ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage; however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is within 1,250m from Churnet Valley SSSI, the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that site has little potential to support protected species apart from foraging bats and badger, and is fairly poorly connected to the wider countryside, though as a species rich hedgerow is present the site is attributed some ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?

SA Objective	Assessment Criteria - Does the site (IP011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 400m of one grade II* listed asset and twenty four grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be within 1,250m of Churnet Valley SSSI and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (IP011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Ipstones has scope to have a positive effect on the vitality and viability of Ipstones and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is within 1,000m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects:			
The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of existing employment is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

IP012A

SA Objective	Assessment Criteria - Does the site (IP012A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? 	<p>The development of this site, a greenfield site that is outside of the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is located on the edge of the village and is within 400m of the village centre and the limited range of services and facilities that can be found here that could serve prospective residents of the site. It should be noted that Ipstones does not have a secondary school but that the current supply of educational services and facilities exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 400m of a GP surgery. It should be noted that the current supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local</p>	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 20 dwellings and therefore also</p>	++

SA Objective	Assessment Criteria - Does the site (IP012A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> Offer opportunities to enable people to meet their needs within their existing communities? Offer opportunities to ensure that people can afford their housing? 	<p>provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> Offer opportunities to minimise impacts on existing traffic congestion? Support the use of public transport? Support safe walking and cycling? Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 400m of the village centre of Ipstones and a GP surgery as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ENVIRONMENTAL			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Ipstones has scope to have a positive effect on the vitality and viability of Ipstones and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is within 1,000m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<p>Page 141</p> <p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 35 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of existing employment is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to designated and historic assets.</p>

SOCIAL			

SA Objective	Assessment Criteria - Does the site (IP015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	<p>The development of this site, a greenfield site that is outside of the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is located on the edge of the village and is within 800m of the village centre and the limited range of services and facilities that can be found here that could serve prospective residents of the site. It should be noted that Ipstones does not have a secondary school but that the current supply of educational services and facilities exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. It should be noted that the current supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate</p>	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 22 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (IP015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> Offer opportunities to enable people to meet their needs within their existing communities? Offer opportunities to ensure that people can afford their housing? 		
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> Offer opportunities to minimise impacts on existing traffic congestion? Support the use of public transport? Support safe walking and cycling? Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	As noted previously, the site is within 800m of the village centre of Ipostones and a GP surgery as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a neutral effect on this Objective.	0
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+

SA Objective	Assessment Criteria - Does the site (IP015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is within 400m from Churnet Valley SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The Ecological Study (2015) notes that the site has low potential to support protected species as the habitats are species poor and poorly connected to other more biodiverse habitats, therefore the site is deemed as having low ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? Deliver development that helps to minimise the loss of greenfield land? Offer opportunities to reduce land contamination / instability? Deliver development that helps reduce the amount of derelict land? Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 50m of two grade II listed assets and within 400m of eight grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the of these historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>

SA Objective	Assessment Criteria - Does the site (IP015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be within 400m of Churnet Valley SSSI and could increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of a residential site with good access to the village centre of Ipstones has scope to have a positive effect on the vitality and viability of Ipstones and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	<p>The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (IP015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		The proposed delivery of circa 22 dwellings is considered to have a significant positive effect, as is the site's proximity to areas of existing employment. Similarly, the site's accessibility to health care and open space is likely to have a positive effect. However, the site is in proximity to a designated asset, Churnet Valley SSSI which is likely to have a significant negative effect, as could the site's proximity to listed assets. The development of greenfield, grade 4 ALC land is assessed as having a negative effect.

SA Objective	Assessment Criteria - Does the site (KG059)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	The site is within 1,000m from Churnet Valley SSSI and Frogghall Meadow and Pastures SSSI, the nearest designated assets, and, as such, is considered to have an effect on this asset. This site has not been subject to an ecology survey, so the exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? 	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 3 ALC land so	-/?

SA Objective	Assessment Criteria - Does the site (KG059)...?	Commentary on likely nature of effects of site allocation	Overall assessment
land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	The site is within 50m of one grade II listed assets and within 400m of eight grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the of these historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	The site would be within 1,000m of Churnet Valley SSSI and Frogghall Meadow and Pastures SSSI and could increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural	+

SA Objective	Assessment Criteria - Does the site (KG059)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Ipstones has scope to have a positive effect on the vitality and viability of Ipstones and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects:			
The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. Similarly, the site's proximity to historic assets and the development of greenfield, grade 3 ALC land is likely to also have a significant negative effect. The site's proximity to designated assets is likely to have a negative effect.

Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>

SA Objective	Assessment Criteria - Does the site (KG019)...?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Ipstones has scope to have a positive effect on the vitality and viability of Ipstones and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. Similarly, development of greenfield, grade 3 ALC land is likely to also have a significant negative effect. The site's proximity to designated and historic assets is likely to have a negative effect.</p>			

Table 12.189

SOCIAL			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	<p>The development of this site, a greenfield site that is outside of the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is located outside of the village, it is within 800m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Kingsley does not have a secondary school but that the current supply of educational services and facilities exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Kingsley does not have a GP surgery and, accordingly, the current supply of health care services and facilities is falls short of demand and the situation is expected to worsen in the future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (KG026A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 30 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	As noted previously, the site is within 800m of the village centre of Kingsley as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help 	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+

16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> ● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of a residential site with good access to the village centre of Ipstones has scope to have a positive effect on the vitality and viability of Ipstones and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> ● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> ● Help meet the employment needs of local people? ● Help increase economic activity levels? ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 	<p>The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (KG049A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> Help to reduce health inequalities? Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>Accordingly, the current supply of health care services and facilities is falls short of demand and the situation is expected to worsen in the future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> Deliver development that reduces actual levels of crime? Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? Offer opportunities to enable people to meet their needs within their existing communities? Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 35 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> Offer opportunities to minimise impacts on existing traffic congestion? Support the use of public transport? Support safe walking and cycling? Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 400m of the village centre of Kingsley as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (KG049A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	1/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is within 1,000m from Churnet Valley SSSI, the nearest designated assets, and, as such, is considered to have an effect on this asset. This site has not been subject to an ecology survey, so the exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? Deliver development that helps to minimise the loss of greenfield land? Offer opportunities to reduce land contamination / instability? Deliver development that helps reduce the amount of derelict land? Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 3 ALC land so development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope</p>	0

SA Objective	Assessment Criteria - Does the site (KG049A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	<p>that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 400m of seven grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the of these historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be within 1,000m from Churnet Valley SSSI and could increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of a residential site with good access to the village centre of Ipstones has scope to have a positive effect on the vitality and viability of Ipstones and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (KG049A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> ● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> ● Help meet the employment needs of local people? ● Help increase economic activity levels? ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 	<p>The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	<p>--</p>
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 35 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. Similarly, development of greenfield, grade 3 ALC land is likely to also have a significant negative effect. The site's proximity to designated and historic assets is likely to have a negative effect.</p>

12.4.3 Larger villages: Upper Tean to Werrington & Cellarhead

Upper Tean

Potentially suitable sites (5+ dwellings) - within the Development Boundary

UT011/014

SA Objective	Assessment Criteria - Does the site (UT011/14)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? 	The development of this site, a mixed brownfield and greenfield site that is within the settlement boundary, could help to improve the social and environmental quality of the village centre. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to shops, services and facilities.	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	The site is located on the edge of the village and is within 800m of the village centre and the limited range of services and facilities that can be found here that could serve prospective residents and employees of the site. It should be noted that Upper Tean does not have a secondary school but that the current supply of educational services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a neutral effect on this Objective.	0
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	The location of this site should provide residents and employees with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. It should be noted that the current supply of health care services and facilities currently falls short of demand and the situation is expected to worsen in the future. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (UT011/14)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	Based on the SHLAA (2015), assessment of this site, it is considered that the site could accommodate circa 20 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	As noted previously, the site is within 800m of the village centre of Upper Tean and a GP surgery as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	1/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? 	Part of the site is located within a flood zone 3 area and, as such, it can be considered that the site would be subject to risk from flooding.	--

SA Objective	Assessment Criteria - Does the site (UT011/14)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> Offer opportunities to reduce risk of flooding e.g . by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	<p>The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant negative effect on this objective.</p>	
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is within 2,500m from Cecilly Brook (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site has species poor habitats present on site, but good connectivity to the wider countryside and potential to support roosting bats, reptiles and terrestrial populations of amphibians, therefore the site is attributed some ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? Deliver development that helps to minimise the loss of greenfield land? Offer opportunities to reduce land contamination / instability? The development of a brownfield site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is within 3,000m from Cecilly Brook (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site is set within an urban environment with little connectivity to the wider countryside which lowers the biodiversity value of the area considerably. The site has mostly low biodiversity value overall and is therefore deemed to have low ecological importance. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
11. To safeguard the best and most versatile agricultural land; improve	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? 	<p>As noted, this site has been assessed as being on brownfield land. However, the land has also been assessed as grade 3 ALC land so</p>	-/?

SA Objective	Assessment Criteria - Does the site (UT019)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>The development of this brownfield site could enable the re-use of existing buildings. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>13. To protect and enhance the character of towns / villages and heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 50m of seven grade II listed assets and 400m of two grade II* listed assets and three grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	--/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be within 3,000m of Cecilly Brook (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there would not be effects on landscape character. Proposal specific information is required to assess the impact on the Needwood & South Derbyshire Claylands National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (UT019)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> ● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Upper Tean has scope to have a positive effect on the vitality and viability of Upper Tean and the wider District, as new residents could be expected to increase footfall. However, the site itself is an area of employment and the development of this site would result in the loss of employment. Overall, this has been assessed as having a negative effect on this Objective.	-
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> ● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the site itself is an area of employment and the development of this site would result in the loss of employment. Overall, this site has been assessed as having a negative effect on this Objective.	-
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> ● Help meet the employment needs of local people? ● Help increase economic activity levels? ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. However, the site itself is an area of employment and the development of this site would result in the loss of employment. Overall, this site has been assessed as having a negative effect on this Objective.	-
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the site is located in proximity to historic assets which is likely to have a significant negative effect, as could the development of grade 3 ALC land. The site's inaccessibility to areas of existing employment is likely to have a negative effect.</p>

SOCIAL			

SA Objective	Assessment Criteria - Does the site (UT021)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? 	<p>The development of this site, a greenfield site that is outside the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is located on the edge of the village and is within 400m of the village centre and the limited range of services and facilities that can be found here that could serve prospective residents and employees of the site. The site is in proximity of Greatwood Primary School. It should be noted that Upper Tean does not have a secondary school but that the current supply of educational services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents and employees with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. It should be noted that the current supply of health care services and facilities currently falls short of demand and the situation is expected to worsen in the future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 20 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (UT021)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 400m of the village centre of Upper Tean and 800m from a GP surgery as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
ENVIRONMENTAL			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p>+</p>
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	<p>i/?</p>
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of a brownfield site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<p>10. To identify, conserve and enhance biodiversity resources and to test the</p>	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? 	<p>The site is more than 3,250m from Cecilly Brook (LNR), the nearest designated asset, and, as such, is not considered to have an effect on</p>	<p>-/?</p>

SA Objective	Assessment Criteria - Does the site (UT021)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>this asset. The Ecological Study (2015) notes that the site has low ecological value and is poorly connected to habitats within a rural landscape. However, the site has two trees with bat potential and a species rich hedgerow therefore is deemed to have some ecological value overall. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? Deliver development that helps to minimise the loss of greenfield land? Offer opportunities to reduce land contamination / instability? Deliver development that helps reduce the amount of derelict land? Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 3 ALC land so development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 400m from two grade II* listed assets and nine grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>
<p>14. To protect and enhance the character and appearance of the landscape including</p>	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? 	<p>The site would be within 3,250m of Cecilly Brook (LNR) and would not increase external pressures on these sites. Given the location of the</p>	<p>+</p>

Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Needwood & South Derbyshire Claylands National</p>	+

SA Objective	Assessment Criteria - Does the site (UT041)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Upper Tean has scope to have a positive effect on the vitality and viability of Upper Tean and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is within 1,000m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment and open space is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to historic assets.</p>

Waterhouses

Potentially suitable sites (5+ dwellings) - within the Development Boundary

WA004

SA Objective	Assessment Criteria - Does the site (WA004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	The development of this site, a greenfield site that is within the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	The site is located on the edge of the village and is within 400m of the village centre and the limited range of services and facilities that can be found here that could serve prospective residents and employees of the site. It should be noted that Waterhouses does not have a secondary school but that the current supply of educational services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.	+
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? 	The location of this site should provide residents and employees with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 400m of a GP surgery. It	+

SA Objective	Assessment Criteria - Does the site (WA004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> Help to reduce health inequalities? Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>should be noted that the current supply of health care services and facilities currently falls short of demand and the situation is expected to worsen in the future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> Deliver development that reduces actual levels of crime? Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? Offer opportunities to enable people to meet their needs within their existing communities? Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 36 dwellings and therefore also provide a quantum of affordable housing on site. It is acknowledged that the site is proposed as mixed use which may reduce the quantum of housing delivered by this site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> Offer opportunities to minimise impacts on existing traffic congestion? Support the use of public transport? Support safe walking and cycling? Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 400m of the village centre of Waterhouses and a GP surgery as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (WA004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	1/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of a brownfield site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is within 750m from Caudon Railway Cutting SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The Ecological Study (2015) notes that un-mitigated ecological impacts of development may be significant. The site has little potential to support protected species apart from roosting/foraging bats, badger and breeding birds, but is connected adjacent to other species rich grasslands. Semi-improved species rich grasslands are uncommon and should be preserved, therefore the site is attributed ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site (WA004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	The site is within 400m from four grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	The site would be within 750m of Cauldon Railway Cutting SSSI and could increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the White Peak National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	The proposed mixed use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. 7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (WA006)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	1/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of a brownfield site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is within 750m from Caudon Railway Cutting SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The Ecological Study (2015) notes that the site has little potential to support protected species apart from potentially roosting/foraging bats and badger, and is fairly poorly connected to the wider countryside. Nevertheless the site is afforded ecological value due to the bat roosting potential of these two trees. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? Deliver development that helps to minimise the loss of greenfield land? Offer opportunities to reduce land contamination / instability? Deliver development that helps reduce the amount of derelict land? Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site (WA006)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	The site is within 400m from three grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	The site would be within 750m of Caudon Railway Cutting SSSI and could increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the White Peak National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Waterhouses has scope to have a positive effect on the vitality and viability of Waterhouses and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (WA006)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 30 dwellings is considered to have a significant positive effect, as is the site accessibility to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the site's proximity to a designated asset is likely to have a negative effect. The development of greenfield, grade 4 ALC land is likely to also have a negative effect, as could the site's proximity to historic assets.</p>

To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Wetley Rocks has scope to have a positive effect on the vitality and viability of Wetley Rocks and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (WR015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and low ecological value of the site is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to historic assets.</p>

ENVIRONMENTAL			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of a brownfield site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? 	<p>The site is within 1,500m from Churnet Valley SSSI, the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site is directly adjacent to a small housing estate, species poor grasslands, and has</p>	-/?

SA Objective	Assessment Criteria - Does the site (WR005)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>poor connectivity to the wider countryside which reduces the value of the site as a whole in terms of biodiversity. The site also has mostly low biodiversity value overall in terms of area but is considered to have some ecological value in terms of its loss within the wider countryside due to the presence of the two trees with bat roosting potential. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 400m from two grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?

SA Objective	Assessment Criteria - Does the site (WR005)...?	Commentary on likely nature of effects of site allocation	Overall assessment
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	The site would be within 1,500m of Churnet Valley SSSI and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of a residential site with good access to the village centre of Werrington and Cellarhead has scope to have a positive effect on the vitality and viability of Werrington and Cellarhead and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	<p>The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
<p>Summary of overall assessment and likely significant effects:</p>			

SA Objective	Assessment Criteria - Does the site (WE019)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>that the current supply of health care services and facilities currently falls short of demand and the situation is likely to worsen in the future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 50 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 800m of the village centre of Werrington and Cellarhead and a GP surgery as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (WE019)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	1/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is within 100m from Wetley Moor SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The Ecological study (2015) notes that the site itself has seven trees with bat potential, species rich hedgerow and a large area of tall ruderal vegetation connected to a series of other hedgerows and habitats. These features culminate in the assessment that the site is attributed ecological value in terms of its loss within the wider countryside. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources, and protect and enhance geological resources.	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site (WE019)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	The site is within 400m of one grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	The site would be within 100m from Wetley Moor SSSI and would increase external pressures on these sites. Given the location of the site, it is considered that there would be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Werrington and Cellarhead has scope to have a positive effect on the vitality and viability of Werrington and Cellarhead and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (WE019)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p>P Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated assets. Similarly, the development of greenfield, grade 4 ALC land and the site's proximity to historic assets is assessed as having a negative effect.</p>

The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is more than 1,750m from Wetley Moor SSSI, the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological study (2015) notes that the site has mostly low biodiversity value overall in terms of area and is directly adjacent to a small housing estate and species poor grasslands. The site does have some good connectivity to a pond which increases chance of the site support terrestrial populations of amphibians and reptiles. The site is therefore deemed as having some ecological value in terms of its potential loss within the wider countryside. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>11. To safeguard the best and most versatile agricultural land, improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>

SA Objective	Assessment Criteria - Does the site (WE033)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 400m of three grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be more than 1,750m from Wetley Moor SSSI and would not increase external pressures on these sites. Given the location of the site, it is considered that there would be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ECONOMIC			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> ● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Werrington and Cellarhead and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> ● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0

SA Objective	Assessment Criteria - Does the site (WE033)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 60 dwellings is considered to have a significant positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect. Similarly, the site's inaccessibility to services and facilities and areas of open space is likely to have a negative effect. Also, the site's ecological value is likely to have a negative effect, as could the development of greenfield, grade 4 ALC land and the site's proximity to historic assets is assessed as having a negative effect.</p>

SA Objective	Assessment Criteria - Does the site (WE040)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of life where people work and live.	<ul style="list-style-type: none"> Make a positive contribution towards community cohesion? Offer opportunity to improve neighbourhood quality? Offer opportunity to provide open space and support Green Infrastructure? Risk unacceptable light and noise pollution? Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	The development of this site, a greenfield site that is set outside of the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social	<ul style="list-style-type: none"> Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender 	The site is located in the centre of the village and is within 800m of the village centre and the range of services and facilities that can be found here that could serve prospective residents of the site. It should be	+

SA Objective	Assessment Criteria - Does the site (WE040)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>exclusion by improving access to jobs, services and facilities.</p>	<p>reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</p> <ul style="list-style-type: none"> ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>noted that the current supply of educational services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. It should be noted that the current supply of health care services and facilities currently falls short of demand and the situation is likely to worsen in the future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 7 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 800m of the village centre of Werrington and Cellarhead and a GP surgery as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 1,000m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (WE040)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
8. To improve air quality.	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is within 200m of Wetley Moor SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The Ecological Study (2015) notes that the site itself has mostly low biodiversity value overall with fairly good connectivity to Wetley Moor SSSI and is deemed as having some ecological value in terms of its loss within the wider countryside due to its proximity to the SSSI. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	--/?
11. To safeguard the best and most versatile agricultural	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so</p>	-

However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> ● Help meet the employment needs of local people? ● Help increase economic activity levels? ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 	<p>The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--

SA Objective	Assessment Criteria - Does the site (WE041)...?	Commentary on likely nature of effects of site allocation	Overall assessment
Summary of overall assessment and likely significant effects:			
The proposed delivery of circa 22 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated and historic assets. Similarly, the development of greenfield, grade 4 ALC land is likely to have a negative effect.			
Table 12.219			
WE052			
SOCIAL			
1. To improve community cohesion and the quality of work and life for people who work and live.	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	<p>The development of this site, a greenfield site that is set outside of the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is located in the centre of the village and is within 400m of the village centre and the range of services and facilities that can be found here that could serve prospective residents of the site. It should be noted that the current supply of educational services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (WE052)...?	Commentary on likely nature of effects of site allocation	Overall assessment
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. It should be noted that the current supply of health care services and facilities currently falls short of demand and the situation is likely to worsen in the future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 25 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 400m of the village centre of Werrington and Cellarhead and 800m from a GP surgery as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (WE052)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	1/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is within 600m of Wetley Moor SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The Ecological Study (2015) notes that the site is directly adjacent to a housing estate and species poor grasslands, and has poor connectivity to more biodiverse habitats. However, the site is deemed as having some ecological value in terms of its loss within the wider countryside due to having five trees that have potential to support roosting bats. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site (WE052)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	The site is within 400m of one grade II listed asset. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	The site would be within 600m from Wetley Moor SSSI and would increase external pressures on these sites. Given the location of the site, it is considered that there would be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Werrington and Cellarhead has scope to have a positive effect on the vitality and viability of Werrington and Cellarhead and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (WE052)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 25 dwellings is considered to have a significant positive effect, as is the site's accessibility to services and facilities. Similarly, the site's accessibility to open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect. The site's proximity to designated historic assets is likely to have a negative effect, as could the development of greenfield, grade 4 ALC land.</p>

<p>archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>heritage assets. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be within 800m from Wetley Moor SSSI and would increase external pressures on these sites. Given the location of the site, it is considered that there would be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ECONOMIC			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of a residential site with good access to the village centre of Werrington and Cellarhead has scope to have a positive effect on the vitality and viability of Werrington and Cellarhead and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0

SA Objective	Assessment Criteria - Does the site (WE069)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to services and facilities and areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to historic assets. The site's proximity to designated assets is likely to have a negative effect, as could the development of greenfield, grade 4 ALC land.</p>

ECONOMIC			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of an employment site within the village centre has the scope to have a positive effect on the vitality and viability of Werrington and Cellarhead and the wider District, as new employment could be expected to increase footfall in the nearby village centre. Overall, this site has been assessed as having a significant positive effect on this objective.</p>	++
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Werrington and Cellarhead as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.</p>	++
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	<p>The site is over 1,500m from existing local employment provision but the site would generate new employment provision. Overall, this site has been assessed as having a significant positive effect on this objective.</p>	++
<p>Summary of overall assessment and likely significant effects:</p>			

SA Objective	Assessment Criteria - Does the site (WE002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide employees with good access to areas of open space which should help to support healthy lifestyles. However, the site is more than 2,000m from a GP surgery. It should be noted that the current supply of health care services and facilities currently falls short of demand and the situation is likely to worsen in the future. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>This site has been proposed for employment uses with regards to this assessment. Therefore the development would provide no housing. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is more than 2,000m from the village centre of Werrington and Cellarhead and a GP surgery, but is adjacent to an area of open space. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Similarly, the site is more than 2,000m from the village centre and could increase the need to travel. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--

SA Objective	Assessment Criteria - Does the site (WE002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. It should be noted that the site is within 150m from a candidate AQMA. Overall, this site has been assessed as having an negative effect on this Objective.</p>	-
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is more than 2,000m from Churnet Valley SSSI and Wetley Moor SSSI, the nearest designated assets, and, as such, is not considered to have an effect on this asset. The Ecological study (2015) notes that the site has species poor habitats present on site and low potential to support protected species, therefore is attributed low ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site (WE002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 400m of three grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be more than 2,000m from Churnet Valley SSSI and Wetley Rocks SSSI and would not increase external pressures on these sites. Given the location of the site, it is considered that there would be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed employment use of this site provides scope for the development of this site to have a positive effect on investment in culture and tourism within the town and wider district, however this is dependent on proposal specific information. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ECONOMIC			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of an employment site within the village centre has the scope to have a positive effect on the vitality and viability of Werrington and Cellarhead and the wider District, as new employment could be expected to increase footfall in the nearby village centre. Overall, this site has been assessed as having a significant positive effect on this objective.</p>	++

SA Objective	Assessment Criteria - Does the site (WE002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Werrington and Cellarhead as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.	++
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m from existing local employment provision but the site would generate new employment provision. Overall, this site has been assessed as having a significant positive effect on this objective.	++
<p>Summary of overall assessment and likely significant effects:</p> <p>The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site's low ecological value is likely to have a positive effect. However, the remote nature of the site is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the proximity to historic assets and distance away from services and facilities and areas of open space.</p>

SOCIAL			
1. To improve community cohesion and the quality of life for people who work and live.	<ul style="list-style-type: none"> Make a positive contribution towards community cohesion? Offer opportunity to improve neighbourhood quality? Offer opportunity to provide open space and support Green Infrastructure? Risk unacceptable light and noise pollution? Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	The development of this site, a greenfield site that is outside of the settlement boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Bagnall does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> Help improve health or access to health facilities? Help promote healthy lifestyles? 	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Bagnall does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (BG008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 		
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 10 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	As noted previously, the site is within 400m of the village centre of Bagnall as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+

9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is more than 1,500m from Bagnall Road Wood (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site itself has four trees with bat potential and a species rich hedgerow and is attributed some ecological value, although it is fairly poorly connected to other biodiverse habitats within the locality. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site (BG008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	The site is within 400m from ten grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	The site would be more than 1,500m of Bagnall Road Wood (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Bagnall has scope to have a positive effect on the vitality and viability of Bagnall and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (BG008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 10 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land and the ecological value of the site is likely to also have a negative effect.</p>

SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	The development of this site, a greenfield site that is outside of the settlement boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Blackshaw Moor does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Blackshaw Moor does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (BL006)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> Deliver development that reduces actual levels of crime? Deliver development that helps to reduce fear of crime? 	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? Offer opportunities to enable people to meet their needs within their existing communities? Offer opportunities to ensure that people can afford their housing? 	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 12 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> Offer opportunities to minimise impacts on existing traffic congestion? Support the use of public transport? Support safe walking and cycling? Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	As noted previously, the site is within 400m of the village centre of Blackshaw Moor as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

SA Objective	Assessment Criteria - Does the site (BL006)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage; however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<p>10. To identify, conserve and enhance biodiversity resources and to test the local policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is more than 1,250m from Thomcliffe Moor SSSI, the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site has potential for protected species to be present due to the buildings present on site and has been deemed to have some ecological value despite fairly poor connectivity to the wider countryside. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>

SA Objective	Assessment Criteria - Does the site (BL006)...?	Commentary on likely nature of effects of site allocation	Overall assessment
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	The site is more than 400m from any listed assets. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	The site would be more than 1,250m of Thornclyffe Moor SSSI and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact on the South West Peak National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Blackshaw Moor has scope to have a positive effect on the vitality and viability of Blackshaw Moor and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (CV005)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is more than 2,000m from Coyney Woods (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site contains fairly species poor habitats and common species, although it is fairly well connected to the wider countryside. As two buildings are present with the potential to support roosting bats the site is deemed to have some ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 3 ALC land so development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>

SA Objective	Assessment Criteria - Does the site (CV005)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 50m of one grade II listed asset and 400m from one grade II* listed asset and fourteen grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be more than 2,000m from Coyney Woods (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
ECONOMIC			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of a residential site with good access to the village centre of Caverswall has scope to have a positive effect on the vitality and viability of Caverswall and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>

SA Objective	Assessment Criteria - Does the site (CV005)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 10 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land and the site's proximity to historic assets. The ecological value of the site is likely to have a negative effect.</p>

SA Objective	Assessment Criteria - Does the site (CV004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> Make a positive contribution towards community cohesion? Offer opportunity to improve neighbourhood quality? Offer opportunity to provide open space and support Green Infrastructure? Risk unacceptable light and noise pollution? Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	The development of this site, a greenfield site that is outside the settlement boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (CV004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Caverswall does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Caverswall does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 8 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 400m of the village centre of Caverswall as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (CV004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SUDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SUDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is more than 2,000m from Coyney Woods (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the majority of the site contains fairly species poor habitats although they are well connected to the wider countryside they have been deemed to have low ecological value overall. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?

ECONOMIC			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> ● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of a residential site with good access to the village centre of Caverswall has scope to have a positive effect on the vitality and viability of Caverswall and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> ● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> ● Help meet the employment needs of local people? ● Help increase economic activity levels? ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 	<p>The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	<p>--</p>
<p>Summary of overall assessment and likely significant effects:</p>			

SA Objective	Assessment Criteria - Does the site (CV006)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		The proposed delivery of circa 8 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land and the site's proximity to historic assets. The ecological value of the site is likely to have a negative effect.

SOIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	The development of this site, a greenfield site that is outside the settlement boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage 	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Cookshill does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--

Page 1636

SA Objective	Assessment Criteria - Does the site (CL004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> / civil partnership, pregnancy / maternity / race, religion / belief, sex and sexual orientation? Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 		
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> Help improve health or access to health facilities? Help promote healthy lifestyles? Help to reduce health inequalities? Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Cookshill does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> Deliver development that reduces actual levels of crime? Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social / extra care housing.	<ul style="list-style-type: none"> Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? Offer opportunities to enable people to meet their needs within their existing communities? Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 20 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> Offer opportunities to minimise impacts on existing traffic congestion? Support the use of public transport? Support safe walking and cycling? Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 400m of the village centre of Cookshill as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (CL004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	<p>i/?</p>
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is within 1,250m of Coyney Woods (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site mostly contains fairly species poor habitats but with some potential to support European and UK protected species along the dry ditch and connecting hedgerow, which is well connected to potentially biodiverse habitats and able to support European and UK protected species. Therefore the site is considered to have ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve versatile agricultural land; improve</p>	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 3 ALC land so</p>	<p>--/?</p>

SA Objective	Assessment Criteria - Does the site (CL004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is more than 400m from a listed asset. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be within 1,250m from Coyney Woods (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (CL004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Cookshill has scope to have a positive effect on the vitality and viability of Cookshill and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects:			
The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and location away from historic assets is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land. The ecological value of the site is likely to have a negative effect.

Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> • Offer opportunities to minimise impacts on existing traffic congestion? • Support the use of public transport? • Support safe walking and cycling? • Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	As noted previously, the site is within 400m of the village centre of Checkley as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (CK007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	The site is more than 4,500m from Cecilly Brook (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site has very low biodiversity value overall in terms of area, is adjacent to a main road to the south and farm buildings to the east, dwellings to the west and species poor grasslands to the north with poor connectivity. Therefore the site is considered to have low ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
11. To safeguard the best and most versatile agricultural land; improve	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? 	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 3 ALC land so	--/?

<p>soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 400m from one scheduled monument, one grade I listed asset and nine grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be more than 4,500m from Cecilly Brook (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact on the Needwood and South Derbyshire Claylands National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (CK007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Checkley has scope to have a positive effect on the vitality and viability of Checkley and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and low ecological value is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land. The site's proximity to historic assets is likely to have a negative effect.</p>

Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	The site would be more than 4,500m from Cecilly Brook (LNR) and Churnet Valley SSSI and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Dilhorne has scope to have a positive effect on the vitality and viability of Dilhorne and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (DL004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and distance from designated assets is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land is likely to have a negative effect.</p>

SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> Make a positive contribution towards community cohesion? Offer opportunity to improve neighbourhood quality? Offer opportunity to provide open space and support Green Infrastructure? 	The development of this site, a greenfield site could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (DL013)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Dilhorne does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	<p>--</p>
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Dilhorne does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 6 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 400m of the village centre of Dilhorne as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (DL013)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is more than 4,500m from Cecilly Brook (LNR) and Churnet Valley SSSI, the nearest designated assets, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site is attributed low ecological value as it has mostly low biodiversity value overall in terms of area, is adjacent to a road to the north, farm buildings and dwellings on the edge of a small village with fairly poor connectivity to the wider countryside through one hedgerow. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?

SA Objective	Assessment Criteria - Does the site (DL013)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 50m from one grade II listed asset and within 400m from six grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be more than 4,500m from Cecilly Brook (LNR) and Churnet Valley SSSI and would not increase external pressures on these sites. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 15 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	As noted previously, the site is within 400m of the village centre of Dilhorne as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (DL026)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	<p>1/?</p>
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is more than 4,500m from Cecilly Brook (LNR) and Churnet Valley SSSI, the nearest designated assets, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site has potential for protected species to be present due to proximity of ponds and wetland habitats and the good connectivity to these potentially biodiverse habitats through species rich hedgerows and adjacent habitat to the wider countryside. Therefore the site is deemed to have some ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources, and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>

SA Objective	Assessment Criteria - Does the site (DL026)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 400m from seven grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be more than 4,500m from Cecilly Brook (LNR) and Churnet Valley SSSI and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
ECONOMIC			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> ● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of a residential site with good access to the village centre of Dilhorne has scope to have a positive effect on the vitality and viability of Dilhorne and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	<p>+</p>

SA Objective	Assessment Criteria - Does the site (DL026)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's ecological value and proximity to historic assets.</p>

To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	The site is within 400m from four grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	The site would be within 500m from Churnet Valley SSSI and would increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			

SA Objective	Assessment Criteria - Does the site (FO008)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> ● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of a residential site with good access to the village centre of Foxt has scope to have a positive effect on the vitality and viability of Foxt and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> ● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> ● Help meet the employment needs of local people? ● Help increase economic activity levels? ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 	<p>The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p>++</p>
<p>Summary of overall assessment and likely significant effects: The site has good accessibility to areas of existing employment which is likely to have a significant positive effect. Similarly, the proposed delivery of circa 8 dwellings is considered to have a positive effect, as could the site's accessibility to areas of open space. However, the site is inaccessible to services and facilities and is in proximity to designated assets, both of which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to historic assets.</p>

SA Objective	Assessment Criteria - Does the site (HO002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 		
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 7 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	As noted previously, the site is within 400m of the village centre of Hollington as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (HO002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	1/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is more than 3,500m from Dimmings Dale and The Ranger SSSI and Saltersford Lane Meadows SSSI, the nearest designated assets, and, as such, is not considered to have an effect on this asset. This site has not been subject to an ecology survey, so the exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? Deliver development that helps to minimise the loss of greenfield land? Offer opportunities to reduce land contamination / instability? Deliver development that helps reduce the amount of derelict land? Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope</p>	0

Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is more than 400m from any listed assets. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be within 750m from Hulme Quarry SSSI and would increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ECONOMIC			

SA Objective	Assessment Criteria - Does the site (HU002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Hulme has scope to have a positive effect on the vitality and viability of Hulme and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is within 1,000m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 5 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space, areas of existing employment and location away from historic assets is likely to have a positive effect, as could the development of brownfield land. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to designated assets.</p>

SA Objective	Assessment Criteria - Does the site (KH009)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Kingsley Holt has scope to have a positive effect on the vitality and viability of Kingsley Holt and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is within 1,000m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects:			
The proposed delivery of circa 9 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and areas of existing employment is likely to have a positive effect, as could its location away from historic assets and the development of brownfield land. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to designated assets.

To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? Offer opportunities to enable people to meet their needs within their existing communities? Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 6 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> Offer opportunities to minimise impacts on existing traffic congestion? Support the use of public transport? Support safe walking and cycling? Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 400m of the village centre of Leekbrook as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (LB011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	1/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>Part of the site is located within a flood zone 2 area and, as such, it can be considered that the site would be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to an increased water demand within the District. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.</p>	-
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is within 1,750m of Ladderedge Country Park (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. This site has not been subject to an ecology survey, so the exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope</p>	0

SA Objective	Assessment Criteria - Does the site (LB011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	<p>that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is more than 400m from any listed assets. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be within 1,750m from Ladderedge Country Park (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of a residential site with good access to the village centre of Leekbrook has scope to have a positive effect on the vitality and viability of Leekbrook and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (LB011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<p>Summary of overall assessment and likely significant effects:</p> <p>The site's accessibility to areas of existing employment is likely to have a significant positive effect. Similarly, the proposed delivery of circa 6 dwellings is considered to have a positive effect, as could the site's accessibility to areas of open space and its location away from designated and historic assets. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect.</p>

ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Longsdon has scope to have a positive effect on the vitality and viability of Longsdon and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 10 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to designated and historic assets.</p>

SA Objective	Assessment Criteria - Does the site (LT001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is more than 3,500m from Cecilly Brook (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of the improved grassland area and is also directly adjacent to a housing estate and species poor grasslands. The hedgerow however has very good connectivity to the wider countryside becoming more diverse further north and should be retained and potentially qualify for SBI status, hence the site itself being attributed ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? Deliver development that helps to minimise the loss of greenfield land? Offer opportunities to reduce land contamination / instability? Deliver development that helps reduce the amount of derelict land? Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 3 ALC land so development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	--/?

SA Objective	Assessment Criteria - Does the site (LT001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	The site is within 50m of two grade II listed assets and within 400m of one scheduled monument and eight grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	The site would be more than 3.500m from Cecilly Brook (LNR) and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Needwood and South Derbyshire Claylands National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> ● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Lower Tean has scope to have a positive effect on the vitality and viability of Lower Tean and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (LT001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,000m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land and proximity to historic assets. The site's proximity to designated assets and the inaccessibility of areas of existing employment are likely to have a negative effect.</p>			
<p>Table 12.257 LT002 74</p>			
SA Objective	Assessment Criteria - Does the site (LT002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> Make a positive contribution towards community cohesion? Offer opportunity to improve neighbourhood quality? Offer opportunity to provide open space and support Green Infrastructure? 	The development of this site, a greenfield site outside the development boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (LT002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 		
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Lower Tean does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Lower Tean does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social / extra care housing.</p>	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 6 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? 	<p>As noted previously, the site is within 400m of the village centre of Lower Tean as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site</p>	+

16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Oakamoor has scope to have a positive effect on the vitality and viability of Oakamoor and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (OA026)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 11 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to designated and historic assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.</p>

SA Objective	Assessment Criteria - Does the site (OA016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> Make a positive contribution towards community cohesion? 	The development of this site, a greenfield site outside the infill boundary could be expected to have an effect on Green Infrastructure	-

SA Objective	Assessment Criteria - Does the site (OA016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	<p>and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Oakamoor does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Oakamoor does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 9 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (OA016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 400m of the village centre of Oakamoor as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
ENVIRONMENTAL			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	<p>i/?</p>
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? 	<p>The site is within 800m of Bath Pasture SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of area, despite its proximity to</p>	<p>-/?</p>

SA Objective	Assessment Criteria - Does the site (OA016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>Cotton Dell LWS. The main features of ecological interest are the semi-natural broadleaved woodland and the potential to support reptiles which warrants the site being attributed ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? Deliver development that helps to minimise the loss of greenfield land? Offer opportunities to reduce land contamination / instability? Deliver development that helps reduce the amount of derelict land? Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 400m of six grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape</p>	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? 	<p>The site would be within 800m of Bath Pasture SSSI and could increase external pressures on these sites. Given the location of the</p>	-

SA Objective	Assessment Criteria - Does the site (OA031)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> ● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Oakamoor has scope to have a positive effect on the vitality and viability of Oakamoor and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> ● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> ● Help meet the employment needs of local people? ● Help increase economic activity levels? ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (OA031)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to designated and historic assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

<p>and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 400m of two grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be more than 4,500m from Peak District Moors (South Pennine Moors Phase 1) SPA and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the South West Peak National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (RS005)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> ● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Rushton Spencer has scope to have a positive effect on the vitality and viability of Rushton Spencer and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> ● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> ● Help meet the employment needs of local people? ● Help increase economic activity levels? ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p style="text-align: center;">Summary of overall assessment and likely significant effects:</p>			
<p>The proposed delivery of circa 7 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site's inaccessibility to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to historic assets, the ecological value of the site and the development of greenfield, grade 4 ALC land are likely to have a negative effect.</p>

<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 400m of four grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be more than 4,500m from Peak District Moors (South Pennine Moors Phase 1) SPA and would not increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the South West Peak National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (RS007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
ECONOMIC			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of a residential site with good access to the village centre of Rushton Spencer has scope to have a positive effect on the vitality and viability of Rushton Spencer and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	<p>The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	<p>--</p>
<p>Summary of overall assessment and likely significant effects:</p>			
<p>The proposed delivery of circa 26 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to historic assets, the ecological importance of the site and the development of greenfield, grade 4 ALC land are likely to have a negative effect.</p>

SOCIAL			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	<p>The development of this site, a greenfield site outside of the development boundary could be expected to have an effect on the Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Rushton Spencer does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Rushton Spencer does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (RS015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 12 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 400m of the village centre of Rushton Spencer as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ENVIRONMENTAL			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+

SA Objective	Assessment Criteria - Does the site (RS015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 		
<p>10. archaeological assets along with their settings.	<ul style="list-style-type: none"> and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	The site is within 500m from Churnet Valley SSSI and could increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Whiston has scope to have a positive effect on the vitality and viability of Whiston and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (WH002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 10 dwellings and proximity to areas of existing employment is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to designated and historic assets.</p>

To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good access to the village centre of Hulme has scope to have a positive effect on the vitality and viability of Hulme and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (OC003)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 1,500m to existing areas of employment within the town of District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p>Summary of overall assessment and likely significant effects:</p> <p>The development of brownfield, grade 4 ALC land is considered to have a positive effect, as could the site's accessibility to areas of open space and the proposed delivery of circa 6 dwellings. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to designated and historic assets are likely to have a negative effect.</p>

Potentially suitable sites (5+ dwellings) - outside Infill Boundary

OC055

SA Objective	Assessment Criteria - Does the site (OC055)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> Make a positive contribution towards community cohesion? Offer opportunity to improve neighbourhood quality? Offer opportunity to provide open space and support Green Infrastructure? 	The site is on the edge of Cresswell and is outside of the infill boundary. The development of this site a greenfield site, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (OC055)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 		
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is located within 800m of the village centre of Cresswell which has insufficient services and facilities to meet the needs of the community. It should be noted that Cresswell does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide employees with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Cresswell does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social / extra care housing.</p>	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>This site has been proposed for employment uses with regards to this assessment. Therefore the development would provide no housing. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? 	<p>As noted previously, the site is within 800m of the village centre of Cresswell and adjacent to the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m</p>	+

SA Objective	Assessment Criteria - Does the site (OC055)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> Support the use of public transport? Support safe walking and cycling? Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
ENVIRONMENTAL			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	<p>Part of the site is located within flood zone 3. The development of this site could lead to an increase in waste water and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? 	<p>The site is more than 5,000m from Barlaston and Rough Close Common (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. This site has not been subject to an ecology survey, so the exact effects are uncertain.</p>	+/?

SA Objective	Assessment Criteria - Does the site (OC055)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<ul style="list-style-type: none"> ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	-
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is more than 400m away from a listed asset. Although dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of this historical heritage assets. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? 	<p>The site would avoid development within 5,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Needwood and South</p>	+

SA Objective	Assessment Criteria - Does the site (OC055)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	Derbyshire Claylands National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed employment use of this site provides scope for the development of this site to have a positive effect on investment in culture and tourism within the town and wider district, however this is dependent on proposal specific information. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of an employment site within the village centre has the scope to have a positive effect on the vitality and viability of Cresswell and the wider District, as new employment could be expected to increase footfall in the nearby village centre. Overall, this site has been assessed as having a significant positive effect on this objective.	++
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The proposed development of an employment site within the village centre has the scope to have a positive effect on the vitality and viability of Cresswell and the wider District, as new employment could be expected to increase footfall in the nearby village centre. Overall, this site has been assessed as having a significant positive effect on this objective.	++
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is proximity to areas of existing local employment provision as well as new employment provision generated by this site. Overall, this site has been assessed as having a significant positive effect on this objective.	++
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (OC055)...?	Commentary on likely nature of effects of site allocation	Overall assessment

The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site is located away from designated and historic assets. However, the site is inaccessible to services and facilities, is partially within a flood zone which are both assessed to have a significant negative effect. The development of greenfield, grade 4 ALC land is considered to have a negative effect.

SA Objective	Assessment Criteria - Does the site (TR002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> Make a positive contribution towards community cohesion? Offer opportunity to improve neighbourhood quality? Offer opportunity to provide open space and support Green Infrastructure? Risk unacceptable light and noise pollution? Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. Storage building adjacent to SW (SMD/2014/0342) approved as dwelling. Some other dwellings further west on Uttoxeter Road. But site large enough to accommodate buffers as necessary, including from road (and also amenity internally between pitches). Site is well screened from roadside. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is located on the edge of the village, it is within 800m of the village centre and the range of services and facilities that can be found here that could serve prospective residents of the site. It should be noted that the current supply of educational and community services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. It should be noted that the current supply of health care services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.</p>	i
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>The site has the potential to bring forward a minimum of 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 800m of the village centre of Blythe Bridge and Forsbrook as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop and 1,000m of a train station. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ENVIRONMENTAL			

SA Objective	Assessment Criteria - Does the site (TR002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. However the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a neutral impact on this Objective.</p>	0
8. To improve air quality.	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of a brownfield site could lead to an increase in wastewater, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a negative effect on this objective, although the exact effects are uncertain.</p>	-/?
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is more than 3,500m from Barlaston and Rough Close Common (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. The Ecological Study (2015) notes that the site consists of a working yard and its associated buildings with 76% of the site being hard standing. The remaining habitats present on site are particularly common in the UK and have low biodiversity value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.</p>	0/?
11. To safeguard the best and most versatile agricultural land; improve soil	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? 	<p>As noted, this site has been assessed as being on previously developed land so development of this site would not result in the</p>	+

<p>and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>loss of best and most versatile land. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 50m of one grade II listed asset. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the historical heritage assets and its setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be more than 3,500m of Barlaston and Rough Close Common (LNR). Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (TR002)...?	Commentary on likely nature of effects of site allocation	Overall assessment
ECONOMIC			
16. To safeguard the vitality and diversity of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The site could deliver a minimum of 8 pitches and with good access to the village centre of Blythe Bridge and Forsbrook has scope to have a positive effect on the vitality and viability of Blythe Bridge and Forsbrook and the wider District, since new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The site could deliver a minimum of 8 pitches however the opportunities for direct economic benefits would be limited. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is within 500m of existing areas of employment within the village or District would could provide accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
Summary of overall assessment and likely significant effects:			
The site has the potential to bring forward a minimum of 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect as is the use of a plot currently given to hard-standing. The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However, the site's proximity to historic assets is likely to have a negative effect.

SA Objective	Assessment Criteria - Does the site (TR004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	SOCIAL		
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is mixed brownfield and greenfield and is largely surrounded by development on all four sides. The site is considered large enough to accommodate buffering in design layout, including internally between pitches, and from the main road to the south. It is not generally visible from the road and includes established foliage, in particular between dwellings on the west (Brookhouse Road) and along the eastern side. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	The site is located within the settlement boundary and is within 800m of the town centre and the wide range of key services and facilities that can be found here that could serve prospective residents of the site. It should be noted that the supply of community facilities and services is currently adequate but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. However, the site is more than 1,200m from a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.</p>	i
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>The site has the potential to bring forward 6 - 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 800m of the town centre of Cheadle and in proximity to the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ENVIRONMENTAL			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. 8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	<p>Part of the site is located within a flood zone 3 area and, as such, it can be considered that the site would be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant negative effect on this objective.</p>	--
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is over 1,500m from Cecilly Brook (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. The Ecological Study (2015) notes that the site itself has one building that is deemed to have potential to support roosting bats, noxious weeds and a range of 'brownfield' habitats albeit fairly species poor in terms of floral diversity. However the fairly large size of the site and the potential to support protected species warrants it being attributed some ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on brownfield and greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site (TR004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	Use of the site may entail the loss of a building. Overall, this site has been assessed as having a negative effect on this Objective.	-
13. To protect and enhance the character of towns /villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	The site is circa 600m away from a grade II historical heritage asset. Although dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of this historical heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.	0
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The site could deliver 6 - 8 pitches and with good access to the town centre of Cheadle has scope to have a positive effect on the vitality and viability of Cheadle and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (TR004)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The site could deliver 6 - 8 pitches however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<p>Summary of overall assessment and likely significant effects:</p> <p>The site has the potential to bring forward 6 - 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect, as is the site's proximity to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect, as could its location away from historic assets. The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However, the site is partly within a flood zone which is likely to have a significant negative effect. The potential ecological value of the site is also likely to have a negative effect.</p>

Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (TR006)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		The site has the potential to bring forward 6 - 8 pitches (although this may be reduced following consideration of set off distances from the railway line and roads) and contribute to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. Similarly, the site's accessibility to services and facilities, and in particular to areas of existing employment, is likely to have a positive effect. The development of this approx 0.25ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity however as the site runs adjacent to the regularly used Stoke to Derby railway line, on-site sound attenuation measures may be required. The site's proximity to historic assets is likely to have a negative effect.

	<ul style="list-style-type: none"> Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	<p>could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>There are listed buildings across the road, to the north and east; however the site is heavily screened. Although dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/i
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>Proposal specific information is required to assess any impact on landscape character. Overall, this site has been assessed as having a neutral effect on this Objective, although the exact effects are uncertain.</p>	0/i
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ECONOMIC			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The site could deliver a minimum of 8 pitches and with access to a town / village centre has scope to have a positive effect on the vitality of the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (TR007)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The site could deliver a minimum of 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 2km from existing areas of employment within the District and, as such, would not provide readily accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
<p>P Summary of overall assessment and likely significant effects: The site has the potential to bring forward a minimum of 8 pitches meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. The development of this approx 2ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However the southern edge of the site is in flood zone 3 and the site is likely to be affected to some degree by flood risk, this is likely to have a significant negative effect. Similarly the site's inaccessibility to services and facilities, including areas of existing employment, is also likely to have a negative effect, as is the site's proximity to historic assets.</p>

The site could deliver 3 - 4 pitches and with access to a town / village centre has scope to have a positive effect on the vitality of the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The site could deliver 3 - 4 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is adjacent to an industrial estate that could provide accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (TR009)...?	Commentary on likely nature of effects of site allocation	Overall assessment

The site has the potential to bring forward 3 - 4 pitches, making a contribution to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The accessibility of the site to services and facilities, including areas of existing employment and public transport is likely to have a positive effect. However the development of this approx 0.16ha site is not considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity.

Table 12.287

SOCIAL			
1. To improve community cohesion and the quality of where people work and live	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	<p>The development of this approx 0.2ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is adjacent to a petrol station (shop) and furniture shop. There are a range of facilities including a hospital and medical centre in Cheadle centre within 5km. Cheadle also offers primary / secondary / sixth form schools and playing fields. In addition there is a primary school with playing fields and a village hall in Kingsley within 3km. Werrington High School, and some facilities at Cheadle are within 4km; Werrington High School, and some facilities at Cheadle are within 5.5km. The site is on the 32 bus route (Hanley - Uttoxeter) with an hourly service or better. A bus stop is within 500m of the site. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site (TR010)...?	Commentary on likely nature of effects of site allocation	Overall assessment
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> Help improve health or access to health facilities? Help promote healthy lifestyles? Help to reduce health inequalities? Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. The site is within 5km of a GP surgery. Overall, this site has been assessed as having a neutral effect on this Objective.	0
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> Deliver development that reduces actual levels of crime? Deliver development that helps to reduce fear of crime? 	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? Offer opportunities to enable people to meet their needs within their existing communities? Offer opportunities to ensure that people can afford their housing? 	The site has the potential to bring forward 6 - 8 pitches and contribute to meeting the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> Offer opportunities to minimise impacts on existing traffic congestion? Support the use of public transport? Support safe walking and cycling? Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	As noted previously, the site is within 5km of a town or village centre which may limit the contribution it can make to reducing the need to travel. The site is on the 32 bus route (Hanley - Uttoxeter), with an hourly service or better. Overall, this site has been assessed as having a negative effect on this Objective.	-
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. However the site is on a bus route and this may help to reduce the need to travel by car. Overall, this site has been assessed as having a neutral effect on this Objective	0

SA Objective	Assessment Criteria - Does the site (TR010)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	<p>Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.</p>	-i
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>There are no known biodiversity constraints however the existing building may support roosting bats and / or breeding birds. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.</p>	0/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? Deliver development that helps to minimise the loss of greenfield land? Offer opportunities to reduce land contamination / instability? Deliver development that helps reduce the amount of derelict land? Offer opportunities to protect notable geological and geomorphological features? 	<p>The site is brownfield, mostly comprising hard standing with a single two-storey building so development for pitches is not expected to result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? 	<p>Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development</p>	0

SA Objective	Assessment Criteria - Does the site (TR010)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	Although dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	This is a brownfield site within the Green Belt and further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The site could deliver 6 - 8 pitches but lacks good access to a town / village centre, however there is some scope to have a positive effect on the vitality of the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (TR010)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The site could deliver 6 - 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 2km from existing areas of employment within the District and, as such, would not provide readily accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
<p>Summary of overall assessment and likely significant effects:</p> <p>The site has the potential to bring forward 6 - 8 pitches, making a contribution to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.2ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However the location of this brownfield site within the Green Belt requires further assessment to identify any impact on landscape character. Similarly the site's inaccessibility to services and facilities, including areas of existing employment, is also likely to have a negative effect.</p>

	maintain and strengthen local distinctiveness and sense of place?		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	This is a greenfield site within the Green Belt and further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The site could deliver a minimum of 8 pitches and with access to a town / village centre, has scope to have a positive effect on the vitality of the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The site could deliver a minimum of 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is over 2km from existing areas of employment within the District and, as such, would not provide readily accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (TR012)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		The site has the potential to bring forward a minimum of 8 pitches, meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. The development of this approx 0.7ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However the site's inaccessibility to services and facilities, including areas of existing employment is likely to have a negative effect. The site's proximity to heritage assets and the presence of mature trees are also likely to have a negative effect. In addition, the location of this greenfield site within the Green Belt requires further assessment to identify any impact on landscape character.

TR013: Mobberley Works - northern area, Tean Road, Cheadle

SA Objective	Assessment Criteria - Does the site (TR013)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However the presence of mature trees and the industrial estate to the south may limit the developable area. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	The site is within 2km of Upper Tean centre where there are shops, a medical centre and playing fields. It is also within 2.4km of Cheadle centre with its range of facilities including a hospital, medical centre, and primary / secondary / sixth form schools. There are also two minimarkets, a pub, sports fields and vets within 1300m. An industrial estate is immediately adjacent to the site. The site is on the 32 bus route (Hanley - Uttoxeter) with an hourly service or better. There is a bus stop within 500m of the site. Overall, this site has been assessed as having a neutral to negative effect on this Objective.	0/-

SA Objective	Assessment Criteria - Does the site (TR013)...?	Commentary on likely nature of effects of site allocation	Overall assessment
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. The site is within 2km of a GP surgery. Overall, this site has been assessed as having a neutral effect on this Objective.	0
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	This site is difficult to assess against this objective without proposal specific information, consequently this site has been assessed as having an uncertain effect on this Objective.	i
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	The site has the potential to bring forward 6 - 8 pitches making a contribution to meeting the identified housing needs of the Gypsy and Traveller communities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	As noted previously, the site is within 2km of a town or village centre which may help to reduce the need to travel. The site is on the 32 bus route (Hanley - Uttoxeter), with an hourly or better service. Overall, this site has been assessed as having a neutral effect on this Objective.	0
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	Dealing with climate change is a wide ranging policy challenge cutting across all parts of society and SA objectives. However the site is on a bus route and this may help to reduce the need to travel by car. Overall, this site has been assessed as having a neutral effect on this Objective	0

SA Objective	Assessment Criteria - Does the site (TR013)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	A small part to the west of the site is in Flood Zone 3 and the site is likely to be affected to some degree by flood risk. Use of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant negative effect on this objective, however the exact effects are uncertain.	--/i
10. To identify, conserve and enhance biodiversity resources and to test the policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	There are no known biodiversity constraints however areas of the site are heavily wooded. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? 	<ul style="list-style-type: none"> ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 		
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> ● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The site could deliver around 6 pitches and with limited access to a town / village centre, has little scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a neutral effect on this Objective.	0
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> ● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The site could deliver around 6 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> ● Help meet the employment needs of local people? ● Help increase economic activity levels? ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 	The site is over 2km from an existing area of employment within the District and, as such, would not provide readily accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (TR016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		The site has the potential to bring forward around 6 pitches, contributing towards meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.2ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity, particularly if the number of pitches delivered is managed accordingly. However the site's inaccessibility to services and facilities (including to areas of existing employment) and isolation from the public transport network is likely to have a negative effect. In addition, the location of this mixed greenfield / brownfield site in the Green Belt requires further assessment to identify any impact on landscape character.	

Table 12.293

heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	deterioration or enhancement of heritage assets and/or their settings. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	This is a greenfield site in the Green Belt. Further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The site could deliver around 8 pitches and with reasonable access to a town centre, has scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The site could deliver 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? 	The site is within 500m of the JCB factory on the A522 and as such, would provide readily accessible employment opportunities	+

SA Objective	Assessment Criteria - Does the site (TR017)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 	for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	
<p>Summary of overall assessment and likely significant effects:</p> <p>The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.8ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is reasonably close to Cheadle facilities and an area of existing employment and this is likely to have a positive effect. However the site's development could result in the loss of best and most versatile agricultural land and this is likely to result in a negative effect. In addition, the location of this greenfield site in the Green Belt requires further assessment to identify any impact on landscape character.</p>

Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The site could deliver a minimum of 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is within 3km of a town centre and there are bus services and as such, would provide limited accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a neutral effect on this Objective.	0
Summary of overall assessment and likely significant effects:			
The site has the potential to bring forward 6 - 8 pitches and contribute to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. There are no known biodiversity or heritage constraints and this is also considered to have a neutral effect. However the site's relative inaccessibility to services and facilities, including areas of existing employment opportunities is likely to result in a negative effect. In addition, the location of this greenfield site in the Green Belt requires further assessment to identify any impact on landscape character.

	maintain and strengthen local distinctiveness and sense of place?		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	This site is part of the disused Special School which is in the Green Belt. Further assessment is required to identify any impact on landscape character. It is relatively well related to the existing adjacent development. Overall, this site has been assessed as having a neutral effect on this Objective, although the exact effects are uncertain.	0/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> ● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The site could deliver pitches and with access to a village centre, has scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> ● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The site could deliver pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> ● Help meet the employment needs of local people? ● Help increase economic activity levels? ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 	The site is within 1.5km-1.6km of local centres and as such, would not provide readily accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative/neutral effect on this Objective.	-/0
Summary of overall assessment and likely significant effects:			

SA Objective	Assessment Criteria - Does the site (TR028)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		This is a small site which has the potential to bring forward some pitches but not all the pitches required to meet the identified needs of the Gypsy and Traveller communities and this is considered to have a negative effect. It is approximately 1.5km from Blythe Bridge which has a range of services/facilities employment access to bus services which is a neutral impact. There are no known biodiversity or heritage constraints, and the site are not in agricultural use would not lead to a loss of agricultural land.

There are no known biodiversity constraints, Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.	0/i
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	This is greenfield site in the Green Belt may not result in the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a neutral effect on this Objective.	0
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	Development of the site for pitches may not enable any re-use of existing buildings. However, there is scope that development could use sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (TR033)...?	Commentary on likely nature of effects of site allocation	Overall assessment
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>Although dependent on proposal specific information, there is little scope that development of this site could lead to the deterioration of the setting of heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.</p>	0/i
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? Deliver development that maximises re-use of brownfield land? Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>This is a greenfield site in the Green Belt. Further assessment is required to identify any impact on landscape character. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain.</p>	-/i
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the wider district. However, the increased population of the District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ECONOMIC			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The site could deliver a minimum of 8 pitches and with access to a village centre, has scope for a positive effect on the vitality of the wider District resulting from new residents being expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The site could deliver a minimum of 8 pitches, however the opportunities for direct economic benefits would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0

SA Objective	Assessment Criteria - Does the site (TR033)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> ● Help meet the employment needs of local people? ● Help increase economic activity levels? ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 	The site is close to employment opportunities and has bus/train services to the wider area as such, would provide accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<p>Summary of overall assessment and likely significant effects:</p> <p>The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.44ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is close to Blythe Bridge which has a range of services/facilities including a train station. This is considered to have a positive impact. There are no known biodiversity constraints. In addition, the location of this greenfield site in the Green Belt requires further assessment to identify any impact on landscape character.</p>			

12.8 Additional site appraisals July 2017

12.8.1 Leek

ADD09 (Leekbrook) for employment use

SA Objective	Assessment Criteria - Does the site (ADD09)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	<p>The development of this greenfield site could be expected to have an effect on the Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>The site is located within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Leekbrook does not have a primary or secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide employees with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Leekbrook does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could</p>	+

SA Objective	Assessment Criteria - Does the site (ADD09)...?	Commentary on likely nature of effects of site allocation	Overall assessment
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p> <p>This site has been proposed for employment uses with regards to this assessment. Therefore the development would provide no housing. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is within 400m of the village centre of Leekbrook as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ENVIRONMENTAL			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? 	<p>The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant neutral effect on this objective.</p>	0

SA Objective	Assessment Criteria - Does the site (ADD09)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 		
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is within 1,000m of Combes Valley SSSI, the nearest designated asset, and, as such, is considered to have a potential effect on this asset. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. Further ecological study should be undertaken.</p>	-/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? Deliver development that helps to minimise the loss of greenfield land? Offer opportunities to reduce land contamination / instability? Deliver development that helps reduce the amount of derelict land? Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been indicated on Natural England's predictive map of Best and Most Versatile land as having a "Moderate" (20 - 60% area bmv) of being predictive BMV land so development of this site may result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and 	<p>The site is within 400m from one grade II listed asset. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?

SA Objective	Assessment Criteria - Does the site (ADD09)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<p>maintain and strengthen local distinctiveness and sense of place?</p>		
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would be within 1,000m from Combes Valley SSSI and could increase external pressures on this site. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed employment use of this site provides scope for the development of this site to have a positive effect on investment in culture and tourism within the town and wider district, however this is dependent on proposal specific information. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ECONOMIC			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> ● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of an employment site close to the village centre has the scope to have a positive effect on the vitality and viability of Leekbrook and the wider District, as new employment could be expected to increase footfall in the nearby town centre. Overall, this site has been assessed as having a significant positive effect on this objective.</p>	++
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> ● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Leekbrook as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.</p>	++
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> ● Help meet the employment needs of local people? ● Help increase economic activity levels? ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 	<p>The site is close to areas of proposed and existing local employment provision as well as new employment provision generated by this site. Overall, this site has been assessed as having a significant positive effect on this objective.</p>	++

SA Objective	Assessment Criteria - Does the site (ADD09)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>Summary of overall assessment and likely significant effects:</p> <p>The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. The site's accessibility to open space is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities which is likely to have a significant negative effect. The development of greenfield, potentially BMV land, is assessed as being a negative effect, as could the site's proximity to historic assets.</p>			
<p>Table 12.312</p> <p>LE154 Adams Foods</p>			
SA Objective	Assessment Criteria - Does the site (LE154)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	<p>As the site is located on the edge of the town centre of Leek it could be considered that the redevelopment of this previously developed site could make a positive contribution to the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>Given the edge of town centre location of this site, it can be considered that the site would be in relatively proximity to a wide range of key services and facilities. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (LE154)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The site is within 800m of a GP surgery and a number of areas of open space within the town. The residential development of this site could also have a positive effect on health, as would the nearby open space area to the east of the site. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 60 dwellings and could contribute to meeting the housing need of the District. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? ● Support the use of public transport? ● Support safe walking and cycling? ● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>The town centre location of this site means that it is within 500m of a number of bus stops as well as a range of other services and facilities. It could be considered that the site could have a positive effect on walking and cycling given the proximity of open space to the site. Overall, the site has been assessed as having a positive effect on this objective.</p>	+
ENVIRONMENTAL			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? ● Offer opportunities to increase energy efficiency? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (LE154)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> ● Offer opportunities to increase the use of renewable energy? ● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 		
8. To improve air quality.	<ul style="list-style-type: none"> ● Offer opportunities to minimise emissions of airborne pollutants? ● Offer opportunities to remove air pollutants (e.g. by trees)? 	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> ● Deliver development directed towards areas of least flood risk? ● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? ● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? ● Offer opportunities to encourage water efficiency and demand management? 	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> ● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	The site is over 500m away from Brough Park Fields (LNR) and, as such, is considered to have no effect on this asset. There are areas of mature woodland in the west of the site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? 	The site has been assessed as being a brownfield site, similarly it is classified as urban ALC land. As such, the development of this site could avoid the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a significant positive effect on this Objective.	++

SA Objective	Assessment Criteria - Does the site (LE154)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The site is within 400m of one grade II listed asset. It is considered that the development of this site might affect the setting of this asset. It should be noted that the site is within 400m of Leek Conservation Area which has been placed on the Heritage at Risk register by Historic England. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact upon the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	<p>Given the proposed employment use of this site and its location, there is scope that the site could support opportunities for investment in culture and tourism and should have a positive effect on the local economy. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
ECONOMIC			

SA Objective	Assessment Criteria - Does the site (LE154)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed loss of an employment site within the town centre has the scope to have a negative effect on the vitality and viability of Leek and the wider District. Overall, this site has been assessed as having a negative effect on this objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site and the proposed loss of employment use of the site could be considered to have a negative effect on businesses and the residents of Leek. Overall, this has been assessed as having a significant negative effect on this Objective.	--
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	Development of the site for residential use would result in the loss of an area of potential employment within the town. Overall, this site has been assessed as having a negative effect on this Objective.	-
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 60 dwellings is considered to have a significant positive effect, as is avoidance of the loss of best and most versatile agricultural land and the edge of town centre location. However, the site's proximity to historic assets and mature woodland is likely to have a negative effect, as is the loss of potential employment use.</p>

SA Objective	Assessment Criteria - Does the site(LE138)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> ● Make a positive contribution towards community cohesion? ● Offer opportunity to improve neighbourhood quality? ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 	<p>The site is outside the current settlement boundary of Leek. The development of this site, a greenfield site that is not well related to the existing town could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>As noted, the site is 500 metres by road from the existing town boundary with the Cricket Club separating the two. The site is more than 1,200m away from the town centre which could result in existing services and facilities being inaccessible. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The location of this site should provide residents with good access to the open countryside and help to support healthy lifestyles. However, the site is in excess of 1,200m of a GP surgery. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site(LE138)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? Offer opportunities to enable people to meet their needs within their existing communities? Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA (2015) assessment of the registered area of this site, it is considered that the site could accommodate circa 25 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p>++</p>
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> Offer opportunities to minimise impacts on existing traffic congestion? Support the use of public transport? Support safe walking and cycling? Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>As noted previously, the site is further than 1,200m of the town centre of Leek, which could be expected to increase the need to travel within the town. However, it is adjacent to the open countryside. Similarly, the site is on the A523 which has a number of bus stops and services serving it. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
ENVIRONMENTAL			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Similarly, the site is more than 1,200m of the town centre and could increase the need to travel. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	<p>1/?</p>
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>

SA Objective	Assessment Criteria - Does the site(LE138)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<p>contribute to the objectives of the Water Framework Directive?</p> <ul style="list-style-type: none"> Offer opportunities to encourage water efficiency and demand management? 		
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	<p>The site is approx 1,200m from Brough Park Fields (LNR) and Back Hills and Abbey Woods SBI, the nearest designated assets, and as such, it is considered that development could have no effect on these assets. The site is agricultural grassland with trees along the road frontage - ecological assessment will be required. New housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on European sites. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? Deliver development that helps to minimise the loss of greenfield land? Offer opportunities to reduce land contamination / instability? Deliver development that helps reduce the amount of derelict land? Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. Similarly, the land is indicated on the predictive map of Best and Most Versatile agricultural land as within an area where over 60% of the land is likely to be BMV, so development of this site could result in the loss of best and most versatile land. The site is within a mineral safeguarding area. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> Offer opportunities to reduce waste generation? Offer opportunities to maximise the re-use of existing buildings? Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and undesignated assets) along with their settings? Offer opportunities to protect and reinforce the character and appearance of the district's towns 	<p>The site is within 500m of a grade II listed asset - a boundary stone. Dependent on proposal specific information, there is little scope that development of this site could lead to the deterioration of this heritage asset or its setting. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.</p>	<p>0/?</p>

SA Objective	Assessment Criteria - Does the site(LE138)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<p>and villages and maintain and strengthen local distinctiveness and sense of place?</p> <ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Further assessment is required. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.</p>	<p>0/?</p>
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration although its location adjacent to the open countryside could detract from this. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
ECONOMIC			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> ● Deliver development that helps to safeguard shops and services in existing centres? ● Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	<p>The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Leek and the wider District, however the Leek town centre is not easily accessible from the site which may reduce the effect on this objective. Overall, this has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> ● Help provide a balanced portfolio of employment land in sustainable locations? ● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> ● Help meet the employment needs of local people? ● Help increase economic activity levels? 	<p>The site is over 1,000m to existing areas of employment within the town or District and, as such, could fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>

SA Objective	Assessment Criteria - Does the site(LE138)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> ● Improve physical accessibility to jobs? ● Support higher income levels for local residents? 		
<p>Summary of overall assessment and likely significant effects:</p> <p>The proposed delivery of circa 25 dwellings is considered to have a significant positive effect, location outside flood zones 2 or 3 is also likely to lead to positive effects. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area where over 60% of the land is likely to be BMV, could have a significant negative effect. Similarly, the site is relatively inaccessible to services, facilities and areas of existing employment. New housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on European sites. Further assessment is required to identify potential for ecological or landscape impacts.</p>

7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. However there may be limited areas of surface water flooding on site currently. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? Offer opportunities to help deliver networks of biodiversity and green infrastructure? 	The site is over 1,750m from Gannister Quarry SSSI, the nearest designated asset and, as such, is considered to have no effect on these assets. Ecological assessment is required. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> Help safeguard the best and most versatile agricultural land? Deliver development that helps to minimise the loss of greenfield land? Offer opportunities to reduce land contamination / instability? 	The site has been assessed as being a greenfield, it has also been indicated on Natural England's predictive map of Best and Most Versatile land as having a "Moderate" (20 - 60% area bmv) of being predictive BMV land so development of this site may result in the loss of best and most versatile land. It is considered that the land may	-

SA Objective	Assessment Criteria - Does the site (Land at BD116)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>have formerly been used for open cast mining. Overall, this site has been assessed as having a negative effect on this Objective.</p>	
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
13. To protect and enhance the character of towns /villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> ● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings? ● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place? 	<p>The nearest historical asset is circa 500m south east from the site. Given the distance of the site from this asset, there is limited scope that development of this site could lead to the deterioration of the setting of this heritage asset. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> ● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness? ● Deliver development that maximises re-use of brownfield land? ● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles? 	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. However given the location of the site, it is considered that effects on landscape character would be likely. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> ● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness? ● Offer opportunities to help support tourism and the visitor economy? 	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
ECONOMIC			

SA Objective	Assessment Criteria - Does the site (Land at BD116)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> Deliver development that helps to safeguard shops and services in existing centres? Deliver development that helps to safeguard and improve the retail, leisure and service provision? 	The proposed development of a residential site with good potential access to the town centre of Biddulph has scope to have a positive effect on the vitality and viability of Biddulph and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> Help provide a balanced portfolio of employment land in sustainable locations? Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses? 	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> Help meet the employment needs of local people? Help increase economic activity levels? Improve physical accessibility to jobs? Support higher income levels for local residents? 	The site is within 800m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<p>Summary of overall assessment and likely significant effects:</p> <p>The site's proximity to services, facilities and existing areas of employment and proposed delivery of circa 80 dwellings should have a significant positive effect. However there is scope that development of this site could have negative effects due to the site's potential ecological value, its contribution to the Biddulph Valley Way and impacts on landscape character.</p>

SA Objective	Assessment Criteria - Does the site (BD011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> Make a positive contribution towards community cohesion? Offer opportunity to improve neighbourhood quality? 	The site is located outside of the existing town boundary. The development of greenfield land within the open countryside could reduce the quality of the Green Infrastructure of the Town. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (BD011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> ● Offer opportunity to provide open space and support Green Infrastructure? ● Risk unacceptable light and noise pollution? ● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy? 		
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> ● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation? ● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities. 	<p>As noted, the site is located outside of the settlement boundary on the south west edge of Biddulph. The site is more than 1,000m away from the town centre which could result in existing services and facilities being inaccessible. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> ● Help improve health or access to health facilities? ● Help promote healthy lifestyles? ● Help to reduce health inequalities? ● Offer opportunities to participate in leisure and recreational activities including access to the countryside? 	<p>The site's location would provide good access to areas of open space and the countryside which could help to support healthy lifestyles. However, the site is more than 1,000m from a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> ● Deliver development that reduces actual levels of crime? ● Deliver development that helps to reduce fear of crime? 	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> ● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met? ● Offer opportunities to enable people to meet their needs within their existing communities? ● Offer opportunities to ensure that people can afford their housing? 	<p>Based on the SHLAA assessment this site might accommodate up to 100 dwellings depending on the site boundary. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p>++</p>
<p>6. To strengthen links between rural areas and towns by sustainable forms</p>	<ul style="list-style-type: none"> ● Offer opportunities to minimise impacts on existing traffic congestion? 	<p>As noted, the site is more than 1,000m from the town centre of Biddulph and a GP surgery this could be expected to increase the</p>	<p>0</p>

SA Objective	Assessment Criteria - Does the site (BD011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> Support the use of public transport? Support safe walking and cycling? Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure? 	<p>need to travel. However, the site is near to the open country side and an area of open space and a number of bus stops. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	
ENVIRONMENTAL			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> Offer opportunities to reduce emissions of greenhouse gases, particularly CO₂? Offer opportunities to increase energy efficiency? Offer opportunities to increase the use of renewable energy? Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport? 	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is more than 1,000m from the town centre and could increase the need to travel. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> Offer opportunities to minimise emissions of airborne pollutants? Offer opportunities to remove air pollutants (e.g. by trees)? 	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> Deliver development directed towards areas of least flood risk? Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs? Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive? Offer opportunities to encourage water efficiency and demand management? 	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a neutral effect on this objective.</p>	0
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites? 	<p>The site is over 2,000m from Whitfield Valley (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. Ecological assessment is required. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?

SA Objective	Assessment Criteria - Does the site (BD011)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> ● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives? ● Offer opportunities to help deliver networks of biodiversity and green infrastructure? ● Help safeguard the best and most versatile agricultural land? ● Deliver development that helps to minimise the loss of greenfield land? ● Offer opportunities to reduce land contamination / instability? ● Deliver development that helps reduce the amount of derelict land? ● Offer opportunities to protect notable geological and geomorphological features? 	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been indicated on Natural England's predictive map of Best and Most Versatile land as having a "Moderate" (20 - 60% area bmv) of being predictive BMV land so development of this site may result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> ● Offer opportunities to reduce waste generation? ● Offer opportunities to maximise the re-use of existing buildings? ● Offer opportunities to increase the use of building materials from sustainable sources? 	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources.
