PO1767 PO1760 P O1775	Mr and Mrs W Lovatt Mrs J Lovatt Mr S Lovatt				Object	<p>LE127, LE069, LE128, LE140, LE066, LE142a, LE142b We would like to submit our comments concerning the above consultations with the specific regard to leek east. These consultations with specific regard to leek Ease and the area of mount road.</p> <p>This is a semi-rural area outside the town development boundary. One of the attractions of this area of leek is that the boundaries for development are very closely defined. This means that within 10minutes walk of the town centre you have access to open space, which makes the mount area very popular for leisure activities such as walking jogging and cycling. This is a important when considering what opportunities there are for leisure and exercise so close to town. The fields provide a home for various types of wildlife and this together with the farm animals that graze them, provide access to a nature very close to the heart of leek. The views from the mount are spectacular and largely unspoilt. Any developments of any of all the listed developments of the type proposed would totally alter the area, as it has with the Buxton Road end of Mount road. If all the development listed above were to proceed. In excess 400 houses would be constructed on what is pleasant open countryside. The access along Ashbourne Road and Mount road provide a road infrastructure that would be totally inadequate with the volume of traffic generated by such a development especially on the bad junction where mount road meets Ashbourne road near Poplar Service Station.. Access via the already existing estate off kniveden lane and or High View road and Moorland Road would be impossible to sustain, given the narrow nature off the roads in question and the cars parked on either side of the roads in what is a already busy residential area. Creation of a rat run would have serious consequences Public transport via the bus service would be totally inadequate. There are significant areas of land that would be ideal for development that are presently brown field sites within the town centre and the town development boundary. Development would be ideal of these sites would not impact on local wildlife and leisure activities and would be more sustainable as they would result from a increase in traffic in outlying areas. Given to the employment situation in Leek, a large proportion of these would inevitably be homes for communities for the potteries conurbation and or Macclesfield and greater Manchester. This would ruin the character and community feel of the area. Given the recent headlines concerning the lack of affordable housing in rural locations, more consideration should be given this type of development, rather than encouraging urban sprawl which would ruin the character of this town.</p>	<p>Note that the Preferred Options do not currently include site LE069.</p> <ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO120 about highways <p>Leek is already served by a number of frequent or less frequent bus routes, connecting to centres such as Hanley, Cheadle, Buxton and Macclesfield. A number of these use main arterial routes such as Buxton Road /Ashbourne Road /Springfield Road. In some circumstances, major residential developments may be required to contribute to improved bus routes/bus facilities in accordance with emerging Local Plan Pol T1/Staffordshire Local Transport Plan.</p> <ul style="list-style-type: none"> • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO683 on ecology evidence • See para response to PO683 about Leek employment land requirements • See para response to PO677 about design policies • See para response to PO1140 about affordable housing

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1558	Miss A Hampson				Object	Any development in the Mount on proposed sites will be visible from some distance, thereby impacting not just on leek, but also the wider area. The infrastructure is inadequate I am not convinced the possibility of infill sites in leek	<ul style="list-style-type: none"> • See para response to PO120 about landscape evidence • See para response to PO683 about Infrastructure Delivery Plan • See para response to PO93 about Leek housing requirements and windfall allowance
PO1553	Mrs G Webster				Object	I have never protested before but I feel compelled to write this let reg the proposed developments across the mount. When I was young I lived on Haregate Est and many times my parents took my siblings and I across the mount it was something we enjoyed seeing all the farm animal and wildlife. As I got older I would still walk the mount and dream of one day owning one of the houses which were only a couple of minutes' walk away from being in the countryside. That dream was realised in 1976. Now I am retired it is wonderful to be able to stroll round the mount each day. My husband twice a day come rain or shine, and able to do just that take in the views or have conversations with people we meet, not just from this area but from other parts of town. It is good for the soul as well as the mind. It is a marvellous asset for the town for young and old alike a great place to relax and exercise. It is precious and should be protected for future generations 'never know what you have got till it's gone' comes to mind as was the case with what was a beautiful roundabout which stood proud at the top off Derby St. Do we need so many more houses in leek if so we do not build on the field opposite the cricket club on Macclesfield Road which would not have the catastrophic impact of hundreds of houses on the mount or why not build them on Blackshaw Moor where there is already a small estate. I hope this marvellous asset treasured by so many can be saved for the town and the people of Leek.	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO223 on housing needs evidence • See para response to PO93 about western Green Belt <p>Blackshaw Moor is identified as a 'smaller village' in the Council's emerging Local Plan and should only attract a limited amount of additional housing within or around the built up area. Note that Anzio Camp received planning consent for erection of extra care housing, live work units, ancillary social centre and facilities building and change of use to holiday park in November 2015.</p>
PO1548	Mr P Sinclair				Object	Would like to object to the development of the 350+homes on sites across the Mount. The area is used by lots of people walkers, families with young and older children dog walkers, cyclist, runners, horse riders, all enjoying the wonderful views over the Leek, which has been enjoyed for many years. I've been coming around the mount since I moved to leek in the late 60's, building more houses will mean the loss of this lovely scenery for ever. Also the health & safety factors of all these extra cars 600-700 trying to get out at either end of the mount, onto the Ashbourne Road and Buxton Road which is already busy without adding additional traffic. Then pollution of the air	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO120 about highways • See para response to PO93 about air quality

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1534	Mrs C Whitehurst				Object	<p>I am disappointed that local objections to development along Mount Road leek have been ignored by those who claim to represent us, and I must once again voice my objections. The Mount is one of our most beautiful and well-loved amenities for local walkers, cyclist, runners and dog walkers. A short walk from town which I personally use at least 3 times a week whenever I walk around I meet at least 10-12 others. It is also a safe route to take children of all ages to appreciate the country side, farm use and wonderful views – all of which will disappear. Many habitats for small animals and birds will go along the grass verges and lost trees, so much for our greener landscapes. Who is going to buy these obviously very expensive houses not my children who can hardly afford to rent never mind buy? But I'm sure the overspill from Macclesfield, Manchester + Buxton will appreciate these cheaper houses than they can afford there. Where will all the children go to school our local ones are full and have little or no space to expand, more Drs and Dentists will be needed. Traffic along the mount will be busy. It has already increased during times of the road closures repairs etc, and now this new short out has been found it will continue to be used. As there are now plans in place to convert several old apartments such as old Mills in the town a large number of houses will not be needed by local people and smaller brown field sites can be found in and around leek for a much more acceptable amount rather than such a large estate. If the £1000 per house built is so tempting why not just ask us for more council tax – I'm sure most people would be willing to pay to save this precious area for our children and grandchildren. I would. Please please listen to our objections regarding this atrocity in our wonderful town.</p>	<ul style="list-style-type: none"> • See para response to PO1349 about public consultation and Statement of Community Involvement • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO683 on ecology evidence • See para response to PO1349 about tree protection • See para response to PO1140 about affordable housing • See para response to PO683 about Leek employment land requirements • See para response to PO677 about educational requirements • See para response to PO120 about highways • See para response to PO683 about Infrastructure Delivery Plan • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO677 about new homes bonus
PO1533	Mrs C Keates				Object	<p>With reference to SMDC local plan notification of consultation on preferred of consultation on preferred options site allocations and boundaries. I must object to the proposed building site of Mount Road Leek. This area is uses by walker's cyclist runners etc. It is an area that can be used in all weather and seasons. It is great use for recreation purposes. Something vital to the community of Leek. I myself have used it for 60years. It is a place of outstanding beauty with in the open spaces and with its views and should not be ruined by the building off houses. Other sites should be found.</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO93 about Leek housing requirements and windfall allowance

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1539	Mr B Day				Object	The Mount is a very important area for the town of leek. This whole area is an important amenity area for the town – it was promised a few years ago that there will be no further development after the completion of Mountside gardens. Further developments' will destroy the open views of the Morridge from the town. Some of the areas highlighted for development was gifted to the town presumably to protect them and for agricultural use. Development of the Mount will lead to greatly increased traffic on what is basically a country lane. Safety issues at both junctions. The importance of the local people who use it. Young walkers, runners, joggers, cyclist, horse riding, dog walkers. These include singles, couple. Family groups and organised walking groups aside. We urge you to look at these plans very carefully before you decide to ruin this beautiful area. Surely there are other smaller areas which could be utilized for future needs.	<ul style="list-style-type: none"> • See para response to PO120 about landscape evidence • See para response to PO120 about highways • See para response to PO93 about Leek housing requirements and windfall allowance
PO1488	Ms Dawn Garrett				Object	I write with reference to the planning proposals along The Mount in Leek. I moved to Leek last August, the countryside being one of the big draws. I'm dismayed to find that my favourite dog walk is earmarked for extensive development. The absolutely magnificent views would be lost forever. The birdsong drowned out by the inevitable increased traffic load. The wildflowers at the side of the road and the sheep peacefully grazing, all gone. The creeping urbanisation of such a lovely country town is a big worry. Surely it would be better environmental sense to deal with the falling-down mills and derelict housing in the town before building any further? Regeneration is a much more modern concept and would further revitalise the town itself. For me and my family access to the views, the fresh air and the wildlife is balm against our stressful and hectic working lives. I live on Ashbourne Road so this is not NIMBYism at work, it is a genuine plea to save this lovely area for everyone. Now and in the future.	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO120 about highways • See para response to PO93 about Leek housing requirements and windfall allowance
PO1585	Mr C Chauveau				Object	I wish to firmly object to any housing development on the mount as I love to go running there with my dad and really enjoy the view into open countryside.	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence
PO1590 PO1605	Mr J Jones Mr J Mays-Woodhead				Object	I wish to firmly object to any housing development on the mount as I often go there cycling and walking there with my family and I think it is very special place and would be completely spoiled by houses.	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence
PO1595	Mr L Emerick				Object	I wish to firmly object to any housing development on the mount as this is a natural beauty spot with open views into the countryside and it should need to be protected. My family often take our dog for walks there and feel it should be protected	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1715	Miss JM Botham				Object	With reference to the proposal for the mount new housing development This is and has been a delightful walk for the people of leek for many years. The older generation will have fond and lasting memories of the courtships over the mount. We as children used it for walking and horse riding in safety to go further afield to Cheddleton Heath. We know in recent times it is an it is a popular route of the Staffordshire moorlands walk. We believe more ought to be done with the brown fields site this would clear unsightly buildings and In most cases be more convenient to the town allowing for less use of vehicles and allowing for less use of vehicles and allowing for the green areas to be maintained for leisure pursuits.	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO683 about public rights of way • See para response to PO93 about Leek housing requirements and windfall allowance
PO1720	Mr & Mrs V and J Emery				Object	<p>LE066, LE067, LE068, LE143a, LE127, LE128, LE140, LE142A, LE142B. I wish to register my objection to the proposed development of the land on The Mount My reasons are as follows.</p> <p>There are sufficient brown field site available, such as The former Just juice site on Prince Street is now vacant The former Big Mill on Mill Street, ripe for development The former Brough, Nicolson and Hall Mill on Ashbourne Road A reasonable plot of land on the Organ Ground which was the former East Street Nursery which is now vacant. Shortly to become available the former Britannia Building Society plot of land on Cheddleton Road Land on Foker Grange on Macclesfield road</p> <p>The Mount is a valued area of outstanding beauty and must be kept for future generations to enjoy. It is supposed to be green belt land; consideration that seems to have been overlooked.</p> <p>I would like to point out the impact of the proposed development would have on local services i.e. schools, GP services, the road infrastructure and employment needs. I am also very concerned about the effect on the local wildlife,, the increase in traffic, and noise levels this development will bring. I would like to know what happened to the housing development at the Sainsbury's site, which never seems to have transpired</p>	<p>Note that the Preferred Options do not currently include site LE143A, and sites LE067/LE068 are not formally identified as they fall within the town boundary (see para response to PO93 about Leek housing requirements and windfall allowance).</p> <p>Note the former Britannia premises on both sides of the Cheddleton Rd are both preferred mixed employment/housing allocations, refs LE150 and LE235.</p> <ul style="list-style-type: none"> • See para response to PO93 about western Green Belt • See para response to PO120 about landscape evidence • See para response to PO677 about educational requirements • See para response to PO683 about Infrastructure Delivery Plan • See para response to PO683 about Leek employment land requirements • See para response to PO683 on ecology evidence • See para response to PO120 on highways • The noise impacts of schemes would be assessed against the Council's adopted amenity Policies and NPPF Policies

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

							<p>The Sainsburys site as part of its mixed use consent SMD/2013/1098 still enjoys residential consent on part of the site. Note Environmental Health Officer did not object to that scheme subject to conditions. The Council would assess residential schemes on sites affected by contamination in line with its adopted Policy SD4 and NPPF paras 120-121 NPPF. The responsibility of funding remediation rests with the developer.</p>
PO1696	Ms Machin K				Object	<p>I would like to object to the proposed housing sites on the mount road, leek as outlined in the preferred options site and boundaries of staffs moorlands local plans – sites LE127, LE128a, LE140, LE142A, LE142B. This area should not be built on as it will ruin the lovely views over Leek and the Horizon and has been enjoyed for generations by walker’s cyclist etc, who on a nice day vastly outnumber cars on this stretch of road. This road also appears to be outside the site boundary. By building approx. 400 houses it will no longer be a country walk yet another housing est. The council should be committed to maintaining green belt land and encouraging people to get fresh air and exercise in an age increasing obesity. There are surely plenty of empty mills and brownfield or former industrial sites within the town which could be developed for housing instead of building on open fields. There is also no development proposed in the west end of leek- why not? The planners need to go back to their drawing board and identify more suitable sites across the whole leek instead of concentrating on the one unsuitable area. Please save the mount</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO683 about public rights of way • See para response to PO120 about landscape evidence • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO120 on highways • See para response to PO93 about western Green Belt

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1741	Mr Martin Armstrong				Object	LE127, LE128A, LE142A, LE142B Why turn a place of beauty into an eyesore when the council should be concentrating on transforming areas which are an eyesore into places of beauty. There are so many alternatives to the proposed sites for housing development around leek is without having to take away Leeks most cherished leisure route. Mount Road has long been a source of relaxation, leisure and exercise to the residents of Leek It is used daily by scores of locals who walk, run, cycle, and enjoy the tranquillity of this country lane which provides fantastic views across Leek and towards the peak district. Where else in the area is there such an amenity so conveniently within walking distance and safe for people to enjoy. The Mount is also a natural habitat for wildlife including many endangered species. The like of owls, woodpeckers and many more other birds and small mammals would be severely put to risk and their habitat will be seriously damaged. This proposed totally unnecessary housing development would not only destroy all this but also a place extra stress on the town centre already, struggling to cope with congestion. The large number of extra stress owns the town struggling to cope with congestion. The large number of extra vehicles would adversely affect road safety and be a danger to the public particularly on both exits from Mount Road. These are but a few of the issues generated by this ill thought out scheme	<ul style="list-style-type: none"> • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO120 about landscape evidence • See para response to PO120 about open spaces and countryside access • See para response to PO683 on ecology evidence • See para response to PO120 on highways
PO2587	Consultation Service	Natural England			General comment	Natural England notes the proposed preferred site for allocation in Leek. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.	The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO2903	James Chadwick	Staffordshire County Council			General comment	The allocations proposed around Mount Road will necessitate highway improvements for example road widening, provision of footways, completing Kniveden Lane to adoptable standard, possible (probable) junction improvements at one or both ends. The removal of the sites between LE127 and LE128a could make the delivery of the required scheme more complicated and therefore requires further consideration including the reinstatement of sites LE069 & LE128b.	<p>Comments noted. See para response to PO91 about highways. The emerging Local Plan sets out how the residual housing requirement for Leek will be achieved by a combination of allocations within the urban area, and along the Mount (making allowance for windfall/small sites allowances). Additional housing sites along the Mount are not required.</p> <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p>
PO3655	Mr P Ash				Object	<p>My husband and I most strongly oppose the number of sites on Mount Road, Leek as preferred option for new homes. Both of us have lived in Leek all our lives and for the past 50 years have resided on the Moorland Road. Mount Road is acknowledged as an area of open space for walking, cycling, and jogging and it is a area of free from volumes of traffic? I know my mother exercised, pushing me in my pram walking round the Mount. Building houses either side of the road would most likely make the Mount Road into a main road linking Ashbourne Road to Buxton Road. This road is not sustainable not wide enough to take heavy vehicles and constant stream of Traffic, if numerous houses were to be built either side for Health and Safety reason would require pavements, gutters and drainage all of which will narrow, the width of the road for vehicles, in all probability each house will have 2 cars, which again will increase the flow of traffic. To surface the top of Kniveden lane would make this road a rat race and a highway leading to an increase of even more traffic may I remind the council that when the developers applied for planning permission to build homes on the land behind sunny view at the end of Ashbourne Road – grave concern was exposed by Staffordshire County Council of traffic from the houses converging onto a busy main road, would that not also apply to traffic from the houses converging onto 2 main roads – Ashbourne road,, and at the other end of Buxton road. I would like to draw your attention to the fact when Mr William Milnes gave the land he owned to the council, land where now stands Leek High School, and is playing fields which borders Kniveden Lane and extend on the Mount, there was a clause in the gift of land that this land would be only used for educational purposes. One may also ask the council “where are all families and buyers that require these houses? Leek has not the facilities to accommodate such a huge increase in its population. The Dr’s are already working to their full capacity, which schools primary and senior have places for an increase in children of school age? And where will the new comers to the area, travelling from the Mount to Macclesfield or to the potteries will increase the flow of traffic though the centre of the town these were problems with</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about highways <p>The Council is not aware of any legal encumbrances upon this site.</p> <ul style="list-style-type: none"> • See para response to PO223 on housing needs evidence • See para response to PO683 about Infrastructure Delivery Plan • See para response to PO677 about educational requirements • See para response to PO683 about Leek employment land requirements • See para response to PO1730 about Sainsburys consent • See para response to PO93 about Leek housing requirements and windfall allowance

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>planning permission to build house on ?? At Leek brook on the site of Joshua Wardens factory, as to the nature of the ground and the fact the earth may have become contaminated from factory work etc. These problems were overcome and rectified and houses were built. Now houses cannot build on this land surrounding Sainsbury's Supermarket because of problems with the land – if land at Leekbrook can overcome the problems with the land around Sainsbury's overcome the problem? And houses can be built on land previously occupied and accommodating buildings.</p>	
PO3644	Mr and Mrs Jones				Object	<p>We would like to formally submit our comment concerning the above consultation with specific regard to Leek East LE127, LE069, LE128, LE066, LE142a and LE142b. These consultations relate to Leek East and the area of Mount Road. This semi-rural area outside the town development boundary. One of its attractions of this area of Leek is that the boundaries for development are very closely defined. This means that within 10 minutes' walk of the town centre you have access to open space, which makes the Mount area very popular for leisure activities such as walking, jogging and cycling. This is important when considering what opportunities there are for leisure and exercise so close to town. The fields provide a home for various types of wildlife and this, together with the farm animals that graze them, provide access to nature very close to the heart of Leek. The combination of these two aspects make an early morning walk or late evening jog across Mount a uplifting and almost spiritual experience. The views from the Mount over Leek are spectacular and are largely unspoilt. Any development of the type and proposed would totally alter the character of the area, as it has with Buxton road end of the Mount. If all of the developments listed above were to proceed in excess of 400 houses would be constructed on what is pleasant open countryside. The access along Ashbourne Road and Mount Road provide a road infrastructure that would be totally inadequate with the volume of traffic generated by such a development, especially on the bad junction where Mount Road meets Ashbourne Rad, given the development has taken place from an old development that has already taken place on an old Quarry site and the proposed development on the other side of Ashbourne Road, near to the Poplar Service station, access via the already existing estate off either Kniveden Lane and or High View Rod and or Moorland Road would be impossible to sustain, given the narrow nature of roads in question are busy residential area. Creation of a rat run would have serious safety consequences. Public transport via the bus service would be totally inadequate. There are significant areas of land which would ideal for the development that are presently brown field sites within the town centre and the town development boundary. Development of these sites would not impact on local wildlife and leisure activities, and would be more sustainable as they would not involve significant damage to the environment that would result from an increase of traffic outlying</p>	<p>Note that the Preferred Options do not currently include site LE069.</p> <ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO677 on design policies • See para response to PO120 about landscape evidence • See para response to PO120 about highways • See para response to PO1767 about bus routes • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO683 on ecology evidence • See para response to PO683 about Infrastructure Delivery Plan • See para response to PO223 on housing needs evidence • See para response to PO1140 about affordable housing <p>It is standard practice for residential schemes which generate a requirement for 'local needs' affordable housing to have future occupation of those dwellings controlled via legal agreement linked to conditions upon the planning consent.</p> <p>Planning applications are assessed against the current Development Plan including the NPPF and adopted Core Strategy Policies.</p>

						areas. Given the department from Leek of major employers such as the Britannia Building Society, a large proportion of these houses would inevitably be home for commuters from the potteries conurbation and or Macclesfield and greater Manchester. This would totally ruin the character and community feeling of the area, and further issues in relation to the sustainable investment in local infrastructure. Planning conditions stating that the occupiers should have a connection with the local area have repeatedly been shown to be unenforceable in the contexts of the urban development. There have been applications for planning permission relating to these areas before, most notably, in 2007. This was refused on appeal, given the strength of feeling within the local community against this development. Any temptation to alter the town development boundary to facilitate these proposals should be resisted are there is no proven case that the type or amount of development proposed is justifiable. Given in the recent headlines concerning the lack of affordable houses in rural locations, more consideration should be given to this type of development, rather than encouraging urban sprawl which would ruin the character of the town.	
PO4727	Mr D And L Robinson				Object	<p>I am writing to protest against the latest site allocation plan for the SMDC. To build upwards of 4000 house in our beautiful area is criminal. It is obvious a Central Government ploy, of threats, then offer of £1000.00/house has worked. For the SMDC to deny the £1000 donation has no bearing on the decision is pure fantasy. The area most concerned is to myself is the site allocated off Mount Road, Leek. At present most of the estates west of Mount Road are below the crest of the Mount, the proposed sites in places near or near to the crest, which will make them highly visible over a large area, particularly at night with street lighting. The site ref LE127 is of particular interest to me, it is obvious access to the site will be through the south end of High View Road with services readily available. If we are building approx. 100 houses on LE127, we can expect a large increase in traffic along High View Road and Moorland Road. Sites ref: LE066 & LE128 will be close proximity to a 35mtr high wind turbine and the plans already approved, which is highly undesirable. The building off 800 houses mainly on the eastern flank of the Town does not seem logical. There must be other sites in the Southern and Western flank of Leek which could be exploited; the advantage of this would be to reduce the great impact on schools & amenities in the Mount catchment area. Other problems concern electrical supply, gas supply, water supply sewage disposal, which can create serious problems due to the massive local increase in demand.</p>	<ul style="list-style-type: none"> • See para response to PO677 about new homes bonus • See para response to PO120 about landscape evidence • See para response to PO1349 about streetlighting • See para response to PO1349 about public consultation and Statement of Community Involvement • See para response to PO120 about highways <p>Note that vehicular access to LE127 is anticipated off Mount Road; SCC Highways response referred to above was predicated on this.</p> <p>The Council would assess residential schemes in proximity to approved wind turbines in accordance with Core Strategy and NPPF amenity Policies, and ETSU (as amended) noise criteria etc.</p> <ul style="list-style-type: none"> • See para response to PO1321 about option sites assessments and sustainability appraisal • See para response to PO93 about Leek housing requirements and windfall allowance

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO3696	Mrs C Ryan				Object	<p>I am writing to express my objection to recently published plans to build on a large area of the Mount in Leek. Whilst understanding there is a need for some new housing, I feel this area is the wrong place and definitely too extensive. A few points I would like to share which may not take into account the professional opinion but a certainly take a common sense view. The Sainsbury's site was passed as a area for retail and business development with a to build on a small housing estate. This has not been fully developed and I understand it may because there are issues with asbestos and or some other contamination. Yet it seems it is fit for a pub selling food, a children's party play area and a supermarket selling some other consumable goods. If it is the case that there have been some bad decisions made around this site, the council officers responsible for passing this plan should own up and ensure this site is cleaned up. Enabling the plans many locals objected to, be completed. Of course this will mean a cost to the taxpayers whom are left carrying the financial burden of bad decisions made. I have no objection Education Land boarding Mount Road being to extend or build a primary school as have a shortage of places, the concern would be of increased traffic and the requirement for good provision of off road parking at the school if there were to be an entrance on that road. There is a site on the Buxton road Blackshaw Moor which has stood unused for many years since the Army ceased training there. It must have drainage, electrics and water on this site. This would be ideal for a small scale affordable housing site. It would also benefit the local school which has a small numbers of pupils and probably in danger of being closed in years to come Transport should not be a issue because there some buses to Buxton and local bus companies can benefit by providing peak time services. There must be other sites within Leek area suitable for developing. I tried to locate brownfield site on SMDC website but it shows many wordy documents but nothing is clearly stating where these sites lie. This could be my ineptitude but there could be more clarity for the lay person on these issues Building in such a large scale on The Mount would devalue housing already there. This may be viewed as a narrow minded but many people have worked hard and taken out huge loans to secure there desired homes. To effect there in such a drastic way I think is unfair and unnecessary. Most of the housing is currently at the higher end of the market and build social or low cost housing amongst his could be problematic from all prospective. If housing is built at the current level at these sites then who shall benefit those on low paid jobs, where I understand the most need is there are many units built as affordable part share homes unsold and many more privately owed sites of apartments etc. standing empty in Leek.</p>	<p>It is not considered that development of this particular site would be out of proportion with the rest of the town. Any new development taking place will be subject to design policies contained within the new Local Plan; and having regard to the Council's landscape impact evidence.</p> <ul style="list-style-type: none"> • See para response to PO120 about landscape evidence • See para response to PO1730 about Sainsburys consent • See para response to PO677 about educational requirements • See para response to PO120 about highways • See para response to PO1553 about Anzio Camp • See para response to PO93 about Leek housing requirements and windfall allowance • Property values are not considered material in planning law. • See para response to PO1140 about affordable housing • See para response to PO223 on housing needs evidence

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO4699	Mr And Mrs C and P Deighton				Object	<p>We are writing to register our very deep concern about the proposal to build on the land at the Mount in Leek. Those involved in the making such decisions do not all live in Leek and probably unaware of the enormous importance of The Mount to the people living around it in Leek. The implications of losing this much loved countryside walk are very serious, and far reaching. The close proximity of The Mount to the homes of so many local people means that it is a place used regularly, often daily, for exercise and relaxation, and is vital to their health and mental well-being. A large number of local residents are elderly, and often unable to drive: there are young families who cannot afford a car: there are several care homes that residents come for walks with their careers. What make The Mount so important is that is so very close to people. It offers beautiful views across the fields and means that people, who cannot get out into the countryside further away, can still enjoy seeing the birds and animals here only just a small walk from where they live. People walking their dogs have a natural means of contact and conversation with others – so important especially for those who live alone. To sum up, we all be deeply distressed to lose this place. So many have been walking there all through their lives, the disruption, and seeing the gradual destruction of a cherished part of their lives will bring an increased sense of isolation, and the feeling of depression faced by those in their later years as they become less able to things without outside help. Having the ability to step outside and walk in open surroundings without having to ask for a lift means a lot to someone struggling to retain their independence and enjoyment for life. To build on The Mount is clearly not necessary. There are as we have all been made aware recently, many alterations for example: various Brown Field sites empty buildings such as factories and offices: disused mills, empty houses apparently unoccupied for long periods. In view of the very unpopular bad decisions made, and the continuing loss of trust in the judgement made and continuing loss of and motives, of the planning department many now suspect that the decisions are influenced mainly by financial incentives from Government or other sources. We do not know whether this is true, but it seems obvious to us that a prompt decision to abandon the idea of building The Mount would bring peace of mind to many Leek Residents and go a long way to restoring the publics belief that members of the Planning Department actually do care about, and will respond to, consider and respect the views, the well-being and even the happiness, of the town they responsible for looking after, both now and the future.</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO223 on housing needs evidence • See para response to PO677 about new homes bonus

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO3938	Mr Mike O'Brien	WYG			Object	[Refer to submitted Representations Report attached to Question 1] which states: The proposed urban extension to the east of the town...- LE127(100), LE128a(47), LE140(63), LE142a(140) and LE142b(40). The proposed extension also accommodates draft reserve sites LE069(42), LE128b(48) and LE066(50). These sites contribute a significant proportion of the proposed housing for Leek. The allocation of these sites, ahead of available brownfield/previously developed sites, is not in compliance Policy SS5a of the Core Strategy, which sets out the overarching strategy for development in Leek. ...None of the proposed allocations are considered likely to come forward in the short term based on the findings set out in the SHLAA (2015). However, we suggest that the allocation of sites which are deliverable within the short term should have been considered to a greater extent in formulating the preferred options due to the significant shortfall of housing delivery across the district. WYG consider that sites in Leek, such as LE243, are suitable to contribute to the short term delivery of housing in Staffordshire Moorlands. Furthermore, the spatial distribution of the draft potential allocations weighs heavily on this eastern stretch of agricultural land and it is noted that no potential allocations have been selected within the core urban area.	<ul style="list-style-type: none"> Refer to Council response to PO3934 under LE127 table Question 10. <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan.</p>
PO4829	Mrs Scragg L				Object	I would like for to make it known that I oppose the above on numerous grounds. The Mount in Leek has always been somewhere for the people of Leek to walk, cycle, jog, ride around not just people up end of the Town but people from all areas, young and old and in-between. The views, the Countryside is there for all to enjoy and appreciate, and we do. The road is not big enough now for all the extra traffic that is using it never mind more homes and a school. The Government wants to be healthier, do more exercise, get out and move, where will the joggers, cyclist go? If you sat up there for 24hours you would understand how used The Mount is used for recreation, pleasure and socializing, it's a free beautiful gymnasium – its where the children go to see their 1 st lamb or donkey walkers go to remember their youth and reflect on their lives, it's a place that puts lives into prospective and brings the troubled some peace. Please let we and our children's children keep the mount	<ul style="list-style-type: none"> See para response to PO120 about open spaces and countryside access See para response to PO120 about landscape evidence See para response to PO120 on highways See para response to PO677 about educational requirements

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO4708	Mr and Mrs A & N Waterhouse				Object	Building 400+ houses on the area known by everyone as The Mount and used by countless generations as a gate way to the countryside would be against everything that "localism" would bring. The enclosed petition goes some way to demonstrate the strength of feeling that there is against the proposed building plots as set out in the Local Plan. The area is mainly agricultural and offers amazing views of the town and it's unrivalled and area as a whole acts as a buffer, between the town and the Peak District National Park. The road itself could not cope with the estimated 600 to 800 extra houses would generate. The Mount is a narrow road with no footpaths and junctions at either end of The Mount would become even more dangerous. Historically people travelling out of Leek to work, use the Stoke-on-Trent and Macclesfield Road with few travelling to Buxton or Ashbourne. This would mean that the roads in Leek Town Centre would become even more congested at peak times as these people make their way through town. We urge the Council to think again and produce alternative sites for houses thereby saving this precious area for future generations to enjoy.	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO120 about highways • See para response to PO683 about Leek employment land requirements
PO9091	Ms Sarah Griffiths				Object	I am objecting to the planning of new housing at Mount rd, Leek. The area is enjoyed by young and old alike for generations. We do not need new housing in this peaceful wonderful area. [2015 Options consultation representation also submitted with email].	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO93 about Leek housing requirements and windfall allowance
PO9167	Mrs Kath Fernyhough				Object	Please note that this email is an objection to the following site references regarding the development of Mount Road Leek., LE142b, LE142a, LE140, LE128a, LE127, LE022 We are residents of Kniveden Lane leek, and so we feel that we are well qualified to tell you why this development would be so disastrous for Leek. The Mount is an area of natural beauty which is used every single day of the year, by walkers, joggers, sightseers, cyclists, and people who enjoy it just for the sheer pleasure of the calm, peaceful area it provides us with. It is used by our senior citizens, who use the Mount as a daily walk to help keep them fit, and they enjoy sitting on one of the benches that have been left by the people of Leek for the people of Leek, to sit and chat or pass the time of day with other walkers. Good for the body and soul. It is an area that we, our parents, grandparents and children have enjoyed for many years, and if this development goes ahead our grandchildren and future generations will be denied this. It is an area of natural beauty that is home to a wide selection of wildlife. From hearing the owls hooting late evening and into the night, to the woodpeckers tapping away in the woods. From the bats swooping past in search of food to the kestrels that hover over the ground looking for their next meal. And the home of badgers and foxes. To name but a few. If this development goes ahead the homes of these beautiful animals and birds will be lost. Another loss for future generations and the	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO683 on ecology evidence • See para response to PO120 about highways • See para response to PO683 about Leek employment land requirements • See para response to PO93 about air quality • See para response to PO1349 about tree protection • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO93 about western Green Belt • See para response to PO1349 about public consultation and the

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

						<p>townspeople of Leek, who you are supposed to represent the views of, so please take the time to read this and understand how passionate the people of Leek are about our beautiful green open space. As well as the above losses, the development will cause many problems. Namely access to and from Mount road. If planning permission is granted for all these new homes, imagine how many extra cars, delivery vans, school buses and refuse collectors will have to use Mount Road. If in excess of 400 homes are built, that will mean that there will probably be in excess of 800 extra cars on a daily basis. Mount road can not deal with this. Our worries are as follows :- The exit from Mount road onto Buxton Road goes straight out into a 40mph area, opposite another junction with Novi Lane. The exit and entry from Ashbourne Road is even worse. To exit from the Mount onto Ashbourne Road you again have to exit into a 40mph area If you want to travel to Ashbourne you have to negotiate a 30% bend onto a very busy road If you want to exit Mount Road onto Ashbourne Road and travel down into town, you still have to join the traffic that is traveling at speed around Lowe Hill bends. This plan is dangerous, foolhardy and beyond belief. As the majority of people who will purchase property on Mount road will work in Stoke on Trent or Macclesfield, this will bring even more traffic that has to negotiate the town centre, which is often gridlocked now, let alone with a further 800 cars a day travelling through Leek town centre. The only other access to Mount Road is from Kniveden Lane, via the unadopted road at the top of the lane. If this road is adopted to improve access onto the Mount, Kniveden Lane will become a rat run, along with Moorland Road. And it will not only be used by the new developments on the Mount, but by the estate accessed from Novi Lane, known as the Haregate estate. Kniveden Lane and Moorland road are residential roads in a residential area, and have not been built for vast amounts of traffic. The noise and level of traffic if this should happen would be very detrimental to a beautiful residential area, not to mention the dangers of traffic moving at speed to residents. Also the exit from Kniveden Lane is notoriously difficult due to the trees which line both sides of the junction reducing visibility to less than 50 yards in either direction. What will you do then, cut down the trees to improve visibility and in the process removing more natural vegetation along with the fields on Mount Road that you are proposing to develop. As an alternative site, why do you not look at Macclesfield Road, the area around Foker Grange. Or develop some of the derelict mills that are lying empty and are nothing but eyesores. This way you would rid the area of the derelict buildings and build new more pleasing structures. We ask you to do the job you were voted in to do, which is to represent the views of the people of Leek.</p>	<p>Statement of Community Involvement</p>

PO9066	Mrs Suzanne Dimmick				Object	<p>I am writing to put forward my opposition to the building of houses on Mount Road in Leek. It upsets me greatly to think that an important local amenity could be lost forever if these proposals go ahead. "The Mount" as we fondly know it, is a valuable asset to the East side of Leek, a wonderful place to take our families for walks and bike rides. In our busy lives, it is vital for our health, both mental and physical to have somewhere to go to relax and unwind. What better place than a walk along the Mount with views over Bradnop and Morr ridge, so accessible from our homes. If the fields in the planning proposals-LE127, LE128, LE140 and most worryingly on the opposite side LE142 were to be built on then the landscape of our beautiful town will be lost forever. For those arriving in to Leek from Ashbourne Road, they would be met with yet another sprawling housing estate, replacing the picturesque fields full of animals that are so welcoming to see. The road will become a main thoroughfare from the Ashbourne Road to Buxton Road and will lose its charm for us all. Lets protect the gateway to LEEK for generations to come. SAVE THE MOUNT.</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO120 about highways
PO9075	Mr Stewart Johnson				Object	<p>I am writing to protest against the proposed plans to build 4000 houses in the Leek area:-</p> <ol style="list-style-type: none"> 1, question how many unoccupied properties are there in the area 2, Loss of beautiful countryside. 3, Work vacancies in the local area. 4, Local infrastructure . 5, Places at local schools. <p>The list is just a few of the considerations the planners seem to be ignoring. Of particular concern is the proposed development along Mount Road. Not only would this destroy a beautiful part of the town used by many residents,it would also cause serious traffic problems both in the immediate vicinity and the rest of the town. These new residents would have to commute,and the main routes would be right through the centre of town adding to an already serious congestion problem. Why do the planners want to destroy the treasure that is The Queen of the Moorlands!</p>	<ul style="list-style-type: none"> • See para response to PO223 on housing needs evidence • See para response to PO120 about landscape evidence • See para response to PO683 about Leek employment land requirements • See para response to PO683 on Infrastructure Delivery Plan • See para response to PO677 about educational requirements • See para response to PO120 about open spaces and countryside access • See para response to PO120 about highways

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9082	Mr Simon Tansley				Object	I am registering my objection to the leek plan proposals for building anywhere along the mount (le 142a,b,140,128a,022,127. To destroy this public amenity would be an outrageous and nigh on irreparable act of vandalism. Any one who is even considering this to be a way forwards for leek town should walk from ashbourne road to buxton road to see precisely what we would lose in terms of beauty and nature. This is an asset that Leek should be celebrating not destroying.	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence
PO9097 PO9317 PO9408	Ms Sarah Bishop Ms Emily Hodgkinson Ms and Mr Carla and Anthony Hodgkinson and Bury				Object	<p>I would like to register my opposition to the plans for development along The Mount. I was born and raised in Leek as are all my family. I remember being dragged "round the mount" as a child and hated every minute of it. I left Leek in 1986 to pursue my career in nursing and I still return to Leek every weekend and Public Holiday. As an adult, I love going round the mount! I appreciate the openness, the air and the local views. I know it is valued by many local people for similar reasons. It is a wonderful asset to Leek which cannot be found elsewhere. In this age of government encouraging activity and reduction of population obesity, I can walk my dog, savour the views and see nature on the doorstep. Something to be encouraged and supported. Leek is very lucky indeed to have such a wonderful asset as part of its town and councillors would be well advised to recognise its importance to their locality. If councillors wish to see houses, roads and urbanisation as part of their tenure, I suggest they visit "The Potteries" or move to the nearest loss of urban space to understand the impact of building for the short term gain. I live still in the city I came to all those years ago. Back then, it was a new city with limits. Now, every route I can take from the centre is urbanised and each area is stuck "in its time" as architecture and design move on creating areas of decline and disrepair bringing new problems with the passing of time. For the love of Leek and its title of "Queen of the Staffordshire Moorlands" , Councillors need to appreciate what qualities give Leek that title and do their utmost to maintain them. Councillors have the opportunity to do the right thing for the future of Leek, not to bring in a fast buck for a short term gain. I hope the people of Leek are listened to when they say "Save The Mount"!</p> <p>As well as the benefits to Leek having such a widely used and accessible area, one should consider the risks and very real hazards to creating such estates in a position where traffic flow, at both access points to the Mount, is at best, difficult. On exiting Mount Road, on to Ashbourne Road and Buxton Road, there is extremely limited vision in both directions. Whilst currently the traffic flow is steady, and reasonably quiet, my concerns lie with the difficulties which will only grow with increased cars, placing those increased pedestrians walking to the proposed development, at a genuine risk. I am not against the development of affordable housing; what I am against is the travesty of those decisions, by councillors which we elect, to take green belt land,</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO683 on Infrastructure Delivery Plan • See para response to PO677 about new homes bonus • See para response to PO120 about highways • See para response to PO93 about western Green Belt • See para response to PO1349 about public consultation and the Statement of Community Involvement • See para response to PO93 about Leek housing requirements and windfall allowance

						before brown belt land, for potential profit, before the views of their constituency and the future of generations to come. I understand that I am far from alone in my views- I feel they should be taken in to deep consideration before this gem in the town is lost forever.	
PO9134	Mr Richard Harding				Object	<p>It is shocking to think that a much valued area of Leek, enjoyed by many thousands of people each year that gives stunning views over many hundreds of acres of Moorland, is a valued place for recreation by the people to walk, hike, cycle, enjoy or just to rest with the freedom of a tranquil setting over the land of the Moorlands will be destroyed forever and what for, the offer of cash to the Council for each new house to be built to be spent by the Council that we all know will be wasted in ways only Councils inimitably can do whilst the result will be a beauty spot for Leek people will be destroyed forever. The Council can sit back and think the money was worth it yet they sit in splendid isolation allowing the areas they are elected to protect be destroyed. I wonder how the local and Staffs Council can think that the huge increase in housing is necessary bearing in mind that the shameful destruction of a much loved part of Leek will be replaced by huge housing estates on The Mount making it appear like a mini version of the Berlin Wall. I regularly see hundreds of people on weekends and on summer days, walking, dog walking, jogging and horse riding along Mount Road and if these awful plans are put in place The Mount will be a danger to all road users and will take on an ugly factor that is part and parcel of building on rural fields loved by so many people and all imposed without once allowing the voters of Leek the change to have their say on the planning issues that have secretly been imposed. Where is the democratic right of the people of Leek int his issue? Sold out to building firms who look on greedily at the profits they can make with help from a submissive Council who dare not fight for Leek people. It is worrying is that all the planning proposals for the Leek Moorlands were taken in secrecy denying people of the Moorland the chance to put forward their views and objections for all these houses to be built without ever once considering that there is not sufficient employment in the town to employ even 1 in 100 of people who might live in these imposed properties and there clearly seems to be a total the lack of schools to educate the huge increase in children and a the lack of Health Care provision in respect to GP services and hospital care for the area. There is also the huge impact on the roads and the congestion that is already a great problem in Leek. It is as if the Council is blind or inept at seeing the problems that all these extra houses will cause but it seems that everything will be decided in the same manner as the destruction of the old town centre round about we were informed would ease traffic but contrary to all Council ideas the reverse is true. I cannot have any faith in a system that has denied us the vote on these extra 6000 houses or that the much loved Mount will be destroyed in the same cavalier and unthinking way as many planning issues have been allowed to go ahead</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO677 about new homes bonus • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO120 about highways • See para response to PO1349 about public consultation and the Statement of Community Involvement • See para response to PO683 about Leek employment land requirements • See para response to PO683 on Infrastructure Delivery Plan • See para response to PO677 about educational requirements

						even when so many Leek people do not want or need these homes to destroy The Mount. I therefore wish to state that I am against the building on any land along Mount Road AKA The Mount, so please register my objection.	
PO9197	Mrs M Motum				Object	I would like to strongly object to more houses being built on The Mount. This very popular location is just a short walk from the town centre where you are in the countryside with far reaching views. The beautiful location will command high prices, therefore no affordable houses will be built. It would be a travesty of justice to build in such a well-loved area, used by dog walkers, walkers, courting couples, and car drivers. I don't think the infrastructure could sustain the number of houses envisaged. Please do not include this area in the local plan.	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO1140 about affordable housing • See para response to PO683 on Infrastructure Delivery Plan • See para response to PO120 about highways
PO9341	Mr Derek Kay				Object	Herewith are my objections yet again about building proposals affecting open greenbelt land on Mount Road. I strongly object to delinations LE127, LE128a, LE140, LE142a and LE142b, on the grounds of unnecessary and deleterious incursion into valuable scenic amenities. The fringes of this town (Queen of the Moorlands) must be preserved at all costs. Open aspects across towards the Peak District are essential for our spiritual wellbeing; unwelcome development of additional traffic flow and population density would be the corollary of this building project, were it to succeed. Conversely, there is much brownfield potential within the town boundary itself; rundown old mills for example (which may be protected by outdated listing orders) and other unsightly structures causing blots on the "townscape". Not enough positive action to clean up the interior of this town has been taken over the years. Use compulsory purchase orders where difficult site owners will not cooperate and make the Queen worthy of her name.	<ul style="list-style-type: none"> • See para response to PO93 about western Green Belt • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO120 about highways • See para response to PO93 about Leek housing requirements and windfall allowance <p>The Secretary of State for Culture, Media and Sport is responsible for the listing of buildings on the advice of Historic England. Apart from being consulted, the Council does not have any say in which buildings are added to the statutory list. The Council, however, is charged with protecting listed buildings insofar as it is possible and managing any changes to them through the planning system. In discharging this responsibility, the Council has to work to the government's advice set out in the National Planning Policy Framework which requires every effort to be made to preserve listed buildings and either keep them, or return them, to active use.</p> <p>Whilst Councils do retain CPO powers in principle, these are generally used (if at</p>

							all) as a last resort where it is expedient and in the public interest for the Council to do so, where agreement with landowners is not possible. As explained in response to PO91 the Council makes assumptions that development schemes will come forward within the Leek development boundary to contribute to its housing need to 2031, which could include historic premises etc. Applications affecting listed or non-listed "heritage assets" would be assessed against Section 12 NPPF and Council Policies. The Council would also assess schemes in the town centre against the aspirations of the adopted Leek Town Centre Masterplan.
PO9303	Mr and Ms Gary and Elaine Turner				Object	I wish to object to the proposed housing development at the mount (all of the sites) as this is a high quality amenity area enjoyed by all for its views, indeed, if ever Leek is featured on TV programmes the cameras usually end up doing a view of the town from the mount, which says it all.	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence
PO9240	Mr John Burnett				Object	I wish to formally object to the plans currently in consultation to allocate land for housing around the Mount Road in Leek. Some background. I have lived in Leek all my life, as have my parents and Grandparents. Throughout my life I have always viewed the Mount as the 'Countryside' and the border between Leek and the Peak district. Since I can remember I have spent many happy hours walking the Mount as it is an accessible area of natural beauty. What makes this area important to me and to anyone who lives in the East end of town. There are very few circular walks that take in such a wide variety of terrain and views as the Mount does. Whichever way its walked theres uphill and down dale terrain that has to be completed. What makes this worth while for many people is the wide open vista that is presented to the walker as you reach the top of the Mount. I complete this walk most days in the Summer, and every week in the Winter, and strongly believe it has added to my health and well being in immeasurable ways. I know and speak to the many others who also make this part of their leisure and health routines and know that a large proportion of the residents of both Haregate and Moorland Road estates rely on this open space as much as I do. So - my main objection is the destruction of some beautiful greenfield leisure location on the outskirts of our town. However I have other concerns about the wider impact to others who may not view this as important. Leeks infrastructure is already at breaking point. In particular the road system is literally not fit for purpose. Since the short sighted decision to alter the traffic flow through our town was taken, the flow of traffic particularly from West to East has been severely curtailed resulting in large traffic	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO683 about public rights of way • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO120 about landscape evidence • See para response to PO120 about highways • See para response to PO683 on Infrastructure Delivery Plan • See para response to PO93 about air quality • See para response to PO683 about economic benefits of housebuilding • See para response in PO703 about utilities and flood risk <p>The Council must demonstrate to planning inspector that its Local Plan is based on the principles of sustainable development. 						<p>build ups through a normal working day. I can only imagine the building of 100's of new houses on the East End of Leeks existing boundary will at best double the misery already experienced by hundreds of travellers each day and cause untold economic and environmental damage to our market town. Additionally, I have serious concerns about the effects on the water run off if large areas of the Mount are built upon. The Mount is the highest point in our town, and huge amounts of water drain off it down towards Leek on a daily basis. Without the ground to soak up this water I'm concerned the water table may be affected causing flooding and other damage to residents and infrastructure further down towards Leek centre. The first part of the consultation document says the following: They should, as far as possible, reflect the aspirations of local communities and should strive to contribute towards their wider social, economic and environmental objectives. Based on what I have seen of the document, I don't believe it succeeds in any of these fundamental objectives. Our local community want a town that is prosperous but also one in which people want to live and work. We should strive to be better than what we are but not to the detriment of what makes people want to live in Leek in the first place. I hope you seriously take on board my views as well as the views of other community members. We live in a democracy and as such I genuinely believe that if a decision doesn't have the backing of the community it shouldn't be pushed through.</p>	<p>considered simultaneously. The Council's submitted Policies and objectives would therefore have to satisfy this.</p> <ul style="list-style-type: none"> • See para response to PO1349 about public consultation and the Statement of Community Involvement • See para response to PO683 about Leek employment land requirements • See para response to PO1321 about option sites assessments and sustainability appraisal
PO9183	Mrs Adams E				Object	<p>We would like to object to the developments proposed around The Mount. This is a very popular safe area to walk. It has a high quality landscape which would be restricted by the developments and traffic would increase significantly on the roads linking Buxton road and Ashbourne road. Visitors to the area also like this walk.</p>	<ul style="list-style-type: none"> • See para response to PO120 about landscape evidence • See para response to PO120 about highways • See para response to PO120 about open spaces and countryside access

PO9254	Ms Joan Hobster				Object	<p>I am writing to plead for the preservation of Mount Road, Leek, as an undeveloped open space and public amenity, available to all residents of the town. Any building on the farmland that borders this road will destroy the ambience and far-reaching views of this delightful area. It has been shown by a headcount (see Leek Post letters May 11 2016) how well used it is by walkers, joggers, horse-riders etc and I would like to add to that, the small but regular number of cars that are parked on Mount Road by elderly residents. They may no longer be physically able to walk far but can still take a short stroll, sit on a bench, enjoy the fresh air and admire the views. I understand that Mount Road is part of the Staffordshire Moorland 's Way and is walked regularly by individuals and organised groups. Surely a designated "Way" cannot be allowed to pass through a housing estate. In addition I see on the Council website, a leaflet suggesting a walk entitled "Leek Landscapes, A Country Walk" which includes Mount Road. I quote from this leaflet "The route passes through attractive farmland and offers many interesting views of Leek and its setting." If the proposed houses are built, this leaflet will have to be amended. I suggest, "The route passes through a new housing estate which obscures many interesting views of Leek and its setting" If building does take place, Mount Road itself would have to be upgraded and widened, to accommodate increased traffic use. An estimated 600 extra cars daily has been suggested. No doubt street lighting would be installed and this would destroy one of the few "dark sky" areas in the town. I have observed the night sky regularly from this location on winter evenings and enjoyed seeing the eastern constellations, planet alignments, meteor showers, the occasional comet and the monthly spectacle of the full moon rising. All this would be lost by light pollution. I understand that planners did take note of objections raised about the development of Mount Road in 2015 and have reduced the proposed site allocations to either end of the road, thus preserving some of the views. For example, the field referenced LE128 will be split in two and only half of it built on. While appreciating this gesture to public opinion it would surely be only a matter of time before the inevitable "infill" would take place and the whole area would be lost for ever. PLEASE PLEASE PLEASE – SAVE THE MOUNT for future generations to enjoy.</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO683 about public rights of way • See para response to PO120 about highways • See para response to PO1349 about public consultation and the Statement of Community Involvement • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO1349 about streetlighting
PO9216	Mrs E Adams				Object	<p>I wish to place my strong objections to the proposals to build house on the mount, leek. It would devastate this beautiful area which benefits tourists and residents alike. Objections also relate to roads, schools, doctors etc. Please please rethink your plans.</p>	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO120 about landscape evidence • See para response to PO677 about design policies • See para response to PO120 about highways • See para response to PO683

							about Infrastructure Delivery Plan <ul style="list-style-type: none"> See para response to PO677 about educational requirements
PO9273	Mr Jeff Davies				Object	<p>I am writing to object to the designation of land on Mount Road, Leek as "Preferred Housing Allocation". There are a number of problems with this intended designation:</p> <ol style="list-style-type: none"> 1) Overlook from the National Park - building as designated will adversely affect the view from the National Park 2) Access - to increase traffic along the Mount would cause significant traffic problems and hazard at its junctions with both the Buxton and Ashbourne Roads. If Knivden Lane is paved then this would also cause problems with access to the hospital and cause a hazard at its junction with Ashbourne Road where there is poor visibility. Improving Mount Road is likely to be self-defeating as it will then become a rat-run between Ashbourne and Buxton Roads further increasing the traffic load. 3) Services - there would be a significant cost to put in mains services as the existing water and drainage up Mount Road towards Padwick Farm are unlikely to adequate to service the proposed housing 4) Amenity - the Mount is a much loved local resource, heavily used by walkers (including dog-walkers) and runners. 5) Location - the bulk of working residents would probably work in Stoke or Macclesfield and the development is on the wrong side of Leek as it would then increase the traffic 'flow' through the centre of town 6) Brownfield first - development on green fields should only occur when all the available brownfield sites have been used. There are multiple opportunities for in-fill housing developments within Leek (e.g. Prince St) as well as numerous mills that are currently eyesores (e.g. both Macclesfield & Ashbourne Roads) 7) Size of housing allocation - there is a significant discrepancy between between SMDC & Government figures for required housing. I believe you are seriously over-estimating the local housing need. By doing this you are making it easier for developers to cherry-pick which bits they want to develop rather than encouraging development where it would be most beneficial to and have the least adverse impact on the town 8) Unnecessary blight - by over-allocating housing designation you will have an unnecessary adverse impact on the value of 	<ul style="list-style-type: none"> See para response to PO120 about landscape evidence See para response to PO120 about highways See para response in PO703 about utilities and flood risk See para response to PO683 on Infrastructure Delivery Plan See para response to PO120 about open spaces and countryside access See para response to PO683 about Leek employment land requirements See para response to PO93 about Leek housing requirements and windfall allowance See para response to PO223 on housing needs evidence <p>Property values are not considered as material considerations under the</p>

						properties which may not in practice be affected by housing development throughout the life of the plan	Planning Acts.
PO9176	Mr and Mrs S A Hodkinson				Object	<p>We are writing as a young couple concerned about the prospect of many more houses being built on good quality farming green field sites in Leek and throughout the Staffordshire Moorlands, especially over the Mount Road in Leek. We use the Mount as many people of all ages do on a regular basis, whether it's to walk the dog or to go out for a run. The Mount is used by many and if lost would be greatly missed. The main issue that concerns me with the proposed building of houses over the Mount is that the council & planners feel it is acceptable to potentially build houses on what is good quality farming green field sites. We need to protect our green spaces and farming land that is producing us with our food and local food at that. Another point to make is there are hundreds of empty properties throughout the Staffordshire Moorlands therefore if there is really a great need for additional housing which there is no evidence to suggest this. Also in this day and age we as a country are very conscious trying to reduce our carbon footprint and recycling everything possible. Therefore question why does this not apply to housing. There are all these properties sitting empty and you are wanting to build more, do we really need more if we already have so many empty. This includes new builds that have being built in the past twelve months that are vacant. Also question who are you expecting to buy these properties or live in them. There is obviously no jobs or prospects for people to want to move into Leek otherwise they would be here now. You only need to open the local paper or look on the internet there are always hundreds of properties at all prices for sale and up for rent in Leek. If you by some miracle find hundreds of families to live in these houses then question how do you propose to improve the infrastructure. It already takes up to twenty minutes to drive from one end of Leek town to the other and this isn't even in 'rush hour'. We certainly don't have enough schools and the GP's are already stretched to capacity. I also have a worry over the wildlife over the Mount there are many different species of birds and animals that are present around the Mount and the building of houses would interrupt them and significantly reduce the numbers of some already endangered species. Finally I urge you think very carefully before allowing these houses to be built in Leek, with a special thought to the Mount, once you have let properties be built there Leek as a lovely small market town will be spoilt and the beautiful uninterrupted views will be gone forever.</p>	<ul style="list-style-type: none"> • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO120 about landscape evidence • See para response to PO120 about open spaces and countryside access • See para response to P0223 on housing needs evidence <p>The NPPF expects Councils to meet objectively assessed development requirements, and also encourages brownfield development, subject to wider Policies.</p> <ul style="list-style-type: none"> • See para response to PO683 about Leek employment land requirements • See para response to PO120 about highways • See para response to PO683 on Infrastructure Delivery Plan • See para response to PO677 about educational requirements • See para response to PO683 on ecology evidence

PO9208	Mr Martin Bagshaw				Object	<p>I would like to register my objection to the proposed housing development on the mount area of Leek. I have lived in Leek for all of my life and I and many others , have spent many happy hours enjoying the scenery and tranquility that this area of the town offers to residents of the town. To develop in this area will drastically reduce the local amenity for the residents of the town. It is a lovely picturesque area that is within easy reach of the town centre. And I believe that to destroy it would be an absolute travesty. The area has many amenity uses, such as walking, horse riding, cycling and jogging, let alone just sitting on the benches and chilling. I think the existing schools will struggle to cope with the increased demand for places. The increase the traffic on the roads surrounding the mount will be significant, and traffic calming measures will need to be considered for safety reasons and quality of life of the existing residents in the area. There also be an increase in commuter traffic from this development. I think the majority of which will have to cross the town towards either Stoke on Trent or Cheshire. This will add to the already considerable traffic issues in the town. I believe the Barnfields, the rear of Sainsbury and Foker Grange Farm would be much better locations, so that the increase in traffic is kept away from the town centre. It was my understanding the houses were proposed for the rear of Sainsbury's. But I understand this has hit commercial difficulties with residual contamination.</p>	<ul style="list-style-type: none"> • See para response to PO120 about landscape evidence • See para response to PO120 about open spaces and countryside access • See para response to PO677 about educational requirements • See para response to PO120 about highways • See para response to PO683 about Leek employment land requirements • Existing industrial areas in use would not generally be allocated to other uses unless re-provision of equivalent or improved floorspace was involved. • See para response to PO1730 about Sainsburys consent • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO93 about western Green Belt
PO9222	Ms Lisa Milward				Object	<p>I wish to register my disapproval to the above development My objection has little to do with extra traffic and infrastructure but a lot to do with losing a place that is very dear to people's hearts. The Mount has always been a favourite short walk of mine and my family's. It is peaceful, has beautiful views and friendly people of all ages make a point of speaking. The Mount is somewhere that I spend a lot of time walking each week, a place that has been a part of my life since childhood. I have very fond memories of spending time walking over The Mount with family when we didn't have a car and little money to take buses elsewhere. The Mount is perfect for a short walk, it's somewhere that I have always felt safe to walk alone and not too far for a morning walk before work and for those people who perhaps struggle to walk longer distances. By developing housing on this land I believe that it will take away one of the town's best assets, one that people of Leek have enjoyed for many, many generations. So as councillors and planners who are in office for a relatively short period of time in comparison making a decision that will remove this for everyone who loves to walk here, I hope that you really consider how much The Mount means to people like me. It will be a huge shame if this goes ahead.</p>	<ul style="list-style-type: none"> • See para response to PO683 on Infrastructure Delivery Plan • See para response to PO120 about highways • See para response to PO120 about landscape evidence • See para response to PO120 about open spaces and countryside access

PO9325	Ms Elizabeth Stretton				Object	<p>I am writing to voice my opposition to the proposed housing development on the Mount Road, Leek - ie Plots IE140, LE128a, LE127, LE142a, LE142b, and LEO22. On the edge of the Peak District, this area of Leek can only be described as an extension of this National Park and one which holds a special place in the hearts of Leek residents. The number of walkers and cyclists using this area each week must be in the hundreds with many, like myself, enjoying the walk over The Mount on a daily basis. This walk commands beautiful views of the surrounding countryside, providing a "country" experience for so many walkers, cyclists and drivers, as well as a place to sit and watch, for example, the sunsets, weather conditions unfold, or simply just to sit and ponder. For years it has provided a walk within a few minutes walking distance, for families, courting couples, dog walkers and anyone else who wants to escape from the town and enjoy the views and the experience pleasures of a "country " walk without having to travel by car and park in an over-priced car park! There are even opportunities for people to drive from anywhere in Leek within minutes to the Mount and then enjoy all the attractions described above. The loss of this walk and seats would deprive many people of the opportunity to enjoy panoramic views across the town and the surrounding skyline: these vistas would be lost and replaced with houses instead - reducing the area to just another street of the kind to found anywhere and out of character with the landscape. It also seems that all the attention has been focused on this area and side of Leek, when there are other areas around Leek which could be made use of. One of the most important problems, as I see it, is the strain on the local infrastructure. Up to, or in excess of, 500 houses could be built along this road and all these new residents will need employment - already a problem in Leek and the surrounding areas and towns - as well as schools for their children. Leek primary schools are already experiencing problems and some children are already having to travel across Leek to receive their education. Recently trees have been cut down on the top field of the High School - now work has started on fencing this area, apparently towards the building of a new primary school on this site. I cannot remember being made aware of this possibility, although it may have been mentioned somewhere, but it seems that the building of this school means that councillors are confident that the housing development will take place and they will be able to wave aside any objections pertaining to education and say that a school is already being built . There are many houses in Leek which are empty, as there are many sites which could be used to provide areas for new homes, and it would make more sense to utilize these possibilities before taking away an important , local amenity which is used every day by so many people and which is our own area of "outstanding natural beauty" and which is available to everyone.</p>	<ul style="list-style-type: none"> • See para response to PO120 about landscape evidence • See para response to PO120 about open spaces and countryside access • See para response to PO93 about western Green Belt • See para response to PO683 about Leek employment land requirements • See para response to PO677 about educational requirements • See para response to PO683 on Infrastructure Delivery Plan • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO677 about design policies <p>The emerging Local Plan is not yet finalised and needs to undergo independent public examination by Government appointed Planning Inspector before it can become adopted. Planning applications arising before this happens must be determined against the NPPF and current Council planning policies.</p> <ul style="list-style-type: none"> • See para response to PO223 on housing needs evidence

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9333	Dr Tracey Cole				Object	<p>I would like to hereby object to the areas of local interest around The Mount being developed (LE142b; LE142a; LE140; LE128a; LE127; LE022). As I am sure you are aware, there is considerable public opposition to the proposed building of 400 houses on these sites. The area is well used, at all times of day for cyclists, walkers and horse-riders. It is an quiet oasis for the people of Leek to experience the calm of the countryside and look down on the splendid views of the town and further afield. As such, it is an extremely highly valued area in the town of Leek. As a resident of Pitcher Lane..building on The Mount would seriously impact on me and my neighbours. The building of so many houses will bring at least 400-800 cars with it. Access for these vehicles will no doubt run straight past my house, causing noise and air pollution. I moved to Leek from Cheshire for exactly the same reasons: the road I lived on became unbearably busy. I noticed that sitting in the garden was impossible with the constant noise of the cars and the smell of the fumes, not to mention the health consequences of nitrogen oxides, carbon monoxide and particulate matter. I am also concerned that with so many vehicles, the junctions of Kniveden/Ashbourne Rd and The Mount/Buxton Rd will easily generate queues during rush hours. Getting off my estate will be far more tricky and the increased risk of traffic and pedestrian accidents is not a pleasant thought. A town like Leek is quite a jewel, but it could so easily be ruined forever if we don't seriously consider all the consequences of our actions.</p>	<ul style="list-style-type: none"> • See para response to PO120 about landscape evidence • See para response to PO120 about open spaces and countryside access • See para response to PO120 about highways • See para response to PO93 about air quality

PO9422	Mr Anthony Clark				Object	<p>I am writing to make you aware of the concerns I have over the housing proposals for the Mount Road area, Leek, set out in Staffordshire Moorlands Preferred Options and Development Boundaries Consultation. The consequence on traffic of building many houses in the Mount Road area will be very marked both in the immediate area and the town as a whole . Immediate area Mount Road is not wide enough to safely take a major increase in traffic. The road is very popular with walkers, horse riders and cyclists. Increased traffic will discourage such use and be a danger to those leisure users who do continue to use the road. The existing access points to the area off Buxton Road and Ashbourne Road are adequate for the present level of traffic but are woefully inadequate and dangerous for high volumes of vehicles. If, as is most likely ,Kniveden Lane was upgraded at its top end to allow access by vehicles the consequences for its junction with Ashbourne Road would be great. At present the limited amount of traffic means that the restricted visibility due to the trees on Ashbourne Road causes minimal problems. An increase in traffic queues would lead to frustration and rash decisions by drivers. This in turn would lead to calls for the removal of the trees and the consequent destruction of a wonderful entrance to the town. Town Residents living in the proposed housing development will need to work and shop. Question where will they go to do these two activities. Work Very few will work in Buxton or Ashbourne which are easily accessible from Mount Road. The vast majority will work in the town centre, the Barnfields industrial estate or on Cheadle Road. Those commuting out of town will be mostly heading for Stoke or Macclesfield/Manchester. All these people will have to drive through the centre of town at least twice a day at peak times as there are no alternative routes they can use. Shopping To reach the two large supermarkets in Leek (Morrisons and Sainsbury's) residents of the Mount Road area would be forced, by the road system, to travel through the centre of town. Those shopping further afield will, in the main, be heading for Stoke and Macclesfield and again will need to travel through the town centre. One look at the map would tell anyone that major building to the east of Leek will cause major traffic problems. If building must take place on the Mount, though I doubt there is a need, the least environmentally damaging sites are LE142b and LE140. Question is there not a possibility of building on the existing sites of Kniveden Hall (which is well screened by trees) and the old Social Services site. These sites would be the least invasive environmentally but would still generate major traffic problems both locally and in town. In 2006 New York took the far sighted decision to turn a disused elevated railway into an linear park (The High Line). Would that Leek had planners and leaders of similar vision to develop Mount Road into The High Lane for the benefit of all the community.</p>	<ul style="list-style-type: none"> • See para response to PO120 about highways • See para response to PO120 about open spaces and countryside access • See para response to PO1349 about tree protection • See para response to PO120 about landscape evidence • See para response to PO683 about Leek employment land requirements • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO1321 about option sites assessments and sustainability appraisal <p>The 2016 Landscape impact study concludes that:</p> <ul style="list-style-type: none"> - LE142B is of high landscape sensitivity and development could be visible from the peak Park, and the rural approach to Leek; - LE140 is of medium landscape sensitivity and site-specific mitigation measures including boundary landscaping, and controlled building heights, are recommended; - LE066 is of high landscape sensitivity owing to its location, despite the presence of site screening. <p>Note the findings of this study form part of a wider evidence base to support SMDC's Local Plan. Its conclusions must be weighed against other evidence.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <p>The Council's emerging Local Plan already contains a policy (T2) protecting existing railway lines from development; and supporting recreational re-use etc. The Mount does not contain any such routes.</p>

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9373	Councillor Rebecca Done				Object	On the proposed planning for the Mount in Leek..I do not agree with and my reasons are stated below: The Mount is a very important open space close to the town centre which is enjoyed by a lot of people across the town including myself. There will be a massive impact on infrastructure, I think primary schools in particular would suffer (East Street, Beresford) and will struggle to keep up with demand. Mount Road is on the route of the Staffordshire Moorlands Walk – a very popular route for leisure activities such as walking, cycling and jogging` If all the 6 developments proceed then in excess of 500 houses would be constructed. Mount Road would likely become a main road linking the Ashbourne and Buxton roads. The proposed sites across Leek are unbalanced - there will not be sufficient demand to build all of these houses on one side of town.	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO677 about educational requirements • See para response to PO683 on Infrastructure Delivery Plan • See para response to PO683 about public rights of way • See para response to PO120 about highways • See para response to PO1684 about viability study
PO9381	Cllr Dani Ogden				Object	An area of natural beauty should never have been considered for planning application in the local plan. The outrage this has caused with local people has been overwhelming. The Mount is an area accessible to open countryside for local people, it is used for recreational purpose and attracts visitors coming to Leek. One lady told me that she could walk safely with a group of people with learning difficulties, the volume of traffic from four hundred dwellings would have a severe impact on those using The Mount for recreation, the infrastructure alone would not only cause a dramatic difference to the landscape it would also affect the wildlife in this area. That said, LE142a [landowner] are against development on this land, also there appears to be no indication on the map as to where the boundary is belonging to [the landowner]. LE127 and LE128a is not suitably distributed to urban infrastructure. It has been suggested LE066 where Kniveden Hall is, Folker Grange and Holme Farm on the west side of Leek are developable.	<ul style="list-style-type: none"> • See para response to PO93 about Leek housing requirements and windfall allowance • See para response to PO120 about open spaces and countryside access • See para response to PO120 about highways • See para response to PO683 on ecology evidence <p>The Council communicates with landowners of affected sites to ensure they are available, prior to selection. Note that the owner of site LE142A, as indicated on the Local Plan proposals map, has confirmed site availability.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <p>The map in the Preferred Options consultation document is intended to illustrate proposed allocations and development boundaries and other summary information, not the extent of land ownerships.</p> <ul style="list-style-type: none"> • See para response to PO677 about educational requirements • See para response to PO683 on Infrastructure Delivery Plan

							<ul style="list-style-type: none"> • See para response to PO1321 about option sites assessments and sustainability appraisal • See para response to PO93 about western Green Belt • See para response to PO683 about Leek employment land requirements <p>The 2016 Landscape impact study concludes that: LE066 is of high landscape sensitivity owing to its location, despite the presence of site screening. Note the findings of this study form part of a wider evidence base to support SMDC's Local Plan. Its conclusions must be weighed against other evidence.</p>
PO9388	Councillor Charlotte Atkins				Object	<p>I am writing to object to the four development sites on The Mount as identified in the proposed SMDC Local Plan. My reasons for doing so are:</p> <p>The Mount provides unique and much valued panoramic views over Leek and its skyline as well as over parts of the National Peak Park The openness of The Mount makes it a hugely important local asset for public recreation and for biodiversity. This is particularly important at present when lack of physical exercise is creating a public health crisis. The Mount is very popular among walkers, cyclists, horse riders and joggers as well encouraging families to be active and enjoy the natural attractions of the area.</p> <p>The roads up to The Mount are totally unsuited to increased traffic. But if they were improved, that would encourage rat running between the Ashbourne and Buxton Roads totally destroying the quiet rural nature of the area. With increased traffic, the junctions at either end of Mount Road would be highly dangerous. The Mount is a developer's dream and would attract developers who want to build expensive executive homes. These would attract buyers from outside Leek rather than providing the affordable homes we need for both local young and older residents. If 400 houses are built on the Mount, they could potentially generate 800 cars driving through the centre of Leek as the prevailing flow of traffic out of Leek is to Stoke on Trent and Macclesfield. That would create even more gridlock than we experience already. More suitable development sites exist within Leek eg along the Macclesfield Road. But they have not been identified or consulted upon. I urge the Council to drop its plans to destroy The Mount and look elsewhere to develop affordable homes for local residents.</p>	<ul style="list-style-type: none"> • See para response to PO120 about landscape evidence • See para response to PO120 about open spaces and countryside access • See para response to PO120 about highways • See para response to PO1140 about affordable housing • See para response to PO683 about Leek employment land requirements • See para response to PO93 about western Green Belt • See para response to PO93 about Leek housing requirements and windfall allowance <p>Both the 2015 site options consultation, and the 2016 Preferred Options consultation, mapped sites for various land uses across the District including housing, employment, and mixed uses.</p> <ul style="list-style-type: none"> • See para response to PO1321 about option sites assessments and sustainability appraisal

Question 10 Do you have any comments on the proposed housing allocation LE142B in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO9415	Mr Alan Percival				Object	I wish to object to the proposed house building on The Mount. Along with many other people I walk along Mount Road several times a week winter and summer. It is a lovely country walk and the only one on the eastern side of the town that is away from traffic fumes. There are many other reasons why building should not be allowed on The Mount which I am sure you have been made aware of.	<ul style="list-style-type: none"> • See para response to PO120 about open spaces and countryside access • See para response to PO93 about air quality
PO1054	Mr Michael Downs	Leek Co-housing Limited			Support	<p>Leek Co-housing is a company limited by guarantee which was formed in November 2015 by a group of households intending to develop the main part of potential residential allocation 142b as a self-build development comprising about 20 dwellings with shared facilities, live-work opportunities and shared outdoor space. Most of the dwellings will be freehold privately owned homes for the Company's members and their families, the remainder being available for sale or rent at an affordable level to future members of the Leek Co-housing.</p> <p>It is our intention to develop the site according to the principles of sustainable development, minimizing energy requirements, incorporating on-site energy generation, and using renewable, recycled and natural materials as far as possible in the construction. Our aim is to have a low impact on the environment, and to utilize appropriate technologies, and contemporary, natural and vernacular external building materials, in order to harmonize with the local area and landscape setting.</p> <p>In our view site 142b is eminently suited to a sensitive, environmentally conscious residential development for the following reasons: The main part of the site, which is the part we are interested in developing, is in a discreet location, and is not visible from the public highway or from the surrounding countryside. There are a number of trees on the site and on its borders, which it is our intention to retain and which effectively hide the main part of the site from external view. A sensitively designed residential development with lower than average density would enable existing trees to be retained and the development to have minimal impact on the environment. Our development would be set in natural landscaping and would be designed to preserve and enhance biodiversity. The site is currently used as a livery and stables, a business which the present owner says is not viable. There are two stable buildings on the site made from concrete block and corrugated sheeting materials which are poor quality, and a number of other smaller structures of a temporary nature. Our development would replace the existing low grade structures with attractive, environmentally friendly dwellings and shared facilities designed to blend with the landscape setting, providing a net gain in environmental and visual quality.</p> <p>Leek Co-housing is a self-build eco-housing organisation. As the</p>	<p>Comments noted.</p> <p>The Council since April 2016 has publicised and maintained a list of those interested in self-build/custom-build throughout the District, and will integrate the data this provides into its broader planmaking, as required by law. The Government requires that, broadly, demand for SBCB within an authority (arising in annual 'base periods') is met by the authority. The Council will ensure its wider housing policies support those wishing to undertake SBCB schemes (subject to consideration of wider policies); and will consider the case for allocating land for this purpose where this register/other evidence suggests a need for this.</p> <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes landscape impact evidence and other studies. The most recent 2016 landscape impact study also assessed impacts from the Peak Park, and concluded that the various Mount sites exhibited low- through to high- landscape sensitivity; it also provided recommendations regarding mitigatory measures where appropriate. It concluded site LE142B to be of high landscape sensitivity as the site is visible from the Peak Park and development could affect its setting; and could also affect the rural approach to Leek from the Peak Park. Note that landscape evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p> <p>The Council's Core Strategy Sustainable Development Policies set out</p>

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>District Council will be aware it has a legal duty under the Self-Build and Custom Housebuilding Act 2015 to support bodies such as ours to identify suitable sites for self-build housing, and to have regard to the needs of such bodies when exercising their planning and other legal functions. Site 142b is one of the most suitable sites in Leek for this purpose. As an eco-developer we are mindful of the consequences of motor vehicles in terms of carbon emissions, pollution and visual impact. Following completion of the development Leek Co-housing will continue as the management company for the site and will apply a green travel plan for the development, which would reduce the average number of motor vehicles per dwelling compared to a typical housing estate, provide charging points for electric cars including one for shared use, and promote the use of bicycles, walking and car sharing.</p>	<p>expectations concerning carbon-saving / water saving in new developments. Schemes may exceed these (subject to consideration of wider policies).</p>
	<p>Petition from Mount residents (1092 signatures)</p>				<p>Object</p>	<p>Dear Miss Ralphs, Building four hundred plus houses on the area known by everyone in Leek as The Mount and used by countless generations as a gateway to the countryside would be against everything that 'Localism' intended to bring. The enclosed petition goes some way to demonstrate the strength of feeling that there is against the proposed building plots as set out in the Local Plan. The area is mainly agricultural and offers amazing views of the town and its surrounding countryside. Indeed the views of Leek's conservation area is unrivalled and the area as a whole acts as a buffer between the town the Peak District National Park. The road itself could not cope with the estimated 600 to 800 extra cars that the proposed housing would generate. The Mount is a narrow road with no footpaths and the junctions at either end of the Mount would become even more dangerous. Historically people travelling out of Leek to work use the Stoke on Trent and Macclesfield roads with few travelling to Buxton or Ashbourne. This would mean that the roads in Leek's Town centre would become even more congested at peak times as these people make their way through town. We urge the Council to think again and produce alternative sites for the houses thereby saving this precious area for the future generations to enjoy.</p>	<ul style="list-style-type: none"> • See para response to PO120 about landscape evidence <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This includes consideration of heritage impacts, following consultation with the Council's Conservation Officer, and the heritage impact recommendations of the most recent 2016 landscape impact study. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p> <ul style="list-style-type: none"> • See para response to PO120 on highways • See para response to PO1349 about Council Assembly and statement of community involvement • See para response to PO683 about Leek employment land requirements

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1113	Mrs S McDermott				Object	<p>The construction of the 179 houses would cause us considerable congestion on the main Cheadle Road and the a520 together with traffic from the coop (Britannia) buildings at peak times eg: 9am, 5pm, there will be major congestion. This could be a safety issue for the schools opening and closing times. All saints' school opening and closing times, there is already congestion traffic between 4.30pm and 5.30pm weekdays. It is my understanding that Newton House has a preservation order on it as a 1960's construction and the Sir Hubbert Newton placed restrictions/regulations on it the building this needs to be addressed. Surely the land by the canal / scrapyard would be a more suitable I to be built Cornhill Site LE235 what happened to the affordable housing which is supposed to be built on the Sainsbury's site? Happened as partying the Sainsbury's deal then there would be no need for this development.</p>	<p>The Council consults with SCC Highways and SCC Transportation during Local Plan preparation. SCC Highways did not raise any objections to this site, however advise that the existing access road into the site could be upgraded to adoptable standard depending on the final proposal; and advise there is good access from the existing roundabout. A Transport Assessment will be required with any proposed scheme, which should look at capacity and operation of existing roundabout and effect on Leek town centre. SCC Transportation also advise that links into the town centre for pedestrians and cyclists would also require consideration. Note that the Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement for the developer to provide highways improvements where deemed appropriate).</p> <p>The Council is not aware that the site is presently affected by legal restrictions for the uses proposed.</p> <p>A 6.59 hectare industrial site off Barnfield Road, Leek near the Caldon canal was granted outline consent in August 2015 for redevelopment for residential, employment, tourism and leisure uses, retail units and pub, including railway station and marina. However existing industrial areas in use would not generally be allocated to other uses unless re-provision of equivalent or improved floorspace was involved.</p> <p>Site LE235 is also proposed for mixed employment and residential uses in the Council's Preferred Options.</p> <p>The Sainsburys site as part of its mixed use consent SMD/2013/1098 still enjoys residential consent on part of the site. Note Environmental Health Officer did not object to that scheme, subject to conditions. The Council would assess residential schemes on sites affected by</p>

							<p>contamination in line with relevant Local Plan policies and NPPF paras 120-121. The responsibility of funding remediation rests with the developer.</p> <p>Page 25 of the Preferred Options consultation document sets out the residual housing requirement for Leek to 2031 (pursuant to Policy SS3 of the adopted Core Strategy). The Council must demonstrate that it will fully meet residual housing requirements for Leek to have a sound Local Plan in place. This requirement does not have to be met 100% from land allocations – unanticipated development of other urban brownfield/greenfield sites counts too – Table 4.1 factors in assumptions about future windfall housing (resulting in a lower residual requirement). This windfall would include urban sites not formally identified on the map. Applications for residential uses arising on such sites would be assessed on their merits against NPPF and Council Policies. As there is insufficient capacity to meet this residual need entirely from sites within the Leek town boundary, the remaining requirement is to be met from a combination of urban (brownfield and greenfield) sites, and peripheral “urban extensions” around Leek as set out in Tables 4.2 and 4.3.</p>
PO425	Mr David John Allen				Object	<p>Consider the development here should be limited to Housing to fit in with surroundings and be in place of housing on several site Leek East thus retaining the Green Belt area on the mount. This would also give a lesser impact on the road infra structure.</p>	<p>Any new developments would need to adhere to design policies to ensure character of the District is maintained.</p> <ul style="list-style-type: none"> • See para response to PO1113 about Leek housing requirements and windfall allowance <p>The broad justification for the Council’s selection of ‘preferred’ sites over other sites, is site out in the ‘Options Site Assessments’ on the Council website. 							<p>subject of sustainability appraisal. A sustainability appraisal report is being published for consultation alongside the Preferred Options Local Plan July 2017. The SA Report considers the economic, social and environmental effects of proposed development site allocations including access to services and facilities.</p> <p>Note that none of the Mount sites falls within the Green Belt, whereas the western edge of Leek has Green Belt status. Whilst Councils can allocate within the Green Belt National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). The Council recently completed a Green Belt Review which assessed the suitability for retention of all areas of Green Belt in the District, against the five Green Belt 'purposes' set out in the NPPF. This will be used by the Council alongside other evidence in progressing its Local Plan. The NPPF also allows for consideration of development proposals that would represent 'limited infilling', or in some cases redevelopment of 'brownfield' sites in the Green Belt.</p> <ul style="list-style-type: none"> • See para response to PO1113 on highways
PO1426	Mrs B White				Object	<p>I always thought that this area is green belt The build of these houses is going to put a great strain on the resources, esp Compton School resources and the a520 at the moment the volume of the traffic is horrendous, queuing back to the railway bridge very often at 8 am onwards and between 3.30- 4pm and 5-6.30 we residents find it difficult to get into the streets because of the traffic. Neither do I think it's necessary to put? With?What has always been a residential area? We are much overloaded already</p>	<ul style="list-style-type: none"> • See para response to PO425 about western Green Belt • See para response to PO1113 on highways <p>The Council consults with SCC Education during Local Plan preparation, and SCC have indicated a need for additional first- and middle- school land provision in Leek resulting from the town's development requirements. These are laid out in the Preferred Options consultation document.</p> <ul style="list-style-type: none"> • See para response to PO425 about option sites assessments and sustainability appraisal

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
PO1297	Mr Price				Object	<p>Summary - please see attached document for full version)</p> <p>ASNW - Ballington Wood at Grid Ref SJ989553 is adjacent.</p> <p>We are concerned that proposed development adjacent or in proximity to the wood will have negative impacts on it, causing damage and potential loss.</p> <p>Ancient woodland is defined as an irreplaceable natural resource that has remained constantly wooded since at least AD1600. The length at which ancient woodland takes to develop and evolve (centuries, even millennia), coupled with the vital links it creates between plants, animals and soils accentuate its irreplaceable status. The varied and unique habitats ancient woodland sites provide for many of the UK's most important and threatened fauna and flora species cannot be re-created and cannot afford to be lost.</p> <p>With Staffordshire Moorlands District Council showing a valuable above average ancient woodland resource at 3.09% of land area compared to a UK average of 2.5%, it is critical that this irreplaceable natural resource is absolutely protected in this Document and highlighted appropriately.</p> <p>Development impacts on ancient woodland in a number of ways:</p> <ul style="list-style-type: none"> • Chemically through acidification, eutrophication and toxic pollution, • Disturbance by noise, light, trampling and other human activity, • Fragmentation as a result of the destruction of adjacent semi-natural habitats, • Development provides a source of non-native plants and aids their colonisation, • Any effect of development can impact cumulatively on ancient woodland - this is much more damaging than individual effects. <p>We would recommend a buffer zone of at least 50 metres of semi-natural vegetation would be required to protect the woodland from the change in land use on the site for each allocation. This 50m should be included as part of the policy for each site.</p>	<p>According to the 2006 NERC Act, the Council must in its Planmaking, have regard to the purpose of conserving biodiversity.</p> <p>The site was subject to a Phase I ecological survey in 2014. The site report acknowledges the site's proximity to this ancient woodland (and Ladydale SBI etc); and factors this into subsequent evaluation/conclusions, recommending a number of further surveys/actions would be appropriate prior to development, including the creation of a buffer zone with the woodland given its AWI status.</p> <p>Also the Council's 2016 ecology study considers the scope for 'local wildlife site' (ie.SBI) designation for all preferred option sites, concluding that LE150 "has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at district level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance, and the potential to support a population of reptiles and badgers."</p> <p>Development proposals will need to consider the findings of these reports and will be assessed against relevant Local Plan and NPPF ecological policy. Note that the emerging Local Plan will contain policies specific to tree/foliage protection and already cover ancient woodland protection.</p> <p>The site-specific policy for LE150 will require that schemes incorporate an eastern buffer.</p>
PO1749	Miss S Riley				Object	<p>LE0150 - Leek has many areas which could be regenerated to bring standards up in the community. We should want visitors to look at town and say how wonderful this it is. When so much can be improved within the town why spend the money destroying the already pleasant and ambient areas outside the town? On a personal level, I grew up on a council estate for 28yrs I had as immediate neighbours a alcoholic, a family with domestic violence, a prostitute followed by a drug addict. My 25 yr old sister committed suicide 10 yrs ago. Burglars stole some of her</p>	<ul style="list-style-type: none"> • See para response to PO1113 about Leek housing requirements and windfall allowance • See response to PO1297 <p>An element of affordable housing will be required for all major housing schemes in the District, as set out in Local Plan</p>

Question 10 Do you have any comments on the proposed housing allocation LE150 in Leek?

						<p>ashes which were never returned despite pleas. Some people may find the drama of this funny or exciting. I do not. I grew up petrified and vowed to go to work to earn enough money so that I never had to live in this sort of environment again. My husband works shifts so is not here half of the time. However due there my house is and its current environment I find I do not feel safe. There is good and bad everywhere but building affordable houses will bring obviously more people, more problems, more anti-social behaviour. Gone would be our peaceful area. Gone would be my feelings of security. I'm not bothered if offices, a cinema, a hotel, a super markets even a mc Donald's is put on this site. If the same or similar foot print to newton house was kept it would retain some wildlife to continue to enjoy. I am however completely against any houses being built. I agree people should have a right to affordable housing but people have the right affordable housing but people should also have the right to live in a more select area should they wish to work hard enough to achieve it.</p>	<p>Policies. The Council may also require an element of starter homes, and self-build plots on such sites. The Council's housing/design policies and the NPPF expect that housing schemes provide for variegation in design; and a mix of house types to meet differing socio-economic needs, including affordable housing.</p>

PO2582	Consultation Service	Natural England			LE249	General comment	<p>Natural England notes the proposed preferred site for allocation in Leek. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.</p>	<p>The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.</p>

PO1297	Mr Price				Object	<p>Summary - please see attached document for full version)</p> <p>ASNW - Ballington Wood at Grid Ref SJ989553 is adjacent.</p> <p>We are concerned that proposed development adjacent or in proximity to the wood will have negative impacts on it, causing damage and potential loss.</p> <p>Ancient woodland is defined as an irreplaceable natural resource that has remained constantly wooded since at least AD1600. The length at which ancient woodland takes to develop and evolve (centuries, even millennia), coupled with the vital links it creates between plants, animals and soils accentuate its irreplaceable status. The varied and unique habitats ancient woodland sites provide for many of the UK's most important and threatened fauna and flora species cannot be re-created and cannot afford to be lost.</p> <p>With Staffordshire Moorlands District Council showing a valuable above average ancient woodland resource at 3.09% of land area compared to a UK average of 2.5%, it is critical that this irreplaceable natural resource is absolutely protected in this Document and highlighted appropriately.</p> <p>Development impacts on ancient woodland in a number of ways:</p> <ul style="list-style-type: none"> • Chemically through acidification, eutrophication and toxic pollution, • Disturbance by noise, light, trampling and other human activity, • Fragmentation as a result of the destruction of adjacent semi-natural habitats, • Development provides a source of non-native plants and aids their colonisation, • Any effect of development can impact cumulatively on ancient woodland - this is much more damaging than individual effects. <p>We would recommend a buffer zone of at least 50 metres of semi-natural vegetation would be required to protect the woodland from the change in land use on the site for each allocation. This 50m should be included as part of the policy for each site.</p>	<p>According to the 2006 NERC Act, the Council must in its Planmaking, have regard to the purpose of conserving biodiversity.</p> <p>The site was subject to a Phase I ecological survey in 2014. The site report acknowledges the site's proximity to this ancient woodland (and Ladydale SBI etc); and factors this into subsequent evaluation/conclusions, recommending a number of further surveys/actions would be appropriate prior to development, including the creation of a buffer zone with the woodland given its AWI status.</p> <p>Also the Council's 2016 ecology study considers the scope for 'local wildlife site' (ie.SBI) designation for all preferred option sites, concluding that LE150 "has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at district level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance, and the potential to support a population of reptiles and badgers."</p> <p>Development proposals will need to consider the findings of these reports and will be assessed against relevant Local Plan and NPPF ecological policy. Note that the emerging Local Plan will contain policies specific to tree/foliage protection and already cover ancient woodland protection.</p> <p>The site-specific policy for LE150 will require that schemes incorporate an eastern buffer.</p>
PO1749	Miss S Riley				Object	<p>LE0150 - Leek has many areas which could be regenerated to bring standards up in the community. We should want visitors to look at town and say how wonderful this it is. When so much can be improved within the town why spend the money destroying the already pleasant and ambient areas outside the town? On a personal level, I grew up on a council estate for 28yrs I had as immediate neighbours a alcoholic, a family with domestic violence, a prostitute followed by a drug addict. My 25 yr old sister committed suicide 10 yrs ago. Burglars stole some of her</p>	<ul style="list-style-type: none"> • See para response to PO1113 about Leek housing requirements and windfall allowance • See response to PO1297 <p>An element of affordable housing will be required for all major housing schemes in the District, as set out in Local Plan</p>

Question 10 Do you have any comments on the proposed housing allocation LE150 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Support/Object/General Comment	Consultee Comments	Officer Response
						<p>ashes which were never returned despite pleas. Some people may find the drama of this funny or exciting. I do not. I grew up petrified and vowed to go to work to earn enough money so that I never had to live in this sort of environment again. My husband works shifts so is not here half of the time. However due there my house is and its current environment I find I do not feel safe. There is good and bad everywhere but building affordable houses will bring obviously more people, more problems, more anti-social behaviour. Gone would be our peaceful area. Gone would be my feelings of security. I'm not bothered if offices, a cinema, a hotel, a super markets even a mc Donald's is put on this site. If the same or similar foot print to newton house was kept it would retain some wildlife to continue to enjoy. I am however completely against any houses being built. I agree people should have a right to affordable housing but people have the right affordable housing but people should also have the right to live in a more select area should they wish to work hard enough to achieve it.</p>	<p>Policies. The Council may also require an element of starter homes, and self-build plots on such sites. The Council's housing/design policies and the NPPF expect that housing schemes provide for variegation in design; and a mix of house types to meet differing socio-economic needs, including affordable housing.</p>

Question 10 Do you have any comments on the proposed housing allocation LE249 in Leek?

ID	Consultee Name	Company / Organisation	Agent Name	Company / Organisation	Allocation	Support/ Object/ General Comment	Consultee Comments	Officer Response
PO2582	Consultation Service	Natural England			LE249	General comment	<p>Natural England notes the proposed preferred site for allocation in Leek. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.</p>	<p>The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.</p>

Question 11 Do you have any comments on the potential locations for new/ extended schools in Leek?

ID	Full Name	Company / Organisation	Allocation	Support Object/ General	Consultee Comments	Officer Response
PO78	MR DARREN HOOLEY		Within ADD01 (extension to Churnet Middle School)	Support	This site is situated adjacent to Churnet View middle school and is in the perfect position to accomodate expansion of this school	<p>Comments noted.</p> <p>A sustainability appraisal report is being published for consultation alongside the Preferred Options Local Plan July 2017. The SA Report considers the economic, social and environmental effects of proposed development site allocations including access to services and facilities.</p> <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This includes consideration of statutory consultee responses and numerous evidence base documents, such as the most recent 2016 landscape impact study. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p>
PO413	Mr David John Allen		Within ADD01 (extension to Churnet Middle School)	General comment	If possible provision to drop and pick school children without blocking road. Draw in bays.	Comments noted. SCC Highways are legally responsible for alterations to the public highway including highway space re-allocation. SCC would undertake measures where deemed appropriate according to its latest adopted Local Transport Plan.
PO2577	Mrs Maggie Taylor	Sport England	Within ADD01 (extension to Churnet Middle School)	General comment	It is important to ensure that extended schools do not lead the loss of outdoor sports provision. There will be more demand from more pupils for curricular sports facilities (indoor and outdoor) to help promote healthy lifestyles etc. but all too often sports facilities are lost as a result of expansion resulting in more demand and less supply. Key schools that are/will become sites will community shared facilities (such as playing fields an sports halls) need to be required to offer secured community use outside of school hours where this is needed in the local area to meet identified needs for sports facilities. This should be a policy requirement.	Comments noted. ADD01 is private land that is not currently identified as school playing fields or public open space. LE140 is not currently identified as school playing fields.
PO2562	Mrs Maggie Taylor	Sport England	Within LE140 (first school)	Object		<p>Playing Pitch Strategy Interim Report April 2017: Consultants KKP consulted with Leek High School who did not raise many key issues - school is considered to have adequate playing field to accommodate curricular demand.</p> <p>Leek High School converted to academy status in April 2016. During the conversion, the School was required to renegotiate its former lease agreement with Staffordshire County Council regarding the School's footprint and in doing so the School lost access to LE140. The field itself is extremely uneven and unsafe in places for any form of school based activity as well as being inadequate to accommodate any form of playing pitch (and historically has not accommodated any form of playing pitch). Through consultation with the School, it was identified that there is little requirement for the field with it only previously being utilised for cross-country running, which is now restricted to its other playing field land due to a perimeter fence causing segregation. The School suggests that whilst there is possible land available to be utilised for any potential first school (as part of the development of Mount Road), this would have to be negotiated with its governing board</p> <p>The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy. Any inconsistencies will be investigated as part of this updated work.</p>
PO2852	James Chadwick	Staffordshire County	Within ADD01 (extension to	General comment	In Leek additional land is required adjacent to Churnet View Middle school in order to facilitate potential expansion. It is noted	The Council is currently having on-going discussions with SCC LEA regarding school provision.

Question 11 Do you have any comments on the potential locations for new/ extended schools in Leek?

ID	Full Name	Company / Organisation	Allocation	Support Object/ General	Consultee Comments	Officer Response
		Council	Churnet Middle School)		that land in the adjacent housing site has been proposed and we will need to consider options in liaison with the school for extending the buildings and how this affects the external spaces. It is noted however that the school field shares a boundary with District Council owned public open space and it may be that this provides an opportunity to re-provide the school external space that will be lost through extending the building footprint. We would therefore like to meet to discuss what potential exists in this respect to inform the Plan going forward.	
PO1423	Mrs A Williams		Within ADD01 (extension to Churnet Middle School)	Support	This site is ideal for both the school expansion and a new housing development. In addition the development of this site would reduce pressure to build on more sensitive sites elsewhere. The site is less than 200 metres from a bus stop and also a very short walk from the amenities of Leek which would restrict the need/use of vehicles.	<p>Comments noted.</p> <ul style="list-style-type: none"> • See para response to PO78 about option sites assessments and sustainability appraisal
PO9367	Mr David & Ros Barnes & Tyrrell		Within ADD01 (extension to Churnet Middle School)	Object	Response form submitted [attached] that objects to this proposed allocation: question will the access for school still be via the existing entrance off Haregate Road – or would it use an alternative entrance to be constructed along the track to Wardle Barn Farm. This would be inappropriate [public footpath]. The re-drafting of the town boundary to encompass ADD01 is taking away more greenfield site from the perimeter of the town - unacceptable encroachment on public countryside.	<p>The Council consults with SCC Highways during Local Plan preparation. SCC did not raise any objections to ADD01 as the road into Horse croft Farm is now almost complete and will ultimately be adopted as highway. Development of this site will be acceptable subject to access design. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to submit transport statements, and provide highways improvements where deemed appropriate).</p> <p>Development proposals affecting the routes of recognised public rights of way would need to make allowance for them.</p> <p>The Council consults with SCC Education during Local Plan preparation, and SCC have indicated a need for additional first- and middle- school land provision in Leek resulting from the town's development requirements. These are laid out in the Preferred Options consultation document.</p> <p>The NPPF expects Councils to meet their objectively assessed development requirements for all relevant land uses, meaning the Council must demonstrate this to Planning Inspector at examination, to have a sound Plan in place.</p> <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes landscape impact evidence. The most recent 2016 landscape impact study also assessed impacts from the Peak Park, and concluded that the various Mount sites exhibited low- through to high- landscape sensitivity; it also provided recommendations regarding mitigatory measures where appropriate. It concluded site ADD01 to be of high landscape sensitivity as it is open to the north-west allowing long distance views and inter-visibility between the site and higher ground across the valley to the north-west. Development of the site would be visually prominent, and would encroach on the countryside by extending beyond this ridge. Note that landscape</p>

Question 11 Do you have any comments on the potential locations for new/ extended schools in Leek?

ID	Full Name	Company / Organisation	Allocation	Support Object/ General	Consultee Comments	Officer Response
						evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites. The Council will require developers to integrate on-site landscaping/screening mitigatory measures to reduce landscape impacts, as part of a site-specific policy
PO385	Mrs Brenda Pigott		Within LE140 (first school)	General comment	Rather than building a new first school on LE140 (on Mount Rd) - increasing traffic along this country lane and encouraging more people to use Kniveden Lane and Moorland Rd - why not build the school next to Churnet View Middle school?	<ul style="list-style-type: none"> See para response to PO9367 about educational requirements <p>Site ADD01 is identified for the necessary expansion of Churnet View Middle School (if this site were allocated for the new first school site instead, middle school expansion would need to occur elsewhere in the town).</p> <p>Note that SCC LEA advise on future educational requirements including their location.</p> <p>The Council consults with SCC Highways during Local Plan preparation. SCC did not raise any objections to Preferred Options sites LE022 /LE127 /LE128 /LE140 /LE142A /LE142B subject to development in this area contributing to the improvement of Mount Road including provision of footways and pedestrian links. Also Kniveden Lane should be brought up to adoptable standard with the implementation of footways. Further junction improvements at Mount Road/Ashbourne Road may also be appropriate. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to submit transport statements, and provide highways improvements where deemed appropriate).</p>
PO864	Mr Daniel Noble		Within LE140 (first school)	General comment	Where are the potential locations for new/extended schools in Leek?	<ul style="list-style-type: none"> See para response to PO9367 about educational requirements
PO9106	Mr Robert McGuinness		Within LE140 (first school)	Object	Email with representation form [attached] objecting to Preferred Options sites LE127/LE128A/LE140/LE142A and 'School Site' [presumed LE140] alongside 2015 'Options' sites LE066/LE069/LE128B with the following text: Overdevelopment, traffic congestion issues, inadequate infrastructure, inadequate road network. Brownfield sites and redundant mills should be brought into use first.	<p>It is not considered that development of these particular sites would be out of proportion with the rest of the town. Any new development taking place will be subject to design policies contained within the new Local Plan; and having regard to the Council's landscape impact evidence.</p> <ul style="list-style-type: none"> See para response to PO385 about highways <p>National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform</p>

Question 11 Do you have any comments on the potential locations for new/ extended schools in Leek?

ID	Full Name	Company / Organisation	Allocation	Support Object/ General	Consultee Comments	Officer Response
						<p>the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p> <p>Page 25 of the Preferred Options consultation document sets out the residual housing requirement for Leek to 2031 (pursuant to Policy SS3 of the adopted Core Strategy). The Council must demonstrate that it will fully meet residual housing requirements for Leek to have a sound Local Plan in place. This requirement does not have to be met 100% from land allocations – unanticipated development of other urban brownfield/greenfield sites counts too – Table 4.1 factors in assumptions about future windfall housing (resulting in a lower residual requirement). This windfall would include urban sites not formally identified on the map. Applications for residential uses arising on such sites would be assessed on their merits against NPPF and Council Policies. As there is insufficient capacity to meet this residual need entirely from sites within the Leek town boundary, the remaining requirement is to be met from a combination of urban (brownfield and greenfield) sites, and peripheral “urban extensions” around Leek as set out in Tables 4.2 and 4.3.</p> <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan. Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <p>Note site LE069 is not included as an allocation in the Local Plan.</p>
PO194	Mr John Pigott			Support	The plan to build a new first school on land adjoining Leek High School is good as it will allow the new school to use some of the facilities of the High School. The land is of limited value except for dog walkers.	Comments noted. Note that the land is presently owned by SCC, who have indicated that it is available for the proposed uses.
PO9168	Mrs Kath Fernyhough		Within LE140 (first school)	Object	Then we come to the proposed new school development on LE140. This area years ago was used to tip waste, probably unofficially but it happened. Rumour has it that there is asbestos buried there. And so if this proposal goes ahead, this would mean that you are happy for our children to be schooled on top of hazardous waste. This is despite housebuilding being stopped down on the Sainsburys site on Macclesfoeld Road Leek due to asbestos contamination. Would not a better idea be to build the new school, if indeed it is needed, on the site of Churnet View Middle School. We see that under site reference no ADD01, there is already a proposal for a new development to provide more	In general if the Council has reason to believe contamination could be an issue, developers will be required to provide proportionate but sufficient site investigation/ information (a risk assessment) with a planning application, to determine the existence or otherwise of contamination, its nature and extent, and the risks it may pose and to whom/what (the ‘receptors’) so that these risks can be assessed and satisfactorily reduced to an acceptable level. The Council would assess schemes on sites affected by contamination in line with its adopted Policy SD4 and NPPF paras 120-121 NPPF. The responsibility of funding remediation rests with the developer.

ID	Full Name	Company / Organisation	Allocation	Support Object/ General	Consultee Comments	Officer Response
					<p>classroom area. If the new school were to be built there, there is already parking and school bus areas. The two schools would work hand in hand with the new school automatically feeding into Churnet View School.</p> <p>If the proposed new school is built on the Mount, where are parents going to park when dropping off and picking up their children, and where are the school buses and other cars going to pass along the road. It will mean even more traffic, noise and pollution which will be the end of the wildlife and just another polluted area. Also for the people who walk along the Mount, there are no footpaths. So our schoolchildren will not be safe either. If the area has further street lighting, we are losing one of our "dark spaces". We ask you to do the job you were voted in to do, which is to represent the views of the people of Leek.</p>	<p>The Sainsburys site as part of its mixed use consent SMD/2013/1098 still enjoys residential consent on part of the site. Note Environmental Health Officer did not object to that scheme (subject to conditions).</p> <ul style="list-style-type: none"> • See para response to PO9367 about educational requirements <p>Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations nor is the possibility of noise from the school or parking issues.</p> <p>See response to PO385</p> <ul style="list-style-type: none"> • See para response to PO385 about highways <p>Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations.</p> <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites, including ecological evidence: the Mount sites LE022/ LE127/ LE128/ LE140/ LE142A/ LE142B were subject to a Phase I ecological survey in 2014 and a later 2016 ecology study considered the scope for 'local wildlife site' (ie.SBI) designation for all preferred option sites. These studies set out ecological evaluations of the sites followed by recommended further surveys/actions in the event of future development. The Council would expect subsequent schemes to take account of this evidence; further Policy NE1 allows for the Council to require ecological mitigatory or compensatory measures where appropriate. Note that ecology evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites. According to the 2006 NERC Act, the Council must in its Planmaking, have regard to the purpose of conserving biodiversity.</p> <p>If the District council considered that a development they may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts. In addition the Council continually monitors air quality across the district and regularly undertakes review and assessments of this data to identify areas where the traffic could have an unacceptable impact on local air quality.</p> <p>There is a policy in the Local Plan covering control of all forms of pollution.</p>

Question 11 Do you have any comments on the potential locations for new/ extended schools in Leek?

ID	Full Name	Company / Organisation	Allocation	Support Object/ General	Consultee Comments	Officer Response
						<p>Issues such as external lighting in schemes can be controlled by the Council's amenity policies. Streetlighting is a matter controlled by SCC Highways.</p> <p>The Council must conduct public consultation concerning its emerging Local Plan as set out in the Local Plan regulations (or exceeding these requirements); and in also in accordance with the Council's adopted Statement of Community Involvement. All stages of the local Plan (including consultations) must be agreed by the elected Council Assembly; and all meetings of the Council Assembly are open to the public.</p>

Question 12 Do you have any comments on the Leek town centre boundary?

ID	Full Name	Company / Organisation	Support / Object / General	Consultee Comments	Officer response
PO640	Ms Alison Conybeare		General comment	please see general comment on previous page.	Comments noted.

Question 13 Do you have any comments on the Leek primary and secondary frontages?

ID	Full Name	Company / Organisation	Support / Object/ General	Consultee Comments	Officer Response
PO414	Mr David John Allen		General comment	Provision for car drop off and pick up points	<p>Alterations to the public highway along shopping streets, including highway space re-allocation are a matter for SCC Highways, in accordance with their latest Local Transport Plan. The Council will work with SCC Highways in recommending appropriate alterations where this would be considered to benefit the functioning of the town centre, subject to the Council's adopted Leek Town Centre Masterplan and other policy documents.</p> <p>Note that all planning applications arising in the town centre must be assessed against relevant Local Plan Policy and the NPPF, including the consideration of Highways Officer recommendations (for example with respect to provision of off-street parking or loading facilities).</p>
PO426	Mr David John Allen		Support	Looks fine to me.	Comments noted.
PO641	Ms Alison Conybeare		General comment	I have no comment on the frontages	Comments noted.
PO1357	Ms Rosamund Worrall	Heritage England	General comment	Map 4.4 Leek Town Centre - Historic England has no objections in principle to the proposed primary and secondary frontages at this stage although it is difficult for these to be meaningful without any policy context at present. It is expected that such policy context would be addressed in the full Local Plan as it progresses and we may wish to comment further at that stage.	<p>Comments noted.</p> <p>The Council's emerging Local Plan contains Policies in relation to development within town centres, and the historic environment, which would be used in the assessment of planning applications alongside all other applicable policies (including NPPF policy), and the adopted Leek Town Centre Masterplan.</p> <p>The Council will review its existing Core Strategy policies in light of changing policy circumstances (such as the publication of the Housing White Paper), and consult on any proposed amendments to these policies, prior to submission of the Local Plan for examination.</p> <p>Note that most of the proposed primary and secondary frontages lie within the Leek Town Centre Conservation Area.</p>

Question 14 Do you have any other comments to make regarding Leek?

ID	Full Name	Company / Organisation	Support / Object / General	Consultee Comments	Officer Response
PO224	Mr Andrew Bodiam		General comment	The construction of the website makes it extremely difficult to find the comment area. Even your planning operator admitted it was far from easy to find when I was forced to call him for assistance, And I was not the only one.!	The consultation was widely publicised and included a flyer being sent to all households and businesses in the District through Royal Mail. High levels of responses have been received by the Council from Leek residents which suggests that a significant number of residents knew about the consultation. Responding on the Council's website by using the consultation portal was an option but there were other ways of responding too – by email, completing a form or letter.
PO415	Mr David John Allen		General comment	Houses would be better developed in small pockets , infill where possible. Employment and housing site better kept separate.	<p>Page 25 of the Preferred Options consultation document sets out the residual housing requirement for Leek to 2031 (pursuant to Policy SS3 of the adopted Core Strategy). The Council must demonstrate that it will fully meet residual housing requirements for Leek to have a sound Local Plan in place. This requirement does not have to be met 100% from land allocations – unanticipated development of other urban brownfield/greenfield sites counts too – Table 4.1 factors in assumptions about future windfall housing (resulting in a lower residual requirement). This windfall would include urban sites not formally identified on the map. Applications for residential uses arising on such sites would be assessed on their merits against NPPF and Council Policies. As there is insufficient capacity to meet this residual need entirely from sites within the Leek town boundary, the remaining requirement is to be met from a combination of urban (brownfield and greenfield) sites, and peripheral “urban extensions” around Leek as set out in Tables 4.2 and 4.3.</p> <p>A range of sites are proposed in the plan both large and small to meet Leek’s housing needs. It would be unrealistic to identify only small sites across the town as the Council is required by the Government to demonstrate that sites they identify will actually be built and smaller sites tend to be less viable (for example because of affordable housing requirements, or site clearance costs etc).</p> <p>General employment purposes encompasses light industry/officing through to general industry and warehousing. Government Policy promotes mixed land uses and sustainable development patterns, subject to proper consideration of amenity impacts (such as noise).</p>
PO427	Mr David John Allen		General comment	I feel Leek is a thriving Town with a good mixture of shops. Any new housing should be spread in a linear manner utilising existing pockets on infill , in some cases with minor expansion of the development boundary. Small clusters of new houses would impact less on the existing road infra- structure and allow monies to be spend on housing not roads. Adjustment need to be made to the various speed limits to provide a safer environment for the existing and new houses. Green Belt should be protected as far as possible and priority given to alternative infill site.	<p>The NPPF expects Councils to meet their objectively assessed development requirements for all relevant land uses, meaning the Council must demonstrate this to Planning Inspector at examination, to have a sound Plan in place.</p> <p>Given previous retail permissions in the town, the emerging Local Plan sets out that Leek has a zero requirement for additional retail floorspace up to 2031. It also sets out the primary retail frontage for the town centre and its general extent</p> <p>A range of sites are proposed in the Local Plan both large and</p>

					<p>small to meet Leek's residual housing needs. It would be unrealistic to identify only small sites across the town as the Council is required by the Government to demonstrate that sites they identify will actually be built and smaller sites tend to be less viable (for example because of affordable housing requirements, or site clearance costs etc).</p> <p>The Council consults with SCC Highways and SCC Transportation during Local Plan preparation. SCC did not raise any objections to the Leek Preferred Options sites subject to developers funding certain highway improvement measures. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to submit transport statements, and provide highways improvements where deemed appropriate).</p> <p>Speed limits on public highways are a matter for SCC Highways; in some cases these can be adjusted as a result of a development scheme, where deemed appropriate by SCC Highways.</p> <ul style="list-style-type: none"> • See para response to PO415 about Leek housing requirements and windfall allowance <p>Note that none of the Mount sites falls within the Green Belt, whereas the western edge of Leek has Green Belt status. Whilst Councils can allocate within the Green Belt National Planning policy is clear that this requires exceptional circumstances to justify (as compared to non-Green Belt). The Council recently completed a Green Belt Review which assessed the suitability for retention of all areas of Green Belt in the District, against the five Green Belt 'purposes' set out in the NPPF. This will be used by the Council alongside other evidence in progressing its Local Plan. The NPPF also allows for consideration of development proposals that would represent 'limited infilling', or in some cases redevelopment of 'brownfield' sites in the Green Belt.</p>
PO642	Ms Alison Conybeare		General comment	I have no further comment to make about Leek, other than to listen to the local residents and prevent further chaos like the roundabout to traffic light change.	<p>Residents views have been sought as part of the consultation. All public responses are considered by the Council in the emerging Local Plan.</p> <p>The highways alterations to the town centre referred to were required under condition to the Sainsburys Leek redevelopment, following SCC Highways recommendations to manage the town's resultant traffic flows.</p>
PO908	Mrs Tracy McMullen		General comment	Why are there no proposals to tackle the numerous crumbling Textile mills that sit empty. Either restoration or demolition?	<ul style="list-style-type: none"> • See para response to PO415 about Leek housing requirements and windfall allowance <p>The Secretary of State for Culture, Media and Sport is responsible for the listing of buildings on the advice of Historic England. Apart from being consulted, the Council does not have any say in which buildings are added to the statutory list. The Council, however, is charged with protecting listed buildings insofar as it is possible and managing any changes to them</p>

Question 14 Do you have any other comments to make regarding Leek?

					<p>through the planning system. In discharging this responsibility, the Council has to work to the government's advice set out in the National Planning Policy Framework which requires every effort to be made to preserve listed buildings and either keep them, or return them, to active use.</p> <p>Planning applications arising in the town centre would be considered against the adopted Leek Town Centre Masterplan in addition to Local and National planning policies.</p>
PO1372	Ms Rosamund Worrall	Heritage England	General comment	<p>Paragraph 126 of the NPPF requires Local Plans to set out a positive strategy for the conservation and enjoyment of the historic environment. This means that the plan, as a whole (including the sites it is putting forward as allocations) has to set out a framework which is likely to conserve the historic environment of the Plan area. The Plan puts forward a number of sites which, if developed, appear likely to affect the significance of one or more designated heritage assets in their vicinity. The Allocation of a site for development within the Local Plan is, in effect, establishing that the principle of development in that particular location is acceptable. However, in the case of this Local Plan, at present, there is no clear meaningful evaluation of what impact the development of these areas might have upon those heritage assets. The evidence base relies on the Historic Environment Character Assessment of 2010 and the Landscape and Settlement Character Assessment (LSCA) of 2008 amongst others. It is also noted that the SHLAA methodology includes reference to constraints and opportunities in relation to the LSCA but does not mention the Historic Environment Character Assessment. In addition, it is noted that the Halcrow Toolkit of 2011 used for the Core Strategy information has been used in respect of the current SHLAA. Table 2.1 of the site rating criteria includes reference to designated heritage assets, but there is no reference to non-designated heritage assets, setting or harm. As such, it is not clear how impact on the historic environment has been assessed and subsequently applied to the site options in relation to them being put forward as allocation sites, other than where mentioned in the associated SA. Even in the SA it is not clear how the sites have been assessed in respect of the historic environment. It is also of concern that Para 1.16 of the draft plan sets out that further evidence base studies will be completed to inform the Local Plan including Landscape and Heritage Impact Study. In the Options Sites Assessments tables, part of the evidence base, it is also noted that Heritage Impact Assessments will be undertaken during the plan production if sites, where negative effect on the historic environment and heritage assets has been identified, are taken forward. These assessments should be undertaken and considered at this stage to ensure that the preferred allocation sites are deliverable in respect of the historic environment but, at present, Part 7 of the SA does not deal with this. In the absence of any assessment of the degree of harm which the proposed Allocations might cause to the historic environment or, indeed, what measures the Plan might need to put in place in order to ensure that any harm is minimised, at present, the authority cannot demonstrate that the sites it is putting forward for development is compatible with the Plan's own policies for the protection of the historic environment. Moreover, in terms of national policy guidance, the Plan also fails to demonstrate that:- (a) The sites that it is putting forward for development will deliver a "positive strategy for the historic environment" as is required by NPPF Paragraph 126. (b) The sites that are allocated will be likely to "contribute to protecting or enhancing the historic environment". Therefore, it has not shown that it is likely to deliver sustainable development in terms of the historic environment [NPPF Paragraph 7]. (c) The sites which it has allocated are likely to "conserve heritage assets in a manner appropriate to their significance". Therefore it has not shown that it will be likely to deliver the Government's objectives for the historic environment [NPPF Paragraph 17]. (d) It has complied with the statutory duty under S72 of the Planning (Listed Buildings and Conservation Areas) Act, 1990 to pay "special attention" to "the desirability of</p>	<p>The Council has recently undertaken a Landscape, Local Green Space and Heritage Impact Study to form part of the evidence base to support the Local Plan and assess the potential heritage impacts of the development allocations and mitigation measures.</p>

				preserving or enhancing the character or appearance” of its Conservation Areas. Moreover, from the information available there is no evidence that, in preparing the Plan, the local planning authority has had “special regard to the desirability of preserving” any of its Listed Buildings. Whilst it is accepted that S66 of the Planning (Listed Buildings and Conservation Areas) Act, 1990 does not apply, specifically, to Plan making, the absence of any evaluation potentially brings into question the deliverability of some sites and, for some, the amount of development they can accommodate. When the requirements of the Act are eventually undertaken, it may be found that the quantum of development on some of the sites is, either, unachievable or, at worst, that the need to safeguard the setting of the building actually renders them largely undevelopable. Please note that these comments are based on known heritage assets at a national level and do not include local information available through heritage environment records which should be considered by the local authority.	
PO2578	Consultation Service	Natural England	General comment	With regard to baseline data and additional new sites : The Council may need to check that up to date information on local wildlife sites (Sites of Biological Interest and Biodiversity Alert Sites in Staffordshire) has been referenced when identifying preferred sites. Our previous advice letter dated 14.9.15 gave detailed advice on themes and issues including these non-statutory sites. Natural England no longer has access to this dataset and the as the preferred sites consultation includes a number of additional sites (not considered as part of last year’s consultation) the Council will need to access up to date information to check on any impacts on these sites. Please contact the Staffordshire Wildlife Trust (01889 880 100 or email info@staffswt.org.uk) for further information if you do not hold the relevant dataset in house.	The Council uses evidence to justify its selection of ‘Preferred’ allocation sites from wider sites, including ecological evidence: all current Preferred Options sites were subject to Phase I ecological surveys between 2014 and 2016; a 2016 ecology study also considered the scope for ‘local wildlife site’ (ie.SBI) designation for all of these preferred options. These studies set out ecological evaluations of the sites followed by recommended further surveys/actions in the event of future development. The Council would expect subsequent schemes to take account of this evidence; further Local Plan Policy NE1 allows for the Council to require ecological mitigatory or compensatory measures where appropriate. Note that ecology evidence must be weighed against all other relevant evidence when the Council selects ‘Preferred’ sites. According to the 2006 NERC Act, the Council must in its Planmaking, have regard to the purpose of conserving biodiversity.
PO2628			Support	Natural England welcomes the deletion of those site options described in our advice letter dated 14.9.15 where selection would involve the loss of part or all of local Wildlife Sites (known as Sites of Biological Interest SBI and Biodiversity Alert Sites BAS in Staffordshire). Those sites are LE057 (affecting Ladydale Local Wildlife Site) , LE091 (affecting Ballhaye Green disused tip Local wildlife Site and adjoining Brough Park Hall Local Nature Reserve), LE045, 076, 243 and 259 (collectively occupying the remainder of the Ballhaye Green disused tip Local wildlife Site This deletion of these site options is consistent with NPPF paras 110, 113, 117 and 118.	Comments noted. The broad justification for the Council’s selection of ‘preferred’ sites over other sites, is site out in the ‘Options Site Assessments’ on the website.
PO2816	Mr Martin Ross	Environment Agency	General comment	LE045: According to information held by the Environment Agency this site is located above historic landfill sites. The local council, as lead regulator for these sites, should be contacted for further information.	Comments noted. Note that this site which was included in the 2015 ‘Site Options’ consultation was not taken forward into the 2016 Preferred Options sites. The broad justification for the Council’s selection of ‘preferred’ sites over other sites, is site out in the ‘Options Site Assessments’ on the website. This includes consideration of environmental issues etc following consultation with the Environment Agency and other organisations, and consideration of relevant evidence base. All proposed sites must also be the subject of sustainability appraisal (the Council’s S.A. will be published as part of its evidence base).
PO2817	Mr Martin Ross	Environment Agency	General comment	LE076: According to information held by the Environment Agency this site is located above historic landfill sites. The local council, as lead regulator for these sites, should be contacted for further information.	Comments noted. Note that this site which was included in the 2015 ‘Site Options’ consultation was not taken forward into the 2016 Preferred Options sites.

					The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This includes consideration of environmental issues etc following consultation with the Environment Agency and other organisations, and consideration of relevant evidence base. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).
PO2818	Mr Martin Ross	Environment Agency	General comment	LE091: According to information held by the Environment Agency this site is located above historic landfill sites. The local council, as lead regulator for these sites, should be contacted for further information.	<p>Comments noted. Note that this site which was included in the 2015 'Site Options' consultation was not taken forward into the 2016 Preferred Options sites.</p> <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. PO2831	Mr Martin Ross	Environment Agency	General comment	The appropriate level and detail of ecological appraisal should be provided for any developments going forward on the proposed site allocations. These should be completed to CIEEM guidelines namely to identify and evaluate the ecological features of interest and potential impacts upon them. The mitigation hierarchy should be employed from the outset of any design and development planning to avoid, minimise, mitigate, offset impacts, both direct and indirect. Many proposed allocations are adjacent to priority habitats and statutory and non-statutory designated sites, including watercourses. In line with the mitigation hierarchy and relevant NPPF sections, i.e. 109, every effort should be made to re-naturalize watercourses, including de-culverting where technically feasible. The main impact on any sites from a developable point of view, are easements from watercourses to help promote Green and Blue corridors and networks where migration and movement along the watercourse banks can occur. This is likely to be between 5 metres, up to 10 metres on some main river stretches. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate in status and listed measures in the RBMP are taken into account. Collective contributions from specific areas could be used to support innovative land management schemes upstream in the catchment delivering natural flood management to reduce flood risk in the new developments and wider communities downstream. We would recommend and welcome the opportunity to comment on pre-applications to ensure the best opportunities and outcomes are realised.	<ul style="list-style-type: none"> • See para response to PO2578 on ecology evidence <p>The Council would consult with both EA and internal ecology officers over individual schemes, regarding appropriate mitigation measures in light of NPPF policy and local policy regarding the natural environment and flood risk..</p> <p>The Council has completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. Mitigation measures will be taken as part of the site development to address any surface water issues.</p> <p>Note that Local Plan Policy will require that, wherever possible, development will promote the reduction of flood risk by the use of sustainable drainage techniques as per the Flood and Water Management Act., as well as taking opportunities to contribute to wider Council objectives such as its emerging Green Infrastructure Network; to enhancing biodiversity and recreation opportunities etc.</p> <p>Policies for sites affected by watercourses will require that early discussions with the Environment Agency and the Lead Local Flood Authority are undertaken, and may specify requirement for FRAs.</p> <p>The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to</p>

					these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.
PO2857	James Chadwick	Staffordshire County Council	General comment	Whilst we have not assessed each site in detail it is clear that many of them will be crossed by public rights of way which will need to be considered in full as part of any proposed development. We are also in the process of preparing the 4th Review of the Definitive Map and Statement for Staffordshire Moorlands area and the District Council will be provided with copies of the maps and Statement to indicate the alignment of all recorded routes. Staffordshire Moorlands District Council currently hold copies of the existing Definitive Map and Statement which should form part of any discussions with developers regarding the proposed sites. As the Plan progresses we suggest policy provision to ensure that all public rights of way are protected and, where possible, enhanced in conjunction with any development. If any Public Path Orders are required to enable the development to take place these should be processed alongside the planning application by the District Council. Many of the sites chosen are close to existing urban areas and it is likely that there are non-definitive routes across the sites which should be considered by any applicants. In many cases these routes could have become rights of way by virtue of established usage over many years and should be treated as public. There will also be sites where such usage or historic evidence has already resulted in applications being made to the County Council under Section 53 of the Wildlife and Countryside Act 1981 to add or modify the Definitive Map of Public Rights of Way, which affects the land in question. As the Plan evolves it would be useful to provide guidance to developers/applicants around enhancing the existing path network where possible in line with Staffordshire County Council's Rights of Way Improvement Plan. This could include: - the creation of public bridleways or the upgrading of public footpaths to bridleways to improve provision for horse riders and cyclists across Staffordshire where there is currently a shortfall in available access routes. - the creation and promotion of short circular walks to promote the health benefits of walking - the replacement of stiles with gaps (where there are no stock) or gates (where there are) in line with Staffordshire County Council's Least Restrictive Principle for path furniture The County Council is able to provide further advice and guidance as and when required.	Comments noted. The Council will have regard to the latest records concerning recognised public rights of way and ensure that site-specific policies reference the need to protect (or divert) these, where applicable. Local Plan Policy T2 supports and promotes the development of a network of safe walking, horse riding and cycling routes, linking communities and recreational/tourist areas; and requires that all legally recognised public rights of way affected by development are protected (or diverted where necessary) and, where possible, enhanced. Local Plan Policy NE1 already supports opportunities to increase public access to wildlife sites including supporting the objectives of the SCC Rights of Way Improvement Plan. See para response to PO2831 about draft Green Infrastructure Strategy
PO2923	James Chadwick	Staffordshire County Council	General comment	See attached transport comments in relation to sites.	Comments noted. See Council responses to individual sites.
PO2927	James Chadwick	Staffordshire County Council	General comment	In relation to surface water flood risk you have provided to us recently a GIS mapping layer of the proposed allocations that we have run through our flood risk software. Attached are our initial comments on the sites and it is hoped that these should help identify any potential issues at each site and assist in framing policy for assessment and SuDS requirements. However, we have only been able to undertake a high level initial assessment at this stage and would welcome the opportunity to discuss with you further and perhaps identify sites that require further detailed consideration.	Comments noted. SCC LLFA Officer comments have been taken into account during Local Plan preparation; and will be consulted where appropriate when planning applications are received. The Council has completed a Level 1 Strategic Flood Risk Assessment for the District, the results of which are being used to inform the site selection process. Mitigation measures will be taken as part of the site development to address any surface water issues. Policies for sites affected by watercourses will require that early discussions with the Environment Agency and the Lead Local Flood Authority are undertaken, and may specify requirement for FRAs.
PO2877	James Chadwick	Staffordshire County Council	General comment	In relation to more general matters regarding the Local Plan's approach and considering the incorporation of policies for the next iteration the following should be considered. A Historic Environment Assessment (HEA) has previously been prepared for the	The Council has recently undertaken a Landscape, Local Green Space and Heritage Impact Study to form part of the evidence base to support the Local Plan and assess the potential heritage

				Staffordshire Moorlands and its focus and extent was informed through discussion with the District Council. The statement regarding the need for further evidence including a 'Heritage Impact Study' (s1.16) of the Staffordshire Moorlands Local Plan booklet is to be supported and should also be welcomed by Historic England. This Heritage Impact Study should review the previous work of the HEA (and update where required), extend the boundaries of the previous study where necessary and enhance the assessment where appropriate. It should cover all aspects of the historic environment and be undertaken by a suitably experienced historic environment specialist following a detailed brief agreed in advance with Historic England, the SMDC Conservation Team and the Staffordshire County Council Historic Environment Team. We have not assessed each site in detail as it is considered that the Heritage Impact Study (identified in s1.16) will undertake this work with reference to all relevant documentary information and databases (Staffordshire County Council Historic Environment Record, National Heritage List for England etc). The Heritage Impact Study should also make use of all available recent studies to inform its assessment including, where appropriate, the relevant Extensive Urban Survey (available on www.staffordshire.gov.uk/ search under EUS) and the historic farmsteads guidance available on the same web pages. Bearing in mind the scale of many of these developments, where appropriate applicants should be encouraged to undertake, as a minimum, a Heritage Statement in support of any application in order to '...describe the significance of any heritage assets affected, including any contribution made by their setting.' (NPPF, s.128). Where more complex remains or larger developments are being considered, then a full Historic Environment Desk-Based Assessment should be prepared. In all cases these documents should be prepared at an early stage by appropriately experienced historic environment specialists and they will inform discussions with the Local Planning Authority and their historic environment advisors regarding the need for and scale of any historic environment interventions including opportunities (where appropriate) to enhance heritage assets within a scheme. The Staffordshire County Council Historic Environment Team would be happy to be consulted by the historic environment specialist appointed to undertake the Heritage Impact Study. We would also be content to advise on the production of Heritage Statements/Historic Environment Desk-Based Assessments to inform development proposals and can advise the LPA on, in particular, the archaeological and historic landscape character aspects of specific developments at the planning application stage.	impacts of the development allocations.
PO3940	Mr Richard Percy	Steven Abbott Associates LLP	General comment	These representations are submitted on behalf of the site owner, Mr Leslie Hughes and seek to promote the allocation of the site [LE259] for housing. The site is outlined in red on the attached plan (SAA/2911/RAP) and consists of a two storey club building towards the road frontage with a senior sized football pitch and associated buildings to the rear. It is understood that the club is now closed and the use of the football pitch is at the discretion of the site owner. The site is within the settlement area of Leek, approximately 600m to the north east of the town centre. It is adjacent to the Bode Business Park to the east, which was described as "underused employment area" in the SHLAA Site Assessment Form, extensive factory premises to the west, residential properties to the south and west and a farm and wooded area to the north. The farm is accessed via a track on the western edge of the Working Mens Club site. The site is in a highly sustainable location with access to the full range of retail, community and leisure facilities and public transport. It is noted that the Site Assessment for the site identifies the proximity of the site to a heritage asset and a Local Nature Reserve as being significant effects and the development of greenfield land as being a negative effect. Each of these impacts would be addressed as part of any formal development proposals and none are seen as being incapable of resolution. In terms of the requirements of the National Planning Policy Framework, the site is suitable, available and achievable/deliverable. The site is part brownfield and part greenfield. The site has no known constraints which would prevent its development in the short term, other than the designation of the site as an Outdoor Sports Facility in the adopted Core Strategy	<p>The broad justification for the Council's selection of 'preferred' sites over other sites, is set out in the 'Options Site Assessments' on the Council's website.</p> <p>The football pitch contributes to outdoor sports facilities for Leek, consequently it is not considered appropriate to allocate for housing. Core Strategy Policy C2 states that existing open space will be protected unless suitable alternative provision is made or the site is surplus to requirements.</p> <p>The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy.</p>

				(Policy C2 – Sport, Recreation and Open Space). Evidence will be produced to demonstrate that at least one of the requirements of the policy can be met. The Council cannot demonstrate a five year supply of land for housing as required by the NPPF. It appears that the current supply is less than two years and consequently it follows that relevant policies for the supply of housing cannot be considered to be up to date. The Council's SHLAA Site Assessment Form indicates that the site has a net area of 1.48 ha and a capacity of some 50 dwellings. The delivery of the site for housing would assist in meeting the Council's housing requirement in a highly suitable location. Given the above factors, we consider that the site should be allocated for housing purposes. [Location Plan attached].	
PO1329	Ms K Dewey	Staffordshire Wildlife Trust	Object	<p>Not all the proposed allocation sites have had ecological surveys carried out. We understand around 11 sites have been added to the proposed allocation sites that were not consulted upon in 2015, and these have not been assessed for their ecological value.</p> <p>The SMDC Local Plan Policy C3 Sustainable Communities - Green Infrastructure 8.7.16 and 8.7.17 references the production of a Green Infrastructure Strategy, which “ will inform the production of the Site Allocations Development Plan Document and will establish appropriate objectives and targets.” No Green Infrastructure Strategy has as yet been produced. Therefore, we are concerned that this lack of evidence base will not enable good decisions to be made on allocation sites.</p> <p>The Extended Phase 1 Habitat Surveys carried out by Lockwood Hall Associates Ltd in 2015 do not comprehensively cover all natural features that the NPPF and Planning Practice Guidance list as needing to be mapped as part of ecological networks: the location and extent of internationally, nationally and locally designated sites; Existing designated sites are recognised, but identification of all Local Wildlife Sites (LWS) is not as yet comprehensive. In terms of potential allocation sites, there are several where information from the Extended Phase 1 Habitat Surveys, other ecological survey reports for planning applications, and habitat data from MAGIC indicate potentially high value habitats, which should be assessed against the Staffordshire Local Wildlife Sites criteria. the distribution of protected and priority habitats and species ; Priority habitats and species are taken to mean those listed as habitats or species of Principal Importance for Conservation in England according to the list under section 41 of the NERC Act 2006, plus those listed on the Staffordshire, and any more local, Biodiversity Action Plan. The Extended Phase 1 Habitat Surveys do provide data that would allow identification of some priority habitats, but do not highlight priority habitats where they are present or use the definitions to describe habitats found. Recommendations for further protected and priority species surveys are made, but full information on their presence has not been gathered. areas of irreplaceable natural habitat , such as ancient woodland or limestone pavement, the significance of which may be derived from habitat age, uniqueness, species diversity and/or the impossibilities of re-creation; This includes veteran trees and ancient hedgerows. Records for these features are not comprehensive. Some veteran tree records are available on http://www.ancient-tree-hunt.org.uk/discoveries/interactivemap It does not appear that this database was searched in the desk studies informing the habitat surveys in 2014. The survey reports do not specifically mention irreplaceable habitats. habitats where specific land management practices are required for their conservation; Some mention is made of current land management in the Extended Phase 1 Habitat Surveys, but important areas are not highlighted. main landscape features which, due to their linear or continuous nature, are important for the migration, dispersal and genetic exchanges of plants and animals, including any potential for new habitat corridors to link any isolated sites that hold nature conservation value, and therefore improve species dispersal; Good habitat links and recommended buffer areas are mentioned in the Extended Phase 1 Habitat Surveys, and the information within the surveys could be used to</p>	<p>Ecus Ltd have now completed ecological assessment of all sites includes in the Preferred Options Sites and Boundaries (April 2016) consultation.</p> <p>A Green Infrastructure Strategy for the Staffordshire Moorlands has been produced by the Council with assistance from partners such as the Staffordshire Wildlife Trust and will be published alongside the next Preferred Options consultation.</p>

				identify corridors and stepping stones, but specific identification of these features is not part of the report or clearly and consistently highlighted. Corridors and stepping stones need to be recognised and protected, and their other benefits to visual and access amenity in urban areas recognised. areas with potential for habitat enhancement or restoration, including those necessary to help biodiversity adapt to climate change or which could assist with the habitats shifts and species migrations arising from climate change; The ecology surveys would help identify such areas, and some Visual Open Space and Public Open Space areas are proposed in the allocations plans, but areas to be enhanced in terms of habitat value are not specifically identified. information on the biodiversity and geodiversity value of previously developed sites and the opportunities for incorporating this in developments; Previously developed sites are among those proposed for allocation and covered by ecological surveys, which give some recommendations. However geodiversity is not covered. If ecological networks and other GI features could be mapped for each settlement, this would give a good basis for allocating sites, both for hard development, and for green space and environmental enhancements. This would also provide a framework for any CIL monies, partnership projects etc. to target priorities in the area and improve the environmental quality of each town and village.	
PO1480	Mr Simpson	N	Object	LE102 Site is visually obstructive, outside the towns boundary and is on greenfield access will be required onto a very busy road at a dangerous point	<p>Comments noted. This site which was included in the 2015 'Site Options' consultation was not taken forward into the 2016 Preferred Options sites. However the site was subsequently suggested during the 2016 Preferred Options, and is now an emerging Local Plan housing allocation. Note that subsequent schemes would have to satisfy both landscape and design policies; and be acceptable on highway safety grounds.</p> <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is set out in the 'Options Site Assessments' on the website. This follows consultation with statutory consultees, and consideration of relevant evidence base.</p> <p>A sustainability appraisal report is being published for consultation alongside the Preferred Options Local Plan July 2017. The SA Report considers the economic, social and environmental effects of proposed development site allocations including access to services and facilities.</p>
PO1481	Mr Simpson	N	Object	Le103 Site is greenbelt I think it is vital that development into open countryside/greenfield site should be fully justified and only when all other options have been fully exhausted. I am concerned that planning decisions such as Sainsbury's site do not appear to have provided the required returns on housing development. This failure shouldn't be at the cost of destruction of green fields	<p>Comments noted. Note that this site which was included in the 2015 'Site Options' consultation was not taken forward into the 2016 Preferred Options sites.</p> <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This follows consultation with statutory consultees, and consideration of relevant evidence base.</p> <p>A sustainability appraisal report is being published for consultation alongside the Preferred Options Local Plan July 2017. The SA Report considers the economic, social and environmental effects of proposed development site allocations including access to services and facilities.</p> <ul style="list-style-type: none"> • See para response to PO415 about Leek housing requirements and windfall allowance

Question 14 Do you have any other comments to make regarding Leek?

					The Sainsburys site as part of its mixed use consent SMD/2013/1098 still enjoys residential consent on part of the site. This permission remains intact because the wider Sainsburys redevelopment has commenced. Residential permissions such as this 'count' as commitments against the residual housing requirement for the town to 2031.
PO2692	Mr Martin Ross	Environment Agency	Object	There is no commentary around the issue of flood risk and how the sites have been chosen with the Sequential process in mind. However, we do note that the sites we previously identified as being the most severely impacted due to flood risk, have not been taken forward to this stage, which we welcome. We have however, identified some sites where further work is necessary and we wish to remind the Local Planning Authority that Sequential Test evidence should be provided and reiterate if these sites are to be taken forward, then a Level 2 SFRA should also be undertaken. At this Preferred Options stage, this work should already be done. However, there is one final chance for this to be undertaken, prior to the Publication Draft towards the end of this year. If it is not done by that stage, the Site Allocation Document risks being found unsound as it will be at odds with the guidance set out in the SFRA Level 1 and potentially, Flood Risk policies that will be set out in the next consultation.	Sites identified are not located in Leek.
PO1733 PO1725	Mrs Mary Emery Mr & Mrs V and J Emery		Object	<p>LE066, LE067, LE068, LE143a, LE127, LE128, LE140, LE142A, LE142B. I wish to register my objection to the proposed development of the land on The Mount My reasons are as follows.</p> <p>There are sufficient brown field site available, such as The former Just juice site on Prince Street is now vacant The former Big Mill on Mill Street, ripe for development The former Brough, Nicolson and Hall Mill on Ashbourne Road A reasonable plot of land on the Organ Ground which was the former East Street Nursery which is now vacant. Shortly to become available the former Britannia Building Society plot of land on Cheddleton Road Land on Foker Grange on Macclesfield road</p> <p>The Mount is a valued area of outstanding beauty and must be kept for future generations to enjoy. It is supposed to be green belt land; consideration that seems to have been overlooked.</p> <p>I would like to point out the impact of the proposed development would have on local services i.e. schools, GP services, the road infrastructure and employment needs. I am also very concerned about the effect on the local wildlife,, the increase in traffic, and noise levels this development will bring. I would like to know what happened to the housing development at the Sainsbury's site, which never seems to have transpired</p>	<p>Note that the Preferred Options do not currently include sites LE143A, and sites LE067/LE068 are not formally identified as they fall within the town boundary (see para response to PO415 about Leek housing requirements and windfall allowance).</p> <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan. Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <p>Note the former Britannia premises on both sides of the Cheddleton Rd are both preferred mixed employment/housing allocations, refs LE150 and LE235.</p> <ul style="list-style-type: none"> • See para response to PO427 about western Green Belt <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes landscape impact evidence. The most recent 2016 landscape impact study also assessed impacts from the Peak Park, and concluded that the various Mount sites exhibited low- through to high- landscape sensitivity; it also provided recommendations regarding mitigatory measures where appropriate. Note that landscape evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p> <p>The Council consults with SCC Education during Local Plan preparation, and SCC have indicated a need for additional first- and middle- school land provision in Leek resulting from the town's development requirements. These are laid out in the Preferred Options consultation document.</p> <p>National planning guidance states that the Council should</p>

					<p>assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p> <p>Notwithstanding current commuting patterns, the District as a whole has residual general employment land requirement, and Leek has a requirement (of around 8ha to 2031) and the Council must demonstrate that it will fully meet these along with its housing requirements, to have a sound Local Plan in place. Government Policy promotes mixed land uses, subject to proper consideration of amenity impacts (such as noise). The Council works with neighbouring planning authorities under its duty to cooperate, to explore opportunities for the meeting of development requirements cross-border. However neighbouring authorities must also address their own development requirements. The Council consults with SCC Transport (regarding strategic impacts) during Local Plan preparation; and has regard to SCC's Local Transport Plan Integrated Transport Strategy for the District.</p> <ul style="list-style-type: none"> • See para response to PO2578 on ecology evidence <p>The Council consults with SCC Highways during Local Plan preparation. SCC did not raise any objections to Preferred Options sites LE022 /LE127 /LE128 /LE140 /LE142A /LE142B subject to development in this area contributing to the improvement of Mount Road including provision of footways and pedestrian links. Also Kniveden Lane should be brought up to adoptable standard with the implementation of footways. Further junction improvements at Mount Road/Ashbourne Road may also be appropriate. The Council would assess schemes having significant transport impacts against relevant NPPF and Local Plan policy (including requirement to submit transport statements, and provide highways improvements where deemed appropriate).</p> <ul style="list-style-type: none"> • The noise impacts of schemes would be assessed against the Council's adopted amenity Policies and NPPF Policies <p>The Sainsburys site as part of its mixed use consent SMD/2013/1098 still enjoys residential consent on part of the site. Note Environmental Health Officer did not object to that scheme subject to conditions. The Council would assess</p>

					residential schemes on sites affected by contamination in line with its adopted Policy SD4 and NPPF paras 120-121 NPPF. The responsibility of funding remediation rests with the developer.
PO1754	Mr and Mrs W Lovatt		Object	<p>LE069, LE143a, LE128, LE140, LE142A, LE142B, LE127, LE066 We would like to submit our comments concerning the above consultations with the specific regard to leek east. These consultations with specific regard to leek Ease and the area of mount road. This is a semi-rural area outside the town development boundary. One of the attractions of this area of leek is that the boundaries for development are very closely defined. This means that within 10minutes walk of the town centre you have access to open space, which makes the mount area very popular for leisure activities such as walking jogging and cycling. This is a important when considering what opportunities there are for leisure and exercise so close to town. The fields provide a home for various types of wildlife and this together with the farm animals that graze them, provide access to a nature very close to the heart of leek. The views from the mount are spectacular and largely unspoilt. Any developments of any of all the listed developments of the type proposed would totally alter the area, as it has with the Buxton Road end of Mount road. If all the development listed above were to proceed. In excess 400 houses would be constructed on what is pleasant open countryside. The access along Ashbourne Road and Mount road provide a road infrastructure that would be totally inadequate with the volume of traffic generated by such a development especially on the bad junction where mount road meets Ashbourne road near Poplar Service Station.. Access via the already existing estate off kniveden lane and or High View road and Moorland Road would be impossible to sustain, given the narrow nature off the roads in question and the cars parked on either side of the roads in what is a already busy residential area. Creation of a rat run would have serious consequences Public transport via the bus service would be totally inadequate. There are significant areas of land that would be ideal for development that are presently brown field sites within the town centre and the town development boundary. Development would be ideal of these sites would not impact on local wildlife and leisure activities and would be more sustainable as they would result from a increase in traffic in outlying areas. Given to the employment situation in Leek, a large proportion of these would inevitably be homes for communities for the potteries conurbation and or Macclesfield and greater Manchester. This would totally ruin the character and community feeling of the area, and further issues in relation to the sustainable investment in local infrastructure. Given the recent headlines concerning the lack of affordable housing in rural locations, more consideration should be given this type of development, rather than encouraging urban sprawl which would ruin the character of this town.</p> <p>Planning conditions stating that the occupiers should have a connection with the local area have repeatedly been shown to be unenforceable in the contexts of the urban development. There have been applications for planning permission relating to these areas before, most notably, in 2007. This was refused on appeal, given the strength of feeling within the local community against this development. Any temptation to alter the town development boundary to facilitate these proposals should be resisted are there is no proven case that the type or amount of development proposed is justifiable.</p>	<p>Note that the Preferred Options do not currently include sites LE069/LE143A.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <p>The public/visual open spaces proposed by the Council are those mapped in the Preferred Options consultation document. The Council's adopted Core Strategy policies seek to improve public access to open spaces/recreation generally where this is consistent with other policies; and subject to landowner agreement. Note there is no automatic public right to cross privately owned land beyond public rights of way. See para response to PO11 about landscape evidence</p> <ul style="list-style-type: none"> • See para response to PO1733 about highways <p>Leek is already served by a number of frequent or less frequent bus routes, connecting to centres such as Hanley, Cheadle, Buxton and Macclesfield. A number of these use main arterial routes such as Buxton Road /Ashbourne Road /Springfield Road. In some circumstances, major residential developments may be required to contribute to improved bus routes/bus facilities in accordance with Core Strategy Pol T1/Staffordshire Local Transport Plan.</p> <ul style="list-style-type: none"> • See para response to PO415 about Leek housing requirements and windfall allowance • See para response to PO2578 on ecology evidence • See para response to PO1733 about Leek employment land requirements <p>Any new developments would need to adhere to design policies to ensure character of the District is maintained.</p> <ul style="list-style-type: none"> • See para response to PO3659 on housing needs evidence <p>The Council's housing evidence points to a need for additional affordable housing across the District. An element of affordable housing will be required for all major housing schemes in the District, as set out in Local Plan Policies. The Council may also require an element of starter homes, and self-build plots on such sites.</p> <p>It is standard practice for residential schemes which generate a requirement for 'local needs' affordable housing to have future occupation of those dwellings controlled via legal agreement linked to conditions upon the planning consent.</p>
PO1761	Mrs J Lovatt				
PO1777	Mr S Lovatt				
PO3645	Mr and Mrs Jones				

Question 14 Do you have any other comments to make regarding Leek?

					Planning applications are assessed against the current Development Plan including the NPPF and adopted Core Strategy Policies.
PO1526	Ms Angie Guest		Object	le069 Detrimental impact on an important & much valued amenity area. The location provides a green space accessible to and used by the wider population of leek for walking cycling and jogging. The mount follows part of the route of the Staffs Moorlands walk 'Leek Landscapes' managed by the SDMC and marked on the OS 1:25000 map. Described in the leaflet published by the district council as offering a walk 'through attractive farmland with interesting views over Leek. This would be compromised by the development. The panoramic views from The Mount over the skyline of Leek and countryside beyond are 2 nd to none. These would be severely restricted. The scale and the unbalanced distribution of this development sites, concentrated in this part of the town will lead to increase traffic in making the mount a busy road between the Ashbourne & Buxton roads as well as loss of a rural environment outside the town's boundary.	<p>Comments noted. Note that this site which was included in the 2015 'Site Options' consultation was not taken forward into the 2016 Preferred Options sites.</p> <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This follows consultation with statutory consultees, and consideration of relevant evidence base. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p>
PO1527	Ms Angie Guest		Object	Lee066 Detrimental impact on an important & much valued amenity area. PO3920		Hourigan Connolly	Object	Hourigan Connolly is promoting land at Buxton Road, Leek for inclusion in the Staffordshire Moorlands District Local Plan as a housing allocation. [Refer to Report attached to Question 1 which includes response to Question 14].	See response to Question 6 – response PO3919.
PO3914	Ms Mairead Kiely		Object	We note that planning permission (ref. 10/00042/OMAJEI) was granted on Churnet Works, Macclesfield Road, Leek back in 2011. This granted full planning permission for a new superstore, retail units, employment units and a petrol filling station as well as outline permission for residential development. This permission has been part implemented, for example the foodstore has been built out and is now occupied by Sainsbury's. Although the residential permission has now lapsed, other elements of the scheme such as the retail units could still be implemented under this permission. We note that the red line boundary for this planning permission extends beyond the town settlement boundary proposed in Map 4.1 'Leek West'. We also note that the Churnet Works site is not allocated for development. We consider that the town settlement boundary proposed in Map 4.1 should be extended to include the land contained within the Churnet Works planning permission. We also consider that the site should be allocated for mixed use development, having regard to its planning history and ability to meet planning needs. Given its previously proven acceptability we would suggest this allocation should encompass a range of uses including retail, employment and residential (as previously permitted and considered acceptable at this location) but also	See response to PO3913 under Question 6.

				to include hotel and leisure uses.	
PO3915	Ms Sophie Trough	Pegasus Group	Object	We act on behalf of owner of SHLAA site LE147. The site is being promoted by the landowners as a suitable site for residential development. [Representation form attached].	<p>Comments noted. Note that this site which was included in the 2015 'Site Options' consultation was not taken forward into the 2016 Preferred Options sites.</p> <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This follows consultation with statutory consultees, and consideration of relevant evidence base including ecological evidence. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p> <p>In particular the site forms part of a wider SBI – refer to Core Strategy Policy NE1 which states that development will not normally be permitted across such sites. It is noted that the illustrative scheme provided does not show residential development across the entire site, makes allowance for a badger sett buffer, and provides for the restoration of the adjacent listed well, however development across any part of the site would need to be justified against this policy.</p>
PO3930	Mr Phil Bamford	Gladman Developments	Object	This submission provides Gladman Development's written representations on the Staffordshire Moorlands Preferred Option Sites and Boundaries Consultation. These representations concern the following matters. Duty to Cooperate Sustainability Appraisal Objectively Assessed Housing Need Development Requirements and Distribution Green Belt Review Preferred Option Sites and Boundaries - Leek. [Refer to 2 submitted attachments to Question 1].	See response to Question 6 – response PO3929.
PO3939	Mr Mike O'Brien	WYG	Object	Submitted Representations Report [attached to Question 1]: argues that residual Leek housing requirement should be increased by incorporating a 10% buffer (given previous under-delivery); argues that none of the proposed housing allocations for Leek are considered likely to be developed within the next five years [in contrast to LE243], and therefore the identified housing shortfall in Leek will not have been addressed. Argues current housing density range expectations in Policy H1 are unrealistic ; includes a deliverability/viability overview of Bode Business Park LE243 arguing that the site fails to meet any of the criteria required to safeguard employment sites as set out in Policy EM2 of the Core Strategy (outlined at paragraph 5.2.1 of this report) and should therefore be allocated for residential development.	<ul style="list-style-type: none"> • See para response to PO92 about Leek housing requirements and windfall allowance • The Council will be reviewing its current Core Strategy Policies following public consultation later in 2017 <p>Comments and confirmation of owner position, noted. The emerging Local Plan sets out how the residual housing requirement for Leek will be achieved by a combination of allocations within the urban area, and along the Mount (making allowance for windfall/small sites allowances). Additional housing sites around Leek are not required.</p>
PO3931			Object	<p>This representation has been prepared by WYG planning & Environment on behalf of Key Plant Automation Limited to support the allocation of land at Bode Business Park, Ball Haye Green, Leek for residential development. The owner of the site is to re-locate the Key Plant Automation business to an alternative location and is considering alternative uses for the present site. This representation aims to demonstrate that further consideration should be given to the allocation of the site for residential use.</p> <p>Council should increase District and Leek housing requirements consequently to allocate more Leek housing sites (including LE243); and revisiting the proposed allocations in light of Policy SS5a of the Core Strategy which states that priority will be given to previously developed sites within the urban area.</p>	<p>All of the sites referenced above are identified as either available now, or potentially available in the SHLAA. The Council communicates with landowners of affected sites to ensure they are available, prior to selection.</p> <ul style="list-style-type: none"> • See para response to PO1683 about viability study <p>As set out in the Options site assessment tables on the website, a number of sites within the Leek development boundary are not proposed as either preferred allocations or 'reserve' sites owing to the fact that these sites could come forward at any time and be assessed against relevant Core Strategy and NPPF policies.</p> <ul style="list-style-type: none"> • See para response to PO427 about western Green Belt

Question 14 Do you have any other comments to make regarding Leek?

					The density expectations set out in Pol H1 were deemed sound by the Examination Inspector, and the NPPF allows for individual LPAs to adopt their own approaches according to Local circumstances. Policy H1 in the emerging Local Plan expects that all housing development should be at the most appropriate density compatible with the site and its location, and with the character of the surrounding area. It also assumes that higher densities will be appropriate in locations which are accessible by public transport. The policy is not considered to 'straitjacket' schemes to a certain density, as it allows for consideration of the surrounding streetscene. Also the Council acknowledges the growing importance of SuDS integration into scheme layouts.
PO9241	Mr John Burnett		Object	I wish to formally object to the plans currently in consultation to allocate land for housing around the Mount Road in Leek. I have other concerns about the wider impact to others who may not view this as important. Leeks infrastructure is already at breaking point. In particular the road system is literally not fit for purpose. Since the short sighted decision to alter the traffic flow through our town was taken, the flow of traffic particularly from West to East has been severely curtailed resulting in large traffic build ups through a normal working day. I can only imagine the building of 100's of new houses on the East End of Leeks existing boundary will at best double the misery already experienced by hundreds of travellers each day and cause untold economic and environmental damage to our market town.	Comments noted. See responses to Question 10 – regarding sites around The Mount.
PO9184	Mrs E Adams		Object	[Sites LE057/LE069/LE066]: We would like to object to the developments proposed around The Mount. This is a very popular safe area to walk. It has a high quality landscape which would be restricted by the developments and traffic would increase significantly on the roads linking Buxton road and Ashbourne road. Visitors to the area also like this walk.	<p>Comments noted. Note that LE057/LE069 which were included in the 2015 'Site Options' consultation was not taken forward into the 2016 Preferred Options sites.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. This follows consultation with statutory consultees, and consideration of relevant evidence base. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p>
PO9255	Ms Joan Hobster		Object	When making their decisions after June 13 th , I beg the planning committee NOT to allow ONE green field to be included in the site allocations while one brown field site remains a possibility for development. For example, it seems criminal to me to exclude Springhill and Knivedon Hall on Mount Road (LE066, neither buildings of beauty and already Council owned) while destroying green the fields, opposite and alongside. (LE142a, LE128a) We have several old mills in Leek that have been tastefully developed and preserved as examples of Leek's industrial heritage. It would be no loss to that heritage if the remaining ugly, and increasingly dangerous, mills were demolished to provide land for housing. Mill Street is a prime example of this. It is a danger and an eyesore and must give an appalling impression to visitors approaching our town from Macclesfield. PLEASE, NOT ONE GREEN FIELD WHILE BROWN SITES EXIST	<ul style="list-style-type: none"> • See para response to PO415 about Leek housing requirements and windfall allowance <p>The Council must conduct public consultation concerning its emerging Local Plan as set out in the Local Plan regulations (or exceeding these requirements); and in also in accordance with the Council's adopted Statement of Community Involvement. All stages of the local Plan (including consultations) must be agreed by the elected Council Assembly; and all meetings of the Council Assembly are open to the public.</p> <p>The 2016 Landscape impact study concludes that:</p> <ul style="list-style-type: none"> - LE142A to be of high landscape sensitivity as the site is visually prominent and visible from the PDNP, as it is located atop of the ridge that screens views of Leek; - LE128A and LE128B to be of medium landscape sensitivity and recommends that site-specific landscape mitigation

					<p>measures could include advanced planting and landscaping on the eastern boundary, and limited building heights in the eastern half of the site;</p> <p>- LE066 to be of high landscape sensitivity owing to its location, despite the presence of site screening.</p> <p>Note the findings of this study form part of a wider evidence base to support SMDC's Local Plan. Its conclusions must be weighed against other evidence.</p> <p>Note that Kniveden Hall LE066 is included as a residential allocation in the Local Plan.</p> <ul style="list-style-type: none"> • See para response to PO9343 about listed buildings
PO9067	Mrs Suzanne Dimmick		Object	<p>Sainsbury's site would be a far better option for large scale affordable housing on a main road in an already established residential area than in a semi rural area that will be changed forever. I thought that this was part of the agreement to Sainsbury's coming in to town and us losing our roundabout.</p>	<ul style="list-style-type: none"> • See para response to PO415 about Leek housing requirements and windfall allowance <p>The Sainsburys site as part of its mixed use consent SMD/2013/1098 still enjoys residential consent on part of the site. This permission remains intact because the wider Sainsburys redevelopment has commenced. Residential permissions such as this 'count' as commitments against the residual housing requirement for the town to 2031.</p>
PO9177	Mr and Mrs S A Hodkinson		Object	<p>Another point to make is there are hundreds of empty properties throughout the Staffordshire Moorlands therefore if there is really a great need for additional housing which there is no evidence to suggest this. Also in this day and age we as a country are very conscious trying to reduce our carbon footprint and recycling everything possible. Therefore question why does this not apply to housing. There are all these properties sitting empty and you are wanting to build more, do we really need more if we already have so many empty. This includes new builds that have being built in the past twelve months that are vacant. Also question who are you expecting to buy these properties or live in them. There is obviously no jobs or prospects for people to want to move into Leek otherwise they would be here now. You only need to open the local paper or look on the internet there are always hundreds of properties at all prices for sale and up for rent in Leek. If you by some miracle find hundreds of families to live in these houses then question how do you propose to improve the infrastructure. It already takes up to twenty minutes to drive from one end of Leek town to the other and this isn't even in 'rush hour'. We certainly don't have enough schools and the GP's are already stretched to capacity.</p>	<ul style="list-style-type: none"> • See para response to PO3659 on housing needs evidence <p>The Council's sustainable development policies SD1 and SD3 contain expectations concerning sustainable use of resources within new development; and also support other measures linked to carbon-saving, such as contribution to District Heating etc.</p> <ul style="list-style-type: none"> • See para response to PO415 about Leek housing requirements and windfall allowance • See para response to PO1733 about highways • See para response to PO1733 about educational requirements • See para response to PO1733 on Infrastructure Delivery Plan
PO9210	Ms Margaret Clowes		Object	<p>Mount Road, Leek - Site LE125 I wish to register an objection to the proposed housing sites on the above road. This road is an important local amenity, it has been a favourite place with the people of Leek for years and years. It is a wonderful place to walk, cycle etc., and because it is on the doorstep is used by many people each day. To build on the road (as you propose) would ruin this pleasurable pass time for many people. In this day and age when people are encouraged to take more exercise it seems a backwood step. Also to accommodate such a large number of houses and associated vehicular traffic, the road would have to be widened considerably, thus a quiet walk in the countryside would disappear. The junctions at either end of Mount Road are not easy to pull out of. I have witnessed one traffic collision at the Buxton Road end recently and also two very near misses. Since the Amos development was allowed at the old garage site on Ashbourne Road with it's associated highway alterations, the pull out from the Ashbourne Road side of Mount Road is more difficult. Question how will these two junctions cope with the traffic numbers that your proposals would generate. Question why is it necessary to propose such a large number of new houses when there are a considerable number of ones which are already vacant in the town and also a number</p>	<ul style="list-style-type: none"> • See para response to PO1754 about open spaces and countryside access <p>Development proposals affecting the routes of recognised public rights of way would need to make allowance for them.</p> <ul style="list-style-type: none"> • See para response to PO1733 about highways • See para response to PO3659 on housing needs evidence • See para response to PO415 about Leek housing requirements and windfall allowance • See para response to PO2818 about option sites assessments and sustainability appraisal • See para response to PO427 about western Green Belt

				of disused mills which could be converted to housing. Question why has the majority of new housing proposed for Leek got to be in this area. Years ago there was a proposal to build off the Macclesfield Road, question why is this not included in your proposals. And finally, question why does the local authority come up with one figure when our MP comes up with a lesser one.	
PO9334	Mr Derek Simkins		Object	Response form submitted [attached] which: queries lack of information on Leek's future in the Preferred Options consultation; queries lack of plans to change mills into apartments; queries plan to expand services to accommodate Leek's growth; suggests possible route for link road which links the town's 4 main roads. raises further questions	<ul style="list-style-type: none"> • See para response to PO415 about Leek housing requirements and windfall allowance <p>The broad justification for the Council's selection of 'preferred' sites over other sites, is site out in the 'Options Site Assessments' on the website. All proposed sites must also be the subject of sustainability appraisal (the Council's S.A. will be published as part of its evidence base).</p> <p>These Assessments set out that it would not be appropriate to allocate all initial 'site options', either because they lie within the town development boundary so schemes arising could in any event be assessed against Development Plan policies; or for other reasons.</p> <ul style="list-style-type: none"> • See para response to PO1733 about highways <p>Adopted Core Strategy Policy T2 sets out the circumstances the Council would support new road schemes; Policies T1 and T2 set out when improvements/financial contributions to the road network are expected.</p> <p>The Strategic Policy controlling future growth of Leek is already set out in Core Strategy Policy SS6A. The town's future development requirements to 2031 are already set out in pages 12-16 in the Preferred Options consultation document.</p> <ul style="list-style-type: none"> • See para response to PO1733 on Infrastructure Delivery Plan • See par response to PO1754 about affordable housing • See para response to PO3659 on housing needs evidence
PO9223	Mrs Lesley Roberts		Object	<p>Representations form submitted [attached] objecting to:</p> <ul style="list-style-type: none"> • District housing requirement as this deviates from ONS data • development at the Mount (L127, L128a L140, L142a L142b) on landscape protection grounds (setting of national park); lack of screening; 	<ul style="list-style-type: none"> • See para response to PO3659 on housing needs evidence <p>The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites. This includes landscape impact evidence. The most recent 2016 landscape impact study also assessed impacts from the Peak Park, and concluded that the various Mount sites exhibited low- through to high- landscape sensitivity; it also provided recommendations regarding mitigatory measures where appropriate. It concluded:</p> <ul style="list-style-type: none"> - LE127 to be of high landscape sensitivity; development within the site would likely be visible from the PDNP and could therefore affect its setting. - LE128A and LE128B to be of medium landscape sensitivity and recommends that site-specific landscape mitigation measures could include advanced planting and landscaping on

				<ul style="list-style-type: none"> • as development along the Mount will require major infrastructure (roads) • future commuting patterns across town. 	<p>the eastern boundary, and limited building heights in the eastern half of the site;</p> <ul style="list-style-type: none"> - LE140 to be of medium landscape sensitivity; recommending that site-specific landscape mitigation measures could include advanced planting and landscaping on the eastern boundary, and limited building heights in the eastern half of the site. - LE142A to be of high landscape sensitivity as the site is visually prominent and visible from the PDNP, as it is located atop of the ridge that screens views of Leek; - LE142B to be of high landscape sensitivity as the site is visible from the Peak Park and could affect its setting; and could also affect the rural approach to Leek from the Peak Park. <p>Note that landscape evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites.</p> <ul style="list-style-type: none"> • See para response to PO1733 about highways • See para response to PO1733 about Leek employment land requirements
PO4392	Mr Andy Frost		Object	<p>On behalf of our client, The Kemshead Family, we wish to make Representations in respect of land at Mount Road, Leek. The aim is to secure the allocation of the entire site within their ownership for residential development in the emerging Local Plan.</p> <p>We note that the Council proposes an annual housing requirement of 320 homes per year across the District over the period 2012 to 2031 (i.e. 6080 additional homes in total). However, we consider this to be inadequate. The requirement should be significantly higher, at approximately 440 dwellings per annum: 320 homes per year across the District is inadequate because it fails to support potential employment growth. It is also unlikely to fully address affordable housing needs in the District. Also seriously doubt the deliverability of the windfall and small sites allowance which has been made in calculating likely supply.</p> <p>For the reasons given [in the Supporting Statement] the Plan is therefore 'unsound' at present.</p> <p>[Refer to attached Supporting Statement letter].</p>	<p>Comments and confirmation of owner position, noted. The emerging Local Plan sets out how the residual housing requirement for Leek will be achieved by a combination of allocations within the urban area, and along the Mount (making allowance for windfall/small sites allowances). Additional housing sites around Leek are not required.</p> <p>The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district's full housing needs, including affordable housing, whilst taking into account migration and demographic change.</p> <p>The large windfall site allowance for Leek in Table 4.1 of the consultation booklet is based on assumed potential capacity of redevelopment sites in the town, and differs to that of the other towns. The small sites allowance is based on an average of previous years residential completions.</p>
PO3941	Mr Alan Knott	Knights LLP	Support	<p>[Site Plan and letter attached to representation, stating:] This letter is submitted on behalf of Renew Land Developments Limited who have an interest in the promotion of land to the west of Mount Road, Leek (site references LE069, LE127, LE128a, LE128b). Site references LE128A and LE127 are identified in the current consultation as "Draft Potential Allocations", and sites LE069 and LE128b are shown as "Draft Reserve Sites". In the case of all of these sites, Renew Land Developments Limited consider that all of the land within the attached red edge plan should be allocated for housing development, including public open space and the retention of existing trees across the site.</p> <p>Housing Requirement In response to the proposed increase in the annual housing requirement from 300 dwellings per annum in the adopted Core Strategy, to 320 dwellings as part of the review being carried out as part of the Preferred Options</p>	<p>Comments and confirmation of owner position, noted. The emerging Local Plan sets out how the residual housing requirement for Leek will be achieved by a combination of allocations within the urban area, and along the Mount (making allowance for windfall/small sites allowances). Additional housing sites around Leek are not required.</p> <p>Note that LE128b is included alongside LE128A, as a residential allocation in the Local Plan. Site LE069 is not included.</p> <p>The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy.</p>

			<p>Consultation, our client supports the proposed increase in the annual housing requirement, as this increase is considered to be justified by the latest evidence of housing need contained in the updated Strategic Housing Market Assessment.</p> <p>The proposed distribution of housing across the area is also supported, including providing 30% of the overall housing requirement in Leek (which is one of the three largest towns in the District). The provision of additional housing in the Leek would be compatible with its role and function as a large settlement, containing a town centre, and a range of other services and facilities, including a small hospital, a range of education provision, and a good range of employment opportunities. Leek therefore has a good range of services to support additional housing development. Conversely, developer contributions and / or CIL levies that would arise from additional housing development would also support the improvement and enhancement of public services and local infrastructure where required.</p> <p>Otherwise, additional housing allocations on the edge of larger towns such as Leek would not only meet requirements for open market housing, but it would also facilitate the delivery of starter homes and affordable housing in order to enable the plan to meet the Government’s housing objectives.</p>	<p>The emerging Local Plan policy NE2 protects all existing trees on site, or where this is not possible, expects a 2 for 1 replacement.</p> <p>The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district’s full housing needs, including affordable housing, whilst taking into account migration and demographic change.</p> <ul style="list-style-type: none"> • See para response to PO4392 about justification for 320 annual housing requirement <p>The justification for the broad apportionment of future housing and employment land between the three towns, and the rural areas under Core Strategy Spatial Strategy Policy SS3, is set out in the Core Strategy (and retained in emerging local Plan). This was accepted as sound by the Planning inspector at examination.</p> <ul style="list-style-type: none"> • See para response to PO1733 about Infrastructure Delivery Plan

PO2307 PO2308 PO2309 PO2304 PO2305 PO2306	Mrs Miriam Burns Mr Burns				Object	<p>I am writing to protest against the latest site allocation plan for the SMDC. To build upwards of 4000 house in our beautiful area is criminal. It is obvious a central government ploy, of threats, then offer of £1000.00/ house has worked. For the SMDC to deny the £1000 donation has no bearing on the decision is pure fantasy. The area most concerned is to myself are the site allocated off mount road, leek. At present most of the estates west of mount road are below the crest of the mount, the proposed sites in places near or near to the crest, which will make them highly visible over a large area, particularly at night with street lighting. The site ref LE127 is of particular interest to me, it is obvious access to the site will be through the south end of high view road with services readily available. If we are building approx. 100 houses on LE127, we can expect a large increase in traffic along high view road and moorland road. Sites ref: LE066 & LE128 will be close proximity to a 35mtr high wind turbine and the plans already approved, which is highly undesirable. The building off 800 houses mainly on the eastern flank of the town does not seem logical. There must be other sites in the southern and western flank of leek which could be exploited; the advantage of this would be to reduce the great impact on schools & amenities in the mount catchment area. Other problems concern electrical supply, gas supply, water supply sewage disposal, which can create serious problems due to the massive local increase in demand.</p>	See response relevant question in site tables for site specific comments

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO22	Mr Robert Moseley				ADD03	Object	Should not be changed to include ADD03, this is Green belt land, so is the other areas, plan inside the boundary only not Greenbelt. This land is for all of us, turn it into public space if you must do something.	Refer to Question 19 site table ADD03.
PO32	Mr E Shaw				ADD03	Object	Infrastructure The proposed development site does not have the infrastructure to support the amount of proposed housing by means of the road links as Akemore Lane is a narrow country lane and resembles a modern day cart track due to the amount of surface water that runs off the hills from Mow Cop eventually in to three natural streams. The roads leading in to Station Road, Halls Road, Mow Lane etc cannot cope with a further amount of vehicles. A further 744 vehicles (assuming each proposed property has two vehicles) plus school traffic using the access roads of Station Road etc would not cope with the vast increase of traffic. The town boundary has to fit around the infrastructure and road links. Tunstall North is an ideal example where the road link was established to the A500 in the early 1990's and then various developments have since been made in the area.	Refer to Question 19 site table ADD03.
PO443 PO838	Mr Gerard Hearson Mrs Ruth Hearson				ADD03	Object	The town boundary should not be expanded to include the recently proposed green belt of ADD03. But the town boundary should be expanded to the west of the old Victoria Colliery site, to include a proposed alternative site. Although it's not clear why this site hasn't been proposed by SMDC officials, if it does go ahead, it may also be necessary to move the existing town boundary further south. Consideration should also be given to expanding the town boundary to include land between Bemersley Road and the A527 Tunstall Road.	Refer to Question 19 site table ADD03 and Question 21 'Other Suggested Sites'.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO236	Mr Robert Stockley				ADD03	Object	<p>ADD03 - I believe that this site has been thrown into the mix of potential development sites because the the Oxhey site has been overturned and rejected. The planners aren't even aware of other potential site, and are sitting in Leek looking at two dimensional maps, without even bothering to come to Biddulph, and look at the impact of the proposals close up and personal. The councillors had to fight hard to even get the planners to come out to look at other potential development sites. When the planners eventually visited the Victoria Colliery site and Childerplay Lane site, they weren't even aware of the existence of these sites or there potential for development. The Akemoor Lane site would create accident blackspots with the convergence of the Wedgewood Lane/Halls Road junction. There would be increased traffic if a school was built on Akemoor Lane, and the resulting traffic increase would create hazards from parking on Wedgewood Lane, Halls Road, Akemoor Lane, Linden Drive and Smokies Way. The increased school and housing traffic along Akemoor Lane from the Brown Lees area would create a second Accident Blackspot on the junction of Tower Hill Road, which is already a partially blind junction. Therefore I strongly urge that the Victoria Colliery and Childerplay Lane sites are considered in preference, as the residents of Brown Lees already accept that these sites will be developed. The location of a school at the west end of Biddulph would also provide safe easy access to the school, and provide an alternative catchment for school children.</p>	Refer to Question 19 site table ADD03.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO867	Mr Jordan Kirkham				ADD03	Object	I object to the proposed development on Akesmoor Lane ADD03 on the following grounds: The greenbelt should stay as green belt and not destroy an area of natural beauty and the development will destroy the habitats of the wild animals that live in that area. Trying to get off Dorset Drive in a morning is currently a nightmare without at least an additional 900 cars from the proposed development thrown into the mix. There is only one point of access in and out of Biddulph and during the winter months there only needs to be 1cm of snow and everything grinds to a halt and takes you 2 hours to make it to knyperley traffic lights. The thatched cottage on Akesmore Lane is a listed Building on Greenbelt land and should be left as it is. Biddulph does not require another school if they do not build more houses and Biddulph still has existing housing stock from past development projects that are still vacant and not been sold. If needed extend the existing schools or build on the former Meadows School Site. The railway track that is a tranquil place to walk, cycle and Horse ride will become an alley way between housing estates. Haydon Park would become a giant car park for parents dropping and picking up school children and will become a rat run making it even more of a nightmare. The areas on previous plans for Gillow Heath, Woodhouse Lane and Conway Road have been thrown out and dropped on Akesmore Lane.	Refer to Question 19 site table ADD03.
PO921	Mrs Dianne Simcock				ADD03	Object	Extending to Gillow Heath and the area surrounding the Biddulph Valley Way will destroy the Character of the town. Extending at Childerplay and rear of the industrial estate would be building on areas that were previously built on	Refer to Question 19 site table ADD03 and Question 21 'Other Suggested Sites'.
PO9701	Mr and Mrs Siddorn				ADD03, ADD04, BD062, BD063a, BD068, BD069, BD087.	Object	Object to the inclusion of sites ADD03, ADD04, BD062, BD063a, BD068, BD069, BD087.	Comments noted.
PO1083	Mrs E Swinnerton				BD004, BD108, ADD03, ADD04, BD087, BD117	Object	Access roads too narrow for BD004, BD108, ADD03, ADD04, BD087, BD117	County Highways have commented on all of these sites and as the Highway Authority, the Council will follow their advice. BD004 was included at 'Site Options' Stage but not 'Preferred Sites and Boundaries Stage' due to Highway issues. Refer to the site tables in Question 19 which cover highway issues for the other sites.
PO1088	Mr P Bradley				ADD04	Object	Object to ADD04.	Comment noted.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO5039	Mr G Boulton				BD016	Support	BD016 - I support this site	Comment noted.
PO815	Mr Timothy Sproston				BD062	Object	I would not want the town boundary to be extended to include site BD062, due to it's ecological significance and the additional pressure on access to the site via Mow lane Essex Drive and York close. Brown field sites and other sites where there is more than one access point or through road would be much better. There are also sites off the bypass and on the out skirts of town which would have a less detrimental impact on the local community and feel of Biddulph Town. The town boundary should not be moved to include Site BD062 as it goes against recommendations in the "Code of practice on Odour nuisance from sewage treatment works" (www.defra.gov.uk). This document (P.17) recommends that local authorities should avoid encroachment which might cause as an odour/statutory nuisance. By nature of the work carried out there the site often smells. Whilst a prescribed 'cordon sanitaire' is not given, fitting 40 dwellings in this small triangle of land would mean building right up to the boundary of the sewage works, closer than has previously been considered sensible. The field is literally riddled with holding tanks and sewage pipes (not far from the surface emerging from the ground at the lower end) making it problematic for building. These pipes back up occasionally, forcing rainwater and raw sewage out into the field which finds its way into Biddulph Brook.	Refer to Question 19 – site tableBD062.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO376	Mr Peter Turner				BD062	Object	<p>BD062 - proximity to waste water treatment works: The site shares a boundary with the only sewage works in Biddulph which is already working over its designed capacity population of 17,000 people (Biddulph WWTW conversion of existing COUF Filters to Nitrifying Sand Filters report for United Utilities by C Gambles CEng, MICE & A Ghaus CEng, MIDhemE 2009) (2011 Biddulph census 19,892). Local residents on Long Valley Road, Portland Drive, York Close, Essex Drive and Marsh Green Road already experience unacceptable amenity impacts in their homes such as noise, odour and raw sewage flooding. In periods of heavy rain, raw sewage floods the system, backfills and pollutes private properties (experienced by 34, 36 and 38 Essex Drive). Building houses on this site even closer to the sewage works will increase these unacceptable impacts, leading to an increase in statutory nuisance incidents. It contradicts SMDC LDF Core Strategy SD Policy 4 where the Council states that it will refuse schemes which are pollution-sensitive adjacent to polluting developments. 1. "The Council will ensure that the effects of pollution (air, land, noise, water, light) are avoided or mitigated by refusing schemes which are deemed to be (individually or cumulatively) environmentally unacceptable and by avoiding unacceptable amenity impacts by refusing schemes which are pollution-sensitive adjacent to polluting developments, or polluting schemes adjacent to pollution sensitive areas, in accordance with national guidance." SMDC LDF Core Strategy SD Policy 4 2. During periods of heavy rainfall, the sewerage system cannot cope and the site experiences an overflow of raw sewerage from the man-hole covers which then runs directly into the Biddulph Brook (evidenced with sanitary products distributed around the sewerage treatment facility pipes at the end of Essex Drive). 3. This happens on a regular basis, with the latest occurrences being in November 2015 and March 2016, when both United Utilities and the Environment Agency were forced to clear the pollution (Environment Agency staff (identified by uniforms) in Biddulph Brook witnessed by residents). 4. Residents in Gillow Heath (York Close, Essex Drive, Long Valley Road, Marsh Green Road) are repeatedly contacting United Utilities & SMDC to deal with cases of noise, odour and raw sewage pollution. Houses should not be built even closer than these. It contradicts the following SMDC</p>	Refer to Question 19 – site tableBD062.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							<p>LDF Core Strategy statement: “The NPPF directs Councils to proactively provide needed economic development - however decisions should ensure that new development is “appropriate for its location” in pollution/contamination terms; and more generally development should contribute to securing good standards of amenity and reducing pollution.” SMDC LDF Core Strategy. Section 8.2.11 6. The current capacity of the United Utilities sewage treatment works is reported to be serving up to 17,000 residents. The population of Biddulph as at 2011 census was 19,892 residents. An increase of 885 houses (approx. 3,000 people) will obviously require investment in this facility. This will not be facilitated by the inclusion of numerous small development sites, but rather fewer larger sites which are able to effectively utilise the CIL. Email from United Utilities to Cllr G Court 11/3/16 states: "In undertaking an assessment of which sites are most suitable, we feel that it is appropriate to highlight to the local planning authority and the independent examining inspector that when considering a range of sites, our advice is that it would be more appropriate to identify new housing sites which are not directly adjacent to a wastewater treatment works. Our preference is to bring forward sites in alternative locations." 7. Email received from United Utilities by myself on 8/6/16 states, “We have held a recent discussion with officers at the local planning authority regarding the emerging development plan and specifically discussed the possibility of new housing near to the wastewater treatment works. In undertaking an assessment of which sites are most suitable, we feel that it is appropriate to highlight to local planning authorities the proximity of sites near to wastewater treatment works. We have explained that a wastewater treatment works can result in emissions which include odour and noise. We have identified the need for the local planning authority to discuss any new housing near to the wastewater treatment works with their Environmental Health colleagues and give the sites very careful consideration when comparing these sites with potential alternative sites that may be available to them.” Therefore, the utility provider advises against releasing development land close to the water treatment works. Evidence of best practice shows waste treatment works not recommended for close boundary development.</p>	

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO977	Mr Peter Turner				BD062	Object	<p>The site is currently protected as Greenbelt, and only considered suitable for release from the Greenbelt under exceptional circumstances. Removing this site from the Greenbelt prioritises development in the floodplain which contradicts SMDC LDF Core Strategy Policy SD 4 when a range of sites are available. Exceptional circumstances are not demonstrated. Its inclusion contradicts SMDC LDF Core Strategy Policy SD 4 where development proposed... will be guided to first make use of areas at no or low risk of flooding before areas at higher risk... “ The site is in Flood Zone 2 Neither the distributor road (Marsh Green Road) nor the feeder roads meet the minimum standards for the SCC Highways Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane which cannot be avoided as there is no alternative access to this site. Mow Lane is a dangerous road with no footpath. There is no scope for the required improvements. The feeder road is far below the minimum design standard for radii of access road bends – measuring less than 8m (Standard = 10m) The feeder road is below the minimum design standards for width - 4.9m (Standard = 5m) The distributor road (Marsh Green Road) is significantly below minimum design guidelines with a minimum measured width of 4.3m (Standard = 6.7m). Access to Portland Drive and the site off Marsh Green Road is restricted from both directions by a very tight bend and a road narrowing pinch point a maximum width of 5.4m, below the design guide standard of 6.7m. The junction of Marsh Green Road with Congleton Road is significantly below required standards for vision splay (south) due to the incline of the approach to the junction and tree line obstructions. Fire tender access to within 45m of the most distal aspect of the development cannot be guaranteed due to narrow roads and regular on-street parking. Its inclusion contradicts SMDC LDF Core Strategy Policy T1 “ Ensuring that all new development is located where the highway network can satisfactorily accommodate traffic generated by the development or can be improved as part of the development.” The local community has had unfettered access to this site for many years. For over 40 years, there has been total open access and the land has been used by local residents. This land should be designated as Visual Open Space , protecting the ecology and allowing the</p>	Refer to Question 19 – site tableBD062.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

							wet meadow to do its natural job of reducing flooding in the watercourse by slowing down surface runoff. There are well-used Public Rights of Way cross this land. Provision of community enjoyment of countryside and open spaces is supported by the Commons Act 2006. This site will deliver too few homes to add a measurable contribution to the Community Infrastructure Levy (CIL), it will not bring any direct benefit to the community of Gillow Heath. Its inclusion contradicts the SMDC LDF Core Strategy Biddulph Area Strategy where new housing allocation is prioritised on urban extension land to the west of the bypass and where developments help secure infrastructure improvements for the benefit of the newly developed part of the town. Improvement works to the adjoining, and only, United Utilities waste water and sewage treatment works requires massive CIL contribution, which is only possible from a large-scale development elsewhere. Improvements to feeder and distributor road accesses are not possible due to the relatively small scale nature of the development.	
PO572	Miss Louise Richardson				BD062	Object	I specifically object to site BD062 being moved out of greenbelt and into the boundary.	Comments noted.
PO177	Mr Kingsley Rowland				BD062	Object	I have objections to site BD062 being included in the new town boundary.	Comments noted.
PO965	Mr Christopher Goldstraw				BD062	Object	Do not built on site BD062. New houses should only be built where there is minimal environmental impact. Houses should not be built in such proximity works to a sewage works. Additionally, do not build on sites BD068 and BD087.	Refer to Question 19 – site tables BD062, BD068 and BD087.
PO1086	Mrs S Shallcross				BD062	Object	I object most strongly to the above numbered site and development; I am a resident on mow lane and find the road extremely busy and dangerous now so the thought of even more traffic using the lane fills me with horror. Children use the lane to walk to school either on Oxhey or woodhouse, so more traffic would make it even a worse walk than it is now. We already get a strong smell of sewage some days even this far away from the works, is adding even more houses will surely make things worse.	Refer to Question 19 – site tableBD062.
PO9955	Mr C Lunt				BD062	Object	Object to BD062 being included in the new town boundary.	Comments noted.
PO9979	Mr Ray Lloyd				BD062	Object	(Summary) Possible enlargement of the sewage works within the Green Belt is no longer permissible. It is the responsibility of the Council to decide if the Green Belt boundary has to be moved. Because brown sites are available to accommodate 40 houses this is not	Refer to Question 19 – site tableBD062.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

							sufficient justification to move the Green Belt.	
PO9952	Mr T Green				BD062	Object	Object to Site BD062 being included in the development boundary.	Comments noted.
PO208	Mr Stephen Platt				BD063a	Object	I object to the site BD063a due to site being green belt	Refer to Question 19 – site tableBD063a.
PO5177 PO5185	Mr J. Denton Mrs A Denton				BD067a - c, BD110, BD134	Object	Pennine Way/Thames Drive site cannot support the disruption. Not to build here in the overcrowded areas where traffic flow would be increased to an unsustainable level.	This site is not included in the 'Preferred Sites and Boundaries' consultation document.
PO284	Mr And Mrs G Edge				BD067a, BD067b, BD067c, BD110 and BD134	Support	I am in favour of removing the following - BD067a, BD067b, BD067c, BD110 and BD134 and am being advised that no positive views to INCLUDE them have been received from the 2015 Consultation. It shows that you agree with us that North East Biddulph is already too built up and saturated. It also preserves the space between us and Biddulph Moor. I understand that the Neighbourhood plan needs to take control of the sites for development, though I don't believe that Biddulph NEEDS this number of houses built when there is insufficient working opportunities in the town. ALL possible new residents are highly likely to be travelling OUT of Biddulph to Stoke on Trent or towards Macclesfield/Manchester. The vision of Biddulph must include developing the Town Centre which are wider, balanced development supports. The By Pass greatly benefits developing the West Side of the Town and in my opinion the plans to develop in those areas fit with the vision for 2030 However, should I need to remind you of probably "why" you made this decision I have attached below the major reasons why there should be no development on any of the above bricks from my perspective living adjacent to BD067a. Schools Ox Hey First – Considerable congestion already exists as parents park cars on both sides of the road in many places – extending for hundreds of yards each side of the school entrance. Cars currently are also parked on each side of Firwood Road and there is no reason to expect this to change should a formal road into BD067 come into being. Woodhouse Middle School – Existing congestion on both sides of the road already and any development increasing traffic from the proposed site will need to exit onto Woodhouse Lane, certainly from (BD607C) along with any traffic exiting Pennine way	This site is not included in the 'Preferred Sites and Boundaries' consultation document.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							<p>from Firwood Road to Woodhouse Lane. I'm advised that Ox Hey School is already at capacity and Woodhouse Academy has had to build school extensions to accommodate the increased numbers – further increases WILL exacerbate the congestion and accident risk. So any new development would need to service further numbers of school children who, being unable to get access, would need to travel – By Car – to other schools, further increasing traffic volume/congestion. Traffic The Selectus Development of 270 houses (as yet unfinished at this time) has one more road to be completed which exits onto Pennine Way as does Geneva Way from this site. Further Traffic exiting from Firwood Road would considerably increase traffic flow in an area already difficult to drive through at school times. Cars already park on each side of Firwood Road currently – that would be unlikely to change making exit from the proposed site even more hazardous. Traffic density has already increased as a result of building of 270 houses (currently +245) on the old Selectus Site (which was at least "A Brown Field Site") and that has already increased the traffic safety issues relating to both schools. Any traffic exiting BD607C on to Woodhouse "Lane" – LANE being the operative word is certainly not wide enough to accommodate further traffic volume. Indeed not that long ago there was a major accident just above this proposed block where both police & ambulances were in attendance and last weekend a car (May 2016) had overturned on the road at the side of BD067c – police were called and the road was closed for some time. Increased traffic would certainly not improve the safety on Woodhouse Lane at this point, which is more reasonably described as a country lane from above Pennine Way to the farms above. There are no public footpaths on this stretch of road either so public safety would again be a major increasing issue. Nature Conservation Many people have purchased property on Fields Side of Pennine Way because of the peaceful, tranquil, pleasant views. Indeed most of us probably paid over the market value and invested significantly in our properties in order to maximise the pleasure we gain from that environment – Many of us in retirement. The Land you propose to develop IS GREEN BELT and as such should be protected – by definition – from such development – clearly the morals/values that set these criteria are now are no longer being treated with the respect it</p>	

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

							<p>deserves – Such is the world we now live in. Plots BD067A and DB067b currently accessed from Firwood Road have Public Right of Way and where numerous people regularly exercise their dogs or just simple walk for pleasure, hence this proposal would deprive the local community of the ability to use this space. Furthermore, with reference to “Green Belt” from the House of Commons Library it states – “Government policy on protection for the green belt is set out in Chapter 9 of the National Planning Policy Framework (NPPF). The fundamental aim of the green belt policy is to prevent urban sprawl by keeping land permanently green. The NPPF states that the construction of new buildings be regarded as “Inappropriate” for the green belt. In the same document the NPPF states that Green Belt “should only be used in Exceptional Circumstances” which they further outline . In my opinion the proposed development of BD067a, BD067b & BD067c “Do Not Satisfy” the definitions stated as “exceptional circumstances”. Community The proposed development of the five proposed blocks would reduce the boundary between Biddulph and Biddulph Moor – reduced even further should the blocks designated at Biddulph Moor become developed. Biddulph Moor has its own Community and a merger would no doubt happen in the future if current proposals were actioned. This should not be allowed to happen Flooding Risk Whilst I would not suggest there is a major flooding risk I can tell you that there has already been one major flood disaster following major storms which flooded the bungalow below us and caused major damage. Indeed the water flowed beyond the properties by the fields, over the road and in to properties on the other side of the road. Whenever we have storms there is always a pool of water in the field feet away from our boundary fence (Photo’s attached - for example taken Nov 2015 – IS TYPICAL). There is clearly an issue to be addressed as to the suitability of this land to be built on. Amenity When the potential scale of the development in this area, since 2013, can range from 640 – 730 new houses in a well confined area it is reasonable to conclude that the levels of noise from increased traffic would be such as to make a major adverse quality difference. Further to this all the existing properties East of Pennine Way would unquestionably lose any privacy at the rear of the property and further more as</p>	

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							<p>the development rises beyond the level of Pennine Way all our properties would be totally overlooked. Furthermore, Furthermore the Private House component on the "Selectus" Bovis site are proving "So Difficult to Sell" that as a result social housing has had to be substituted – In other words there is no real market for private housing of the order being propositioned and certainly on this evidence no case to build 480 more houses along Pennine Way. Access – BD067b BD067b is "sandwiched between BD067a & BD067c. From BD067c, BD067b can only be accessed from Woodhouse Lane. As stated above the road at this point on Woodhouse Lane is more a Country Lane than road and would be inappropriate to have as a vehicular access/exit. Furthermore BD067b cannot be accessed from BD067a since the house boundary garden line (Firwood Road pavement next to the property) is some 2.5 metres from the BD067d boundary into BD067a. This being the case – you can't build on BD067b in isolation which makes the scale of what you would need to build totally unacceptable in size considering the potential scale of the development in these blocks as covered below. Scale of the Development Areas BD067a + BD067b + DB067c are defined as having the capacity to build 120 + 150 + 120 houses. A total of 390 new houses. Add to this the 270 houses on the "Selectus" sight and you have more than 660 new houses then built in and around the existing area. This would fundamentally change the current local environment and have major "add on" effects detrimental to the community as it is. This could be even worse if you add the projected addition houses on BD110 + BD134 (50 + 40) to this figure. IF Green Field sites are to be considered then the areas with the potential to cause the major downsides of the Pennine Way/Thames Drive blocks would have to be considered. For examples the West part of the town from Brown Lees (Tower Hill Road), Akemoor Lane - which has less than 10 residential properties along the whole length of the lane and is mostly Green Fields on BOTH sides of the road, Equally the road out of Brown Lees in the opposite direction has few residential buildings and fields to both sides of the road. Such expansion to the West would be more sensible/logical than Pennine/Thames Drive</p>	
PO321	Frank Cottrell				BD067a, BD067b, BD067c,	Support	Although I agree with the removal of BD067a,BD067b,BD067c,BD110,BD134,a proposed site would be the old Victoria Colliery site and Childerplay	Comments noted. See responses to Question 19 which explain the Council's position on the Victoria Colliery and Childerplay Road sites.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
					BD110 and BD134		Road site. I am glad to see that there is no URBAN CREEP on to Biddulph Moor, we need to keep our own identity. Would it be possible for the council to purchase the above sites and designate them Public open spaces because at the moment they are use quite a lot by dog walkers. We need a park in Biddulph why not take the opportunity to purchase these sites and provide a park and protect us from URBAN CREEP in the future.	Sites BD067a, BD067b, BD067c, BD110 and BD134 are all privately owned and purchase by the Council is highly unlikely as the land cost would be prohibitive and use as open space would be expensive for the Council.
PO285	Mr David Spruce				BD067a, BD067b, BD067c, BD110 and BD134	Support	I support the removal of Pennine Way / Thames Drive sites BD067a, BD067b, BD067c, BD110 and BD134. Thanks for listening to the residents and sparing this over-developed portion of Biddulph even further. There is precious-little separation between this area and Biddulph Moor as it is without adding more housing.	Comments noted.
PO531 PO591	Mr Bill Hockey Mrs Pamela Hockey				BD067a, BD067b, BD067c, BD110 and BD134	Support	As a resident of North East Biddulph and very concerned about the previously proposed sites BD067a, BD067b, BD067c, BD110 and BD134 along behind Pennine Way, Torville Drive, etc. I am very pleased to support the change their status to constrained. I understand that the Green Belt Review rejected these as being too close to Biddulph Moor and if built on create urban sprawl taking the two areas much too close to each other. It is good for Biddulph that the Pennine Way, etc. sites are taken off, North East Biddulph is already too extended and saturated. Retains the Biddulph / Biddulph Moor separation and the open space between them. Stops the housing development that would have been highly visible from most of the rest of Biddulph. The vision for Biddulph must include developing the Town Centre which a more balanced geographic development supports. The by-pass greatly benefits developing on the West side, and looks like it was planned to support the expected housing allocations for Biddulph. Extending to the West past the current Town Boundary into the area bounded by Akemoor Lane, Brown Lees and the old rail track gives the opportunity to build organic housing developments instead of ribbon developments (lines of properties) making them more attractive, be in keeping with the rural nature that Biddulph Residents want to retain and enables the types of houses that potential buyers are looking for to be built. Only building on smaller and / or hemmed-in sites risks a repeat of what has happened on the Selectus site where houses have been built that no one wants to buy. Doing this across	Comments noted. See other tables for responses to the issues raised.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							<p>Biddulph may achieve the target numbers on the fewest sites possible but it would change the nature of the town in a very bad way and certainly not bring the desperately needed wealth into the town. Sympathetically developing this area to the West and using the less contentious parts provides the opportunity to achieve the required numbers with desirable properties and that will be close to the least number of existing dwellings and where there is space to include natural screening around the development and open spaces and natural screening within. ACCESS: There are already several existing routes across the old rail track, off / from Marsh Green Lane Mow Lane Station Road Wharf Road New Pool Road With 'large' developments, the Developer has an obligation to financially contribute to infrastructure improvements via the Community Infrastructure Levy, previously known as Section 106. Build nature sensitive access routes: bridge, tunnel, etc. to the Town side, widen lower Akesmoor Road to the West, etc. NATURE: Widen the natural screening of the old rail track by including a band along to the west which: Separates this development from the developments BD016, BD055, BD071, BD071a, BD106, BD108 & BD156 between the rail line and the by-pass. Makes a wider nature corridor along there. Adds to the visual and public open space in Biddulph. ADVANTAGES: It is a low laying area so will be a less obtrusive development, especially with natural screening. Enables pedestrian access to the Town Centre reducing car use, demand for increased car parking and pollution from vehicles. Provides close proximity to the amenities, e.g. the Health Centre and the planned late night Pharmacy. Gives the opportunity to include dwellings for the older residents where they will have close proximity to the Town Centre amenities. Reduces the likelihood of residents travelling north to Congleton or south to Stoke for their shopping, Close to the proposed Care Home in BD055 for those with elderly relatives and friends. Closer to the Halls Road sports grounds than potential developments to the south east of the town, reducing traffic volumes. It is able to accommodate the proposed new Primary School and is close enough for access by foot, so against the School being located to the south: Eliminates the need to travel by car. Could design for safe parent drop-off / pick-up. Reduces by-pass volumes. Eliminates needing to cross</p>	

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							the by-pass so safer for those on foot and reduces slowing of traffic. Therefore greatly improving safety for our vulnerable young children. The area being best located to maximise the positive impact of all the above in support of Town Centre regeneration and Town Council income generation into the future and beyond. The above demonstrating why this is the best Sustainable Location in achieving the goals of the Staffordshire Moorlands Sustainability Vision.	
PO532	Mrs C Picken				BD067a, BD067b, BD067c, BD110 and BD134	Support	It is pleasing that the views of the residents have been listened to and that the town boundary has not been extended eastwards, in the northern half of the town, which will help to preserve the independence and clear demarcation of the two separate communities of Biddulph and Biddulph Moor. I would like to say thankyou for taking sites BD067a, BD067b, BD067c, BD110 and BD134 off the 'Preferred Options', as this area of Biddulph is already over-extended and saturated. Consideration should be given to the possibility of extending the town boundary on the west side of the town, through site BD116 and BD140, between the currently identified area of ADD03 and site BD063a, to allow for the possibility of further site allocations within this area. The vision for Biddulph must include developing the Town Centre, which a more balanced geographic development supports. The by-pass greatly benefits developing on the West side, and looks like it was planned to support the expected housing allocations for Biddulph.	Comments noted. The area you suggest is under investigation by the Council.
PO717	Mr Philip Beech				BD067a, BD067b, BD067c, BD110 and BD134	Support	I feel that the council has made a positive decision by deeming sites BD134, BD110, BD067a, BD067b and BD067c as constrained sites. In my opinion the areas to the North and East of Biddulph are already over populated, as previously reasoned and highlighted by the comments raised in the previous consultation. The inclusion of ADD03, and the utilisation of the area of land immediately to the west of the by-pass (BD076a, BD076, BD071 & BD071a, BD106, BD156, BD055, BD108), in my opinion, are a positive proposition for the Town as a whole, as this area is far more accessible from the main artery road running through Biddulph. The new proposed town boundary is good for Biddulph and its regeneration. Developing the 'proposed allocated sites' will have minimal impact on the existing residents and infrastructure, whilst meeting the future demands for development and regeneration. Use of these sites will give developers a 'clean sheet', whereby they can develop the areas in	Comments noted.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							an organic manner, and not be constrained by the presence of existing developments, and the issues that can arise when integrating developments old and new. I feel that the only type of development to be approved should be sympathetic, and the inclusion of ADD03 lends itself to this type of development. Also, the opportunity to expand the development in the coming years will already exist, without the need to search tirelessly for suitable sites, as is the case currently. In summary - I am very pleased with the proposed town boundary for Biddulph and commend the team involved with the project for their hard work.	
PO453	Mrs Jean Fairbanks				BD067a, BD067b, BD067c, BD110 and BD134	Support	I support Pennine Way and Thames Drive sites BD067A, BD067B, BD067C, BD110 and BD134 being made constrained sites, thanks for removing the and listening to residents. We need to retain Biddulph/Biddulph Moor separation as North East Biddulph is too saturated with developments.	Comments noted.
PO639 PO658	Mrs Siobhan Perry Mr Andrew Perry				BD067a, BD067b, BD067c, BD110 and BD134	Support	The boundary looks more balanced with regards to walking access for everyone to the town centre for shopping etc.... The removal of sites BD067A, BD067b, BD067c, BD110 and BD134 to "constrained sites" is greatly appreciated. Building on these plots of land would have no real benefit to the growth of the town centre and decrease the open green space around Biddulph which makes it beautiful.	Comments noted.
PO844	Mrs Andrea Millington				BD067a, BD067b, BD067c, BD110 and BD134	Support	I agree with the local plan town boundary as it stands with extension to the west of the bypass which was clearly recommended in the core strategy. I believe that the green belt survey supports no further extension of the town boundary to the north east of the town and agree that BD067a,b,c, BD110 and BD134 should remain in greenbelt due to its proximity to Biddulph Moor, reducing the risk of the village and town becoming one entity. The town boundary has been extended so far to the north east it is becoming increasingly further away from the town centre and therefore the residents will be less likely to access the town as the routes out of north east of Biddulph encourage exit to Congleton and Stoke partly due to people being less likely to walk to town from such a distance.	Comments noted.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO1045	Mr Nicholas Tavernor				BD067a, BD067b, BD067c, BD110 and BD134	Support	I support the removal of sites BD067a, BD067b, BD067c, BD110 and BD134. These sites provide water catchment, which release water slowly into watercourses, as there has been increased flooding to properties on Smithy Lane since the development of the selectus site which would get much worse with development in these sites. They also and importantly retain the separation between Biddulph and Biddulph Moor and prevents a big band of highly visible development which starts to break peoples visual connection to landscape in which they live, especially considering the towns pride as a the garden town of Staffordshire. I do not think site BD062 should be developed as that provides natural water catchment, is a species rich site with valuable recreational use. BD076 & 76a could be developed with protection in place for the habitat and wildlife corridors on the north and east edges. BD071 & 71a could be developed with the provision that as a district value site the biodiverse habitat running along the steam following the bypass and contained within the hedgerows are retained and developed as part of the green infrastucture policy.	Comments noted. See Question 19 site table BD062, BD076 and BD076a and BD071 and 71a.
PO1057	Mr Robert Hurst				BD067a, BD067b, BD067c, BD110 and BD134	Support	It is visually obvious from the map that the proposed boundary results in a much better balanced development either side of the town centre, than would result from over development of the north east side. I understand that sites to the north east (BD67a-c, BD110 and BD134) have thankfully been made 'Constrained Sites'. Added to the current 'Uplands Mill' development those sites would have overloaded the access roads, the primary school does not have the capacity and 'school run' traffic already chaos. Pushing the development further up the hill towards Biddulph Moor would be detrimental to the special and rare moorlands countryside. As those sites retain considerable amounts of water from the hillside, any development would accelerate the runoff and probably overload the drainage system. The point in stating these 'objections' to those sites is by implication to support the boundary as now proposed in order to meet the housing requirement. To avoid making comment individually on each green belt amendment (Q17) and housing allocation (Q19), though in principle any green belt amendment should be resisted, in view of the above, I have no objection to the proposals.	Comments noted.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO5228	Mrs I E Sefton				BD067a, BD067b, BD067c, BD110 and BD134	Support	It is reassuring to know that Pennine Way- Thames Drive sites have become constrained sites. Clearly SMDC has listened to local residents. This will also maintain the open space beyond Biddulph and Biddulph Moor. Where as possible it is important to protect Green Belt areas.	Comments noted.
PO5336	Mr D Heath				BD067a, BD067b, BD067c, BD110 and BD134	Support	It is good for Biddulph that Pennine Way etc. sites are taken off the north east of Biddulph is already too extended and saturated. Retains Biddulph Moor separation the other space between the stops the housing development that would have been highly visible from most off Biddulph,	Comments noted.
PO5277	Mrs S Purcell				BD067a, BD067b, BD067c, BD110 and BD134	Support	Thank you for taking them off and for listening to the residents. Agree with all the comments.	Comments noted.
PO5302	Mr and Mrs A. Hodgkinson				BD067a, BD067b, BD067c, BD110 and BD134	Support	Thank you for taking them off and for listening to the residents comments.	Comments noted.
PO5259	Mr and Mrs J B Ecclestone				BD067a, BD067b, BD067c, BD110 and BD134	Support	Thank you for listening to the residents and taking the off Thames Drive and Pennine Way (Most encouraging). Congleton Road from Mow Cop and looking across the Valley it seems vital to retain that green	Comments noted.
PO5250	Mrs J Sutton				BD067a, BD067b, BD067c, BD110 and BD134	Support	I support the revised town boundary, I support the removal of the sites BD067b, BD067c, BD110 and BD134 a very sensible decision. I support the view that the north east of Biddulph maintains its present separation via the natural Green Belt corridor separating the town boundary from Biddulph Moor. I support the councils desire to improve the town centre. This is easily achievable by housing development to the west of the Biddulph Valley railway line.	Comments noted.
PO5076	Mr J Neate				BD067a, BD067b, BD067c, BD110 and BD134	Support	I strongly support the fact that the Pennine Way + Thames drive site are constrained sites.	Comments noted.
PO5077	Mrs L Neate				BD067a, BD067b, BD067c, BD110 and BD134			

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO5210	Mrs L McQuade				BD067a, BD067b, BD067c, BD110 and BD134	Support	Thanks for taking residents comments on board.	Comments noted.
PO5234	Mrs P G Webb				BD067a, BD067b, BD067c, BD110 and BD134	Support	Good to know that the residents have been listened too!	Comments noted.
PO5235	Mrs P G Webb				BD067a, BD067b, BD067c, BD110 and BD134	Support	All ready enough houses in the area.	Comments noted.
PO5345	Mr I Barber				BD067a, BD067b, BD067c, BD110 and BD134	Support	Already very saturated with housing and would be blight on the area, if built this area it would be a definite case of urban creep.	Comments noted.
PO5310	Mr A Picken				BD067a, BD067b, BD067c, BD110 and BD134	Support	It is pleasing to know that the town boundary has not been extended eastwards in the northern half of the town. This will help provide clear demarcation of the Biddulph, Biddulph Moor communities.	Comments noted.
PO5264	Mrs A Bridgette				BD067a, BD067b, BD067c, BD110 and BD134	Support	Thank you for taking them off and for listening to the residents of Biddulph is already too extended and saturated so it's better that these sites are removed.	Comments noted.
PO9926	Mr J Wright				BD067a, BD067b, BD067c, BD110 and BD134	Support	(Summary of comments - full version attached) Support the exclusion of sites BD067a-c, BD110 and BD134 from the plan.	Comments noted.
PO1004 6	Mr Philip Sutton				BD067a, BD067b, BD067c, BD110 and BD134	Support	I support the proposed town boundary. I support the removal of sites BD067a-c, BD110 and BD134. I agree and support the decision that the north east of Biddulph maintains its natural corridor of land separating it from Biddulph Moor. Any development on this natural separation makes the town even more unbalanced. I more balanced geographic town centre is vital and I support the Council's desire to develop the town centre. This is easily achievable by the development of all the sites identified on the western side of the bypass.	Comments noted.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO9790	Mrs. Margaret Biddle				BD067a, BD067b, BD067c, BD110 and BD134	Support	(Summary of comments - full version attached) I am against developments on green field sites. I support the removal of sites BD067a - c, BD110 and BD134 from the plan. This area should not be developed for the following reasons: Loss of separation between Biddulph and Biddulph Moor; Houses would be highly visible around the town; Loss of a natural floodplain; Loss of wildlife; Unstable land; loss of open space; Many empty houses exist in Biddulph already; and a Neighbourhood Plan is needed.	Comments noted.
PO9791	Mr Eric Biddle				BD067a, BD067b, BD067c, BD110 and BD134	Support	(Summary of comments - full version attached) Do not agree with building on green field sites. Whilst brownfield sites exist they should be given priority. However, support the non-inclusions of sites BD067a-c, BD110 and BD134 for the following reasons: Constrained sites; this part of Biddulph has been saturated with houses and bungalows for many years; Houses on the old Selectus site are not selling - the site has not been developed sympathetically; The area would lose open space it needs; Biddulph Moor would be in danger of 'creep'; Wildlife would disappear; Land is unstable; Flood risk - no where to soak up water from Biddulph Moor; Visual intrusion of development; Many empty properties already exist in Biddulph; and a Neighbourhood Plan is needed.	Comments noted.
PO9643	Mr D Copeland				BD067a, BD067b, BD067c, BD110 and BD134	Support	(Summary of comments - full version attached) Support changes made to the town boundary since the last plan was produced (Site Options 2015) which excludes BD067a, BD067b, BD067c, BD110 and BD134. Consider that town boundary should be extended to the west and south instead (see attached plan). Advantages would be: close and easy access to the town centre and facilities; close to Halls Road and less obtrusive (with screening); create access to the new development directly from the bypass; development here would not add to flooding problems experienced at present in Biddulph; and part of BD140 is an excellent place for a new primary school as we do not currently have a school on the west side of town.	Comments noted. The area you suggest is under investigation by the Council.
PO10203	Mr Stan Charlesworth				BD067a, BD067b, BD067c, BD110 and BD134	Support	Summary (see full attached response). Support the Biddulph development boundary. North Biddulph is surrounded by views and greenfields and close to Biddulph Grange support decision not to build new homes adjacent to Pennine Way and Thames Drive traffic generated from this development would have had an adverse impact.	Comments noted.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO1021 6	Mr Stuart Nicholls				BD067a, BD067b, BD067c, BD110 and BD134	Support	I support the removal of the sites off Pennine Way, Blackbird Way etc. from the plan. This decision is very important for a number of reasons including infrastructure, safety, wildlife and natural habitat preservation but also the retention of separation between Biddulph and Biddulph Moor. Also, this area is already saturated by the recent building on the Uplands Mill site.	Comments noted.
PO9894	Mrs Janet Copeland				BD067a, BD067b, BD067c, BD110 and BD134	Support	Support the removal of sites BD067a-c, BD110 and BD134 from the plan. This will prevent urban creep between Biddulph and Biddulph Moor. Develop brown field sites before any development on Green Belt land.	Comments noted.
PO9970	Ms Ashley Kirkham				BD067a, BD067b, BD067c, BD110 and BD134	Support	Summary (see full representation attached). Support making sites BD067b to BD134 'constrained sites'. Believe that the NE Biddulph is already developed enough and the separation between Biddulph and Biddulph Moor should be retained. Developing the west of the town would be better related to the town centre and the bypass and provides the opportunity to grow organically rather than ribbon development. There are several existing access points available.	Comments noted.
PO9962	Ms Claire Kirkham				BD067a, BD067b, BD067c, BD110 and BD134	Support	Thank you for listening to the residents by removing sites BD067a to BD134 from the plan. I believe north east Biddulph is already too extended and it is important to retain separation between Biddulph and Biddulph Moor. Any new developments would be highly visible. Extending to the west past the current town boundary into the area bounded by Akemoor Lane, Brown Lees and the old rail track gives the opportunity to build organically instead of ribbon developments making them more attractive for buyers. Developing on the west would provide the opportunities to achieve the required number of properties using existing access points across the old rail track, Marsh Green Lane, Mow Lane, Station Road, Wharf Road and Newpool Road. Sympathetically developing on the west would naturally screen the old railway track by including a band on the west which has open spaces.	Comments noted.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO1023 6	Mr Robert Kirkham				BD067a, BD067b, BD067c, BD110 and BD134	Support	Summary of response (see full response attached) Support the town development boundary to the north of Biddulph for the following reasons: the north of Biddulph is already too developed and not as close to the town centre as other sites retain the separation between Biddulph Moor and open views sites to the west of the bypass are in a better position to access the town centre and have better access points proving a logical location. It would be organic growth rather than ribbon development and the land is low lying	Comments noted.
PO1021 7	Mr Ian Evans				BD067a, BD067b, BD067c, BD110 and BD134	Support	Sites BD076A, BD076B, BD076C, BD110, BD134 have been made constrained sites and not shown [on Preferred Options], thank you. PENNINE WAY HAS HOUSING SATURATION AND WOULD ENCROACH ONTO THE SPACE BETWEEN BIDDULPH AND BIDDULPH MOOR.	Comments noted.
PO1020 8	Mrs J Cottrell				BD067a, BD067b, BD067c, BD110 and BD134	Support	(Summary only) Support the town development boundary as it is now (north of Biddulph). There has been a large amount of housing over the last few years and the roads are extremely busy. Schools sewers etc are saturated.	Comments noted.
PO9852	Mr Gayle				BD067a, BD067b, BD067c, BD110 and BD134	Support	It really seems a folly and injustice to the valley to build any higher up towards Biddulph Moor (i.e. BD067a-c, BD134, BD110). There certainly are lower sites within Biddulph giving people easier access to employment and route to Cheshire (Congleton Station) or to Hanley and Newcastle.	Comments noted.
PO1005 7	Mrs B Purton				BD067a, BD067b, BD067c, BD110 and BD134	Support	(Summary of comments - full version attached) Support removal of BD067a-c, BD110 and BD134 from the plan. This will help to keep Biddulph and Biddulph Moor separate and prevent development which would be highly visible from most of the rest of Biddulph.	Comments noted.
PO9959	Miss M Underwood				BD067a, BD067b, BD067c, BD110 and BD134	Support	Pennine Way already suffers from the Uplands Mill development. The increase in traffic to Thames Drive and Pennine Way from further development would cause more pollution and ruin the estate. The Green Belt would be lost causing a loss of biodiversity and increasing the risk of flooding due to the removal of vegetation and trees only to be replaced with concrete.	Comments noted.
PO5142	Ms Karen Harding				BD067a-c	General comment	Thanks for listening to the local people of Biddulph removing in removing sites BD067a, BD067b, BD067c from the development map. If this would have taken place this development would be visible from most of Biddulph and beyond.	Comments noted.
PO5148	Ms Melissa Harding				BD067a-c	General comment	I am glad that you have taken the proposed sites of BD067a, BD067b, BD067c, from the development maps. This site developed Biddulph further from the	Comments noted.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							town centre and could have been visible from most parts of Biddulph, thank you.	
PO5120	Ms Lynne Evans				BD067a-c	General comment	I would heartedly thank those involved in making the area a constrained site. I concur that this area surrounding Pennine Way is better removed from possible building as this would blight the existing developments.	Comments noted.
PO5152	Mrs P Alcock				BD067a-c	General comment	I am grateful you have taken time to listen to the local people of Biddulph and decided not to build on plots BD067a, BD067b, and BD067c north east of Biddulph sites have already had a lot of building and to the west gives a Biddulph a better balance. It also keeps Biddulph Moor separate.	Comments noted.
PO5159	Mr N McQuade				BD067a-c	General comment	Thanks for listening to residents comments: Please keep as much Green Belt as possible very important.	Comments noted.
PO5134	Mr Gary Harding				BD067a-c	General comment	Thank you taking the time to listen to the residents and taking the time plots BD067a, BD067c off the current maps. North east Biddulph sites have already been developed. This keeps the Biddulph, Biddulph Moor separation. Building to the west gives Biddulph a better balance.	Comments noted.
PO5155	Mrs C. Nicholls				BD067a-c, BD110, BD134	General comment	I support the new decision to the sites off Pennine Way, Black Bird Way etc. have now been made constrained sites, this is important in many ways including health and safety. Infrastructure etc. but also retains the separation between Biddulph and Biddulph Moor. I believe that other areas could be classified for building + would not impact on residents these are land off Childerplay Road + the Old Victoria Colliery.	Comments noted. See responses to Question 19 for the Council's position on the sites you have suggested.
PO9775	Mr M Barlow				BD067a-c, BD110, BD134	Object	It was always Pennine Way as the roads are wide and the cul-de-sacs provide access to the sites. As for joining up to Biddulph Moor, Park Lane is already joined up to Biddulph Moor. Or could put a few less houses there, the site is big enough to take a lot of houses.	These sites have been removed from the plan as the Council's Green Belt Review considers that they are not suitable for release from the Green Belt.
PO1087	Mrs Valerie Austin				BD068	Object	Object to BD068.	Comments noted.
PO975	Mr Peter Turner				BD068	Object	BD068 The site shares a boundary with the only sewage works in Biddulph which is already working over its' designed capacity population of 17,000 people (2011 Biddulph census 19,892). Local residents on Long Valley Road, Portland Drive, York Close, Essex Drive and Marsh Green Road already experience unacceptable amenity impacts in their homes such as noise, odour and raw sewage flooding. In periods of heavy rain, raw sewage floods the system, backfills	Refer to Question 19 site table BD068.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							<p>and pollutes private properties (experienced by 34, 36 and 38 Essex Drive). Building houses on this site even closer to the sewage works will increase these unacceptable impacts, leading to an increase in statutory nuisance incidents. It contradicts SMDC LDF Core Strategy SD Policy 4 where the Council states that it will refuse schemes which are pollution-sensitive adjacent to polluting developments. 1. “The Council will ensure that the effects of pollution (air, land, noise, water, light) are avoided or mitigated by refusing schemes which are deemed to be (individually or cumulatively) environmentally unacceptable and by avoiding unacceptable amenity impacts by refusing schemes which are pollution-sensitive adjacent to polluting developments, or polluting schemes adjacent to pollution sensitive areas, in accordance with national guidance.” SMDC LDF Core Strategy SD Policy 4 2. During periods of heavy rainfall, the sewerage system cannot cope and the site experiences an overflow of raw sewerage from the man-hole covers which then runs directly into the Biddulph Brook (evidenced with sanitary products distributed around the sewerage treatment facility pipes at the end of Essex Drive). 3. This happens on a regular basis, with the latest occurrences being in November 2015 and March 2016, when both United Utilities and the Environment Agency were forced to clear the pollution (Environment Agency staff (identified by uniforms) in Biddulph Brook witnessed by residents). 4. Residents in Gillow Heath (York Close, Essex Drive, Long Valley Road, Portland Drive, Marsh Green Road) are repeatedly contacting United Utilities & SMDC to deal with cases of noise, odour and raw sewage pollution. Houses should not be built even closer than these. It contradicts the following SMDC LDF Core Strategy statement: “The NPPF directs Councils to proactively provide needed economic development - however decisions should ensure that new development is “appropriate for its location” in pollution/contamination terms; and more generally development should contribute to securing good standards of amenity and reducing pollution.” SMDC LDF Core Strategy. Section 8.2.11 6. The current capacity of the United Utilities sewage treatment works is reported to be serving up to 17,000 residents. The population of Biddulph as at 2011 census was 19,892 residents. An increase of 885 houses (approx. 3,000 people) will obviously require investment in this</p>	

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							<p>facility. This will not be facilitated by the inclusion of numerous small development sites, but rather fewer larger sites which are able to effectively utilise the CIL. 7. Email received from United Utilities by myself on 8/6/16 states, "We have held a recent discussion with officers at the local planning authority regarding the emerging development plan and specifically discussed the possibility of new housing near to the wastewater treatment works. In undertaking an assessment of which sites are most suitable, we feel that it is appropriate to highlight to local planning authorities the proximity of sites near to wastewater treatment works. We have explained that a wastewater treatment works can result in emissions which include odour and noise. We have identified the need for the local planning authority to discuss any new housing near to the wastewater treatment works with their Environmental Health colleagues and give the sites very careful consideration when comparing these sites with potential alternative sites that may be available to them." Therefore, the utility provider advises against releasing development land close to the water treatment works. Evidence of best practice shows waste treatment works not recommended for close boundary development. The site is currently protected as Greenbelt, and only considered suitable for release from the Greenbelt under exceptional circumstances. Removing this site from the Greenbelt prioritises development in the floodplain which contradicts SMDC LDF Core Strategy Policy SD 4 when a range of sites are available. Exceptional circumstances are not demonstrated. Its inclusion contradicts SMDC LDF Core Strategy Policy SD 4 where development proposed..."will be guided to first make use of areas at no or low risk of flooding before areas at higher risk..." The site is in Flood Zone 2 Development close to the waste water and sewerage treatment works will result in increased raw sewage overflow close to the nearby residences as well as polluting the watercourse, Biddulph Brook. Neither the distributor road (Marsh Green Road) nor the feeder roads (Portland Drive) meet the minimum standards for the SCC Highways Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are at least two pinch points on Marsh Green Road which cannot be avoided as there is no alternative access to this site. Marsh Green Road is a dangerous road with no footpath. There is</p>	

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							<p>no scope for the required improvements. The feeder road is far below the minimum design standard for radii of access road bends – measuring less than 8m (Standard = 10m) The feeder road is below the minimum design standards for width - 4.9m (Standard = 5m) The distributor road (Marsh Green Road) is significantly below minimum design guidelines with a minimum measured width of 4.3m (Standard = 6.7m). Access to Portland Drive and the site off Marsh Green Road is restricted from both directions by a very tight bend and a road narrowing pinch point a maximum width of 5.4m, below the design guide standard of 6.7m. The junction of Marsh Green Road with Congleton Road is significantly below required standards for vision splay (south) due to the incline of the approach to the junction and tree line obstructions. Fire tender access to within 45m of the most distal aspect of the development cannot be guaranteed due to narrow roads and regular on-street parking. Its inclusion contradicts SMDC LDF Core Strategy Policy T1 “ Ensuring that all new development is located where the highway network can satisfactorily accommodate traffic generated by the development or can be improved as part of the development.” This site will deliver too few homes to add a measurable contribution to the Community Infrastructure Levy (CIL), it will not bring any direct benefit to the community of Gillow Heath. Its inclusion contradicts the SMDC LDF Core Strategy Biddulph Area Strategy where new housing allocation is prioritised on urban extension land to the west of the bypass and where developments help secure infrastructure improvements for the benefit of the newly developed part of the town. Improvement works to the adjoining, and only, United Utilities waste water and sewage treatment works requires massive CIL contribution, which is only possible from a large-scale development elsewhere. Improvements to feeder and distributor road accesses are not possible due to the relatively small scale nature of the development.</p>	

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO9023	Mr & Mrs Weaver				BD069	Support	<p>HOUSING LAND, BIDDULPH – REF: BD069 - FORMER KNYPERSLEY HALL GARDEN CENTRE We write in support of the proposed allocation of the above brownfield, former garden centre site for residential development, inclusion within the town boundary for Biddulph and removal from the Green Belt. We write as owners of the site since 2003. The site has been in our family since 1940s when our family moved to Biddulph. In writing this letter we have taken advice from town planning consultants and have reviewed the consultation documents available on the Council’s website. The following sections of this letter establish our reasons for supporting the proposed allocation of this site for residential development, including within the town boundary and its removal from the green belt. Please take this letter as a formal response to the Site Allocations Preferred Options consultation in respect of the site and Question 15, 17 and 19 in particular. The Site and Surroundings The site extends to approximately 1.02 hectares (2.5 acres). The land is shown on the plan attached at Appendix 1 (Ref. SF498873). The site is approximately one kilometre to the southwest of Biddulph town centre, which contains a variety of shops and facilities including a library and leisure centre. The land is bounded, to the north, by Orme Road, beyond which is Biddulph High School. To the south of the site is the Mill Hays Playing Fields. To the east and west of the site are primarily residential areas. To the south west of the site is a Knypersley Hall which is a Grade II* listed building. The site is a brownfield site which comprises of a former garden centre which was in operation from the late 1960s to 2003. The site is partly covered by greenhouses, other garden centre buildings (as shown on the enclosed photograph) and extensive areas of hard standing. The buildings on site have become dilapidated and have fallen into a state of disrepair following the closure of the Garden Centre in 2003. There are also a number of trees located along the site boundaries. The Principle of Development The Council’s adopted Core Strategy (March 2014) identifies a need for 6,000 dwellings in the District between 2006 and 2026. The Core Strategy commits to undertaking an early review to cover the period 2016 – 2031 to ensure that future provision will continue to meet objectively assessed needs. It also states that the Council will seek to enhance the role of Biddulph as a significant service centre and improve</p>	Comments noted. Refer to Question 19 site table BD069.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							<p>the local housing market by increasing the range of houses and allocating deliverable housing sites within the urban area and, on land adjacent to the urban area. Policy SS5B of the Core Strategy states that sites identified adjacent to the urban area of Biddulph shall be in locations which relate well to the urban area, can be assimilated into the landscape and would help secure infrastructure improvements. The supporting text to Policy SS5B states that due to the extent of green belt around the town, opportunities for peripheral expansion are limited. Therefore, it establishes that in order to meet the longer-term needs of the town, some development will be required in the green belt. It states that up to 2026 there will be a need for a minimum of 813 dwellings in Biddulph, of which land for around 200 dwellings would need to be identified in the green belt. Policy SS5B, therefore, states that the allocation of small urban extension sites will require a comprehensive review of the green belt boundary around Biddulph to accommodate the new dwellings through the preparation of the Site Allocations DPD and an early review of the Core Strategy. We understand that the Council has recently reviewed the position in relation to local housing need accounting for the latest Government household projections, new population and employment data. The Council's updated Housing Need report, from January 2016, concludes that the housing need for the District is between 250 to 440 homes per year between 2012 and 2031. Therefore the Council's Preferred Options document proposes an annual housing requirement of 320 homes per year up to 2031. In relation to Biddulph it identifies a requirement for 1196 new dwellings (855 net) during the plan period to 2031. Therefore, we support the general growth strategy for the District and the focus on the delivery of the majority of housing and employment in the main towns, including Biddulph. We also support the proposed allocation of the Knypersley Hall Garden Centre site, within the town boundary, for residential development to help contribute towards meeting the housing needs for Biddulph, for the following reasons. We understand that the Government attaches great importance to Green Belts and that the fundamental objective of Green Belt policy, as established in the National Planning Policy Framework (NPPF), is to prevent urban sprawl. Paragraph 79 establishes that the essential</p>	

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							<p>characteristics of Green Belts are their “openness” and “permanence”. However, by virtue of the site’s former use as a Garden Centre and the built structures on the site, including various garden centre buildings and green houses, it is considered that the brownfield site does not effectively serve or perform the five purposes or functions of the Green Belt established in paragraph 80 of the NPPF: “ to check the unrestricted sprawl of large built-up areas; to prevent neighbouring towns merging into one another; to assist in safeguarding the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist in urban regeneration, by encouraging the recycling of derelict and other urban land. ” Moreover, the edge of the site is well defined and visually contained by the existing trees and soft landscaping which are located along its boundaries. The trees and change in levels at the site boundary sever the site from the green belt to the south, in physical and visual terms. This results in the site becoming a pocket of brownfield land that is visually isolated from the main area of green belt to the south. Therefore, development of the garden centre site would result in no visual impact on the openness of the Green Belt. Furthermore, paragraph 89 of the NPPF states that the partial or complete redevelopment of brownfield land, such as the garden centre site, which would have no greater impact on the openness of the Green Belt and the purpose of including land within it would not be considered inappropriate development in the Green Belt. By virtue of the visual containment of the site it is considered that the redevelopment of this brownfield site for housing would not have any greater impact on the openness of the Green Belt or its function and would not constitute inappropriate development in the Green Belt. The land to the south of the site is not in agricultural use and is the Mill Hayes Playing Fields, which are used by Biddulph High School. It is considered that the northern boundary of the playing fields would provide a more appropriate, clear, defensible boundary for the green belt along a physical feature or use which is readily recognisable and likely to remain permanent in line with paragraph 85 of the NPPF. Moreover, we note that the Council’s Green Belt Assessment, undertaken by Amec Foster Wheeler, in November 2015, confirms that the Knypersley Hall Garden Centre site makes a ‘limited’</p>	

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							<p>contribution to the purposes and function of the green belt, is “ potentially suitable ” for removal from the green belt and comprises: “ Previously developed land with reasonably strong outer boundaries and which would create a logical extension to the current settlement envelope. ” We also note that the Council recognises, in their Options Site Assessment document (which accompanies the Preferred Options Site Allocations document), that in order for Biddulph to accommodate new development, the Green Belt boundary will need to be adjusted as there are insufficient sites in the existing settlement boundary to accommodate Biddulph’s housing requirement to 2031. In proposing the site as a preferred option for removal from the Green Belt and residential development the Council clearly considers that the site is in a sustainable location that is contiguous with the neighbouring residential area that surrounds the site to the north, east and west. The Council clearly agrees with our view that the site is in an accessible location with good levels of accessibility to range of facilities on foot and by public transport. This is confirmed by the Council’s site assessment which states that the site is well related to the residential area and is close to Biddulph High School and other facilities. Moreover, there are several bus stops in close proximity to the site. These are located on Park Lane and Mayfields Road (less than 300 metres walking distance from the site). The bus stops are served by a number of bus routes which provide access to the various shops, facilities and employment in Biddulph Town Centre and further afield to areas including Congleton, Newcastle and Hanley. As stated previously, the site is brownfield land and contains various garden centre buildings and greenhouses. Unfortunately, since the closure of the garden centre in 2003, these buildings have fallen into disrepair. The site has also been the target of both vandalism and arson. Therefore, it considered that the removal of the site from the Green Belt and its allocation for residential development would enable a viable use for the site and provide the opportunity for the existing dilapidated structures on the site to be replaced by a viable, secure and efficient use of the land for residential development, which would contribute towards meeting the identified housing needs for Biddulph. Given the sustainable location of the site and its accessibility to services and facilities in the</p>	

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							<p>town centre it is also anticipated that the site could make an appropriate contribution to meeting affordable housing needs in the district. The site is currently contained by security fencing due to the issues surrounding vandalism and arson. This gives the site an industrial appearance to dwellings surrounding the site. It is considered that the development of the site would also, therefore, provide the opportunity to improve the appearance and security of the site for residents living nearby. Technical Constraints It is understood that a suitable access to the site could be provided from Orme Road. Moreover, the development of the site would offer the potential opportunity for associated improvements to the 'un-adopted' Orme Road by a potential developer. Given the former use of the site as a garden centre is it not anticipated that there would be any issue or constraints to development in terms of ground conditions or contamination on the site. It is also understood that, given the former use of the site, and its location contiguous with the settlement boundary and nearby residential development, the site could be easily linked to mains services. The site is also fairly flat and there are no evident building constraints. According to the Environment Agency's Flood Risk Map the site is located entirely within Flood Zone 1 (i.e. at low risk of flooding with less than 1 in 1,000 annual probability of river or sea flooding). According to the National Planning Practice Guidance (NPPG) residential development is a "more vulnerable" use to flooding. The NPPG confirms that residential development would be considered an appropriate use in Flood Zone 1. The Council's Strategic Flood Risk Assessment (2015) also confirms that the site is in Flood Zone 1 at low risk of flooding. However, we note that there appears to be a minor error in the Options Site Assessment document, which accompanies the Preferred Options Site Allocations document, which suggests that the site is located within a flood zone. There are number of trees located within the site. However, the majority are located towards the site boundaries. Therefore, it is considered that the majority of the quality existing trees on the site could be effectively incorporated in to the design and layout of the site at a later stage. Moreover, the site is not subject to any designations relating to the conservation of ecology or biodiversity. Although the site is located adjacent to</p>	

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							<p>Knypersley Hall, a Grade II* Listed Building, as stated in the Council’s Site Assessment, the site is secluded and separated from Knypersely Hall by the adjacent lake and a significant number of trees and landscaping and falls outside the curtilage of the Listed Building. Therefore, it is considered that the development of the site for approximately 30 dwellings would not result in any significant impact on the designated heritage asset or its setting, subject to appropriate design. We understand that the Council is currently commissioning a heritage impact assessment, in conjunction with Heritage England, for all the sites selected as Preferred Options allocations and we look forward to reviewing the outcome of this in assessment in due course. We are not aware of any technical constraints that would prevent development of the site for housing. However, should the Council require any further technical information to consider or support the suitability of the site for residential redevelopment and removal from the Green Belt we would be willing to investigate this further and provide any information where possible. Capacity and Deliverability The site is approximately 1 hectare in area. It is assumed that it could be developed at a density of approximately 30 dwellings per hectare, given its rural location. Therefore, giving an indicative site capacity of 30 dwellings. This is reflected in the Preferred Options document which indicates that the Council agrees that the site is capable of delivering circa. 30 dwellings. The site is immediately available for residential development. Therefore, assuming that development of the site could commence within two years of the allocation of the site (in the Council’s Site Allocations Document which is expected to be formally adopted in 2017), following the grant of planning permission, we anticipate that the total number of dwellings would be constructed and delivered within a further year. Conclusions We trust that our responses above provide sufficient confirmation of our support for the allocation of the site in the Council’s Site Allocations Development Plan Document (DPD), its deliverability and its possible contribution to the Council’s housing delivery in the short-term, given the identified shortage of housing in the District.</p>	

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO869	Mr Jordan Kirkham				BD076 & BD076a	Object	I object to the proposed development of the site reference BD076 & BD076A on the following grounds: The traffic situation off Dorset Drive is currently a nightmare and take you 15mins to turn onto the bypass so with the additional development you would have no chance with the additional traffic. There is only one route into and out of Biddulph and the slightest drop of snow the bypass grinds to a halt and with additional retail traffic the whole road will become even more gridlocked making it even more impossible. Biddulph should be encouraging businesses to be developed within the town centre on the high street and not in out of town shopping complexes. The high street in Biddulph is completely dead therefore the council should be focusing its efforts on filling the empty shop units on the high street as its priority. The retail units outside of Sainsburys have been left empty since the date it was built as well as the surrounding units on the high street. The council should be trying to encourage footfall onto the high street and not outside retail developments.	Refer to Question 19 site table BD076 / BD076a.
PO5040	Mr G Boulton				BD108	Support	BD108 – I support this site	Comment noted.
PO280	Mrs Judith Cottrell				General	General comment	The town boundary should NOT be extended to incorporate ANY green belt in the Biddulph Area.	Refer to Question 17.
PO644	Ms Alison Conybeare				General	General comment	Please seek the local residents views. These are the most important.	Comments noted.
PO5200	Mr Peter Brittain				General	General comment	Thank you for your actions.	Comments noted.
PO5093 PO5094	Mr J Neate Mrs L Neate				General	General comment	All the advantages should be explored and approved.	Comments noted.
PO138	Mr Carl Webb				General	Object	I believe the proposed boundary is not good for the town and people of Biddulph as it will harm the quality of life here. Views will be lost, pressure on infrastructure will increase, congestion will increase and wild life will be lost.	Comments noted.
PO628	Mrs Amanda Reed				General	Object	Not enough consultation with Biddulph residents as a whole to agree a forward plan.	Comments noted.
PO958	Mr Alistair McLoughlin				General	Object	The SMDC Green Infrastructure Strategy does not exist. It has not been used to inform the production of the Site Allocations Development Plan Document and has consequently not established appropriate objectives and targets. It has consequently not mapped any integrated networks. This site needs protection from development and the Phase 1 Habitat information should be used to guide decision making.	A Draft Green Infrastructure Strategy will be published alongside the next draft of the Local Plan.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO4888	Mrs J Goodwin				General	Object	Biddulph is a beautiful little village lying in a valley surrounded by open countryside, wooded areas a little bit of heaven. Over the years I have seen quite a lot of changes and this beauty disappear. My family came to Biddulph from worn torn Manchester when I was 3 and half years old. We lived in Gillow Heath what a lovely place it was. Now I despair when I go to Gillow Heath how it has been ravaged by continuous housing estates on all those lovely open fields have disappeared houses built on the selectus site like little boxes that are not selling. Biddulph before all our beautiful countryside is lost forever to the generations to come.	Comments noted.
PO5219	Mr I Seabridge				General	Support	Essential to maintain character of the area with a definitive open area space – ‘land boundary’ Existing road construction/specification not adequate to accommodate road construction/specification not adequate to accommodate additional demand. Highways linkages and access road/egress poor. Any junction improvement at the Biddulph Road/Woodhouse Road priority junction will have an unfavourable impact on the character of the area.	Comments noted.
PO68	Mrs Marilyn Griffiths				Green Belt	Object	We do not think that the town boundaries should be extended into green belt land as the government clearly states that green belt land will be protected	Comments noted.
PO607	Mrs Ellen Faulkner				Green Belt	Object	Not happy with any housing in the green belt.	Refer to Question 17.
PO559	Mrs Angela Turner				Green Belt	Object	Minimal land should be moved into the boundary from the Green Belt. Where other towns have land not classed as Green Belt, this should be prioritised before changing the status of Green Belt across the district.	Refer to Question 17.
PO913	Mr Robert Stockley				Green Belt	Object	Our government has pledged in its manifesto that Green Belt areas are safe for the next five years. A key commitment in the Conservative manifesto is to prioritise Brownfield development. Key principles of Green Belt designation are to check the unrestricted sprawl of built up areas, to safeguard the countryside from encroachment, to preserve the setting and special character of the area, to carry out urban regeneration by encouraging the recycling of derelict and urban land. According to the Campaign for the Protection of Rural England “Green belts are a buffer between town and countryside. Within their boundaries, damaged and derelict land can be improved and nature conservation is encouraged. Green Belts help with food production, help us tackle the huge challenges of climate change, form part of a nationwide ecological network providing breathing	Refer to Question 17.

							places for people and for nature long into the future.	
PO923	Mrs Elaine Stockley				Green Belt	Object	<p>Green Belt: Our government has pledged in its manifesto that Green Belt areas are safe for the next five years. A key commitment in the Conservative manifesto is to prioritise Brownfield development. Key principles of Green Belt designation are to check the unrestricted sprawl of built up areas, to safeguard the countryside from encroachment, to preserve the setting and special character of the area, to carry out urban regeneration by encouraging the recycling of derelict and urban land. According to the Campaign for the Protection of Rural England “Green belts are a buffer between town and countryside. Within their boundaries, damaged and derelict land can be improved and nature conservation is encouraged. Green Belts help with food production, help us tackle the huge challenges of climate change, form part of a nationwide ecological network providing breathing places for people and for nature long into the future. Neighbourhood plans: Under the Government’s pledges, local people are to have more control over the planning of their neighbourhoods and the protection of Green Belt areas. The development of Neighbourhood Plans is there to give more power to local allowing them to play a much stronger role in shaping their area and that local people should have the final say on developments in their town. Our objections: According to the “Local Development Framework” document, sustainable development means “A better quality of life for everybody now and in the future”. Why do we need all these extra houses in Biddulph, when there are so many empty properties in the town. These extra houses will put great pressure on the infrastructure - Medical centres, the sewage system (already overloaded from current residents and the many visitors to Biddulph Grange Gardens, the Country Park, Biddulph Valley Way, Sports facilities, town centre etc..) and the quality of life for residents through increased congestion and pollution. We are astounded that you are considering a plan for houses and a school on the Green Belt land around Akesmore Lane. We have been told that this Green Belt land has been a last minute amendment to the plan, which suggests that you are attempting to deceive people and go against all the principles of Neighbourhood planning. What are the reasons for adding Akesmore Lane to the plan, Biddulph is known as the Garden</p>	Refer to Question 17.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							<p>town of Staffordshire and yet you are willing to deprive local people and visitors of the beautiful countryside on the boundary of the town, which many people enjoy along the Biddulph Valley Way. You are prepared to disturb the wonderful bird/animal life and nature, which is in abundance there. Has an independent ecological survey been undertaken for this site to show the projected effect of water courses, will life (ironically Akesmore Lane has breeding curlews and lapwings (curlews being the bird shown on the SMDC logo!!) If you check old Ordinance Survey maps, you will see that this area used to be called "Lapwing fields". You are prepared to locate housing and a school next to the White Cottage, a very rare example of a Staffordshire thatched dwelling and Grade 1 listed. We have been informed at a recent resident's meeting that Staffordshire Moorlands District Offices are ignoring objections and ideas from our local Biddulph councillors and riding rough-shod over local people's wishes, going against all the principles of Neighbourhood plans. We are also very concerned that objections raised to the plan have so far not been uploaded to the relevant website - is this a ruse on your part to discourage people from making their objections, as well as making the website extremely difficult to locate from the main SMDC site? We believe that the Green Belt area proposed is unsuitable for building purposes, due to the many drift mines and the level of flooding over the last few years. Has there been a technical survey of flooding control in this area? There are extensive Brownfield sites in Biddulph and empty properties, which could be used rather than encroaching onto the Green Belt areas of the town. For example, the Victoria Colliery site has had millions spent on it (presumably from residents' council tax/income tax), so that it could be developed, so surely this would be an ideal option, meeting the government's commitment to prioritise Brownfield development and the aims of Neighbourhood planning. Another Brownfield site might be the Childerplay area, as well as other sites in the town, such as Whally Street, Singer Street, Cross Street, the ground behind the Leisure Centre (for the school), Caravan storage area, behind Chell's Yard. If we are not vigilant, we will be allowing our generation to spoil these Green Belt areas for generations to come. It is a terrible plan, badly presented, unscrutinised and rushed through - please stop now</p>	

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							and think what you are doing. Above all, please listen to local people and adhere to the principles of Neighbourhood plans and the Government's commitment to Green Belt areas.	
PO4978	Mrs L Goodwin				Green Belt	Object	Essentially the town boundary should remain "as is", Green Belt was designed as such for a reason i.e. not to build upon.	Refer to Question 17.
PO151 PO158	Mrs Beverley Webb Mr Barrington Webb				Green Belt / Other Suggested Sites	Object	The town boundary should not be extended to include green belt for proposed housing until all Brownfield sites have been used for development. All Brownfield sites should be used before encroachment on to greenbelt e.g. From roundabout at the bottom of Thames Drive to Sainsburys taking in – Builders Merchants, Whalley Street Mill, Stringers Street Mill, Station Road Mill. The old dye works on Congleton Road, also City Bank Mill and Old Fireclay Pottery in Mow Lane.	Refer to Question 17 and Question 21 'Other Suggested Sites'.
PO1022 4	Mr R Hart				Other Suggested Sites	Object	Response form submitted [attached]: THE TOWN BOUNDARY SHOULD NOT BE EXTENDED INTO GREENBELT UNTIL..BROWNFIELD SITES NEED TO BE ALL USED..TO INCLUDE MILLS ON STATION ROAD, WHALLEY STREET, STRINGER STREET, CITY BANK MILL.	Refer to Question 21 'Other Suggested Sites'.
PO5085 PO5084	Mr J Neate Mrs L Neate				Town Centre	Support	Development the Biddulph Town Centre will attract more shoppers to the town centre to spend money – must be good.	Comment noted.
PO5239	Mrs P G Webb				Town Centre	Support	The town centre developments needed many more shops would be very welcomed.	Comment noted.
PO5135	Mr Gary Harding				West Side	General comment	Biddulph bypass benefits Biddulph building on the west side.	Comment noted.
PO5140	Mr Gary Harding				West Side	General comment	Access to the sites west of Biddulph can be from Marsh Green Road, Mow Lane, Station Road, New Pool Road,	Comment noted.
PO5151	Ms Karen Harding				West Side	General comment	Again these sites give more balance to Biddulph. As a general comment the west side of Biddulph is flatter and would be more inconspicuous. This could be planned better for Biddulph future with the trees and the shrubbery hiding the development. The closeness of the bypass gives a quick access route to work. There are also good and plenty of access routes onto this development site.	Comment noted.
PO5180 PO5188	Mr J. Denton Mrs A Denton				West Side	General comment	The by-pass to the west of Biddulph town.	Comment noted.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO5184 PO5192	Mr J. Denton Mrs A Denton				West Side West Side	General comment	Sympathetically developing the area to the west will provided space without intruding on existing properties. Pedestrian access to the town centre would be a big advantage as well as reduction in vehicle use and therefore lead to car parking reductions. Facilities such as the health centre, the local shops nearby may prove potential house purchases as well as Biddulph sector therefore building next to the west side of Biddulph will prove beneficial for the town regeneration.	Comment noted.
PO5126	Ms Lynne Evans				West Side	General comment	The bypass enables the development of the town centre and the surrounding west side.	Comment noted.
PO5130	Ms Lynne Evans				West Side	General comment	The old railway track has many more access routes that lend themselves to making developments here far easier, this area would avoid the problems experienced around the new uplands mill developments, with its squeezed together look and unattractive outcome,	Comment noted.
PO96	Mr Graham Vawdrey					Object	This development would cause an increase in traffic movements above and beyond the capacity of Halls Road and Station Road (already excessive) .Plus it would create a negative outlook for existing properties on the West side of Biddulph.	Comment noted.
PO4861	Mr Chris Millington				West Side	Object	Town Boundary should extend to a west and south of the town centre of Biddulph, North East already saturated and recent development at North East unable to attract buyers.	Comment noted.
PO9897	Mrs Janet Copeland				West Side	Object	Town boundary should be extended to the west and south so that access to the town is made easier. This would also encourage people to shop locally and to use the town's facilities.	Comment noted.
PO301	Mr Russell Picken				West Side	Support	It is pleasing that the town boundary has not been extended eastwards in the northern half of the town, which will help to preserve the independence and clear demarcation of the two separate communities of Biddulph and Biddulph Moor. Consideration should be given to the possibility of extending the town boundary on the west side of the town, through site BD116 and BD140, between the currently identified area of ADD03 and site BD063a, to allow for the possibility of further site allocations within this area.	Comment noted. The Council is investigating the area you have suggested.
PO5143	Ms Karen Harding				West Side	Support	If Biddulph needs to be developed it should be from the town centre out to the west. The bypass would also serve this area well.	Comment noted.
PO5116	L C Millington				West Side	Support	I support the latest town boundary in its changes/from last proposal) removing expansion to the east and adding areas to the west. The town is already lop sided enough.	Comment noted.

Question 15 – Do you have any comments on the proposed town boundary for Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
PO5344	Mr D Heath				West Side	Support	The west side of the bypass lends to the better development to support the town.	Comment noted.
PO5346	Mr I Barber				West Side	Support	Building to the west would also appear to be the most sensible. It would be the most attractive for the town, and would be less intrusive. Closer to the town centre amenities and be the access from the by-pass and several other parts.	Comment noted.
PO1020 7	Mrs Julia Hackney				West Side	Support	Proposed town boundary is positioning the new homes closer to a stronger road infrastructure ie the bypass. This could mean less traffic in residential area.	Comment noted.
PO243	Mr Robert Stockley					Object	Erosion of the Green belt will mean the end of the Biddulph Valley, and once that erosion starts there will be no stopping the development further into the green belt. The Biddulph Valley is a beautiful place to live, and if development continues up the green belt, we will no longer have a beautiful lovely place to live. The planners in Leek have had to be cajoled into even visiting Biddulph, and have picked the locations from two dimensional plans. The Victoria Colliery site was a complete surprise to the planners, and they weren't aware of the potential, or the cooperation with Newcastle BC who also want to build on the boundary. We need some joined up thinking here, not just sitting in offices miles away from the locations in question. We need to include the Victoria Colliery and Childerplay Road sites in the plan. This will give alternative locations for the schools, and provide an alternative catchment for the kids who live on the extremities of Biddulph.	Refer to Question 21 'Other Suggested Sites'.
PO5050	Ms Philippa Swindells					Object	i object	Comment noted.

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support /Object/ General Comment	Consultee Comments	Officer Response
							currently, forms a small part of the open space to the west of the town. Development here will have little visual impact on the western side of the valley due to the vast open space between it and Mow Cop/Congleton Edge. This location lends its self to a more satisfactory development than ones which may impact severely on existing developments. Also there is a positive opportunity to include a new school, which Biddulph desperately needs. I support the proposed town boundary for Biddulph.	
PO5281	Mrs S Purcell					Support	agree	Comment noted.

Question 16 – Do you have any comments on the proposed visual and public open spaces for Biddulph?

ID	Consultee Name	Company /Org	Agent Name	Open Space	Support / Object / General Comment	Consultee / Agent Comments	Officer Response
PO18	Mr Robert Moseley			ADD03	General comment	If you force through building on here including open space would break up the visual impact building in the greenbelt, keeping the wooded area at the Southern end and making a feature of the brook, similar to Dorset Drive.	Refer to Question 19, Table ADD03.
PO237	Mr Robert Stockley			ADD03	Object	ADD03 is encroaching into the Green Belt, and will start the erosion of our beautiful valley. Even though the Victoria Colliery site is within some green belt, Newcastle Borough Council have agreed to merge a site on the boundary, which would benefit both councils. Together with Childerplay Lane, this has to be the preferred option.	Refer to Question 19, Table ADD03.
PO534 PO592	Mr Bill Hockey Mrs Pamela Hockey			West of BVW	Support	The vision for Biddulph must include developing the Town Centre which a more balanced geographic development supports. The by-pass greatly benefits developing on the West side, and looks like it was planned to support the expected housing allocations for Biddulph. Extending to the West past the current Town Boundary into the area bounded by Akemoor Lane, Brown Lees and the old rail track gives the opportunity to build organic housing developments instead of ribbon developments (lines of properties) making them more attractive, be in keeping with the rural nature that Biddulph Residents want to retain and enables the types of houses that potential buyers are looking for to be built. Only building on smaller and / or hemmed-in sites risks a repeat of what has happened on the Selectus site where houses have been built that no one wants to buy. Doing this across Biddulph may achieve the target numbers on the fewest sites possible but it would change the nature of the town in a very bad way and certainly not bring the desperately needed wealth into the town. Sympathetically developing this area to the West and using the less contentious parts provides the opportunity to achieve the required numbers with desirable properties and that will be close to the least number of existing dwellings and where there is space to include natural screening around the development and open spaces and natural screening within. ACCESS: There are already several existing routes across the old rail track, off / from Marsh Green Lane Mow Lane Station Road Wharf Road New Pool Road With 'large' developments, the Developer has an obligation to financially contribute to infrastructure improvements via the Community Infrastructure Levy, previously known as Section 106. Build nature sensitive access routes: bridge, tunnel, etc. to the Town side, widen lower Akemoor Road to the West, etc. NATURE: Widen the natural screening of the old rail track by	Comments noted. This area is being considered by the Council.

Question 16 – Do you have any comments on the proposed visual and public open spaces for Biddulph?

ID	Consultee Name	Company /Org	Agent Name	Open Space	Support / Object / General Comment	Consultee / Agent Comments	Officer Response
						<p>including a band along to the west which: Separates this development from the developments BD016, BD055, BD071, BD071a, BD106, BD108 & BD156 between the rail line and the by-pass. Makes a wider nature corridor along there. Adds to the visual and public open space in Biddulph. ADVANTAGES: It is a low laying area so will be a less obtrusive development, especially with natural screening. Enables pedestrian access to the Town Centre reducing car use, demand for increased car parking and pollution from vehicles. Provides close proximity to the amenities, e.g. the Health Centre and the planned late night Pharmacy. Gives the opportunity to include dwellings for the older residents where they will have close proximity to the Town Centre amenities. Reduces the likelihood of residents travelling north to Congleton or south to Stoke for their shopping, Close to the proposed Care Home in BD055 for those with elderly relatives and friends. Closer to the Halls Road sports grounds than potential developments to the south east of the town, reducing traffic volumes. It is able to accommodate the proposed new Primary School and is close enough for access by foot, so against the School being located to the south: Eliminates the need to travel by car. Could design for safe parent drop-off / pick-up. Reduces by-pass volumes. Eliminates needing to cross the by-pass so safer for those on foot and reduces slowing of traffic. Therefore, greatly improving safety for our vulnerable young children. The area being best located to maximise the positive impact of all the above in support of Town Centre regeneration and Town Council income generation into the future and beyond. The above demonstrating why this is the best Sustainable Location in achieving the goals of the Staffordshire Moorlands Sustainability Vision.</p>	

Question 16 – Do you have any comments on the proposed visual and public open spaces for Biddulph?

ID	Consultee Name	Company /Org	Agent Name	Open Space	Support / Object / General Comment	Consultee / Agent Comments	Officer Response
PO753	Mrs Sharon Kirkham			ADD03	Object	<p>Greenbelt should stay as greenbelt and not destroy an area of outstanding natural beauty. Would destroy the habitat for wild animals. Houses on Haydon Park devalued considerably since Sainsbury was built and would further devalue them. Fields and railway track are an excellent selling point. Dorset Drive would become a rat-run again, as it was when the bypass was being built. The small closes/cul-de-sacs on Haydon Park would be used for parking by parents going to the school. Trying to get off Dorset Drive at the Sainsburys roundabout in a morning is a nightmare now, never mind with potentially another 900 – 1200 cars (300 houses 3-4 cars each property). There is really only one way out in and out of Biddulph – gets gridlocked very easily. The Biddulph bypass only needs around 1cm snow in the winter to completely grind to a halt. The thatched cottage on Akesmore Lane is a listed building and the oldest property in Biddulph. Akesmore Lane is not adequate for more cars / housing / school, and dangerous for children to walk along to school. The railway track would go from a beautiful, tranquil place to walk, cycle, ride horses, to, basically, an alleyway between housing estates. Biddulph does not need another 300 extra houses – plenty of properties to buy and rent of all prices at the local estate agents. Also houses on the Uplands site didn't all sell and were turned over to social housing, which people from other areas moved in to fill . Biddulph does not need another school if they do not build more houses. If needed either extend existing ones or build on the former Meadows school site – James Bateman school still use the playing field there. Local amenities already under extreme pressure – ie, GP surgeries unable to recruit more doctors (had to recruit nurse/matron), and very difficult to get an appointment even now. The areas on the previous plans from meeting in July 2015, ie Gillow Heath, Pennine Way/Woodhouse Lane, Conway Road, have all been thrown out and basically pasted onto Akesmore Lane.</p>	Refer to Question 19, Table ADD03.

Question 16 – Do you have any comments on the proposed visual and public open spaces for Biddulph?

PO146	Mr Carl Webb			All	Object	Object.	Comment noted.

Question 16 – Do you have any comments on the proposed visual and public open spaces for Biddulph?

ID	Consultee Name	Company /Org	Agent Name	Open Space	Support / Object / General Comment	Consultee / Agent Comments	Officer Response
PO554	Mrs Angela Turner			All		<p>The designation of Visual and Public Open Space is important in Biddulph. The SMDC Local Plan Policy C3 Sustainable Communities - Green Infrastructure [1] 8.7.16 and 8.7.17 references the production of a Green Infrastructure Strategy which “ will inform the production of the Site Allocations Development Plan Document and will establish appropriate objectives and targets.” This strategy does not exist either as a GIS set or other publically accessible form. In the light of this missing information, the evidence contained within the Phase 1 Habitat Survey must be acted upon, especially where sites are shown to have good links to the surrounding landscape. As SMDC are missing the evidence base that a Green Infrastructure Strategy would have provided (which would have strategically identified and linked such spaces) more work is need on this objective and time should be given for this to happen. Additional surveys should take place to better understand how these wildlife corridors link together and can eb enhanced and protected. All wildlife corridors identified in the Phase 1 Habitat surveys should be given a level of protection and it should be considered that Visual Open Space could be one such designation. These are mostly linear in function and thereby do not significantly impact on the surrounding wider land use. Along the West of the bypass (sites BD71 & 71a) the Phase 1 habitat survey identified a river margin which is well connected to the countryside and deserves protection. It is bounded by a number of mature trees which should similarly be protected as part of the landscape characer of this area. This would, in reality, impact on only a tiny proportion of this site which, in places is steep sided and would have minimal impact on the wider land use. The survey at BD062 identified the sites importantce due to its ability to connect the river and linear habitat of the Biddulph Valley Way. The presence of a wet meadow in this location demonstrates the sites current natural 'job' of retaining and slowing down surface run-off from the Biddulph Valley Way and the Long Valley estate before it runs off into the Biddulph Brook (the field increases the lag time into the river and helps to reduce flooding incidents). The survey at BD76 & 76a identified watercourses and a biodiverse north and eastern edge. The survey at BD106 and 156 identified species rich hedegrows. As the Green Infrastructure Strategy does not exist, this information should be used to start the process of mapping our wildlife corridors and protecting them where they have been</p>	<p>It is agreed that the designation of all types of open space is important.</p> <p>The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy.</p> <p>Land designated as Visual Open Space in the existing Local Plan (which is an old designation and not supported in current Government policy) has been assessed to determine whether it qualifies as Local Green Space (an NPPF compliant designation) and the Council will then include sites in the next consultation version of the plan for comments.</p> <p>A Draft version of the Council’s Green Infrastructure Strategy will be published alongside the Preferred Options Local Plan and comments will be invited.</p>

Question 16 – Do you have any comments on the proposed visual and public open spaces for Biddulph?

						<p>identified. Designation of parts of these sites (such as the river corridors) as Visual Open Space is a good starting point and shows that SMDC is giving equal weighting to environmental information in it's purpose of ensuring 'Sustainable Development.' There is already a precedent set for this on the Pennine Way estate and off Halls Road. Green Infrastructure has been shown to have a positive benefit in economic, social and environmental terms (DEFRA Guidance, RTP1). The RTP1 Briefing Paper on Green Infrastructure states: The NPPF requires local planning authorities to use the term green infrastructure. The NPPF definition of green infrastructure (p.52), states that it is "A network of multi-functional green space, urban and rural, which is capable of delivering a wide range of environmental and quality of life benefits for local communities." In the NPPF, the onus is on local planning authorities to plan positively for strategic networks of green infrastructure (Para. 114), and take account of the benefits of green infrastructure in reducing the risks posed by climate change (Para. 99). The wider benefits of green infrastructure beyond its contribution to ecological networks and climate change adaptation are also referenced. There is no evidence that SMDC are 'planning positively' for strategic networks of Green Infrastructure in Biddulph. The Green Infrastructure approach is vital for areas such as Biddulph where the landscape surrounding and running through the town forms one of its' greatest assets. Indeed, the SMDC Core Strategy section C3 Green Infrastructure 8.7.16 recognises this benefit: " Staffordshire Moorlands contains a wide range of existing and potential green infrastructure assets, which can benefit from a strategic approach to ensure adequate protection is given to key features, to identify areas where new linkages and assets need to be created and to guide and manage development which may impact on such areas. The Core Strategy recognises the cross cutting function that green infrastructure has, and the benefits of integrating green infrastructure with social and economic priorities, which will help contribute to the development of sustainable communities." I can see no evidence of this approach so far within the SMDC Local Plan site allocations process, contradicting the SMDC Core Strategy. Under Section 40 of the Natural Environment and Rural Communities Act 2006, SMDC has a duty to have regard, in the exercise of their functions, to the purpose of conserving biodiversity. With the evidence base of the Green Infrastructure Strategy being non-existent SMDC have to understand and positively act on the findings of the Phase</p>

						1 Habitat Survey and realise the significance of the findings in local and district terms. [1] SMDC Core Strategy 8.7.13 Green Infrastructure Policy C3. Pg.137 8.7.16 and 8.7.17	
PO2568	Mrs Maggie Taylor	Sport England		All	Object	I note some of the open space designations are formal sports facilities (which is supported) but it is very important that all sports sites are captured otherwise those excluded will have lesser protection. I note that the Football Ground off Orchard Court/Grace Street for example is not designated whereas the cricket club site just to the north is - why? I also note that the playing fields associated with the secondary school are not designated – should they not be? It will be important to clarify what is designated and why (or why not) and to ensure all playing fields are clearly protected (as it is a defined function/use of open space), whether it is in Council ownership or not (Birchhall Playing Fields appears to be included?) so there is a consistent level of protect for all open space, whatever its use. This principle applies across ALL THE PROPOSED PLANS.	The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy. Any inconsistencies will be investigated as part of this updated work.
PO2862	James Chadwick	Staffordshire County Council		All	Object	In relation to the areas of Open Space identified throughout the site options document it is noted that all school playing fields have been categorised as open space, some in their entirety and others appear to only include certain parts. There is no definition in the plan as to what 'Open Space' constitutes or whether it needs to be accessible to the general public. As the Plan progresses it is unclear what policy restrictions may be imposed to such land. We therefore reserve our position on 'Open Space' at school fields and suggest that further discussion is required on whether the identification of school playing fields as 'Open Space' is required given the protection afforded to playing fields already through National Planning legislation and school premises legislation?	<ul style="list-style-type: none"> Not all the open spaces marked on the map are accessible to the public and should be indicated as 'open space' rather than 'public open space'. See response to Sport England.
PO7309	Ms Joan Walley			All	Support	I support the inclusion of designation of open spaces for formal and informal recreation, and the importance of designation of footpaths and the green corridor that is the former railway line.	Comments noted.
PO10219	Mr Stuart Nicholls			All	Support	It is important that all public open spaces and visual open spaces are retained for all Biddulph residents.	Comments noted.
PO1288	Justin Milward	Woodland Trust		All sites	Support	Support provision of Open Space in the Local Plan. (Further detail in the attached comments).	Comments noted.
PO5371 PO6287 PO6489	Mr S Leese Mr and Mrs I Condliffe Mr Gilbert Bradley			BD004	Support	i support	This site is not included in the Preferred Option Sites and Boundaries Consultation Document due to uncertainty about its availability and an access issue which will be difficult to overcome.

Question 16 – Do you have any comments on the proposed visual and public open spaces for Biddulph?

ID	Consultee Name	Company /Org	Agent Name	Open Space	Support / Object / General Comment	Consultee / Agent Comments	Officer Response
PO576	Miss Louise Richardson			BD062	Object	<p>The SMDC Local Plan Phase 1 Habitat Survey concluded "... the site is not recommended for potential development ..." It is the ONLY site surveyed where this was concluded, showing that other sites are more suitable. The site contains UK and Staffordshire Biodiversity Action Plan Priority Habitats and species and has the potential to be a Species Rich Farmland site. It is very well connected to other biodiverse habitats (evidenced in the Phase 1 Habitat survey). In the absence of a SMDC Green Infrastructure Strategy, the findings of this survey must be heeded. Development would contradict Section 40 of the Natural Environment and Rural Communities Act 2006, and Policy C3, NE1 and section 8.7.17 of the SMDC LDF Core Strategy. This site is important because of its mix of habitats, particular species found and its vital wildlife corridor linkages (where the Biddulph Brook meets the Biddulph Valley Way). The SMDC Green Infrastructure Strategy, which was supposed to guide decision making about the environment and its linkages across the Local Plan area does not exist. In the absence of such strategic data, the Phase 1 Habitat Survey findings must be prioritised and used to guide decision making. " The Green Infrastructure Strategy will inform the production of the Site Allocations Development Plan Document and will establish appropriate objectives and targets." SMDC LDF Core Strategy section C3 Green Infrastructure 8.7.17 Its inclusion contradicts Section 40 of the Natural Environment and Rural Communities Act 2006 which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity. Its inclusion contradicts SMDC LDF Core Strategy Policy C3 Sustainable Communities where existing and potential sites of nature conservation value are linked, biodiversity is increased and the urban fringe is enhanced. Its inclusion contradicts SMDC LDF Core Strategy Policy NE1 Natural Environments and the protection of land suitable for inclusion in the Biodiversity Opportunity Mapping Species-Rich farmland zone. The land has the potential to be designated as a Species Rich Farmland site. The site contains UK and Staffordshire Biodiversity Action Plan Priority Habitats and species (evidenced in the Habitat survey). Bats and badgers are active on site (local knowledge) and English Bluebells (indicating ancient hedgerows) and marsh Orchids uncommon to Staffordshire have been found on site (Phase 1 Habitat Survey findings). The site has potential to be designated as a Local Wildlife Site once more detailed survey</p>	Refer to Question 19 Table BD062.

Question 16 – Do you have any comments on the proposed visual and public open spaces for Biddulph?

ID	Consultee Name	Company /Org	Agent Name	Open Space	Support / Object / General Comment	Consultee / Agent Comments	Officer Response
						information is gathered and time should be allowed for this to take place before it could be considered for release from the greenbelt or as a potential housing site. The site displays some semi-natural characteristics and is within the Species Rich Farmland Ecosystem Action Plan Area , where priority habitats and species include Hedgerows, as well as several priority bird and mammal species present on site. The primary objectives within this zone are the maintenance, restoration and expansion of species-rich grassland and to increase the connectivity of semi-natural habitats. The Phase 1 Habitat Survey stated that the site is “ ... very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site.” This site is a vital wildlife corridor, linking linear habitats from two sides of the valley via the Biddulph Brook and Biddulph Valley Way. It is bounded by two ancient hedgerows to the west and east, and contains a swathe of broadleaved woodland with possible veteran trees. The local community have had unfettered access to this site since the estate was built in 1971. For over 40 years, there has been total open access and the land has been used by local residents. This land should be designated as Visual Open Space , protecting the ecology and allowing the wet meadow to do its natural job of reducing flooding in the watercourse by slowing down surface runoff. Three well-used Public Rights of Way cross this land. Provision of community enjoyment of countryside and open spaces is supported by the Commons Act 2006.	
PO959	Mr Alistair McLoughlin			BD062	Object	Object.	Comment noted.
PO964	Mr Christopher Goldstraw			BD062	Object	Do not built on site BD062. New houses should only be built where there is minimal environmental impact. Houses should not be built in such proximity works to a sewage works. Additionally, do not build on sites BD068 and BD087.	Comments noted. Refer to Question 19 Tables BD062, BD068 and BD087.
PO4866	Mr Allan Knapper			BD062	Object	Consider that this site should remain included as a visual open space within Biddulph.	Comments noted. Refer to Question 19 Tables BD062, BD068 and BD087.

PO5160	Mr N McQuade			General comment	General comment	Thanks for listening to residents comments: Please keep as much Green Belt as possible very important.	Comment noted.
PO5211	Mrs L McQuade			General comment	Support	i support this	Comment noted.
PO5202	Miss F McQuade			General comment	Support	i support	Comment noted.
PO9972	Ms Ashley Kirkham			New site (West Biddulph)	Support	Sympathetically developing the west could achieve the desired number of houses close to the least number of existing properties where natural screening can be used around the development and open spaces within.	Comment noted. This area is being considered by the Council.
PO1341	Ms K Dewey	Staffordshire Wildlife Trust		Newpool Meadows	Object	Newpool Meadows should be marked as Public Open Space.	A review of Public Open Space in the Staffordshire Moorlands is underway and this site will be assessed as part of it.

Question 16 – Do you have any comments on the proposed visual and public open spaces for Biddulph?

ID	Consultee Name	Company /Org	Agent Name	Open Space	Support / Object / General Comment	Consultee / Agent Comments	Officer Response
PO342	Miss Gemma Docksey			Route 55 / ADD03	General comment	Re. ADD03 Akesmore Lane Route 55 runs through the whole of Biddulph. This area is used by many people and is part of the reason people from outside of the area come to enjoy our beautiful garden town. To build 300 potential homes and a school adjacent to Route 55 would deter people and reduce the money we receive from tourism. I understand that trees and hedges could be planted as a screen however you only need to look at other areas of the Route which back onto houses to see that fly tipping and litter is already an issue, this causes hazards to wildlife and detracts from the picturesque area we live in and spend our recreational time. I believe that Route 55 needs to be preserved and protected from over development, I see this being a big issue when it comes to revenue the town receives from our tourism.	Refer to Question 19, Table ADD03.
PO70	Mrs Marilyn Griffiths			Surrounding ADD03	Object	We think that the existing open space should remain and not be reduced by removal of green belt land	Refer to Question 19, Table ADD03.
PO302 PO533	Mr Russell Picken Mrs C Picken				General comment	If area ADD03 is to be used, maybe a strip of visual open space could be included between the development and the "Biddulph Valley Way". This would make the new housing development more appealing visually, both from within the development itself and when viewed from the "Biddulph Valley Way". Likewise, if areas within BD140 (to the south of ADD03) and BD116 were to be used, maybe a strip of visual open space could be included between the development and the "Biddulph Valley Way". This would make the new housing development more appealing visually, both from within the development itself and when viewed from the "Biddulph Valley Way".	Comments noted. A buffer zone between development and the Biddulph Valley way will be considered as part of the site layout if these areas are selected for development.
PO547	Mr Bill Hockey				Support	Developments need to be on sites that can include the provision for open spaces and not be so close together that potential residents are not put off from moving / buying there.	Comment noted.
PO848	Mrs Andrea Millington				General comment	I do not agree with some of the brownfield sites within the town centre being classed as visual open space when the majority of site allocations are using greenbelt rather than brownfield. Part of the aesthetic attraction of Biddulph is the open space surrounding the town boundary due to the mass of greenbelt surrounding the town, it is important to retain as much of this as possible as we are known as the garden town of Staffordshire and not just because of the Biddulph Grange.	Comments noted. None of the 'Visual Open Space' (VOS) sites shown on the map are brownfield – they are green spaces providing breaks between development.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO19	Mr Robert Moseley				ADD03	Object	The Old railway line has acted as a boundary for many years protecting the Greenbelt, once breached the gloves are off for building all the way up to the summit of the valley. No further encroachment up the valley sides should take place. We all have a duty to protect the green space for us and our children, a breach of this is a violation of that trust. Instead of building on this land, trees should be planted and made into a public space for all. This is not your land it belongs to us all. Stop the building into greenbelt and making a mockery of this legislation. It states in your introduction in "exceptional circumstance" should the greenbelt be built on this is not that, this is poor planning.	<ul style="list-style-type: none"> In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site ADD03 for release from the Green Belt. If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt. The land is privately owned so is unlikely to become a public space.
PO33	Mr E Shaw				ADD03	Object	(Summary) Infrastructure The proposed development site does not have the infrastructure to support the amount of proposed housing by means of the road links as Akeshire Lane is a narrow country lane and resembles a modern day cart track due to the amount of surface water that runs off the hills from Mow Cop eventually in to three natural streams. The roads leading in to Station Road, Halls Road, Mow Lane etc cannot cope with a further amount of vehicles. A further 744 vehicles (assuming each proposed property has two vehicles) plus school traffic using the access roads of Station Road etc would not cope with the vast increase of traffic. Akeshire Lane does not have any other access other than from Wedgwood Lane which leads from the narrow Mow Lane. Akeshire Lane is a road leading to various farms which have a regular daily use of large tractors and HGV's for deliveries etc accessing the farms and therefore further cars etc using the local lanes themselves pose a danger for the new proposed residents. The residents of the any new proposed development may well work in the City of Stoke on Trent or need to access the A500 and M6 therefore they would travel South along Akeshire Lane, Towerhill Road etc and on through various nearby villages such as Newchapel, Harrisehead and therefore putting further pressure on very narrow busy side roads. Services There is a lack of services with the area of Akeshire Lane, there is no mains drainage or gas, with the water supply pressure being very low at my father's property at Moody Street Farm. The mains electric has to come from Knypersley. Wildlife The area has been	<ul style="list-style-type: none"> National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers (including gas and electricity suppliers) is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the County Council to assess the impact of proposed development on school capacity, what additional capacity is needed and how this can be delivered. The Highway Authority has no difficulties with the principle of development in this location. Improvements needed to the road network as a result of development would need to be identified through a Transport Assessment. The site is not within floodplain and the Environment Agency has not commented as such. If there is an existing issue with surface water

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
							<p>greenbelt for many years with very little development in the proposed ADD03 development area, and therefore wildlife has been able to flourish, with mature hedgerows and oak trees all the for birds, ducks and bats, natural habitat etc together with newts and water wild life with the three natural brooks and water courses. If a new development of housing and schools was permitted almost all the natural environment will be destroyed. History Located within the proposed site ADD03 is Biddulph's oldest house a large thatched cottage which is Listed standing in its own grounds - approximately 7 acres. The cottage is occupied and should be preserved for future generations. The area has a long standing mining history and therefore past mineworkings will have to be dealt with and further excavations may create further land stability issues for existing properties and residents. The area was effected by the Foot & Mouth disease in the 1960's and therefore concerns can be raised if past graves of the cattle were excavated. Farming The proposed development will have a very negative impact on the location with many local farmers struggling to make any form of a living from the land either as a dairy, beef or sheep farming. Most farmers and landowners have had to diversify significantly to rotate the land with various animals in order to make a living. Concerned about loss of view and impact on property prices.</p>	<p>drainage then new development would need to address this. An on site SUDs (Sustainable Urban Drainage) system would be required on this site if it were to be developed.</p> <ul style="list-style-type: none"> • Ecus Ltd conducted Phase 1 ecological survey (incorporating Local Wildlife Site Assessment) in 2016. It concluded that the habitats on ADD03 were considered to be of nature conservation value at the site level only and are not listed as an important habitat in the Staffordshire SBI guidelines. Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site significantly supported any notable protected species. [Some predevelopment species surveys recommended]. • If the site is developed hedgerows would be retained within the scheme layout wherever possible. • Heritage Impact of development on the site has been assessed in the Council's Heritage Impact Study (August 2016), the results for this site are: "There is one Grade II Listed Building within the site. The setting of the asset contributes to the overall significance of it and would need special regard for its preservation. Development would be highly likely to cause adverse effects to its setting. Therefore, any development should be restricted to the southern part of the site only and mitigation should include the use of vegetation screening to reduce adverse effects to its setting. Whilst the HEA states that zone BBHECZ 18 cannot absorb significant change, development to the south of the site would be a small change to the zone as a whole, and with appropriate development, this could be accommodated on the site (Historic Environment Character Assessment 2010). Site is suitable for development in heritage terms, subject to suitable masterplanning; if development is restricted to the southern part of the site only and with appropriate screening." The Council must balance this evidence against all the other evidence relating to this site

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
								<p>and reach a decision on whether or not to include it as a development site in the Local Plan.</p> <ul style="list-style-type: none"> • The Council is aware of mining issues which affect a number of green field sites around Biddulph and investigative work will take place in these areas prior to the commencement of any development. • The land has an agricultural classification of Grade 4 which means that it is poor quality. • It is not considered that development in this location would impact on the enjoyment of the route and long ranging views (e.g. to Mow Cop) and the wider countryside would remain. • Property values are not considered material in planning law.
PO39	Mrs Emma Hallen				ADD03	Object	<p>Destruction of green belt land for housing would have a devastating effect on wildlife and habitats. The views of fields and hedgerows would be lost. The bridal path is widely used by a variety of people including families like ours which would not want to use this if it became a path through a housing estate. The consultation evening has been poorly advertised and not widely known by residents and people who use the bridal path regularly. This has left little time to properly prepare before the deadline for a decision by the council.</p>	<ul style="list-style-type: none"> • See response to PO33 in relation to ecology. • See response to PO33 in relation to loss of views. • The BVW is a very significant attribute in the town and part of a national Sustrans cycle route. Therefore, any development in the area would be built around it. The route is generally buffered by trees and hedgerows. All new development bordering the route would be required to provide pedestrian and cycle links on to it. The Council has produced a Green Infrastructure Strategy and the BVW is identified within this document. It is not considered that development in this location would impact on the enjoyment of the route and long ranging views (e.g. to Mow Cop) and the wider countryside would remain. • The consultation was widely publicised and included a flyer being sent to all households and businesses in the District through Royal Mail. High levels of responses have been received by the Council from Biddulph residents which suggests that a significant number of residents knew about the consultation. • The consultation period for planning documents at statutory stages is 6 weeks. This consultation was held over a longer time period.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO69	Mrs Marilyn Griffiths				ADD03	Object	We think that the existing open space should remain and not be reduced by removal of green belt land as stated by the government	Comments noted.
PO444 PO839	Mr Gerard Hearson Mrs Ruth Hearson				ADD03	Object	Building on green belt should only happen when there are absolutely no alternatives and all other options have been considered and discounted. In this case, there is a credible alternative which will ensure that the beautiful green fields of ADD03 are not lost forever. Consider the land to the west of the old Victoria Colliery site. Although technically green belt, this is a reclaimed brown field site and is significantly better suited to the large building project being proposed. It is also unlikely to upset and antagonise a significant number of Biddulph residents, unlike the proposal to build on ADD03 and other similar sites which are nearer to the town centre. It is unclear why this site has not been formally proposed by SMDC officials? For the same reasons, also consider BD117 and between Bemersley Road and the A527 Tunstall Road as sensible alternatives to ADD03.	<ul style="list-style-type: none"> • See response to PO19 in relation to Green Belt Review and any exceptional circumstances. • Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph (particularly Yarn Mill and Minster Mill) would be appropriate for residential development. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping brownfield sites. • Sites at Victoria Colliery and Childerplay Road are within the Green Belt like ADD03. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy. • BD117 is already being considered for housing.
PO298	Mr Peter Benn				ADD03	Object	Biddulph is now a commuter town with little remaining industry. No mills, mines, railways etc. are left. There are plenty of vacant lots in the town that should be developed before green belt land is built on. For example the abandoned mill and chapel on Station Road. Do you, as councillors want to be remembered for destroying open spaces with soulless estates; or restoring some character to the town?	<ul style="list-style-type: none"> • See response to PO444 in relation to use of Brownfield land inclu mills.
PO345	Miss Gemma Docksey				ADD03	Object	Re ADD03 Akesmore Lane I understand that the town needs to provide more homes under our current Government however taking a huge chunk out of the Green belt seems a drastic measure. This area is home to a wide range of wild life. We have owls, bats, and birds including Jays, badgers and foxes, just to name a few! At the moment this area is used for grazing livestock, an apt use of Green belt land. Could we consider reducing the acreage being reclaimed for housing on Akesmore Lane? We need to protect our wildlife and reduce the destruction of their natural habitats.	<ul style="list-style-type: none"> • See response to PO19 in relation to Green Belt Review and any exceptional circumstances • See response to PO33 in relation to ecology • See response to PO33 in relation to loss of agricultural land

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO690	Mr Ian Turner				ADD03	Object	The amendment of the status of this location has been done by stealth and without the consent of those living in the vicinity. Having paid a premium to live in a rural area, this erosion of the green belt alters the environment we are living in significantly.	<ul style="list-style-type: none"> The area was suggested as a potential development area during the last consultation on Site Options. It has been put forward in this consultation giving anyone the opportunity to comment. There are 2 more consultation stages and a public examination before the Local Plan is finalized. See response to PO33 in relation to property prices See response to PO33 in relation to visual impact
PO768	Mrs Sharon Kirkham				ADD03	Object	Greenbelt should stay as it is, not destroy a natural habitat for our wildlife, and also an area of beauty. There are plenty of brownfield sites to build on.	<ul style="list-style-type: none"> See response to PO33 in relation to ecology See response to PO33 in relation to visual impact See response to PO444 in relation to brownfield sites (including mills)
PO451	Mrs Kirsty Murphy				ADD03	Object	This area provides a haven for wild life with badgers, foxes and rabbits. It runs next to the tracks which provide beautiful countryside walks and is used by cyclists, walkers and runners etc. It is well known feature of Biddulph and to build in this area which have a drastic effect on the wildlife and usage of the track. I understand the area has been previously considered by yourselves and deemed unsuitable for a number of reasons e.g drainage and previous mining so why is it being considered again? The is already a high volume of water which runs of this land onto Haydon Park and in particular into Mason drive with problems to number 22 which has permanent sandbags to the side of their drive. The area clearly provides natural drainage which it struggles to cope with and building would cause a host of problems with drainage, without the natural drainage where is the water expected to go? There is no suitable access to this land which would provide adequate access for the houses and in particular the volume of traffic a new school would create. More suitable sites have been identified by council members who sat on the panel at the meeting at Biddulph Town hall which would have far less impact on the surrounding area. I can't see any good arguments for amending the area from green belt.	<ul style="list-style-type: none"> See response to PO33 in relation to ecology See response to PO33 & PO39 in relation to impact on BVW / visual impact See response to PO33 in relation to flooding / drainage See response to PO33 in relation to mining See response to PO33 in relation to highways See response to PO19 in relation to loss of Green Belt including any exceptional circumstances
PO1358	Ms Rosamund Worrall	Heritage England			ADD03	Object	Map 4.5 Biddulph - ADD03 - green belt release for housing with a possible school - It is not clear how the impact of the site allocation on the Grade II listed building Whitehouse Cottage and its setting has been considered. Further information on this is required.	<ul style="list-style-type: none"> See response to PO33 in relation to heritage impact.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO1048	Mr John Hayley				ADD03	Object	<p>I strongly oppose this proposed development. I am opposed to any green belt development taking place to the west of the Biddulph Valley Way and bounded by Tower Hill Road and Akemoor Lane. This represents unacceptable creeping urban sprawl and urbanisation of open countryside. In my view it is fundamentally wrong to place high density modern housing in the vicinity of Biddulph's last remaining 15th century cruck-frame thatched cottage. Without special care this development would destroy the landscape setting for one of Biddulph's most important historic buildings. [For more details on this please see my objections to site ADD04]. This site is not a suitable location for the proposed new primary school. I am opposed to any development that requires Wharf Road to be extended to the west of The Biddulph Valley Way. Such a proposal is likely to require very expensive reconstruction of the existing railway bridge and any such construction would cause major disruption to runners, ramblers, cyclists, horse riders, and others using the Biddulph Valley Way. Extending this road west of the railway line would make this area of open countryside highly vulnerable to urban encroachment in the future. The proposed new town boundary for this site [ADD03] has no physical boundaries to the south west prevent unchecked incursion into surrounding Green Belt countryside making this location vulnerable to future encroachment. There is a danger that this town boundary change will lead to further encroachment and urban sprawl towards Tower Hill Road in years to come. The proposed boundary does not meet NPPF criteria stating that a Green Belt change must have long term permanence capable of enduring for 30-50 years. These house should not be built on green field land. Town centre sites together with carefully selected brown field and reclaimed land sites elsewhere could be developed to meet this need.</p>	<ul style="list-style-type: none"> • See response to PO19 in relation to loss of Green Belt including any exceptional circumstances • See response to PO33 & PO39 in relation to impact on BVW / visual impact • See response to PO33 in relation to heritage impact • Landscape impact of development on the site has been assessed in the Council's Landscape Impact Study (August 2016), the results for this site are: "Large site on the western edge of Biddulph, comprising agricultural land and two farmsteads (Moodystreet Farm and Hollylane) and sheds, enclosed by Akemoor Lane to the west. The site is located beyond the dismantled railway, which currently forms a strong, vegetated settlement edge and limit to development. The site is inter-visible with the Green Belt to the west. Development within the site would encroach on the surrounding countryside, and would adversely affect the existing settlement edge. Development of the site could potentially compromise the surrounding sensitive countryside, as there would be no clear limit to development beyond the site. Site is of high landscape sensitivity." The Council must balance this evidence against all the other evidence relating to this site and reach a decision on whether or not to include it as a development site in the Local Plan. • See response to PO444 in relation to brownfield sites (including mills) • See response to PO444 in relation to use of land at Childerplay Road and Victoria Colliery

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO928 PO924	Mr Robert Stockley Mrs Elaine Stockley				ADD03	Object	<p>Green Belt: Our government has pledged in its manifesto that Green Belt areas are safe for the next five years. A key commitment in the Conservative manifesto is to prioritise Brownfield development. Key principles of Green Belt designation are to check the unrestricted sprawl of built up areas, to safeguard the countryside from encroachment, to preserve the setting and special character of the area, to carry out urban regeneration by encouraging the recycling of derelict and urban land. According to the Campaign for the Protection of Rural England “Green belts are a buffer between town and countryside. Within their boundaries, damaged and derelict land can be improved and nature conservation is encouraged. Green Belts help with food production, help us tackle the huge challenges of climate change, form part of a nationwide ecological network providing breathing places for people and for nature long into the future. Erosion of the Green belt will mean the end of the Biddulph Valley, and once that erosion starts there will be no stopping the development further into the green belt. The Biddulph Valley is a beautiful place to live, and if development continues up the green belt, we will no longer have a beautiful lovely place to live. ADD03 will create accident blackspots from the increased traffic on Wedgewood Lane, Halls Road and Akemoor Lane, not to mention the other end of Akemoor Lane at the junction with Tower Hill Road. The Victoria Colliery also encroaches into the green belt I believe, but this location has already been identified for development, and the residents of Brown Lees are expecting it, so why not build there, and join up with Newcastle BC to build a joint site. Neighbourhood plans: Under the Government’s pledges, local people are to have more control over the planning of their neighbourhoods and the protection of Green Belt areas. The development of Neighbourhood Plans is there to give more power to local allowing them to play a much stronger role in shaping their area and that local people should have the final say on developments in their town. Our objections: According to the “Local Development Framework” document, sustainable development means “A better quality of life for everybody now and in the future”. Why do we need all these extra houses in Biddulph, when there are so many empty properties in the town. These extra houses will put great pressure on the infrastructure - Medical centres, the sewerage system (already overloaded from current residents and the many visitors to Biddulph Grange Gardens, the Country Park, Biddulph Valley Way, Sports facilities, town centre etc..) and the quality of life for residents through increased congestion and pollution. We are astounded that you are considering a plan for houses and a school on the Green Belt land around Akemoor Lane. We have been told that this Green Belt land has been a last minute amendment to the plan, which suggests that you are attempting</p>	<ul style="list-style-type: none"> • See response to PO19 in relation to loss of Green Belt including any exceptional circumstances • See response to PO33 & PO39 in relation to impact on BVW / visual impact • See response to PO33 in relation to highways • See response to PO33 in relation to ecology • See response to PO444 in relation to Victoria Colliery and Childerplay Lane. • The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district’s full housing needs, including affordable housing, whilst taking into account migration and demographic change. • Need for additional housing stems from a number of factors, for example household formation, in-migration, linkages with future workforce, and other factors. The NPPF makes clear that housing projections are the starting point for assessing housing needs; however these additional factors should also be taken in to account in Council SHMAs. The Council’s own housing need assessments are set out in its evidence base on the website. Note that this already takes into consideration empty properties in the Moorlands. • See response to PO33 in relation to infrastructure • United Utilities has a statutory duty to provide capacity for new development so this is not a valid reason for development not to come forward in Biddulph. • Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations nor is the possibility of noise from the school or parking issues. • The Local Plan production process, by its very nature, involves several stages of consultation at

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
							<p>to deceive people and go against all the principles of Neighbourhood planning. What are the reasons for adding Akesmore Lane to the plan? Biddulph is known as the Garden town of Staffordshire and yet you are willing to deprive local people and visitors of the beautiful countryside on the boundary of the town, which many people enjoy along the Biddulph Valley Way. You are prepared to disturb the wonderful bird/animal life and nature, which is in abundance there. Has an independent ecological survey been undertaken for this site to show the projected effect of water courses, will life (ironically Akesmore Lane has breeding curlews and lapwings (curlews being the bird shown on the SMDC logo!!) If you check old Ordinance Survey maps, you will see that this area used to be called “Lapwing fields”. You are prepared to locate housing and a school next to the White Cottage, a very rare example of a Staffordshire thatched dwelling and Grade 1 listed. We have been informed at a recent resident’s meeting that Staffordshire Moorlands District Offices are ignoring objections and ideas from our local Biddulph councillors and riding rough-shod over local people’s wishes, going against all the principles of Neighbourhood plans. We are also very concerned that objections raised to the plan have so far not been uploaded to the relevant website - is this a ruse on your part to discourage people from making their objections, as well as making the website extremely difficult to locate from the main SMDC site? We believe that the Green Belt area proposed is unsuitable for building purposes, due to the many drift mines and the level of flooding over the last few years. Has there been a technical survey of flooding control in this area? There are extensive Brownfield sites in Biddulph and empty properties, which could be used rather than encroaching onto the Green Belt areas of the town. For example, the Victoria Colliery site has had millions spent on it (presumably from residents’ council tax/income tax), so that it could be developed, so surely this would be an ideal option, meeting the government’s commitment to prioritise Brownfield development and the aims of Neighbourhood planning. Another Brownfield site might be the Childerplay area, as well as other sites in the town, such as Whalley Street, Stringer Street, Cross Street, the ground behind the Leisure Centre (for the school), Caravan storage area, behind Chell’s Yard. If we are not vigilant, we will be allowing our generation to spoil these Green Belt areas for generations to come. It is a terrible plan, badly presented, unscrutinised and rushed through - please stop now and think what you are doing. Above all, please listen to local people and adhere to the principles of Neighbourhood plans and the Government’s commitment to Green Belt areas. ADD03 is encroaching into the Green Belt, and will start the erosion of our beautiful valley. Even though the Victoria Colliery site is within</p>	<p>which point anyone can suggest further sites for inclusion in the plan and the Council decides on whether they are appropriate. This site was suggested as part of the site options consultation.</p> <ul style="list-style-type: none"> • See response to PO33 in relation to heritage impact • The comments made online on the Council’s consultation portal will all be uploaded for public viewing at the same time. • There was a link to the consultation portal from the SMDC website homepage throughout the consultation • See response to PO33 in relation to mining • See response to PO33 in relation to drainage / flooding • See response to PO444 in relation to use of brownfield sites – including mills. All sites listed have been investigated.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
							some green belt, Newcastle Borough Council have agreed to merge a site on the boundary, which would benefit both councils. Together with Childerplay Lane, this has to be the preferred option. Any erosion of the green belt will have a lasting effect, and Biddulph Valley will gradually cease to exist.	
PO922	Mrs Dianne Simcock				ADD03	Object	The land is riddled with mines and unsafe. I understand this has been pointed out to the planners but they don't care. What are the financial repercussions for the council tax payer in future law suits for negligence in allowing housing to be knowingly built on an unsafe area?	<ul style="list-style-type: none"> • See response to PO33 in relation to mining.
PO1202	Mr M Jones				ADD03	Object	Use of green belt site when other Brown Field site are more appropriate detracting on the setting of a grade 2 listed building impact on the wildlife, traffic shall be impact on the existing roads.	<ul style="list-style-type: none"> • See response to PO19 in relation to loss of Green Belt including any exceptional circumstances • See response to PO444 in relation to use of brownfield sites – including mills. • See response to PO33 in relation to heritage impact • See response to PO33 in relation to highways • See response to PO33 in relation to ecology
PO1203	Mrs P Jones				ADD03	Object	The use of green belt land when there is more brownfield sites in the area more suitable. Site of a listed building. Impact on the wildlife. Old open cast mining. Akesmore lane entrance is already very very dangerous! With many near misses. Akesmore Lane floods and the land behind Smokies way to floods	<ul style="list-style-type: none"> • See response to PO19 in relation to loss of Green Belt including any exceptional circumstances • See response to PO444 in relation to use of brownfield sites – including mills. • See response to PO33 in relation to heritage impact • See response to PO33 in relation to ecology • See response to PO33 in relation to mining • See response to PO33 in relation to flooding / drainage • See response to PO33 in relation to highways
PO1207	Mr J Hopkins				ADD03	Object	I feel it is unnecessary to change the green belt boundaries when decent site like just outside the Biddulph Town boundary and yet it would be ideal for development. The site assessment form for the land East of Akesmore Lane who deemed unsuitable for development in July 2015 the strategic housing land availability assessment and yet the proposed developments for housing and 1 st school as here why is this?	<ul style="list-style-type: none"> • See response to PO19 in relation to loss of Green Belt including any exceptional circumstances • See response to PO444 in relation to Victoria Colliery and Childerplay Lane. • The relevant SHLAA record, BD140, does not support development of this site giving the reasons of access and landscape character. Since the record was written, it has been established that access would not be an issue which would prevent development of the site. Recent evidence has shown that development of the site would have a high impact on landscape sensitivity. The Council must balance this evidence against all the other evidence relating to this site and reach a decision on whether or not to include it as a development site in the Local Plan.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO1208	Mrs P Young				ADD03	Object	Access into Akesmore Lane already like a rat run! Noise pollution/more litter kids roaming up and down the lane. We don't want affordable homes lowering the tone of our neighbourhood!! The school should be built where the old Meadows School was already set up ready with fields. The lane will not take more traffic.	<ul style="list-style-type: none"> • See response to PO33 in relation to highways • See response to PO928 in relation to noise/pollution/residential amenity • Staffordshire County Council are the Education Authority and they look at the need for new schools in an area as a result of development. They consider that a new first school would be needed in Biddulph to accommodate the level of new housing development currently proposed. The location of this school would not be decided until the Council has firmed up its plans as to where the new housing development will take place in the town. (There are 2 options put forward as potential locations for a new school in the Preferred Option Sites and Boundaries Consultation booklet).
PO1211	Mr J Leek				ADD03	Object	Do not take our green belt there are other sites (brown) once it's gone its gone. So many people enjoy the view as they walk along this part of Biddulph Valley Way. This walk can be enjoyed by so many people but only minutes from the town centre not so many towns can boast this amenity so why take it away.	<ul style="list-style-type: none"> • See response to PO19 in relation to loss of Green Belt including any exceptional circumstances • See response to PO444 in relation to use of brownfield sites – including mills. • See response to PO33 & PO39 in relation to impact on BVW / visual impact

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO4650	Mrs E Heathcote				ADD03	Object	Why is this plot now being considered? In June 2015 at site assessments it appears as plot BD140, as for its suitability, the conclusion drawn was 'not considered suitable for development due to potential access difficulties and the rural character of this area! I wish to object the proposed housing site ADD03, which is sited on land adjacent to Akeshire Lane and the Biddulph Valley Way. I object on the following grounds: The proposed site is a intrusion into Green Belt. The lane is very old. It is clearly marked on the Mainwaring Estate Map of 1597 – indeed probably much older, typical of such early origins it twists and turns and in places deep and narrow. It snakes alongside one our historically significant houses – the thatched 'White House'. How can you justify developing in this landscape which is set in history of the town. It would affect its character and setting within the landscape. As is usual with lanes of this antiquity the hedges are of great importance and I'm certain that they support a variety of flora and fauna. Surely development will lead to damage of these ancient hedgerows. The road today is used as a short cut to Mow Cop. With Such extensive development this rat run is going to see a huge increase in traffic. The quality of the road is exceedingly poor: ditches either side in part huge potholes. In order for it to serve a development and a school it would require investment along the length of the road from Tower Hill junction to junction at Wedgewood Lane. In Biddulph Valley Way is much loved and well used resource within the community development would detract from the outlook, peace and tranquillity which are doubtlessly enjoyed by users. The BVW acts as a physical barrier to development. To go beyond it would leave development up the valley side. This would impact on the views of the town from many areas.	<ul style="list-style-type: none"> • See response to PO19 in relation to loss of Green Belt including any exceptional circumstances • See response to PO1207 in relation to the site being listed as unsuitable in the SHLAA • See response to PO33 in relation to highways • See response to PO33 in relation to heritage impact • See response to PO1048 in relation to landscape impact • See response to PO33 in relation to ecology • If the site is developed hedgerows would be retained within the scheme layout wherever possible. • See response to PO33 & PO39 in relation to impact on BVW / visual impact
PO4588	Mr & Mrs K Shone				ADD03	Object	Why are we building on Green Belt land? This amended Green Belt land should not be built until all the available Brown Belt land has been utilised.	<ul style="list-style-type: none"> • See response to PO19 in relation to loss of Green Belt including any exceptional circumstances • See response to PO444 in relation to use of brownfield sites – including mills
PO4593	Mrs & Miss J & A Carter/Vickers				ADD03	Object	Farms & scenery Thatcher's Cottage (white) (listed building) Sites of historic mines Wildlife Footpaths Do not change Green to Brown Why not use the old Victoria Colliery Keep my horses on Akeshire Lane not happy (Amy)	<ul style="list-style-type: none"> • See response to PO33 & PO39 in relation to impact on BVW / visual impact • See response to PO33 in relation to heritage impact • See response to PO33 in relation to mining • See response to PO33 in relation to ecology • Public footpaths can be maintained or re-directed. This issue would be considered at the planning application stage. • See response to PO444 in relation to Victoria Colliery and Childerplay Lane.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO4594	Mr M Boden				ADD03	Object	Keep Akemore Lane as Green Belt save all the wildlife. Lane is too narrow to put footpaths and winding bends there are mine shafts in area and slag heaps. We have a listed building in the area. Need land for livestock to graze in the area. A lot of running water from the natural streams, there is no sewers as I cannot go on using septic tanks. Don't want any houses build on the lane causing excessive traffic. I struggle to get out of my drive as it is.	<ul style="list-style-type: none"> • See response to PO33 in relation to ecology • See response to PO33 in relation to highways • See response to PO33 in relation to mining • See response to PO33 in relation to heritage impact • See response to PO33 in relation to agricultural land value • See response to PO33 in relation to drainage / flooding • See response to PO928 in relation to sewerage infrastructure
PO4597	Mr S Wood				ADD03	Object	Akesmore Lane is a very narrow for the amount of cars that will be going up and down. We need farm land we get a lot of flooding outside our house now, without building new houses. We have an ancient listed building in Akemore Lane, the thatched white house. We have mine shafts in the building area.	<ul style="list-style-type: none"> • See response to PO33 in relation to highways • See response to PO33 in relation to agricultural land value • See response to PO33 in relation to drainage / flooding • See response to PO33 in relation to heritage impact • See response to PO33 in relation to mining
PO4598	Mr J Hodgkinson				ADD03	Object	Why must we build on designated Green Belt land which is rich in both beauty and diverse nature and has also a historic building when there is a site crying out to be developed i.e.: the old Victoria Colliery Site.	<ul style="list-style-type: none"> • See response to PO33 & PO39 in relation to impact on BVW / visual impact • See response to PO33 in relation to ecology • See response to PO33 in relation to heritage impact • See response to PO444 in relation to Victoria Colliery and Childerplay Lane.
PO6264	Mr and Mrs Siddorn				ADD03	Object	Object to Green Belt amendment to include this site. The site has very significant highway challenges and much uncertainty over land ownership let alone the fact that it provides for a very significant projection (a large finger) eastwards into open countryside and away from the town which is especially damaging in Green Belt terms. Disagree with the results of the Green Belt Review and consider that an alternative view should be reached in relation to this site as follows: This site breaches the greenway which otherwise provides a strong and very defensible long term Green Belt boundary. It projects a finger of development into the Green Belt which set a precedent for further infill to the South of this site in the future let alone being an unacceptable encroachment into the green Belt in its own right. In addition to this the ground rises to the site and lies adjacent to the greenway making the site highly visible. It is considered that this site makes a significant contribution to the Green Belt and its loss should be avoided. The council are reminded of its own findings in respect of AD003 in the 2015 SHLAA where on the site assessment form the council stated: Site AD003 • A new access would need to be created probably across BVW as Akemoor Lane likely to be too narrow to serve a large number of dwellings. • In floodplain of	<ul style="list-style-type: none"> • See response to PO33 in relation to highways • The Council is currently investigating land ownership issues in this area. • See response to PO19 in relation to loss of Green Belt including any exceptional circumstances • See response to PO1207 in relation to the site being listed as unsuitable in the SHLAA

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO305	Mr Russell Picken				ADD03	Support	If any further extension of the green belt is required, then it should occur on the western side of the town, in site BD116 and the area of site BD140, adjacent to the currently preferred sites of BD071 and BD071a, possibly extending southwards from area ADD03.	Comments noted.
PO287	Mr David Spruce				ADD03	Support	I do not believe that Biddulph needs this many new properties and I do not support the use of green belt, but I understand that we have to take control through the neighbourhood plan. Filling out to the West (to Akemoor lane etc) gives a better distribution for the town which is close to the bypass and centre of the town.	Comments noted.
PO536	Mrs C Picken				ADD03	Support	It is extremely important to both the communities of Biddulph and Biddulph Moor that the green belt is not extended eastwards in the northern half of the town, which would then result in urban sprawl; one of the main things that the green belt was designed to protect towns and villages from in semi-rural locations like these. (Further development here would have resulted in the town appearing similar to a foreign holiday resort, where the properties extend from the valley floor all the way up the side of the valley to the horizon.) It is therefore welcomed, with great appreciation, that the sites BD067a, BD067b, BD067c, BD110 and BD134 have been removed from preferred options of allocation of sites. If any further extension of the green belt is required, then it should occur on the western side of the town, in site BD116 and the area of site BD140, adjacent to the currently preferred sites of BD071 and BD071a, possibly extending southwards from area ADD03. Further development to the West gives the opportunity to achieve a better balance to the town.	Comments noted.
PO718	Mr Philip Beech				ADD03	Support	I wholly support the amendment to the green belt on this occasion, as the use of ADD03 makes absolute sense. It is closer to the town centre than many of the other proposed or constrained green belt sites, thus making it an obvious choice. Utilisation of ADD03 will not seriously erode the natural separation between Biddulph and the adjoining small urban areas of say Biddulph Moor or Mow Cop. It will help to redress the imbalance in the way in which Biddulph has been developed in the past. Too much development has taken place in the East and North of the town previously and this is an opportunity to address this.	Comments noted.
PO652 PO659	Mrs Siobhan Perry Mr Andrew Perry				ADD03	Support	I believe filling the development of Biddulph to the West would be a far better balance for the town.	Comments noted.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD03)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO788	Mrs Jayne Beech				ADD03	Support	I support the use of ADD03 for development. There are few other sites within Biddulph which offer an opportunity to develop without causing major upset to existing residential developments. Access to this area is straightforward, due to the close proximity to the town centre and by-pass. Although the use of green belt land isn't a preferred approach, I appreciate the need to develop, so support the inclusion of ADD03 in the changes.	Comments noted.
PO777	Mrs Jayne Beech				ADD03	Support	I support the revision of the Green Belt proposal relating to ADD03. This site lends its self to development, as it is within close proximity of the town centre - public transport - doctors - dentists etc. Also, the impact of developing ADD03 will have a minor visual impact to the western side of the Biddulph valley due to its location. Developing ADD03 will help to address some of the imbalance that has occurred over the years, where most developments took place to the East side of the town. This has created a shortage in School place allocation amongst other problems.	Comments noted.
PO10204	Mr Stan Charlesworth				ADD03	Support	(Summary) Support for development in this location for the following reasons: new dwellings would be close to the town centre and services and facilities make Biddulph more compact support for a new Primary School within the site.	Comments noted.
PO9974	Ms Ashley Kirkham				ADD03	Support	Building on Green Belt on the west of Biddulph would make the town more geographically balanced.	Comments noted.
PO9967	Ms Claire Kirkham				ADD03	Support	Using Green Belt to the west would achieve a better balance in the town and be closer to amenities.	Comments noted.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO4283	Mr & Mrs Wilkes				ADD04	Object	<p>In response to this public consultation I wish to object to the proposed development of 150-250 houses and a possible school near to Harlech Drive, Knypersley (Site ADD04) for reasons which are explained below. Settlement: Biddulph / Knypersley Response Question Number: 17 (Green Belt Amendment) - Site Reference: ADD04 (Off Harlech Drive, Knypersley) - Nature of response: Objection As a local resident I call on SMDC to remove area ADD04 (Harlech Drive, Knypersley) from the 2012-2031 Local Plan Preferred Option Sites. This community is opposed to Green Belt development and we believe that Staffordshire Moorlands District Council needs to consider the following: National Planning Policy Framework (NPPF) - 1. NPPF (paragraph 83) states that “once established, Green Belt should only be altered in exceptional circumstances”. The council’s plans do not justify “exceptional circumstances” that would require them to build on unspoiled green field land to meet their current housing targets. Town centre sites together with carefully selected reclaimed land sites elsewhere could be developed to meet this need. 2. NPPF (paragraph 111) states that brown field sites are to be prioritised over the development of green field sites. However, the preferred option plans as recommended at Stage 2 consultation offer up green field sites in preference to other brown field site developments already proposed. Sites which have been suggested to the town council as part of our local neighbourhood plan include: the “mill triangle” and other town centre sites; reclaimed land adjacent to Childerplay Lane; and reclaimed land to the west of Victoria Business Park near to Brown Lees. 3. NPPF (paragraphs 156-157) states that infrastructure must come first, yet outline plans to provide new infrastructure are not being prepared in advance. Currently there are no plans for historic conservation of the Knypersley Hall estate. There is no green infrastructure plan and no plans to develop sport and recreation to the south east of Knypersley. 4. NPPF (paragraphs 83 & 85). The proposed new Green Belt boundaries for site ADD04 are illogical because they follow arbitrary field boundaries. There are no physical boundaries to prevent unchecked incursion into surrounding countryside making this location extremely vulnerable to future encroachment. The proposed boundary does not meet NPPF criteria stating that a Green Belt change must have long term permanence capable of enduring for 30-50 years. SMDC Green Belt Review Study 5. Development of 150-250 houses on this site potentially is the first step in a wider plan to develop a new school and up to 1,070 houses within Green Belt Review Area N17. This represents creeping erosion of Biddulph’s open countryside. Urbanisation on this scale within the Green Belt is unacceptable and would have a large negative impact on</p>	<ul style="list-style-type: none"> • In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study concludes that the overall impact of this area on Green Belt purposes is moderate. It states that: “This is a significant area of land which cannot be readily subdivided because of an absence of clear internal boundaries. It is well contained physically and visually by Mill Hayes Road and whilst making a contribution to Green Belt purposes in respect of separation and setting, comprehensive masterplanning (which would retain existing open space and sports pitches) could yield a development which would help to reinforce wider Green belt function. It recommends considering site ADD04 for release from the Green Belt. If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt. • Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph (particularly Yarn Mill and Minster Mill) would be appropriate for residential development. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph’s housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping brownfield sites. • Sites at Victoria Colliery and Childerplay Road are within the Green Belt like ADD04. The Green Belt Review has considered the impact on the Green Belt the release of these sites for

PO4254	Mr H Gregory						<p>existing countryside in Biddulph South, an area of outstanding natural beauty. 6. The Green Belt Review recommends that (other than BD117, BD069 & BD131B) there should be no release of Green Belt in area N17 within the plan period 2012-2031. It then states that, if desired, the council could reconsider this area for release in a future Local Plan. Thus, the inclusion of ADD04 as a Preferred Site at this time is inappropriate and is contrary to the review study's recommendations. Impact on highway traffic and road safety 7. Site access would be via a narrow private road leading to a farm track. The entrance road may need to be widened making this site impossible or difficult to develop without complex land acquisition. 8. The area around Harlech Drive and Conway Road has three schools in the immediate vicinity already and is affected by high traffic flow at peak times. 180-280 new houses (ADD04 & BD069 combined) would cause an estimated increase in traffic flow of up to 550 extra cars causing significant extra traffic problems. 9. This site is not a suitable location for the proposed new school. Knypersley already has a pre-school nursery and a primary school nearby. Entrance to the site is via a quiet residential district mainly occupied by elderly people. Quality of life will be harmed and there could be significant disruption to the existing community. Effect on the landscape 10. Open countryside, public footpaths, historic parkland in the vicinity of Knypersley Hall (Grade II* listed), the fishing pool, the cricket pavilion, and fields adjacent to Knypersley Cricket Ground are all an integral part of the landscape of Knypersley. (The cricket ground itself was donated to the community by Robert Heath). Open countryside forms an integral part of the surrounding natural landscape and, if developed upon, connection between the Knypersley community and the natural environment would be lost forever. 11. Development of this site would cause significant harm to Knypersley's sense of place and to its unique semi-rural village identity centred upon Newpool Meadows, the cricket ground and pavilion, and its magnificent landscape setting. This new housing would significantly harm the local landscape and potentially could damage the separate "village community" identity that Knypersley enjoys at present. NPPF policy states that merging of neighbouring communities is to be prevented. 12. Footpath 11, which runs from Harlech Drive to Mill Hayes Lane, provides access to beautiful open countryside for the town as a whole. This path provides important public access to open space overlooking the cricket ground and to a large area of open countryside beyond. This footpath interconnects Biddulph with Greenway Bank Country Park to the south making this a strategically important area requiring special Green Belt protection. It is not an area of derelict land requiring urban infill. The proposed development would cause significant</p>	<p>development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy.</p> <ul style="list-style-type: none"> National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the County Council to assess the impact of proposed development on school capacity, what additional capacity is needed and how this can be delivered. Heritage Impact of development on the site has been assessed in the Council's Heritage Impact Study (August 2016), the results for this site are: 'There is one Grade II* and one Grade II Listed Building within close proximity to the site. The site contributes greatly to the setting of the Grade II* as a remnant of the parkland, which in turn, contributes to the overall significance of the asset. Development on the site would highly likely cause substantial adverse effects to the setting of the Grade II* Listed Building which would impact upon its overall significance. The HEA states that development is not deemed appropriate in the HLC zone BBHECZ 7 (Historic Environment Character Assessment 2010). Site could not be developed without substantial heritage impacts'. It should be noted that this study forms part of a wider

Biddulph's footpaths should pass through open countryside, not through an urban landscape. Historic conservation of the natural environment 13. For many years the Green Belt around Biddulph has made a significant contribution towards protecting its major historic assets including Knypersley Hall and nearby historic parkland. The council's 2010 Historic Environment Character Assessment Report identifies numerous heritage assets near to the hall which connect the de Knypersley, Bowyer, Bateman, and Heath families to this area and which form an important part of understanding both the history of Biddulph Grange Gardens and of Biddulph as a whole. The report recommends that the remnants of its historic parkland should be conserved and states that " development is not deemed to be appropriate within this zone ". The proposed ADD04 development is incompatible with this objective and therefore makes the site completely unsuitable for high density housing. 14. Further south lies an area of ancient valley farmland, the last remaining such farmland in the Biddulph Valley. The conservation of this area is also recognised as important and this farmland, together with its historic field boundaries, should be preserved for the long term future benefit of our town's heritage. 15. Nearby Knypersley Fishing Pool is already designated as a protected nature conservation site. Existing hedgerows within the proposed ADD04 site boundary host a large array of wildlife that would perish as a result of this development. Bats are known to live nearby. Therefore this site, if developed for housing, could have a serious detrimental impact on nature conservation efforts in this locality.	<p>evidence base to support SMDC's Local Plan. Therefore the Council will weigh this conclusion against other evidence when determining the overall suitability of the site for development.</p> <ul style="list-style-type: none"> • The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the Preferred Options plan. • The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy. • From the Highway Authority's point of view, a Transport Assessment would be required at the planning application stage. Creation of an access directly onto the A527 is preferred though a limited amount of development could be accommodated using an access onto Harlech Drive. No concerns were raised by the Highway Authority about any localised traffic problems as a result of development here. • Staffordshire County Council are the Education Authority and they look at the need for new schools in an area as a result of development. They consider that a new first school would be needed in Biddulph to accommodate the level of new housing development currently proposed. The location of this school would not be decided until the Council has firmed up its plans as to where the new housing development will take place in the town. (There are 2 options put forward as potential locations for a new school in the Preferred Option Sites and Boundaries Consultation booklet). • Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

PO4177	Rowlands-Brough Mrs S Whalley							<p>of Pollution Acts) are not material planning considerations nor is the possibility of noise from the school or parking issues.</p> <ul style="list-style-type: none"> • Landscape impact of development on the site has been assessed in the Council's Landscape Impact Study (August 2016), the results for this site are: 'Site comprises land to the west and south of Knypersley Hall, including a large, open field which slopes down from the hall in the north of the site, and more undulating land in the south of the site containing a pond and scattered trees. The site is separated from the settlement edge by Knypersley Hall and agricultural land to the north. Development of the site could adversely affect the existing settlement form, particularly in the southern extent of the site. The northern section of the site has high visual prominence, particularly when viewed from Tunstall Road. Site is of high landscape sensitivity. Please note that this study forms part of a wider evidence base to support SMDC's Local Plan. Therefore the Council will weigh this conclusion against other evidence when determining the overall suitability of the site for development. • Public footpaths can be maintained or re-directed. This issue would be considered at the planning application stage. • Ecus Ltd conducted Phase 1 ecological survey (incorporating Local Wildlife Site Assessment) in 2016. It concluded that the habitats on ADD04 were considered to be of nature conservation value at the site level only and are not listed as an important habitat in the Staffordshire SBI guidelines. Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site significantly supported any notable protected species. [Some predevelopment species surveys recommended].

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO4233 PO4760 PO4763 PO4840 PO4842	Mr & Mrs M & P Smith Mr & Mrs K & C Alcock Mrs Harper							
PO4554	Kyle Mellor				ADD04	Object It is disgraceful that this and other green belt sites are being put forward as preferred sites. These proposals will ruin the beautiful countryside and dilute our community. Please put the wishes of electorate ahead of the developers that will go onto to develop out greenbelt.		<ul style="list-style-type: none"> In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study concludes that the overall impact of this area on Green Belt purposes is moderate. It states that: "This is a significant area of land which cannot be readily subdivided because of an absence of clear internal boundaries. It is well contained physically and visually by Mill Hayes Road and whilst making a contribution to Green Belt purposes in respect of separation and setting, comprehensive masterplanning (which would retain existing open space and sports pitches) could yield a development which would help to reinforce wider Green belt function. It recommends considering site ADD04 for release from the Green Belt. If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt.
PO4486	Mrs C Carter				ADD04	Object We moved to Orme Road 4 and half years ago the quiet rural location in our retirement the majority of residents in the surrounding area are elderly residents and we think it's outrageous to put us in this situation. The traffic congestion and noise will spoil the surrounding areas massively.		<ul style="list-style-type: none"> From the Highway Authority's point of view, a Transport Assessment would be required at the planning application stage. Creation of an access directly onto the A527 is preferred though a limited amount of development could be accommodated using an access onto Harlech Drive. No concerns were raised by the Highway Authority about any localised traffic problems as a result of development here. Problems arising from the construction period of any works, e.g. noise, dust, construction

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
								vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations nor is the possibility of noise from the school or parking issues.
PO4485	Mrs K Nicosia				ADD04	Object	Risk of flooding the playing area of the cricket ground as the pool sits higher than the cricket area. Inappropriate in this area – seek area with less impact i.e.: Childerplay Road + surrounding areas at the Southern Side. RE: Schools if Kingsfield expanded + pupils (parents) living close to this school it would free up possibly places out at Knypersley + Oxhay. Would there need to be another school built.	<ul style="list-style-type: none"> The site is not within floodplain and the Environment Agency has not commented as such. If there is an existing issue with surface water drainage then new development would need to address this. An on site SUDs (Sustainable Urban Drainage) system would be required on this site if it were to be developed. See response to PO4283 (at the beginning of this table) regarding other brownfield sites as an alternative. See response to PO4283 (at the beginning of this table) regarding schools.
PO4481	Mr P Sherratt				ADD04	Object	I object to this proposed development 100% as losing this beautiful area would be criminal! I very often use the footpath mentioned as a way to unwind after work, it is lovely to sit and look over the lovely pools and cricket pitch and enjoy all the nature that surrounds the area. Including rabbit, hare and owls in the dusk imagine losing all this nature and more just for a few bricks and mortar? Is this really fair?	<ul style="list-style-type: none"> If this area is selected for development, the scheme would be designed to take into account its setting and heritage impact as well as any infrastructure and / or site constraints. A planning application would be required before any development could take place and this would be open for anyone to comment on. See response to PO4283 (at the beginning of this table) regarding footpaths and ecology.
PO4480	Mrs T Rowley				ADD04	Object	I object to this proposal development 100%, myself and partner are both nature lovers and we use the foot path on a regular basis, as we go and walk the country to wind down. I don't think it's fair we should lose all of this nature animals habitat, natural relaxation for a few bricks and mortar, not to mention the added noise the building traffic from building and residents, as park lane is extremely busy anyway and to add to this isn't something good. I live where I live for the tranquillity it offers within a very short distance, and I certainly don't want to lose what we have.	<ul style="list-style-type: none"> See response to PO4283 (at the beginning of this table) regarding footpaths and ecology. See response to PO4486 regarding highways and noise.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO4478	Mr J Bartle				ADD04	Object	The land travelling north from Knypersley pool reservoir/country park travelling through the proposed development is a very important wildlife corridor passing through the cricket club and onto the Biddulph Valley way used by badgers, pole cats and many other mammals and invertebrate's. First priority for new developments should be on brown field sites such as the old colliery where the impact upon the natural environment would be least left. There are several schools to the South West and the town. Badgers regularly forage in these proposed fields and should this important feeding foraging area be lost then they would be forced to forage on agricultural land surrounding the country park reducing there range and habitat.	<ul style="list-style-type: none"> See response to PO4283 (at the beginning of this table) regarding ecology and use of brownfield sites including Victoria Colliery.
PO4479	Mrs D Gregory				ADD04	Object	I think it would be more viable to extend Knypersley First School as they have a field attached that hardly seems to be used, plus it already has the boundary fence they erected.	<ul style="list-style-type: none"> See response to PO4283 (at the top of this table) regarding school provision.
PO4477	Mr A Smith				ADD04	Object	We have streams of traffic already coming past our bungalow, if this site went ahead it would chaos to even get out of our drive, it would increase pollution and noise. Why don't you build more houses in Leek where there is more space and area for development?	<ul style="list-style-type: none"> See response to PO4486 regarding highways and noise. A higher proportion of the District's housing needs are proposed for Leek than Biddulph though, like Biddulph, there are constraints around Leek.
PO4473	Mr S Corcoran				ADD04	Object	There isn't sufficient infrastructure in place to withstand these extra houses/schools. Conway Road especially already struggles to cope with the school traffic. I don't see how this can be easily remedied. What this area really needs is some sort of car park for the collection of school children, more play areas and sports fields as Biddulph high school has seen fit to fence of playing fields and possibly more recreation facilities.	<ul style="list-style-type: none"> See response to PO4283 (at the top of this table) regarding infrastructure provision and recreation. See response to PO4486 regarding highways.
PO4472	Mr I Whiston				ADD04	Object	Impact on the wildlife (barn and tawny owls) at the hall. Area cannot deal with the disruption Schools traffic is already absurd sort this problem before adding to it. Heavy trucks will damage the roads. Schools are not needed in this area. Only an idiot would allow the area to be built on.	<ul style="list-style-type: none"> See response to PO4283 (at the beginning of this table) regarding ecology and schools. See response to PO4486 regarding highways.
PO4468	Mr M Matthews				ADD04	Object	What a ridiculous site to propose building. On right up alongside homes that have been there for years, that people have worked hard for. To build on this open countryside will not only impact the environment impact on wildlife (Kestrels, buzzards, bats, badgers, to name but a few) it will impact on existing house values. As we moved here recently, specifically for the village community and surrounding countryside, we know that this was reflected in the house price. This proposal can only cause house value depreciation, ridiculous when there are other sites to build on which will have a much less impact!	<ul style="list-style-type: none"> See response to PO4283 (at the beginning of this table) regarding ecology. Property values are not considered material in planning law.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO4464	Mr C Gordon				ADD04	Object	The proposed development of area ADD04 will lead to the loss of site that is both historic and lead to the loss of a natural beauty which should be preserved for this and many more future generations to enjoy. This site provides both recreational and educational spaces which benefit the whole of Biddulph in addition the erosion of the current boundaries will lead to the possible future development of the more green belt land and open country side which will further diminish the quality of life for the residents of Biddulph and will affect the habitat of the local wild life.	<ul style="list-style-type: none"> • See response to PO4283 (at the beginning of this table) regarding historic impact and ecology. • See response to PO4481 regarding visual impact. • The sports pitches are not proposed for housing development.
PO4463	Mrs A Gordon				ADD04	Object	I am totally opposed to the proposed housing development on the Green belt land in Knypersley (area ADD04) especially when there are brown field sites that would be more suitable or short distance away which already have access off the Main Tunstall Road. The impact that this proposed development will have on the environment could never be reversed! I believe that it is our (the residents) + the SMDC duty to protect and safe guard the natural beauty of this area! The land under threat is a natural habitat for wild life, such as badgers, foxes and bats; all varieties of birds + the pools are a haven for ducks and geese, plus swan the destruction of the green belt land would be devastating!! Not counting the impact 150 – 250 houses to accommodate. We brought our house a number of years ago because of its views of the open countryside, we do not want to be overlooking a housing estate.	<ul style="list-style-type: none"> • See response to PO4554 regarding loss of Green Belt. • See response to PO4283 (at the beginning of this table) regarding ecology and use of brownfield sites including Victoria Colliery. • See response to PO4481 regarding visual impact.
PO4462	Mrs J Johnson				ADD04	Object	Has the land between Brindley Ford and Chatterley Whitfield been considered for building? The land on the right hand side does not seem to have been used for anything; perhaps it would be unsuitable for housing. It is also on a bus route.	<ul style="list-style-type: none"> • See response to PO4283 (at the beginning of this table) regarding use of brownfield sites including Victoria Colliery.
PO4460	Mr R Bailey				ADD04	Object	Knypersley is good vicinity, over building will wreck this place builders pick these locations because of the pleasant area but soon turn it into urban sprawl, there's other places that can be improved by new builds and not out of place, if this went forward then Knypersley would have a unwanted blot on the landscape.	<ul style="list-style-type: none"> • See response to PO4283 (at the beginning of this table) regarding landscape impact
PO4457	Mr R Mahan				ADD04	Object	I have lived in Knypersley for over 25 years during this time the increase in traffic has been terrible at times 10 -20 mins to get out of our drive. Due to the sheer volume of traffic as the infrastructure cannot cope with any more volume of the area new build is once at the max whacking routes to Knypersley Pool, the building of these houses will cause loss of wildlife area, we have loads of areas that could be used i.e. The Old Meadows School, Walf Road, Old Black Bull Pitt, why if we need another school if they can we not re-built Meadows School? The area is natural flood plain, into Chiscket Pool. S? Make house will cause more flooding to Main Road because the Drains cannot take cope.	<ul style="list-style-type: none"> • See response to PO4486 regarding highways. • See response to PO4283 (at the beginning of this table) regarding use of brownfield sites including Victoria Colliery, infrastructure provision, schools and ecology. • See response to PO4485 regarding drainage.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO4456	Mrs L Bayley				ADD04	Object	Too much over development we need these green spaces for people and wildlife to enjoy. Also traffic on the main road already bad at school times, and peak travel periods. Traffic congestion and parking? To drop off and pick. As far as I can see Bovis Homes cannot sell the houses already built other than to housing associations, which is not fit for local population.	<ul style="list-style-type: none"> • See response to PO4283 (at the beginning of this table) regarding ecology. • See response to PO4486 regarding highways. • The Uplands Mill housing site has been taken into account in calculating Biddulph's housing needs.
PO4447	Mr M Hawker				ADD04	Object	Too much over development we need these green spaces for people and wildlife to enjoy. Also traffic on the main road already bad at school times, and peak travel periods.	<ul style="list-style-type: none"> • See response to PO4283 (at the beginning of this table) regarding ecology. • See response to PO4486 regarding highways.
PO4454	Mrs A Webster				ADD04	Object	I object to the proposed development because I have seen a lot of change in Biddulph over the last 40 years. It has gone from a lovely small village into a large town taking all the beautiful countryside with it. I live near the proposed site and walk this area daily as it is a peaceful place to be I struggle to cross the roads at busy times already due to the amount of parked cars. At busy times I can't get out of my drive safely. Please leave the remaining green belt for or wildlife which is very important.	<ul style="list-style-type: none"> • See response to PO4486 regarding highways. • See response to PO4481 regarding visual impact. • See response to PO4554 regarding loss of Green Belt. • See response to PO4283 (at the beginning of this table) regarding ecology.
PO4450	Mr T Blank				ADD04	Object	I feel that other proposed sites like to the west or even reclaimed land on (Chatterley Lane) should be the priority sites not green belt where there are other options. Also we have the feeling that a smallest development with soon grow into excessive, with no consideration given to the practicality and aesthetic aspects of development i.e. to many crammed into to narrow roads which immediately results in a unpleasant environment.	<ul style="list-style-type: none"> • See response to PO4283 (at the beginning of this table) regarding use of brownfield sites including Victoria Colliery.
PO4492	Mrs T Adams				ADD04	Object	We the people of Knypersley and Biddulph choose to live in this area for its outstanding beauty. I know that the people all over Knypersley and Biddulph are opposed to the number of homes proposed, and yes we are all trying our best to move them from our own immediate vicinity to somewhere else. It is a large amount of homes for this area and one has to wonder if they are needed given the fact that 200 homes already being built off Pennie Way are not selling. There is a lot of congestion around Knypesley due to there being 3 schools in close proximity. Developing around ADD04 (off Harlech Drive) will only add to the congestion. With heavy vehicles coming and going, we have to consider the impact to the area during the time of developing, the safety of children, and ask ourselves if there is a need for another school so close to the 3 we already have, and given the amount of homes planned this area of beauty will be eroded. I also feel it is not fair on the properties that overlook this land. People have brought these properties for the view and have paid a higher premium for this outlook (my own property does not over- look this area) and any development will now see their properties decrease in value. I feel it's not right. Would you be happy in this situation? I am in favour of land to the west of	<ul style="list-style-type: none"> • See response to PO4481 regarding visual impact. • See response to PO4456 regarding existing homes not selling. • See response to PO4486 regarding highways. • See response to PO4486 regarding residential amenity. • See response to PO4468 regarding property values. • See response to PO4283 (at the beginning of this table) regarding use of brownfield sites including Victoria Colliery.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
							Victoria Business Park near to Brown Lees for development. As former open cast mining area I feel this makes more sense. It is far enough away from existing schools, has better access for vehicles therefore causing less disruption and congestion, and most importantly does not intrude on green belt land.	
PO4448	Mrs MD Jones				ADD04	Object	I object strongly to the erosion of the green belt land particularly when existing brownfield sites have not been utilised in the area. The proposal to possibly use this (ADD04) would not comply with building houses alone to the town centre of protect the flow of urban sprawl towards on the south side of the valley of Biddulph knypersley settlements when existing brownfield sites are available.	<ul style="list-style-type: none"> • See response to PO4554 regarding loss of Green Belt. • See response to PO4283 (at the beginning of this table) regarding use of brownfield sites including Victoria Colliery.
PO4504	Mr C Davies				ADD04	Object	Why keep building on Green Belt land when less than 4 miles down the road are 3 sites which have been unused for years, Doultons old site in Burslem, H & R Johnson old site in Tunstall, and the unused cricket ground in Cell. Plus 150+ more cars using Knypersley traffic lights, the road can't cope now.	<ul style="list-style-type: none"> • See response to PO4554 regarding loss of Green Belt. • National planning guidance states that the Council should seek to meet the development needs of their area. Stoke and Newcastle Councils have their own development needs to meet. • See response to PO4486 regarding highways.
PO4505	Mrs J Wright				ADD04	Object	We do not need any more congestion on our road it's bad enough when trying to get to and from school. It's an accident waiting to happen. We not got enough jobs for our community's it is, no more places at our local school for our children now having to go to 2 nd or 3 rd choices so what will happen when houses are built. More people more cars more children. It might bring more trade to Biddulph but doubt it as we've got empty shops but more than enough charity, hairdressing and funeral directors and no more news as us going to have anything else. Sainsbury's has done more harm than good in our town. Not given little shops a chance. No more houses needed.	<ul style="list-style-type: none"> • See response to PO4486 regarding highways. • New employment land is proposed for allocation in Biddulph in the 'Preferred Sites and Boundaries' document. • See response to PO4283 (at the beginning of this table) regarding infrastructure provision. • New development creates numerous economic benefits. • The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district's full housing needs, including affordable housing, whilst taking into account migration and demographic change.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO4548	Mr D Finney				ADD04	Object	The nearby Knypersley Garden Centre has already been proposed as a future development for further housing whilst well has a significant effect on local resources and traffic flow with the area. The fields off Harlech Drive have become a haven for wildlife e.g. little owls have bred going over the years, Badgers, Fox regularly observed over the week along with Buzzard and Sparrow Hawkes. In the winter months the field have become a haven for the migrating bird's Field Fares and Red Wing's this development will significantly affect the above habitat. The road traffic during the hours of School opening and closing time in, Conway Road, Harlech Drive and Park Lane and gridlocked, making the access for emergency response vehicles extremely difficult and hazardous.	<ul style="list-style-type: none"> • See response to PO4486 regarding highways. • See response to PO4283 (at the beginning of this table) regarding ecology.
PO4529	Mrs V Poole				ADD04	Object	The roads in the area are already congested and unsuitable to take more any further traffic. Traffic comes to a complete standstill in the week as a result of the pupils being driven to and from schools. There being 3 schools very close to each other. Park Lane and Conway Road are 'no go' areas for us at these times to avoid residents which often happen.	<ul style="list-style-type: none"> • See response to PO4486 regarding highways.
PO4528	Mr Loughlin				ADD04	Object	<p>1) I cannot believe there are not more 'ugly' sites that could be developed first.</p> <p>2) Mill Hayes, Colwyn Drive, Orme Road and Conway will probably Victoria Pool is bad enough at the minute with cars and poor roads surfaces.</p> <p>3) Instead of thinking about new roads, how about repairing the existing ones. Park Lane lights and the 3 roundabouts heading towards Congleton are terrible.</p> <p>4) Why does a new school need to be built when existing junior and senior school are in the immediate vicinity?</p>	<ul style="list-style-type: none"> • See response to PO4283 (at the beginning of this table) regarding use of brownfield sites including Victoria Colliery. • See response to PO4486 regarding highways. • Road repairs are outside the jurisdiction of the Local Plan. • See response to PO4283 (at the beginning of this table) regarding schools.
PO4530	Mrs F Haynes				ADD04	Object	We moved here 5 years ago, because we (mainly!) wanted to end my days in peaceful scenery, the wild animals, and the lovely walks. Please no more houses or what was the point of it all?! And I'm sure we're not the only ones who have done the same.	<ul style="list-style-type: none"> • See response to PO4283 (at the beginning of this table) regarding ecology. • See response to PO4481 regarding visual impact.
PO4531	Mrs A Johnson				ADD04	Object	The building at the St David's Way/Cornfield Road housing estate, in recent years as already had a negative impact on our environment. Increased and unsuitable types of traffic on our narrow lanes despite the signage for HGV's. An increase in the amount of dropped litter from the children walking from the high school to the new estates. Dog walkers neglecting to clean up after their mess around our streets rather than their own! Allowing the proposal to go ahead would defeat the object us buying our property in a quiet location, with easy access to the local countryside. The increase in traffic on Mill Hayes Road has made quite dangerous to walk to Knypersley Pool, as people like this route from Biddulph to avoid the cameras on Tunstall Road.	<ul style="list-style-type: none"> • See response to PO4486 regarding highways. • See response to PO4486 regarding residential amenity.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO4544 PO4508	Mr P Drummond Mrs J Drummond				ADD04	Object	We agree wholeheartedly with the observations set out in this document objecting to the development adjacent to Harlech Drive. We would however like to emphasise our own objections. The area, we assume, is Green Belt. As we understand if developments should not be allowed except in exceptional circumstances. Clearly these are not exceptional circumstances. Surely the emphasis should be on the retention of such areas. Once built upon such areas to be Green Belt again. The go ahead for further development would be a thin end of the wedge; it would give the amber light for the go ahead for further developments. This is very much akin to 'mission creep'. We would also like to put on paper our objections with reference to the access situation. Parking at the moment on Conway Road/Harlech Drive at school times presents problems. The grass areas adjacent to the aforementioned roads are already a mess, witness the situation at Park Lane end off Conway Road. We saw a similar situation to this, should the proposed development go ahead, where we lived previously. The road in question was close to a school drop off and pick up times the congestion situation made it very difficult to drive down the road. We would question the ability of certain emergency vehicles to gain access to the properties on the road. A similar situation would exist on Harlech Drive/Denbigh Close. The properties in Denbigh Close are mainly bungalows and the people living there are mainly elderly residents and the only access is via Harlech Drive.	<ul style="list-style-type: none"> • See response to PO4554 regarding loss of Green Belt. • See response to PO4486 regarding highways.
PO4543 PO4542	Mrs J Salt Mr P Salt				ADD04	Object	Particular concern's regarding increased traffic to an additional school alongside existing High School, Middle School and Primary School	<ul style="list-style-type: none"> • See response to PO4486 regarding highways.
PO4541	Mrs J Forster				ADD04	Object	The main thing I object to be the increase in traffic the roads and the surfaces, including the footpaths are in a terrible state at this moment so any additional will make it worse. Water pressure is below standard for the area. Parking of cars in the winter months is terrible because access will be via a steep incline and drivers will park at the top to get away from work it does happen at the moment at Park Lane roundabout from residents.	<ul style="list-style-type: none"> • See response to PO4486 regarding highways. • See response to PO4528 regarding road surfaces.
PO4540	Mrs C Elms				ADD04	Object	I agree with all the above and would like to state that I am against any developments i.e.: school, housing in Knypersley area, especially on green belt. We already have traffic problems which will be made worse. More use should be made of existing site in Biddulph i.e. Mill Sites. The residents must be listened to.	<ul style="list-style-type: none"> • See response to PO4486 regarding highways. • See response to PO4283 (at the beginning of this table) regarding use of brownfield sites including Victoria Colliery.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO4539	Mr G Elms				ADD04	Object	I object to any further development in the Knypersley area that will increase the congestion and parking of cars & buses. At the present we have four schools & a football & a cricket ground. They each contribute to parking on the roads including buses on Conway Road picking up and dropping off school children. Staffordshire Moorlands & Biddulph High School have a duty of care to residents & school children this is being ignored.	<ul style="list-style-type: none"> • See response to PO4486 regarding highways.
PO4538	Mrs R Dale				ADD04	Object	I strongly object for the above reason and we have buzzards, newts, great crested adders, owl's, grass snakes, kestrels and bats. We have the servant quarters mature garden that has been here for nearly 200 years surrounded by trees with preservation orders on. People come to walk down the footpath down to the Knypersley reservoir.	<ul style="list-style-type: none"> • See response to PO4283 (at the beginning of this table) regarding ecology, footpaths and heritage impact.
PO4537	Mr A Dale				ADD04	Object	Proposed development would seriously increase the traffic and smoke/noise pollution to the current private access and garden areas to my home and neighboring houses, my concerns are my children, which one has asthma and the dangers of vehicle traffic, which is the main reason that myself and my family live here, also i have pets which is another reason that we live here. To keep Knypersley remaining green areas. Also to protect the valley from development for our future generations to enjoy.	<ul style="list-style-type: none"> • See response to PO4486 regarding highways. • If the district council considered that a development may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts. In addition the district council continually monitors air quality across the district and regularly undertakes review and assessments of this data to identify areas where the traffic could have an unacceptable impact on local air quality.
PO4536	Mrs F Nicosia				ADD04	Object	Biddulph is often described as a historic town. I do not feel as though this sentiment is carried forward and considered thoroughly when decisions such as new housing are made. There is no doubt that new houses are needed in an ever evolving and ever increasing society and town as such as Biddulph sites are few and far between and as such more and more green belt site are being sacrificed. In this situation is due to the unique nature of Biddulph and its environment. It's a rural town, surrounded by areas of natural beauty such as the Peak District, the Cheshire Plains and the Moorlands. There are environment ramifications of this proposal as have been eloquently listed/outlined in the proposal against that plan. What concern me are not just the environmental ramifications such as the loss of the habitats and the hedgerows. But now such a plan would impact on the quality of living adjacent to this plan. The proposal itself will have reduced the quality of life of some residents already. Uncertainty in what will happen to their homes, what will the traffic impact be, what will the noise pollution be like, what will the light pollution do? Questions that would not be on the mind of the occupants of their house when the purchased their properties. Homes to the land at the back of the properties would have been appealing or	<ul style="list-style-type: none"> • See response to PO4283 (at the beginning of this table) regarding ecology, landscape impact and heritage impact. • Wherever possible hedgerows would be incorporated into any future development scheme. • See response to PO4486 regarding residential amenity. • See response to PO4486 regarding highways.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
							deciding from when I purchased the house. Land that they have watched grow during the spring and during the winter and come back again. What changes could be made to their home without their consent. Historically, the area has evidence rife with promise undiscovered promise of giving an insight into our ancestors, families even who occupied then are previously to learn from the past, we need to find it, catalogue and interpret it this chance will not be given if it is built over it a shame more consideration has not been demonstrated, it seems our duty to cover it up again but to uncover it learn from it and add more to the historic content of Biddulph.	
PO4535	Mr M Kelly				ADD04	Object	I, my parents, my children and my grandchildren, have enjoyed walks in this area for years. To watch the varied wildlife has been a pleasure for the whole family as have our bat watch! Please do not destroy this community loving area in our green belt.	<ul style="list-style-type: none"> • See response to PO4283 (at the beginning of this table) regarding ecology. • See response to PO4554 regarding loss of Green Belt.
PO4534	Mrs G Hancock				ADD04	Object	I object because I live on Tunstall Road and the traffic is already extremely heavy. Conway Road is also a main thoroughfare to the only High School in Biddulph. This road is not accessible in winter due to the gradient and lack of gritting. I also object as the views and natural habitat will be totally destroyed. Why not build on ugly brown sites in the town?	<ul style="list-style-type: none"> • See response to PO4486 regarding highways. • See response to PO4481 regarding visual impact. • See response to PO4283 (at the beginning of this table) regarding ecology. • See response to PO4283 (at the beginning of this table) regarding use of brownfield sites including Victoria Colliery.
PO4533	Mr K Hancock				ADD04	Object	Congestion Access Natural Habitat Infrastructure Destroy what is a natural green belt beautiful view. Drainage It will devastate the view from Knypersley Cricket Club which is acknowledged as one of the beautiful settings in Staffordshire Cricket League.	<ul style="list-style-type: none"> • See response to PO4486 regarding highways. • See response to PO4283 (at the beginning of this table) regarding ecology and infrastructure provision. • See response to PO4554 regarding loss of Green Belt. • See response to PO4485 regarding drainage.
PO4532	Mr B Goodwin				ADD04	Object	I have recognition that there is a considerable housing demand in the area. However, the plans to build this number of houses of Conway Road seems poorly conceived as from the perceptions of someone who as a local resident for many years. This said if the numbers were reduced to less than 50 I feel support would increase.	<ul style="list-style-type: none"> • The Council is looking at ways of minimizing Green Belt development.
PO4519	Miss G Bestwick				ADD04	Object	It saddens me greatly to hear that the council have chosen so many green belt sites as potential locations for housing. Unfortunately, it appears the notion of Biddulph as the Garden Town of Staffordshire is going to become something of the past and not the future. With regards to the proposal of a new school on the site the roads surrounding Park Lane and Conway Road are already difficult to navigate at school time with Knypersley first, James Batemen and the high school. To add more traffic to this already congested area would be bad for our children and young families.	<ul style="list-style-type: none"> • See response to PO4554 regarding loss of Green Belt. • See response to PO4486 regarding highways.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO4516	Mrs E Stubbs				ADD04	Object	I feel as though the lovely green field should stay green not a lot houses, it has stayed since we came here, and we don't want it to alter any more.	<ul style="list-style-type: none"> • See response to PO4554 regarding loss of Green Belt.
PO4514	Mr C Toft				ADD04	Object	This is proposed building on green belt land, which should be preserved and not built upon. It is proposed to be built around listed property which would spoil the historic integrity. Also, the traffic through Conway Road/Harlech Drive is heavy enough without more. The extra traffic would cause absolute chaos, particularly on Harlech Drive – and high peak times it is difficult enough to get of Conway Road onto Tunstall Road. Plus, the infrastructure in place in Biddulph is just not enough to sustain another housing estate the size of that proposed.	<ul style="list-style-type: none"> • See response to PO4554 regarding loss of Green Belt. • See response to PO4486 regarding highways. • See response to PO4283 (at the beginning of this table) regarding heritage impact and infrastructure provision.
PO4513	Mrs A Harrison				ADD04	Object	I object to the proposed building on green belt site. These need to be protected. Also I object to where the access roads will be sited as it will cause chaos on Harlech Drive and Conway Road. Plus I believe the current infrastructure will be unable to maintain so many new buildings.	<ul style="list-style-type: none"> • See response to PO4554 regarding loss of Green Belt. • See response to PO4486 regarding highways. • See response to PO4283 (at the beginning of this table) regarding infrastructure provision.
PO4512	Mrs K Saltwell				ADD04	Object	Another school site could be where the Meadow School was until it recently burnt down – It is next to sports fields Mill Hayes Road is already dangerous to use and HGV trucks still use it even though there is only wide enough for one vehicle at a time in some places.	<ul style="list-style-type: none"> • Staffordshire County Council are the Education Authority and they look at the need for new schools in an area as a result of development. They consider that a new first school would be needed in Biddulph to accommodate the level of new housing development currently proposed. The location of this school would not be decided until the Council has firmed up its plans as to where the new housing development will take place in the town. (There are 2 options put forward as potential locations for a new school in the Preferred Option Sites and Boundaries Consultation booklet). • See response to PO4486 regarding highways.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO4511	Mr R Rowland-Brough				ADD04	Object	<p>In addition to the very well researched bullet points which form part of the basis of my objection, I would like to bring the following points to your attention. The only notice relating to the proposed development at ADD04 is located on a wooden plate on the dirt track of Knypersley Hall. Given this location, unless you happen to walk on the footpath, the vast majority of residents in the surrounding area would be generally none the wiser for the plans. This was confirmed when talking to friends and neighbours who live at various locations overlooking ADD04. I find it hard to describe this action so maybe I should leave it with very convenient. Although this notice may for fill with the requirements of the planning regulations, I know for certain it provided no opportunity to residents in the wider area who would be affected therefore a convenient way to cheat the good hearted people of Knypersley out of green open space that they believed was protected green belt. A quick fix for the first 150 houses? Given the location of the site ADD04 and the proposals for the site I would suggest that the planning department have not made any effort to visit the site or any other in the area. The references to the (NPPF) are already noted on the bullet point list 1-4. I would suggest that the planning department have failed totally to operate within their own guidelines. As such I believe that this site ADD04 should be removed permanently from the proposals. The green belt land which forms site ADD04 has features related to Knypersley Hall which is a listed building. The former park lands of the hall having been undisturbed for many years have formed a natural nature reserve for the birds and wildlife complimented by the mature trees. To destroy this for the purpose of housing would be an atrocity for which the SMDC planning department should be ashamed given the alternative brown field sites available. This site is currently home to a variety of birds including Grey Herons, Buzzards and more notably Oystercatcher have been observed in the summer months, not to mention Bats, Squirrels, Rabbits. The birdlife shares naturally beautiful and tranquil environment with the likes of planners, they are an irreplaceable feature of this area, should it be developed and would most likely perish. Given the sensitivity of some of the site proposed around Knypersley and Biddulph, the planning department should consider the sites proposed in far greater detail and within the NPPF guidelines. In all cases, they should consider the sites and make detailed consideration and research before even reaching the initial proposals stage. Road Access – The current traffic level in Conway Road far exceeds its original purpose. The additional traffic at school times makes use of the road extremely dangerous for drivers and pedestrians alike. It is generally not easy to park outside properties without causing an obstruction. With further traffic and parking issues created by</p>	<ul style="list-style-type: none"> • The site notice as a means of informing the public about a potential site allocation was put in place in addition to other measures such as delivering flyers to all residents in the District so it was not the only way to find out about the Council's consultation. • See response to PO4554 regarding loss of Green Belt. • See response to PO4283 (at the beginning of this table) regarding ecology and landscape impact. • See response to PO4536 regarding loss of hedgerows. • If development takes place on this site any protected trees would be preserved unless there are exceptional circumstances in which case re-planting would be required. Soft landscaping would be integrated into any scheme. • See response to PO4283 (at the beginning of this table) regarding heritage impact, use of brownfield sites including Victoria Colliery. • See response to PO4486 regarding highways. • See response to PO4512 regarding schools.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site ADD04)

							events at local schools, the road can become grid locked causing problems for the school buses and on occasion has impeded the access for ambulance. The road becomes quickly impassable during falling snow and remains icy for long periods afterward as the storm grids lower section of the road are blocked solid with rubble and have been for a considerable time. To consider imposing the additional traffic flow proposed development would create, is in my opinion ludicrous given the already crumbling road. Schools - With respect to the proposed School on development ADD04 I fail to see the purpose of an additional primary School given the current primary schools. It would appear however to have been overlooked that the area only has one High School which has no further availability. General Impact – The impact of the proposed developments would lead to the loss of identity for the area and merge the small villages into Biddulph and as a whole we would be soon be living in a small city.	
PO4555	Mr and Mrs A Alcock				ADD04	Object	As an alternative site can we suggest land alongside the road leading from Mill Hayes Garage towards the recycling centre?	<ul style="list-style-type: none"> See response to PO4283 (at the beginning of this table) regarding use of brownfield sites including Bemersley area.
PO4638	Mr E Case				ADD04	Object	I object to the proposed development of 150-250 houses and a possible school near to Harlech Drive, Knypersley for reasons which are explained on the attached sheets.	Comments noted.
PO4656	Mrs A Case				ADD04	Object	I object to the proposed development of 100-250 houses and a possible school near to Harlech Drive, Knypersley for the reasons explained above.	Comments noted.
PO4655	Mr Tipper				ADD04	Object	I object to the proposed development of 100-250 houses and a possible school near to Harlech Drive, Knypersley for the reasons explained above.	Comments noted.
PO4449	Mrs J Garner				ADD04	Object	I object strongly to the erosion of the green belt land particularly when existing brownfield sites have not been utilised in the area. The proposal to possibly use this (ADD04) would not comply with building houses alone to the town centre of protect the flow of urban sprawl towards on the south side of the valley of Biddulph knypersley settlements when existing Knypersley has a lot of traffic problems we do already have 3 schools in the area.	<ul style="list-style-type: none"> See response to PO4554 regarding loss of Green Belt. See response to PO4283 (at the beginning of this table) regarding use of brownfield sites including Victoria Colliery.
PO6262	Mr N Lunt				ADD04	Object	This site is Green Belt + would result in building in front of a historic building. Access roads are totally unsuitable to this site.	<ul style="list-style-type: none"> See response to PO4554 regarding loss of Green Belt. See response to PO4283 (at the beginning of this table) regarding heritage impact. See response to PO4486 regarding highways.
PO9707	Mr and Mrs Siddorn				ADD04	Object	Object to adjustment of Green Belt boundary to include this site.	<ul style="list-style-type: none"> See response to PO4554 regarding loss of Green Belt.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO5199	Mr Peter Brittain				BD062	General comment	Please balance the town geographically.	Comment noted.
PO5136	Mr Gary Harding				BD062	General comment	Biddulph bypass benefits Biddulph building on the west side.	Comment noted.
PO5181 PO5189	Mr J. Denton Mrs A Denton				BD062	General comment	The by-pass to the west of Biddulph town.	Comment noted.
PO4864	mr allan knapper				BD062	Object	This site should remain included in the green belt within Biddulph and not taken out for development.	Comment noted.
PO5122	Ms Lynne Evans				BD062	General comment	Biddulph North requires a neighbourhood plan to balance out the already developed north east Biddulph sites. The bypass enables the development of the town centre and the surrounding west side.	Comment noted.
PO5125	Ms Lynne Evans				BD062	General comment	The bypass enables the development of the town centre and the surrounding west side.	Comment noted.
PO5110	Mr Cottrell				BD062	Object	Where ever we build in Biddulph Green Belt will be used Brown Field Sites should be used first until these have been used Victoria Colliery Site and if building is to be done then this should be and is suitable to use.	<ul style="list-style-type: none"> • In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site BD062 for release from the Green Belt. • Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph (particularly Yarn Mill and Minster Mill) would be appropriate for residential development. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping brownfield sites. • Sites at Victoria Colliery and Childerplay Road are within the Green Belt like BD062. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy.
PO4950	Mr M Owen				BD062	General comment	My opinion is that in today's climate we continue to keep building anywhere and not understanding problems that are caused afterwards.	Comment noted.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO5078	Mr J Neate				BD062	General comment	As stated above the level of homes in Biddulph area is at a saturated level. Moving west makes much more sense.	Comment noted.
PO5161	Mr N McQuade				BD062	General comment	Thanks for listening to residents comments: Please keep as much Green Belt as possible very important.	Comment noted.
PO178	Mr Kingsley Rowland				BD062	Object	I think this site should remain included in the green belt within Biddulph and not taken out for development.	Comment noted.
PO4963	Mr Stephen Willott				BD062	Object	Sewage works since the land owner decimated the site in December 2015; we are plagued with sewage smells: This never occurred before. Neither the distributor road (Mow Lane) nor feeder roads (Essex Drive/York Close) meet the minimum STD for the SCC highways design guide policy. To narrow and bend radii is too small. Plus 2 pinch points on Mow Lane, only recently (20th May) a bad accident happened needing the police to attend. Community access – the local community have an unfettered access to this site since 1971. For over 40 years, there has been total open access to this, used by local residents. This land should be designated as a visual open space. Bio diversity – the phase 1 habitat survey stated that this site was not recommended for development it is the only site in Biddulph where this was stated is why the landowner decided to try to destroy the habitat and allowed to get away with it	<ul style="list-style-type: none"> • United Utilities has a statutory duty to provide capacity for new development so this is not a valid reason for development not to come forward in Biddulph. United Utilities considers that there is no need to expand the treatment works in the development plan period for the growth identified in the development plan. Current issues experienced by residents in regard to raw sewage flooding are a separate matter to be investigated by United Utilities. An odour assessment has been undertaken which demonstrates that the site could be developed without adverse impact on future residents. A noise assessment has not been undertaken as the developer does not consider this to be necessary. • The Highway Authority has no difficulties with this development from their point of view. Cumulative impact of several developments in this area would be assessed through a Transport Assessment. • The land is privately owned and has a footpath across it linking to Biddulph Valley Way. If this site were to be developed, the developer would be required to maintain a public access on to the Biddulph Valley Way. • The site is not recommended for designation as Local Green Space in the Landscape, Local Green Space and Heritage Impact Study (2016). Local Green Space supersedes the Visual Open Space designation (which is an old designation not supported by Government policy in the NPPF). • The Council's Phase 1 Habitat consultants consider the site habitats to be of nature conservation value at district level and have the potential to support bats and reptiles, which could allow the consideration of the site as an SBI or BAS. Further survey work would need to take place prior to any development to establish Site of Biological Importance (SBI) / Biodiversity Alert Site (BAS). Prior to any development an assessment would be required of the 2 trees for their potential to support roosting bats and a reptile survey.
PO4936	Ms Diane Copeland				BD062	Object	There is plenty of land at Brown Lees waiting to be built on. Our infrastructure won't cope with the housing and the sewage	<ul style="list-style-type: none"> • See response to PO5110 regarding Victoria Colliery / Childerplay.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							works, who would want to live here anyway with the stench.	<ul style="list-style-type: none"> National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the County Council to assess the impact of proposed development on school capacity, what additional capacity is needed and how this can be delivered. See response to PO4963 regarding the close proximity of the Water Treatment Works.
PO5157	Mrs C. Nicholls				BD062	Object	I do not believe that building should take place on Green Belt but understand that the town needs to produce a neighbourhood plan to achieve the objections set by the government I would suggest that the land that has been more recently been designated as Green Belt should be used like Childerplay Road + the Victoria Colliery site.	<ul style="list-style-type: none"> See response to PO5110 regarding Victoria Colliery / Childerplay.
PO4965	Mrs Joan Draisey				BD062	Object	Proximity of the sewage works is already working over capacity population. Incidents already of raw sewage flooding, odour. Access roads too narrow. Coming out of Essex Drive onto Mow Lane already is a danger. Green Belt slowly being eroded varied wildlife at risk. Increase in the amount of cars in the cul de sac impacts on the children's safety.	<ul style="list-style-type: none"> See response to PO4963 regarding the close proximity of the Water Treatment Works. See response to PO4963 regarding highways. See response to PO4963 regarding ecology.
PO329	Mr Dave Boothroyd				BD062	Object	Green Belt Review. Land adjacent to the Sewage works. I oppose any suggestion that areas BD068, BD087 and BD062 should be designated as possible areas for development or that their Green Belt status be changed. In view of recent correspondence with United Utilities, suggesting strongly that development should not take place adjacent to wastewater treatment (sewage) works on the grounds of environmental health concerns of problems with smells and noise, it is clear that these areas must never be built upon. I quote from their message, made in a letter dated 26 th May 2016: - "We have identified the need for the local planning authority to discuss any new housing near to the wastewater treatment works with their Environmental Health colleagues and give the sites very careful consideration when comparing these sites with potential alternative sites that may be available to them. Our position is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a wastewater treatment works." It is possible, of course, that local land-owners may wish	<ul style="list-style-type: none"> See response to PO5110 regarding Green Belt. See response to PO4963 regarding the close proximity of the Water Treatment Works. See response to PO4963 regarding ecology. The land has an agricultural classification of Grade 4 which means that it is poor quality. The site boundary can be amended to exclude land within Flood Zone 2 at the request of the landowner, who does not own this land and is not promoting it for development. This approach has been agreed with the Environment Agency since their response to the consultation so a Level 2 Flood Risk Assessment is no longer required for the site.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

							<p>to sell their land for development outside the current Housing Allocation scheme. The planning officers would have to oppose the granting on planning permission on the above grounds. If these areas were firmly designated as Green Belt, the planning authorities would find the refusal of planning permission a far easier case to argue if the Green Belt status is maintained. Wildlife Habitat: - I refer to the Wildlife Habitat Survey on behalf of SMDC of 2014. http://www.staffsmoorlands.gov.uk/sites/default/files/documents/pages/Front%20Cover%2C%20Introduction%2C%20Appendices.pdf This survey gives scientific and quantitative support to the everyday observation that the areas are a thriving wildlife habitat. The destruction of habitat is a most undesirable development. In particular, the gully and hedgerow that crosses the field BD068 is home to rabbits, foxes and badgers, many species of bird, including the rare Jay and Kestrel. Insect and plant species are plentiful and varied. Hedgerows along the brook side and the Gillow Heath/Congleton Road footpath are similarly species rich. Any aerial view of these areas clearly show that development on these areas will tend to break the wildlife corridor that links the Biddulph area with the ancient woodland areas on Baileys Bank (site of the former Biddulph Castle) and on Congleton Edge. This is bad because it threatens genetic diversity in plant and animal species by restricting the range of habitats. Agriculture: - Two of the three areas are active, productive farmland. Area BB068 in particular is being maintained and improved by the current farming tenants. The grass is fertilised, the weeds suppressed, and the land is used currently to raise two dozen heifers. It can not be dismissed as low quality pasture land. Flooding: - It must be accepted that the areas under discussion have been, recently, in the past, and probably for the indefinite future, subject to flooding. According to the Environment Agency, open green land adjacent to watercourses is the only viable solution to the problem of mitigating the damage to property in the area. Green Belt status is a sensible approach to keeping flood-prone areas available to fulfil the role of 'flood plain'</p>	
PO6725	Master Joey Turner				BD062	Object	Please do not let them build on the field at the end of my road (ref. site BD062) because we make dens there and we play in our street and do not want to get ran over. The stream is very near and I like the nature and animals in the field.	Comments noted.

PO6726	Ms Kerris Farr				BD062	Object	Regarding site ref: BD062 as a resident of Gillow Heath for nearly 30yrs I am so upset by the plans to use the proposed site for development. I use the footpath adjacent to the site everyday whilst walking my dog. It is bad enough that someone came along a few months ago and cut all the trees and shrubs down. Not taking into consideration the beautiful wildlife that lives there rabbits, badgers, foxes and birds too numerous to mention, and that you can see 'every time' you walk there. Green spaces are getting few and far between these days and to build on this small but beautiful patch of land is a crime, some people have got no hearts and money seems to be at the top of their priority list I bet. If the plans do get passed I hope that potential home owners take 5 minutes to stay and smell the putrid odour of the water works that the houses will be backing onto.	<ul style="list-style-type: none"> • See response to PO4963 regarding loss of footpath. • See response to PO4963 regarding ecology. • See response to PO4963 regarding the close proximity of the Water Treatment Works.
PO9705	Mr and Mrs Siddorn				BD062	Object	Object to adjustment of Green Belt boundary to include this site. The site has significant highway, drainage, ecology, odour and other constraints which local people will require the LPA to address.	<ul style="list-style-type: none"> • See response to PO4963 regarding highways. • See response to PO329 regarding flooding. • See response to PO4963 regarding ecology. • See response to PO4963 regarding the close proximity of the Water Treatment Works.
PO9671	Mrs P Hancock				BD062	Object	Access (Mow Lane) is too narrow.	<ul style="list-style-type: none"> • See response to PO4963 regarding highways.
PO9956	Mr C Lunt				BD062	Object	BD062 should remain in the Green Belt and not taken out for development.	Comment noted.
PO9981	Mr Ray Lloyd				BD062	Object	(Summary) Site BD062 has special environmental qualification to Green Belt Protection because of its progressions towards a wildlife sanctuary. It is a national cycleway with an open aspect and crucial to Biddulph wishin to develop tourism. This site would be better cared for as a small woodland. Lots of wildlife present on the site.	<ul style="list-style-type: none"> • See response to PO4963 regarding ecology. • The BVW is a very significant attribute in the town and part of a national Sustrans cycle route. Therefore any development in the area would be built around it. The route is generally buffered by trees and hedgerows. All new development bordering the route would be required to provide pedestrian and cycle links on to it. The Council has produced a Green Infrastructure Strategy and the BVW is identified within this document. It is not considered that development in this location would impact on the enjoyment of the route and long ranging views (e.g. to Mow Cop) and the wider countryside would remain.
PO9953	Mr T Green				BD062	Object	Object to the site being taken out of the Green Belt for development.	Comment noted.

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO812	Mr Timothy Sproston				BD062	Object	<p>I do not feel that changes should be made to the greenbelt status site BD062 reasons as follows. The Phase 1 habitat Survey conducted by Lockwood Hall Associates conducted (2014) stated; that the site 'FID122, is significant because of the range of wildlife and habitats it provides. The section related specifically to Site BD062 concluded (p.276 of 382) that, "the site has potential for protected species due to the mosaic of habitats and habitat structure especially as the site is well connected to the wider countryside. Therefore the site is not recommended for potential development as the site is deemed to have distinct ecological importance". I am not an expert in the area of ecology, however Consultants have given their opinion. Despite this (and the recommendation that further surveys be carried out) representatives of the land owner have been (Dec 2015) and caused damage. They used tractors and heavy machinery to bring down trees and remove vegetation, in doing so they disturbed the habit of many of the species specified in the Survey. Local residents has had unfettered community access to site BD062 for circa 40 years and we have photographic evidence of parties being held there in the 1970s. The use of this green space has continued daily to this present day for a variety of recreational activities.</p>	<ul style="list-style-type: none"> • See response to PO4963 regarding ecology. • See response to PO4963 regarding loss of resident's access to land.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO377	Mr Peter Turner				BD062	Object	<p>The SMDC Local Plan Phase 1 Habitat Survey concluded "... the site is not recommended for potential development ..." It is the ONLY site surveyed where this was concluded, showing that other sites are more suitable. The site contains UK and Staffordshire Biodiversity Action Plan Priority Habitats and species and has the potential to be a Species Rich Farmland site. It is very well connected to other biodiverse habitats (evidenced in the Phase 1 Habitat survey). In the absence of a SMDC Green Infrastructure Strategy, the findings of this survey must be heeded. Development would contradict Section 40 of the Natural Environment and Rural Communities Act 2006, and Policy C3, NE1 and section 8.7.17 of the SMDC LDF Core Strategy. This site is important because of its mix of habitats, particular species found and its vital wildlife corridor linkages (where the Biddulph Brook meets the Biddulph Valley Way). The SMDC Green Infrastructure Strategy, which was supposed to guide decision making about the environment and its linkages across the Local Plan area does not exist. In the absence of such strategic data, the Phase 1 Habitat Survey findings must be prioritised and used to guide decision making. "The Green Infrastructure Strategy will inform the production of the Site Allocations Development Plan Document and will establish appropriate objectives and targets." SMDC LDF Core Strategy section C3 Green Infrastructure 8.7.17 Its inclusion contradicts Section 40 of the Natural Environment and Rural Communities Act 2006 which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity. Its inclusion contradicts SMDC LDF Core Strategy Policy C3 Sustainable Communities where existing and potential sites of nature conservation value are linked, biodiversity is increased and the urban fringe is enhanced. Its inclusion contradicts SMDC LDF Core Strategy Policy NE1 Natural Environments and the protection of land suitable for inclusion in the Biodiversity Opportunity Mapping Species-Rich farmland zone. The land has the potential to be designated as a Species Rich Farmland site. The site contains UK and Staffordshire Biodiversity Action Plan Priority Habitats and species (evidenced in the Habitat survey). Bats and badgers are active on site (local knowledge) and English Bluebells (indicating ancient hedgerows) and marsh Orchids uncommon to Staffordshire have been found on site (Phase 1 Habitat Survey findings). The site has potential to be designated as a Local Wildlife Site once more detailed survey information is gathered and time should be allowed for this to take place before it could be considered for release from the greenbelt or as a potential housing site. The site displays some semi-natural characteristics and is within the Species Rich</p>	<ul style="list-style-type: none"> • See response to PO4963 regarding ecology. • A Green Infrastructure Strategy for the Staffordshire Moorlands has been produced by the Council with assistance from partners such as the Staffordshire Wildlife Trust and will be published alongside the next Preferred Options consultation. • If development takes place on this site any protected trees would be preserved unless there are exceptional circumstances in which case re-planting would be required. Soft landscaping would be integrated into any scheme. • If the site is developed hedgerows would be retained within the scheme layout wherever possible. • See response to PO5110 regarding Green Belt. If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt. • See response to PO329 regarding flooding. • Site BD062 will be required to provide a percentage of affordable housing / starter homes to benefit those in the community needing affordable housing. • No contradiction with SMDC Core Strategy Policy SS5b 'Biddulph Area Strategy'. Sites within the urban area and an extension to the urban area are included as well as extensions in the Green Belt identified as part of the Green Belt Review as stated in the policy. • See response to PO4963 regarding the close proximity of the Water Treatment Works.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							<p>Farmland Ecosystem Action Plan Area , where priority habitats and species include Hedgerows, as well as several priority bird and mammal species present on site. The primary objectives within this zone are the maintenance, restoration and expansion of species-rich grassland and to increase the connectivity of semi-natural habitats. The Phase 1 Habitat Survey stated that the site is “ ... very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site.” This site is a vital wildlife corridor, linking linear habitats from two sides of the valley via the Biddulph Brook and Biddulph Valley Way. It is bounded by two ancient hedgerows to the west and east, and contains a swathe of broadleaved woodland with possible veteran trees. The site is currently protected as Greenbelt, and only considered suitable for release from the Greenbelt under exceptional circumstances. Removing this site from the Greenbelt prioritises development in the floodplain which contradicts SMDC LDF Core Strategy Policy SD 4 when a range of sites are available. Exceptional circumstances are not demonstrated. Its inclusion contradicts SMDC LDF Core Strategy Policy SD 4 where development proposed...”will be guided to first make use of areas at no or low risk of flooding before areas at higher risk... “ The site is in Flood Zone 2 The presence of a wet meadow (Phase 1 Habitat Survey) evidences the current high level of surface water runoff this site experiences. Development will increase surface runoff in close proximity to a watercourse, reducing lag time into the Biddulph Brook leading to increased flooding. Development close to the waste water and sewerage treatment works will result in increased raw sewage overflow close to the new development as well as polluting the watercourse, Biddulph Brook. This site will deliver too few homes to add a measurable contribution to the Community Infrastructure Levy (CIL), it will not bring any direct benefit to the community of Gillow Heath. Its inclusion contradicts the SMDC LDF Core Strategy Biddulph Area Strategy where new housing allocation is prioritised on urban extension land to the west of the bypass and where developments help secure infrastructure improvements for the benefit of the newly developed part of the town. Improvement works to the adjoining, and only, United Utilities waste water and sewage treatment works requires massive CIL contribution, which is only possible from a large-scale development elsewhere. Improvements to feeder and distributor road accesses are not possible due to the relatively small scale nature of the development.</p>

PO560	Mrs Angela Turner				BD062	Object	Where viable land is identified elsewhere in the District which is NOT classed as Green Belt this should be prioritised over removing land from the Green Belt in Biddulph. The figure of 20% has not be based on the land available in different areas and the presumption that land can simply be reclassified, removed from the Green Belt and put into the Town Boundary is both wrong and shows no understanding of the true definition of 'Sustainable Development'. This approach is extremely unsustainable when non- Green Belt sites are available elsewhere in the District.	<ul style="list-style-type: none"> It is agreed that non-green belt land should be used for development first and this approach has been used in Biddulph. However, there is not enough land to meet Biddulph's housing needs without Green Belt land. The proportion of 20% of the District's housing development taking place in Biddulph has been through extensive consultation and public examination as it is taken from the Council's Core Strategy which was adopted in March 2014.
PO4951	Mr D Wickstead				BD062	Object	Major concern for me is the traffic increase on Mow Lane this is an incident waiting to happen if the increase goes ahead some decision making councillor will be ultimately responsible for some innocent person's death.	<ul style="list-style-type: none"> See response to PO4963 regarding highways.
PO4932	Mrs M Moffatt				BD062	Object	Too near sewage works can be smelt in Mow Lane. Mow Lane is totally unsuitable for any more traffic no pavements for pedestrian's dangerous bends over 2 bridges are safe? Mow Lane is unsuitable for the Contractors Lorries. You should not be able to use green belt which always was protected.	<ul style="list-style-type: none"> See response to PO4963 regarding the close proximity of the Water Treatment Works. See response to PO4963 regarding highways. See response to PO5110 regarding Green Belt.

The local community have had unfettered access to this site since the estate was built in 1971. For over 40 years, there has been total open access and the land has been used by local residents. This land should be designated as Visual Open Space , protecting the ecology and allowing the wet meadow to do its natural job of reducing flooding in the watercourse by slowing down surface runoff. Three well-used Public Rights of Way cross this land. Provision of community enjoyment of countryside and open spaces is supported by the Commons Act 2006.</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO950	Mr Alistair McLoughlin				BD062	Object	<p>The proposed development site BD062 is semi rural Green Belt land and the impact of any development on the surrounding area would be great. The Essex Drive and York Close estate which borders the site was originally open farm land prior to the houses construction in approximately 1971. After the houses were constructed, the remaining part of the site was listed as Green Belt land, and continued to be used for the grazing of animals until the early 1980's. At this point extensive construction activity was undertaken on the Biddulph sewage works site, and pipes were laid across site BD062, including some above surface level. Since this construction activity, the site has been left to nature as Green Belt land with no agricultural use or maintenance works undertaken on site. The site is one of the few areas of land in Biddulph that has been left untended to allow nature to thrive. There is now a good range of wildlife and plant life on the site, despite the site owners attempt to destroy the sites natural habitats in December 2015. The site acts as a break between Gillow Heath and the wider Biddulph area across the main road (A527), and has the additional benefit of screening the sewage works. Previous applications Site BD062 was previously subject to a planning application in the early 1990's (circa 1991). The application was rejected due to a number of issues with the site, all of these issues still exist today, yet the 'Site Assessment Form' now states that the site is potentially suitable for residential development. The original issues included the Green Belt status of the land, proximity to the sewage works with associated nuisances (odour and noise), pipe work laid across the site, and restricted access to site BD062 via Mow Lane and either Essex Drive or York Close. Grounds for objection to site development at BD062: 1. Proximity to sewage works and public health During the Local Plan process local residents have made numerous enquires to United Utilities concerning the sewage works / waste water treatment works at Marsh Green Road in Biddulph. The site currently processes the sewage for nearly all Biddulph residents. 1.1. Correspondence with United Utilities Issues raised by residents include the sewage processing capacity of the site, with concerns raised regarding the extra pressure generated by nearly 1,100 new homes, noise from site operations, odours emitted from the site, and sewer overflow with the consequential pollution of Biddulph Brook. Additionally, we now understand that Biddulph Grange Gardens and neighbouring housing developments at the Grange are soon to be connected to the sewage works system. Consequently, reducing the sewage works current ability to accommodate new housing developments in the town. United Utilities have stated in two separate items of correspondence with residents: " We have held a recent discussion with officers at the local planning</p>	<ul style="list-style-type: none"> • See response to PO5110 regarding Green Belt and PO377 regarding exceptional circumstances. • United Utilities infrastructure exists on the site and if the site is developed the developer would be required to work with United Utilities to reach an appropriate solution. • See response to PO4963 regarding ecology. • Screening would be required as part of any new development. • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding highways. • See response to PO377 regarding the Green infrastructure strategy. • See response to PO377 regarding loss of trees and hedgerows. • See response to PO329 regarding flooding. • See response to PO377 regarding community contribution. • See response to PO4963 regarding Visual Open Space. • See response to PO377 regarding perceived contradiction with the Core Strategy.

							<p>authority and Councillor Court regarding the emerging development plan and specifically discussed the proposed new housing near to the wastewater treatment works ." (United Utilities Reference: TH/CAS16-0031-0912 & CAS16-0031-7878) " In undertaking an assessment of which sites are most suitable, we feel it is appropriate to highlight to local planning authorities the proximity of sites near to wastewater treatment works. We have explained that a wastewater treatment works can result in emissions which include odour and noise. We have identified the need for the local planning authority to discuss any new housing near to the wastewater treatment works with their Environmental Health colleagues and give the sites very careful consideration when comparing these sites with potential alternative sites that maybe available to them ." (United Utilities Reference: TH/CAS16-0031-0912) United Utilities clearly stated in correspondence: " The position of United Utilities is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a wastewater treatment works ." (United Utilities Reference: TH/CAS16-0031-0912 & CAS16-0031-7878) Any housing development on sites adjoining Biddulph sewage works would constrain the sewage works operation, and potentially have a serious impact on United Utilities ability to undertake future upgrade/expansion works to their site, to accommodate additional housing in Biddulph. The developers draft site plan (submitted to SMDC in 2015) shows houses placed only 15 metres away from pumping equipment on the sewerage works site, which is in operation 24 hours a day. However, site BD062 remains in the SMDC Local Plan. 1.2. SMDC planning policy Development of site BD062 contradicts SMDC LDF Core Strategy SD Policy 4 where the Council states that it will refuse schemes which are pollution-sensitive adjacent to polluting developments. " The Council will ensure that the effects of pollution (air, land, noise, water, light) are avoided or mitigated by refusing schemes which are deemed to be (individually or cumulatively) environmentally unacceptable and by avoiding unacceptable amenity impacts by refusing schemes which are pollution-sensitive adjacent to polluting developments, or polluting schemes adjacent to pollution sensitive areas, in accordance with national guidance ." SMDC LDF Core Strategy SD Policy 4. 1.3. Pollution and nuisance Local residents on Essex Drive, York Close, Long Valley Road and Marsh Green Road already experience unacceptable amenity impacts in their homes from noise, odour and flooding from raw sewage discharge. In periods of heavy rain, raw sewage floods the system, backfills and pollutes the Biddulph Brook. The sewage system cannot cope and the site experiences an overflow of raw sewerage from</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							<p>the manhole covers. This sewage then runs directly into the Biddulph Brook (evidenced with sanitary products distributed around the sewerage treatment facility pipes located near to the end of Essex Drive). This has happened on a regular basis, with the latest occurrences being in November 2015 and March 2016, when either United Utilities or the Environment Agency cleared the pollution from Biddulph Brook. Further to this, the Environment Agency instructed United Utilities to attend site BD062 on Friday 13 May 2016, and undertake a clear up of materials discharged from the overflowing sewer junction box (Call reference 1434712). Photographs of materials were provided to the Environment Agency at the time, with the Environment Agency reporting back that United Utilities undertook a litter pick of the site. 1.4. Odours Residents in Gillow Heath (Essex Drive, York Close, Long Valley Road, Marsh Green Road) have repeatedly contacted United Utilities, Severn Trent, Environment Agency, and Staffordshire Moorlands District Council to deal with cases of noise, odour and raw sewage pollution. Regrettably, the numerous reports by residents over the years to different authorities and agencies have not been consolidated into a single reporting mechanism. United Utilities have also admitted to having no records of resident's previous reports when they were followed up. The site owner paid for a survey which stated: " the vast majority of the site immediately adjacent to the works is suitable for residential use ." Residents would ask when this assessment was undertaken, and why it contradicts the correspondence received from United Utilities above, who suggested SMDC discuss the site with their Environmental Health Officers. It is notable to residents that the odours emitted from the sewage works site are at their strongest during the summer months. The United Utilities engineers who visited site BD062 to undertake a cleanup in May 2016 stated: " it will always smell when it is hot and sunny ", " when it next rains the smell should go away ". Building houses on site BD062, which are even closer to the sewage works than existing housing will increase these unacceptable impacts, leading to an increase in incidents under the statutory nuisance regime. The Environmental Protection Act 1990 applies to the sewage works site, Section 79(1) of the act concerns 'Statutory Nuisances', including issues prejudicial to health, including smells emitted from industrial/trade/business premises, and noise emitted from a premises. The application of this legislation to a sewage works site was confirmed in a High Court decision from 2003 – Hounslow London Borough Council v Thames Water Utilities Ltd [2003] All ER (D) 347 (May) . The proceedings were commenced as Hounslow London Borough Council were concerned with the odour emitted from a sewage treatment works, as having a</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							<p>detrimental impact on the quality of the local environment for those living close by. Development on site BD062 contradicts the following SMDC LDF Core Strategy statement: “The NPPF directs Councils to proactively provide needed economic development - however decisions should ensure that new development is “appropriate for its location” in pollution/contamination terms; and more generally development should contribute to securing good standards of amenity and reducing pollution.” SMDC LDF Core Strategy. Section 8.2.11 1.5. Noise Construction activity on the Biddulph sewage works site in 2012 required a planning permission application to SMDC, with permission granted on 7 th June 2012 (Application Number: SM.12/02/153 W). The planning application process included consultation with residents who objected, raising concerns regarding noise from the site. Within the ‘Permission For Development’ document dated 7 th June 2012, The ‘Notification For Applicants’ section states “ Concern was raised by a local resident regarding noise. The residents property is located over 160 metres to the east of the site’s boundary and over 200 metres to the east of the proposed kiosks. The nearest residential properties are located over 60 metres to the West.” The nearest properties described above are actually located on Long Valley Road, the other side of a disused railway embankment, now used as a National Cycle Route 55. The owner of site BD062 commissioned an architect who produced a draft site plan, that shows the nearest houses to sewage site equipment being less than 15 metres away. Therefore, it is obvious that the residents of any new housing on site BD062 would experience disruption caused by the sewage works from both odours and noise. 1.6. Sewage works capacity The United Utilities sewage treatment works site in Biddulph is reported as having the capacity to serve a population equivalence of 17,000 residents (figure taken from a professional journal published by a United Utilities Senior Process Engineer). The population of Biddulph at the 2011 census was 19,892 residents. An increase of nearly 1,100 houses (approx. 3,000 people) will obviously require investment in this facility. United Utilities have stated: “ We will be closely monitoring the impact on our assets as development takes place to see how they perform and consider the need to invest at the most appropriate time.” (United Utilities Reference: TH/CAS16-0031-0912). This investment will not be facilitated by the inclusion of numerous small development sites, but rather fewer larger sites which are able to effectively utilise the Community Infrastructure Levy (CIL). Should site BD062 be built on, any future development work or expansion required at the sewage works site, or with associated pipe works, would be severely constrained with construction on site BD062. This may prevent</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							<p>the development of larger housing schemes in Biddulph and their connection to the sewage system. The Biddulph sewerage works site is compact and it would be unable to expand to the West or the South, as site BD062 adjoins these boundaries of the site. The Eastern boundary of the site is the Biddulph Brook, and to the North the ground is wet marshland. In conclusion, the presence of the sewage works site adjoining the development site, would suggest that this site should only be developed as a last option for Biddulph, due to environmental impacts and potentially negative impact on larger developments within the town. 2. Habitats and biodiversity The SMDC Local Plan Phase 1 Habitat Survey concluded “ the site is not recommended for potential development ”. It is the ONLY site surveyed where this was concluded in the habitat survey information that was adopted by the Council, and that other sites are more suitable. The site contains UK and Staffordshire Biodiversity Action Plan Priority Habitats and species and has the potential to be a Species Rich Farmland site. It is very well connected to other biodiverse habitats (evidenced in the Phase 1 Habitat survey). In the absence of a SMDC Green Infrastructure Strategy, the findings of this survey must be heeded. 2.1. Environmental policy Development would contradict Section 40 of the Natural Environment and Rural Communities Act 2006, and Policy C3, NE1 and section 8.7.17 of the SMDC LDF Core Strategy. This site is important because of its mix of habitats, particular species found and its vital wildlife corridor linkages (where the Biddulph Brook meets the Biddulph Valley Way). The SMDC Green Infrastructure Strategy, which was supposed to guide decision making about the environment and its linkages across the Local Plan area does not exist. In the absence of such strategic data, the Phase 1 Habitat Survey findings must be prioritised and used to guide decision making. “ The Green Infrastructure Strategy will inform the production of the Site Allocations Development Plan Document and will establish appropriate objectives and targets ” SMDC LDF Core Strategy section C3 Green Infrastructure 8.7.17 The inclusion of BD062 contradicts Section 40 of the Natural Environment and Rural Communities Act 2006, which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity. BD062 inclusion contradicts SMDC LDF Core Strategy Policy C3 Sustainable Communities where existing and potential sites of nature conservation value are linked, biodiversity is increased and the urban fringe is enhanced. Its inclusion contradicts SMDC LDF Core Strategy Policy NE1 Natural Environments and the protection of land suitable for inclusion in the Biodiversity Opportunity Mapping Species-Rich farmland zone. The site is within the Species Rich</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

							<p>Farmland Ecosystem Action Plan area, where priority habitats and species include Hedgerows, as well as several priority bird and mammal species present on the site. The primary objectives within this zone are the maintenance, restoration and expansion of species-rich grassland and to increase the connectivity of semi-natural habitats. This site has the potential to deliver both of these aims. Protecting and enhancing this site would help to deliver the aims of SMDC Local Plan Policy NE1 Natural Environment regarding the protection and improvement of the countryside and biodiversity, and identification of sites suitable for inclusion in the Biodiversity Opportunity Mapping Species-Rich farmland zone. The land has the potential to be designated as a Species Rich Farmland site. The site contains UK and Staffordshire Biodiversity Action Plan Priority Habitats and species (evidenced in the Habitat survey). Bats and badgers are active on site (local knowledge) and English Bluebells (indicating ancient hedgerows) and marsh Orchids uncommon to Staffordshire have been found on site (Phase 1 Habitat Survey findings). The Lockwood Hall Associates Ltd, Phase 1 Habitat Survey stated that the site is “ very well connected to other bio diverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site ”. This site is a vital wildlife corridor, linking linear habitats from two sides of the valley via the Biddulph Brook and Biddulph Valley Way. It is bounded by two ancient hedgerows to the west and east, and contains a swathe of broadleaved woodland with possible veteran trees. 2.2. Phase 1 Habitat Reports Two Phase 1 Habitat Surveys exist for this site. In addition to the SMDC survey carried out in October 2014 by Lockwood Hall Associates Ltd, an additional Phase 1 Habitat Survey was carried out in June 2014 by Leigh Ecology Ltd on behalf of Seabridge Developments (available publicly as part of a submitted planning application). In combination, these two studies give an insight into the potential importance of this site and the information below is gleaned from both of these studies. A number of flora species present on the site are classed as 'scoring' species within the Site of Biological Interest (SBI) Guideline checklists for: - Grasslands (Anthoxanthumodoratum, Dactylorhiza fuchsia, Deschampsiaespitosa, Juncus species, Lathyruspratensis, Plantage lanceolate, Ranunculusacris) -Woodlands (Hyacinthoides non-scripta, Myosotis sylvatica) -Wet woodlands (Cornussanguinea, Iris pseudacorus) These species indicate that the site has clearly not been subject to intensive management, and displays some semi-natural characteristics. It is the number and abundance of indicator species that determines a site's value, and these do not need to be rare or legally protected, although any such plants would add to the value. There are</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

							<p>actually protected plants on the site, despite attempts to remove them in December 2015. The site has potential to be designated a Local Wildlife Site once more detailed survey information is gathered and time should be allowed for this to take place before it could be considered for release from the greenbelt or as a potential housing site. The site displays some semi-natural characteristics and is within the Species Rich Farmland Ecosystem Action Plan Area, where priority habitats and species include Hedgerows, as well as several priority bird and mammal species present on site. The primary objectives within this zone are the maintenance, restoration and expansion of species-rich grassland and to increase the connectivity of semi-natural habitats. 2.3. SMDC Local Plan Phase 1 Habitat survey October 2014 The Evaluation (Section 5) of the Phase 1 Habitat survey undertaken for the SMDC Local Plan review in October 2014 (Site FID 122) concluded the site is: -Classed as a woodland / scrub habitat mosaic (Broadleaved woodland, dense and scattered shrub, semi-improved grassland, tall ruderal vegetation). -“ Very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site .” “ The importance of this site is notable as it contains a range of habitat structures of different heights .” -“ The variation in vegetation structure throughout the site has good potential to support a fairly complex and diverse ecology which is accentuated by the sites good connectivity .” -“ The site is attributed district ecological importance .” The report concluded (Conclusion section 7): “ The site has potential for protected species to be present due to the mosaic of habitats and habitat structure present, especially as the site is well connected to the wider countryside. Therefore the site is not recommended for potential development as the site is deemed to have district ecological importance ”. 2.4. Developer Phase 1 Habitat survey June 2014 (Leigh Ecology Ltd) The additional Phase 1 habitat survey was undertaken in June 2014 for the developer by Leigh Ecology Ltd. This survey was in more depth and recorded the following: -“ Areas of key ecological interest within the development site include the marshy area, which contains species indicative of habitats, which are both UK BAP and Staffordshire BAP priority habitats .” (Executive summary pg.5) -“ This area contained yellow flag iris <i>Iris pseudacorus</i>, and sedge species and two orchid species, common spotted orchid <i>Dactylorhiza fuchsii</i> and southern marsh orchid <i>Dactylorhiza praetermissa</i> .” (pg.11) A photograph of the Southern Marsh Orchid in flower on site was included within this report, when the report was submitted to the council. -“ The site boundary to the western boundary consist of hawthorn hedge. Hedgerows are a UK BAP and SBAP priority habitat .”</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							<p>(pg.14) -“ The site provided suitable nesting and foraging habitat (eg. Scrub area and shrubby broadleaved trees) for a range of bird species, including UK BAP species such as DunnockPrunellamodularis (hedge accentor) and starling Sturnus vulgaris, which together with another six species were recorded during the survey ” (pg.16) A list of birds observed during the survey is included in the report. Of particular concern are: - Dunnock (hedge accentor) – this bird is a UKBAP Priority species, with 100% of the European population occurring in the UK. The species is in decline and is Amber on the list of the Birds of Conservation Concern. -Starling (Sturnus vulgaris) – this bird is a UKBAP Priority species with a 78% decline in their population over 25 years. The species is in decline and is Red on the list of the Birds of Conservation Concern. -Willow Warbler (Phylloscopustrochilus) – The species is in decline and is Amber on the list of the Birds of Conservation Concern. 2.5. Local observations -Hedgerows - The eastern boundary contains at least 3 trees which could be classed as veteran trees. These are part of an ancient hedgerow which can clearly be seen running along the eastern boundary of the site. Two of these Ash trees are recorded as having potential bat roosts (SMDC Local Plan Phase 1 habitat survey). -Orchids - The presence of an orchid meadow is of particular concern. Orchids are themselves a key plant that indicates a species rich meadow. The presence of the Southern Marsh Orchid is of particular interest as it is listed in the Hopkins 1985 checklist as ‘Uncommon’ for Staffordshire and could trigger the classification as a ‘Site of Biological Importance’ due to its’ presence. -Bluebells - The site supports populations of native English bluebells Hyacinthoides non-scripta. It is an important indicator species for ancient woodland – in this case it could indicate the presence of ancient hedgerow on both the east and west margins of the site. It is found both within the development site itself and along the hedgerow margins. - Badgers - The Phase 1 Habitat report states that whilst Badger sets were located during the survey, no current Badger activity was observed. Local residents know that Badgers are present on the site, and they know that there is a badger set within the boundaries of site at the end of Essex Drive and York Close. Badgers from site BD062 have been frequent visitors to the gardens of homes in Essex Drive. -Bats - Presently, the gardens at the bottom of Essex Drive frequently have bats flying around at dusk each evening and there is a presence of bats within the trees on the development site, regardless of whether the trees are deemed suitable or not for bats per the report. A bat survey must be undertaken, as recommended in the Phase 1 Habitat report. The report also acknowledges that the trees and scrub areas are likely to provide abundant invertebrates, thus</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							<p>providing foraging opportunities for bats. 2.6. Conclusion The SMDC LDF Core Strategy section C3 Green Infrastructure 8.7.16 states: “ Staffordshire Moorlands contains a wide range of existing and potential green infrastructure assets, which can benefit from a strategic approach to ensure adequate protection is given to key features, to identify areas where new linkages and assets need to be created and to guide and manage development which may impact on such areas. The Core Strategy recognises the cross cutting function that green infrastructure has, and the benefits of integrating green infrastructure with social and economic priorities, which will help contribute to the development of sustainable communities .” Site BD062 links two vital wildlife corridors which travel through the Biddulph Valley and can be classed as a ‘potential green infrastructure asset’. In addition to this, the site contains species indicative of habitats, which are both UK BAP and Staffordshire BAP priority habitats. It has the potential to deliver a number of outcomes of the SMDC LDF Core Strategy, including the identification of sites suitable for inclusion in the Biodiversity Opportunity Mapping Species-Rich farmland zone. As such the evidence base suggests, and in fact actually states, that it should not be developed. 3. Greenbelt and Flood risk Should housing be constructed on the site, the infill of this existing Green Belt land would serve to connect the area of Gillow Heath with the Portland Drive estate and the main road, resulting in one continuous block of housing across the Biddulph valley. Site BD062 represents a clear break between the former separate hamlet/village Gillow Heath and the town of Biddulph. Should sites BD062, BD068, BD083 and BD87 all to be developed, Gillow Heath will change from a semi-rural community and become engulfed in a densely populated suburb without any green spaces separating the residential areas. This would alter the fundamental nature of Gillow Heath from that of a large hamlet/small village in the early 1960’s, to instead becoming part of the continuous urban sprawl of Biddulph stretching from Knypersley to Marsh Green Road. The site is currently protected as Greenbelt, and only considered suitable for release from the Greenbelt under exceptional circumstances. Removing this site from the Greenbelt prioritises development in the floodplain which contradicts SMDC LDF Core Strategy Policy SD 4 when a range of sites are available. Exceptional circumstances are not demonstrated. Its inclusion contradicts SMDC LDF Core Strategy Policy SD 4 where development proposed: “ will be guided to first make use of areas at no or low risk of flooding before areas at higher risk. ” The site is in Flood Zone 2. The presence of a wet meadow (Phase 1 Habitat Survey) evidences the current high level of surface water runoff this site experiences. Development will</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							<p>increase surface runoff in close proximity to a watercourse, reducing lag time into the Biddulph Brook leading to increased flooding. Development close to the waste water and sewerage treatment works will result in increased raw sewage overflow close to the new development as well as polluting the watercourse, Biddulph Brook. 4. Highways and Emergency Access The Site Assessment form states: " Been refused planning permission in past due to insufficient capacity of York Close/Essex Drive ", however " highways now say 40 dwellings ok ". The draft Site Assessment form dated September 2009 states: " Check highway standard ", what has happened since 2009? It was clearly identified in the previous application process (circa 1991) that the access roads were unsuitable and unsafe for additional development. In the intervening period there have been no material changes to the roads or their layouts that could have caused this position to have changed. Essex Drive and York Close Essex Drive and York Close are both dangerous for current traffic because of poor visibility around the bends, especially the first bend before the junction of Essex Drive and York Close. The road is so narrow that it does not allow cars to pass in opposite directions without cars having to manoeuvre occasionally onto the kerbs at the corners. Due to the narrow width of Essex Drive and York Close, local residents are required to park on the footpaths so that cars may freely move up and down the streets. The proposed development doubles the size of the estate and consequently the number of cars, whilst the two roads are barely adequate for the existing resident's vehicles. Mow Lane The Essex Drive and York Close estate can only be accessed from Mow Lane, which is extremely narrow and dangerous with numerous blind bends heading towards the main road. The lane is so narrow that it does not permit vehicles travelling in the opposite directions to clearly pass. Mow Lane also has either none or inadequate street lighting along its length, and no pavements or footpaths, with no room to add them at a later date. Mow Lane is in an extremely poor state of repair and the visibility at the junction with the A527 is very poor, being obstructed by both Halls Road and the Biddulph Arms. Over the years there have been a number of serious accidents at this junction. A number of serious car accidents have also occurred on Mow lane in recent years and the safety of the lane has been raised at numerous Gillow Heath Residents Association meetings with no action taken. The reason for the lack of action is that there is physically no space to improve the width of the lane or the layout of the junctions. Heavy vehicles cannot use Mow Lane and any increase in traffic would be very hazardous. The lane is extremely hazardous for pedestrians and especially for children walking to Woodhouse Middle</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							<p>School. Local residents generally do not walk along Mow Lane and undertake even short local journeys in their car rather than walk on the lane. Adding more housing to the areas would only result in more traffic and consequentially greater safety risks. Neither the distributor road (Mow Lane) nor the feeder roads (Essex Drive and York Close) meet the minimum standards for the SCC Highways Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane which cannot be avoided as there is no alternative access to this site. Mow Lane is a dangerous road with no footpath. There is no scope for the required improvements. 4.1. Road standards Residents are so concerned with development taking place on roads that are already unsuitable, they have measured the roads and compared their measurement to the SHCC Highways standards. The feeder road (Essex Drive) is far below the minimum design standard for radii of access road bends – 7.5m and 7.8m sequentially (Standard = 10m) The feeder roads (Essex Drive and York Close) are both below the minimum design standards for width - 4.9m and 4.7m respectively (Standard = 5m) The distributor road (Mow Lane) is significantly below minimum design guidelines with a minimum measured width of 4.25m (Standard = 6.7m). Access to Essex Drive off Mow Lane is restricted from both directions by bridges with a maximum width of 5.15m, below the design guide standard of 6.7m. The junction of Mow Lane with Congleton Road is significantly below required standards for vision splay (south) – measured at 23m. The junction spacing and convergence at Congleton Road are far below highways design guidelines. (Standard = 40m opposite and 80m adjacent.) (Mow Lane and Halls Road are 0m adjacent and Smithy Lane opposite is 18m). Fire tender access to within 45m of the most distal aspect of the development cannot be guaranteed due to narrow roads and regular on-street parking. Its inclusion contradicts SMDC LDF Core Strategy Policy T1 “ Ensuring that all new development is located where the highway network can satisfactorily accommodate traffic generated by the development or can be improved as part of the development .” 5. Unfettered Community Access and Public Rights of Way The local community have had unfettered access to this site since the estate was built in 1971. For over 40 years, there has been total open access and the land has been used by local residents. Three well-used Public Rights of Way cross this land, there are also a number of further public footpaths which cross the site. This includes a path that runs from the end of Essex Drive and joins the National Cycle way, this path has been in use for over 30 years, and should now be adopted as a Public Right of Way. This land should be designated as Visual Open Space, protecting the</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							ecology and allowing the wet meadow to do its natural job of reducing flooding in the watercourse by slowing down surface runoff. 6. Appropriate use of the Community Infrastructure Levy Site BD062 will deliver too few homes to add a measurable contribution to the Community Infrastructure Levy (CIL), it will not bring any direct benefit to the community of Gillow Heath. Its inclusion contradicts the SMDC LDF Core Strategy Biddulph Area Strategy where new housing allocation is prioritised on urban extension land to the west of the bypass and where developments help secure infrastructure improvements for the benefit of the newly developed part of the town.	
PO4947	Mr K Collier				BD062	Object	(Summary) The site shares a boundary with the only sewage works in Biddulph. This cant cope now with the current capacity. The SMDC states local plan phase 1 concludes the site recommended for housing. The site currently protected as a Green Belt and considered suitable for release under exceptional circumstances. The minimum standard for the SCC highways design guide policy. The local community have had an unfettered access to this site since 1971; it should be designated as visual open space. The few houses created will not add any measurable contribution to the community infrastructure. This sites should not be considered for housing because of the points raised above. There are more suitable sites around.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO5110 regarding Green Belt and PO377 regarding exceptional circumstances. • See response to PO4963 regarding highways. • See response to PO4963 regarding Visual Open Space. • See response to PO4963 regarding community access. • See response to PO377 regarding community contribution.
PO4949	Mrs A Jones				BD062	Object	The site by the water sewage works at Essex Drive should not be left as it is with no houses on it.	Comment noted.
PO4952	Mrs J Brennan				BD062	Object	We have lived here at Essex Drive for 38 + years and we had problems for the sewage works for all this time depending on the weather and the air conditions, to the point that during warm times all the windows and the doors had to be kept closed as the smell stung our throat. Also if one wanted to sell up it could have an effect whether a prospective buyer came on a stinky day. Also the access road is very narrow as most residents park in the street and park on the turning areas, Mow Lane is also a hazard so the increase in the traffic to the site would make it 40 times worse (that is only counting 1 car per household) There is no footpath on Mow Lane for school children and no way to step off Mow Lane to avoid the traffic when confronted with. The water table is high in this site so would increase the flow of rain water to the lower areas eventually flood the low lying land.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding highways. • See response to PO329 regarding flooding.
PO6263	Mr N Lunt				BD062	Object	(Summary) Building houses on this site adjacent to the sewage works cannot be considered a good strategy. Health concerns with building houses even close to the sewage work. Also existing roads Essex Drive and York Close are barely suitable for the current traffic and the distributor road, Mow Lane, is totally unsuitable as a means of accessing this site.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding highways.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO966	Mr Christopher Goldstraw				BD062	Object	<p>Do not built on site BD062. New houses should only be built where there is minimal environmental impact. Houses should not be built in such proximity works to a sewage works. Public health and proximity to sewage works The site shares a boundary with the only sewage works in Biddulph which is already working over its' designed capacity population of 17,000 people (2011 Biddulph census reported a population of 19,892). Local residents on Essex Drive and Marsh Green Road already experience unacceptable amenity impacts in their homes such as noise, odour and raw sewage flooding discharge. In periods of heavy rain, raw sewage floods the system, backfills and pollutes the Biddulph Brook. Building houses on this site even closer to the sewage works will increase these unacceptable impacts, leading to an increase in statutory nuisance incidents. It contradicts SMDC LDF Core Strategy SD Policy 4 where the Council states that it will refuse schemes which are pollution-sensitive adjacent to polluting developments. "The Council will ensure that the effects of pollution (air, land, noise, water, light) are avoided or mitigated by refusing schemes which are deemed to be (individually or cumulatively) environmentally unacceptable and by avoiding unacceptable amenity impacts by refusing schemes which are pollution-sensitive adjacent to polluting developments, or polluting schemes adjacent to pollution sensitive areas, in accordance with national guidance." SMDC LDF Core Strategy SD Policy 4. During periods of heavy rainfall, the sewerage system cannot cope and the site experiences an overflow of raw sewerage from the man-hole covers which then runs directly into the Biddulph Brook (evidenced with sanitary products distributed around the sewerage treatment facility pipes at the end of Essex Drive). This happens on a regular basis, with the latest occurrences being in November 2015 and March 2016, when both United Utilities and the Environment Agency were forced to clear the pollution. Residents in Gillow Heath (York Close, Essex Drive, Long Valley Road, Marsh Green Road) are repeatedly contacting United Utilities, Environment Agency, and Staffordshire Moorlands District Council to deal with cases of noise, odour and raw sewage pollution. Houses should not be built even closer than these. Development on site BD062 contradicts the following SMDC LDF Core Strategy statement: "The NPPF directs Councils to proactively provide needed economic development - however decisions should ensure that new development is "appropriate for its location" in pollution/contamination terms; and more generally development should contribute to securing good standards of amenity and reducing pollution." SMDC LDF Core Strategy. Section 8.2.11 The current capacity of the United Utilities sewage treatment works is reported to be serving up to</p>	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding ecology. • See response to PO377 regarding the Green infrastructure strategy. • See response to PO329 regarding flooding. • See response to PO5110 regarding Green Belt and PO377 regarding exceptional circumstances. • See response to PO4963 regarding highways.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							<p>17,000 residents. The population of Biddulph as at 2011 census was 19,892 residents. An increase of 885 houses (approx. 3,000 people) will obviously require investment in this facility. This will not be facilitated by the inclusion of numerous small development sites, but rather fewer larger sites which are able to effectively utilise the CIL. Habitats and biodiversity The SMDC Local Plan Phase 1 Habitat Survey concluded "...the site is not recommended for potential development..." It is the ONLY site surveyed where this was concluded, showing that other sites are more suitable. The site contains UK and Staffordshire Biodiversity Action Plan Priority Habitats and species and has the potential to be a Species Rich Farmland site. It is very well connected to other biodiverse habitats (evidenced in the Phase 1 Habitat survey). In the absence of a SMDC Green Infrastructure Strategy, the findings of this survey must be heeded. Development would contradict Section 40 of the Natural Environment and Rural Communities Act 2006, and Policy C3, NE1 and section 8.7.17 of the SMDC LDF Core Strategy. This site is important because of its mix of habitats, particular species found and its vital wildlife corridor linkages (where the Biddulph Brook meets the Biddulph Valley Way). The SMDC Green Infrastructure Strategy, which was supposed to guide decision making about the environment and its linkages across the Local Plan area does not exist. In the absence of such strategic data, the Phase 1 Habitat Survey findings must be prioritised and used to guide decision making. "The Green Infrastructure Strategy will inform the production of the Site Allocations Development Plan Document and will establish appropriate objectives and targets." SMDC LDF Core Strategy section C3 Green Infrastructure 8.7.17 Its inclusion contradicts Section 40 of the Natural Environment and Rural Communities Act 2006 which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity. Its inclusion contradicts SMDC LDF Core Strategy Policy C3 Sustainable Communities where existing and potential sites of nature conservation value are linked, biodiversity is increased and the urban fringe is enhanced. Its inclusion contradicts SMDC LDF Core Strategy Policy NE1 Natural Environments and the protection of land suitable for inclusion in the Biodiversity Opportunity Mapping Species-Rich farmland zone. The land has the potential to be designated as a Species Rich Farmland site. The site contains UK and Staffordshire Biodiversity Action Plan Priority Habitats and species (evidenced in the Habitat survey). Bats and badgers are active on site (local knowledge) and English Bluebells (indicating ancient hedgerows) and marsh Orchids uncommon to Staffordshire have been found on site (Phase 1 Habitat Survey</p>

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							<p>findings). The site has potential to be designated as a Local Wildlife Site once more detailed survey information is gathered and time should be allowed for this to take place before it could be considered for release from the greenbelt or as a potential housing site. The site displays some semi-natural characteristics and is within the Species Rich Farmland Ecosystem Action Plan Area, where priority habitats and species include Hedgerows, as well as several priority bird and mammal species present on site. The primary objectives within this zone are the maintenance, restoration and expansion of species-rich grassland and to increase the connectivity of semi-natural habitats. The Phase 1 Habitat Survey stated that the site is "...very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site." This site is a vital wildlife corridor, linking linear habitats from two sides of the valley via the Biddulph Brook and Biddulph Valley Way. It is bounded by two ancient hedgerows to the west and east, and contains a swathe of broadleaved woodland with possible veteran trees. Greenbelt and Flood risk The site is currently protected as Greenbelt, and only considered suitable for release from the Greenbelt under exceptional circumstances. Removing this site from the Greenbelt prioritises development in the floodplain which contradicts SMDC LDF Core Strategy Policy SD 4 when a range of sites are available. Exceptional circumstances are not demonstrated. It's inclusion contradicts SMDC LDF Core Strategy Policy SD 4 where development proposed..." will be guided to first make use of areas at no or low risk of flooding before areas at higher risk... " The site is in Flood Zone 2 The presence of a wet meadow (Phase 1 Habitat Survey) evidences the current high level of surface water runoff this site experiences. Development will increase surface runoff in close proximity to a watercourse, reducing lag time into the Biddulph Brook leading to increased flooding. Development close to the waste water and sewerage treatment works will result in increased raw sewage overflow close to the new development as well as polluting the watercourse, Biddulph Brook. Highways and Emergency Access Neither the distributor road (Mow Lane) nor the feeder roads (Essex Drive and York Close) meet the minimum standards for the SCC Highways Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane which cannot be avoided as there is no alternative access to this site. Mow Lane is a dangerous road with no footpath. There is no scope for the required improvements. The feeder road (Essex Drive) is far below the minimum design standard for radii of access road bends – 7.5m and 7.8m sequentially (Standard = 10m) The feeder</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							roads (Essex Drive and York Close) are both below the minimum design standards for width - 4.9m and 4.7m respectively (Standard = 5m) The distributor road (Mow Lane) is significantly below minimum design guidelines with a minimum measured width of 4.25m (Standard = 6.7m). Access to Essex Drive off Mow Lane is restricted from both directions by bridges with a maximum width of 5.15m, below the design guide standard of 6.7m. The junction of Mow Lane with Congleton Road is significantly below required standards for vision splay (south) – measured at 23m. The junction spacings and convergence at Congleton Road are far below highways design guidelines. (Standard = 40m opposite and 80m adjacent.) (Mow Lane and Halls Road are 0m adjacent and Smithy Lane opposite is 18m). Fire tender access to within 45m of the most distal aspect of the development cannot be guaranteed due to narrow roads and regular on-street parking. Its inclusion contradicts SMDC LDF Core Strategy Policy T1 “Ensuring that all new development is located where the highway network can satisfactorily accommodate traffic generated by the development or can be improved as part of the development.”	
PO987	Mr Peter Turner				BD062	Object	Relating to ALL Green Belt incursion proposals, SMDC has arbitrarily (i.e. not based on evidence of need, demand, and availability of developable land outside of the Green Belt) set local development targets based on a percentage allocation scheme. This mechanism does not recognise the intended permanence of Green Belt as defined within the National Planning Policy Framework (NPPF). Nor does this method withstand the tests for allowing development in the Green Belt thereby not demonstrating exceptional circumstances. On this basis the inclusion of Green Belt within the Local Plan will be challenged. It is also known that SMDC has identified developable land outside the Green Belt elsewhere within Staffordshire Moorlands, which, as directed by the NPPF, must be prioritised to be developed prior to removing any land from the Green Belt. On this basis the SMDC Green Belt review will be challenged. developing Green Belt within Biddulph will add to urban sprawl, which is key motive of protection of the Green Belt within the NPPF. The detail of this submission will be shared with elected members and the media. It is noted within the NPPF Paragraph 79 - SMDC failure to recognise permanence, openness or risk of urban sprawl The government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; The essential characteristics of Green Belts are their openness and their permanence. Paragraph 80 - SMDC failure to protect against urban sprawl, to protect countryside against encroachment, in urban regeneration as other sites	<ul style="list-style-type: none"> • See response to PO5110 regarding Green Belt and PO377 regarding exceptional circumstances. • See response to PO560 regarding the 20% portion of development allocated to Biddulph in the Core Strategy.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							<p>demonstrated as developable within the borough. Green Belt serves five purposes: ● to check the unrestricted sprawl of large built-up areas; ● to prevent neighbouring towns merging into one another; ● to assist in safeguarding the countryside from encroachment; ● to preserve the setting and special character of historic towns; and ● to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.</p> <p>Paragraph 81 - SMDC failing to plan positively to enhance positive use of Green Belt, retain and enhance amenity and biodiversity, also failing to improve damaged or derelict land. Once Green Belts have been defined, local planning authorities should plan positively to enhance the beneficial use of the Green Belt, such as looking for opportunities to provide access; to provide opportunities for outdoor sport and recreation; to retain and enhance landscapes, visual amenity and biodiversity; or to improve damaged and derelict land. Paragraph 83 - SMDC failure to demonstrate exceptional circumstances as other sites available in the borough outside of the Green Belt. Arbitrary approach to percentage allocation will be challenged. Failure to recognise the intended permanence of Green Belt. Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period. Paragraph 84 - SMDC to channel development within draft Local Plan to urban areas or areas outwith the Green Belt. When drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary. Paragraph 87 - SMDC failure to demonstrate very special circumstances as land outside the green belt available for development elsewhere within SMDC area. As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances. Paragraph 88 - SMDC failure to demonstrate very special circumstances as previously outlined. When considering any planning application, local planning authorities should ensure that substantial weight is given to any harm to the Green Belt. 'Very special circumstances' will not exist</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
							<p>unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm, is clearly outweighed by other considerations. Paragraph 89 - SMDC have not demonstrated or evidenced any of the requirements as detailed in this paragraph. A local planning authority should regard the construction of new buildings as inappropriate in Green Belt. Exceptions to this are: ● buildings for agriculture and forestry; Achieving sustainable development 21 ● provision of appropriate facilities for outdoor sport, outdoor recreation and for cemeteries, as long as it preserves the openness of the Green Belt and does not conflict with the purposes of including land within it; ● the extension or alteration of a building provided that it does not result in disproportionate additions over and above the size of the original building; ● the replacement of a building, provided the new building is in the same use and not materially larger than the one it replaces; ● limited infilling in villages, and limited affordable housing for local community needs under policies set out in the Local Plan; or ● limited infilling or the partial or complete redevelopment of previously developed sites (brownfield land), whether redundant or in continuing use (excluding temporary buildings), which would not have a greater impact on the openness of the Green Belt and the purpose of including land within it than the existing development. Paragraph 90 - SMDC have not demonstrated or evidenced any of the requirements as detailed in this paragraph. Certain other forms of development are also not inappropriate in Green Belt provided they preserve the openness of the Green Belt and do not conflict with the purposes of including land in Green Belt. These are: ● mineral extraction; ● engineering operations; ● local transport infrastructure which can demonstrate a requirement for a Green Belt location; ● the re-use of buildings provided that the buildings are of permanent and substantial construction; and ● development brought forward under a Community Right to Build Order. Inclusion of the green Belt will be challenged on all of the above NPPF Paragraphs.</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO4956	Mr and Mrs D P Pass				BD062	Object	Houses built here would make experience more odour than we already get on our street and surrounding areas. This would contradict the council's core strategy plans by not refusing the scheme which would be pollution sensitive and adequate to polluting developments. The habitat survey concluded that this site is well connected to other bio diverse habitats. Green Belt Land should only be released due to exceptional circumstances. The roads for access are too narrow and have no pavements. There are 2 pinch points on Mow Lane and blind corners. The local community have had access to this land for over 40 years. This land should be designated to for visual open space. Planning has been refused for since the sixties so what has suddenly happened or changed to make it viable now. The old Stannards Mill on Cross Street and the Old Mill Station Road, could the used for building or conversion into housing.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding ecology. • See response to PO5110 regarding Green Belt. • See response to PO4963 regarding highways. • See response to PO4963 regarding community access. • See response to PO5110 regarding use of mills.
PO4948	Mrs Alison Wickstead				BD062	Object	Building homes so near to the sewage works is positively horrible we have to put up the unpleasant smells already and we are not that near. Mow Lane is a death trap already and you have to take your life into your owns hands at the junction with Congleton Road, more traffic not to mention bulldozers etc. moving up and down the lane doesn't bear thinking about Essex Drive and York Close could not possible cope with more traffic due to the width + parked cars. The area, at the end on which you are considering building on is not worth destroying this beautiful field.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding highways. • See response to PO9981 regarding visual impact.
PO4967	Mrs S Stanway				BD062	Object	It doesn't make sense to build houses any closer to the sewage works in Biddulph than there are, given the problems residents are already having to cope with i.e.: noise, odour and now raw sewage, flooding. This is probably why it wasn't built on in the 1st place. I understand the sewage works is already working over its capacity, so these problems are only going to get worse as more houses are built wherever they are. Would it not be better to identify a suitable site for another sewage works and plan the new building's sites around this instead of numerous small development sites all over the place? Access to this plot of land of land is difficult: the main road (Mow Lane) and the feeder roads (Essex Drive and York Close) a very narrow but there are no alternative access to this site. Due to regular on street parking and the narrow roads Emergency vehicle access could be guaranteed to the furthest part of the plot.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding highways.
PO4966	Mr A Malbon				BD062	Object	My main objections are: Sewage works will need to expand at some point, Narrow road access in all parts of Gillow Heath especially York Close and Essex Drive. Service impact on Mow Lane with special effect at the Biddulph Arms junction. Increased car no's (40-60) on York Close (being a cul de sac) Green Belt is slowly being eroded.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding highways. • See response to PO5110 regarding Green Belt and PO377 regarding exceptional circumstances.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO4964	Mrs A Bagnall				BD062	Object	This is a very undesirable place for properties to be built by a sewage works. The roads round these country lanes will not accommodate the extra traffic.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding highways.
PO4961	Mrs M Brindley				BD062	Object	I moved to Essex Drive in March 2016. The 1 st thing that drew me to this area was the community spirit amongst the people that live here, secondly the roads butts onto Green Belt land. As I have a dog I enjoy the fact that I can walk her safely a very short distance from my home. The week I moved into Essex Drive I was aware of the awful stench coming from what I now know, is the sewage works. This happens on a regular basis, if the wind is blowing in the wrong direction. There a quite a few children who live in Essex Drive and it is a safe place for them to play out, this is very important for their social development. The road is very narrow and is unsuitable for HGV's, s apart from the destruction of the Green Belt the bio diversity of this field and removing valuable piece of flood plain, the road is totally unsuitable for heavy traffic. Another consideration is the risk of suitable schools to accommodate extra families and will put extra strain on the health services, this would be costly financially and an added stress to those workers in these services. This strives of complete lack of proper town planning and there are so many Brown Field sites within this area that can be utilised and empty houses that need to be looked into if the housing situation is so concerning at the moment. Proper planning with infrastructure taken into account is imperative before randomly building houses for profit. Will these houses be affordable or suitable for pensioners?	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding highways. • See response to PO4963 regarding ecology. • See response to PO329 regarding flooding. • See response to PO4936 regarding infrastructure. • See response to PO5110 regarding use of brownfield sites. • Need for additional housing stems from a number of factors, for example household formation, in-migration, linkages with future workforce, and other factors. The NPPF makes clear that housing projections are the starting point for assessing housing needs; however these additional factors should also be taken in to account in Council SHMAs. The Council's own housing need assessments are set out in its evidence base on the website. Note that this already takes into consideration empty properties in the Moorlands. • Affordable housing and housing suitable for older people will be provided as well as family housing.
PO4954	Mr D Bradbury				BD062	Object	We object to anymore housing in Gillow heath and the surrounding areas.	Comment noted.
PO4953	Mr R Hindmarsh				BD062	Object	As a resident of Mow Lane for 5 years I have seen several instances where the drainage system has not coped with the current demand. This has resulted pollution into the brook and sanitary items ending up in my neighbours gardens and the rear of their houses. Further stain on this already over worked system can only result in further issues for existing residents, in the Gillow Heath area. I also have major concerns on the added pressure and increased numbers of children at risk within the Biddulph Schooling System. The primary schools are already seeing an increase in the class sizes, and having fewer middle schools means that the increase will see even greater impact on the children in this age group.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO4936 regarding infrastructure.
PO4955	Mr J Shelly				BD062	Object	Gillow Heath, Essex Drive, York Close has insufficient roads, to take more traffic. The sewerage system won take any more. Mow Lane always floods in heavy rain and sewerage comes up from the man hole covers. I am sure there are more suitable sites around Biddulph??	<ul style="list-style-type: none"> • See response to PO4963 regarding highways. • See response to PO4963 regarding the Water Treatment Works. • See response to PO329 regarding flooding.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO4960	Mrs M Elmhurst				BD062	Object	The Sewage Works of Biddulph are next to this site. We already have quite a lot of unpleasant odours coming from this site throughout the year. There have also been some leakages into people's gardens and the brook at the bottom of the field. It would make matters far worse if more houses were built next to the sewage works. In addition, who would want to buy/rent a house next to a malodorous and potentially an unhealthy site? Site BD062 acts as some sort of floodplain. It helps to slow down the water which comes down the hill and from the track and it goes more slowly into the brook. I can remember several times when there was flooding further and downstream (even onto the man road). If there are houses and roads and drives on this field, the water will rush off it will cause further floods downstream more easily. Mow Lane is a very busy and dangerous road. It does not have any footpaths at all except for a short stretch near Wedgewood Lane. So it is very dangerous for pedestrians and especially school children walking to and from Woodhouse Middle School (there are two choices of road are Halls Road and Marsh Middle School which also have no footpaths). Older people parents with pushchairs. In fact all people expose themselves to considerable danger each time they walk on these roads. More dwellings, and therefore, more people would make this worse. The only exit into Mow Lane would be that leading to York Close and Essex Drive. Lorries, fire engines, ambulances, already find it hard to drive down these narrow roads and turnings not to mention in case of an emergency - at night for example, when many cars are already parked on the existing roads and pavements. Also there are lots of plants, birds, animals and insects to be found on this site, their habitat would be destroyed. We have noticed more buzzards, sparrow hawks and kestrels over recent years. I cannot understand who would benefit from this field being used for building on. The community, the local environment the habitat's, the road system, the support services would be put under much greater pressure, which I think is unacceptable. For these reasons, I do not agree with the redesignation of the site.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO329 regarding flooding. • See response to PO4963 regarding highways. • See response to PO4963 regarding ecology.
PO4959	Mr K Allen				BD062	Object	The roads are too narrow, the sewage works are all over capacity, and in Marsh Green Road there is a pumping station already put there for the houses that are already built. All these new houses will take the country side away and turn it into a town. There is not enough police for the population now; the schools are over populated now. It took over 40 years to get the bypass.	<ul style="list-style-type: none"> • See response to PO4963 regarding highways. • See response to PO4963 regarding the Water Treatment Works. • See response to PO5110 regarding Green Belt. • See response to PO4936 regarding infrastructure.
PO4957	Mr E Hilditch				BD062	Object	The site BD062 is too close to the sewage works which is over capacity at the moment. And will cause more flooding of sewage in the area.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO4935	Mrs J Moxon				BD062	Object	The roads are not suitable for the amount of houses. It has always been Green Belt and the children can play safely, the sewage field is marsh, Akesmore Lane is not suitable to carry traffic for 300 houses. The wildlife is going to be decimated, wildlife is very important for the environment.	<ul style="list-style-type: none"> • See response to PO4963 regarding highways. • See response to PO5110 regarding Green Belt. • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding ecology.
PO4937	Mr A Copeland				BD062	Object	Too much wildlife at stake here many birds nest on the land at the end of York Close + the sewage works are already over loaded.	<ul style="list-style-type: none"> • See response to PO4963 regarding ecology. • See response to PO4963 regarding the Water Treatment Works.
PO4938	Mrs I Latta				BD062	Object	This site shares a boundary with the only sewage works in Biddulph, which is already working above its desired capacity of 17000 people. We already experience unacceptable levels of noise and odours and raw sewage flooding the system during heavy rain. The local residents of Essex Drive and Marsh Green Road already experience unacceptable amenity impacts in their homes, such as noise odour, raw sewage and flooding, when the system back fills and pollutes Biddulph Brook and household drains. Building houses on this site even closer to the sewage works will increase these unacceptable impacts, leading to an increase in statutory nuisance incidents. It contradicts the SMDC LDF core strategy where the council had already states that it will refuse schemes which are pollution sensitive adjacent to polluting developments. Neither the distributor roads (Mow Lane) no feeder roads (Essex Drive and York Close) meet the minimum standards for the SCC Highway's Design guide policy. The roads bend radii are too small. There are 2 pinch points over bridges on Mow Lane which cannot be avoided as there is no alternative access to this site. Mow Lane very dangerous roads with no footpath on either side in parts. There is no scope for the required developments.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding highways.
PO4939	Mr D Nixon				BD062	Object	I think that more development in York Close and Essex Drive would put far too much strain on such small roads cannot accommodate a further 40 properties, which could go on 2 cars per household in total 80 cars./vehicles, plus the impact on the type of nature in this part of Gillow Heath which my family enjoy so much plus the risk of flooding and a large impact on the sewage works which is already under so much strain as we can sometimes smell and my son has been flooded twice since living here on Essex Drive the water came up into his back garden so no more houses in this area pleas.	<ul style="list-style-type: none"> • See response to PO4963 regarding highways. • See response to PO329 regarding flooding. • See response to PO4963 regarding the Water Treatment Works.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO4941 PO4940	Mr D Platt Mrs E Platt				BD062	Object	Site no BD062 should not be reclassified as potential building land, and therefore taken out of the Green Belt. The sewage works is very close (in fact next to this site) and very often leaks awful odours. I do not think it will be able to cope with the extra houses + people. I believe it's already working to capacity to cope. The land should be allowed to stay as a wet meadow to do its natural job, reduce flooding by slowing down the surface run off. Mow Lane is a very narrow lane and dangerous. There are no footpaths (only a short peace of entrance to Essex Drive) for pedestrians and young children use Halls Road to get to the school. The entrance to Mow Lane and Halls Road is a terrible junction. Essex Drive and York Close would be the only means off getting to site BD062. It is a narrow road and work lorries ambulances, fire engines and all other emergency vehicles would have problems. Also parked cars on the estate. The site is home to a lot of birds, insects, animals and plants. Sparrow Hawkes fly overhead frequently, it would be a shame to lose all of this. Who would want to live right next to a sewage works? Close than I am, when we brought our house in Long Valley Road, we did not know there was a sewage works until the smell reached us. Still we get very nasty smells, more houses and people would add to that. We were told years ago that this land would never be built on because it was close to a sewage works. There has been flooding further down the field and downstream. Therefore: I don't agree with the plans to build 40 houses in site no: BD062. I think this site should be included as visual or public open space within Biddulph.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO329 regarding flooding. • See response to PO4963 regarding highways. • See response to PO4963 regarding ecology. • See response to PO4963 regarding Visual Open Space.
PO4942	Mr I Frisby				BD062	Object	Mow Lane dangerous for 80 more cars that is if site BD062 is granted. Essex Drive and York Close is a narrow road to accept all this traffic in this modern work people will have 2 cars per household and with 400 plots you can imagine the chaos this would cause.	<ul style="list-style-type: none"> • See response to PO4963 regarding highways.
PO4943	Mr R Blood				BD062	Object	The proposed site adoptions a sewage works on occasion's raw sewage pollutes the Biddulph Brook, I am personally aware of the strong smells from the works at times, the main road onto this site (Mow Lane) is dangerous (no foot paths – narrow bridge's – narrow roads). Local people have had access to the site for some time. The land is currently in the Green Belt and I understand the land has been recommended for potential by survey by SMDC.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding highways. • See response to PO4963 regarding local access to site. • See response to PO5110 regarding Green Belt and PO377 regarding exceptional circumstances.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO4944	Mr D Cantrill				BD062	Object	Poor vehicle access. Increased traffic through York Close, making it dangerous for local residents and children. The ground is like a bog and would be very expensive to develop for building. Detrimental to the local wildlife. The land is used by locals for dog walks, and wildlife watching. There is a constant smell from the water treatment works. This development will destroy the view for people using the Biddulph Valley Way for leisure purposes. It will devalue property along Valley Road by destroying the view. All the access roads are just not up to the increased volume of traffic irrespective of the construction traffic.	<ul style="list-style-type: none"> • See response to PO4963 regarding highways. • See response to PO329 regarding flooding. • See response to PO4963 regarding ecology. • See response to PO4963 regarding local access to site. • See response to PO4963 regarding the Water Treatment Works. • Property values are not considered material in planning law.
PO4945	Mrs J Frisby				BD062	Object	(Summary) Essex Close and York Cloe are too narrow – already congested with on road parking due to narrow drives of the semi-detached properties, many of which are two car families. Mow Lane is already a busy road (narrow) and used by pedestrians – it needs no further traffic! Sewage works already working over capacity. The land in question has potential to be a species rich farmland site. It is currently protected by Green Belt. The site will deliver too few homes to add to any measurable contribution to the community infrastructure levy (CIL) it will not bring any direct benefit to Gillow Heath community.	<ul style="list-style-type: none"> • See response to PO4963 regarding highways. • See response to PO4963 regarding the Water Treatment Works. • See response to PO4963 regarding ecology. • See response to PO5110 regarding Green Belt. • See response to PO377 regarding community contribution.
PO4946	Mrs J Collier				BD062	Object	The site shares a boundary with the old sewage works in Biddulph. This is already over capacity. The SMDC local plan phase 1 concludes the site recommended for housing. The site currently protected as a Green Belt and considered suitable for release under exceptional circumstances Neither of the feeder roads meets the minimum standard for the SCC highways design guide policy. The local community have had an unfettered access to this site since 1971; it should be designated as visual open space. The few houses created will not add to any measurable contribution to the community infrastructure. There are other places offering better infrastructure and not currently in the Green Belt that could be used. Leaving to this area free to remain as it has been for over 40 years. It is an important area for the council residents.	<ul style="list-style-type: none"> • See response to PO4963 regarding the Water Treatment Works. • See response to PO5110 regarding Green Belt. • See response to PO4963 regarding highways. • See response to PO4963 regarding community access. • See response to PO4963 regarding Visual Open Space. • See response to PO377 regarding community contribution. • See response to PO4936 regarding Infrastructure.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO463	Mr Alan Nixon				BD063A		I do not believe that the housing plan is supported by housing demand or need and therefore development of green belt on this or any other extension of the boundary in Biddulph can be justified. The site at BD063A is wholly unsuitable for development with inadequate infrastructure available to the site and the constraints of the adjacent bridge, Knypersley First School and traffic lights already limiting vehicular movement to/from the site. Increasing the number of cars in the immediate vicinity will undoubtedly cause problems for local residents.	<ul style="list-style-type: none"> • The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district's full housing needs, including affordable housing, whilst taking into account migration and demographic change. • The 20% figure – Biddulph's share of the District housing requirement - is set out in the Council's Core Strategy, a planning document which has been through consultation and an examination by an independent inspector. • National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. • The Highway Authority have not raised any issues to suggest that this site could not be developed. Further work has been undertaken by the owner's agent to demonstrate that the site can be suitably accessed in accordance with highway standards.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO27	Mr Wayne Tracey				BD063A	Object	<p>Firstly why is this plot back in the Core strategy, it was removed some years ago due to objections and a personal visit by Sybil Ralphs. Also the named Councillor has stated the below in an interview with Leek Post and Times regarding the Greenbelt use: "Leader of Staffordshire Moorlands District Council, Sybil Ralphs, said this week she was totally against building on green belt land. She said: "No development should be allowed on greenfields when brownfield sites are available. "If any development impacts adversely on the quality of life for people who already live in areas proposed it should not go ahead." I put it to you that the Target of Housing required for Biddulph can be fulfilled using up the old Brownfield sites in the area. Taking the easy option of Greenbelt sites is morally wrong and constitutes the Guidelines set out By the Government. I would like to add some information from the "House of Commons library" with reference to Green Belt: "Government policy on protection for the green belt is set out in chapter 9 of the National Planning Policy Framework (NPPF). The fundamental aim of green belt policy is to prevent urban sprawl by keeping land permanently open. The NPPF states that that the construction of new buildings should be regarded as "inappropriate" for the green belt" Purpose of green belt land According to the Government's National Planning Policy Framework (NPPF), the green belt serves five purposes: • to check the unrestricted sprawl of large built-up areas; • to prevent neighbouring towns merging into one another; • to assist in safeguarding the countryside from encroachment; • to preserve the setting and special character of historic towns; and • to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.1 The CPRE (Campaign to Protect Rural England), describes green belts as a buffer between towns, and town and countryside whereby within their boundaries, damaged and derelict land can be improved and nature conservation encouraged. Also using the NPPF Document I would like you to note in section 9. It states the Green Belt should only be used in "Exceptional Circumstances" see below for the exert The NPPF also states that new green belts should only be established in "exceptional circumstances": The general extent of Green Belts across the country is already established. New Green Belts should only be established in exceptional circumstances, for example when planning for larger scale development such as new settlements or major urban extensions. It also makes clear that the construction of new buildings should be regarded as "inappropriate" for the green belt, although there are exceptions: 89. A local planning authority should regard the construction of new buildings as inappropriate in Green Belt. Exceptions to this are: • buildings for agriculture and forestry; • provision of appropriate facilities for outdoor sport, outdoor recreation and for cemeteries, as long as it preserves the openness of the Green Belt and does not conflict with the purposes of including land within it; 3 Department for Communities and Local Government, National Planning Policy Framework, March 2012 Number 00934, 30</p>	<ul style="list-style-type: none"> • A larger area was considered as a broad area for development as part of the Core Strategy but not included in the final version of the plan. The land in question is within the Green Belt. In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review (published in 2015) in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering a smaller variant of site BD063a for release from the Green Belt but considers that other options would be better. The capacity of the site has been reduced from 120 to 40 to reflect the results of the Green Belt Review. If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt. • Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph (particularly Yarn Mill and Minster Mill) would be appropriate for residential development. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping brownfield sites. • Sites at Victoria Colliery and Childerplay Road are within the Green Belt like BD063a. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy. • The District Council is working with the County Council on the issue of school capacity. The County has determined that additional school provision would be required to support housing growth at the Primary phase of education. At this early stage in the site selection process there are a number of options for delivering school capacity dependant on the sites selected to take forward.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
							<p>June 2015 6 • the extension or alteration of a building provided that it does not result in disproportionate additions over and above the size of the original building; • the replacement of a building, provided the new building is in the same use and not materially larger than the one it replaces; • limited infilling in villages, and limited affordable housing for local community needs under policies set out in the Local Plan; or • limited infilling or the partial or complete redevelopment of previously developed sites (brownfield land), whether redundant or in continuing use (excluding temporary buildings), which would not have a greater impact on the openness of the Green Belt and the purpose of including land within it than the existing development. With reference to the above guidelines, I don't feel that any "exceptional Circumstances" have been met. I believe there are lots of other plots listed that would be a lot more suitable and have no impact on the surrounding areas, infrastructure, landscape etc Since receiving the information from yourselves, I took the liberty to speak to a Local Head Mistress at a school in Biddulph, she believes that before more houses are constructed a school should be built to cope with the current demand, and certainly a better road network, especially the ones around the site(s) mentioned above. Schools in biddulph are currently full and will be for the next 4-5 years, this is based on figures available to the school network, using births etc. I have some images of the roads around proposed site BD063a, these are images gathered by myself and a neighbour over the past 10 years, it clearly shows that the road network cannot cope with the current residents. The congestion at the local surrounding Schools during hour leaving and arrival times is total mayhem, and the rush hour times are just as bad, the images will be posted with this document to support my case. I strongly object to the proposal to any housing development on Green Belt sites in the country and especially the ones in question.</p>	<ul style="list-style-type: none"> See response to PO463 regarding highways.
PO251	Mr Thomas Faughnan				BD063A	Object	<p>This is green belt land and should remain so. There are over 2000 houses currently for sale in Biddulph therefore why do we need to add another 885. In the recent green belt review of November 2015 the area covered by BD063A makes a 'significant contribution to maintain separation, prevent encroachment and preserve setting, plus a contribution to check sprawl'. This is the only area designated as significant in this review to still appear on the preferred options map, and it is also not included in Appendix C i.e. Sites with potential for release without damaging Green Belt purposes.</p>	<ul style="list-style-type: none"> Need for additional housing stems from a number of factors, for example household formation, in-migration, linkages with future workforce, and other factors. The NPPF makes clear that housing projections are the starting point for assessing housing needs; however these additional factors should also be taken in to account in Council SHMAs. The Council's own housing need assessments are set out in its evidence base on the website. Note that this already takes into consideration empty properties in the Moorlands. See response to PO27 regarding Green Belt Review.
PO209	Mr Stephen Platt				BD063A	Object	<p>i object to any ammendments on the greenbelt</p>	<ul style="list-style-type: none"> Comments noted.
PO66	Mrs Clare Tracey				BD063A	Object	<p>Firstly "Greenbelt Land is Protected" under many laws in this country, and should only be used as a last resorts, as there are many Brownfield sites available in the district and also Greenfield sites, I can see no lawful reason to use any of the proposed Greenbelt sites</p>	<ul style="list-style-type: none"> See response to PO27 regarding Green Belt Review. See response to PO27 regarding use of brownfield sites including mills and land at Victoria Colliery and

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
							<p>in the core strategy, particularly this one. Can the council provide any strategy or information showing the plans to use up current Brownfield sites in Biddulph before we start destroying the landscape. I personally think we are taking the easy option, I would like to see more effort from the council in way of producing residents information about Brownfield Sites use, similar to the efforts displayed with the altering of Brownfield Sites. A huge Review was commissioned and compiled by “Amec Foster Wheeler” Can we not commission a review into using up Brownfield Sites, and also perhaps another review in the houses built on the Uplands Mill site that are currently not selling? After moving into our new property 4 months ago we love the views and use the public right of way on a regular basis, this particular “public right of way” runs through BD063A. The proposed site is Filled with Nature/Wildlife and picturesque views, building 40 Houses on this Famers Field is morally wrong, this is why the site is GreenBelt to start with, to Prevent “Urban Sprawl”. Doing this is would destroy the landscape and the village, de value the neighbourhood. I would also like to point out that since moving into the property it is quite apparent that the road network around BD063a simply cannot cope with current traffic and volume, 1 car can pass over the small bridge on Newpool road, this is packed with Traffic during School Runs and Rush hour. Cars are left abandoned as the roads are too narrow for parking. Emergency Services even struggle when trying to cross the bridge, buses and Lorries are commonly stuck and reversing to allow one to pass. Also, the local schools are full, I have a 6 Year old in Knypersley First School and I have a relative who works in the school, the school is full and is planned to be full for 4-5 years. This is the same for most schools in Biddulph. Where are the influx of children that would come with all of these homes get educated? Perhaps the council should first improve the Infrastructure and possibly build another school to cope, before building 100’s of houses in an area already over populated and with a road network bursting with traffic. I have now noticed that in new plans that a first school is now proposed. In The winter of 2014 we purchased our home, paid a lot of money for it, and stretched ourselves to have our forever home, with unhindered views surrounded by “PROTECTED” Greenbelt, if this proposal happened the devaluation of about 30 Properties will happen, not to mention the congestion around the area. Could the council provide me a list of Protected Greenbelt plots that could possibly remain greenbelt in the Future? What is the point in having the law in place if in years to come you will simply change the status, it was given the greenbelt status for a very good and genuine reason. Suitable sites would be BD071 + BD071A + BD106 + BD156, these are better suited as the road can cope with volume of traffic as it lines the Bypass. I strongly object to the proposal to any housing development on Green Belt sites.</p>	<p>Childerplay.</p> <ul style="list-style-type: none"> • The Council’s Strategic Housing Land Availability Assessment reviews available sites in Biddulph including brownfield sites. • See response to PO251 regarding empty properties. • Public footpaths can be maintained or re-directed. This issue would be considered at the planning application stage. • The Council uses evidence to justify its selection of ‘Preferred’ allocation sites from wider sites, including ecological evidence: This site was subject to a Phase I ecological survey in 2014 and a later 2016 ecology study considered the scope for ‘local wildlife site’ (ie.SBI) designation for all preferred option sites. These studies set out evaluations of the sites followed by recommended further surveys/actions in the event of future development. The Council would expect subsequent schemes to take account of this evidence; further Policy NE1 allows for the Council to require ecological mitigatory or compensatory measures where appropriate. Note that ecology evidence must be weighed against all other relevant evidence when the Council selects ‘Preferred’ sites. • The Council’s Landscape, Local Green Space & Heritage Impact Study (August 2016) concludes that the land is of low landscape sensitivity. • Property values are not considered material in planning law. • See response to PO463 regarding highways. • The District Council is working with the County Council on the issue of school capacity. The County has determined that additional school provision would be required to support housing growth at the Primary phase of education. At this early stage in the site selection process there are a number of options for delivering school capacity dependant on the sites selected to take forward. • BD071 + BD071A + BD106 + BD156 are already included in the Draft Local Plan and Green Belt land is needed over and above these sites to meet Biddulph’s housing requirements.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO214	Mrs Christine Faughnan				BD063A	Object	The National Planning Policy Framework states that green belt will not be built on unless there are exceptional circumstances - there are no exceptional circumstances on this land. The access point will be between a bend and the brow of a hill. There will be a loss of privacy and light. The green belt review states that there are better areas to use than BD063a, to the west of Biddulph. Newpool Road is already a busy road with traffic jams at school times by the bridge. Land off Childerplay road would be more suitable for housing.	<ul style="list-style-type: none"> • See response to PO27 regarding Green Belt Review. • See response to PO463 regarding highways. • Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations. • See response to PO27 regarding use of brownfield sites including mills and land at Victoria Colliery and Childerplay.
PO283	Mrs Sandra Walley				BD063A	Object	The infrastructure of Newpool Road, the actual road, the bridge, the access to the proposed site all are not suitable. The local school is full. There are already numerous congestion issues on Newpool Road, and these will be severely increased with the proposed 40 properties and all the extra traffic that would bring. George Osbourne MP stated in the House of Commons 25th May 2016 "We will not be using Green Belt to build houses when other better options are available". There are Brown Field sites within the Biddulph Boundaries, some of these are far more suitable, they already have adequate infrastructure in place. Also, I feel that there are many empty properties in Biddulph that appear to be surplus to requirements. There is no new employment in Biddulph, the new house owners will need to commute, again putting serious stress on the transport system. Has anyone noticed that the Network Rail public transport infrastructure does not run through Biddulph?	<ul style="list-style-type: none"> • See response to PO463 regarding highways. • See response to PO66 regarding education. • See response to PO27 regarding use of brownfield sites including mills and land at Victoria Colliery and Childerplay. • See response to PO251 regarding empty properties. • New employment areas are also proposed for Biddulph in the draft Local Plan.
PO368	Ms Deborah Johnston				BD063A	Object	Building 40 houses on greenbelt land totally contradicts what greenbelt land policy was devised for which was to control urban growth for the foreseeable future and to ensure that the land is permanently open and is an area where agriculture, forestry and outdoor leisure can prevail. When we lose open greenbelt land, we lose more than just a view, a space to run or play, an easy escape from the city or valuable farmland. We lose land that has its own identity and plays its own role in England's heritage. Instead of building on it we should be using it to its best effect. Instead of an urban sprawl people would like to see more trees planted, farm animals grazing there and more food grow, by providing more local produce it will help the environment and reduce food miles. The openness of greenbelt land needs to be cherished and protected permanently not to build an urban development. Once this greenbelt land has been built on its gone forever and future generations will not have the pleasure of looking out on to the land and enjoying the lushness and wildlife that this greenbelt land provides. Stop taking the easy option and leave greenbelt land alone and start using the brownfield sites that have not even been considered.	<ul style="list-style-type: none"> • See response to PO27 regarding Green Belt Review. • See response to PO27 regarding use of brownfield sites including mills and land at Victoria Colliery and Childerplay.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO713	Ms Ruth Rowland				BD063A	Object	<p>I object to the Newpool Road/Meadowside development site (BD063A) on the following grounds: Nature conservation Flood risk Infrastructure - schools Infrastructure - traffic and transport Landscape and tourism Amenity Scale of development Government policy 1.) The area is currently a haven to wildlife including protected species (owls and bats). 2.) This section of agricultural land is listed as one of the very few 'best areas' in North Staffs and Derbyshire. It should be preserved. (Agricultural lands classification map for the West Midlands): http://www.soilenviromentsservices.co.uk/agricultural-land-survey/?gclid=CjwKEAjwkPS6BRD2ioKR7K245jASJAD1ZqHOTtBoEWqCk23nT-mOn7fQz33aildwUNHqh9PMhyvgQxoCSLnw_wcB 3.) Biddulph is deemed the 'Garden Town of Staffordshire'. The area should not be developing greenbelt land, but making the area more attractive to tourists, thereby boosting the economy. 4.) The proposed sight will increase noise pollution, air pollution, light pollution and visual pollution. 5) Ancient trees and hedgerows could be lost or damaged. 6.) There will be a loss of privacy, and loss of light to current residents. 7.) The council have not taken into account the current guideline for increased dwellings, which is now 43% of the 6000 originally proposed. 8.) Educational, health and dental provision is at full capacity and cannot support proposed increases in population. 9.) Knypersley First School is a few hundred yards away from the proposed site and there is already traffic congestion. Parking is at a premium, with the school run becoming increasingly dangerous to pedestrians and motorists alike. 10.) Full consideration has not been given to brownfield sites within Biddulph. 11.) Part of BD063a was the site of a Victorian mine and contains disused mine shafts. 12.) Suggested suitable employment sites are totally ill founded when unoccupied retail and commercial buildings remain in Biddulph and Brown Lees Industrial Estate. 13.) The narrow farm track would not provide a safe exit for vehicles using the proposed site. Several accidents have happened at the junction of Towerhill Road and Newpool Road. This development would exacerbate the problem. The proposed 120 dwellings could generate 150 to 200+ extra cars. 14.) Residential access to BD063A would be shared with Newpool Farm. Agricultural traffic, including cattle and hay-bearing trucks and tractors would make this unsuitable and further congested.</p>	<ul style="list-style-type: none"> • See response to PO66 regarding ecology. • The Environment Agency has stated that the area is not affected by flooding. Any drainage issues on the land could be resolved through new development. • See response to PO463 regarding infrastructure. • See response to PO463 regarding highways. • See response to PO66 regarding landscape impact. • See response to PO463 regarding housing need. • If the district council considered that a development may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts. In addition the district council continually monitors air quality across the district and regularly undertakes review and assessments of this data to identify areas where the traffic could have an unacceptable impact on local air quality. • The land has an agricultural classification of Grade 3 which means that it is good to moderate. It is up to the Council to balance all the planning issues in determining whether to select a site for development in the Local Plan. • If development takes place on this site any protected trees would be preserved unless there are exceptional circumstances in which case re-planting would be required. Soft landscaping would be integrated into any scheme. If the site is developed hedgerows would be retained within the scheme layout wherever possible. • See response to PO214 regarding residential amenity. • The Council is aware of mining issues which affect a number of green field sites around Biddulph and investigative work will take place in these areas prior to the commencement of any development. • See response to PO27 regarding consideration of brownfield sites. • The Council's employment assessment already takes into account empty employment units in calculating future needs for employment land in the District.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO805 PO813	Mrs Sue Ward Mr Arthur Ward				BD063A	Object	<p>A. I wish to raise my objections to the Newpool Road/Meadowside site (BD063A). I feel that the plans presented by the Council are greatly flawed for the following reasons:- Shouldn't domiciliary increases be viewed from a Staffordshire county perspective when so many factories & Pot Banks lie derelict within the Stoke-on-Trent area and other large towns? The Council haven't produced any plans for any increase in educational, health, dental or utility provisions. All the areas are at full capacity and cannot withstand the proposed increases in population within this area. Full consideration has not been given to brownfield sites within Biddulph - the derelict mill on Station Road is not included in the current Option Site Allocations but is an absolute eyesore and long overdue for demolition. This is a desirable site perfect for the construction of apartments and ideally located being close to the town centre. Also the area bordered by Cross Street, Stringer Street and Walley Street is in need of comprehensive redevelopment and has been a blot on the town centre for years – many of the buildings are of no architectural merit and should have been demolished years ago to make way for modern living/work units. The suggested suitable employment sites seem totally ill founded when within this area we have unoccupied retail and commercial buildings within Biddulph, in addition to vacant land within the Brown Lees Industrial Estate. Has any consideration been given to the use of some of the Open spaces for housing and replace that Open Space from Greenbelt land? B. I totally support all the objections for the use of Greenbelt land for some of these sites. The use of BD117, BD76A and BD76 for housing would provide the majority of land for the area's housing based on point A1 above. C. Having lived on Newpool Road for over 20 years and have first-hand knowledge of the points below. My main objection is to BD063A proposal of 40 dwellings for the following geographical reasons:- 1. Currently the only access to this site is a single-farm-track with a bungalow one side of it and a house the other. Even with the removal of the thick hedge it would be a very narrow two-way road. 2. This entrance is immediately after a bend at the brow of a hill making it a very dangerous exit onto Newpool Road at any time of the day. People use Newpool Road to avoid the speed camera on Tunstall Road and the speed humps on Lyneside Road. 3. The proposed 40 new dwelling will probably generate between 60 to 110 extra vehicles using Newpool Road which is not and never has been a road for major traffic. The Lyneside Road and the Brown Lees developments had a serious effect on the current traffic problems but this development proposal ensures dangerous traffic with potential fatalities. 4. The "old railway bridge" area which lies between the school and the proposed site BD063a access is narrow & virtually impossible to negotiate around school times and rush hour especially for emergency vehicles, buses or any delivery lorry. It is not unusual to see one or other of them stuck and reversing to allow other to pass. 5. Knypersley First School is just 1/4 mile away from this</p>	<ul style="list-style-type: none"> • Housing allocations are needed to ensure the District's housing requirement is met. Each District in Staffordshire has its own housing requirement. • See response to PO463 regarding infrastructure. • See response to PO27 regarding consideration of brownfield sites. • See response to PO713 regarding empty employment units. • Open space needs to be accessible to local communities so developing it and replacing it outside the town in the green belt is not considered to be a satisfactory approach in planning policy. • The Council is looking to meet the future employment land needs of the District in the period to 2031 – refer to its employment land assessment for further details. • See response to PO463 regarding highways. • See response to PO66 regarding ecology. • See response to PO27 regarding Green Belt Review.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Objection/General Comment	Consultee / Agent Comments	Officer Response
							<p>proposed site, next to the 'traffic light controlled' crossroads with A527, Tunstall Road. Currently during rush hour and pick up/drop off times at Knypersley First School parked cars are on both sides of the road (and on the adjoining roads of Meadowside and Lyneside) exacerbate the situation and result in total traffic chaos. D. The site has an abundance of wildlife and picturesque views, the building proposal is immoral, the site is Green Belt land - the National Planning Policy Framework (NPPF) states : that Green Belt land is to be protected and requires exceptional circumstances to be built on - there is nothing exceptional about the Council's plans to build on unspoilt land to meet their current housing target. that Brownfield sites are to be prioritised over the development of green field and certainly Green Belt sites - these plans offer up Greenbelt in advance of Brownfield site development. that merging of communities is to be prevented - yet development of site BD063A will lose the individual identities currently held between Knypersley and Biddulph. that infrastructure must come first - yet the outline ideas to provide infrastructure are either not in place or are not time lined in advance of the proposed developments. There are currently no plans to develop new healthcare within these massive scale extensions of population.</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO711 PO721	Mr Graham Mellor Mrs Gail Mellor				BD063A	Object	<p>The proposal to build on greenbelt land off Newpool Road (BD063A) would have an adverse impact on the immediate area which would significantly outweigh any benefits. The current lie of the ground allows water, through natural drainage, to percolate through the soil and thus disperse via natural means. If the area were to become "hard standing" then there would be little doubt that existing properties will be seriously affected by runoff water, after rain and/or snowstorms. The land falls away considerably towards the "tin bridge" area. Properties in this vicinity would be affected as well as being greatly overlooked by any buildings on the higher ground behind them. This problem currently affects other properties higher up the land. The proposal would exacerbate the situation decreasing the ability of standing water to percolate away. Access to the proposed site would mean an increase in vehicles using Newpool Road - a well-known and much used "rat run"/shortcut to avoid the main Tunstall Road and it's, monitored, speed restrictions and hold ups. There are no monitored speed restrictions on Newpool Road, which is quite obvious to residents living in the proximity. Many near miss accidents are observed, both for pedestrians and vehicles, on a daily basis. There is a blind spot at the junction with Lyneside Road which is proceeded a few yards up the road by a bend on the brow of a hill-where the site access is proposed. An increase of at least fifty additional vehicles plus delivery and collection vehicles along with a significant increase in pedestrians will surely increase the likelihood of more mayhem, to an already busy and unmonitored roadway on a hill, on a bend and at a blind spot. Common sense must prevail and make potential accident prevention paramount. The site proposed is an area of natural beauty and greenbelt. It consists of mature hedgerows and large trees on open farmland and is home to many species of wild life. It is accessible via public footpaths and is used by hikers, ramblers and locals alike. It is an amenity that cannot be replaced. It should be preserved for future generations. It appears that it is better planning to preserve brown field sites, such as the old Victoria Colliery, Childerplay and land purchased by the owners of the car wash on the A527, all available for building, than preserve our natural heritage. I question the need to have to object to this proposal - again. It is only a few years ago that this site was deemed unsuitable for development. Will I have to spend the rest of my years wondering when the next attack is due? As an aside I received confirmation, from yourselves, that you had received my objection on the last occasion but it does not appear on your records. Is there any reason for this? I am also aware of others who have experienced the same situation.</p>	<ul style="list-style-type: none"> • See response to PO713 regarding drainage. • See response to PO214 regarding residential amenity. • See response to PO463 regarding highways. • See response to PO27 regarding Green Belt Review. • See response to PO66 regarding ecology. • See response to PO66 regarding loss of public footpath. • See response to PO27 regarding Victoria Colliery and Childerplay Road. • See response to PO27 regarding the mills. • A larger area was considered as a broad area for development as part of the Core Strategy but not included in the final version of the plan. • Regarding comments made in response to the previous consultation, the data was published in a different format which did not include the names of everyone who objected, just a list of the issues raised in their objections and Council responses. Only the statutory bodies (e.g. Environment Agency) were named in the report and not private individuals.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO694	Dr P R Rowland				BD063A	Object	The development will result in the loss of valuable greenbelt, and is directly contradictory to the designated aims of Green Belt. In particular it will lead to the sprawl of built-up areas. The loss of countryside to urban encroachment Wildlife, in particular bats, and owls live in this area. Loss of valuable hedge rows and trees (some ancient) would result in loss of habitat for this wildlife. The visual impact will be ugly, and adversely impact on the unique rural flavour of the area. Ignores the alternatives of recycling derelict or other urban land available in the area. In addition, It will cause a loss of privacy for many families. There would definitely be a loss appeal to visit, live or remain in the area. Living conditions of local people will deteriorate due to noise, pollution, light pollution, overcrowded medical and school facilities. Safety of drivers and pedestrians will be compromised, especially schoolchildren attending Knypersley First School and Park Middle School (already heavily congested on school days.) Do these schools have the capacity to receive the influx of additional children, or, the ground and resources to be expanded? Access to this site is restricted; currently a farm track with houses each side. Biddulph/Knypersley is already lacking in facilities for outdoor sport or recreation. Again in keeping with government policies, the local authority should be engaged in positive, forward thinking, long term plans, to quote Government Planning Practice Guidance "Once Green Belts have been defined, local planning authorities should plan positively to enhance the beneficial use of the Green Belt, such as looking for opportunities to provide access; to provide opportunities for outdoor sport and recreation; to retain and enhance landscapes, visual amenity and biodiversity; or to improve damaged and derelict land."	<ul style="list-style-type: none"> • See response to PO463 regarding highways. • See response to PO66 regarding ecology. • See response to PO713 regarding hedgerows and trees. • See response to PO214 regarding residential amenity • See response to PO463 regarding infrastructure • See response to PO463 regarding education capacity. • See response to PO463 regarding highways / access to site. • A Public Open Space Study is underway. • See response to PO27 regarding Green Belt Review. • See response to PO27 regarding brownfield land including the mills. • See response to PO27 regarding Victoria Colliery and Childerplay Road.
PO783	Mrs Anne Barnsley				BD063A	Object	I wish to object to the proposed BD063a site Newpool Road/Meadowside – this area is Green Belt land and is used as working agricultural land that produces at least two crops a year, it is also in use for cattle grazing. The road infrastructure cannot currently deal with the volume of traffic using Newpool Road – this is already a busy road used by drivers avoiding the speed cameras on Tunstall Road, the speed humps on Lyneside Road and is the main route through to Mow Cop and Brown Lees. The "tin bridge" is narrow and a severe hazard and can only allow for single vehicle crossing when large vehicles ie. buses, lorries, tractors attempt to cross over. More importantly this hazard also affects the Emergency Services! During rush hour and pick up/drop off times at Knypersley First School parked cars on both sides of the road (and on adjoining roads – Meadowside and Lyneside Road) exacerbate the situation and result in traffic chaos. The proposed access to site BD063A is on a dangerous bend and the brow of a hill on Newpool Road; this raises major concerns regarding safe visibility for both cars and pedestrians exiting and entering the proposed site. The addition of 40 houses on this proposed site will cause increased traffic flow of approximately 100 cars which will only add to the existing traffic problems within	<ul style="list-style-type: none"> • See response to PO27 regarding Green Belt Review. • See response to PO27 regarding exceptional circumstances for Green Belt Development. • See response to PO713 regarding loss of agricultural land. • See response to PO463 regarding highways. • See response to PO463 regarding access to site. • See response to PO463 regarding education capacity. • See response to PO463 regarding infrastructure capacity. • See response to PO66 regarding ecology. • See response to PO27 regarding the mills. • See response to PO27 regarding Victoria Colliery and Childerplay Road. • See response to PO27 regarding brownfield land.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
							<p>this overburdened area. Knypersley First School (located at the junction of Tunstall Road/Newpool Road) is currently full to capacity and projected to be so for the next 4-5 years; this also applies to other schools in the area. In addition, local Doctors/Dentists have no capacity to accommodate new patients. The site has an abundance of wildlife and picturesque views, the building proposal is immoral, the site is Green Belt land - the National Planning Policy Framework (NPPF) states : that Green Belt land is to be protected and requires exceptional circumstances to be built on. There is nothing exceptional about the Council's plans to build on unspoilt land to meet their current housing target. that Brownfield sites are to be prioritised over the development of green field and certainly Green Belt sites - these plans offer up Green Belt in advance of Brownfield site development. that merging of communities is to be prevented - yet development of site BD063A will lose the individual identities currently held between Knypersley and Biddulph. that infrastructure must come first - yet the outline ideas to provide infrastructure are either not in place or are not time lined in advance of the proposed developments. There are currently no plans to develop new healthcare within these massive scale extensions of population. Government policy is that Brownfield sites are to be prioritised over the development of Greenfield and certainly Green Belt sites – the derelict mill on Station Road is not included in the current Option Site Allocations but is an absolute eyesore and long overdue for demolition. This is a desirable site perfect for the construction of apartments and ideally located being close to Biddulph town centre. Also the area bordered by Cross Street, Stringer Street and Walley Street is in need of comprehensive redevelopment and has been a blot on the town centre for years - many of the buildings are of no architectural merit and should have been demolished years ago to make way for modern living/work units. Biddulph and the neighbouring areas are a lovely part of the Staffordshire Moorlands and as such should be protected. I am of the firm belief that a stop should be put to this proposed development and any destruction of Green Belt land. Site BD117 - Situated on the A527 on the outskirts of the town - this site has currently been identified as a "Potential Suitable Employment Site". However, in view of the fact that there are vacant units, plus scope for expansion on the Victoria Business Park, I feel that this site is more ideally suited for consideration as a "Potentially Suitable Housing Site". In addition, I would also suggest that land on the left-hand side (from the A527) of Childerplay Road is also considered as a "Potentially Suitable Housing Site".</p>	
PO865	Ms Norma Gibson				BD063A	Object	<p>I wish to object to the Development with the green belt. The NPPF states that the green belt is to be protected and requires exception circumstances to be built on. I can not think of any exceptional circumstances and as yet Staffordshire Moorlands District Council have provided none. Given that there are a number of Brownfield sites in the area I do not see how this can be justified.</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO854	Miss Keelie Mellor				BD063A	Object	I am objecting to the Green Belt amendments with reference to site BD063a. The National Planning Policy Framework states that green belt land is to be protected and requires exceptional circumstances to be built on - there are NO exceptional circumstances to build on this site. This site has an elevated incline. Properties on this site would have a dominate and detrimental effect on the landscape. Many of the properties that border this site are bungalows - this will cause a massive loss of privacy. This field is an integral part of the landscape of Knypersley. It provides views of the natural landscape and if developed on, this connection with the natural environment will be lost forever. It is working agricultural land. The wildlife that lives on this site is vast. There are bats, owls, birds of prey, foxes to name but a few. Destroying their habitats is unacceptable. Your own green belt review details that there are better options for housing.	<ul style="list-style-type: none"> • See response to PO27 regarding Green Belt Review. • See response to PO713 regarding loss of agricultural land. • See response to PO66 regarding impact on the landscape • See response to PO27 regarding the mills. • See response to PO27 regarding brownfield land. • See response to PO463 regarding highways / access to the site. • Any drainage issues on the land could be resolved through new development. The Environment Agency has stated that the area is not affected by flooding. • See response to PO463 regarding Education capacity. • See response to PO713 regarding mining legacy. • See response to PO66 regarding ecology.
PO973	Mr John Hayley				BD063A	Object	As a local resident I call on SMDC to remove area BD063a from the 2012-2031 Local Plan Preferred Option Sites. This community is opposed to Green Belt development and we believe that Staffordshire Moorlands District Council needs to consider the following: 1. National Planning Policy Framework (NPPF): I. NPPF states that greenbelt is to be protected and requires exceptional circumstances to be built on. There is nothing exceptional about the council's plans to build on unspoiled land to meet their current housing target. II. NPPF states that brown field sites are to be prioritised over the development of green field and certainly greenbelt sites, but these plans offer up greenbelt in advance of brown field site development. III. NPPF states that merging of communities is to be prevented, yet development of site BD063A will lose the individual identities currently held between Knypersley and Biddulph. IV. NPPF states that infrastructure must come first, yet the outline ideas to provide infrastructure are either not in place, or are not time-lined in advance of the proposed developments. There are currently no plans to develop new healthcare with these massive scale extensions of population. 2. Impact on highway safety and traffic: I. This section of Newpool Road (BD063A) is already affected by high volumes of traffic flow at peak times and school hours. The bridge access at the bottom of Newpool Road can only allow for single vehicle crossing when large vehicles i.e. buses & lorries attempt to cross over, this can be seen with the attached press articles & photos. The current access to site BD063A is via a single carriageway access road, which would not provide proper and safe access to a development of 40 houses the access would need to be upgraded with the formation of a proper road junction and pavement area to allow for safe access and continued traffic flow, this would potentially mean the need to restructure the garden areas to 58 and 60 Newpool Road to allow for a safe visibility splay for both cars and pedestrians exiting and entering the proposed site (the garden area of 58	<ul style="list-style-type: none"> • See response to PO27 regarding Green Belt Review. • See response to PO463 regarding highways / access to the site. • See response to PO66 regarding ecology. • See response to PO713 regarding loss of agricultural land. • See response to PO66 regarding impact on the landscape • See response to PO214 regarding residential amenity

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
							<p>Newpool Road goes straight out to the existing pavement area and would not allow for any room to create a safe visibility splay for cars or pedestrians). The adding of forty houses on this area will cause increased traffic flow of over approximately 100 cars which will only add to the existing traffic problems within this overburdened area. 3. Conservation of the natural environment: I. The above site is host to different species of bats, owls and a huge array of wildlife that will perish as a result of the proposed development. II. Site BD063A is used as working agricultural land that produces at least two crops a year, it is also in use for cattle grazing which provide the community a meaningful way to connect with the natural environment. 4. Effect on the landscape: I. The development of Site BD063A which has an elevated incline with potential two & three storey properties would have a dominate and detrimental effect on the landscape, as the majority of properties that currently boarder this site are bungalows and this will create an overpowering effect to these properties with the loss of privacy. These fields are an integral part of the landscape of Knypersley. Site BD063A provides views of the natural landscape and if developed on, this connection with the natural environment will be lost forever. 5. Other comments: I. The proposed new town boundary for this site has no physical boundaries to prevent unchecked incursion into surrounding Green Belt countryside making this location vulnerable to future encroachment. There is a danger that this boundary change will lead to further encroachment and urban sprawl towards Tower Hill Road and Akemoor Lane in years to come. This proposed boundary does not meet NPPF criteria stating that a Green Belt change must have long term permanence capable of enduring for 30-50 years. II. I would recommend that no further housing expansion within Newpool should be permitted until and unless road improvements are made to the old railway bridge at the bottom of Newpool Road.</p>	
PO1053	Mr David Kirkham				BD063A	Object	<p>I object strongly to the building of houses on greenfield sites when there are plenty of brown field sites available in this area. The BD063a site has many problems. The first being the entrance and exit from this site is narrow and has poor visibility on the right exit. The left exit is on the brow of a hill making exiting very difficult. Lower down Newpool Road we have a narrow bridge to negotiate which is an absolute nightmare at both school and work times of the day. There is an additional problem with parking on either side of the road at the school which adds extra pressure on the already busy junction. This is an already busy road which is used as a short cut. The entrance to this site also has a bus stop each side of the road causing another problem. So, 40 houses, possible 80 vehicles added to an existing busy road (A NIGHTMARE).</p>	<ul style="list-style-type: none"> • See response to PO27 regarding the mills. • See response to PO27 regarding brownfield land. • See response to PO463 regarding highways / access to the site.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD063a)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO9266	Mr Lee Dawkin	Renew Land	Mr Ben Weatherley	Knights LLP	BD063A	Object	We would encourage the LPA to give further consideration to potential changes to the town and Green Belt boundaries in Biddulph and support a strategy for releasing sites from the Green Belt through the Local Plan process where appropriate - such as to accommodate residential development of the land at Newpool Farm being promoted by our client.	<ul style="list-style-type: none"> • See response to PO27 regarding Green Belt Review.
PO947 PO952	Mr John Hancock Mrs Alwyn Hancock				BD063A	Object	<p>I wish to raise my objections to the proposed BD063A site Newpool Road/Meadowside – this area is Green Belt land and is used as working agricultural land that produces at least two crops a year, it is also in use for cattle grazing. The road infrastructure cannot currently deal with the volume of traffic using Newpool Road – this is already a busy road used by drivers avoiding the speed cameras on Tunstall Road, the speed humps on Lyneside Road and is the main route through to Mow Cop and Brown Lees. The “tin bridge” is narrow and a severe hazard and can only allow for single vehicle crossing when large vehicles ie. buses, lorries, tractors attempt to cross over. More importantly this hazard also affects the Emergency Services! During rush hour and pick up/drop off times at Knypersley First School parked cars on both sides of the road (and on adjoining roads – Meadowside and Lyneside Road) exacerbate the situation and result in traffic chaos. The proposed access to site BD063A is on a dangerous bend and the brow of a hill on Newpool Road; this raises major concerns regarding safe visibility for both cars and pedestrians exiting and entering the proposed site. The addition of 40 houses on this proposed site will cause increased traffic flow of approximately 100 cars which will only add to the existing traffic problems within this overburdened area. The site is Green Belt land - the National Planning Policy Framework (NPPF) states : that Green Belt land is to be protected and requires exceptional circumstances to be built on. There is nothing exceptional about the Council’s plans to build on unspoilt land to meet their current housing target. that Brownfield sites are to be prioritised over the development of green field and certainly Green Belt sites - these plans offer up Green Belt in advance of Brownfield site development. that merging of communities is to be prevented - yet development of site BD063A will lose the individual identities currently held between Knypersley and Biddulph. that infrastructure must come first - yet the outline ideas to provide infrastructure are either not in place or are not time lined in advance of the proposed developments. There are currently no plans to develop new healthcare within these massive scale extensions of population. Government policy is that Brownfield sites are to be prioritised over the development of Greenfield and certainly Green Belt sites – the derelict mill on Station Road is not included in the current Option Site Allocations but is an absolute eyesore and long overdue for demolition. This is a desirable site perfect for the construction of apartments and ideally located being close to Biddulph town centre. Also the area bordered by Cross Street, Stringer Street and Walley Street is in need of comprehensive</p>	<ul style="list-style-type: none"> • See response to PO27 regarding Green Belt Review. • See response to PO27 regarding exceptional circumstances for Green Belt Development. • See response to PO713 regarding loss of agricultural land. • See response to PO463 regarding highways. • See response to PO463 regarding access to site. • See response to PO27 regarding the mills. • See response to PO27 regarding brownfield land. • See response to PO463 regarding infrastructure capacity. • See response to PO854 regarding drainage. • See response to PO854 regarding flooding. • See response to PO463 regarding Education capacity. • See response to PO713 regarding mining legacy.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (housing site BD067)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO535 PO593	Mr Bill Hockey Mrs Pamela Hockey				BD067	General comment	As a resident of North East Biddulph and very concerned about the previously proposed sites BD067a, BD067b, BD067c, BD110 and BD134 along behind Pennine Way, Torville Drive, etc. I am very pleased to support the change their status to Constrained. I understand that the Green Belt Review rejected these as being too close to Biddulph Moor and if built on create urban sprawl taking the two areas much too close to each other. It is good for Biddulph that the Pennine Way, etc. sites are taken off, North East Biddulph is already too extended and saturated. Retains the Biddulph / Biddulph Moor separation and the open space between them. Stops the housing development that would have been highly visible from most of the rest of Biddulph.	Comments noted. These sites are not included in the Preferred Options Sites and Boundaries Consultation (April 2016).
PO469	Mrs Jean Wrench				BD067	General comment	A balanced approach is required regarding new build so that uneven saturation does not occur.	Comments noted. This site is not included in the Preferred Options Sites and Boundaries Consultation (April 2016).
PO852	Mrs Andrea Millington				BD067	General comment	The purpose of the greenbelt is to protect developments from urban sprawl and the greatest threat to this lies at the north east of the town, there is now a major threat of Biddulph town and Biddulph Moor being amalgamated as one urban settlement and if there were to be further development up the hill to the moor there will be no clear physical distinction between the boundaries.	Comments noted. This site is not included in the Preferred Options Sites and Boundaries Consultation (April 2016).
PO82	Mr Robert Moseley				BD067	Object	No need to build on green belt land, find alternative housing solution.	Comments noted. This site is not included in the Preferred Options Sites and Boundaries Consultation (April 2016). In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance).
PO281	Mrs Judith Cottrell				BD067	Object	The Green Belt should be retained in the whole of the Biddulph area. In particular, the areas adjoining BD 067 are unsuitable for building purposes, it is an area of natural beauty and attracts a large number of birds and other wild animals, it is also subject to flooding; and, if built upon, would encroach upon the boundary between Biddulph and Biddulph Moor, thus creating urban creep.	Comments noted. This site is not included in the Preferred Options Sites and Boundaries Consultation (April 2016). In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance).
PO288	Mr Peter Benn				BD067	Object	No other comments are visible. Why?	All comments have to be moderated before they can be viewed publically. Once this has been done, they will be published at the same time.
PO440	Mrs Janice Deane				BD067	Object	Object to any changes to green belt. All we have in Biddulph is lovely countryside	Comments noted. This site is not included in the Preferred Options Sites and Boundaries Consultation (April 2016). In order for Biddulph to accommodate new development, the

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (housing site BD067)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	GB Amendment	Support/ Object/ General Comment	Consultee / Agent Comments	Officer Response
PO303	Mr Russell Picken				BD067	Support	It is extremely important to both the communities of Biddulph and Biddulph Moor that the green belt is not extended eastwards in the northern half of the town, which would then result in urban sprawl; one of the main things that the green belt was designed to protect towns and villages from in semi-rural locations like these. (Further development here would have resulted in the town appearing similar to a foreign holiday resort, where the properties extend from the valley floor all the way up the side of the valley to the horizon.) It is therefore welcomed, with great appreciation, that the sites BD067a, BD067b, BD067c, BD110 and BD134 have been removed from preferred options of allocation of sites. If any further extension of the green belt is required, then it should occur on the western side of the town, in site BD116 and the area of site BD140, adjacent to the currently preferred sites of BD071 and BD071a, possibly extending southwards from area ADD03.	Comments noted. This site is not included in the Preferred Options Sites and Boundaries Consultation (April 2016).
PO323	Frank Cottrell				BD067	Support	Where ever we build in Biddulph green belt will be used ,all brown field sites should be used first until all these sites have been used Victoria Colliery site is a recent green field site and if building is to be done then this is a suitable site to use.	<p>Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph would be appropriate for residential development. The larger ones (Yarn Mill and Minster Mill) could be residential allocations in the plan. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs. Biddulph Town Council is currently working on a masterplan for the town centre.</p> <p>Sites at Victoria Colliery and Childerplay Road are within the Green Belt like BD067. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy.</p>
PO454	Mrs Jean Fairbanks				BD067	Support	Although I don't think we need many new properties we do need a neighbourhood plan to avoid what is happening in Cheshire, building to the west of Biddulph will help balance out the town.	A Neighbourhood Plan is currently being prepared for Biddulph Parish.
PO790	Mrs Jayne Beech				BD067	Support	I support the inclusion of BD067 in the proposal.	This site is not included in the Preferred Options Sites and Boundaries Consultation (April 2016).
PO5117	L C Millington				BD067	Support	I support the latest town boundary in its changes/from last proposal) removing expansion to the east and adding areas to the west. The town is already lopsided enough.	Comments noted. This site is not included in the Preferred Options Sites and Boundaries Consultation (April 2016).
PO267 PO726 PO5778	Mr Christopher Hall Mr Philip Beech Mr E Pearl				BD067	Support		This site is not included in the Preferred Options Sites and Boundaries Consultation (April 2016).

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD068)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
PO5079	Mrs L Neate				BD068	General comment	As stated above the level of homes in Biddulph area is at a saturated level. Moving west makes much more sense.	Comment noted.
PO6352	Mr V A Bainbridge				BD068	Object	<p>The site shares a boundary with the only sewage works in Biddulph which is already working over its' designed capacity population of 17,000 people (2011 Biddulph census 19,892). Local residents on Long Valley Road, Portland Drive, York Close, Essex Drive and Marsh Green Road already experience unacceptable amenity impacts in their homes such as noise, odour and raw sewage flooding. In periods of heavy rain, raw sewage floods the system, backfills and pollutes private properties (experienced by 34, 36 and 38 Essex Drive). Building houses on this site even closer to the sewage works will increase these unacceptable impacts, leading to an increase in statutory nuisance incidents. It contradicts SMDC LDF Core Strategy SD Policy 4 where the Council states that it will refuse schemes which are pollution-sensitive adjacent to polluting developments. 1. "The Council will ensure that the effects of pollution (air, land, noise, water, light) are avoided or mitigated by refusing schemes which are deemed to be (individually or cumulatively) environmentally unacceptable and by avoiding unacceptable amenity impacts by refusing schemes which are pollution-sensitive adjacent to polluting developments, or polluting schemes adjacent to pollution sensitive areas, in accordance with national guidance." SMDC LDF Core Strategy SD Policy 4. During periods of heavy rainfall, the sewerage system cannot cope and the site experiences an overflow of raw sewerage from the man-hole covers which then runs directly into the Biddulph Brook (evidenced with sanitary products distributed around the sewerage treatment facility pipes at the end of Essex Drive). This happens on a regular basis, with the latest occurrence's being 2015 and March 2016, when both United Utilities and environmental Agency were forced to clear the pollution. Residents in Gillow Heath (York Close, Essex Drive, Long Valley Road, Portland Drive, Marsh Green Road) are repeatedly contacting United Utilities & SMDC to deal with cases of noise, odour and raw sewage pollution. Houses should not be built even closer than these. It contradicts the following SMDC LDF Core Strategy statement: "The NPPF directs Councils to proactively provide needed economic development - however decisions should ensure that new development is "appropriate for its location" in pollution/contamination terms; and more generally development should contribute to securing good standards of amenity and reducing pollution." SMDC LDF Core Strategy. Section 8.2.11 The current capacity of the United Utilities sewage treatment works is reported to be serving up to 17000 residents. The population of Biddulph as it 2011 census was 19892 residents. An increase of 885 houses approximately 3000 people will obviously require investment in its facility. This will not be facilitate by the inclusion of numerous small development site, but rather fewer larger sites which are able to utilize the CIL. The site is currently protected as Greenbelt, and only considered suitable for release from the Greenbelt</p>	<ul style="list-style-type: none"> • United Utilities has a statutory duty to provide capacity for new development so this is not a valid reason for development not to come forward in Biddulph. United Utilities considers that there is no need to expand the treatment works in the development plan period for the growth identified in the development plan. • Noise and odour assessments have been produced on behalf of the landowner and received by the Council recently. Noise mitigation measures are recommended which could potentially be implemented as part of a development scheme – no odour mitigation measures are considered necessary. • Current issues experienced by residents in regard to raw sewage flooding are a separate matter to be investigated by United Utilities. • Site BD068 will be required to provide a percentage of affordable housing / starter homes to benefit those in the community needing affordable housing. • In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site BD068 for release from the Green Belt provided that exceptional circumstances can be demonstrated. • The site boundary can be amended to exclude land within Flood Zone 2. This approach has been agreed with the Environment Agency since their response to the consultation so a Level 2 Flood Risk Assessment is no longer required for the site. A planning application would still be needed before this (or any other) site could be developed and the Environment Agency is a statutory consultee. • The Highway Authority consider that "the development of the site is acceptable subject to access design and visibility splays. Access is likely to need to be close to the bridge in order to meet visibility standards. Footway should be provided on the frontage to connect to the existing footway. Possible improvements to Marsh Green Road/Congleton Road junction. May be appropriate to

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD068)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
							<p>under exceptional circumstances. Removing this site from the Greenbelt prioritises development in the floodplain which contradicts SMDC LDF Core Strategy Policy SD 4 when a range of sites are available exceptional circumstances are not demonstrated. 1. Its inclusion contradicts SMDC LDF Core Strategy Policy SD 4 where development proposed... "will be guided to first make use of areas at no or low risk of flooding before areas at higher risk..." 2. The site is in Flood Zone 2 3. The presence of a wet meadow (Phase 1 Habitat Survey) evidences the current high level of surface water runoff this site experiences. Development will increase surface runoff in close proximity to a watercourse, reducing lag time into the Biddulph Brook leading to increased flooding. 4. Development close to the waste water and sewerage treatment works will result in increased raw sewage overflow close to the new development as well as polluting the watercourse, Biddulph Brook. Neither the distributor road (Mow Lane) nor the feeder roads (Essex Drive and York Close) meet the minimum standards for the SCC Highways Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane which cannot be avoided as there is no alternative access to this site. Mow Lane is a dangerous road with no footpath. There is no scope for the required improvements. 1. The feeder road (Essex Drive) is far below the minimum design standard for radii of access road bends – 7.5m and 7.8m sequentially (Standard = 10m) 2. The feeder roads (Essex Drive and York Close) are both below the minimum design standards for width - 4.9m and 4.7m respectively (Standard = 5m) 3. The distributor road (Mow Lane) is significantly below minimum design guidelines with a minimum measured width of 4.25m (Standard = 6.7m). Access to Essex Drive off Mow Lane is restricted from both directions by bridges with a maximum width of 5.15m, below the design guide standard of 6.7m. 4. The junction of Mow Lane with Congleton Road is significantly below required standards for vision splay (south) – measured at 23m. 5. The junction spacing's and convergence at Congleton Road are far below highways design guidelines. (Standard = 40m opposite and 80m adjacent.) (Mow Lane and Halls Road are 0m adjacent and Smithy Lane opposite is 18m). 6. Fire tender access to within 45m of the most distal aspect of the development cannot be guaranteed due to narrow roads and regular on-street parking. 7. Its inclusion contradicts SMDC LDF Core Strategy Policy T1 " Ensuring that all new development is located where the highway network can satisfactorily accommodate traffic generated by the development or can be improved as part of the development." This site will deliver too few homes to add a measurable contribution to the Community Infrastructure Levy (CIL), it will not bring any direct benefit to the community of Gillow Heath. Its inclusion contradicts the SMDC LDF Core Strategy Biddulph Area Strategy where new housing allocation is prioritised on urban extension land to the west of the bypass and where developments help secure infrastructure improvements for the benefit of the newly developed part of the town. 1. Improvement works to the</p>	<p>realign Marsh Green Road to provide visibility to plot BD087 if possible and if agreement can be reached between owners".</p>

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD068)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
							adjoining, and only, United Utilities waste water and sewage treatment works requires massive CIL contribution, which is only possible from a large-scale development elsewhere. 2. Improvements to feeder and distributor road accesses are not possible due to the relatively small scale nature of the development.	
PO328	Mr Dave Boothroyd				BD068	Object	<p>Green Belt Review. Land adjacent to the Sewage works. I oppose any suggestion that areas BD068, BD087 and BD062 should be designated as possible areas for development or that their Green Belt status be changed. In view of recent correspondence with United Utilities, suggesting strongly that development should not take place adjacent to wastewater treatment (sewage) works on the grounds of environmental health concerns of problems with smells and noise, it is clear that these areas must never be built upon. I quote from their message, made in a letter dated 26 th May 2016: - "We have identified the need for the local planning authority to discuss any new housing near to the wastewater treatment works with their Environmental Health colleagues and give the sites very careful consideration when comparing these sites with potential alternative sites that may be available to them. Our position is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a wastewater treatment works." It is possible, of course, that local land-owners may wish to sell their land for development outside the current Housing Allocation scheme. The planning officers would have to oppose the granting on planning permission on the above grounds. If these areas were firmly designated as Green Belt, the planning authorities would find the refusal of planning permission a far easier case to argue if the Green Belt status is maintained. Wildlife Habitat: - I refer to the Wildlife Habitat Survey on behalf of SMDC of 2014. http://www.staffsmoorlands.gov.uk/sites/default/files/documents/pages/Front%20Cover%2C%20Introduction%2C%20Appendices.pdf This survey gives scientific and quantitative support to the everyday observation that the areas are a thriving wildlife habitat. The destruction of habitat is a most undesirable development. In particular, the gully and hedgerow that crosses the field BD068 is home to rabbits, foxes and badgers, many species of bird, including the rare Jay and Kestrel. Insect and plant species are plentiful and varied. Hedgerows along the brook side and the Gillow Heath/Congleton Road footpath are similarly species rich. Any aerial view of these areas clearly show that development on these areas will tend to break the wildlife corridor that links the Biddulph area with the ancient woodland areas on Baileys Bank (site of the former Biddulph Castle) and on Congleton Edge. This is bad because it threatens genetic diversity in plant and animal species by restricting the range of habitats. Agriculture: - Two of the three areas are active, productive farmland. Area BD068 in particular is being maintained and improved by the current farming tenants. The grass is fertilised, the weeds suppressed, and the land is used currently to raise two dozen heifers. It cannot be dismissed as low quality</p>	<ul style="list-style-type: none"> • See response to PO6352 regarding loss of Green Belt. • See response to PO6352 regarding proximity of water treatment works. • The Council has had an extended Phase 1 Habitat Survey undertaken on this site in 2015. The site has been deemed to have ecological importance due to the presence of trees with bat roosting potential, potential reptile populations and good connectivity to other biodiverse habitats. The following surveys/ actions are therefore recommended prior to any potential development works being carried out: <ul style="list-style-type: none"> <input type="checkbox"/> A bat survey regime to ascertain whether bats roost in the tree <input type="checkbox"/> Reptile survey <input type="checkbox"/> Badger survey <input type="checkbox"/> Vegetation removal at the appropriate time of year <p>There is no evidence at present to suggest that the site cannot be developed for ecological reasons.</p> <ul style="list-style-type: none"> • The land has an agricultural classification of Grade 4 which means that it is poor quality. • See response to PO6352 regarding flooding.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD068)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
							pasture land. Flooding: - It must be accepted that the areas under discussion have been, recently, in the past, and probably for the indefinite future, subject to flooding. According to the Environment Agency, open green land adjacent to watercourses is the only viable solution to the problem of mitigating the damage to property in the area. Green Belt status is a sensible approach to keeping flood-prone areas available to fulfil the role of 'flood plain'	
PO130	Mr Dave Boothroyd				BD068	Object	<p>I do not believe that this is a suitable, or even possible area for housing development for the following reasons. 1: - Access. The area can only be reached by access along Marsh Green Road, which is very narrow, less than ten feet (3 metres) in width, with high banks on either side including protected mature trees. There are no footpaths on either side and for a large part, there is no street lighting. To the east of the site, travelling towards Gillow Heath, there is a narrow, very sharp, blind bend, followed by a narrow bridge crossing the cycle way. To the west a narrow bridge crosses the stream. Heavy vehicles could not use this road at all, and increased traffic would be very hazardous. Foot traffic, for children walking to school on Woodhouse Lane, for example, would be risking life or serious injury, especially during the dark winter months. 2: - Landscape and Geology. Across this land there is a deep, tree-lined gully, the bed of a former watercourse. This watercourse is now culverted, but, some water flow continues in wet weather. In the course of extensive excavations in my garden on Portland Drive, I have proved that there is a layer of clay, between 40 and 60 cm thick. It overlays a very deep layer of very soft, running sand. (Photographic evidence is available). This strongly suggests that the land adjacent to the gully is unstable. It is entirely possible that groundworks in the field could cause significant subsidence and damage to existing properties in Portland Drive and, of course, substantial claims for compensation against any possible developer. 3: - Flood Plain issues. There are powerful counter-indications against building on flood plains, highlighted by the major floods in parts of the country in recent years. The area is immediately adjacent to Biddulph Stream. When my wife and I moved to this area, our existing insurer declined our application because our postcode was flagged as an area at risk from flooding. Indeed, there have been floods on both Mow Lane and Congleton Road in the last twelve months. Every house insurer now asks prospective customers if they reside within 100 metres of a watercourse. Any owner or tenant of a house built on this area will have to answer "Yes" to that question. Any developer needs to face the same scrutiny by the Environment Agency with respect to building on the flood plain. 4: - The Sewage Works. Immediately adjacent to this area is the United Utilities' water treatment works. This would cause serious issues for any development on this area. The issues come under several headings. a. Visual aspects. A screen of trees hides the major part of the works from Portland Drive and Long Valley Road, in the summer at least. This is not the case in winter. Houses built on this area would have a clear and highly intrusive view of a huge steel structure of</p>	<ul style="list-style-type: none"> • See response to PO6352 regarding highways. • Landscape Impact of development on the site has been assessed in the Council's Landscape Impact Study (August 2016), the results for this site are: "Site is located within the north of Biddulph, south of Marshgreen Road. The site comprises fields enclosed by residential development to the north, east and south; and sewage treatment works to the west. The site is elevated above Marshgreen Road, however it is at a similar level to the adjacent residential development on Portland Drive, and has low visual prominence due to screening provided by the surrounding development and vegetation, particularly trees surrounding the sewage works. The site forms a gap in development, and therefore fits in well with the existing settlement form. Site is of low landscape sensitivity." • If the site were chosen as an allocation and went on to be developed any damage to neighbouring properties would be the responsibility of the developer. • See response to PO6352 regarding flooding. • See response to PO6352 regarding proximity of water treatment works. • Screening of the sewage works would be required as part of any development on the site. • See response to PO6352 regarding Green Belt. • National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered. • Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD068)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
							<p>pipes, valves and pumps. Frequently vital work is carried out on this structure late into the night, using powerful floodlights. (Photographic evidence is available) b. Noise. Tanker lorries are used to remove waste materials from the works. On many occasions, installed heavy machinery (probably pumping equipment) is run late at night. Based on sound meter readings taken from Portland Drive, approximately 200 metres away, the noise level on a quiet night with the no machinery running was 46dB. On a different evening when the machinery was running the reading was 65dB. At 100 metres the sound pressure level, using the inverse square law, would be four times louder, that is 12dB more thus 77dB. At 50 metres the noise level would be 89dB, a further 12dB greater. Sustained noise levels of 90dB are a health hazard. As a reference the noise level in my very well insulated house, in conditions of silence, was measured as 20dB, which is the accepted level for "peace and quiet" in a house. 89dB in their gardens would be a statutory noise nuisance and would not be acceptable to residents of houses built on this area. c. Smell. The sedimentation tanks are all enclosed now, mostly because of serious complaints from residents of surrounding roads in the past. However, this has not completely solved the problem of the emission of foul smells. They do occur in Marsh Green, Portland Drive, Congleton Road, Mow Lane and Halls Road quite often (Three times so far this year- most recently on Friday 6 th May 2016) It would be a serious concern to anyone purchasing a house built only twenty metres away from the works, and could be a serious health hazard, from flies etc. A spokesperson for United Utilities made the following statement in a letter dated 26 th May 2016:- "We have identified the need for the local planning authority to discuss any new housing near to the wastewater treatment works with their Environmental Health colleagues and give the sites very careful consideration when comparing these sites with potential alternative sites that may be available to them. Our position is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a wastewater treatment works." 5: - The Green Belt, and infill between settlement areas. As recently as this month, senior government figures have emphasised the importance of the green belt in preserving communities in their areas. The original intention of "green belt" was to separate and delineate areas that have traditionally been separate. This area alone represents a clear, agricultural break between the former separate villages of Biddulph and Gillow Heath. If areas BD087, BD068, BD062, BD004, BD138a and b, BD064, and DB83 were all to be developed, a pair of semi-rural communities would be engulfed and lumped together in a densely populated suburb without green spaces. The green belt would be utterly destroyed in complete negation of both past and previous government policy. Is this what is meant by "infill"?. I believe that "infill" is something to be avoided, according to the guidelines. 6: - Infrastructure. Any development on this site would fall into the present catchment areas of Ox Hey first school,</p>	<p>application is received and residents will have the opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations.</p> <ul style="list-style-type: none"> • The land to the north of Woodhouse Lane (west of the school) is not considered suitable for development, mainly due to the heritage impact on the nearby registered park and garden. It is also in the Green Belt. • Sites at Victoria Colliery and Childerplay Road are within the Green Belt like BDO68. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy. • National planning guidance states that the Council should seek to meet the development needs of their area. Stoke on Trent City Council has its own development needs to meet.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD068)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
							<p>Woodhouse Middle School and Biddulph High School. Each of these is operating currently at full capacity. None of the above schools have much opportunity for expansion. Prospective developers should be clear that they will need to provide the local authorities, or other providers with sufficient funds to create new schools, on new sites, within the next fifteen years, if proposed development targets are reached. Once again, taking all of the above proposed sites together, the resulting additional traffic using either the Marsh Green Road/ Congleton Road or the Hall's Road/Mow Lane/Congleton Road/ Smithy Lane Junction, neither of which is well served by visibility would be an extra level of hazard to junctions which are already dangerous. 7: - Amenity. Development on this site will result in a great loss of amenity for residents of Portland Drive. People who bought their houses based on the assurance that the adjacent green space was green belt land forever, will be justified in firstly, opposing its inclusion in "sites suitable for development", and, should the development ever go ahead, in seeking redress for loss of amenity. It should also be noted that the vast majority of the houses on the east side of Portland Drive are single storey dwellings. Regulations require that new development should be in keeping with existing properties. If this regulation were observed, the development of the land adjacent to Portland Drive could only consist of single story dwellings. Loss of light and privacy is an additional danger. Additional Site Options: - The map of proposed sites for Biddulph shows peripheral sites around most of the current boundary, with one exception. That is land to the north of Woodhouse Lane, west of the grounds of the school, and stretching from Woodhouse Lane to the boundary of Biddulph Grange and the Country Park. There is already development on this road, and the access would be from a relatively wide road. It is a large area with few houses that would be affected by the development. Based on a comparison of the area with the Uplands development, there would be room for up to 300 houses, allowing the Marsh Green and Gillow Heath developments to be removed. It is clear that there is a large area of properly restored, former mine working land on the site of the former Victoria Colliery to the south of Brown Lees Road, and a very large area of land on the east of the main road on Childerplay Lane. These two sites could hold the entire Biddulph Allocation with very little impact on existing residents and ready access to the main road. The preamble to the document states that some authorities have been able to agree with adjacent areas that part of their housing allocation be transferred from one to the other. It goes on to say that both Cheshire East and Stoke on Trent have no surplus land that could be considered for use by Biddulph. This is completely counter to the glaring evidence that can be gathered from a drive of no more than a mile from the southern boundary of Biddulph. There are many hectares of land lying idle and crying out for redevelopment at Chatterley Whitfield, plus a large plot on the other side of the road. A few hundred yards on the right, further along towards Oxford, there is large abandoned sports field. The entire 880</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD068)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
							house allocation for Biddulph would fit into these three sites. Where is the evidence that Stoke has no land? There are many, brownfield sites (H&R Johnson?) in the Stoke on Trent area. Perhaps the developers do not like them, but the citizens like their green belt more. The citizens should be given priority. That is what community involvement means.	
PO153 PO161	Mrs Beverley Webb Mr Barrington Webb				BD068	Object	The document Historic Environment Character Assessment: Staffordshire Moorlands August 2010 page 114 indicates that BD068 appears to be the only remaining example of an Early Irregular Enclosure possibly going back to medieval times which predates the Enclosure Acts . Page 111 states ‘ Prior to the 20th century expansion of Biddulph the landscape was dominated by irregular enclosure which may have been created incrementally from the later medieval period and into the post medieval. The field pattern may have been associated with the extraction of minerals, notably coal and iron ore, which documentary evidence records as occurring in the area by at least the 14th century’ . Therefore this land should be protected as greenbelt status due to its historic value.	<ul style="list-style-type: none"> Heritage Impact of development on the site has been assessed in the Council’s Heritage Impact Study (August 2016), the results for this site are “There is one Grade II* and eight Grade II Listed Buildings, and a Registered Park and Garden which is also a Conservation Area within the 400m buffer. There was no public access on to the site which is elevated above Marshgreen Road, and it is at a similar level to the adjacent residential development on Portland Drive. Development would be unlikely to cause high adverse effects to the settings of the heritage assets as development would be seen in context of the existing housing estate. Development would not adversely affect HLC zone BBHECZ 8 (Historic Environment Character Assessment 2010). Site suitable for development in heritage terms.”
PO137	Mrs D Jacobs				BD068	Object	The erosion of this green belt site will cause the North of the town and Gillow Heath to merge with no obvious boundary. The site is currently used by many (including those with young children) to safely walk dogs. It is also used for pasturing of cattle in the summer months. There are not many places in Biddulph where this can be found. It would be a great shame to take this away from the local people. Building on this site would cause traffic congestion in the vicinity. Horses are often walked up and down the narrow road on their journey to the bridal path. I'm not sure how riders would gain access if the road became busier as it would be unsafe for pedestrians and riders alike. This area of green belt is not just enjoyed by a few (as other areas of green belt around the town are). MANY people walk, cycle, jog, ride past this area on a daily basis. The erosion of the green belt on this site would affect a large number of people, making Biddulph a less desirable place to live.	<ul style="list-style-type: none"> See response to PO6352 regarding Green Belt. The land is privately owned and no public rights of way cross the site. The land has an agricultural classification of Grade 4 which means that it is poor quality. See response to PO6352 regarding highways.
PO917	Mrs Dianne Simcock				BD068	Object	Sewers stink and are noisy only people forced to live here such as social housing from other areas as has happened at the former selectus site will live here The roads in this area are dangerous for pedestrians and cars. No pavements a blind bend to Gillow Heath and narrow roads. It would require significant council payers money to make them safe	<ul style="list-style-type: none"> See response to PO6352 regarding proximity of water treatment works. See response to PO6352 regarding highways.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD068)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
PO4962	Mrs Maureen Whitehurst				BD068	Object	To near sewage works, roads are too narrow, to support more traffic wildlife, foxes, badgers, rabbits, birds, jays and I have seen a kingfisher, cuckoo, sparrow hawks, owls and ducks. Green Belt. This field is part of our country side with public paths leading to Biddulph Valley Way, why spoil such a small area the detriment of our community – children play here, people walk their dogs. Infrastructure schools roads are already crumbling Mow Lane is a danger (traffic) no pavement.	<ul style="list-style-type: none"> • See response to PO6352 regarding proximity of water treatment works. • See response to PO6352 regarding highways. • See response to PO328 regarding ecology. • See response to PO137 regarding public use of the land. • See response to PO130 regarding infrastructure including schools.
PO4894	Mrs K Hallam				BD068	Object	Do you think this site should remain included into the green belt within Biddulph and not taken out for development - yes	Comment noted.
PO4934	Mrs C Drew				BD068	Object	My main concern is to the wildlife that once uprooted will not return, also where will the extra roads be made access is very poorly made at the moment, Leave the Green Belt area alone, so many people enjoy walking, horse riding etc. and building work noise. The disruption will be very unpleasant. Also as it is so close to the sewage works what problems may arise from the constant digging and vibrations so near (no one wants problems there!)	<ul style="list-style-type: none"> • See response to PO328 regarding ecology. • See response to PO6352 regarding highways. • See response to PO6352 regarding Green Belt. • See response to PO6352 regarding proximity of water treatment works.
PO4933	Mr N Moxon				BD068	Object	The proposal for Essex Drive site – the wildlife + fauna will be wiped out as it is a marsh land. Near to the sewage works no one will want to live there with the smell. The road into it is not big enough to support the building transport or the volume of traffic from the houses! Portland Drive + Marsh Green Road the roads are not adequate enough to support the volume of traffic that the amount of houses will create.	<ul style="list-style-type: none"> • See response to PO328 regarding ecology. • See response to PO6352 regarding proximity of water treatment works. • See response to PO6352 regarding highways.
PO8299	Mr A Hague				BD068	Object	(Summary) Refer to attached forms. Object due to poor access, loss of Green Belt, close proximity of sewage works – noise and odour. Preferred sites are: old Victoria Colliery, land off Childerplay Road, mills close to town centre. All have good access to A527 and would not spoil the Green Belt.	<ul style="list-style-type: none"> • See response to PO6352 regarding highways. • See response to PO6352 regarding Green Belt. • See response to PO6352 regarding proximity of water treatment works. • See response to PO130 regarding Victoria Colliery and Childerplay. • Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph (in particular Yarn Mill and Minster Mill) would be appropriate for residential development. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping brownfield sites.
PO6275	Mr J Hodgson				BD068	Object	Marsh Green Road is not suitable for traffic. The noise and the smell from the sewage works. Planned estates on a flood plain.	<ul style="list-style-type: none"> • See response to PO6352 regarding highways. • See response to PO6352 regarding proximity of water treatment works. • See response to PO6352 regarding flooding.
PO6723	Miss L Delves				BD068	Object	Additional sites that would be suitable include the Victoria Colliery site, the land behind the Bemersley Recycle Centre. Please see the reverse for	<ul style="list-style-type: none"> • See response to PO130 regarding Victoria Colliery and Childerplay.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing site BD068)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
							<p>reasons I am against building on the site number BD068. In addition to reasons already stated. I object to building on this site because of health and safety reasons. As a current council tax payer you are failings me, my family and all the residents on Marsh Green Road, Portland Drive by building here there is no way you can ensure our safety on the roads, the pavements at the side of my property nor the capacity to widen the road and to put a potential 70 cars, at least, on Marsh Green Road, is madness and can only assume a lack of concern from yourselves. I am aware that the council receives per new house built but surely you have obligation to current tax payers. When you have been to this site have you looked yourself how much money can make and actually looked at its surrounding environment? When I tell people visit that you want to build 70 houses here they are horrified – how can the road cope? My reply “I don’t think they care” am I wrong? Lots of children /us in this area – use the cycle path etc., but you obviously have no regard for the future of our children will not be allowed out as the road will be too dangerous. If meeting the planners – it was? The land of Pennine Way had been discounted as a blurred gap between Biddulph and Biddulph Moor and that you consider Knypersley, Brown Lees, Gillow Heath and Biddulph all to be as one. This is madness; Biddulph and Biddulph are no more separate areas, like Knypersley - a great building location already on a road network and still with a massive area of space between Biddulph & Biddulph Moor. Is there a proper reason why this has been discounted? It may not look much on the map too just add 70 houses onto the back of existing ones, but the implications for the people that live here is massive. There are better locations than this. One of four officers at the planning meeting said it was only green belt because there was no need for housing at the last classification. But the fact is that that the green belt adds a fact lot of character and charm to this area. Don’t ruin it.</p>	<ul style="list-style-type: none"> • See response to PO6352 regarding highways. • See response to PO6352 regarding Green Belt.
PO9670	Mrs P Hancock				BD068	Object	Access (Mow Lane) is too narrow.	<ul style="list-style-type: none"> • See response to PO6352 regarding highways.
PO9704	Mr and Mrs Siddorn				BD068	Object	Object to adjustment of Green Belt boundary to include this site. The site has significant highway, drainage, ecology, odour and other constraints which local people will require the LPA to address.	<ul style="list-style-type: none"> • See response to PO6352 regarding Green Belt. • See response to PO6352 regarding highways. • See response to PO6352 regarding flooding. • See response to PO328 regarding ecology. • See response to PO6352 regarding proximity of water treatment works.

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD069)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
PO1020	Mr John Hayley				BD069	General comment	<p>I am sympathetic towards those residents living in Orme Road, and others nearby, who regard this site as a derelict eyesore and who urgently wish it to be redeveloped. Housing is needed in Biddulph, but this needs to be the right housing in the right place. In my view at least part of the housing proposed for this site is inappropriate. This garden contains English Heritage listed objects and is in very close proximity to Knypersley Hall, a Class II* listed building. This site is of great historic significance and is unsuitable for the development of such a large number of houses (30) in such a small location. This objective to build 30 high density houses is incompatible with retaining the historic character of this Victorian walled garden and with its historic landscape. This walled garden is of unique importance. James Bateman was the creator of Biddulph Grange Gardens (a National Trust visitor attraction that now welcomes almost 100,000 visitors per year). It was here in this kitchen garden that James developed his life-long love of horticulture and it was here that he grew his first orchids in specially built greenhouses. It may be feasible with careful and sympathetic design to support a modest development of, say, 5-10 houses, built in the vernacular style, and built with low elevations - a high quality development, built in keeping with the nearby Knypersley Hall. Such development must make a positive contribution to the built environment and must enhance, rather than degrade, the landscape setting for the hall itself. Both inside and outside the walled garden, this development should fully comply with NPPF policy guidelines for conserving and enhancing the historic environment (NPPF paragraphs 126 – 141). The current poor state of repair of many of the historic assets contained within the garden should not be used as excuse for their destruction, nor should it be used as a convenient excuse for change of use of this land from horticulture to housing (NPPF policy paragraph 130). Redevelopment of this site should not obstruct or interfere with reconstruction efforts to restore the original driveway to Knypersley Hall that leads NE towards Conway Road. I am deeply opposed to any changes to the town boundary and to the Green Belt status of this site. [For further details on this please see my objections to Site ADD04]. My preferred options for this site would be: 1) Development of the site as part of Biddulph’s tourism strategy 2) Restoration of the site as a privately owned Victorian heritage walled garden 3) Redevelopment for horticulture use, for example, as a horticulture training centre 4) Redevelopment as a horticulture education centre, in conjunction with Biddulph High School 5) Redevelopment of part of the site as a bio-diversity site, for ecology and educational purposes, in conjunction with Biddulph High School 6) Some form of public ownership or shared public ownership 7) Some form of public access (even if only for a few</p>	<p>The Council’s Landscape, Local Green Space & Heritage Impact Study (August 2016) assesses this site in terms of heritage and landscape impact. The results for heritage are: “There is one Grade II* and one Grade II Listed Building within close proximity to the site. The site contributes greatly to the setting of the Grade II* as a walled garden to the hall, which in turn, contributes to the overall significance of the asset. Development on the site would highly likely cause substantial adverse effects to the setting of the Grade II* Listed Building which would impact upon its overall significance. The HEA states that development is not deemed appropriate in the HLC zone BBHECZ 7 (Historic Environment Character Assessment 2010). Site could not be developed without substantial heritage impacts.” This study forms part of a wider evidence base to support the Local Plan. Therefore the conclusions within this report will be weighed against other evidence when determining the overall suitability of a site for development.</p> <p>The Council’s Green Belt Review has assessed the site as follows: “Check Sprawl: Limited contribution Maintain Separation: Limited contribution Prevent Encroachment: Limited contribution Preserve Setting: Contribution Overall Impact on Green Belt Purposes: Limited Previously developed land with reasonably strong outer boundaries and which would create a logical extension to the current settlement envelope. See also Land north of Mill Hayes Road. Recommendation: Consider for release”</p> <p>As the land is privately owned, public access and redevelopment of the site for a training centre are unlikely outcomes.</p>

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD069)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
							<p>days each year) Destruction of this walled garden, in my view, would be a national tragedy. Biddulph calls itself “ The Garden Town of Staffordshire ”. This proposal, if it goes ahead, could sadly lead to the permanent destruction of Biddulph’s second most important garden (second only to Biddulph Grange Gardens). The National Trust commented on this proposal [BD069] at Stage 1 consultation. I endorse their conclusions and for completeness I have added their comments below: National Trust - This would entail the destruction of the remains of the kitchen garden at Knypersley Hall. While the Trust has no direct involvement in Knypersley Hall, the house was the former home of James Bateman – who created the gardens at Biddulph Grange which are in our protective ownership. The significance of the Knypersley gardens is recognized in the 2010 Historic Environment Character Assessment jointly published by Staffordshire Moorlands District Council and Staffordshire County Council. This notes that the Hall is listed grade II* and the stable and coach house grade II. While the character much of the historic parkland associated with Knypersley Hall has changed in the 20 th century, some remains of the walled garden survive. These have heritage value in themselves and contribute to the settings of the nearby listed buildings. The National Trust considers that development of the walled garden would cause unnecessary harm to heritage assets and should be resisted. The Leek and Moorlands Historic Buildings Trust also commented on this proposal [BD069] at Stage 1 consultation. I agree with their conclusions and therefore have added their comments to this Stage 2 submission: Leek and Moorlands Historic Buildings Trust - BD069 is the former kitchen garden of Knypersley Hall (Listed Grade II*). It is currently extremely overgrown and therefore difficult to assess. A decade ago various historic structures still survived here so the site will need careful clearance and detailed assessment in advance of any proposed development.</p>

PO786	Mrs Jayne Beech				BD069	Support	BD069 is an area of town which would benefit from a sympathetic development. I cannot see it returning to retail use and feel that the neighbouring properties would prefer a modern quality development to an unused overgrown ex retail site. I support the use of this site for development.	Comments noted.
PO5601	Mr Lewis Williams				BD069	Support	i support all the above sites	Comment noted.
PO5086	Mrs L Neate				BD069	Support	Development will attract more shoppers to the town centre to spend money – must be good.	Comment noted.
PO9024	Mr & Mrs Weaver				BD069	Support	<p>We write in support of the proposed allocation of the above brownfield, former garden centre site for residential development, inclusion within the town boundary for Biddulph and removal from the Green Belt. We write as owners of the site since 2003. The site has been in our family since 1940s when our family moved to Biddulph. In writing this letter we have taken advice from town planning consultants and have reviewed the consultation documents available on the Council's website. The following sections of this letter establish our reasons for supporting the proposed allocation of this site for residential development, including within the town boundary and its removal from the green belt. Please take this letter as a formal response to the Site Allocations Preferred Options consultation in respect of the site and Question 15, 17 and 19 in particular. The Site and Surroundings The site extends to approximately 1.02 hectares (2.5 acres). The land is shown on the plan attached at Appendix 1 (Ref. SF498873). The site is approximately one kilometre to the southwest of Biddulph town centre, which contains a variety of shops and facilities including a library and leisure centre. The land is bounded, to the north, by Orme Road, beyond which is Biddulph High School. To the south of the site is the Mill Hays Playing Fields. To the east and west of the site are primarily residential areas. To the south west of the site is a Knypersley Hall which is a Grade II* listed building. The site is a brownfield site which comprises of a former garden centre which was in operation from the late 1960s to 2003. The site is partly covered by greenhouses, other garden centre buildings (as shown on the enclosed photograph) and extensive areas of hard standing. The buildings on site have become dilapidated and have fallen into a state of disrepair following the closure of the Garden Centre in 2003. There are also a number of trees located along the site boundaries. The Principle of Development The Council's adopted Core Strategy (March 2014) identifies a need for 6,000 dwellings in the District between 2006 and 2026. The Core Strategy commits to undertaking an early review to cover the period 2016 – 2031 to ensure that future provision will continue to meet objectively assessed needs. It also states that the Council will seek to enhance the role of Biddulph as a significant service centre and improve the</p>	<p>Comments noted.</p> <p>The Council's Landscape, Local Green Space & Heritage Impact Study (August 2016) assesses this site in terms of heritage and landscape impact. The results for heritage are: "There is one Grade II* and one Grade II Listed Building within close proximity to the site. The site contributes greatly to the setting of the Grade II* as a walled garden to the hall, which in turn, contributes to the overall significance of the asset. Development on the site would highly likely cause substantial adverse effects to the setting of the Grade II* Listed Building which would impact upon its overall significance. The HEA states that development is not deemed appropriate in the HLC zone BBHECZ 7 (Historic Environment Character Assessment 2010). Site could not be developed without substantial heritage impacts."</p> <p>This study forms part of a wider evidence base to support the Local Plan. Therefore the conclusions within this report will be weighed against other evidence when determining the overall suitability of a site for development.</p>

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD069)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
							<p>local housing market by increasing the range of houses and allocating deliverable housing sites within the urban area and, on land adjacent to the urban area. Policy SS5B of the Core Strategy states that sites identified adjacent to the urban area of Biddulph shall be in locations which relate well to the urban area, can be assimilated into the landscape and would help secure infrastructure improvements. The supporting text to Policy SS5B states that due to the extent of green belt around the town, opportunities for peripheral expansion are limited. Therefore, it establishes that in order to meet the longer-term needs of the town, some development will be required in the green belt. It states that up to 2026 there will be a need for a minimum of 813 dwellings in Biddulph, of which land for around 200 dwellings would need to be identified in the green belt. Policy SS5B, therefore, states that the allocation of small urban extension sites will require a comprehensive review of the green belt boundary around Biddulph to accommodate the new dwellings through the preparation of the Site Allocations DPD and an early review of the Core Strategy. We understand that the Council has recently reviewed the position in relation to local housing need accounting for the latest Government household projections, new population and employment data. The Council's updated Housing Need report, from January 2016, concludes that the housing need for the District is between 250 to 440 homes per year between 2012 and 2031. Therefore the Council's Preferred Options document proposes an annual housing requirement of 320 homes per year up to 2031. In relation to Biddulph it identifies a requirement for 1196 new dwellings (855 net) during the plan period to 2031. Therefore, we support the general growth strategy for the District and the focus on the delivery of the majority of housing and employment in the main towns, including Biddulph. We also support the proposed allocation of the Knypersley Hall Garden Centre site, within the town boundary, for residential development to help contribute towards meeting the housing needs for Biddulph, for the following reasons. We understand that the Government attaches great importance to Green Belts and that the fundamental objective of Green Belt policy, as established in the National Planning Policy Framework (NPPF), is to prevent urban sprawl. Paragraph 79 establishes that the essential characteristics of Green Belts are their "openness" and "permanence". However, by virtue of the site's former use as a Garden Centre and the built structures on the site, including various garden centre buildings and green houses, it is considered that the brownfield site does not effectively serve or perform the five purposes or functions of the Green Belt established in paragraph 80 of the NPPF: " to check the unrestricted sprawl of large built-up areas; to prevent neighbouring towns merging into one another; to</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD069)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
							<p>assist in safeguarding the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist in urban regeneration, by encouraging the recycling of derelict and other urban land. " Moreover, the edge of the site is well defined and visually contained by the existing trees and soft landscaping which are located along its boundaries. The trees and change in levels at the site boundary sever the site from the green belt to the south, in physical and visual terms. This results in the site becoming a pocket of brownfield land that is visually isolated from the main area of green belt to the south. Therefore, development of the garden centre site would result in no visual impact on the openness of the Green Belt. Furthermore, paragraph 89 of the NPPF states that the partial or complete redevelopment of brownfield land, such as the garden centre site, which would have no greater impact on the openness of the Green Belt and the purpose of including land within it would not be considered inappropriate development in the Green Belt. By virtue of the visual containment of the site it is considered that the redevelopment of this brownfield site for housing would not have any greater impact on the openness of the Green Belt or its function and would not constitute inappropriate development in the Green Belt. The land to the south of the site is not in agricultural use and is the Mill Hayes Playing Fields, which are used by Biddulph High School. It is considered that the northern boundary of the playing fields would provide a more appropriate, clear, defensible boundary for the green belt along a physical feature or use which is readily recognisable and likely to remain permanent in line with paragraph 85 of the NPPF. Moreover, we note that the Council's Green Belt Assessment, undertaken by Amec Foster Wheeler, in November 2015, confirms that the Knypersley Hall Garden Centre site makes a 'limited' contribution to the purposes and function of the green belt, is " potentially suitable " for removal from the green belt and comprises: " Previously developed land with reasonably strong outer boundaries and which would create a logical extension to the current settlement envelope. " We also note that the Council recognises, in their Options Site Assessment document (which accompanies the Preferred Options Site Allocations document), that in order for Biddulph to accommodate new development, the Green Belt boundary will need to be adjusted as there are insufficient sites in the existing settlement boundary to accommodate Biddulph's housing requirement to 2031. In proposing the site as a preferred option for removal from the Green Belt and residential development the Council clearly considers that the site is in a sustainable location that is contiguous with the neighbouring residential area that surrounds the site to the north, east and</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD069)

							<p>west. The Council clearly agrees with our view that the site is in an accessible location with good levels of accessibility to range of facilities on foot and by public transport. This is confirmed by the Council's site assessment which states that the site is well related to the residential area and is close to Biddulph High School and other facilities. Moreover, there are several bus stops in close proximity to the site. These are located on Park Lane and Mayfields Road (less than 300 metres walking distance from the site). The bus stops are served by a number of bus routes which provide access to the various shops, facilities and employment in Biddulph Town Centre and further afield to areas including Congleton, Newcastle and Hanley. As stated previously, the site is brownfield land and contains various garden centre buildings and greenhouses. Unfortunately, since the closure of the garden centre in 2003, these buildings have fallen into disrepair. The site has also been the target of both vandalism and arson. Therefore, it considered that the removal of the site from the Green Belt and its allocation for residential development would enable a viable use for the site and provide the opportunity for the existing dilapidated structures on the site to be replaced by a viable, secure and efficient use of the land for residential development, which would contribute towards meeting the identified housing needs for Biddulph. Given the sustainable location of the site and its accessibility to services and facilities in the town centre it is also anticipated that the site could make an appropriate contribution to meeting affordable housing needs in the district. The site is currently contained by security fencing due to the issues surrounding vandalism and arson. This gives the site an industrial appearance to dwellings surrounding the site. It is considered that the development of the site would also, therefore, provide the opportunity to improve the appearance and security of the site for residents living nearby. Technical Constraints It is understood that a suitable access to the site could be provided from Orme Road. Moreover, the development of the site would offer the potential opportunity for associated improvements to the 'un-adopted' Orme Road by a potential developer. Given the former use of the site as a garden centre is it not anticipated that there would be any issue or constraints to development in terms of ground conditions or contamination on the site. It is also understood that, given the former use of the site, and its location contiguous with the settlement boundary and nearby residential development, the site could be easily linked to mains services. The site is also fairly flat and there are no evident building constraints. According to the Environment Agency's Flood Risk Map the site is located entirely within Flood Zone 1 (i.e. at low risk of flooding with less than 1 in 1,000 annual probability of river or sea flooding). According to the National Planning Practice Guidance</p>	

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Housing Site BD069)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object /General Comment	Consultee / Agent Comments	Officer Response
							<p>(NPPG) residential development is a “more vulnerable” use to flooding. The NPPG confirms that residential development would be considered an appropriate use in Flood Zone 1. The Council’s Strategic Flood Risk Assessment (2015) also confirms that the site is in Flood Zone 1 at low risk of flooding. However, we note that there appears to be a minor error in the Options Site Assessment document, which accompanies the Preferred Options Site Allocations document, which suggests that the site is located within a flood zone. There are number of trees located within the site. However, the majority are located towards the site boundaries. Therefore, it is considered that the majority of the quality existing trees on the site could be effectively incorporated in to the design and layout of the site at a later stage. Moreover, the site is not subject to any designations relating to the conservation of ecology or biodiversity. Although the site is located adjacent to Knypersley Hall, a Grade II* Listed Building, as stated in the Council’s Site Assessment, the site is secluded and separated from Knypersley Hall by the adjacent lake and a significant number of trees and landscaping and falls outside the curtilage of the Listed Building. Therefore, it is considered that the development of the site for approximately 30 dwellings would not result in any significant impact on the designated heritage asset or its setting, subject to appropriate design. We understand that the Council is currently commissioning a heritage impact assessment, in conjunction with Heritage England, for all the sites selected as Preferred Options allocations and we look forward to reviewing the outcome of this in assessment in due course. We are not aware of any technical constraints that would prevent development of the site for housing. However, should the Council require any further technical information to consider or support the suitability of the site for residential redevelopment and removal from the Green Belt we would be willing to investigate this further and provide any information where possible. Capacity and Deliverability The site is approximately 1 hectare in area. It is assumed that it could be developed at a density of approximately 30 dwellings per hectare, given its rural location. Therefore, giving an indicative site capacity of 30 dwellings. This is reflected in the Preferred Options document which indicates that the Council agrees that the site is capable of delivering circa. 30 dwellings. The site is immediately available for residential development. Therefore, assuming that development of the site could commence within two years of the allocation of the site (in the Council’s Site Allocations Document which is expected to be formally adopted in 2017), following the grant of planning permission, we anticipate that the total number of dwellings would be constructed and delivered within a further year. Conclusions We trust that our responses above provide sufficient confirmation</p>

Question 17 – Do you have any comments on the Green Belt amendments for Biddulph? (Site BD117)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Organisation	GB Amendment	Support/Object/General Comment	Consultee / Agent Comments	Officer Response
PO1215	Mr P And Mrs J Dowson				BD117	Object	I object as this greenbelt and should stay as such. Where is the entrance going to be if this is changed for mixed use? Surely the land by Fast Far (opposite side) is more sustainable as there is already a access opposite The old Matador pub. Thus keeping mixed building use on one side of the road. Mill Hayes Road is already a rat run for the new housing estates Park Lane.	<ul style="list-style-type: none"> The Council has undertaken a Green Belt Review (published in 2015) to assess all the Green Belt in the Staffordshire Moorlands and determine whether it may be suitable for removal from the Green Belt to meet the District's future development needs to 2031. For this site, it was concluded that the overall impact of development on the Green Belt would be limited. 'This site would infill land between Mill Hayes Road and the A527 Tunstall Road. As such, the land is reasonably well bounded, although smaller boundaries to the east and north are hedgerows. (See also land to the north of Mill Hayes Road). Recommendation – Consider for release – Release under exceptional circumstances, should be accompanied by extension of the Town Boundary.' The site entrance is likely to be off Tunstall Road in proximity to the Victoria Business Park on the other side.
PO1214	Mr M Brassington				BD117	Object	The proposed development encroaches onto natural underdeveloped land. This will encourage encroachment in the future towards green way bank Country Park and eventually linkup to the Knypersley hall area. The natural greenbelt boundary to the east of Tunstall road has clear & open country park & the far ridgelines. This is a essential to the general impression upon entering into Biddulph Ford (Stoke on Trent urbanisation) & Biddulph. This site is a high value green Belt space (site) giving a clear separation with Stoke on Trent. Developing this will encourage strip development and no clear green belt break. The development should be placed to the west of Tunstall Road previously developed open cast lane.	<ul style="list-style-type: none"> Refer to PO1215 regarding Green Belt Review.

Question 18 – Do you have any comments on the proposed retail and employment sites in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site Ref	Support/Object/General Comment	Consultee Comments	Officer Response
PO71	Mrs Marilyn Griffiths				BD076/BD076A	General comment	Depending upon the type of retail. We do not need any more supermarkets.	Comments noted. The Council's Retail Study (published in 2013) recommends that the Council allocate a site to accommodate a discount foodstore to provide more choice for local shoppers as currently Sainsburys is the only large supermarket in the town. Evidence suggests that a high proportion of Biddulph residents still shop out of town for their main food shop and it is considered that a greater choice of supermarkets would help to reverse this trend.
PO495	Mr Denver Johnson				BD076/BD076A	Support	Apparently there is going to be a super Aldi built in Biddulph - not a day too soon! Role on the conversion of the Sainsbury's into a giant Netto!	Comments noted.
PO769	Mrs Sharon Kirkham				BD076/BD076A	Object	Biddulph's high street needs to be regenerated, not retail units/parks built to further close the few shops that remain (not helped by allowing Sainsburys to sell everything).	There has been recent regeneration of the town centre. Any further improvements are likely to be market-led and dependent on the amount of new development which occurs in the town. The Council's Retail Study (published in 2013) recommends that the Council allocate a site to accommodate a discount foodstore to provide more choice for local shoppers as currently Sainsburys is the only large supermarket in the town. Evidence suggests that a high proportion of Biddulph residents still shop out of town for their main food shop and it is considered that a greater choice of supermarkets would help to reverse this trend.
PO549	Mr Terry Barber				BD076/BD076A	Support	The retail environment in Biddulph is dying, with many private shops closing in the High Street. At least three new stores are needed, a discount foodstore would be one, with an additional clothes store and shoe shop at least as additional requirements.	Comments noted.
PO653	Mrs Siobhan Perry				BD076/BD076A	Support	This area is close to the town and the bypass and would be close enough to support housing development in that area.	Comments noted.
PO765	Mr Paul Malkin				BD076/BD076A	Support	It makes sense to use this land for development if extra retail units are required, with easy access to the A527 and the town centre and will also not negatively impact current residents	Comments noted.

Question 18 – Do you have any comments on the proposed retail and employment sites in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site Ref	Support/Object/General Comment	Consultee Comments	Officer Response
PO1340	Ms K Dewey	Staffordshire Wildlife Trust			BD076/BD076A	Object	BD 076a, covered by FID 226, part of FID 25 and part un-surveyed. District ecological value, biodiverse site. BD 076 covered by FID 25 - district ecological value, biodiverse site. These should be assessed against the Staffordshire LWS criteria. There are also a number of species-rich hedgerows identified by the surveys.	ECUS Ltd conducted Phase 1 ecological survey (incorporating Local Wildlife Site Assessment) in 2016. They concluded that both sites had the potential to support protected species. The site habitats on both sites were considered to be of nature conservation value at local and site level. Further survey work was identified as a requirement for both sites. On site BD076 more information is required regarding the species rich hedgerow and the presence/absence of reptiles on the site in order to establish SBI/ BAS status. On site BD076a further investigation of the presence/absence of reptiles on the site is needed. If these sites are taken forward as allocations, policy wording will require the survey work to be undertaken in order to inform any planning application for development of the sites.
PO2781	Mr Martin Ross	Environment Agency			BD076/BD076A	General comment	The following comments highlight sites where we consider there may be issues relating to contaminated land. BD076a: According to information held by the Environment Agency, these sites are located above historic landfill sites. The local council, as lead regulator for these sites, should be contacted for further information.	The Council's Environmental Health section has advised that there is possible landfill in the North West part of the site. Any developer would have to undertake investigative work to assess contamination risk and remediate land where required. This will be an additional development cost. This will be raised in the Local Plan policy for the site.
PO2886	James Chadwick	Staffordshire County Council			BD076/BD076A	General comment	The site is adjacent to, or overlaps with a Biodiversity Alert Site. Design and layout should avoid impacts in this site, enhance it where possible, and maintain linear habitat connectivity.	Comments noted. These requirements will be incorporated into the Local Plan policy for this site.
PO5198	Mr Peter Brittain				BD076/BD076A	General comment	Western development will be balance the town.	Comments noted.
PO5137	Mr Gary Harding				BD076/BD076A	General comment	Biddulph bypass benefits Biddulph building on the west side.	Comments noted.
PO5253	Mr and Mrs J B Ecclestone				BD076/BD076A	Support	Everything considered it would seem a more cost effective development.	Comments noted.
PO5231	Mrs I E Sefton				BD076/BD076A	Support	Developments of employment sites appeal to offer excellent opportunities to further development of businesses.	Comments noted.
PO5251	Mrs J Sutton				BD076/BD076A	Support	I support the need for further retail and business's within the town centre supported by an increased pedestrian traffic that could easily access the town from the western development sites.	Comments noted.

Question 18 – Do you have any comments on the proposed retail and employment sites in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site Ref	Support/Object/General Comment	Consultee Comments	Officer Response
PO5127	Ms Lynne Evans				BD076/BD076A	General comment	The bypass enables the development of the town centre and the surrounding west side.	Comments noted.
PO5131	Ms Lynne Evans				BD076/BD076A	General comment	The old railway track has many more access routes that lend themselves to making developments here far easier, this area would avoid the problems experienced around the new uplands mill developments, with its squeezed together look and unattractive outcome.	Comments noted.
PO4610	Biddulph Neighbourhood Plan Working Group	Biddulph Neighbourhood Plan Working Group			BD076/BD076A	Support	BD076, BD076a – recommended for inclusion.	Comment noted.
PO5342	Mr D Heath				BD076/BD076A	Support	The west side of the bypass lends to the better development to support the town.	Comments noted.
PO5355	Mr D Heath				BD076/BD076A	Support	Building to the west side also closer to the Chatterley Whitfield site understood to create 2100 jobs. Being able to walk via the railway line.	Comments noted.
PO5283	Mrs S Purcell				BD076/BD076A	Support	i agree	Comments noted.
PO5290	Mrs S Purcell				BD076/BD076A	Support	i agree	Comments noted.
PO5291	Mrs S Purcell				BD076/BD076A	Support	i agree	Comments noted.
PO5306	Mr and Mrs A. Hodgkinson				BD076/BD076A	Support	All these comments are sensible and constructive, and we agree with them completely.	Comments noted.
PO5111	Mr Cottrell				BD076/BD076A	General comment	These sites should have been used for residential building before employment site. No one would come to Biddulph to open a business.	<p>There is demand for employment land in Biddulph. These sites would be developed as part of a wider regeneration opportunity including land to the south to bring forward a large strategic mixed use regeneration site which is well related to the town centre and its key services and facilities.</p> <p>An assessment of employment land requirements by NLP in February 2017 concluded that 13ha to 27ha of employment land was required to meet the needs of the district 2014-2031. It was recommended and agreed by Council Assembly on 08/03/17 that an annual housing requirement of 320 homes per year (close to combined jobs growth scenario) was taken forward into the Preferred Options Local Plan. An employment land requirement of approximately 27ha was therefore recommended up to the year 2031 for the Preferred Options Local Plan on the basis that it was at the top of the OAN range</p>

Question 18 – Do you have any comments on the proposed retail and employment sites in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site Ref	Support/Object/General Comment	Consultee Comments	Officer Response
								for employment and so closely corresponds with the proposed housing requirement to support sustainable development. Applying the 20% requirement for Biddulph wards in Pol SS3 Core Strategy gives a requirement for the town of at least 5.4ha, less qualifying 2014-17 employment commitments. A range of employment site choices have been selected for Biddulph – either close to the town centre (i.e. this site) or to the existing Victoria Business Park.
PO5087	Mr J Neate				BD076/BD076A	Support	Development the Biddulph Town Centre will attract more shoppers to the town centre to spend money – must be good.	Comments noted.
PO5106	Mr J Neate				BD076/BD076A	Support	The recommendations regarding the Market Days/dedicated market area/link the Excellent.	Comments noted.
PO5107	Mrs L Neate				BD076/BD076A	Support	The recommendations regarding the Market Days/dedicated market area/link the Excellent.	Comments noted.
PO5088	Mrs L Neate				BD076/BD076A	Support	Development the Biddulph Town Centre will attract more shoppers to the town centre to spend money – must be good.	Comments noted.
PO5153	Mrs P Alcock				BD076/BD076A	General comment	The sites being developed to the west of Biddulph could benefit from the new retail sites and would be in easy access and walking distance	Comments noted.
PO5175	Mr S Sneyd				BD076/BD076A	Support	i support this	Comments noted.
PO5171	Mrs K Sneyd				BD076/BD076A	Support	i support	Comments noted.
PO5162	Mr N McQuade				BD076/BD076A	General comment	Thanks for listening to residents comments: Please keep as much Green Belt as possible very important.	Comments noted.
PO5213	Mrs L McQuade				BD076/BD076A	Support	The town centre should be treated as.	Comments noted.
PO5204	Miss F McQuade				BD076/BD076A	General comment	The town is dead for younger people/update pls.	
PO5227	Mr I Seabridge				BD076/BD076A	Object	Disagree 'pie in the sky?'	Comments noted.
PO5241	Mrs P G Webb				BD076/BD076A	Support	The town centre developments needed many more shops would be very welcomed.	Comments noted.
PO5245	Mrs P G Webb				BD076/BD076A	Support	New primary school is desperately needed/I strongly support the proposals here.	
PO5321	Mr D Lovatt				BD076/BD076A	Support	i support	Comments noted.
PO5349	Mr I Barber				BD076/BD076A	Support	Regeneration of the town centre can only be achieved if the High street was made pedestrian zone, if the town was more attractive you can attract more visitors with Biddulph Grange Gardens to spend there.	
PO5296	Mr S Findlow				BD076/BD076A	Support	i support	Comments noted.

Question 18 – Do you have any comments on the proposed retail and employment sites in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site Ref	Support/Object/General Comment	Consultee Comments	Officer Response
PO5299	Mr S Findlow				BD076/BD076A	General comment	But not sure about closing the High Street to traffic. The elderly residents of the Pennine Way estate + the Washington Close area desperately need a round robin' mini bus service to help to get to the doctors and the shops and the dentist etc.: say from 9am – 3pm, it could be enterprising taxi service to set this up to help the elderly attend appointments. I strongly feel that the health infrastructure would be under great strain with such an increase in the population. I work at the local dental practice and we simply cannot cope with any more patients. We have to turn people away on a daily basis.	Comments noted. Your suggestions about the mini-bus service are outside the remit of the Local Plan. National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals (including health infrastructure). It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
PO5268	Mrs A Bridgette				BD076/BD076A	Support	The bypass offers better development sites: It was designed that way. There would be better balances to the town. It is better to develop the town centre, making it more balanced Building here to the west is closer to the proposed site Chatterley Whitfield, gives the opportunity to the health centre and the town amenities.	Comments noted.
P010291	Mr Chris Millington					Support	Makes sense to build retail to the south and the west where according to the core strategy houses should be built.	Comments noted.

Question 18 – Do you have any comments on the proposed retail and employment sites in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site Ref	Support/Object/General Comment	Consultee Comments	Officer Response
PO9042 PO9041	Gallagher Developments Ltd	Gallagher Developments Limited	Mark Rose	Define	BD076/BD076A	Object	<p>My clients would object to a mixed use and employment allocation of 3.5ha in the northern part of Core Strategy Broad Area 4 (BD076 / BD076A). There has been a long standing allocation on that site, and they have marketed it for employment and commercial uses for over 10 years without success. Their firm view is that residential development is the only viable use on the site, and as such the entire site should be allocated for residential development in the Local Plan review. That course of action is explicitly supported by the NPPF which states (para. 22) that “Planning policies should avoid the long term protection of sites allocated for employment use where there is no reasonable prospect of a site being used for that purpose. Land allocations should be regularly reviewed. Where there is no reasonable prospect of a site being used for the allocated employment use, applications for alternative uses of land or buildings should be treated on their merits having regard to market signals and the relative need for different land uses to support sustainable local communities.” Indeed, the Employment Land Requirements Study states (para. 8.4) that: “Whilst adopted and emerging Local Plan policies may seek to safeguard against the loss of employment land to other uses it is likely that, over the course of the plan period, some land will be lost to alternative use (for example where they are no longer suitable for employment use). In accordance with the Practice Guidance, market signals should be used by the LPAs as a guide to whether losses in certain areas will be appropriate or not.” It later (para 8.18) states: “any new provision should ensure that the layout, location and type of space is attractive to the market rather than purely focusing on the quantum of space delivered”. Furthermore, it is questioned whether the need actually exists for an employment allocation on this site in Biddulph. The consultation paper refers to an employment land requirement of 35ha in the District (para 3.16) which is in the middle of the range identified in the Employment Land Requirements Study (para 7.108: 25-45ha). However, the Study states: “it is recognised that the labour supply projections which link to the Objectively Assessed Housing Need are towards the lower end of this range. Whilst it has been acknowledged that there is not a direct causal link between housing and employment land requirements, there is nevertheless a need to</p>	<p>See response to PO5111.</p> <p>A masterplan would be set out incorporating this land and neighbouring land to establish a suitable layout for the scheme.</p> <p>Refer to site policy in the Preferred Options Local Plan for further details.</p>

Question 18 – Do you have any comments on the proposed retail and employment sites in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site Ref	Support/Object/General Comment	Consultee Comments	Officer Response
							ensure that the two dovetail together to avoid any unsustainable outcomes". Moreover, in relation to Biddulph specifically the consultation paper identifies a residual employment land requirement of only 1.95ha in Table 3.3, and a need for a 1000m2 discount foodstore in Table 3.4, but then proposes the allocation of a total of 10.24ha of employment land in and around the town. Consequently, in relation to Broad Area 4, given the clear lack of market interest in employment or commercial uses on the site, and the over riding need to increase the housing land supply in town as highlighted above, it is contended that these areas in the site should also be allocated for residential development in the Local Plan review as part of the wider site allocation.	
PO362	Miss Jenna Woolliscroft				BD076/BD076A	Object	Wildlife, beautiful scenery.	Comments noted.
PO9647	Mr D Copeland				BD076/BD076A	Support	Need to bring more employment opportunities into Biddulph.	Comments noted.
PO9695	Mrs P Hancock				BD076/BD076A	Support	I support.	Comments noted.
PO10048	Mr Philip Sutton				BD076/BD076A	Support	I support the need for retail around the town centre within walking distance of the proposed development sites on the west side of the bypass.	Comments noted.
PO10247	Mrs Angela Turner				BD076/BD076A	Support	In terms of ecology, this is classed as District value. A high proportion of the land is poor (70%) but the land to the north and eastern edge contains important habitats. This area should be considered for designation as Visual Open Space.	See response to PO1340.
PO9861	Mr Gayle				BD076/BD076A	Support	Support	Comments noted.
PO4590	Mr I Botham				BD117	Object	I recently attended a meeting at Biddulph Town Hall where the Parish Councillors now decided at the eleventh hour to get involved in this process that's been going on since 2009. There decided outcome of the meeting (that was predominantly about Akesmore Lane proposed site) was to propose that housing development should take place on an extension of the Victoria Business Park on what was previously the Victoria Colliery Site and on land at Childerplay Road, and to oppose all building in Green belt (despite both these sites being in Green Belt). I would question whether either of these sites are actually in Biddulph? As i have always been told by the SMDC council that my property is the boundary between Stoke and Biddulph. In my opinion development of Childerplay	An assessment of employment land requirements by NLP in February 2017 concluded that 13ha to 27ha of employment land was required to meet the needs of the district 2014-2031. It was recommended and agreed by Council Assembly on 08/03/17 that an annual housing requirement of 320 homes per year (close to combined jobs growth scenario) was taken forward into the Preferred Options Local Plan. An employment land requirement of approximately 27ha was therefore recommended up to the year 2031 for the Preferred Options Local Plan on the basis that it was at the top of the OAN range for employment and so closely corresponds

Question 18 – Do you have any comments on the proposed retail and employment sites in Biddulph?

							<p>Road is remote to the town and creates sprawl into the Green Belt, whilst I feel that the old Victoria Colliery would make an extension to the Victoria Business Park, keeping the industrial units in Knypersley (Brown Lees on the site of A527) Therefore releasing my site for residential development that everyone else seems to oppose in their area. My site is a infill site between Victoria Row and houses in Mill Hayes Road and New building's, it would be easily accessed via adaption of the traffic light junction to Victoria business Park, I hope that you will give this careful consideration, in any event I confirm that the land is fully available for development.</p>	<p>with the proposed housing requirement to support sustainable development. Applying the 20% requirement for Biddulph wards in Pol SS3 Core Strategy gives a requirement for the town of at least 5.4ha, less qualifying 2014-17 employment commitments. A range of employment site choices have been selected for Biddulph – either close to the town centre or to the existing Victoria Business Park.</p> <p>This site (as shown in the 'Preferred Sites and Boundaries Consultation Booklet') includes your land has been selected primarily for employment use as it has good road links and is well related to Victoria Business Park so is likely to be attractive to businesses to help meet the employment needs of the District.</p> <p>It is proposed that there will also be a residential element to meet housing needs and assist with the viability of the scheme as a whole. A masterplan will be created to look in detail as to which land uses could occupy particular parts of the site.</p>
PO10275	Mrs C Williams				BD117	Object	<p>Land South of Victoria Row Area not suitable for industrial units as it would impact on the landscape. Approaching Biddulph from the south with industrial units both sides would be an eyesore and not in keeping with the character of Biddulph. Other more appropriate sites are available West of Tunstall Road. Would increase HGVs, traffic turning onto Tunstall Road, should 3 way traffic lights are proposed this would cause more delays. Would, eliminate any future expansion off Mill Hayes Sports and recreation ground.</p>	<p>The Council's Landscape Impact Study states "Large site comprising fields on the southern edge of Biddulph, east of the A527 (Tunstall Road); south of Victoria Row; and north and west of Mill Hayes Road. Residential properties and a smallholding are located on the A527 and are enclosed by the site. The site is opposite Brown Lees Industrial Estate, which is located on the opposite side of the A527. However, despite this, the site is rural in character. The agricultural buildings enclosed by the site and the cottages on Victoria Row contribute to this character. The site is large and open with high visual prominence, particularly in the north and east of the site, with long distance views available from the footpath on the northern boundary. Visual prominence is lower in the south-west of the site, south of the existing properties on the</p>

Question 18 – Do you have any comments on the proposed retail and employment sites in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site Ref	Support/Object/General Comment	Consultee Comments	Officer Response
								<p>A527, where the land is enclosed by trees and hedgerows. The landscape sensitivity of the site is low in the south-west, increasing to the north-east corner of the site where sensitivity is highest. In order to limit potential landscape impacts the existing vegetation in the south-west of the site should be retained, and additional planting could be undertaken on the edges of, and within the development, to create a strong vegetated edge and soften the appearance of the development in long distance views. Limits on the size and scale of buildings would also soften the appearance of the development.”</p> <p>The Council must balance the evidence it has in considering this land for development.</p>
PO83	Mr Robert Moseley				BD117	Object	NO further retail is need, there are plenty of empty shops in biddulph.	The Council’s Retail Study (published in 2013) recommends that the Council allocate a site to accommodate a discount foodstore to provide more choice for local shoppers as currently Sainsburys is the only large supermarket in the town. Evidence suggests that a high proportion of Biddulph residents still shop out of town for their main food shop and it is considered that a greater choice of supermarkets would help to reverse this trend. BD117 is not however, proposed for retail use – the relevant site is BD076a which is on the edge of the town centre.
PO362	Miss Jenna Woolliscroft				BD117	Object	Wildlife, beautiful scenery.	Comments noted.
PO179	Mr Kingsley Rowland				BD117	Support		Comments noted.
PO324	Mr Frank Cottrell				BD117	Support	These sites should be used for residential building	See response to PO4590.

PO292	Mr David Spruce				BD117	Support	Location on edge of town. Away from town centre and close to current employment area.	Comments noted.

Question 18 – Do you have any comments on the proposed retail and employment sites in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site Ref	Support/Object/General Comment	Consultee Comments	Officer Response
PO1019	Mr G Cooper				BD117	Support	Would it not also be a good idea to use the new access road in that would be required off the VBP traffic light junction to access the larger southern area of the ADD04 previously proposed for 250 houses via Mill Hayes Road near the small fishing pool. This must surely be a more viable proposition than ADD03 where there does not seem a obvious point of accessing this site for a future proposal of 300 houses because Akesmore Lane would not be suitable. This would concentrate all the investment in one area & would also seem to have a smaller impact on the town than some of the the other proposed sites going by the numbers of objections received. Also this whole area seems a better proposition for removing from the green belt than other areas according to the green belt review. thanks for reading	The Council must balance all the evidence it has in deciding which sites to take forward for development in the next draft of the Local Plan.
PO689	Mr Ian Turner				BD117	Object	Got quite enough retail buildings which are disused and not sustainable. Building more in the area of housing and recreation is disgraceful and stressful to the people living in the vicinity	Retail development is not proposed on this site. It is proposed for a mixture of housing and employment.
PO455	Mrs Jean Fairbanks				BD117	Support	The town centre needs developing towards the west side to assist retail, it also needs to be more attractive.	Comment noted.
PO470	Mrs Jean Wrench				BD117	Support	Support	Comment noted.
PO632	Mrs Amanda Reed				BD117	Support	Support	Comment noted.
PO660	Mr Andrew Perry				BD117	Object	This area is close to the town and the bypass and would be close enough to support housing development in that area.	See response to PO4590.
PO772	Mr Paul Malkin				BD117	Object	could this land not be used for housing only to minimise the impact on green belt and on current residents of Biddulph	See response to PO4590.
PO787	Mrs Anne Barnsley				BD117	General comment	Site BD117 - Situated on the A527 on the outskirts of the town - this site has currently been identified as a "Potential Suitable Employment Site". However, in view of the fact that there are vacant units, plus scope for expansion on the Victoria Business Park, I feel that this site is more ideally suited for consideration as a "Potentially Suitable Housing Site". In addition, I would also suggest that land on the left-hand side (from the A527) of Childerplay Road is also considered as a "Potentially Suitable Housing Site".	See response to PO4590.
PO778	Mrs Jayne Beech				BD117	Support	I support the use of BD117 for employment and development. The southern end of the town already has Industrial estates, so additional retail and industrial use would not be out of place here. This makes good use of the land, as all of the industry is within one geographic area, and not dotted about here and there.	Comments noted.

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO386	Mrs Margaret Fowell				General comment	I am concerned that the proposed housing allocation will have a detrimental effect on the Haydon Park estate. I believe that the land off Akemoor Lane is mined and there are underground streams. Water run-off is already a problem in some parts of the estate and I think this can only get worse if the building plan is implemented.	<ul style="list-style-type: none"> The Council is aware of mining issues which affect a number of green field sites around Biddulph and investigative work will take place in these areas prior to the commencement of any development. The site is not within floodplain and the Environment Agency has not commented as such. If there is an existing issue with surface water drainage then new development would need to address this. An on site SUDs (Sustainable Urban Drainage) system would be required on this site if it were to be developed.
PO2592	Consultation Service	Natural England			General comment	Natural England notes the proposed preferred site for allocation in Biddulph. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.	<ul style="list-style-type: none"> The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.
PO2780	Mr Martin Ross	Environment Agency			General comment	The following comments highlight sites where we consider there may be issues relating to contaminated land. ADD03: According to information held by the Environment Agency, this site is located above historic landfill sites. The local council, as lead regulator for these sites, should be contacted for further information.	<ul style="list-style-type: none"> It is considered that although this matter will require more detailed investigation at the time a detailed scheme is being developed, it is an additional development cost rather than an issue which would prevent development from taking place.
PO4580	Mrs M Smith				General comment	Poor access from existing roads, on to a very narrow lane. The old train line is a national cycle route as well as a bridle way and a walkway. The development may have an impact on the traffic through Haydon Park making safety an issue as well as congestion. An alternative site may be the disused Victoria Colliery Site – excellent access to the A527 and is on a bus route.	<ul style="list-style-type: none"> The Highway Authority has no difficulties with the principle of development in this location. Improvements needed to the road network as a result of development would need to be identified through a Transport Assessment. The BVW is a very significant attribute in the town and part of a national Sustrans cycle route. Therefore any development in the area would be built around it. The route is generally buffered by trees and hedgerows. All new development bordering the route would be required to provide pedestrian and cycle links on to it. The Council has produced a Green Infrastructure Strategy and the BVW is identified within this document. It is not considered that development in this location would impact on the enjoyment of the route and long ranging views (e.g. to Mow Cop) and the wider countryside would remain. Sites at Victoria Colliery and Childerplay Road are within the Green Belt like ADD03. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy.

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4581	Mr & Mrs E Prudem				General comment	After living next to Wharf Road for the past 41 years we know better than anyone how busy and popular our lovely Biddulph Valley Way has become for cyclist, runners, walkers, horse riders et: how could anyone consider spoiling this amenity, by building houses and a school next to it. Also we have grave concerns about the wildlife in this area - would spoil their habitat. Akemore Lane is very unsuitable place to build a school and houses, it has very poor access, has a lot of surface mining and prone to flooding which has affected some property on Hayden Park. Surely there are more suitable sites than this one which could be found i.e.: Victoria Colliery has been suggested or others. We hope so.	<ul style="list-style-type: none"> • See response to PO4580 regarding Impact on BVW / Visual impact. • Ecus Ltd conducted Phase 1 ecological survey (incorporating Local Wildlife Site Assessment) in 2016. It concluded that the habitats on ADD03 were considered to be of nature conservation value at the site level only and are not listed as an important habitat in the Staffordshire SBI guidelines. Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site significantly supported any notable protected species. [Some predevelopment species surveys recommended] • See response to PO4580 regarding highways. • See response to PO386 regarding Mining. • See response to PO386 regarding Flooding – surface water drainage. • See response to PO4580 regarding Victoria Colliery and Childerplay.
PO4586	Mr G Bloor				General comment	I do not feel that the proposed development off Akemore Lane provides a suitable place to relax the Green Belt. Problems over access to and from and what are the needs sorry that says we need housing and a school? Biddulph Town is almost built up to the Town Boundary. Build on Brown Fields.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways. • The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district's full housing needs, including affordable housing, whilst taking into account migration and demographic change. Staffordshire County Council are the Education Authority and they look at the need for new schools in an area as a result of development. They consider that a new first school would be needed in Biddulph to accommodate the level of new housing development currently proposed. The location of this school would not be decided until the Council has firmed up its plans as to where the new housing development will take place in the town. (There are 2 options put forward as potential locations for a new school in the Preferred Option Sites and Boundaries Consultation booklet). • Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph (particularly Yarn Mill and Minster Mill) would be appropriate for residential development. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping brownfield sites.
PO4618	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			General comment	ADD03 - Further investigation is required for this site. It needs to be put out for consultation and comments and see what is the response. Remove narrow northern strip and enter via Wharf Rd off roundabout, recommendation TBD.	<ul style="list-style-type: none"> • Comments noted. This table shows the response to the consultation on this site.

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO9005	Mr J Turner				General comment	Please do not let them build on the field behind at the field at the end of my road because we make dens there and we play and we play in out street and do not want anyone to get ran over, the stream is very near and I like to the nature and the animals in the field.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways. • See response to PO4581 regarding Ecology.
	Petition with 450 signatures				Object	<p>We the undersigned object to the development of the greenbelt land above, on the grounds of:</p> <ol style="list-style-type: none"> 1. Unacceptable encroachment into the greenbelt, and destruction of natural habitat 2. Loss of open space and visual amenity along National Cycle Route 55 (Biddulph Valley Way) 3. Poor access creating unacceptable increase in traffic on narrow country lanes (Hall Rd, Wedgewood Lane, Mow Lane; Akesmore Lane), with dangerous junctions and lack of suitable footpaths 4. Loss of setting for listing buildings within the proposed development area 	<ul style="list-style-type: none"> • In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site ADD03 for release from the Green Belt. • See response to PO4581 regarding Ecology. • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4580 regarding highways. • Heritage Impact of development on the site has been assessed in the Council's Heritage Impact Study (August 2016), the results for this site are: "There is one Grade II Listed Building within the site. The setting of the asset contributes to the overall significance of it and would need special regard for its preservation. Development would be highly likely to cause adverse effects to its setting. Therefore, any development should be restricted to the southern part of the site only and mitigation should include the use of vegetation screening to reduce adverse effects to its setting. Whilst the HEA states that zone BBHECZ 18 cannot absorb significant change, development to the south of the site would be a small change to the zone as a whole, and with appropriate development, this could be accommodated on the site (Historic Environment Character Assessment 2010). Site is suitable for development in heritage terms, subject to suitable masterplanning; if development is restricted to the southern part of the site only and with appropriate screening." The Council must balance this evidence against all the other evidence relating to this site and reach a decision on whether or not to include it as a development site in the Local Plan.
PO20	Mr Robert Moseley				Object	This is Greenbelt land, with a long standing man made feature setting the appropriate boundary. No further encroachment should be made up the valley sides into the Green belt.	<ul style="list-style-type: none"> • In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site ADD03 for release from the Green Belt.
PO40	Mrs Emma Hallen				Object	The housing will destroy green belt land which should be protected from development. Access from akesmore lane and mow lane crossroads would be a problem - volume of traffic and cars edging out of a dangerous crossroads.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt. • See response to PO4580 regarding highways.

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO72	Mrs Marilyn Griffiths				Object	We think that there are sufficient sites to build additional housing without using green belt land	<ul style="list-style-type: none"> • See response to PO regarding using brown field land first (including mills).
PO84	Mr Robert Moseley				Object	This is beautiful, pictureque greenbelt that serves the whole community and more as people walk, cycle, run , toddle along the old railway line.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding Impact on BVW / Visual impact
PO10279	Cllr Chris Wood				Object	I also reject the sites at Akesmore Lane ADD03 which is completely ridiculous in terms of access it is a narrow country lane which has 3 streams running through it ,there are numerous mineworks in the area and the main point is that Biddulph is known as the garden town and the Biddulph valley way is an important aspect on the eyeline when approaching Biddulph and this incursion into the green belt goes against the fundamental principles of the green belt review , this site was added at a late stage and should be ruled out as completely unsuitable .	<ul style="list-style-type: none"> • See response to PO4580 regarding highways. • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO20 regarding loss of Green Belt • The Local Plan production process, by its very nature, involves several stages of consultation at which point anyone can suggest further sites for inclusion in the plan and the Council decides on whether they are appropriate. This site was suggested as part of the site options consultation.
PO87	Mr James Baskeyfield				Object	Regarding the proposal to build 300 houses and a school on greenbelt land off Akesmoor Lane, Biddulph, my wife and I strongly object for the following reasons This is a Developers Charter and not in the interests of Biddulph. It appears that the planners at SMDC have no respect for the Council Tax payers of Biddulph West. It is obviously a desperate and badly thought-out idea. This beautiful area of greenbelt land, with the view West from the Biddulph Valley Way, will be ruined. Have the planners considered the access difficulties in narrow, winding Akesmoor Lane? During the building process local residents would be subjected to noise, parking of builders' vehicles and machinery. Afterwards there would be noise from the school, a lot of extra traffic, plus parking in the cul de sacs on Haydon Park by parents of the schoolchildren. We do not believe Biddulph needs any more housing or schools adding to the urban sprawl and pressure on local services. The Biddulph Valley Way was always meant to be a division between local development and the greenbelt. SMDC is blatantly disregarding their original policy.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding highways. • Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations nor is the possibility of noise from the school or parking issues. • See response to PO4586 regarding need for housing and school • See response to PO4580 regarding Impact on BVW / Visual impact

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO445 PO840	Mr Gerard Hearson Mrs Ruth Hearson				Object	<p>The number of houses being proposed for ADD03 is unclear. This website refers to 60 houses, yet other sources refer to ' up to 300 ' houses. If it is known that there are plans to build up to 300 houses on ADD03, then this website should make that clear and not appear to be hiding the fact. Our property in Smokies Way backs on to the bridleway (old railway line) and overlooks the beautiful green fields of ADD03. The assurance that this was green belt - and would therefore not be built on - was a major consideration when purchasing the property. To build here would ruin this unspoilt view and considerably devalue our property. The detrimental impact on the thatched Whitehouse Cottage (Grade II listed building - English Heritage Building ID: 275237) which is situated in ADD03 cannot be overstated. If this proposal goes ahead, consider the incongruous site of a Late 15th Century cottage in the middle of a 21st Century housing estate and school. There is also the added danger to the thatched cottage of vibration from construction traffic and an increased risk of fire to/from any new houses or school. Access to a school and houses in ADD03 is a major concern. Akemoor Lane is very narrow and its dangerous bends and soft verges makes it prone to regular accidents and frequent near misses. It's also in a constant state of poor repair with an uneven surface and damaging pot holes etc. It has high hedges that restrict vision for drivers and there is little or no street lighting, road markings or footpaths. The road itself often has mud on it and this can make driving treacherous, especially in wet conditions. School buses will add significant congestion and increase the risk of a serious accident. The notoriously dangerous and difficult cross-roads of Akemoor Lane/Biddulph Road and Tower Hill Road is already a major hazard for drivers, pedestrians and cyclists. Again, the risk of a serious accident will increase as more people drive to and from any new houses or school. It is assumed that there will be a need for other access roads to ADD03 - though these are, as yet, unannounced. Even if Smokies Way does not become an official access road, the likely impact on Smokies Way (and its nearby residential streets) is a major concern. This will inevitably turn our quiet cul-de-sac into a noisy and busy 'drop zone' on school days, as parents on the school run pull up (perhaps park up?) to allow their children quick access to the proposed school, by crossing over the bridleway. Note the old mine workings in ADD03 which are prone to collapse. The potential for sink holes also makes this site particularly unsuitable for a school and homes. Consider the potential damage to wildlife - and the conservation implications. ADD03 has ancient trees and is home to various birds, badgers, foxes and other small animals. A field in the lower part of ADD03 is also currently rented by local farmers to graze cattle and sheep. The accompanying sounds (and smells!) add to the sense of living in the country and help to make living in Smokies Way the</p>	<ul style="list-style-type: none"> • The Preferred Option Sites and Boundaries Consultation Document lists the site as accommodating 60 houses and a new first school. This is an indicative number and clearly if the Education Authority decided that the first school was not required in this location, the Council could decide to increase the number of houses on the site. There will be two further public consultations and a public examination before the plan is adopted so any changes made would be open to comment. • See response to PO20 regarding loss of Green Belt • Property values are not considered material in planning law. • See response to PO87 regarding residential amenity - disturbance from building work / noise from school / parking during school drop-off and pick-up times • Heritage Impact of development on the site has been assessed in the Council's Heritage Impact Study (August 2016), the results for this site are: "There is one Grade II Listed Building within the site. The setting of the asset contributes to the overall significance of it and would need special regard for its preservation. Development would be highly likely to cause adverse effects to its setting. Therefore, any development should be restricted to the southern part of the site only and mitigation should include the use of vegetation screening to reduce adverse effects to its setting. Whilst the HEA states that zone BBHECZ 18 cannot absorb significant change, development to the south of the site would be a small change to the zone as a whole, and with appropriate development, this could be accommodated on the site (Historic Environment Character Assessment 2010). Site is suitable for development in heritage terms, subject to suitable masterplanning; if development is restricted to the southern part of the site only and with appropriate screening." The Council must balance this evidence against all the other evidence relating to this site and reach a decision on whether or not to include it as a development site in the Local Plan. • See response to PO4580 regarding highways. • See response to PO386 regarding Mining • See response to PO4581 regarding Ecology • See response to PO386 regarding Flooding – surface water drainage • See response to PO4580 regarding Impact on BVW / Visual impact

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>delight it is. Ducks can often be seen on the areas of water caused by the flooding fields , particularly adjacent to the Old Station House just off Halls Road. The proposed ADD03 development also poses a real flood risk to properties in Smokies Way. Many new buildings in ADD03, with large areas of Tarmac, block-paving, slabs and other hard surfaces will increase this risk to Smokies Way, as it becomes more difficult for surface water in ADD03 to drain away. The proposal will have a detrimental impact on the tranquil and beautiful setting of at least one public footpath and several streams in ADD03. Views from the renowned Staffordshire Way will also be spoiled. Consider also the Biddulph Valley Way (and National Cycle Path N55). This is used extensively by walkers, ramblers and cyclists from both inside and outside of the area and the stretch alongside the proposed ADD03 site is one of the most beautiful. The views across to Akemoor Lane and towards Mow Cop etc will be simply ruined by the plan to build up to 300 new houses and a school.</p>

PO216	Mrs Rowena Jukes				Object	<p>I would like to object on the following grounds: There doesn't seem to be enough evidence that all potential Brownfield sites have been explored for development before Greenbelt has been proposed for inclusion on the plan. For example, there are a number of derelict Brownfield sites on Station road, which could be used as an alternative. The road infrastructure around this proposed site cannot cope with the demands of weekend league football matches. Therefore, housing on this site would compound the situation and potentially make the roads around this area unsafe. There is a Grade II Listed building on the proposed site. Building here would destroy the habitat of numerous species of wildlife that are established in the area. The train lines that run through where the proposed development site is attract a lot of people, not just from Biddulph. If houses and potentially a school are built on the site, this would discourage people from using it. Neighbouring councils have made agreements to transfer some of their housing allocation to other authorities who have excessive derelict Brownfield sites. Why is this not being considered as an alternative before using Greenbelt sites? To say that this is because there is a need for housing cannot be justified as the recent development on the old Select us site could not sell all of the houses privately and so 60% of that is now social housing. How many of this 60% is used for the social housing needs of the Staffordshire Moorlands? If those houses are being offered to other authorities to help to meet their social housing alternatives because Staffordshire Moorlands have met their social housing needs, then there is no further need for housing in Biddulph. Therefore, the inclusion of any of the Greenbelt sites is not justified.</p>	<ul style="list-style-type: none"> • See response to PO4586 regarding using brown field land first (including mills) • See response to PO4580 regarding highways. • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO4581 regarding Ecology • See response to PO4580 regarding Impact on BVW / Visual impact • National planning guidance states that the Council should seek to meet the development needs of their area. Neighbouring authorities including Stoke and Newcastle Councils have their own development needs to meet. • See response to PO4586 regarding need for housing and school • See response to PO20 regarding loss of Green Belt
PO295	Mr Peter Benn				Object	<p>When I purchased a property on Smokies Way I obtained a Coal Mining Report from the Coal Authority that stated that it "is in an area where coal is believed to exist at or close to the surface that may have been worked at some time in the past". Also, 'the property is within the likely zone of influence on the surface from two seams of coal at approximately 70m and 190m depth, the last date of working being 1880.' I also have a copy of a report on disused mine shafts in the vicinity of The Parkway (Smokies Way) prepared for Tay Homes Ltd. This shows the location of several disused mine shafts on the site. Given the close location of the proposed Akesmore Lane development to Smokies Way it would seem highly likely that that land would also be subject to past mining.</p>	<ul style="list-style-type: none"> • See response to PO386 regarding Mining

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO346	Miss Gemma Docksey				Object	<p>Re ADD03 Akesmore Lane As I have mentioned in other comments to previous questions on this matter, taking such a huge chunk of Green belt back for residential use is inappropriate. Building a potential 300 homes and a school on plot ADD03 would have a huge impact on the leisure industry i.e. Route 55, it will have a massive impact on the amount of traffic using the country lanes of Gillow Heath. I have been told that the roads would be improved however it is not just Akesmore Lane and Station Road which will feel the impact. Station Road already has issues with no off road parking causing congestion and making the junction with Dorset Drive dangerous to get out of. (this is a piece of road which could not be widened due to buildings on both sides) All of the other roads in the area would have an increase in passing traffic. Halls Road is torturous at the weekends already due to the lack of parking for the weekend footballers and their families. On most weekends tractors and large vans/lorries cannot get down the road due to parked cars, the thought of being able to get an emergency vehicle to anyone on the road or them accessing Gillow Heath that way is unthinkable and a worry already. Please don't add more traffic to this already dangerous situation we are put into continually. Could we reduce the acreage used on Akesmore lane and utilise the area closer to the bypass, this could potentially have access from the bypass and reduce the hazards we already face in Gillow Heath. Again I understand more homes need to be provided however why are you wanting to use huge chunks of land at a time. Why not develop smaller areas around the borders of our town. This is not a case of not wanting development near me, it is a case of why do we need to do so much in such large areas. spread them out, build on Brown belt land, utilise the old buildings i.e. the old mill on Station Road. Do smaller development more evenly dispersed, providing the same quantity of homes but leaving less of an impact on specific areas of the town.</p>	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4580 regarding highways. • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO4586 regarding using brown field land first (including mills) • A range of sites are proposed in the plan both large and small to meet Biddulph's housing needs. It would be unrealistic to identify all small sites for Biddulph as the Council is required by the Government to demonstrate that sites they identify will actually be built and smaller sites tend to be less viable.
PO688	Mr Ian Turner				Object	<p>This is a rural area with heavily used public walkways used for leisure. Also, the roads are not able to take further traffic and maintain the rural aspects of existing properties in the area</p>	<ul style="list-style-type: none"> • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4580 regarding highways.

PO416 PO417	Mrs Shirley Foster				Object	The proposed plans for the site off Akemoor Lane in Biddulph will completely decimate the local flora and fauna. The proposed site is home to many species of plants and wildlife including bats, bats are a protected species and it is against the law to disturb and resting or breeding sites, the below has been taken directly off the government website: What you must not do You're breaking the law if you do certain things including: deliberately capture, injure or kill bats damage or destroy a breeding or resting place obstruct access to their resting or sheltering places possess, sell, control or transport live or dead bats, or parts of them intentionally or recklessly disturb a bat while it's in a structure or place of shelter or protection Either or both of the following could happen if you're found guilty of any offences: you could be sent to prison for up to 6 months you could get an unlimited fine Activities that can harm bats Activities that can affect bats include: renovating, converting or demolishing a building cutting down or removing branches from a mature tree repairing or replacing a roof repointing brickwork insulating or converting a loft installing lighting in a roost, or outside if it lights up the entrance to the roost removing 'commuting habitats' like hedgerows, watercourses or woodland changing or removing bats' foraging areas using insecticides or treating timber The conservative manifesto also clearly states the following: on page 51 ensure local people have more control over planning and protect the Green Belt. Also Page 52 it again clearly states: We will protect the Green Belt We have safeguarded national Green Belt protection and increased protection of important green spaces We have abolished the Labour Government's top-down Regional Strategies which sought to delete the Green Belt in and around 30 towns and cities and introduced a new Local Green Space planning designation which allows councils and neighbourhood plans to give added protection to valuable local green spaces	<ul style="list-style-type: none"> • See response to PO4581 regarding Ecology • See response to PO20 regarding loss of Green Belt
PO775	Mrs Sharon Kirkham				Object	The proposed housing allocation numbers would be reasonable as long as they were targeted in the right areas, ie Victoria colliery and Childerplay being prime areas for development. Biddulph Valley needs to be protected and we need to stop tearing up greenbelt land. The current infrastructure cannot cope now, never mind with such a vast increase in the number of residents - trying to get a GP appt is a joke at the moment (they have been unable to fill one position at the surgery for the past 2years). Trying to get in and out of Biddulph for work is a nightmare - effectively there is really only one road through. High Peak officers ought to try and get to work from here!	<ul style="list-style-type: none"> • See response to PO4580 regarding Victoria Colliery and Childerplay • See response to PO20 regarding loss of Green Belt • National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the County Council to assess the impact of proposed development on school capacity, what additional capacity is needed and how this can be delivered. • See response to PO4580 regarding highways.

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

PO380	Mrs Jacqueline Baskeyfield				Object	I object to any greenbelt land around Biddulph being used for building, in particular the site off Akesmoor Lane. The officers at SMDC should listen to Biddulph Councillors who know that this land contains mine shafts and is prone to flooding. Also, Akesmoor Lane is completely unsuitable for any more traffic. Surely the Environment Agency and Staffordshire Highways Dept will not agree to this poorly thought out scheme. Why not approach Newcastle under Lyme Council to discuss the possibility of building houses on the brownfield Victoria site?	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO4580 regarding highways • See response to PO216 regarding building in neighbouring authorities instead
PO490	Mrs Lynda Cotterill				Object	I object to the proposed housing and school development off Akesmore Lane. The reasons for my objection are:- Narrow roads, difficult access to Akesmore Lane. Use of greenbelt when other sites are available eg Victoria colliery site, factories around the town centre eg Minster Mill on Walley Street, derelict mill on Station Road etc. This area is sorely in need of redevelopment to improve the look of the town and is close to the town centre Meadows Way - potential site for housing, also I believe there is land in Brown Lees on offer for sale for housing development. General point - green belt land is needed for health & wellbeing of residents. Losing the rural nature of land around the town centre and destroying the sensitive and unique nature of Gillow Heath would be unnecessary and potentially destroy the attraction of that area.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding Victoria Colliery and Childerplay • See response to PO4586 regarding using brown field land first (including mills)

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO757	Mr Paul Malkin				Object	<p>Save Biddulphs Green Belt Firstly I would again like to comment that the Councils marketing of this consultation has been extremely poor, it has been left to residents associations and concerned residents to spread the bad news in their community. As council tax notices were sent to all residents a few weeks prior to the consultation starting then I would have expected the promotion of an important issue like this to have been included in that delivery. I feel SMDC have missed a real opportunity to work in partnership with neighbouring authorities to produce a North Staffordshire plan that could deliver the required housing whilst protecting green belt and identifying brownfield sites to continue to regenerate the area. When I asked if this had been considered at the Biddulph consultation meeting the council officer advised me that this had not been considered as "nobody wants to live in Stoke". I find this attitude from a council officer pretty appalling and if this is the attitude of the planning team then no wonder an innovative partnership approach had not been considered. Stoke have been successfully regenerating and redeveloping brownfield sites in the area for many years and I believe SMDC could learn a lot from their approach. In addition Stoke and Newcastle are where the job opportunities are being created and many residents of Staffordshire Moorlands will travel there for work and leisure and probably would want to live in these areas. The proposed sites for development are not only in green belt areas, but also along the boundaries of existing residents. The sites are going to have a detrimental impact on current council tax payers of the district who purchased properties at an inflated rate due to overlooking beautiful open fields. These residents are not only going to lose their beautiful views but also thousands of pounds from the value of their homes. I propose a number of sites that will have a minimal impact on the green belt and current residents. The Mills in Station Road and Walley Street are in desperate need of repair or regeneration. These could either be developed into apartments for young first time buyers or older persons or demolished and new properties built. This accommodation is far better situated close to the town centre and will keep the area more in keeping of the newer properties around them. There is also old brownfield land available either side of Congleton Road in Knypersley, the former Victoria Colliery site and the land behind Bemersley recycling centre off Childerplay Road. All of these sites have much better access to the main roads than the proposed sites that are all reliant on single track country lanes. What is required locally is housing to meet the needs of local people, there are key issues to address, young people can not get onto the housing ladder and have to resort to renting that can cost more than mortgage payments and there is an ageing population that require housing to meet their needs. What I would expect the planning department to complete before any</p>	<ul style="list-style-type: none"> • See response to PO1006 regarding poor marketing of consultation / Consultation period too short / Website not easy to use. • See response to PO216 regarding building in neighbouring authorities instead • See response to PO2044 regarding lack of employment • Property values are not considered material in planning law. • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4586 regarding using brown field land first (including mills) • See response to PO4580 regarding Victoria Colliery and Childerplay • It is agreed that affordable housing is needed locally – the Council’s Strategic Housing Market Assessment and housing needs surveys assess the numbers and types of houses needed. Site ADD03 will be required to provide a percentage of affordable housing / starter homes so will contribute to this need. • See response to PO4580 regarding highways • See response to PO1132 regarding water treatment works over capacity • See response to PO4586 regarding need for housing and school

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>development plans are signed off is a thorough research project to identify what is actually required locally, what is affordable to the local community and what the mix of starter homes, shared ownership and social rent homes should be. The Housing and Planning Bill has recently been passed and this includes the development of starter homes for first time buyers as part of the affordable housing requirement. These homes can be for sale up to £250,000 outside of London. Local salaries of young first time buyers would not make these affordable, SMDC must ensure that affordable homes to purchase are for sale at a price that local people can afford. The type of houses that are required should also be researched, surely the requirement is for smaller affordable homes, 1 bed apartments for singles and couples and older people to downsize to and then 2 and 3 bed homes for young families. I also made a freedom of information request to the district council with regard to the recent development at Uplands Mill in Biddulph asking for the breakdown of owner occupation, shared ownership and social housing and how many nominations had been made for local people to the social landlord, unfortunately this has not been provided in time for me to include this within this response. The reason I made this request was to be able to identify if there was a need for social housing in Biddulph or if the housing association had to widen its search for tenants to the north west, which I believe to be the case. This land should not be considered due to its impact on the green belt, the sewage works and the local highways, the roads are not built to meet the demand of all this additional traffic without making it dangerous for drivers and pedestrians alike.</p>	
PO1338	Ms K Dewey	Staffords hire Wildlife Trust			Object	<p>Site ADD03 has not been covered by the Extended Phase 1 Habitat Surveys.</p>	<p>Ecus Ltd conducted Phase 1 ecological survey (incorporating Local Wildlife Site Assessment) in 2016. It concluded that the habitats on site were considered to be of nature conservation value at the site level only and are not listed as an important habitat in the Staffordshire SBI guidelines. However, further surveys are recommended of the semi-natural broadleaved woodland present along the brook as this could qualify as an SBI under the Staffordshire guidelines.</p> <p>Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site significantly supported any notable protected species. Some species are listed as important in the Staffordshire SBI guidelines and therefore the site does currently qualify for consideration as an SBI or as a BAS under these criteria. However, prior to any future development the site should be checked again for signs of badger and activity surveys should be conducted to better determine use of the site by bats, especially along the eastern boundary. It would be necessary to conduct nesting bird checks before vegetation clearance or other disturbance during the bird breeding season. These requirements can be</p>

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

							included in policy if the site is selected for development.
PO1006	Mr J Hopkins				Object	The site off Akesmore lane is by the council on strategic availability assessment June 2015 deemed inappropriate due to flood issues, aside from the traffic – issues the proposal development would create. Much better to build on land (ex industrial off Brown Lees Foundry, Biddulph people don't care if this the town closer to stoke if this protects the Green Belt!! The consultation process poor – A complex process without proper explanation to local people, lots of maps, Jargon and false district council representatives who were besieged on the evening. Not good enough	<ul style="list-style-type: none"> • See response to PO386 regarding Flooding – surface water drainage • See response to PO4580 regarding highways • See response to PO4580 regarding Victoria Colliery and Childerplay • See response to PO20 regarding loss of Green Belt • The consultation was widely publicised and included a flyer being sent to all households and businesses in the District through Royal Mail. High levels of responses have been received by the Council from Biddulph residents which suggests that a significant number of residents knew about the consultation. The consultation period for planning documents at statutory stages is 6 weeks. This consultation was held over a longer time period. Responding on the Council's website by using the consultation portal was an option but there were other ways of responding too – by email, completing a form or letter.
PO842	Mr Alan Brown				Object	First of all I would like to congratulate the council on creating a green artery that runs through the heart of Biddulph, however with the development of ADD03 it looks like the planning department are trying clog this up which if allowed to happen would go alongway to destroying one of the most beautiful shortwalks anywhere in the county. The proposed development would also encroach on the oldest (14th Century) and a grade 2 listed property in Biddulph. what do English Heritage have to say about this? Also the proposed building of a school in ADD03 would make Dorset Drive and all the surrounding streets a car park.	<ul style="list-style-type: none"> • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO4580 regarding highways
PO916	Mrs Dianne Simcock				Object	The roads in this area are dangerous for pedestrians and cars. No pavements and narrow roads. The junction with Towerhill Road is dangerousIt would require significant council payers money to make them safe	<ul style="list-style-type: none"> • See response to PO4580 regarding highways
PO926	Mrs Dianne Simcock				Object	People who live in Biddulph have to work out of town. Like other colleagues we think if greenbelt is built on it will destroy the area. We will move to pay our council tax in an area nearer work such as Newcastle under Lyme where although built up there are more facilities, jobs and less travelling time than carry on travelling to Biddulph with few facilities, lack of advance education and leisure activities for our children.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO1132	Mr and Mrs G Davies				Object	We wish to object to the proposed development at Akesmore Lane Biddulph for the following reasons: There are unrecorded mine workings on the site. Akesmore Lane has problems with flooding at times it is impassable. Any development of this site may cause problems for existing properties adjacent to the site. Access to the site is difficult, there is no existing road suitable for access to the site. Construction vehicles would cause problems on the existing roads. Access for residents and emergency services to the finished development would be difficult. Access to the proposed school within the development would be difficult as there is no route to the site from the town centre that has a continuous footpath. Parents taking their children to and from the school will cause problems on the narrow roads in the area. The Biddulph Valley Way is a great asset to Biddulph. It is used by many Biddulph residents and brings tourists into Biddulph. This development would have a detrimental effect on the local wildlife and turn this section of the Biddulph Valley Way into a footpath through a housing estate. The former brown field site at Victoria Colliery is a more suitable site for development. The land has been reclaimed and stabilised for development, this site has no access problems and should be considered for development before any other site in Biddulph. The sewage treatment plant in Biddulph is currently working over its design capacity. This is causing pollution problems in Biddulph brook. These environmental problems should be resolved before any housing developments are approved in the Biddulph area.	<ul style="list-style-type: none"> • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO4580 regarding highways • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4581 regarding Ecology • See response to PO4580 regarding Victoria Colliery and Childerplay • United Utilities has a statutory duty to provide capacity for new development so this is not a valid reason for development not to come forward in Biddulph.
PO1427	Mrs Barbara Forster				Object	Why when I live only approx. 100m from this side did I not know anything about this site until Monday 9/5/2016 when a friend phoned me to tell me? Planning officer could not answer this? Why was this not on the plan last year. 2 weeks have passed already of your? Period this we cannot get back. Access beautiful narrow lane listed building maybe one of the oldest in Biddulph. Thatched cottage. Wildlife – badgers owls – Tawney and brown, blue bells kestrels, buzzards etc Green Belt Have all other brown fields site been built on Akesmoor Lane Floods – water already runs into hayden park Cycle route 55 Access on to halls road on a bend Beautiful brooks .	<ul style="list-style-type: none"> • See response to PO10279 regarding why site was not included at site options stage • See response to PO4580 regarding highways • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO4581 regarding Ecology • See response to PO20 regarding loss of Green Belt • See response to PO4586 regarding using brown field land first (including mills) • See response to PO386 regarding Flooding – surface water drainage
PO1420	Mr J Mountford				Object	Ideal site brown lees industrial est	<ul style="list-style-type: none"> • This is an existing employment area and will be retained as such.
PO1421	Mrs H Cain				Object	to akemore lane site ideal site old victoria colliery site and childerplay road site	<ul style="list-style-type: none"> • See response to PO4580 regarding Victoria Colliery and Childerplay
PO1422	Mrs D Bott				Object	the akemore lane site is not suitable for houses and a school ideal sites would be the old victoria colliery site and child play road.	<ul style="list-style-type: none"> • See response to PO4580 regarding Victoria Colliery and Childerplay

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO2029	Ms Jane Garner				Object	I object strongly to this proposed development for the following reason; It will completely eradicate the countryside location of this side of town bordering the attraction that is Biddulph valley way. Increased traffic volume will massively affect all adjoining streets, roads, lanes. One of which is used by walkers, cyclists, horse riders. Station Road is already dangerous, especially at the weekend when the football is on the playing fields. Dorset drive estate (Haydon Park) will suffer increased traffic cutting through causing a hazard to children playing fields when the children are playing football. Etc. on the open spaces. Why on earth don't planners look at dissipating additional housing across various pockets of the town instead? Why do we need another primary school? Can't the others expand slightly? If another primary school is built to accommodate these dwellings, there wouldn't another middle school be needed to? Biddulph should not become an urban sprawl. I with no lack of regard for retaining its garden town status, situated in a pleasant valley.	<ul style="list-style-type: none"> • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4580 regarding highways. • A range of sites are proposed in the plan both large and small to meet Biddulph's housing needs. It would be unrealistic to identify all small sites for Biddulph as the Council is required by the Government to demonstrate that sites they identify will actually be built and smaller sites tend to be less viable. • Staffordshire County Council are the Education Authority and they look at the need for new schools in an area as a result of development. They consider that a new first school would be needed in Biddulph to accommodate the level of new housing development currently proposed. The location of this school would not be decided until the Council has firmed up its plans as to where the new housing development will take place in the town. (There are 2 options put forward as potential locations for a new school in the Preferred Option Sites and Boundaries Consultation booklet).
PO2044	Mrs K Everitt				Object	I am writing for the proposal for the building of 100's of houses and a school at Gillow heath area. I have lived here along with my partner for 11 years and find it very peaceful, agreeable place to live. The proposed plan would add approximately 300 hundred houses and a school to the green belt land that is a beautiful backdrop to biddulph and would encroach on the small area of Gillow Heath, which is still classed as a village. This would be completely out of character of the neighbourhood. The much urban sprawl and prevents biddulph from becoming burgeoning town, with even more housing developments blighting the landscape. Views of beautiful fields stretching from Biddulph Valley. Way up to Mow Cop, define the spectacular beauty of this peaceful location. The forfeiture of any of our natural open countryside would be lost for ever, much to the detriment of the current and future generations. If biddulph must have more houses, surely there must be a suitable area in which to build them. One that's close to a local footpath or possibly within the eye line of a historical folly. The Biddulph Valley way is utilised regularly by walker, cyclist, horse riders and rambling clubs alike. Families with children enjoy strolling and spending quality time on this tranquil rural footpath. What a pleasure would these derive from looking out onto houses, with the inevitable noise more residents would obviously bring to this area? The proposed development, which borders the very edges of biddulph valley way, in parts, would have a detrimental effect on a well-used and much loved escape from modern living. It is necessary environment, where 1 in 10 can relax amid the peaceful atmosphere and enjoy the benefits of strolling through the pleasant countryside. The government suggest we take more exercise, amid our busy working lives and the biddulph valley way is a perfect area to do this and must not have any of its air of	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO87 regarding residential amenity - disturbance from building work / noise from school / parking during school drop-off and pick-up times • Landscape impact of development on the site has been assessed in the Council's Landscape Impact Study (August 2016), the results for this site are: "Large site on the western edge of Biddulph, comprising agricultural land and two farmsteads (Moodystreet Farm and Hollylane) and sheds, enclosed by Akemoor Lane to the west. The site is located beyond the dismantled railway, which currently forms a strong, vegetated settlement edge and limit to development. The site is inter-visible with the Green Belt to the west. Development within the site would encroach on the surrounding countryside, and would adversely affect the existing settlement edge. Development of the site could potentially compromise the surrounding sensitive countryside, as there would be no clear limit to development beyond the site. Site is of high landscape sensitivity." The Council must balance this evidence against all the other evidence relating to this site and reach a decision on whether or not to include it as a development site in the Local Plan. • See response to PO4580 regarding highways • If the district council considered that a development may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts. In addition the district council continually monitors air quality across the district and regularly undertakes review and assessments of this data to identify areas where the traffic could have an unacceptable impact on local air quality. • New employment areas are also proposed for Biddulph in the draft Local

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

						<p>tranquillity disturbed by the building of more houses. This extra house, school and obviously the residents would cause an adverse impact on the residential amenity of the neighbours. More and more people are being housed within a close proximity so no wonder, on occasions, this will cause problems, both socially and environmentally. People need the green open spaces. They need to be able to sit quietly in their gardens at the end of a hard day's work, and not have to listen to cars flying by or unavoidable noise a larger population would bring. Surely this development would be adversely affecting the intrinsic environment value of the local landscape. The green rich greenbelt provides a natural mechanism to absorb the damage caused by carbon emissions. This benefit would be lost under the proposed development, as building on this vital environment would weaken these natural defences. New houses with the increased population of the impact on this area. The additional vehicles on the local roads will also negatively impact the area. These small roads will become busy and there will be an increase in air pollution. Biddulph is a small town with not much by way of employment within the immediate area this would mean those who go to work have no alternative but to use their cars, the public transport isn't very efficient either, so realistically more and more people shall need to use their cars more and more, thus more carbon emissions. Even now car parking spaces are somewhat limited and difficult to find and appointments with Dr's further stretched. If the population were to grow by such a number! Biddulph is the 1 town that consists of lovely close community. This high street is still full of traditional shop where people will stop and pass the time of day. It's a place to enjoy returning at the end of the working day. As I drive up to Halls Road, the beauty of the countryside nearby never fails to move me. For this very reason and for those outlined above, I trust that these objections will be taken fully into account before embarking on a project that would see the begins of turning Biddulph into another faceless town</p>	<p>Plan.</p> <ul style="list-style-type: none"> • See response to PO775 regarding lack of infrastructure (doctors etc)
PO4653	Mr J Turnock				Object	<p>I understand local authorities are under instruction from government to build more houses, but I object to them using our beautiful green fields that's borders on the most beautiful and popular walk and cycle way (55) in the district, used by hundreds of local and not so local people, this seems incredible, in places it would be Biddulph Valley Way in a urban corridor and not the enjoyable asset it is today. The government tell us health and fitness is important to our wellbeing so the Akesmore Lane proposal would take away the enjoyment of the country walk's or rides. Would you please take note of my objection to the Akesmore Lane land and proposal?</p>	<ul style="list-style-type: none"> • See response to PO4580 regarding Impact on BVW / Visual impact

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

PO4657	Mr And Mrs A Roberts				Object	With regard to the proposed developments on green belt and green field sites in all areas of Knypersley, Gillow Heath, Biddulph and Brown Lees, I am dismayed and disappointed with the plans SMDC deem to be appropriate to build on. The roads in all these areas are little more than county lanes and do experience traffic problems now which no doubt you are aware of. In Biddulph we have so many empty and derelict mill buildings yet are not in your proposed planning programme. Would it be a good idea to utilise these before extending out into our treasured countryside or is it too easy to allow developers to build on flat farm fields? Do planners actually visit the areas? They designate for building on? Every proposed house will generate 1 motor vehicles and possible 2 so I have to ask the question, do the authority have plans to upgrade the road systems? Our town centre needs to promoted to encourage present and any future residents to 'shop local' is it fit for purpose at present to attract sustainable. Our very beautiful country side is quite quickly being eaten away, open spaces will be at a premium, where will our children play? Biddulph is home to a wide variety of wildlife. Does anyone care? I am not hostile to new homes being built but they need to be sympathetic to our town and our town needs to be able to service and welcome our new residents with suitable infrastructure. Please listen and consider the views of Biddulph people.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding highways. • See response to PO4586 regarding using brown field land first (including mills) • New development will help to support the town centre shops and facilities. • The Council requires open space to be integrated into developments of more than 20 houses including children's play facilities unless there is already adequate provision in the local area. • See response to PO4581 regarding Ecology • See response to PO775 regarding lack of infrastructure (doctors etc)
PO4652	Mr D W Swetnam				Object	I object to any objection to any Green Belt land around Biddulph being used for housing. Land passed for housing 20 years ago has not been used yet, e.g. Orme road garden centre station road Mill and Town Mills which are an eye saw to our town. New pool site (can't read the site numbers!) is poor and water logged. Land and would be the start of joining us up to Mow Cop! There is land BO117 which would be better choice near to the main road and services. Plenty of houses empty at this moment.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4586 regarding using brown field land first (including mills)
PO4643	Mrs Maureen Whitehurst				Object	Unacceptable encroachment of Green Belt Land + area of beauty, wildlife habitats, trees, wild flowers this is a national cycle route 55. Very poor plus dangerous access along the country lanes adjoining this area increasing traffic + hazards on the increasing traffic + hazards on Tower Hill, Mow Lane, Wedgewood Lane + Halls Roads and Mow Lane. These are already very busy at rush times for their size. Flood risk – Akesmole Lane old mine workings that could collapse the area is used by walkers visitors horse riders (many children horse ride in this area) cyclists – extra traffic again would be dangerous. Listed building in this area – the oldest cruck frame construction in Biddulph vibration damage form construction vehicles + danger of fire.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4581 regarding Ecology • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4580 regarding highways • See response to PO386 regarding Flooding – surface water drainage • See response to PO386 regarding Mining • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only)

PO4658	Mr Robert Moseley				Object	I strongly object to this substantial housing development of green belt land The access in to the Northern end if walking would require pedestrians to use the both sides road to access the town. This is significantly scenic part of the Biddulph Valley Way upside of the valley for all to enjoy this development would cause serious visual impact. There is a substantial land on the open cast mine at Victoria Colliery site that would cause a far less visual impact.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding highways • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4580 regarding Victoria Colliery and Childerplay
PO4647	Mr Frank Cottrell				Object	Build on Childerplay Road and Victoria Colliery site.	<ul style="list-style-type: none"> • See response to PO4580 regarding Victoria Colliery and Childerplay
PO4644	Mrs Margaret Cooper				Object	I would suggest that there are many alternative Brownfield sites a few miles away in Stoke on Trent that would be more suitable and that some agreement with Stoke Council could be achieved as most of the people would have to find employment in this area anyway. To build on Green Belt in the country as a small as Britain is totally wrong. By increasing urban spread and loss of wildlife habitat.	<ul style="list-style-type: none"> • See response to PO216 regarding building in neighbouring authorities instead • See response to PO20 regarding loss of Green Belt • See response to PO4581 regarding Ecology
PO4680	Mrs Shirley Barlow				Object	We wish object to homes being built on visible open green space off Akemoor Lane, this I totally unacceptable, as this is an area of natural beauty, it seems you want to join us up to Biddulph own down one side and HARRISEHEAD the other why? It's spoiling our town and why changes it from Pennine Way. When Roads are wide, and the Cul De Sac has an entrance in the site already, and the cards, the roads by Akemoor are totally unsuitable and would be unacceptable they are country lane and needs to be kept as so for future generation also the infrastructure cannot take more housing being built, Bovis Estate uplands mill, not selling to social housing. Keep Biddulph Green it's a lovely area that we want to keep not have a blot on the landscape. This is something we only heard about in the last 2 weeks, no letter or leaflets have been delivered, really should send out letters.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding Impact on BVW / Visual impact • This area was included at Site Options Stage but not taken forward due to the impact development in this location would have on the Green Belt (refer to the Council's Green Belt Review for details). • See response to PO4580 regarding highways • See response to PO775 regarding lack of infrastructure (doctors etc) • See response to PO2044 regarding impact on Landscape • See response to PO1006 regarding poor marketing of consultation / Consultation period too short / Website not easy to use
PO4654	Mrs Shirley Barlow				Object	Alternative site in Biddulph: No to Akemoor Lane not suitable land object to this site/minshafts and flooding. What about Victoria Site and Childerplay Road Knypersley. Build on Pennine Way where it was always going to be. Victoria Site is much more suitable than taking of any the countryside good links to the roads and S-O-T and Congleton also the same thing in Childerplay Road no one to really object to building on Victoria Site, and many happy Biddulph residents. Also 200 plus homes already empty in Biddulph area why do we need more when these are empty, selective site, and many more when these are empty, people who have brought these cannot sell because of the awful layout and selling to social housing organisations. Pennine Way is much more suitable as the roads are already in place and cul de sac ready for the entrance road put the school there so they are close together.	<ul style="list-style-type: none"> • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO4580 regarding Victoria Colliery and Childerplay • See response to PO4680 regarding using Pennine Way instead

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4637	Mr Jordan Kirkham				Object	Green Belt should stay Green Belt and not destroy an area of natural beauty. Would destroy the Habitat for wild animals. Houses on Haydon Park devalued considerably since Sainsbury's was built and would further devalue them. Fields and railway track are an excellent selling point. Dorset Drive would become more a rat run again, as it was when the bypass was being built. The small close Cul de Sacs on Haydon Park would be used for parking by parents going to the school. Trying to get off Dorset Drive at the Sainsbury's round about in the morning is a night mare now, ever min with potentially another 900 -1000 cars (300 houses 3-4 cars each property) There really is only one way in and out of Biddulph, gets gridlocked very easily. The Biddulph by pass only needs 1cm of snow in the winter to completely grind to a halt. Akesmore Lane is not adequate for more cars/housing/school and dangerous for children to walk along to the school. The Thatched Cottage on Akesmore Lane is a listed and the oldest property in Biddulph. Akesmore Lane is not adequate for more cars/houses/schools and is dangerous for children to walk along. The railway track would go from a beautiful tranquil place to walk, cycle, and ride horses to basically an alleyway between housing estates. Biddulph does not need another extra 300 extra houses – plenty of properties to buy and rent of all prices at the local estate agents. Also houses on the uplands site didn't all sell and were turned over to social housing, which people from other areas moved into fill. Biddulph does not need another school Meadows school site, James Bateman School still use the playing field there. Local amenities already under extreme pressure - i.e. GP surgeries unable to recruit more Dr's (had to recruit nurse/matron) and very difficult to get an appointment even now. The areas on the previous plans from the meeting in July 2015, i.e. Gillow Heath, Pennine Way/Woodhouse Lane, Conway Road, have all been thrown out basically pasted into Akesmore Lane. Not satisfied with the attitude of the officers who attended the Biddulph consultation event (amended).	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4581 regarding Ecology • See response to PO445 regarding property values • See response to PO4580 regarding highways • See response to PO87 regarding residential amenity - disturbance from building work / noise from school / parking during school drop-off and pick-up times • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4586 regarding need for housing and school • See response to PO775 regarding lack of infrastructure (doctors etc)
PO4641	Mr J Horton				Object	There is a lot of surface mining in this area which would need a lot of attention to state to safe for building. The area is prone to flooding which has caused problems to some houses on Haydon Park. Very poor access as the name suggests Akesmore Lane is a very narrow and? Not suitable for the extra number of vehicles which houses and the school would create. The road would have to cross the train lines at some point (i.e. Biddulph Valley Way). Biddulph Valley Way is a national cycle route no 55 so this would also impact on cyclist's as well as walker's horses, as well wildlife. Haydon Park would be massively affected with increased traffic and congestion as parents use Dorset Drive and the cul-de-sac off it as a drop off point to for the children going to the school. Alternative site – The old Victoria site which has excellent access does not impact on anyone and is on the bus route.	<ul style="list-style-type: none"> • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO4580 regarding highways • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4581 regarding Ecology • See response to PO4580 regarding Victoria Colliery and Childerplay

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4645	Mr M Job				Object	I object to the inclusion of ADD03 (Akesmore Lane) on the Biddulph proposed development plan.	Comment noted.
PO4676	Mr S Cook				Object	<p>I don't seem to be able to access SMDC planning site to lodge my objection to potential building on Green Belt land off Akesmoor Lane Biddulph. Whether this is by accident or design or my ineptitude at on my laptop, I don't know I always understood that Biddulph urban spread was contained by the old railway, line. The development in the 1970's bordered the boundary and the land to the west of the line was Green Belt land and consequently not for urban building upon. Those developments were necessary then as there was plentiful employment in the area at Victoria Colliery, Cowlishaw Walkers Steel Works and Selectus etc. There are now no large employers in Biddulph and so the housing requirements have diminished. I also understand that there are some 200 empty properties in Biddulph area for rent or purchase, so what is the purpose of 825 more. If this central government requirement, surely there is some logical way to appeal system and no sensible government department would impose needless building in an area that does not require or want. As a further suggestion what is wrong with including the land of the old Victoria colliery spoil that was cleared and stabilised for building some years ago, instead of our green belt land ADD03 (Akesmoor Lane). I can only assume that this land has been added to after the local council vote at a developer's behest as it would be a prime building land for expensive and large houses in our rural area. The bedroom tax forces people to pay for empty unused bedrooms in there house or move to a smaller property for those tenants to move to a smaller property to free up larger houses for family use. There are very few smaller properties for those tenants to move to surely smaller properties and bungalows should be built to allow that process to advance. If I am accused of NIMBY ism I must admit to some justification for that accusation's but my object to the Akesmoor Lane site is based on fact that it is just not I who use this area for recreation and enjoyment. A lot of people from outside the area also visit via a National Cycle path. I have spoken to several visitors about the potential development and one can believe that this beautiful area defiled with a large housing development and school. The access to this area is also difficult and Akesmoor Lane in particular would require massive development and widening. The traffic in the area would be greatly increased with the attendant road safety risks. The sewage plant at Marshgreen is already over its working capacity and would be unable to cope with the proposed developments without a large scale upgrade with all the attendant difficulties. As you will gather from the above I am against a large scale housing development of the area between in particular the proposed development of the area between Akesmoor Lane and the old Railway Line.</p>	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO2044 regarding lack of employment • Housing need is in addition to any existing empty properties • See response to PO4586 regarding need for housing and school • See response to PO4580 regarding Victoria Colliery and Childerplay • Any development on this site would not just be larger properties. There will be an affordable housing requirement which will need to be implemented including 'starter homes' which tend to be smaller units. • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4580 regarding highways • See response to PO1132 regarding water treatment works being over capacity

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4646	Mrs J Cottrell				Object	Build on Childerplay Road and Victoria Colliery site.	<ul style="list-style-type: none"> • See response to PO4580 regarding Victoria Colliery and Childerplay
PO4648	Mr A Heathcote				Object	The proposed development is on an old and poorly maintained lane which is narrow and has several blind bad bends and is not suitable for development. It would also encourage further building on the eastern side of the valley which would be visible from the opposite site of the valley. I understand this land was not included in the plan previously for this reason, which is why the western side of the valley has been rejected.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO4580 regarding Impact on BVW / Visual impact
PO4649	Mrs E Heathcote				Object	Why is this plot now being considered? In June 2015 at site assessments it appears as plot BD140, as for its suitability, the conclusion drawn was 'not considered suitable for development due to potential access difficulties and the rural character of this area! I wish to object the proposed housing site ADD03, which is sited on land adjacent to Akemore Lane and the Biddulph Valley Way. I object on the following grounds: The proposed site is a intrusion into Green Belt. The lane is very old. It is clearly marked on the Mainwaring Estate Map of 1597 – indeed probably much older, typical of such early origins it twists and turns and in places deep and narrow. It snakes alongside one our historically significant houses – the thatched 'White House'. How can you justify developing in this landscape which is set in history of the town. It would affect its character and setting within the landscape. As is usual with lanes of this antiquity the hedges are of great importance and I'm certain that they support a variety of flora and fauna. Surely development will lead to damage of these ancient hedgerows. The road today is used as a short cut to Mow Cop. With Such extensive development this rat run is going to see a huge increase in traffic. The quality of the road is exceedingly poor: ditches either side in part huge potholes. In order for it to serve a development and a school it would require investment along the length of the road from Tower Hill junction to junction at Wedgewood Lane. In Biddulph Valley Way is much loved and well used resource within the community development would detract from the outlook, peace and tranquillity which are doubtlessly enjoyed by users. The BVW acts as a physical barrier to development. To go beyond it would leave development up the valley side. This would impact on the views of the town from many areas.	<ul style="list-style-type: none"> • See response to PO10279 regarding why site was not included at site options stage • See response to PO20 regarding loss of Green Belt • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO2044 regarding impact on Landscape • See response to PO4581 regarding Ecology • See response to PO4580 regarding highways. • See response to PO4580 regarding Impact on BVW / Visual impact

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4651	Mrs H Rutherford				Object	A large increase in traffic would have a serious detrimental effect on this area because access roads to this new estate would spill out onto inadequate roads. Access to it would undoubtedly include cars travelling through Haydon Park estate as well as any new roads built. Underground streams have already affected Dorset Drive increase the danger for all the children who play on the grass by the stream. Akesmore Lane is totally inadequate and a road widening/improving these would alter completely the country atmosphere of the area if a school is built it would increase transit through Haydon Park of children, which would also include transit access in Biddulph Valley Way as a start out. Biddulph Valley way is a national cycle route; increased numbers of children crossing it would pose a danger. On this estate we enjoy the wide variety of wildlife – one blessings of this estate that would drastically affect not only by the proposed building estate. Over many years there much undermining under this estate in this area. Many of these have never been mapped. That was witnessed by a caravan sized hole that appeared in Mow Lane. There are other more suitable site and areas of Biddulph where houses can be built and where the impact on people has and will be far less great e.g.: The Meadows land around the old Victoria Colliery etc. both public transport links and access to the main road.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO386 regarding Flooding – surface water drainage • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4581 regarding Ecology • See response to PO386 regarding Mining • See response to PO4580 regarding Victoria Colliery and Childerplay
PO4600	Mrs S Speake				Object	I strongly object to the proposed building on land adjacent to Akesmoor Lane for the following reasons: There are a few surface lines on this area making any building of houses & a school most unsuitable. This area is very prone to flooding which is already impacted on the houses in Haydon Park where I live. Poor access to the area from existing roads – Akesmore Lane is very narrow with no pavements & there is no road in place from the by-pass. National cycle routes is very near to the site which if the building goes ahead will have huge impact on cyclist, walkers and horse riders. There is a lot of wildlife in the area which will be seriously affected if destroyed. A much more suitable site is available on the old Victoria Colliery and land on Childerplay Lane with good access to existing roads.	<ul style="list-style-type: none"> • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO4580 regarding highways • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4581 regarding Ecology • See response to PO4580 regarding Victoria Colliery and Childerplay
PO4589	Mr & Mrs K Shone				Object	We object to any housing allocation on this site due to it being Green Belt Land. Also we understand after looking at the mining reports and speaking to a structural engineer, that there are several mine shafts and more importantly huge open cast coal seams which could have to be excavated before any building work could commence this would totally devastate the Green Belt Lane affecting Wildlife and the Beauty of the area. The effects of noise and dust on the nearby Haydon Park Estate would be horrendous, which could create health issues to the local people many of the elderly.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO386 regarding Mining • See response to PO4581 regarding Ecology • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO87 regarding residential amenity - disturbance from building work / noise from school / parking during school drop-off and pick-up times

PO4591	Mr S Jackson				Object	A habitat for wildlife Akesmore Lane is in Green Belt area. Mine Shafts I was told of a story when i was young man living I Gillow Heath a man fell down a unused mine shaft in Akesmore Lane. There are also underground streams so big risk of flooding. Having lived in Gillow Heath and Biddulph all my life, and watched it grow bigger and bigger we've gone from a small village to a big town so anymore building work should be done outside Biddulph and Gillow Heath areas such as Chatterley Whitfield area.	<ul style="list-style-type: none"> • See response to PO4581 regarding Ecology • See response to PO20 regarding loss of Green Belt • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO216 regarding building in neighbouring authorities instead
PO4672	Mr T Thornton				Object	A natural habit for many varied wildlife Akesmoor Lane is in the countryside where by distribution through the proposed buildings site and consequences there would be impacted upon severely! There are mine shafts. There are 3 streams which are under this area, a high risk under this area of flooding. The lane is not suitable for potential traffic flow a road traffic hazard/accidents! Historic thatched white house – Historically should be preserved. Green Belt land ADDO3 Concerns of considerable traffic, noise and pollution to neighbouring properties. Not in the 2015 site allocations. Time scale of 6 weeks to respond (sometime of which during the school holidays) unlike others that have up to 12 months. Appropriate/viable alternative option – Site allocations, BD076/BD071A/BD076A in this vicinity expansion of BD076A. BD076 Old Telephone exchange preferred employment allocation? Good road access already in place (A527) close to amenities/town centre close to potential retail development. (Biddulph is over developed – the services in place i.e.: water, electrical etc. are inadequate only if BD117/ taken for employment to incorporate housing). Preferred options use or any Brownfield Site/disused sites.	<ul style="list-style-type: none"> • See response to PO4581 regarding Ecology • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO4580 regarding highways • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO20 regarding loss of Green Belt • See response to PO87 regarding residential amenity - disturbance from building work / noise from school / parking during school drop-off and pick-up times • See response to PO10279 regarding why site was not included at site options stage • See response to PO1006 regarding poor marketing of consultation / Consultation period too short / Website not easy to use • BD076/BD071A/BD076A are already included in the plan. • See response to PO4586 regarding using brown field land first (including mills)
PO4592	Mrs & Miss J & A Carter/Vickers				Object	Farms & scenery Thatcher's Cottage (white) (listed building) Sites of historic mines Wildlife Footpaths Do not change Green to Brown Why not use the old Victoria Colliery Keep my horses on Akesmore Lane not happy (Amy)	<ul style="list-style-type: none"> • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO4581 regarding Ecology • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding Victoria Colliery and Childerplay
PO4595	Mr M Boden				Object	Keep Akesmore Lane as Green Belt save all the wildlife. Lane is too narrow to put footpaths and winding bends there are mine shafts in area and slag heaps. We have a listed building in the area. Need land for livestock to graze in the area. A lot of running water from the natural streams, there is no sewers as I cannot go on using septic tanks. Don't want any houses build on the lane causing excessive traffic. I struggle to get out of my drive as it is.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4581 regarding Ecology • See response to PO4580 regarding highways • See response to PO386 regarding Mining • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • The land has an agricultural classification of Grade 4 which means that it is poor quality. • See response to PO775 regarding lack of infrastructure (doctors etc)

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4596	Mr S Wood				Object	Akesmore Lane is a very narrow for the amount of cars that will be going up and down. We need farm land we get a lot of flooding outside our house now, without building new houses. We have an ancient listed building in Akesmore Lane, the thatched white house. We have mine shafts in the building area.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO4595 regarding agricultural land value • See response to PO386 regarding Flooding – surface water drainage • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO386 regarding Mining
PO4599	Mr J hodgkinson				Object	Why must we build on designated Green Belt land which is rich in both beauty and diverse nature and has also a historic building when there is a site crying out to be developed i.e.: the old Victoria Colliery Site.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO4581 regarding Ecology • See response to PO4580 regarding Victoria Colliery and Childerplay
PO4673	Mrs G Boden				Object	Akesmoor Lane is a country lane which serves working farms not road to service all the extra traffic which houses and a school would bring. It has too many bends and to narrow. The area is prone to flooding the streets and footpaths, drives would make it prone to more flooding because the water would not be able to soak away. There is a listed building in Akesmoor Lane that needs to be protected from building. We have mine shafts in our front garden which may collapse if too much traffic use it there are mine shafts dotted all around the area.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO386 regarding Flooding – surface water drainage • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO386 regarding Mining

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4674	Mrs L Boden				Object	Akesmoor Lane is unsuitable for an increase in volume of traffic due to its narrow composition as well as narrow unsafe bends and? Along as a route, the lane is also unsuitable for expansion due to its length and access, any extra housing developments or school construction would create common blockages due to parked cars during the morning and afternoon as well as the extra volume from the housing, Such an expansion would make the existing road considerably more dangerous for both pedestrians and motorists alike, due to HGVS from equipment such as tracked as well as animal. The road is also prone to heavy and frequent flooding, as well as being located above on old mine network, which could cope with increase in traffic. The local area is also Green Belt and attractive there is no need for development in the area and its peaceful nature. Any development would also put a strain on drainage which is also a significant problem, gushing water and flooding from Biddulph Brook are commonplace during and after rainfall. Aside the environmental problems, building along Akesmoor Lane for would be expensive and difficult due bad access as well as the natural gradient of the land. Any school would be horrendous for the children due to the nature and speed which vehicles travel down Akesmoor Lane. The HGVs travel at high speed considering the very narrow lanes as well as the gradient. Child fatalities would not only be likely but would become common place.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO386 regarding Flooding – surface water drainage • See response to PO386 regarding Mining • See response to PO20 regarding loss of Green Belt
PO4567	Mr A Wallis				Object	I strongly object to the building on the Green Belt land when particular need to protect the land west of Biddulph valley way and Akesmoor lane. At this point the track attracts the people because of its aspect and views now cop. It would be a shame to spoil it as it has old mine shafts and has a problem with flooding. Not to mention a grade 2 listed thatched cottage. Other reasons are the immense impact on the area of increased traffic. I think it would be better to make full use of the brown field sites within Biddulph town centre and the old Victoria colliery site to the south of brown leas. So let's all make sure we protect the green belt around Biddulph and the rest of staffs moorlands once it's gone we will never get it back.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO386 regarding Flooding – surface water drainage • See response to PO386 regarding Mining • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO4586 regarding using brown field land first (including mills) • See response to PO4580 regarding Victoria Colliery and Childerplay
PO4683	Mr C Jukes				Object	High Flood risk, due to there being a under-ground streams, mine shafts historical thatched house green belt.	<ul style="list-style-type: none"> • See response to PO386 regarding Flooding – surface water drainage • See response to PO386 regarding Mining • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO20 regarding loss of Green Belt

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4682	Mr D Heathcote				Object	ADD03 this land is Green Belt farm land with a very old thatched cottage that should be protected, there are 3 underground streams on this land and it's a high risk off flood area. My family used it in the 1950's to live on Falls Farm in the 1950's (The Falls) why would you build on Green Belt farm land with a high risk of flooding.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4595 regarding agricultural land value • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO386 regarding Flooding – surface water drainage
PO4661	Mr A Parker				Object	Information and map by Railway track entrance alternative locations to be mentioned on form.	Comment noted.
PO4660	Mrs M Ellis				Object	The information needed to build 300 plus houses and school would ideally destroy such a beautiful area that gives some people peace and wildlife – walking along Biddulph Valley Way. The view towards Mow Cop would be destroyed.	<ul style="list-style-type: none"> • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4581 regarding Ecology
PO4659	Mrs J Woolley				Object	I strongly object to this substantial housing development of green belt land The access in to the Northern end if walking would require pedestrians to use the both sides road to access the town. This is significantly scenic part of the Biddulph Valley Way upside of the valley for all to enjoy this development would cause serious visual impact. There is a substantial land on the open cast mine at Victoria Colliery site that would cause a far less visual impact.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding highways • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4580 regarding Victoria Colliery and Childerplay
PO4667	Miss G Collingwood				Object	Outstanding Green Belt area alongside Biddulph Valley Way, this has been used for valuable agriculture and has listed building within its boundaries. The nature of flora and fauna will be lost and will be lost and will become a dumping ground for refuse from the new properties as its happened in lots other parts of Biddulph Valley Way, leading to an area of disuse and misuse as has happened in Stoke on Trent. Other brown field sites and derelict building should be used. There are not enough medical facilities or Dr's to cope the pressure on over used infrastructure will not work.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4581 regarding Ecology • See response to PO4586 regarding using brown field land first (including mills) • See response to PO775 regarding lack of infrastructure (doctors etc)
PO4666	Mrs PK Bailey				Object	I object to the building of houses off Akemoor Lane as it is totally unsuitable site.	Comment noted.

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4694 PO9004	Mr P McGovern Mrs L McFarland				Object	I am writing with reference to the building of houses on Akesmoor Lane site and Newpool Road site near to Cooks Farm. Why build on a Green Belt when there is oh so much Brown Field site to build on? I know school is going to be built but what about the Dr's surgeries. It's difficult enough to get an appointment now, never mind with so many more houses. And what about the traffic on the roads, it's unbelievable that so many houses are (hopefully not) going to be built. Please re-think. Talking about the Brown Field sites, what about the Old Mills on Station Road? You could knock them inside and out and make some homes there killing two birds with one stone: Knocking down the unsightly buildings and at the same time the place look better for those who live opposite and for passers-by too. It would be quite easy to find out who the factories belong to. As for the information that was 'supposedly posted through our letter boxes well what a shambolic (or was it meant to be?) way to post important information tucked inside Farm Foods pamphlets and takeaway menu's). If I need anything from these places, I will find their groceries or meals myself, so don't go through the leaflets. They go straight into the Recycling bag. Please, let's have more transparency. I have put a stamp on the envelope because I want to be sure that it gets to the correct address, otherwise, it may go astray!	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4586 regarding using brown field land first (including mills) • See response to PO775 regarding lack of infrastructure (doctors etc) • See response to PO4580 regarding highways • See response to PO1006 regarding poor marketing of consultation / Consultation period too short / Website not easy to use
PO4665	Mr P McGovern				Object	We live on Mow Lane Gillow Heath many people from around the country walk and bike here also kits of horse riders. The amount of time people stop us gardening and ask us about Gillow Heath. Then they compare us to the settlements in Wales. They go to Biddulph and walk around the town and Gillow Heath off their maps. Traffic problems on Mow Lane will be added to the council do not want to know about this vehicles speed etc. no pavements water pouring down the lanes after storms Green Belt is precious, to birds newts, foxes etc. and if this all goes I have not put my name to it, but you will have.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways. • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO386 regarding Flooding – surface water drainage • See response to PO20 regarding loss of Green Belt • See response to PO4581 regarding Ecology
PO4664	Mr K Snape				Object	I agree with SMDC, site assessment form site ref no: 1899 Akesmoor Lane not considered suitable for development 26 th June 2015.	Comment noted.
PO4663	Mr K Ward				Object	Information and map by Railway track entrance alternative locations to be mentioned on form.	Comment noted.
PO4662	Mrs M Parkinson				Object	Green Belt keep Biddulph Green protect our nature and wildlife.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4581 regarding Ecology
PO4668	Mrs L Jackson				Object	I object I am concerned about the infrastructure of the town, because there will be no opportunities for jobs etc. Also there will be pressure on Ambulance services.	<ul style="list-style-type: none"> • See response to PO775 regarding lack of infrastructure (doctors etc) • See response to PO2044 regarding lack of employment

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4687	Mr Sword				Object	House building numbers do not seem to be for the residents of Biddulph the only other people that will be at Gillow Heath will be commuters, with no affinity to Biddulph. Also it's a dangerous place for people with regards to the road way of Akemoor Lane. It's a Green Belt site that's a good buffer zone for Biddulph residents. So therefor I object to the proposed site for building on.	<ul style="list-style-type: none"> • See response to PO4586 regarding need for housing and school • See response to PO4580 regarding highways • See response to PO20 regarding loss of Green Belt
PO4688	Mr D Oakley				Object	I've walked and lived in Biddulph for a couple of years now and in my time have seen so much wildlife around Akemoor Lane, Foxes, Badger, Rabbits and various birds etc. I think the build of new homes will not only affect wildlife but also cause a lot of traffic issues, noise, crime and the local area of land can't cope with the extra population of people.	<ul style="list-style-type: none"> • See response to PO4581 regarding Ecology • See response to PO4580 regarding highways • See response to PO87 regarding residential amenity - disturbance from building work / noise from school / parking during school drop-off and pick-up times • See response to PO775 regarding lack of infrastructure (doctors etc)
PO4569	Mr D Oakley				Object	To build in this area would greatly disturb lovely natural surroundings to Biddulph which is one of the main reasons many people live here and stay. I regularly walk and exercise around the Akemoor Road area and the variety of wildlife that's seen in my opinions is the greatest reason to not to develop, along with increased traffic to surrounding estates and pressure on facilities e.g. waste/sewage how can such a big development be a good idea?	<ul style="list-style-type: none"> • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4581 regarding Ecology • See response to PO4580 regarding highways • See response to PO775 regarding lack of infrastructure (doctors etc) • See response to PO1132 regarding water treatment works over capacity
PO4568	Mr & Mrs G Bradbury				Object	This site in question is very unsuitable Akemoor Lane is only a country and is very narrow. The railway track is very well used by all. There are plenty of Brownfield sites which could be made use off before destroying our countryside and the upheaval of the wildlife.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4586 regarding using brown field land first (including mills) • See response to PO4581 regarding Ecology
PO4571	Mr J Winkle				Object	Green Belt Land – Mature trees all over site very narrow road, 3 streams across site which floods in heavy rain, number of shafts/air shafts on the site. Not suitable for housing.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4581 regarding Ecology • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage
PO4685	Mr F Tomkinson				Object	I object to the proposed development of 150-250 houses and a possible school near to Harlech Drive, Knypersley for reasons which are explained on the attached sheets.	Comments noted.
PO4684	Mrs L Tomkinson				Object	I object to the proposed development of 150-250 houses and a possible school near to Harlech Drive, Knypersley for reasons which are explained on the attached sheets.	Comments noted.

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4681	Mrs R Barlow				Object	We wish object to homes being built on visible open green space off Akemoor Lane, this I totally unacceptable, as this is an area of natural beauty, it seems you want to join us up to Biddulph own down one side and Harsehead the other why? It's spoiling our town and why changes it from Pennine Way. When Roads are wide, and the Cul De Sac has an entrance in the site already, and the roads, the roads by Akemoor are totally unsuitable and would be unacceptable they are country lane and needs to be kept as so for future generation also the infrastructure cannot take more housing being built, Bovis Estate uplands mill, not selling to social housing. Keep Biddulph Green it's a lovely area that we want to keep not have a blot on the landscape. This is something we only heard about in the last 2 weeks, no letter or leaflets have been delivered, really should send out letters.	<ul style="list-style-type: none"> • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4680 regarding using Pennine Way instead • See response to PO4580 regarding highways • See response to PO775 regarding lack of infrastructure (doctors etc) • See response to PO2044 regarding impact on Landscape • See response to PO1006 regarding poor marketing of consultation / Consultation period too short / Website not easy to use
PO4572	Mrs R Barlow				Object	Gillow Heath is not suitable for housing mine shafts flooding which occurs already Smokies Way, Halls Road is like a river running down it when it's raining, can't take any more housing. Brown Site at Victoria Site + Childerplay Road Knypersley absolutely perfect for housing good access to roads, Biddulph Valley Way S-o-T and Congleton Manchester Way.	<ul style="list-style-type: none"> • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO4580 regarding Victoria Colliery and Childerplay
PO4573	Mr G Vawdrey				Object	This would increase transport, traffic on Halls Road is excessive, and Akemoor could not cope with the infrastructure traffic, plus a school, the answer is no to this development.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways
PO4574	Mr J Kirkham				Object	Re proposed development of housing & schools on Akemoor Lane map ref no: ADD03, I feel that the access road is not suitable (one way traffic) for any amount of traffic (narrow lane) and also there is 15th Century Thatched cottage, which would be left derelict by the development if it were to take place. Where the school is proposed, all of the roads surrounding on Haydon Park would be turned into a car park, with cars going to this school crossing the Biddulph Valley Way at the rear of the school playground would be facing the Biddulph Valley Way which isn't suitable as any undesirables could be hiding in the bushes, watching the children. The area is of outstanding beauty and the wildlife and habitat would be destroyed and to distribute water course could result in flooding.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4581 regarding Ecology • See response to PO386 regarding Flooding – surface water drainage
PO4575	Mrs J McGovern				Object	Traffic problems Mow Lane is a rat run now, this can only add to the problems. Green Belt must be for helping nature, birds, newts, wildlife etc. we have many walkers, bikers and horse riders they love the Greenfields in Gillow Heath if this goes it will be all thanks to you.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4581 regarding Ecology

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4576	Mrs Luckman				Object	Most of the area is agricultural land and contains a listed thatch cottage, The Biddulph Valley way is enjoyed by many and development of this size would spoil the peace of this area and take away many peoples enjoyment. There are plenty of other areas to choose which would have a less impact on residents.	<ul style="list-style-type: none"> • See response to PO4595 regarding agricultural land value • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO4580 regarding Impact on BVW / Visual impact
PO10284	Miss Jenna Woolliscroft				Object	We often bike down here, it's home to some beautiful wild life many people use this route just to generally find peace in our very busy lives if this is destroyed by buildings there will be no where else to go.	<ul style="list-style-type: none"> • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4581 regarding Ecology
PO4689	Mr D Goodwin				Object	I object in writing to the proposal that the area around Akemoor Lane, west of the Biddulph Valley Way should be developed for housing for the following reasons: Access would be very expensive since the Biddulph Valley Way (National Cycle Route 55) would need to be safely negotiated. Akemoor Lane itself would need to be considerably widened to accommodate traffic, destroying ancient oak trees from which the lane gets its name. Drainage would be a real issue since at least 3 streams make their way down the valley. The area is a major English Watershed. The lane itself is becomes a stream itself after a storm and many major attempts to repair Akemoor Lane have only been a short term success. Local flooding, already an issue on the nearby Haydon Park estate, could only get worse. The land that was not developed by open cast in the 60's and is riddled with old bell pits and substantial but unrecorded hidden shafts. Despite illegal tipping by a local land owner the area supports a hugely varied amount of wildlife. General opposition to development. There does appear to be a demand for housing in the area (See the local estate agent figures) Access to and from valley is restricted and would become impossible if 1000 more houses with a potential for 2000 more cars to be placed here. Our sewerage system is already under pressure as it was designed for 17000 homes and now supports 20000. This problem needs urgent attention already but isn't receiving any. Our schools are full. We have a major industry here now. People live here because it's a because of its beauty of the area we don't have elsewhere. I believe existing Greenbelt should be preserved locally and nationally. Childerplay, Landfill, on outskirts of town with access to the A527, Brownfield. Necessary to leave large band of undeveloped land to prevent it from joining up and Stoke on Trent, Land South West of the Victoria Business Park. Previously landscaped after open cast mining. Access to the A527 south of Mill Hayes. Development of the 3 old mills, in the town for housing and alternative accommodation with easier access to current owners on Victoria Business Park. The development should be for sheltered accommodation or similar because of its close proximity to the local shops, medical centres etc. I hope that you will take these points into consideration when making your decisions. Indeed I hope that	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO4581 regarding Ecology • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO4586 regarding need for housing and school • See response to PO1132 regarding water treatment works over capacity • See response to PO775 regarding lack of infrastructure (doctors etc) • See response to PO2044 regarding lack of employment • See response to PO4586 regarding using brown field land first (including mills)

						this letter is read.	
PO4578	Mr & Mrs ML Brookes				Object	I am writing to object to the proposal that has been put forward for school and housing complex. Our objections are that there is an old mine working and tunnels where it has been proposed, plus the wildlife there would truly be affected and truly ruin the walks and cyclist that parents, and I their children have whilst seeing the nature that that is there out there, conserving all of this myself and my wife think that alternative sites are available proven sites, like Victoria Colliery and Childerplay which you look at to consider.	<ul style="list-style-type: none"> • See response to PO4581 regarding Ecology • See response to PO386 regarding Mining • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4580 regarding Victoria Colliery and Childerplay
PO4582	Mrs K Wallis				Object	I strongly object to the propose site of development on Akesmore Lane for the following reasons. If this development goes ahead these houses would be I object because the land it would be built on is Green Belt, which I strongly believe, should be protected & an alternative site should be another reason why I object is because the land is just not suitable for building on, because of flooding & mineshaft problems. Other reasons are an intense impact, on the nearby Biddulph valley way poor access. Increase in traffic & threat to wildlife.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4580 regarding highways • See response to PO4581 regarding Ecology
PO4584	Mr & Mrs J & G Vickers				Object	We think there are better sites to build on i.e.: The ex-colliery site. The views to Mow Cop from the by-pass are great. Visitor's to Biddulph love it.	<ul style="list-style-type: none"> • See response to PO4580 regarding Victoria Colliery and Childerplay • See response to PO4580 regarding Impact on BVW / Visual impact
PO4585	Mr C Peach				Object	My main objection to the building by houses and a school off Akesmoor Lane is the volume of traffic it will create, mixed with frequent heavy vehicles; skip hire is a cocktail for accidents.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways
PO4583	Mrs J Peach				Object	My main objection to the building of houses and a school off Akesmore Lane is the volume of traffic on the surrounding roads, Wedgewood, Halls; Mow Station Road (double parking) will be a very dangerous. There are Brown Sites, old Mills, Station Road, & Cross Street area that could be tidied up before ruining Green Belt.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO4586 regarding using brown field land first (including mills) • See response to PO20 regarding loss of Green Belt
PO4975	Mr M Seddon				Object	ADD003 A: Totally unsuitable how the can have been proposed after being rejected in our original allocation by SMDC is unbelievable. B: Green Belt will mean sides B.V.W will have houses and us BVW is a local walkway + cycle route, it will remove the open aspect + the beautiful views to the west. C: Removal of strong boundary to protect ? D: Road access not suitable.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4580 regarding highways
PO4904	Mr B Barcoft				Object	i do not support this site.	Comment noted.
PO4899	Mrs K Hallam				Object	i do not support this site.	Comment noted.

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO6716	Mr Jeffrey Killicoat				Object	<p>Object to the proposal of housing and a school on Green Belt land around Akesmore Lane. Green Belt: Our government has pledged in its manifesto that Green Belt areas are safe for the next five years. A key commitment in the Conservative manifesto is to prioritise Brownfield development. Key principles of Green Belt designation are to check the unrestricted sprawl of built up areas, to safeguard the countryside from encroachment, to preserve the setting and special character of the area, to carry out urban regeneration by encouraging the recycling of derelict and urban land. According to the Campaign for the Protection of Rural England "Green belts are a buffer between town and countryside. Within their boundaries, damaged and derelict land can be improved and nature conservation is encouraged. Green Belts help with food production, help us tackle the huge challenges of climate change, form part of a nationwide ecological network providing breathing places for people and for nature long into the future.</p> <p>Neighbourhood plans: Under the Government's pledges, local people are to have more control over the planning of their neighbourhoods and the protection of Green Belt areas. The development of Neighbourhood Plans is there to give more power to local allowing them to play a much stronger role in shaping their area and that local people should have the final say on developments in their town. Our objections: According to the "Local Development Framework" document, sustainable development means "A better quality of life for everybody now and in the future". Why do we need all these extra houses in Biddulph, when there are so many empty properties in the town. These extra houses will put great pressure on the infrastructure - Medical centres, the sewerage system (already overloaded from current residents and the many visitors to Biddulph Grange Gardens, the Country Park, Biddulph Valley Way, Sports facilities, town centre etc..) and the quality of life for residents through increased congestion and pollution. We are astounded that you are considering a plan for houses and a school on the Green Belt land around Akesmore Lane. We have been told that this Green Belt land has been a last minute amendment to the plan, which suggests that you are attempting to deceive people and go against all the principles of Neighbourhood planning. What are the reasons for adding Akesmore Lane to the plan, Biddulph is known as the Garden town of Staffordshire and yet you are willing to deprive local people and visitors of the beautiful countryside on the boundary of the town, which many people enjoy along the Biddulph Valley Way. You are prepared to disturb the wonderful bird/animal life and nature, which is in abundance there. Has an independent ecological survey been undertaken for this site to show the projected effect of water courses, will life (ironically Akesmore Lane has breeding curlews and lapwings (curlews being the bird shown</p>	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4586 regarding using brown field land first (including mills) • See response to PO4586 regarding need for housing and school • See response to PO775 regarding lack of infrastructure (doctors etc) • See response to PO1132 regarding water treatment works over capacity • See response to PO4580 regarding highways • See response to PO2044 regarding air pollution. • See response to PO10279 regarding why site was not included at site options stage • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4581 regarding Ecology • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO1006 regarding poor marketing of consultation / Consultation period too short / Website not easy to use • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO4586 regarding using brown field land first (including mills) • See response to PO4580 regarding Victoria Colliery and Childerplay • Staffordshire County Council, the Education Authority will decide on the most appropriate location for the new school as this depends on where new development takes place.

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>on the SMDC logo!!) If you check old Ordinance Survey maps, you will see that this area used to be called "Lapwing fields". You are prepared to locate housing and a school next to the White Cottage, a very rare example of a Staffordshire thatched dwelling and Grade 1 listed. We have been informed at a recent resident's meeting that Staffordshire Moorlands District Offices are ignoring objections and ideas from our local Biddulph councillors and riding rough-shod over local people's wishes, going against all the principles of Neighbourhood plans. We are also very concerned that objections raised to the plan have so far not been uploaded to the relevant website - is this a ruse on your part to discourage people from making their objections, as well as making the website extremely difficult to locate from the main SMDC site? We believe that the Green Belt area proposed is unsuitable for building purposes, due to the many drift mines and the level of flooding over the last few years. Has there been a technical survey of flooding control in this area? There are extensive Brownfield sites in Biddulph and empty properties, which could be used rather than encroaching onto the Green Belt areas of the town. For example, the Victoria Colliery site has had millions spent on it (presumably from residents' council tax/income tax), so that it could be developed, so surely this would be an ideal option, meeting the government's commitment to prioritise Brownfield development and the aims of Neighbourhood planning. Another Brownfield site might be the Childerplay area, as well as other sites in the town, such as Whally Street, Singer Street, Cross Street, the ground behind the Leisure Centre (for the school), Caravan storage area, behind Chell's Yard. If we are not vigilant, we will be allowing our generation to spoil these Green Belt areas for generations to come. It is a terrible plan, badly presented, unscrutinised and rushed through - please stop now and think what you are doing. Above all, please listen to local people and adhere to the principles of Neighbourhood plans and the Government's commitment to Green Belt areas.</p>	
PO6744	Mr Stephen Dobbs				Object	<p>I have lived in and around biddulph all of my life and in my 51 years I have seen considerable development in the Biddulph valley. I am convinced that the council and developers will not rest until they have completely built on every scrap of greenery in the valley. I absolutely object to any development on green belt land and especially the new proposed site on Akemore Lane which has recently been added. I believe any such development on green belt land is just the thin end of the wedge and once begun it will pave the way to complete development of all the green belt in the valley. Development of Greenbelt land will reduce the quality of life for everyone who lives in Biddulph apart from the developers, speculators and others looking to profit from the development. I also consider that there is absolutely no need for any further housing in the local area. The councils and governments major</p>	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4586 regarding need for housing and school • See response to PO4586 regarding using brown field land first (including mills) • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO87 regarding residential amenity - disturbance from building work / noise from school / parking during school drop-off and pick-up times • See response to PO4580 regarding highways

						<p>concern should be the development of a stable population size, not uncontrolled and unsustainable and irresponsible population growth and that policies should be adopted which encourage this. If housing is required as a result of councils / government being unable to control population then they should firstly look at bringing second homes and holiday homes back into the mainstream housing market and then as a last resort development of brownfield sites. Biddulph should not be allowed to become one huge estate providing cheap housing for Cheshire and Staffordshire commuters. The charm and uniqueness of the town should not be further denegated and since I am sure there are considerable sums of money to be made by the further development of the town, the developers, speculators, vultures and others seeking to gain should not be allowed to profit and reduce the quality of life for Biddulph residents. In addition to my above objections I must also point out that Biddulph does not have the transport infrastructure to cope with any further development. The roads out of Biddulph via Mow Lane (until recently) and Akesmore Lane have been allowed to lapse into a terrible state of repair with a considerable number of potholes which rendered Akesmore Lane almost impassible in a car. If the council is unable to maintain roads with the current number of vehicles then I dread to think what things would be like with even more vehicles on the roads as a result of building more houses. Also the only road out of Biddulph leading direct to the potteries is often congested especially around Knypersley traffic lights and now increasingly by the site of the business development which has taken place on the Knypersley Vics site. I dont believe any Biddulph residents would welcome further increases in their journey times to get to the potteries or to travel in any other direction out of Biddulph but this is precisely what will happen if there is any further housing development. I trust these comments and objections will be taken on board before the council decides to continue with the proposed plans and I look forward to receiving any comments you may have.</p>	
PO6624	Mr Colin Hall				Object	<p>How many derelict mills and warehouse units exist within your jurisdiction? And how many brownfield sites suitable for development? I would guess there are more than adequate to cover all of your directive for additional housing etc from your lords & masters in Whitehall. It is sloppy and blinkered to not -seriously explore this option first. Have you? Greenfield sites are precious and once gone cannot be replaced - especially where wildlife and flora is concerned. Furthermore your slipping in an additional site, ie Akesmore Lane, at short notice - and with only a shortened timespan for objections - is not only sly and cynical, it is a lazy, ugly and inappropriate use of the democratic process.</p>	<ul style="list-style-type: none"> • See response to PO4586 regarding using brown field land first (including mills) • See response to PO4581 regarding Ecology • See response to PO10279 regarding why site was not included at site options stage • See response to PO1006 regarding poor marketing of consultation / Consultation period too short / Website not easy to use

PO6748 PO6749	Mr M Brammer Mrs M Brammer				Object	I object to the use of this area of Green Belt for housing and a school. This area lies outside the natural boundary set by the old railway line / Biddulph Valley Way. There is an uninterrupted view to Congleton Edge that would be spoiled by this area being used for housing. This would be a great loss of amenity. Access to this site is poor along a narrow road. There are mine shafts and culverts in this area with water run off when we have rain. The site also contains what is probably the oldest building in Biddulph. I am concerned that development in this area could have an effect on the Haydon Park Estate as I believe that there could be an increase in water run off which the existing systems could not cope with. If this amendment were to go ahead there would be a danger of housing "creep" to the south towards Knypersley.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO20 regarding loss of Green Belt
PO7218	Mr B Roberts				Object	Akesmore Lane – issues: Very narrow country lane especially considering the proposal for 300 homes No footpath No lighting Only one entrance / exit into Biddulph via Wedgwood Lane Poor position for a school	<ul style="list-style-type: none"> • See response to PO4580 regarding highways
PO6599	Ms Catharine Snell				Object	How many derelict mills and warehouse units exist within your jurisdiction? How many existing dwellings are empty or unsold? And how many brownfield sites suitable for development? I would guess there are at least adequate to cover all of your directive for additional housing etc from your lords & masters in Whitehall. It is sloppy and blinkered to not seriously explore this option first. Have you? Why is the Victoria Colliery site not being explored? Greenfield sites are precious and once gone cannot be replaced - especially where farming, wildlife and flora is concerned, never mind objections on other grounds: rural areas being torn up in favour of stereotypical houses and other buildings built on the cheap, and unimaginatively; and years of noise, fumes and disruption in formerly non-urban environments whilst this is underway. Furthermore your slipping in an additional site, ie Akesmore Lane, at short notice - and with only a shortened timespan for objections - is not only sly and cynical, it is a lazy, ugly and inappropriate use of the democratic process. The sewer system is already over capacity and set for more as Biddulph Grange (with its 10,000 annual guests) and surrounding homes are about to be hooked up. What plans do you have for this and other infrastructure? Exactly how do you foresee the residents of almost 1000 homes plus a school use the single track road that is Akesmore Lane. Has this actually been thought through or was a dart thrown at a wall map?	<ul style="list-style-type: none"> • See response to PO4586 regarding using brown field land first (including mills) • Empty properties for sale cannot be counted in future housing need calculations as they could be occupied at any time. • See response to PO4580 regarding Victoria Colliery and Childerplay • See response to PO4595 regarding agricultural land value • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO87 regarding residential amenity - disturbance from building work / noise from school / parking during school drop-off and pick-up times • See response to PO4581 regarding Ecology • See response to PO1132 regarding water treatment works over capacity • See response to PO10279 regarding why site was not included at site options stage • See response to PO775 regarding lack of infrastructure (doctors etc) • See response to PO4580 regarding highways

PO6731	Mr & Mrs R Barlow				Object	Wish to OBJECT to the proposed building on greenbelt and an area of outstanding natural beauty which also has an 17th century thatched roof cottage,the land is totally unsuitable for housing having mine shafts and prone to flooding not forgetting the cost to flora and fauna,Biddulph has in excess of 200 or.more empty houses.the Boris site of 200 plus houses which they can't sell and selling letting to housing social and others.Biddulph is the garden town of the Staffordshire Moorlands but for how much longer? The infrastructure cannot take more housing stop now not spoil our small town or it will be a city without a town centre.gardens of existing homes are prone to flooding now what will it be like if you build more,look at building on the victoria site and Childerplay road very suitable, or the original site of Pennine Way cul de sacs with the road in situ and wide roads,Biddulph moor is already joined up by way of park lane knypersley.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO4581 regarding Ecology • See response to PO775 regarding lack of infrastructure (doctors etc) • See response to PO4580 regarding Victoria Colliery and Childerplay • See response to PO4580 regarding highways.
PO6742	Mr & Mrs Wayne Harrison				Object	Object due to: Inadequate road infrastructure, Loss of Green Belt land, Loss of wildlife, fields and hedgerows which under UK Biodiversity Plan Councils have a duty to protect. The Council should use existing brown field sites.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO20 regarding loss of Green Belt • See response to PO4581 regarding Ecology • See response to PO4586 regarding using brown field land first (including mills)
PO6743	Mr J A Turner				Object	Object to loss of beautiful countryside. The majority of residents bought their homes because of the location and do not wish to see houses and a school built on Akesmoor Lane. There are more appropriate brownfield sites elsewhere - why destroy our Green Belt?	<ul style="list-style-type: none"> • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4586 regarding using brown field land first (including mills) • See response to PO20 regarding loss of Green Belt
PO6747	Mr & Mrs N Booth				Object	Housing density too high. Inadequate infrastructure - roads, drains and services. Spoils the backdrop from Biddulph to Mow Cop. No vote as to which areas of the Green Belt should be released. Impact upon Haydon Park from increased traffic. Area would not support an additional 1000 people and 200 cars.	<ul style="list-style-type: none"> • The densities put forward are indicative at present. If the site were taken forward and the subject of a planning application the density would be an issue that anyone would have the opportunity to comment on. • See response to PO775 regarding lack of infrastructure (doctors etc) • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding highways.
PO6750	Mr & Mrs G Wilson				Object	Around the town of Biddulph there are numerous brown field sites perfectly suitable for housing developments. As a chartered structural engineer I have vast experience in this type of remedial work and use of brown field sites and modern techniques to make them economically viable to developers. To attack the only remaining areas of green field sites in the Biddulph valley would be detrimental to the future of our children and the people of the town.	<ul style="list-style-type: none"> • See response to PO4586 regarding using brown field land first (including mills).

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO7375	Mr Nigel Yates				Object	Akesmore Lane is a narrow rural lane on the steep western valley side, access to which is along narrow lanes which do not have continuous footpaths, the proposed site was intensively mined during the early 19th C, and many unrecorded shafts and adits exist on the site. The site is criss-crossed by hedgerows containing mature trees and streams draining the valley side - these streams have a history of backing up from the culverts as they pass through to cross the Biddulph Valley Way embankment.	<ul style="list-style-type: none"> • See response to PO4580 regarding highways. • See response to PO4581 regarding Ecology • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage
PO7250	Mr Gerald Wright				Object	To quote from the on line booklet "The extension to green belt land should only be considered in exceptional cases". The Akesmore lane site ADD03 does not fall into this category as other provision exists on brownfield sites that have already stabilized for building; namely the site of the Victoria colliery site tip which has since been cleared after open cast recovery of coal and re instated in a manner suitable for building. Although this land is shown as green belt on the plan within the booklet this land has been industrial for over 100 years. If this land was not intended for building why was money spent in stabilizing the land in the first place? Akesmore lane was also once industrial land in that hand dug pits and bell pits were constructed on this land over several hundred years many of which are recorded and many more that will not be. The watershed from the Mow Cop area also collects and is partially absorbed in this area which helps to reduce flow into local streams several of which also emanate or cross this area. Reduction of absorbency with the creation of hard non absorbent areas of construction will also require infrastructure changes in the provision of extra larger culverts to prevent flooding on the existing Haydon Park estate evidence of which can already be found at the top of Mason Drive after alterations to land in area ADD03. In addition to the already mentioned available land on the site of the old pit waste tip there are other brown field sites within Biddulph in the form of dilapidated fustian mills some of which have suffered subsidence due to poor foundations and the old council waste disposal tip which as in Tunstall is also supposed to be suitable for building on. Is this or is this not the case?. Although these sites may not be favored by large builders looking for maximum profit I see it that provisions are available in line with government requirements without the need to encroach on the green belt at this stage and that regardless of cost these sites must be used first before encroaching onto green belt land. Although the Akesmore site is listed as for 60 properties I am lead to believe that in reality this is likely to be in the region of 360, if this is indeed the case then the proposal document is also being dishonest and I would appreciate your comment in this respect. With regards to the proposed provision of a school in Akesmore Lane. The meadows school site I believe to have been found unsuitable for the care home proposed	<ul style="list-style-type: none"> • If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt. • See response to PO4586 regarding using brown field land first (including mills) • See response to PO4580 regarding Victoria Colliery and Childerplay • See response to PO4586 regarding using brown field land first (including mills) • See response to PO4580 regarding Victoria Colliery and Childerplay • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage • See response to PO4586 regarding need for housing and school • See response to PO1132 regarding water treatment works over capacity

						<p>for the site as the land is considered unsuitable for buildings of more than one storey. If indeed this is the case then as infrastructure in that playing fields etc already exist on this site and its close proximity to Knypersley first school would appear to make it an ideal site to be re used as the area for a new single storey school building similar to the one that burnt down could be reconstructed. It makes no sense whatsoever to destroy these facilities and rebuild them elsewhere in Biddulph especially as this cost would be born by council tax payers and not developers. Would the planning department like to comment on the cost of destroying and re creating these facilities? Finally the waste water treatment plant for Biddulph is at capacity and on occasions is overloaded it also already causes problems to the surrounding area by way of smells. What provision do United Utilities intend to make with regards capacity and control of smells emanating from the plant especially as it would appear that it is intended to build up to this sites boundary and this may inhibit expansion?</p>	
PO7351	Jenny Cryer				Object	<p>I would like to strongly object to the proposed building work off Akesmore Lane in Biddulph. I cannot see at all how the current road networks, sewage systems, doctors and local schools could cope with such an influx of new residents. This needs to be thought through in much more detail and properly provided for before anything on the scale you are proposing could be considered. Akesmore Lane is a lovely country lane and should remain as it is.</p>	<ul style="list-style-type: none"> • See response to PO4580 regarding highways • See response to PO1132 regarding water treatment works over capacity • See response to PO775 regarding lack of infrastructure (doctors, schools etc)

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO9044	Mr and Mrs Siddorn		G Willard	Willard Willard	Object	<p>This site has very significant highway challenges and much uncertainty over land ownership let alone the fact that it provides for a very significant projection (a large finger) eastwards into open countryside and away from the town which is especially damaging in Green Belt terms. It is frankly fantastical that the council have included site AD003 at Akemoor Lane as preferred site when they have not received confirmation from all of the land-owners that they are able and willing to allow the land to be delivered. It is even more perverse given that the site was not allocated in the SHLAA or earlier Site Options consultation in 2015 whereas both BD0138 sites were. Deliverability is key planning considering especially where there is a clear and demonstrable under-supply of housing land. Sites BD0138 can both be delivered. There is significant doubt as to whether AD003 can be. Disagree with the results of the Green Belt Review and consider that they should read as follows: This site breaches the greenway which otherwise provides a strong and very defensible long term Green Belt boundary. It projects a finger of development into the Green Belt which set a precedent for further infill to the South of this site in the future let alone being an unacceptable encroachment into the green Belt in its own right. In addition to this the ground rises to the site and lies adjacent to the greenway making the site highly visible. It is considered that this site makes a significant contribution to the Green Belt and its loss should be avoided. The council are reminded of its own findings in respect of AD003 in the 2015 SHLAA where on the site assessment form the council stated: Site AD003 • A new access would need to be created probably across BVW as Akemoor Lane likely to be too narrow to serve a large number of dwellings. • In floodplain of three watercourses which runs through and under site. Consult EA and SCC. Works on watercourses will need Land Drainage Consent of SCC. Consult EA on surface water (over 1ha). FRA needed. • Intrusion into the Green Belt. Area rural in character. Goes beyond BVW. Access. Likely to be a number of landowners. FRA needed. The council considered the site to be a category C site in 2015 SHLA and it was not identified in the Site options and development boundaries consultation in July of 2015.</p>	<ul style="list-style-type: none"> • The Council is currently investigating land ownership issues in this area. • See response to PO20 regarding loss of Green Belt • See response to PO10279 regarding why site was not included at site options stage • The relevant SHLAA record, BD140, does not support development of this site giving the reasons of access and landscape character. Since the record was written, it has been established that access would not be an issue which would prevent development of the site. Recent evidence has shown that development of the site would have a high impact on landscape sensitivity. The Council must balance this evidence against all the other evidence relating to this site and reach a decision on whether or not to include it as a development site in the Local Plan.

PO9008	Mr Denver Johnson				Object	<p>I've been a resident of Biddulph for forty one years and have seen many developments in the location over the years. Happily over that time the green spaces and views have survived relatively unchanged within that time, maintaining the spirit of a rural conurbation. The current threat to those very Green Belt spaces that set Biddulph apart as a little gem is untenable. It seems that crooked National government have connived with big developers (party sponsors) to twist arms up backs of Development Officers and override Councillors/Local Public Opinion to cherry pick development locations that they hope will bring in the most cash. Stupid insofar that any big development so close would bring down local property prices. The infrastructure of our little end of Biddulph has always been strained by the population level, to suggest that the number of houses could be doubled is ludicrous. The main drawbacks to our location have always been increasing traffic on the A527 (it's too crowded now). ADD03 - has had a history of severe flooding. The field is boggy during the Winter and Spring with signs of subsidence. The entire site has been extensively mined and has probably been worked both on the surface and in deep pits going as far back as the Bronze age: in search of copper, iron and latterly coal. Access to this site is so bad that major infrastructure changes would have to be made to the area before it could be opened up.</p>	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO445 regarding property values • See response to PO4580 regarding highways. • See response to PO386 regarding Mining • See response to PO386 regarding Flooding – surface water drainage
PO9026	Mr E Shaw				Object	<p>I have considered the plans for the proposed development and I do not wish my land to be considered for the development within the greenbelt and countryside for 330 proposed homes and a school.</p>	<p>Comments noted.</p>

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO9032	The Hart Family		Rob Duncan		Object	<p>This site is identified within the Local Authority’s Strategic Housing Land Availability Assessment as: “Not considered suitable for development due to potential access difficulties and the rural character of this area: The Local Authority’s Green Belt Review furthermore acknowledges that the land breaches the strong defensible boundary of the Biddulph Valley Way and that the southern extent of the land would be difficult to develop given rising landform and the lack of a clear containing boundary. The site makes a significant contribution to the Green Belt in terms of safeguarding from encroachment and furthermore makes a contribution in terms of preventing sprawl and preserving the setting of the town. I would agree with these conclusions, and for the reasons set out in section 3 above, conclude that my client’s sites will have no greater impact on the Green Belt than that which has been identified for this site as a preferred option. A significant concern with the identification of this site as a preferred option, is its viability. The appraisal of the site confirms that from a highway safety perspective a number of enhancements to the local highway network would be required. These include: • Improvements to numerous junctions • Widening of Akesmore Lane along its length • Re-construction of Akesmore Lane • Provision of Street Lighting • Provision of Surface Water Drainage Most significantly the Local Highway Authority also identifies that some third party land may be required to facilitate these works. All of these requirements lead me to conclude that this would not be a financially viable site in the context of its prospective number of dwellings, particularly when you take into account the other developer contributions that would need to be delivered, including the provision of much needed affordable housing, public open space, play areas and the delivery of new school (or alternative education contributions). Aligned with these concerns are matters of unauthorised tipping on the site. I am informed that this site has had a history of illegal tipping of medical waste, which has led to prosecutions by Staffordshire County Council and the Environment Agency. That being the case it raises significant contamination concerns, as for the site to be suitable for residential use, full decontamination would be required. Such decontamination costs would add to the development costs of this site, and in turn further affect the overall viability of the site. On this basis alone the site should not be brought forward for allocation as a housing site. By comparison, my client’s sites (BD067a, BD067b and BD067c) already benefit from two existing vehicular access points, do not necessitate such substantive highway improvement works, do not have contamination constraints, and can facilitate the growth of an existing school. It is also a financially viable site having regard to all likely developer contributions. A further objection to the allocation of this site for housing arises from the site ownership situation. As</p>	<ul style="list-style-type: none"> • See response to PO9044 regarding SHLAA record for site does not support inclusion. • The Council has had viability assessment of the site undertaken and the site is considered marginally viable if the requirement for 33% affordable homes is applied. • See response to PO9044 regarding uncertainty over land ownership • See response to PO10279 regarding why site was not included at site options stage • See response to PO386 regarding Flooding – surface water drainage

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>acknowledged within the Site Appraisal, three responses are still awaited from registered landowners, and there is also a parcel of land that is unregistered. Its availability to be brought forward for housing is therefore unknown. The site furthermore did not appear as an option within the initial Site Allocations Consultation, and was also given a classification of 'C' within the Strategic Housing Land Availability Assessment, with its impact on the rural area and access being identified as significant constraints. Given the above, I would submit that it should not have been identified as a preferred option, as until now the Local Authority has not supported its suitability for development. This site is also known to suffer from flooding. A review of Surface Water Flood Maps from the Environment Agency show that a large portion of the site, particularly the parcel closest to Wedgewood Lane, suffers from significant surface water flooding problems. This will serve to lessen the developable area of the site and contribute to the overall build costs, which are already likely to be significant in light of the highway authority's requirements and other developer contributions. On behalf of my client I would therefore request that the Local Authority abandons this site as a preferred option.</p>	
PO9227	Mr Peter Wilshaw				Object	<p>(Summary) The development of future Housing and any future Solar Farm installation would squeeze the natural life from the valley. It would deplete the Green Belt and detrimentally and dramatically alter the landscape and negatively affect the wellbeing of the people of Biddulph and in particular Gillow Heath. I hope that planners will reconsider the preferred option taking into account the following; Unsuitable road network . These proposed housing sites are situated along the gateways to our countryside and walking tracks e.g. Akesmore Lane, Holy Lane, Mow Lane and Marshgreen Road. These narrow roads already carry an unacceptable level of traffic which when combined with a heavy footfall of walkers with children and animals presents a real danger. This danger is also manifested in the fact that they all lead to crossroads on the A527 at Marshgreen and Smithy Lane which are difficult places to emerge from. If these lanes require widening or other safety upgrade it highly likely the ancient hedgerows will be destroyed and therefore the characteristics of that landscape lost for ever. Situating parking places at various spots on the west side of the valley at medium to high elevation would enable access to many walking tracks and elevate the mix of cars and people on the narrow lanes. Diminishing of the Green Belt in the short and long term. The release of Green Belt land, according to the NPPF, should only take place in "exceptional circumstances". There is not statement to say what those circumstances are and why land can be released in Biddulph and other places but, not in Leek? Site ADD03. Is it 300 or 70 houses plus a school? Unsuitable area</p>	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO2044 regarding impact on Landscape • See response to PO4580 regarding highways. • If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt. • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO4580 regarding Impact on BVW / Visual impact

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

						<p>adjacent to the Grade II listed White house (the oldest house and tourist attraction in Biddulph). Cumulative and Visual damage to the historic and characteristics of the north Staffordshire uplands area of Gillow Heath . Biddulph valley is also a gateway to the moorlands and The Peak District National Park. It was granted the title of “The Garden Town of Staffordshire” and over twenty years of volunteer effort to showcase the town, Biddulph in Bloom Charity has won many RHS Heart of England in Bloom awards and in 2015 came second in the National Large Town category. I feel that the location and magnitude of these developments will adversely affect the confidence, so hard fought for, in the effort to improve our town and increase tourism. In many respects this plan does not meet the Core Strategy of SMDC and SCC in meeting their own obligations stated in the Historical Environment Assessment Report which is to protect and retain the character of the landscape and follow and develop many of the recommendation therein. There is a finite limit to the availability of land on which to build houses and the limit to where the wellbeing and recreation of the population is detrimentally affected. The County’s Historic Environment Assessment demonstrates that this area has historic value in terms of heritage and historic landscape character.</p>	
PO9605	Mrs Alys Gregory				Object	<p>(Summary) Object to development of the site for the following reasons: Site is in an area of natural beauty; Impact on local wildlife; Remote and inaccessible location - narrow lane with deep ditches in places, traffic would be horrendous; No industry to sustain development; Loss of Green Belt; Impact on White House Listed Building; Impact on Biddulph Valley Way; Old mining workings in the area; Costly to convert access road across BVW; A number of vital footpaths cross the site; Dangerous access for school children; A farm in the area regularly burns rubbish which would affect schoolchildren; and Heavy farm vehicles use the road and leave mud and debris which is a potential danger.</p>	<ul style="list-style-type: none"> • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO4581 regarding Ecology • See response to PO4580 regarding highways • See response to PO2044 regarding lack of employment • See response to PO20 regarding loss of Green Belt • See response to PO455 regarding impact on Listed White House / Reduce size of site (southern part only) • See response to PO4580 regarding Impact on BVW / Visual impact • See response to PO386 regarding Mining • See response to PO274 regarding loss of public footpath(s) • See response to PO274 regarding problem of pollution - burning rubbish from local farm

						and neighbourhood plans to give added protection to valuable local green spaces	
PO9777	Mr M Barlow				Object	There is not the need for so many houses. We have hundreds of empty houses already built and cannot sell them. This is an area of outstanding natural beauty please don't spoil it. It is not suitable for building. It is not low lying, it is steep - try walking up the lane. As for closeness to the town - most people have cars. It will not reduce people shopping outside the area as Biddulph town has no real shops, most closed when Sainsburys took over the town and it would make Halls Road playing fields more dangerous to go to due to increased traffic. Most parents take children to school by car even when they live close to the school. The bypass is not that busy, after rush hour you can cross over without pressing the lights and people from both sides of Biddulph would use the school.	<ul style="list-style-type: none"> • See response to PO4586 regarding need for housing and school • Existing houses which are currently empty do not count towards future supply as they could be occupied at any time. • See response to PO4580 regarding highways. • See response to PO4580 regarding Impact on BVW / Visual impact
PO306 PO543	Mr Russell Picken Mrs C Picken				Object	This site should be extended and possibly moved slightly southwards into sites BD116 and the area of site BD140, adjacent to sites BD071 and BD071a for the following reasons: This development would start to rebalance Biddulph in the right direction, i.e. it would start to move the town centre back towards the centre of the town. A proper, suitably sized road system / infrastructure for the new housing estate could be built, capable of accepting future extension of the site. It should be built with direct access to the bypass. There is already an access road into site BD140, which passes the boundary of BD116 at its north-west corner. It originally formed part of Wharf Road, but was bisected by the construction of the bypass. Although currently in poor condition, it could be upgraded and has the benefit of already having access across the BVW, in the same manner as that found in Marsh Green Road. New properties in this area would be much closer to the town centre. This could encourage people to walk, particularly for limited shopping. This then has the advantages of being more environmentally friendly and also reducing the traffic in the town and parking requirements. New housing developments in this would have much less of a visual impact on the area and would not constitute 'urban creep'. A strip of visual open space could be included between the development and the BVW. This would make the new housing development more appealing visually, both from within the development itself and when viewed from the BVW. This could also act as a wildlife corridor. These sites are well placed to take advantage of some of the new services and facilities, i.e. the new Primary Health Care Centre, which is within easy walking distance, from these sites, for most people. These areas could be developed without dominating the outlook from existing properties. Also they would not overlook the said existing properties. The development of these sites would not add to	Comments noted. This area is being considered by the Council as a possible housing site with linkages to BD071 and BD071a as you suggest.

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						existing property flooding issues. The BVW would provide a relative safe and easy access to the playing fields at Gillow Heath, either by walking, or by cycling. These sites could comply with items 1, 2 and 4 of the 'T1 – Development and Sustainable Transport' section of the 'Preferred Transport Policies' from the 'Core Strategy Draft Preferred Options' document, as shown in Appendix A.	
PO1021	Mr Peter Barnett				Object	This area is green belt ADD03, and as such should not be included for proposed housing and school development. The infrastructure is not suitable to carry the additional heavy loads of building materials which would be required to develop this site. What damage to our houses would be inflicted if millions of tons of building materials were hauled up Station Road and Halls Road to give access to Akemoor Lane daily, which in self is too narrow. Not only that presumably if a school is built there would be inadequate parking for the parents as history shows that parents drive their children to school in many cases and this would therefore encroach on to available road space on these streets causing additional congestion. It would also make the cycle/walkway, fenced on both sides, and appearing like walking up an entry, thus defeating the object of a country walk.	<ul style="list-style-type: none"> • See response to PO20 regarding loss of Green Belt • See response to PO4580 regarding highways. • See response to PO4580 regarding Impact on BVW / Visual impact
	Petition with 361 signatures				Object / Support	<p>We the undersigned residents of the North of Biddulph wish to register our support for a revised version of ADD03, whereby the narrow north end abutting gardens is excluded, instead starting at the beginning of the visual open space. The site could then extend further to the south allowing for greater opportunities for access to the bypass</p> <ul style="list-style-type: none"> • Starting south of where the open space begins • Leaving a screening barrier consisting of the existing visual open space and the hedged discussed rail track • Maintaining the nature corridor between the existing and new developments • Access could be onto the bypass and then to the Town Centre, and with potential funding from the development • Including the planned Primary School allows access on foot, reducing vehicle use and pollution • Opening up the possibility to extend this at a later date, including with easy access to Kidsgrove and beyond, and the motorways. 	Comments noted. Land in this area is being considered by the Council as a possible housing site with linkages to BD071 and BD071a and the bypass as you suggest.
PO541 PO595	Mr Bill Hockey Mrs Pamela Hockey				Support	While we do not agree that Biddulph needs this number of new properties, we understand that unless Biddulph takes control through the Neighbourhood Plan we risk developments 'running wild' as has happened elsewhere. Filling out to the West gives the opportunity to achieve a better balance to the town.	Comments noted. See response to PO4586 regarding need for housing and school.

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO724	Mr Philip Beech				Support	This area of Biddulph is ideally situated for development of housing and the proposed new school. Utilisation of this land will allow for a 'future proofing' approach to development, as the land is not hemmed in by other developments or roads. I wholly support the use of ADD03, as it and adjacent land will meet the future development needs for many years to come.	Comments noted.
PO4858	Mr Chris Millington				Support	Support Akemoor Lane as can access onto now sites & bypass – has close proximity to the centre for walking retains a natural barrier and eco corridor for wildlife.	Comments noted.
PO6712	Dr Emma Stanmore				Support	I am in support of the preferred site of Akemoor Lane as opposed to the other considered sites further north bordering Wedgwood Lane, Mow Lane and Well Lane, as these sites are noted as having considerable value to the special character of the area in the Green Belt consultation. Any development to the North of Biddulph closes the gap between the town and Congleton, particularly Congleton Edge, which should be avoided to preserve the distinct identity of each district. The quality of landscape in the Biddulph Valley to the North of the town is far greater than the West (i.e. Akemoor Lane), due to its unspoilt nature, and should therefore be protected against major development. It should also be noted that several subsidence issues have occurred in the field off Wedgwood Lane, due to redundant mine workings collapsing. The national coal board were involved in rectifying these problems by excavating and backfilling the areas of concern.	Comments noted.
PO6719	Mr Michael Stanmore				Support	I am in support of the preferred site of Akemoor Lane as opposed to the other considered sites further north bordering Wedgwood Lane, Mow Lane and Well Lane, as these sites are noted as having considerable value to the special character of the area in the Green Belt consultation. Any development to the North of Biddulph closes the gap between the town and Congleton, particularly Congleton Edge, which should be avoided to preserve the distinct identity of each district. The quality of landscape in the Biddulph Valley to the North of the town is far greater than the West (i.e. Akemoor Lane), due to its unspoilt nature, and should therefore be protected against major development. It should also be noted that several subsidence issues have occurred in the field off Wedgwood Lane, due to redundant mine workings collapsing.	Comments noted.
PO7585	Mr Peter Turner				Support	These sites offer far more appropriate development opportunities, away from the water treatment works and meeting highways requirements. This site offers an opportunity to access greater CIL contributions.	Comments noted.

Question 19 – Do you have any comments on the proposed housing allocation ADD03 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO10228	Mr Graeme Court				Support	Suggest this as an alternative site. I recognise this is a controversial site but it does have its merits, provided the land bordering Akesmore Lane itself is not used. This large site could be opened up by extending and improving the partially built access road, off the Inner Ring Road, to the south of the BT phone exchange.	Comments noted.
PO10053	Mr Philip Sutton				Support	This is a low lying area and would be less visually intrusive from the Biddulph Moor and Mow Cop ridge lines. It has good access to the town centre.	Comments noted.
PO9792	Mr Eric Biddle				Support	At present Biddulph is not a balanced town. To put this right areas to the west and south must be developed. Support development south of ADD03.	Comments noted.
PO10205	Mr Stan Charlesworth				Support	(Summary) Support for development in this location for the following reasons: new dwellings would be close to the town centre and services and facilities make Biddulph more compact support for a new Primary School within the site.	Comments noted.
PO10286	Mr D Heath				Support	The Akesmore Lane site is more accessible for the town centre and the new school these would be more acceptable. There are already several more acceptable routes from there, Marsh Green Lane, Mow Lane, Station Road, Wharf Road and New Pool Road. It would also be easier to walk to the town centre and the school so saving on car parking and problems and pollution.	Comments noted.
PO10024	Mr & Mrs D Cartwright				Support	(Summary). Seems the best area to complete the town (more symmetrical) low lying land with natural screening and would retain open aspect of land near to the Halls Road sports ground walking to work will be a possibility from this area walking distance to the town which will help regeneration and access facilities and services not too close to other existing houses	Comments noted.
PO10175 PO10066 PO10164 PO9994 PO10111 PO10042 PO10152 PO9864 PO9682 PO9662	Mr Robert Chambers G B Ford Mr N Clowes Mr D Cliffe Mrs V Whiston Mr D Platt Mrs B Rowland Mr Gayle Mrs P Hancock Mr and Mrs A D Lawton				Support	Support.	Comment noted.

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO1316	Mr Andrew Leysens	United Utilities Water Limited			General comment	(Summary) With regards to site references ADD04, BD069 and BD117, these sites appear likely to discharge to that area served by Severn Trent for the provision of wastewater services. It would be useful to confirm with the respective landowners the likely point of discharge to the wastewater network from these sites so that we can confirm the receiving wastewater infrastructure and therefore better understand the impact.	Points of discharge to the wastewater network are a detail which can be confirmed at a later stage in the process once the sites have been allocated in the Local Plan and detailed development schemes become available at the planning application stage.
PO2593	Consultation Service	Natural England			General comment	Natural England notes the proposed preferred site for allocation in Biddulph. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.	<ul style="list-style-type: none"> The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.
PO2888	James Chadwick	Staffordshire County Council			General comment	ADD04 appears to partially affect a Local Geological / Geomorphological Sites (LoGS) which covers a geomorphological feature. Layout and design should avoid impacts on this feature in consultation with GeoConservation Staffordshire.	Comments noted. Reference to the geological site will be included in the relevant site policy if this site is selected for development in the Local Plan.
PO2915	James Chadwick	Staffordshire County Council			General comment	Site ADD04 is likely to require junction and access improvements.	Comments noted. These can be incorporated into a planning application should this site be selected to take forward.
PO4619	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			General comment	ADD04 - Further investigation is required for this site. It needs to be put out for consultation and comments and see what is the response. It also needs to be properly defined on the map. How do you propose accessing this site? Recommendation TBD	Comments noted. Consultation has now taken place on this site. Access is proposed from Harlech Drive.
PO1137 PO6630 PO6699 PO6740 PO7490	<p><u>Petition with 114 signatures</u> Plus: Mr & Mrs G & B Dawson Mr Eric Cox Mr Glenn Walker Mrs Lisa Barrow Mr L Wright</p>				Object	<p>As a local resident I call on SMDC to remove area ADD04 (Harlech Drive, Knypersley) from the 2012-2031 Local Plan Preferred Option Sites. This community is opposed to Green Belt development and we believe that Staffordshire Moorlands District Council needs to be considered the following:</p> <p><u>National Planning Policy Framework (NPPF)</u> 1. NPPF (Paragraph 83) states that "once established, Green Belt should only be altered in exceptional circumstances". The council's plans do not justify "exceptional circumstances" that would require them to build on unspoiled green field land to meet their current housing targets.</p>	<ul style="list-style-type: none"> In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study concludes that the overall impact of this area on Green Belt purposes is moderate. It states that: "This is a significant area of land which cannot be readily subdivided because of an

NPPF (paragraph 111) states that brown field sites are to be prioritised over the development of green field sites. However, the preferred option plans as recommended at Stage 2 consultation offer up green field sites in preference to other brown field site developments already proposed.</p> <p>3. NPPF (paragraph 156-157) states that infrastructure must come first, yet outline plans to provide new infrastructure are not being prepared in advance. Currently there are no plans for historic conservation of the Knypersley Hall estate. There is no green infrastructure plan and no plans to develop sport and recreation of the south east of Knypersley.</p> <p>4. NPPF (paragraph 83 & 85). The proposed new Green Belt boundaries for site ADD04 are illogical because they follow arbitrary field boundaries. There are no physical boundaries to prevent unchecked incursion into surrounding countryside making this location extremely vulnerable to future encroachment. The proposed boundary does not meet NPPF criteria stating that a Green Belt change must have long term permanence capable of enduring for 30-50 years.</p> <p><u>SMDC Green Belt Review Study</u></p> <p>5. Development of 150-250 houses on this site potentially is merely the first step in a wider plan to develop a new school and up to 1,070 houses within Green Belt Review Area N17. This represents creeping erosion of Biddulph's open countryside. Urbanisation on this scale within the Green Belt is unacceptable and would have a large negative impact on existing countryside in Biddulph South, an area of outstanding natural beauty.</p> <p>6. The Green Belt Review recommends that (other than BD117, BD069 & BD131b) there should be no release of Green Belt in area N17 within the plan period 2012-2031. It then states that, if desired, the council could reconsider this area for release in a future Local Plan. Thus, the inclusion of ADD04 as a Preferred Site at this time is appropriate and is contrary to the review study's recommendations.</p> <p><u>Impact on highway traffic and road safety</u></p> <p>7. Site access would be via a narrow private road leading to a farm track. The entrance road may need to be widened making this site impossible or difficult to develop without complex land acquisition.</p> <p>8. The area around Harlech Drive and Conway Road has three schools in the immediate vicinity already and is affected by high traffic flow at peak times. 180-280 new houses (ADD04 & BD069 combined) would cause an estimated increase in traffic flow of up to 550 extra cars causing significant extra traffic problems.</p> <p>9. This site is not a suitable location for the proposed new school. Knypersley already has a pre-school nursery and a primary school nearby.</p>	<p>absence of clear internal boundaries. It is well contained physically and visually by Mill Hayes Road and whilst making a contribution to Green Belt purposes in respect of separation and setting, comprehensive masterplanning (which would retain existing open space and sports pitches) could yield a development which would help to reinforce wider Green belt function. It recommends considering site ADD04 for release from the Green Belt. If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt.</p> <ul style="list-style-type: none"> • Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph (particularly Yarn Mill and Minster Mill) would be appropriate for residential development. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping brownfield sites. • National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the County Council to assess the impact of proposed development on school capacity, what additional capacity is needed and how this can be delivered. • Heritage Impact of development on the site has been assessed in the Council's Heritage Impact Study (August 2016), the results for this site are: 'There is one Grade II* and one Grade II Listed Building within close proximity to the site. The site contributes greatly to the setting of the Grade II* as a remnant of the parkland, which in turn, contributes to the overall significance of the asset. Development on the site would highly likely cause substantial adverse effects to the setting of the Grade II* Listed Building which would impact upon its overall significance. The HEA states that development is not deemed appropriate in the HLC zone BBHECZ 7 (Historic Environment Character Assessment 2010). Site could not be developed without substantial heritage impacts'. It should be noted that this study forms part of a wider evidence base to support SMDC's Local Plan. Therefore, the Council will weigh this conclusion against other evidence when determining the

Question 19 – Do you have any comments on the proposed housing allocation ADD04 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>Entrance to the site is via a quiet residential district mainly occupied by elderly people. Quality of life will be harmed and there could be significant disruption to the existing community.</p> <p><u>Effect on the landscape</u></p> <p>10. Open countryside, public footpaths, historic parkland in the vicinity of Knypersley Hall (Grade II* listed), the fishing pool, the cricket pavilion, and fields adjacent to Knypersley Cricket Ground are all an integral part of the landscape of Knypersley. (The cricket ground itself was donated to the community by the Bateman family). Open countryside forms an integral part of the surrounding natural landscape and, if developed upon, connection between the Knypersley community and the natural environment would be lost forever.</p> <p>11. Development of this site would cause significant harm to Knypersley's sense of place and to its unique semi-rural village identity centred upon Newpool Meadows, the cricket ground and pavilion, and its magnificent landscape setting. This new housing would significantly harm the local landscape and potentially could damage the separate "village community" identity that Knypersley enjoys at present. NPPF policy states that merging of neighbouring communities is to be prevented.</p> <p>12. Footpath 11, which runs from Harlech Drive to Mill Hayes Lane, provides access to beautiful open countryside for the town as a whole. This path provides important public access to open space overlooking the cricket ground and to a large area of open countryside beyond. This footpath interconnects Biddulph with Greenway Bank Country Park to the south making this a strategically important area requiring special Green Belt protection (not an area of derelict land requiring urban infill). The proposed development would cause significant harm to our green infrastructure objectives. Biddulph's footpaths should pass through open countryside, not through an urban landscape.</p> <p><u>Historic conservation of the natural environment</u></p> <p>13. For many years the Green Belt around Biddulph has made a significant contribution towards protecting its major historic assets including Knypersley Hall and nearby historic parkland. The council's 2010 Historic Environment Character Assessment Report identifies numerous heritage assets near to the hall which connect the de Knypersley, Bowyer, Bateman, and Heath families to this area and which form an important part of understanding both the history of Biddulph Grange Gardens and of Biddulph as a whole. The report recommends that the remnants of its historic parkland should be conserved and states that "development is not deemed to be appropriate within this zone". The proposed ADD04 development is incompatible with this objective and therefore makes the site completely unsuitable for high density housing.</p> <p>14. Further south lies an area of ancient valley farmland, the last remaining such farmland in the Biddulph Valley. The conservation of this area is also recognised as important and this farmland, together with its</p>	<p>overall suitability of the site for development.</p> <ul style="list-style-type: none"> • The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the Preferred Options Local Plan. • The Council is undertaking a review of open space, sport and recreation facilities which includes an updated playing pitch strategy. • From the Highway Authority's point of view, a Transport Assessment would be required at the planning application stage. Creation of an access directly onto the A527 is preferred though a limited amount of development could be accommodated using an access onto Harlech Drive. No concerns were raised by the Highway Authority about any localised traffic problems as a result of development here. • Staffordshire County Council are the Education Authority and they look at the need for new schools in an area as a result of development. They consider that a new first school would be needed in Biddulph to accommodate the level of new housing development currently proposed. The location of this school would not be decided until the Council has firmed up its plans as to where the new housing development will take place in the town. (There are 2 options put forward as potential locations for a new school in the Preferred Option Sites and Boundaries Consultation booklet). • Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations nor is the possibility of noise from the school or parking issues. • If this area is selected for development, the scheme would be designed to take into account its setting and heritage impact as well as any infrastructure and / or site constraints. A planning application would be required before any development could take place and this would be open for anyone to comment on. • Public footpaths can be maintained or re-directed. This issue

Question 19 – Do you have any comments on the proposed housing allocation ADD04 in Biddulph?

						<p>historic field boundaries, should be preserved for the long term future benefit of our town's heritage.</p> <p>15. Nearby Knypersley Fishing Pool is already designated as a protected nature conservation site. Existing hedgerows within the proposed ADD04 site boundary host a large array of wildlife that would perish as a result of this development. Bats are known to live nearby. Therefore this site, if developed for housing, could have a serious detrimental impact on nature conservation in this locality.</p>	<p>would be considered at the planning application stage.</p> <ul style="list-style-type: none"> • Landscape impact of development on the site has been assessed in the Council's Landscape Impact Study (August 2016), the results for this site are: 'Site comprises land to the west and south of Knypersley Hall, including a large, open field which slopes down from the hall in the north of the site, and more undulating land in the south of the site containing a pond and scattered trees. The site is separated from the settlement edge by Knypersley Hall and agricultural land to the north. Development of the site could adversely affect the existing settlement form, particularly in the southern extent of the site. The northern section of the site has high visual prominence, particularly when viewed from Tunstall Road. Site is of high landscape sensitivity. Please note that this study forms part of a wider evidence base to support SMDC's Local Plan. Therefore, the Council will weigh this conclusion against other evidence when determining the overall suitability of the site for development. • Ecus Ltd conducted Phase 1 ecological survey (incorporating Local Wildlife Site Assessment) in 2016. It concluded that the habitats on ADD04 were considered to be of nature conservation value at the site level only and are not listed as an important habitat in the Staffordshire SBI guidelines. Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site significantly supported any notable protected species. [Some predevelopment species surveys recommended]. • Wherever possible hedgerows would be incorporated into any future development scheme.
PO4669	Mrs C Williams				Object	<p>ADD04 (BD131) Land off Mill Hayes Road. Land drafted for school has public foot path through, it which part of the 'Staffordshire Way' a path regularly used by open space. Land used by local residents and ramblers. This should remain and be kept as green space. Land drafted for school has public large storm water pipe and culvert through it the plans do not show how the council propose to develop around it. Development of the former parkland of Knypersley Hall, Grade 11 listed would be better with green open space left around the Hall. Development on the former parkland of Knypersley Hall, beautiful old trees in this area need to be protected as they are a major part of Knypersley Hall's character and history. Unacceptable increase in the volume of the traffic using Harlech Drive, with added parking and congestion close to Knypersley traffic lights. Increased volume of road surface water runoff, going towards an already over loaded system.</p>	<ul style="list-style-type: none"> • See response to Petition regarding loss of public footpath • See response to Petition regarding site design / visual impact / buffer around Knypersley Hall • See response to Petition regarding highways. • The site is not within floodplain and the Environment Agency has not commented as such. If there is an existing issue with surface water drainage then new development would need to address this. An on site SUDs (Sustainable Urban Drainage) system would be required on this site if it were to be developed.

Therefore, the Council will weigh this conclusion against other evidence when determining the overall suitability of the site for development.
PO1134	Mr Jason Tilsley				Object	I am writing to object due to concern about loss of green areas – consider that once this trend starts there is no going back. Our children will not be able to enjoy the quite locations and open spaces. Residents like myself who have chosen to live here enjoy the quite location. If plans go further then to develop we will see a increase of small roads trying to cope with a minimum of 150 vehicle increase with a realistic volume of 300 vehicles. The result would be noise, air pollution, gridlocked roads at peak hours, safety reduced for our children and property prices falling once we join the mass volume with a less attraction to the location. We are proud to be a part of Biddulph owing to its independence and supported feel to which the local authorities have always put the people and how plans affect the local looks and environment with great thought. For a small rural town we have great volume and estates we will reduce our attraction with a greater volume. Think for the future not a quick fix. This is also your home, take care.	<ul style="list-style-type: none"> See response to Petition regarding highways. See response to Petition regarding site design / visual impact / buffer around Knypesley Hall See response to Petition regarding residential amenity e.g. noise from school, parking problems If the district council considered that a development may adversely impact on local air quality then the applicant is required to undertake air quality assessments to identify these issues and develop options to mitigate these impacts. In addition the district council continually monitors air quality across the district and regularly undertakes review and assessments of this data to identify areas where the traffic could have an unacceptable impact on local air quality. Property values are not considered material in planning law.

PO1141	Ava Heath				Object	I am very concerned about your proposals for the above and submit my objections as follows:- Use of Green Belt and taking away dedicated open spaces which will affect all the wildlife that live in these areas. Additional Traffic flow/volume of traffic that this will create in this area. Conway Road is currently used as a short cut to avoid Park Lane lights by general traffic passing through. Vehicle Access via an already well used road. Sewerage/Drainage Maintenance of roads and pavements is not to an acceptable standard now (the litter and chewing gum on pavements is disgusting). Conway Road is heavily used at school start/end times with parents parking their cars while waiting at pick-up/drop off places for their children – Will a survey be carried out to assess the problems that currently exist before considering your proposals which will only exacerbate the problems? Parking permits would be helpful in our cul de sac to put a stop to this. It should be a stipulation that schools should provide sufficient parking areas so as to avoid parents 'on-street parking' which degrades the road system in the area and causes a danger for pedestrians and other passing traffic.	<ul style="list-style-type: none"> • See response to Petition regarding loss of Green Belt and Exceptional Circumstances • See response to Petition regarding site design / visual impact / buffer around Knypersley Hall • See response to Petition regarding Ecology • See response to Petition regarding highways. • See response to PO4669 regarding Drainage / Sewage • See response to Petition regarding residential amenity e.g. noise from school, parking problems
PO1150	Carol Mountford				Object	Location of proposed school - access/traffic. There are already three schools close to Conway Road, and these are the High School at the top of Conway Road, James Bateman Junior High in Park Lane and Knypersley First School on Tunstall Road. They all generate traffic for Conway Road - used to access schools, use to park, drop off and pick up children from each school, including driving round and round while waiting for children to come out of school. Traffic congestion and parking would be even greater. Also if we want to encourage more people to walk to school then schools need to be located within walking distance of the main catchment area. 150 houses is a massive development - increase in traffic for Conway Road and out onto Tunstall Road, (each home is likely to have at least two cars), impact on land drainage - some houses already have problems with standing water in their back gardens, lack of investment in infrastructure to support new developments - particularly roads. Totally changes a quiet residential area, with good green space into just another estate with as many as houses as possible crammed in. 30 houses on former garden site - too many for the site, impact on traffic. Consider a more imaginative and innovative development in keeping with the area and the wonderful restoration work done on Knypersley Hall. Consider either a well set out care home with garden space around it and or 10 high quality homes set in green space - where do the plans for Knypersley have any upmarket, spacious development - can we not make this space more attractive than just cramming in more houses?	<ul style="list-style-type: none"> • See response to Petition regarding highways. • See response to Petition regarding infrastructure. • See response to PO4669 regarding Drainage / Sewage. • See response to Petition regarding residential amenity e.g. noise from school, parking problems. • See response to Petition regarding Heritage impact
PO4974	Mr M Seddon				Object	ADD04 a: Green Belt b: building in front of a historic building c: the roads are not suitable	<ul style="list-style-type: none"> • See response to Petition regarding loss of Green Belt and Exceptional Circumstances • See response to Petition regarding Heritage impact • See response to Petition regarding highways.

PO6727	Mr Kevin Reynolds				Object	Just to give my view and concerns on any developments on the former Garden Centre site, the field adjacent to Knypersley Hall and to the south of Conway Road I myself and many others in the area are opposed to future housing in view of taking away the countryside in this area of which will effect wildlife and the natural habitat of many animals and birds. Also the effect of increased traffic in the area regarding Conway Road and Harlech Drive of which Conway Road has now become a rat run for people trying to avoid the traffic lights at Knypersley corner and the extra dangers that will occur for the pupils that attend Biddulph High School that will obviously increase.	<ul style="list-style-type: none"> • See response to Petition regarding site design / visual impact / buffer around Knypersley Hall • See response to Petition regarding Ecology • See response to Petition regarding highways.
PO7213	Mr & Mrs B Lowndes				Object	We object to the proposals to permit possible development of this site (ADD04), around Harlech Drive/Conway Road, with housing and, potentially, a school. 1) Physical Geography of Site Parts of the site are simply unsuitable for housing development. They may be appropriate for a cheese-rolling contest should Staffordshire want to set up in competition with Cooper’s Hill in Gloucestershire. The residents could need a ski-lift to reach the top of the site and 4wheel drive vehicles for driving home. Seriously, not good for a housing estate. 2) Traffic Problems There is no suitable vehicular access to the site short of driving across the cricket pitch and creating some rough for the spinners to exploit – a silly idea. Harlech Drive and the track leading off are totally inadequate to cope with the extra volume generated by building work and, then, residential and school traffic. The increase would make our roads less safe. 3) Green Belt Development Our Victorian forefathers, as cities, including the Potteries, expanded rapidly following the Industrial Revolution, well understood the importance of open spaces to our health and well-being. Hence the legacy of parks, gardens and recreational areas. This continued in the post-war rebuilding era, when the Town & Country Planning Act 1947 allowed the creation of Green Belt areas, a work already commenced by Greater London in the 1930s. Green Belt land never was, and still is not, meant to be built on, such development would not be demonstrating good stewardship.. Indeed, it is incumbent upon authorities to encourage opportunities for access, sport and recreation, to retain and enhance landscapes and biodiversity. To close, another quote from the Planning Practice Guidance website of the Department for Communities & Local Government – “essential characteristics of Green Belts are their openness and permanence” (my italics) Staffordshire Moorlands is an, often, unsung gem in the English landscape. Please look after it, not spoil it for future generations.	<ul style="list-style-type: none"> • See response to Petition regarding Landscape Impact. • See response to Petition regarding highways. • See response to Petition regarding loss of Green Belt and Exceptional Circumstances.

Question 19 – Do you have any comments on the proposed housing allocation ADD04 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO7256 PO7259	Mrs A M Latham Mr & Mrs G A Bond				Object	(Summary) Object to development of the site as it is: Contrary to Green Belt Policy in the NPPF; Contrary to the recommendations of the Green Belt Review study; Inadequate access to site, unacceptable increased levels of traffic generation, new school would impact on the quality of life of neighbouring residents. Significant harm to Knypersley's sense of place. Contrary to Historic Environment Character Assessment Report. Detrimental impact on landscape and wildlife.	<ul style="list-style-type: none"> • See response to Petition regarding loss of Green Belt and Exceptional Circumstances • See response to Petition regarding highways. • See response to Petition regarding residential amenity e.g. noise from school, parking problems • See response to Petition regarding Heritage impact • See response to Petition regarding Landscape Impact • See response to Petition regarding Ecology
PO9045	Mr and Mrs Siddorn		G. Willard		Object	Object to the inclusion of this site.	Comment noted.
PO9033	The Hart Family		Rob Duncan		Object	This site is identified within the Local Authority's Strategic Housing Land Availability Assessment as being: "Unsuitable for development, relatively isolated from built dev and historical interest (former parkland to Knypersley Hall)" The Local Authority's Green Belt Review identifies that the site as a whole, including all the surrounding land to the south, west and east which was also assessed, has a moderate overall impact insofar as the purposes of the Green Belt are concerned, and that it is a significant parcel of land that cannot be readily subdivided because of an absence of clear internal boundaries. It goes on to comment that the site is well contained physically, although such conclusions are not directly relevant to this particular site, which has limited defensible boundaries. Those conclusions relate to the wider parcel of land. The Review suggests that comprehensive master planning of the site incorporating the retention of existing open space and sports pitches, could yield a development which would help to reinforce wider Green Belt function. Those conclusions however relate to the much wider parcel of land which is enclosed by Mill Hayes Road and the Congleton Road. Site ADD04 by comparison is a much smaller parcel of land with poor enclosure and will appear as a strident, incongruous incursion into the Green Belt. The development of the site will furthermore relate badly to the existing settlement morphology, appearing as a southerly projection into an otherwise open and undeveloped area, with no housing to the east, west or south. The conclusions from the Green Belt Review are therefore not considered to be directly applicable to site ADD04 and I would suggest that on settlement morphology grounds alone it should not be a preferred option for housing within the Submission Version of the Site Allocations DPD. In terms of highway safety, the Local Highway Authority identifies that an access through onto the A527 would be preferred. However, site ADD04 does not include sufficient land to take a vehicular access onto the A527, and there is furthermore a large portion of public open space located between the two. As such an access would need to be taken off Harlech Drive, which is less favourable. As with site ADD03, the site is in multiple ownerships. Responses are still awaited from registered landowners and as such its availability for housing is not	<ul style="list-style-type: none"> • The relevant SHLAA record, BD131, covers a much larger area than ADD04 and does not support development of this larger area with the main reason being constraints from existing uses in the area, particularly the sports clubs. The SHLAA will be updated to reflect this smaller area and also the fact that since the record was written, recent evidence has emerged regarding landscape and heritage constraints. The Council must balance this evidence against all the other evidence relating to this site and reach a decision on whether or not to include it as a development site in the Local Plan. • See response to Petition regarding loss of Green Belt and Exceptional Circumstances • See response to Petition regarding Landscape Impact • See response to Petition regarding highways. • The owners of ADD04 have confirmed to the Council that the land is available for development. • See response to Petition regarding Heritage impact • The Local Plan production process, by its very nature, involves several stages of consultation at which point anyone can suggest further sites for inclusion in the plan and the Council decides on whether they are appropriate. This site was suggested as part of the site options consultation.

Question 19 – Do you have any comments on the proposed housing allocation BD016 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO2589	Consultation Service	Natural England			General comment	Natural England notes the proposed preferred site for allocation in Biddulph. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.	The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.

PO4602	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Support	BD016 – already approved? recommended for inclusion.	Comment noted. There is no recent planning history on this site at the time of writing.
PO7579	Mr Peter Turner				Support	These sites offer far more appropriate development opportunities, away from the water treatment works and meeting highways requirements	Comment noted.
PO10052	Mr Philip Sutton				Support	Support development here, it would balance out the town and access from these sites is easily achievable. They are within walking distance of the town centre.	Comment noted.
PO9834	Mrs. Margaret Biddle				Support	Support development of this site. Residents are more likely to use the facilities of the town if they live within walking distance and commuters to the Potteries will be able to access their places of work without travelling through the town centre.	Comment noted.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO1310	Mr Andrew Leyssens	United Utilities Water Limited			General comment	<p>(Summary) We wish to emphasise the need to carefully consider the allocation of new housing sites in close proximity to our wastewater treatment works. In this regard we note that our wastewater treatment works (WwTW) in your local authority include: Biddulph WwTW; Biddulph Park WwTW; and Flash WwTW. We wish to highlight that a wastewater treatment works can result in emissions which include odour and noise. Therefore if you are considering any sites for new allocations, especially housing allocations, near to a wastewater treatment works, you should carefully consider the sites with your Environmental Health colleagues. This is important when comparing sites close to treatment works with potential alternative sites that may be available to you for allocation. This reflects our earlier correspondence to you. The position of United Utilities is that when considering a range of sites to meet housing needs, it would be more appropriate to identify new housing sites, which are sensitive receptors, that are not close to a wastewater treatment works. We note this point is particularly relevant to your assessment of sites considered for allocation in Biddulph as part of the current Preferred Options Sites and Boundaries consultation. In particular, site references BDO68, BDO62 and BDO87, which are sited in close proximity to Biddulph Wastewater Treatment Works. Notwithstanding this preference, if it is still intended to progress with the allocation of sites near to a wastewater treatment works for housing following discussions with your Environmental Health colleagues, we strongly recommend that your decision should be informed by: 1. an odour impact assessment; and 2. a noise assessment. If after having undertaken these assessments you still allocate land near to the wastewater treatment works for housing, we recommend that there should be detailed associated policy which identifies the need for mitigating measures including any that may be identified as a result of the assessments. We recommend that: 3. careful masterplanning is always prudent in order to mitigate the risk of odour and noise nuisance. For example, any on-site open space should be located so as to act as a buffer between the treatment works and any newly introduced housing. In addition the houses could be orientated so to most appropriately manage the impact of noise; and 4. appropriate soft landscaping is included to strengthen the buffer between the treatment works and the proposed new development.</p>	<p>Comments noted.</p> <p>An Odour Assessment has been produced by the land owner. Since these comments were sent to the Council, United Utilities has agreed that the issue of odour has been effectively addressed in the land owner's odour report. "Further to recent correspondence, United Utilities does not require any further odour impact work subject to the inclusion of the buffer you have proposed in your email of 5 December 2016 and the inclusion of appropriate landscaping boundary treatments."</p> <p>The developer considered that no noise report was necessary.</p> <p>It is now up to the Council to balance the planning issues in determining whether to select this site for development in the Local Plan.</p> <p>Detailed associated policy for the site will be included in the Local Plan if it is selected and it is acknowledged that careful master planning of the site will be required including appropriate screening /buffering.</p>

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO2595	Consultation Service	Natural England			General comment	Natural England notes the proposed preferred site for allocation in Biddulph. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.	<ul style="list-style-type: none"> The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.
PO974 PO577	Mr Peter Turner Miss Louise Richardson				Object	Neither the distributor road (Mow Lane) nor the feeder roads (Essex Drive and York Close) meet the minimum standards for the SCC Highways Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane which cannot be avoided as there is no alternative access to this site. Mow Lane is a dangerous road with no footpath. There is no scope for the required improvements. The feeder road (Essex Drive) is far below the minimum design standard for radii of access road bends – 7.5m and 7.8m sequentially (Standard = 10m) The feeder roads (Essex Drive and York Close) are both below the minimum design standards for width - 4.9m and 4.7m respectively (Standard = 5m) The distributor road (Mow Lane) is significantly below minimum design guidelines with a minimum measured width of 4.25m (Standard = 6.7m). Access to Essex Drive off Mow Lane is restricted from both directions by bridges with a maximum width of 5.15m, below the design guide standard of 6.7m. The junction of Mow Lane with Congleton Road is significantly below required standards for vision splay (south) – measured at 23m. The junction spacings and convergence at Congleton Road are far below highways design guidelines. (Standard = 40m opposite and 80m adjacent.) (Mow Lane and Halls Road are 0m adjacent and Smithy Lane opposite is 18m). Fire tender access to within 45m of the most distal aspect of the development cannot be guaranteed due to narrow roads and regular on-street parking. Its inclusion contradicts SMDC LDF Core Strategy Policy T1 “ Ensuring that all new development is located where the highway network can satisfactorily accommodate traffic generated by the development or can be improved as part of the development.” Serious Highways incidents are common place at the junction of Mow Lane, Congleton Road, Smithy Lane and Halls Road. Recent accident at 4.30am (outside of high risk high flow traffic times) on 20/5/16 relating to the Mow Lane junction with Congleton Road resulted in lane closures, traffic restrictions and spillage intervention by the fire authority.	<ul style="list-style-type: none"> The Highway Authority has no difficulties with this development from their point of view. Cumulative impact of several developments in this area would be assessed through a Transport Assessment.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO577	Miss Louise Richardson				Object	<p>This site will deliver too few homes to add a measurable contribution to the Community Infrastructure Levy (CIL), it will not bring any direct benefit to the community of Gillow Heath. Its inclusion contradicts the SMDC LDF Core Strategy Biddulph Area Strategy where new housing allocation is prioritised on urban extension land to the west of the bypass and where developments help secure infrastructure improvements for the benefit of the newly developed part of the town. Improvement works to the adjoining, and only, United Utilities waste water and sewage treatment works requires massive CIL contribution, which is only possible from a large-scale development elsewhere. Improvements to feeder and distributor road accesses are not possible due to the relatively small scale nature of the development. The site shares a boundary with the only sewage works in Biddulph which is already working over its' designed capacity population of 17,000 people (2011 Biddulph census 19,892). Local residents on Essex Drive and Marsh Green Road already experience unacceptable amenity impacts in their homes such as noise, odour and raw sewage flooding. In periods of heavy rain, raw sewage floods the system, backfills and pollutes the Biddulph Brook. Building houses on this site even closer to the sewage works will increase these unacceptable impacts, leading to an increase in statutory nuisance incidents. It contradicts SMDC LDF Core Strategy SD Policy 4 where the Council states that it will refuse schemes which are pollution-sensitive adjacent to polluting developments. 1. "The Council will ensure that the effects of pollution (air, land, noise, water, light) are avoided or mitigated by refusing schemes which are deemed to be (individually or cumulatively) environmentally unacceptable and by avoiding unacceptable amenity impacts by refusing schemes which are pollution-sensitive adjacent to polluting developments, or polluting schemes adjacent to pollution sensitive areas, in accordance with national guidance." SMDC LDF Core Strategy SD Policy 4 2. During periods of heavy rainfall, the sewerage system cannot cope and the site experiences an overflow of raw sewerage from the man-hole covers which then runs directly into the Biddulph Brook (evidenced with sanitary products distributed around the sewerage treatment facility pipes at the end of Essex Drive). 3. This happens on a regular basis, with the latest occurrences being in November 2015 and March 2016, when both United Utilities and the Environment Agency were forced to clear the pollution. 4. Residents in Gillow Heath (York Close, Essex Drive, Long Valley Road, Marsh Green Road) are repeatedly contacting United Utilities to deal with cases of noise, odour and raw sewage pollution. Houses should not be built even closer than these. It contradicts the following SMDC LDF Core Strategy statement: "The NPPF directs Councils to proactively provide needed economic development - however decisions should ensure that new development is "appropriate for its location" in pollution/contamination terms; and more generally development should contribute to securing good standards of amenity and reducing pollution." SMDC LDF Core Strategy. Section 8.2.11</p>	<ul style="list-style-type: none"> • New housing development would make a contribution towards Biddulph's housing needs. • No contradiction with SMDC Core Strategy Policy SS5b 'Biddulph Area Strategy'. Sites within the urban area and an extension to the urban area are included as well as extensions in the Green Belt identified as part of the Green Belt Review as stated in the policy. • United Utilities has a statutory duty to provide capacity for new development so this is not a valid reason for development not to come forward in Biddulph. United Utilities considers that there is no need to expand the treatment works in the development plan period for the growth identified in the development plan. • Current issues experienced by residents in regard to raw sewage flooding are a separate matter to be investigated by United Utilities. • An odour assessment has been undertaken which demonstrates that the site could be developed without adverse impact on future residents. The developer considered that no noise report was necessary. • The Council's Phase 1 Habitat consultants consider the site habitats to be of nature conservation value at district level and have the potential to support bats and reptiles, which could allow the consideration of the site as an SBI or BAS. Further survey work would need to take place prior to any development to establish Site of Biological Importance (SBI) / Biodiversity Alert Site (BAS). Prior to any development an assessment would be required of the 2 trees for their potential to support roosting bats and a reptile survey. • A Green Infrastructure Strategy for the Staffordshire Moorlands has been produced by the Council with assistance from partners such as the Staffordshire Wildlife Trust and will be published alongside the next Preferred Options consultation.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>6. The current capacity of the United Utilities sewage treatment works is reported to be serving up to 17,000 residents. The population of Biddulph as at 2011 census was 19,892 residents. An increase of 885 houses (approx. 3,000 people) will obviously require investment in this facility. This will not be facilitated by the inclusion of numerous small development sites, but rather fewer larger sites which are able to effectively utilise the CIL. The SMDC Local Plan Phase 1 Habitat Survey concluded "... the site is not recommended for potential development ...". It is the ONLY site surveyed where this was concluded, showing that other sites are more suitable. The site contains UK and Staffordshire Biodiversity Action Plan Priority Habitats and species and has the potential to be a Species Rich Farmland site. It is very well connected to other biodiverse habitats (evidenced in the Phase 1 Habitat survey). In the absence of a SMDC Green Infrastructure Strategy, the findings of this survey must be heeded. Development would contradict Section 40 of the Natural Environment and Rural Communities Act 2006, and Policy C3, NE1 and section 8.7.17 of the SMDC LDF Core Strategy. This site is important because of its mix of habitats, particular species found and its vital wildlife corridor linkages (where the Biddulph Brook meets the Biddulph Valley Way). The SMDC Green Infrastructure Strategy, which was supposed to guide decision making about the environment and its linkages across the Local Plan area does not exist. In the absence of such strategic data, the Phase 1 Habitat Survey findings must be prioritised and used to guide decision making. "The Green Infrastructure Strategy will inform the production of the Site Allocations Development Plan Document and will establish appropriate objectives and targets." SMDC LDF Core Strategy section C3 Green Infrastructure 8.7.17 Its inclusion contradicts Section 40 of the Natural Environment and Rural Communities Act 2006 which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity. Its inclusion contradicts SMDC LDF Core Strategy Policy C3 Sustainable Communities where existing and potential sites of nature conservation value are linked, biodiversity is increased and the urban fringe is enhanced. Its inclusion contradicts SMDC LDF Core Strategy Policy NE1 Natural Environments and the protection of land suitable for inclusion in the Biodiversity Opportunity Mapping Species-Rich farmland zone. The land has the potential to be designated as a Species Rich Farmland site. The site contains UK and Staffordshire Biodiversity Action Plan Priority Habitats and species (evidenced in the Habitat survey). Bats and badgers are active on site (local knowledge) and English Bluebells (indicating ancient hedgerows) and marsh Orchids uncommon to Staffordshire have been found on site (Phase 1 Habitat Survey findings). The site has potential to be designated as a Local Wildlife Site once more detailed survey information is gathered and time should be allowed for this to take place before it could be considered for release from the greenbelt or as a potential housing site. The site displays some semi-natural characteristics and is within the</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>Species Rich Farmland Ecosystem Action Plan Area , where priority habitats and species include Hedgerows, as well as several priority bird and mammal species present on site. The primary objectives within this zone are the maintenance, restoration and expansion of species-rich grassland and to increase the connectivity of semi-natural habitats. The Phase 1 Habitat Survey stated that the site is “ ... very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water which accentuates the value of the site.” This site is a vital wildlife corridor, linking linear habitats from two sides of the valley via the Biddulph Brook and Biddulph Valley Way. It is bounded by two ancient hedgerows to the west and east, and contains a swathe of broadleaved woodland with possible veteran trees. Halls Road playing Field leads out onto Mow Lane. The increased traffic generated by more housing here will add to the danger already there (no footpaths, bad corner, blind spots, etc.) There's football facilities and a new childrens play area here and access from the fields are pedestrian only. Not safe!</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO756	Mr Paul Malkin				Object	<p>Save Biddulph's Green Belt - Firstly I would again like to comment that the Councils marketing of this consultation has been extremely poor, it has been left to residents associations and concerned residents to spread the bad news in their community. As council tax notices were sent to all residents a few weeks prior to the consultation starting then I would have expected the promotion of an important issue like this to have been included in that delivery. I feel SMDC have missed a real opportunity to work in partnership with neighbouring authorities to produce a North Staffordshire plan that could deliver the required housing whilst protecting green belt and identifying brownfield sites to continue to regenerate the area. When I asked if this had been considered at the Biddulph consultation meeting the council officer advised me that this had not been considered as "nobody wants to live in Stoke". I find this attitude from a council officer pretty appalling and if this is the attitude of the planning team then no wonder an innovative partnership approach had not been considered. Stoke have been successfully regenerating and redeveloping brownfield sites in the area for many years and I believe SMDC could learn a lot from their approach. In addition Stoke and Newcastle are where the job opportunities are being created and many residents of Staffordshire Moorlands will travel there for work and leisure and probably would want to live in these areas. The proposed sites for development are not only in green belt areas, but also along the boundaries of existing residents. The sites are going to have a detrimental impact on current council tax payers of the district who purchased properties at an inflated rate due to overlooking beautiful open fields. These residents are not only going to lose their beautiful views but also thousands of pounds from the value of their homes. I propose a number of sites that will have a minimal impact on the green belt and current residents. The Mills in Station Road and Walley Street are in desperate need of repair or regeneration. These could either be developed into apartments for young first time buyers or older persons or demolished and new properties built. This accommodation is far better situated close to the town centre and will keep the area more in keeping of the newer properties around them. There is also old brownfield land available either side of Congleton Road in Knypersley, the former Victoria Colliery site and the land behind Bemersley recycling centre off Childerplay Road. All of these sites have much better access to the main roads than the proposed sites that are all reliant on single track country lanes. What is required locally is housing to meet the needs of local people, there are key issues to address, young people can not get onto the housing ladder and have to resort to renting that can cost more than mortgage payments and there is an ageing population that require housing to meet their needs. What I would expect the planning department to complete before any development plans are signed off is a thorough research project to identify what is actually required locally, what is affordable to the local community and what the mix of starter homes, shared ownership and social rent homes should be. The Housing and Planning Bill has recently</p>	<ul style="list-style-type: none"> • The consultation was widely publicised and included a flyer being sent to all households and businesses in the District through Royal Mail. High levels of responses have been received by the Council from Biddulph residents which suggests that a significant number of residents knew about the consultation. • National planning guidance states that the Council should seek to meet the development needs of their area. Stoke and Newcastle Councils have their own development needs to meet. • Property values are not considered material in planning law. • See response to PO4635 regarding the Green Belt Review. • Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph (particularly Yarn Mill and Minster Mill) would be appropriate for residential development. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping brownfield sites. • Sites at Victoria Colliery and Childerplay Road are within the Green Belt like BD062. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy. • It is agreed that affordable housing is needed locally. Site BD062 will be required to provide a percentage of affordable housing / starter homes so will contribute to this need. • See response to PO974 regarding highways. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • Education - The District Council is working with the County Council on the issue of school capacity. The County has determined that additional school provision would be required to support housing growth at the Primary phase of education. At this early stage in the site selection process there are a number of options for delivering school capacity dependant on the sites selected to take forward.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>been passed and this includes the development of starter homes for first time buyers as part of the affordable housing requirement. These homes can be for sale up to £250,000 outside of London. Local salaries of young first time buyers would not make these affordable, SMDC must ensure that affordable homes to purchase are for sale at a price that local people can afford. The type of houses that are required should also be researched, surely the requirement is for smaller affordable homes, 1 bed apartments for singles and couples and older people to downsize to and then 2 and 3 bed homes for young families. I also made a freedom of information request to the district council with regard to the recent development at Uplands Mill in Biddulph asking for the breakdown of owner occupation, shared ownership and social housing and how many nominations had been made for local people to the social landlord, unfortunately this has not been provided in time for me to include this within this response. The reason I made this request was to be able to identify if there was a need for social housing in Biddulph or if the housing association had to widen its search for tenants to the north west, which I believe to be the case. In addition to the above, the below comments are why I feel the proposed sites should be reconsidered. Highway - too narrow, single vehicle for most of Marsh Green Road and Well Lane. At the junction with Congleton Road the carriage way is raised in both directions making it extremely difficult to see fast moving traffic coming either way. Congleton Road to Stoke gets congested and backs up at Knypersley lights and Chell roundabout, this will get worse with other developments so residents will naturally take the lanes towards Gillow Heath and up to Mow Cop and Harrishead. These lanes are single tracks with blind bends, where the road widens in Gillow Heath parked cars make it difficult to pass and the bus currently has problems getting through. Pedestrians use this lane with no pavement going to cycle track and children going to school and numerous properties in Marsh Green Road lead directly onto road, any increased traffic will make these roads dangerous and put users of them more at risk. Construction traffic will also find these areas increasingly difficult to navigate. Environment - after heavy rainfall there is often smells from the sewerage plant and it is known to overflow into the stream. Following heavy rain Marsh Green Road is like a river for many hours with water flowing from the fields, should this water be caught in the drainage system the sewage works will be constantly overflowing. The sewerage works is already servicing more properties than it is designed to. Schools - as there are currently not enough first school places for children that live in the area, I assume the schools will be built first before any housing development. As a new first school is to be built has a review taken place to ensure that there will be places at the local middle and high schools to accommodate these additional children, or are class sizes going to increase resulting in a drop in educational standards?</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO1333	Ms K Dewey	Staffordshire Wildlife Trust			Object	Site BD062 contains potentially high value areas of habitat and needs to be assessed against the current Staffordshire Local Wildlife Site criteria. The site also would have a 'stepping stone' role as it is adjacent to the Biddulph Brook corridor, a key green corridor through the urban areas of Biddulph that links to the wider countryside. The Extended Phase 1 Habitat Survey (site FID 122) reports that: 'The site is very well connected to other biodiverse habitats through hedgerows, scrub, broadleaved woodland and running water, which accentuates the value of the site. The site itself consists of a potentially biodiverse woodland/ scrub habitat mosaic. The importance of this site is notable as it contains a range of habitat structures of different heights.' Flora species recorded included tufted hair grass, soft rush, ribwort plantain and orchid species (unidentified due to season), which indicate that parts of the site have botanical interest. In addition The Extended Phase 1 Habitat Report dated 27th June 2014 by Leigh Ecology Ltd on behalf of Seabridge Developments (available publically as part of a submitted planning application) found a small marshy area on the site which contained 'yellow flag iris <i>Iris pseudacorus</i> , and sedge species and two orchid species, common spotted orchid <i>Dactylorhiza fuchsia</i> and southern marsh orchid <i>Dactylorhiza praetermissa</i> .' Dogwood <i>Cornus sanguinea</i> is present on the site, and if not planted, is unusual to find, indicating semi-natural habitat. Several bird species were recorded, including priority species Dunnock and Sparrow. We also support the comments made by Mrs Angie Turner BSc MSc on this site.	Lockwood Hall Associates consider the site habitats to be of nature conservation value at district level and have the potential to support bats and reptiles, which could allow the consideration of the site as an SBI or BAS. The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status: <ul style="list-style-type: none"> • Assessment of the 2 trees for their potential to support roosting bats. • Reptile survey required.
PO1319	Mrs B Ratcliffe				Object	I am writing about the potential development site BD062. This site is very close to the sewage works and is already several thousand over its capacity. There are photos of raw sewage flooding the site and into the brook. I have lived here since 1970 and have over the years seen a variety of wildlife and plants of which some are very rare. On a safety aspect there is no access to the site other than York Close. Mow land is very narrow and unsuitable for heavy traffic and pedestrians occur often. York Close itself is very narrow especially on the 2 steep bends. The land has no suitable safe access. It is a small piece of land rich in wild life and plants that in it should be very important to all of us and it is vital that we sustain all of these things.	<ul style="list-style-type: none"> • See response to PO577 regarding existing raw sewage flooding, capacity of sewage works and ecology. • See response to PO974 regarding highways.
PO10280	Clr Chris Wood				Object	Sites such as BD062 and BD068 are completely unacceptable because the authority has a duty of care to ensure smell from sewerage works do not cause issues for housing within the proximity of the sewerage works and the site in Biddulph does emit odour which is both distasteful and unpleasant.	<ul style="list-style-type: none"> • See response to PO577 regarding existing raw sewage flooding, capacity of sewage works and ecology.
PO953	Mr Alistair McLoughlin				Object	New houses should only be built where there is minimal environmental impact. Houses should not be built in such proximity works to a sewage works.	<ul style="list-style-type: none"> • See response to PO577 regarding noise and odour in relation to the sewage works.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO1107	Ann Wright				Object	What type of provisions would be provided for the stream and river management for the houses in Akesmore Lane? Also the water treatment facility as this is at capacity NOW. The proposed plots BD062 and BD068 would stop the treatment plant from being enlarged and at the moment the odours from the present plant are terrible as you walk along the track or Long Valley Road.	<ul style="list-style-type: none"> See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works.
PO2704	Mr Martin Ross	Environment Agency			Object	2 sites in Biddulph are adjacent to the same watercourse. There is a floodplain extent on the western boundary but this is poorly defined at present. A level 2 assessment will be required for these.	<ul style="list-style-type: none"> The site boundary can be amended to exclude land within Flood Zone 2 at the request of the landowner, who does not own this land and is not promoting it for development. This approach has been agreed with the Environment Agency since their response to the consultation so a Level 2 Flood Risk Assessment is no longer required for the site.
PO4642	Mrs Alys Gregory				Object	I believe BD062 is totally unsuitable for building on, it is directly opposite sewage works, it is a marshy area that becomes water logged. Building on it does not contradict the SMDC LDF Care Strategy Policy. The council says it will refuse schemes of pollution and sensitive areas which are adjacent to the polluting developments. This site is a natural habitat and has been for more than 50 years, there is no feasible access to this land, and there are no jobs in the area. The lanes in Gillow Heath are very narrow and barely cope with the existing traffic, sewerage work is already over capacity, I am therefore saying no to this site.	<ul style="list-style-type: none"> See response to PO577 regarding noise, odour and capacity of sewage works and ecology. The part of the site within Flood Zone 2 has now been removed from the allocation. New employment areas are also proposed for Biddulph in the draft Local Plan. See response to PO974 regarding highways.
PO4635	Mrs Wendy Boothroyd				Object	I do not think these areas are suitable for housing for the following reasons: Access Marshgreen Road is a narrow road in some places less than 10feet. With steep banks and in one part it is single track with a very sharp blind bend leading to a narrow bridge which crosses the cycle tracks. An increase in traffic would be very hazardous to people walking the tracks. Also this round is not suitable for heavy vehicles. There is no street lighting which makes it very dangerous for the children walking to school. Landscape The land between Portland Drive there is a deep gully which was once a water course. This has been culverted but when it rains heavily it still floods. Local knowledge is that the land in this area is unstable due to shifting sand which would make it unsuitable for housing. Flood Plain The land adjacent to Biddulph Brook, and again particularly the level of the Brook rises causes flooding issues. When I moved here my insurer could not transfer my insurance because the post code flagged up as a flood risk area. Housing being built nearer the Brook could possibly find themselves un insurable as company's now ask if your 100 meters of a water course, Sewage Works The sewage works is screened by trees for part of the year, but during the Winter Months is quite visible. Housing in this area would have a clear view if the metal structure, and quite often when work is being carried out large floodlights are used. Also the noise when the pumps are going is obtrusive in Portland Drive, also the smell on occasion is very offensive so property nearer would even more inconveniences which could become an environment issue. A spokesperson for United Utilities made the	<ul style="list-style-type: none"> See response to PO974 regarding highways. See response to PO4642 regarding flooding. See response to PO577 regarding noise and odour and existing raw sewage flooding. Screening would be required as part of any new development. United Utilities have responded to this consultation raising these issues and a Council response to this can be found on page 1 of this table. In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site BD062 for release from the Green Belt. See response to PO756 regarding Education and Victoria Colliery and Childerplay as alternative locations for development. Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

						<p>following statement by letter dated 26 th May 2016: We have identified the need for the local planning authority to discuss any new housing near to the waste water treatment works with their Environment Health colleagues, and give the sites very careful consideration when comparing these sites with potential alternative sites that may be available to them. Our position is that when considering a range of sites to meet the housing of the borough, it would be more appropriate to identify new housing sites that are not close to a waste water treatment works. Green Belt The government have emphasised the importance of Green Belt in preserving communities in their areas. These sites form a natural barrier with Gillow Heath and if these sites plus others were developed semi-rural areas would be engulfed and densely populated suburb without Green spaces will be formed. Infrastructure Development on this site would fall into the catchment area for Woodhouse Middle School, and Oxhay School, both schools are always well subscribed and therefore maybe unable to cope with a large intake. Also the junction on Marsh Green Road/Congleton Road has very poor visibility and increase in traffic would make the junction more hazardous and dangerous. Amenity The properties adjacent to the Green Belt in Portland Drive are all single story dwellings, and regulations state that new development should be in keeping with these properties. If this is the case then development on this land could only consist of single storey dwelling's as loss of light and privacy would be an issue to existing properties. Additional Sites As Brownfield sites are supposed to be the preferred option, there is a large area of the properly restored former Victoria Colliery on Brown Lees Road. Also there is a large area of land east of the main road on Childerplay Lane. These two sites could hold the entire Biddulph allocation with very little impact on existing residents with ready access to main road and bus services.</p>	<p>comment on the content of that application.</p>
PO4989	Mr C Kisicki				Object	<p>This site has been open land and a wildlife haven for many years and provides a public access to Biddulph Valley Way. Its proximity to the already overloaded sewage works renders it unsuitable for any further development in this location. The roads around Gillow Heath are very narrow and can't cope with any major developments as it is very unlikely that Mow Lane will be very much improved and widened, especially at the very narrow Congleton Road end. Reclaimed Brown Field land of the former Victoria colliery site should be looked at first rather than the building on Akesmore Lane which is green living for the people of Biddulph and the surrounding landscapes add to the attractiveness of the Town. The former colliery spoil heap site may technically be regarded as Green Belt land but if possible should be developed for housing.</p>	<ul style="list-style-type: none"> • See response to PO577 regarding ecology and capacity of sewage works. • If this site were to be developed, the developer would be required to maintain a public access on to the Biddulph Valley Way. • See response to PO974 regarding highways. • See response to PO756 regarding Victoria Colliery as an alternative location for development.
PO4992	Mr W H Lunt				Object	<p>No elected person should allow houses to be built in BD062 so close to a sewage works that smell continuously and is very noisy that this is not the fault of United Utilities because as we all know muck stinks and this must prove to be a health hazard of which no one should be faced with. I think that this site should be included as visual or public open space. Photo (see attached) shows traffic on York Close leading to the site.</p>	<ul style="list-style-type: none"> • See response to PO577 regarding sewage works noise and odour. • The site is not recommended for designation as Local Green Space in the Landscape, Local Green Space and Heritage Impact Study (2016). Local Green Space supersedes the Visual

							<p>Open Space designation (which is an old designation not supported by Government policy in the NPPF).</p> <ul style="list-style-type: none"> • See response to PO974 regarding highways.
PO4985	Mrs Claire Meadowcroft				Object	<p>(Summary) Object to the development of this site for the following reasons: Close proximity of the sewerage works which already causes noise and odour (almost on a daily basis) and raw sewage flooding in York Drive, Essex Close, Long Valley Road, + Marsh Green Road. The SMDC local plan phase 1 habitat survey stated that this site is NOT RECOMMENDED for potential development – it is the only site surveyed where this was concluded; Loss of Green Belt - no exceptional circumstances; This site is extremely wet for the majority of the year which indicates presence of a wet meadow; People who live in Gillow Heath because of its surrounding Green Belt areas. Building on this land will discourage people from living here and make the area less attractive to residents; There are other areas within Biddulph which are more suitable to build on where access will not be a problem, Mow Lane, Essex Drive and York Close do not meet the minimum standards for the SCC Highways design guide policy. The roads are too narrow and the road bends are too small. There is no footpath on Mow Lane which means it is already very dangerous. There is no scope for the required improvements. The site will deliver too few homes to add a measurable contribution to the community infrastructure and will not benefit Gillow Heath. This land is used by the local community and there has been a total open access since the estate was built. This land should be designated as visual open space, protecting the ecology and allowing the wet meadow to do its natural job of reducing flooding and water course by slowing the runoff. Three public rights of way cross this land. I think this site should be included as visual or public open space within Biddulph.</p>	<ul style="list-style-type: none"> • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO577 regarding ecology. • If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt. • See response to PO4642 regarding flooding. • See response to PO974 regarding highways. • Site BD062 will be required to provide a percentage of affordable housing / starter homes to benefit those in the community needing affordable housing. • See response to PO4989 regarding maintenance of link through site to Biddulph Valley Way. • See response to PO4992 regarding allocating the site as Visual Open Space.
PO4991	Mr and Mrs B Carter				Object	<p>As a resident of York Close for over 35 years and I am well accustomed to the smell of raw sewage from the treatment works despite work being carried out to alleviate the problems. The site is already operating at 15% above the desired capacity – increasing this by 35% above would make it even more ineffective. The facility needs to be expanded to cope with the future growth and close to the land close to the site should be reserved for the purpose and this purpose only. Despite the efforts of the developer to raise the site to ground thereby destroying the natural wildlife habitat that has existed for well over 40 years (site ref: ? 122 phase 1 habitat survey) both natural flora and fauna would be given every opportunity to do so, bringing the site back into line with section 40 – Natural Environment and Rural Communities Act 2006 of the SMDC LDF Core Strategy.</p>	<ul style="list-style-type: none"> • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO577 regarding ecology.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4996	Ms Janet Lawton				Object	The sewage system is only reported to serve 17.000 residents, however looking the census for 2011 shows those 19.892 residents a further increase will put more pressure on an already unsuitable system. The site is currently protected by Green Belt; the site is a flood 2 zone. The presence of a wet meadow evidences the current high level of surface water run-off, this site experiences development close to the waste water and sewerage treatment works will result in raw sewage overflow close to the new development. Distributor Road and Mow Lane and feeder roads like Essex Drive and York Close are too narrow, the road bend radi are too small there is a 2 pinch points over bridges on Mow Lane, which cannot be avoided. There is no foot path on Mow Lane which means there will be an increase in traffic will increase the danger to pedestrians access my fire engines to most distal aspect of the proposed development would not be guaranteed due to narrow roads and on street parking, vehicles would not access the development safely when delivering building goods. The roads were not built to consistently withstand HGVS or the increase in traffic. For over 40 years there has been total open access and the land used recreationally by local residents. During 1970's and 1980's this land was used for grazing cattle. The site will deliver too few homes to add a measurement contribution to the community infrastructure it will not bring any benefit to Gillow Heath. Its inclusion contradicts the SMDC LDF core strategy Biddulph area strategy improvements to feeder and distributor roads are not possible due to the small scale nature of development.	<ul style="list-style-type: none"> • See response to PO577 regarding capacity of sewage works and existing raw sewage flooding. • See response to PO4635 regarding the Green Belt Review. • See response to PO2704 regarding Flood Zone 2. • See response to PO974 regarding highways. • The land is privately owned and has a footpath across it linking to Biddulph Valley Way. • See response to PO4985 regarding community benefit. • See response to PO577 regarding contradiction with Core Strategy Policy SS5b.
PO5056	Ms Philippa Swindells				Object	i do not support this site	Comment noted.
PO4994	Mrs Patricia M Lunt				Object	This site is rich in flora, bees, bats, birds, rabbits and foxes. The residents have laid a pathway to the Biddulph Valley Way which is used by hikers, cyclist, bird watchers, and the general public. Children climb the trees and enjoy learning about the nature on this Green Belt Land. Areas are mowed by residents to keep it safe and tidy. The sewage works smells dreadful in the summer very noisy at night. The trees are there to conceal the works, We have lived here for 44 years and we want this land to remain Green Belt in all its natural beauty.	<ul style="list-style-type: none"> • See response to PO577 regarding ecology. • See response to PO4989 regarding maintenance of link through site to Biddulph Valley Way. • See response to PO4996 regarding public access to the site • See response to PO577 regarding odour in connection with the sewage works. • Screening of the sewage works would be required as part of any development on the site.
PO4613	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Object	BD062 - Poor Access, sewerage works close by, smell and noise. Unsuitable for development, not recommended for inclusion.	<ul style="list-style-type: none"> • See response to PO974 regarding highways. • See response to PO577 regarding noise and odour in connection with the sewage works.

							<ul style="list-style-type: none"> • See response to PO4994 regarding site screening • See response to PO756 regarding use of derelict buildings in Biddulph.
PO4977 PO4976	Mr A Nixon Mrs G Hall				Object	Sewage Works – Odour is already present on Essex Drive and further afield, I can't imagine it being at all pleasant for residents if houses are built even closer to the sewage works. We frequently see lovely wildlife in Essex Drive including foxes, squirrels and rabbits. These and many more species are all supported by the surrounded Green Belt Land. Flooding has caused problems in the past in Essex Drive and our garden was once seriously flooded after heavy rainfall and Biddulph Brook rose to a very worrying high level. When the water eventually cleared from the garden we were still left with an awful knotweed problem. We genuinely don't believe the tiny contribution of building so few homes on site BD062 would be worth the consequences of doing so.	<ul style="list-style-type: none"> • See response to PO577 regarding odour issue and existing raw sewage flooding in respect of the sewage works. • See response to PO577 regarding ecology. • See response to PO4635 regarding the Green Belt Review. • See response to PO4985 regarding community benefit.
PO4898	Mrs K Hallam				Object	I support housing allocation/development on the site - no	Comment noted.
PO4993	Mrs D Stuttard				Object	I object to this proposed site due to it being Green Belt. Flood risk, my garden has been flooded twice over the past years. The roads are too narrow for emergency vehicles, the sewage works cannot take any more houses being built nearby. This site should remain in the Green Belt also for natural environmental habitat.	<ul style="list-style-type: none"> • See response to PO4635 regarding the Green Belt Review. • See response to PO577 regarding existing raw sewage flooding and capacity in respect of the sewage works. • See response to PO974 regarding highways. • See response to PO577 regarding ecology.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4990	Miss E Booth				Object	<p>This site shares a boundary with the only sewage works in Biddulph, which is already working above its desired capacity of 17000 people. We already experience unacceptable levels of noise and odours and raw sewage flooding the system during heavy rain. The local residents of Essex Drive and Marsh Green Road already experience unacceptable amenity impacts in their homes, such as noise odour, raw sewage and flooding, when the system back fills and pollutes Biddulph Brook and household drains. Building houses on this site even closer to the sewage works will increase these unacceptable impacts, leading to an increase in statutory nuisance incidents. It contradicts the SMDC LDF core strategy where the council had already states that it will refuse schemes which are pollution sensitive adjacent to polluting developments. Neither the distributor roads (Mow Lane) no feeder roads (Essex Drive and York Close) meet the minimum standards for the SCC Highway's Design guide policy. The roads bend radii are too small. There are 2 pinch points over bridges on Mow Lane which cannot be avoided as there is no alternative access to this site. Mow Lane very dangerous roads with no footpath on either side in parts. There is no scope for the required developments. This site is not recommended for development, it was the only site where this was concluded, showing that the other site were more suitable. The other site is important because of its mixed habitats, particular species found in its vital wildlife corridor linkages. This site is currently protected as Green Belt and is only suitable for release from the Green Belt and only in exceptional circumstances. Removing this site from the Green Belt prioritises development in the flood plain when other sites are available. The roads around the site meet the minimum standards for the SCC Highways design guide policy. The roads are too narrow and the road bend radii are too narrow. Mow Lane is a dangerous road with no footpath. For over 40 years the community have had an unfettered access to this site, and the land is used by local residents and children alike. The site will deliver too few homes to add a measurable contribution to the community infrastructure very, and will bring no direct benefit to Gillow Heath community.</p>	<ul style="list-style-type: none"> • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO974 regarding highways. • See response to PO577 regarding ecology. • See response to PO4635 regarding the Green Belt Review. • See response to PO4985 regarding exceptional circumstances for loss of GB. • See response to PO2704 regarding Flood Zone 2. • See response to PO4985 regarding community benefit.
PO4987	Mr S Booth				Object	<p>The site shares a boundary with the only sewage works in Biddulph and is already over its maximum capacity. The SMDC local plan phase 1 habitat survey concluded the site is not recommended for potential development. The site is currently protected as Green Belt and only considered suitable under exceptional circumstances. The local community have had a unfettered access to the site since the estate was built in 1971 and there are well used public rights of way across this land. This site will deliver too few homes to add any measurable contribution to the community of Gillow Heath.</p>	<ul style="list-style-type: none"> • See response to PO577 regarding capacity of sewage works. • See response to PO577 regarding ecology. • See response to PO4635 regarding the Green Belt Review. • See response to PO4985 regarding exceptional circumstances for loss of GB. • See response to PO4996 regarding public access to the site • See response to PO4989 regarding maintenance of link through site to Biddulph Valley Way. • See response to PO4985 regarding community benefit.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4986	Mrs L Carter				Object	It is the next to sewage works, which is already working over its designated capacity population. The development of the sewage works needs planning PRIORITY. There are already problems: Odours and raw sewage flooding. Biddulph Brook is polluted when the system backfills in periods of heavy rain. There is overflow from the man hole cover at the end of Essex Drive. The idea of building houses next to a sewage works contradicts SMDC LDF core strategy policy 4. The feed roads (York Close/Essex Drive) to the site are far too narrow I do not meet the minimum standards for SCC Highways design guide policy. The bends are too tight. The distributor road, Mow Lane, is also too tight. The distributor road, Mow Lane, is a country lane, dangerous + has no footpaths! There are 2 pinch points (over bridges) which cannot be avoided whichever way you drive to Essex Drive + York Close. The site is very wet and is a flood plain. Phase 1 habitat survey stated that the site was not recommended for development. If houses are built the water will be displaced and will cause more flooding's in Biddulph Brook and surrounding areas.	<ul style="list-style-type: none"> • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO974 regarding highways. • See response to PO2704 regarding Flood Zone 2. • See response to PO577 regarding ecology.
PO4982	Mr A Weston				Object	Mow Lane a dangerous road already too much traffic. This field is a haven for wildlife and has always been walked by local residents. Sewers – smell most of the weeks. Building site will not be beneficial to our community.	<ul style="list-style-type: none"> • See response to PO974 regarding highways. • See response to PO577 regarding ecology. • See response to PO577 regarding odour issue in relation to the sewage works. • See response to PO4985 regarding community benefit.
PO4983	Mrs G Weston				Object	Save our Green Belt. Mow Lane is already dangerous with no footpath.	<ul style="list-style-type: none"> • See response to PO4635 regarding the Green Belt Review. • See response to PO4985 regarding exceptional circumstances for loss of GB. • See response to PO974 regarding highways.
PO4995	Mr R Lawton				Object	The sewage works system works cannot cope as the site experiences an overflow of raw sewage, which runs into Biddulph Brook latest floods were Nov 15 and March 16. We experience noise and odour and raw sewage pollution. The sewage system is reported to be servicing 17000 residents. The 2011 census shows that 19892 residents with the proposed York Close/Essex Drive development and the Portland Drive/Marsh Green Road development this would add 135 properties and a 400 to 500 residents putting even more pressure on the already unsuitable sewage system. Mow Lane the access road to York Close /Essex Drive is a narrow country lane not suitable for HGVs; there are no pavements for pedestrians which is a danger. The possibility of a further 40 houses, which means possibly 140 vehicles needing to access Mow Lane will add more pressure to a an already narrow road, and cause more danger to pedestrians going down Mow Lane to narrow and when passing you sometimes have to stop as there is no room to pass safely. Exactly the same problems apply to Portland Drive/Marsh Green Road proposed developments, these roads cannot cope with the traffic we have now let alone a possible 270 plus cars using these unsuitable country lanes from the two proposed developments.	<ul style="list-style-type: none"> • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO974 regarding highways.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4997	Mr A Atkinson				Object	<p>Major concern for me is the traffic increase on Mow Lane this is an incident waiting to happen if the increase goes ahead some decision making councillor will be ultimately responsible for some innocent person's death. We have lived here at Essex Drive for 38 years and we had problems for the sewage works for all this time depending on the weather and the air conditions, to the point that during warm times all the windows and the doors had to be kept closed as the smell stung our throat. Also if one wanted to sell up it could have an effect whether a prospective buyer came on a stinky day. Also the access road is very narrow as most residents park in the street and park on the turning areas, Mow Lane is also a hazard so the increase in the traffic to the site would make it 40 times worse (that is only counting 1 car per household) There is no footpath on Mow Lane for school children and no way to step off Mow Lane to avoid the traffic when confronted with. The water table is high in this site so would increase the flow of rain water to the lower areas eventually flood the low lying land. We object to anymore housing in Gillow heath and the surrounding areas. My major area of concerns for the proposed dwelling at the end of York Close and Essex Drive, is the road infrastructure could not cope with any increase. Mow Lane is too narrow in parts and poor visibility along that stretch of the road i.e.: very sharp bends and there nipping points after the bridges and after the bridge, going westerly. Major concerns are and would be required at the junction with Congleton Road; it is hazardous to make a right turn there now. In the other direction the road has a severe nipping point at the bridge over the old railway line; visibility is also very poor here. From this bridge to Congleton Road there is little or no footpath. All schools are to the east of Congleton Road. I do not feel that the proposal does not supply a soak away to the surrounding area. As well as much used nature area.</p>	<ul style="list-style-type: none"> • See response to PO974 regarding highways. • See response to PO577 regarding odour and existing raw sewage flooding in respect of the sewage works. • See response to PO4989 regarding maintenance of link through site to Biddulph Valley Way. • See response to Po4996 regarding public access to the site.
PO6730	Miss Laura Simcock				Object	<p>I object to the proposed building here as it is ridiculously close to sewage works in this area, not only does it already give off foul smell already to houses on Long Valley Road but it would also be worse for new houses even closer, and therefore wrong to put more houses there. Furthermore, the sewage works is already struggling to cope with the amount of residents at present as it is known there is over flow problems that unsanitary waste regularly appears near to a neighbouring road called York Close, Gillow Heath.</p>	<ul style="list-style-type: none"> • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO6268	Mr N Mosson				Object	I am in full agreement with the accompanying sheets stating the objections (summary) to this site I have lived at this address since 1972 and remember the nights when the smell from the sewage works was overpowering necessitating keeping all the windows shut. I also used to work at the forge colour work's and remember the times at night when the out flows from the sewage works used to heavily contaminate Biddulph Brook. Allowing extra housing in this site could lead to the same problems again.	<ul style="list-style-type: none"> • See response to PO974 regarding highways. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO2704 regarding Flood Zone 2. • See response to PO4642 regarding flooding. • See response to PO756 regarding Education and Victoria Colliery and Childerplay as alternative locations for development. • See response to PO577 regarding ecology. • See response to PO4985 regarding exceptional circumstances for loss of GB. • See response to PO4985 regarding community benefit • See response to PO4989 regarding maintenance of link through site to Biddulph Valley Way. • See response to PO4992 regarding allocating the site as Visual Open Space. • See response to PO577 regarding contradiction with Core Strategy Policy SS5b • See response to PO4635 regarding the Green Belt Review • See response to Po4996 regarding public access to the site • See response to PO4994 regarding site screening • See response to PO756 regarding use of derelict buildings in Biddulph.
PO7222	Mr B Roberts				Object	Northern plots – York Close, Marsh Green, Portland Drive. These developments are very close to the sewerage works. Problems remain with proximity and also capacity and space available for any possible need for expansion of the sewerage works.	<ul style="list-style-type: none"> • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works.
PO6273	Mr Ronald Bailey				Object	I strongly feel that this site should be left as normal and a visual open space, keeping the habitat and the fauna certainly is a better zone for the necessary cover from the sewage works as outlined.	<ul style="list-style-type: none"> • See response to PO4992 regarding allocating the site as Visual Open Space. • See response to PO577 regarding ecology.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO6746	Mr Robert Chambers				Object	<p>I am writing to voice my concerns about the site (above). I have lived next to this site for more than 40 years, and, consequently, have accumulated a lot of knowledge and experience about the characteristics of the area. I have also understood why revoking green belt status and giving planning permission for development have been refused on at least two occasions in the past. The Sewage Works and Public Health The nearest housing to the site of the sewage works is the eastern side of Long Valley Road. The Biddulph Valley Way and part of the field provide some distance, but not much. Despite the fact that the sewage works was upgraded some years ago, there are still frequent occasions throughout the year when a very strong odour pervades the air and can be experienced several streets away. There have been issues of flooding and raw sewage leakage near Essex Drive (March 2016 for example) and, in times of heavy or persistent rain, the site becomes very wet indeed (Marsh Green Road, which runs past the entry to the sewage works is aptly named). Additionally, the water that flows along the Biddulph Valley Way finds its way to the brook through this site. At times of heavy rain, the track becomes water-logged and river-like despite attempts to deepen the ditch behind the upper half of Long Valley Road and insert plastic drainage pipes into the site's field. The field itself becomes extremely boggy. The river at the eastern side of the site is liable to flood at times of high rainfall. Water run-off from building, roads, paths, drives would increase the likelihood of flooding downstream, too. Have projections been conducted to assess whether the capacity of the sewage works is sufficient for Biddulph and if the increase in population would adversely affect its ability to cope? Clearly, the complex is not able to cope adequately at the moment. In any case, it is clear that anything built on this site would be very close to the sewage works and to the river. Roads and Footpaths Infrastructure Mow Lane and Marsh Green Road are very narrow roads serving much of the Gillow Heath area. In places, there is insufficient room for vehicles to pass. Pedestrians have to use the road as there are no footpaths. At some points, there are no refuge areas at all. Mow Lane, which begins at the top of Congleton Edge is a major transit route from Congleton and the A34, as well as from Kidsgrove, and yet is woefully inadequate for purpose. As things stand, it is doubtful whether the road system is suitable without adding extra burden from potentially hundreds of extra vehicles, including the resultant noise and air pollution. Elderly people, the disabled and parents with young children who choose to walk to Biddulph or elsewhere would be compromised even more by extra traffic, and cars parked on pavements, which already occurs. Additionally, parents with prams and push-chairs would find using the roads or the already inadequate pedestrian areas more dangerous. Access to site BD062 is restricted. Essex Drive and York Close are narrow roads with steep gradients at points and sharp turns. Many people need to park cars on the road and pavements (as they do in many of the other roads in Gillow Heath). Some residents have vans for work which take up even more space. Ambulances, fire vehicles, delivery lorries and</p>	<ul style="list-style-type: none"> • See response to PO4635 regarding the Green Belt Review. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO2704 regarding Flood Zone 2. • See response to PO974 regarding highways. • See response to PO577 regarding Green Infrastructure Strategy. • See response to PO577 regarding ecology. • See response to PO4985 regarding community benefit.

						<p>waste/recycling vehicles would find the negotiation of these roads even more difficult. As has been pointed out elsewhere, Biddulph is essentially a dormitory town with very limited work possibilities and facilities. Consequently, a very large number of people have to commute to work, drop children off at school. All of this traffic would be funnelled into Mow Lane which has no footpaths. Any sites that led into Mow Lane or Marsh Green Road would create far too much traffic and would be potentially very dangerous. Mow Lane, Essex Drive and York close do not meet the minimum standards for the SCC Highways Design Guide Policy. Additionally, the area would be totally transformed, packing large numbers of houses into a relatively small area. Higher-density living would not have the infrastructure to serve it. Green Infrastructure The Green Infrastructure Strategy of SMDC seems to be somewhat inadequate. As has been stated elsewhere, the Phase 1 Habitat Survey stated that this site was not recommended for development. This is from the Green Infrastructure Guidance on the Natural England website. The highlighted sections are the pertinent ones: A healthy natural environment: Our diverse landscapes continue to provide inspiration and enjoyment for people and enable our wildlife to adapt to the challenges of the future. Our rich biodiversity thrives across the landscape, with ecosystems and habitats resilient to climate change. Our marine environment is better understood, valued and protected. Well planned Green Infrastructure encompassing new and enhanced sites and habitats: contributes to high quality and accessible landscapes benefiting people and wildlife; plays an essential role in maintaining and enhancing the health of the natural environment and its ability to provide a wealth of 'ecosystem services'; increases ecological connectivity to overcome habitat fragmentation and increase the ability of the natural environment to adapt to climate change ; and in coastal locations helps to provide recreational space and to enhance and protect our marine environment. People are inspired to conserve and value the natural environment: People fully understand and value the contribution of the natural environment to our quality of life. People increasingly take action to protect and enhance the natural environment. People have places to access and enjoy a high quality natural environment The creation and enhancement of green infrastructure helps to: create attractive and accessible places for people to enjoy direct and regular contact with the natural environment; strengthen links between urban areas and their surrounding countryside, and bring the natural world into every neighbourhood, with benefits for individual and community health and well-being. Twinned with effective promotional campaigns, green infrastructure can support healthier lifestyles by providing green routes for walking and cycling, and green spaces for exercise and play. The Phase 1 Habitat Survey concluded that the site was not recommended for potential development, and the SMDC LDF Core Strategy Policy C3 Sustainable Communities also states that where existing and potential sites of nature conservation value are linked, biodiversity is increased and</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						the urban fringe in enhanced. This site has the potential to be designated as a species rich farmland site, and also acts as a link between the Biddulph Valley Way and Biddulph Brook. A few months ago, the owner of the site felled most of the trees on the site. This suggested that either he was privy to information about the future of the site not being divulged to the public, or that it was an attempt to degrade the site and to reduce its biodiversity. The Phase 1 Habitat survey stated that this site was not recommended for development. The variety of habitats and the connection between the Biddulph Valley Way and the brook are obvious to us all. The site will not bring any benefit to the community of Gillow Heath. SMDC has stated that new housing allocation should be prioritised on urban extension land to the west of the bypass and where this can help secure infrastructure improvements for the newly developed part of the town. Summary of Opposition I am concerned that development here would have detrimental effect on the biodiversity of the area, introduce a much higher risk of flooding, as outlined above, put greater stress on the water purification and sewage plant (and its continuing problems with odour and leakages) and put an unacceptable pressure on the narrow roads as well as putting drivers and pedestrians under greater risk of being hurt. Finally, it will bring no benefit to the community.	
PO7370	Mr John Hayley				Object	As a Biddulph resident I call on SMDC to remove areas BD062 & BD068 from the 2012-2031 Local Plan Preferred Option Sites. I believe that Staffordshire Moorlands District Council needs to consider the following: Areas: BD062, BD068 and BD083 1. In my view it is totally inappropriate to build new housing on green fields within the Green Belt in such close proximity to Biddulph's sewage treatment plant. I would not wish future generations of my family to have to live in such housing and it is not appropriate to make town boundary changes in this vicinity. It would be impossible to produce a "wide choice of high quality homes" at this location (NPPF paragraph 50) and the type of housing that could be built here is likely to have a large negative effect on social cohesion and quality of life within the existing Gillow Heath community. This development would harm the reputation of this area of Biddulph from a housing perspective. 2. Because of its proximity to the urban environment I believe that it remains sensible for the sewage treatment plant to be heavily surrounded by trees. One suitable productive use of this land might therefore be, not to use it for housing, but to use it instead to secure reductions in greenhouse gas emissions. Options might include: carbon capture, forestry and coppicing, or creation of a small Community Forest – all done in support of a low carbon future for Biddulph.	<ul style="list-style-type: none"> • See response to PO4635 regarding the Green Belt Review. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO4994 regarding site screening. • The land is privately owned so a community forest is not likely to be achievable.
PO7589	Mr Gary Ratcliffe				Object	(Summary) In considering the proposal to develop the green belt land in Gillow Heath, Biddulph, the Developer and District Council need to agree on the level and scope of the transport assessment at the earliest	<ul style="list-style-type: none"> • The Highway Authority, Staffordshire County Council has stated that a Transport Assessment will be required and they will ensure that the level and scoping is appropriate.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>possible stage of design i.e. feasibility stage. The transport assessment must give due consideration to the Health and Safety of those that will be affected by the works during the lifecycle of the project i.e. construction of the development, use (including emergency access) and maintenance (including service vehicles). In regards to the construction phase, it should be noted that each year construction work injures and kills people who have no direct connection to the construction work itself. A basic desktop traffic risk assessment would consider the following: Problems with traffic: Pedestrians may be struck by vehicles entering or leaving the site Construction vehicles using unsuitable residential roads for access (see points below) Site and delivery vehicles may obstruct the pavement forcing pedestrians into the road where they can be struck by other vehicles Construction vehicles must pass each other on narrow residential roads Vehicles may strike non-site vehicles while entering or leaving the site Unsecured loads or those moved during transit may fall off, striking pedestrians or other vehicles People who may be harmed – residents, visitors, children and cyclists (it is well documented the number of fatalities and serious injuries involving cyclists and large construction vehicles) Recent development of the amenities on Mow Lane to encourage children into the locality Government and local policy to encourage the use of cycling and walking Increased potential for accidents due to the access roads – the physical restrictions of York Close, Essex Drive and Mow Lane have already been well documented by others residents. Narrow residential roads, poor visibility / sight distance restrictions and no pavement on Mow Lane Lack of segregation between pedestrians and cyclists and large / numerous construction vehicle Foreseeability – number of accidents and near-misses on these roads involving vehicles, pedestrians, cyclists and children in recent years Significant traffic increase due to the number of construction vehicles required to construct 40 new dwellings Typical construction vehicles include 8 wheel tippers for the initial ground works, including spoil removal and deliveries – see photo and dimensions of typical construction vehicle. A traffic risk assessment (or traffic management plan) produced by the Developer could not reduce the risk to a tolerable level i.e. a risk that is acceptable to society in general. The existing environmental factors limit the control measures that could be implemented to mitigate the risk further i.e. it is not possible to: Segregate pedestrians and vehicles Divert site traffic away from pedestrianised areas Physically modify the access roads Time deliveries to avoid members of the public This is why a previous planning application for the area classified as BD062 failed due to the limited access for construction vehicles. There have been no changes to the physical environment or existing site use that would facilitate a reversal of this previous decision (this includes political pressure / incentives which are still bound by Statutory Law).</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO7565	Mrs Angela Turner				Object	<p>(Summary) Object to the proposal to develop this site for the following reasons: Issues with regards to habitats (refer to full details in the attached document) - it is the only proposed housing allocation in Biddulph where the Council's Phase 1 Habitat Survey concluded that the site is "not recommended for potential development". Site BD062 links two vital wildlife corridors which travel through the Biddulph Valley and can be classed as a 'potential green infrastructure asset'. In addition to this, the site contains species indicative of habitats, which are both UK BAP and Staffordshire BAP priority habitats. It has the potential to deliver a number of outcomes of the SMDC LDF Core Strategy, including the identification of sites suitable for inclusion in the Biodiversity Opportunity Mapping Species-Rich farmland zone. Time should be given for additional ecological surveys to be undertaken; The Council's evidence base is not complete - it has not produced a Green Infrastructure Strategy and it makes a commitment to do this in Core Strategy Policy C3; The sites inclusion contradicts the Biddulph area strategy where new housing allocation is prioritised on urban extension land to the west of the new bypass where it is located adjacent to the urban area and where developments can help to secure infrastructure improvements for the benefit of that part of the town. This site offers no scope for infrastructure improvements specific to Gillow Heath; Land is Green Belt and no exceptional circumstances have been demonstrated; Lack of capacity of sewage works (refer to attached documents); Part of the Local Plan evidence base has not been fully researched, evidenced and made publically available. United Utilities have not submitted DG5 Flood Register data; Current lack of capacity results in regular overflow of raw sewerage into Biddulph Brook resulting in serious public health concerns, particularly if housing were to be built on the site of current overflows (see attached pictures); Amenity issues for current and future residents - noise, odour and sewage flooding; Inadequate highway infrastructure - past planning refusals, distributor roads and feeder roads do not meet minimum standards in Residential Design Guide SPG (2000), concerns over highway safety; The site is in Flood Zone 2; Local community has had unfettered public access to the site since the estate was built in 1971 - 3 well used Public Rights of Way cross this land; and Land should be designated as 'Visual Open Space' protecting the ecology and allowing the wet meadow to do its natural job of reducing flooding in the watercourse by slowing down surface water run-off.</p>	<ul style="list-style-type: none"> • See response to PO577 regarding ecology. • See response to PO577 regarding Green Infrastructure Strategy. • See response to PO577 regarding contradiction with Core Strategy Policy SS5b. • See response to PO4985 regarding community benefit. • See response to PO4985 regarding exceptional circumstances for loss of GB. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO2704 regarding Flood Zone 2. • See response to PO974 regarding highways. • See response to Po4996 regarding public access to the site. • See response to PO4989 regarding maintenance of link through site to Biddulph Valley Way. • See response to PO4992 regarding allocating the site as Visual Open Space.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO6734	Mr Michael Martin				Object	Object to BD062 - it is TOTALLY unsuitable for development. ALL of these sites are within metres of a full to capacity sewerage works already working to overcapacity. We regularly have sewage smells, the nightly warring of machinery, and when walking in the adjacent fields have seen evidence of sewage overflow. The health limitations are obvious. The lane leading to BD087 is one cars width, no footpath, houses adjoining the lane have their own boundaries right up to the lane. Many years ago my wife and i together with numerous neighbours attended a site meeting at the actual works and were told by a United Utilities area manager that the houses in Portland Drive, York Close, and Long Valley Road should never have been built..... we register our total objections to this area. The preferred area was the old Victoria Colliery that has been totally reclaimed and is ready to use.	<ul style="list-style-type: none"> • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewerage works. • See response to PO974 regarding highways. • See response to PO756 regarding Victoria Colliery as an alternative location for development.
PO7575	Mr Peter Turner				Object	(Summary) Object on the basis of: Public Health / Proximity to Sewage Works Sewage works is over capacity, residents already experience unacceptable levels of amenity such as noise, odour and raw sewage flooding. Contradicts Core Strategy Policy SD4. During heavy periods of rainfall sewerage system cannot cope with existing levels of development and overflows. United Utilities have expressed a preference that the Council does not locate new development next to the sewerage works. Habitats and Biodiversity The SMDC Phase 1 Habitat Survey recommended that the site is not recommended for potential development – it is the only site surveyed where this is concluded. The site contains UK and Staffordshire Biodiversity Action Plan Priority Habitats and species and has the potential to be a Species Rich Farmland site. It is very well connected to other biodiverse habitats (evidenced in the Phase 1 Habitat survey). In the absence of a SMDC Green Infrastructure Strategy, the findings of this survey must be heeded. Development would contradict Section 40 of the Natural Environment and Rural Communities Act 2006, and Policy C3, NE1 and section 8.7.17 of the SMDC LDF Core Strategy. This site is important because of its mix of habitats, particular species found and its vital wildlife corridor linkages (where the Biddulph Brook meets the Biddulph Valley Way). Green Infrastructure Strategy does not exist. Inclusion contradicts Core Strategy policies C3 and NE1. Site has potential to be designated as a Local Wildlife Site. Green Belt & Flood Risk Site is flood zone 2 and its release would contradict Core Strategy Policy SD4. Highways Local highway network is inadequate to cope with new development. Neither the distributor road (Mow Lane) nor the feeder roads (Essex Drive and York Close) meet the minimum standards for the SCC Highways Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane which cannot be avoided as there is no alternative access to this site. Mow Lane is a dangerous road with no footpath. There is no scope for the required improvements. Serious Highways incidents are common place at the junction of Mow Lane, Congleton Road, Smithy Lane and Halls Road. Recent accident at 4.30am	<ul style="list-style-type: none"> • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewerage works. • United Utilities have expressed a preference but not a formal objection. It is up to the Council to balance all the planning issues and reach a decision. • See response to PO577 regarding ecology. • See response to PO577 regarding Green Infrastructure Strategy. • See response to PO4635 regarding the Green Belt Review. • See response to PO4985 regarding exceptional circumstances for loss of GB. • See response to PO2704 regarding Flood Zone 2. • See response to PO974 regarding highways. • See response to PO4996 regarding public access to the site. • See response to PO4989 regarding maintenance of link through site to Biddulph Valley Way. • See response to PO4992 regarding allocating the site as Visual Open Space. • See response to PO577 regarding contradiction with Core Strategy Policy SS5b. • See response to PO4985 regarding community benefit.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						(outside of high risk high flow traffic times) on 20/5/16 relating to the Mow Lane junction with Congleton Road resulted in lane closures, traffic restrictions and spillage intervention by the fire authority. Community Access / Public Rights of Way The local community have had unfettered access to this site since the estate was built in 1971. For over 40 years, there has been total open access and the land has been used by local residents. This land should be designated as Visual Open Space, protecting the ecology and allowing the wet meadow to do its natural job of reducing flooding in the watercourse by slowing down surface runoff. Three well-used Public Rights of Way cross this land. Provision of community enjoyment of countryside and open spaces is supported by the Commons Act 2006. Wise use of CIL This site will deliver too few homes to add a measurable contribution to the Community Infrastructure Levy (CIL), it will not bring any direct benefit to the community of Gillow Heath. Its inclusion contradicts the SMDC LDF Core Strategy Biddulph Area Strategy where new housing allocation is prioritised on urban extension land to the west of the bypass and where developments help secure infrastructure improvements for the benefit of the newly developed part of the town.	
PO7355	Jenny Cryer				Object	I have very deep concerns over the development BD062. It is a lovely green pocket of land within a number of housing developments, which attracts a lot of wildlife. My concerns are that it is extremely close to the sewage works, so a considerable number of the houses on the proposed site would actually be right next to the works. I am also concerned about how the site will be accessed. Neither Essex Drive/ York Close, or Marsh Green Road are at all suitable, and what are currently quiet residential areas would become major thoroughfares. Gillow Heath and the surrounding area have quite enough residential properties in them already, without yet another small area of wild land being used for commercial gain. Please do reconsider.	<ul style="list-style-type: none"> • See response to PO577 regarding ecology. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO974 regarding highways.
PO9046	Mr and Mrs Siddorn		G. Willard		Object	Object to inclusion of the site. The site has significant highway, drainage, ecology, odour and other constraints which local people will require the LPA to address.	<ul style="list-style-type: none"> • See response to PO577 regarding ecology. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO974 regarding highways. • See response to PO2704 regarding Flood Zone 2.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO9006	Mr Denver Johnson				Object	<p>I've been a resident of Biddulph for forty one years and have seen many developments in the location over the years. Happily over that time the green spaces and views have survived relatively unchanged within that time, maintaining the spirit of a rural conurbation. The current threat to those very Green Belt spaces that set Biddulph apart as a little gem is untenable. It seems that crooked National government have connived with big developers (party sponsors) to twist arms up backs of Development Officers and override Councillors/Local Public Opinion to cherry pick development locations that they hope will bring in the most cash. Stupid insofar that any big development so close would bring down local property prices. The infrastructure of our little end of Biddulph has always been strained by the population level, to suggest that the number of houses could be doubled is ludicrous. The main drawbacks to our location have always been increasing traffic on the A527 (it's too crowded now), flooding (gardens in the best drained locations tend to get boggy in Winter - the weather is getting wetter and some local actions like selling off the Grange and allowing the marsh drying Rhododendrons to be mass destroyed didn't help) and when the wind is in the wrong direction, the smell from the close sewage works. The placing of large developments even closer to the sewage works seems more like a criminal act than a thoughtless oversight. The Abbeystead, Lancashire waterworks disaster of May 1984 where a methane gas explosion severely wounded forty four people and killed eight outright including a mother and child should never be allowed to be forgotten. The cause of ignition has never been determined, however the good sense of at the very least leaving as many fields as possible around them was once enforced by law. Private takeover of Public utilities seems to have greyed this issue. From an explosives perspective (I'm a Physical Science Graduate) placing houses closer to such an installation is akin to packing a bomb with shrapnel and strapping innocent victims to it! Won't allowing these developments be exponentially raising the risks of the site being used as a terrorist soft target? How many other locations are there Nationally like this one, with the added blast focus of the steep valley sides? New houses on the proposed sites would not just be putting lives of new residents at risk. Wildlife - Biddulph attracts some rarities like buzzards and herons, sustains a large population of wild rabbits along with frogs, toads, snakes, foxes, stoats, badgers and hedgehogs. Pheasants, crows jackdaws, jays, magpies, woodpeckers (green and spotted) along with a large variety of the smaller birds. All of these animals would be hit by the loss of the green spaces and the draining of marshland. Heritage - Biddulph originated in the lee of the old 13th century Norman fort/castle built in Bailys Wood. All of the Mediaeval village would have been centred on the brook. The road from the South along the brook would have been important, but the fair road that no longer exists, running East West through the village would probably have been more important to the community and the North road out towards Congleton may not have been there since the fort was put there to control the area boundary.</p>	<ul style="list-style-type: none"> • See response to PO4635 regarding the Green Belt Review. • Property values are not considered material in planning law. • See response to PO974 regarding highways. • See response to PO4642 regarding flooding. • See response to PO2704 regarding Flood Zone 2. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO577 regarding ecology. • Heritage Impact of development on the site has been assessed in the Council's Heritage Impact Study (August 2016), the results for this site are "There are three Grade II Listed Buildings within the 400m buffer. The site was enclosed by surrounding vegetation and there is no intervisibility between the site and the assets. Development would be highly unlikely to adversely affect the settings of the assets. Development would be highly unlikely to adversely affect HLC zone BBHECZ 8 (Historic Environment Character Assessment 2010). Site suitable for development in heritage terms".

						<p>Bradley Green was the name of the village now using the name Biddulph. See 1806 map: http://www.visionofbritain.org.uk/maps/series?xCenter=3216685.06303&yCenter=2985192.16842&scale=633600&viewScale=181417.4208&mapLayer=nineteenth&subLayer=smith_1806&title=C.%20Smith%20New%20Map%20of%20Great%20Britain%20and%20Ireland&download=true Biddulph Castle - Biddulph Lea Forge http://www.gatehouse-gazetteer.info/English%20sites/3308.html Archaeology - ancient Biddulph is still buried below the fields (inc. BD087) between Marsh Green Road and Bailys Wood. Bakers South field (BD068), from hearsay, was called 'the old garrison' - it's sited ~1000M South West of the old Biddulph Hall and would have been a very probable place for a Parliamentarian cannon battery during the Civil war. I've found shards of what appear to be iron age or older pottery in this field close to the brook. I've got this depiction from a mix of reading and hearsay, but am currently in contact with 'The Biddulph Museum'. See: http://biddulphmuseum.com/index.html Flooding - Marsh Green gets it's name from a long history of flooding. The glacial alluvial valley floor is an area for subsidence even without the help of the many mines close to the area and the existence of a large underground reservoir at our end of the valley that is the reason for there being less pit shafts this end. Access - Marsh Green road is a single track, dangerous to the many pedestrians that have to cross it daily on their way to the old railway line (Biddulph Valley Way - Route 55) and cars that face meeting on the sharp blind bend next to Suttons old farm. Marsh Green Road was at it's safest when it was blocked off at the sewage works entrance to facilitate work on the bridge over the brook. BD062 - has had a history of severe flooding. The field is boggy during the Winter and Spring with signs of subsidence. Biddulph brook regularly gets charged with raw sewage, it gets much of it's volume by taking the constant discharge from processed sewage: it is categorically 'unfit for human consumption'. The field provides a pleasant buffer zone between the houses of Gillow Heath and the sewage works and is often referred to as the village green.</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO9015	Mrs Angela Sproston				Object	<p>(Summary) Public Health – proximity to sewage works The site shares a boundary with the only sewage works in Biddulph. Local residents on Essex Drive and Marsh Green Road already experience unacceptable amenity impacts in their homes such as noise, odour and raw sewage flooding. In periods of heavy rain, raw sewage floods the system and pollutes the Biddulph Brook. Building houses on this site even closer to the sewage works will increase these unacceptable impacts, leading to an increase in statutory nuisance incidents. It contradicts SMDC LDF Core Strategy SD Policy 4 where the Council states that it will refuse schemes which are pollution-sensitive adjacent to polluting developments.</p> <p>Habitats and biodiversity Site reference FID 122 in the Phase 1 Habitat Survey The SMDC Local Plan Phase 1 Habitat Survey concluded “... the site is not recommended for potential development ...” It is the ONLY site surveyed where this was concluded, showing that other sites are more suitable. The site contains UK and Staffordshire Biodiversity Action Plan Priority Habitats and species and has the potential to be a Species Rich Farmland site. It is very well connected to other biodiverse habitats (evidenced in the Phase 1 Habitat survey). In the absence of a SMDC Green Infrastructure Strategy, the findings of this survey must be heeded. Greenbelt and Flood risk The site is currently protected as Greenbelt, and only considered suitable for release from the Greenbelt under exceptional circumstances. Removing this site from the Greenbelt prioritises development in the floodplain which contradicts SMDC LDF Core Strategy Policy SD 4 when a range of sites are available. Exceptional circumstances are not demonstrated. Highways and Emergency Access Neither the distributor road (Mow Lane) nor the feeder roads (Essex Drive and York Close) meet the minimum standards for the SCC Highways Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane which cannot be avoided as there is no alternative access to this site. Mow Lane is a dangerous road with no footpath. There is no scope for the required improvements. Unfettered Community Access and Public Rights of Way The local community have had unfettered access to this site since the estate was built in 1971. For over 40 years, there has been total open access and the land has been used by local residents. This land should be designated as Visual Open Space, protecting the ecology and allowing the wet meadow to do its natural job of reducing flooding in the watercourse by slowing down surface runoff. Three well-used Public Rights of Way cross this land. Wise use of the Community Infrastructure Levy This site will deliver too few homes to add a measurable contribution to the Community Infrastructure Levy (CIL), it will not bring any direct benefit to the community of Gillow Heath. Its inclusion contradicts the SMDC LDF Core Strategy Biddulph Area Strategy where new housing allocation is prioritised on urban extension land to the west of the bypass and where developments help secure infrastructure improvements for the benefit of the newly developed part of the town.</p>	<ul style="list-style-type: none"> • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO577 regarding ecology. • See response to PO577 regarding Green Infrastructure Strategy. • See response to PO4635 regarding the Green Belt Review. • See response to PO2704 regarding Flood Zone 2. • See response to PO4985 regarding exceptional circumstances for loss of GB. • See response to PO974 regarding highways. • See response to PO4996 regarding public access to the site. • See response to PO4989 regarding maintenance of link through site to Biddulph Valley Way. • See response to PO4992 regarding allocating the site as Visual Open Space. • See response to PO4985 regarding community benefit. • See response to PO577 regarding contradiction with Core Strategy Policy SS5b.

PO9035	The Hart Family		Rob Duncan		Object	<p>Whilst this site is acknowledged to have a limited impact on the Green Belt owing to it being effectively enclosed by existing development, the narrow and convoluted nature of Mow Lane and its poor junction with the Congleton Road, means that enhancements to the local highway network are likely to be necessary. By comparison, my client's site benefits from two existing vehicular access points onto parts of the highway network that are suitable for additional traffic, and which will enable vehicles to pass safely. The site is also highlighted as having District level importance from an ecological perspective, with the Local Authority's Phase 1 Habitat Survey of the site concluding that: "The site has potential for protected species to be present due to the mosaic of habitats and habitat structure present, especially as the site is well connected to the wider countryside. Therefore the site is not recommended for potential development as the site is deemed to have district ecological importance. (my emphasis). The unsuitability of the site from an ecological perspective lessens its overall suitability for allocation for housing land and I would request on behalf of myclient that this be re-considered.</p>	<ul style="list-style-type: none"> • See response to PO974 regarding highways. • See response to PO577 regarding ecology.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO9224	Mr Peter Wilshaw				Object	<p>(Summary) The development of future Housing and any future Solar Farm installation would squeeze the natural life from the valley. It would deplete the Green Belt and detrimentally and dramatically alter the landscape and negatively affect the wellbeing of the people of Biddulph and in particular Gillow Heath. I hope that planners will reconsider the preferred option taking into account the following; Unsuitable road network . These proposed housing sites are situated along the gateways to our countryside and walking tracks e.g. Akesmore Lane, Holy Lane, Mow Lane and Marshgreen Road. These narrow roads already carry an unacceptable level of traffic which when combined with a heavy footfall of walkers with children and animals presents a real danger. This danger is also manifested in the fact that they all lead to crossroads on the A527 at Marshgreen and Smithy Lane which are difficult places to emerge from. If these lanes require widening or other safety upgrade it highly likely the ancient hedgerows will be destroyed and therefore the characteristics of that landscape lost for ever. Situating parking places at various spots on the west side of the valley at medium to high elevation would enable access to many walking tracks and elevate the mix of cars and people on the narrow lanes. Diminishing of the Green Belt in the short and long term. The release of Green Belt land, according to the NPPF, should only take place in “exceptional circumstances”. There is not statement to say what those circumstances are and why land can be released in Biddulph and other places but, not in Leek? Site ADD03. Is it 300 or 70 houses plus a school? Unsuitable area adjacent to the Grade II listed White house (the oldest house and tourist attraction in Biddulph). Cumulative and Visual damage to the historic and characteristics of the north Staffordshire uplands area of Gillow Heath . Biddulph valley is also a gateway to the moorlands and The Peak District National Park. It was granted the title of “The Garden Town of Staffordshire” and over twenty years of volunteer effort to showcase the town, Biddulph in Bloom Charity has won many RHS Heart of England in Bloom awards and in 2015 came second in the National Large Town category. I feel that the location and magnitude of these developments will adversely affect the confidence, so hard fought for, in the effort to improve our town and increase tourism. Sites BD062, BD068 and BD087 are unsuitable areas to build houses being adjacent to a water treatment plant and the Biddulph Brook. In many respects this plan does not meet the Core Strategy of SMDC and SCC in meeting their own obligations stated in the Historical Environment Assessment Report which is to protect and retain the character of the landscape and follow and develop many of the recommendation therein. There is a finite limit to the availability of land on which to build houses and the limit to where the wellbeing and recreation of the population is detrimentally affected. The County’s Historic Environment Assessment demonstrates that this area has historic value in terms of heritage and historic landscape character.</p>	<ul style="list-style-type: none"> • See response to PO4635 regarding the Green Belt Review. • See response to PO4985 regarding exceptional circumstances for loss of GB. • Landscape impact of development on the site has been assessed in the Council’s Landscape Impact Study (August 2016), the results for this site are “Site is located within the north of Biddulph, east of the dismantled railway line, and comprises an area of rough grassland and scrub. The site is enclosed by residential development to the south and west, and a sewage treatment works to the north-east, resulting in low visual prominence. Although the adjacent settlement edge is well-defined, it is urban in character to the south of the site. Existing vegetation on the north-eastern site boundaries would form a vegetated settlement edge, and therefore this vegetation should be retained and strengthened where necessary. Site is of low landscape sensitivity.” • See response to PO974 regarding highways. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO9006 regarding heritage impact.

						measureable contribution to CIL; Medical and educational facilities in the town need to be able to cope with increased numbers; and Consider that site should be included as visual or public open space.	<ul style="list-style-type: none"> • See response to PO974 regarding highways. • See response to PO4985 regarding community benefit. • National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the County Council to assess the impact of proposed development on school capacity, what additional capacity is needed and how this can be delivered. • See response to PO4992 regarding allocating the site as Visual Open Space. • The land cannot be allocated as public open space as it is privately owned.
PO9980	Mr D Cliffe				Object	(Summary) Object to the development of this site for the following reasons: Loss of Green Belt; Loss of wildlife and corridor links with Biddulph Brook and Biddulph Valley Way; Loss of sites function as floodplain; Sewage works is over capacity - existing problems with discharge of raw sewage during periods of heavy rain; Lack of adequate highway network to cope with the additional traffic - Mow Lane is narrow with no footpaths and no facility to create them. York Close and Essex Drive are both narrow with bends; and Consider that site should be included as visual or public open space.	<ul style="list-style-type: none"> • See response to PO4635 regarding the Green Belt Review. • See response to PO577 regarding ecology. • See response to PO4642 regarding flooding. • See response to PO2704 regarding Flood Zone 2. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO974 regarding highways. • See response to PO4992 regarding allocating the site as Visual Open Space. • See response to PO10000 regarding public open space.
PO9755	Mr M Alcock				Object	(Summary) Object to the development of this site for the following reasons: Mow Lane is too narrow to accommodate extra traffic and there is no room to widen it; and Highway safety for pedestrians as there are no pavements. Public health and proximity to sewage works; Impact on habitats and biodiversity; Land is Green Belt; Flood risk; Highways and emergency access; Unfettered Community Access and Public Rights of Way; and Wise use of Community Infrastructure Levy. I think that the site should be included as visual open space or public open space.	<ul style="list-style-type: none"> • See response to PO974 regarding highways. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO577 regarding ecology. • See response to PO4635 regarding the Green Belt Review. • See response to PO2704 regarding Flood Zone 2. • See response to Po4996 regarding public access to the site. • See response to PO4989 regarding maintenance of link through site to Biddulph Valley Way. • See response to PO4985 regarding community benefit. • See response to PO4992 regarding allocating the site as Visual Open Space. • See response to PO10000 regarding public open space.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO10195	Mrs I Tranter				Object	In 1965 this land was declared by Council as no good for building on. It has been turned down since then also. Nothing has changed (if anything it's a lot worse). Question will Highways Department undertake work on Mow Lane to help make it safer for [school]children and [pedestrians] ie walkways, traffic calming humps. Mow Lane is already a rat run. Advises will personally undertake vehicle census between 8am-9:30am and 4pm-6:30pm. Will forward to SMDC/Highways Authority, and put online. Hopefully more housing may bring more to the town centre (eg police station, more medical services). None of this will be accomplished by putting into a very poor field with [all its] problems.	<ul style="list-style-type: none"> • Planning decisions are made using policy that exists at that time. Circumstances have changed since the 1960s. • See response to PO974 regarding highways. • See response to PO10000 regarding infrastructure. • See response to PO4985 regarding community benefit.
PO10116	Mr R Meadowcroft				Object	(Summary) Object to the development of this site for the following reasons: Loss of Green Belt - no exceptional circumstances; There are other areas within Biddulph which are more suitable to build on where access will not be a problem, Mow Lane, Essex Drive and York Close do not meet the minimum standards for the SCC Highways design guide policy; The site will deliver too few homes to add a measurable contribution to the community infrastructure and will not benefit Gillow Heath; Close proximity of the sewerage works which already causes noise and odour (almost on a daily basis) and raw sewage flooding in York Drive, Essex Close, Long Valley Road, + Marsh Green Road; The SMDC local plan phase 1 habitat survey stated that this site is NOT RECOMMENDED for potential development – it is the only site surveyed where this was concluded; This land is used by the local community and there has been a total open access since the estate as built. This land should be designated as visual open space, protecting the ecology and allowing the wet meadow to do natural job of reducing flooding and water course by slowing the runoff. Three public rights of way cross this land. I think this site should be included as visual or public open space within Biddulph.	<ul style="list-style-type: none"> • See response to PO4635 regarding the Green Belt Review. • See response to PO4985 regarding exceptional circumstances for loss of GB. • See response to PO974 regarding highways. • See response to PO4985 regarding community benefit. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO577 regarding ecology. • See response to Po4996 regarding public access to the site. • See response to PO4989 regarding maintenance of link through site to Biddulph Valley Way. • See response to PO4992 regarding allocating the site as Visual Open Space. • See response to PO10000 regarding public open space.
PO10290	Mr J Whitehurst				Object	Keep BD062 Green Belt an area for wildlife. The smell from the sewage works isn't good now, when it rains heavily the manhole cover comes off spilling sewage onto the field. Essex Drive and York Close are too narrow Mow Lane – Traffic already a nightmare.	<ul style="list-style-type: none"> • See response to PO577 regarding ecology. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO974 regarding highways.
PO10104	Mrs V Whiston				Object	(Summary) Object to the development of this site for the following reasons: Mow Lane is busy and dangerous with no footpaths; Access for emergency services; Sewage works next to the site - odours, leakages of sewage in some gardens, health hazard, cannot cope with further development; Site acts as a floodplain helping to slow down the water from the hills as it heads towards the brook; and Impact on wildlife and ecology. I think this site should be included as visual or public open space within Biddulph.	<ul style="list-style-type: none"> • See response to PO974 regarding highways. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO2704 regarding Flood Zone 2. • See response to PO577 regarding ecology. • See response to PO4992 regarding allocating the site as Visual Open Space. • See response to PO10000 regarding public open space.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO10194	Mr P Johnson				Object	<p>Understand why revoking green belt status and giving planning permission for development have been refused in the past despite the sewage works being upgraded a few years ago there are still occasions when a strong odour is experienced several streets away. issues of flooding and raw sewage leakage; site becomes very wet indeed in heavy rain. Additionally, Biddulph Valley Way water flow feeds into Brook. Track has become waterlogged. Eastern river liable to flood during heavy rainfall. [Water run off implications]. Question if projections have been conducted to assess whether the capacity of the sewage works is sufficient. Mow Lane and Marsh Green Road are very narrow. In places too narrow for vehicles to pass. No footpaths etc. Mow Lane is major transit route from Congleton to A34. Doubtful whether road system is suitable [now] without adding extra burden from potentially hundreds of extra vehicles [and resultant noise and air pollution]. [Would be more dangerous for pedestrians [parents, the elderly etc]]. Access to BD062 is restricted. Estate roads are narrow with steep gradients and sharp turns. Already on-street parking. Ambulances, fire vehicles, delivery lorries, waste vehicles would find their negotiation more difficult. Biddulph is a dormitory town with very limited work possibilities and facilities. Consequently a very large number of people have to commute to work/drop children off at school. All of this traffic would be funnelled into Mow Lane (no footpaths). Were some/all of sites: BD138A/064/004/138B/062/068/083/087 adopted, resultant pressure on infrastructure would be unimaginable. Area would be totally transformed,..large numbers of houses into relatively small area. Higher density living [without] the infrastructure to serve it. SMDC Green Infrastructure Strategy somewhat inadequate. Phase I ecological survey stated that site not recommended for development. Quotes relevant excerpts from Green infrastructure Guidance on Natural England website. Owner felled most of trees on site. [Questions motives for this]. We are concerned development here would have detrimental effect on biodiversity of area, introduce much higher risk of flooding, put greater stress on water purification and sewage plant, put unacceptable pressure on the narrow roads and putting drivers and pedestrians under greater risk.</p>	<ul style="list-style-type: none"> • See response to PO4635 regarding the Green Belt Review. • See response to PO4985 regarding exceptional circumstances for loss of GB. • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO2704 regarding Flood Zone 2. • See response to PO974 regarding highways. • See response to PO9634 regarding lack of employment. • See response to PO577 regarding ecology. • See response to PO577 regarding Green Infrastructure Strategy.

PO1014 2	Mrs B Rowland				Object	(Summary) Object to the development of this site for the following reasons: site shares a boundary with main Biddulph sewage plant (at design limit already) adjacent residents already experience unacceptable amenity impacts (noise, odour, raw sewage flooding). During heavy rain sewage floods the system, pollutes Biddulph Brook building houses even closer to sewage works will increase these impacts (increase statutory nuisance incidents). Contradicts Core Strat Policy SD4 currently green belt, should only be considered for release under exceptional circumstances (not demonstrated). Removing from green belt prioritises for development in the flood plain (in FZ2) (contrary Policy SD4). Neither the distributor road nor feeder roads meet the minimum standards for SCC highways design guide policy. Roads are narrow; two pinch points (bridges). Mow Lane dangerous with no footpath. No scope for required improvements.	<ul style="list-style-type: none"> • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO2704 regarding Flood Zone 2. • See response to PO4985 regarding exceptional circumstances for loss of GB. • See response to PO974 regarding highways.
PO9924	Mrs M Harding				Object	(Summary) Object to the development of this site for the following reasons: Public health and proximity to sewage works; Impact on habitats and biodiversity; Land is Green Belt; Flood risk; Highways and emergency access; and Unfettered Community Access and Public Rights of Way. I think that the site should be included as visual open space or public open space.	<ul style="list-style-type: none"> • See response to PO577 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. • See response to PO577 regarding ecology. • See response to PO4635 regarding the Green Belt Review. • See response to PO4985 regarding exceptional circumstances for loss of GB. • See response to PO2704 regarding Flood Zone 2. • See response to PO974 regarding highways. • See response to Po4996 regarding public access to the site • See response to PO4989 regarding maintenance of link through site to Biddulph Valley Way. • See response to PO4992 regarding allocating the site as Visual Open Space. • See response to PO10000 regarding public open space.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO9029	Seabridge Developments Limited		Mr Andy Williams		Support	<p>We represent Seabridge Developments Limited which owns land north of York Close and Essex Drive, Gillow Heath, Biddulph that is identified as BD062 on the Site Options Consultation. Green Belt: Our client was previously represented by McDyre & Co who submitted representations on the Core Strategy and also gave evidence at the Examination in Public. You will have a copy of that representation on your file, but for the sake of completeness, another copy is attached. You will note that my client has consistently argued that there is a need to review the Green Belt to meet housing need in the Plan period and beyond and also that my client's land is ideally suited to contribute towards that need. The Council has acknowledged that it will be necessary to review the Green Belt to meet its housing needs, including around Biddulph. In this respect, we would draw your attention to paragraph 70 of the Inspectors Report on the Core Strategy when he stated: "A slightly different scenario is provided by suggestions for sites, such as that at Gillow Heath in the vicinity of Biddulph. Here, as I saw during my visits to the area, there are sites currently within the Green Belt designation which could form the basis for small urban extensions which Policy SS5b indicates [MM24] will be identified as part of a comprehensive review of the Green Belt around Biddulph through the Site Allocations DPD and review of the Core Strategy..." (emphasis added) As can be noted, having visited the Gillow Heath area, the Inspector gave a clear indication that my client's land would represent a potentially appropriate housing extension to the urban area. Green Belt The Green Belt Review Study (November 2015) has assessed the value of Site BD062 and the adjoining land to the east (BD068) in terms of the main purposes of Green Belt and has concluded as follows: · Check Sprawl – Limited Contribution · Maintain Separation – Limited Contribution · Prevent Encroachment – Limited Contribution · Preserve Setting – Contribution The Study concludes that the overall impact of developing these two sites on the Green Belt purposes is 'LIMITED' and that "these sites are connected though their enclosure to the north by Marsh Green Road. As such they are effectively part of the built envelope of Biddulph in this location and notwithstanding the presence of a sewage treatment works between the sites could be developed without impinging on the wider Green Belt either physically or visually." We concur with the findings of the Study and we suggest that its deletion will not harm the function of the Green Belt in the wider area. Deliverability and Potential Development Capacity: My client owns the site and the Registered Title extends up to the adopted highway at the end of York Close and Essex Drive. There are sewer easements over the land, but these can readily be accommodated within any future development on this relatively level site, which is also not affected by the more steeply sloping contours affecting land to the east. The site is available and achievable and we maintain that it is suitable to accommodate up to 40 dwellings, having regard to all know constraints including: the triangular shape of the site; existing sewer easements; the informal/non-statutory path that links from the southern boundary to the</p>	Comments noted.

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>footpath and housing to the west; strong boundary tree cover to the east; and the proximity of the sewage works to the north-east. Transportation We note that the Highway Authority has no objection to a development of up to 40 dwellings served off York Close, presumably in line with Manual for Streets, which of course, post-dates any earlier guidance and/or planning history that might be referred to in order to raise objection to this excellent housing site option. An initial Highways Report has been undertaken and is attached. The Report confirms that a proposed development of up to 40 dwellings can be achieved by safe means of access design that complies with the technical standards adopted by Staffordshire Moorlands and in accordance with Manual for Street Design guide. It also demonstrates that the traffic associated with a development of up to 40 dwellings, can safely be accommodated onto the local highway network. The existing peak time traffic flows currently operate well below their theoretical capacity, meaning that a development of up to 40 dwellings would have a very little impact on the local highway network and would not constitute severe impact to warrant refusal as stated in the NPPF. The site can be accessed by both walking and cycling and therefore provides alternative modes of transport opportunities to the car to access the local schools and amenities. There are also public transport services that operate from Congleton Road (A527) and the surrounding area within a very short walking distance of the proposed development. Overall it can be concluded that the site is very sustainable and offers a wide range of alternative modes of transport locally. The Report notes that the National Planning Policy Framework states that, "Development should only be prevented or refused on transport grounds where the residual cumulative impacts of development are severe". It concludes that overall, the proposed development does not produce a residual cumulative impact on the road network and is considered acceptable in transport terms. The site is located in a sustainable location and would therefore deliver a highly sustainable small scale graft onto the existing urban area. In the circumstances, the proposed access, to serve the application site off York Close, the surrounding priority junctions and footway connectivity can safely accommodate all vehicular and pedestrian movements and so is rightly considered by the Highway Authority as a potentially acceptable allocation for residential use. Ecology: An Extended Phase 1 Habitat Survey was undertaken in June 2014 and this confirmed that the site holds little ecological significance and any potential impacts arising from its future development can be minimised and enhancements to local biodiversity can be achieved through an Ecological Mitigation Strategy to be formulated in due course. The site has recently been re-surveyed and assessed and latest report completed this month (June 2016) and attached herewith, also confirms that: "The habitats on site provided limited potential for use by reptile species. Although suitable reptile habitat within the site is limited in extent, it is recommended that a precautionary approach is followed, with a method statement prepared</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD062 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						that details the actions required to reduce the risk to common reptiles (if present) being injured as a result of the works." (§1.11) Flood Risk: The site is shown on the Environment Agency Flood Map as being Flood Zone 1 (e.g. not liable to flood). It is envisaged that the foul water will discharge into nearby mains and the surface water can either be to soakaways, or attenuated to discharge at an agreed green field run-off rate into the adjacent watercourse. Odour: An Odour Assessment has been undertaken and is attached. This confirms that the nearby Treatment Works have not generated objection and that all but the very northern tip of the site (which could be open space) is suitable for residential development. The findings of the report do not materially reduce the capacity of the site to accommodate between 35-40 dwellings. Conclusion: The site is of only 'limited' value in terms of fulfilling the purposes of Green Belt and it is clear that there are no physical (ownership, easement and topography) technical (highways and flood risk and drainage), or environmental (landscape, ecology, trees and proximity to the nearby treatment works) constraints to prevent the development of the site for up to 40 dwellings. In summary, this site is suitable, achievable and capable of delivering a sustainable modest scale of residential environment in keeping with the adjoining urban area and without detriment to the wider surroundings. In the circumstances, we fully endorse the site option BD062 which is immediately available and capable of delivering new homes at the earliest available opportunity.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO1315	Mr Andrew Leysens	United Utilities Water Limited			General comment	(Summary) Within Biddulph we note site reference BD063a, this appears to be on the boundary of our area with Severn Trent Water for the provision of wastewater services. We would find it helpful to confirm that this site will discharge to that area served by United Utilities.	<ul style="list-style-type: none"> Points of discharge to the wastewater network are a detail which can be confirmed at a later stage in the process once the sites have been allocated in the Local Plan and detailed development schemes become available at the planning application stage.
PO2782	Mr Martin Ross	Environment Agency			General comment	The following comments highlight sites where we consider there may be issues relating to contaminated land BD063: According to information held by the Environment Agency, these sites are located above historic landfill sites. The local council, as lead regulator for these sites, should be contacted for further information.	<ul style="list-style-type: none"> It is considered that although this matter will require more detailed investigation if a detailed scheme is being developed, it is an additional development cost rather than an issue which would prevent development from taking place.
	Petition with 883 signatures				Object	<p>We the undersigned call on Staffordshire Moorlands District council to discount/remove area BD063A Newpool Road, Knypersley from the Local Plan 2031 Preferred Option Sites. We believe that Staffordshire Moorlands District Council need to consider the following:</p> <ol style="list-style-type: none"> 1. National Planning Policy Framework (NPPF) <ul style="list-style-type: none"> • I. NPPF states that greenbelt is to be protected and requires exceptional circumstances to be built on. There is nothing exceptional about the council's plans to build on unspoiled land to meet their housing target • II. NPPF states that brown-field sites are to be prioritised over the development of greenfield and certainly greenbelt sites, but these plans offer up greenbelt in advance of brown-field site development • III. NPPF states that merging of communities is to be prevented, yet development of site BD063A will lose the individual identities currently held between Knypersley and Biddulph • IV. NPPF states that infrastructure must come first, yet the outline ideas to provide infrastructure are either not in place, or are not time-lined in advance of the proposed developments. There are currently no plans to develop new healthcare with these massive scale extensions of population 2. Impact on highway safety and traffic <ul style="list-style-type: none"> • I. this section Newpool Road (BD063A) is already affected by high volumes of traffic flow at peak times and school hours. The bridge access at the bottom Newpool Road can only allow for single vehicle crossing when large vehicles i.e. buses and lorries attempt to cross over. The current access to site BD063A is via a single carriageway access road, which would not provide proper and safe access to a development of 40 houses, the access would need to be upgraded with the formation of a proper road junction and pavement area to allow for safe access and continued traffic flow, this would potentially mean the need to restructure the garden areas to 58 and 60 Newpool Road to allow for safe visibility splay for both cars and pedestrians exiting and entering the proposed site (the garden area of 58 Newpool Road goes straight out to the existing pavement area and would not allow for any room to create a safe visibility splay for cars or pedestrians). The adding of 40 houses on this area will cause increased traffic flow of over approx. 100 cars which will add to the existing traffic problems within this overburdened area. 	<ul style="list-style-type: none"> The land in question is within the Green Belt. The new Local Plan looks at development requirements to 2031. Biddulph's share is lower than Leek and Cheadle as it is recognised that the Green Belt acts as a constraint. In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. However, the Council's Green Belt Review highlights areas of the Green Belt around the town which could be considered for release without jeopardising the wider purposes of the Green Belt designation. This study recommends considering a smaller variant of site BD063a for release from the Green Belt but considers that other options to the west of Biddulph would be better. The capacity of the site has been reduced from 120 to 40 to reflect the results of the Green Belt Review. The Council has to balance the evidence base and consider the best way forward. If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt. Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph (particularly Yarn Mill and Minster Mill) would be appropriate for residential development. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping brownfield sites. National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>3. Conservation of the natural environment:</p> <ul style="list-style-type: none"> • I. the above site is host to different species of bats, owls and huge array of wildlife that will perish as a result of the proposed development • II. Site BD063A is used as working agricultural land that produces at least two crops a year, it is also in use for cattle grazing which provide the community a meaningful way to connect with the natural environment <p>4. Effect on the landscape:</p> <ul style="list-style-type: none"> • I. the development of site BD063A which has an elevated incline with potential two & three storey properties would have a dominate and detrimental effect on the landscape, as the majority properties that currently boarder this site sit at a lower level and this will create overpowering effect on these properties with the loss of privacy. These fields are an integral part of the landscape of Knypersley. Site BD063A provides views of the natural landscape and if developed on, this connection with the natural environment will be lost forever. <p>I trust that you are able to understand the concerns of the people of Newpool Road and the possible destruction of Greenbelt land if any development was to be proposed on site BD063A. we are here to protect the environment and the destroying of more fields in particular 'GREENBELT AREAS' to new development and concrete will only have a major effect on us now and future generations. The correct way forward is by using existing allocated and brown-field site for development without the need to take away virgin sites and GREENBELT AREAS.</p>	<p>Local Plan.</p> <ul style="list-style-type: none"> • The District Council is working with the County Council on the issue of school capacity. The County has determined that additional school provision would be required to support housing growth at the Primary phase of education. At this early stage in the site selection process there are a number of options for delivering school capacity dependent on the sites selected to take forward. • The Highway Authority does not raise any objections to development of the site. • The Council uses evidence to justify its selection of 'Preferred' allocation sites from wider sites, including ecological evidence: This site was subject to a Phase I ecological survey in 2014 and a later 2016 ecology study considered the scope for 'local wildlife site' (ie.SBI) designation for all preferred option sites. These studies set out evaluations of the sites followed by recommended further surveys/actions in the event of future development. The Council would expect subsequent schemes to take account of this evidence; further Policy NE1 allows for the Council to require ecological mitigatory or compensatory measures where appropriate. Note that ecology evidence must be weighed against all other relevant evidence when the Council selects 'Preferred' sites. • The land has an agricultural classification of Grade 3 which means that it is good to moderate. It is up to the Council to balance all the planning issues in determining whether to select a site for development in the Local Plan. • The Council's Landscape, Local Green Space & Heritage Impact Study (August 2016) concludes that the land is of low landscape sensitivity. • Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO26	Mr Wayne Tracey				Object	<p>Firstly why is this plot back in the Core strategy, it was removed some years ago due to objections and a personal visit by Sybil Ralphs. Also the named Councillor has stated the below in an interview with Leek Post and Times regarding the Greenbelt use: "Leader of Staffordshire Moorlands District Council, Sybil Ralphs, said this week she was totally against building on green belt land. She said: "No development should be allowed on greenfields when brownfield sites are available. "If any development impacts adversely on the quality of life for people who already live in areas proposed it should not go ahead." I put it to you that the Target of Housing required for Biddulph can be fulfilled using up the old Brownfield sites in the area. Taking the easy option of Greenbelt sites is morally wrong and constitutes the Guidelines set out By the Government. I would like to add some information from the "House of Commons library" with reference to Green Belt: "Government policy on protection for the green belt is set out in chapter 9 of the National Planning Policy Framework (NPPF). The fundamental aim of green belt policy is to prevent urban sprawl by keeping land permanently open. The NPPF states that that the construction of new buildings should be regarded as "inappropriate" for the green belt" Purpose of green belt land According to the Government's National Planning Policy Framework (NPPF), the green belt serves five purposes: • to check the unrestricted sprawl of large built-up areas; • to prevent neighbouring towns merging into one another; • to assist in safeguarding the countryside from encroachment; • to preserve the setting and special character of historic towns; and • to assist in urban regeneration, by encouraging the recycling of derelict and other urban land.1 The CPRE (Campaign to Protect Rural England), describes green belts as a buffer between towns, and town and countryside whereby within their boundaries, damaged and derelict land can be improved and nature conservation encouraged. Also using the NPPF Document I would like you to note in section 9. It states the Green Belt should only be used in "Exceptional Circumstances" see below for the exert The NPPF also states that new green belts should only be established in " exceptional circumstances ": The general extent of Green Belts across the country is already established. New Green Belts should only be established in exceptional circumstances, for example when planning for larger scale development such as new settlements or major urban extensions. It also makes clear that the construction of new buildings should be regarded as "inappropriate" for the green belt, although there are exceptions: 89. A local planning authority should regard the construction of new buildings as inappropriate in Green Belt. Exceptions to this are: • buildings for agriculture and forestry; • provision of appropriate facilities for outdoor sport, outdoor recreation and for cemeteries, as long as it preserves the openness of the Green Belt and does not conflict with the purposes of including land within it; 3 Department for Communities and Local Government, National Planning Policy Framework, March 2012 Number 00934, 30 June 2015 6 • the extension or alteration of a building provided that it does not result in disproportionate additions over and above the size</p>	<ul style="list-style-type: none"> • A larger area was considered as a broad area for development as part of the Core Strategy but not included in the final version of the plan. The land in question is within the Green Belt. In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has recently completed a Green Belt Review (published in 2015) in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering a smaller variant of site BD063a for release from the Green Belt but considers that other options would be better. The capacity of the site has been reduced from 120 to 40 to reflect the results of the Green Belt Review. • If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt. • Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph (particularly Yarn Mill and Minster Mill) would be appropriate for residential development. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping brownfield sites. • Sites at Victoria Colliery and Childerplay Road are within the Green Belt like BD063a. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy. • The District Council is working with the County Council on the issue of school capacity. The County has determined that additional school provision would be required to support housing growth at the Primary phase of education. At this early stage in the site selection process there are a number of options for delivering school capacity dependant on the sites selected to take forward. • Further work has been undertaken by the owner's agent to demonstrate that the site can be suitably accessed in accordance with highway standards.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>of the original building; • the replacement of a building, provided the new building is in the same use and not materially larger than the one it replaces; • limited infilling in villages, and limited affordable housing for local community needs under policies set out in the Local Plan; or • limited infilling or the partial or complete redevelopment of previously developed sites (brownfield land), whether redundant or in continuing use (excluding temporary buildings), which would not have a greater impact on the openness of the Green Belt and the purpose of including land within it than the existing development. With reference to the above guidelines, I don't feel that any "exceptional Circumstances" have been met. I believe there are lots of other plots listed that would be a lot more suitable and have no impact on the surrounding areas, infrastructure, landscape etc Since receiving the information from yourselves, I took the liberty to speak to a Local Head Mistress at a school in Biddulph, she believes that before more houses are constructed a school should be built to cope with the current demand, and certainly a better road network, especially the ones around the site(s) mentioned above. Schools in biddulph are currently full and will be for the next 4-5 years, this is based on figures available to the school network, using births etc. I have some images of the roads around proposed site BD063a, these are images gathered by myself and a neighbour over the past 10 years, it clearly shows that the road network cannot cope with the current residents. The congestion at the local surrounding Schools during hour leaving and arrival times Is total mayhem, and the rush hour times are just as bad, the images will be posted with this document to support my case. I strongly object to the proposal to any housing development on Green Belt sites in the country and especially the ones in question.</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO67	Mrs Clare Tracey				Object	<p>Firstly “Greenbelt Land is Protected” under many laws in this country, and should only be used as a last resorts, as there are many Brownfield sites available in the district and also Greenfield sites, I can see no lawful reason to use any of the proposed Greenbelt sites in the core strategy, particularly this one. Can the council provide any strategy or information showing the plans to use up current Brownfield sites in Biddulph before we start destroying the landscape. I personally think we are taking the easy option, I would like to see more effort from the council in way of producing residents information about Brownfield Sites use, similar to the efforts displayed with the altering of Brownfield Sites. A huge Review was commissioned and compiled by “Amec Foster Wheeler” Can we not commison a review into using up Brownfield Sites, and also perhaps another review in the houses built on the Uplands Mill site that are currently not selling? After moving into our new property 4 months ago we love the views and use the public right of way on a regular basis, this particular “public right of way” runs through BD063A. The proposed site is Filled with Nature/Wildlife and picturesque views, building 40 Houses on this Famers Field is morally wrong, this is why the site is GreenBelt to start with, to Prevent “Urban Sprawl”. Doing this is would destroy the landscape and the village, de value the neighbourhood. I would also like to point out that since moving into the property it is quite apparent that the road network around BD063a simply cannot cope with current traffic and volume, 1 car can pass over the small bridge on Newpool road, this is packed with Traffic during School Runs and Rush hour. Cars are left abandoned as the roads are too narrow for parking. Emergency Services even struggle when trying to cross the bridge, buses and Lorries are commonly stuck and reversing to allow one to pass. Also, the local schools are full, I have a 6 Year old in Knypersley First School and I have a relative who works in the school, the school is full and is planned to be full for 4-5 years. This is the same for most schools in Biddulph. Where are the influx of children that would come with all of these homes get educated? Perhaps the council should first improve the Infrastructure and possibly build another school to cope, before building 100’s of houses in an area already over populated and with a road network bursting with traffic. I have now noticed that in new plans that a first school is now proposed. In The winter of 2014 we purchased our home, paid a lot of money for it, and stretched ourselves to have our forever home, with unhindered views surrounded by “PROTECTED” Greenbelt, if this proposal happened the devaluation of about 30 Properties will happen, not to mention the congestion around the area. Could the council provide me a list of Protected Greenbelt plots that could possibly remain greenbelt in the Future? What is the point in having the law in place if in years to come you will simply change the status, it was given the greenbelt status for a very good and genuine reason. Suitable sites would be BD071 + BD071A + BD106 + BD156, these are better suited as the road can cope with volume of traffic as it lines the Bypass. I strongly object to the proposal to any housing development on Green Belt sites.</p>	<ul style="list-style-type: none"> • See response to PO26 regarding the Green Belt Review. • See response to PO26 in relation to brownfield sites that have been considered in Biddulph. The Council’s Strategic Housing Land Availability Assessment has assessed more than 150 sites in and around Biddulph including brown field sites and these have been included as allocations where they are large enough (10+ units), suitable, available and deliverable. However, there is not enough brownfield land to meet the town’s requirements. • The new Local Plan looks at development requirements to 2031. Biddulph’s share is lower than Leek and Cheadle as it is recognised that the Green Belt acts as a constraint. However, the Council’s Green Belt Review highlights areas of the Green Belt around the town which could be considered for release without jeopardising the wider purposes of the Green Belt designation. • The Uplands Mill housing site has been taken into account in calculating Biddulph’s housing needs. • Public footpaths can be maintained or re-directed. This issue would be considered at the planning application stage. • The Council uses evidence to justify its selection of ‘Preferred’ allocation sites from wider sites, including ecological evidence: This site was subject to a Phase I ecological survey in 2014 and a later 2016 ecology study considered the scope for ‘local wildlife site’ (ie.SBI) designation for all preferred option sites. These studies set out evaluations of the sites followed by recommended further surveys/actions in the event of future development. The Council would expect subsequent schemes to take account of this evidence; further Policy NE1 allows for the Council to require ecological mitigatory or compensatory measures where appropriate. Note that ecology evidence must be weighed against all other relevant evidence when the Council selects ‘Preferred’ sites. • The Council’s Landscape, Local Green Space & Heritage Impact Study (August 2016) concludes that the land is of low landscape sensitivity. • Property values are not considered material in planning law. • The Highway Authority does not raise any objections to development of the site. • See response to PO26 regarding education capacity. • It is agreed that BD071 + BD071A + BD106 + BD156 are suitable sites and they have been included in the plan.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO128 PO129	Mrs Debbie Rogers Mr Richard Rogers				Object	<p>I wish to object to BD063a on grounds of the destruction of our greenbelt land. I strongly believe that the greenbelt should be preserved in all circumstances. This particular patch of greenbelt is home to many varied forms of wildlife, including - but not limited to, birds of prey, bats, foxes, and many species of birds. It also includes a busy public footpath which my family and I frequently enjoy. Changing the use of this beautiful greenbelt land will totally destroy the habitat of our wildlife and the ambience of what is currently a place of outstanding natural beauty! I appreciate that there is a need for new housing, but firmly believe that we should protect against urban sprawl and use brownfield sites before greenbelt. I also object to this proposal (BD063a) on grounds of accessibility. There is currently a single track dirt path with which to access the patch of land. This will not be sufficient for accessing an estate of 40+ houses. At the very minimum it would need a road where by two cars could comfortably pass simultaneously, and a footpath on either side. There is not room to do this currently - the current road access is only wide enough for one car, and as there are existing properties on either side. I also object on grounds of increased traffic flow. Newpool Road is already struggling with sheer volume of traffic. The lower part of Newpool Road (surrounding the bridge) is so heavily congested with stationery and parked vehicles that the road is reduced to a single lane. This problem is heightened during the school run periods when travelling through is hazardous to say the least. Building another 40 homes on the road will only add to this problem. There have been a number of instances where emergency vehicles have been unable to pass through over the bridge. It is also hazardous because cars are parked on both sides of the road. This means that children, travelling to school, are dashing out from behind parked cars to cross the road. This congestion is terrible at present, it cannot cope with additional traffic from this proposed housing estate. I also object to BD063a on grounds of infrastructure. If we build another 40+ homes on Newpool Road Greenbelt land, those homes will house families. Obviously the new families will need to send their children to schools in the area. All the schools are already full. I am aware of plans to build another primary school, but this does not meet the needs of middle and high school students. It is difficult enough to secure places for our children in local schools. This is a significant problem for existing residents, and one that I don't believe has been sufficiently addressed. This problem is echoed with the local doctors' surgeries. The existing surgeries (Biddulph Valley and Biddulph) can not cope with the number of patients it currently has, and it is nearly impossible to get an appointment, even for serious medical conditions. I sincerely believe that in today's busy society, families and individuals need to fight hard to keep open spaces of greenbelt, where our children can learn to appreciate the beauty of uncultivated nature.</p>	<ul style="list-style-type: none"> • See response to PO26 regarding the Green Belt Review. • See response to PO67 regarding ecology. • See response to PO67 regarding public footpaths. • See responses to PO26 and PO67 regarding alternative brown field sites. • See response to PO26 and PO67 regarding site access and highways. • See response to PO26 regarding education capacity. • National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO250	Mr Thomas Faughnan				Object	Newpool Road is already a busy road with any access from this proposed site onto the brow of a hill and near to a dangerous bend. There are cars parked near to the bridge at school times, making this road single track and potentially obstructing emergency vehicles.	<ul style="list-style-type: none"> • See response to PO67 regarding highways.
PO150	Mr Chris Smith				Object	Having just spent a beautiful weekend in the Staffordshire Moorlands i am outraged at the development plan to urbanise this area of outstanding beauty. We regularly take a ramble through the land designated for development - BD063a we are outraged at this, this particular stretch of land is greenbelt area and as such should be fiercely guarded. We are strong conservationists and abjectly object to the development of greenbelt. The overall impact on wildlife and the landscape would be unforgiveable. Please do not build on one of our favourite country rambles.	<ul style="list-style-type: none"> • See response to PO26 regarding the Green Belt Review. • See response to PO67 regarding ecology. • See response to PO67 regarding public footpaths. • See response to PO67 regarding landscape.
PO210	Mr Stephen Platt				Object	I object to the building proposal due to site access wild life disturbance and also the lack of infrastructure within the area there are numerous wild life that will be disturbed badgers , bats, and birds of prey.	<ul style="list-style-type: none"> • See response to PO67 regarding ecology. • See response to PO128 regarding infrastructure.
PO367	Ms Deborah Johnston				Object	The 40 houses proposal on this site is ludicrous. Newpool Road is a busy road with congestion around rush hour and school drop off and pick up. Adding an extra 40 houses on this site will mean that on average there will be very near 80 extra cars using this stretch of road, as most houses nowadays have at least 2 cars. Buses have a hard job with the traffic we have now when they try to get over the bridge and ensuring there is enough room for them to swing round on to Newpool Road, Access in and out of the proposed site is limited and will mean certain houses may be having to be compulsory purchased to ensure an adequate site entrance. As well as the impact on traffic, the local schools are full to capacity which means that any families within these 40 houses will have to send their children to either Leek or Stoke-on-Trent which means extra traffic again on the roads. As well as the schools there will be a impact on other services who will be expected to provide support for these families.	<ul style="list-style-type: none"> • See response to PO26 and PO67 regarding site access and highways. • See response to PO26 regarding education capacity. • See response to PO128 regarding infrastructure.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO1167	Mr F.B Biddulph				Object	<p>It seems the SMDC have ignored the legitimate objection put forward by residents off Newpool road and Meadow side Knypersley Land that borders my property in Meadowside, prime pasture land producing as least 2 crops per year cattle grazing. With all the immigration which this government and the previous governments have encouraged, where have you all allowed for food security, 1000's of more mouths to feed, less productive farm land to grow food. It seems this has not been properly thought through. Perhaps with Leek you just stuck pins on a map. When local councillors make the comments that you, making the decisions, have not viewed all the sites and don't know where they are, hence my past point. It does seem that you have not taken into account the infrastructure of New pool Road and Meadowside, an old railway bridge on a bend, an accident black spot, a full to capacity primary school, major traffic problems so that parts of the day nothing moves. The Lyne side estate all use newpool road, common sense does not prevail. You are expecting that 40 plus houses that would mean at least those 80 adults to 10's of children, 40-60vehicles using this one small road common sense doesn't prevail. Perhaps some of you, esp Mrs Ralphs and her conservative colleague may remember David Cameron standing in front of an audience feb 2015 saying that new houses will be built on brown fields and not Green Belt 'That he stated is conservative way. How do you answer that encroaching on green belt? Do you realise that there used to be a small colliery owned by R Heath? That boards my property in fact it is in the deeds to property. To this day we drainage is problem we have water drainage As a closing thought why have you not taken in to account the old mills could be made into attractive apartments within the town, this has already been proposed by one of our local councillors. You may be assured we as biddulph people will fight you every step of the way to keep the green area.</p>	<ul style="list-style-type: none"> • The land has an agricultural classification of Grade 3 which means that it is good to moderate. It is up to the Council to balance all the planning issues in determining whether to select a site for development in the Local Plan. • See response to PO67 regarding highways. • See response to PO26 regarding education capacity. • See response to PO26 regarding the Green Belt Review. • The Council is aware of mining issues which affect a number of green field sites around Biddulph and investigative work will take place in these areas prior to the commencement of any development. • Any drainage issues on the land could be resolved through new development. • See response to PO26 regarding the mills in Biddulph.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO714	Ms Ruth Rowland				Object	<p>I object to the Newpool Road/Meadowside development site (BD063A) on the following grounds: Nature conservation Flood risk Infrastructure - schools Infrastructure - traffic and transport Landscape and tourism Amenity Scale of development Government policy 1.) The area is currently a haven to wildlife including protected species (owls and bats). 2.) This section of agricultural land is listed as one of the very few 'best areas' in North Staffs and Derbyshire. It should be preserved. (Agricultural lands classification map for the West Midlands): http://www.soilenviromentservices.co.uk/agricultural-land-survey/?gclid=CjwKEAjwKPS6BRD2ioKR7K245jASJAD1ZqHOtTboEWqCk23nTmOn7fQz33aildwUNHqh9PMhyvgQxoCSLnw_wcB 3.) Biddulph is deemed the 'Garden Town of Staffordshire'. The area should not be developing greenbelt land, but making the area more attractive to tourists, thereby boosting the economy. 4.) The proposed sight will increase noise pollution, air pollution, light pollution and visual pollution. 5) Ancient trees and hedgrows could be lost or damaged. 6.) There will be a loss of privacy, and loss of light to current residents. 7.) The council have not taken into account the current guideline for increased dwellings, which is now 43% of the 6000 originally proposed. 8.) Educational, health and dental provision is at full capacity and cannot support proposed increases in population. 9.) Knypersley First School is a few hundred yards away from the proposed site and there is already traffic congestion. Parking is at a premium, with the school run becoming increasingly dangerous to pedestrians and motorists alike. 10.) Full consideration has not been given to brownfield sites within Biddulph. 11.) Part of BD063a was the site of a Victorian mine and contains disused mine shafts. 12.) Suggested suitable employment sites are totally ill founded when unoccupied retail and commercial buildings remain in Biddulph and Brown Lees Industrial Estate. 13.) The narrow farm track would not provide a safe exit for vehicles using the proposed site. Several accidents have happened at the junction of Towerhill Road and Newpool Road. This development would exacerbate the problem. The proposed 120 dwellings could generate 150 to 200+ extra cars. 14.) Residential access to BD063A would be shared with Newpool Farm. Agricultural traffic, including cattle and hay-bearing trucks and tractors would make this unsuitable and further congested.</p>	<ul style="list-style-type: none"> • See response to PO67 regarding ecology. • The Environment Agency has stated that the area is not affected by flooding. • See response to PO1167 regarding drainage. • See response to PO26 regarding Education capacity • See response to PO67 regarding highways. • See response to PO67 regarding Impact on landscape. • Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations. • See response to PO1167 regarding loss of agricultural land. • See response to PO26 regarding Green Belt Review. • The Council constantly monitors levels of new housing needed to achieve its target – more details can be found in the Strategic Housing Market Assessment. • See response to PO128 regarding infrastructure capacity. • See response to PO26 regarding the mills. • See response to PO67 regarding brownfield land. • See response to PO1167 regarding mining legacy. • The Council is looking to meet the future employment land needs of the District in the period to 2031 – refer to its employment land assessment for further details.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO712 PO723	Mr Graham Mellor Mrs Gail Mellor				Object	<p>The proposal to build on greenbelt land off Newpool Road (BD063A) would have an adverse impact on the immediate area which would significantly outweigh any benefits. The current lie of the ground allows water, through natural drainage, to percolate through the soil and thus disperse via natural means. If the area were to become "hard standing" then there would be little doubt that existing properties will be seriously affected by runoff water, after rain and/or snowstorms. The land falls away considerably towards the "tin bridge" area. Properties in this vicinity would be affected as well as being greatly overlooked by any buildings on the higher ground behind them. This problem currently affects other properties higher up the land. The proposal would exacerbate the situation decreasing the ability of standing water to percolate away. Access to the proposed site would mean an increase in vehicles using Newpool Road - a well-known and much used "rat run"/shortcut to avoid the main Tunstall Road and it's, monitored, speed restrictions and hold ups. There are no monitored speed restrictions on Newpool Road, which is quite obvious to residents living in the proximity. Many near miss accidents are observed, both for pedestrians and vehicles, on a daily basis. There is a blind spot at the junction with Lyneside Road which is proceeded a few yards up the road by a bend on the brow of a hill-where the site access is proposed. An increase of at least fifty additional vehicles plus delivery and collection vehicles along with a significant increase in pedestrians will surely increase the likelihood of more mayhem, to an already busy and unmonitored roadway on a hill, on a bend and at a blind spot. Common sense must prevail and make potential accident prevention paramount. The site proposed is an area of natural beauty and greenbelt. It consists of mature hedgerows and large trees on open farmland and is home to many species of wild life. It is accessible via public footpaths and is used by hikers, ramblers and locals alike. It is an amenity that cannot be replaced. It should be preserved for future generations. It appears that it is better planning to preserve brown field sites, such as the old Victoria Colliery, Childerplay and land purchased by the owners of the car wash on the A527, all available for building, than preserve our natural heritage. I question the need to have to object to this proposal - again. It is only a few years ago that this site was deemed unsuitable for development. Will I have to spend the rest of my years wondering when the next attack is due? As an aside I received confirmation, from yourselves, that you had received my objection on the last occasion but it does not appear on your records. Is there any reason for this? I am also aware of others who have experienced the same situation.</p>	<ul style="list-style-type: none"> • See response to PO1167 regarding drainage. • See response to PO714 regarding residential amenity. • See response to PO67 regarding highways. • See response to PO26 regarding Green Belt Review. • See response to PO67 regarding ecology. • See response to PO67 regarding loss of public footpath. • See response to PO26 regarding Victoria Colliery and Childerplay Road. • See response to PO26 regarding the mills. • See response to PO26 regarding why this area is being reconsidered. • Regarding comments made in response to the previous consultation, the data was published in a different format which did not include the names of everyone who objected, just a list of the issues raised in their objections and Council responses. Only the statutory bodies (e.g. Environment Agency) were named in the report and not private individuals.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO695	Dr P R Rowland				Object	The area already suffers from heavy traffic congestion on the A523/Newpool Road crossroads, especially at school drop off and pick up times. Safety of drivers and pedestrians will be compromised, especially schoolchildren attending Knypersley First School and Park Middle School (already heavily congested on school days.) Do these schools have the capacity to receive the influx of additional children, or, the ground and resources to be expanded? Access to this site is restricted; currently a farm track with houses each side. Biddulph/Knypersley is already lacking in facilities for outdoor sport or recreation. Again in keeping with government policies, the local authority should be engaged in positive, forward thinking, long term plans, to quote Government Planning Practice Guidance "Once Green Belts have been defined, local planning authorities should plan positively to enhance the beneficial use of the Green Belt, such as looking for opportunities to provide access; to provide opportunities for outdoor sport and recreation; to retain and enhance landscapes, visual amenity and biodiversity; or to improve damaged and derelict land." In short, I would like to think that we had intelligent and forward thinking developers, re-using brown sites and utilizing unspoilt resources in constructive and not destructive manner, and that Biddulph/Knypersley would continue to be attractive and distinctive place to live, rather than just another androgynous town.	<ul style="list-style-type: none"> • See response to PO67 regarding highways. • See response to PO26 regarding Education capacity. • See response to PO26 regarding access to site. • A Public Open Space review is underway. • See response to PO26 regarding Green Belt Review. • See response to PO26 regarding the mills. • See response to PO26 regarding Victoria Colliery and Childerplay Road.
PO785	Mrs Anne Barnsley				Object	I wish to object to the proposed BD063A site Newpool Road/Meadowside – this area is Green Belt land and is used as working agricultural land that produces at least two crops a year, it is also in use for cattle grazing. The road infrastructure cannot currently deal with the volume of traffic using Newpool Road – this is already a busy road used by drivers avoiding the speed cameras on Tunstall Road, the speed humps on Lyneside Road and is the main route through to Mow Cop and Brown Lees. The "tin bridge" is narrow and a severe hazard and can only allow for single vehicle crossing when large vehicles ie. buses, lorries, tractors attempt to cross over. More importantly this hazard also affects the Emergency Services! During rush hour and pick up/drop off times at Knypersley First School parked cars on both sides of the road (and on adjoining roads – Meadowside and Lyneside Road) exacerbate the situation and result in traffic chaos. The proposed access to site BD063A is on a dangerous bend and the brow of a hill on Newpool Road; this raises major concerns regarding safe visibility for both cars and pedestrians exiting and entering the proposed site. The addition of 40 houses on this proposed site will cause increased traffic flow of approximately 100 cars which will only add to the existing traffic problems within this overburdened area. Knypersley First School (located at the junction of Tunstall Road/Newpool Road) is currently full to capacity and projected to be so for the next 4-5 years; this also applies to other schools in the area. In addition, local Doctors/Dentists have no capacity to accommodate new patients. The site has an abundance of wildlife and picturesque views, the building proposal is immoral, the site is Green Belt land - the National Planning Policy Framework (NPPF) states : that Green	<ul style="list-style-type: none"> • See response to PO26 regarding Green Belt Review. • See response to PO26 regarding exceptional circumstances for Green Belt Development. • See response to PO1167 regarding loss of agricultural land. • See response to PO67 regarding highways. • See response to PO26 regarding access to site. • See response to PO26 regarding Education capacity. • See response to PO128 regarding infrastructure capacity. • See response to PO67 regarding ecology. • See response to PO26 regarding the mills. • See response to PO26 regarding Victoria Colliery and Childerplay Road. • See response to PO67 regarding brownfield land.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>Belt land is to be protected and requires exceptional circumstances to be built on. There is nothing exceptional about the Council's plans to build on unspoilt land to meet their current housing target. that Brownfield sites are to be prioritised over the development of green field and certainly Green Belt sites - these plans offer up Green Belt in advance of Brownfield site development. that merging of communities is to be prevented - yet development of site BD063A will lose the individual identities currently held between Knypersley and Biddulph. that infrastructure must come first - yet the outline ideas to provide infrastructure are either not in place or are not time lined in advance of the proposed developments. There are currently no plans to develop new healthcare within these massive scale extensions of population. Government policy is that Brownfield sites are to be prioritised over the development of Greenfield and certainly Green Belt sites – the derelict mill on Station Road is not included in the current Option Site Allocations but is an absolute eyesore and long overdue for demolition. This is a desirable site perfect for the construction of apartments and ideally located being close to Biddulph town centre. Also the area bordered by Cross Street, Stringer Street and Walley Street is in need of comprehensive redevelopment and has been a blot on the town centre for years - many of the buildings are of no architectural merit and should have been demolished years ago to make way for modern living/work units. Biddulph and the neighbouring areas are a lovely part of the Staffordshire Moorlands and as such should be protected. I am of the firm belief that a stop should be put to this proposed development and any destruction of Green Belt land. Site BD117 - Situated on the A527 on the outskirts of the town - this site has currently been identified as a "Potential Suitable Employment Site". However, in view of the fact that there are vacant units, plus scope for expansion on the Victoria Business Park, I feel that this site is more ideally suited for consideration as a "Potentially Suitable Housing Site". In addition, I would also suggest that land on the left-hand side (from the A527) of Childerplay Road is also considered as a "Potentially Suitable Housing Site".</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

PO806 PO814	Mrs Sue Ward Mr Arthur Ward				Object	<p>A. I wish to raise my objections to the Newpool Road/Meadowside site (BD063A). I feel that the plans presented by the Council are greatly flawed for the following reasons Shouldn't domiciliary increases be viewed from a Staffordshire county perspective when so many factories & Pot Banks lie derelict within the Stoke-on-Trent area and other large towns? The Council haven't produced any plans for any increase in educational, health, dental or utility provisions. All the areas are at full capacity and cannot withstand the proposed increases in population within this area. Full consideration has not been given to brownfield sites within Biddulph - the derelict mill on Station Road is not included in the current Option Site Allocations but is an absolute eyesore and long overdue for demolition. This is a desirable site perfect for the construction of apartments and ideally located being close to the town centre. Also the area bordered by Cross Street, Stringer Street and Walley Street is in need of comprehensive redevelopment and has been a blot on the town centre for years – many of the buildings are of no architectural merit and should have been demolished years ago to make way for modern living/work units. The suggested suitable employment sites seem totally ill founded when within this area we have unoccupied retail and commercial buildings within Biddulph, in addition to vacant land within the Brown Lees Industrial Estate. Has any consideration been given to the use of some of the Open spaces for housing and replace that Open Space from Greenbelt land? B. I totally support all the objections for the use of Greenbelt land for some of these sites. The use of BD117, BD76A and BD76 for housing would provide the majority of land for the area's housing based on point A1 above. C. Having lived on Newpool Road for over 20 years and have first-hand knowledge of the points below. My main objection is to BD063A proposal of 40 dwellings for the following geographical reasons:- 1. Currently the only access to this site is a single-farm-track with a bungalow one side of it and a house the other. Even with the removal of the thick hedge it would be a very narrow two-way road. 2. This entrance is immediately after a bend at the brow of a hill making it a very dangerous exit onto Newpool Road at any time of the day. People use Newpool Road to avoid the speed camera on Tunstall Road and the speed humps on Lyneside Road. 3. The proposed 40 new dwelling will probably generate between 60 to 110 extra vehicles using Newpool Road which is not and never has been a road for major traffic. The Lyneside Road and the Brown Lees developments had a serious effect on the current traffic problems but this development proposal ensures dangerous traffic with potential fatalities. 4. The "old railway bridge" area which lies between the school and the proposed site BD63a access is narrow & virtually impossible to negotiate around school times and rush hour especially for emergency vehicles, buses or any delivery lorry. It is not unusual to see one or other of them stuck and reversing to allow other to pass. 5. Knypersley First School is just 1/4 mile away from this proposed site, next to the 'traffic light controlled' crossroads with A527, Tunstall Road. Currently during rush hour and pick up/drop off times at Knypersley First School parked cars are on both sides of the road (and on the adjoining roads of Meadowside and</p>	<ul style="list-style-type: none"> • National planning guidance states that the Council should seek to meet the development needs of their area. 						Lynside) exacerbate the situation and result in total traffic chaos. D. The site has an abundance of wildlife and picturesque views, the building proposal is immoral, the site is Green Belt land - the National Planning Policy Framework (NPPF) states : that Green Belt land is to be protected and requires exceptional circumstances to be built on - there is nothing exceptional about the Council's plans to build on unspoilt land to meet their current housing target. that Brownfield sites are to be prioritised over the development of green field and certainly Green Belt sites - these plans offer up Greenbelt in advance of Brownfield site development. that merging of communities is to be prevented - yet development of site BD063A will lose the individual identities currently held between Knypersley and Biddulph. that infrastructure must come first - yet the outline ideas to provide infrastructure are either not in place or are not time lined in advance of the proposed developments. There are currently no plans to develop new healthcare within these massive scale extensions of population.	
PO830	Mr Matt Gibson				Object	I would like to object to the proposed development of site BD063A on the grounds that there is insufficient infrastructure in the surrounding area to support an increase in population, this includes but is not limited to roads, Newpool Road is already dangerous and over utilised with blind bends and congestion at all times of day; there would appear to be little scope to improve this. Schools - all local schools are already full which would force any new residents to travel in order to take there children to school, this would increase the burden on the already crowded roads. Health Services - given the issues currently experienced by those in the area attempting to get doctors appointments additional residents would only make this worse.	<ul style="list-style-type: none"> • See response to PO128 regarding infrastructure capacity. • See response to PO67 regarding highways. • See response to PO26 regarding Education capacity.
PO10278	Cllr Chris Wood				Object	I object to a number of the sites in the site options , and as a ward councillor for Biddulph west I will deal with those . Firstly the site number BD063a at Newpool Road is completely unsuitable in terms of the infrastructure in the area will not cope with any increase in number of vehicles that will have to access this site , the site itself is in green belt and doesn't lend it self to sustain housing in fact the councils own document states that it is an illogical site with no clear external boundaries to prevent incursion into the open countryside to the west of Biddulph leading up to Mow Cop and on the site appraisals it states there are better options in Biddulph and it is my belief this site completely contradicts the green belt review recommendations and the recommendation to the green belt review was not to pursue this site , the access is off an unmade road which has limited access and is totally unsuitable .	<ul style="list-style-type: none"> • See response to PO128 regarding infrastructure capacity. • See response to PO26 regarding access to site. • See response to PO67 regarding highways. • The Council's Green Belt Review assesses a larger version of the site than is included on the consultation map and describes this larger site as 'illogical'. However, the smaller variant (included on the map) "might be acceptable, but there are better options to the west of Biddulph". It is not agreed that the Green Belt Review recommends not pursuing this part of the site. The Council has to balance the evidence base and consider the best way forward.

PO866	Ms Norma Gibson				Object	This site is totally unsuitable for housing. Not only is it home to numerous amounts of wildlife, it is on an already very busy and dangerous road. Schools in the vicinity are full. Even if additional schools are built, families will have to travel further to enable them to use a "local" school due to the criteria that applicants have to meet. The site is accessible via a single dirt track and the area is prone to flooding. Mine shafts are present in the location and building here will have a detrimental effect on the housing already in situ due to lack of privacy. This site should be discounted from the proposed sites, without hesitation.	<ul style="list-style-type: none"> • See response to PO67 regarding ecology. • See response to PO67 regarding highways. • See response to PO26 regarding Education capacity. • See response to PO26 regarding access to site. • See response to PO714 regarding flooding. • See response to PO1167 regarding mining legacy. • See response to PO714 regarding residential amenity.
PO861	Miss Keelie Mellor				Object	I object to the proposed housing allocation site BD063a. Most importantly; this is green belt land and is working agricultural land. Building on this site does NOT agree with the NPPF. The NPPF also states that brown field sites are to be prioritised over the development of greenbelt sites yet development on this site would be against what the policy states. Newpool Road is not suitable for 80+ additional vehicles. The tin bridge is precarious at the best of times; when larger vehicles are using the road (which is frequently), it is impassable by more than one vehicle. Emergency services have been delayed when attending to calls due to this. There is already flooding in this vicinity - additional housing will make this much worse. Due to the layout of the road, pedestrians are already at risk; blind bends and speeding vehicles do not mix well. The access path to site BD063a sits on the brow of a hill. It is already difficult to negotiate joining this busy road from properties already in situ. There is a complete lack of school places for additional families in this area. There are also mineshafts on this site. Building here could potentially put the homes that are already built, at risk. I am certain that if this site were approved for building, it would be just the start of a larger development and would open up the flood gates for further fields to Newpool Road to be earmarked for housing in the future.	<ul style="list-style-type: none"> • See response to PO26 regarding Green Belt Review. • See response to PO1167 regarding loss of agricultural land. • See response to PO26 regarding the mills. • See response to PO67 regarding brownfield land. • See response to PO67 regarding highways. • See response to PO1167 regarding drainage. • See response to PO714 regarding flooding. • See response to PO26 regarding access to site. • See response to PO26 regarding Education capacity. • See response to PO1167 regarding mining legacy.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO948 PO954	Mr John Hancock Mrs Alwyn Hancock				Object	<p>I wish to raise my objections to the proposed BD063A site Newpool Road/Meadowside – this area is Green Belt land and is used as working agricultural land that produces at least two crops a year, it is also in use for cattle grazing. The road infrastructure cannot currently deal with the volume of traffic using Newpool Road – this is already a busy road used by drivers avoiding the speed cameras on Tunstall Road, the speed humps on Lyneside Road and is the main route through to Mow Cop and Brown Lees. The “tin bridge” is narrow and a severe hazard and can only allow for single vehicle crossing when large vehicles ie. buses, lorries, tractors attempt to cross over. More importantly this hazard also affects the Emergency Services! During rush hour and pick up/drop off times at Knypersley First School parked cars on both sides of the road (and on adjoining roads – Meadowside and Lyneside Road) exacerbate the situation and result in traffic chaos. The proposed access to site BD063A is on a dangerous bend and the brow of a hill on Newpool Road; this raises major concerns regarding safe visibility for both cars and pedestrians exiting and entering the proposed site. The addition of 40 houses on this proposed site will cause increased traffic flow of approximately 100 cars which will only add to the existing traffic problems within this overburdened area. The site is Green Belt land - the National Planning Policy Framework (NPPF) states : that Green Belt land is to be protected and requires exceptional circumstances to be built on. There is nothing exceptional about the Council’s plans to build on unspoilt land to meet their current housing target. that Brownfield sites are to be prioritised over the development of green field and certainly Green Belt sites - these plans offer up Green Belt in advance of Brownfield site development. that merging of communities is to be prevented - yet development of site BD063A will lose the individual identities currently held between Knypersley and Biddulph. that infrastructure must come first - yet the outline ideas to provide infrastructure are either not in place or are not time lined in advance of the proposed developments. There are currently no plans to develop new healthcare within these massive scale extensions of population. Government policy is that Brownfield sites are to be prioritised over the development of Greenfield and certainly Green Belt sites – the derelict mill on Station Road is not included in the current Option Site Allocations but is an absolute eyesore and long overdue for demolition. This is a desirable site perfect for the construction of apartments and ideally located being close to Biddulph town centre. Also the area bordered by Cross Street, Stringer Street and Walley Street is in need of comprehensive redevelopment and has been a blot on the town centre for years - many of the buildings are of no architectural merit and should have been demolished years ago to make way for modern living/work units. Biddulph and the neighbouring areas are a lovely part of the Staffordshire Moorlands and as such should be protected. A stop should be put to this proposed development and any destruction of Green Belt land.</p>	<ul style="list-style-type: none"> • See response to PO26 regarding Green Belt Review. • See response to PO26 regarding exceptional circumstances for Green Belt Development. • See response to PO1167 regarding loss of agricultural land. • See response to PO67 regarding highways. • See response to PO26 regarding access to site. • See response to PO26 regarding the mills. • See response to PO67 regarding brownfield land. • See response to PO128 regarding infrastructure capacity. • See response to PO1167 regarding drainage. • See response to PO714 regarding flooding. • See response to PO26 regarding Education capacity. • See response to PO1167 regarding mining legacy.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO1055	Mr David Kirkham				Object	I object strongly to the building of houses on greenfield sites when there are plenty of brown field sites available in this area. The BD063a site has many problems. The first being the entrance and exit from this site is narrow and has poor visibility on the right exit. The left exit is on the brow of a hill making exiting very difficult. Lower down Newpool Road we have a narrow bridge to negotiate which is an absolute nightmare at both school and work times of the day. There is an additional problem with parking on either side of the road at the school which adds extra pressure on the already busy junction. This is an already busy road which is used as a short cut. The entrance to this site also has a bus stop each side of the road causing another problem. So, 40 houses, possible 80 vehicles added to an existing busy road (A NIGHTMARE).	<ul style="list-style-type: none"> • See response to PO26 regarding the mills. • See response to PO67 regarding brownfield land. • See response to PO26 regarding access to site. • See response to PO67 regarding highways.
PO4639	Mr Eric Ball				Object	I find myself in the situation again where I am having to object to build house on Newpool Road, Knypersley – your ref no: BD063A. This proposed is very much ridiculous. Some of my objections are outlines below. Additional noise that would put on Newpool Road would cause me great distress. I have lived in my house for many many years. I am off limited sight and the great sounds of the wildlife that I hear, in the area behind my property, is of great comfort to me. There is a host of wildlife which will be destroyed if this land were to be built on including nesting bats, foxes and birds of prey. My property is next the access on Newpool Farm (Cookies Farm) and goes past my kitchen door. This is a single dirt track, completely unsuitable for access to 40+ houses. The track comes up to my property boundary. It is also a public footpath that is often used by rambler's and dog walkers. I don't believe that the interests of these people are being taken into account. Newpool Road is already a very busy road. The additional vehicles noise that would come from that would come from that building more houses here would be detrimental to my health. The road is not suitable due to precarious 'tin bridge' which only allows for single use when larger vehicles are using the road. The road is 30 mph that they should be. Development of this land does not agree with central government policy to protect Green Belt land (NPPF). The development of this land will lose the individual identities of Knypersley and Biddulph – again the central government states that the merging of communities is to be prevented (NPPF). 40 houses now will give the green light for further houses to be built in this area; this will extend up to the top of Newpool Road creating urban sprawl. I would be obliged if you could take these points into consideration when reviewing the proposals and suggest that this site BD063A is removed as a possible site for housing.	<ul style="list-style-type: none"> • See response to PO714 regarding residential amenity. • See response to PO67 regarding ecology. • See response to PO26 regarding access to site. • See response to PO67 regarding loss of public footpath. • See response to PO67 regarding highways. • See response to PO26 regarding Green Belt Review. • See response to PO26 regarding exceptional circumstances for Green Belt Development.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4640	Mr Barry Aldridge				Object	I am writing to object to build houses on Newpool Road, Knypersley your ref: BD063A. As an older resident, the additional noise that this would put on Newpool Road would cause me great distress. I often sit in the garden when the weather is fine and take in views of the wildlife. The property I live in is next to the current access road to Newpool Farm which from what I understand, one of the proposed housing. In case you don't know, this is a dirt track and in no way suitable as access for housing. In case you don't know, the dirt track is no way suitable for access to houses. It is also a footpath that is often used by ramblers and dog walkers. Newpool Road is a very busy road. Emergency vehicles already struggle and more often than not have to put there sirens on. As a non-driver, I often have to use public transport. From my trips on the buses, I can tell you 1 st hand the 'tin bridge' at the bottom of the road is unsuitable for even more traffic. The site is Green Belt land should be protected. The NPPF states the Green Belt land should be protected, yet here you want to build houses on it. Why? There are more suitable sites for example Childerplay Lane. I would be obliged if you could take these points into consideration when reviewing this proposal. Building on this site does not make sense – I would suggest that it is removed from your site options.	<ul style="list-style-type: none"> • See response to PO714 regarding residential amenity. • See response to PO67 regarding ecology. • See response to PO26 regarding access to site. • See response to PO67 regarding loss of public footpath. • See response to PO67 regarding highways. • See response to PO26 regarding Green Belt Review. • See response to PO26 regarding exceptional circumstances for Green Belt Development. • See response to PO26 regarding Childerplay Road.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4691	Mr D Goodwin				Object	There is no evidence that Biddulph actually needs to the amount of housing that is proposed in the plan. Also the infrastructure i.e. schools and Dr's are not there to support the extra population.	<ul style="list-style-type: none"> • The 20% figure – Biddulph's share of the District housing requirement - is set out in the Council's Core Strategy, a planning document which has been through consultation and an examination by an independent inspector. • See response to PO26 regarding Education capacity. • See response to PO128 regarding infrastructure capacity.
PO4614	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Object	BD063a - Major concern with traffic issues which need to be addressed before any development, not recommended for inclusion.	<ul style="list-style-type: none"> • See response to PO26 regarding access to site. • See response to PO67 regarding highways.
PO6692	Mr David Gibson				Object	I write in connection with the above proposal for potentially suitable site for housing. I have examined the plans and I know the site well. I wish to object strongly to the development of these houses in this location. Newpool Road represents the border of Biddulph and Knypersley marking a distinct boundary between the town of Biddulph and the Cheshire Plains. The continual spread of the town would severely impact this boundary and the welfare of those living in Newpool Road both visually and reduce quality of life through increased noise and the risk of accident on an already busy, dangerous road. The proposed siting of the development is particularly ill-considered: it is on a greenfield site, as well as being in the Green Belt, used by a local farm for grazing and feed production and also has a public footpath through used this year, as well as previously, by high school students training for their Duke of Edinburgh award, and building here would both diminish the striking view across the Cheshire Plains and deter ramblers from visiting the area. While issues with access and infrastructure could be resolved with significant investment deterring tourists from an otherwise redundant town would be highly ill advised. In addition to the above issues I also feel that this site is not suitable because the strain it would put on local NHS services. It would have significant impact for residents of Biddulph and surrounding areas. Having dispersed Ambulance services, local paramedics are already under significant strain; along with issues getting appointments at local doctors which is currently difficult, people would be at significant risk by the increased population.	<ul style="list-style-type: none"> • See response to PO26 regarding Green Belt Review. • See response to PO714 regarding residential amenity. • See response to PO67 regarding highways. • See response to PO1167 regarding loss of agricultural land. • See response to PO67 regarding loss of public footpath. • See response to PO128 regarding infrastructure capacity.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO6600	Mr Adrian Hill				Object	(Summary) I would like to object and call on Staffordshire Moorlands District Council to discount/remove area BD063A Newpool Road, Knypersley from the Local Plan. The proposal is not founded on a robust and credible evidence base: No exceptional circumstances for building on this Green Belt land as required by NPPF. NPPF requires brownfield sites to be prioritised over green field sites. NPPF states that infrastructure must come first - currently no plans to develop new healthcare and schools with these massive scale extensions of population. Highway Issues - Inadequate site access, existing high volumes of traffic, highway safety - nearby school, inadequate bridge on Newpool Road. Natural environment & landscape - land is host to various different species of bats, owls and a huge array of wildlife. Land is used as working agricultural land that produces at least two crops a year, it is also in use for cattle grazing which provide the community a meaningful way to connect with the natural environment. The geography of Site BD063A has an elevated incline and with potential development of two & three storey properties would have a dominant and detrimental effect on the landscape, as the majority of properties that currently border this area (particularly along Meadowside) are bungalow properties and sit at a lower level and this will create an overpowering effect to these properties with the loss of privacy. These fields are an integral part of the landscape of Knypersley. Should make use of brown field sites instead.	<ul style="list-style-type: none"> • See response to PO26 regarding exceptional circumstances for Green Belt Development. • See response to PO26 regarding the mills. • See response to PO67 regarding brownfield land. • See response to PO128 regarding infrastructure capacity. • See response to PO26 regarding Education capacity. • See response to PO67 regarding highways. • See response to PO26 regarding access to site. • See response to PO67 regarding ecology. • See response to PO67 regarding Impact on landscape. • See response to PO1167 regarding loss of agricultural land. • See response to PO714 regarding residential amenity.
PO7238	Kyle Mellor				Object	<p>1. National Planning Policy Framework (NPPF): I. NPPF states that greenbelt is to be protected and requires exceptional circumstances to be built on. There is nothing exceptional about the council's plans to build on unspoiled land to meet their current housing target. II. NPPF states that brown field sites are to be prioritised over the development of green field and certainly greenbelt sites, but these plans offer up greenbelt in advance of brown field site development. III. NPPF states that merging of communities is to be prevented, yet development of site BD063A will lose the individual identities currently held between Knypersley and Biddulph. IV. NPPF states that infrastructure must come first, yet the outline ideas to provide infrastructure are either not in place, or are not time-lined in advance of the proposed developments. There are currently no plans to develop new healthcare with these massive scale extensions of population. 2. Impact on highway safety and traffic: I. This section of Newpool Road (BD063A) is already affected by high volumes of traffic flow at peak times and school hours. The bridge access at the bottom of Newpool Road can only allow for single vehicle crossing when large vehicles i.e. buses & lorries attempt to cross over. The current access to site BD063A is via a single carriageway access road, which would not provide proper and safe access to a development of 40 houses the access would need to be upgraded with the formation of a proper road junction and pavement area to allow for safe access and continued traffic flow, this would potentially mean the need to restructure the garden areas to 58 and 60 Newpool Road to allow for a safe visibility splay for both cars and pedestrians exiting and entering the proposed site. The adding of forty houses on this area will cause increased</p>	<ul style="list-style-type: none"> • See response to PO26 regarding exceptional circumstances for Green Belt Development. • See response to PO26 regarding Green Belt Review. • See response to PO26 regarding the mills. • See response to PO67 regarding brownfield land. • See response to PO128 regarding infrastructure capacity. • See response to PO67 regarding highways. • See response to PO26 regarding access to site. • See response to PO67 regarding ecology. • See response to PO67 regarding Impact on landscape. • See response to PO1167 regarding loss of agricultural land. • See response to PO714 regarding residential amenity. • See response to PO26 regarding Education capacity.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

						<p>traffic flow of over approximately 100 cars which will only add to the existing traffic problems within this overburdened area. 3. Conservation of the natural environment: I. The above site is host to different species of bats, owls and a huge array of wildlife that will perish as a result of the proposed development. II. Site BD063A is used as working agricultural land that produces at least two crops a year, it is also in use for cattle grazing which provide the community a meaningful way to connect with the natural environment. 4. Effect on the landscape: I. The development of Site BD063A which has an elevated incline with potential two & three storey properties would have a dominate and detrimental effect on the landscape, as the majority of properties that currently boarder this site sit at a lower level and this will create an overpowering effect to these properties with the loss of privacy. These fields are an integral part of the landscape of Knypersley. Site BD063A provides views of the natural landscape and if developed on, this connection with the natural environment will be lost forever. 5.Schools The middle schools in Biddulph are already at capacity. I do not see how there will be sufficient places at middle schools by constructing housing at the levels that you are proposing. I trust that you are able to understand the above concerns and the possible destruction of Greenbelt land if any development was to be proposed on site BD063A. The correct way forward is by using existing allocated areas and brownfield site for development without the need to take away virgin sites and greenbelt areas. It genuinely feels that SMDC are prioritising the profitability of development companies by offering up greenbelt land which would be cheaper to develop than other brownfield or urban alternatives. Please demonstrate that this is not the case by removing this site and other greenbelt sites from your future proposals.</p>	
PO7379	Mr Nigel Yates				Object	<p>Newpool Road is a small constrained site that has a dry stream valley running diagonally through it towards existing housing, the position of the housing would make the creation of a land drain difficult, and this area (including the existing properties rear gardens) floods during periods of heavy rain. Access to the development is via Newpool Rd, residents are deeply concerned about the ability of the very narrow Newpool Road bridge being able to take additional traffic load.</p>	<ul style="list-style-type: none"> • See response to PO1167 regarding drainage. • See response to PO67 regarding highways. • See response to PO26 regarding access to site.
PO9047	Mr and Mrs Siddorn				Object	<p>(Agent - G. Willard) Object to inclusion of this site.</p>	Comment noted.

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO9034	The Hart Family				Object	Rob Duncan (agent) This site has been identified as a preferred option, despite the Local Authority's Green Belt Review concluding that it makes a significant contribution to the Green Belt in terms of maintaining separation, preventing encroachment and preserving the setting of historic towns. It also makes a contribution in terms of checking sprawl. This analysis reflects the conclusions reached for my client's site, but for the reasons set out in Section 3 above, I submit that the Green Belt Review is flawed in terms of its assessment of my client's sites as it contradicts the Green Belt Review's findings for the wider parcel of land within which they sit. My client's sites are accordingly considered to represent a more favourable housing site option than this site, and as such I would request that the Local Authority abandons this site as a preferred option.	See response to PO26 regarding Green Belt Review.
PO9697	Mrs C Hill				Object	(Summary) Object to development of the site for the following reasons: Contrary to NPPF (protecting greenbelt, brownfield prioritisation, infrastructure first); Highway safety and traffic - Newpool Road bridge could not cope, inadequate site access - to correct this would need to use land from neighbouring properties); Impact on wildlife; Loss of agricultural land; Loss of trees and hedgerows; and Detrimental impact on landscape - rising land - also impact on amenity of existing residents.	<ul style="list-style-type: none"> • See response to PO26 regarding exceptional circumstances for Green Belt Development. • See response to PO26 regarding the mills. • See response to PO67 regarding brownfield land. • See response to PO128 regarding infrastructure capacity. • See response to PO26 regarding Education capacity. • See response to PO67 regarding highways. • See response to PO26 regarding access to site. • See response to PO67 regarding ecology. • See response to PO67 regarding Impact on landscape. • See response to PO1167 regarding loss of agricultural land. • See response to PO714 regarding residential amenity.

Question 19 – Do you have any comments on the proposed housing allocation BD063a in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO133	Mrs Clare Vause				Object	I strongly object to the proposed Newpool Road housing development BD063A I do believe there are better more accessible areas around Biddulph that can be used to build 40 houses on - I do not believe that these areas have been considered. The proposed development is on greenbelt land - farm land. George Osbourne has stated 'we will not be using greenbelt to build houses when other better options are available'. I believe there are better options available. There is a large amount of brownfield sites around Biddulph, it is of my opinion that these sites have not been looked at. The brownfield sites would be a much more suitable choice. It is of my opinion that the proposed 40 house site would be much better built closer to town with its amenities and better road network than tucked up behind a well established semi rural area in the middle of nowhere. The proposed housing development is in an area of natural beauty. It will disturb the local wildlife which include badgers, hares/rabbits, frogs owls and bats, not to mention all of the birds that come to the area. It will also destroy hedgerows and the wildlife within. The area is renowned with walkers/hikers because of the natural beauty and wildlife. Ripping the land to bits will destroy the wildlife, the scenery and landscape. Greenbelt lands needs to be protected! There is a great deal of traffic on Newpool Road already with people using it as a rat run. There is also a first school at the bottom of the road which adds to the traffic/parking problems. Building an additional 40 properties in the area will just add to these problems. There has been an identified issue raised with the amount of traffic on the road and the speed travelled as we have local a local speedwatch group that monitor the problem in cooperation with the local Police. Parking around the school is a big issue. The narrow bridge at the bottom of the road does cause a lot of problems with buses / tractors/lorries up and down. The proposed entrance road to the site is currently a farm track between two bungalows on the brow of a hill. How is this going to be turned into an access road without taking land from the bungalows - how is this fare to the current home owners? Also, with it being on the brow of a hill its an accident waiting to happen. I strongly object to this proposal.	<ul style="list-style-type: none"> • See response to PO26 regarding Green Belt Review. • See response to PO1167 regarding loss of agricultural land. • See response to PO26 regarding the mills. • See response to PO67 regarding brownfield land. • See response to PO67 regarding ecology. • See response to PO67 regarding loss of public footpath. • See response to PO67 regarding Impact on landscape. • See response to PO67 regarding highways. • See response to PO26 regarding access to site.
PO464	Mr Alan Nixon				Object	I do not believe that the housing plan is supported by housing demand or need and therefore development of green belt on this or any other extension of the boundary in Biddulph cannot be justified. The road network, drainage and services are inadequate to the site and the natural restrictions of the road layout, topography, adjacent bridge and nearby school/traffic lights make it impossible to improve at a sensible cost to permit viable development.	<ul style="list-style-type: none"> • The 20% figure – Biddulph’s share of the District housing requirement - is set out in the Council’s Core Strategy, a planning document which has been through consultation and an examination by an independent inspector. • See response to PO67 regarding highways. • See response to PO1167 regarding drainage. • See response to PO128 regarding infrastructure capacity.
PO4677	Mr & Mrs I Sanders				Object	The access to this land if of Newpool Road between no 58 and 60. This is on crest of the hill and is on a slow bend. As far as I can tell it is the only possible access to the site. The land runs down in an easterly direction and is very wet at the lowest part. As it is farm land the water is spread over a large area. If this land is used for building on and covered in hard water go? My property is on the lower end of this land and we have no problems with water/flooding. Again as the land slopes away from the access area how the	<ul style="list-style-type: none"> • See response to PO26 regarding access to site. • See response to PO1167 regarding drainage • See response to PO714 regarding flooding • See response to PO1167 regarding mining legacy • See response to PO67 regarding highways. • See response to PO26 regarding Green Belt Review. • See response to PO1167 regarding loss of agricultural land.

						<p>sewage is removed. Can it be guaranteed that my property will be safe from flooding. This land has pits on it. Will these be dealt with in an appropriate manner? What records are there of previous mine workings on the land? Newpool Road leaves the A527 at Knypersley Cross Roads and travels in a westerly direction crossing over a narrow bridge. This bridge was built for horse and carts. We now have 35 tonne articulated lorry's and vehicles and buses. These vehicles very often block the bridge and cause delays for emergency vehicles. Many of the residents have two cars that are parked on the road as they have no off road parking. This restricts the road for other users. At school time the road comes to a halt because parents bringing their children to school and parking anywhere. There is a lot of speeding/dangerous driving that takes place on this road. The more Green Belt that is used for building the less there is for food production. This means that we have to import it increasing the carbon footprint and relying on foreign powers to supply us/ there is so many species of wild life, ancient hedges and trees that will be destroyed in the process. I am told that the local sewage works is already overloaded as it was designated for 17000 and at the last count there are 19500 + another 10000 a month from Biddulph Grange in the summer. After heavy rainfall the sewer in Newpool Road can't cope and get faeces washed up on my drive. This suggests to me that the sewers cannot cope. There is many more Brownfield site that can be used before valuable Green Belt is used. When the open casting took place on Victoria site at Brown Lees we were told that the reclaimed land would be used for industry recreation and housing as it will have better access to the A527. Also there is poor farm land on Childerplay Road that could be used again with better access to the A527. There are a number of old mills in Biddulph that could be used BD118 and BD109 are also a Brown Fields site. The infrastructure is far from adequate in this area and needs up grading. The schools are full along with the medical facilities.</p>	<ul style="list-style-type: none"> • See response to PO67 regarding ecology. • See response to PO67 regarding brownfield land. • See response to PO26 regarding the mills. • United Utilities has a statutory duty to provide capacity for new development so this is not a valid reason for development not to come forward in Biddulph. United Utilities considers that there is no need to expand the treatment works in the development plan period for the growth identified in the development plan. • See response to PO26 regarding Victoria Colliery and Childerplay Road • See response to PO128 regarding infrastructure capacity. • See response to PO26 regarding Education capacity.
PO4675	Mr A Hill				Object	<p>I would like to object to the allocation of the area (BD063A) Newpool Road Knypersley for the purpose of residential development under the local plan 2031 preferred options sites for the following reasons; The section of Newpool Road (BD063a) is already affected by high volumes of traffic at peak times and school hours. The access to site BD063a is a currently via a single carriageway access road, although there is an additional piece of land adjacent to the track it would still not provide a proper access to a residential development if 40 houses the access would need to be upgraded with a formation of a proper road junctions already on Newpool Road (e.g.: Road width 4.5m for development below 100 units and 1.8m wide pavements on both sides of the road) the need for visibility splay would also be required and based on the same road junctions already on Newpool Road (examples James Way, Henley Avenue and Birch Avenue) this would require the use of part of the garden areas of both numbers 58 and 60 Newpool Road (there would not be enough land to the front of number 60</p>	<ul style="list-style-type: none"> • See response to PO67 regarding highways. • See response to PO26 regarding access to site.

Question 19 – Do you have any comments on the proposed housing allocation BD068 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO1311	Mr Andrew Leysens	United Utilities Water Limited			General comment	<p>(Summary) We wish to emphasise the need to carefully consider the allocation of new housing sites in close proximity to our wastewater treatment works. In this regard we note that our wastewater treatment works (WwTW) in your local authority include: Biddulph WwTW; Biddulph Park WwTW; and Flash WwTW. We wish to highlight that a wastewater treatment works can result in emissions which include odour and noise. Therefore if you are considering any sites for new allocations, especially housing allocations, near to a wastewater treatment works, you should carefully consider the sites with your Environmental Health colleagues. This is important when comparing sites close to treatment works with potential alternative sites that may be available to you for allocation. This reflects our earlier correspondence to you. The position of United Utilities is that when considering a range of sites to meet housing needs, it would be more appropriate to identify new housing sites, which are sensitive receptors, that are not close to a wastewater treatment works. We note this point is particularly relevant to your assessment of sites considered for allocation in Biddulph as part of the current Preferred Options Sites and Boundaries consultation. In particular, site references BDO68, BDO62 and BDO87, which are sited in close proximity to Biddulph Wastewater Treatment Works. Notwithstanding this preference, if it is still intended to progress with the allocation of sites near to a wastewater treatment works for housing following discussions with your Environmental Health colleagues, we strongly recommend that your decision should be informed by: 1. an odour impact assessment; and 2. a noise assessment. If after having undertaken these assessments you still allocate land near to the wastewater treatment works for housing, we recommend that there should be detailed associated policy which identifies the need for mitigating measures including any that may be identified as a result of the assessments. We recommend that: 3. careful masterplanning is always prudent in order to mitigate the risk of odour and noise nuisance. For example, any on-site open space should be located so as to act as a buffer between the treatment works and any newly introduced housing. In addition the houses could be orientated so to most appropriately manage the impact of noise; and 4. appropriate soft landscaping is included to strengthen the buffer between the treatment works and the proposed new development. With regards to site ref: BDO68, which lies immediately east of Biddulph wastewater treatment works, the consultation</p>	<p>Comments noted.</p> <p>Noise and odour assessments have been produced on behalf of the land owner and received by the Council very recently. Noise mitigation measures are recommended which could potentially be implemented as part of a development scheme – no odour mitigation measures are considered necessary.</p> <p>It is now up to the Council to balance the planning issues in determining whether to select this site for development in the Local Plan.</p> <p>Detailed associated policy for the site will be included in the Local Plan if it is selected and it is acknowledged that careful master planning of the site will be required including appropriate screening /buffering. Similarly, the recommendations above will be incorporated into policy should the site be taken forward.</p> <p>It is noted that United Utilities infrastructure is present on this site and if this site is selected as an allocation, a requirement will be included in the policy for this site requiring the developer to enter into early discussions with United Utilities on this matter.</p>

Question 19 – Do you have any comments on the proposed housing allocation BD068 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						document indicates this could deliver approximately 70 new dwellings. We wish to highlight the presence of United Utilities' infrastructure at the site. This site is transected by a significant overground sewer running east to west through the site therefore we are flagging this as a constraint which needs further consideration. We wish to emphasise that United Utilities would require access and maintenance strips to its infrastructure to be retained. It is important to note that any developer of the site should not assume that the assets of United Utilities can be diverted, especially large assets like those within BDO68. Therefore if development is intended to take place in this location, we need to be consulted at an early stage to ensure our infrastructure is not compromised. We would ask any future developer(s) to contact us to explore options for addressing this as early as possible. We recommend this matter should be reflected in any detailed policy wording if you are minded to continue with the allocation of this site.	
PO2913	James Chadwick	Staffordshire County Council			General comment	In relation to sites BD068 there is likely to be a requirement for junction improvement at Marsh Green Lane/A527; a transport assessment will be required to consider this.	Comment noted. A Transport Assessment can be undertaken at the appropriate time.

Question 19 – Do you have any comments on the proposed housing allocation BD068 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO155	Mrs Beverley Webb				Object	<p>BD068 - Adjacent to Sewage Works – Western boundary of this site is Biddulph Brook which forms the Eastern boundary of the Sewage Works. Document produced by Defra - Code of Practice on Odour Nuisance from Sewage Treatment Works recommends very careful consideration of Planning Authorities allowing development adjacent to Sewage Works page 16 of this document is particularly relevant. As this documents states – because of the potential increased nuisance calls from a new adjacent development, this could increase all Biddulph residents’ water charges in order to offset the cost of upgrading the Sewage Works. Increased complaints to Environmental Health at SMDC, this could also impact on Council tax bills. The SMDC have a duty of care to protect residents from statutory odour nuisance. The working capacity of the Sewage Works is compromised following heavy downpours causing the sewage to overflow directly into Biddulph Brook and causing very powerful unpleasant smells. Also noise nuisance from the pumps working at high speed to cope with the ‘flooding’. This noise level is especially disturbing during evenings and throughout the nights. Complaint made directly to United Utilities on 29 th . April at 11.34am. In view of the above problem which is apparently caused by the design / construction of town sewer causing flooding in Gillow Heath and into Biddulph Brook - United Utilities say this cannot be solved without considerable funds, therefore it would sensible to maintain BD068 as a ‘cordon sanitaire’ (Buffer zone) between the sewage works and Portland Drive. Additional housing = additional problems = additional complaints to United Utilities and SMDC who have a duty of care to protect residents form odour/noise nuisance . SMDC Core Strategy SD Policy 4 states ‘ Pollution-sensitive developments should not be built next to polluting developments – page 108 refers. BD068 is also seen as a potential flood risk area from surface water according to the River Authority Map on website Environment Agency - GOV.UK . As a consequence of the building of new developments in Biddulph the issues mentioned above will increase. The current level of screening from a visual impact and noise from the sewage works can only be considered when the deciduous trees are in full leave. Building requirements for United Utilities are very specific regarding building over sewers. BD068 is probably riddled with old but still in use public sewer pipes which are probably not recorded by United Utilities given the age of some of the sewage system in Biddulph, and also a culverted watercourse therefore earth</p>	<ul style="list-style-type: none"> ● United Utilities has a statutory duty to provide capacity for new development so this is not a valid reason for development not to come forward in Biddulph. United Utilities considers that there is no need to expand the treatment works in the development plan period for the growth identified in the development plan. ● Noise and odour assessments have been produced on behalf of the land owner and received by the Council recently. Noise mitigation measures are recommended which could potentially be implemented as part of a development scheme – no odour mitigation measures are considered necessary. ● Current issues experienced by residents in regard to raw sewage flooding are a separate matter to be investigated by United Utilities. ● The site boundary can be amended to exclude land within Flood Zone 2. This approach has been agreed with the Environment Agency since their response to the consultation so a Level 2 Flood Risk Assessment is no longer required for the site. ● Screening of the sewage works would be required as part of any development on the site. ● The landowner and United Utilities are aware of the public sewer pipes running underneath the site and any new development would need to enter into early discussions with United Utilities regarding their infrastructure. This requirement will be included in the site policy. ● The Highway Authority considers that “the development of the site is acceptable subject to access design and visibility splays. Access is likely to need to be close to the bridge in order to meet visibility standards. Footway should be provided on the frontage to connect to the existing footway. Possible improvements to Marsh Green Road/Congleton Road junction. May be appropriate to realign Marsh Green Road to provide visibility to plot BD087 if possible and if agreement can be reached between owners”.

Question 19 – Do you have any comments on the proposed housing allocation BD068 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>moving vehicles could potentially fracture a hidden sewer pipe which would be an environmental disaster and a health risk. As Marsh Green Road is a single lane cutting with BD068 considerably higher than the road level access to the proposed development would have to be adjacent to the bridge over Biddulph Brook, therefore exiting the site turning east or west would turn into head on traffic as it is a single lane road in both directions. Also there is no footpath from Portland Drive going west. The road could not be widened to the required width of a feeder road complete with pavements to access BD068. Any development allowed on BD068 would severely impact on the Marsh Green Road/A527 junction which is already dangerously inadequate for the number of vehicles using Marsh Green Road which includes farm vehicles – tractors and trailers for example. Also Marsh Green Road is totally unsuitable for construction vehicles. The weight limit of the bridge over Biddulph Brook is unknown. Data provided by Staffordshire County Highways in October 2015 gave the following results for the A527:- Northbound direction shows that on an average day (24hrs) 7958 vehicles drive along Congleton Road. Of these 7958 vehicles the 85 th percentile speeds were 34.4mph. The peak of the volume was at 17:00 hrs with 601 vehicles travelling in this direction. Southbound direction shows that on an average day (24hrs) 7318 vehicles drive along Congleton Road. Of these 7138 vehicles the 85 th percentile speeds were 33.6 mph. The peak of the volume was at 17:00 hrs with 724 vehicles travelling in this direction. An average weekday peak hour two way traffic flow of 1325 vehicles. Obviously these figures will increase with additional development in Biddulph and there appears to be no planned road management improvements within the SMDC Local Plan.</p>	
PO132	Mr Dave Boothroyd				Object	<p>I do not believe that this is a suitable, or even possible area for housing development for the following reasons. 1: - Access. The area can only be reached by access along Mow Lane, which is very narrow, less than ten feet (3 metres) in width in places, with high banks on either side including protected mature trees. There are no footpaths on either side. 2: - Landscape and Geology. 3: - Flood Plain issues. There are powerful counter-indications against building on flood plains, highlighted by the major floods in parts of the country in recent years. The area is immediately adjacent to Biddulph Stream. When my wife and I moved to this area, our existing insurer declined our application because our postcode was flagged as an area at risk</p>	<ul style="list-style-type: none"> • See response to PO155 regarding highways. • Landscape Impact of development on the site has been assessed in the Council’s Landscape Impact Study (August 2016), the results for this site are: “Site is located within the north of Biddulph, south of Marshgreen Road. The site comprises fields enclosed by residential development to the north, east and south; and sewage treatment works to the west. The site is elevated above Marshgreen Road, however it is at a similar level to the adjacent residential development on Portland Drive, and has low visual prominence due to screening provided by the surrounding development and vegetation, particularly trees surrounding the sewage works. The site forms a gap in development, and therefore fits in well with the existing settlement

Question 19 – Do you have any comments on the proposed housing allocation BD068 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>from flooding. Indeed, there have been floods on both Mow Lane and Congleton Road in the last twelve months. Every house insurer now asks prospective customers if they reside within 100 metres of a watercourse. Any owner or tenant of a house built on this area will have to answer "Yes" to that question. Any developer needs to face the same scrutiny by the Environment Agency with respect to building on the flood plain.</p> <p>4: - The Sewage Works. Immediately adjacent to this area is the United Utilities' water treatment works. This would cause serious issues for any development on this area. The issues come under several headings. a. Visual aspects. A screen of trees hides the major part of the works from Portland Drive and Long Valley Road, in the summer at least. This is not the case in winter. Houses built on this area would have a clear and highly intrusive view of a huge steel structure of pipes, valves and pumps. Frequently vital work is carried out on this structure late into the night, using powerful floodlights. (Photographic evidence is available) b. Noise. Tanker lorries are used to remove waste materials from the works. On many occasions, installed heavy machinery (probably pumping equipment) is run late at night. Based on sound meter readings taken from Portland Drive, approximately 200 metres away, the noise level on a quiet night with the no machinery running was 46dB. On a different evening when the machinery was running the reading was 65dB. At 100 metres the sound pressure level, using the inverse square law, would be four times louder, that is 12dB more thus 77dB. At 50 metres the noise level would be 89dB, a further 12dB greater. Sustained noise levels of 90dB are a health hazard. As a reference the noise level in my very well insulated house, in conditions of silence, was measured as 20dB, which is the accepted level for "peace and quiet" in a house. 89dB in their gardens would be a statutory noise nuisance and would not be acceptable to residents of houses built on this area. c. Smell. The sedimentation tanks are all enclosed now, mostly because of serious complaints from residents of surrounding roads in the past. However, this has not completely solved the problem of the emission of foul smells. They do occur in Marsh Green, Portland Drive, Congleton Road, Mow Lane and Halls Road quite often (Three</p>	<p>form. Site is of low landscape sensitivity.”</p> <ul style="list-style-type: none"> ● See response to PO155 regarding Flood Zone 2. A planning application would still be needed before this (or any other) site could be developed and the Environment Agency is a statutory consultee. ● See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of sewage works. ● See response to PO132 and United Utilities (top of this table) in response to this consultation. ● In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site BD068 for release from the Green Belt. ● Education - The District Council is working with the County Council on the issue of school capacity. The County has determined that additional school provision would be required to support housing growth at the Primary phase of education. At this early stage in the site selection process there are a number of options for delivering school capacity dependant on the sites selected to take forward. ● Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations. ● Sites at Victoria Colliery and Childerplay Road are within the Green Belt like BD068. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy. ● The land to the north of Woodhouse Lane (west of the school) is not considered suitable for development, mainly due to the heritage impact on the nearby registered park and garden.

Question 19 – Do you have any comments on the proposed housing allocation BD068 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>times so far this year- most recently on Friday 6 th May 2016) It would be a serious concern to anyone purchasing a house built only twenty metres away from the works, and could be a serious health hazard, from flies etc. A spokesperson for United Utilities made the following statement in a letter dated 26 th May 2016:- “We have identified the need for the local planning authority to discuss any new housing near to the wastewater treatment works with their Environmental Health colleagues and give the sites very careful consideration when comparing these sites with potential alternative sites that may be available to them. Our position is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a wastewater treatment works.”</p> <p>5: - The Green Belt, and infill between settlement areas. As recently as this month, senior government figures have emphasised the importance of the green belt in preserving communities in their areas. The original intention of "green belt" was to separate and delineate areas that have traditionally been separate. This area alone represents a clear, agricultural break between the former separate villages of Biddulph and Gillow Heath. If areas BD087, BD068, BD062, were all to be developed, a pair of semi-rural communities would be engulfed and lumped together in a densely populated suburb without green spaces. The green belt would be utterly destroyed in complete negation of both past and previous government policy. Is this what is meant by "infill"? I believe that "infill" is something to be avoided, according to the guidelines.</p> <p>6: - Infrastructure. Any development on this site would fall into the present catchment areas of Ox Hey first school, Woodhouse Middle School and Biddulph High School. Each of these is operating currently at full capacity. None of the above schools have much opportunity for expansion. Prospective developers should be clear that they will need to provide the local authorities, or other providers with sufficient funds to create new schools, on new sites, within the next fifteen years, if proposed development targets are reached. Once again, taking all of the above proposed sites together, the resulting additional traffic using either the Marsh Green Road/ Congleton Road or the Hall's Road/Mow</p>	<ul style="list-style-type: none"> National planning guidance states that the Council should seek to meet the development needs of their area. Stoke on Trent City Council has its own development needs to meet.

Question 19 – Do you have any comments on the proposed housing allocation BD068 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>Lane/Congleton Road/ Smithy Lane Junction, neither of which is well served by visibility would be an extra level of hazard to junctions which are already dangerous. 7: - Amenity. Development on this site will result in a great loss of amenity for residents. People who bought their houses based on the assurance that the adjacent green space was green belt land forever, will be justified in, firstly opposing its inclusion in "sites suitable for development", and, should the development ever go ahead, in seeking redress for loss of amenity. Additional Site Options: - The map of proposed sites for Biddulph shows peripheral sites around most of the current boundary, with one exception. That is land to the north of Woodhouse Lane, west of the grounds of the school, and stretching from Woodhouse Lane to the boundary of Biddulph Grange and the Country Park. There is already development on this road, and the access would be from a relatively wide road. It is a large area with few houses that would be affected by the development. Based on a comparison of the area with the Uplands development, there would be room for up to 300 houses, allowing the Marsh Green and Gillow Heath developments to be removed. It is clear that there is a large area of properly restored, former mine working land on the site of the former Victoria Colliery to the south of Brown Lees Road, and a very large area of land on the east of the main road on Childerplay Lane. These two sites could hold the entire Biddulph Allocation with very little impact on existing residents and ready access to the main road. The preamble to the document states that some authorities have been able to agree with adjacent areas that part of their housing allocation be transferred from one to the other. It goes on to say that both Cheshire East and Stoke on Trent have no surplus land that could be considered for use by Biddulph. This is completely counter to the glaring evidence that can be gathered from a drive of no more than a mile from the southern boundary of Biddulph. There are many hectares of land lying idle and crying out for redevelopment at Chatterley Whitfield, plus a large plot on the other side of the road. A few hundred yards on the right, further along towards Oxford, there is large abandoned sports field. The entire 880 house allocation for Biddulph would fit into these three sites. Where is the evidence that Stoke has no</p>

						land? There are many, brownfield sites (H&R Johnson?) in the Stoke on Trent area. Perhaps the developers do not like them, but the citizens like their green belt more. The citizens should be given priority. That is what community involvement means.	
PO163	Mr Barrington Webb				Object	<p>Western boundary of this site is Biddulph Brook which forms the Eastern boundary of the Sewage Works. Document produced by Defra - Code of Practice on Odour Nuisance from Sewage Treatment Works recommends very careful consideration of Planning Authorities allowing development adjacent to Sewage Works page 16 of this document is particularly relevant. As this documents states – because of the potential increased nuisance calls from a new adjacent development, this could increase all Biddulph residents’ water charges in order to offset the cost of upgrading the Sewage Works. Increased complaints to Environmental Health at SMDC, this could also impact on Council tax bills. The SMDC have a duty of care to protect residents from statutory odour nuisance. The working capacity of the Sewage Works is compromised following heavy downpours causing the sewage to overflow directly into Biddulph Brook and causing very powerful unpleasant smells, as most residents living in the area are very much aware. Also noise nuisance from the pumps working at high speed to cope with the ‘flooding’. This noise level is especially disturbing during evenings and throughout the nights. Complaint made directly to United Utilities on 29 th . April at 11.34am. In view of the above problem which is apparently caused by the design / construction of town sewer causing flooding in Gillow Heath and into Biddulph Brook - United Utilities say this cannot be solved without considerable funds, therefore it would sensible to maintain BD068 as a ‘cordon sanitaire’ (Buffer zone) between the sewage works and Portland Drive. Additional housing = additional problems = additional complaints to United Utilities and SMDC who have a duty of care to protect residents form odour/noise nuisance . SMDC Core Strategy SD Policy 4 states ‘ Pollution-sensitive developments should not be built next to polluting developments – page 108 refers. BD068 is also seen as a potential flood risk area from surface water according to the River Authority Map on website Environment Agency - GOV.UK . As a consequence of the building of new developments in Biddulph the issues mentioned above will increase. The current level of screening from a visual impact and noise from the sewage works can only be considered when</p>	<ul style="list-style-type: none"> ● See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO155 regarding Flood Zone 2. ● See response to PO155 regarding site screening. ● See response to PO155 regarding presence of United Utilities pipes under the site. ● See response to PO155 regarding highways.

						<p>the deciduous trees are in full leaf. Building requirements for United Utilities are very specific regarding building over sewers. BD068 is probably riddled with old but still in use public sewer pipes which are probably not recorded by United Utilities given the age of some of the sewage system in Biddulph, and also a culverted watercourse therefore earth moving vehicles could potentially fracture a hidden sewer pipe which would be an environmental disaster and a health risk. As Marsh Green Road is a single lane cutting with BD068 considerably higher than the road level access to the proposed development would have to be adjacent to the bridge over Biddulph Brook, therefore exiting the site turning east or west would turn into head on traffic as it is a single lane road in both directions. Also there is no footpath from Portland Drive going west. The road could not be widened to the required width of a feeder road complete with pavements to access BD068. Any development allowed on BD068 would severely impact on the Marsh Green Road/A527 junction which is already dangerously inadequate for the number of vehicles using Marsh Green Road which includes farm vehicles – tractors and trailers for example. Also Marsh Green Road is totally unsuitable for construction vehicles. The weight limit of the bridge over Biddulph Brook is unknown. Data provided by Staffordshire County Highways in October 2015 gave the following results for the A527:- Northbound direction shows that on an average day (24hrs) 7958 vehicles drive along Congleton Road. Of these 7958 vehicles the 85 th percentile speeds were 34.4mph. The peak of the volume was at 17:00 hrs with 601 vehicles travelling in this direction. Southbound direction shows that on an average day (24hrs) 7318 vehicles drive along Congleton Road. Of these 7138 vehicles the 85 th percentile speeds were 33.6 mph. The peak of the volume was at 17:00 hrs with 724 vehicles travelling in this direction. An average weekday peak hour two way traffic flow of 1325 vehicles. Obviously these figures will increase with additional development in Biddulph and there appears to be no planned road management improvements within the SMDC Local Plan.</p>

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO135	Mrs D Jacobs				Object	The area would be accessed via Marsh Green Road. This is a narrow road which current traffic negotiates with difficulty. Increased housing in this area would cause increased difficulties especially at the junction of Tunstall Rd where the recent building of housing on the former Selectus site has already caused increased congestion and at time dangerous crossing. Two way traffic needs to be maintained on this road for the large tankers accessing the water treatment works and therefore the increase in traffic would cause considerable difficulties. The road is accessed by many families walking / biking to the bridal path. The additional traffic would make it very dangerous for these people to travel to and from the beautiful passage way. An extra 70 houses would put undue pressure on local schools. Both the first and middle schools close by are oversubscribed. They have recently been impacted by the Selectus site new builds. The proposed school sites would not be within walking distance for families moving into the BD068 site, therefore extensions would be required to the existing schools. This would not be in place prior to the homes being built causing pressure on the system. The houses would be built really close to the water treatment works which would cause difficulty selling the homes due to the noise and associated ongoing activities of the plant through the day and evening. The building of homes on green belt land will further detract from people wishing to live in Biddulph. These fields form a boundary between the North of Biddulph and the Gillow Heath community. Homes on this site would merge the two together, further eroding the integrity and identity of the areas.	<ul style="list-style-type: none"> ● See response to PO155 regarding highways. ● See response to PO132 regarding Education. ● See response to PO155 regarding noise and odour, existing raw sewage flooding and capacity of water treatment works. ● See response to PO132 regarding the Green Belt Review.
PO976	Mr Peter Turner				Object	The site shares a boundary with the only sewage works in Biddulph which is already working over its' designed capacity population of 17,000 people (2011 Biddulph census 19,892). Local residents on Long Valley Road, Portland Drive, York Close, Essex Drive and Marsh Green Road already experience unacceptable amenity impacts in their homes such as noise, odour and raw sewage flooding. In periods of heavy rain, raw sewage floods the system, backfills and pollutes private properties (experienced by 34, 36 and 38 Essex Drive). Building houses on this site even closer to the sewage works will increase these unacceptable impacts, leading to an increase in statutory nuisance incidents. It contradicts SMDC LDF Core Strategy SD Policy 4 where the Council states that it will refuse schemes which are pollution-sensitive adjacent to polluting developments. 1. "The Council will ensure that the effects of pollution (air, land, noise, water, light) are avoided or mitigated by refusing schemes which are deemed to	<ul style="list-style-type: none"> ● See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO132 and United Utilities (top of this table) in response to this consultation. ● See response to PO132 regarding the Green Belt Review. ● See response to PO155 regarding Flood Zone 2. ● See response to PO155 regarding highways. ● Site BD068 will be required to provide a percentage of affordable housing / starter homes to benefit those in the community needing affordable housing. ● No contradiction with SMDC Core Strategy Policy SS5b 'Biddulph Area Strategy'. Sites within the urban area and an extension to the urban area are included as well as extensions in the Green Belt identified as part of the Green Belt Review as stated in the policy.

						<p>be (individually or cumulatively) environmentally unacceptable and by avoiding unacceptable amenity impacts by refusing schemes which are pollution-sensitive adjacent to polluting developments, or polluting schemes adjacent to pollution sensitive areas, in accordance with national guidance.” SMDC LDF Core Strategy SD Policy 4 2. During periods of heavy rainfall, the sewerage system cannot cope and the site experiences an overflow of raw sewerage from the man-hole covers which then runs directly into the Biddulph Brook (evidenced with sanitary products distributed around the sewerage treatment facility pipes at the end of Essex Drive).</p> <p>3. This happens on a regular basis, with the latest occurrences being in November 2015 and March 2016, when both United Utilities and the Environment Agency were forced to clear the pollution (Environment Agency staff (identified by uniforms) in Biddulph Brook witnessed by residents).</p> <p>4. Residents in Gillow Heath (York Close, Essex Drive, Long Valley Road, Portland Drive, Marsh Green Road) are repeatedly contacting United Utilities & SMDC to deal with cases of noise, odour and raw sewage pollution. Houses should not be built even closer than these. It contradicts the following SMDC LDF Core Strategy statement: “The NPPF directs Councils to proactively provide needed economic development - however decisions should ensure that new development is “appropriate for its location” in pollution/contamination terms; and more generally development should contribute to securing good standards of amenity and reducing pollution.” SMDC LDF Core Strategy. Section 8.2.11 6. The current capacity of the United Utilities sewage treatment works is reported to be serving up to 17,000 residents. The population of Biddulph as at 2011 census was 19,892 residents. An increase of 885 houses (approx. 3,000 people) will obviously require investment in this facility. This will not be facilitated by the inclusion of numerous small development sites, but rather fewer larger sites which are able to effectively utilise the CIL. 7. Email received from United Utilities by myself on 8/6/16 states, “We have held a recent discussion with officers at the local planning authority regarding the emerging development plan and specifically discussed the possibility of new housing near to the wastewater treatment works. In undertaking an assessment of which sites are most suitable, we feel that it is appropriate to highlight to local planning authorities the proximity of sites near to wastewater treatment works. We have explained that a wastewater treatment works can result in emissions which include odour and noise. We have identified the need for the</p>

						<p>local planning authority to discuss any new housing near to the wastewater treatment works with their Environmental Health colleagues and give the sites very careful consideration when comparing these sites with potential alternative sites that may be available to them.” Therefore, the utility provider advises against releasing development land close to the water treatment works. Evidence of best practice shows waste treatment works not recommended for close boundary development. The site is currently protected as Greenbelt, and only considered suitable for release from the Greenbelt under exceptional circumstances. Removing this site from the Greenbelt prioritises development in the floodplain which contradicts SMDC LDF Core Strategy Policy SD 4 when a range of sites are available. Exceptional circumstances are not demonstrated. Its inclusion contradicts SMDC LDF Core Strategy Policy SD 4 where development proposed...”will be guided to first make use of areas at no or low risk of flooding before areas at higher risk... “ The site is in Flood Zone 2 Development close to the waste water and sewerage treatment works will result in increased raw sewage overflow close to the nearby residences as well as polluting the watercourse, Biddulph Brook. Neither the distributor road (Marsh Green Road) nor the feeder roads (Portland Drive) meet the minimum standards for the SCC Highways Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are at least two pinch points on Marsh Green Road which cannot be avoided as there is no alternative access to this site. Marsh Green Road is a dangerous road with no footpath. There is no scope for the required improvements. The feeder road is far below the minimum design standard for radii of access road bends – measuring less than 8m (Standard = 10m) The feeder road is below the minimum design standards for width - 4.9m (Standard = 5m) The distributor road (Marsh Green Road) is significantly below minimum design guidelines with a minimum measured width of 4.3m (Standard = 6.7m). Access to Portland Drive and the site off Marsh Green Road is restricted from both directions by a very tight bend and a road narrowing pinch point a maximum width of 5.4m, below the design guide standard of 6.7m. The junction of Marsh Green Road with Congleton Road is significantly below required standards for vision splay (south) due to the incline of the approach to the junction and tree line obstructions. Fire tender access to within 45m of the most distal aspect of the development cannot be guaranteed due to narrow roads and regular on-street parking.</p>

						<p>Its inclusion contradicts SMDC LDF Core Strategy Policy T1 “ Ensuring that all new development is located where the highway network can satisfactorily accommodate traffic generated by the development or can be improved as part of the development.” This site will deliver too few homes to add a measurable contribution to the Community Infrastructure Levy (CIL), it will not bring any direct benefit to the community of Gillow Heath. Its inclusion contradicts the SMDC LDF Core Strategy Biddulph Area Strategy where new housing allocation is prioritised on urban extension land to the west of the bypass and where developments help secure infrastructure improvements for the benefit of the newly developed part of the town. Improvement works to the adjoining, and only, United Utilities waste water and sewage treatment works requires massive CIL contribution, which is only possible from a large-scale development elsewhere. Improvements to feeder and distributor road accesses are not possible due to the relatively small scale nature of the development.</p>	
PO748	Mr Paul Malkin				Object	<p>Save Biddulphs Green Belt Firstly I would again like to comment that the Councils marketing of this consultation has been extremely poor, it has been left to residents associations and concerned residents to spread the bad news in their community. As council tax notices were sent to all residents a few weeks prior to the consultation starting then I would have expected the promotion of an important issue like this to have been included in that delivery. I feel SMDC have missed a real opportunity to work in partnership with neighbouring authorities to produce a North Staffordshire plan that could deliver the required housing whilst protecting green belt and identifying brownfield sites to continue to regenerate the area. When I asked if this had been considered at the Biddulph consultation meeting the council officer advised me that this had not been considered as "nobody wants to live in Stoke". I find this attitude from a council officer pretty appalling and if this is the attitude of the planning team then no wonder an innovative partnership approach had not been considered. Stoke have been successfully regenerating and redeveloping brownfield sites in the area for many years and I believe SMDC could learn a lot from their approach. In addition Stoke and Newcastle are where the job opportunities are being created and many residents of Staffordshire Moorlands will travel there for work and leisure and probably would want to live in these areas. The proposed sites for development are not only in green belt areas, but also along the boundaries of existing residents. The sites are going to have a detrimental impact on</p>	<ul style="list-style-type: none"> ● The consultation was widely publicised and included a flyer being sent to all households and businesses in the District through Royal Mail. High levels of responses have been received by the Council from Biddulph residents which suggests that a significant number of residents knew about the consultation. ● See response to PO132 regarding developing sites in Stoke instead. ● See response to PO132 regarding the Green Belt Review. ● Property values are not considered material in planning law. ● Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph (in particular Yarn Mill and Minster Mill) would be appropriate for residential development. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph’s housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping brownfield sites. ● See response to PO132 regarding Education and Victoria Colliery and Childerplay as alternative locations for development. ● It is agreed that affordable housing is needed locally. Site BD068 will be required to provide a percentage of affordable housing / starter homes so will contribute to this need. ● See response to PO155 regarding highways. ● See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of sewage works.

Question 19 – Do you have any comments on the proposed housing allocation BD068 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>current council tax payers of the district who purchased properties at an inflated rate due to overlooking beautiful open fields. These residents are not only going to lose their beautiful views but also thousands of pounds from the value of their homes. I propose a number of sites that will have a minimal impact on the green belt and current residents. The Mills in Station Road and Walley Street are in desperate need of repair or regeneration. These could either be developed into apartments for young first time buyers or older persons or demolished and new properties built. This accommodation is far better situated close to the town centre and will keep the area more in keeping of the newer properties around them. There is also old brownfield land available either side of Congleton Road in Knypersley, the former Victoria Colliery site and the land behind Bemersley recycling centre off Childerplay Road. All of these sites have much better access to the main roads than the proposed sites that are all reliant on single track country lanes. What is required locally is housing to meet the needs of local people, there are key issues to address, young people can not get onto the housing ladder and have to resort to renting that can cost more than mortgage payments and there is an ageing population that require housing to meet their needs. What I would expect the planning department to complete before any development plans are signed off is a thorough research project to identify what is actually required locally, what is affordable to the local community and what the mix of starter homes, shared ownership and social rent homes should be. The Housing and Planning Bill has recently been passed and this includes the development of starter homes for first time buyers as part of the affordable housing requirement. These homes can be for sale up to £250,000 outside of London. Local salaries of young first time buyers would not make these affordable, SMDC must ensure that affordable homes to purchase are for sale at a price that local people can afford. The type of houses that are required should also be researched, surely the requirement is for smaller affordable homes, 1 bed apartments for singles and couples and older people to downsize to and then 2 and 3 bed homes for young families And not 4 and 5 bed homes that will generate developers a greater return and the council higher rates of council tax. I also made a freedom of information request to the district council with regard to the recent development at Uplands Mill in Biddulph asking for the breakdown of owner occupation, shared ownership and social housing and how many nominations had been made for local people to the social</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD068 in Biddulph?

						<p>landlord, unfortunately this has not been provided in time for me to include this within this response. The reason I made this request was to be able to identify if there was a need for social housing in Biddulph or if the housing association had to widen its search for tenants to the north west, which I believe to be the case. In addition to the above, the below comments are why I feel the proposed sites should be reconsidered. Highway - too narrow, single vehicle for most of Marsh Green Road and Well Lane. At the junction with Congleton Road the carriage way is raised in both directions making it extremely difficult to see fast moving traffic coming either way. Congleton Road to Stoke gets congested and backs up at Knypersley lights and Chell roundabout, this will get worse with other developments so residents will naturally take the lanes towards Gillow Heath and up to Mow Cop and Harrishead. These lanes are single tracks with blind bends, where the road widens in Gillow Heath parked cars make it difficult to pass and the bus currently has problems getting through. Pedestrians use this lane with no pavement going to cycle track and children going to school and numerous properties in Marsh Green Road lead directly onto road, any increased traffic will make these roads dangerous and put users of them more at risk. Construction traffic will also find these areas increasingly difficult to navigate. Environment - after heavy rainfall there is often smells from the sewerage plant and it is known to overflow into the stream. Following heavy rain Marsh Green Road is like a river for many hours with water flowing from the fields, should this water be caught in the drainage system the sewage works will be constantly overflowing. The sewerage works is already servicing more properties than it is designed to. Schools - as there are currently not enough first school places for children that live in the area, I assume the schools will be built first before any housing development. As a new first school is to be built has a review taken place to ensure that there will be places at the local middle and high schools to accommodate these additional children, or are class sizes going to increase resulting in a drop in educational standards?</p>	
PO1108	Ann Wright				Object	<p>What type of provisions would be provided for the stream and river management for the houses in Akeshire Lane? Also the water treatment facility as this is at capacity NOW. The proposed plots BD062 and BD068 would stop the treatment plant from being enlarged and at the moment the odours from the present plant are terrible as you walk along the track or Long Valley Road.</p>	<ul style="list-style-type: none"> See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of sewage works.

Question 19 – Do you have any comments on the proposed housing allocation BD068 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO10281	Cllr Chris Wood				Object	Sites such as BD062 and BD068 are completely unacceptable because the authority has a duty of care to ensure smell from sewerage works do not cause issues for housing within the proximity of the sewerage works and the site in Biddulph does emit odour which is both distasteful and unpleasant.	<ul style="list-style-type: none"> See response to PO155 regarding odour from sewage works.
PO2705	Mr Martin Ross	Environment Agency			Object	2 sites in Biddulph are adjacent to the same watercourse. There is a floodplain extent on the western boundary but this is poorly defined at present. A level 2 assessment will be required for these.	<ul style="list-style-type: none"> The site boundary can be amended to exclude land within Flood Zone 2. This approach has been agreed with the Environment Agency since their response to the consultation so a Level 2 Flood Risk Assessment is no longer required for the site.
PO4634	Mrs Wendy Boothroyd				Object	I do not think these areas are suitable for housing for the following reasons: Access Marshgreen Road is a narrow road in some places less than 10feet. With steep banks and in one part it is single track with a very sharp blind bend leading to a narrow bridge which crosses the cycle tracks. An increase in traffic would be very hazardous to people walking the tracks. Also this road is not suitable for heavy vehicles. There is no street lighting which makes it very dangerous for the children walking to school. Landscape The land between Portland Drive there is a deep gully which was once a water course. This has been culverted but when it rains heavily it still floods. Local knowledge is that the land in this area is unstable due to shifting sand which would make it unsuitable for housing. Flood Plain The land adjacent to Biddulph Brook, and again particularly the level of the Brook rises causes flooding issues. When I moved here my insurer could not transfer my insurance because the post code flagged up as a flood risk area. Housing being built nearer the Brook could possibly find themselves un insurable as company's now ask if your 100 meters of a water course, Sewage Works The sewage works is screened by trees for part of the year, but during the Winter Months is quite visible. Housing in this area would have a clear view if the metal structure, and quite often when work is being carried out large floodlights are used. Also the noise when the pumps are going is obtrusive in Portland Drive, also the smell on occasion is very offensive so property nearer would even more inconveniences which could become an environment issue. A spokesperson for United Utilities made the following statement by letter dated 26 th May 2016: We have identified the need for the local planning authority to discuss any new housing near to the waste water treatment works with their Environmental Health colleagues, and give the sites very careful consideration when comparing these sites with potential alternative sites that may be available to them. Our position is that when considering a range of sites to meet the housing of the borough, it would be more appropriate to identify new	<ul style="list-style-type: none"> See response to PO155 regarding highways. See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. See response to PO155 regarding Flood Zone 2. Question 19 – Do you have any comments on the proposed housing allocation BD068 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						housing sites that are not close to a waste water treatment works. Green Belt The government have emphasised the importance of Green Belt in preserving communities in their areas. These sites form a natural barrier with Gillow Heath and if these sites plus others were developed semi-rural areas would be engulfed and densely populated suburb without Green spaces will be formed. Infrastructure Development on this site would fall into the catchment area for Woodhouse Middle School, and Oxhay School, both schools are always well subscribed and therefore maybe unable to cope with a large intake. Also the junction on Marsh Green Road/Congleton Road has very poor visibility and increase in traffic would make the junction more hazardous and dangerous. Amenity The properties adjacent to the Green Belt in Portland Drive are all single story dwellings, and regulations state that new development should be in keeping with these properties. If this is the case then development on this land could only consist of single storey dwelling's as loss of light and privacy would be an issue to existing properties. Additional Sites As Brownfield sites are supposed to be the preferred option, there is a large area of the properly restored former Victoria Colliery on Brown Lees Road. Also there is a large area of land east of the main road on Childerplay Lane. These two sites could hold the entire Biddulph allocation with very little impact on existing residents with ready access to main road and bus services.	
PO4615	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Object	BD068 - Originally planners agreed 300ft gap to sewerage works this fills the gap. Concerns re access and proximity to sewerage works, other concerns with noise and smell not recommended for inclusion.	<ul style="list-style-type: none"> ● See response to PO132 regarding the Green Belt Review. ● See response to PO155 regarding highways. ● See response to PO155 regarding noise and odour of water treatment works.
PO5730	Mrs Eileen Smith				Object	I object due to impact on highway infrastructure.	<ul style="list-style-type: none"> ● See response to PO155 regarding highways.
PO7223	Mr B Roberts				Object	Northern plots – York Close, Marsh Green, Portland Drive. These developments are very close to the sewerage works. Problems remain with proximity and also capacity and space available for any possible need for expansion of the sewerage works.	<ul style="list-style-type: none"> ● See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works.
PO7367	Mr John Hayley				Object	As a Biddulph resident I call on SMDC to remove areas BD062 & BD068 from the 2012-2031 Local Plan Preferred Option Sites. I believe that Staffordshire Moorlands District Council needs to consider the following: Areas: BD062, BD068 and BD083 1. In my view it is totally inappropriate to build new housing on	<ul style="list-style-type: none"> ● See response to PO132 regarding the Green Belt Review. ● See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO155 regarding site screening. ● The land is privately owned so delivery of a community forest is

						green fields within the Green Belt in such close proximity to Biddulph's sewage treatment plant. I would not wish future generations of my family to have to live in such housing and it is not appropriate to make town boundary changes in this vicinity. It would be impossible to produce a "wide choice of high quality homes" at this location (NPPF paragraph 50) and the type of housing that could be built here is likely to have a large negative effect on social cohesion and quality of life within the existing Gillow Heath community. This development would harm the reputation of this area of Biddulph from a housing perspective. 2. Because of its proximity to the urban environment I believe that it remains sensible for the sewage treatment plant to be heavily surrounded by trees. One suitable productive use of this land might therefore be, not to use it for housing, but to use it instead to secure reductions in greenhouse gas emissions. Options might include: carbon capture, forestry and coppicing, or creation of a small Community Forest – all done in support of a low carbon future for Biddulph.	unlikely.
PO6736	Mr Michael Martin				Object	Object to BD068 - site is TOTALLY unsuitable for development. ALL of these sites are within metres of a full to capacity sewerage works already working to overcapacity. We regularly have sewage smells, the nightly warring of machinery, and when walking in the adjacent fields have seen evidence of sewage overflow. The health limitations are obvious. The lane leading to BD087 is one cars width, no footpath, houses adjoining the lane have their own boundaries right up to the lane. Many years ago my wife and i together with numerous neighbours attended a site meeting at the actual works and were told by a United Utilities area manager that the houses in Portland Drive, York Close, and Long Valley Road should never have been built..... we register our total objections to this area. The preferred area was the old Victoria Colliery that has been totally reclaimed and is ready to use.	<ul style="list-style-type: none"> ● See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO155 regarding highways. ● See response to PO132 regarding Victoria Colliery as an alternative location for development.
PO8305	Mr A Hague				Object	Site has poor access to main road A527 Would spoil green belt which i feel would spoil nice area of Biddulph Question who would choose to live any nearer to a sewage works than the houses in Marsh Green Road and Portland Drive We can occasionally hear noise from the sewage works at night. The odour has improved since 1980s but we still get smells occasionally Preferred Sites - The Old Victoria Colliery Land off Childerplay Road Mills close to town centre. All have good access to A527 Would not spoil green belt question why spoil green belt and spoil what we have in Biddulph.	<ul style="list-style-type: none"> ● See response to PO155 regarding highways. ● See response to PO132 regarding the Green Belt Review. ● See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO132 regarding Victoria Colliery and Childerplay as alternative locations for development. ● See response to PO748 regarding use of derelict buildings in Biddulph.

PO9048	Mr and Mrs Siddorn		G. Willard		Object	Object to inclusion of this site. The site has significant highway, drainage, ecology, odour and other constraints which local people will require the LPA to address.	<ul style="list-style-type: none"> ● See response to PO155 regarding highways. ● See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO155 regarding Flood Zone 2. ● The Council has had an extended Phase 1 Habitat Survey undertaken on this site in 2015. The site has been deemed to have ecological importance due to the presence of trees with bat roosting potential, potential reptile populations and good connectivity to other biodiverse habitats. The following surveys/ actions are therefore recommended prior to any potential development works being carried out: <ul style="list-style-type: none"> ▪ A bat survey regime to ascertain whether bats roost in the tree ▪ Reptile survey ▪ Badger survey ▪ Vegetation removal at the appropriate time of year There is no evidence at present to suggest that the site cannot be developed for ecological reasons.
PO9007	Mr Denver Johnson				Object	<p>I've been a resident of Biddulph for forty one years and have seen many developments in the location over the years. Happily over that time the green spaces and views have survived relatively unchanged within that time, maintaining the spirit of a rural conurbation. The current threat to those very Green Belt spaces that set Biddulph apart as a little gem is untenable. It seems that crooked National government have connived with big developers (party sponsors) to twist arms up backs of Development Officers and override Councillors/Local Public Opinion to cherry pick development locations that they hope will bring in the most cash. Stupid insofar that any big development so close would bring down local property prices. The infrastructure of our little end of Biddulph has always been strained by the population level, to suggest that the number of houses could be doubled is ludicrous. The main drawbacks to our location have always been increasing traffic on the A527 (it's too crowded now), flooding (gardens in the best drained locations tend to get boggy in Winter - the weather is getting wetter and some local actions like selling off the Grange and allowing the marsh drying Rhododendrons to be mass destroyed didn't help) and when the wind is in the wrong direction, the smell from the close sewage works. The placing of large developments even closer to the sewage works seems more like a criminal act than a thoughtless oversight. The Abbeystead, Lancashire waterworks disaster of May 1984 where a methane gas explosion severely wounded forty four people and killed eight outright including a mother and child should never be allowed to be forgotten. The cause of ignition has never been determined, however the good sense of at the</p>	<ul style="list-style-type: none"> ● See response to PO132 regarding the Green Belt Review. ● See response to PO748 regarding property values. ● See response to PO155 regarding highways. ● See response to PO155 regarding Flood Zone 2. ● See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO9048 regarding ecology. ● Heritage Impact of development on the site has been assessed in the Council's Heritage Impact Study (August 2016), the results for this site are "There is one Grade II* and eight Grade II Listed Buildings, and a Registered Park and Garden which is also a Conservation Area within the 400m buffer. There was no public access on to the site which is elevated above Marshgreen Road, and it is at a similar level to the adjacent residential development on Portland Drive. Development would be unlikely to cause high adverse effects to the settings of the heritage assets as development would be seen in context of the existing housing estate. Development would not adversely affect HLC zone BBHECZ 8 (Historic Environment Character Assessment 2010). Site suitable for development in heritage terms." ● The land is privately owned and no public rights of way cross the site.

						<p>very least leaving as many fields as possible around them was once enforced by law. Private takeover of Public utilities seems to have greyed this issue. From an explosives perspective (I'm a Physical Science Graduate) placing houses closer to such an installation is akin to packing a bomb with shrapnel and strapping innocent victims to it! Won't allowing these developments be exponentially raising the risks of the site being used as a terrorist soft target? How many other locations are there Nationally like this one, with the added blast focus of the steep valley sides? New houses on the proposed sites would not just be putting lives of new residents at risk. Wildlife - Biddulph attracts some rarities like buzzards and herons, sustains a large population of wild rabbits along with frogs, toads, snakes, foxes, stoats, badgers and hedgehogs. Pheasants, crows jackdaws, jays, magpies, woodpeckers (green and spotted) along with a large variety of the smaller birds. All of these animals would be hit by the loss of the green spaces and the draining of marshland. Heritage - Biddulph originated in the lee of the old 13th century Norman fort/castle built in Bailys Wood. All of the Mediaeval village would have been centred on the brook. The road from the South along the brook would have been important, but the fair road that no longer exists, running East West through the village would probably have been more important to the community and the North road out towards Congleton may not have been there since the fort was put there to control the area boundary. Bradley Green was the name of the village now using the name Biddulph. See 1806 map: http://www.visionofbritain.org.uk/maps/series?xCenter=3216685.06303&yCenter=2985192.16842&scale=633600&viewScale=181417.4208&mapLayer=nineteenth&subLayer=smith_1806&title=C.%20Smith%20New%20Map%20of%20Great%20Britain%20and%20Ireland&download=true Biddulph Castle - Biddulph Lea Forge http://www.gatehouse-gazetteer.info/English%20sites/3308.html Archaeology - ancient Biddulph is still burried below the fields (inc. BD087) between Marsh Green Road and Bailys Wood. Bakers South field (BD068), from hearsay, was called 'the old garrison' - it's sited ~1000M South West of the old Biddulph Hall and would have been a very probable place for a Parliamentarian cannon battery during the Civil war. I've found shards of what appear to be iron age or older pottery in this field close to the brook. I've got this depiction from a mix of reading and hearsay, but am currently in contact with 'The Biddulph Museum'. See: http://biddulphmuseum.com/index.html Flooding - Marsh</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD068 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						Green gets it's name from a long history of flooding. The glacial alluvial valley floor is an area for subsidence even without the help of the many mines close to the area and the existence of a large underground reservoir at our end of the valley that is the reason for there being less pit shafts this end. Access - Marsh Green road is a single track, dangerous to the many pedestrians that have to cross it daily on their way to the old railway line (Biddulph Valley Way - Route 55) and cars that face meeting on the sharp blind bend next to Suttons old farm. Marsh Green Road was at it's safest when it was blocked off at the sewage works entrance to facilitate work on the bridge over the brook. BD068 - has a history of flooding. The field is boggy during the Winter and Spring with signs of subsidence. The field seems to have had several old mill ponds fed by the brook, they will have powered small grinding mills during the eighteenth Century. The middle field and field closest to Marsh Green Road seem to have a man-made escarpment between them, most probably the remains of a seventeenth Century gun emplacement/ cannon battery from the English Civil War. I have found pottery fragments on the surface of this field that appear to be ancient: fourth Century or older maybe. Biddulph brook regularly gets charged with raw sewage, it gets much of it's volume by taking the constant discharge from processed sewage: it is categorically 'unfit for human consumption'. During the Summer the field is home to local cattle, it regularly hosts wild life. The field provides a pleasant buffer zone between the houses on Portland Drive and the houses to the rear. In the cold months it makes an excellent dog walking space used by many local people.	
PO9036	The Hart Family		Rob Dunca n		Object	Whilst this site is acknowledged to have a limited impact on the Green Belt owing to it being effectively enclosed by existing development, the narrow and convoluted nature of Marsh Green Lane means that enhancements to the local highway network are likely to be necessary. By comparison, my client's site benefits from two existing vehicular access points onto parts of the highway network that are suitable for additional traffic, and which will enable vehicles to pass safely.	<ul style="list-style-type: none"> ● See response to PO155 regarding highways.
PO9225	Mr Peter Wilshaw				Object	(Summary) The development of future Housing and any future Solar Farm installation would squeeze the natural life from the valley. It would deplete the Green Belt and detrimentally and dramatically alter the landscape and negatively affect the wellbeing of the people of Biddulph and in particular Gillow Heath. I hope that planners will reconsider the preferred option taking into account the following; Unsuitable road network . These proposed housing sites are situated along the gateways	<ul style="list-style-type: none"> ● See response to PO132 regarding the Green Belt Review. ● If the site is taken forward in the Local Plan, exceptional circumstances which justify its release from the Green Belt would have to be demonstrated. ● See response to PO132 regarding landscape impact. ● See response to PO155 regarding highways. ● See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works.

						<p>to our countryside and walking tracks e.g. Akeshire Lane, Holy Lane, Mow Lane and Marshgreen Road. These narrow roads already carry an unacceptable level of traffic which when combined with a heavy footfall of walkers with children and animals presents a real danger. This danger is also manifested in the fact that they all lead to crossroads on the A527 at Marshgreen and Smithy Lane which are difficult places to emerge from. If these lanes require widening or other safety upgrade it highly likely the ancient hedgerows will be destroyed and therefore the characteristics of that landscape lost for ever. Situating parking places at various spots on the west side of the valley at medium to high elevation would enable access to many walking tracks and elevate the mix of cars and people on the narrow lanes. Diminishing of the Green Belt in the short and long term. The release of Green Belt land, according to the NPPF, should only take place in “exceptional circumstances”. There is not statement to say what those circumstances are and why land can be released in Biddulph and other places but, not in Leek? Biddulph valley is also a gateway to the moorlands and The Peak District National Park. It was granted the title of “The Garden Town of Staffordshire” and over twenty years of volunteer effort to showcase the town, Biddulph in Bloom Charity has won many RHS Heart of England in Bloom awards and in 2015 came second in the National Large Town category. I feel that the location and magnitude of these developments will adversely affect the confidence, so hard fought for, in the effort to improve our town and increase tourism. Sites BD062, BD068 and BD087 are unsuitable areas to build houses being adjacent to a water treatment plant and the Biddulph Brook. In many respects this plan does not meet the Core Strategy of SMDC and SCC in meeting their own obligations stated in the Historical Environment Assessment Report which is to protect and retain the character of the landscape and follow and develop many of the recommendation therein. There is a finite limit to the availability of land on which to build houses and the limit to where the wellbeing and recreation of the population is detrimentally affected. The County’s Historic Environment Assessment demonstrates that this area has historic value in terms of heritage and historic landscape character.</p>	<ul style="list-style-type: none"> • See response to PO155 regarding Flood Zone 2. • See response to PO9007 regarding heritage impact.
PO9687	Mrs P Hancock				Object	Access (Mow Lane) is too narrow.	<ul style="list-style-type: none"> • See response to PO155 regarding highways.

PO10223	Mr Graeme Court				Object	(Summary) Strongly object to the allocation of this site due to the following reasons: 1) It would prioritise building in the floodplain. The land acts as a natural soakaway for rainwater. (Photos attached). 2) site is next to the Water Treatment Works where there are issues of odour and noise. (Email from United Utilities attached). 3) during periods of heavy rain, the sewers cannot cope and raw sewage is admitted to drains in Marsh Green Road finding its way into Biddulph Brook. Development would exacerbate this and would be contrary to adopted Core Strategy SD4. 4) The land is currently used for grazing 5) it would damage the amenity value of this part of Biddulph 6) the site is in the Green Belt and there are other sites available for development. 7) site is a conduit for diverse wildlife. The Phase 1 survey stated that other surveys needed to be carried out. 8) March Green Road is a very dangerous road. Further development would exacerbate problems here. This would be contrary to Core Strategy T1. 9) BD068 is too far from the town centre. 10) The capacity of the water treatments works is insufficient. More recently Biddulph NT gardens have agreed that their waste can now go via the works which will make things worse.	<ul style="list-style-type: none"> ● See response to PO155 regarding Flood Zone 2. ● See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO132 regarding the Green Belt Review. ● See response to PO9048 regarding ecology. ● See response to PO155 regarding highways.
PO10091 PO10130	Mr & Mrs S & C Fielding Mrs Anne Young				Object	(Summary) Object to the development of this site for the following reasons: Proximity of the sewage works which is already overloaded; Flooding of raw sewage; Flooding of brook (see picture attached); Amenity issues associated with sewage works e.g. noise; Local road network could not cope with further development; Emergency access; Impact on ecology; Impact on infrastructure - e.g. doctors surgeries are full; Impact on Middle Schools and High School which would not be able to cope; Lack of demand for new housing - Uplands Mill units have not all sold; Loss of Green Belt; and Not the best use of CIL. I think that this site should be included as visual or public open space within Biddulph.	<ul style="list-style-type: none"> ● See response to PO155 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO155 regarding Flood Zone 2. ● See response to PO132 regarding amenity issues. ● See response to PO155 regarding highways. ● See response to PO9048 regarding ecology. ● National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered. ● See response to PO132 regarding Education. ● The new Local Plan will cover a period to 2031 so lack of demand (perceived or actual) at one point in time is not a valid reason for not meeting the area's objectively assessed housing needs (as required by Government policy). ● See response to PO132 regarding the Green Belt Review. ● See response PO9225 to regarding exceptional circumstances for loss

							<p>of GB.</p> <ul style="list-style-type: none"> • See response to PO976 regarding community benefit • The land is privately owned so cannot be designated as Public Open Space. The site is not recommended for designation as Local Green Space in the Landscape, Local Green Space and Heritage Impact Study (2016). Local Green Space supersedes the Visual Open Space designation (which is an old designation not supported by Government policy in the NPPF).
PO4570	Mrs L Jones				Object	Also sewage works at full capacity and proposed overlooked. Plots BD062 & BD068 would appear to prevent enlargement of the existing treatment works, also more Dr's places needed can't cope with what we have got.	<ul style="list-style-type: none"> • See response to PO155 regarding capacity of water treatment works. • See response to PO10091 regarding infrastructure.
PO4671	Mr Arthur Potts				Object	Objections to developing site BD068 for housing and changing it to omit this site from its protection. I am now in possession of a copy of Town Councillors Court letter to you dated 09.26.2016 regarding proposed housing sites BD068, BD062 and BD067. I fully support and endorse the statements and arguments put forward by Councillor Court. However, I am extremely concerned regarding the entirety of these 'Planning Proposals' which appear to be superficial overview to increase the population of the town of Biddulph without any considerations of the town itself. The existing car parking provision is currently hardly adequate at busy times to relate to the functions of the town itself. To include major residential developments this will generate considerable additional car ownership will have a most adverse effect on the town centre itself due to the physical inability to provide essential additional car parking provision. If these housing proposals as tabled at the moment are carried forward Biddulph will become purely a dormitory town centre servicing the North Staffs/South Cheshire. The High Street of Biddulph is currently fighting to survive. These housing proposals will accelerate the demise. Councillor Court in his communication details brown field site closely situated within the town centre itself and if these sites are actively pursued as a priority surely people will be able to walk into the town itself, for shopping/clinical and other pursuits. Surely Chartered Town & Country Planners should consider these housing proposals in conjunction with the impact of the functions of the town itself to achieve a well-	<ul style="list-style-type: none"> • See response to PO10091 regarding infrastructure. • See response to PO748 regarding use of derelict buildings in Biddulph.

Question 19 – Do you have any comments on the proposed housing allocation BD069 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO1317	Mr Andrew Leysens	United Utilities Water Limited			General comment	(Summary - full version attached) With regards to site references ADD04, BD069 and BD117, these sites appear likely to discharge to that area served by Severn Trent for the provision of wastewater services. It would be useful to confirm with the respective landowners the likely point of discharge to the wastewater network from these sites so that we can confirm the receiving wastewater infrastructure and therefore better understand the impact.	Points of discharge to the wastewater network are a detail which can be confirmed at a later stage in the process once the sites have been allocated in the Local Plan and detailed development schemes become available at the planning application stage.
PO2594	Consultation Service	Natural England			General comment	Natural England notes the proposed preferred site for allocation in Biddulph. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.	The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.
PO4616	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Object	BD069 - This site was originally the Hall Kitchen garden. There are moves that this site should be restored as a Heritage Kitchen Garden. Until these possibilities have been investigated this site should be withdrawn, not recommended for inclusion.	The Council's Landscape, Local Green Space & Heritage Impact Study (August 2016) assesses this site in terms of heritage and landscape impact. The results for heritage are: "There is one Grade II* and one Grade II Listed Building within close proximity to the site. The site contributes greatly to the setting of the Grade II* as a walled garden to the hall, which in turn, contributes to the overall significance of the asset. Development on the site would highly likely cause substantial adverse effects to the setting of the Grade II* Listed Building which would impact upon its overall significance. The HEA states that development is not deemed appropriate in the HLC zone BBHECZ 7 (Historic Environment Character Assessment 2010). Site could not be developed without substantial heritage impacts." This study forms part of a wider evidence base to support the Local Plan. Therefore, the conclusions within this report will be weighed against other evidence when determining the overall suitability of a site for development.

PO8073 PO8620	Clowes Mrs V Jackson Mrs M Booth						
PO7315	Mr Mohammed Yasin				Object	As the owner of Knypersley Hall (Star Listed Building) I am totally against the development of 30 houses at BD069 and 150 houses on site ADD04. I bought the Hall in 2006 in a very poor state of repair. The department of Conservation insisted that all repairs must be done to restore the Hall to its original state. Part of the Hall had 6 apartments this was changed to 2 dwellings in the interest of less traffic on site and protection of the environment. I was assured by the conservation department that no further development would take place around Knypersley Hall. By allowing this development you are actually surrounding the Knypersley Hall with new housing. This will totally destroy the character and the look of the Hall. Site BD069 is the garden that used to belong to Knypersley Hall and still is physically next to the Hall. How can such development get the blessing of the Department of Conservation. Please reconsider the impact of putting such a large burden on the existing infrastructure and the residents of Knypersley.	<ul style="list-style-type: none"> See response to PO4616 regarding heritage impact.
PO9049	Mr and Mrs Siddorn				Object	(Agent - G. Willard) Object to inclusion of this site.	Comment noted.
PO10274	Mrs C Williams				Object	Former Knypersley Garden Centre off Orme Road This area was the kitchen garden for Knypersley Hall Grade 11 listed, as would have been within the original curtilage of the hall, the walls and structures within this area should also come under the listing. As this has a significant historical interest, I have concerns that this will be destroyed if land is used for residential developments.	<ul style="list-style-type: none"> See response to PO4616 regarding heritage impact.

Question 19 – Do you have any comments on the proposed housing allocation BD069 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO9018 PO9020 PO9019 PO9021	Mr C Lunt Mr Alan Worthington Mr N Lunt Mrs Josie Worthington				Object	Listed building / conservation area and Landscape In 2010 the council commissioned a Historic Sites Assessment report which identified this site as part of a historic park and garden in the Historic Landscape Character assessment conducted by Staffordshire County Council, that report recommended that development in this area is not appropriate. The assessment marked every indicator (evidential, historical, aesthetic and communal) value of this site as high, I think it was the only area within the report that achieved such a high score. The reasons for this score are varied but one of the main drivers is the fact that James Bateman grew up at Knypersley Hall and this particular area is where he executed his first landscape designs and where the Victorian walled garden is located. Parts of that walled garden have been knocked down by the site owners however the Historic Sites Assessment determined that there is good potential for restoring and/or conserving the heritage assets which contribute to the zones historic character, the walled garden and other structures within BD069 would be an ideal place to begin that restoration. The BBC commissioned a television programme in August 2015, experts on the programme stated that Biddulph Grange was the most important Victorian garden in the country (and therefore the world), what value does that place on the location where the designer of that garden executed his first landscape designs? The HEA stated that the links with Biddulph Grange and with James Bateman, the creator of some of the gardens at both sites, is of particular importance and recommended the site be adopted into the Green Infrastructure Plan. I agree with some other comments posted on the public consultation website that the BD069 area has become derelict but I don't agree that the only way to add value back to the site is to build houses on it. I also think we should question why the site has become derelict. It is our understanding that basic planning permission was granted for the building that was erected on this site at the same time that one wall of the historic walled garden was knocked down, however the council aren't certain that the conditions set out in that permission were adhered to. In 2007 the council seems to have realised the mistake that previous members had made by refusing a request by the owners for a certificate of lawfulness for existing use of a garden centre. Two of the reasons for that refusal were due to the area being in green belt (it's now classified as historic parks and gardens) and because the site is classified as a special landscape area. A member of the local historical society (J N Sherratt) has written a statement claiming that English Heritage visited the site after the garden centre was opened and remarked that the knocked down wall of the Victorian walled garden had to be rebuilt, the fountain should be reinstated, the rock features and pulpit (from where it is understood James Bateman gave orders to his gardeners) should be tidied up, trees had to be replanted for those that had been felled, all paths had to be made good, greenhouses had to be repaired, a new hot house needed to be built and new natural fencing should be erected. Mr Sherratt	<p>Comments noted.</p> <ul style="list-style-type: none"> • See response to PO4616 regarding heritage impact. <p>Regarding flooding, no concerns about development of this site have been raised by the Environment Agency nor the Lead Local Flood Officer to date.</p> <p>The Council's ecological evidence consists of a Phase I ecological survey undertaken in 2014. This recommends that:</p> <ul style="list-style-type: none"> • A bat survey regime is recommended to ascertain whether bats roost in the trees • Reptile survey • Great crested newt survey of nearby pond • Vegetation removal at the appropriate time of year <p>In addition, a later 2016 ecology study considered the scope for 'local wildlife site' (ie.SBI) designation for all preferred option sites.</p> <p>The results were: "The broadleaf woodland may be of ecological value and may allow for the site to gain SBI/BAS status once the vegetation has been fully recorded. Furthermore, the site offers potential to support bats, reptiles and amphibians, The following surveys/ actions are therefore recommended in order to establish SBI/ BAS status:</p> <ul style="list-style-type: none"> • An extended Phase 1 Habitat Survey, as the assessment could not be fully completed due to issues with access. • The tree which has the potential to support roosting bats needs to be further assessed. • Reptile survey required. • Newt survey required on the pond (pond 4 in ADD04)". <p>The above survey work would need to be undertaken before any development could take place on the site as clearly it would inform a site layout.</p> <p>The Council must consider all the evidence and reach a decision as to whether to continue to promote the site for redevelopment.</p>

Question 19 – Do you have any comments on the proposed housing allocation BD069 in Biddulph?

						<p>claims none of this was done and claims that English Heritage didn't follow it up because one of the officials passed away. To back this up, Mr Sherratt is planning on contacting Derek Wheelhouse, the local historian who was the driving force behind the reopening of Biddulph Grange and is still active there today. Attached is a picture that provides an understanding of what part of this site was like prior to being destructed by the owners, it shows the 3rd wall that was demolished but unfortunately doesn't encompass the historic springs, greenhouses, fountain, rock or pulpit. If the council did decide to allow the building on this site they would be rewarding the owners for knocking down historical features and then letting a site of historical importance rot away so that it becomes derelict. The decision by the council in 2007 to refuse the application for a certificate of lawfulness for existing use suggests the council understand the importance of this site, they now need to follow the recommendations of their own historical environment assessment and enforce the recommendations of English Heritage so that the site is brought back to its original state and conserved for future generations. This site should have been added to the Staffordshire Moorlands Local Heritage Register a long time ago to prevent it getting into its current state of disrepair. The council has stated in its Local Heritage Register Supplementary Planning Document that for inclusion a site needs to meet the criteria below. Sites which are representative examples of a style or layout, or a type of site, or the work of an important designer. Sites associated with locally significant persons or historical events. Sites which are of intrinsic interest and contribute to the character of the area. This site meets all the above requirements and it's difficult to understand why or how the site has been overlooked. Had it been added, the document states that ' Owners are encouraged to carry out regular maintenance in order to safeguard the historic fabric and avoid the need for more costly repairs in the future. Continued inclusion on the Local Heritage Register may help in maintaining the value of the property '. Unfortunately, not being on the register means this encouragement doesn't appear to have happened. Fortunately though, the HEA recognise the site can still be renovated and brought back to its original state. The HEA assessment that was conducted utilised the guidance provided by English Heritage in their document 'Conservation principles: policies and guidance for the sustainable management of the historic environment'. At the point the HEA was conducted the council should have applied for this site to be added to the Heritage at Risk Register held by Historic England, this may have brought the site to the attention of Historic England again and the preservation and renovation may have already begun. The council says it needs to build 1100 houses in Biddulph, some bold decisions need to be made, houses will have to be built in greenbelt areas. 30 houses in this area would admittedly make a tiny dent in the housing requirement however ignoring the recommendations of the HEA and losing the</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD069 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>opportunities to restore this site to its former glory and reestablish its connections with Biddulph Grange for future generations would be a decision that could never be reversed. This isn't one of the bold decisions the council will need to make, it's an obvious one. Taking all the above evidence into consideration, most of which was available to the council via their own Historical Site Assessment I was surprised that the council summarized that evidence on the site assessment form with the line 'capacity may be constrained due to presence of historic features'. That is quite an understatement. The council's own evidence has recommended that development in this area is not appropriate and the council should show they have the courage to support the convictions of their findings. Flood risk The site assessment form says a flood risk assessment is needed but SCC has no specific concerns. I've questioned the council on this and they pointed me at the 'evidence base' section of their website, so I looked at the 'Strategic flood risk assessment' but noticed that this site wasn't covered in that document. I then emailed the council and asked 'where is the flood document that led the council to have no specific concerns? I'm asking as the site is next to a lake so just trying to understand how you determine that there are no specific concerns.' The council have responded as follows 'This information was obtained from consultation with the Lead Local Flood Officer at Staffordshire County Council'. I'm not certain how well the Lead Local Flood Officer knows the site but he can't be aware that the site is next to a lake, has an abundance of wells, naturally occurring springs and a very high water table or I would have expected the officer to have had some very specific concerns particularly around the effects of sinking further foundations into land of this nature and the proximity of the lake. Nature conservation I asked the council 'Am I correct in thinking the ecological studies evidence base didn't look at this site or the lake next to it? If so - what determines where ecological studies are performed?' The response was 'Nature conservation entails the conservation of wild plants and animals and natural and seminatural habitats. The purpose of a Phase 1 Habitat Study is to provide a knowledge of the nature of these habitats and of their location, extent and distribution. Phase 1 survey information is collected by inspection of each habitat unit in the field by a trained surveyor. Once the findings are known it can be determined whether a more detailed 'Phase 2' Study is required or not. The Council has had a Phase 1 Habitat Survey undertaken this year on a large number of sites to ensure that its ecology information is as up to date as possible. The survey includes BD069. The survey is currently being finalised and is expected to be published by the end of October 2015.' This means that although the council are using conservation to assess whether or not a site is suitable, at the point of completing the site assessment forms that habitat survey had not been undertaken. This site is next to a lake, I would have expected the ecological studies evidence to have included this site prior to the</p>

						<p>assessment being drawn up as I'm confident that would also recommend against development. Since then the survey has been undertaken however, the officer performing the survey did not enter the site as the gates were locked. Additional comments in relation to SHLAA record - should point out that the land is in a greenbelt area that has been classified as historic parks and gardens in the HEA and HLC. > Strengths / opportunities - should say that this is one option for tidying up a derelict site but that all other options should be explored rather than lose a piece of local history that is of national importance due to its close links to the Grange and one of few surviving Victorian walled gardens in the country. > Weaknesses / Constraints - should say that the council commissioned Historic Sites Assessment report recommended that development in this area is not appropriate. > As the site is next to a lake, has an abundance of wells, naturally occurring springs and a very high water table I think the SCC should have some specific concerns re: flooding. > Suitability – This section should point out all the above comments as each one provides insight into the unsuitability of this site.</p>	
PO7583	Mr Peter Turner				Support	<p>These sites offer far more appropriate development opportunities, away from the water treatment works and meeting highways requirements.</p>	Comments noted.
PO4679 PO4678 PO4577	Mr and Mrs J.C. Longmore Mr Robert Longmore Mrs P Barry				Support	<p>We wish to support the site options for the site of site ref: BD069 We are residents in Biddulph and have known the site for 30 years. It was formally a garden centre which closed 2003 and since become derelict and neglected, we support the use of this land for housing for the following reasons: It is brown field site contiguous with the neighbouring residential area. It will contribute Biddulph acknowledged housing shortage. It is neglected and has been a target of vandalism and arson. The security fencing gives it an industrial appearance. Development would give an improved appearance for the neighbouring homes. It is sustainable and close to schools and neighbourhood and town centre services. It can be very easily linked to the existing road networks. It is immediately available. It is flat and no evident building constraint. It can be linked to mains services and there is no flood risk or polluted grounds. Please allocate this site.</p>	Comments noted.

Question 19 – Do you have any comments on the proposed housing allocation BD069 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO9022	Mr & Mrs Weaver				Support	<p>We write in support of the proposed allocation of the above brownfield, former garden centre site for residential development, inclusion within the town boundary for Biddulph and removal from the Green Belt. We write as owners of the site since 2003. The site has been in our family since 1940s when our family moved to Biddulph. In writing this letter we have taken advice from town planning consultants and have reviewed the consultation documents available on the Council’s website. The following sections of this letter establish our reasons for supporting the proposed allocation of this site for residential development, including within the town boundary and its removal from the green belt. Please take this letter as a formal response to the Site Allocations Preferred Options consultation in respect of the site and Question 15, 17 and 19 in particular. The Site and Surroundings The site extends to approximately 1.02 hectares (2.5 acres). The land is shown on the plan attached at Appendix 1 (Ref. SF498873). The site is approximately one kilometre to the southwest of Biddulph town centre, which contains a variety of shops and facilities including a library and leisure centre. The land is bounded, to the north, by Orme Road, beyond which is Biddulph High School. To the south of the site is the Mill Hayes Playing Fields. To the east and west of the site are primarily residential areas. To the south west of the site is a Knypersley Hall which is a Grade II* listed building. The site is a brownfield site which comprises of a former garden centre which was in operation from the late 1960s to 2003. The site is partly covered by greenhouses, other garden centre buildings (as shown on the enclosed photograph) and extensive areas of hard standing. The buildings on site have become dilapidated and have fallen into a state of disrepair following the closure of the Garden Centre in 2003. There are also a number of trees located along the site boundaries. The Principle of Development The Council’s adopted Core Strategy (March 2014) identifies a need for 6,000 dwellings in the District between 2006 and 2026. The Core Strategy commits to undertaking an early review to cover the period 2016 – 2031 to ensure that future provision will continue to meet objectively assessed needs. It also states that the Council will seek to enhance the role of Biddulph as a significant service centre and improve the local housing market by increasing the range of houses and allocating deliverable housing sites within the urban area and, on land adjacent to the urban area. Policy SS5B of the Core Strategy states that sites identified adjacent to the urban area of Biddulph shall be in locations which relate well to the urban area, can be assimilated into the landscape and would help secure infrastructure improvements. The supporting text to Policy SS5B states that due to the extent of green belt around the town, opportunities for peripheral expansion are limited. Therefore, it establishes that in order to meet the longer-term needs of the town, some development will be required in the green belt. It states that up to 2026 there will be a need for a minimum of 813 dwellings in Biddulph, of which land for around 200</p>	<p>Comments noted.</p> <p>See response to PO4616 regarding heritage impact.</p> <p>The Council must consider all the evidence and reach a decision as to whether to continue to promote the site for redevelopment.</p>

Question 19 – Do you have any comments on the proposed housing allocation BD069 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p> dwellings would need to be identified in the green belt. Policy SS5B, therefore, states that the allocation of small urban extension sites will require a comprehensive review of the green belt boundary around Biddulph to accommodate the new dwellings through the preparation of the Site Allocations DPD and an early review of the Core Strategy. We understand that the Council has recently reviewed the position in relation to local housing need accounting for the latest Government household projections, new population and employment data. The Council’s updated Housing Need report, from January 2016, concludes that the housing need for the District is between 250 to 440 homes per year between 2012 and 2031. Therefore the Council’s Preferred Options document proposes an annual housing requirement of 320 homes per year up to 2031. In relation to Biddulph it identifies a requirement for 1196 new dwellings (855 net) during the plan period to 2031. Therefore, we support the general growth strategy for the District and the focus on the delivery of the majority of housing and employment in the main towns, including Biddulph. We also support the proposed allocation of the Knypersley Hall Garden Centre site, within the town boundary, for residential development to help contribute towards meeting the housing needs for Biddulph, for the following reasons. We understand that the Government attaches great importance to Green Belts and that the fundamental objective of Green Belt policy, as established in the National Planning Policy Framework (NPPF), is to prevent urban sprawl. Paragraph 79 establishes that the essential characteristics of Green Belts are their “openness” and “permanence”. However, by virtue of the site’s former use as a Garden Centre and the built structures on the site, including various garden centre buildings and green houses, it is considered that the brownfield site does not effectively serve or perform the five purposes or functions of the Green Belt established in paragraph 80 of the NPPF: “ to check the unrestricted sprawl of large built-up areas; to prevent neighbouring towns merging into one another; to assist in safeguarding the countryside from encroachment; to preserve the setting and special character of historic towns; and to assist in urban regeneration, by encouraging the recycling of derelict and other urban land. ” Moreover, the edge of the site is well defined and visually contained by the existing trees and soft landscaping which are located along its boundaries. The trees and change in levels at the site boundary sever the site from the green belt to the south, in physical and visual terms. This results in the site becoming a pocket of brownfield land that is visually isolated from the main area of green belt to the south. Therefore, development of the garden centre site would result in no visual impact on the openness of the Green Belt. Furthermore, paragraph 89 of the NPPF states that the partial or complete redevelopment of brownfield land, such as the garden centre site, which would have no greater impact on the openness of the Green Belt and the purpose of including land within it would not be</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD069 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>considered inappropriate development in the Green Belt. By virtue of the visual containment of the site it is considered that the redevelopment of this brownfield site for housing would not have any greater impact on the openness of the Green Belt or its function and would not constitute inappropriate development in the Green Belt. The land to the south of the site is not in agricultural use and is the Mill Hayes Playing Fields, which are used by Biddulph High School. It is considered that the northern boundary of the playing fields would provide a more appropriate, clear, defensible boundary for the green belt along a physical feature or use which is readily recognisable and likely to remain permanent in line with paragraph 85 of the NPPF. Moreover, we note that the Council’s Green Belt Assessment, undertaken by Amec Foster Wheeler, in November 2015, confirms that the Knypersley Hall Garden Centre site makes a ‘limited’ contribution to the purposes and function of the green belt, is “ potentially suitable ” for removal from the green belt and comprises: “ Previously developed land with reasonably strong outer boundaries and which would create a logical extension to the current settlement envelope. ” We also note that the Council recognises, in their Options Site Assessment document (which accompanies the Preferred Options Site Allocations document), that in order for Biddulph to accommodate new development, the Green Belt boundary will need to be adjusted as there are insufficient sites in the existing settlement boundary to accommodate Biddulph’s housing requirement to 2031. In proposing the site as a preferred option for removal from the Green Belt and residential development the Council clearly considers that the site is in a sustainable location that is contiguous with the neighbouring residential area that surrounds the site to the north, east and west. The Council clearly agrees with our view that the site is in an accessible location with good levels of accessibility to range of facilities on foot and by public transport. This is confirmed by the Council’s site assessment which states that the site is well related to the residential area and is close to Biddulph High School and other facilities. Moreover, there are several bus stops in close proximity to the site. These are located on Park Lane and Mayfields Road (less than 300 metres walking distance from the site). The bus stops are served by a number of bus routes which provide access to the various shops, facilities and employment in Biddulph Town Centre and further afield to areas including Congleton, Newcastle and Hanley. As stated previously, the site is brownfield land and contains various garden centre buildings and greenhouses. Unfortunately, since the closure of the garden centre in 2003, these buildings have fallen into disrepair. The site has also been the target of both vandalism and arson. Therefore, it considered that the removal of the site from the Green Belt and its allocation for residential development would enable a viable use for the site and provide the opportunity for the existing dilapidated structures on the site to be replaced by a viable, secure and</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD069 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>efficient use of the land for residential development, which would contribute towards meeting the identified housing needs for Biddulph. Given the sustainable location of the site and its accessibility to services and facilities in the town centre it is also anticipated that the site could make an appropriate contribution to meeting affordable housing needs in the district. The site is currently contained by security fencing due to the issues surrounding vandalism and arson. This gives the site an industrial appearance to dwellings surrounding the site. It is considered that the development of the site would also, therefore, provide the opportunity to improve the appearance and security of the site for residents living nearby.</p> <p>Technical Constraints It is understood that a suitable access to the site could be provided from Orme Road. Moreover, the development of the site would offer the potential opportunity for associated improvements to the ‘un-adopted’ Orme Road by a potential developer. Given the former use of the site as a garden centre it is not anticipated that there would be any issue or constraints to development in terms of ground conditions or contamination on the site. It is also understood that, given the former use of the site, and its location contiguous with the settlement boundary and nearby residential development, the site could be easily linked to mains services. The site is also fairly flat and there are no evident building constraints. According to the Environment Agency’s Flood Risk Map the site is located entirely within Flood Zone 1 (i.e. at low risk of flooding with less than 1 in 1,000 annual probability of river or sea flooding). According to the National Planning Practice Guidance (NPPG) residential development is a “more vulnerable” use to flooding. The NPPG confirms that residential development would be considered an appropriate use in Flood Zone 1. The Council’s Strategic Flood Risk Assessment (2015) also confirms that the site is in Flood Zone 1 at low risk of flooding. However, we note that there appears to be a minor error in the Options Site Assessment document, which accompanies the Preferred Options Site Allocations document, which suggests that the site is located within a flood zone. There are number of trees located within the site. However, the majority are located towards the site boundaries. Therefore, it is considered that the majority of the quality existing trees on the site could be effectively incorporated in to the design and layout of the site at a later stage. Moreover, the site is not subject to any designations relating to the conservation of ecology or biodiversity. Although the site is located adjacent to Knypersley Hall, a Grade II* Listed Building, as stated in the Council’s Site Assessment, the site is secluded and separated from Knypersely Hall by the adjacent lake and a significant number of trees and landscaping and falls outside the curtilage of the Listed Building. Therefore, it is considered that the development of the site for approximatley 30 dwellings would not result in any significant impact on the designated heritage asset or its setting, subject to appropriate design. We understand that the Council is currently</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD069 in Biddulph?

						commissioning a heritage impact assessment, in conjunction with Heritage England, for all the sites selected as Preferred Options allocations and we look forward to reviewing the outcome of this in assessment in due course. We are not aware of any technical constraints that would prevent development of the site for housing. However, should the Council require any further technical information to consider or support the suitability of the site for residential redevelopment and removal from the Green Belt we would be willing to investigate this further and provide any information where possible. Capacity and Deliverability The site is approximately 1 hectare in area. It is assumed that it could be developed at a density of approximately 30 dwellings per hectare, given its rural location. Therefore, giving an indicative site capacity of 30 dwellings. This is reflected in the Preferred Options document which indicates that the Council agrees that the site is capable of delivering circa. 30 dwellings. The site is immediately available for residential development. Therefore, assuming that development of the site could commence within two years of the allocation of the site (in the Council's Site Allocations Document which is expected to be formally adopted in 2017), following the grant of planning permission, we anticipate that the total number of dwellings would be constructed and delivered within a further year. Conclusions We trust that our responses above provide sufficient confirmation of our support for the allocation of the site in the Council's Site Allocations Development Plan Document (DPD), its deliverability and its possible contribution to the Council's housing delivery in the short-term, given the identified shortage of housing in the District.

Question 19 – Do you have any comments on the proposed housing allocation BD071, BD071a, BD106, BD156 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO23	Mr Robert Moseley				General comment	This area seems to be the best of all the bad solutions to the supposed housing problem in Biddulph, building up to the the old railway line would give some expansion within the current boundaries.	Comments noted.
PO471	Mrs Jean Wrench				General comment	A balanced approach is required.	Comment noted.
PO1058	Mr Nicholas Tavernor				General comment	I do not agree that Biddulph needs this number of new houses and think they should be developed at the minimum rate so there is not an abundance of unsold property that will reduce house prices and negatively impact on residents. The proposed housing allocations need to be developed in line with the development study findings, which suggested there would be a reduction in numbers of families and young people and an increase in numbers of elderly, no point in building houses for people who are leaving.	<ul style="list-style-type: none"> • The proportion of 20% of the District’s housing development taking place in Biddulph has been through extensive consultation and public examination as it is taken from the Council’s Core Strategy which was adopted in March 2014. • The Local Plan is planning for the period up to 2031 so will allocate a number of sites in Biddulph in order to meet the need. These will not all be built at exactly the same time, they will come forward as the market demands. • Property values are not considered material in planning law. • The Local Plan will reflect the evidence gathered about the housing market. The key document is the Strategic Housing Market Assessment.
PO2588	Consultation Service	Natural England			General comment	Natural England notes the proposed preferred site for allocation in Biddulph. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces’ may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.	The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.
PO2887	James Chadwick	Staffordshire County Council			General comment	These sites are adjacent to, or overlap with a Biodiversity Alert Site. Design and layout should avoid impacts in this site, enhance it where possible, and maintain linear habitat connectivity.	Comments noted. This will be reflected in the site policy and the Council’s Green Infrastructure Strategy.
PO5138	Mr Gary Harding				General comment	Biddulph bypass benefits Biddulph building on the west side.	Comment noted.
PO5145	Ms Karen Harding				General comment	If Biddulph needs to be developed it should be from the town centre out to the west. The bypass would also serve this area well.	Comment noted.
PO5149	Ms Melissa Harding				General comment	Building on the west side of Biddulph would start to give Biddulph a more even balance in terms of development. The site of the new primary school would be in walking distance from a lot of this new development.	Comment noted.
PO5182	Mr J. Denton				General comment	The by-pass to the west of Biddulph town.	Comment noted.

Question 19 – Do you have any comments on the proposed housing allocation BD071, BD071a, BD106, BD156 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO4871	Mr Allan Knapper				General comment	i support all the 7 sites.	Comment noted.
PO5118	L C Millington				General comment	Apart from the areas north and south (which I have no comment on) I think it right to allocate housing to BD055, 63a. 108, 106, 156, 16, 71, 71a, 76, 76a, and ADD003. The housing will be close to the town centre – more likely that people will use it. The visual impact looking from Biddulph Moor is hard to visualise, but it will be less than an expansion of Thames Drive estate will be from Mow Cop.	Comments noted.
PO5123	Ms Lynne Evans				General comment	Plan to balance out the already developed north east Biddulph sites. The old railway track has many more access routes that lend themselves to making developments here far easier, this area would avoid the problems experienced around the new uplands mill developments, with its squeezed together look and unattractive outcome.	Comment noted.
PO5128	Ms Lynne Evans				General comment	The bypass enables the development of the town centre and the surrounding west side.	Comment noted.
PO5112	Mr Cottrell				General comment	All the proposed houses where the residents work they would have to commute to find work the Victoria Colliery and Childerplay Road site would have been closer to the areas of employment e.g. Chatterley Whitfield site.	Sites at Victoria Colliery and Childerplay Road are within the Green Belt. Sites BD071, BD071a, BD106 and BD156 are not in the Green Belt. The Green Belt Review has considered the impact on the Green Belt the release of Victoria Colliery and Childerplay Road for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy.
PO5080	Mr J Neate				General comment	As stated above the level of homes in Biddulph area is at a saturated level. Moving west makes much more sense.	Comment noted.
PO5163	Mr N McQuade				General comment	Thanks for listening to residents comments: Please keep as much Green Belt as possible very important.	Comment noted.
PO5190	Mrs A Denton				General comment	The by-pass to the west of Biddulph town.	Comment noted.
PO239	Mr Robert Stockley				Object	I have already stated that the erosion of the Green Belt is of major concern, and would be the beginning of the end of our beautiful Biddulph Valley. I suggest that the Victoria Colliery Site, and Childerplay Road sites are the preferred options, which would develop sites, which are ready and open for development with easy safe access to all concerned.	<ul style="list-style-type: none"> • See response to PO5112 regarding use of Victoria Colliery and Childerplay Road for housing.
PO441	Mrs Janice Deane				Object	All areas. There is no access to any of the sites described without increased pollution and log jams of traffic trying to get out of the town for work. There's no work here.	<ul style="list-style-type: none"> • County Council Highways have said that development here is acceptable in principle subject to access design and Transport Assessment. • Employment sites are proposed at BD117 (opposite Victoria Business Park) and BD076a (north of BD071).

Question 19 – Do you have any comments on the proposed housing allocation BD071, BD071a, BD106, BD156 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO1335	Ms K Dewey	Staffordshire Wildlife Trust			Object	Other sites which have potentially high ecology value are: BD 071 and 071a covered by FID 17 - regional ecological value. These should be assessed against the Staffordshire LWS criteria. There are also a number of species-rich hedgerows identified by the surveys.	<p>The conclusions from the Ecus LWS survey are that the broadleaf woodland may be of ecological value and may allow for the site to gain SBI/BAS status once the vegetation has been fully recorded. Furthermore, the site offers potential to support bats, reptiles and amphibians.</p> <p>The following surveys/ actions are therefore recommended prior to any development taking place in order to establish SBI/ BAS status:</p> <ul style="list-style-type: none"> • Hedgerow survey following the HEGS methodology. • Detailed vegetation survey to determine the status of the habitat mosaic. • The buildings and trees which have the potential to support roosting bats needs to be further assessed. • Reptile survey required.
PO1360	Ms Rosamund Worrall	Heritage England			Object	Map 4.5 Biddulph - BD055; BD106; BD108; and, BD156 - preferred housing allocations - It is not clear how the impact of the site allocations on the Grade II listed buildings (former Parsonage, school and the Church) and their setting, individually and cumulatively, has been considered. Further information on this is required.	<p>Heritage Impact of development on the site has been assessed in the Council's Landscape Impact Study (August 2016), the results for this site are:</p> <p><u>BD071/BD071a</u> There are seven Grade II Listed Buildings within the 400m buffer. Due to topography and surrounding vegetation, development would be unlikely to cause high adverse effects to the settings of the assets. Mitigation may include screening in the south-eastern part of the site. Development in the site would change a large element of the HLC zone BBHECZ 3 (Historic Environment Character Assessment 2010). However, with sensitive design, this could be mitigated. Site suitable for development in heritage terms subject to appropriate masterplanning.</p> <p><u>BD055</u> There are seven Grade II Listed Buildings within the 400m buffer. Development would be unlikely to cause high adverse effects to the settings of the assets, however, mitigation should include screening along the southern edge of the site to reduce effects. Development would not adversely affect the HLC zone BBHECZ 3 (Historic Environment Character Assessment 2010). Site suitable for development in heritage terms subject to appropriate masterplanning.</p> <p><u>BD106/BD156</u> There are seven Grade II Listed Buildings within the 400m buffer. Development would be unlikely to cause high adverse effects to the</p>

							settings of the assets. To reduce effects, mitigation should include setting development back from the assets by keeping development to the west and north of the site as well as employing screening along the eastern edges of the site. Development would not adversely affect the HLC zone BBHECZ 3 (Historic Environment Character Assessment 2010). Site suitable for development in heritage terms subject to appropriate masterplanning.
PO857	Mrs Andrea Millington				Object	Previous studies and documents by SMDC have identified that Cheadle has the highest capacity for growth, the least greenbelt impact and could facilitate a higher degree of development with less risk and yet they have been allocated the same nominal figure of 20 percent of the overall allocation as has Biddulph. At the recent consultation in Biddulph the chief of planning agreed that the previous local plan had over estimated demand for housing in Biddulph which had resulted in planning permission for nearly 200 houses and as the realisation of lack of demand hit the developers they had to readjust their building plan and revert to social housing styles and attempt to attract people from cities such as Liverpool and Manchester despite the planners at the time of the planning process recommending only 20 percent social housing on the development all of which would be to accomodate those in the Staffordshire Moorlands that required affordable of social housing. This clear lack of judgement could be at play again when expecting Biddulph to build 1,100 homes in 15 years possible resulting in a population growth of 5,000, a boom of which has never happened in the towns history. As the governments main and seemingly only stipulation is pro growth if there is to be such a growth of the town then the vision for Biddulph must include developing the Town Centre which a more balanced geographic development supports. The by-pass greatly benefits developing on the West side, and looks like it was planned to support the expected housing allocations for Biddulph.	<ul style="list-style-type: none"> See response to PO1058 regarding housing numbers for Biddulph.
PO5158	Mrs C. Nicholls				Object	I don't agree that Biddulph needs to have the number of properties allocated and I understand that the neighbourhood plan designate the land for the governments directorate. I agree that the sites designated off the by-pass will balance the town out better, (i.e.: BD055/BD108/BD106/Bd071 and BD071a).	<ul style="list-style-type: none"> See response to PO1058 regarding housing numbers for Biddulph.

Question 19 – Do you have any comments on the proposed housing allocation BD071, BD071a, BD106, BD156 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
	Bainbridge						
PO10093	Mr & Mrs S & C Fielding				Object	Object to BD106 and BD156 only.	Comment noted.
PO9789	Mr M Barlow				Object	Please do not spoil the entrance to Biddulph bypass area by removing trees and bushes. They will hide any houses built there.	Site screening will be required as part of any new development. This can also help to act as a noise barrier.
PO304 PO538	Mr Russell Picken Mrs C Picken				Support	Site BD116 and the area of site BD140, adjacent to sites BD071 and BD071a should be included for the following reasons: This development would start to rebalance Biddulph in the right direction, i.e. it would start to move the town centre back towards the centre of the town. A proper, suitably sized road system / infrastructure for the new housing estate could be built, capable of accepting future extension of the site. It should be built with direct access to the bypass. There is already an access road into site BD140, which passes the boundary of BD116 at its north-west corner. It originally formed part of Wharf Road, but was bisected by the construction of the bypass. Although currently in poor condition, it could be upgraded and has the benefit of already having access across the BVW, in the same manner as that found in Marsh Green Road. New properties in this area would be much closer to the town centre. This could encourage people to walk, particularly for limited shopping. This then has the advantages of being more environmentally friendly and also reducing the traffic in the town and parking requirements. New housing developments in this would have much less of a visual impact on the area and would not constitute 'urban creep'. A strip of visual open space could be included between the development and the BVW. This would make the new housing development more appealing visually, both from within the development itself and when viewed from the BVW. This could also act as a wildlife corridor. These sites are well placed to take advantage of some of the new services and facilities, i.e. the new Primary Health Care Centre, which is within easy walking distance, from these sites, for most people. These areas could be developed without dominating the outlook from existing properties. Also they would not overlook the said existing properties. The development of these sites would not add to existing property flooding issues. The BVW would provide a relative safe and easy access to the playing fields at Gillow Heath, either by walking, or by cycling. These sites could comply with items 1, 2 and 4 of the 'T1 – Development and Sustainable Transport' section of the 'Preferred Transport Policies' from the 'Core Strategy Draft Preferred Options' document, as shown in Appendix A.	Comments noted. This area is being investigated by the Council.

Question 19 – Do you have any comments on the proposed housing allocation BD071, BD071a, BD106, BD156 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO325	Mr Frank Cottrell				Support	Of the 850 proposed new build houses the working residents of these properties would have to commute due to lack of employment in the Biddulph area. To develop the Victoria Road and Childerplay Road sites would be closer to the proposed Chatterley Whitfield employment site.	<ul style="list-style-type: none"> See response to PO441 regarding lack of employment. See response to PO239 regarding use of Victoria Colliery and Childerplay Road for housing.
PO290	Mr David Spruce				Support	Developing here is close to the town centre and bypass. Good access and easy to reach town centre without transport.	Comments noted.
PO722	Mr Philip Beech				Support	I wholly support the utilisation of this broad area. The use of this area can be seen to be positive for the town centre, as it is close to the main arterial road and town centre amenities. Development of this area will have minimal negative impact on the residents adjacent due to the natural terrain. Access is easy, directly from or near to the bypass, which is not the case on some of the now constrained sites.	Comments noted.
PO779	Mrs Jayne Beech				Support	The use of this area is a sensible one due to the close proximity to the town centre. A minimum amount of negative impact will occur if this area is developed as it is overlooked by few houses. If the area isn't developed it may well become an overgrown blot on the landscape, which is far less appealing than a sympathetic high quality development. I support the use of this area for development.	Comments noted.
PO456	Mrs Jean Fairbanks				Support	I think the Councils need to build more attractive and spaced out homes to help them raise more council tax as central funds dry up, and the proposed areas may benefit the town.	Comments noted.
PO10289	Mrs Julia Hackney				Support	Green Belt amendments for Biddulph: while i don't agree that Biddulph needs this number of new properties i understand that unless we take control through the Neighbourhood Plan we risk developments running wild. The bypass was built to accommodate [housing, industry] buildings. Green Belt sites highlighted on the west of the bypass was set aside for building projects when the bypass was built. Doing this centralises town and local amenities. Housing allocations in Biddulph: the bypass greatly benefits developing on the west side and looks like it was planned to support the expected housing allocation. New proposal is agreeable if they increase the amenities to the town centre, ie doctors, car parks etc.	Comments noted.
PO654 PO661	Mrs Siobhan Perry Mr Andrew Perry				Support	Building here balances out the town and give easy access for residents to the bypass and the town centre.	Comments noted.
PO760	Mr Paul Malkin				Support	It makes sense to use this land for development if extra homes are required, with easy access to the A527 and the town centre and will also not negatively impact current residents.	Comments noted.
PO1059	Mr John Hayley				Support	In principle (and subject to more detailed planning) I support the potential use of these sites for future housing.	Comments noted.

Question 19 – Do you have any comments on the proposed housing allocation BD071, BD071a, BD106, BD156 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO5248	Kyoko Boll				Support	I propose ADD003, ADD004, BD069 and BD071, BD071a, BD106, BD156, BD055 and BD063a as the plan of housing development in Biddulph. These sites are able to get to road access directly a can be reduced existence of the traffic who people who have to travel to the town centre and main roads. Specially, ADD004 as a plan to build a new school. I also prefer to extend to the west areas such as Akesmore Lane, Brown Lees and alongside old railway track which gives the opportunity to build housing developments.	Comments noted.
PO5179	Mr J. Denton				Support	We support development to the west of the Biddulph Town.	Comments noted.
PO5232	Mrs I E Sefton				Support	The development of areas to the west should swallow units of growth while protecting open spaces. They will enable residents to have easiest access to all the amenities.	Comments noted.
PO4603	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Support	BD055 – already approved, recommended for inclusion.	Comments noted.
PO4608	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Support	BD071, BD071a, BD106, BD156 - Meets all criteria, provided that the water course and a decent wildlife corridor is kept as a stream and not diverted / culverted. This could be enhanced to form a nice town river walk linking the developments along this side of the bypass, recommended for inclusion.	<ul style="list-style-type: none"> Comments noted. The details of the scheme will be determined at the planning application stage and these will be open to public comment.
PO5338	Mr D Heath				Support	Filling out the west side of the bypass seems more sensible options give the opportunity to achieve a better balance of the town.	Comments noted.
PO5341	Mr D Heath				Support	The west side of the bypass lends to the better development to support the town.	Comments noted.
PO5860 PO5026	Mr and Mrs M. Flanagan Mr F Moorhouse				Support	i support BD055	<ul style="list-style-type: none"> Comments noted. This site now has a planning consent for extra care housing.
PO5261	Mr and Mrs J B Ecclestone				Support	Thank you for listening to the residents and taking the off Thames Drive and Pennine Way (Most encouraging). ? Congleton Road from Mow Cop and looking across the Valley it seems vital to retain that green	Comments noted.
PO4916	Mr B Barcoft				Support	I agree with BD106 and BD156	Comments noted.
PO5090	Mr J Neate				Support	Development the Biddulph Town Centre will attract more shoppers to the town centre to spend money – must be good.	Comments noted.

Question 19 – Do you have any comments on the proposed housing allocation BD071, BD071a, BD106, BD156 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO5222	Mr I Seabridge				Support	Essential to maintain character of the area with a definitive open area space – ‘land boundary’ Existing road construction/specification not adequate to accommodate additional demand. Highways linkages and access road/egress poor. Any junction improvement at the Biddulph Road/Woodhouse Road priority junction will have an unfavourable impact on the character of the area.	Comments noted.
PO5237	Mrs P G Webb				Support	Many on the Uplands Mill development have not been sold.	Comments noted.
PO6375 PO6898 PO6877 PO7779 PO7868	Mrs K Chaddock Mr M Mason Mr G Mason Mr R Hindmarsh Mrs J Banister				Support	i support 1 of these sites	Comments noted.
PO6153 PO6080 PO6117 PO6133 PO6991 PO6000 PO6633 PO6921 PO6488 PO6507 PO8868 PO8684 PO8533 PO7950 PO8077 PO7970 PO6521	Mr K Collier Mr I Frisby Mrs J Frisby Mrs J Collier Mr R Lawton Mrs L Price Mr Ronald Bailey Mrs J Brennan Mr Gilbert Bradley Mr K Wilshaw Mrs J.A. Bennett Mrs Joan Draisey Mr D Neal Mr A Lehepoo Mrs V Jackson Mrs C Hensor Mr S Wilshaw				Support	i support 3 of the above sites	Comments noted.
PO5311	Mr A Picken				Support	This development would help to re balance the town in the right direction. IE: back towards the centre of the town. New properties would be closer to the town centre which would mean that there would be less traffic and reduced parking requirements. This would be environmentally friendly. These sites are well placed to take advantage of the services for example the schools, health centre. It wouldn't be seen as a urban creep. There would be a less visual impact.	Comments noted.

Question 19 – Do you have any comments on the proposed housing allocation BD071, BD071a, BD106, BD156 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO5266	Mrs A Bridgette				Support	The bypass offers better development sites: It was designed that way. There would be better balances to the town. It is better to develop the town centre, making it more balanced Building here to the west is closer to the proposed site Chatterley Whitfield, gives the opportunity to the health centre and the town amenities.	Comments noted.
PO7578	Mr Peter Turner				Support	These sites offer far more appropriate development opportunities away from the water treatment works and meeting highway requirements.	Comments noted.
PO8163	Mrs Angela Turner				Support	Support. However there is ecological interest in this area. Sites BD071 and BD071a have high amounts of species poor grassland and the biodiverse habitat is on a small area of the site mostly connected to the stream and hedgerows. This small but important part of the site should be kept as a wildlife corridor running along this side of the bypass - it should be classed as Visual Open Space.	See response to PO1335 regarding ecological value of site.
PO9040	Gallagher Developments Ltd	Gallagher Developments Limited	Mark Rose	Define	Support	I write on behalf of my client Gallagher Developments Ltd with regard to the Local Plan Preferred Options Sites and Boundaries Consultation. Following the adoption of the Core Strategy in 2014 and the identification at that time for a prompt review to roll the plan forward to 2031, my client welcomes the progression of the Local Plan, and specifically this Preferred Options Sites and Boundaries consultation to consider how the identified development needs for the District in that period will be met. The Core Strategy provides an entirely appropriate basis for considering the most appropriate development strategy to meeting future needs, and my clients welcome the continued focus on the Market Towns in the District as the most sustainable locations for future growth. Indeed, you will be aware that they control a significant interest in “Core Strategy Broad Area 4” and welcome the proposed allocation of this land for development in principle. In light of that Gallagher Estates support the allocation of Core Strategy Broad Area 4 for development. The site is not located in the Green Belt and clearly represents a sustainable development opportunity that is well related to the existing urban form of Biddulph and its town centre. It is deliverable in that it has been demonstrated to be suitable, available and achievable, and the site’s merits were reflected in the positive comments received from the Site Options Consultation in 2015 (e.g. support from the Highways Authority). Whilst some representors did highlight some environmental sensitivities (e.g. ecology and landscape) it is apparent that there are no over riding or particular constraints to development. However, these issues can be effectively addressed through an iterative masterplanning exercise that takes into account the detailed technical and environmental assessments that will be required to support a planning application, as well as best urban and landscape design practice. The clear intent	Comments noted.

Question 19 – Do you have any comments on the proposed housing allocation BD071, BD071a, BD106, BD156 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						would be to establish an appropriate form and character of development that would realise a high quality housing development which responds to the site's features and setting, reflects the local character, and is well integrated into its surroundings. Indeed, whilst Table 4.6 in the consultation paper refers to the delivery of 335 dwellings on the site, there is a clear need to optimise its residential capacity to ensure that the identified development needs for the town and the District are met. That will also be a critical consideration in the masterplanning process, and may require some flexibility and prioritisation in the design of an appropriate development scheme for the site (e.g. in relation to the extent and location of the public open spaces and the employment /mixed-use allocations).	
PO8328 PO8111 PO8091	Mrs S Bennett Mr A Forrester Mr K Davies				Support	i support 2 of the above sites	Comments noted.
PO9258	Mr Lee Dawkin	Renew Land	Mr Ben Weatherley	Knights LLP	Support	Support the proposed allocation of land at and adjoining Jacksons Nurseries - Preferred Housing Allocation reference BD108 - along with the adjoining site references BD106, BD156 and BD055, for housing development.	Comments noted.
PO10049	Mr Philip Sutton				Support	Support development here, it would balance out the town and access from these sites is easily achievable. They are within walking distance of the town centre.	Comments noted.
PO9829	Mrs. Margaret Biddle				Support	By developing this area the town would be better used and regeneration would be encouraged.	Comments noted.
PO9793	Mr Eric Biddle				Support	At present, Biddulph is not a balanced town. To put this right, areas to the west and south must be developed. Residents living within walking distance of the shops are more likely to use them. Residents are likely to work in the Potteries and if they live in this location it would save them from having to travel through the town centre to get to work.	Comments noted.

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO1313	Mr Andrew Leysens	United Utilities Water Limited			General comment	<p>(Summary) We wish to emphasise the need to carefully consider the allocation of new housing sites in close proximity to our wastewater treatment works. In this regard we note that our wastewater treatment works (WwTW) in your local authority include: Biddulph WwTW; Biddulph Park WwTW; and Flash WwTW. We wish to highlight that a wastewater treatment works can result in emissions which include odour and noise. Therefore if you are considering any sites for new allocations, especially housing allocations, near to a wastewater treatment works, you should carefully consider the sites with your Environmental Health colleagues. This is important when comparing sites close to treatment works with potential alternative sites that may be available to you for allocation. This reflects our earlier correspondence to you. The position of United Utilities is that when considering a range of sites to meet housing needs, it would be more appropriate to identify new housing sites, which are sensitive receptors, that are not close to a wastewater treatment works. We note this point is particularly relevant to your assessment of sites considered for allocation in Biddulph as part of the current Preferred Options Sites and Boundaries consultation. In particular, site references BDO68, BDO62 and BDO87, which are sited in close proximity to Biddulph Wastewater Treatment Works. Notwithstanding this preference, if it is still intended to progress with the allocation of sites near to a wastewater treatment works for housing following discussions with your Environmental Health colleagues, we strongly recommend that your decision should be informed by: 1. an odour impact assessment; and 2. a noise assessment. If after having undertaken these assessments you still allocate land near to the wastewater treatment works for housing, we recommend that there should be detailed associated policy which identifies the need for mitigating measures including any that may be identified as a result of the assessments. We recommend that: 3. careful masterplanning is always prudent in order to mitigate the risk of odour and noise nuisance. For example, any on-site open space should be located so as to act as a buffer between the treatment works and any newly introduced housing. In addition the houses could be orientated so to most appropriately manage the impact of noise; and 4. appropriate soft landscaping is included to strengthen the buffer between the treatment works and the proposed new development.</p>	<p>Comments noted.</p> <p>Noise and odour reports have been received from the developer very recently. The noise report concludes that the site is not affected and no specific noise mitigation measures will be necessary. The odour report concludes that odour impacts at the site would not be significant and that they should not be a constraint to development. Both reports will be supplied to Environmental Health section for comments.</p> <p>It is now up to the Council to balance the planning issues in determining whether to select this site for development in the Local Plan.</p> <p>Detailed associated policy for the site will be included in the Local Plan if it is selected and it is acknowledged that careful masterplanning of the site will be required including appropriate screening /buffering.” Similarly, the recommendations given by United Utilities will be incorporated into policy should the site be taken forward.</p>
PO2912	James Chadwick	Staffords hire County Council			General comment	<p>With regards Site BD087 as stated in previous responses there is still no obvious access to this site. We will need to see this before we can provide a comprehensive response.</p>	<p>The landowner has corresponded directly with the County Highways Officer for the Staffordshire Moorlands and provided evidence that the principle of providing an access from the opposite side of Biddulph Brook using a newly constructed bridge would be acceptable to the highway officer.</p>

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO131	Mr Dave Boothroyd				Object	<p>Comments: - Settlement area: -BD068 I do not believe that this is a suitable, or even possible area for housing development for the following reasons. 1: - Access. The area can only be reached by access along Marsh Green Road, which is very narrow, less than ten feet (3 metres) in width, with high banks on either side including protected mature trees. There are no footpaths on either side and for a large part, there is no street lighting. To the east of the site, travelling towards Gillow Heath, there is a narrow, very sharp, blind bend, followed by a narrow bridge crossing the cycle way. To the west a narrow bridge crosses the stream. Heavy vehicles could not use this road at all, and increased traffic would be very hazardous. Foot traffic, for children walking to school on Woodhouse Lane, for example, would be risking life or serious injury, especially during the dark winter months. 3: - Flood Plain issues. There are powerful counter-indications against building on flood plains, highlighted by the major floods in parts of the country in recent years. The area is immediately adjacent to Biddulph Stream. When my wife and I moved to this area, our existing insurer declined our application because our postcode was flagged as an area at risk from flooding. Indeed, there have been floods on both Mow Lane and Congleton Road in the last twelve months. Every house insurer now asks prospective customers if they reside within 100 metres of a watercourse. Any owner or tenant of a house built on this area will have to answer "Yes" to that question. Any developer needs to face the same scrutiny by the Environment Agency with respect to building on the flood plain. 4: - The Sewage Works. Adjacent to this area is the United Utilities' water treatment works. This would cause serious issues for any development on this area. The issues come under several headings. a. Visual aspects. A screen of trees hides the major part of the works from Portland Drive and Long Valley Road, in the summer at least. This is not the case in winter. Houses built on this area would have a clear and highly intrusive view of a huge steel structure of pipes, valves and pumps. Frequently vital work is carried out on this structure late into the night, using powerful floodlights. (Photographic evidence is available) b. Noise. Tanker lorries are used to remove waste materials from the works. On many occasions, installed heavy machinery (probably pumping equipment) is run late at night. Based on sound meter readings taken from Portland Drive, approximately 200 metres away, the noise level on a quiet night with the no machinery running was 46dB. On a different evening when the machinery was running the reading was 65dB. At 100 metres the sound pressure level, using the inverse square law, would be four times louder, that is 12dB more thus 77dB. At 50 metres the noise level would be 89dB, a further 12dB greater. Sustained noise levels of 90dB are a health hazard. As a reference the noise level in my very</p>	<ul style="list-style-type: none"> ● The Highway Authority considers that this development is acceptable subject to detailed design issues. The landowner considers that the issue of access to the site can be resolved and discussions with the highway authority have been held (see above). ● Landscape Impact of development on the site has been assessed in the Council's Landscape Impact Study (August 2016), the results for this site are: "Site comprises land to rear of linear development on the A527, to the north of the settlement. The site slopes down from this linear development towards Biddulph Brook (located to the west of the site), and is visible from the opposite side of the valley. However, development within the site would be partially screened by trees along Biddulph Brook and would be viewed against the context of the existing development. In addition the site does not extend beyond the existing settlement edge formed by development on Beaumont Close. Site is of low landscape sensitivity." ● The site boundary has been amended to exclude land within Flood Zone 2. This approach has been agreed with the Environment Agency since their response to the consultation so a Level 2 Flood Risk Assessment is no longer required for the site. A planning application would still be needed before this (or any other) site could be developed and the Environment Agency is a statutory consultee. ● United Utilities has a statutory duty to provide capacity for new development so this is not a valid reason for development not to come forward in Biddulph. United Utilities considers that there is no need to expand the treatment works in the development plan period for the growth identified in the development plan. ● Noise and odour assessments have been undertaken on behalf of the landowner which demonstrate that the site could be developed without significant adverse impact on future residents. ● Current issues experienced by residents in regard to raw sewage flooding are a separate matter to be investigated by United Utilities. ● In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site BD087 for release from the Green Belt. ● Education - The District Council is working with the County Council on the issue of school capacity. The County has determined that additional school provision would be required to support housing growth at the Primary phase of education. At this early stage in the site selection process there are a number of options for delivering school capacity dependant on the sites selected to take forward.

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

						<p>well insulated house, in conditions of silence, was measured as 20dB, which is the accepted level for "peace and quiet" in a house. 89dB in their gardens would be a statutory noise nuisance and would not be acceptable to residents of houses built on this area. c. Smell. The sedimentation tanks are all enclosed now, mostly because of serious complaints from residents of surrounding roads in the past. However, this has not completely solved the problem of the emission of foul smells. They do occur in Marsh Green, Portland Drive, Congleton Road, Mow Lane and Halls Road quite often (Three times so far this year- most recently on Friday 6 th May 2016) It would be a serious concern to anyone purchasing a house built only twenty metres away from the works, and could be a serious health hazard, from flies etc. A spokesperson for United Utilities made the following statement in a letter dated 26 th May 2016:- "We have identified the need for the local planning authority to discuss any new housing near to the wastewater treatment works with their Environmental Health colleagues and give the sites very careful consideration when comparing these sites with potential alternative sites that may be available to them. Our position is that when considering a range of sites to meet the housing needs of the borough, it would be more appropriate to identify new housing sites that are not close to a wastewater treatment works." 5: - The Green Belt, and infill between settlement areas. As recently as this month, senior government figures have emphasised the importance of the green belt in preserving communities in their areas. The original intention of "green belt" was to separate and delineate areas that have traditionally been separate. This area alone represents a clear, agricultural break between the former separate villages of Biddulph and Gillow Heath. If areas BD087, BD068, BD062, BD004, BD138a and b, BD064, and DB83 were all to be developed, a pair of semi-rural communities would be engulfed and lumped together in a densely populated suburb without green spaces. The green belt would be utterly destroyed in complete negation of both past and previous government policy. Is this what is meant by "infill"? I believe that "infill" is something to be avoided, according to the guidelines. 6: - Infrastructure. Any development on this site would fall into the present catchment areas of Ox Hey first school, Woodhouse Middle School and Biddulph High School. Each of these is operating currently at full capacity. None of the above schools have much opportunity for expansion. Prospective developers should be clear that they will need to provide the local authorities, or other providers with sufficient funds to create new schools, on new sites, within the next fifteen years, if proposed development targets are reached. Once again, taking all of the above proposed sites together, the resulting additional traffic using either the Marsh Green Road/ Congleton Road</p>	<ul style="list-style-type: none"> ● Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations. ● Sites at Victoria Colliery and Childerplay Road are within the Green Belt like BD087. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy. ● The land to the north of Woodhouse Lane (west of the school) is not considered suitable for development, mainly due to the heritage impact on the nearby registered park and garden. It is also within the Green Belt. ● National planning guidance states that the Council should seek to meet the development needs of their area. Stoke on Trent City Council has its own development needs to meet.

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>or the Hall's Road/Mow Lane/Congleton Road/ Smithy Lane Junction, neither of which is well served by visibility would be an extra level of hazard to junctions which are already dangerous. 7: - Amenity. Development on this site will result in a great loss of amenity for residents of Portland Drive. People who bought their houses based on the assurance that the adjacent green space was green belt land forever, will be justified in firstly, opposing its inclusion in "sites suitable for development", and, should the development ever go ahead, in seeking redress for loss of amenity. Additional Site Options: - The map of proposed sites for Biddulph shows peripheral sites around most of the current boundary, with one exception. That is land to the north of Woodhouse Lane, west of the grounds of the school, and stretching from Woodhouse Lane to the boundary of Biddulph Grange and the Country Park. There is already development on this road, and the access would be from a relatively wide road. It is a large area with few houses that would be affected by the development. Based on a comparison of the area with the Uplands development, there would be room for up to 300 houses, allowing the Marsh Green and Gillow Heath developments to be removed. It is clear that there is a large area of properly restored, former mine working land on the site of the former Victoria Colliery to the south of Brown Lees Road, and a very large area of land on the east of the main road on Childerplay Lane. These two sites could hold the entire Biddulph Allocation with very little impact on existing residents and ready access to the main road. The preamble to the document states that some authorities have been able to agree with adjacent areas that part of their housing allocation be transferred from one to the other. It goes on to say that both Cheshire East and Stoke on Trent have no surplus land that could be considered for use by Biddulph. This is completely counter to the glaring evidence that can be gathered from a drive of no more than a mile from the southern boundary of Biddulph. There are many hectares of land lying idle and crying out for redevelopment at Chatterley Whitfield, plus a large plot on the other side of the road. A few hundred yards on the right, further along towards Oxford, there is large abandoned sports field. The entire 880 house allocation for Biddulph would fit into these three sites. Where is the evidence that Stoke has no land? There are many, brownfield sites (H&R Johnson?) in the Stoke on Trent area. Perhaps the developers do not like them, but the citizens like their green belt more. The citizens should be given priority. That is what community involvement means.</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO496	Mr Denver Johnson				Object	<p>I've been a resident of Biddulph for forty one years and have seen many developments in the location over the years. Happily over that time the green spaces and views have survived relatively unchanged within that time, maintaining the spirit of a rural conurbation. The current threat to those very Green Belt spaces that set Biddulph apart as a little gem is untenable. It seems that crooked National government have connived with big developers (party sponsors) to twist arms up backs of Development Officers and override Councillors/Local Public Opinion to cherry pick development locations that they hope will bring in the most cash. Stupid insofar that any big development so close would bring down local property prices. The infrastructure of our little end of Biddulph has always been strained by the population level, to suggest that the number of houses could be doubled is ludicrous. The main drawbacks to our location have always been increasing traffic on the A527 (it's too crowded now), flooding (gardens in the best drained locations tend to get boggy in Winter - the weather is getting wetter and some local actions like selling off the Grange and allowing the marsh drying Rhododendrons to be mass destroyed didn't help) and when the wind is in the wrong direction, the smell from the close sewage works. The placing of large developments even closer to the sewage works seems more like a criminal act than a thoughtless oversight. The Abbeystead, Lancashire waterworks disaster of May 1984 where a methane gas explosion severely wounded forty four people and killed eight outright including a mother and child should never be allowed to be forgotten. The cause of ignition has never been determined, however the good sense of at the very least leaving as many fields as possible around them was once enforced by law. Private takeover of Public utilities seems to have greyed this issue. From an explosives perspective (I'm a Physical Science Graduate) placing houses closer to such an installation is akin to packing a bomb with shrapnel and strapping innocent victims to it! Won't allowing these developments be exponentially raising the risks of the site being used as a terrorist soft target? How many other locations are there Nationally like this one, with the added blast focus of the steep valley sides? New houses on the proposed sites would not just be putting lives of new residents at risk. Wildlife - Biddulph attracts some rarities like buzzards and herons, sustains a large population of wild rabbits along with frogs, toads, snakes, foxes, stoats, badgers and hedgehogs. Pheasants, crows jackdaws, jays, magpies, woodpeckers (green and spotted) along with a large variety of the smaller birds. All of these animals would be hit by the loss of the green spaces and the draining of marshland. Heritage - Biddulph originated in the lee of the old 13th century Norman fort/castle built in Bailys Wood. All of the Mediaeval village would have been centred on the brook. The road from the</p>	<ul style="list-style-type: none"> ● See response to PO131 regarding the Green Belt Review. ● Property values are not considered material in planning law. ● See response to PO131 regarding highways. ● See response to PO131 regarding Flood Zone 2. ● See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● The Council's Phase 1 Habitat Study (2015) concludes that "The site has mostly low biodiversity value overall in terms of the species poor grassland area, and has been given ecological importance in terms of loss within the wider countryside due to the potential presence of reptile populations. The following surveys/ actions are therefore recommended prior to any potential development works being carried out: <ul style="list-style-type: none"> - Reptile survey - Vegetation removal at the appropriate time of year" ● Heritage Impact of development on the site has been assessed in the Council's Heritage Impact Study (August 2016), the results for this site are "There are three Grade II* and 21 Grade II Listed Buildings, one Scheduled Monument, and a Registered Park and Garden which is also a Conservation Area within the 400m buffer. The site is located behind existing housing. The tower of the Grade II* listed church was visible from the site but it is considered that the development would be highly unlikely to adversely affect the setting of the asset. Due to the intervening buildings and vegetation, development would be unlikely to cause high adverse effects to the understanding of the Registered Park and Garden and Conservation Area. The site is within the HLC zone BBHECZ 17 and the HEA states that designated heritage assets would require consideration (Historic Environment Character Assessment 2010). Site suitable for development in heritage terms."

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>South along the brook would have been important, but the fair road that no longer exists, running East West through the village would probably have been more important to the community and the North road out towards Congleton may not have been there since the fort was put there to control the area boundary. Bradley Green was the name of the village now using the name Biddulph. See 1806 map: http://www.visionofbritain.org.uk/maps/series?xCenter=3216685.06303&yCenter=2985192.16842&scale=633600&viewScale=181417.4208&mapLayer=nineteenth&subLayer=smith_1806&title=C.%20Smith%20New%20Map%20of%20Great%20Britain%20and%20Ireland&download=true Biddulph Castle - Biddulph Lea Forge http://www.gatehouse-gazetteer.info/English%20sites/3308.html Archaeology - ancient Biddulph is still buried below the fields (inc. BD087) between Marsh Green Road and Bailys Wood. Bakers South field (BD068), from hearsay, was called 'the old garrison' - it's sited ~1000M South West of the old Biddulph Hall and would have been a very probable place for a Parliamentary cannon battery during the Civil war. I've found shards of what appear to be iron age or older pottery in this field close to the brook. I've got this depiction from a mix of reading and hearsay, but am currently in contact with 'The Biddulph Museum'. See: http://biddulphmuseum.com/index.html Flooding - Marsh Green gets its name from a long history of flooding. The glacial alluvial valley floor is an area for subsidence even without the help of the many mines close to the area and the existence of a large underground reservoir at our end of the valley that is the reason for there being less pit shafts this end. Access - Marsh Green road is a single track, dangerous to the many pedestrians that have to cross it daily on their way to the old railway line (Biddulph Valley Way - Route 55) and cars that face meeting on the sharp blind bend next to Suttons old farm. Marsh Green Road was at its safest when it was blocked off at the sewage works entrance to facilitate work on the bridge over the brook. BD087 - has had a history of severe flooding. The field is boggy during the Winter and Spring with signs of subsidence. Despite this it was part of the old Medieval Biddulph village due to its proximity to the brook, which would have been considerably smaller then. Biddulph brook today regularly gets charged with raw sewage, it gets its extra volume currently by taking the constant discharge from processed sewage: it is categorically 'unfit for human consumption'. During the Summer the field is home to local cattle, it regularly hosts wild life. The field provides a pleasant buffer zone between the houses on Congleton Road and the houses and sewage works to the rear.</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO754	Mr Paul Malkin				Object	<p>Save Biddulphs Green Belt Firstly I would again like to comment that the Councils marketing of this consultation has been extremely poor, it has been left to residents associations and concerned residents to spread the bad news in their community. As council tax notices were sent to all residents a few weeks prior to the consultation starting then I would have expected the promotion of an important issue like this to have been included in that delivery. I feel SMDC have missed a real opportunity to work in partnership with neighbouring authorities to produce a North Staffordshire plan that could deliver the required housing whilst protecting green belt and identifying brownfield sites to continue to regenerate the area. When I asked if this had been considered at the Biddulph consultation meeting the council officer advised me that this had not been considered as "nobody wants to live in Stoke". I find this attitude from a council officer pretty appalling and if this is the attitude of the planning team then no wonder an innovative partnership approach had not been considered. Stoke have been successfully regenerating and redeveloping brownfield sites in the area for many years and I believe SMDC could learn a lot from their approach. In addition Stoke and Newcastle are where the job opportunities are being created and many residents of Staffordshire Moorlands will travel there for work and leisure and probably would want to live in these areas. The proposed sites for development are not only in green belt areas, but also along the boundaries of existing residents. The sites are going to have a detrimental impact on current council tax payers of the district who purchased properties at an inflated rate due to overlooking beautiful open fields. These residents are not only going to lose their beautiful views but also thousands of pounds from the value of their homes. I propose a number of sites that will have a minimal impact on the green belt and current residents. The Mills in Station Road and Walley Street are in desperate need of repair or regeneration. These could either be developed into apartments for young first time buyers or older persons or demolished and new properties built. This accommodation is far better situated close to the town centre and will keep the area more in keeping of the newer properties around them. There is also old brownfield land available either side of Congleton Road in Knypersley, the former Victoria Colliery site and the land behind Bemersley recycling centre off Childerplay Road. All of these sites have much better access to the main roads than the proposed sites that are all reliant on single track country lanes. What is required locally is housing to meet the needs of local people, there are key issues to address, young people can not get onto the housing ladder and have to resort to renting that can cost more than mortgage payments and there is an ageing population that require housing to meet their needs. What I would expect the</p>	<ul style="list-style-type: none"> ● The consultation was widely publicised and included a flyer being sent to all households and businesses in the District through Royal Mail. High levels of responses have been received by the Council from Biddulph residents which suggests that a significant number of residents knew about the consultation. ● See response to PO131 regarding developing sites in Stoke instead. ● See response to PO131 regarding the Green Belt Review. ● See response to PO496 regarding property values. ● Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph (particularly Yarn Mill and Minster Mill) would be appropriate for residential development. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping brownfield sites. ● See response to PO131 regarding Education and Victoria Colliery and Childerplay as alternative locations for development. ● It is agreed that affordable housing is needed locally – need thorough research as to what is needed – SHMA! Site BD087 will be required to provide a percentage of affordable housing / starter homes so will contribute to this need. ● See response to PO131 regarding highways. ● See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of sewage works.

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>planning department to complete before any development plans are signed off is a thorough research project to identify what is actually required locally, what is affordable to the local community and what the mix of starter homes, shared ownership and social rent homes should be. The Housing and Planning Bill has recently been passed and this includes the development of starter homes for first time buyers as part of the affordable housing requirement. These homes can be for sale up to £250,000 outside of London. Local salaries of young first time buyers would not make these affordable, SMDC must ensure that affordable homes to purchase are for sale at a price that local people can afford. The type of houses that are required should also be researched, surely the requirement is for smaller affordable homes, 1 bed apartments for singles and couples and older people to downsize to and then 2 and 3 bed homes for young families. I also made a freedom of information request to the district council with regard to the recent development at Uplands Mill in Biddulph asking for the breakdown of owner occupation, shared ownership and social housing and how many nominations had been made for local people to the social landlord, unfortunately this has not been provided in time for me to include this within this response. The reason I made this request was to be able to identify if there was a need for social housing in Biddulph or if the housing association had to widen its search for tenants to the north west, which I believe to be the case. In addition to the above, the below comments are why I feel the proposed sites should be reconsidered. Highway - too narrow, single vehicle for most of Marsh Green Road and Well Lane. At the junction with Congleton Road the carriage way is raised in both directions making it extremely difficult to see fast moving traffic coming either way. Congleton Road to Stoke gets congested and backs up at Knypersley lights and Chell roundabout, this will get worse with other developments so residents will naturally take the lanes towards Gillow Heath and up to Mow Cop and Harrishead. These lanes are single tracks with blind bends, where the road widens in Gillow Heath parked cars make it difficult to pass and the bus currently has problems getting through. Pedestrians use this lane with no pavement going to cycle track and children going to school and numerous properties in Marsh Green Road lead directly onto road, any increased traffic will make these roads dangerous and put users of them more at risk. Construction traffic will also find these areas increasingly difficult to navigate. Environment - after heavy rainfall there is often smells from the sewerage plant and it is known to overflow into the stream. Following heavy rain Marsh Green Road is like a river for many hours with water flowing from the fields, should this water be caught in the drainage system the sewage works will be constantly overflowing. The sewerage works is already servicing more</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

						properties than it is designed to. Schools - as there are currently not enough first school places for children that live in the area, I assume the schools will be built first before any housing development. As a new first school is to be built has a review taken place to ensure that there will be places at the local middle and high schools to accommodate these additional children, or are class sizes going to increase resulting in a drop in educational standards?	
PO2706	Mr Martin Ross	Environment Agency			Object	In particular, BD087 will need to be assessed before being taken further. A level 2 assessment will be required.	<ul style="list-style-type: none"> The site boundary has been amended to exclude land within Flood Zone 2. This approach has been agreed with the Environment Agency since their response to the consultation so a Level 2 Flood Risk Assessment is no longer required for the site if it is selected.
PO4636	Mrs Wendy Boothroyd				Object	<p>I do not think these areas are suitable for housing for the following reasons: Access Marshgreen Road is a narrow road in some places less than 10feet. With steep banks and in one part it is single track with a very sharp blind bend leading to a narrow bridge which crosses the cycle tracks. An increase in traffic would be very hazardous to people walking the tracks. Also this round is not suitable for heavy vehicles. There is no street lighting which makes it very dangerous for the children walking to school. Landscape The land between Portland Drive there is a deep gully which was once a water course. This has been culverted but when it rains heavily it still floods. Local knowledge is that the land in this area is unstable due to shifting sand which would make it unsuitable for housing. Flood Plain The land adjacent to Biddulph Brook, and again particularly the level of the Brook rises causes flooding issues. When I moved here my insurer could not transfer my insurance because the post code flagged up as a flood risk area. Housing being built nearer the Brook could possibly find themselves un insurable as company's now ask if your 100 meters of a water course, Sewage Works The sewage works is screened by trees for part of the year, but during the Winter Months is quite visible. Housing in this area would have a clear view if the metal structure, and quite often when work is being carried out large floodlights are used. Also the noise when the pumps are going is obtrusive in Portland Drive, also the smell on occasion is very offensive so property nearer would even more inconveniences which could become an environment issue. A spokesperson for United Utilities made the following statement by letter dated 26 th May 2016: We have identified the need for the local planning authority to discuss any new housing near to the waste water treatment works with their Environment Health colleagues, and give the sites very careful consideration when comparing these sites with potential alternative sites that may be available to them. Our position is that when considering a range of sites to meet the housing of the borough, it would be more appropriate to identify new housing sites that are not close to a waste water treatment works. Green Belt The</p>	<ul style="list-style-type: none"> See response to PO131 regarding highways. See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. See response to PO131 regarding Flood Zone 2. Screening of the sewage works would be required as part of any development on the site. See Council response to United Utilities (top of this table) See response to PO131 regarding Education. See response to PO131 regarding amenity issues. See response to PO131 regarding Victoria Colliery and Childerplay as alternative locations for development.

						<p>government have emphasised the importance of Green Belt in preserving communities in their areas. These sites form a natural barrier with Gillow Heath and if these sites plus others were developed semi-rural areas would be engulfed and densely populated suburb without Green spaces will be formed. Infrastructure Development on this site would fall into the catchment area for Woodhouse Middle School, and Oxhay School, both schools are always well subscribed and therefore maybe unable to cope with a large intake. Also the junction on Marsh Green Road/Congleton Road has very poor visibility and increase in traffic would make the junction more hazardous and dangerous. Amenity The properties adjacent to the Green Belt in Portland Drive are all single story dwellings, and regulations state that new development should be in keeping with these properties. If this is the case then development on this land could only consist of single storey dwelling's as loss of light and privacy would be an issue to existing properties. Additional Sites As Brownfield sites are supposed to be the preferred option, there is a large area of the properly restored former Victoria Colliery on Brown Lees Road. Also there is a large area of land east of the main road on Childerplay Lane. These two sites could hold the entire Biddulph allocation with very little impact on existing residents with ready access to main road and bus services.</p>	
PO5069	Mr Paul Kasperowicz				Object	<p>Planned development of 25 new builds on land North of Marsh Green Road, East of the Biddulph Brook and backing on to the houses on Congleton Road. Historical note - BD087 was considered in the 1980's as a new Cemetery Ground for Biddulph. This Planning proposal was rejected by the Biddulph Planning Group due to both access issues and flood risk. BD087 is clearly constrained - there are four major planning factors to be consider together with the sustainable and viability of this site as a stand-alone build. 1. BD087 is within the Green Belt Core strategy - Only in exceptional circumstances should the Green Belt be used. The Green Belt Report (Parcel N7) commissioned by SMDC contains all the land in the Marsh Green Area. The report states that this land has a Significant Contribution - in preventing neighbouring towns (Biddulph & Congleton) merging into one another. The report states development in this locality would quickly give the impression of a connection between the settlements - the report further states - The parcel complements Green Belt land within Cheshire East. This report also states that Eastern Boundary is Complex - this is the boundary along Congleton Road. (Complex means - It has many different elements which therefore makes it more difficult to understand or interpret) and that development would produce an over extended linear pattern with limited relationship to Biddulph Town. This site is Approximately 1.5 Miles from the town centre. The Green Belt report clearly states that</p>	<ul style="list-style-type: none"> ● See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO131 regarding Flood Zone 2. ● See response to PO131 regarding highways. ● See response to PO131 regarding the Green Belt Review. ● If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt. ● See Council response to United Utilities (top of this table) ● See response to PO131 regarding amenity issues. ● No contradiction with SMDC Core Strategy Policy SS5b 'Biddulph Area Strategy'. Sites within the urban area and an extension to the urban area are included as well as extensions in the Green Belt identified as part of the Green Belt Review as stated in the policy. ● See response to PO131 regarding Education. ● See response to PO496 regarding ecology.

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>this land which contains BD 087 has a Significant Contribution in Biddulph's Green Belt. The Green Belt report states that there is Land in the immediate vicinity of Biddulph Moor which is less sensitive, being on a plateau. 2. Access to the Site The entrance to BD 087 will be via Marsh Green Road (Confirmed by SMDC Future Planning) the new road will then turn right off Marsh Green Road, then right again over Biddulph Brook - a new bridge will be constructed over Biddulph Brook, then the road will sweep uphill towards Congleton Road before turning North back down to the Brook. There will be a proposed nature band next to the stream. 1. There is no current access to BD087 - this will have to be created. Please Note - The Staffordshire Moorlands Planning office has stated there will be No compulsory purchase of land by the council. 2. BD087 is to consist of a proposed 25 new builds - assuming 2 cars/new build, plus 10 visitors/day and 10 delivery vans this puts an additional road usage of about 140 extra journeys onto Marsh Green Road in daylight hours, approximately 20 vehicles/hour or double the current usage on a single track road. In otherwords traffic controls would be required to control the traffic flow. (Please Note - this is not taking into consideration the potential development of BD 068 - 70 Builds, 140 vehicles, 30 visitors, 30 delivery vans, total 400 journeys. 50 extra vehicles/hour - now 4 times the current usage! 3. Marsh Green Road is 90% a single track road - Entrance via Congleton Road is 5.3M wide reducing to 4.0M after Portland Drive, after the proposed new entrance to BD087, Marsh Green Road reduces to 2.5M (non useable to heavy construction vehicles / trucks). Therefore there is one way in and one way out of this site for construction vehicles. 4. From the entrance to Portland Drive to the proposed new entrance to BD087, Marsh Green Road will have to be extensively widened approximately by 2.5M (from 4.4M/ 4.0M to 6.9M this includes road widening plus a new footpath of 1.8M from the proposed site to Portland Drive the nearest pavement), a new retaining wall will also be required to prevent land slippage from neighbouring field (this could be shifting sand). Unfortunately the existing Bridge (3.9M) over Biddulph Brook cannot be extended and therefore will remain as a single track Bridge due to the approach angle being 30 degrees to the entering roads. A new footpath will have to be created over Biddulph Brook on Marsh Green Road. 5. The widening of Marsh Green Road to support BD087 would also need to address Road surface water issues and Street Lighting (There is No current street lighting in this area) - This area is currently a dark zone and therefore low level light would be needed to retain the current darkness levels. Switch off times would also be good for this area. 6. Please note to support the proposed new build on BD087 the above work will have to be completed before the building works could start (to prevent major traffic issues - vehicles</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>backing onto Congleton Road) - This may require Marsh Green Road being closed for a period of time. Compensation maybe required by existing users, this is the Builders issue. 7. The access to the site on the Western side of Biddulph Brook will be built on both Category 3 & Category 2 Flood Risk Areas (The approximate height of the proposed access road above Biddulph Brook at this point would be 1.5M. These access road will require substantial foundations to avoid future sinkage). These High Risk Flood areas are indicated on Environmental Agency Map 388.801Y. BD087 currently contains 3 High Risk Flood areas. Please Note - there are a further 10 High Risk Flood areas identified on Biddulph Brook before the boundary with Congleton. Major infrastructure including surface water drainage and street lighting would have to be built in/on these areas. 8. The Environmental Agency and United Utilities have both stated (in writing) that - If another site in the Biddulph or Biddulph Moor area was available that does not have a Flood Risk, then these sites should be considered first before BD087. Please also see Staffordshire Moorlands Future Planning Core Strategy and Government Guidelines. I do not believe that the Staffordshire Moorlands Core strategy is being followed. 9. A new bridge would have to be built to support access to this site. Due to the narrow width of the land on the Western side of Biddulph Brook and the necessity to provide the necessary turning circles for both 28 and 44 ton vehicles this bridge would have to be at a diagonal angle to the Brook. This bridge (approximately 6.0M wide) would need to take the loading for a 44 Ton Truck. This bridge would require substantial foundations - This site is called Marsh Green, it is Marsh Land - can this land actually provide the necessary foundation for a Bridge this size? I would strongly suggest that before any Planning Permission is given to develop this site that core samples are taken to ensure that a Bridge and its foundations could actually be built. The Environment Agency has confirmed it will not allow the Brook to have a culvert. 10. The actual site proposal of 25 new builds will require parking for 50 to 60 vehicles plus 10 visitors spaces and a large turn around at the Northern end of the site to accommodate a turning circle for a 28 Ton fixed axle Truck - the site is a dead end. It is possible that more than 20% of the site land area would be taken up in providing the necessary road system to support the site. 11. The Road system on the site will require Surface water drainage and a retention tank, (this is not possible in the High Risk Flood areas - Surface water would have to be directly drained into the brook) Surface water (which could include car washing) will require filtering before it enters Biddulph Brook. Due to the topography nature of the site Two Surface Water retaining tanks would be required - one in the Southern end of the site (this could be a problem as the High Risk</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>Flood Area Category 3/2 extends onto this site by at least 25M). United Utilities has a requirement that the Surface Water Drainage system is not located on a Flood Risk Area. The Northern part of this site is on a High Risk Flood Area which extends onto this site by 15M. Therefore the Road system and Drainage system would have to stop short of both the Southern & Northern part of this site - reducing the potential house numbers. 12. Street lighting would be required - but this is a Dark area - Please Note that Bats feed in this area and lighting would need to be kept to a minimum to protect the existing environment, wildlife and nature requirements. As there is no existing access available to this site - BD087 will require substantial infrastructure development to both existing roads (Marsh Green Road) and in providing new access roads and bridges. Can the potential of 15 new builds (see later notes) support these costs? Is this site viable? Before granting Planning Permission a fully costed out business plan with contingency should be presented to the Staffordshire Moorlands Future Planning clearly identifying all associated infrastructure costs. 3. Site Constraints BD087 site location relative to the Water treatment plant. The Water Treatment Works 100M to the South and 15M higher. The Sewage Works is 225M to the South and 20M higher - compared to the Northern end of this site. Due to the topographical nature of the site there are a number of major planning constraints. 1. United Utilities position on BD087 - The position of United Utilities is that when considering a range of sites to meet the housing needs of the Borough, it would be more appropriate to identify new housing sites that are not close to a wastewater treatment works. United Utilities also state in their letter - the sites (BD087,062 and 068) need very careful consideration when comparing these sites with potential alternative sites that maybe available to them. 2. Site Sewage system - The sewage from BD087 will have to be pumped back to the Sewage works approximately a distance of 400M to the South, the site at the Northern end is 20M below the sewage works. United Utilities has stated in writing - we would expect the houses and associated road systems to be located outside the area of highest flood risk nearest to the Brook as this is a requirement of planning policy. As a result, if a pumping station is required, we are hopeful the pumping station would be located within the residential development, therefore, outside an area of high flood risk. 3. Septic tank overflow from properties on Congleton Road, to the Eastern side of the site - From 161 Congleton Road to 165 Congleton Road - sewage water is piped into a septic tank located at the bottom of 167 Congleton Road the existing pipework requires 2M access to the Northern end of the site - I am told that there is a legal agreement in place, this needs to be confirmed before any Planning Permission is given. 4. BD 087 is completely over-looked</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>- therefore any new builds will have to take this into consideration and demonstrate this will not become a major issue after the properties are built and sold. Example the properties on Congleton Road are 10M above the site and therefore look directly down into the site, any potential new owners privacy concerns must be addressed at the planning stage. 5. Loss of Light to existing properties - due to the topography of the site the plan to build the new builds on the Eastern side of the valley will mean there will be loss of light to existing properties - The Staffordshire Moorlands Planning Department should look to keep the loss of light to existing properties to an absolute minimum, this needs to be addressed at the planning stage - A reasonable distance should be determined between the existing boundaries and any new builds to avoid the loss of light. 6. Existing Boundary considered - Boundaries need to be maintained and therefore access will be required. Please note - there is a right of way to the Southern end of the Site that will also have to be maintained by the Biddulph Council. 4. Environment Issues 1. BD087 - Environmental Agency considerations. This site has 3 Major Flood Risk areas identified by the Environmental Agency. The Staffordshire Moorlands Planning Departments Core Principles - stated that no Flood Risk Land in Category 3,2 or 1 should be built on if there is other land available in the area! In other words this states all other non Flood Risk sites should be first reviewed before a Flood Risk site is considered. Judging by the evidence summated in both the Green Belt Report and the potential sites recognized in the first Staffordshire Moorlands Site Review and by the Biddulph Neighbourhood Planning Committee this is clearly not the case. 2. The Green Belt Report clearly states that there is ample opportunity to develop sites in the Biddulph Moor area without major impact on the Green Belt. The Staffordshire Moorlands First Sites Review identified sites in Pennine Way, Biddulph Moor and Gillow Heath. The Biddulph Neighbourhood Planning Committee has identified several possible sites in the Biddulph area that should be considered before BD087. Government Guidelines also confirm that all other sites should be considered first before sites on a Flood Risk Area. I believe a full review of sites in the Biddulph and Biddulph Moor areas is necessary before BD087 is confirmed and/or is granted Planning Permission. 3. The Environment Agency requested at the last Staffordshire Moorlands District Council Site Consultation in September 2015 that BD087 had a Sequential Test and a Level 2 SFRA completed before Planning Permission was granted. The Environment Agency confirmed that a Level 2 SFRA would have a major effect on any final plans for New Builds on this site. 4. The Environmental Agency also stated that if the site added to any potential flooding down-stream (10 Major Flood Risk areas between BD087 and the</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>boundary with Congleton) then the Agency would strongly object to this site. 5. United Utilities confirm that other sites should be considered before this site, not only due to the Flood Risk and surface water issues but also the locality of the site to the existing Water Treatment Works and the effects that any potential future expansion of the Works would both have on the site in terms of odour and noise, but also increased water flow from the Sewage Works into the Biddulph Brook due to the new builds proposed for the Biddulph area. Potentially causing additional flooding to this site. 5. Sustainability of this site 1. BD 087 is 2 Km from Biddulph town centre - The Staffordshire Moorlands Core Strategy is to support the development of Biddulph Town Centre - this site does not fit within the Core Strategy - Why is it being considered? 2. The nearest Bus stop is over 1000 M away - there is no Bus service to this area, therefore, the only means of transport is via a Car. This will add more strain onto the parking problems in Biddulph Town Centre. 3. The nearest primary School to this site is Ox Hay (which is full to capacity) this school is nearly 1.5 Km from this site and Children would have to cross a major traffic route Congleton Road (1200 vehicles/hour). I would suggest that if the Staffordshire Moorlands Council decide to go ahead with BD087 they also instruct a Traffic Light system at the Junction of Marsh Green Road and Congleton Road estimated cost 256,000 pounds - this can be paid for by the Builder of the site. 4. Potential flooding of the Access Road - From the Environment Agency Maps it is clear that the proposed access road not only has the potential to be systemically flooded but could also be washed away (The road foundations will be critical in preventing any washing away of the road or sinkage of the Road. I would suggest core samples are taken to assess the type and depth of the foundations required to support heavy trucks on this road) - there is no other access to this site. How will the Staffordshire Moorlands Council handle this problem? 6. Viability of Stand-alone Site 1. The infrastructure Costs associated with this site will run into the millions - Widening of Marsh Green Road, Retaining Wall and New pavement on Marsh Green Road, New Foot Bridge over Biddulph Brook, New access road built on Category 3 Flood Plain, New Bridge over Biddulph Brook & Traffic Lights on Congleton Road. Not a complete list just a flavour of the Major Project this stand-alone site is. 2. The Site has 3 Major Flood Zones and this will restrict the New Build to an estimated 15 houses. The costs associated with building these houses and infrastructure to support the build would put these properties costs at over 350,000 pounds each, to balance the costs. Clearly this is not affordable housing. 3. As 30% of these new builds will be Social Housing it is not possible to create a viable cost effective project. Question who will pick up this bill? Does the Staffordshire Moorlands Council have a</p>	

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

						<p>viable costed out plan for this site with contingency built in? If this site is Not a viable site why is it being considered? 4. The Biddulph Local Plan states for BD087 - The Council evidence demonstrates a need for affordable housing in Biddulph and this is reflected in local policy(set out in the Core Strategy) Building housing in excess of 350,000 pounds is not providing affordable housing. This site does not have the capacity to provide affordable housing! Summary 1. The Green Belt Report (Parcel N7) commissioned by SMDC contains all the land in the Marsh Green Area. The report states that this land has a Significant Contribution - in preventing neighbouring towns (Biddulph & Congleton) merging into one another. 2. The Green Belt report clearly states that this land which contains BD 087 has a Significant Contribution in Biddulph's Green Belt. 3. The Environmental Agency and United Utilities have both stated (in writing) that - If another site in the Biddulph or Biddulph Moor area was available, that does not have a Flood Risk, then these sites should be considered first before BD087. 4. United Utilities also state in their letter - the sites (BD087,062 and 068) need very careful consideration when comparing these sites with potential alternative sites that maybe available. 5. The Staffordshire Moorlands Planning Departments Core Principles - stated that no Flood Risk Land in Category 3,2 or 1 should be built on if there is other land available in the area! Judging by the evidence summated in both the Green Belt Report and the potential sites recognized in the first Staffordshire Moorlands Site Review and by the Biddulph Neighbourhood Planning Committee this is clearly not the case. 6. The Staffordshire Moorlands Planning Department First Sites Review identified sites in Pennine Way, Biddulph Moor and Gillow Heath. The Biddulph Neighbourhood Planning Committee has identified several possible sites in the Biddulph area that should be considered before BD087. Government Guidelines also confirm that all other sites should be considered first before sites on a Flood Risk Area. I believe a full review of sites in the Biddulph and Biddulph Moor areas is necessary before BD087 is confirmed and/or is granted Planning Permission. 7. The Environment Agency requested at the last Staffordshire Moorlands District Council Site Consultation in September 2015 that BD087 had a Sequential Test and a Level 2 SFRA completed before Planning Permission was granted. This site is called Marsh Green, it is Marsh Land - can this land actually provide the necessary foundation to support a Bridge which will carry a 44 Ton Vehicle or for that matter housing? The Site needs to be fully surveyed before any planning permission is granted. 8. The Environmental Agency has stated that if this site added to any potential flooding down-stream then the Agency would strongly object to this site. 9. The position of United Utilities is that when considering a range of sites to meet the housing needs of the</p>

						<p>Borough, it would be more appropriate to identify new housing sites that are not close to a wastewater treatment works. United Utilities also state in their letter - the sites (BD087,062 and 068) need very careful consideration when comparing these sites with potential alternative sites that maybe available to them. 10. BD087 will require substantial infrastructure development to both existing roads (Marsh Green Road) and in providing new access roads and bridges. Can the potential of 15 new builds (see later notes) support these costs? Is this site actually viable? 11. The Site has 3 Major Flood Zones and together with infrastructure restrictions would restrict the New Build to an estimated 15 houses. The costs associated with building these houses and infrastructure to support the build would put these properties costs at over 350,000 pounds each, to balance the costs. Clearly this is not affordable housing. This site does not have the capacity to provide affordable housing! 12. BD087 has a number of Right of Access to be resolved before Planning Permission is given. An Example - Septic tank overflow from properties on Congleton Road pass through BD087 (for the past 45 years) - There is an existing legal agreement. 13. BD 087 is completely over-looked - therefore any new builds will have to take this into consideration, any potential new owners privacy concerns must be addressed at the planning stage. 14. Not discussed in the above letter is the ecological importance of this site. In the Biddulph Local Plan it states - the sites proximity to a heritage assets and an LNR is likely to have a negative effect as could the sites district ecological importance. Before any planning permission is granted this site deserves a fully ecological study to be completed. I am not the person to write on this subject, I can only ask that the Staffordshire Moorlands Planning Department review this request. I thank you for your time in reviewing this letter and would ask for a written response.</p>	
PO4617	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Object	BD087 - Major access issues. Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO7225	Mr B Roberts				Object	Northern plots – York Close, Marsh Green, Portland Drive. These developments are very close to the sewerage works. Problems remain with proximity and also capacity and space available for any possible need for expansion of the sewerage works.	<ul style="list-style-type: none"> ● See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works.
PO6684 PO9010	Mr Chris Heath Mrs Susan Heath				Object	(Summary of comments - full version attached) Highways/Access/Infrastructure There is no capacity to support works traffic as Marsh Green Road is a narrow Lane. There is a risk to person and property from works traffic and increased volume of traffic on the inadequate access highways following development. No access to local retail without car travel due to lack of pavements on Marsh Green Road, therefore additional impact on inadequate highways infrastructure. The proposal would create a severe risk of accident. The access to the site would be either through Beaumont Close or Marsh Green Close both routes would intersect a public path. Planning policies should protect public rights of way and by putting a road into the planned housing estate would endanger pedestrians. The junction spacing's and convergence at Congleton Road are below highways design guidelines. (Standard = 40m opposite and 80m adjacent). The development contradicts SMDC LDF Core Strategy Policy T1 "Ensuring that all new development is located where the highway network can satisfactorily accommodate traffic generated by the development or can be improved as part of the development." Schools Current schools are at capacity. Increased development will cause increased traffic around schools - highway safety. Children's education would suffer. Jobs Query why extra housing is needed. Empty shops in town centre. There are no more jobs being created in the town. People moving into new developments therefore need to commute making Biddulph no more than a dormitory town. With the Stoke area being the obvious local source of work, all these cars would commute south, so why build at the north of Biddulph? It would make more sense to build the housing in the areas where it is really needed- where there are jobs, and where there are brownfield sites. Scale of development The figures given for population growth are provided nationally not locally and therefore do not necessarily adequately reflect the population growth or the requirements of Biddulph. Social Housing It is evidenced that mixed developments have a negative impact on communities, especially where people have paid large amounts of money for a property to be living next to properties where anti-social behaviour is taking place. Unfortunately due to housing associations allocations policies, mixed communities do not work, the problems being experienced at Uplands Mill is a local example of this. Sewerage Works Odour from sewage treatment works can have a detrimental impact on the quality of the local environment for those living close. The amount of waste the plant at	<ul style="list-style-type: none"> ● See response to PO131 regarding Highways. ● See response to PO131 regarding Education. ● The proportion of 20% of the District's housing development taking place in Biddulph has been through extensive consultation and public examination as it is taken from the Council's Core Strategy which was adopted in March 2014. ● See response to PO754 regarding use of brownfield sites in Biddulph. ● Provision of affordable housing is enshrined in Government policy. ● See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO131 regarding Flood Zone 2. ● See response to PO131 regarding the Green Belt Review. ● See response to PO5069 regarding exceptional circumstances justifying development in the Green Belt ● See response to PO131 regarding Victoria Colliery and Childerplay as alternative locations for development. ● See response to PO131 regarding landscape impact. ● See response to PO496 regarding ecology. ● See response to PO496 regarding heritage impact. ● The land is privately owned.

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>this site can take is already at capacity, this the only sewage works in Biddulph designed with a capacity of 17,000 people (2011 Biddulph census 19,892) and now with the extra waste from the new development "Uplands Mill" to deal with. This is evidenced by historic Sewage Flooding (extract below). Further development will increase the occurrence of sewer flooding. The issue of odour is only one of the side effects of the plant. DEFRA states that no matter how modern these plants are there will always be the excretion of gas and chemicals into the environment. The tanker lorry already collects twice a day to empty, how many times a day will the extra housing force the tanker down Marsh Green Lane, it will cause a higher level of disruption when combined with the additional resident traffic on a road that is not built to cope, simply it won't be safe. Floodplain Summary of flood issues/Objections: The site has a history of flooding. Increased development will increase run off, increasing flood risk. The site acts as an area to accept run off waters from A527. Loss of this will exacerbate flood impact directly. Unacceptable risk of development works contamination due to run off in to waterway (Biddulph Brook) would be inevitable due to the proximity of the proposed development. Unacceptable risk of waterway contamination following development from household use. The site is currently protected as Greenbelt, and only considered suitable for release from Greenbelt under exceptional circumstances. Removing this site from Greenbelt prioritises development in the floodplain which contradicts SMDC LDF Core Strategy Policy SD 4 when a range of sites are available. Its inclusion contradicts SMDC LDF Core Strategy Policy SD 4 where development proposed... "will be guided to first make use of areas at no or low risk of flooding before areas at higher risk." The presence of a wet meadow evidences the current high level of surface water runoff the site experiences. Development will increase surface runoff in close proximity to a watercourse, reducing lag time into Biddulph Brook leading to increased flooding. Greenbelt This site is Greenbelt land that should be protected with brownfield sites considered a priority, the Government imply that greenbelt is still to be protected so the Brownfield sites should be considered a priority. There are empty mills close to the town center that could be utilised/re-developed. Also several brown fields sites such as the Old Victoria Colliery site or land of Childerplay Road. The National Planning Policy Framework States that the environmental role should contribute to protecting and enhancing our natural, built and historic environment and as part of this, helping to improve biodiversity, use of natural resources prudently, minimise waste and pollution, and mitigate and adapt to climate change including moving to a low carbon economy, this development would result in completely the opposite. Wildlife This area is rich in wildlife with</p>

						Buzzards, Barn owls, Little owls, Ducks, Herons, Frogs, Toads and Newts often seen on this proposed site, Bats are commonly seen feeding above the field at twilight, all of which would be destroyed by the development. The site has been used for recreation, children, dog walking and wildlife research for many years.	
PO6737	Mr Michael Martin				Object	Object to BD087 - site is TOTALLY unsuitable for development. ALL of these sites are within metres of a full to capacity sewerage works already working to overcapacity. We regularly have sewage smells, the nightly warring of machinery, and when walking in the adjacent fields have seen evidence of sewage overflow. The health limitations are obvious. The lane leading to BD087 is one cars width, no footpath, houses adjoining the lane have their own boundaries right up to the lane. Many years ago my wife and I together with numerous neighbours attended a site meeting at the actual works and were told by a United Utilities area manager that the houses in Portland Drive, York Close, and Long Valley Road should never have been built..... we register our total objections to this area. The preferred area was the old Victoria Colliery that has been totally reclaimed and is ready to use.	<ul style="list-style-type: none"> ● See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO131 regarding highways. ● See response to PO131 regarding Victoria Colliery as an alternative location for development.
PO7577	Mr Peter Turner				Object	(Summary only) Object on the basis of: Public Health / Proximity to Sewage Works Sewage works is over capacity, residents already experience unacceptable levels of amenity such as noise, odour and raw sewage flooding. Contradicts Core Strategy Policy SD4. During heavy periods of rainfall sewerage system cannot cope with existing levels of development and overflows. United Utilities have expressed a preference that the Council does not locate new development next to the sewage works. Green Belt & Flood Risk Site is flood zone 2 and its release would contradict Core Strategy Policy SD4. Highways Local highway network is inadequate to cope with new development. Neither the distributor road (Mow Lane) nor the feeder roads (Essex Drive and York Close) meet the minimum standards for the SCC Highways Design Guide Policy. The roads are too narrow and the road bend radii are too small. There are two pinch points over bridges on Mow Lane which cannot be avoided as there is no alternative access to this site. Mow Lane is a dangerous road with no footpath. There is no scope for the required improvements. Serious Highways incidents are common place at the junction of Mow Lane, Congleton Road, Smithy Lane and Halls Road. Recent accident at 4.30am (outside of high risk high flow traffic times) on 20/5/16 relating to the Mow Lane junction with Congleton Road resulted in lane closures, traffic restrictions and spillage intervention by the fire authority. Its inclusion contradicts the SMDC LDF Core Strategy Biddulph Area Strategy where new housing allocation is prioritised on urban extension land to the west of the	<ul style="list-style-type: none"> ● See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See Council response to United Utilities (top of this table). ● See response to PO131 regarding the Green Belt Review. ● See response to PO131 regarding Flood Zone 2. ● See response to PO131 regarding highways. ● See response to PO5069 regarding contradiction with Core Strategy Policy SS5b.

						bypass and where developments help secure infrastructure improvements for the benefit of the newly developed part of the town.	
PO8318	Mr A Hague				Object	Site has poor access to main road A527. Would spoil green belt which i feel would spoil nice area of Biddulph Question who would choose to live any nearer to a sewage works than the houses in Marsh Green Road and Portland Drive We can occasionally hear noise from the sewage works at night. The odour has improved since 1980s but we still get smells occasionally Preferred Sites The Old Victoria Colliery Land off Childerplay Road Mills close to town centre. All have good access to A527 Would not spoil green belt question why spoil green belt and spoil what we have in Biddulph.	<ul style="list-style-type: none"> ● See response to PO131 regarding highways. ● See response to PO131 regarding the Green Belt Review. ● See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO131 regarding Victoria Colliery and Childerplay as alternative locations for development. ● See response to PO754 regarding use of derelict mills in Biddulph.
PO9050	Mr and Mrs Siddorn				Object	(Agent - G. Willard) Object to inclusion of this site.	<ul style="list-style-type: none"> ● Comment noted.
PO9037	The Hart Family				Object	Rob Duncan (agent) Whilst it is acknowledged that this site is well contained and will round-off existing development in this location, it is a very small site with limited capacity for development (up to 25 dwellings). As such it does not present opportunities for significant improvements to local infrastructure. There are also significant issues in respect of this site from a highway safety perspective. The Local Highway Authority confirms that development of this site would necessitate the provision of 2.4m x 90m visibility splays at the junction of Beaumont Road onto Marsh Green Road. Crucially however, it is not possible to achieve these visibility splays without including third party land. There is no evidence to suggest that the relevant third parties are in agreement to provide these splays and accordingly there is not an appropriate means of access into this site. As such this sit should not be taken forward as a preferred option. A fair proportion of the site also lies within the Flood Plain, as confirmed by Environment Agency mapping. New housing development should be targeted to areas outside of the flood plain in the first instance, and it is submitted that my client's sites (BD067a, BD067b and BD067c) are sequentially preferable in this regard. Site BD087 should therefore not be taken forward as a housing allocation within the Submission Version of the Site Allocations DPD.	<ul style="list-style-type: none"> ● See response to PO131 regarding highways. ● See response to PO131 regarding Flood Zone 2.
PO9226	Mr Peter Wilshaw				Object	(Summary of comments - full version attached) The development of future Housing and any future Solar Farm installation would squeeze the natural life from the valley. It would deplete the Green Belt and detrimentally and dramatically alter the landscape and negatively affect the wellbeing of the people of Biddulph and in particular Gillow	<ul style="list-style-type: none"> ● See response to PO131 regarding the Green Belt Review. ● See response to PO5069 regarding exceptional circumstances justifying development in the Green Belt. ● See response to PO131 regarding landscape impact. ● See response to PO131 regarding highways.

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
						<p>Heath. I hope that planners will reconsider the preferred option taking into account the following; Unsuitable road network . These proposed housing sites are situated along the gateways to our countryside and walking tracks e.g. Akesmore Lane, Holy Lane, Mow Lane and Marshgreen Road. These narrow roads already carry an unacceptable level of traffic which when combined with a heavy footfall of walkers with children and animals presents a real danger. This danger is also manifested in the fact that they all lead to crossroads on the A527 at Marshgreen and Smithy Lane which are difficult places to emerge from. If these lanes require widening or other safety upgrade it highly likely the ancient hedgerows will be destroyed and therefore the characteristics of that landscape lost for ever. Situating parking places at various spots on the west side of the valley at medium to high elevation would enable access to many walking tracks and elevate the mix of cars and people on the narrow lanes. Diminishing of the Green Belt in the short and long term. The release of Green Belt land, according to the NPPF, should only take place in “exceptional circumstances”. There is not statement to say what those circumstances are and why land can be released in Biddulph and other places but, not in Leek? Cumulative and Visual damage to the historic and characteristics of the north Staffordshire uplands area of Gillow Heath . Biddulph valley is also a gateway to the moorlands and The Peak District National Park. It was granted the title of “The Garden Town of Staffordshire” and over twenty years of volunteer effort to showcase the town, Biddulph in Bloom Charity has won many RHS Heart of England in Bloom awards and in 2015 came second in the National Large Town category. I feel that the location and magnitude of these developments will adversely affect the confidence, so hard fought for, in the effort to improve our town and increase tourism. Sites BD062, BD068 and BD087 are unsuitable areas to build houses being adjacent to a water treatment plant and the Biddulph Brook. In many respects this plan does not meet the Core Strategy of SMDC and SCC in meeting their own obligations stated in the Historical Environment Assessment Report which is to protect and retain the character of the landscape and follow and develop many of the recommendation therein. There is a finite limit to the availability of land on which to build houses and the limit to where the wellbeing and recreation of the population is detrimentally affected. The County’s Historic Environment Assessment demonstrates that this area has historic value in terms of heritage and historic landscape character.</p>	<ul style="list-style-type: none"> ● See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO131 regarding Flood Zone 2. ● See response to PO496 regarding heritage impact.
PO9965	Mr C Lunt				Object	The land has flooding issues. Access would be an issue.	<ul style="list-style-type: none"> ● See response to PO131 regarding Flood Zone 2. ● See response to PO131 regarding highways.

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO10227	Mr Graeme Court				Object	Summary only (see full representation attached). Object to the allocation of this site due to the following reasons: 1) It would prioritise building in the floodplain. The land acts as a natural soakaway for rainwater. 2) site is next to the Water Treatment Works where there are issues of odour and noise 3) during periods of heavy rain, the sewers cannot cope and raw sewage is admitted to drains in Marsh Green Road finding its way into Biddulph Brook. Development would exacerbate this and would be contrary to adopted Core Strategy SD4. 4) The land is currently used for grazing 5) it would damage the amenity value of this part of Biddulph 6) the site is in the Green Belt and there are other sites available for development. 7) site is a conduit for diverse wildlife. The Phase 1 survey stated that other surveys needed to be carried out. 8) March Green Road is a very dangerous road. Further development would exacerbate problems here. This would be contrary to Core Strategy T1. 9) The capacity of the water treatments works is insufficient. More recently Biddulph NT gardens have agreed that their waste can now go via the works which will make things worse.	<ul style="list-style-type: none"> ● See response to PO131 regarding Flood Zone 2. ● See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO131 regarding the Green Belt Review. ● See response to PO496 regarding ecology. ● See response to PO131 regarding highways.
PO10074	Ms Heather Mason				Object	(Summary of comments) Object to the development of this site for the following reasons: The site shares a boundary with the only sewage works in Biddulph which is already working over its' designed capacity population of 17,000 people (2011 Biddulph census 19,892); Local residents on Long Valley Road, Portland Drive, York Close, Essex Drive and Marsh Green Road already experience unacceptable amenity impacts in their homes such as noise, odour and raw sewage flooding; Loss of Green Belt - no exceptional circumstances demonstrated; The site is in Flood Zone 2; Neither the distributor road (Mow Lane) nor the feeder roads (Essex Drive and York Close) meet the minimum standards for the SCC Highways Design Guide Policy; Access for emergency vehicles; This site will deliver too few homes to add a measurable contribution to the Community Infrastructure Levy (CIL), it will not bring any direct benefit to the community of Gillow Heath. Staffordshire Highways have already responded to our protests to say the road infrastructure is not suitable; therefore more housing would bring more cars, more danger, more noise, and more pollution. There are no bus routes on this lane for the reason of unsuitable, therefore more housing would bring more cars more danger, more noise pollution. The natural habitat provides homes for the varied wildlife including badgers foxes bats and many different species of birds. This development would not enhance nor add any value to the quality of life of the local community.	<ul style="list-style-type: none"> ● See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO131 regarding the Green Belt Review. ● See response to PO5069 regarding exceptional circumstances justifying development in the Green Belt. ● See response to PO131 regarding Flood Zone 2. ● See response to PO131 regarding highways. ● Site BD087 will be required to provide a percentage of affordable housing / starter homes to benefit those in the community needing affordable housing. ● See response to PO496 regarding ecology.

Question 19 – Do you have any comments on the proposed housing allocation BD087 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO10071	Mr Norman Smith				Object	(Summary of comments) Object to the development of this site for the following reasons: The site shares a boundary with the only sewage works in Biddulph which is already working over its' designed capacity population of 17,000 people (2011 Biddulph census 19,892); Local residents on Long Valley Road, Portland Drive, York Close, Essex Drive and Marsh Green Road already experience unacceptable amenity impacts in their homes such as noise, odour and raw sewage flooding; Noise from new development will negatively impact on existing residents; Loss of Green Belt - no exceptional circumstances demonstrated; Impact on ecology; Site is in Flood Zone 2; Inadequate road network; Emergency services access; Too few homes to bring CIL benefits to Gillow Heath; I think this site should be included as visual or public open space within Biddulph.	<ul style="list-style-type: none"> ● See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO131 regarding the Green Belt Review. ● See response to PO5069 regarding exceptional circumstances justifying development in the Green Belt. ● See response to PO131 regarding Flood Zone 2. ● See response to PO131 regarding highways. ● Site BD087 will be required to provide a percentage of affordable housing / starter homes to benefit those in the community needing affordable housing. ● See response to PO496 regarding ecology. ● The land is privately owned so cannot be designated as Public Open Space. The site is not recommended for designation as Local Green Space in the Landscape, Local Green Space and Heritage Impact Study (2016). Local Green Space supersedes the Visual Open Space designation (which is an old designation not supported by Government policy in the NPPF).
PO10202	Mr Carl Mason				Object	Strongly object to Preferred Option site BD087: NPPF states that environmental role should contribute to protecting and enhancing natural, built and historic environment and..help to improve biodiversity [etc] the overbearing scale of works would have oppressive impact on the surrounding area and existing houses planning policies should protect public rights of way and by putting [access] road into housing estate would endanger pedestrians site is natural land with many varieties of plant and animal life. We should be conserving and enhancing the natural environment.. building on green belt land would be oppressive to Beaumont Close residents (close proximity of buildings). Loss of natural light. Also a planned site on the opposite side of Marsh Green Road. planned housing would be out of character both in design and scale we would lose privacy and visual amenity. Trees would be lost in large quantities thereby reducing carbon footprint. 25 additional houses would result in noise pollution and disturbance. Unacceptable level of intrusion in addition to [other amenity impacts]. Traffic pollution and highway safety would become dangerous; Marsh Green Road could not accommodate more traffic and does not have pavement. Beaumont Close could not accommodate through-traffic (and no pavement); turn into the cul de sac only one vehicle(wide). HGVs would cause danger and disturbance. Beaumont Close residents currently feel safe but this would be lost due to fear of crime and disorder which would undermine the quality of life of the community.	<ul style="list-style-type: none"> ● See response to PO131 regarding noise and odour, existing raw sewage flooding, capacity of water treatment works. ● See response to PO131 regarding the Green Belt Review. ● See response to PO5069 regarding exceptional circumstances justifying development in the Green Belt. ● See response to PO131 regarding amenity issues. ● See response to PO131 regarding Flood Zone 2. ● See response to PO131 regarding highways. ● See response to PO496 regarding ecology. ● See response to PO4636 regarding site screening.

PO2590	Consultation Service	Natural England			General comment	Natural England notes the proposed preferred site for allocation in Biddulph. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.	The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.

Question 19 – Do you have any comments on the proposed housing allocation BD108 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO763	Mr Paul Malkin				Support	It makes sense to use this land for development if extra homes are required, with easy access to the a527 and the town centre and will also not negatively impact current residents	Comments noted.
PO7580	Mr Peter Turner				Support	These sites offer far more appropriate development opportunities, away from the water treatment works and meeting highways requirements.	Comments noted.
PO9234	Mr Lee Dawkin	Renew Land	Mr Ben Weatherley	Knights LLP	Support	(Summary) Support the proposed allocation of land at and adjoining Jacksons Nurseries - Preferred Housing Allocation reference BD108 - along with the adjoining site references BD106, BD156 and BD055, for housing development. Reasons are: Land is previously developed and located within the Biddulph Town Boundary; Land is in a sustainable location within walking distance of the town centre and local bus services whole of Biddulph is within cycling distance; A range of local facilities are within 2km of the site - primary schools, secondary schools, supermarkets, convenience store, GP surgery; Pre-application discussions for this site and a neighbouring site have resulted in positive feedback including site layout (attached); Site has a willing landowner and developer and is technically deliverable; and Agree with results of options site assessment document published by the Council during the previous (Site Options Consultation) in regard to Site BD108.	Comments noted.
PO10051	Mr Philip Sutton				Support	Support development here, it would balance out the town and access from these sites is easily achievable. They are within walking distance of the town centre.	Comments noted.
PO9832	Mrs Margaret Biddle					Support development of this site. Residents are more likely to use the facilities of the town if they live within walking distance and commuters to the Potteries will be able to access their places of work without travelling through the town centre.	Comments noted.

Question 19 – Do you have any comments on the proposed housing allocation BD117 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO2591	Consultation Service	Natural England			General comment	Natural England notes the proposed preferred site for allocation in Biddulph. We note that it is located close to and/or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces' may be required together with appropriate management (and funding thereof) in order to allow these open spaces to function effectively during the local plan period. Similarly the development of these preferred sites (if progressed) will need to include suitable multi-functional green infrastructure. Adopted local plan spatial objectives SO8 & 9 refer together with policies such as DC1 Design Considerations, DC3 landscape and settlement setting, and C3 Green Infrastructure.	<ul style="list-style-type: none"> The Council has produced a Draft Green Infrastructure Strategy for consultation alongside the next draft version of the Local Plan. The strategy identifies green infrastructure corridors around the towns and lists particular issues in relation to that corridor which can be addressed as part of the relevant site policy and / or at the planning application stage. Similarly, a public open space study is underway covering all designated public open spaces in the Staffordshire Moorlands. One of the areas this will advise on is where improvements are needed to these spaces and new development in the vicinity could contribute towards this. The Council has also designated Local Green Spaces in line with criteria set out in the NPPF and the Council will seek to facilitate improvements to these areas where required.
PO1194	Mr P And Mrs J Dowson				Object	This idea of changing green belt area mixed use ie prefab low employment warehouses and the like is flawed. As well as providing a lovely gap between Biddulph and Stoke built up areas it provides excellent views over the glorious countryside. There are unoccupied units nearby already the Victoria Colliery site and the old steel works areas. There is no need for anymore in this area.	<ul style="list-style-type: none"> An assessment of employment land requirements by NLP in February 2017 concluded that 13ha to 27ha of employment land was required to meet the needs of the district 2014-2031. It was recommended and agreed by Council Assembly on 08/03/17 that an annual housing requirement of 320 homes per year (close to combined jobs growth scenario) was taken forward into the Preferred Options Local Plan. An employment land requirement of approximately 27ha was therefore recommended up to the year 2031 for the Preferred Options Local Plan on the basis that it was at the top of the OAN range for employment and so closely corresponds with the proposed housing requirement to support sustainable development. Applying the 20% requirement for Biddulph wards in Pol SS3 Core Strategy gives a requirement for the town of at least 5.4ha, less qualifying 2014-17 employment commitments. A range of employment site choices have been selected for Biddulph – either close to the town centre or to the existing Victoria Business Park. This site has been selected primarily for employment use as it has good road links and is well related to Victoria Business Park so is likely to be attractive to businesses to help meet the employment needs of the District. The Council has undertaken a Green Belt Review (published in 2015) to assess all the Green Belt in the Staffordshire Moorlands and determine whether it may be suitable for removal from the Green Belt to meet the District's future development needs to 2031. For this site, it was concluded that the overall impact of development on the Green Belt would be limited. 'This site would infill land between Mill Hayes Road and the A527 Tunstall Road. As such, the land is reasonably well bounded, although smaller boundaries to the east and north are hedgerows. (See also land to the north of Mill Hayes Road). Recommendation – Consider for release – Release under exceptional circumstances,

Question 19 – Do you have any comments on the proposed housing allocation BD117 in Biddulph?

							<p>should be accompanied by extension of the Town Boundary.'</p> <ul style="list-style-type: none"> The Council has also undertaken a Landscape Impact Assessment of the site and this concludes that part of the site (adjacent to Tunstall Road) is of low landscape sensitivity but most of the site (south and east of Victoria Row) is of high landscape sensitivity and landscape mitigation measures are recommended if this area were to be developed. The Council must balance all planning issues in determining the suitability of a site for inclusion in the Local Plan.
PO4988	Mr C Kisicki				Object	In relation to BD117 (housing/employment) on Mill Hayes Farm. The employment part should be ideally sited on the vacant land between Childerplay Road. There are already industrial units along part of the road, and it would make more sense to build new units further down this road than on Mill Hayes Farm.	<ul style="list-style-type: none"> Childerplay Road is within the Green Belt like BD117. The Green Belt Review has considered the impact on the Green Belt the release of this area for development would have. The Childerplay Road area is not considered suitable for release from the Green Belt. Area BD117 is considered suitable for release from the Green Belt.
PO6266	Mr N Lunt				Object	This site is currently considered as a Green Belt. The land here is subject to flooding and access roads are completely unsuitable. This Green Belt site should surely be considered too far from the town centre and encroaching on Stoke-on-Trent.	<ul style="list-style-type: none"> See response to PO1194 in relation to Green Belt Review. The Environment Agency commented on the site at the Site Options Consultation Stage in 2015 and said "Site not identified as being in an area likely to be affected by flooding." The Highway Authority has agreed that access from Tunstall Road opposite the Tunstall Road / Brown Lees Road junction would be acceptable.
PO8075 PO8317 PO8022 PO7205 PO7864 PO8830 PO6019 PO5017 PO5546 PO7082 PO7000 PO10017 PO6810 PO6331 PO8383	Mrs V Jackson Mr A Hague Mr N Goode Mr M Seddon Mr H Whalley Mrs Ann-Marie Cumberbatch Mr P Price Mr R Milner Mrs M Moffatt Mr C Kisicki Mr R Lawton Mrs C Cliffe Mr M Owen Ms S Wilson Mr John James				Object	i object	<ul style="list-style-type: none"> Comment noted.

Question 19 – Do you have any comments on the proposed housing allocation BD117 in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support / Object / General	Consultee / Agent Comments	Officer Response
PO9964	Mr C Lunt				Object	Building here would encroach too closely to Stoke-on-Trent, again Biddulph identifies itself separately from S-o-T, that's what attracts people here and why it's such a nice place to live.	<ul style="list-style-type: none"> See response to PO1194 in relation to Green Belt Review.
PO1046	Mr G Cooper				Support	Could this not accomodate a few more houses than the proposed 65 because there is about 6.5 hectares of land & only 2 is required for employment purposes.	<ul style="list-style-type: none"> The site in total is 6.74ha. 4.74ha is proposed for employment to meet Biddulph's needs and the remaining 2 hectares is proposed for residential – giving a total of 80 houses (based on a density of 40 dwellings per hectare).
PO771	Mr Paul Malkin				Support	It makes sense to use this land for development if extra homes are required, with easy access to the a527 and will also not negatively impact current residents. Could this whole site not be used for housing to protect the areas that will majorly impact on current residents lives?	<ul style="list-style-type: none"> An assessment of employment land requirements by NLP in February 2017 concluded that 13ha to 27ha of employment land was required to meet the needs of the district 2014-2031. It was recommended and agreed by Council Assembly on 08/03/17 that an annual housing requirement of 320 homes per year (close to combined jobs growth scenario) was taken forward into the Preferred Options Local Plan. An employment land requirement of approximately 27ha was therefore recommended up to the year 2031 for the Preferred Options Local Plan on the basis that it was at the top of the OAN range for employment and so closely corresponds with the proposed housing requirement to support sustainable development. Question 20 – Do you have any comments on the potential locations for a new school in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site	Support/Object/General Comment	Consultee Comments	Officer Response
PO34	Mr E Shaw				ADD03	Object	The roads leading in to Station Road, Halls Road, Mow Lane etc cannot cope with a further amount of vehicles. A further 744 vehicles (assuming each proposed property has two vehicles) plus school traffic using the access roads of Station Road etc would not cope with the vast increase of traffic. Akesmores Lane does not have any other access other than from Wedgwood Lane which leads from the narrow Mow Lane. Akesmores Lane is a road leading to various farms which have a regular daily use of large tractors and HGV's for deliveries etc accessing the farms and therefore further cars etc using the local lanes themselves pose a danger for the new proposed residents. The residents of the any new proposed development may well work in the City of Stoke on Trent or need to access the A500 and M6 therefore they would travel South along Akesmores Lane, Towerhill Road etc and on through various nearby villages such as Newchapel, HARRISEHEAD and therefore putting further pressure on very narrow busy side roads.	<ul style="list-style-type: none"> The Highway Authority has no difficulties with the principle of development in this location. Improvements needed to the road network as a result of development would need to be identified through a Transport Assessment. Also refer to PO2899 below.
PO41	Mrs Emma Hallen				ADD03	Object	The school would be built of greenbelt land which should remain protected from development. Access for parents and carers onto and out of Akesmores Lane and Mow Lane would be a problem. The extra volume of traffic onto akesmores lane would be a problem and potential danger.	<ul style="list-style-type: none"> In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site ADD03 for release from the Green Belt. See response to PO34 regarding highways.
PO85	Mr Robert Moseley				ADD03	Object	Its on Green belt.	<ul style="list-style-type: none"> See response to PO41 regarding loss of Green Belt.
PO307 PO544	Mr Russell Picken Mrs C Picken				ADD03	Support	The new school should be located in (ADD03 or within BD140 (to the immediate south of ADD03)). This is an ideal site as it is fairly central to the town. It would also be the only school on the west side of the town and could service Hayden Park, parts of Gillow Heath and some of the new builds on sites BD071 and BD071a, etc. This could have the effect of reducing traffic crossing the main roads through Biddulph and could reduce traffic congestion around Oxhey, Kingsfield and Knypersley First Schools. Currently the traffic congestion, caused by parents parking around Oxhey First School, at the start and the end of the day, virtually renders Pennine Way impassable. The school should be located close to the BVW, which could then be used to provide traffic free walking access to and from many properties in the area.	<ul style="list-style-type: none"> Comments noted.
PO156 PO164	Mrs Beverley Webb Mr Barrington Webb				ADD03	Object	ADD03 – Object to the building of new primary school on greenbelt when there is sufficient capacity to extend Oxhey School in Oxhey Drive as highlighted in the letter from Staffordshire County Council Education Department dated 14/9/2015.	<ul style="list-style-type: none"> See response to PO41 regarding loss of Green Belt. Staffordshire County Council are the Education Authority and they look at the need for new schools in an area as a result of development. They consider that a new first school would be needed in Biddulph to accommodate the

Question 20 – Do you have any comments on the potential locations for a new school in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site	Support/Object/General Comment	Consultee Comments	Officer Response
								level of new housing development currently proposed. The location of this school would not be decided until the Council has firmed up its plans as to where the new housing development will take place in the town. (There are 2 options put forward as potential locations for a new school in the Preferred Option Sites and Boundaries Consultation booklet).
PO245	Mr Robert Stockley				ADD03	Object	ADD03 location for a school will create accident blackspots from the increased traffic on Wedgewood Lane, Halls Road and Akemoor Lane, not to mention the other end of Akemoor Lane at the junction with Tower Hill Road. There will be increased parking on all the afore mentioned roads plus Linden Drive and Smokies way. With all this increased traffic at peak times there are bound to be more accidents. The increased traffic along Akemoor Lane towards Tower Hill Road junction will also cause accidents because of the lanes narrow nature, and its twists and turns, and the Tower Hill Road junction has blind approaches, so there will inevitably be accidents, some serious and potentially fatal. The Victoria Colliery site also encroaches into the green belt I believe, but this location has already been identified for development, and the residents of Brown Lees are expecting it, so why not build there, and join up with Newcastle BC to build a joint site. A school site on the Victoria Colliery location will create a safe access and egress for children, parents and residents so this site must be included as a potential. ADD04 + Victoria Colliery school sites will alter the catchment and provide shorter journey's for kids living a the west end of Biddulph.	<ul style="list-style-type: none"> • See response to PO34 regarding highways. • Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations nor is the possibility of noise from the school or parking issues. • Sites at Victoria Colliery and Childerplay Road are within the Green Belt like ADD03. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy.
PO291	Mr David Spruce				ADD03	Support	Good location close to domestic areas reducing need for transport. On same side of bypass as new housing development, so no need to cross busy road.	<ul style="list-style-type: none"> • Comments noted.
PO347	Miss Gemma Docksey				ADD03	Object	I understand that with the growing population and increased demand for us to provide more homes that this will increase the capacity our schools will need to be able to facilitate. I don't think that building more schools is the answer. Shouldn't we instead support the schools in Biddulph we already have? Looking at the plans for the potential allocation sites it would seem you want to build most new homes towards the Congleton end of Biddulph (I have stated my concerns about this in other question). It would then make sense to extend Ox Hey First school, there is a lot of land around the school! We could then spend the money we would spend on building a new school on employing more teachers and improve the learning opportunities for our future generation. I really don't believe that building a new school is the answer.	<ul style="list-style-type: none"> • See response to PO156 regarding education.
PO1097	Mrs F Moore				ADD03		Object	<ul style="list-style-type: none"> • Comment noted.

Question 20 – Do you have any comments on the potential locations for a new school in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site	Support/Object/General Comment	Consultee Comments	Officer Response
PO537 PO600	Mr Bill Hockey Mrs Pamela Hockey				ADD03	Support	Developments on ADD03 are able to accommodate the proposed new Primary School and is close enough for access by foot, so against the School being located to the south: Eliminates the need to travel by car. Could design for safe parent drop-off / pick-up. Reduces by-pass volumes. Eliminates needing to cross the by-pass so safer for those on foot and reduces slowing of traffic. Therefore, greatly improving safety for our vulnerable young children. The area being best located to maximise the positive impact of all the above in support of Town Centre regeneration and Town Council income generation into the future and beyond. The above demonstrating why this is the best Sustainable Location in achieving the goals of the Staffordshire Moorlands Sustainability Vision.	<ul style="list-style-type: none"> Comments noted.
PO497	Mr Denver Johnson				ADD03	Object	I've been a resident of Biddulph for forty one years and have seen many developments in the location over the years. Happily, over that time the green spaces and views have survived relatively unchanged within that time, maintaining the spirit of a rural conurbation. The current threat to those very Green Belt spaces that set Biddulph apart as a little gem is untenable. It seems that crooked National government have connived with big developers (party sponsors) to twist arms up backs of Development Officers and override Councillors/Local Public Opinion to cherry pick development locations that they hope will bring in the most cash. Stupid insofar that any big development so close would bring down local property prices. The infrastructure of our little end of Biddulph has always been strained by the population level, to suggest that the number of houses could be doubled is ludicrous. The main drawbacks to our location have always been increasing traffic on the A527 (it's too crowded now), flooding (gardens in the best drained locations tend to get boggy in Winter - the weather is getting wetter and some local actions like selling off the Grange and allowing the marsh drying Rhododendrons to be mass destroyed didn't help) and when the wind is in the wrong direction, the smell from the close sewage works. The placing of large developments even closer to the sewage works seems more like a criminal act than a thoughtless oversight. The Abbeystead, Lancashire waterworks disaster of May 1984 where a methane gas explosion severely wounded forty four people and killed eight outright including a mother and child should never be allowed to be forgotten. The cause of ignition has never been determined, however the good sense of at the very least leaving as many fields as possible around them was once enforced by law. Private takeover of Public utilities seems to have greyed this issue. From an explosives perspective (I'm a Physical Science Graduate) placing houses closer to such an installation is akin to packing a bomb with shrapnel and strapping innocent victims to it! Won't allowing these developments be exponentially raising the risks of the site being used as a terrorist soft target? How many other locations are there	<ul style="list-style-type: none"> See response to PO41 regarding loss of Green Belt Property values are not considered material in planning law. See response to PO34 regarding highways. Heritage Impact of development on the site has been assessed in the Council's Heritage Impact Study (August 2016), the results for this site are: "There is one Grade II Listed Building within the site. The setting of the asset contributes to the overall significance of it and would need special regard for its preservation. Development would be highly likely to cause adverse effects to its setting. Therefore, any development should be restricted to the southern part of the site only and mitigation should include the use of vegetation screening to reduce adverse effects to its setting. Whilst the HEA states that zone BBHECZ 18 cannot absorb significant change, development to the south of the site would be a small change to the zone as a whole, and with appropriate development, this could be accommodated on the site (Historic Environment Character Assessment 2010). Site is suitable for development in heritage terms, subject to suitable masterplanning; if development is restricted to the southern part of the site only and with appropriate screening." The Council must balance this evidence against all the other evidence relating to this site and reach a decision on whether or not to include it as a development site in the Local Plan. The Council is aware of mining issues which affect a number of green field sites around Biddulph and investigative work will take place in these areas prior to the commencement of any development. The site is not within floodplain and the Environment Agency has not commented as such. If there is an existing issue with surface water drainage then new

Question 20 – Do you have any comments on the potential locations for a new school in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site	Support/Object/General Comment	Consultee Comments	Officer Response
							<p>Nationally like this one, with the added blast focus of the steep valley sides? New houses on the proposed sites would not just be putting lives of new residents at risk. Wildlife - Biddulph attracts some rarities like buzzards and herons, sustains a large population of wild rabbits along with frogs, toads, snakes, foxes, stoats, badgers and hedgehogs. Pheasants, crows jackdaws, jays, magpies, woodpeckers (green and spotted) along with a large variety of the smaller birds. All of these animals would be hit by the loss of the green spaces and the draining of marshland. Heritage - Biddulph originated in the lee of the old 13th century Norman fort/castle built in Bailys Wood. All of the Mediaeval village would have been centred on the brook. The road from the South along the brook would have been important, but the fair road that no longer exists, running East West through the village would probably have been more important to the community and the North road out towards Congleton may not have been there since the fort was put there to control the area boundary. Bradley Green was the name of the village now using the name Biddulph. See 1806 map: http://www.visionofbritain.org.uk/maps/series?xCenter=3216685.06303&yCenter=2985192.16842&scale=633600&viewScale=181417.4208&mapLayer=nineteenth&subLayer=smith_1806&title=C.%20Smith%20New%20Map%20of%20Great%20Britain%20and%20Ireland&download=true Biddulph Castle - Biddulph Lea Forge http://www.gatehouse-gazetteer.info/English%20sites/3308.html Archaeology - ancient Biddulph is still burried below the fields (inc. BD087) between Marsh Green Road and Bailys Wood. Bakers South field (BD068), from hearsay, was called 'the old garrison' - it's sited ~1000M South West of the old Biddulph Hall and would have been a very probable place for a Parliamentarian cannon battery during the Civil war. I've found shards of what appear to be iron age or older pottery in this field close to the brook. I've got this depiction from a mix of reading and hearsay, but am currently in contact with 'The Biddulph Museum'. See: http://biddulphmuseum.com/index.html Flooding - Marsh Green gets it's name from a long history of flooding. The glacial alluvial valley floor is an area for subsidence even without the help of the many mines close to the area and the existence of a large underground reservoir at our end of the valley that is the reason for there being less pit shafts this end. Access - Marsh Green road is a single track, dangerous to the many pedestrians that have to cross it daily on their way to the old railway line (Biddulph Valley Way - Route 55) and cars that face meeting on the sharp blind bend next to Suttons old farm. Marsh Green Road was at it's safest when it was blocked off at the sewage works entrance to facilitate work on the bridge over the brook. ADD03 - has had a history of severe flooding. The field is boggy during the Winter and Spring with signs of subsidence. The entire site has been extensively mined and has</p>	<p>development would need to address this. An on site SUDs (Sustainable Urban Drainage) system would be required on this site if it were to be developed.</p>

Question 20 – Do you have any comments on the potential locations for a new school in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site	Support/Object/General Comment	Consultee Comments	Officer Response
							probably been worked both on the surface and in deep pits going as far back as the Bronze age: in search of copper, iron and latterly coal. Access to this site is so bad that major infrastructure changes would have to be made to the area before it could be opened up.	
PO725	Mr Philip Beech				ADD03	Support	The inclusion of a new school within ADD03 can't come quickly enough. I believe that there are huge issues with school allocation in Biddulph, where children have to travel to a school which isn't the closest geographically. This is wholly unacceptable, and the inclusion of a new school may go some way to addressing this unfortunate issue. I believe that ADD03 should go ahead and wholly support it.	<ul style="list-style-type: none"> Comments noted.
PO691	Mr Ian Turner				ADD03	Object	The roads in the area are not capable of safely accommodating additional pedestrian and vehicle access.	<ul style="list-style-type: none"> See response to PO34 regarding highways.
PO773	Mrs Sharon Kirkham				ADD03	Object	The location would be really poor and somewhat dangerous for a school, ie winding, country lanes are not the best to walk along, especially on a dark winters night or morning. Biddulph does not need another school if they do not build more houses. If needed either extend existing ones or build on the former Meadows school site – James Bateman school still use the playing field there.	<ul style="list-style-type: none"> See response to PO34 regarding highways. See response to PO156 regarding education.
PO452	Mrs Kirsty Murphy				ADD03	Object	My views expressed regarding the amendment to the green belt apply to my reason for the objection to a new school. The issue with the volume of traffic outside all the current schools in Biddulph is an issue for drop off and in particular pick up. The site does not have any adequate access for the volume or traffic a new school would attract. With Haydon Park being easy access to the new site from the tracks I can clearly see cars trying to park up various roads on this estate for access and these roads are not wide enough for cars to be parked on either side. There are already many parked cars on the roads from the residents. The old school which has been demolished at the top of the bypass would have been a far better option with plenty of land to provide off road parking for pick up and drop off. There is much better access and far less disruption to the surrounding area.	<ul style="list-style-type: none"> See response to PO34 regarding highways. See response to PO245 regarding parking problems in relation to the possible new school.
PO578	Miss Louise Richardson				ADD03	Support	Knypersley end of Biddulph is the wrong place for a school. To add one to Akesmore Lane makes sense as at the moment Oxhey services such a large area and a growing population means that it's pushing people from my end of town (gillow heath) to town centre schools. This is a drivable distance only. This increases congestion and also discourages the 'healthy' activity of walking. Little legs can't go so far and for working parents there's no time to walk with schools potentially being so far away.	<ul style="list-style-type: none"> Comments noted.
PO751	Mr Paul Malkin				ADD03	Object	This is a ridiculous site for both housing and a new school, access will be via difficult to navigate country lanes and will put children's lives at risk on their journey to school.	<ul style="list-style-type: none"> See response to PO34 regarding highways.

Question 20 – Do you have any comments on the potential locations for a new school in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site	Support/Object/General Comment	Consultee Comments	Officer Response
PO780	Mrs Jayne Beech				ADD03	Support	Biddulph North area has issues with school places for residents. I understand that Oxhey School does not have enough school places for residents living close by. A new school built in ADD03 would serve to improve on this. Traffic issues are worsening, so less travel during the school run time must be seen to be positive. I support the proposal to build a new school in ADD03	<ul style="list-style-type: none"> • Comments noted.
PO951	Mr Alistair McLoughlin				ADD03	Support	Providing that a new access road can be constructed to the site directly from the town centre, the site is ideally suited. Should also consider expanding the existing primary schools within their existing footprints, where space provides.	<ul style="list-style-type: none"> • Comments noted.
PO967	Mr Christopher Goldstraw				ADD03	Support	Providing that a new access road can be constructed to the site directly from the town centre, the site is ideally suited.	<ul style="list-style-type: none"> • Comments noted.
PO1200	Mrs Y Pointon				ADD03	Support	Excellent idea to build new schools to accommodate new families.	<ul style="list-style-type: none"> • Comments noted.
PO2565	Mrs Maggie Taylor	Sport England			ADD03	General Comment	The new school is located near to existing playing field areas. It would be good if some co-location/shared use could be secured if this will improve sports provision for both the school and community (for example access to school changing rooms/toilets for users of the playing field or shared car park provision?)	<ul style="list-style-type: none"> • Comments noted. The location of the school is dependent on where the bulk of new housing takes place in the town so once this is determined issues such as sharing facilities can be explored.
PO2854	James Chadwick	Staffordshire County Council			ADD03	General Comment	In Biddulph it is noted that the Plan puts forward two potential locations for new First school provision. We will need to review both of these in detail in relation to transport matters and pupil movement to determine which of the two is to be taken forward in the Plan.	<ul style="list-style-type: none"> • Comments noted.
PO2899	James Chadwick	Staffordshire County Council			ADD03	General Comment	With regards to the two potential First School locations in Biddulph from an initial assessment we have the following comments to make from a transport planning perspective. There are currently no identified accident clusters in Biddulph and therefore it is unlikely that either site would be preferred based on the existing accident record. Site ADD03 would provide a greater geographic spread of first school provision in Biddulph and would be located some distance away from Biddulph High School which is likely to be a reasonable trip generator. If the whole site area shown in the consultation document is delivered following land assembly (300 homes) then there will be opportunities to provide car free access to the new school utilising National Cycle Network route 55 (NCN 55) for the new houses. Pedestrian connectivity for existing homes to the east of the site could also be enhanced by providing connections via NCN 55. If the site delivers 60 homes then the level of pedestrian connectivity would be dependent on the location of the school and land ownership.	<ul style="list-style-type: none"> • Comments noted.
PO4857	Mr Chris Millington				ADD03	Object	Either site is surrounded by big developments and makes sense of a place schools within them. Do not want 'Primary Schools' as support 3 tier system but support a new first school.	<ul style="list-style-type: none"> • Comments noted.
PO5196	Mr Peter Brittain				ADD03	Support	Western developments will help visibility + practicality.	<ul style="list-style-type: none"> • Comments noted.

Question 20 – Do you have any comments on the potential locations for a new school in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site	Support/Object/General Comment	Consultee Comments	Officer Response
PO5141	Mr Gary Harding				ADD03	Support	Is able to accommodate the new primary school. It is also close enough to walk; it is close enough to the new medical centres and the pharmacies and shops	<ul style="list-style-type: none"> Comments noted.
PO5147	Ms Karen Harding				ADD03	Support	Building a development to the west of Biddulph would allow a school to be built in walking distance of the new development. The west is lower lying and can be naturally screened by trees etc.	<ul style="list-style-type: none"> Comments noted.
PO5150	Ms Karen Harding				ADD03	Support	The site of the new primary school would be in walking distance from a lot of this new development.	<ul style="list-style-type: none"> Comments noted.
PO5119	L C Millington				ADD03	Support	I think it's better to have a new school in ADD003 than stuck away from the town centre in ADD004. As long as adequate arrangements are made for pick up and drop offs, it could benefit the town centre as people pass by.	<ul style="list-style-type: none"> Comments noted.
PO5255	Mr and Mrs J B Ecclestone				ADD03	Support	Filling out the west side of the bypass seems more sensible options. The bypass itself is beneficial to the development on the west.	<ul style="list-style-type: none"> Comments noted.
PO5252	Mrs J Sutton				ADD03	Support	I fully support the council's proposals for the new school on the proposed development site no: ADD003 supported by residential housing. Developing a plan around the primary and secondary frontage strategy would make the town more attractive place to visit and conduct business.	<ul style="list-style-type: none"> Comments noted.
PO5133	Ms Lynne Evans				ADD03	Support	The old railway track has many more access routes that lend themselves to making developments here far easier, this area would avoid the problems experienced around the new uplands mill developments, with its squeezed together look and unattractive outcome, Again thank you for taking the Biddulph North Area a constrained site.	<ul style="list-style-type: none"> Comments noted.
PO4587	Mr & Mrs K Shone				ADD03	Object	Why are we building on Green Belt land? This amended Green Belt land should not be built until all the available Brown Belt land has been utilised. We object to building a school on ADD03 due the effects it would have on Haydon Park Estate and public walkway runs from Craigside over Biddulph Brook to the top of Coopers Way over disused railway tracks which is now Biddulph Valley Green Belt walkway, on the land where the proposed school is to be built, which is also Green Belt Land. In our view this would create a huge disturbance to us and the people of Coopers Way as parents would be dropping their children off with vehicles and children would be walking the walkway up and down to and from school on Akemore Lane, if there had we would not have purchased our property. Why are we now proposed to plan to build a school on Green Belt land when there is already a school i.e.: The Meadows Special School which could have been extended to accommodate 100's of children, this would not have affected our local area in anyway and also had brilliant access off the A527 i.e. Biddulph bypass. This would in our view have released several existing school locations in Biddulph for potential building land.	<ul style="list-style-type: none"> See response to PO41 regarding loss of Green Belt. Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph would be appropriate for residential development. The larger ones (Yarn Mill and Minster Mill) are proposed as residential allocations in the plan. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs (refer to Town Council Masterplan). See response to PO245 regarding parking problems in relation to the possible new school. See response to PO34 regarding highways. See response to PO156 regarding education.

Question 20 – Do you have any comments on the potential locations for a new school in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site	Support/Object/General Comment	Consultee Comments	Officer Response
PO5354	Mr D Heath				ADD03	Support	The west side of Biddulph would be close to the proposed care home in BD055 for relatives to visit, also Halls Road Sports Ground. It is also low lying so it is not so obtrusive.	<ul style="list-style-type: none"> • Comments noted.
PO5287	Mrs S Purcell				ADD03	Support	I agree	<ul style="list-style-type: none"> • Comments noted.
PO5307	Mr and Mrs A. Hodgkinson				ADD03	Support	All these comments are sensible and constructive, and we agree with them completely.	<ul style="list-style-type: none"> • Comments noted.
PO5275	Mr Carl Webb				ADD03	Object	Complete wrong locations and poor roads	<ul style="list-style-type: none"> • See response to PO34 regarding highways.
PO5114	Mr Cottrell				ADD03	General Comments	If the 850 properties are built then new schools would be required could the Ox Hay School be extended.	<ul style="list-style-type: none"> • See response to PO156 regarding education.
PO5154	Mrs P Alcock				ADD03	Support	The new primary school would be easily accessible from the new developments on the west of Biddulph.	<ul style="list-style-type: none"> • Comments noted.
PO5164	Mr N McQuade				ADD03	Support	Thanks for listening to residents comments: Please keep as much Green Belt as possible very important.	<ul style="list-style-type: none"> • Comments noted.
PO5215	Mrs L McQuade				ADD03	Support	i support this	<ul style="list-style-type: none"> • Comments noted.
PO5206	Miss F McQuade				ADD03	Support	I support this	<ul style="list-style-type: none"> • Comments noted.
PO5226	Mr I Seabridge				ADD03	Support	i agree	<ul style="list-style-type: none"> • Comments noted.
PO5244	Mrs P G Webb				ADD03	Support	New primary school is desperately needed/I strongly support the proposals here.	<ul style="list-style-type: none"> • Comments noted.
PO5406	Mr G Harper				ADD03	Support		<ul style="list-style-type: none"> • Comments noted.
PO5348	Mr I Barber				ADD03	Support	Building to the west would also appear to be the most sensible. It would be the most attractive for the town, and would be less intrusive. Closer to the town centre amenities and be the access from the by-pass and several other parts.	<ul style="list-style-type: none"> • Comments noted.
PO5352	Mr I Barber				ADD03	Support	The area is suitable for the proposed new primary school; it will reduce the traffic flow, and mean that it will reduce the traffic flow, and that the children are safe, and do not have to cross roads, to get to school which is an added safety feature.	<ul style="list-style-type: none"> • Comments noted.
PO5312	Mr A Picken				ADD03	Support	The new school should be located in ADD003 or BD140 south of ADD003. This is central to the town. This will and may reduce traffic around areas for our schools for example OX Hay, Kingsfield and Knypersley.	<ul style="list-style-type: none"> • Comments noted.
PO5269	Mrs A Bridgette				ADD03	Support	Gives the opportunity to include dwellings for the elderly residents, close proximity to the health centre and the local amenities.	<ul style="list-style-type: none"> • Comments noted.
PO1024 5	Mr R Hart				ADD03	Object	ADD03 strongly object as this is in the green belt and would cause traffic problems. I feel there is enough room to expand oxhey and woodhouse academy on these present sites.	<ul style="list-style-type: none"> • See response to PO41 regarding loss of Green Belt. • See response to PO34 regarding highways. • See response to PO156 regarding education.
PO1005 4	Mr Philip Sutton				ADD03	Support	Support. This is a low lying area so development here would be less visually intrusive from Biddulph Moor or Mow Cop ridge	<ul style="list-style-type: none"> • Comments noted.

Question 20 – Do you have any comments on the potential locations for a new school in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site	Support/Object/General Comment	Consultee Comments	Officer Response
							lines. Access to the town centre is quicker.	
PO9814	Mr Eric Biddle				ADD03	Support	This area would be suitable for a school.	<ul style="list-style-type: none"> • Comments noted.
PO10023	Mr & Mrs D Cartwright				ADD03	Support	(Summary) Best location for parents and children to walk from new housing without having to use a car.	<ul style="list-style-type: none"> • Comments noted.
PO10213	Mrs Julia Hackney				ADD03	Support	New schools will be needed for increased population and should be built to deal with increased traffic issues as traffic already plagues current schools.	<ul style="list-style-type: none"> • Comments noted.
PO9977	Ms Ashley Kirkham				ADD03	Support	The housing of a new Primary School to the west of the bypass would be a perfect spot for adjacent housing developments and brilliant walking access to the town centre. Many pupils would be able to walk to school. It would link closely to the development of the town centre. It would constitute the best sustainable location in achieving the goals of the Staffs Moorlands sustainable vision.	<ul style="list-style-type: none"> • Comments noted.
PO10238	Mr Robert Kirkham				ADD03	Support	The proposed west side sites would tie in wonderfully with the proposed new Primary School, also on the west. This would mean the possibility by foot and also mean the kids wouldn't have to cross the bypass. It would also constitute the best sustainable location in achieving the goals for the Staffordshire Moorlands sustainable vision.	<ul style="list-style-type: none"> • Comments noted.
PO9875	Mr Gayle				ADD03	Support	Support	<ul style="list-style-type: none"> • Comments noted.
PO184	Mrs Shirley Barlow				ADD03	Object	Object to Akesmore Lane too dangerous and out of the way as well and unsuitable land flooding and mineshafts and greenbelt	<ul style="list-style-type: none"> • See response to PO34 regarding highways. • The site is not within floodplain and the Environment Agency has not commented as such. If there is an existing issue with surface water drainage then new development would need to address this. An on site SUDs (Sustainable Urban Drainage) system would be required on this site if it were to be developed. • The Council is aware of mining issues which affect a number of green field sites around Biddulph and investigative work will take place in these areas prior to the commencement of any development. • See response to PO41 regarding loss of Green Belt.
PO73	mrs marilyn griffiths				ADD04	Object	This will cause additional vehicles using existing streets within the estate trying to find short cuts and parking places when dropping off and picking up children	<ul style="list-style-type: none"> • See response to PO245 regarding parking problems in relation to the possible new school.
PO308	Mr Russell Picken				ADD04	Object	The proposed site of ADD04 is not suitable for a school, as it is at the southern extremity of the town, with very little proposed new housing development. Therefore this location would be unlikely to ease the current congestion around the existing schools and may actually increase the traffic on the main roads around Knypersley.	<ul style="list-style-type: none"> • See response to PO156 regarding education.
PO326	FRANK COTTRELL				ADD04	Support		<ul style="list-style-type: none"> • Comments noted.

Question 20 – Do you have any comments on the potential locations for a new school in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site	Support/Object/General Comment	Consultee Comments	Officer Response
PO136	Mrs D Jacobs				ADD04	General Comment	It is presumed that extensive information has been gathered prior to site proposals. If however the proposed sites do not go ahead then the information would be invalid. This causes the public to feel that the proposals are already a done deal rather than a consultation. It will be good to see that council listens to and responds to concerns appropriately.	<ul style="list-style-type: none"> Comments noted.
PO142	Mr Carl Webb				ADD04	Object		<ul style="list-style-type: none"> Comments noted.
PO240	Mr Robert Stockley				ADD04	Object	I object to the ADD03 Akemoor Lane Site as a potential school location. The Akemoor Lane site would create accident blackspots with the convergence of the Wedgewood Lane/Halls Road junction. There would be increased traffic if a school was built on Akemoor Lane, and the resulting traffic increase would create hazards from parking on Wedgewood Lane, Halls Road, Acresmoor Lane, Linden Drive and Smokies Way. The increased school and housing traffic along Akemoor Lane from the Brown Lees area would create a second Accident Blackspot on the junction of Tower Hill Road, which is already a partially blind junction. Therefore I strongly urge that the Victoria Colliery and Childerplay Lane sites are considered in preference, as the residents of Brown Lees already accept that these sites will be developed. The location of a school at the west end of Biddulph would also provide safe easy access to the school, and provide an alternative catchment for school children.	<ul style="list-style-type: none"> See response to PO34 regarding highways. See response to PO245 regarding use of Victoria Colliery / Childerplay.
PO271	Mr Christopher Hall				ADD04	Support		<ul style="list-style-type: none"> Comment noted.
PO289	Mr Peter Benn				ADD04	Object	No comments are visible. Why?	<ul style="list-style-type: none"> The comments made in response to the consultation have to be moderated before they can be published. They will all be published in due course at the same time.
PO545	Mrs C Picken				ADD04	Object	The proposed site of ADD04 is not suitable for a school, as it is at the southern extremity of the town, with very little proposed new housing development. Therefore this location would be unlikely to ease the current congestion around the existing schools and may actually increase the traffic on the main roads around Knypersley.	<ul style="list-style-type: none"> Comments noted. See response to PO156 regarding education.
PO608	Mrs Ellen Faulkner				ADD04	Object	Putting the school in a narrow country lane as not been thought through. What about the safety of pedestrians.	<ul style="list-style-type: none"> See response to PO34 regarding highways.
PO457	Mrs Jean Fairbanks				ADD04	Support	This area may be a good idea for a primary school as it will be within walking distance from many homes.	<ul style="list-style-type: none"> Comments noted.
PO439	Mrs Janice Deane				ADD04	Object	How will the children get to and from the school and what else will be provided in this area. Will it just be a housing estate with a school?	<ul style="list-style-type: none"> Comments noted.
PO472	Mrs Jean Wrench				ADD04	Support	Consideration for location to the west of Biddulph.	<ul style="list-style-type: none"> Comments noted.
PO633	Mrs Amanda Reed				ADD04	Object	Not a suitable site with inadequate access	<ul style="list-style-type: none"> See response to PO34 regarding highways.

Question 20 – Do you have any comments on the potential locations for a new school in Biddulph?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Site	Support/Object/General Comment	Consultee Comments	Officer Response
PO655	Mrs Siobhan Perry				ADD04	Support		<ul style="list-style-type: none"> Comments noted.
PO858	Mrs Andrea Millington				ADD04	Support	I totally support a three tier system in Biddulph and if there is a new school would support a first school in a location that would take the strain off other over subscribed schools and near to larger developments where children are encouraged to walk to school.	<ul style="list-style-type: none"> Comments noted.
PO2564	Mrs Maggie Taylor	Sport England			ADD04	General Comments	The new school is located near to existing playing field areas. It would be good if some co-location/shared use could be secured if this will improve sports provision for both the school and community (for example access to school changing rooms/toilets for users of the playing field or shared car park provision?)	<ul style="list-style-type: none"> Comments noted. The location of the school is dependent on where the bulk of new housing takes place in the town so once this is determined issues such as sharing facilities can be explored.
PO2853	James Chadwick	Staffordshire County Council			ADD04	General Comments	In Biddulph it is noted that the Plan puts forward two potential locations for new First school provision. We will need to review both of these in detail in relation to transport matters and pupil movement to determine which of the two is to be taken forward in the Plan.	<ul style="list-style-type: none"> Comments noted.
PO2897	James Chadwick	Staffordshire County Council			ADD04	General Comments	With regards to the two potential First School locations in Biddulph from an initial assessment we have the following comments to make from a transport planning perspective. There are currently no identified accident clusters in Biddulph and therefore it is unlikely that either site would be preferred based on the existing accident record. Site ADD04 based on the published information is the largest housing site and is directly adjacent to BD069 which in combination will provide a total of 180 homes. Locating the new school on the largest housing site will provide the greatest opportunity for children to walk to school minimising the impact on the road network. Existing houses to the north of this site are in the catchment area of Knypersley First School which is located across the A527 from the houses. Locating a new school in site ADD04 would remove the requirement to cross the A527.	<ul style="list-style-type: none"> Comments noted.
PO9850	Mrs. Margaret Biddle				ADD04	Support	This area would support a school.	<ul style="list-style-type: none"> Comments noted.
PO9813	Mr Eric Biddle				ADD04	Support	This area would be suitable for a school.	<ul style="list-style-type: none"> Comments noted.
PO10022	Mr & Mrs D Cartwright				ADD04	Support	(Summary) Best location for parents and children to walk from new housing without having to use a car.	<ul style="list-style-type: none"> Comments noted.
PO10212	Mrs Julia Hackney				ADD04	Support	New schools will be needed for increased population and should be built to deal with increased traffic issues as traffic already plagues current schools.	<ul style="list-style-type: none"> Comments noted.
PO9969	Ms Claire Kirkham				ADD04	Support	A new primary school in the south would be ideal as it would be accessible, reduce car travel, bypass traffic, drop offs and improve safety for children.	<ul style="list-style-type: none"> Comments noted.
PO9874	Mr Gayle				ADD04	Support	Support	<ul style="list-style-type: none"> Comments noted.

Question 21 – Do you have any comments on the Biddulph Town Centre Boundary?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support/Object/General Comments	Consultee Comments	Officer Response
PO74	Mrs Marilyn Griffiths				General comment	The boundary seems to be okay	Comments noted.
PO185	Mrs Shirley Barlow				General comment	We all know where the boundary is from Rio cafe to Garsides most shops are hairdressers no real shops as such.	Comments noted.
PO649	Ms Alison Conybeare				General comment	Please seek the local residents views. These are the most important.	Comments noted.
PO5195	Mr Peter Brittain				General comment	as per question 18	Comments noted.
PO5139	Mr Gary Harding				General comment	Biddulph bypass benefits Biddulph building on the west side.	Comments noted.
PO5146	Ms Karen Harding				General comment	If Biddulph needs to be developed it should be from the town centre out to the west. The bypass would also serve this area well	Comments noted.
PO5183	Mr J. Denton				General comment	The by-pass to the west of Biddulph town.	Comments noted.
PO5124	Ms Lynne Evans				General comment	The bypass enables the development of the town centre and the surrounding west side.	Comments noted.
PO5082	Mr J Neate				General comment	As stated above the level of homes in Biddulph area is at a saturated level. Moving west makes much more sense.	Comments noted.
PO5083	Mrs L Neate				General comment	As stated above the level of homes in Biddulph area is at a saturated level. Moving west makes much more sense.	Comments noted.
PO5176	Mr S Sneyd				General comment	Try to sort out the traffic from the town centre it must be very difficult to drive public transport (buses) in and around town centre. We need to encourage public transport in the area, and hopefully get our buses back on Thames Drive which are very much missed.	In recent years the road layouts have changed in Biddulph Town Centre and it would be up to the Highway Authority at the County Council if they consider any further changes are necessary. They have not advised the District Council as such. Again, public transport is a County Council matter and not within the scope of the Local Plan.
PO5165	Mr N McQuade				General comment	Thanks for listening to residents comments: Please keep as much Green Belt as possible very important.	Comments noted.
PO5191	Mrs A Denton				General comment	The by-pass to the west of Biddulph town.	Comments noted.
PO10237	Mr Robert Kirkham				General comment	Make the town of Biddulph a pedestrian zone. This can be for the start of a town centre regeneration. This can be the first step in making the town centre more attractive to both Biddulph residents and from further afield. If we look at Congleton we see a lovely pedestrianised shoppable street which is attractive to travel to. Building on the west would allow a surge of pedestrian shoppers and provide a platform for the pedestrianised future of the town centre and high street.	When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.
PO776	Mrs Sharon Kirkham				Object	The existing greenbelt boundaries need to be maintained.	Comments noted.

Question 21 – Do you have any comments on the Biddulph Town Centre Boundary?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support/Object/General Comments	Consultee Comments	Officer Response
PO10055	Mr Philip Sutton				Object	Pedestrianisation of the town centre would make it safer from a traffic point of view and it would be visually more appealing. This would reduce the likelihood of residents travelling to Cheshire or the Potteries to do their shopping.	When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.
PO4999 PO143	Mr R Milner Mr Carl Webb				Object	Object	Comments noted.
PO10239	Mr Robert Kirkham				Support	Building in the west just seems like a natural progression with accompanying nearby by-pass.	Comments noted.
PO10214	Mrs Julia Hackney				Support	Town centre needs to match other large town status facilities which it clearly doesn't.	There has been recent regeneration of the town centre. Any further improvements are likely to be market-led and dependent on the amount of new development which occurs in the town.
PO5243	Mrs P G Webb				Support	The town centre developments needed many more shops would be very welcomed.	There has been recent regeneration of the town centre. Any further improvements are likely to be market-led and dependent on the amount of new development which occurs in the town.
PO5295	Mr S Findlow				Support	I support	Comments noted.
PO5267	Mrs A Bridgette				Support	The bypass offers better development sites: It was designed that way. There would be better balances to the town. It is better to develop the town centre, making it more balanced Building here to the west is closer to the proposed site Chatterley Whitfield, gives the opportunity to the health centre and the town amenities.	Comments noted.
PO5223	Mr I Seabridge				Support	Essential to maintain character of the area with a definitive open area space – 'land boundary' Existing road construction/specification not adequate to accommodate road construction/specification not adequate to accommodate additional demand. Highways linkages and access road/egress poor. Any junction improvement at the Biddulph Road/Woodhouse Road priority junction will have an unfavourable impact on the character of the area.	Comments noted.
PO5238	Mrs P G Webb				Support	Many on the Uplands Mill development have not been sold.	Comments noted.
PO5092	Mr J Neate				Support	Development the Biddulph Town Centre will attract more shoppers to the town centre to spend money – must be good.	There has been recent regeneration of the town centre. Any further improvements are likely to be market-led and dependent on the amount of new development which occurs in the town.
PO5254	Mr and Mrs J B Ecclestone				Support	Filling out the west side of the bypass seems more sensible options give the opportunity to achieve a better balance of the town.	Comments noted.
PO604	Mr Bill Hockey				Support	The Town Centre boundary could be sympathetically extended to facilitate the growth of shops (once those closed high street units are occupied), cafes, restaurants, etc., especially somewhere the teenagers want to go. The Town needs to encourage its residents and not discourage them.	There has been recent regeneration of the town centre. Any further improvements are likely to be market-led and dependent on the amount of new development which occurs in the town. The retail industry in particular is very sensitive to change and the increases in people shopping online are affecting the amount of physical stores operators require.
PO5339	Mr D Heath				Support	The west side of the bypass lends to the better development to support the town.	Comments noted.

Question 21 – Do you have any comments on the Biddulph Town Centre Boundary?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support/Object/General Comments	Consultee Comments	Officer Response
PO458	Mrs Jean Fairbanks				Support	If we build out towards the west it should balance out the town	Comments noted.
PO859	Mrs Andrea Millington				Support	Filling out to the West gives the opportunity to achieve a better balance to the town.	Comments noted.
PO5233	Mrs I E Sefton				Support	Development and improvement of the Town Centre is essential. It is in danger of further deterioration unless specifics plans are generated. Accommodating a considerable increase in housing would make this of absolute necessity.	There has been recent regeneration of the town centre. Any further improvements are likely to be market-led and dependent on the amount of new development which occurs in the town. The retail industry in particular is very sensitive to change and the increases in people shopping online are affecting the amount of physical stores operators require.
PO9876 PO9691 PO5335 PO5323 PO5331 PO7548 PO5216 PO5207 PO5172 PO5000 PO4887 PO5075 PO5280 PO5305 PO5327 PO5340 PO734 PO662 PO970 PO270 PO293	Mr Gayle Mrs P Hancock Mr G Morris Mr D Lovatt Mrs R Bellwood Mr Alistair McLoughlin Mrs L McQuade Miss F McQuade Mr S Sneyd Mr R Milner Mrs J Goodwin Mrs M Morris Mrs S Purcell Mr and Mrs A. Hodgkinson Mrs T. Cooper Mr D Heath Mr Philip Beech Mr Andrew Perry Mr Christopher Goldstraw Mr Christopher Hall Mr David Spruce				Support	Support	Comments noted.

Question 22 – Do you have any comments on the Biddulph primary and secondary frontages?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support/Object/General Comments	Consultee Comments	Officer Response
PO75	Mrs Marilyn Griffiths				General comment	These again seem to be okay	Comment noted.
PO10021	Mr & Mrs D Cartwright				General Comment	(Summary) The High Street should be pedestrianised and would provide a site for a market Biddulph should attract national retailers which would support independents Need to attract people into the town to shop Bypass has meant that people bypass the town	Comments noted. When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future. The retail industry in particular is very sensitive to change and the increases in people shopping online are affecting the amount of physical stores operators require.
PO5166	Mr N McQuade				General Comment	Thanks for listening to residents comments: Please keep as much Green Belt as possible very important.	Comment noted.
PO648	Ms Alison Conybeare				General comment	Please seek the local residents views. These are the most important.	Comment noted.
PO9975	Ms Ashley Kirkham				General comment	Make the town of Biddulph a pedestrian zone. Developing a plan around the Primary and Secondary frontages strategy will make Biddulph Town Centre much more attractive than it currently is.	Comments noted. When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.
PO1361	Ms Rosamund Worrall	Heritage England			General comment	Map 4.6 - Biddulph Town Centre - Historic England has no objections in principle to the proposed primary and secondary frontages at this stage although it is difficult for these to be meaningful without any policy context at present. It is expected that such policy context would be addressed in the full Local Plan as it progresses and we may wish to comment further at that stage.	Comments noted. Policies relating to the primary and secondary frontages will be published in the next draft version of the Local Plan and comments will be invited.

Question 22 – Do you have any comments on the Biddulph primary and secondary frontages?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support/Object/General Comments	Consultee Comments	Officer Response
PO1063	Mr Nicholas Tavernor				General comment	In the development of the town centre i would like to see a development scheme that will draw people into the town. maybe covered walk ways to shop fronts, improving shopper experience encoraging shopping in all weather. Biddulph can be seen in old photographs with victorian cast iron canopies to shop fronts, so it would be return to past form. A high street pedestrianised, on one level without kerbs and 'access only' for vehicles, this would improve the high street shopping experience and encourage shoppers.	Comments noted. There has been recent regeneration of the town centre. Any further improvements are likely to be market-led and dependent on the amount of new development which occurs in the town. When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.
PO5194	Mr Peter Brittain				General comment	Increase the town pedestrianisation.	When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.
PO5300	Mr S Findlow				General Comment	The elderly residents of the Pennine Way estate + the Washington Close area desperately need a round robin' mini bus service to help to get to the doctors and the shops and the dentist etc.: say from 9am – 3pm, it could be enterprising taxi service to set this up to help the elderly attend appointments. I strongly feel that the health infrastructure would be under great strain with such an increase in the population. I work at the local dental practice and we simply cannot cope with any more patients. We have to turn people away on a daily basis.	Comments noted. Your suggestions are outside the remit of the Local Plan. National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals (including health infrastructure). It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the Staffordshire County Council to assess the impact proposed development on school capacity, what additional capacity is needed and how this can be delivered.
PO656 PO663	Mrs Siobhan Perry Mr Andrew Perry				Support	Making the town centre more attractive will encourage visitors.	Comments noted.
PO5356	Mr D Heath				Support	Building to the west side also closer to the Chatterley Whitfield site understood to create 2100 jobs. Being able to walk via the railway line.	Comments noted.
PO9971	Ms Claire Kirkham				Support	Developing a plan around the primary and secondary frontages would make the town centre more attractive.	Comments noted.

Question 22 – Do you have any comments on the Biddulph primary and secondary frontages?

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Support/Object/General Comments	Consultee Comments	Officer Response
PO5308	Mr and Mrs A. Hodgkinson				Support	All these comments are sensible and constructive, and we agree with them completely.	Comments noted.
PO5256	Mr and Mrs J B Ecclestone				Support	Filling out the west side of the bypass seems more sensible options. The bypass itself is beneficial to the development on the west.	Comments noted.
PO5104 PO5105	Mr J Neate Mrs L Neate				Support	The recommendations regarding the Market Days/dedicated market area/link the Excellent.	Markets are outside the remit of the Local Plan. When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.
PO5350	Mr I Barber				Support	Regeneration of the town centre can only be achieved if the High street was made pedestrian zone, if the town was more attractive you can attract more visitors with Biddulph Grange Gardens to spend there.	When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.
PO5217 PO5208 PO9877 PO5173 PO5289 PO5273 PO735 PO272	Mrs L McQuade Miss F McQuade Mr Gayle Mr S Sneyd Mrs S Purcell Mr Carl webb Mr Philip Beech Mr Christopher Hall				Support	i support this	Comments noted.
PO603 PO605	Mrs Pamela Hockey Mr Bill Hockey				Support	Improve the Town Centre layout. Why not have a pedestrian zone in the centre? Other Towns have shown how this encourages residents, and visitors from outside of the Town, to shop locally, and therefore pull other businesses in. Go for the successful 'Market Town' environment, ambiance and culture	When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.
PO5270	Mrs A Bridgette				Support	All the comments support Biddulph town centre.	Comments noted.
PO10056	Mr Philip Sutton				Support	Developing a plan around the primary and secondary frontage strategy would make the town an attractive place to visit and spend.	Comments noted.
PO9811	Mr Eric Biddle				Support	The primary and secondary frontage is needed.	Comments noted.
PO144	Mr Carl Webb				object	(No reasons given)	Comments noted.

Question 22 – Do you have any comments on the Biddulph primary and secondary frontages?

Question 23 – Do you have any other comments to make regarding Biddulph? – (Comments on ADD03 housing site)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO462	Mrs Kirsty Murphy				ADD03	Object	<p>I am very concerned by the way in which ADD03 was added at the last minute, as a resident I was not informed and only found out through a neighbour telling me, this is case for many other residents on Haydon Park. I can't understand how site options can be added without at least looking at the basic suitability, especially when its green belt. Access, drainage and previous mining surely should have been looked into first. It if had of been previous surveys of the land would have shown its unsuitability. This is the same for other sites proposed and in particular those around the sewage works. Please tell me who wants to spend money on a new house to be next to the sewage works!! Alternative sites have been highlighted to you by our local councillors which will have far less impact and provide good access and the ground is fair more suitable for building. As a town Biddulph would be far more accepting of proposals on these sites.</p>	<ul style="list-style-type: none"> • The Local Plan production process, by its very nature, involves several stages of consultation at which point anyone can suggest further sites for inclusion in the plan and the Council decides on whether they are appropriate. This site was suggested as part of the site options consultation. • The consultation was widely publicised and included a flyer being sent to all households and businesses in the District through Royal Mail. High levels of responses have been received by the Council from Biddulph residents which suggests that a significant number of residents knew about the consultation. • The Highway Authority has no difficulties with the principle of development in this location. Improvements needed to the road network as a result of development would need to be identified through a Transport Assessment. • The Council is aware of mining issues which affect a number of green field sites around Biddulph and investigative work will take place in these areas prior to the commencement of any development. • The site is not within floodplain and the Environment Agency has not commented as such. If there is an existing issue with surface water drainage then new development would need to address this. An on site SUDs (Sustainable Urban Drainage) system would be required on this site if it were to be developed.
PO24	Mr Robert Moseley				ADD03	Object	<p>ADD03 makes no sense and we are not in exceptional circumstances to build in the green belt here.</p>	<ul style="list-style-type: none"> • In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site ADD03 for release from the Green Belt. • If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt.

Question 23 – Do you have any other comments to make regarding Biddulph? – (Comments on ADD03 housing site)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO7216	Mr B Roberts				ADD03	Object	<p>Object to the removal of plot BD110 and the inclusion of plot ADD03 Plan displayed in Biddulph Town Hall on 5th May 2016 had a new plot displayed; Akemore Lane (ADD03) along with all the other original plots including those to the east (BD067a,b,c BD110 and BD134) The drop in session in the Town Hall on the 11th May had a new version of the plan which retained Akemore Lane plot but had all of the plots to the east removed. Both of the above changes were unannounced and no formal or official explanation given. One of the councillors present at the drop in session when asked to explain the changes replied that 'planning were advised by the Greenbelt Committee (Greenbelt Review) that the preferred option was to use the greenbelt land to the west rather than that to the east even though the sites to the west had not been discussed in any previous meetings' This is not an adequate explanation. The new (current 20th May) plan clearly shows all the Akemore Lane, plots to the north to be in greenbelt that has been designated as 'Amended' presumably to allow building and development. If this can be done for these plots then it can be done for those plots to the east, they are of a similar quality and use. The plots to the east which have been removed without any adequate explanation, we believe offer a much better option than the Akemore Lane plot for the following reasons; The plots lie adjacent to an established housing estate that has good roads and services including footpaths and lighting. A service road is already in place, Plover Drive providing direct access to plot BD110. Similarly Firwood Road gives access to plot BD067a and Blackbird Way to plot BD134. The school, Oxhey Primary is situated adjacent to plot BD067a and could be extended into this plot to provide the extra primary school provision required. The loss of amenity in developing this land is no greater than that proposed for the development of other sites such as ADD03.</p>	<ul style="list-style-type: none"> • See response to PO24 in relation to Green Belt Review and Exceptional Circumstances • See response to PO462 in relation to introduction of this site for potential housing development at this stage in the process.
PO767	Mrs Sharon Kirkham				ADD03	Object	<p>(Summary) Unhappy with knowledge and attitude of planning officers who staffed the Biddulph consultation event. The ideal locations for development for housing and an extra school, would be Victoria colliery and Childerplay. These areas are ripe for regeneration and as previous brownfield sites have been cleaned up from the old mine workings, and are deemed suitable for housing. Why would anyone even think about building on greenbelt when these areas are available for development?</p>	<p>Sites at Victoria Colliery and Childerplay Road are within the Green Belt like ADD03. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy.</p>

Question 23 – Do you have any other comments to make regarding Biddulph? – (Comments on ADD03 housing site)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO579	Miss Louise Richardson				ADD03	Support	SITE ADD03 Akesmore Lane has the potential for 300 houses not just 60! This would create a small community that could incorporate a school, shops, amenities, etc. It would take up a large allocation and would make sense! You can build access directly from Wharf Road to the Bypass - just what the bypass is for - taking traffic away from the surrounding areas! Why has this not been explored??	Comments noted.
PO978	Mr Peter Turner				ADD03	Support	The Akesmore Lane site (ADD03) which could potentially offer up to 300 units will provide significant CIL contribution thereby efficiently using the allocation of housing development rather than multiple small sites.	Comments noted.
PO860	Mrs Andrea Millington				ADD03	Support	<p>Extending to the West past the current Town Boundary into the area bounded by Akesmoor Lane, Brown Lees and the old rail track gives the opportunity to build organic housing developments instead of ribbon developments (lines of properties) making them more attractive, be in keeping with the rural nature that Biddulph Residents want to retain and enables the types of houses that potential buyers are looking for to be built. Only building on smaller and / or hemmed-in sites risks a repeat of what has happened on the Selectus site where houses have been built that no one wants to buy. Doing this across Biddulph may achieve the target numbers on the fewest sites possible but it would change the nature of the town in a very bad way and certainly not bring the desperately needed wealth into the town. Sympathetically developing this area to the West and using the less contentious parts provides the opportunity to achieve the required numbers with desirable properties and that will be close to the least number of existing dwellings and where there is space to include natural screening around the development and open spaces and natural screening within.</p> <p>ACCESS: There are already several existing routes across the old rail track, off / from Marsh Green Lane Mow Lane Station Road Wharf Road New Pool Road. With 'large' developments, the Developer has an obligation to financially contribute to infrastructure improvements via the Community Infrastructure Levy, previously known as Section 106. Build nature sensitive access routes: bridge, tunnel, etc. to the Town side, widen lower Akesmoor Road to the West, etc. NATURE: Widen the natural screening of the old rail track by including a band along to the west which: Separates this development from the developments BD016, BD055, BD071, BD071a, BD106, BD108 & BD156 between the rail line and the by-pass. Makes a wider nature corridor along there. Adds to the visual and public open space in Biddulph.</p> <p>ADVANTAGES: It is a low laying area so will be a less obtrusive development, especially with natural screening. Enables pedestrian access to the Town Centre reducing car use, demand for increased car parking and pollution from vehicles. Provides close proximity to the amenities, e.g. the Health Centre and the</p>	Comments noted.

Question 23 – Do you have any other comments to make regarding Biddulph? – (Comments on ADD03 housing site)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
							planned late night Pharmacy. Gives the opportunity to include dwellings for the older residents where they will have close proximity to the Town Centre amenities. Reduces the likelihood of residents travelling north to Congleton or south to Stoke for their shopping, Close to the proposed Care Home in BD055 for those with elderly relatives and friends. Closer to the Halls Road sports grounds than potential developments to the south east of the town, reducing traffic volumes. It is able to accommodate the proposed new Primary School and is close enough for access by foot, so against the School being located to the south: Eliminates the need to travel by car. Could design for safe parent drop-off / pick-up. Reduces by-pass volumes. Eliminates needing to cross the by-pass so safer for those on foot and reduces slowing of traffic. Therefore greatly improving safety for our vulnerable young children. The area being best located to maximise the positive impact of all the above in support of Town Centre regeneration and Town Council income generation into the future and beyond. The above demonstrating why this is the best Sustainable Location in achieving the goals of the Staffordshire Moorlands Sustainability Vision.	
PO956	Mr Alistair McLoughlin				ADD03	Support	Practical Deliverable Alternatives ADD03 (up to 300 dwellings) Supported by appropriate roadway infrastructure, a new road from Biddulph town centre. Under no circumstance should Akesmore Lane be used for site access. Significant development scale capacity to meet the CIL requirements to provide significant local benefit. Significant development scale capacity to contribute significant housing numbers to required Local Plan total. Land owner believed to be supportive of inclusion Biddulph Town Council support Not proximate to the sewerage treatment works, therefore less of a public health risk.	Comments noted.

Question 23 – Do you have any other comments to make regarding Biddulph? (Comments on ADD04 housing site)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO4761	Mr and Mrs K & C Alcock				ADD04	Object	<p>Impact on highway traffic and road safety 7. Site access would be via a narrow private road leading to a farm track. The entrance road may need to be widened making this site impossible or difficult to develop without complex land acquisition. 8. The area around Harlech Drive and Conway Road has three schools in the immediate vicinity already and is affected by high traffic flow at peak times. 180-280 new houses (ADD04 & BD069 combined) would cause an estimated increase in traffic flow of up to 550 extra cars causing significant extra traffic problems. 9. This site is not a suitable location for the proposed new school. Knypersley already has a pre-school nursery and a primary school nearby. Entrance to the site is via a quiet residential district mainly occupied by elderly people. Quality of life will be harmed and there could be significant disruption to the existing community. Effect on the landscape 10. Open countryside, public footpaths, historic parkland in the vicinity of Knypersley Hall (Grade II* listed), the fishing pool, the cricket pavilion, and fields adjacent to Knypersley Cricket Ground are all an integral part of the landscape of Knypersley. (The cricket ground itself was donated to the community by Robert Heath). Open countryside forms an integral part of the surrounding natural landscape and, if developed upon, connection between the Knypersley community and the natural environment would be lost forever. 11. Development of this site would cause significant harm to Knypersley sense of place and to its unique semi-rural village identity centred upon Newpool Meadows, the cricket ground and pavilion, and its magnificent landscape setting. This new housing would significantly harm the local landscape and potentially could damage the separate "village community" identity that Knypersley enjoys at present. NPPF policy states that merging of neighbouring communities is to be prevented. 14. Further south lies an area of ancient valley farmland, the last remaining such farmland in the Biddulph Valley. The conservation of this area is also recognised as important and this farmland, together with its historic field boundaries, should be preserved for the long term future benefit of our town's heritage. 15. Nearby Knypersley Fishing Pool is already designated as a protected nature conservation site. Existing hedgerows within the proposed ADD04 site boundary host a large array of wildlife that would perish as a result of this development. Bats are known to live nearby. Therefore this site, if developed for housing, could have a serious detrimental impact on nature conservation efforts in this locality.</p>	<p>From the Highway Authority's point of view, a Transport Assessment would be required at the planning application stage. Creation of an access directly onto the A527 is preferred though a limited amount of development could be accommodated using an access onto Harlech Drive. No concerns were raised by the Highway Authority about any localised traffic problems as a result of development here.</p> <p>Staffordshire County Council are the Education Authority and they look at the need for new schools in an area as a result of development. They consider that a new first school would be needed in Biddulph to accommodate the level of new housing development currently proposed. The location of this school would not be decided until the Council has firmed up its plans as to where the new housing development will take place in the town. (There are 2 options put forward as potential locations for a new school in the Preferred Option Sites and Boundaries Consultation booklet).</p> <p>Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations nor is the possibility of noise from the school or parking issues.</p> <p>Landscape impact of development on the site has been assessed in the Council's Landscape Impact Study (August 2016), the results for this site are: 'Site comprises land to the west and south of Knypersley Hall, including a large, open field which slopes down from the hall in the north of the site, and more undulating land in the south of the site containing a pond and scattered trees. The site is separated from the settlement edge by Knypersley Hall and agricultural land to the north. Development of the site could adversely affect the existing settlement form, particularly in the southern extent of the site. The northern section of the site has high visual prominence, particularly when viewed from Tunstall Road. Site is of high landscape sensitivity. Please note that this study forms part of a wider evidence base to support SMDC's Local Plan. Therefore, the Council will weigh this conclusion against other evidence when determining the overall suitability of the site for development.</p> <p>Public footpaths can be maintained or re-directed. This issue would be considered at the planning application stage.</p>

Question 23 – Do you have any other comments to make regarding Biddulph? (Comments on ADD04 housing site)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
								<p>Heritage Impact of development on the site has been assessed in the Council’s Heritage Impact Study (August 2016), the results for this site are: ‘There is one Grade II* and one Grade II Listed Building within close proximity to the site. The site contributes greatly to the setting of the Grade II* as a remnant of the parkland, which in turn, contributes to the overall significance of the asset. Development on the site would highly likely cause substantial adverse effects to the setting of the Grade II* Listed Building which would impact upon its overall significance. The HEA states that development is not deemed appropriate in the HLC zone BBHECZ 7 (Historic Environment Character Assessment 2010). Site could not be developed without substantial heritage impacts’. It should be noted that this study forms part of a wider evidence base to support SMDC’s Local Plan. Therefore, the Council will weigh this conclusion against other evidence when determining the overall suitability of the site for development.</p> <p>In the event of development in this area, sports facilities would be retained.</p> <p>In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study concludes that the overall impact of this area on Green Belt purposes is moderate. It states that: “This is a significant area of land which cannot be readily subdivided because of an absence of clear internal boundaries. It is well contained physically and visually by Mill Hayes Road and whilst making a contribution to Green Belt purposes in respect of separation and setting, comprehensive masterplanning (which would retain existing open space and sports pitches) could yield a development which would help to reinforce wider Green belt function. See also BD069, BD117, BD131b. It recommends considering site ADD04 for release from the Green Belt. If this site is selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt.</p> <p>Ecus Ltd conducted Phase 1 ecological survey (incorporating Local Wildlife Site Assessment) in 2016. It concluded that the habitats on ADD04 were considered to be of nature conservation value at the site level only and are not listed as an important habitat in the</p>

								Staffordshire SBI guidelines. Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site significantly supported any notable protected species. [Some predevelopment species surveys recommended].
PO4841	Mrs Harper				ADD04	Object	Impact on highway traffic and road safety 7. Site access would be via a narrow private road leading to a farm track. The entrance road may need to be widened making this site impossible or difficult to develop without complex land acquisition. 8. The area around Harlech Drive and Conway Road has three schools in the immediate vicinity already and is affected by high traffic flow at peak times. 180-280 new houses (ADD04 & BD069 combined) would cause an estimated increase in traffic flow of up to 550 extra cars causing significant extra traffic problems. 9. This site is not a suitable location for the proposed new school. Knypersley already has a pre-school nursery and a primary school nearby. Entrance to the site is via a quiet residential district mainly occupied by elderly people. Quality of life will be harmed and there could be significant disruption to the existing community. Effect on the landscape 10. Open countryside, public footpaths, historic parkland in the vicinity of Knypersley Hall (Grade II* listed), the fishing pool, the cricket pavilion, and fields adjacent to Knypersley Cricket Ground are all an integral part of the landscape of Knypersley. (The cricket ground itself was donated to the community by Robert Heath). Open countryside forms an integral part of the surrounding natural landscape and, if developed upon, connection between the Knypersley community and the natural environment would be lost forever. 11. Development of this site would cause significant harm to Knypersley sense of place and to its unique semi-rural village identity centred upon Newpool Meadows, the cricket ground and pavilion, and its magnificent landscape setting. This new housing would significantly harm the local landscape and potentially could damage the separate "village community" identity that Knypersley enjoys at present. NPPF policy states that merging of neighbouring communities is to be prevented. 14. Further south lies an area of ancient valley farmland, the last remaining such farmland in the Biddulph Valley. The conservation of this area is also recognised as important and this farmland, together with its historic field boundaries, should be preserved for the long term future benefit of our town's heritage. 15. Nearby Knypersley Fishing Pool is already designated as a protected nature conservation site. Existing hedgerows within the proposed ADD04 site boundary host a large array of wildlife that would perish as a result of this development. Bats are known to live nearby. Therefore this site, if developed for housing, could have a serious detrimental impact on nature conservation efforts in this locality.	Refer to response made to previous correspondent (above) who has raised the same issues.

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO1044	Mr G Cooper				BD117 & ADD04	Support	The Southern area of Biddulph using BD117 & the previously larger ADD04 would seem to be best for the additional 2 hectares of employment land required & the a large quantity of the houses required which would have a far less impact on the town because I would say the majority of the traffic goes to Stoke so they would not have to travel through the town.	Comments noted.

Question 23 – Do you have any other comments to make regarding Biddulph? (Comments on site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/ Object/ General	Consultee Comments	Officer Response
PO5827	Mr Carl Mason				BD062	Object	Sewage works currently over its designed capacity. Severe odour, noise and now raw sewage pollution already exists. Pollution to Biddulph Brook would be severe. Green Belt Land currently – not suitable for housing would as it's on a flood plain. Staffordshire Highways have already responded to our protest to say road infrastructure is not suitable and would be dangerous, more noise pollution. The natural habitat provides homes for the valued wildlife including badgers, foxes, bats and many more species of birds. This development would not enhance or add any value to the quality of life of the local community.	<ul style="list-style-type: none"> • United Utilities has a statutory duty to provide capacity for new development so this is not a valid reason for development not to come forward in Biddulph. United Utilities considers that there is no need to expand the treatment works in the development plan period for the growth identified in the development plan. • Current issues experienced by residents in regard to raw sewage flooding are a separate matter to be investigated by United Utilities. Noise and odour assessments have been undertaken which demonstrate that the site could be developed without adverse impact on future residents. • In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site BD062 for release from the Green Belt. • The site boundary has been amended to exclude land within Flood Zone 2 at the request of the landowner, who does not own this land and is not promoting it for development. This approach has been agreed with the Environment Agency since their response to the consultation so a Level 2 Flood Risk Assessment is no longer required for the site. • The Highway Authority has no difficulties with this development from their point of view. Cumulative impact of several developments in this area would be assessed through a Transport Assessment. • The Council's Phase 1 Habitat consultants consider the site habitats to be of nature conservation value at district level and have the potential to support bats and reptiles, which could allow the consideration of the site as an SBI or BAS. Further survey work would need to take place prior to any development to establish Site of Biological Importance (SBI) / Biodiversity Alert Site (BAS). Prior to any development an assessment would be required of the 2 trees for their potential to support roosting bats and a reptile survey. • Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application.
PO10246	Mr R Hart				BD062	Object	Feel that current infrastructure is already at a maximum and that the proposed housing allocation is far too much for Biddulph. Roads, doctors, schools all over stretched. Sewage works would need to be extended taking in BD062. So if BD062 developed, the sewage works would not be able to expand. Use infill sites and all brownfield sites.	<ul style="list-style-type: none"> • National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the County Council to assess the impact of proposed development on school capacity, what additional capacity is needed and how this can be delivered.

								<ul style="list-style-type: none"> • See response to PO5827 in relation to highways. • See response to PO5827 in relation to water treatment works. • Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph would be appropriate for residential development. The larger ones (Yarn Mill and Minster Mill) are proposed as residential allocations in the plan. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping brownfield sites. • Sites at Victoria Colliery and Childerplay Road are within the Green Belt like BD062. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy.
PO5940 PO5805 PO5784 PO6526 PO6728 PO6530 PO6528 PO6757 PO6738 PO6715 PO6497 PO6754 PO6294 PO6735 PO6477 PO6304 PO6622	Mrs Kathleen Boulton Mr Christopher Slater Mr Stephen Clowes Mrs Beverley Holding Mrs Gillian Flannagan Mr Jeffrey Leese Mr J Greatbatch Ms Barbara Griffiths Mrs E. Smart R Hutton Mr K Wilshaw Mr C Kirkham Mr and Mrs I Condliffe Mr and Mrs G Bowyer Mr Gilbert Bradley Mr J Robertson Mr Ronald				BD062 / BD068	Object	<p>(Summary)</p> <ul style="list-style-type: none"> • The site shares a boundary with the only sewage works in Biddulph which is already working over its' designed capacity population of 17,000 people (2011 Biddulph census 19,892). Local residents on Long Valley Road, Portland Drive, York Close, Essex Drive and Marsh Green Road already experience unacceptable amenity impacts in their homes such as noise, odour and raw sewage flooding. • In periods of heavy rain, raw sewage floods the system, backfills and pollutes private properties (experienced by 34, 36 and 38 Essex Drive). The sewerage system cannot cope and the site experiences an overflow of raw sewerage from the man-hole covers which then runs directly into the Biddulph Brook (evidenced with sanitary products distributed around the sewerage treatment facility pipes at the end of Essex Drive). Building houses on this site even closer to the sewage works will increase these unacceptable impacts, leading to an increase in statutory nuisance incidents. It contradicts SMDC LDF Core Strategy SD Policy 4 where the Council states that it will refuse schemes which are pollution-sensitive adjacent to polluting developments. • The site is currently protected as Greenbelt, and only considered suitable for release from the Greenbelt under exceptional circumstances. Removing this site from the Greenbelt prioritises development in the floodplain which contradicts 	<ul style="list-style-type: none"> • United Utilities has a statutory duty to provide capacity for new development so this is not a valid reason for development not to come forward in Biddulph. United Utilities considers that there is no need to expand the treatment works in the development plan period for the growth identified in the development plan. • Current issues experienced by residents in regard to raw sewage flooding are a separate matter to be investigated by United Utilities. • Noise and odour assessments have been undertaken which demonstrate that the site could be developed without adverse impact on future residents. • In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. PO5847	Forrester Mr and Mrs M. Flanagan						<p>which was supposed to guide decision making about the environment and its linkages across the Local Plan area does not exist. In the absence of such strategic data, the Phase 1 Habitat Survey findings must be prioritised and used to guide decision making. “ 2. Its inclusion contradicts Section 40 of the Natural Environment and Rural Communities Act 2006 which places a duty on all public authorities in England and Wales to have regard, in the exercise of their functions, to the purpose of conserving biodiversity 3. Its inclusion contradicts SMDC LDF Core Strategy Policy C3 Sustainable Communities where existing and potential sites of nature conservation value are linked, biodiversity is increased and the urban fringe is enhanced.</p> <ul style="list-style-type: none"> • Neither the distributor road (Mow Lane) nor the feeder roads (Essex Drive and York Close) meet the minimum standards for the SCC highways Design Guide Policy. The roads are too narrow and the road has pinch points over bridges on Mow Lane which cannot be avoided as there is no alternative access to this site. Mow Lane is a dangerous road with no footpath. There is no scope for the required improvements. • This site will deliver too few homes to add any measurable contribution to the community infrastructure levy (CIL), it will not bring any direct benefit to the community of Gillow Heath. Its inclusion contradicts the SMDC LDF core strategy Biddulph Area Strategy where new housing allocation is prioritised on urban development’s help secure infrastructure improvements for benefit of the newly developed part of town. The current capacity of the United Utilities sewage treatment works is reported to be serving up to 17000 residents. The population of Biddulph as at 2011 census was 19892 residents. An increase of 885 houses approximately 3000 people will obviously require investment in its facility. This will not be facilitated by the inclusion of numerous small development sites, but rather fewer larger sites which are able to utilize the CIL.

Question 23 – Do you have any other comments to make regarding Biddulph? (Comments on site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/ Object/General	Consultee Comments	Officer Response
PO6527	Mrs Beverley Holding				BD062 / BD068	Object	It makes no sense at all to extend boundaries into Green Belts when there are adequate sites within the urban locations. Furthermore as outlined is typed text overleaf my concerns would be around flooding if building went ahead on the proposed sites BD068 and BD062 water (rain) runs from Mow Cop and lies at the foot of both these sites. Therefore building there even drainage will cause environmental issues. This working against the natural contours of the land.	<ul style="list-style-type: none"> In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). This study recommends considering site BD062 for release from the Green Belt. See responses to PO10246 regarding use of mills and other brownfield sites. See response to PO5940 regarding flooding.
PO6733	Mr and Mrs I Condliffe				BD062 / BD068	Object	Public health – too close to the sewage works, there is already noise and smell. Flood risk – the brook floods and it is an issue. Green Belt – loss of the countryside, wildlife and open space. Highways issues – Marsh Green Road is too narrow and could not cope with more traffic, risk of a accidents. Objections 1- 4 use brown field land or land that has previously been developed.	<ul style="list-style-type: none"> See response to PO5940 regarding issues relating to the water treatment works. See response to PO5940 regarding flooding. See response to PO6527 regarding Green Belt. See response to PO5827 regarding loss of wildlife. See response to PO5940 regarding Highways. See responses to PO10246 regarding use of mills and other brownfield sites.
PO6254	Mr J Robertson				BD062 / BD068	Object	Attached are four specific objections. Objection no 3 is of particular importance this road Marsh Green Road is frequently used by myself and many others for cycling, walking, especially with dogs, horse riders extra traffic would be a serious danger at the junction of Marsh Green Road and Congleton Road (the main road). The extra traffic from the road would be a serious danger to every road user, given the narrowness of Marsh Green Road. I also specifically brought my property with the view of the hillside and not in the middle of a housing estate. There is Land available to the south of the town which doesn't have much use for other purposes this area would not have much of an impact on others if developed and there is room for infrastructure to be upgraded.	<ul style="list-style-type: none"> See response to PO5940 regarding Highways. Views from individual properties are not protected in planning law. See responses to PO10246 regarding use of mills and other brownfield sites. National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the County Council to assess the impact of proposed development on school capacity, what additional capacity is needed and how this can be delivered.

Question 23 – Do you have any other comments to make regarding Biddulph? (Comments on site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/ Object/General	Consultee Comments	Officer Response
PO6710	Mr and Mrs W Summerscales				BD062 / BD068	Object	Marsh Green Road is potentially a dangerous road already. It is not safe to walk with a pushchair due to the very narrow and uneven roads particularly in the summer months when the hedges limit a single side of the carriageway. The junction with Congleton Road is also a problem not only because of the dip in the road towards the Church which makes it difficult to see cars coming from the Congleton Direction. This together with the junction of Woodhouse Lane directly opposite and the fact that many drivers speed along that road (hence the use of the speed vans on a regular basis) make it a hazard. There appear to be much more suitable sites that have a far better access and would not impact on the green belt. I understand that Victoria Colliery and Childerplay Road have been suggested and I agree that they seem much more appropriate. The access is far better and there is a good bus service should it be required.	<ul style="list-style-type: none"> • See response to PO5940 regarding Highways. • See responses to PO10246 regarding use of mills and other brownfield sites.
PO6260	Mr and Mrs M. Flanagan				BD062 / BD068	Object	<p>Objection 1 This site shares the Boundary with the sewage works which is already over its designed capacity of 17.000 people. Residents in Portland Drive, Essex Drive and Marsh Green Road already experience unacceptable amenity impacts of odour, raw sewage, pollutes Biddulph Brook. Building houses even closer to the sewage works will increase these unacceptable impacts. Objection 2 This site is protected as Green Belt and should not be released from the Green Belt. It is also a flood plain; it is also a hive of activity for the wildlife, not to mention, foxes, badgers, rabbits, stoats, bats and a wonderful variety of birds. Objection 3 Marsh Green Road does not meet the minimum standards for SCC Highways Design Guide Policy the road is too narrow with twists and bends, no footpath or lighting and access onto Congleton Road is very poor due to the busy traffic and poor visibility due to the dip in the road it is also an accident hotspot. Objection 4 The site is totally unacceptable, and will not bring any direct benefit to the community of Biddulph North its inclusion contradicts SMDC LDF Core Strategy where new housing is allocated on urban extension land. The massive improvements required to feeder and distributor roads do not seem possible due to the small scale nature of the development. I would like for you to consider alternative sites at the Victoria Colliery and Childerplay Road which seem a lot more suitable.</p>	<ul style="list-style-type: none"> • See response to PO5940 regarding issues relating to the water treatment works. • See response to PO6527 regarding Green Belt. • See response to PO5940 regarding flooding. • See response to PO5940 regarding highways. • Site BD062 will be required to provide a percentage of affordable housing / starter homes to benefit those in the community needing affordable housing. • See response to PO10246 regarding brownfield land including Victoria Colliery.

Question 23 – Do you have any other comments to make regarding Biddulph? (Comments on site BD062)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/ Object/General	Consultee Comments	Officer Response
PO6533	Mrs Ann James				BD062 / BD068	Object	As per summary of objections as listed with special objection given the risk of flooding, risk with close proximity to the sewage works, which has total number of residents. The safety requirements of the access to the development of the sites via the highways i.e.: roads access etc.: The area of outstanding beauty surrounding Biddulph should be undeveloped, and not to be used to house people from other areas coming into Biddulph.	<ul style="list-style-type: none"> • See response to PO5940 regarding flooding. • See response to PO5940 regarding issues relating to the water treatment works. • See response to PO5940 regarding highways.
PO6256	Mr John James				BD062 / BD068	Object	The comments made on the listed objections are relevant to the proposed development. The concern relating to access via Marsh Green Road as being unsuitable. The close proximity to the sewage works which has an overall capacity for 17,000 residents and should not be exceeded. The access of the proposed site is not adequate. The Green Belt area of Biddulph should be retained and the area of Biddulph is an outstanding beauty should be left undeveloped and not spoilt.	<ul style="list-style-type: none"> • See response to PO5940 regarding highways. • See response to PO5940 regarding issues relating to the water treatment works. • See response to PO6527 regarding Green Belt.
PO6252	Mr B Wilson				BD062 / BD068	Object	I am strongly opposed to the proposed site, Victoria Colliery and Childerplay Road sites appear to be a better development sites, my objections are: Loss of wildlife consisting of various species of Bats, owls foxes rabbits newts birds etc. The site if developed is close to the water treatment works which will increase raw sewage overflow and polluting the water course, Biddulph Brook. Increase in crime (criminal target estates) I strongly propose the proposed site. All the houses/bungalows backing onto the site will lose the light and privacy in there homes. It will reduce the value of my property. Loss of agricultural land. The current access (Marsh Green Road) does not meet the current standards for the SCC Highways. The sewage works is already overworked and the smell and the noise and the raw sewage flooding is current issue, the environment agency was called out in March 2016 to assist in the cleaning up the pollution.	<ul style="list-style-type: none"> • See response to PO10246 regarding brownfield land including Victoria Colliery. • See response to PO5827 regarding loss of wildlife. • See response to PO5940 regarding issues relating to the water treatment works. • There is no evidence to suggest that development of this site would result in an increase in crime. • Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the opportunity to comment on the content of that application. • Property values are not considered material in planning law. • The land has an agricultural classification of Grade 4 which means that it is poor quality. • See response to PO5940 regarding highways.
PO5379	Mr S Leese				BD062 / BD068	General comment	The sewage works cannot cope now so will not be able to with a new housing development. The road also will be very dangerous as increased traffic will be a threat to pedestrians who walk their children and their dogs along the railway tracks.	<ul style="list-style-type: none"> • See response to PO5940 regarding issues relating to the water treatment works. • See response to PO5940 regarding highways.

PO5918	Mrs J Smith				BD062 / BD068	Object	I agree totally with the summary of objections over the page. Marsh Green Road is very narrow in parts and is a potential danger hazard already. I myself have had quite a few near misses and thought of increased residents/houses would be a fatality waiting to happen on this very narrow winding road. Access is not the only issue, the pipe work and sewage works are currently under capacitated so an increase to the residence population in this area would cause major issues with the smell + pollution in this area would cause major issues with the smell the pollution in this regard. Also build houses on Victoria Colliery + Childerplay Road sites.	<ul style="list-style-type: none"> • See response to PO5940 regarding highways. • See response to PO5940 regarding issues relating to the water treatment works. • See response to PO10246 regarding brownfield land including Victoria Colliery.
PO6251	Ms S Wilson				BD062 / BD068	Object	Sewage works is already over worked and the smell noise and the raw sewage flooding is a current issue. Flooding last happened in March 2016 and the environment agency was called in to assist the clearing up. Green Belt – The site is currently Green Belt and has a lot of wildlife which includes birds, foxes, owls and bats also including this site would contradict SMDC LDF Proposed Site will be guided to first make use of the other areas. At low risk of flooding causing watercourse pollution within Biddulph Brook. Victoria Colliery and Childerplay Road appear to be a better development sites. Highway access – The current access (Marsh Green Road) does not meet the current minimum SCC Highways. This is supported by the fire tender access to within 45m of the most distal aspect of the development cannot be guaranteed, due to narrow roads. It also contradicts SMDC LDF Core Strategy Policy T1. This site will deliver to few many homes to add any measurable contribution to the community infrastructure Levy CIL and will not bring any benefits to the Biddulph North Community. Current homes on Portland Drive will not only be reduced in value but the bungalows backing on the site will lose light and privacy will be greatly affected.	<ul style="list-style-type: none"> • See response to PO5940 regarding issues relating to the water treatment works. • See response to PO5940 regarding flooding. • See response to PO6527 regarding Green Belt. • See response to PO5827 regarding loss of wildlife. • See response to PO10246 regarding brownfield land including Victoria Colliery. • See response to PO5940 regarding highways. • See response to PO6260 regarding community benefit of development. • See response to PO6252 regarding property values and residential amenity.
PO6777 PO6774 PO6758 PO6773	Mrs J Banister Mr J Banister Mr A Forrester Mr K Flannagan				BD087, BD083, BD138b, BD004, BD064	Object	Object.	Comment noted.

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO309 PO546	Mr Russell Picken Mrs C Picken				General	General comment	Building more houses will not necessarily improve the town. The town is still declining even though the 'Uplands Mill' development has (and will) provide a lot more residential accommodation. The bus service around the Pennine Way estate has reduced while this development has been ongoing. To attract more people into the town centre, the developments need to be within a few minutes walking distance, otherwise, if people need to use their cars, they are much more likely to go to the better shopping centres of Congleton or Hanley. This obviously also comes with an environmental impact. The only way to improve the town centre and associated retail opportunities is by attracting more people into the town to thereby stimulate growth.	Comments noted. The largest development area in the Preferred Options Sites and Boundaries document is on the west side of the bypass which is within a few minutes walking distance of the town centre.
PO650	Ms Alison Conybeare				General	General comment	Please seek the local resident's views. These are the most important.	Comments noted.
PO636	Mrs Amanda Reed				General	General comment	More consultation with Biddulph residents as a whole would be appreciated.	The Council is only part way through the plan production process. Further public consultation will take place before the plan is adopted. A Preferred Options Local Plan containing sites and policies will be published later in 2017 and full public consultation will follow. The final draft plan will then be published and representations invited from the public and any other interested parties before a public examination conducted by an independent planning inspector takes place and any objectors will have the opportunity to speak at a public hearing or submit written representations.
PO657 PO664	Mrs Siobhan Perry Mr Andrew Perry				General	Support	Biddulph is a great place to live, keep listening to residents, keep investing in the town centre and promoting Biddulph to encourage investments from shops and visitors.	Comment noted.

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO1305	Ms Melanie Lindsley	Planning Liaison Manager The Coal Authority			General	General comment	<p>(Summary) As you will be aware, the Staffordshire Moorlands area contains coal resources which are capable of extraction by surface mining operations. These resources cover an area amounting to approximately 22.07 of the Council area. The Coal Authority is keen to ensure that coal resources are not unnecessarily sterilised by new development. Where this may be the case, The Coal Authority would be seeking prior extraction of the coal. Prior extraction of coal also has the benefit of removing any potential land instability problems in the process. The area has been subjected to coal mining which will have left a legacy. Whilst most past mining is generally benign in nature, potential public safety and stability problems can be triggered and uncovered by development activities. Problems can include collapses of mine entries and shallow coal mine workings, emissions of mine gases, incidents of spontaneous combustion, and the discharge of water from abandoned coal mines. These surface hazards can be found in any coal mining area, particularly where coal exists near to the surface, including existing residential areas. Within the Plan area there are approximately 1,225 recorded mine entries and around 205 coal mining related hazards have been reported to The Coal Authority. A range of other mining legacy features are present, in total The Coal Authority High Risk Development Area covers approximately 6.98% of the Council area. Mining legacy is concentrated in and around the Towns of Biddulph and Cheadle and many of the villages south-west of the A523. Mine entries may be located in built up areas, often under buildings where the owners and occupiers have no knowledge of their presence unless they have received a mining report during the property transaction. Mine entries can also be present in open space and areas of green infrastructure, potentially just under the surface of grassed areas. Mine entries and mining legacy matters should be considered by Planning Authorities to ensure that site allocations and other policies and programmes will not lead to future public safety hazards. No development should take place over mine entries even when treated. Although mining legacy occurs as a result of mineral workings, it is important that new development recognises the problems and how they can be positively addressed. However, it is important to note that land instability and mining legacy is not always a complete constraint on new development; rather it can be argued that because mining legacy matters have been addressed the new development is safe, stable and sustainable. In our previous response on the 14 September 2015 we stated: "In assessing potential site allocations, it would therefore be</p>	<ul style="list-style-type: none"> • Sites affected by mining legacy to have a policy criterion to clarify that developers should recognise mining legacy problems and demonstrate how they can be positively addressed by new development. • Most recent GIS information from the Coal Authority has been downloaded and informs the site assessments.

							<p>prudent to include a criterion which assesses coal mining data. In accordance with NPPF guidance (paras. 109, 120, 121 and 166), this would be a due diligence check to ensure that potential development sites do not contain any mine entries or other coal related hazards which would require remediation or stabilisation prior to development. This assessment should be undertaken by the LPA using the GIS data provided by the Coal Authority. The Coal Authority notes that the Development Risk product and Surface Coal Resource product were downloaded by the LPA on the 8 June 2015. The LPA should use the most up to date information available to inform its assessments." I note and welcome the fact that the site assessment documents covering the site options does identify ground instability arising from mining legacy and as such The Coal Authority supports the broad approach taken to site selection. We have no views on the actual sites chosen as this is a matter for local determination following consideration of all relevant factors.</p>	
PO442	Mrs Janice Deane				General	Object	<p>Biddulph is a close a supportive community. It cannot grow without that becoming unbalanced.</p>	Comment noted.

PO1330	Ms K Dewey	Staffordshire Wildlife Trust			General	Object	<p>Not all the proposed allocation sites have had ecological surveys carried out. We understand around 11 sites have been added to the proposed allocation sites that were not consulted upon in 2015, and these have not been assessed for their ecological value. The SMDC Local Plan Policy C3 Sustainable Communities - Green Infrastructure 8.7.16 and 8.7.17 references the production of a Green Infrastructure Strategy, which “ will inform the production of the Site Allocations Development Plan Document and will establish appropriate objectives and targets.” No Green Infrastructure Strategy has as yet been produced. Therefore, we are concerned that this lack of evidence base will not enable good decisions to be made on allocation sites. The Extended Phase 1 Habitat Surveys carried out by Lockwood Hall Associates Ltd in 2015 do not comprehensively cover all natural features that the NPPF and Planning Practice Guidance list as needing to be mapped as part of ecological networks: the location and extent of internationally, nationally and locally designated sites; Existing designated sites are recognised, but identification of all Local Wildlife Sites (LWS) is not as yet comprehensive. In terms of potential allocation sites, there are several where information from the Extended Phase 1 Habitat Surveys, other ecological survey reports for planning applications, and habitat data from MAGIC indicate potentially high value habitats, which should be assessed against the Staffordshire Local Wildlife Sites criteria. the distribution of protected and priority habitats and species; Priority habitats and species are taken to mean those listed as habitats or species of Principal Importance for Conservation in England according to the list under section 41 of the NERC Act 2006, plus those listed on the Staffordshire, and any more local, Biodiversity Action Plan. The Extended Phase 1 Habitat Surveys do provide data that would allow identification of some priority habitats, but do not highlight priority habitats where they are present or use the definitions to describe habitats found. Recommendations for further protected and priority species surveys are made, but full information on their presence has not been gathered. areas of irreplaceable natural habitat , such as ancient woodland or limestone pavement, the significance of which may be derived from habitat age, uniqueness, species diversity and/or the impossibilities of re-creation; This includes veteran trees and ancient hedgerows. Records for these features are not comprehensive. Some veteran tree records are available on http://www.ancient-tree-hunt.org.uk/discoveries/interactivemap It does not appear that this database was searched in the desk studies informing the habitat surveys in 2014. The survey reports do</p>	<p>Ecus Ltd have now completed ecological assessment of all sites includes in the Preferred Options Sites and Boundaries (April 2016) consultation.</p> <p>A Green Infrastructure Strategy for the Staffordshire Moorlands has been produced by the Council with assistance from partners such as the Staffordshire Wildlife Trust and will be published alongside the next Preferred Options consultation.</p>

							<p>not specifically mention irreplaceable habitats. habitats where specific land management practices are required for their conservation; Some mention is made of current land management in the Extended Phase 1 Habitat Surveys, but important areas are not highlighted. main landscape features which, due to their linear or continuous nature, are important for the migration, dispersal and genetic exchanges of plants and animals, including any potential for new habitat corridors to link any isolated sites that hold nature conservation value, and therefore improve species dispersal; Good habitat links and recommended buffer areas are mentioned in the Extended Phase 1 Habitat Surveys, and the information within the surveys could be used to identify corridors and stepping stones, but specific identification of these features is not part of the report or clearly and consistently highlighted. Corridors and stepping stones need to be recognised and protected, and their other benefits to visual and access amenity in urban areas recognised. areas with potential for habitat enhancement or restoration, including those necessary to help biodiversity adapt to climate change or which could assist with the habitats shifts and species migrations arising from climate change; The ecology surveys would help identify such areas, and some Visual Open Space and Public Open Space areas are proposed in the allocations plans, but areas to be enhanced in terms of habitat value are not specifically identified. information on the biodiversity and geodiversity value of previously developed sites and the opportunities for incorporating this in developments; Previously developed sites are among those proposed for allocation and covered by ecological surveys, which give some recommendations. However geodiversity is not covered. If ecological networks and other GI features could be mapped for each settlement, this would give a good basis for allocating sites, both for hard development, and for green space and environmental enhancements. This would also provide a framework for any CIL monies, partnership projects etc. to target priorities in the area and improve the environmental quality of each town and village.</p>	

Question 23 – Do you have any other comments to make regarding Biddulph? (General Comments)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO1373	Ms Rosamund Worrall	Heritage England			General	General comment	<p>Paragraph 126 of the NPPF requires Local Plans to set out a positive strategy for the conservation and enjoyment of the historic environment. This means that the plan, as a whole (including the sites it is putting forward as allocations) has to set out a framework which is likely to conserve the historic environment of the Plan area. The Plan puts forward a number of sites which, if developed, appear likely to affect the significance of one or more designated heritage assets in their vicinity. The Allocation of a site for development within the Local Plan is, in effect, establishing that the principle of development in that particular location is acceptable. However, in the case of this Local Plan, at present, there is no clear meaningful evaluation of what impact the development of these areas might have upon those heritage assets. The evidence base relies on the Historic Environment Character Assessment of 2010 and the Landscape and Settlement Character Assessment (LSCA) of 2008 amongst others. It is also noted that the SHLAA methodology includes reference to constraints and opportunities in relation to the LSCA but does not mention the Historic Environment Character Assessment. In addition, it is noted that the Halcrow Toolkit of 2011 used for the Core Strategy information has been used in respect of the current SHLAA. Table 2.1 of the site rating criteria includes reference to designated heritage assets, but there is no reference to non-designated heritage assets, setting or harm. As such, it is not clear how impact on the historic environment has been assessed and subsequently applied to the site options in relation to them being put forward as allocation sites, other than where mentioned in the associated SA. Even in the SA it is not clear how the sites have been assessed in respect of the historic environment. It is also of concern that Para 1.16 of the draft plan sets out that further evidence base studies will be completed to inform the Local Plan including Landscape and Heritage Impact Study. In the Options Sites Assessments tables, part of the evidence base, it is also noted that Heritage Impact Assessments will be undertaken during the plan production if sites, where negative effect on the historic environment and heritage assets has been identified, are taken forward. These assessments should be undertaken and considered at this stage to ensure that the preferred allocation sites are deliverable in respect of the historic environment but, at present, Part 7 of the SA does not deal with this. In the absence of any assessment of the degree of harm which the proposed Allocations might cause to the historic environment or, indeed, what measures the Plan might need to put in place in order to ensure that any harm is minimised, at present, the authority cannot</p>	<p>The Council has recently undertaken a Landscape, Local Green Space and Heritage Impact Study to form part of the evidence base to support the Local Plan and assess the potential heritage impacts of the development allocations and mitigation measures.</p>

Question 23 – Do you have any other comments to make regarding Biddulph? (General Comments)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
							<p>demonstrate that the sites it is putting forward for development is compatible with the Plan's own policies for the protection of the historic environment. Moreover, in terms of national policy guidance, the Plan also fails to demonstrate that:- (a) The sites that it is putting forward for development will deliver a "positive strategy for the historic environment" as is required by NPPF Paragraph 126. (b) The sites that are allocated will be likely to "contribute to protecting or enhancing the historic environment". Therefore, it has not shown that it is likely to deliver sustainable development in terms of the historic environment [NPPF Paragraph 7]. (c) The sites which it has allocated are likely to "conserve heritage assets in a manner appropriate to their significance". Therefore it has not shown that it will be likely to deliver the Government's objectives for the historic environment [NPPF Paragraph 17]. (d) It has complied with the statutory duty under S72 of the Planning (Listed Buildings and Conservation Areas) Act, 1990 to pay "special attention" to "the desirability of preserving or enhancing the character or appearance" of its Conservation Areas. Moreover, from the information available there is no evidence that, in preparing the Plan, the local planning authority has had "special regard to the desirability of preserving" any of its Listed Buildings. Whilst it is accepted that S66 of the Planning (Listed Buildings and Conservation Areas) Act, 1990 does not apply, specifically, to Plan making, the absence of any evaluation potentially brings into question the deliverability of some sites and, for some, the amount of development they can accommodate. When the requirements of the Act are eventually undertaken, it may be found that the quantum of development on some of the sites is, either, unachievable or, at worst, that the need to safeguard the setting of the building actually renders them largely undevelopable. Please note that these comments are based on known heritage assets at a national level and do not include local information available through heritage environment records which should be considered by the local authority.</p>	
PO972	Mr Christopher Goldstraw				General	Object	<p>Biddulph will never need 1,100 new houses. There are already a substantial number of empty properties in the town that should be brought back into use.</p>	<p>Need for additional housing stems from a number of factors, for example household formation, in-migration, linkages with future workforce, and other factors. The NPPF makes clear that housing projections are the starting point for assessing housing needs; however, these additional factors should also be taken in to account in Council SHMAs. The Council's own housing need assessments are set out in its</p>

								evidence base on the website. Note that this already takes into consideration empty properties in the Moorlands.
PO1148	Darren Archer				General	Object	Why should we be dictated to by Stafford County Council and have 880 plus houses built in Biddulph along the bypass. Which is all green belt land. Woodland and full of nature. Over 200 of these properties will be for affordable housing. With anti social people coming from other counties and possibly immigration. If the cannot be housed in the area they are from why should local people who have lived in Biddulph all there lives have a new estate on there doorstep. Full of non desirables. Biddulph is a commuting town with no industry any more thanks to government for someone to use google maps to say yes we will build there is absurd. And all the community will object. If anyone from this department would like to contact me. Please feel free and explain what idiot came up with this suggestion. Please forward me their details. Many thanks.	<ul style="list-style-type: none"> • See response to PO972 (above) regarding need for housing. • Staffordshire County Council do not stipulate the housing numbers for Staffordshire Moorlands. This is determined by evidence in the Strategic Housing Market Assessment in line with Government policy. • New employment areas are also proposed for Biddulph in the draft Local Plan. • Decisions as to the content of the Council's Local Plan are made by elected Councillors.
PO2579	Consultation Service	Natural England			General	General comment	With regard to baseline data and additional new sites: The Council may need to check that up to date information on local wildlife sites (Sites of Biological Interest and Biodiversity Alert Sites in Staffordshire) has been referenced when identifying preferred sites. Our previous advice letter dated 14.9.15 gave detailed advice on themes and issues including these non-statutory sites. Natural England no longer has access to this dataset and the as the preferred sites consultation includes a number of additional sites (not considered as part of last year's consultation) the Council will need to access up to date information to check on any impacts on these sites. Please contact the Staffordshire Wildlife Trust (01889 880 100 or email info@staffswt.org.uk) for further information if you do not hold the relevant dataset in house.	Comments noted.

Question 23 – Do you have any other comments to make regarding Biddulph? (General Comments)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO2695	Mr Martin Ross	Environment Agency			General	Object	There is no commentary around the issue of flood risk and how the sites have been chosen with the Sequential process in mind. However, we do note that the sites we previously identified as being the most severely impacted due to flood risk, have not been taken forward to this stage, which we welcome. We have however, identified some sites where further work is necessary and we wish to remind the Local Planning Authority that Sequential Test evidence should be provided and reiterate if these sites are to be taken forward, then a Level 2 SFRA should also be undertaken. At this Preferred Options stage, this work should already be done. However, there is one final chance for this to be undertaken, prior to the Publication Draft towards the end of this year. If it is not done by that stage, the Site Allocation Document risks being found unsound as it will be at odds with the guidance set out in the SFRA Level 1 and potentially, Flood Risk policies that will be set out in the next consultation.	Comments noted. The sites in Biddulph included in the 'Preferred Sites and Boundaries Consultation Document' (April 2016) where flood zone issues were identified, have been recommended for exclusion from the plan so they are unlikely to be taken forward and those which have been recommended for inclusion do not have flood zone issues (subject to decision taken at Council Assembly on 12 th July 2017).
PO2832	Mr Martin Ross	Environment Agency			General	General comment	The appropriate level and detail of ecological appraisal should be provided for any developments going forward on the proposed site allocations. These should be completed to CIEEM guidelines namely to identify and evaluate the ecological features of interest and potential impacts upon them. The mitigation hierarchy should be employed from the outset of any design and development planning to avoid, minimise, mitigate, offset impacts, both direct and indirect. Many proposed allocations are adjacent to priority habitats and statutory and non-statutory designated sites, including watercourses. In line with the mitigation hierarchy and relevant NPPF sections, i.e. 109, every effort should be made to re-naturalize watercourses, including de-culverting where technically feasible. The main impact on any sites from a developable point of view, are easements from watercourses to help promote Green and Blue corridors and networks where migration and movement along the watercourse banks can occur. This is likely to be between 5 metres, up to 10 metres on some main river stretches. Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant WFD waterbodies do not deteriorate in status and listed measures in the RBMP are taken into account. Collective contributions from specific areas could be used to support innovative land management schemes upstream in the catchment delivering natural flood management to reduce flood risk in the new developments and wider communities downstream. We would recommend and welcome the opportunity to comment on pre-applications to ensure the best opportunities and outcomes are realised.	Comments noted. Policies for sites affected by watercourses should require that early discussions with the Environment Agency and the Lead Local Flood Authority are undertaken.

PO2858	James Chadwick	Spatial Planning Policy Officer Staffordshire County Council			General	General comment	<p>Whilst we have not assessed each site in detail it is clear that many of them will be crossed by public rights of way which will need to be considered in full as part of any proposed development. We are also in the process of preparing the 4th Review of the Definitive Map and Statement for Staffordshire Moorlands area and the District Council will be provided with copies of the maps and Statement to indicate the alignment of all recorded routes. Staffordshire Moorlands District Council currently hold copies of the existing Definitive Map and Statement which should form part of any discussions with developers regarding the proposed sites. As the Plan progresses we suggest policy provision to ensure that all public rights of way are protected and, where possible, enhanced in conjunction with any development. If any Public Path Orders are required to enable the development to take place these should be processed alongside the planning application by the District Council. Many of the sites chosen are close to existing urban areas and it is likely that there are non-definitive routes across the sites which should be considered by any applicants. In many cases these routes could have become rights of way by virtue of established usage over many years and should be treated as public. There will also be sites where such usage or historic evidence has already resulted in applications being made to the County Council under Section 53 of the Wildlife and Countryside Act 1981 to add or modify the Definitive Map of Public Rights of Way, which affects the land in question. As the Plan evolves it would be useful to provide guidance to developers/applicants around enhancing the existing path network where possible in line with Staffordshire County Council's Rights of Way Improvement Plan. This could include: - the creation of public bridleways or the upgrading of public footpaths to bridleways to improve provision for horse riders and cyclists across Staffordshire where there is currently a shortfall in available access routes. - the creation and promotion of short circular walks to promote the health benefits of walking - the replacement of stiles with gaps (where there are no stock) or gates (where there are) in line with Staffordshire County Council's Least Restrictive Principle for path furniture The County Council is able to provide further advice and guidance as and when required.</p>	<p>Comments noted. Text has been added to the supporting text associated with relevant Biddulph site policies to reflect the protection and, where possible, enhancement of public rights of way in conjunction with any development, though it is recognised that they may have to be re-directed.</p>

Question 23 – Do you have any other comments to make regarding Biddulph? (General Comments)

PO2880	James Chadwick	Spatial Planning Policy Officer Staffordshire County Council			General	General comment	<p>In relation to more general matters regarding the Local Plan's approach and considering the incorporation of policies for the next iteration the following should be considered. A Historic Environment Assessment (HEA) has previously been prepared for the Staffordshire Moorlands and its focus and extent was informed through discussion with the District Council. The statement regarding the need for further evidence including a 'Heritage Impact Study' (s1.16) of the Staffordshire Moorlands Local Plan booklet is to be supported and should also be welcomed by Historic England. This Heritage Impact Study should review the previous work of the HEA (and update where required), extend the boundaries of the previous study where necessary and enhance the assessment where appropriate. It should cover all aspects of the historic environment and be undertaken by a suitably experienced historic environment specialist following a detailed brief agreed in advance with Historic England, the SMDC Conservation Team and the Staffordshire County Council Historic Environment Team. We have not assessed each site in detail as it is considered that the Heritage Impact Study (identified in s1.16) will undertake this work with reference to all relevant documentary information and databases (Staffordshire County Council Historic Environment Record, National Heritage List for England etc). The Heritage Impact Study should also make use of all available recent studies to inform its assessment including, where appropriate, the relevant Extensive Urban Survey (available on www.staffordshire.gov.uk/ search under EUS) and the historic farmsteads guidance available on the same web pages. Bearing in mind the scale of many of these developments, where appropriate applicants should be encouraged to undertake, as a minimum, a Heritage Statement in support of any application in order to '...describe the significance of any heritage assets affected, including any contribution made by their setting.' (NPPF, s.128). Where more complex remains or larger developments are being considered, then a full Historic Environment Desk-Based Assessment should be prepared. In all cases these documents should be prepared at an early stage by appropriately experienced historic environment specialists and they will inform discussions with the Local Planning Authority and their historic environment advisors regarding the need for and scale of any historic environment interventions including opportunities (where appropriate) to enhance heritage assets within a scheme. The Staffordshire County Council Historic Environment Team would be happy to be consulted by the historic environment</p>	<p>The Council has recently undertaken a Landscape, Local Green Space and Heritage Impact Study to form part of the evidence base to support the Local Plan and assess the potential heritage impacts of the development allocations.</p>

							specialist appointed to undertake the Heritage Impact Study. We would also be content to advise on the production of Heritage Statements/Historic Environment Desk-Based Assessments to inform development proposals and can advise the LPA on, in particular, the archaeological and historic landscape character aspects of specific developments at the planning application stage.	
PO2928	James Chadwick	Spatial Planning Policy Officer Staffordshire County Council			General	General comment	In relation to surface water flood risk you have provided to us recently a GIS mapping layer of the proposed allocations that we have run through our flood risk software. Attached are our initial comments on the sites and it is hoped that these should help identify any potential issues at each site and assist in framing policy for assessment and SuDS requirements. However, we have only been able to undertake a high level initial assessment at this stage and would welcome the opportunity to discuss with you further and perhaps identify sites that require further detailed consideration.	Comments noted. Further discussions have been held with SCC regarding flooding issues.
PO5272	Mr Carl Webb				General	Object	Building will put even more strain on Biddulph increase pollution and destroy green belt and wildlife and bio diversity.	Comment noted.
PO5096 PO5095	Mr J Neate Mrs L Neate				General	General comment	All the advantages should be explored and approved.	Comment noted.
PO5218	Mrs L McQuade				General	Support	We have been waiting 12 months join the gym class at the leisure centre. More opportunities needed.	Comment noted. However, this is not a matter which can be directly addressed in the Local Plan.
PO5247	Mrs P G Webb				General	Support	New primary school is desperately needed/I strongly support the proposals here.	Comment noted.

Question 23 – Do you have any other comments to make regarding Biddulph? (General Comments)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO7310	Ms Joan Walley				General	Object	<p>I feel strongly that strategic issues arising from the earlier consultation response and including my own comments have not been fully considered. Even more disconcerting for local democracy is the concern expressed that local councillors' views have not been acted upon. My specific comments are as follows. * Future Housing and Retail Need in Biddulph I do not consider that sufficient detailed assessment has been done to enable SMDC to arrive at a definitive assessment of future housing and retail need in Biddulph. What account has been taken of future housing trends, the need of the aging population, the extent of existing vacant and derelict properties, audit and ownership of more suitable town centre sites for potential development or reuse, and of the implications of this assessment for new build housing and retail? For example, what future sheltered housing provision is required; to what extent is the new build at Selectus meeting local housing need; what account has been taken of vacant shops in the town centre? Without this detailed analysis and breakdown of the type of new properties and retail required it is difficult to see how the required figure of 885 properties is arrived at, or the need for new retail. *Greenbelt, Without a detailed review of the value of greenbelt and impact of any removal of green belt, and with no full biodiversity / natural capital assessment, I do not agree that there is a case that there are exceptional circumstances that would merit release of the green belt sites in Biddulph identified in the plan and also to the overall cumulative extent outlined in the plan. Biddulph's development is very much linked to its geography and historic mineral resources and it is important that the settlement should remain distinctive, separated by greenbelt from the settlements in Biddulph Moor, Mow Cop, and from sites such as the Woodland Trust's at Baileys wood, and that urban sprawl should be avoided. I particularly object to the the later addition of the Akesmoor Lane site ADD03 for house building and a new school. I suggest that the reduction of the overall number of planned new houses for this site would be short term in any case and development there of the reduced number of homes would be temporary and sequential, leading inevitably to a future 'joining of the lines on the map', encroaching even further into the green belt in the future. Given that local councillors and people have repeatedly called for a brown field site first approach to avoid unnecessary despoiling why will the Council not assess the suitability of existing unused sites and undertake a full appraisal of the suitability of the former Victoria colliery site for housing in the first instance? Infrastructure It is difficult to see from paragraphs 327</p>	<ul style="list-style-type: none"> • It is not agreed that sufficient detailed assessment of housing and retail need has not been undertaken. The Strategic Housing Market Assessment and the Retail Study are considered to be robust. • The Staffordshire Moorlands Green Belt Review provides a detailed assessment of all the Green Belt in the District by splitting it into parcels and undertaking detailed analysis of each parcel. It is considered that this assessment follows a robust and credible methodology. • Phase 1 Ecological Assessment has now been undertaken for all sites in the 'Preferred Options Sites and Boundaries' document. These sites have also been considered against 'Local Wildlife Criteria' to assess which may qualify as 'Sites of Biological Importance'. • A Draft Green Infrastructure Strategy has been produced by the Council in partnership with key organisations (such as the County Council and Staffordshire Wildlife Trust). This will be published alongside the Preferred Options Local Plan for comments. • Brownfield sites in and around Biddulph have been assessed in the Strategic Housing Land Availability Assessment and included in the plan where they are suitable, available and viable. • Other sites suggested through the consultation have also been assessed including the former Victoria Colliery site. • National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with

							<p>onwards and linked papers exactly how the Plan's proposals have taken full account of the requirements in the NPPF to assess the quality and capacity of infrastructure to meet local demands. Can SMDC set out what assessment they and the Environment Agency have made in respect of future sewage infrastructure investment requirements for existing and future housing development in Biddulph? Please can SMDC set out what account has been taken of flooding on each of the sites included for development? Please can SMDC also set out in detail what traffic modelling has been undertaken in respect of the existing transport infrastructure and implications for all proposed new development, and particularly that on the west side of the Biddulph Valley? There appears to be no reference to traffic and pedestrian safety for access to and from the town centre and other sites in an area already lacking basic safety measures including pavements and traffic controls. Any site for a new school should have safe vehicular and pedestrian access. In conclusion I strongly object to SMDC's approach to this Local Plan housing allocation for Biddulph which appears to be based more on a remote desk top paper exercise rather than a genuine understanding of and response to local views, local geography, and economic, social and environmental needs and considerations. I accept that a Plan has to be adopted, but there is still time for officers to take account of the views of local people and their elected ward councillors.</p>	<p>infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the County Council to assess the impact of proposed development on school capacity, what additional capacity is needed and how this can be delivered.</p> <ul style="list-style-type: none"> • United Utilities has a statutory duty to provide capacity for new development and they consider that there is no need to expand the treatment works in the development plan period for the growth identified in the development plan. • The Council has had an on-going dialogue with the Environment Agency and the Lead Local Flood Officer at Staffordshire County Council regarding flood risk. • The Council has had an on-going dialogue with highway officers at Staffordshire County Council and they have provided site specific information to inform the site selection process.
PO5301	Mr S Findlow				General	General comment	<p>The elderly residents of the Pennine Way estate + the Washington Close area desperately need a round robin' mini bus service to help to get to the doctors and the shops and the dentist etc.: say from 9am – 3pm, it could be enterprising taxi service to set this up to help the elderly attend appointments. I strongly feel that the health infrastructure would be under great strain with such an increase in the population. I work at the local dental practice and we simply cannot cope with any more patients. We have to turn people away on a daily basis.</p>	<p>Comments noted. Provision for community transport is outside the remit of the Local Plan.</p> <p>See response to PO7310 regarding infrastructure.</p>
PO6724	Ms Jenna Wooliscroft				General	Object	<p>I would just like to respond to the new planning application in biddulph, I am against building in our beautiful green belt that is home to many animals, walkers, bikers etc.</p>	<p>Comment noted.</p>

Question 23 – Do you have any other comments to make regarding Biddulph? (General Comments)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO9244 PO9276	Mr Lee Dawkin	Renew Land	Mr Ben Weatherley	Knights LLP	General	Object	<p>With regard to the proposed distribution of housing across the district, we would support a greater proportion of housing being allocated to Biddulph mindful that we consider that the allocation of additional land for housing in Biddulph would also enhance the prospects of the open market and affordable housing needs of the town (and in turn the district) being met within the plan period, which would in turn support the delivery of sustainable communities in terms of both meeting housing needs and supporting local services. It is also considered that there would be sustainable benefits and justification for increasing the housing allocations in Biddulph, given the good range of existing services in the town. There would also be knock-on benefits from provision of additional housing to that currently proposed in the town. Such benefits would include local economic benefits through additional spending in the town centre and at other local facilities and ultimately additional support for the future sustainability and growth of local services. Further justification for increasing the housing allocations in Biddulph is the fact that it is proposed to allocate employment and mixed alternative use sites in Biddulph. The delivery of more homes in Biddulph in tandem with the job creation associated with those site allocations would enhance the sustainability of the local area, including by providing increased opportunity for existing and future employees at businesses within Biddulph to live locally (therefore reducing the need to travel). It is considered that the delivery of more homes in and around Biddulph would be more sustainable than allocating land within the Green Belt for housing in locations elsewhere that are more remote from the employment opportunities and other range of services that are available in the larger settlements such as Biddulph.</p>	<p>The Council's Objectively Assessed Housing Needs were agreed at Council Assembly on 8th March 2017. The agreed figure is an annual housing requirement of 320 homes per year (close to combined jobs growth scenario) is taken forward on the basis that the scenario:</p> <ul style="list-style-type: none"> • Most closely accords with the housing policy set out in the NPPF as it fully meets demographic housing needs and helps to address the affordable housing need. It also increases the scope to provide specialist housing such as Self-Build and Custom Build • Supports the provision of approximately 870 additional jobs up to the year 2031. This will help to set a positive economic strategy for the District in line with to Paragraph 21 of the NPPF • With a pro-active approach to delivery taken by the Council, is "aspirational, but realistic" when considered in the context of an historic average delivery rate of 178 homes per year • Is deliverable in terms of the supply of suitable housing land, the scope to release land from the Green Belt and infrastructure capacity • Is consistent with the requirement agreed by the Council in 2016. The majority of sites required for this level of development were not found to give rise to significant landscape or heritage impacts, including on the setting of the Peak District National Park • Provides a balanced range of social, economic and environmental effects as set out in the Sustainability Appraisal the most consistent with the four aims of the Corporate Plan (2015-2019) when read as a whole. <p>The proportion of the OAN applied to Biddulph is the same as set out in the adopted Core Strategy, 20%.</p>
PO9055	Mrs Joyce Tagell			Hourigan Connolly	General	Object	<p>(Further document attached). APPORTIONMENT OF HOUSING It is noted that the Council has not invited comment on the distribution of development amongst the District and relies upon the apportionment contained within Policy SS3 of the Core Strategy. In respect of housing this</p>	See response above.

Question 23 – Do you have any other comments to make regarding Biddulph? (General Comments)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
							<p>proposes that Biddulph accommodates 20% of the housing requirement. B IDDULPH – HOUSING REQUIREMENT ADJUSTED FOR BARTON WILLMORE FOAHN Given the work undertaken by Barton Willmore it is necessary to illustrate the effect of utilising a 440 dwelling per annum requirement (8,360 dwellings for the Plan period) on the need to identify further land for housing. In that respect and adopting the 20% apportionment advocated by the Council Biddulph would need to accommodate 1,672 dwellings over the Plan period 2012 – 2031 (8,360 x 20%). Table 3.2 of the Council’s Preferred Options document states that as of 31 December 2015 156 dwellings had been completed since 2012 and there were commitments for a further 155 dwellings (311 in total). Against a requirement of 1,672 dwellings for the settlement this leaves a residual requirement of 1,361 dwellings. Accordingly, we object to the residual requirement of 885 dwellings as shown in Table 3.2 of the Preferred Options document and consider that this should be increased to 1,361 dwellings. Table 4.6 of the Preferred Options document illustrates how the residual Plan requirement for Biddulph is going to be met. However, adopting the 1,361 residual requirement established in Chapter 4 it is evident that even if all sources of potential supply as set out in the Council’s Table 4.6 were accepted (which they are not) then only 888 additional dwellings are to be provided for. In other words against the 1,361 residual requirement we favour the Council need to identify land to accommodate at least a further 473 dwellings (1,361 – 888). It is notable that of the 888 dwellings identified by the Council to meet development needs 335 are within the Core Strategy Broad Area 4 and 440 dwellings comprise allocations – urban extensions. The remainder is reliant on a Large Windfall site allowance of 20 dwellings and a small sites allowance of 150. The entire supply is then subject to an 89 dwelling slippage allowance. Further, the small sites allowance of 150 is attributed to each of the three town’s totalling 450 dwellings over the plan period. Biddulph is surrounded by Green Belt, Leek and Cheadle are also constrained by Green Belt on their western edges. Historic delivery of housing has been demonstrably low due to constraints such as Green Belt and environmental designations resulting in a very low reservoir of planning permissions. The over reliance on large windfalls and small sites across the Plan area is unjustified and will result in a failure of the Plan to meet housing needs. The 150 dwellings small sites allowance for Biddulph is totally unjustified.</p>	
PO9824	Mrs. Margaret Biddle				General	Object	At present Biddulph is not a well-balanced town. This must be put right and the only way to do this is to develop the	Sites at Victoria Colliery and Childerplay Road are within the Green Belt. The Green Belt

Question 23 – Do you have any other comments to make regarding Biddulph? (General Comments)

							west and south of the town sympathetically using less contentious parts, providing the opportunity to build the number of houses required. Most residents favour the development of the Victoria Colliery site. The neighbouring Newcastle Authority appears to be in favour. The area would be greatly improved and a large number of houses could be built and there would be CIL benefits. Also favoured are Childerplay Lane and south of ADD03 / west of BD076.	<p>Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy.</p> <p>The area south of ADD03 / west of BD076 is being considered as a potential development site by the Council.</p>
PO10206	Mr Stan Charlesworth				General	General comment	Summary only (see attached full representation) Do not agree with the suggestion from a Councillor to reopen the railway line between Biddulph and Stoke. It would not be cost effective.	Comment noted.
PO10221	Mr Stuart Nicholls				General	Object	I strongly disagree that Biddulph needs the number of new properties allocated as there are not enough employers or employment for such numbers of people in Biddulph. If the extra numbers of people are to find employment in Stoke on Trent then there are numerous brownfield sites within 5 to 10 miles south west of Biddulph. Whilst I understand that the Neighbourhood Plan must designate the land by the Government's directive there are many brownfield alternatives a few miles away.	<ul style="list-style-type: none"> The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district's full housing needs, including affordable housing, whilst taking into account migration and demographic change. An assessment of employment land requirements by NLP in February 2017 concluded that 13ha to 27ha of employment land was required to meet the needs of the district 2014-2031. It was recommended and agreed by Council Assembly on 08/03/17 that an annual housing requirement of 320 homes per year (close to combined jobs growth scenario) was taken forward into the Preferred Options Local Plan. An employment land requirement of approximately 27ha was therefore recommended up to the year 2031 for the Preferred Options Local Plan on the basis that it was at the top of the OAN range for employment and so closely corresponds with the proposed housing requirement to support sustainable development. Applying

Question 23 – Do you have any other comments to make regarding Biddulph? (General Comments)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
								<p>the 20% requirement for Biddulph wards in Pol SS3 Core Strategy gives a requirement for the town of at least 5.4ha, less qualifying 2014-17 employment commitments. A range of employment site choices have been selected for Biddulph – either close to the town centre or to the existing Victoria Business Park.</p> <ul style="list-style-type: none"> National planning guidance states that the Council should seek to meet the development needs of their area. Stoke and Newcastle Councils have their own development needs to meet.
PO9976	Ms Ashley Kirkham				General	General comment	I understand that Biddulph needs to take control through the Neighbourhood Plan or risk developments running wild as has happened in other places. I have lived in Biddulph all my life and it seems as though the east side of Biddulph has been almost routinely developed with housing. It seems logical to me to balance things up by developing on the west.	The area south of ADD03 / west of BD076 is being considered as a potential development site by the Council.

Question 23 – Do you have any other comments to make regarding Biddulph? (General Comments)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO10220	Mr Ian Evans				General	Support	Filling out on west side of town would give a better balance to the town. Question if Biddulph really needs new housing. Properties on east side. Better road lines on west side of town - Biddulph bypass - looks like it was planned to support the expected housing for Biddulph. A more attractive structure could be built on the west side of Biddulph. A greater sympathetic development could be created with good access - Marsh Green Lane, Mow Lane, Station Road, Wharf Road, New Pool Road. Nature: new development can be better screened from the railway track naturally (bd016, bd055, bd071, bd071a, bd106, bd156 & bd108) makes a wider nature corridor. Has advantages; natural screening, better pedestrian access to Biddulph reducing car demand, close to health centre, opportunity for older person dwellings close to town centre, close to proposed care home, sports ground etc - thus reducing traffic flows/volumes. It will accommodate new school, accessible by foot, safer dropping off children. (ox hay school was on chaotic roads with parked cars). All of the above demonstrates good sustainable locations, achieving smdc sustainability vision. All above will achieve and support the regeneration of Biddulph town centre - making Biddulph an attractive and safe environment to live and work. Building on west side of valley will be closer to potential business developments at the old Chatterley Whitfield mining sites. It will also be closer to planned new employment areas than other sites. This will make walking to work attractive - thus reducing traffic congestion/pollution.	<ul style="list-style-type: none"> • See response to PO10221 regarding housing need for Biddulph. • See response to PO9976 regarding building on the west side of Biddulph.
PO9978	Ms Carol Ann Nixon				General	Object	Why can't the 15 year plan be divided into 885 houses so that less than 60 houses per year could be built which would have least impact on the town and the 5 year stock would never run out and cause less stress for residents.	Comments noted. Although this seems like a logical solution in theory, the Council cannot in planning law limit the number of houses which can be built per year.
PO273	Mr Christopher Hall					Support	Support.	Comment noted.
PO294	Mr David Spruce					Support	This plan supports the regeneration of Biddulph and gives a better balance to the shape of the town. It provides dwellings close to the town centre and good access via the bypass.	Comment noted.
PO5288	Mrs S Purcell					Support	I agree	Comment noted.
PO5309	Mr and Mrs A. Hodgkinson					Support	All these comments are sensible and constructive, and we agree with them completely.	Comment noted.

Question 23 – Do you have any other comments to make regarding Biddulph? (General Comments)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO5174	Mr S Sneyd					Support	I support	Comment noted.
PO5209	Miss F McQuade					Support	I support this	Comment noted.
PO5271	Mrs A Bridgette					Support	Regeneration.	Comment noted.
PO6762	Mr A Lehepoo					Object	I agree with the following objections overleaf	Comment noted.
PO6761	Mrs V Jackson					Object	I agree with the summary of objections attached.	Comment noted.
PO5895	Mrs B Bainbridge					General comment	Yes to suggestions you agree with	Comment noted.
PO157 PO165	Mrs Beverley Webb Mr Barrington Webb				Infrastructure	Object	Current infrastructure is already over-stretched. It is felt that the housing allocation for Biddulph is excessive considering newly built properties on the old Selectus factory site do not appear to be selling to private buyers with a considerable proportion being sold to Housing associations. All the proposed development appears to be targeted in the North and West Wards.	<ul style="list-style-type: none"> • See response to PO7310 regarding infrastructure. • See response to PO10221 regarding need for housing in Biddulph. • Need for additional housing stems from a number of factors, for example household formation, in-migration, linkages with future workforce, and other factors. The NPPF makes clear that housing projections are the starting point for assessing housing needs; however, these additional factors should also be taken in to account in Council SHMAs. The Council's own housing need assessments are set out in its evidence base on the website. Note that this already takes into consideration empty properties in the Moorlands.
PO617	Mrs Ellen Faulkner				Infrastructure	Object	Biddulph does not need any more housing until the infrastructure as been improved to deal with a growing population. If you have to build, choose to improve brown field sites first. Try to leave the Green Belt alone.	<ul style="list-style-type: none"> • See response to PO7310 regarding infrastructure. • See response to PO10221 regarding need for housing in Biddulph. • See response to PO7310 regarding use of brown field land and the Green Belt. • There is not enough land outside of the Green Belt to meet Biddulph's housing needs to 2031.

Question 23 – Do you have any other comments to make regarding Biddulph? (Comments on Green Belt)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO10025	Mr & Mrs D Cartwright				Green Belt	General comment	What has happened to the Green Belt being safe from developers? Concerned about the Green Belt area between Biddulph and Biddulph Moor.	<ul style="list-style-type: none"> The Council's Green Belt Review has recommended that the area between Biddulph and Biddulph Moor is retained as Green Belt and not considered for development.
PO36	Mr E Shaw				Green Belt	General comment	The town of Biddulph is a growing town situated within a semi rural location, the needs of a growing town have to be met, yet the infrastructure of the lack space to create further road and rail links due to the isolated location compared to The Potteries and Congleton. Therefore, developing the town further in to the Green Belt will only create further frustrating problems for the residents of all ages that have to travel far to their place of work or higher education. Some parts of the town in the South have better road links to the A500 and some brown field land that can be used for housing and further development.	<ul style="list-style-type: none"> National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the County Council to assess the impact of proposed development on school capacity, what additional capacity is needed and how this can be delivered.
PO513	Mr Denver Johnson				Green Belt	Object	I've been a resident of Biddulph for forty one years and have seen many developments in the location over the years. Happily over that time the green spaces and views have survived relatively unchanged within that time, maintaining the spirit of a rural conurbation. The current threat to those very Green Belt spaces that set Biddulph apart as a little gem is untenable. It seems that crooked National government have connived with big developers (party sponsors) to twist arms up backs of Development Officers and override Councillors/Local Public Opinion to cherry pick development locations that they hope will bring in the most cash. Stupid insofar that any big development so close would bring down local property prices.	<ul style="list-style-type: none"> Comments noted. Refer to PO692 (below).
PO692	Mr Ian Turner				Green Belt	General comment	As a resident of Gillow Heath and Biddulph for 16 years, I feel very let down by the changing in status of green belt land in order to accommodate some of these proposals. Proposing these changes whilst the centre of Biddulph is decaying from within, with underutilisation of existing retail premises and brown field sites is a disgrace.	<ul style="list-style-type: none"> In order for Biddulph to accommodate new development, the Green Belt boundary will need adjustment as there are not enough sites in the existing settlement boundary to accommodate the level of development needed. The Council has completed a Green Belt Review in order to assess parts of the Green Belt where minor adjustments can be made without having an impact on the function of the Green Belt as a whole (as defined in government planning guidance). Whichever site(s) are selected as a housing allocation, exceptional circumstances will need to be demonstrated to justify its release from the Green Belt. Brown field sites have been considered as part of the site selection process and it is agreed that the mills in the centre of Biddulph (particularly Yarn Mill and Minster Mill) would be appropriate for residential development. Albion Mill on Station Road is too small for an allocation of its own but if it is developed it would count towards Biddulph's housing needs. The Biddulph Neighbourhood Planning Group are currently working on a Town Centre Masterplan which includes looking at opportunities for redeveloping

Question 23 – Do you have any other comments to make regarding Biddulph? (Comments on Green Belt)

								brownfield sites.
PO558	Mrs Angela Turner				Green Belt	General comment	The landscape running through and around Biddulph is one of its' major assets. Most of this is currently classed as Green Belt. It is highly unsustainable to simply remove this designation to make land available for building when other areas of the District have non Green Belt land available for development. In order to achieve the aims of 'Sustainable Development', which balances economic, environmental and social benefits I call for SMDC to reconsider and revisit the arbitrary 20% figure to make this more suitable for a town with little urban development space (non-green belt) and poor links to areas of employment.	<ul style="list-style-type: none"> • See response to PO692 regarding loss of Green Belt. • The 20% figure is set out in the Council's Core Strategy, a planning document which has been through consultation and an examination by an independent inspector.
PO76	Mrs Marilyn Griffiths				Green Belt	General comment	Biddulph is currently a very good place to live, it would be better if all current green belt land remains as is	<ul style="list-style-type: none"> • See response to PO692 regarding loss of Green Belt.
PO21	Mr Robert Moseley				Green Belt	Object	No further encroachment into Greenbelt land should be made a more imaginative solution to the housing needs of the people of Biddulph should be made. Looking at empty homes, local homes for local people!, freeing up any by to let that is restricting home ownership, alternative accomodation solutions. There is a great big disused Mill on Station road that could easily become a number of houses.	<ul style="list-style-type: none"> • See response to PO692 regarding loss of Green Belt. • See response to PO692 in relation to use of brownfield sites including mills. • Need for additional housing stems from a number of factors, for example household formation, in-migration, linkages with future workforce, and other factors. The NPPF makes clear that housing projections are the starting point for assessing housing needs; however these additional factors should also be taken in to account in Council SHMAs. The Council's own housing need assessments are set out in its evidence base on the website. Note that this already takes into consideration empty properties in the Moorlands.
PO86	Mr Robert Moseley				Green Belt	Object	Develop brown field not green belt.	<ul style="list-style-type: none"> • See response to PO692 in relation to use of brownfield sites including mills.
PO145	Mr Carl Webb				Green Belt	Object	Brownfield sites should be used instead of green belt	<ul style="list-style-type: none"> • See response to PO692 in relation to use of brownfield sites including mills.
PO241	Mr Robert Stockley				Green Belt	Object	Erosion of the Green Belt is of primary concern to me, we should protect the green belt at all costs to preserve of Beautiful Biddulph Valley.	<ul style="list-style-type: none"> • See response to PO692 regarding loss of Green Belt.

PO348	Miss Gemma Docksey				Green Belt	Object	RE: ADD03 I am aware of the reduction from the original plans on the Akesmore Lane site (ADD03) from 300 house to 60 whilst this is a more manageable number the placement within the site and access for traffic does need careful consideration. I do believe if this site allocation was to go ahead, access from off the bypass would be a better idea as I have mentioned in my previous comments. The reduction in the housing number for this area I do feel needs further confirmation, what reassurance do we have that this number would not rise again, seeming as the number was reduced with no comment as to why and done before public consultation, are people even aware this was the original plan? Are we to have another consultation if the numbers change again? My other concern is the amount of housing that is being developed in the Gillow Heath Area, bearing in mind we have already had housing developments in the area, Brook Gardens, and Smokies Way for example. I do feel there are other areas of Biddulph which could share the load so to speak, as Biddulph is a "Garden Town" the destruction of our Green Belt is criminal. I understand that we have been allotted this number of houses to be built but I feel that it could be done in a more sympathetic way without marring the beauty of our town.	<ul style="list-style-type: none"> Suitable access to any site is agreed with County Highways. Two further rounds of consultation will take place on the contents of the Local Plan and a hearing in front of an independent inspector before it is adopted.
PO1109	Ann Wright				Green Belt	Object	Why not use brown field sites in Biddulph before using green belt? Like the old pit site which was classed as green belt, was industrial until recently and was stabilized for building on. Unlike the land in Akesmore Lane which may increase flooding in the valley. Brown field sites in Biddulph should also be used before green belt land.	<ul style="list-style-type: none"> See response to PO692 in relation to use of brownfield sites including mills. Sites at Victoria Colliery and Childerplay Road are also within the Green Belt. The Green Belt Review has considered the impact on the Green Belt the release of these sites for development would have. Only the Victoria Colliery site was identified as being suitable for consideration for Green Belt release (in exceptional circumstances). In reaching a decision on which sites to include in the Local Plan, the Council must balance evidence and Government policy.
PO4844	Mrs Harper				Green Belt	Object	Object to building on Green Belt area. Also the impact of additional traffic on an already very busy main road at Knypersley	<ul style="list-style-type: none"> See response to PO692 regarding loss of Green Belt. The Highway Authority has no difficulties with the principle of development in this location. Improvements needed to the road network as a result of development would need to be identified through a Transport Assessment.
PO752	Mr Paul Malkin				Green Belt	Object	Save Biddulphs Green Belt Firstly I would again like to comment that the Councils marketing of this consultation has been extremely poor, it has been left to residents' associations and concerned residents to spread the bad news in their community. As council tax notices were sent to all residents a few weeks prior to the consultation starting then I would have expected the promotion of an important issue like this to have been included in that delivery. I feel SMDC have missed a real opportunity to work in partnership with neighbouring	<ul style="list-style-type: none"> The consultation was widely publicised and included a flyer being sent to all households and businesses in the District through Royal Mail. High levels of responses have been received by the Council from Biddulph residents which suggests that a significant number of residents knew about the consultation. National planning guidance states that the Council should seek to meet the development needs of their area. Stoke on Trent City Council has its own development needs to

							<p>authorities to produce a North Staffordshire plan that could deliver the required housing whilst protecting green belt and identifying brownfield sites to continue to regenerate the area. When I asked if this had been considered at the Biddulph consultation meeting the council officer advised me that this had not been considered as "nobody wants to live in Stoke". I find this attitude from a council officer pretty appalling and if this is the attitude of the planning team then no wonder an innovative partnership approach had not been considered. Stoke have been successfully regenerating and redeveloping brownfield sites in the area for many years and I believe SMDC could learn a lot from their approach. In addition Stoke and Newcastle are where the job opportunities are being created and many residents of Staffordshire Moorlands will travel there for work and leisure and probably would want to live in these areas. The proposed sites for development are not only in green belt areas, but also along the boundaries of existing residents. The sites are going to have a detrimental impact on current council tax payers of the district who purchased properties at an inflated rate due to overlooking beautiful open fields. These residents are not only going to lose their beautiful views but also thousands of pounds from the value of their homes. I propose a number of sites that will have a minimal impact on the green belt and current residents. The Mills in Station Road and Walley Street are in desperate need of repair or regeneration. These could either be developed into apartments for young first time buyers or older persons or demolished and new properties built. This accommodation is far better situated close to the town centre and will keep the area more in keeping of the newer properties around them. There is also old brownfield land available either side of Congleton Road in Knypersley, the former Victoria Colliery site and the land behind Bemersley recycling centre off Childerplay Road. All of these sites have much better access to the main roads than the proposed sites that are all reliant on single track country lanes. What is required locally is housing to meet the needs of local people, there are key issues to address, young people can not get onto the housing ladder and have to resort to renting that can cost more than mortgage payments and there is an ageing population that require housing to meet their needs. What I would expect the planning department to complete before any development plans are signed off is a thorough research project to identify what is actually required locally, what is affordable to the local community and what the mix of starter homes, shared ownership and social rent homes should be. The Housing and Planning Bill has recently been passed and this includes the development of starter homes for first time buyers as part of the affordable housing requirement. These</p>	<p>meet.</p> <ul style="list-style-type: none"> • See response to PO692 regarding loss of Green Belt. • Property values are not considered material in planning law. • See response to PO692 in relation to use of brownfield sites including mills. • See response to PO1109 regarding Victoria Colliery and Childerplay as alternative locations for development. • It is agreed that affordable housing is needed locally. All sites will be required to provide a percentage of affordable housing / starter homes so will contribute to this need. The Council's Strategic Housing Market Assessment provides housing evidence. • See response to PO4844 regarding highways. • Staffordshire County Council are the Education Authority and they look at the need for new schools in an area as a result of development. They consider that a new first school would be needed in Biddulph to accommodate the level of new housing development currently proposed. The location of this school would not be decided until the Council has firmed up its plans as to where the new housing development will take place in the town. (There are 2 options put forward as potential locations for a new school in the Preferred Option Sites and Boundaries Consultation booklet). • Elected members decide on the content of the Local Plan not Council Officers. The plan also undergoes independent examination to allow objectors to have their say in front of an inspector appointed by the Secretary of State.

							<p>homes can be for sale up to £250,000 outside of London. Local salaries of young first time buyers would not make these affordable, SMDC must ensure that affordable homes to purchase are for sale at a price that local people can afford. The type of houses that are required should also be researched, surely the requirement is for smaller affordable homes, 1 bed apartments for singles and couples and older people to downsize to and then 2 and 3 bed homes for young families. I also made a freedom of information request to the district council with regard to the recent development at Uplands Mill in Biddulph asking for the breakdown of owner occupation, shared ownership and social housing and how many nominations had been made for local people to the social landlord, unfortunately this has not been provided in time for me to include this within this response. The reason I made this request was to be able to identify if there was a need for social housing in Biddulph or if the housing association had to widen its search for tenants to the north west, which I believe to be the case. please consider these alternative sites, maintain Biddulph as a rural town, protect the green belt and the interests of longstanding local residents.</p> <p>In addition I support the development of previous Brownfield sites at Victoria Colliery and land behind Bemersley Recycle Centre off Childerplay Road. I believe that these sites should be considered before building properties around the existing properties that benefit from being alongside Green Belt. These residents are your current council tax payers and their interests should be taken into consideration. Schools - although there is a proposed new first school, is there adequate space for these pupils to move into the middle school or will this mean they will just mean larger class sizes that will be detrimental to and affect the education standards. Green Belt review – the land beyond Pennine Way was deemed as inappropriate as it would diminish the boundary between the Biddulph and Biddulph Moor, however building on this site shall have much more of an impact on the boundary of Gillow Heath. I believe that the elected members of Biddulph should make their own decision on what land should be allocated for having and not the council officers and certainly not the developers who are looking for the best land to maximise on their profit.</p>	
PO929 PO925	Mr Robert Stockley Mrs Elaine Stockley				Green Belt	Object	<p>Green Belt: Our government has pledged in its manifesto that Green Belt areas are safe for the next five years. A key commitment in the Conservative manifesto is to prioritise Brownfield development. Key principles of Green Belt designation are to check the unrestricted sprawl of built up areas, to safeguard the countryside from encroachment, to preserve the setting and special character of the area, to carry</p>	<ul style="list-style-type: none"> • See response to PO692 in relation to loss of Green Belt including any exceptional circumstances • The BVW is a very significant attribute in the town and part of a national Sustrans cycle route. 							<p>out urban regeneration by encouraging the recycling of derelict and urban land. According to the Campaign for the Protection of Rural England “Green belts are a buffer between town and countryside. Within their boundaries, damaged and derelict land can be improved and nature conservation is encouraged. Green Belts help with food production, help us tackle the huge challenges of climate change, form part of a nationwide ecological network providing breathing places for people and for nature long into the future. Neighbourhood plans: Under the Government’s pledges, local people are to have more control over the planning of their neighbourhoods and the protection of Green Belt areas. The development of Neighbourhood Plans is there to give more power to local allowing them to play a much stronger role in shaping their area and that local people should have the final say on developments in their town. Our objections: According to the “Local Development Framework” document, sustainable development means “A better quality of life for everybody now and in the future”. Why do we need all these extra houses in Biddulph, when there are so many empty properties in the town. These extra houses will put great pressure on the infrastructure - Medical centres, the sewerage system (already overloaded from current residents and the many visitors to Biddulph Grange Gardens, the Country Park, Biddulph Valley Way, Sports facilities, town centre etc..) and the quality of life for residents through increased congestion and pollution. We are astounded that you are considering a plan for houses and a school on the Green Belt land around Akesmore Lane. We have been told that this Green Belt land has been a last minute amendment to the plan, which suggests that you are attempting to deceive people and go against all the principles of Neighbourhood planning. What are the reasons for adding Akesmore Lane to the plan, Biddulph is known as the Garden town of Staffordshire and yet you are willing to deprive local people and visitors of the beautiful countryside on the boundary of the town, which many people enjoy along the Biddulph Valley Way. You are prepared to disturb the wonderful bird/animal life and nature, which is in abundance there. Has an independent ecological survey been undertaken for this site to show the projected effect of water courses, will life (ironically Akesmore Lane has breeding curlews and lapwings (curlews being the bird shown on the SMDC logo!!) If you check old Ordinance Survey maps, you will see that this area used to be called “Lapwing fields”. You are prepared to locate housing and a school next to the White Cottage, a very rare example of a Staffordshire thatched dwelling and Grade 1 listed. We have been informed at a recent resident’s meeting that Staffordshire Moorlands District Offices are ignoring objections and ideas from our local</p>	<p>to provide pedestrian and cycle links on to it. The Council has produced a Green Infrastructure Strategy and the BVW is identified within this document. It is not considered that development in this location would impact on the enjoyment of the route and long ranging views (e.g. to Mow Cop) and the wider countryside would remain.</p> <ul style="list-style-type: none"> • See response to PO4844 in relation to highways • Ecological assessments of all sites have been undertaken by the Council to assist in determining the most appropriate areas for development. • See response to PO1109 in relation to Victoria Colliery and Childerplay Lane. • The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district’s full housing needs, including affordable housing, whilst taking into account migration and demographic change. • Need for additional housing stems from a number of factors, for example household formation, in-migration, linkages with future workforce, and other factors. The NPPF makes clear that housing projections are the starting point for assessing housing needs; however these additional factors should also be taken in to account in Council SHMAs. The Council’s own housing need assessments are set out in its evidence base on the website. Note that this already takes into consideration empty properties in the Moorlands. • National planning guidance states that the Council should assess the quality and capacity of infrastructure to meet forecast demands. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. It builds on the findings of the Development Capacity Study for the Core Strategy. Consultation and work with infrastructure providers is ongoing and their feedback will inform the Infrastructure Delivery Plan and the Local Plan. The Council is working with the County Council to assess the impact of proposed development on school capacity, what additional capacity is needed and how this can be delivered. • United Utilities has a statutory duty to provide capacity for new development so this is not a valid reason for development not to come forward in Biddulph. • Issues such as overlooking will be assessed in detail once a site layout has been determined at the time a planning application is received and residents will have the

							<p>Biddulph councillors and riding rough-shod over local people's wishes, going against all the principles of Neighbourhood plans. We are also very concerned that objections raised to the plan have so far not been uploaded to the relevant website - is this a ruse on your part to discourage people from making their objections, as well as making the website extremely difficult to locate from the main SMDC site? We believe that the Green Belt area proposed is unsuitable for building purposes, due to the many drift mines and the level of flooding over the last few years. Has there been a technical survey of flooding control in this area? There are extensive Brownfield sites in Biddulph and empty properties, which could be used rather than encroaching onto the Green Belt areas of the town. For example, the Victoria Colliery site has had millions spent on it (presumably from residents' council tax/income tax), so that it could be developed, so surely this would be an ideal option, meeting the government's commitment to prioritise Brownfield development and the aims of Neighbourhood planning. Another Brownfield site might be the Childerplay area, as well as other sites in the town, such as Whally Street, Singer Street, Cross Street, the ground behind the Leisure Centre (for the school), Caravan storage area, behind Chell's Yard. If we are not vigilant, we will be allowing our generation to spoil these Green Belt areas for generations to come. It is a terrible plan, badly presented, unscrutinised and rushed through - please stop now and think what you are doing. Above all, please listen to local people and adhere to the principles of Neighbourhood plans and the Government's commitment to Green Belt areas.</p>	<p>opportunity to comment on the content of that application. Problems arising from the construction period of any works, e.g. noise, dust, construction vehicles, hours of working (covered by Control of Pollution Acts) are not material planning considerations nor is the possibility of noise from the school or parking issues.</p> <ul style="list-style-type: none"> • The Local Plan production process, by its very nature, involves several stages of consultation at which point anyone can suggest further sites for inclusion in the plan and the Council decides on whether they are appropriate. This site was suggested as part of the site options consultation. • Heritage impact assessments of all sites have been undertaken by the Council to assist in determining the most appropriate areas for development. • The comments made online on the Council's consultation portal will all be uploaded for public viewing at the same time. • There was a link to the consultation portal from the SMDC website homepage throughout the consultation. • Coal Authority records of all sites have been viewed by the Council to assist in determining the most appropriate areas for development. • Flood plain and drainage information of all sites has been provided by statutory consultees (the Environment Agency and the Lead Local Flood Officer) to assist in determining the most appropriate areas for development. • See response to PO692 in relation to use of brownfield sites – including mills. All sites listed have been investigated and those which are available have been included in the plan.
PO10242	Mr R Hart				Green Belt	Object	The green belt should be protected for the future generations to enjoy. Even David Cameron [and Sybil Ralphs] said it should be protected.	<ul style="list-style-type: none"> • See response to PO692 regarding loss of Green Belt.

Question 23 – Do you have any other comments to make regarding Biddulph? (Comments on Green Belt)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO6598	Councillor H Sheldon				Green Belt	Object	I wish to inform you of my objection to the use of green belt land for housing in Biddulph. I believe the number of houses proposed is too high as they are unsustainable due to lack of both existing and proposed employment land. This increases travel to work for residents and impacts greatly on the environment in respect of carbon emissions. The building of housing in Biddulph should be prioritised to Brownfield sites which can be compulsory purchased to provide the land necessary, e.g. former mill sites. Developing these sites would regenerate the Town and improve the ascetic look of the area. The needs of the existing community are not currently met with a deficit of open public space and children’s play areas. Faculties for young people are also in short supply there are few youth clubs or organised support. Medical facilities i.e. doctors lists are over subscribed. This also applies to education with school places in short supply. There is a lack of retail facilities in the town with one supermarket meaning most resident have to travel to source necessities which are unavailable locally. The transport infrastructure is inadequate currently and increased housing will exacerbate this issue. Public transport to the north finishes at 6.00pm leaving workers reliant on their own transport or taxis, public transport to Biddulph Moor ceases at 5.00pm stranding workers and children staying for after school clubs. Biddulph’s essential character would be compromised if new housing is built onGreenfieldspace, it is preferable to develop unsightly Brownfield sites and provide these developments with the infrastructure and services needed to thrive.	<ul style="list-style-type: none"> • See response to PO692 regarding loss of Green Belt. • The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. The Council has prepared a Strategic Housing Market Assessment to assess the district’s full housing needs, including affordable housing, whilst taking into account migration and demographic change. • New employment areas are also proposed for Biddulph in the draft Local Plan. • See response to PO692 in relation to use of brownfield sites – including mills. • The Council has commissioned a new open space study to update the position on which areas have a surplus and deficit of open space and children’s play areas. This will inform the Local Plan and has been published alongside the latest draft of the Local Plan. • See response to PO929 regarding infrastructure including medical facilities. • The Council’s Retail Study (published in 2013) recommends that the Council allocate a site to accommodate a discount foodstore to provide more choice for local shoppers as currently Sainsburys is the only large supermarket in the town. Evidence suggests that a high proportion of Biddulph residents still shop out of town for their main food shop and it is considered that a greater choice of supermarkets would help to reverse this trend. • Public transport services are the responsibility of the County Council and provision of them is outside the remit of the Local Plan.
PO6745	Mr Stephen Dobbs				Green Belt	Object	I have lived in and around biddulph all of my life and in my 51 years I have seen considerable development in the Biddulph valley. I am convinced that the council and developers will not rest until they have completely built on every scrap of greenery in the valley. I absolutely object to any development on green belt land and especially the new proposed site on Akesmore Lane which has recently been added. I believe any such development on green belt land is just the thin end of the wedge and once begun it will pave the way to complete development of all the green belt in the valley. Development of Greenbelt land will reduce the quality of life for everyone who lives in Biddulph apart from the developers, speculators and others looking to profit from the development. I also consider that there is absolutely no need for any further housing in the local area. The councils and governments major concern should	<ul style="list-style-type: none"> • See response to PO692 regarding loss of Green Belt • The National Planning Policy Framework requires that local planning authorities identify the objectively assessed need for housing in their areas, and that Local Plans translate those needs into land provision targets. 							<p>be the development of a stable population size, not uncontrolled and unsustainable and irresponsible population growth and that policies should be adopted which encourage this. If housing is required as a result of councils / government being unable to control population then they should firstly look at bringing second homes and holiday homes back into the mainstream housing market and then as a last resort development of brownfield sites. Biddulph should not be allowed to become one huge estate providing cheap housing for Cheshire and Staffordshire commuters. The charm and uniqueness of the town should not be further denegated and since I am sure there are considerable sums of money to be made by the further development of the town, the developers, speculators, vultures and others seeking to gain should not be allowed to profit and reduce the quality of life for Biddulph residents. In addition to my above objections I must also point out that Biddulph does not have the transport infrastructure to cope with any further development. The roads out of Biddulph via Mow Lane (until recently) and Akeshire Lane have been allowed to lapse into a terrible state of repair with a considerable number of potholes which rendered Akeshire Lane almost impassible in a car. If the council is unable to maintain roads with the current number of vehicles then I dread to think what things would be like with even more vehicles on the roads as a result of building more houses. Also the only road out of Biddulph leading direct to the potteries is often congested especially around Knypersley traffic lights and now increasingly by the site of the business development which has taken place on the Knypersley Vics site. I dont believe any Biddulph residents would welcome further increases in their journey times to get to the potteries or to travel in any other direction out of Biddulph but this is precisely what will happen if there is any further housing development. I trust these comments and objections will be taken on board before the council decides to continue with the proposed plans and I look forward to receiving any comments you may have.</p>	<p>firmed up its plans as to where the new housing development will take place in the town. (There are 2 options put forward as potential locations for a new school in the Preferred Option Sites and Boundaries Consultation booklet).</p> <ul style="list-style-type: none"> • See response to PO692 regarding using brown field land first (including mills) • See response to PO929 regarding Impact on BVW / Visual impact • See response to PO929 regarding residential amenity - disturbance from building work / noise from school / parking during school drop-off and pick-up times • See response to PO4844 regarding highways

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO6274	Mr P Squires				Green Belt	Object	As a resident for 52 years in Biddulph North you have to respect why Green Belt areas have been put into place. There is a good reason it's unspoilt and provides stability, I see this land every day the wildlife corridor that runs along the return of the wild ducks Canadian geese recent years have seen the buzzards return so why would you want to destroy Biddulph North with new build out of character unneeded housing. Do you not realise that the houses in the area (Green Belt) are on septic tanks and the field is the runoff area. BD087 Green belt is also the nearest flood plain field to the brook also for a good reason. It's a farmer's field through June, July, Aug and Sept, it has cows grazing question. Why haven't any houses been built on the Old Forge Colour works isn't it time that land has been available. Can our town cater for what you propose? The schools are full. First you have to provide the necessary High and extend primary schools. Why not look at regenerating Brindley Ford new school for housing. Don't destroy our town or you will lose the very people who use it most green belt land BD087 is listed as fairly low risk flood plain it is currently an important site for the water run off directly into the brook. With Congleton edge high ground directly opposite its natural route to end the water run-off.	<ul style="list-style-type: none"> See response to PO692 in relation to loss of Green Belt. Ecological assessments of all sites have been undertaken by the Council to assist in determining the most appropriate areas for development. Flood plain and drainage information of all sites has been provided by statutory consultees (the Environment Agency and the Lead Local Flood Officer) to assist in determining the most appropriate areas for development. Please see the table for Question 19 BD087 for site specific responses. The Forge Colour Works has planning permission for housing already and has been included within Biddulph's housing figures. See response to PO929 in relation to infrastructure (including medical and schools). See response to PO752 in relation to building outside the District (Brindley Ford).
PO6269	Mrs S Bennett				Green Belt	Object	Green belt should remain Green Belt Road Structure inadequate Road safety compromised	<ul style="list-style-type: none"> See response to PO692 in relation to loss of Green Belt. See response to PO4844 regarding highways.
PO6752	Mrs J Siales				Green Belt	Object	Green Belt should remain unless exceptional circumstances exist and no other viable options apply this clearly not the case in this instance? There are no very exceptional circumstances to warrant inclusion into Green Belt, therefore alternative sites should be considered as they do exist.	<ul style="list-style-type: none"> See response to PO692 in relation to loss of Green Belt. See response to PO692 in relation to use of brownfield sites – including mills. See response to PO1109 regarding Victoria Colliery and Childerplay as alternative locations for development.
PO9961	Miss M Underwood				Green Belt	Object	It is unacceptable to build on Green Belt sites when there are so many brownfield sites that could be used. The Green Belt is vital for biodiversity. Connectivity of natural areas is needed for wildlife to survive and bring essential ecosystem services to us all. Biddulph does not need this many new properties. Once Uplands Mill is completed it will be clear how difficult it will be to sell properties hemmed in on every side with no greenery. There are 44 units of affordable housing already on Uplands Mill. I do not believe that these will be allocated to young people from the Biddulph area which will result in allocations being made to people from outside the area. This will not help Biddulph at all due to high turnover due to rented properties being continually vacant as new tenants leave due to them wanting to move back to areas they are from. The roads into Biddulph from Chell and Congleton are terrible and cannot support the current volume of traffic. All the roads need resurfacing as they are crumbling under the weight of all the cars. All the new properties will be allocated or sold to people out of the Biddulph area (as there is not sufficient demand	<ul style="list-style-type: none"> See response to PO692 in relation to loss of Green Belt. See response to PO692 in relation to use of brownfield sites – including mills. See response to PO1109 regarding Victoria Colliery and Childerplay as alternative locations for development. Ecological assessments of all sites have been undertaken by the Council to assist in determining the most appropriate areas for development. 							within the town itself) which means that the 1600+ cars that will be in Biddulph due to the 800 new properties will all go out of the town daily to work elsewhere. This will cause more damage to the roads but will not bring any more income or wages into Biddulph as people will spend them mainly in the area where they work.	
PO7574	Mr Peter Turner				Green Belt	Object	<p>Relating to ALL Green Belt incursion proposals, SMDC has arbitrarily (i.e. not based on evidence of need, demand, and availability of developable land outside of the Green Belt) set local development targets based on a percentage allocation scheme. This mechanism does not recognise the intended permanence of Green Belt as defined within the National Planning Policy Framework (NPPF). Nor does this method withstand the tests for allowing development in the Green Belt thereby not demonstrating exceptional circumstances. On this basis the inclusion of Green Belt within the Local Plan will be challenged. It is also known that SMDC has identified developable land outside the Green Belt elsewhere within Staffordshire Moorlands, which, as directed by the NPPF, must be prioritised to be developed prior to removing any land from the Green Belt. On this basis the SMDC Green Belt review will be challenged. Developing Green Belt within Biddulph will add to urban sprawl, which is a key motive of protection of the Green Belt within the NPPF. The detail of this submission will be shared with elected members and the media. It is noted within the NPPF Paragraph 79 - SMDC failure to recognise permanence, openness or risk of urban sprawl The government attaches great importance to Green Belts. The fundamental aim of Green Belt policy is to prevent urban sprawl by keeping land permanently open; The essential characteristics of Green Belts are their openness and their permanence. Paragraph 80 - SMDC failure to protect against urban sprawl, to protect countryside against encroachment, in urban regeneration as other sites demonstrated as developable within the borough. Green Belt serves five purposes: ● to check the unrestricted sprawl of large built-up areas; ● to prevent neighbouring towns merging into one another; ● to assist in safeguarding the countryside from encroachment; ● to preserve the setting and special character of historic towns; and ● to assist in urban regeneration, by encouraging the recycling of derelict and other urban land. Paragraph 81 - SMDC failing to plan positively to enhance positive use of Green Belt, retain and enhance amenity and biodiversity, also failing to improve damaged or derelict land. Once Green Belts have been defined, local planning authorities should plan positively to enhance the beneficial use of the Green Belt, such as looking for opportunities to provide access; to provide opportunities for outdoor sport and recreation; to retain and enhance landscapes, visual amenity and biodiversity;</p>	<ul style="list-style-type: none"> • The Council’s Green Belt Review acts as its evidence base for changes to the Green Belt in the Staffordshire Moorlands. • The 20% figure – Biddulph’s share of the District housing requirement - is set out in the Council’s Core Strategy, a planning document which has been through consultation and an examination by an independent inspector.

Question 23 – Do you have any other comments to make regarding Biddulph? (Comments on Green Belt)

							<p>or to improve damaged and derelict land. Paragraph 83 - SMDC failure to demonstrate exceptional circumstances as other sites available in the borough outside of the Green Belt. Arbitrary approach to percentage allocation will be challenged. Failure to recognise the intended permanence of Green Belt. Local planning authorities with Green Belts in their area should establish Green Belt boundaries in their Local Plans which set the framework for Green Belt and settlement policy. Once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of the Local Plan. At that time, authorities should consider the Green Belt boundaries having regard to their intended permanence in the long term, so that they should be capable of enduring beyond the plan period. Paragraph 84 - SMDC to channel development within draft Local Plan to urban areas or areas outwith the Green Belt. When drawing up or reviewing Green Belt boundaries local planning authorities should take account of the need to promote sustainable patterns of development. They should consider the consequences for sustainable development of channelling development towards urban areas inside the Green Belt boundary, towards towns and villages inset within the Green Belt or towards locations beyond the outer Green Belt boundary. Paragraph 87 - SMDC failure to demonstrate very special circumstances as land outside the green belt available for development elsewhere within SMDC area. As with previous Green Belt policy, inappropriate development is, by definition, harmful to the Green Belt and should not be approved except in very special circumstances. Paragraph 88 - SMDC failure to demonstrate very special circumstances as previously outlined. When considering any planning application, local planning authorities should ensure that substantial weight is given to any harm to the Green Belt. 'Very special circumstances' will not exist unless the potential harm to the Green Belt by reason of inappropriateness, and any other harm, is clearly outweighed by other considerations. Paragraph 89 - SMDC have not demonstrated or evidenced any of the requirements as detailed in this paragraph. A local planning authority should regard the construction of new buildings as inappropriate in Green Belt. Exceptions to this are:</p> <ul style="list-style-type: none"> ● buildings for agriculture and forestry; Achieving sustainable development 21 ● provision of appropriate facilities for outdoor sport, outdoor recreation and for cemeteries, as long as it preserves the openness of the Green Belt and does not conflict with the purposes of including land within it ● the extension or alteration of a building provided that it does not result in disproportionate additions over and above the size of the original building ● the replacement of a building, provided the new building is in the same use and not materially larger

							<p>than the one it replaces ● limited infilling in villages, and limited affordable housing for local community needs under policies set out in the Local Plan; or ● limited infilling or the partial or complete redevelopment of previously developed sites (brownfield land), whether redundant or in continuing use (excluding temporary buildings), which would not have a greater impact on the openness of the Green Belt and the purpose of including land within it than the existing development.</p> <p>Paragraph 90 - SMDC have not demonstrated or evidenced any of the requirements as detailed in this paragraph. Certain other forms of development are also not inappropriate in Green Belt provided they preserve the openness of the Green Belt and do not conflict with the purposes of including land in Green Belt. These are: ● mineral extraction; ● engineering operations; ● local transport infrastructure which can demonstrate a requirement for a Green Belt location; ● the re-use of buildings provided that the buildings are of permanent and substantial construction; and ● development brought forward under a Community Right to Build Order. Inclusion of the green Belt will be challenged on all of the above NPPF Paragraphs.</p>	
PO5249	Kyoko Boll				BD134 BD110 BD067 BD067 a BD067 b BD067 c	Object	<p>While I am living in the area, on the site of BD134, according to the latest proposed sites as far as I saw, the BD134 has been disappeared. However, I have not received any nor heard any confirmation what site plans of housing development at these allocated sites. Where sites BD067a, BD037b, BD067c were abandoned and that any houses in areas will not be built or developed. I would like to propose again that I strongly object to the plan of housing developments in these areas. I mentioned above in the future. I object to the plan to build houses at the areas BD134, BD110, BD067, BD067a, BD067b, BD067c.</p>	<ul style="list-style-type: none"> Comments noted.
PO10246	Mr R Hart				BD067 a -c	Object	<p>Comments on proposed housing allocation in biddulph...i feel that sites bd067a/b/c should have reduced housing allocation.</p>	<ul style="list-style-type: none"> No housing allocation is included in the Preferred Sites and Boundaries Document (April 2016) for these sites.
PO4860	Mr Chris Millington				BD067 a, b, c, BD110 BD134	Object	<p>BD067a, b, c, BD110 BD134 are too close to the Biddulph Moor Boundary and therefore need to remain in the Green Belt.</p>	<ul style="list-style-type: none"> No housing allocation is included in the Preferred Sites and Boundaries Document (April 2016) for these sites.

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO4620	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			ADD02	Object	ADD02 - This site has been recommended via the last consultation and should be further investigated. Recommendation TBD.	Land at Brindley Ford – This land is outside the Staffordshire Moorlands within Newcastle Borough. Newcastle Borough Council has been asked whether they would consider development on the old minerals sites within their boundary to meet Staffordshire Moorlands housing requirements. The feedback received in response to this has been negative. Also, circumstances have changed since last year and it is considered that the District can meet its own development needs without using land outside its boundary.
PO7364	Mr John Hayley				Green Belt / Other Suggested Sites	Support	<p>I support the use of reclaimed land and brown field land for housing (NPPF paragraph 111). I also strongly support the Campaign to Protect Rural England (CPRE) planning strategy of “brownfield first, greenfield last” and hence wish to discourage inappropriate use of greenfield land in and around Biddulph. I am opposed to greenfield development for housing within the Green Belt. I am also deeply opposed to proposed developments such as Sites ADD03, ADD04 & BD063a which would require inappropriate changes to Green Belt boundaries and which would cause extensive encroachment into Biddulph’s surrounding beautiful open countryside. However, I would support housing development and housing site allocation at the following sites: - [BD101, BD102] A strategic redevelopment of the town centre near to the war memorial in the region known as “mill triangle” bounded by the A527, Walley Street, Cross Street, and Congleton Road. This could and should be a high density housing development because of its proximity to the town centre. A well planned and well designed development at this location could provide significant enhancement to Biddulph’s prosperity and to Biddulph’s town centre. - Redevelopment of the former Albion Mill, a disused 3-storey building in Station Road - Re-designation of “green belt” status of reclaimed land to the west of Victoria Business Park (part of the former colliery site, Victoria Colliery). Redevelopment of this site for potential housing allocation. - Redevelopment and new development on brown field land in the vicinity of Childerplay Lane - Relocation of some land for employment use from Site BD117 to Childerplay Lane (potentially to enable increased housing allocation to be located at Site BB117) - [ADD02] Redevelopment of Site ADD02 (near to Brindley Ford) for productive use, including potential use for housing. [I strongly disagree that this land requires green belt protection and with the assertion that this land makes a “significant contribution to green belt purposes”]. I would also support any proposal that the SMDC planning department should do a full feasibility study concerning use of reclaimed open casting land and land forming part of the former Victoria Colliery to the west of Victoria Business Park.</p>	<p>Minster Mill and Yarn Mill are recommended as allocations in the next stage of the Local Plan (subject to outcome of Council Assembly).</p> <p>Allocations need to be for a minimum of 10 dwellings in the towns. Albion Mill is too small and could come forward independently of the plan as a windfall. Biddulph Town Council’s Masterplan is considering this area and this could assist in bringing the site forward. There is clearly developer interest as this is reflected in the planning history.</p> <p>Former Victoria Colliery Land – Although the Green Belt Review recommends that this land could be released if exceptional circumstances were demonstrated and the landowner is willing to release the land for development, there are other factors to consider. The site is located on the southern edge of the town some distance from the town centre and is not recommended for taking forward into the Preferred Options Local Plan due to:</p> <ul style="list-style-type: none"> An alternative Green Belt site exists adjacent to Wharf Road which will assist with bringing forward a large strategic mixed use regeneration site which is well related to the town centre and its key services and facilities. <p>Land at Childerplay Lane (old Council tip site), Land East of Childerplay Road and Former Quarry off Tunstall Road / Bemersley Road – The Green Belt Review does not recommend releasing these areas of land from the Green Belt.</p> <p>Relocating employment land from BD117 to Childerplay Lane to accommodate more housing – This is not recommended for the reasons above – the sites are not recommended for release from the Green Belt. The</p>

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
								employment land is needed to meet the needs of the town over the plan period and it is considered that BD117 is the best location to accommodate this need. See response to PO4620 re: land at Brindley Ford.
PO279	Mrs Judith Cottrell				Other Suggested Sites	Support	There are two sites in the south of the Biddulph area which would be suitable for new housing, one being the old Victoria Colliery site which has been treated and cleared for housing and also the Childerplay Road site, which again is suitable for housing purposes.	Refer to PO7364 (above).
PO1084	Mr and Mrs C.B. Dodds				Other Suggested Sites	Object	Build houses on Victoria Colliery and Childerplay Road sites	Refer to PO7364 (above).
PO1028 2	Cllr Chris Wood				Other Suggested Sites	Object	I have suggested the old Victoria colliery site which I believe would accommodate a large number of the housing requirements and not cause distress in terms of incursion into the green belt most of the collieries in North Staffordshire have been built on for housing so why not Victoria colliery it would enhance the area and have good access to the A 527. Also the site at Childerplay Lane which is reclaimed land should be bought into use for either housing or commercial use , I do strongly object to incursions into green belt but also understand the need for a 5 year housing plan but the sites put forward are illogical and ill thought out.	Refer to PO7364 (above).
PO500	Mr Denver Johnson				Other Suggested Sites	Object	Alternative sites - there is a huge area of reclaimed land from the old Victoria colliery at the South West end of Biddulph with easy access from the A527 and simple integration into the rest of the area. Over the road from there, is another former industrial site (formerly an old steel mill) South East of Biddulph off Childerplay Road with equally excellent access and good views. The old Bemersley Road council tip site also adjoining Childerplay Road is due for closure since it's operations are to be moved to a new Chatterley-Whitfield site, would be open for future development.	Refer to PO7364 (above).
PO956	Mr Alistair McLoughlin				Other Suggested Sites	General comment	BD004 (15 dwellings) Brownfield Development Within residential boundary Land owner believed to be supportive of inclusion. Biddulph Town Council supports. Not proximate to the sewerage treatment works, therefore less of a public health risk. BD101 (24 dwellings) Brownfield Development Within residential boundary Land owner believed to be supportive of inclusion Biddulph Town Council supports Not proximate to the sewerage treatment works, therefore less of a public health risk. BD102 (42 dwellings) Brownfield Development Within residential boundary Land owner believed to be supportive of inclusion Provides similar number of units developed without environmental and highways impacts Biddulph Town Council supports. Not proximate to the sewerage treatment works,	BD004 is inside the town development boundary but there are highway and ownership constraints. Access is off City Bank and requires visibility over third party land. There can be no intensification of use of this access without a visibility improvement. There is no certainty over the land owner – a large part of the site is unregistered and the part that is registered, the owner has not made contact with the Council despite being sent several communications. Although for these reasons, this site is not recommended as an allocation, as it is not in the green belt it could still come forward if the

PO4621	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Other Suggested Sites	Object	Site adjacent to Victoria Business Park - This site has been recommended by Cllr Wood and should be investigated. At recent public meeting this site was met with approval. Recommendation TBD.	Refer to PO7364 (above).
PO4623 PO10229	Biddulph Neighbourhood Plan Working Mr Graeme Court	Biddulph Neighbourhood Plan Working Group			Other Suggested Sites	Object	Chell's Builders' Yard and land down to bypass roundabout. This site needs investigation in conjunction with the Mill triangle. Recommendation for inclusion.	Refer to PO956 and PO7364.
PO4624	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Other Suggested Sites	Object	Land adjacent 71/71a, Woodside Farm - Land available, next to proposed acceptable site, close to town centre, easy access via already proposed site. No neighbouring property. Needs investigation and consultation. Recommendation TBD.	East of Woodside Farm - The Council has investigated this area. It is considered suitable for release from the Green Belt if exceptional circumstances can be demonstrated. Appropriate access could be achieved according to the Highway Authority. Investigations so far have concluded that an access across the Biddulph Valley Way would be desirable and no utilities constraints have come to light at the time of writing. Therefore, this site has been recommended for inclusion in the Staffordshire Moorlands Preferred Options Local Plan (subject to outcome of Council Assembly).
PO4625	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Other Suggested Sites	Object	Newpool Rd Caravan site – Brown field, why not? Recommendation TBD.	Newpool Road Caravan Site - Although this site is considered suitable for release from the Green Belt under exceptional circumstances, it is difficult to justify exceptional circumstances for release from Green Belt of such a small site. An alternative site exists which will help to bring forward a key regeneration area in a central part of the town so land on this site is not needed.
PO4626	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Other Suggested Sites	Object	Brown Lees Chapel - Site for 4 dwellings either within existing building or new builds. Recommendation TBD.	Brown Lees Chapel - Too small for an allocation. Could come forward independently from the plan as it is within the development boundary.
PO4627	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Other Suggested Sites	Object	BD109/118/ Land off Brook St - Alternative to BD063a? Recommendation TBD.	Land off Brook Street - This area was included in the Site Options Consultation. However, it was then assessed as part of the Green Belt Review and not considered suitable for release from the Green Belt.
PO4628	Biddulph Neighbourhood Plan Working	Biddulph Neighbourhood Plan Working Group			Other Suggested Sites	Object	BD144 West of Towerhill Road - Possible alternative to BD063a? Recommendation TBD.	Land off Towerhill Road - This area was included in the Site Options Consultation. However, it was then assessed as part of the Green Belt Review and not considered suitable for release from the Green Belt.

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO4970	Mrs R Knapper				Other Suggested Sites	Object	Suggested sites the old Victoria colliery, Childerplay Road, derelict Mill Station Road	Refer to PO956 and PO7364.
PO4969	Mr R Booth				Other Suggested Sites	Object	I just cannot understand why the SMDC are proposing to build new developments in Biddulph on Green Belt land when there are derelict areas in the Town that are being overlooked. Buildings and factories which have been left to decay and are very unsightly after years of neglect I propose that these areas should be seriously taken into account and considered for the new build and derelict sites as they are is common sense? The sites that I propose in place of the proposed Green Belt sites are: Station Road area/Cross Street, Stringer Street, Whalley Street, The old Victoria Colliery Site.	Refer to PO7364.
PO4968	Mrs M Booth				Other Suggested Sites	Object	When considering the new development for the enhancement for the new builds in Biddulph. I SMDC to firstly consider the areas of Brownfield Sites. The derelict site that houses a disused factory in Station Road. The derelict factory in Cross Street which is the old Standards Factory (this would be ideal for Aldi or Lidl supermarket which would keep the towns community shopping within the High Street. A huge housing development could be proposed on the old Victoria Colliery site which would enhance the entrance into the entrance to the moorlands which I am sure that the council will agree should be upheld. No one is objecting to this new development but we must protect out valley are surrounding but we must protect our valley and surrounding areas, protecting our wildlife as well.	Refer to PO7364.
PO5358	Mr D Heath				Other Suggested Sites	Support	Building to the west side also closer to the Chatterley Whitfield site understood to create 2100 jobs. Being able to walk via the railway line.	Refer to PO4624.
PO5724	Mrs Eileen Smith				Other Suggested Sites	Object	Feel that the available Brown Field site should be seriously looked at as building sites, including Old Mills that are practically derelict and Victoria Colliery land, and Childerplay Road area – and similar. Also attached letter dated 9/9/2015 addressed to Mr D Plant which illustrates the problems that are inherent on the, and the approach (and lack of safety etc.) surrounding this particular area.	Refer to PO7364.
PO5825	Mr Christopher Slater				Other Suggested Sites	General comment	Objection's 1 to 4 houses should be built on Victoria Colliery + Childerplay Road sites	Refer to PO7364.
PO5981	Mr P Price				Other Suggested Sites	Object	Being a Brownfield Site Victoria Colliery should be considered as should all the Brownfield sites before Green Belt is even considered. Why do we need so many houses when we have so many unoccupied in this area? I don't trust the figures.	Refer to PO7364.

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO5993	Mrs L Price				Other Suggested Sites	Object	While I no objection to the principle of extra housing in the Biddulph Valley. I do strongly object to Green Belt being used before all brown sites have been developed e.g.: The Victoria Colliery Site, Jackson Garden Nursery, Minster Mill, Whalley Street etc. The recent developed Selectus Site still has so many unsold properties so will other large developments be the same. There have been so many contrary figures are produced by various parties is it all misinformation? Who does one trust?	Refer to PO7364. Former Jackson's Nursery is already included as a Local Plan allocation.
PO6756 PO6257 PO6498 PO6755 PO6478 PO6261 PO6271 PO6775 PO6776 PO6771 PO6258 PO6206 PO6512	Ms Barbara Griffiths R Hutton Mr K Wilshaw Mr C Kirkham Mr Gilbert Bradley Mr B.W. Newton Mrs J M Slater Mr J Banister Mrs J Banister Mr R Bradbury Mr G Price Mrs P Newton Mr S Wilshaw				Other Suggested Sites	Object	Build houses on Victoria Colliery and Childerplay Road sites objections 1-4	Refer to PO7364.
PO6270	Mr A Hague				Other Suggested Sites	General comment	To protect Green Belt potential development could include the mills close to the town centre, the old Victoria Colliery and the lad off Childerplay Road anyone with a brain larger than a field mouse would not build houses on site BD068, this is just another trick to get more social housing by the government and tory council as the old Selectus site. I own 3 properties in Marsh Green Road and would not agree to any land fronting Marsh Green Road being taken for developments.	Refer to PO7364. Refer to Question 19 site table BD068.

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Objct/General	Consultee Comments	Officer Response
PO7383	Mr Nigel Yates				Other Suggested Sites	Support	<p>Support the alternative sites for housing which are listed below: A012 - redundant and under-utilised buildings around Congleton Rd/Cross St/ Stringer St/ Walley St and Station Rd. (photograph attached) This is a brownfield urban site which requires regeneration and redevelopment, existing businesses could be re-located within a mixed use development of affordable starter homes and business units, similar to the development in Fairfax Close opposite the site - this is an area of the town that is constantly referred to by Biddulph Residents as a reason to object to ANY greenfield development;</p> <p>A017/A019 - Derelict farm buildings and Pottery on Mow Lane, Gillow Heath (photograph attached) This is small but significant site within the greenbelt, but consists of two areas of dereliction either side of Mow Lane, this would be ideal for an "Executive Home/ Barn Conversion to produce 8 - 12 quality units, the development of which would remove a crumbling eyesore, and allow for footpath instigation on this section of Mow Lane. The footprint of the plot would be within the "brown" land with current trees being retained as a screen;</p> <p>A020 Land North of Woodhouse Lane, between Woodhouse Middle School and Woodhouse Farm (photograph attached) A small but significant parcel of land about the same size as Newpool which has excellent connectivity to the A527 via Woodhouse Lane, local schools and shops on Smithy Lane/Congleton Rd. Considering the land lost off Pennine Way, this would be the only development within this sector of Biddulph North; A032 Change of status from Mixed Use to Affordable Housing (photograph attached) This site was originally allocated to Mixed Use - business and housing, the close proximity to Victoria Row and Mill Hayes recreational area and the potential primary school at A050/A051 would render the site eminently more suited to 100% housing, this would be a far more acceptable proposition, with business being reallocated to the poor land at A036/A036a A036/A036a Childerplay Lane and Quarry (photograph attached) This area, although currently designated as greenbelt, is the old industrial centre of Biddulph South, on both sides of the road straddle the old Whiston Slag Company, discharged with disposing and processing iron ore slag from Robert Heath's iron works and latterly on the south side, an opencast coal mine. As a consequence, the land quality is very poor. I would propose that the northern side of the road is utilised for open air business use - re-locating the hauliers from Wharf Road in Biddulph Town, whilst the southern side bordered by Bemersley Road from "The Matador" is used as a business industrial estate; A043 Victoria Colliery Site (photograph attached) This site was promoted during and after the opencast and subsequent land reclamation as mixed</p>	<p>Refer to PO7364 (Mills, BD117, Childerplay Lane and Quarry, Bemersley Road, Victoria Colliery).</p> <p>Derelict Farm buildings on Mow Lane – Not suitable for allocation - In the Green Belt and open countryside – does not directly adjoin the town boundary. Could possibly be developed under existing NPPF policy if brownfield and new development not having a greater impact on openness of Green Belt than what is already on the site.</p> <p>Land north of Woodhouse Lane – Green Belt. Considered in SHLAA but C Class due to potential impact on Registered Park and Garden and National Trust property. For this reason, the site was not a site option.</p> <p>Site Adjacent Victoria Court, Brown Lees - Allocations need to be for a minimum of 10 dwellings in the towns. This is too small and could come forward independently of the plan as a windfall.</p>

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
							<p>business and housing with a significant public open space together with an improved former railway trackbed into the Biddulph Valley Way NCR55 - little of this has happened. The fields within the SMDC boundary adjacent to the A527 can provide a significant number of housing, the BVW NCR55 could be metalled and made into a safer route to the town centre and Brown Lees, whilst servicing a Primary School built on land at A050/A051 below. A047 Site adjacent Victoria Court, Brown Lees Rd, Brown Lees (photograph attached) A small site that could mirror the Victoria Court Apartments on Brown Lees Rd which would have good links to A527, the BVW NCR55 and new primary school at Brown Lees. A050/A051 Alternative site south and parallel to Brown Lees Rd west of BVW NCR55 (photograph attached) This is a potentially large site with excellent access to Brown Lees Rd at the head of the BVW NCR55, leading up to Brook St, if the site incorporates the unmodernised farm and outbuildings at the western head of the site. The site is large enough - especially with the potential of building a school and providing playing fields on NuL Administered Land adjacent to the site. Access could also be considered opposite Lyneside Road aside the Gardener's Arms Public House. Both myself and Councillor Chris Wood have put a lot of thought and effort into meeting the housing allocations, and request that you give due consideration to the above suggested alternative sites, that we feel would be more readily accepted by the residents of Biddulph.</p>

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO9268 PO9265	Mr Lee Dawkin	Renew Land	Mr Ben Weatherley	Knights LLP	Other Suggested Sites	Object	<p>(Summary of comments - full comments attached) Would like to see the inclusion of a larger area immediately adjacent to site BD063a in the Local Plan as well as site BD063a (map attached). Reasons are: Delivery of additional dwellings should have a significant positive effect - the site is accessible to existing services, facilities and areas of employment; The site's district ecological importance is considered to have a negative effect, but the Phase 1 Habitat Survey (attached) demonstrates that there are no features of ecological interest that preclude the residential development of this site; Reference is made to the site's development having a significant negative effect as a result of it comprising greenfield, grade 3/4 agricultural land. However, there is a good supply of grade 3/4 land in the vicinity and furthermore the site has limited potential for agricultural purposes as a result of its size and shape and the proximity of existing dwellings; No major improvements would be required to deliver an acceptable access to serve housing development on the site in a safe manner. (see attached technical note); The land is not highlighted as significant in the Council's Landscape & Settlement Setting Assessment and the Council comments within the Options Site Assessment that it is not considered that development of this particular site would be out of proportion with its surroundings; Disagree with the results of the Green Belt Review - it is considered that the impact of the combined site's development on the Green Belt would not be significant when considering the fairly limited depth of the site (which is just part of the wider areas of land assessed in the Green Belt Review) and how its development would form a logical extension to the ribbon of existing development along its southern boundary. The indicative site layout (attached) also demonstrates the potential to provide a defensible boundary along the northern edge of the site, which would discourage urban sprawl/further encroachment into the Green Belt; both the developer and LPA could focus and take care at planning application stage to ensure that the final form and layout of development would ensure it has an acceptable impact on the Green Belt. It is considered that these factors would limit the impact of the site's development on the Green Belt; The combined site the subject of these representations is in a more accessible and sustainable location, in much closer proximity to the town centre and most of the main existing and future sources of local employment and other local amenities than some of the other proposed housing allocations, including some that would also require amendments to the Green Belt. This is particularly the case in comparison to the preferred housing allocation references BD062, BD068 and BD087 which are all located at the northern edge of Biddulph. It is considered that the enhanced sustainability of housing</p>	<p>The land is Green Belt.</p> <p><u>Green Belt Review (Site 3 – 2016)</u></p> <p>The site is on gently rising land to the rear of Newpool Road and as such presents relatively limited visual intrusion and hence limited impact on openness, but has no significant outer boundary with which to contain development. The site appears to seek to 'round off' the settlement edge in this location between Tower Hill Road and Newpool Farm, but in so doing cuts across fields and in only one instance uses a recognisable field boundary. In addition, the site does not abut existing development off Meadowside, leaving a remnant field. Not recommended for release due to the absence of a clear outer boundary with which to properly contain development, thus preventing localised sprawl. More modest rounding-off to the east of the site could be considered, using a farm track as a boundary to development.</p> <p>For the above reason, this land is not recommended as a Local Plan allocation.</p>

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
							<p>development of the combined site at Newpool Farm would outweigh any differences between these sites in terms of impact on the Green Belt and that, when considered in the round, the combined site at Newpool Farm is a preferable and more logical and sustainable option than those alternative sites; The site is both accessible and sustainably located, with a realistic choice of mode of travel other than the private car - there is a range of local facilities within the 2km walk distance of the site, which include primary schools, secondary schools, supermarkets, convenience stores and GP surgeries, whilst the whole of Biddulph is within 3km and therefore within cycling distance. Bus stops are also found on Newpool Road and are currently located at the site access and despite the need to move them they would still be in close proximity to the site; Development of the site would make a contribution to local need for housing and in turn reduce the level of housing development that must be accommodated on less accessible/sustainably located greenfield land in the Green Belt around Biddulph; Contribution of the larger site towards infrastructure delivery - client anticipates the combined site being developed for housing by a single developer; Site is deliverable and is being promoted by a willing landowner; and Opportunities to deliver housing on previously developed land and other infill or windfall sites within the existing settlement boundary are severely limited.</p> <p>We would encourage the LPA to give further consideration to potential changes to the town and Green Belt boundaries in Biddulph and support a strategy for releasing sites from the Green Belt through the Local Plan process where appropriate - such as to accommodate residential development of the land at Newpool Farm being promoted by our client.</p>	

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO9027	Mrs Helen Baker				Other Suggested Sites	Object	<p>Further to the consultation I would like to propose the area BD137 is included in the local plan. Attached is a location map of the field, are happy for it to be considered with land adjacent also can be included for the purposes of the consultation. The land use for this site is agricultural land. The reason I believe that it should be included is that there is a national shortage of homes and government laws and publicity reflect this and indeed Cheshire East Council proposed that Staffordshire Councils could provide additional sites to reflect the national requirement of homes for the future. 3 Development requirements and distribution Distribution of development 3.1 Policy SS3 of the adopted Core Strategy sets out the broad spatial distribution of housing and employment development across the District. It is proposed to carry this distribution forward into the new Local Plan. However Cheshire East Council announced during the local plan developments that Staffordshire Council would be able to undertake some of the housing requirement on their behalf 3.2 As the proposed development approach is one which focuses development on the 3 market towns of Leek, Cheadle and Biddulph so would make the area to the north of Biddulph suitable area to accommodate the additional homes. Strengths are that Biddulph Valley Way is on the field boundary to the West with good access. This provides for very good amenity facilities for dwellings. The main road (A527) from Congleton to Biddulph is on the field boundary to the East with main road frontage and gate access. The main road provides good communication which is sustainable including regular public transport to both towns of Congleton and Biddulph and within 2.5 miles connects to Congleton train station going to Manchester and London. Biddulph Leisure Centre is located on the main road to the south of the site in the direction of Biddulph town centre. Utilities are conveniently located:- Gas main on main road Sewage works across the main road in the direction of Biddulph Mains electricity at adjacent homes The consultation document prepared by Staffordshire Moorland says that they have provided space for 4000 homes. I think that this will be inadequate when presented to the government inspector for inspectors examination as neighbouring Cheshire East Council local plan which was presented to government inspector for examination in 2014 was rejected and Cheshire East were then obliged to include provision for 36000 houses before the local plan was allowed to go through to the next stage by the inspector Stephen Pratt. I would be glad if you could consider these issues during the consultation and include the above site.</p>	<p>The site was not included as a site option or identified in the Preferred Sites and Boundaries Consultation Document for the following reasons:</p> <p><u>Green Belt Review</u></p> <p>Parcel N7 (Land to North West of Biddulph) –</p> <p>Contribution towards the following GB purposes:</p> <ul style="list-style-type: none"> • significant contribution to preventing neighbouring towns merging; • Contribution to checking the unrestricted sprawl of large built – up areas; • contribution to safeguarding countryside from encroachment; • Contribution to preserving the setting and special character of historic towns; <p>Permanence of GB – current boundaries are firm and largely logical.</p> <p>Sustainable patterns of development – “development would produce an over-extended linear settlement pattern with a limited relationship to Biddulph town proper.”</p> <p><u>SHLAA</u></p> <p>“Eastern part of site (and north) affected by Flood Zones 2 and 3 due to stream. Blanket TPOs to northern part of site (Baileys Wood). This is also identified in PPG17 audit as natural and semi natural open space. Also historic earthwork here.” (c class)</p> <p>It is not recommended for inclusion in the Preferred Option Local Plan.</p>

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO9054	Mrs Joyce Tagell			Hourigan Connolly	Other Suggested Sites	Object	(Summary of comments - full version attached) Object to the non-inclusion of BD083 in the Local Plan. It is considered that land at Marsh Green Road, Biddulph should be allocated for residential development to deliver in the order of 40 dwellings. The site has been identified as deliverable in the SHLAA. Neighbouring sites which have been included in the plan (BD062, BD068 and BD087) all share similar constraints to BD083. There are no constraints on the land which make it undevelopable. Its agricultural land classification is low. The assessment of the site in the Green Belt Review is inconsistent with other assessments undertaken by the Council in particular the land in question is not highlighted as significant in the Council's Landscape & Settlement Setting Assessment. It is also self-evident that the subject site is an infill site and entirely appropriate for development. In summary land at Marsh Green Road, Biddulph is available for development, it is suitable for housing and would be achievable. In our view there is no justification for not allocating this site given the need to allocate more land than the Council has identified in order to meet the housing needs of the District going forward. We respectfully seek an allocation of the land at Marsh Green Road, Biddulph for housing and a consequential amendment to the Town Boundary for the settlement.	The Green Belt Consultants view is that the site is on rising land and the sense of openness would be compromised by development and it is disconnected from urban area, (the Biddulph Valley Way separates it from nearby residential development). For this reason it is not recommended that the site is included in the Preferred Options Local Plan.
PO9025	Mr Mark Holland				Other Suggested Sites	General comment	I would consider making land in my ownership (map attached) - estimated at around 2 acres - (adjacent to site ADD04) available for development provided that the adjacent site ADD04 is deemed suitable for housing. This is being proposed at this stage on the basis that it is in no way binding on our part.	ADD04 is not considered suitable for retention in the Local Plan due to heritage impact (its position adjacent to Knypersley Hall). The same would apply to this area of land.
PO10235	Mr Graeme Court				Other Suggested Sites	Support	Suggest old gas works site as an alternative.	Refer to PO4611.
PO9795	Mr Eric Biddle				Other Suggested Sites	Object	A majority of residents would like to see the Victoria Colliery site developed - it would take a large number of homes. Infrastructure would need improving using CIL. Newcastle under Lyme Borough Council is apparently in favour of development. Many believe that co-operation between Biddulph and Stoke on Trent could also benefit Biddulph. Stoke on Trent has vast areas of brown field land waiting to be developed. Another area is at Childerplay Lane.	Refer to PO7634 and PO4620.
PO10075	Ms Heather Mason				Other Suggested Sites	Object	Consider that Site BD004 (City Bank Mill) and site BD102 (Minster Mill) should be included in the plan. Also recommend: Victoria Colliery Childerplay Lane Mill Hayes Farm	Refer to PO7634 and PO956.
PO10073	Mr Norman Smith				Other Suggested Sites	Object	Object to BD004 (City Bank Mill) and BD102 (Minster Mill) not being included in the plan. Consider that all brownfield sites should be seriously looked at in addition to any old mills not being active and also Victoria Colliery Land, Childerplay area and similar.	Refer to PO7634 and PO956.

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO1013 1	Mrs Anne Young				Other Suggested Sites	Object	There are many derelict buildings in Biddulph - Station Road, the old Victoria Colliery site, Cross Street, land off Childerplay Road. Developing derelict buildings would tidy up the already tired looking Biddulph.	Refer to PO7634 and PO956.
PO9900	Mrs Janet Copeland				Other Suggested Sites	Object	Suggest the Victoria Colliery site and Childerplay Lane would be very suitable sites for housing and employment. This could be feasible though I am aware we are creeping away from our town boundary and nearer to Stoke on Trent. If this option is suitable I would support it rather than sacrifice our Green Belt land. A new school could also be built in this area if housing is.	Refer to PO7634 and PO956.
PO9583	Mr Carl Mason				Other Suggested Sites	Object	Consider that the following sites should be assessed for housing development instead of BD087: Victoria Colliery Childerplay Lane Knypersley Bypass Mill Hayes Farm Meadows Playing Field Jacksons Nursery	Refer to PO7634, PO956 and PO5993. Meadows Playing Field is in use by a local school.
PO9645	Mr D Copeland				Other Suggested Sites	Object	Prefer no Green Belt development, brown field land should be prioritised first e.g. old timber yard, mills in Cross Street and Station Road. Have Newcastle Borough Council been contacted about the Victoria Colliery Site? It may be suitable for housing or business though urban creep could be a problem.	Refer to PO7634.
PO9746	Mrs T Adams				Other Suggested Sites	Object	I am in favour of land to the west of Victoria Business Park near to Brown Lees for development. As former open cast mining area I feel this makes more sense. It is far enough away from existing schools, has better access for vehicles therefore causing less disruption and congestion, and most importantly does not intrude on green belt land.	Refer to PO7634.
PO9667	Mrs P Hancock				Other Suggested Sites	Object	The best site for new housing is south of G Rhodes garage - good access, handy for people working on industrial park, desirable location, open countryside, good access to town, next best site is brownfield land.	BD117 is already included in the plan as a mixed use employment / housing site.
PO9927	Mr J Wright				Other Suggested Sites	Object	Suggest the following sites to be investigated for housing development (suggested by Councillors Chris Wood and Jim Davies): Victoria Colliery Site (undeveloped part to the south). Mining history but has been reinstated. Site has good access to A527. Newcastle Borough Council has agreed this in principle; Childerplay Land - between Mill Hayes Road and recycling station at Bemersley, also reclaimed land with good access to A527; Land to south of ADD03 - lies to west of old railway line, access to the town centre via Wharf Road, residents could walk into town for shopping, medical facilities etc. Priority should be given to developing mill buildings for housing as they are ideally located.	Refer to PO7634 and PO4624.

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO10210	Mrs J Cottrell				Other Suggested Sites	General comment	Summary only (please see full representation attached) Support the Victoria Colliery Site and the Childerplay Road sites for housing. These two sites: would not impinge on other housing lessen road/traffic congestion more suitable for large developers who can enter into S106 infrastructure agreements	Refer to PO7634.
PO9779	Mr M Barlow				Other Suggested Sites	Object	Use brown fields for housing development such as Victoria and Childerplay Road, Knypersley. Also Chatterley Whitfield site. Knock down or regenerate the mill in Station Road, it spoils the area.	Refer to PO7634 and PO4620.
PO10058	Mrs B Purton				Other Suggested Sites	Object	Consideration should be given to the possibility of extending the town boundary on the west side of the town through site BD116 and BD140 between the currently identified area of ADD03 and site BD063a to allow for the possibility of further site allocations within this area. This development would start to rebalance Biddulph in the right direction i.e. it would start to move the town centre back towards the centre of town. A strip of visual open space could be included between the development and the Biddulph Valley Way which could also act as a wildlife corridor. These sites are well placed to take advantage of some of the new services and facilities and the new primary health care centre which is within easy walking distance. Development in this location would have much less of a visual impact on the area and would not constitute 'urban creep'.	Refer to PO4624.

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO9575	Water of Ayr & Tam O'Shanter Ltd	The Water of Ayr & Tam O'Shanter Hone Works Ltd	Ms Jennifer Hadland	Savills	Other Suggested Sites	Object	(Summary only - full comments and site plan attached) New site for consideration at Underwood Farm, Gillow Heath, Biddulph Land measures 14.8 hectares and residential development abuts the site to the east. The site is in single ownership and is deliverable and viable. Site could all be developed or separated into parts (A and B as shown on the attached map). Site A (north of Mow Lane) is approximately 5.5 hectares and lies to the west of existing residential development and the site is bounded by mature hedgerows. The site is relatively flat but gently slopes down towards the existing built up area. Site B (south of Mow Lane) is approximately 9.3 hectares, is well confined by existing hedgerows and trees particularly along the southern boundary. The future development of the site would utilise land which is adjacent to existing residential development. The site is relatively flat but gently slopes down towards the existing built up area. Client's land does not fully meet the 5 Green Belt purposes in the NPPF. The Council's Green Belt Review assessed the land as part of a large swathe of land but not as an individual site. It is considered that the deletion of the land and its future allocation for residential development would not have an adverse impact on the remaining Green Belt. It would not lead to merger with Congleton, will prevent unrestricted sprawl taking place whilst helping to meet the District's development needs. Land is located away from the historic centre of Biddulph so would not have an adverse effect on the character of the town but is sustainably located in terms of access to facilities and services. There is no strong settlement edge where client's land is located. A strong settlement edge could be created as part of development. Developing to the east of the town would lead to merger with Biddulph Moor but development to the west of the town would retain its rural setting.	<p><u>Green Belt Review Assessment – April 2017</u></p> <p>Not recommended for release. Development would be a clear intrusion into open countryside, without substantial boundaries with which it could be contained. A new built edge to Gillow Heath (and Biddulph) would be created which would be of a linear character and not constitute a logical rounding-off of the settlement.</p> <p><u>SHLAA</u></p> <p>Part A – divorced from settlement. Not assessed in SHLAA</p> <p>Part B – Partial SHLAA assessment –</p> <p>BD123 (old coal yard only – divorced from settlement – may be NPPF compliant as it is brownfield?) C class in SHLAA.</p> <p>BD139 – “The whole of the site has been identified in the Landscape & Settlement Setting Study as being important to the setting of the settlement. Rural character of the area. Wedgewood Lane provides a strong edge to the settlement at this point. FRA needed.” – C class.</p> <p>Not recommended for inclusion in the Local Plan for the reasons above.</p>

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO9030	The Hart Family		Rob Duncan		Other Suggested Sites - BD067 a-c	Object	(Summary only - full version attached) Object to sites BD067a-c being excluded from the Local Plan. Consider that there is no prescribed methodology for how the sites have been assessed and why new sites for Biddulph have emerged which were not included at the previous consultation stage e.g. site ADD03. Do not agree with some of the conclusions of the Council's Green Belt Review - overplays the significance of the site in terms of preventing towns merging together, challenge view that Biddulph is a historic town as it has no conservation area, suggest revised assumptions which would deem these sites as being suitable for release from the Green Belt. The land in question has a higher development capacity study ranking than other sites in Biddulph included as preferred options. The attached plan demonstrates how effective screening can be accommodated on the site to strengthen its boundaries. The sites were categorised as deliverable in the SHLAA as opposed to sites ADD04 and ADD03 which were both categorised as undeliverable in the SHLAA. The Local Highway Authority does not raise concerns about highway safety matters. The site overall scores fairly low in terms of its ecological credentials, and it is submitted that the substantial structural landscaping identified within the accompanying layout plan would derive significant benefits to local biodiversity in accordance with the aims of paragraph 109 of the NPPF. Site has the potential to deliver substantial developer contributions to benefit the town e.g. affordable housing, bungalows, extra care housing, open space, children's play areas. Also owner is willing to safeguard a substantial parcel of land to enable Oxhey First School to expand. Site is owned in full by client and available for development immediately. The Local Authority is accordingly requested to re-visit its intended preferred options, and prioritise my client's site ahead of the other preferred options within the Submission Version of the Site Allocations DPD.	The Green Belt Review does not consider that this area is suitable for release from the Green Belt therefore it is not proposed for inclusion in the Local Plan Preferred Options.
PO9038	Mr & Mrs J Hibbert		John Grantham		Other Suggested Sites - BD138a / BD138b	Object	Object to the non inclusion of sites BD138a and BD138b in the Local Plan. The land in question (location plan attached) is approximately 15 acres in size. I believe this land would make a good contribution to the Council's housing targets going forward. Allowing for the topography of said land I would envisage approximately 8-10 acres of housing development land, equating to approximately 100-130 dwellings being delivered. A phased development over a 3-5 year period could be achievable and could be economically viable. The land sits adjacent to the existing settlement of Biddulph. The land is in a sustainable area, Biddulph benefitting from all local services expected from a medium sized town. I hope you will agree that this land offers great potential in assisting the Council improving their housing shortfall targets.	The Green Belt Review does not consider that this area is suitable for release from the Green Belt therefore it is not proposed for inclusion in the Local Plan Preferred Options.

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO9561	Ms Christine Williams				Other Suggested Sites BD131	Object	Request that land associated with 62 Mill Hayes Road (your reference BD131 - see attached map) be considered for release from the Green Belt. The land extends to 6.35 acres and has a road frontage which would provide the best point of access into land north of Mill Hayes Road.	<p><u>Green Belt Review</u></p> <p>Allows for release of the land if exceptional circumstances can be demonstrated.</p> <p><u>Other Issues</u></p> <p>If developed alone appears incongruous – would have to be part of a wider development for this area. Close to a site of geological importance.</p> <p>An alternative site exists which will help to bring forward a key regeneration area in a central part of the town so land on this site is not needed.</p>
PO491	Mrs May Pointon	Ken Wainman Associates Ltd	Mr Kenneth Wainman	Ken Wainman Associates Ltd	Other Suggested Sites Marsh Green Nursery	Object	Land to the north of Well Lane, Gillow Heath, Biddulph, Stoke-on-Trent. On behalf of my client I object to the omission of an area of land of land north of Well Lane, Gillow Heath, from the proposed Development Boundary for Biddulph and ask that the site is released from the Green Belt and included in the Town Development Boundary. The site was not submitted as part of the Site Options Consultations in 2015 but Mrs Pointon contends that the site as a nursery (appears as developed land rather than as part of the Green Belt. The site lies to the north-east of Site BD138b which was included in the Site Options Consultation in 2015 but is not one of the preferred site allocations. The Green Belt Review commissioned by the Council assessed each site against the five purposes of the Green Belt. In the case of Site 138b the assessment was that the site made: A contribution to checking sprawl. A limited contribution to maintaining separation. A significant contribution to preventing encroachment. A moderate contribution to the overall impact on the Green Belt purposes of development. The Review recommended that the site is not released from the Green Belt. Mrs Pointon asks that the site is omitted from the Green Belt and included in the proposed Village Development Boundary for the following reasons: The site is different from Site BD138b and Site BD138a which lies to the south of Site 138b in that where the two latter sites are open land my client's land is a well-developed nursery with several portal framed buildings, two houses, a retail area, access tracks, areas of hardstanding and numerous polytunnels. The Review's description of Sites 138a and 138b is " Broadly rising land lying outside the current settlement envelope beyond Well Lane. Despite the intrusion of isolated built development, the land retains a clear open countryside character, development of which would create visual intrusion, and compromise openness, notwithstanding the boundaries provided by Wedgewood Lane/Marshfield Land and an unmade	<p><u>Green Belt Review Assessment – April 2017</u></p> <p>Consider for release under Exceptional Circumstances. Notwithstanding the contribution of the land to the Green Belt in this locality, development would not cause significant harm to the openness of the Green Belt, reflecting the bounded nature of the site and the character of existing built form, combining both residential properties and the garden nursery. Of the two options, the smaller would be less damaging, being more closely related to the current built edge at Well Lane and limiting the interface with open countryside to the north west. However, there is no obvious significant feature between the two options which would serve as a reasonable long term boundary.</p> <p><u>SCC Highways</u></p> <p>Marsh Green Road is poor and would really need some improvement before I could be comfortable with development using it as access. It would need at least widening but if sites BD068 and BD083 are still proposed, these would be significantly beneficial. All sites could then contribute to improvements at Marsh Green Road/Congleton Road junction. BD083 would be essential. The existing traffic generation of the existing use as nursery could be taken into account to offset against the proposed residential use. Transport Statement would be required. However, given the poor geometry and alignment of Marsh Green Road, some improvement would be essential for any sizeable development.</p> <p>An alternative site exists which will help to bring forward a key regeneration area in a central part of the town so land on this site is not needed.</p>

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
							<p>track to Congleton Edge Road.”. It is contended that my client’s site – The Nursery – is completely different to Sites 138a & b. To all intents and purposes to a lay person it appears as developed land occupied as it is with a retail area, car park and buildings mainly to the front (south-east) of the site with polytunnels, two houses and another building on the rest of the site. It is accepted that horticultural land is “previously developed land. However, a recent appeal (APP/j3720/W/15/3010653) for the construction of up to 75 dwellings was allowed on a horticultural nursery on 6 June 2016 in open countryside in a valued landscape. Whilst a “valued landscape” is not the same as Green Belt the Inspector on this appeal considered that because of the several buildings and the glass houses on the site “a significant part of the site could not be described as open or green field land”. The inspector also mentioned that the site faces a terrace of houses and that when walking up the road to the site the perception is “a partially built site”. In the case of Pointon’s nursery whilst there are open fields to either side of the site there is a sizable modern housing are across Well Lane and the perception when looking at the site from well Lane is of a partially well developed site which is in context with the houses on the opposite side of the road. With respect to the purposes of the Green Belt it is contended that the site already sprawls and encroaches into the countryside and Green Belt; that there is already considerable visual intrusion; and that development of the land would at worst only have a limited impact on the purposes of the Green Belt. Two plans showing two options for the development of the site are sent separately by email. The first plan titled “Option 1” (drawing no. SOP2106-4) shows the entire site. The second plan titled “Option 2” (drawing no; SOP2016-5) shows the front part of the site available for development. The Council are asked to consider both options for development. My client would prefer to see the entire site developed but puts Option 2 forward for consideration as well. The number of houses that could be built in Option 1 (the site area is about 1.52 ha) is between 37-44 houses assuming moderate densities and the number of houses which could be built on Option 2 (about 0.7 ha in area) assuming similar densities would be about 17-20 houses. The site has good access onto Well Road and there is a tarmacked track to the north which could be made wider using land in the site to provide a second access point. If the entire site were to be developed there are recognisable permanent boundaries – Well Road, the track to the north-east, a house and field boundary to the south-west and a narrow road (Wedgewood Lane) maintained by the County Council to the north-east. If Option 2 were pursued then the boundaries to the north-west, south-</p>

							west and south-east would be the same but a permanent feature would need to be established in the north-east.	
PO9051	Mr and Mrs Siddorn		G Willard	Willard Willard	Other Suggested Sites BD138a / BD138b	Object	<p>(Summary - full comments and plan attached) Object to the non-inclusion of sites BD138a and BD138b in the Local Plan. The sites are available and considered to be deliverable for the following reasons: Deliverability The site is in the ownership of only 2 parties. Both are able and willing to sell the sites in order for them to be developed. There is no legal incumbrance to prevent or slow down the sale of the site. Around 170 homes could be provided. Highways The Highway Authority state: The Highway Authority has no difficulties in principle with this development provided that appropriate highway standards can be achieved. Cumulative development in this area would need to be assessed through a TA. This remains the council's position. It is however conceivable that the development of this could include further highway and planning gains to the surrounding road network and for pedestrians and cyclists (see attached plan). Green Belt Impact The site (a and b) is not identified within the Green Belt Review as being suitable for housing. This submission contests both that conclusion and the weight that ought to be attributed to it. Suggest alternative wording for the conclusion in relation to this site: The site is bounded by residential development to the East, South and to some extent the North. It is well contained with Wedgwood Lane enclosing the site to the West. The site is open but is well screened. The site too is free of any development constraints. The site is considered to have a moderate impact upon the Green Belt and note especially that the site is well contained. It ought to be considered for release from the Green Belt. SHLAA Site ADD03 was identified as a C class in the SHLAA and was not included in the previous Site Options Consultation. Sites BD138 a and b are both classed as B and were included in the previous consultation. Sustainable Site It is contested that the loss of grade 4 farmland is not a significant loss to sustainability. And moreover there is no indication of any adverse impact upon any historic assets or ecology. Ecology The site owner supports the conclusions set out in the Council's Phase 1 Habitat Survey of the sites and proper site development can take place whilst complying with these conclusions. It is notable too that Natural England consider that this may represent a strategic site and subject to a suitable LVIA would support the allocation. Flooding The site is not within a flood zone nor would it be affected by flooding given its underlying geology and topography and for the greater part much of the site is sloping. Moreover because of the size</p>	The Green Belt Review does not consider that this area is suitable for release from the Green Belt therefore it is not proposed for inclusion in the Local Plan Preferred Options.

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
							<p>of the site it is wholly practicable to provide for storm water attenuation on site in the form of swales, balancing ponds or underground storage. In short there is no need for this site to add to local storm water flows and it is considered acceptable in these terms. Environmental Risk Whilst Groundsure has determined the property to comprise Acceptable Environmental Risk, some liabilities may reside with the property that a prudent purchaser may wish to consider further, particularly if the site is to change use/be redeveloped in the future. Ground conditions There are ground constraints on this site and no serious risk have been identified from any previous local mine working. Service provision. The site is served by water, foul sewage, broadband, electricity and mains gas infrastructure. Public footpath The site is served by a public footpath which crosses the site. This could and ought to be included within any site layout provision. Market interest The site has attracted the interest of a national volume house-builder. They withdrew from completing an option agreement with the council upon learning of the council's likely draft allocations because contesting and properly contesting a site thru the plan making process is a time consuming and expensive exercise. At the time of preparing this submission the site owner is being approached by land agents who also may have interested clients. The previous involvement of a national house-builder does serve to confirm that there would indeed be a developer within the marketplace who would develop the site if it were to be allocated. School The combined BD138 a and BD138b sites are big enough to accommodate a new primary school site. They have good road connections and are well served by existing public transport routes. In addition these sites adjoin existing housing areas in a part of the town not already served by a primary school site meaning that access for children is both secure, safe and quick. Moreover the site is close to the Halls Road Playing fields providing children with extensive open space provision close to the school in addition to any on site play and sports space. The linking of the site via improved and new cycle routes and green lane would also offer children and parents a safe and secure choice of routes to school.</p>

PO9293 PO9291	Mr Lee Dawkin	Renew Land	Mr Ben Weatherley	Knights LLP	Other Suggested Sites Hurst Quarry	Object	<p>(Summary of comments - full comments attached) Would like to see land at Hurst Quarry, Hurst Road, Biddulph considered for inclusion in the Local Plan for housing development (see attached plan) for the following reasons: The site is currently washed over by Green Belt. However, the site has a history of use as a quarry (see attached aerial photo) shows how the extensive extraction workings resulting from previous quarrying activity has significantly altered the appearance of the site and physically and visually damaged the local landscape. In addition to the quarrying activity there is an industrial premises at the site's frontage with Hurst Road, which comprises previously developed land. This business would be relocated in the event that housing development of the site comes forward. All of the site therefore comprises previously worked and developed land; Whilst the site's planning history includes details of an approved restoration plan for the quarry element of the site (i.e. excluding the industrial premises at the front of the site), we understand that under European legislation the site can continue to be used as a quarry for many years to come and if this were to take place it would result in considerable further damage to the landscape; A sensitively designed residential development of the site on the other hand presents the potential to bring forward the ceasing of quarrying activity at the site - prior therefore to quarrying having any further impacting on the currently unspoilt land at the site - and in turn deliver a number of benefits including: The removal of the HGV and other vehicle movements associated with further quarrying at the site and the existing engineering business from the local highway network, to the benefit of highway safety and the amenity of local residents; Further improvements to the residential amenity of local residents including by way of removing the impact of quarrying at the site by way of dust, noise and vibration; Positive effects on/enhancements to the local landscape and visual amenity; Improvements to the setting of Biddulph Grange and Biddulph Grange Gardens; and The potential to enhance biodiversity in the local area and avoid further tree loss that may result from further quarrying activity at the site, whilst low quality self-seeded trees within the site that would be removed to accommodate the proposed development would be replaced by native tree planting; The consultation document confirms an estimated housing need of 1,100 dwellings in Biddulph over the plan period and the Core Strategy acknowledges that housing development will need to take place on land in the Green Belt on the edge of Biddulph in order to meet this requirement. Housing development at Hurst Quarry creates the potential to make a material contribution to the housing requirements in Biddulph and in turn reduce the level of housing development required on virgin greenfield land</p>	<p><u>Green Belt Review:</u></p> <p>Parcel N8 (Land to north east of Biddulph) –</p> <p>Contribution towards the following GB purposes:</p> <ul style="list-style-type: none"> • Check unrestricted sprawl; • Assist in safeguarding countryside from encroachment; • Preserve the setting and special character of historic towns. <p>Permanence of GB – Characterised by strong logical boundaries along inner and outer edges.</p> <p>Sustainable patterns of development – development not appropriate.</p> <p>This land is not recommended for inclusion in the Local Plan due to impact new development would have on the Green Belt and its unsustainable location.</p>

Question 23 – Do you have any other comments to make regarding Biddulph? (Other Suggested Sites)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
							<p>in the Green Belt; Community engagement has been undertaken and there is support for residential development on the site - a planning application has been submitted; Client is only to promoting residential development of the parts of the site that have been subject to previous quarrying activity (which are naturally at a lower level than the surrounding land) and that accommodate the industrial premises at the site frontage. These parts of the site are well contained and a carefully designed residential scheme and associated landscape strategy - such as those submitted in connection with the current outline application - would deliver a high quality housing scheme of low prominence/visual impact that would protect the previously unspoilt higher ground within the wider site from future change and in turn avoid harmful impact on the wider landscape; The proposed housing development is acceptable from a highways, landscape, tree, ecology, flood risk and drainage, minerals sterilisation, ground conditions and urban design perspective as proven in supporting documents submitted with the planning application (see attached planning statement for more details); An assessment of the viability of the proposal has also been undertaken to inform the planning application, which has resulted in the planning application proposing 100% open market housing on the site and a financial contribution (£500,000) towards off-site affordable housing provision; The planning application is also accompanied by a Heritage Assessment that demonstrates the proposed housing development of the site would not affect the architectural, historical, archaeological or artistic significance of Biddulph Grange; A Highway Assessment has been produced and demonstrates that a suitable site access exists and development would not lead to a serious impact on the local highway network; and the site would make a positive contribution towards the local need for housing.</p> <p>We would encourage the LPA to give further consideration to potential changes to the town and Green Belt boundaries in and around Biddulph and support a strategy for releasing sites from the Green Belt through the Local Plan process where appropriate - such as to accommodate residential development of the land at Hurst Quarry. The purpose of these representations is to request that the LPA gives further consideration to the potential allocation of land at Hurst Quarry for housing development. The site area is approximately 15.5 hectares (and the landowner also owns additional adjoining land), but as considered in more detail below and within the planning application it is not envisaged that the entire site will come forward.</p>

PO10218	Mr Stuart Nicholls				Other Suggested Sites	Object	Areas which could be designated for building which would not impact on residents are land off Childerplay Road and the former Victoria Colliery site. Although I strongly believe that building should not take place on Green Belt land, I understand that the town has to produce a Neighbourhood Plan to achieve the objectives set by the Government. Land in these areas which has recently been designated as Green Belt should be used as this is less established and more suitable. Also suggest land on the west side of Biddulph bypass at Woodside Farm. The Biddulph Valley Way would act as a natural green strip between here and the site to the east. Access roads could be linked to the bypass either over or under the BVW avoiding the extra traffic on already overstretched local roads and lanes.	Refer to PO7634 and PO4624.
PO10283	Mr Alan Brown				Other Suggested Sites	Object	I believe that the site on Childerplay Lane represents a better option rather than ADD03.	Refer to PO7634.

Question 23 – Do you have any other comments to make regarding Biddulph? (Town Centre)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO166	Mrs Tracy Norton				Town Centre		Either pedestrianize the High Street, or make it all accessible to cars, rather than as it is now.	<p>In recent years the road layouts have changed in Biddulph Town Centre and it would be up to the Highway Authority at the County Council if they consider any further changes are necessary. They have not advised the District Council as such.</p> <p>When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.</p>
PO186	Mrs Shirley Barlow				Town Centre		Keep it looking nice either Biddulph in bloom and replace the 2 trees that were cut down in front of the town hall, need a few small trees in the large tubs to enhance the town	Comments noted.
PO539 PO599	Mr Bill Hockey Mrs Pamela Hockey				Town Centre	Support	<p>All my Comments against the previous questions are aimed at supporting the regeneration of Biddulph Town Centre. I strongly recommend: Holding Market Days at times and days when working people can attend, and not mid-week when people only want to get home, eat and rest. It is no wonder that what is arranged has few and uninteresting stalls and poor attendance. The example of the few weekend Markets show the difference. A dedicated Market Area – just consider Congleton, Hanley and even Manchester at Christmas and at other times! Encourage and nurture links with Biddulph Grange. If even some of the people visiting there come into Biddulph the impact could be significant on Trader and Council income. Developing a plan around the Primary & secondary Frontage Strategy that makes the Town Centre an attractive place to come to and spend, something it definitely is not now. Make the High Street a pedestrian zone, learn from Congleton and others. Building to the West is closer to the potential £0.5 million business development at the Chatterley & Whitfield site understood to offer the opportunity for creating 2,100 jobs. It is also closer to the already planned new employment areas than other sites. Makes walking to work possible and more attractive against the likelihood of going by car from sites north of it, especially with their less direct routes.</p>	<p>Comments noted. Regeneration works have taken place in the town centre in the last few years – a new foodstore, paving, shop front improvements, bus station etc.</p> <p>Market days are outside the remit of the Local Plan. When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.</p>
PO736	Mr Philip Beech				Town Centre	Support	The regeneration of Biddulph Town (Shopping) Centre needs to be addressed. A market day would be beneficial - NOT on a week day when the majority of people with disposable income are out a work. Maybe a Sunday market, like Macclesfield have, may be more beneficial to the Town than a traditional Saturday market. To encourage development maybe the 'powers that be' could heavily subsidise this by offering drastically reduced fees for traders willing to sign up to the scheme. Also, temporary closure of certain roads should be considered to permit said market. This happened in adjacent towns and their events are well attended it would seem.	Market days are outside of the Local Plan remit.

Question 23 – Do you have any other comments to make regarding Biddulph? (Town Centre)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
							Biddulph isn't a bad town, but could I believe do far better.	
PO618	Mrs Ellen Faulkner				Town Centre	General comment	I know we will have to have houses eventually. I feel that some of the shops could be encouraged to improve the upper floors of their premises for apartments or bed sits.	Agreed. The Biddulph Town Centre Area Action Plan (which is still a live policy document) encourages the conversion of upper floors in the main shopping area to residential (Policy STRAT3).
PO459	Mrs Jean Fairbanks				Town Centre	Support	Biddulph has been neglected for many years and badly needs investment and good ideas to stimulate shoppers to come into and stay in the town centre. People living on the outskirts have limited access by bus if they do not possess a car.	There has been recent regeneration of the town centre – a new foodstore, paving, shop front improvements, bus station etc. Any further improvements are likely to be market-led and dependent on the amount of new development which occurs in the town. The retail industry in particular is very sensitive to change and the increases in people shopping online are affecting the amount of physical stores operators require.
PO797	Mrs Jayne Beech				Town Centre	Support	Biddulph would benefit from events to attract more tourism. The summer series of events seems to cater for local residents, as opposed to people from outside. A weekly market would go some way to improving this - especially around bank holiday weekends and Christmas time. Also, the use of the Town Hall to host music events and films would be beneficial. This would help keep people in Biddulph and may go some way to attract people from outside the area.	These suggestions are outside of the Local Plan remit.
PO4856	Mr Chris Millington				Town Centre	Object	Town Centre needs to be regenerated starting with housing near the centre so people don't by pass to stoke or Congleton. Need to attract visitors into town centre. Concerned regarding sewage works in general infrastructure. Agree to take out more buildings in the North East.	Comments noted. United Utilities has a statutory duty to provide capacity for new development so this is not a valid reason for development not to come forward in Biddulph.
PO5193	Mr Peter Brittain				Town Centre	General comment	Intervene now to stop expansion of empty shops.	There has been recent regeneration of the town centre – a new foodstore, paving, shop front improvements, bus station etc. Any further improvements are likely to be market-led and dependent on the amount of new development which occurs in the town. The retail industry in particular is very sensitive to change and the increases in people shopping online are affecting the amount of physical stores operators require.
PO5098	Mr J Neate				Town Centre	Support	The recommendations regarding the Market Days/dedicated market area/link the Excellent.	These suggestions are outside of the Local Plan remit.
PO5097	Mrs L Neate				Town Centre	Support	The recommendations regarding the Market Days/dedicated market area/link the Excellent.	These suggestions are outside of the Local Plan remit.
PO5351	Mr I Barber				Town Centre	Support	Regeneration of the town centre can only be achieved if the High Street was made pedestrian zone, if the town was more attractive you can attract more visitors with Biddulph Grange Gardens to spend there.	When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.

Question 23 – Do you have any other comments to make regarding Biddulph? (Town Centre)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO5167	Mr N McQuade				Town Centre	General comment	plus electric car charging points, enforce no parking on grass verges?	These are matters which are outside the remit of the Local Plan.
PO5313	Mr A Picken				Town Centre	Support	To attract more people into the town centre, the developments need to be within walking distance.	Agreed.
PO9845	Mrs. Margaret Biddle				Town Centre	Object	Regeneration of the town centre is needed. The High Street should be a pedestrian zone. Weekend market days are popular in many towns. There must be a way to encourage visitors to Biddulph Grange to come to the town centre. Improving the christmas lights would be a start. Biddulph in Bloom shows what can be done. Factories in the town could be converted to residential to provide living accommodation.	<p>There has been recent regeneration of the town centre – a new foodstore, paving, shop front improvements, bus station etc.</p> <p>Market days are outside the remit of the Local Plan. When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.</p> <p>Mills such as Minster Mill and Yarn Mill in the town centre are being considered as possibilities for housing (either conversion or new build).</p>
PO9808	Mr Eric Biddle				Town Centre	Object	The High Street needs to be a pedestrian zone then some of the Biddulph Grange visitors could be encouraged to visit the town. It needs to be more attractive. Ugly factories should be removed or converted into apartments.	<p>When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.</p> <p>Mills such as Minster Mill and Yarn Mill in the town centre are being considered as possibilities for housing (either conversion or new build).</p>
PO9648	Mr D Copeland				Town Centre	General comment	Would like more open space in the town centre. Should consider using land to the front and side of the Town Hall to create space. Pedestrianisation along part of High Street would be beneficial, need to create a dedicated area for the open market and improve public realm with seating and trees. The centre of town needs substantial regeneration. Also need an improved bus services so there are other issues to consider not just house building.	<p>Use of land around the Town Hall could be improved independently of the Local Plan process.</p> <p>When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.</p> <p>Market days are outside the remit of the Local Plan. Public transport is a County Council matter and not within the scope of the Local Plan.</p>

Question 23 – Do you have any other comments to make regarding Biddulph? (Town Centre)

ID	Consultee Name	Company / Org	Agent Name	Agent Company / Org	Issue	Support/Object/General	Consultee Comments	Officer Response
PO9968	Ms Claire Kirkham				Town Centre	Object	Make the High Street a pedestrian zone and have a dedicated market area holding markets at times when working people can attend. I understand that Biddulph needs to take control through Neighbourhood Planning or risk developments running wild which has happened in other places.	Market days are outside the remit of the Local Plan. When the Biddulph Town Centre Area Action Plan was being produced (2004 – 2006) pedestrianisation of the High Street was considered as an option and it proved controversial with a number of businesses along High Street at that time. There is a policy in this plan which allows for pedestrianisation or part-pedestrianisation of the High Street but this has not been implemented to date and is unlikely to be in the near future.
PO10211	Mrs J Cottrell				Town Centre	General comment	(Summary) The brownfield sites in the town centre could be developed for new housing to visually improve and enhance the town centre. Do not need new shops/retail to be built, the High Street has empty shops which could be utilised for new traders.	The brownfield sites in the town centre including the mills are being investigated for residential development. Those which are available and viable will be included. The Council's Retail Study agrees that the town centre does not need any further retail expansion. It only recommends that a site for a discount foodstore on the edge of the centre is allocated in the Local Plan.
PO9783	Mr M Barlow				Town Centre	Object	Make the High Street open to traffic both ways - it does not work at the moment for people approaching the town centre from Congleton Road.	In recent years the road layouts have changed in Biddulph Town Centre and it would be up to the Highway Authority at the County Council if they consider any further changes are necessary. They have not advised the District Council as such.

PO4925	M Mitchell				Object	(Biddulph) Roads and schools cannot cope with the extra demands. The sewage works cannot cope with the extra demand. Not enough amenities to cope with the demand (buses, police etc.) Green Belt is Green Belt for a reason.	See site table for specific comments on individual sites
PO4931	Ms Philippa Swindells				Object	I object to the following site: BD062 for the following reasons; Mow Lane has over the years got more and more busy and more dangerous and cannot cope with more traffic. Over the past 2 years there have been many accidents outside our home do to speeding and the width of the road. I regularly walk my 10 yr old son to and from school and I wonder why I bother it's so dangerous – there will one day be an accident and a serious one. Sewage works – there is already a foul smell on a regular basis which will only get worse. I do wonder why anyone would want to purchase a home that close. I walk every day with my dog along that route and there is wildlife and rabbits + buzzards to name a few. Dr – how would I get an appointment at Biddulph Drs Surgery? I have to wait for an appointment after ringing at least 3 times to try to get the an available appointment then only to be told there are none left after calling from 8am.	See site table for specific comments on individual sites
PO4929	Mr R Milner				Object	I have objections to any development of Gillow Heath because: It is Green Belt Land It is an area of important bio diversity and wildlife, Gillow Heath suffers from regular raw sewage odours, building right next to that would place the residents with many days of keeping the door and windows shut and possibly ill health to young children. During heavy rain raw sewage has been seen to back fill & pollute the Biddulph Brook. Essex Drive residents already experience unacceptable amenity impacts in their homes, such as odour and raw sewage flooding. Extra load on an already over loaded sewage works can only make things worse. Above all the road's into this site are to narrow, which is contradict the SMDC LDF core strategy Policy T1.	See site table for specific comments on individual sites
PO4930	Mrs B Milner				Object	I have objections to the development of the site ref: BD062 (Gillow Heath as follows: Proximity to already inadequate sewage works. Inadequate infrastructure Wildlife and biodiversity requirements It is a Green Belt site. It is a flood site, and wet meadow. The land has an unfettered community access should be designated as visual open space. 3 public rights of way cross this Land.	See site table for specific comments on individual sites

						Significant house building in Biddulph will increase the load on a sewage works, which is already struggling to cope. This issue needs to be addressed prior to any building consent being awarded.	
PO4923	Mr D Smith				Object	Biddulph I object to building on this site for the following reasons. The SMDC local phase 1 habitat survey concluded the site is not recommended for potential development, it is the only site surveyed where this was concluded, showing that other site are more suitable. The site contains UK and Staffordshire biodiversity action plan priority habitats and species and potential to be species rich farmland site. It is very well connected to other bio diverse habitats (evidenced in the phase 1 habitat survey) I feel that the field offer lots of wildlife a home. I have seen badgers, foxes, newts, numerous wild birds. I also feel that the field is far too close to the sewage works and it would be ludicrous to build right next to the plant. The site shares a boundary with the only sewage works in Biddulph which is already working over its capacity population of 17000people. Local residents on Essex Drive /York Close/ Long Valley Road/ and Marsh Green already experience unacceptable amenity impacts in their homes such as odour and raw sewage flooding	See site table for specific comments on individual sites
PO1179	Mr D Young				Object	Biddulph Access on Akesmore Lane is poor will not take any more cars noise and pollution/more litter kids roaming up and down we do not want affordable homes built here lower the tone of the neighbourhood school, should have been built at the Old Meadows site where a school once was this is a green belt.	See site table for specific comments on individual sites
PO4919	MR LEWIS WILLIAMS				Object	I fully support objections 1-6 in the summary of objections in respect of the site number BD062 which I consider valid and appropriate to this site.	See site table for specific comments on individual sites
PO4926	Mrs B Ratcliffe				Object	Biddulph site The small from the sewage is unacceptable, this site is right up the sewage works. There have been loads of problems with the sewage flooding and going into the brook. It is working well over its capacity it is meant to, this plot of land links the brook to the Biddulph Valley way there are wildlife and plants some of which are rare. These things are important to me we all need nature. On a safety aspect there is no more access to this site other	See site table for specific comments on individual sites

						than Mow Lane/Essex Drive/York Close. Mow Lane is very narrow, there are no footpaths, there has been a lot of money spent on the playing fields and access to that is Mow Lane. There are more families and children using the fields. There is a sharp bend into Essex Drive, and there are two more sharp bends on York Close. Here are two more pinch points this site is totally unsuitable on safety aspects alone. The Victoria Colliery site would be ideal.	
PO4927	Mr K Davies				Object	Biddulph Due to the fact that I live on a flood prone area i.e. Mow Lane the current sewerage/surface water system cannot cope at the present time, therefore building any additional properties will only make the situation worse. Plus Mow Lane doesn't have a pavement and when flooded pedestrians have to wade through sewage. Whilst taking the children to school.	See site table for specific comments on individual sites
PO4928	Mrs C Hensor				Object	Biddulph For the last 40 years the public rights off way have been used by the local people and the open space supports it local wildlife, and does its job of reducing flooding. Access to the exit roads for construction or emergency vehicles would be severely restricted or impossible. Access to the site via existing roads for construction of emergency vehicles would be severely restricted or almost impossible.	See site table for specific comments on individual sites
PO4920	Mrs S Wilshaw				Object	Biddulph Close proximity to the sewage works – Local residents in and around York Close/Essex Drive already gave a great deal of experience with the foul odours. In addition in periods of heavy rain (of which there are many) raw sewage floods the system, back fills and pollutes the brook. The proposed additional housing would be even closer to these unacceptable amenity impacts in their homes: a complete contradiction of the SMDC LDF core strategy policy 4. Habitat and biodiversity – The SMDC local plan phase 1 habitat survey concluded that BD062 is the only site that was surveyed, which was not recommended for potential development. This site forms part of the exceptional wildlife corridor linking Biddulph Brook and the Biddulph Valley Way. Its inclusion for the development contradicts the 2006 act which places a	See site table for specific comments on individual sites

						duty on all public authorities to have regard to the purpose of conserving the biodiversity. Highway and Emergency access – Mow Lane (the distributor roads) and York Close/Essex Drive are too narrow, and the road bends are too small. There are 2 pinch points over the bridges on Mow Lane which cannot be avoided ad there is no alternative access to this site. In addition Mow Lane is a dangerous road with no footpath, and highly risky junction where it joins with Congleton Road. Further, when the playground is completed on Halls Road playing fields, when the playground this will only serve to increase the likelihood of both more traffic, and pedestrians. Finally, the layout of all these roads precludes all scope for any additional improvements. 40 additional houses and working parents would make both the feeder road and distributor roads, intolerable for everyone concerned. Green Belt and flood risk – This site is currently protected by Green Belt and only considered suitable for release under exceptional circumstances. Removing it prioritises development under the circumstances. Removing it prioritises development in the floodplain. Exceptional circumstances have not been met or demonstrated, as there are other suitable sites for development.	
PO4921	Mr R Wilshaw				Object	My objections to BD062 being used for housing development are as follows: Close proximity to sewage works – on several occasions during heavy rain periods, raw sewage floods from the man hole/inspection cover to the Biddulph Brook. Access to site BD062 – the feeder roads, York Close and Essex rive are both far too narrow to accommodate a further 40 properties, which could easily translate to 80 cars/vehicles, these roads struggle with existing traffic. The distributor roads with two fixed narrow bridges that with increased traffic would be significant accident areas. The site is constantly wet with surface water –with housing construction of the site, this will create a flood risk at the lower end of the fields and the tree/shrub land obviously increases this threat. Unique site: Because the site is probably the only Biddulph that has a wildlife corridor of the Biddulph Valley Way and the Biddulph Brook creating a well-connected biodiverse habitat with a wet site.	See site table for specific comments on individual sites
PO4918	Mrs S Harper				Object	Biddulph	See site table for specific comments on individual sites

ID	Consultee Name	Company / Org	Agent Name	Agent Company /Org	Support/ Object/ General Comment	Consultee Comments	Officer Response
						When we 1 st moved here the area was very quiet. Children could play in the street there was little traffic on Mow Lane. Now, the road has become a virtual car park. Every house as 2 cars, Mow Lane is like a major highway with cars in and out of Essex Drive. I have lost 2 wing mirrors and 4 tyres in Mow Lane, having being forced off the road by speeding vans in the middle of the road. This situation will only be made worse if there is an increase in traffic.	
PO4917	Mr G Harper				Object	Biddulph f this land is lost it will have a devastating effect on my special needs daughter it is the only place she feels happy and relaxed feeding the bird's squirrels, badgers etc. She is unable to cope with crowds + hustle and bustle around her, Mow Lane is a nightmare road it is so thin and had 4 blind bends and no sidewalks/pavements.	See site table for specific comments on individual sites
