Robert Barker				Object	<p>I do not believe that it is necessary to extend the town boundary into farmland as there are still many available brownfield sites within the locality. It is also important to note that TOURISM is a significant driver to the local Economy! Therefore the Town Gateway, especially from the PEAK PARK Buxton Road A53, needs rigorous protection from urban sprawl in order to maintain the 'Queen of The Moorlands' identity. The point of entry into Leek from A53 Buxton Road is the most attractive and picturesque and is a key Tourist route. It is also a highly utilised public amenity for local residents of Leek who very regularly make use of the whole area incorporating the A53 towards Tittesworth Reservoir/Blackshaw Moor, along Thorncliffe Road and its' adjoining lanes, and The Mount Road, as a place to exercise by walking, rambling, cycling, horseriding, dog-walking, sightseeing, picnicing, and general enjoyment for health and wellbeing. The proposal area, particularly as it approaches the A53 Buxton Road junction with Thorncliffe Road and The Mount, is immediately adjacent to the SPECIAL LANDSCAPE AREA which presumes against intrusive developments in order to protect its Historic Landscape nature. I would personally feel that the Special Landscape Area and environs ought to receive the highest priority in its protection. The designation encompasses the fact that it is 'Special' in nature and cannot therefore be replaced once lost or damaged. There are a number of 'brown' sites within the town which could be very effectively used for housing development. [Question why] these are not shown on the accompanying Consultation Maps. However from attending a consultation meeting the existence of several sites is a matter of common knowledge along with the fact that these would be "The Preferred Option Housing Sites" in the view of the residents of Leek. There are also pockets of greenbelt land (designated such primarily for the purposes of town separation and quite often having no other particular beauty or amenity), which in common with other Towns in the country could be effectively utilised to expand the town boundary with selective use and sensitivity to the environment. This would be better than destroying the areas which are highly valued by the Leek Community for beauty and recreation and which give the Town of Leek its identity. The proposal to build almost 400 houses off the junction of the A53 as it joins Thorncliffe Road and The Mount Road is a Major Intrusion into the public amenity and is unsupported in terms of the additional infrastructure requiring a need for development of roads, sewers, schools etc.. It would put a major strain onto the area and have significantly adverse effects on the locality. The proposal is completely unbalanced as it places virtually all the "housing requirement"[queries this as unjustified] along 1 narrow lane at the most Flagship side of Leek renowned for its visual beauty and recreational amenity. Please utilise the "brown sites" and protect Leek's Heritage and inheritance!</p>	<ul style="list-style-type: none"> • See para response to PO11 about Leek housing requirements and windfall allowance • See para response to PO676 about design policies <p>Green Belt is a long established designation that serves a number of important functions in separating settlements, and preserving 'openness'. Whilst Councils can allocate/make boundary amendments within the Green Belt, National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). Note that landscape quality/character, and public access characteristics, are not in themselves 'purposes' of Green Belt laid out in national guidance. The NPPF allows for consideration of development proposals upon 'brownfield' Green Belt sites.</p> <ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access • See para response to PO1500 about special landscape area • See para response to PO11 about highways • See para response to PO682 about Leek employment land requirements • See para response to PO676 about new homes bonus • See para response to PO119 on housing needs evidence • See para response to PO193 about heritage impact considerations • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO676 about educational requirements

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9133	Mr Richard Harding				Object	<p>It is shocking to think that a much valued area of Leek, enjoyed by many thousands of people each year that gives stunning views over many hundreds of acres of Moorland, is a valued place for recreation by the people to walk, hike, cycle, enjoy or just to rest with the freedom of a tranquil setting over the land of the Moorlands will be destroyed forever and what for, the offer of cash to the Council for each new house to be built to be spent by the Council that we all know will be wasted in ways only Councils inimitably can do whilst the result will be a beauty spot for Leek people will be destroyed forever. The Council can sit back and think the money was worth it yet they sit in splendid isolation allowing the areas they are elected to protect be destroyed. I wonder how the local and Staffs Council can think that the huge increase in housing is necessary bearing in mind that the shameful destruction of a much loved part of Leek will be replaced by huge housing estates on The Mount making it appear like a mini version of the Berlin Wall. I regularly see hundreds of people on weekends and on summer days, walking, dog walking, jogging and horse riding along Mount Road and if these awful plans are put in place The Mount will be a danger to all road users and will take on an ugly factor that is part and parcel of building on rural fields loved by so many people and all imposed without once allowing the voters of Leek the change to have their say on the planning issues that have secretly been imposed. Where is the democratic right of the people of Leek int his issue? Sold out to building firms who look on greedily at the profits they can make with help from a submissive Council who dare not fight for Leek people. It is worrying is that all the planning proposals for the Leek Moorlands were taken in secrecy denying people of the Moorland the chance to put forward their views and objections for all these houses to be built without ever once considering that there is not sufficient employment in the town to employ even 1 in 100 of people who might live in these imposed properties and there clearly seems to be a total the lack of schools to educate the huge increase in children and a the lack of Health Care provision in respect to GP services and hospital care for the area. There is also the huge impact on the roads and the congestion that is already a great problem in Leek. It is as if the Council is blind or inept at seeing the problems that all these extra houses will cause but it seems that everything will be decided in the same manner as the destruction of the old town centre round about we were informed would ease traffic but contrary to all Council ideas the reverse is true. I cannot have any faith in a system that has denied us the vote on these extra 6000 houses or that the much loved Mount will be destroyed in the same cavalier and unthinking way as many planning issues have been allowed to go ahead even when so many Leek people do not want or need these homes to destroy The Mount. I therefore wish to state that I am against the building on any land along Mount Road AKA The Mount, so please register my objection.</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO676 about new homes bonus • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO11 about highways • See para response to PO11 about public consultation and the Statement of Community Involvement • See para response to PO682 about Leek employment land requirements • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO676 about educational requirements

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9392	Mr Chris Taylor				Object	Land ref LE142a: Development of this land should be resisted. It would block panoramic views from Mount Road towards the Peak Park, and specifically the Roaches. It would have the greatest negative impact on the character and amenity of the Mount Road, a widely appreciated natural environment much loved by many people from the Town who enjoy this leisure walk on a frequent basis.	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO676 about design policies • See para response to PO11 about open spaces and countryside access
PO9196	Mrs M Motum				Object	I would like to strongly object to more houses being built on The Mount. This very popular location is just a short walk from the town centre where you are in the countryside with far reaching views. The beautiful location will command high prices, therefore no affordable houses will be built. It would be a travesty of justice to build in such a well-loved area, used by dog walkers, walkers, courting couples, and car drivers. I don't think the infrastructure could sustain the number of houses envisaged. Please do not include this area in the local plan.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO1142 about affordable housing • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO11 about highways
PO9247 PO9201	Mr John Belfield Mrs Maureen Belfield				Object	The rural fringe of Leek, and specifically Mount Road, would become urbanised. The Mount is a very popular route for leisure activities and exercise for many people and this would be lost. With the enormous number of proposed new houses there would be a massive increase in the amount of traffic both on the mount and also in the surrounding area. Kniveden Lane is already a busy road as it gives access to the small car park at the Moorlands Hospital. This car park is already insufficient for the needs of the hospital and many cars currently park on Kniveden Lane. If hundreds of houses are built on the mount Kniveden Lane would become a significant means of access to Ashbourne Road. The road network would need to be considerably enhanced and part of Kniveden Lane would need to be properly surfaced. This would lead to a major change in traffic patterns in the area which would lead to a loss of public amenity. This would not only cause traffic chaos but would also pollute the surrounding area. It would also make the smaller residential streets of Pitcher Lane and Trafford Close a potential car park for those who currently use Kniveden Lane for this purpose. There are brownfield sites available for building and also more suitable greenfield sites, for example Foker Grange and Home Farm, which have much easier access to the main road network. I therefore object to the building plans on the Mount which are numbered LE142a, LE140, LE128a and LE127.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about highways • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO1142 about western Green Belt • See para response to PO92 about air quality <p>The Council maintains a database of housing site suggestions (SHLAA). This database formed the basis of the 2015 'Site Options' consultation as all SHLAA sites above a minimum size threshold, and attracting a 'B' deliverability rating, were included in that consultation. Subsequently 2016 'Preferred Options' were narrowed down from this.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9339	Mr Derek Kay				Object	<p>Herewith are my objections yet again about building proposals affecting open greenbelt land on Mount Road. I strongly object to delinations LE127, LE128a, LE140, LE142a and LE142b, on the grounds of unnecessary and deleterious incursion into valuable scenic amenities. The fringes of this town (Queen of the Moorlands) must be preserved at all costs. Open aspects across towards the Peak District are essential for our spiritual wellbeing; unwelcome development of additional traffic flow and population density would be the corollary of this building project, were it to succeed. Conversely, there is much brownfield potential within the town boundary itself; rundown old mills for example (which may be protected by outdated listing orders) and other unsightly structures causing blots on the "townscape". Not enough positive action to clean up the interior of this town has been taken over the years. Use compulsory purchase orders where difficult site owners will not cooperate and make the Queen worthy of her name.</p>	<ul style="list-style-type: none"> • See para response to PO1142 about western Green Belt • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO11 about highways • See para response to PO92 about Leek housing requirements and windfall allowance <p>The Secretary of State for Culture, Media and Sport is responsible for the listing of buildings on the advice of Historic England. Apart from being consulted, the Council does not have any say in which buildings are added to the statutory list. The Council, however, is charged with protecting listed buildings insofar as it is possible and managing any changes to them through the planning system. In discharging this responsibility, the Council has to work to the government's advice set out in the National Planning Policy Framework which requires every effort to be made to preserve listed buildings and either keep them, or return them, to active use.</p> <p>Whilst Councils do retain CPO powers in principle, these are generally used (if at all) as a last resort where it is expedient and in the public interest for the Council to do so, where agreement with landowners is not possible. As explained in response to PO91 the Council makes assumptions that development schemes will come forward within the Leek development boundary to contribute to its housing need to 2031, which could include historic premises etc. Applications affecting listed or non-listed "heritage assets" would be assessed against Section 12 NPPF and Council Policies. The Council would also assess schemes in the town centre against the aspirations of the adopted Leek Town Centre Masterplan.</p>

PO9302	Mr and Ms Gary and Elaine Turner				Object	I wish to object to the proposed housing development at the mount (all of the sites) as this is a high quality amenity area enjoyed by all for its views, indeed, if ever Leek is featured on TV programmes the cameras usually end up doing a view of the town from the mount, which says it all.	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access
PO9239	Mr John Burnett				Object	<p>I wish to formally object to the plans currently in consultation to allocate land for housing around the Mount Road in Leek. Some background. I have lived in Leek all my life, as have my parents and Grandparents. Throughout my life I have always viewed the Mount as the 'Countryside' and the border between Leek and the Peak district. Since I can remember I have spent many happy hours walking the Mount as it is an accessible area of natural beauty. What makes this area important to me and to anyone who lives in the East end of town. There are very few circular walks that take in such a wide variety of terrain and views as the Mount does. Whichever way its walked theres uphill and down dale terrain that has to be completed. What makes this worth while for many people is the wide open vista that is presented to the walker as you reach the top of the Mount. I complete this walk most days in the Summer, and every week in the Winter, and strongly believe it has added to my health and well being in immeasurable ways. I know and speak to the many others who also make this part of their leisure and health routines and know that a large proportion of the residents of both Haregate and Moorland Road estates rely on this open space as much as I do.</p> <p>So - my main objection is the destruction of some beautiful greenfield leisure location on the outskirts of our town. However I have other concerns about the wider impact to others who may not view this as important. Leeks infrastructure is already at breaking point. In particular the road system is literally not fit for purpose. Since the short sighted decision to alter the traffic flow through our town was taken, the flow of traffic particularly from West to East has been severely curtailed resulting in large traffic build ups through a normal working day. I can only imagine the building of 100's of new houses on the East End of Leeks existing boundary will at best double the misery already experienced by hundreds of travellers each day and cause untold economic and environmental damage to our market town. Additionally, I have serious concerns about the effects on the water run off if large areas of the Mount are built upon. The Mount is the highest point in our town, and huge amounts of water drain off it down towards Leek on a daily basis. Without the ground to soak up this water Im concerned the water table may be affected causing flooding and other damage to residents and infrastructure further down towards Leek centre. The first part of the consultation document says the following: They should, as far as possible, reflect the aspirations of local communities and should strive to contribute towards their wider social, economic and environmental objectives. Based on what I have seen of the document, I don't</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about public rights of way • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO11 about landscape evidence • See para response to PO11 about highways • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO92 about air quality • See para response to PO682 about economic benefits of housebuilding • See para response in PO702 about utilities and flood risk <p>The Council must demonstrate to planning inspector that its Local Plan is based on the principles of sustainable development. The NPPF is clear that this means three roles – economic, social, and environmental, and that they are considered simultaneously. 						believe it succeeds in any of these fundamental objectives. Our local community want a town that is prosperous but also one in which people want to live and work. We should strive to be better than what we are but not to the detriment of what makes people want to live in Leek in the first place. I hope you seriously take on board my views as well as the views of other community members. We live in a democracy and as such I genuinely believe that if a decision doesn't have the backing of the community it shouldn't be pushed through.	
PO918 2	Mrs E Adams				Object	We would like to object to the developments proposed around The Mount. This is a very popular safe area to walk. It has a high quality landscape which would be restricted by the developments and traffic would increase significantly on the roads linking Buxton road and Ashbourne road. Visitors to the area also like this walk.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO11 about highways
PO925 3	Ms Joan Hobster				Object	<p>I am writing to plead for the preservation of Mount Road, Leek, as an undeveloped open space and public amenity, available to all residents of the town. Any building on the farmland that borders this road will destroy the ambience and far-reaching views of this delightful area. It has been shown by a headcount (see Leek Post letters May 11 2016) how well used it is by walkers, joggers, horse-riders etc and I would like to add to that, the small but regular number of cars that are parked on Mount Road by elderly residents. They may no longer be physically able to walk far but can still take a short stroll, sit on a bench, enjoy the fresh air and admire the views. I understand that Mount Road is part of the Staffordshire Moorland 's Way and is walked regularly by individuals and organised groups. Surely a designated "Way" cannot be allowed to pass through a housing estate. In addition I see on the Council website, a leaflet suggesting a walk entitled "Leek Landscapes, A Country Walk" which includes Mount Road. I quote from this leaflet "The route passes through attractive farmland and offers many interesting views of Leek and its setting." If the proposed houses are built, this leaflet will have to be amended. I suggest, "The route passes through a new housing estate which obscures many interesting views of Leek and its setting"</p> <p>If building does take place, Mount Road itself would have to be upgraded and widened, to accommodate increased traffic use. An estimated 600 extra cars daily has been suggested. No doubt street lighting would be installed and this would destroy one of the few "dark sky" areas in the town. I have observed the night sky regularly from this location on winter evenings and enjoyed seeing the eastern constellations, planet alignments, meteor showers, the occasional comet and the monthly spectacle of the full moon rising. All this would be lost by light pollution. I understand that planners did take note of objections raised about the development of Mount Road in 2015 and have reduced the</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO11 about public rights of way • See para response to PO11 about highways • See para response to PO11 about public consultation and the Statement of Community Involvement • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO1350 about streetlighting

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

						<p>proposed site allocations to either end of the road, thus preserving some of the views. For example, the field referenced LE128 will be split in two and only half of it built on. While appreciating this gesture to public opinion it would surely be only a matter of time before the inevitable “infill” would take place and the whole area would be lost for ever. PLEASE PLEASE PLEASE – SAVE THE MOUNT for future generations to enjoy.</p>	
PO9296	Mrs Gwen Gledhill				Object	<p>Re sites LE127,128,140.142a I wish to object strongly to the proposal to make these sites on The Mount available for housing on the following grounds:</p> <p>1. Traffic The Mount is a narrow country lane with no pavements and little or no street lighting. There are narrow and dangerous junctions at both ends on to the Buxton and Ashbourne roads and a dangerous bend by LE127. The traffic generated by the proposed 400 houses will completely overload these junctions at busy times and generate a major risk to pedestrians on the lane itself, especially as there is not sufficient width for two cars to pass each other for most of the length of the lane. Commuters travelling from these house to Manchester, Macclesfield or Stoke will only add to the town centre traffic congestion at busy times.</p> <p>2. The Local Housing Need It is well documented that the local need is for starter homes for young people and ‘downsizing’ homes for older people. These are not required on the edge of town but need to be closer to the centre where there are shops, amenities and better public transport links. Whatever developers initially propose re ‘affordable housing’ on The Mount, the reality is that they will ultimately build executive homes attractive to commuters travelling to Manchester, Stoke and beyond at prices cheaper than can be found in Cheshire East! I believe that the buyers will not be local people and thus the developments will not answer the local housing need. There are other sites that could address this need to the south and north west of the town and via infill in the centre itself. Planners should look more carefully at these and not settle quickly for ‘easier’ options.</p> <p>3 Our Environment The Mount is a long standing area of natural beauty, accessible to most town residents on foot with views equal to those enjoyed across the Peak District. The developments will ruin this aspect and destroy a major, free, leisure experience for local people right on the edge of The Peak District National Park - their officers will (I’m sure) be objecting too!</p>	<ul style="list-style-type: none"> • See para response to PO11 about highways • See para response to PO682 about Leek employment land requirements • See para response to PO1142 about affordable housing • See para response to PO119 on housing needs evidence • See para response to PO9144 about ageing District population • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO193 about option sites assessments and sustainability appraisal • See para response to PO1142 about western Green Belt • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9166	Mrs Kath Fernyhough				Object	<p>Please note that this email is an objection to the following site references regarding the development of Mount Road Leek., LE142b, LE142a, LE140, LE128a, LE127, LE022 We are residents of Kniveden Lane leek, and so we feel that we are well qualified to tell you why this development would be so disastrous for Leek. The Mount is an area of natural beauty which is used every single day of the year, by walkers, joggers, sightseers, cyclists, and people who enjoy it just for the sheer pleasure of the calm, peaceful area it provides us with. It is used by our senior citizens, who use the Mount as a daily walk to help keep them fit, and they enjoy sitting on one of the benches that have been left by the people of Leek for the people of Leek, to sit and chat or pass the time of day with other walkers. Good for the body and soul. It is an area that we, our parents, grandparents and children have enjoyed for many years, and if this development goes ahead our grandchildren and future generations will be denied this. It is an area of natural beauty that is home to a wide selection of wildlife. From hearing the owls hooting late evening and into the night, to the woodpeckers tapping away in the woods. From the bats swooping past in search of food to the kestrels that hover over the ground looking for their next meal. And the home of badgers and foxes. To name but a few. If this development goes ahead the homes of these beautiful animals and birds will be lost. Another loss for future generations and the townspeople of Leek, who you are supposed to represent the views of, so please take the time to read this and understand how passionate the people of Leek are about our beautiful green open space. As well as the above losses, the development will cause many problems. Namely access to and from Mount road. If planning permission is granted for all these new homes, imagine how many extra cars, delivery vans, school buses and refuse collectors will have to use Mount Road. If in excess of 400 homes are built, that will mean that there will probably be in excess of 800 extra cars on a daily basis. Mount road can not deal with this. Our worries are as follows :- The exit from Mount road onto Buxton Road goes straight out into a 40mph area, opposite another junction with Novi Lane. The exit and entry from Ashbourne Road is even worse. To exit from the Mount onto Ashbourne Road you again have to exit into a 40mph area If you want to travel to Ashbourne you have to negotiate a 30% bend onto a very busy road If you want to exit Mount Road onto Ashbourne Road and travel down into town, you still have to join the traffic that is traveling at speed around Lowe Hill bends. This plan is dangerous, foolhardy and beyond belief. As the majority of people who will purchase property on Mount road will work in Stoke on Trent or Macclesfield, this will bring even more traffic that has to negotiate the town centre, which is often gridlocked now, let alone with a further 800 cars a day travelling through Leek town centre. The only other access to Mount Road is from Kniveden Lane, via the unadopted road at the top of the lane. If this road is adopted to improve access onto the Mount, Kniveden</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO682 on ecology evidence • See para response to PO11 about highways • See para response to PO682 about Leek employment land requirements • See para response to PO92 about air quality • See para response to PO1350 about tree protection • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO1142 about western Green Belt • See para response to PO11 about public consultation and the Statement of Community Involvement

						<p>Lane will become a rat run, along with Moorland Road. And it will not only be used by the new developments on the Mount, but by the estate accessed from Novi Lane, known as the Haregate estate. Kniveden Lane and Moorland road are residential roads in a residential area, and have not been built for vast amounts of traffic. The noise and level of traffic if this should happen would be very detrimental to a beautiful residential area, not to mention the dangers of traffic moving at speed to residents. Also the exit from Kniveden Lane is notoriously difficult due to the trees which line both sides of the junction reducing visibility to less than 50 yards in either direction. What will you do then, cut down the trees to improve visibility and in the process removing more natural vegetation along with the fields on Mount Road that you are proposing to develop. As an alternative site, why do you not look at Macclesfield Road, the area around Foker Grange. Or develop some of the derelict mills that are lying empty and are nothing but eyesores. This way you would rid the area of the derelict buildings and build new more pleasing structures. We ask you to do the job you were voted in to do, which is to represent the views of the people of Leek.</p>

PO9272	Mr Jeff Davies				Object	<p>I am writing to object to the designation of land on Mount Road, Leek as "Preferred Housing Allocation". There are a number of problems with this intended designation:</p> <p>1) Overlook from the National Park - building as designated will adversely affect the view from the National Park</p> <p>2) Access - to increase traffic along the Mount would cause significant traffic problems and hazard at its junctions with both the Buxton and Ashbourne Roads. If Knivden Lane is paved then this would also cause problems with access to the hospital and cause a hazard at its junction with Ashbourne Road where there is poor visibility. Improving Mount Road is likely to be self-defeating as it will then become a rat-run between Ashbourne and Buxton Roads further increasing the traffic load.</p> <p>3) Services - there would be a significant cost to put in mains services as the existing water and drainage up Mount Road towards Padwick Farm are unlikely to be adequate to service the proposed housing</p> <p>4) Amenity - the Mount is a much loved local resource, heavily used by walkers (including dog-walkers) and runners.</p> <p>5) Location - the bulk of working residents would probably work in Stoke or Macclesfield and the development is on the wrong side of Leek as it would then increase the traffic 'flow' through the centre of town</p> <p>6) Brownfield first - development on green fields should only occur when all the available brownfield sites have been used. There are multiple opportunities for in-fill housing developments within Leek (e.g. Prince St) as well as numerous mills that are currently eyesores (e.g. both Macclesfield & Ashbourne Roads)</p> <p>7) Size of housing allocation - there is a significant discrepancy between between SMDC & Government figures for required housing. I believe you are seriously over-estimating the local housing need. By doing this you are making it easier for developers to cherry-pick which bits they want to develop rather than encouraging development where it would be most beneficial to and have the least adverse impact on the town</p> <p>8) Unnecessary blight - by over-allocating housing designation you will have an unnecessary adverse impact on the value of properties which may not in practice be affected by housing development throughout the life of the plan</p>	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 about highways • See para response in PO702 about utilities and flood risk • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO11 about open spaces and countryside access • See para response to PO682 about Leek employment land requirements • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO119 on housing needs evidence <p>Property values are not considered as material considerations under the Planning Acts.</p>

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

PO9215	Mrs E Adams				Object	I wish to place my strong objections to the proposals to build house on the mount, leek. It would devastate this beautiful area which benefits tourists and residents alike. Objections also relate to roads, schools, doctors etc. Please please rethink your plans.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO11 about landscape evidence • See para response to PO676 about design policies • See para response to PO11 about highways • See para response to PO682 about Infrastructure Delivery Plan • See para response to PO676 about educational requirements
PO9189	Ms Michele Rushton				Object	<p>I wish to register my disapproval re the above development and quite the following points.</p> <p>Loss of an important local amenity – the Mount is a very important open space close to the town centre which is enjoyed by people across the town.</p> <p>Visual impact - restricting important and highly valued panoramic views across the Leek skyline and further afield.</p> <p>Impact on infrastructure - primary schools in particular (East Street, Beresford) will struggle to keep up with demand and the situation where some children already have to travel to schools in the west of Leek will become more and more common</p> <p>Mount Road is on the route of the Staffordshire Moorlands Walk – a very popular route for leisure activities such as walking, cycling and jogging</p> <p>High quality landscape – unsympathetic to the landscape character and quality of the area Urbanisation of the country lane that is Mount Road – if all the 6 developments proceed then in excess of 500 houses would be constructed. Mount Road would likely become a main road linking the Ashbourne and Buxton roads. The spatial distribution of proposed sites across Leek is unbalanced - there will not be sufficient demand to build all of these houses on one side of town so the council will not meet its housing needs in any event The volume and speed of traffic is likely to increase on Kniveden Lane where my family have been residents for over 25years. Please for the sake of Leek and her people, review your proposal.</p> <p>Question where are the jobs to support people buying new houses Traffic & congestion through & around Leek is already critical without the addition of more vehicles. Question why can't brownfield sites/old mills etc be converted to housing · I chose to live near Mount Road because I like it as it is, please do not change it!</p>	<ul style="list-style-type: none"> • See para response to PO91 about open spaces and countryside access • See para response to PO91 about landscape evidence • See para response to PO675 about educational requirements • See para response to PO680 about public rights of way • See para response to PO90 about highways • See para response to PO1683 about viability study • See para response to PO682 about Leek employment land requirements • See para response to PO92 about Leek housing requirements and

							windfall allowance
PO9207	Mr Martin Bagshaw				Object	<p>I would like to register my objection to the proposed housing development on the mount area of Leek. I have lived in Leek for all of my life and I and many others , have spent many happy hours enjoying the scenery and tranquility that this area of the town offers to residents of the town. To develop in this area will drastically reduce the local amenity for the residents of the town. It is a lovely picturesque area that is within easy reach of the town centre. And I believe that to destroy it would be an absolute travesty. The area has many amenity uses, such as walking, horse riding, cycling and jogging, let alone just sitting on the benches and chilling. I think the existing schools will struggle to cope with the increased demand for places. The increase the traffic on the roads surrounding the mount will be significant, and traffic calming measures will need to be considered for safety reasons and quality of life of the existing residents in the area. There also be an increase in commuter traffic from this development. I think the majority of which will have to cross the town towards either Stoke on Trent or Cheshire. This will add to the already considerable traffic issues in the town. I believe the Barnfields, the rear of Sainsbury and Foker Grange Farm would be much better locations, so that the increase in traffic is kept away from the town centre. It was my understanding the houses were proposed for the rear of Sainsbury's. But I understand this has hit commercial difficulties with residual contamination.</p>	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access • See para response to PO676 about educational requirements • See para response to PO11 about highways • See para response to PO682 about Leek employment land requirements • Existing industrial areas in use would not generally be allocated to other uses unless re-provision of equivalent or improved floorspace was involved. • See para response to PO1731 about Sainsburys consent • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO1142 about western Green Belt

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9175	Mr and Mrs S A Hodkinson				Object	<p>We are writing as a young couple concerned about the prospect of many more houses being built on good quality farming green field sites in Leek and throughout the Staffordshire Moorlands, especially over the Mount Road in Leek. We use the Mount as many people of all ages do on a regular basis, whether it's to walk the dog or to go out for a run. The Mount is used by many and if lost would be greatly missed. The main issue that concerns me with the proposed building of houses over the Mount is that the council & planners feel it is acceptable to potentially build houses on what is good quality farming green field sites. We need to protect our green spaces and farming land that is producing us with our food and local food at that. Another point to make is there are hundreds of empty properties throughout the Staffordshire Moorlands therefore if there is really a great need for additional housing which there is no evidence to suggest this. Also in this day and age we as a country are very conscious trying to reduce our carbon footprint and recycling everything possible. Therefore question why does this not apply to housing. There are all these properties sitting empty and you are wanting to build more, do we really need more if we already have so many empty. This includes new builds that have being built in the past twelve months that are vacant. Also question who are you expecting to buy these properties or live in them. There is obviously no jobs or prospects for people to want to move into Leek otherwise they would be here now. You only need to open the local paper or look on the internet there are always hundreds of properties at all prices for sale and up for rent in Leek. If you by some miracle find hundreds of families to live in these houses then question how do you propose to improve the infrastructure. It already takes up to twenty minutes to drive from one end of Leek town to the other and this isn't even in 'rush hour'. We certainly don't have enough schools and the GP's are already stretched to capacity. I also have a worry over the wildlife over the Mount there are many different species of birds and animals that are present around the Mount and the building of houses would interrupt them and significantly reduce the numbers of some already endangered species. Finally I urge you think very carefully before allowing these houses to be built in Leek, with a special thought to the Mount, once you have let properties be built there Leek as a lovely small market town will be spoilt and the beautiful uninterrupted views will be gone forever.</p>	<ul style="list-style-type: none"> • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access • See para response to P0119 on housing needs evidence <p>The NPPF expects Councils to meet objectively assessed development requirements, and also encourages brownfield development, subject to wider Policies.</p> <ul style="list-style-type: none"> • See para response to PO682 about Leek employment land requirements • See para response to PO11 about highways • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO676 about educational requirements • See para response to PO682 on ecology evidence

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9221	Ms Lisa Milward				Object	I wish to register my disapproval to the above development My objection has little to do with extra traffic and infrastructure but a lot to do with losing a place that is very dear to people's hearts. The Mount has always been a favourite short walk of mine and my family's. It is peaceful, has beautiful views and friendly people of all ages make a point of speaking. The Mount is somewhere that I spend a lot of time walking each week, a place that has been a part of my life since childhood. I have very fond memories of spending time walking over The Mount with family when we didn't have a car and little money to take buses elsewhere. The Mount is perfect for a short walk, it's somewhere that I have always felt safe to walk alone and not too far for a morning walk before work and for those people who perhaps struggle to walk longer distances. By developing housing on this land I believe that it will take away one of the town's best assets, one that people of Leek have enjoyed for many, many generations. So as councillors and planners who are in office for a relatively short period of time in comparison making a decision that will remove this for everyone who loves to walk here, I hope that you really consider how much The Mount means to people like me. It will be a huge shame if this goes ahead.	<ul style="list-style-type: none"> • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO11 about highways • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access
PO9289	Mr Ian Harrison				Object	I hereby which to object to the building of houses etc on The Mount, Leek. This road, used by many is the last place to admire the scenic views of both Leek and the surrounding areas. It is an area of outstanding natural beauty. If one site is given permission for house building, then all others will follow and question where will it end. There must be countless brown field sites in the leek area which can be built on first and foremost. If 500 houses were to be built, what happens to Leek. The jobs aren't there, infrastructure, the existing roads can't cope with todays traffic (constant gridlocks in the town centre, never mind 1000 further cars. No hope of a ring road around leek. Junior schools, can't cope with further numbers of school pupils. My wife and I continue to walk over the mount and admire the scenery, as well as the many more who walk, cycle, run and horse ride over it. The new housing would block the outstanding views people go the the mount to view.	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence <p>None of the Mount sites attract an AONB designation.</p> <ul style="list-style-type: none"> • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO682 about Leek employment land requirements • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO11 about highways • See para response to PO676 about educational requirements • See para response to PO11 about open spaces and countryside access

PO9282	Mr Ian McFaul				Object	<p>i am writing to protest against the latest version of the site allocations plan for th Staffs Moorlands, in particular the mount area of Leek. the following objections should be considered</p> <p>a)maintaining the individuality of our market town rather than going down the homogenisation route</p> <p>b)I'm not sure where the demand for these house is coming from - where is the research on households forecasted to require this</p> <p>c)The area of most concern to myself is particularly LE127 and the terrible prospect of houses being built on the town horizon, the entrance to Buxton makes me shudder and we should not go down that route</p> <p>d)there are lots of brownfield sites ripe for development in town that should be exhausted first rather than taking the easy option short term option.</p> <p>e)where i the visionary leader on the council who can set out a plan for the town not driven by short termism</p>	<ul style="list-style-type: none"> • See para response to PO676 about design policies • See para response to PO119 on housing needs evidence • See para response to PO11 about landscape evidence • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO11 about public consultation and the Statement of Community Involvement
PO9309	Councillor Gail Lockett				General comment	LE142a – is owned by [a local charity] and I believe they are against the development.	The Council communicates with landowners of affected sites to ensure they are available, prior to selection. Note that the owner of site LE142A, as indicated on the Local Plan proposals map, has confirmed site availability.

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9324	Ms Elizabeth Stretton				Object	<p>I am writing to voice my opposition to the proposed housing development on the Mount Road, Leek - ie Plots IE140, LE128a, LE127, LE142a, LE142b, and LEO22. On the edge of the Peak District, this area of Leek can only be described as an extension of this National Park and one which holds a special place in the hearts of Leek residents. The number of walkers and cyclists using this area each week must be in the hundreds with many, like myself, enjoying the walk over The Mount on a daily basis.</p> <p>This walk commands beautiful views of the surrounding countryside, providing a "country" experience for so many walkers, cyclists and drivers, as well as a place to sit and watch, for example, the sunsets, weather conditions unfold, or simply just to sit and ponder. For years it has provided a walk within a few minutes walking distance, for families, courting couples, dog walkers and anyone else who wants to escape from the town and enjoy the views and the experience pleasures of a "country " walk without having to travel by car and park in an over-priced car park! There are even opportunities for people to drive from anywhere in Leek within minutes to the Mount and then enjoy all the attractions described above. The loss of this walk and seats would deprive many people of the opportunity to enjoy panoramic views across the town and the surrounding skyline: these vistas would be lost and replaced with houses instead - reducing the area to just another street of the kind to found anywhere and out of character with the landscape. It also seems that all the attention has been focused on this area and side of Leek, when there are other areas around Leek which could be made use of. One of the most important problems, as I see it, is the strain on the local infrastructure. Up to, or in excess of, 500 houses could be built along this road and all these new residents will need employment - already a problem in Leek and the surrounding areas and towns - as well as schools for their children. Leek primary schools are already experiencing problems and some children are already having to travel across Leek to receive their education. Recently trees have been cut down on the top field of the High School - now work has started on fencing this area, apparently towards the building of a new primary school on this site. I cannot remember being made aware of this possibility, although it may have been mentioned somewhere, but it seems that the building of this school means that councillors are confident that the housing development will take place and they will be able to wave aside any objections pertaining to education and say that a school is already being built . There are many houses in Leek which are empty, as there are many sites which could be used to provide areas for new homes, and it would make more sense to utilize these possibilities before taking away an important , local amenity which is used every day by so many people and which is our own area of "outstanding natural beauty" and which is available to everyone.</p>	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access • See para response to PO1142 about western Green Belt • See para response to PO682 about Leek employment land requirements • See para response to PO676 about educational requirements • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO676 about design policies <p>The emerging Local Plan is not yet finalised and needs to undergo independent public examination by Government appointed Planning Inspector before it can become adopted. Planning applications arising before this happens must be determined against the NPPF and current Council planning policies.</p> <ul style="list-style-type: none"> • See para response to PO119 on housing needs evidence

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9332	Dr Tracey Cole				Object	I would like to hereby object to the areas of local interest around The Mount being developed (LE142b; LE142a; LE140; LE128a; LE127; LE022). As I am sure you are aware, there is considerable public opposition to the proposed building of 400 houses on these sites. The area is well used, at all times of day for cyclists, walkers and horse-riders. It is an quiet oasis for the people of Leek to experience the calm of the countryside and look down on the splendid views of the town and further afield. As such, it is an extremely highly valued area in the town of Leek. As a resident of Pitcher Lane..building on The Mount would seriously impact on me and my neighbours. The building of so many houses will bring at least 400-800 cars with it. Access for these vehicles will no doubt run straight past my house, causing noise and air pollution. I moved to Leek from Cheshire for exactly the same reasons: the road I lived on became unbearably busy. I noticed that sitting in the garden was impossible with the constant noise of the cars and the smell of the fumes, not to mention the health consequences of nitrogen oxides, carbon monoxide and particulate matter. I am also concerned that with so many vehicles, the junctions of Kniveden/Ashbourne Rd and The Mount/Buxton Rd will easily generate queues during rush hours. Getting off my estate will be far more tricky and the increased risk of traffic and pedestrian accidents is not a pleasant thought. A town like Leek is quite a jewel, but it could so easily be ruined forever if we don't seriously consider all the consequences of our actions.	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access • See para response to PO11 about highways • See para response to PO92 about air quality
PO9350	Mr David Rowe				Object	I am writing to object to the selection of all sites on Mount Road, LE127, LE128, LE140 and LE142a. This road is of great value to local people as a very accessible place to experience and benefit from the surrounding countryside. Many people walk, cycle, exercise their dogs along this road every day, and this would be completely lost if development was allowed to take place. There are several brownfield sites in the town that should be considered instead, e.g. the old mills, Barnfields site.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO9207 about existing industrial areas

PO9387	Councillor Charlotte Atkins				Object	<p>I am writing to object to the four development sites on The Mount as identified in the proposed SMDC Local Plan. My reasons for doing so are:</p> <p>The Mount provides unique and much valued panoramic views over Leek and its skyline as well as over parts of the National Peak Park. The openness of The Mount makes it a hugely important local asset for public recreation and for biodiversity. This is particularly important at present when lack of physical exercise is creating a public health crisis. The Mount is very popular among walkers, cyclists, horse riders and joggers as well encouraging families to be active and enjoy the natural attractions of the area.</p> <p>The roads up to The Mount are totally unsuited to increased traffic. But if they were improved, that would encourage rat running between the Ashbourne and Buxton Roads totally destroying the quiet rural nature of the area. With increased traffic, the junctions at either end of Mount Road would be highly dangerous. The Mount is a developer's dream and would attract developers who want to build expensive executive homes. These would attract buyers from outside Leek rather than providing the affordable homes we need for both local young and older residents. If 400 houses are built on the Mount, they could potentially generate 800 cars driving through the centre of Leek as the prevailing flow of traffic out of Leek is to Stoke on Trent and Macclesfield. That would create even more gridlock than we experience already. More suitable development sites exist within Leek eg along the Macclesfield Road. But they have not been identified or consulted upon. I urge the Council to drop its plans to destroy The Mount and look elsewhere to develop affordable homes for local residents.</p>	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access • See para response to PO11 about highways • See para response to PO1142 about affordable housing • See para response to PO682 about Leek employment land requirements • See para response to PO1142 about western Green Belt • See para response to PO92 about Leek housing requirements and windfall allowance <p>Both the 2015 site options consultation, and the 2016 Preferred Options consultation, mapped sites for various land uses across the District including housing, employment, and mixed uses.</p> <ul style="list-style-type: none"> • See para response to PO193 about option sites assessments and sustainability appraisal

PO9426	Mr Michael Harvey				Object	<p>To whom this may concern. I would like to raise my strongest objections to the proposed plans to build across the mount - LE142A, LE140, LE128 & LE127. This is a beautiful and precious area for the people of Leek who currently enjoy leisure activities such as walking etc which is easily accessed by many, both old and young. The fantastic views of this high quality landscape and the therapeutic benefits it offers are easily available to all who want to enjoy the beauty and peacefulness of the countryside without having to travel far from their doorstep, and who may not be in a position to! To lose this lovely countryside would be a tragic and very sad loss to the people of Leek. The Mount is a narrow county lane and is totally unsuitable for increasing the flow of traffic. Having Buxton Road at one end of The Mount and Ashbourne Road at the other, this would create a massive increase in the volume of traffic using it, and increase the risk of accidents - it's totally unsuitable! In addition to this, the increase in homes would ruin what is currently a peaceful retreat and a habitat for our wildlife which I have seen loads of rare birds when walking our dogs , these birds would go away and would not be seen again. Also foxes and badgers. Concern that fatal traffic accidents will occur. Leave our mount and all it has to offer well alone!! There are loads of other areas in Leek that are within the boundaries of leek and not on green field sites (Huges Concrete site for one) Leek dose not need this amount of housing there is not the work/jobs for the increase in people. This is all about money in the pocket for the council. If we need another primary school increase extend Beresford Memorial school there is about 3 acres of fields behind the school.</p>	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access • See para response to PO11 about highways • See para response to PO682 on ecology evidence • See para response to PO9207 about existing industrial areas • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO119 on housing needs evidence • See para response to PO682 about Leek employment land requirements • See para response to PO676 about new homes bonus • See para response to PO676 about Leek education requirements
PO9380	Cllr Dani Ogden				Object	<p>An area of natural beauty should never have been considered for planning application in the local plan. The outrage this has caused with local people has been overwhelming. The Mount is an area accessible to open countryside for local people, it is used for recreational purpose and attracts visitors coming to Leek. One lady told me that she could walk safely with a group of people with learning difficulties, the volume of traffic from four hundred dwellings would have a severe impact on those using The Mount for recreation, the infrastructure alone would not only cause a dramatic difference to the landscape it would also affect the wildlife in this area. That said, LE142a [landowner] are against development on this land, also there appears to be no indication on the map as to where the boundary is belonging to [the landowner]. LE127 and LE128a is not suitably distributed to urban infrastructure. It has been suggested LE066 where Kniveden Hall is, Folker Grange and Holme Farm on the west side of Leek are developable.</p>	<ul style="list-style-type: none"> • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO11 about open spaces and countryside access • See para response to PO11 about highways • See para response to PO682 on ecology evidence <p>The Council communicates with landowners of affected sites to ensure they are available, prior to selection. Note that the owner of site LE142A, as indicated on the Local Plan proposals map, has confirmed site availability.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local</p>

							<p>Plan.</p> <p>The map in the Preferred Options consultation document is intended to illustrate proposed allocations and development boundaries and other summary information, not the extent of land ownerships.</p> <ul style="list-style-type: none"> • See para response to PO676 about educational requirements • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO193 about option sites assessments and sustainability appraisal • See para response to PO1142 about western Green Belt • See para response to PO682 about Leek employment land requirements <p>The 2016 Landscape impact study concludes that: LE066 is of high landscape sensitivity owing to its location, despite the presence of site screening. Note the findings of this study form part of a wider evidence base to support SMDC's Local Plan. Its conclusions must be weighed against other evidence.</p>
PO937 2	Councillor Rebecca Done				Object	<p>On the proposed planning for the Mount in Leek..I do not agree with and my reasons are stated below: The Mount is a very important open space close to the town centre which is enjoyed by a lot of people across the town including myself. There will be a massive impact on infrastructure, I think primary schools in particular would suffer (East Street, Beresford) and will struggle to keep up with demand. Mount Road is on the route of the Staffordshire Moorlands Walk – a very popular route for leisure activities such as walking, cycling and jogging` If all the 6 developments proceed then in excess of 500 houses would be constructed. Mount Road would likely become a main road linking the Ashbourne and Buxton roads. The proposed sites across Leek are unbalanced - there will not be sufficient demand to build all of these houses on one side of town.</p>	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO676 about educational requirements • See para response to PO682 on Infrastructure Delivery Plan • See para response to PO11 about public rights of way • See para response to PO11 about highways • See para response to PO1683 about viability study

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9398	Ms Katie Giddings				Object	<p>I wish to register my strong objection to the sites identified for development along The Mount, Leek. The site reference numbers are LE127, LE128, LE140 & LE142a. The Mount is highly valued by the people of Leek. Hundreds of people use it every day & enjoy the landscape and views. These people cover a broad mix - there are walkers & strollers, hikers & joggers, dog walkers, horse riders, cyclists - and they range through all ages, from young to old. Generations have taken the air along The Mount and future generations deserve the same opportunity. Chance and regular encounters with this variety of people whose paths would probably otherwise not cross creates the sense of community so often lacking elsewhere but celebrated in Leek. The view of Leek from The Mount creates a sense of belonging to and connection with the whole town, enhancing this sense of belonging. I may not live the other side of Leek but I can see it every time I walk the Mount and feel part of its whole. The town is visible from The Mount & I can enjoy the view of its special architecture & character. This natural landscape is free for everyone to enjoy and is accessible within minutes of the town centre. It is a landscape and community which would be lost forever should the developments go ahead. Such things are irreplaceable and I despair that The Mount is even being considered as a suitable option. I am a recent newcomer to Leek having moved here three years ago. I have never lived anywhere more welcoming and cheerful and full of people appreciating and making the most of living in such a beautiful place. The Mount is at present a country lane offering peace and tranquil exercise. Its urbanisation would completely change its character and make it a main road connecting Ashbourne & Buxton Roads. The traffic increase would be beyond that contributed to by extra housing as it would become a highly attractive route for those seeking to avoid Leek town centre. The access to and from Ashbourne Road would also radically change the character of that end of town. The increased housing would alter the balance of the town and there is simply not that level of demand for housing in that area. The figures of required housing also appear to be based on doubtful statistics so that the very need for this level of housing in the Moorlands is questionable. It would really be dreadful if this so very important natural landscape were to disappear forever from Leek. In conversation with the people I meet along the Mount, there is a strong feeling of being threatened by changes beyond their control & of losing something very precious. Many people have said they have no faith that their feelings and needs will be valued. Please change their minds and show that local people will be listened to and their objections acted upon. Please don't build on The Mount.</p>	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence • See para response to PO11 about open spaces and countryside access • See para response to PO11 about highways • See para response to PO92 about Leek housing requirements and windfall allowance • See para response to PO119 on housing needs evidence • See para response to PO11 about public consultation and the Statement of Community Involvement

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9414	Mr Alan Percival				Object	I wish to object to the proposed house building on The Mount. Along with many other people I walk along Mount Road several times a week winter and summer. It is a lovely country walk and the only one on the eastern side of the town that is away from traffic fumes. There are many other reasons why building should not be allowed on The Mount which I am sure you have been made aware of.	<ul style="list-style-type: none"> • See para response to PO11 about open spaces and countryside access • See para response to PO92 about air quality

Question 10 Do you have any comments on the proposed housing allocation LE142A in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
	Petition from Mount residents (1092 signatures)				Object	<p>Dear Miss Ralphs, Building four hundred plus houses on the area known by everyone in Leek as The Mount and used by countless generations as a gateway to the countryside would be against everything that 'Localism' intended to bring. The enclosed petition goes some way to demonstrate the strength of feeling that there is against the proposed building plots as set out in the Local Plan. The area is mainly agricultural and offers amazing views of the town and its surrounding countryside. Indeed the views of Leek's conservation area is unrivalled and the area as a whole acts as a buffer between the town the Peak District National Park. The road itself could not cope with the estimated 600 to 800 extra cars that the proposed housing would generate. The Mount is a narrow road with no footpaths and the junctions at either end of the Mount would become even more dangerous. Historically people travelling out of Leek to work use the Stoke on Trent and Macclesfield roads with few travelling to Buxton or Ashbourne. This would mean that the roads in Leek's Town centre would become even more congested at peak times as these people make their way through town. We urge the Council to think again and produce alternative sites for the houses thereby saving this precious area for the future generations to enjoy.</p>	<ul style="list-style-type: none"> • See para response to PO11 about landscape evidence <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This includes consideration of heritage impacts, following consultation with the Council's Conservation Officer, and the heritage impact recommendations of the most recent 2016 landscape impact study. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p> <ul style="list-style-type: none"> • See para response to PO11 on highways • See para response to PO11 about Council Assembly and statement of community involvement • See para response to PO221 about Leek employment land requirements

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO120	Mrs Alison Campion				Object	Extra housing will create more traffic on already busy narrow road. Views and open spaces should be left as they are for the public to enjoy when walking and cycling.	<p>The Council consults with SCC Highways during Local Plan preparation. SCC did not raise any objections to Preferred Options sites LE022 /LE127 /LE128 /LE140 /LE142A /LE142B subject to development in this area contributing to the improvement of Mount Road including provision of footways and pedestrian links. Also Kniveden Lane should be brought up to adoptable standard with the implementation of footways. Further junction improvements at Mount Road/Ashbourne Road may also be appropriate. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to submit transport statements, and provide highways improvements where deemed appropriate).</p> <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes landscape impact evidence. The most recent 2016 landscape impact study also assessed impacts from the Peak Park, and concluded that the various Mount sites exhibited low- through to high- landscape sensitivity; it also provided recommendations regarding mitigatory measures where appropriate. It concluded site LE142B to be of high landscape sensitivity as the site is visible from the Peak Park and could affect its setting; and could also affect the rural approach to Leek from the Peak Park. Note that landscape evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p> <p>The public/visual open spaces proposed by the Council are those mapped in the Preferred Options consultation document. The Council's emerging Local Plan policies seek to improve public access to open spaces/recreation generally where this is consistent with other policies. Note there is no automatic public right to cross privately owned land beyond public rights of way.</p>

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO230 PO235	Miss Alicia Guy Mr Daniel Frith				Object	Building nearly 400 houses in the Mount area will totally ruin the lovely breathtaking scenery and peace and quiet that you get up there, increased traffic will spoil the area also. It could bring house prices down as at the moment it is such a lovely peaceful area and this no doubt will change	<ul style="list-style-type: none"> • See para response to PO120 about landscape evidence • See para response to PO120 on highways • Property values are not considered material in planning law.
PO93	Mr Bill Reid				Object	This area is a most popular area for walkers, runners, drivers and strollers. It has been, for as long as I can remember, an area that provides views over Leek town and the surrounding area which cannot be equalled. It is a beautiful peaceful part of Leek which should not be spoilt by housing estates and the disruption that goes with it. The top of Kniveden Lane has a piece of unadopted road which deters motorists from using it as a thoroughfare and I am sure that this would become adopted if the proposed plans go ahead causing untold traffic, noise and pollution, as well as the dangers to residents from the traffic. There are many areas around Leek which would be far more suitable.	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO120 on highways <p>If the Council considered that a development may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts. In addition the Council continually monitors air quality across the District and regularly undertakes review and assessments of this data to identify areas where the traffic could have an unacceptable impact on local air quality. Policy SD4 in the emerging Local Plan covers control of all forms of pollution arising from development.</p> <p>Page 25 of the Preferred Options consultation document sets out the residual housing requirement for Leek to 2031 (pursuant to Policy SS3 of the adopted Core Strategy). The Council must demonstrate that it will fully meet residual housing requirements for Leek to have a sound Local Plan in place. This requirement does not have to be met 100% from land allocations – unanticipated development of other urban brownfield/greenfield sites counts too – Table 4.1 factors in assumptions about future windfall housing (resulting in a lower residual requirement). This windfall would include urban sites not formally identified on the map. Applications for residential uses arising on such sites</p>

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
							<p>would be assessed on their merits against NPPF and Council Policies. As there is insufficient capacity to meet this residual need entirely from sites within the Leek town boundary, the remaining requirement is to be met from a combination of urban (brownfield and greenfield) sites, and peripheral "urban extensions" around Leek as set out in Tables 4.2 and 4.3.</p> <p>Note that none of the Mount sites falls within the Green Belt, whereas the western edge of Leek has Green Belt status. Whilst Councils can allocate within the Green Belt National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). The Council recently completed a Green Belt Review which assessed the suitability for retention of all areas of Green Belt in the District, against the five Green Belt 'purposes' set out in the NPPF. This will be used by the Council alongside other evidence inprogressing its Local Plan. The NPPF also allows for consideration of development proposals that would represent 'limited infilling', or in some cases redevelopment of 'brownfield' sites in the Green Belt.</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO223	Mr Andrew Bodiam				Object	<p>Like many others I have enjoyed walking on the Mount for 12 years and the planned housing site allocations in this area will completely destroy one of Leek's most valuable assets. Just take a walk along Mount Road and imagine what it would be like with the planned housing in place. I appreciate the Governments requirements but I am far from convinced that Leek's rural countryside should be sacrificed to their cause when there are so many brown field sites available. Furthermore, Leek is not a commuter town and I wonder if there is really the demand for 600 houses especially when those that are for sale take forever to do so. I would therefore ask you to think again.</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO93 about Leek housing requirements and windfall allowance <p>Need for additional housing stems from a number of factors, for example household formation, in-migration, linkages with future workforce, and other factors. The NPPF makes clear that housing projections are the starting point for assessing housing needs; however these additional factors should also be taken in to account in Council SHMAs. The Council's own housing need assessments are set out in its evidence base on the website. Note that this already takes into consideration empty properties in the Moorlands.</p>
PO683	Andy McGraw					<p>Extension of the Town Boundary into the Natural Zone The following blocks identified as, potentially suitable housing sites, all appear to be outside the town boundary on the maps supplied by the Staffordshire Moorlands District Council, on this second housing consultation June 2016 Block numbers; LE 127, LE128a, LE140, LE142a, LE142b All the above mentioned blocks are therefore proposed to be constructed on the Natural Zone land surrounding the town of Leek.</p> <p>Public Amenity The small narrow lane known as Mount Road which travels between the A53 Leek/ Buxton road and A523 Leek/ Ashbourne road along which the following blocks appear, LE127, LE128a, LE140 and LE142a, are used on a daily basis as a public amenity. The lane is constantly used by locals and visitors to walk, ride and enjoy the views in relative safety at present. If the proposed housing goes ahead, with the number of houses planned on these sites, this road will undoubtedly suffer a dramatic increase in the number of vehicles using it, by averaging 2 cars per household, thus reducing its safety and relative quiet enjoyment. The views over the town of Leek and its surrounding countryside will also be affected detrimentally. I also note that the lane is included as part of the Staffordshire Moorlands Walks, advertised and mapped by the Ordnance Survey as a recreational path but not highlighted as such on the SMDC consultation map. Surely the increase in vehicular traffic would compromise this route. Other public rights of way, public footpaths, are either not shown or seem now to stop at the new</p>	<p>Note that there is not a 'natural zone' designation for open countryside in the Staffordshire Moorlands.</p> <ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about highways • See para response to PO120 about landscape evidence <p>Development proposals affecting the routes of recognised public rights of way would need to make allowance for them.</p> <p>The consultation map is intended to depict summary information only; it does not for example illustrate public rights of way.</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>development. When I raised the question of this fact at consultation the officer was unable to answer my query. In these times of austerity and the constant cut backs to local government, areas of free enjoyment and recreational use which also merit health benefits need to be conserved.</p> <p>Wildlife Concerns The blocks shown as, LE127, LE128a, LE140 and LE142a are frequently used by several bird species, especially during the winter months, as important feeding grounds. Some of these bird species are afforded special protection under the Wildlife and Countryside Act 1981 (W&CA81) as Schedule 1 protected species, identified by BirdLife International as Globally Threatened species and are listed as Red List species of birds of conservation concern by organisations, the RSPB (Royal Society for the Protection of Birds), the British Ornithologists Union, Natural England and the British Trust of Ornithology, to name a few. The birds in question are; Fieldfare Turdus pilaris, Schedule 1 W&CA 81 and Red List species Redwing Turdus iliacus , Schedule 1 W&CA81 and Red List Species Starling Sturnus vulgaris, Red List species The small block of land between blocks LE127 and LE128a is also important to wildlife in particular bird species. Although this land is not earmarked for development I feel that the disturbance of the development would compromise the species using it. This small wooded block is used during the winter months as an important winter roost for a small number of Raven Corus corax, a species again afforded a certain amount of protection. Species using this block to breed include, Little Owl Athene noctua , although not afforded any specific protection via acts of Parliament or listed as a concern yet, it is a species showing major decline, UK population estimated to be down by 24%, as highlighted by the RSPB breeding bird data 1995 – 2008. Great Spotted Woodpecker Dendrocopos major , Nuthatch Sitta europaea, are other examples of regular breeding species in this area. Due to disturbance I predict that many of these species will refrain from using this important area.</p> <p>Infrastructure As mentioned previously the numbers of new houses proposed in the areas of Mount Road and Thorncliffe Road, blocks LE127, LE128a, LE140, LE142a and LE142b, will put an enormous strain on the local infrastructure and road system. We all constantly experience the difficulties whilst travelling through the town of Leek caused by any one road closure. Both junctions from Mount Road can be difficult to negotiate now with the small amount of traffic using it with the A523 being particularly dangerous in its present form. Problems with access at both these junctions will be severely increased with the increased volume of traffic. At the original consultation July 2015 there was no mention of increasing employment opportunities even when the question was raised. I still feel that these concerns have yet to be addressed. It was implied but not</p>	<p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites, including ecological evidence: the Mount sites LE022/ LE127/ LE128/ LE140/ LE142A/ LE142B were subject to a Phase I ecological survey in 2014 and a later 2017 ecology study considered the scope for 'local wildlife site' (ie.SBI) designation for all preferred option sites. These studies set out ecological evaluations of the sites followed by recommended further surveys/actions in the event of future development. The Council would expect subsequent schemes to take account of this evidence; further Policy NE1 allows for the Council to require ecological mitigatory or compensatory measures where appropriate. Note that ecology evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites. According to the 2006 NERC Act, the Council must in its Planmaking, have regard to the purpose of conserving biodiversity.</p> <p>National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess</p>

						<p>confirmed that most of the individuals who would be residing in the new development would be commuter based, travelling to nearby cities to seek their employment. This surely is contrary to most local government policies that are tasked with reducing this activity to contribute towards climate change and global warming issues. These planned developments will also have a visual, probably a negative impact from the adjoining Peak District National Park as it will be observed from the iconic Roaches and the boundary road of Morridge.</p> <p>There seems to be little or no mention of the use of brown field sites throughout the proposal. With the relaxation of planning rules for developing these sites should the Council look to these sites first. Removing deteriorating buildings and areas within the town that look unsightly and replacing with new developments would surely enhance the town, and, as they are close to amenities within the town centre, reduce the need for occupants to use their motor vehicles on shopping trips or evening entertainment. There are also a number of old mills and factories within the existing town boundary that could and should be transformed and upgraded into apartment blocks, as they have in other towns and cities in the UK, which would save those buildings from further degradation, provide perfect housing within</p>	<p>the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p> <p>Both the 2015 site options consultation, and the 2016 Preferred Options consultation, mapped sites for various land uses across the District including housing, employment, and mixed uses.</p> <p>Notwithstanding current commuting patterns, the District as a whole has residual general employment land requirement, and Leek has a requirement (of around 8ha to 2031) and the Council must demonstrate that it will fully meet these along with its housing requirements, to have a sound Local Plan in place. Government Policy promotes mixed land uses, subject to proper consideration of amenity impacts (such as noise). The Council works with neighbouring planning authorities under its duty to cooperate, to explore opportunities for the meeting of development requirements cross-border. However neighbouring authorities must also address their own development requirements. The Council consults with SCC Transport (regarding strategic impacts) during Local Plan preparation; and has regard to SCC's Local Transport Plan Integrated Transport Strategy for the District.</p> <ul style="list-style-type: none"> • See para response to PO93 about Leek housing requirements and windfall allowance

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

						<p>the town and help to keep the overall feel of the town and its history.</p> <p>Conclusion In conclusion it is my belief that the proposed development and size of that development will have a serious and negative impact on the market town of Leek and its Natural Zone boundary. As a society in general we are loosing touch with nature and the great outdoors. There are Government initiatives to reverse and combat this trend. Organisations, funded by the National Lottery, Government, County and Local councils including SMDC, are tasked to promote these initiatives assisting people to re-engage with nature. We are also constantly reminded these days of heath, well-being and mental heath issues that our society is increasingly subject too due to the pressures of our modern living and the need for places for people to unwind. With this in mind how can we justify increasing the urban zone into our countryside. We have a duty to protect iconic landscapes, open spaces and the biodiversity such as can be found within the Mount Road area for the future generations of this fantastic town, so that they too, can experience quiet and peaceful recreation as we have enjoyed over the years . Maybe the Officers involved in making the final decisions should take an early morning walk along the Mount Road to experience these quiet and peaceful surroundings with the only noise being provided by the local bird-life with their dawn chorus. Once we loose these areas they are lost forever.</p>	<p>In relation to comments on economic impact, new housing has a proven positive economic benefit to an area, generated both by expenditure of construction industry and through longer term residential spend.</p>

PO677	Mr Jonathan Hulme				Object	<p>The mount is an important, free, extensively used recreation facility for Leek. The proximity of the mount to the town makes it easily accessible, providing a rural escape for walkers, cyclists, joggers and families alike. This invaluable resource contributes to the physical and mental health and wellbeing of all who use it. The mount provides panoramic views of the town and surrounding moor land including the Roches, and housing developments should not encroach on this. The junctions with the A53 and the A523 are also quite dangerous and unsuited to large amounts of traffic. Some form of traffic management would need to be added to these junctions, increasing congestion in and around the town to even higher levels than currently (which is already too high!!). This deters visitors to the town, reducing the amount of tourist trade. The area is also important ecologically and accommodates a variety of species, some of which appear on the UK Biodiversity Action Plan. This excessive allocation of sites appears to be national policy implemented at a local level without consideration of local needs and demographics. The infrastructure in the east of the town is insufficient to cope with a population influx. For instance, the schools and health facilities are already full. Housing development should be concentrated on brownfield sites in the town such as Davenport mill on Mill Street and the mill on Ashbourne Road. The developers who own these sites should be incentivised to commence development. Redevelop eyesores, don't diminish beauty spots.</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO120 on highways <p>Any new developments would need to adhere to design policies to ensure character of the District is maintained.</p> <ul style="list-style-type: none"> • See para response to PO683 on ecology evidence • See para response to PO223 on housing needs evidence • See para response to PO683 about Infrastructure Delivery Plan <p>The Council consults with SCC Education during Local Plan preparation, and SCC have indicated a need for additional first- and middle- school land provision in Leek resulting from the town's development requirements. These are laid out in the Preferred Options consultation document.</p> <ul style="list-style-type: none"> • See para response to PO93 about Leek housing requirements and windfall allowance <p>All Planning Authorities are eligible to receive New Homes Bonus which was introduced by the Government to reflect and incentivise housing growth in their areas. It is based on the amount of extra Council Tax revenue raised for new homes and is payable annually over a 6 year period.</p>

PO703	Mr John Burnett				Object	<p>This existing field forms an intrinsic part of the open space known as the Mount. As such it provides views over the town out to the Macclesfield area and for users of the Mount affords an area of outstanding natural beauty. Building on this plot of land would severely restrict the views available and would mean that use of the Mount Road as an exercise and recreation facility would be severely restricted. I would also object based on my concerns that building in this location would have severe impact on both existing infrastructure including roads and schools and would affect the ground water run off causing issues in other areas of the town. Building on this land would demonstrably damage the aspirations of the local community and would have severe economic and environmental consequences - completely at odds with the objectives of the consultation.</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence <p>None of the Mount sites attract an AONB designation.</p> <ul style="list-style-type: none"> • See para response to PO120 on highways • See para response to PO677 about educational requirements <p>The Council consults with utilities providers, the Environment Agency, and the SCC Lead Local Flood Risk Officer during Local Plan preparation. These bodies did not object to any of the Mount sites. The SFRA provides an overview of flood risk from all sources across the District, and will be used alongside formal EA responses regarding proposed allocations. Note that subsequent development proposals would be required to integrate sustainable drainage features into layouts, as required by the Flood and Water Management Act.</p> <ul style="list-style-type: none"> • See para response to PO683 about economic benefits of housebuilding
PO1321	Mr Stapleton	Leek And District Civic Society			Object	<p>I write on behalf of Leek & District Civic Society to protest in the strongest possible terms against the decision to include The Mount' Leek as a preferred option for housing development. This area is heavily used by recreational walkers and is the sort of local amenity which would be absolutely spoilt by additional building. Leek has few enough open spaces as it is and the loss of The Mount would be completely unjustifiable. Of all the site options in the Leek area, The Mount is the one which we feel should be absolutely sacrosanct and protected for the present populace and future generations.</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access <p>The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy.</p> <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This includes consideration of heritage impacts, following consultation with the Council's Conservation Officer, and the heritage impact recommendations of the</p>

							<p>most recent 2016 landscape impact study. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p>
PO1349	Mr A Birks				Object	<p>This morning whilst taking my constitutional stroll around Mount Road I happened upon a group of people considering the best plots to build houses in this beauty spot. One member of the group introduced herself as a local councillor. My heart sank as it became clear that some minds at least, against the wishes of the local people, the decision to build seems to have been taken. It is outrageous that the local community is once again to be ignored by those elected to serve us. Mount Road is a very important part of the social scene of Leek as local people use it daily to enjoy the countryside which is within their homes. It would be an ecological and social outrage to remove this facility from the people of Leek. This area is more important to the wellbeing of residents from across the town than any other area around Leek as it is their gateway to a relaxed walk in the fresh air in the countryside.</p> <p>Any development of this area would change the nature of Leek as it would necessitate the widening of the road, the installation of lighting and the uprooting of that special commodity trees. The Mount Road would be a major thoroughfare between the Ashbourne Road, and Buxton Road, Kniveden Lane. It would be a conduit between the same roads meaning heavy traffic rushing through the estate and there would be a problem caused by necessary construction of major road junctions at each end of the Mount Road. Local residents this would be a disaster. There is a concern too that, with the addition of a large number of houses in this area, the infrastructure at this end of town would be challenged beyond its ability to cope. Schools and doctors surgeries are already very full and recent queues of vehicles to get into town were horrendous during the roadworks in the town. Imagine the chaos should we add another 500 families in the queue.</p> <p>In the unlikely event that Leek should actually need extra accommodation, consideration should be given to brownfields or less intrusive sites first. There are several derelict mills which could be utilised for apartments or demolished for housing. The infrastructure of drains, electricity and gas is readily available near these 2 areas too. I appeal to the council to reflect on the wishes of those who elected them to serve their needs and reject the idea of developing this area and retain it for enjoyment and health of the many people of Leek who appreciate it.</p>	<p>The Council must conduct public consultation concerning its emerging Local Plan as set out in the Local Plan regulations (or exceeding these requirements); and in also in accordance with the Council's adopted Statement of Community Involvement. All stages of the local Plan (including consultations) must be agreed by the elected Council Assembly; and all meetings of the Council Assembly are open to the public.</p> <ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO683 on ecology evidence • See para response to PO120 about highways <p>Issues such as external lighting in schemes can be controlled by the Council's amenity policies. Streetlighting is a matter controlled by SCC Highways.</p> <p>The Council would as far as possible seek the retention of, or replacement of trees against its Core Strategy NE1 Policy where a scheme proposes tree loss.</p> <ul style="list-style-type: none"> • See para response to PO683 about Infrastructure Delivery Plan • See para response to PO677 about educational requirements • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO223 on housing needs evidence

PO1140	Mr R Harrison				Object	<p>I have recently looked at the site plans and talked to one of your officers concerning the location: This is a narrow road, used by many recreational purposes such as walking, cycling The views over Leek Conservation area and its surrounding area are 2nd to none both night and day There have been lots of houses built on the east side of Leek in recent years mainly off Ashbourne road. As the majority of people travel to Macclesfield, Manchester and Stoke on Trent to work, this means they have to travel through the centre and often Leek is gridlocked at busy times The exits from the Mount onto Buxton and the Ashbourne Roads are both very narrow and difficult to negotiate. Schools at the end of the town are already full to capacity and young children have to be taken across Leek early in the morning and collected in the evening. Drs Lists are so full. We are told that some of these houses are possible affordable housing. What does this mean? There are plenty of small terrace houses on the market which I would consider as affordable. So do we need more? In fact do we need a 1000 new houses to in Leek at all anywhere? If so I would like to think that there are possible sites in Leek - West End could be given consideration before further action is taken. Leek is a beautiful small town with easy access to countryside. By allowing building on The Mount Road that access will be diminished as more of our green fields turned into housing developments and country roads become clogged with vehicles. Where will it end?</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about highways • See para response to PO683 about Leek employment land requirements • See para response to PO1321 about option sites assessments and sustainability appraisal • See para response to PO683 about Infrastructure Delivery Plan • See para response to PO677 about educational requirements <p>The Council consults with its Housing Officer when setting definitions of 'affordable' in relation to affordable housing. This usually equates to a percentage of open market value which represents the upper limit that the house can be sold/resold for.</p> <p>An element of affordable housing will be required for all major housing schemes in the District, as set out in Local Plan Policies. The Council may also require an element of starter homes, and self-build plots on such sites. The Council's housing/design policies and the NPPF expect that housing schemes provide for variation in design; and a mix of house types to meet differing socio-economic needs, including affordable housing.</p> <ul style="list-style-type: none"> • See para response to PO223 on housing needs evidence • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO93 about western Green Belt

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO988	Mr Chris Clark				Object	In conjunction with my comments on allocation LE142A, this site is totally unsuitable. It is on a hill-top overlooking the town and surrounding countryside, and housing in this location will destroy the rural nature of the area. This site is way outside the current town boundary, and there are many alternative sites (including current "brown-field" ares) that are far more suitable for housing development.	<ul style="list-style-type: none"> • See para response to PO120 about landscape evidence • See para response to PO1321 about option sites assessments and sustainability appraisal • See para response to PO93 about Leek housing requirements and windfall allowance
PO1575 PO1571 PO1576	Mrs S Chauveau Mrs S Chauveau Mr PJ Chauveau				Object	I wish to firmly object to any housing development on the mount. It is a icon beauty spot, Leek's gateway into the open country side and has been popular with walkers, joggers, cyclist and horse riding for generations and should be protected for future generations to I strongly recommend further consideration be given to the developing the empty mills, brownfield Sites and making use of the many vacant homes in the Moorlands before surrendering our precious Greenfields to hungry developers	<ul style="list-style-type: none"> • See para response to PO120 about landscape evidence • See para response to PO120 about open spaces and countryside access • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO223 on housing needs evidence

PO1684	Mr N A Brundrett				Object	<p>I am writing to protest against the latest version of the site allocation plan for the SMDC. The site references of particular interest are: LE022, LE127, LE128a, LE140, LE142A, LE142B. The grounds for that are:</p> <p>Loss of important local amenity – The Mount is a very important open space close to the town.</p> <p>Visual impact – restrict important skyline and further afield. The proposed sites are near or run on particularly at night with street lighting.</p> <p>Impact for infrastructure – primary schools in particular (Leek 1 st school and Beresford Memorial School) will struggle to keep up demand and the situation where some children already have to school in the west of leek will become more common. Mount Road is a route of Staffordshire Moorlands Walk a very popular route for Leisure activities such as running, cycling and walking.</p> <p>High quality Landscape – unsympathetic to landscape and the character and quality of the area. Urbanisation of the country lane that is mount road – if all 6 developments proceed then the 500 houses would be constructed. Mount Road would be linking the Ashbourne and Buxton Roads. The spatial distribution of the proposed access sites across leek is unbalance – there will not be sufficient demand to build all of these houses on one side of the town so the council will not meet its housing needs in any event. The Mount is, and has been a great source of pleasure for many people over years. It needs to stay that way in order that the future generations have as much enjoyment out of this as our generation has.</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO1349 about streetlighting • See para response to PO677 about educational requirements • See para response to PO683 about public rights of way • See para response to PO677 about design policies • See para response to PO120 about highways <p>The Council is undertaking Local Plan viability work which will consider the viability of preferred option sites.</p>

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1685	Mr David Morgan				Object	<p>I am writing to express my strong objection to the proposal to build houses on the Mount. I specifically object to the building off houses on sites: LE022, LE127, LE128a, LE140, LE142A, LE142B. When I first heard about the proposal to build in this area. I was genuinely shocked and still cannot believe that the proposal have been submitted to build on such beautiful landscape which has helped to shape leeks identity as Queen Of the moorlands. I work in the local community and I have not heard a single resident of Leek express support for these proposals – they have expressed deep anger and concern. I live locally to the Mount and regularly take walks there and it is very clearly, a popular destination for walkers and cyclist. However, I do not feel that this is area that is solely of Leek by these who live in its vicinity. I believe that the mount is an area that the people of Leek genuinely cherish and it would be a tragedy if a major housing development were built along it, The Mount does provide an important amenity for local residents including Hargate estate. I feel it would be unacceptable to build houses on it, spoiling the unspoilt beauty of the area and leading to a huge increase in the traffic which would obviously cause a major hazard to walkers and cyclist. I feel it is unacceptable to deprive residents of a very built up area such as Haregate estate of the opportunity to enjoy the beautiful country side and open space this that the mount offers. If this proposal is passed then I feel that the character and identity of Leek will be very adversely affected and this will have a very detrimental impact on its image in terms of visitors and attracting business</p>	<ul style="list-style-type: none"> • See para response to PO120 about landscape evidence • See para response to PO120 about open spaces and countryside access • See para response to PO120 about highways • See para response to PO683 about economic benefits of housebuilding • See para response to PO677 on design policies

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1281	Mrs B Ward				Object	<p>I write once again to protest against the proposed development of housing along and off mount road. We have already had 2 public enquires and each time the inspector has upheld the decision not to allow these fields to develop along mount road. This is a great amenity for the town, especially for residents this side of leek. I feel that we have been left a short stretch off mount road but with all the roads going off it Mount Road itself will probably have to be widened and will become a bi pass for traffic between Buxton Road. Walking along a country lane enjoying the views. Do people walk as much on the other side of town? Aren't there still places for the development within the town? Not touching our open spaces. Where are 600 new houses on Mount Road going to work?</p>	<p>The Council must justify proposed land allocations which form part of its new Local Plan to planning inspector during public examination of the Local Plan. The Inspector must consider the 'soundness' of the Plan as per para 182 NPPF. Note that as part of this process the Council must demonstrate that it meets its objectively assessed development requirements for housing (and other land uses) for the District.</p> <ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO120 about highways • See para response to PO683 about Leek employment land requirements
PO1471	Mrs G Armstrong				Object	<p>As a resident of Moorland Road since 1975, I write to you to express my concerns over the appalling plan to yet again to destroy an area of the town much loved and frequented by its residents for countless generations. I can assure you that the contents of the letter not only reflect the views of me and the residents of moorland road and Kniveden Lane but those of leek in general. The proposal to build 400 houses on the Mount came as a shock to the town. Whilst I am not opposed to the idea of providing some housing in the Leek area, I cannot equate with the requirement for the number your department are planning. As regards the location, how can you say that a beautiful location like the Mount is in need of development when there are numerous locations that in the area that are an eyesore and would be more than fit the bill for re development? If your department were to take the time to canvas the people of leek you would find that it is considered an asset to this town. The Mount is an area of outstanding rural beauty with great views across the town, supporting an abundance of wildlife whose habitat would be destroyed if the plan goes ahead. It has long been a source of relaxation, leisure, exercise, and even welcomes retreats for courting couples and families with children or people exercising their pets can be seen walking the Mount in complete safety without the fear of being subjected to danger from large numbers of cars. This would change if the whole scheme goes ahead. Is it right that future generations should be denied the pleasure their forebears derived from this beautiful road, With an average of</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO223 on housing needs evidence • See para response to PO120 about landscape evidence • See para response to PO683 on ecology evidence • See para response to PO120 about highways • See para response to PO1140 about affordable housing • See para response to PO1349 about public consultation and the Statement of Community Involvement

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>each household owning 2 cars each the pain to build 400 residents could unleash about 800 vehicles all trying to support those numbers. Mount road would be saturated with vehicles all trying to leave either via the junction with the A523 Ashbourne Road or the A53 Buxton Road. Both roads are very busy main roads. After frustration of accessing these knock on effect would choke the town centre which struggles now at certain times to maintain a smooth flow. No doubt the un adapted and unmade section of Kniveden Lane would be upgraded encouraging it to be used as a short cut between Ashbourne Road and Buxton Road. The only thing that stops it being a rat track now is that it is unmade and has ruts and pot holes. Also of concern is that with this sort of development you re require to provide a proportion for social housing. We all know who are housed in these and what effect it has on the surrounding area. I need say no more. Can you explain why there seems determination within the planning bodies to destroy what is beautiful and precious to the people of Leek with total disregard to the preservation of the environment and wishes of the Leek populace. If they want to improve this town why don't they concentrate on some off those areas in dire need of redevelopment and of which there are many in this town. I along with the majority of the other house owners in the vicinity, share at the lack of the thought the has obviously not being thought that has gone into this project. I ask the question; have any of the councillors or those on the planning dep actually bothered to walk to location, to see for themselves what they would be destroying and ask residents for their thoughts. No, I doubt it very much if this is the case.is it just a figure on the map to them? I understand that the majority are not from leek and so don't really have its best interests at heart. These so called councillors were voted in to represent the towns folk and listen to their view. This has not obviously been thought out thoroughly and it makes me wonder what sort of people will be running the council. Is it yet again something to their advantage and not that of the town. Their priorities do not appear to be the people of leek there to represent them. I make this representation not only on behalf of those directly affected but also the people of leek who are totally opposed to this desecration of one of the most beautiful and well-loved areas.</p>	
<p>PO1501 PO9120</p>	<p>MRS KAREN BARKER Mr Robert Barker</p>				<p>Object</p>	<p>I do not believe that it is necessary to extend the town boundary into farmland as there are still many available brownfield sites within the locality. There is much greater need for jobs/employment as priority in the town if people are to be enticed to come to live here by large scale housing developments. There are presently not enough jobs locally to adequately provide for the current housing occupants. There is likely to be an increased need for Housing Benefits affecting the local economy together with significant increased pressure on infrastructure due to need for travel in and out of the area for work. It is also important to note tourism is a significant driver to the local economy! Therefore the town gateway, especially from the Peak Park</p>	<ul style="list-style-type: none"> • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO677 about design policies <p>Green Belt is a long established designation that serves a number of important functions in separating settlements, and preserving 'openness'. Whilst Councils can allocate/make</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>Buxton road A53, needs to be rigorous protection from the urban sprawl in order to maintain the 'Queen of the moorlands' identity. The point of entry into Leek from A53 Buxton Road is the most attractive picturesque and Tourist Route. It is also highly utilised public amenity for local residents of Leek who regularly make use of the whole area incorporating the A53 towards Tittesworth Reservoir/Blackshaw Moor, along Thorncliffe Road and its adjoining lanes, the Mount Road, as a place to exercise by walking, rambling, cycling, horse-riding, dog-walking, sightseeing, picnicking and general enjoyment of for health and well-being. The proposed areas particularly as it approaches the a53 Buxton Road junction with Thorncliffe Road and The Mount Road, is immediately adjacent to a landscape area which presumes against intrusive developments in order to protect its historic landscape nature. I would personally feel that the Special Landscape Area and environs ought to receive the highest priority protection. The designation encompasses the fact that it is special in nature and cannot therefore be replaced once lost or damaged. There is a number of brownfield sites within the town which could be very effectively used for housing development. For some reason? These are not shown on the accompanying consultation maps. However from attending a consultation meeting the existence of several sites a is a matter of common knowledge along with the fact that these would be 'the preferred option housing sites' in view of the residents of leek. There are also pockets of green belt land (designated such primarily for the purposes of town separation and quite often having no particular beauty or amenity), which in common with other towns in the country could be effectively utilised to expand the town boundary with selective use and sensitively to the environment. This would be better than destroying the areas which are highly valued by the Leek Community for beauty and recreation and which give the town of Leek its identity. The proposal to build almost 400 houses off the junction of the A53 as it joins Thorniclife Road and The Mount Road is a major intrusion into the public amenity and is unsupported in terms of the additional infrastructure requiring a need for development of roads, sewers, schools etc. The proposal will is completely unbalanced as it places virtually all the housing requirement? Unjustified along 1 narrow lane at the most flagship side of leek renowned for its visual beauty and recreational amenity. Please utilise the brownfield sites and protect leeks heritage and inheritance!</p>	<p>boundary amendments within the Green Belt, National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). Note that landscape quality/character, and public access characteristics, are not in themselves 'purposes' of Green Belt laid out in national guidance. The NPPF allows for consideration of development proposals upon 'brownfield' Green Belt sites.</p> <ul style="list-style-type: none"> • See para response to PO120 about landscape evidence • See para response to PO120 about open spaces and countryside access • Note that since adoption of the 2014 Core Strategy, there is no longer a 'special landscape area' designation. • See para response to PO120 about highways • See para response to PO683 about Leek employment land requirements • See para response to PO677 about new homes bonus • See para response to PO223 on housing needs evidence • See para response to PO1321 about heritage impact considerations • See para response to PO683 on Infrastructure Delivery Plan • See para response to PO677 about educational requirements • See para response in PO703 about utilities and flood risk
PO1402	Mrs Smith	M			Object	<p>With regard to the proposed 400 plus houses to be built on the mount, I would like to express my concerns on the matter. I can't help but for see the problems 400 to 800 cars will create, trying to leave Mount Road to gain access to the Buxton Road. They will be queuing up! Most families these days have at least one car some have two. Mount Road was not built for such traffic</p>	<ul style="list-style-type: none"> • See para response to PO120 about highways

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

PO1487	Mrs C Lane				Object	I object to any housing being built in this area. It is an area used by many people for walking etc. – many for health reasons e.g. for me. We must keep our open spaces that are in walking distance of our town, once lost – gone forever. Don't let us loose it	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access
PO1710	Mr G Carding				Object	I would like to object to the proposed housing sites on Mount Road leek. The Mount has been a historic to the people of leek for generations for its 360 degree panoramic views of natural beauty. Being born in Leek I have walked over the mount all my life and always enjoyed the peace and quiet surrounded by the countryside views which are irreplaceable building housing in this area would also destroy the wildlife and a result in the loss of open space. This road is unsuitable for the large volume of traffic which would be generated by all the new houses and is narrow in places with dangerous junctions at both end of the road. The roads in this part cannot take any more traffic. Please find more suitable site within the town, if we keep building out into the countryside where will the border of Leek End? Ashbourne	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO683 on ecology evidence • See para response to PO120 about highways • See para response to PO93 about Leek housing requirements and windfall allowance
PO1697	Mr Michael Owen				Object	My wife and I would like to tender our personal objections to any proposed house building along Mount Road Leek. We don't feel that the area has infrastructure to cope with the number of houses proposed and would spoil the landscape of a very popular and picturesque area used extensively by Leek residents	<ul style="list-style-type: none"> • See para response to PO683 on Infrastructure Delivery Plan • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence
