

# Staffordshire Moorlands Local Plan

## Sustainability Appraisal

Submission Version  
February 2018

1 Consultation questions	6
2 Non technical summary	9
2.1 Overall approach	9
2.2 Objectives of the Plan	9
2.3 Main options considered	10
2.4 Changes to the Plan resulting from the SA	13
2.5 Conclusions	14
3 Introduction	16
4 Appraisal methodology	22
5 SA Scoping stage	42
5.1 Sustainability Appraisal Framework	43
6 Summary of findings	49
6.1 Appraisal of housing requirement options	50
6.2 Appraisal of alternative employment land requirements	72
6.3 Appraisal of site options	81
6.3.1 Gypsy and Traveller site options	214
6.4 Appraisal of alternative development approaches for Cheadle	223
6.5 Appraisal of alternative development approaches for the rural areas	235
6.6 Appraisal of preferred option policies	246
7 Cumulative Effects	260
8 Summary of Plan effects	268
8.1 Summary of significant sustainability effects	269
8.2 Mitigation	284
8.3 Changes made to the Plan as a result of the SA	285

<b>9 HRA and EqIA</b>	<b>288</b>

## Consultation questions

## 1 Consultation questions

**1.1** The purpose of this consultation is to seek your views on this SA Report prepared to accompany the Submission Version Local Plan February 2018. We would particularly welcome your comments on the following:

### Question 1

Do you support the overall approach taken to the appraisal of options?

### Question 2

Have we correctly identified the main significant effects and potential mitigation measures?

### Question 3

Do you wish to make a comment on the appraisal of one or more Local Plan policy option(s)?

### Question 4

Do you wish to make a comment on the appraisal of one or more housing or employment requirement option(s)?

### Question 5

Do you wish to make a comment on the appraisal of one or more proposed development site option(s)?

### Question 6

Do you wish to make a comment on the appraisal of alternative development approaches for Cheadle?

### Question 7

Do you wish to make a comment on the appraisal of alternative development approaches for the Rural Areas?

### Question 8

Do you wish to make a comment on the monitoring proposals, in particular the sustainability effects to be monitored and the information to be collected, including by whom and when?

### Question 9

Do you wish to make any other comments about this SA Report?

### Question 10

Does this February 2018 SA Report, together with the SA Scoping Report, provide sufficient information to demonstrate that an appropriate SA has been carried out of the Staffordshire Moorlands Local Plan?

### Question 11

Do you wish to make a comment on either or both of the supporting documents: the Habitats Regulations Assessment report of the Staffordshire Moorlands Local Plan February 2018, or the Equality Impact Assessment report of the Local Plan at this stage? Both these reports are available alongside this SA Report.

**1.2** Details of how to respond are provided from paragraph 3.20 of this report.

## Non technical summary

## 2 Non technical summary

**2.1** This section sets out a non technical summary of the information provided in this document.

### 2.1 Overall approach

**2.2** The Staffordshire Moorlands Local Plan provides a framework for the delivery of development, guiding how and where the District will grow over the period 2016 to 2031. The challenge for the Plan is to ensure that planned growth is sustainable and delivers the necessary housing, employment, shopping and community facilities, whilst ensuring that the District's valuable natural and built heritage assets and its character are not compromised. To help understand the performance of the Plan against this challenge, during the course of its preparation, the Local Plan's proposals (and the options considered in developing them) are subjected to a prescribed appraisal known as a sustainability appraisal. This report documents the appraisal and its findings.

**2.3** The sustainability appraisal of the emerging Local Plan is carried out by members of the Council's Regeneration Service team, following a method established by national guidance. At each stage of the Local Plan (preferred option sites and boundaries, preferred options, and now submission version) a report of the sustainability appraisal has been published. The reports provide an assessment of how the Local Plan's options and proposals perform against sustainability objectives. Comments provided to the Council on each published report of the sustainability appraisal have been used to improve the appraisal and amend the report. The findings of the sustainability appraisal have been used to inform the preparation of the Local Plan.

### 2.2 Objectives of the Plan

**2.4** The Staffordshire Moorlands Local Plan sets out a vision for the direction in which the Council would like to take the District in the long term. The central theme of the vision is to see Staffordshire Moorlands become an exceptional place to live, work and visit. This means balancing the need to foster sustainable growth where it is needed and beneficial, with the need to protect and enhance the District's heritage and its significant built and natural assets.

**2.5** The Local Plan vision is supported by four spatial aims that address how the vision will be delivered. These aims are to see Staffordshire Moorlands become an exceptional place to live, work and visit by:

- Creating distinctive, sustainable, self-supporting settlements.
- Meeting the needs of our communities.
- Encouraging a strong, prosperous and diverse economy.
- Maintaining a quality environment and special places.

**2.6** The aims are given further clarity through the identification of a series of objectives for the Local Plan that indicate the broad direction that the more detailed Plan strategy and policy measures take and provide the basis for subsequent targets and indicators. The Plan objectives are:

- To make provision for the overall land-use requirements for the District, consistent with national policy and evidence.

- To create a District where development minimises its impact on the environment, helps to mitigate and adapt to the adverse effects of climate change and makes efficient use of resources.
- To develop and diversify in a sustainable manner the District's economy and meet local employment needs in the towns and villages.
- To provide new housing that is affordable, desirable, well-designed and meets the needs of residents of the Moorlands.
- To ensure the long-term vitality and viability of the three market towns of Leek, Biddulph and Cheadle.
- To maintain and promote sustainable regenerated rural areas and communities with access to employment opportunities, housing and services for all.
- To support and enhance the tourism, cultural, recreation and leisure opportunities for the District's residents and visitors.
- To promote local distinctiveness by means of good design and the conservation, protection and enhancement of historic, environmental and cultural assets throughout the District.
- To conserve and improve the character and distinctiveness of the countryside and its landscape, heritage, biodiversity and geological resources.
- To deliver sustainable, inclusive, healthy and safe communities.
- To reduce the need to travel or make it safer and easier to travel by more sustainable forms of transport.

### 2.3 Main options considered

**2.7** In order to meet the vision and objectives described above, the Staffordshire Moorlands Local Plan establishes the extent of land that will be required for new homes and employment and sets out both development principles and development management policies. The Plan also identifies specific sites for the location of growth. The role of the sustainability appraisal has been to help review the implications of taking forward alternative possible options for each of the above and in each case to make recommendations about the most sustainable approach for the Local Plan to take. The sustainability appraisal also suggests ways to mitigate any negative effects identified or to maximise any positive effects.

#### Housing requirement options

**2.8** Nathaniel Lichfield & Partners (NLP) prepared a Strategic Housing Market Assessment (SHMA) on behalf of the Council in April 2014. The identification of Objectively Assessed Need (OAN) for housing was at the heart of the study, based on a range of housing, economic and demographic factors, trends and forecasts. Between 2014 and 2017 the demographic data underpinning NLP's modelling work was updated by the Office for National Statistics (ONS) and NLP prepared a series of updates to their report accordingly. The latest update to the SHMA was published in February 2017.

**2.9** At the Council Assembly meeting on 8th March 2017 it was resolved to take forward an annual housing requirement of 320 homes per year.

**2.10** To help inform this decision, the following options were appraised in February 2017:

- Option 1: 235 new homes each year (2014 - 2031)
- Option 2: 260 new homes each year (2014 - 2031)
- Option 3: 330 new homes each year (2014 - 2031)
- Option 4: 450 new homes each year (2014 - 2031)

**2.11** Previously in January 2016, alternatives had been considered as follows:

- Option 1: 250 new homes each year (2016 - 2031)
- Option 2: 320 new homes each year (2016 - 2031)
- Option 3: 440 new homes each year (2016 - 2031)
- Option 4: 520 new homes each year (2016 - 2031)

### **Employment land requirements**

**2.12** Nathaniel Lichfield & Partners (NLP) prepared an Employment Land Review for the District in July 2014. This study was updated in February 2017 to incorporate more recent data releases, to align with the updated Strategic Housing Market Assessment (SHMA) and also to reflect the changing economic context post British exit from the European Union. The report considered a number of potential future scenarios in order to help identify requirements for B-class employment space in the District over the seventeen year period 2014 - 2031.

**2.13** At the Council Assembly meeting on 8th March 2017 it was resolved to take forward an employment land requirement of approximately 27 hectares up to the year 2031.

**2.14** To help inform this decision, the following options were appraised in February 2017:

- Option 1: 13ha (2014 - 2031)
- Option 2: 16ha (2014 - 2031)
- Option 3: 25ha (2014 - 2031)
- Option 4: 27ha (2014 - 2031)

### **Development site options**

**2.15** At the Council Assembly meeting on 19th July 2017 it was resolved to publish for consultation the Staffordshire Moorlands Local Plan – Preferred Options Plan (July 2017). In order to meet the housing and employment land requirements agreed in March 2017, the Plan proposed a supply of sites identified as suitable for development.

**2.16** To help inform the Council's choice of site allocations, a wide range of sites with development potential for housing, employment and other uses had been identified and consulted on. Some of these sites had been proposed by the Council and others were identified through consultation responses. A detailed appraisal of each of the site options was made against a set of sustainability objectives and this is documented in matrices forming section 15 of this report. Summaries of the findings are provided in Section 6.3.

**2.17** In some cases the Initial SA report accompanying the April 2016 Preferred Options Sites and Boundaries document recommended that further information should be sought concerning the sustainability effects of a proposed site allocation. In some cases the additional evidence has contributed to the justification for the selection or rejection of a site as a preferred option. In all cases SA evidence and the rationale for site selection or dismissal as a preferred option is provided in this report.

### **Alternative development approaches for Cheadle**

**2.18** Cheadle is the district's smallest town, located 10 miles south east of Leek and 10 miles west of the north Staffordshire conurbation. Cheadle has suffered from under-investment and a poor infrastructure and its town centre has declined in recent years, although a successful Heritage Economic Regeneration Scheme has led to some improvements.

**2.19** The strategy for Cheadle set out in the adopted Core Strategy was based on taking a comprehensive view of the expansion of the town and programming ahead for the phased release of land and related infrastructure improvements. The Core Strategy noted that this would take the form of urban extensions involving housing and employment development with related leisure and community facilities as part of an overall regeneration and growth strategy.

**2.20** In identifying sites for inclusion in the Local Plan: Preferred Options Sites and Boundaries (April 2016), a number of alternative development approaches were considered for Cheadle, in line with the strategy set out above. In the first instance these were:

- Option 1: Northern Focus
- Option 2: South western focus
- Option 3: Scattered approach

**2.21** Following dismissal of these options, further work was undertaken to help inform preparation of the Preferred Options Plan (July 2017). A fourth development approach was then identified and considered, designed to build on the strengths of the three options previously proposed, whilst minimising the cumulative impacts of development identified in each case. The July 2017 preferred option was:

- Option 4: North-South clusters with small sites scattered through the town

### **Alternative development approaches for the rural areas**

**2.22** Policy SS3 of the adopted Core Strategy set out the broad spatial distribution of housing and employment development across the District. The approach is one that focuses development on the three market towns of Leek, Cheadle and Biddulph and the larger villages but allows for limited development of other settlements to meet local needs.

**2.23** However there are a number of constraints to development in the rural areas. A third of the district lies inside the Peak National Park, where the Peak District National Park Authority represents the special interests of the National Park. Of the remainder of the Moorlands, around 30% is designated as Green Belt. Consequently, and in line with the agreed development approach, the Local Plan Preferred Options Sites and Boundaries (2016) proposed to amend the Green Belt boundary in some locations, including in the rural areas, in order to facilitate development.

**2.24** However a Housing White Paper was published in February 2017 and this included a proposed requirement for authorities to examine fully all other reasonable options before amending Green Belt boundaries. The preferred option at April 2016 was re-examined in the light of this and it was considered that options other than Green Belt release may be available to the Council in order to meet housing need.

**2.25** In December 2017 alternative development approaches for the rural areas were appraised as follows:

1. Preferred Option 2016: Green Belt release
2. Countryside release
3. Growth redirected to towns
4. Strategic site release

**2.26** Following the appraisal, elements of options 3 and 4 were identified as offering sustainable development benefits. However a fifth option - a hybrid of options 3 and 4 was identified as a preferable option. This option 5 - was the option put forward as the preferred option in July 2017:

5. Preferred Option July 2017: Growth redirected to towns accompanied by strategic site release in the rural areas.

### **Preferred Option Policies**

**2.27** The Staffordshire Moorlands Core Strategy was adopted in March 2014. The Core Strategy contains a suite of existing policies consistent with the National Planning Policy Framework.

**2.28** Existing core strategy policies have been reviewed as part of the Local Plan preparation process and updated where the evidence base or national planning policy context requires it. For this reason, alternative approaches to delivering policy objectives have not been appraised, the Core Strategy policy has been taken as the most appropriate policy option in the first instance. However the policies, updated as required, have been appraised to identify likely significant effects. The appraisal also identified measures for the Local Plan to help address negative effects or to maximise positive ones.

### **2.4 Changes to the Plan resulting from the SA**

**2.29** The SA has influenced the preparation of the Local Plan at all stages, providing feedback and detail about the sustainability effects of proposals and alternatives under consideration, helping to identify the most sustainable approach.

**2.30** For example following appraisal of preferred option policies in December 2016, a new Policy: Policy NE2 Trees, Woodland and Hedgerows was included in the Preferred Options Plan July 2017.

**2.31** Other changes made to Plan policies as a result of the SA include the following:

**2.32** The Development Principles Policy (SS1) was amended to support development which secures high quality sustainable environments, efficient and effective use of resources and contributes effectively to tackling climate change and reduced carbon emissions.

**2.33** The Area Strategy Policies for Leek, Biddulph and Cheadle as well as for Larger and Smaller Villages (SS5, SS6, SS7, SS8 and SS9) were amended to include a reference to the District's GI Strategy.

**2.34** The Design Considerations Policy (DC1) had an additional bullet point (8) added to include a requirement for developments to be well integrated for car, pedestrian and cycle use as well as other sustainable transport links.

**2.35** The Landscape and Settlement Setting Policy (DC3) had an additional bullet point (3) added to include support for development which maintains the biodiversity qualities of any natural or man-made features within the landscape, such as trees, woodlands, hedgerows, walls, watercourses or ponds.

**2.36** Strategic Development Area Policies for Cheadle North and for Cecilly Brook (DSC1 and DSC2) had an additional bullet point added to each requiring a master plan to consider how to manage the impact of growth on the Cecilly Brook Local Nature Reserve and Green Infrastructure Network to ensure that Local Plan policy requirements can be met for minimising impacts on biodiversity (and providing net gains in biodiversity where possible); and establishing coherent ecological networks that are more resilient to current and future pressures; as well as enabling water quality improvements in line with the Water Framework Directive objectives.

## **2.5 Conclusions**

**2.37** The Sustainability Appraisal of the Local Plan has appraised the effects of the housing and employment land requirements, development approaches in Cheadle and the rural areas, individual policies and site allocations, as well as the overall effect of the plan, including cumulative and incremental effects. The SA has found that the Local Plan addresses key sustainability issues and will make a significant positive contribution to sustainability in the District through meeting housing, employment and community needs, enhancing accessibility and encouraging high quality design.

**2.38** The key negative effects identified relate to the environmental impact of increased housing, employment and infrastructure development. Throughout the process the SA has sought to make further recommendations to assist the Council in mitigating any negative effects whilst enhancing the positive opportunities that development provides for the District.

**2.39** The Appraisal process found that on the whole, the mitigation provided through the Local Plan policies would address identified potential significant effects.

## Introduction

### 3 Introduction

**3.1** Staffordshire Moorlands District Council is preparing a Local Plan which, when adopted, will guide future development across the plan area, up to the year 2031.

**3.2** This Sustainability Appraisal Report has been published to accompany the Staffordshire Moorlands Local Plan Submission Version February 2018. Sustainability Appraisal (SA) is an ongoing process. This SA Report follows on from the draft SA Report that accompanied the Preferred Options Local Plan consulted on between 31<sup>st</sup> July and 22<sup>nd</sup> September 2017; the Initial SA Report that accompanied the Local Plan Preferred Options Sites and Boundaries consulted on between 28<sup>th</sup> April 2016 and 13<sup>th</sup> June 2016; and the Sustainability Appraisal Scoping Report, consulted on between 13<sup>th</sup> August 2014 and 26<sup>th</sup> September 2014.

**3.3** National Planning Practice Guidance describes how sustainability appraisal is a systematic process that must be carried out during the preparation of a Local Plan. Its role is to promote sustainable development by assessing the extent to which the emerging plan, when judged against reasonable alternatives, will help to achieve relevant environmental, economic and social objectives.

**3.4** This process is an opportunity to consider ways by which the Plan can contribute to improvements in environmental, social and economic conditions, as well as a means of identifying and mitigating any potential adverse effects that the Plan might otherwise have. By doing so, it can help make sure that the proposals in the Plan are the most appropriate given the reasonable alternatives. It can be used to test the evidence underpinning the Plan and help to demonstrate how the tests of soundness have been met. Sustainability appraisal should be applied as an iterative process informing the development of the Local Plan.

**3.5** The sustainability appraisal process is governed by European and national legislation, supported by government policy, which includes:

- The Planning and Compulsory Purchase Act 2004 which requires sustainability appraisal of emerging Development Plan Documents and Supplementary Planning Documents.
- The requirements of European Directive 2001/42/EC (often known as the Strategic Environmental Assessment (SEA) Directive) which requires the preparation of an environmental report that considers the significant environmental effects of a plan or programme. This Directive is transposed into UK law by The Environmental Assessment of Plans and Programmes Regulations 2004: Statutory Instrument 2004 No. 1633 (SEA Regulations).
- Planning practice guidance issued by the Department for Communities and Local Government on Strategic environmental assessment and sustainability appraisal; published 9 February 2015<sup>(1)</sup>.

**3.6** This sustainability appraisal incorporates the requirements of the SEA Directive, by combining the more environmentally-focused considerations of SEA with wider social and economic effects.

### Staffordshire Moorlands Local Plan

**3.7** The Staffordshire Moorlands Core Strategy was adopted in March 2014. The plan identified a housing requirement of 300 homes per year and an employment land requirement of at least 24ha over the period 2011 to 2026. The Core Strategy also established the

---

1 <https://www.gov.uk/guidance/strategic-environmental-assessment-and-sustainability-appraisal>

appropriate distribution of development across the District with the emphasis being on development in the market towns of Leek, Biddulph and Cheadle with a more modest scale of development in the villages that lie within the Rural Area. However, the Inspector determined that an early and comprehensive review of the Core Strategy for the period 2016 to 2031 would be required to take account of longer term development requirements. The review of the Core Strategy has been rolled forward into a single Local Plan combined with site allocations.

**3.8** Local Plans are seen by Government as key to delivering sustainable development. They should, as far as possible, reflect the aspirations of local communities and should strive to contribute towards their wider social, economic and environmental objectives. The Staffordshire Moorlands Local Plan also needs to be consistent with the Government's planning principles and policies as set out in the National Planning Policy Framework<sup>(2)</sup>.

**3.9** To meet these objectives, the Staffordshire Moorlands Local Plan Submission Version February 2018 comprises:

- A Portrait of Staffordshire Moorlands - a description of the District.
- The Challenges - a summary of the key challenges facing the District.
- The Vision – detailing what the Staffordshire Moorlands will be like in 2031.
- Aims and Objectives – stating what the Local Plan is proposing to achieve.
- A Spatial Strategy and Strategic Policies – setting out the over-arching strategy and policies for the District.
- Development Management Policies – setting out specific measures to manage development.
- Strategic Development Site Policies - specific policy to guide the development of strategic sites.
- Implementation and Monitoring - a framework for how the plan will be implemented and monitored.
- Maps - for Leek, Biddulph, Cheadle and the Rural Areas which identify proposed sites and boundaries.

## Habitats Regulations Assessment

**3.10** European Directive 92/43/EEC on the Conservation of Natural Habitats and of Wild Fauna and Flora (the Habitats Directive) requires a Habitats Regulations Assessment (HRA) to be undertaken on the Local Plan. In the UK, the Habitats Directive is implemented through the Conservation of Habitats and Species Regulations 2010 (the “Habitats Regulations”).

**3.11** The HRA assesses any impacts of the Local Plan against the conservation objectives of sites of European importance for nature conservation in, and outside the plan area, to ascertain whether it would adversely affect the integrity of any sites concerned. These sites, often just referred to as European sites, include Special Areas of Conservation (SACs) and Special Protection Areas (SPAs).

**3.12** Staffordshire Moorlands District Council has appointed consultants Clearlead Consulting Limited to undertake the HRA requirements for the Local Plan. It is important that the sustainability appraisal takes account of HRA findings in order that consideration can be given to mitigating any adverse effects. An HRA Report is available alongside the Local Plan Submission Version February 2018 and this SA Report. The report builds on the

2 [www.communities.gov.uk/publications/planningandbuilding/nppf](http://www.communities.gov.uk/publications/planningandbuilding/nppf)

initial HRA Report (July 2017) made available for consultation alongside the Preferred Options Local Plan. The findings of the HRA Report February 2018 are considered in section 9 of this report.

### Equalities Impact Assessment

**3.13** In order to comply with the Public Sector Equality Duty (set out in the Equality Act 2010)<sup>(3)</sup> the Council is carrying out an equalities impact assessment of Staffordshire Moorlands emerging Local Plan. The broad purpose of the Equalities Duty is to integrate consideration of equality and good relations into the day-to-day business of public authorities.

**3.14** The Equalities Impact Assessment (EqIA) is considering the impact, or likely impact, of the development strategy, policies and their functions outlined in the Local Plan on different equality groups, including women, people from ethnic minorities and those with disabilities. The findings of the assessment have been summarised to provide an overall assessment of the Staffordshire Moorlands Local Plan Submission Version February 2018; the findings of the Equalities Impact Assessment are considered in section 9 of this report.

**3.15** An EqIA is a tool to assist public authorities with assessing the impact, or likely impact, of their policies and functions on people who share a relevant protected characteristic. It assists authorities with identifying adverse outcomes and steps that can be taken to mitigate adverse effects. EqIAs help public authorities meet the requirements of their equality duties and to identify active steps to promote equality.

**3.16** One of the 12 core planning principles set out in paragraph 17 of the National Planning Policy Framework (NPPF) is that local planning authorities should take account of and support local strategies to improve health, social and cultural wellbeing for all, and deliver sufficient community and cultural facilities to meet local needs. It is considered that the EqIA can help inform this process by understanding the needs of different community groups and how planning policies and decisions can affect them.

### Structure of this report

**3.17** This February 2018 Sustainability Appraisal Report has been designed to be as succinct as possible to improve accessibility of information and to allow key findings to be presented more concisely. For ease, a review of relevant plans, programmes and policy objectives, along with a summary of baseline data from the SA Scoping Report have been included as sections 23 and 24 of this report. Detailed appraisal work is also presented in separate appendices. Consultation questions are provided in Section 1. A non technical summary of the report is included as Section 2.

**3.18** This section has provided an introduction to sustainability appraisal, the Staffordshire Moorlands Local Plan Habitats Regulations Assessment (HRA) and Equalities Impact Assessment (EqIA). The rest of the report is structured as follows:

- Section 4 – the methodology of how this appraisal was carried out, limitations and definitions of significance.
- Section 5 – an overview of the scoping stage with the sustainability appraisal framework set out.
- Section 6 – a summary of findings with an overview of significant effects.

---

3 <http://www.legislation.gov.uk/ukpga/2010/15/contents>

- Section 7 – a discussion of broad conclusions about the nature of cumulative effects of the plan.
- Section 8 - a summary of the Plan's likely significant effects, including changes made to the emerging Local Plan as a result of the SA.
- Section 9 - discussion of the findings of the Habitats Regulations Assessment and the Equalities Impact Assessment of the Plan and how these findings have been used to help shape the Local Plan policies and proposals.
- Section 10 - recommendations for the approach to monitoring the sustainability effects of implementing the Staffordshire Moorlands Local Plan.
- Section 11 - presents findings from testing Local Plan objectives against the SA Framework.
- Section 12 - The Quality Assurance checklist used to ensure that the requirements of the SEA Directive have been met and fully integrated into the sustainability appraisal process.
- Section 13 - the next steps in the sustainability appraisal process.
- Section 14 - consultation responses received to the draft SA Report July 2017, the Initial SA Report April 2016 and the SA Scoping report August 2014.
- **Appendices** - providing full detail of the assessments undertaken:
- Section 15 - appraisal of site options.
- Section 16 - appraisal of alternative housing requirement options.
- Section 17 - appraisal of alternative alternative employment land requirement options.
- Section 18 - appraisal of alternative development approaches for Cheadle.
- Section 19 - appraisal of alternative development approaches for the rural areas.
- Section 20 - appraisal of preferred option policies.
- Section 21 - results of the screening of changes to preferred option policies proposed for the Submission Version Plan.
- Section 22 - constraints maps for site appraisals.
- Section 23 - review of other relevant plans, programmes and policy objectives identified in the SA Scoping Report and used to help inform the SA Framework.
- Section 24 - Summary of baseline data described in full in the SA Scoping Report and used to help inform the SA Framework.

**3.19** This February 2018 Sustainability Appraisal Report includes the required elements of an environmental report as required by the SEA Regulations.

## How to respond

**3.20** We would like to know your views by **5pm on Wednesday 11<sup>th</sup> April 2018**.

**3.21** If you would like to send us your views on this consultation, you can do so using one of the following methods:

- Online on the Local Plan consultation website:  
[www.staffsmoorlands.gov.uk/localplan](http://www.staffsmoorlands.gov.uk/localplan)
- Email to [forward.plans@staffsmoorlands.gov.uk](mailto:forward.plans@staffsmoorlands.gov.uk).
- Post to the address given below.

**3.22** The submission of comments online or by email is considered to be the most efficient means of responding. Use of the consultation website provides several benefits and enables consultees to:

- Read the SA Report, Local Plan and other supporting information online.
- Submit comments online (registration required).
- Read all comments submitted by other consultees.

**3.23** Documents can be consulted at Council offices and libraries (or downloaded from the web address above) and comments returned by post to:

- Regeneration, Staffordshire Moorlands District Council, Moorlands House, Stockwell Street, Leek, Staffordshire, ST13 6HQ.

Please note: details of consultees registered on the consultation website and all respondents to the consultation will be added to our Local Plan contact list and will receive notification of future consultations.

All comments and the name of the individual or organisation responsible for them will be made available to view on the public consultation website. All representations may also be viewed at Council offices.

Consultation responses and associated information will be handled in accordance with the Data Protection Act.

## Appraisal methodology

## 4 Appraisal methodology

**4.1** The methodology for this appraisal was developed in accordance with the following guidance:

- Sustainability Appraisal of Regional Spatial Strategies and Local Development Documents (ODPM, 2005).
- A Practical Guide to the Strategic Environmental Assessment (SEA) Directive (ODPM, 2005).
- Planning Advisory Service (PAS) Sustainability Appraisal guidance contained in the Communities and Local Government (CLG) Plan Making Manual.<sup>(4)</sup>
- National Planning Practice Guidance<sup>(5)</sup>

**4.2** Staffordshire Moorlands District Council undertakes the sustainability appraisal process principally in-house, with Officers based in the Regeneration Service teams. The work has been supported by site appraisals carried out by consultants Amec Foster Wheeler between October and December 2015.

**4.3** The sustainability appraisal is carried out in a series of stages, which include setting the context and objectives for the sustainability appraisal, developing and assessing the effects of alternatives and carrying out consultation on a Sustainability Appraisal Report. The stages of methodology are shown in Table 4.1 below.

Methodology stage	Description
A – Setting the context and objectives for the sustainability appraisal	This stage sets the scope for the ongoing appraisal by establishing an evidence base. A separate Scoping Report has been completed and published for consultation.
B – Developing options and assessing effects	The sustainability appraisal is involved in developing options from the outset. Development and appraisal of options is an iterative process, with effects being predicted and evaluated for their significance. Potential mitigation measures for any predicted significant effects are considered at this stage.
C – Preparing a Sustainability Appraisal Report	This February 2018 report is the third step in this key output of the appraisal process, following publication of the Draft SA report in July 2017 and the Initial SA Report in April 2016, and presenting information on the effects of the plan in a format suitable for public consultation.
D – Consulting on the plan and Sustainability Appraisal Report	The final Sustainability Appraisal Report is published for consultation alongside the plan concerned. Consultation must include the statutory environmental consultation bodies.

4 <http://www.pas.gov.uk/pas/core/page.do?pagelId=152450>

5 <http://planningguidance.communities.gov.uk/>

Methodology stage	Description
E – Monitoring significant effects	The predicted significant effects are monitored after implementation of the plan to identify any unforeseen effects and undertake appropriate remedial action.

**Table 4.1 Stages of sustainability appraisal methodology**

**4.4** The timetable for the key stages undertaken in the SA of the emerging Staffordshire Moorlands Local Plan are shown in Table 4.2 below.

Stage	Linkages to Plan Preparation	Aim
SA Scoping Report - August 2014	Prepared alongside preparation and review of the evidence base. Published for consultation between 13 <sup>th</sup> August 2014 and 26 <sup>th</sup> September 2014.	Identify relevant plans and programmes. Establish the baseline. Identify sustainability issues. Set the Sustainability Framework: including deciding on the scope of the appraisal, defining objectives and indicators.
Interim Sustainability Appraisal report - April 2016	Prepared alongside the Local Plan: Preferred Options Sites and Boundaries. Published for consultation between 28 <sup>th</sup> April 2016 and 13 <sup>th</sup> June 2016.	Provide background and context for the consultation. Assist selection of preferred options. Recommend how options could be improved, including through mitigation measures.
Draft Sustainability Appraisal report - July 2017	Prepared alongside the Preferred Options Local Plan July 2017. Consultation on both took place at the same time: 24 <sup>th</sup> July 2017 to 15 <sup>th</sup> September 2017.	Appraise the effects (economic, social and environmental) of the alternative development requirements, policies and site allocations - against the Sustainability Framework. Appraise any significant changes to the plan arising out of consultation undertaken at Preferred Options Sites and Boundaries Stage. Recommend how the options could be improved, including through mitigation measures. Develop proposals for monitoring the plan.

Stage	Linkages to Plan Preparation	Aim
Sustainability Appraisal report - February 2018	<p>This document. Prepared alongside the Local Plan Submission Version February 2018.</p> <p>Consultation on both is taking place at the same time: 27<sup>th</sup> February 2018 to 11<sup>th</sup> April 2018.</p>	<p>Appraise any significant changes to the plan arising out of latest evidence and consultation undertaken at Preferred Options Stage.</p> <p>Identify changes made to the Plan as a result of the SA.</p> <p>Integrate key elements of the Scoping Report.</p> <p>Prepare a Non Technical Summary.</p>
Final Sustainability Appraisal report - (date to be confirmed)	Submitted alongside Staffordshire Moorlands Local Plan for Examination.	The sustainability appraisal will be used as part of determining the robustness of the plan and whether it should be approved.

**Table 4.2 Key Stages in the Sustainability Appraisal**

### Developing and refining ‘reasonable alternatives’

**4.5** The SEA Directive requires assessment of the likely significant effects of implementing the plan, and “reasonable alternatives”. Developing options and alternatives is an important part of both the plan-making and sustainability appraisal process. For the Local Plan, the reasonable alternatives are the different options put forward during the preparation of the plan.

**4.6** This consultation and the sustainability appraisal work documented in appendices to this report have had a significant part to play in identifying and refining options considered to be “reasonable alternatives”. The sustainability appraisal has been involved from an early stage in this development of options to help ensure that any adverse effects of proposals were identified as early as possible.

### Development Site Options

**4.7** The Council maintains a Strategic Housing Land Availability Assessment (SHLAA) which identifies and assesses the availability, suitability and deliverability of land as a potential housing site to meet the identified need for housing over the plan period. This evidence helps the Council understand what sites are theoretically available for housing development and was the basis for identifying a wide range of alternative site options consulted on between July and September 2015. A detailed appraisal of around 300 alternative housing site options, alongside options for employment sites and gypsy and traveller sites, is documented in section 15 of this report, with findings summarised in section 6.

**4.8** Over 5,500 consultation responses were received to the 2015 consultation and the representations made, along with the findings of the SA, were used with other evidence to help determine preferred sites to be taken forward into the Local Plan preferred option sites and boundaries consultation held in April 2016.

**4.9** Over 8,600 responses were received to the 2016 consultation. Analysis of these consultation responses along with updates to the evidence base, including the developing SA evidence, helped to refine the preferred options and inform the selection of sites proposed in the Local Plan preferred options July 2017.

### Housing requirement options

**4.10** An update to the SHMA<sup>(6)</sup> was published in February 2017 when a number of scenarios were modelled to take account of the latest evidence, including the 2014-based SNPP published in May 2016. The scenarios demonstrated the extent to which the population of the District is likely to change over the plan period, and how this growth would be translated into households, dwellings, numbers of economically active residents and the number of jobs that might be supported. Reasonable alternatives for a housing requirement, derived from the February 2017 report, were appraised in February 2017. These were:

- Option 1: 235 new homes each year (2014 - 2031)
- Option 2: 260 new homes each year (2014 - 2031)
- Option 3: 330 new homes each year (2014 - 2031)
- Option 4: 450 new homes each year (2014 - 2031)

**4.11** Previously, the Staffordshire Moorlands Strategic Housing Market Assessment<sup>(7)</sup> January 2016 revision had identified a number of scenarios to reflect the alternatives for future growth within the District based on the evidence available at that time. Consideration of these scenarios led to the Council considering four potential housing requirement options in January 2016:

- Option 1: 250 new homes each year (2016 - 2031)
- Option 2: 320 new homes each year (2016 - 2031)
- Option 3: 440 new homes each year (2016 - 2031)
- Option 4: 520 new homes each year (2016 - 2031)

### Employment requirement options

**4.12** Nathaniel Lichfield & Partners (NLP) prepared an Employment Land Review for the district in July 2014. This study was updated in February 2017 to incorporate more recent data releases, to align with the updated Strategic Housing Market Assessment (SHMA) and also to reflect the changing economic context post British exit from the European Union. The report<sup>(8)</sup> considered a number of potential future scenarios in order to help identify requirements for B-class employment space in the district over the seventeen year period 2014-2031. From these scenarios, four reasonable alternative employment land requirements were selected for appraisal in February 2017:

- Option 1: 13ha (2014 - 2031)
- Option 2: 16ha (2014 - 2031)

6 Staffordshire Moorlands SHMA Update; Nathaniel Lichfield & Partners; 2017

7 Staffordshire Moorlands 2012-based SNHP Update - Implications of the 2012-based SNHP - January 2016 Revision; January 2016; Nathaniel Lichfield & Partners

8 Staffordshire Moorlands ELR Update; February 2017; Nathaniel Lichfield & Partners

- Option 3: 25ha (2014 - 2031)
- Option 4: 27ha (2014 - 2031)

### **Alternative Development Approaches for Cheadle**

**4.13** The strategy for Cheadle set out in the adopted Core Strategy is based on taking a comprehensive view of the expansion of the town and programming ahead for the phased release of land and related infrastructure improvements. The Core Strategy notes that this will take the form of urban extensions involving housing and employment development with related leisure and community facilities as part of an overall regeneration and growth strategy.

**4.14** In identifying sites for inclusion in the Local Plan preferred option sites and boundaries April 2016, a number of reasonable alternative development approaches were considered for Cheadle, in line with the strategy set out above. These were:

- Option 1: Northern Focus
- Option 2: South western focus
- Option 3: Scattered approach

**4.15** Following the appraisal, all three options were dismissed and a fourth option was appraised for the Local Plan preferred options July 2017:

- Option 4: North-South clusters with small sites scattered through the town

### **Alternative development approaches for the rural areas**

**4.16** In order to meet the development requirement for the rural areas, the Preferred Options Sites and Boundaries Plan proposed Green Belt release where evidence suggested that this could be done whilst retaining Green Belt purposes and where exceptional circumstances could be justified. However this preferred option (April 2016) approach was re-examined in the light of the requirement proposed in the subsequent Housing White Paper for authorities to examine fully all other reasonable options before amending Green Belt boundaries. It was considered that options other than Green Belt release were available to the Council in order to meet housing need.

**4.17** An alternative approach to meeting housing need was set out in the emerging Local Plan in July 2017. This alternative approach relied on redirecting a small percentage of growth to the towns accompanied by a strategic site release in the rural areas. In order to test this approach against reasonable alternatives, in December 2017 four alternative development approaches for the rural areas were considered. These were:

1. Preferred Option 2016: Green Belt release.
2. Countryside release.
3. Growth redirected to towns
4. Strategic site release

**4.18** Following the appraisal, all four options were dismissed and a fifth option was appraised - the Local Plan preferred options July 2017:

- Option 5: Growth redirected to towns accompanied by strategic site release.

## Local Plan policy options

**4.19** The Staffordshire Moorlands Core Strategy was adopted in March 2014. The Core Strategy contains a suite of existing policies consistent with the NPPF. However since adoption a number of new or emerging planning policies and regulations of relevance have been introduced. These include:

- The Housing and Planning Act 2016
- Self-Build and Custom House Building Act 2015 and associated Regulations (2016)
- The Town and Country Planning (Brownfield Land Register) Regulations 2017
- Town and Country Planning (Permission in Principle) Order 2017
- Neighbourhood Planning Act 2017
- Housing White paper published February 2017

**4.20** Existing core strategy policies have thus been reviewed as part of the Local Plan preparation process and updated where the evidence base or national planning policy context requires it. For this reason, alternative approaches to delivering policy objectives have not been appraised, the Core Strategy policy has been taken as the most appropriate policy option in the first instance. However the policies, updated as required, have been considered the preferred approach and appraised to identify likely significant effects.

**4.21** In January 2018 proposed changes to the preferred options policies were screened for likely significant effects as part of the preparation of the Submission Version Local Plan February 2018.

## Assessing the significance of effects

### The SEA Directive requires

... "an assessment of likely significant effects ... taking into account the objectives and geographical scope of the plan or programme".

**4.22** It is only necessary to assess those effects that are likely to be significant, not all possible effects. In this report, the social, environmental and economic effects of all Local Plan options have been predicted and evaluated for their significance. The sustainability appraisal framework, presented in Section 5, forms the basis for the assessment throughout the report.

**4.23** Prediction of effects involves identifying what changes might occur to the sustainability baseline over time – these changes are then evaluated for their likely significance, in terms of their probability, duration, frequency, and the geographical area likely to be affected.

**4.24** Assessment matrices (contained in Sections 15 - 20) present the detailed findings. Each matrix is relatively simple and allows for a discussion of potential effects, evidence and possible mitigation measures. The simplicity of the matrix is designed to reflect the fact that strategic options should (and in many cases can only be) assessed in broad terms where there is a lack of spatial expression. A combination of expert judgement and analysis of baseline data has been used to judge the effects.

**4.25** Within each matrix, a significance "score", ranging from: ++ (very positive impact) to: -- (very negative impact) is given against each objective. Ultimately, the significance of an effect is a matter of judgement, making best use of available evidence, and requires no more than a clear and reasonable justification. Definition of significance is considered later in this section. Where uncertainties exist or where it is considered that insufficient information exists to enable an accurate assessment to be made, this has been noted.

### **Assessing cumulative effects**

**4.26** The assessment of effects of Local Plan policies and proposals includes potential secondary, cumulative and synergistic effects, as required by the SEA Directive. Many sustainability problems result from the accumulation of multiple, small and often indirect effects, rather than a few large obvious ones, and consideration of such cumulative effects is set out in section 7 of this report.

### **Consideration of potential mitigation measures**

#### **The SEA Directive requires**

... consideration of "measures envisaged to prevent, reduce and as fully as possible offset any significant adverse effects on the environment of implementing the plan or programme".

**4.27** These measures are referred to as mitigation measures, and can include recommendations for improving beneficial effects.

**4.28** In the assessment matrices, potential mitigation measures are considered for likely adverse and positive effects. For any effects judged likely to be significant, these are discussed further in this report.

### **Appraisal limitations, difficulties encountered and assumptions made**

**4.29** A key issue in undertaking the appraisal of the emerging Local Plan is the partly strategic nature of the document, the uncertainty surrounding precisely how its ambitions will be implemented on the ground and the degree to which they will be achieved in practice (particularly since many different partners are involved in its delivery).

**4.30** Inevitably, a high degree of judgement has been required in undertaking the appraisals to determine the "significance" of effects. Sustainability appraisal relies on expert judgement, which is guided by knowledge of the likely impacts of the plan, the baseline data available and responses and information provided by consultees and other stakeholders. The assessment has been carried out and reported using an expert, judgement-led, qualitative assessment.

**4.31** Definitions of significance have been identified and used in the appraisals in order to address the qualitative nature of the work, and to help ensure consistency and transparency. This is discussed further below.

**4.32** Some gaps in the baseline data regarding detailed trends across the plan area have been identified. Although every effort has been made to present an accurate baseline situation in the scoping report, there have been inevitable data constraints and the scoping

report is subject to regular review. Information contained within the scoping report is always likely to become outdated quickly and there are time and resource issues regarding how often this data can be updated.

### Definitions of significance

**4.33** In order to support the appraisals, definitions of significance were used to ensure assessments were consistent and transparent. These definitions are set out in table 4.5 below, and show the rationale under-pinning judgements made on significance of identified effects. The key to the symbols depicting the description of significance used in the following table is given in the table below.

**4.34** In considering definitions of significance, suggested acceptable walking distances have been taken from Building for Life 12 as set out in table 4.3 below.

(1)	Town centres (m)	Commuting / School / Sight-seeing (m)	Elsewhere (m)
Desirable	200	500	400
Acceptable	400	1000	800
Preferred maximum	800	2000	1200

**Table 4.3 Suggested acceptable walking distances**

1. Source: The Institution of Highways and Transportation (2000) Guidelines for Providing for Journeys on Foot, London

### Key to description of the nature of effects

Effect	
++	The policy / proposal will have a very positive impact on the sustainability objective. See definition of significance in Table 4.5.
+	The policy / proposal will have a slightly positive impact on the sustainability objective. See definition of significance in Table 4.5.
0	The policy / proposal will have a negligible or neutral impact on the sustainability objective. A recorded neutral effect does not necessarily mean that there will be no effect at the project level, but shows that at this strategic level there are no identifiable effects.
-	The policy / proposal will have a slightly negative impact on the sustainability objective. See definition of significance in Table 4.5.
--	The policy / proposal will have a very negative impact on the sustainability objective. See definition of significance in Table 4.5.
i	The outcome could be dependent on implementation, or more detail is required to make an assessment.

Effect	
?	The impact of an issue cannot be predicted at this stage.

**Table 4.4 Description of the nature of effects**

**4.35** Definitions of significance are provided in the table that follows.

Objective	Decision making criteria	Effect	Illustrative Guidance for determining significance
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Will it make a positive contribution towards community cohesion?</li> <li>● Will it improve neighbourhood quality?</li> <li>● Will it ensure that there is adequate open space and support Green Infrastructure (GI)?</li> <li>● Will it minimise light and noise pollution?</li> <li>● Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>++</p> <p>+</p> <p>-</p> <p>--</p>	<p>The proposal could enable the delivery of new, or the significant enhancement of existing, community facilities and services.</p> <p>The proposal could enable significant improvements to the social and environmental quality of the neighbourhood.</p> <p>The proposal could enable significant enhancement of the District's GI network.</p> <p>The proposal is within the existing settlement boundary.</p> <p>The proposal could enable the enhancement of existing, community facilities and services.</p> <p>The proposal could enable improvement of the social and environmental quality of the neighbourhood.</p> <p>The proposal could enable enhancement of the District's GI network.</p> <p>The proposal is within or adjoins the existing settlement boundary.</p> <p>The proposal could reduce the availability and quality of existing community facilities and services.</p> <p>The proposal could have an adverse effect on the social and environmental quality of the neighbourhood.</p> <p>The proposal could have an adverse effect on the District's GI network.</p> <p>The proposal is separate from an existing settlement.</p> <p>The proposal could result in the loss of existing community facilities and services without suitable replacement</p> <p>The proposal could have a significantly adverse effect on the social and environmental quality of the neighbourhood.</p> <p>The proposal could have a significantly adverse effect on the District's GI network.</p> <p>The proposal is remote from an existing settlement.</p>
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Will it help to minimise the distance people need to travel (including travel by public transport) to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>++</p> <p>+</p> <p>-</p> <p>--</p>	<p>The proposal could ensure that new development is located in close proximity to a wide range of services and facilities (e.g. within 800m of a wide range of services and/or 400m of a settlement centre.) The needs of all members of the community can be addressed.</p> <p>The proposal could ensure that new development is located in proximity to some services and facilities (e.g. within 400-800m of a key service.)</p> <p>The proposal could result in new development being located away from existing services and facilities (e.g. in excess of 2,000m from a wide range of services.)</p> <p>The proposal could result in new development being inaccessible to existing services and facilities (it is over 2,000m from existing services &amp; facilities and has poor public transport links). The needs of some members of the community could not be addressed.</p>

Objective	Decision making criteria	Effect	Illustrative Guidance for determining significance
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Will it improve health or access to health facilities?</li> <li>● Will it promote healthy lifestyles?</li> <li>● Will it reduce health inequalities?</li> <li>● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	++	<p>The proposal could ensure that new development is located in close proximity to a range of healthcare facilities (e.g. within 800m of a GP surgery and open space).                      The proposal could have strong and sustained impacts on healthy lifestyles and improve well-being through physical or recreational activity.                      The proposal could deliver new healthcare or physical recreation facilities; open space or enable improved recreational access to the countryside and address the needs of those areas which experience economic and/or social deprivation.</p>
		+	<p>The proposal could ensure that new development is located in proximity to a healthcare facility (e.g. Within 800m - 1,200m of a GP surgery and open space).                      The proposal could support healthy lifestyles and well-being through physical or recreational activity and enable improved recreational access to the countryside.</p>
		-	<p>The proposal could deliver development in excess of 1,200m from a GP surgery or open space or has a limited or infrequent public transport.                      The proposal could reduce access to healthcare facilities and open space.                      The proposal could have effects which could result in a deterioration of health e.g. through reducing opportunity for physical or recreational activity, including reducing opportunities for supporting recreational access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Will it reduce actual levels of crime?</li> <li>● Will it reduce fear of crime?</li> </ul>	--	<p>The proposal could result in loss of healthcare facilities and open space without suitable replacement.                      The proposal could have significant effects which could result in a deterioration of health within the community e.g. through loss of leisure and physical recreational facilities.</p>
		++	<p>The proposal could significantly reduce the level of crime and fear of crime through design and/or other safety measures.</p>
		+	<p>The proposal could reduce the level of crime and fear of crime through design and/or other safety measures.</p>
		-	<p>The proposal risks leading to an increase in reported crime and the fear of crime in the District.</p>
		--	<p>The proposal risks leading to a significant increase in reported crime and the fear of crime in the District.</p>
5. To ensure adequate quality and provision of a range of house	<ul style="list-style-type: none"> <li>● Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Will it enable people to meet their needs within their existing communities?</li> <li>● Will it ensure that people can afford their housing?</li> </ul>	++	<p>The proposal could provide a significant contribution to help boost the supply of housing in the District (for sites: over 20 dwellings in towns and over 10 dwellings elsewhere).                      The proposal could enable the delivery of a range of types and tenures making a significant contribution to meeting the needs of the whole community.                      The proposal could make a significant contribution to the delivery of affordable homes.</p>

Objective	Decision making criteria	Effect	Illustrative Guidance for determining significance
<p>types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>		<p>+</p>	<p>The proposal could provide a contribution to help boost the supply of housing in the District (for sites: between 15 - 19 dwellings in towns and between 5 - 9 elsewhere). The proposal could enable the delivery of a range of types and tenures making a contribution to meeting community needs The proposal could make a contribution to the delivery of affordable homes.</p>
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Will it minimise impacts on existing traffic congestion?</li> <li>● Will it support the use of public transport?</li> <li>● Will it support safe walking and cycling?</li> <li>● Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>++</p>	<p>The proposal could fail to provide a contribution to help boost the supply of housing in the District (for sites: 0 dwellings). The proposal could fail to provide an appropriate mix of housing and significant need of some parts of the community could be unmet. The proposal could not make a contribution to the delivery of affordable homes and significant affordable housing need could be unmet.</p>
		<p>-</p>	<p>The proposal could fail to provide a contribution to help boost significantly the supply of housing in the District (for sites: between 1 - 14 dwellings in towns and 1 - 4 dwellings elsewhere). The proposal could not enable the delivery of a range of types and tenures and could fail to make a contribution to meeting community needs. The proposal could not make a contribution to the delivery of affordable homes.</p>
		<p>+</p>	<p>The proposal could have a significantly positive effect on minimising the impact of new development on existing traffic congestion e.g. a site in an area without existing traffic congestion. The proposal could offer significant support for the use of public transport e.g. a site that could deliver development within 500m of a bus stop or 1,000m of a train station. The proposal could provide significant support for safe walking and cycling e.g. development that could deliver a new, or improvement to an existing, greenway and /or deliver development within 400m of a settlement centre or 800m of a range of services and facilities.</p>
		<p>+</p>	<p>The proposal could have a positive effect on minimising the impact of new development on existing traffic congestion e.g. a site in an area without high levels of existing traffic congestion. The proposal could offer support for the use of public transport e.g. a site that could deliver development within 1,000m of a bus stop or 2,000m of a train station. The proposal could provide support for safe walking and cycling e.g. development that could deliver a new, or improvement to an existing, greenway and /or deliver development within 800m of a settlement centre or 1,200m of a range of services and facilities.</p>
		<p>-</p>	<p>The proposal could increase the need to travel by less sustainable forms of transport, increasing road traffic and congestion eg a site remote from a settlement centre (eg in excess of 2,000m from a wide range of services) and/or in an area of existing traffic congestion. The proposal could not offer support for the use of public transport eg a site that could deliver development in excess of 2,000m from public transport services.</p>

Objective	Decision making criteria	Effect	Illustrative Guidance for determining significance
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>● Will it increase energy efficiency?</li> <li>● Will it increase the use of renewable energy?</li> <li>● Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>--</p> <p>++</p> <p>+</p> <p>-</p> <p>--</p>	<p>The proposal could significantly increase the need to travel by less sustainable forms of transport, increasing road traffic and congestion.</p> <p>The proposal could significantly reduce greenhouse gas emissions from the District. The proposal could significantly reduce energy consumption or increase the amount of renewable energy used / generated. The proposal could deliver development within 400m of a settlement centre or 800m of a range of services and facilities.</p> <p>The proposal could reduce greenhouse gas emissions from the District. The proposal could reduce energy consumption or increase the amount of renewable energy used / generated. The proposal could deliver development within 800m of a settlement centre or 1,200m of a range of services and facilities.</p> <p>The proposal could lead to an increase in greenhouse gas emissions from the District The proposal could lead to an increase in energy consumption. The proposal could fail to support increase in the use of renewable energy. The proposal could deliver development in excess of 1,200m from a wide range of services and facilities.</p> <p>The proposal could lead to a significant increase in greenhouse gas emissions from the District. The proposal could lead to a significant increase in energy consumption. The proposal could lead to a decline in the contribution made by renewable forms of energy. The proposal could deliver development in excess of 2,000m from public transport and other services and facilities.</p>
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Will it minimise emissions of airborne pollutants?</li> <li>● Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	<p>++</p> <p>+</p> <p>-</p>	<p>The proposal could significantly improve air quality; result in air quality targets being met and/or the number of identified areas of poor air quality being reduced.</p> <p>The proposal could improve air quality. The proposal could contribute to improvements in air quality e.g. through delivery of significant soft landscape features.</p> <p>The proposal could lead to a decrease in air quality. The proposal could result in new development being located within 500m of an identified area of poor air quality.</p>

Objective	Decision making criteria	Effect	Illustrative Guidance for determining significance
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Is new development directed towards areas of least flood risk?</li> <li>● Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDs into new development?</li> <li>● Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Will it encourage water efficiency and demand management?</li> </ul>	--	<p>The proposal could lead to a decrease in air quality and could result in the extension to an identified area of poor air quality.</p> <p>The proposal could result in new development being located within an identified area of poor air quality.</p>
		++	<p>The proposal could significantly reduce flood risk to new or existing infrastructure or communities currently located in the 1 in 100 year floodplain (flood zone 3).</p> <p>The proposal could lead to a significant reduction of wastewater, surface water runoff and/or pollutant discharge so that the quality of groundwater and/or surface water could be significantly improved and all water targets could be met.</p> <p>The proposal could lead to a significant reduction in the demand for water from the District.</p>
		+	<p>The proposal could reduce flood risk to new or existing infrastructure or communities currently located in the 1 in 1,000 year floodplain (flood zone 2).</p> <p>The proposal could lead to a reduction of wastewater, surface water runoff and/or pollutant discharge so that the quality of groundwater and/or surface water could be improved so that some water targets could be met.</p> <p>The proposal could lead to a reduction in the demand for water from the District.</p>
		-	<p>The proposal could result in an increased flood risk within the 1 in 1,000 year floodplain (flood zone 2).</p> <p>The proposal could result in development being located in flood zone 2.</p> <p>The proposal could reduce flood risk to new or existing infrastructure or communities currently located in the 1 in 1,000 year floodplain (flood zone 2).</p> <p>The proposal could lead to an increase in the amount of wastewater, surface water runoff and/or pollutant discharge so that the quality of groundwater and/or surface water could be reduced. (This will apply in most cases if the site is greenfield).</p> <p>The proposal could lead to an increase in the demand for water from the District.</p>
		--	<p>The proposal could result in an increased flood risk within the 1 in 100 year floodplain (flood zone 3).</p> <p>The proposal could result in development being located in flood zone 3.</p> <p>The proposal could lead to a significant increase in the amount of wastewater, surface water runoff and/or pollutant discharge so that the quality of groundwater and/or surface water could be decreased and water targets could not be met.</p> <p>The proposal could lead to a significant increase in the demand for water from the District.</p>

Objective	Decision making criteria	Effect	Illustrative Guidance for determining significance
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>● Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>● Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>++</p> <p>+</p> <p>-</p>	<p>The proposal could have a positive effect on European or national designated sites, habitats or species e.g. enhancing habitats, creating additional habitat or increasing protected species population. The proposal could create new habitat and link it with existing habitats or significantly improve existing habitats to support local biodiversity.</p> <p>The proposal could have a positive effect on regional or locally designated sites, habitats or species. The proposal could improve existing habitats to support local biodiversity. The policy could enhance the District's ecological and GI networks.</p> <p>The proposal could have negative effects on regional or locally designated sites, habitats or species e.g. short term loss of habitats, temporary loss of species, proposal within 100m of a designated site.</p> <p>The proposal could lead to short-term disturbance of existing habitat (including woodland) but could not have long-term effects on local biodiversity.</p> <p>The proposal could adversely affect the District's ecological and GI networks.</p> <p>The proposal could have a negative effect on European or national designated sites, habitats and/or protected species and these effects could not be reasonably mitigated.</p> <p>The proposal could have a significantly adverse effect on the District's ecological and GI networks.</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Will it safeguard the best and most versatile agricultural land?</li> <li>● Will it minimise the loss of greenfield land?</li> <li>● Will it reduce land contamination / instability?</li> <li>● Will it reduce the amount of derelict land?</li> <li>● Will it protect notable geological and geomorphological features?</li> </ul>	<p>++</p> <p>+</p> <p>-</p> <p>--</p>	<p>The proposal could avoid the loss of agricultural land including the best and most versatile land. The proposal could result in significant development on brownfield land. The proposal could result in soil contamination being removed. The proposal could have major positive effects on protected geologically important sites.</p> <p>The proposal could result in development on brownfield or non agricultural land. The proposal could have positive effects on protected geologically important sites.</p> <p>The proposal could result in development on agricultural land in the countryside or ALC 4 or 5. The proposal could have minor negative effects on protected geologically important sites.</p> <p>The proposal could result in the loss of the best and most versatile agricultural land. ALC 1-3. The proposal could result in land contamination. The proposal could have major negative effects on protected geologically important sites.</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Will it reduce waste generation?</li> <li>● Will it maximise the re-use of existing buildings?</li> <li>● Will it increase the use of building materials from sustainable sources?</li> </ul>	<p>++</p>	<p>The proposal could reduce the amount of waste generated through prevention, minimisation and re-use. The proposal could enable the significant re-use of existing buildings. The proposal could enable the significant use of sustainable materials.</p>

Objective	Decision making criteria	Effect	Illustrative Guidance for determining significance
		+	<p>The proposal could enable some re-use of existing buildings. The proposal could enable some use of sustainable materials.</p>
		-	<p>The proposal could involve the loss of existing buildings. The proposal could increase the demand for local resources.</p>
		--	<p>The proposal could result in a significantly increased amount of waste going to landfill. The proposal could involve the significant loss of existing buildings. The proposal could significantly increase the demand for local resources. The proposal could result in inappropriate development within a Minerals Safeguarding Area.</p>
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>++</p>	<p>The proposal could provide opportunities to enhance cultural and historic heritage assets (designated and non-designated assets) along with their settings. The proposal could offer potential to significantly enhance townscape character.</p>
		+	<p>The proposal could protect cultural and historic heritage assets (designated and non-designated assets) along with their settings. The proposal could offer potential to enhance townscape character.</p>
		-	<p>The proposal could lead to deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings.  Proposal will effect designated heritage asset or it's setting (is within 100m) although it's effect maybe uncertain.</p>
		--	<p>The proposal could lead to a loss or significant deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. The proposal could lead to new development that risked making a negative contribution to local character and distinctiveness.</p>
<p>14. To protect and enhance the character of the landscape and appearance of the landscape including historic landscape and</p>	<ul style="list-style-type: none"> <li>● Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Will it promote development on brownfield land?</li> <li>● Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>++</p>	<p>The proposal could offer potential to significantly protect and enhance landscape character in accordance with NCA profiles The proposal could avoid development within 1,000m of protected sites (e.g. Natura sites and SSSIs) and thus recreational and urbanisation pressures on such sites.</p>
		+	<p>The proposal could offer potential to protect and enhance landscape character in accordance with NCA profiles. The proposal could avoid development within 400m of protected sites (e.g. Natura sites and SSSIs).</p>

Objective	Decision making criteria	Effect	Illustrative Guidance for determining significance
<p>other natural assets and resources.</p>		-	<p>The proposal could have an adverse effect on landscape character or an area of historic landscape value that could not be reasonably mitigated. The proposal has potential for an adverse effect on a site of local importance such as ancient woodland that could not be reasonably mitigated.  The proposal is on a greenfield site in the countryside.</p>
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Does it help support tourism and the visitor economy?</li> </ul>	<p>++  +  -  --</p>	<p>The proposal could have a significant adverse effect on landscape character or area of historic landscape value that could not be reasonably mitigated. The proposal could result in development within proximity of protected sites (e.g. Natura sites and SSSIs) and could result in recreational and urbanisation pressures on such sites that could not be reasonably mitigated.  The proposal could support opportunities for investment in culture and tourism that could result in significant positive effects on the local economy.  The proposal could support opportunities for investment in culture and tourism that could result in positive effects on the local economy.  The proposal could have negative effects on potential investment in culture and tourism that could result in negative impacts on the local economy.  The proposal could have significantly negative effects on investment in culture and tourism that could result in significant negative impacts on the local economy.</p>
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>● Will it safeguard shops and services in existing centres?</li> <li>● Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>++  +  -  --</p>	<p>The proposal could significantly enhance the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services.  The proposal could enhance the vitality and viability of the District's towns and villages contributing to the safeguarding and improvement of shops and services.  The proposal could have an adverse effect on the vitality and viability of the District's towns and villages, leading to the decline of shops and services.  The proposal could have a significantly adverse effect on the vitality and viability of the District's towns and villages, leading to significant decline in shops and services.</p>

Objective	Decision making criteria	Effect	Illustrative Guidance for determining significance
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>● Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>++</p> <p>+</p> <p>-</p> <p>--</p>	<p>The proposal could significantly encourage investment in businesses, people and infrastructure which could lead to a strengthened and more diversified economy, e.g. it could deliver over 1ha of employment land within 20 minutes travel time of a main population centre.</p> <p>The proposal could encourage investment in businesses, people and infrastructure which could lead to a strengthened and more diversified economy. The proposal could provide accessible employment opportunities.</p> <p>The proposal could have a negative effect on business, the local economy and local employment, e.g. it could lead to the closure or relocation of existing business, or the loss of employment land.</p> <p>The proposal could have a significant negative effect on business, the local economy and local employment, e.g. it could lead to the closure or relocation of significant businesses, the loss of over 1ha of employment land or negative impact on key sectors of the economy (e.g. knowledge-based; advanced manufacturing).</p>
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> <li>● Will it meet the employment needs of local people?</li> <li>● Will it increase economic activity levels?</li> <li>● Will it improve physical accessibility to jobs?</li> <li>● Will it support higher income levels for local residents?</li> </ul>	<p>++</p> <p>+</p> <p>-</p> <p>--</p>	<p>The proposal could facilitate the delivery of new employment opportunities, or residential development in close proximity to existing local employment provision e.g. within 500m or 10 minutes travel time by walk/cycle/bus/rail.</p> <p>The proposal could facilitate the delivery of new employment opportunities, or residential development e.g. within 1,000m or 30 minutes travel time of existing local employment provision by walk/cycle/bus/rail.</p> <p>The proposal is unlikely to contribute to the employment needs of local people e.g. by delivering development beyond 1,000m and 30 minutes travel time by walk/cycle/bus/rail.</p> <p>The proposal could fail to meet the employment needs of local people e.g. by delivering development beyond 1,500m and 30 minutes travel time by walk/cycle/bus/rail.</p>

**Table 4.5 Definitions of significance**

## Consultation requirements for the sustainability appraisal

### The SEA Directive requires that

... “ authorities with relevant environmental responsibilities and the public ... shall be given an early and effective opportunity within appropriate time frames to express their opinion on the draft plan ... and accompanying environmental report...”

**4.36** This SA report is being consulted on alongside the Staffordshire Moorlands Local Plan - Submission Version February 2018. The consultation includes the statutory environmental organisations Natural England, Historic England and the Environment Agency, as required by the SEA Directive, alongside a wide range of other stakeholders and community organisations.

**4.37** A Draft SA Report was published for formal public consultation alongside the Staffordshire Moorlands Local Plan Preferred Options between 31<sup>st</sup> July and 22<sup>nd</sup> September 2017. In addition, an Initial Sustainability Appraisal Report was subject to consultation alongside the Staffordshire Moorlands Preferred Option Sites and Boundaries document between 28th April and 13th June 2016. Comments received during these consultations, and the Council's response, are set out in section 14 of this report.

**4.38** Consultation has also previously been undertaken on the scope and level of detail of the sustainability appraisal through consultation on the SA Scoping Report held between 13<sup>th</sup> August 2014 and 26<sup>th</sup> September 2014. Seeking the views of the statutory environmental organisations on the scope and level of detail to be included in the Environmental Report is also a requirement of the SEA Directive.

SA Scoping stage

## 5 SA Scoping stage

### **The SEA Directive requires**

an environmental report to include ... “An outline of the plan’s relationship with other relevant plans and programmes”.

“The relevant aspects of the current state of the environment and the likely evolution thereof without implementation of the plan or programme”.

“The environmental characteristics of those areas likely to be significantly affected”.

“Any existing problems which are relevant to the plan or programme including, in particular, those relating to any areas of a particular environmental importance such as areas designated pursuant to Council Directive 79/409/EEC on the conservation of wild birds and Habitats Directive”.

“The environmental protection objectives, established at international, Community or Member State level, which are relevant to the plan or programme and the way those objectives and any environmental considerations have been taken into account during its preparation”.

**5.1** This stage of the sustainability appraisal (shown as stage A in Table 4.1) involves compiling background information needed before a sustainability appraisal can be undertaken. It established an evidence base for ongoing appraisal work and culminated in a framework of sustainability objectives.

**5.2** Key tasks in this evidence compilation included:

- identifying relevant policies, plans and programmes;
- collecting baseline information;
- identifying key sustainability issues in the plan area;
- establishing sustainability objectives.

**5.3** This evidence base work was subject to a period of public consultation held on the SA Scoping Report between 13<sup>th</sup> August 2014 and 26<sup>th</sup> September 2014 as part of a continuing baseline review taking place alongside preparation of the emerging Staffordshire Moorlands Local Plan. An SA Scoping Report was originally produced in 2006 and updated in 2007 to form the basis for assessing the Council's Local Development Framework.

**5.4** The SA Scoping Report forms part of the environmental report required by the SEA Directive. The scoping work is subject to continual review as evidence becomes outdated and new information made available. This helps to ensure that effects prediction and evaluation remains accurate and consistent.

**5.5** The key elements of the Scoping Report are described below, and the full version can be viewed online at:

<https://www.staffsmoorlands.gov.uk/article/2861/Sustainability-Appraisal>

## **Relationship with other plans and programmes (policy context) and baseline evidence**

**5.6** A thorough review was undertaken of other relevant plans, policies and programmes and this was presented in the Scoping Report. The purpose of this was to meet the requirement of the SEA Directive to take account of environmental protection objectives and to gather other information that would influence options to be considered in plan preparation.

**5.7** This review studied a range of international, national, regional and local documents that should be taken into account during the preparation of the Local Plan. Details are provided in Section 23.

**5.8** This was followed by a thorough review of the sustainability "baseline" in the Staffordshire Moorlands plan area. The baseline identifies what is currently happening in Staffordshire Moorlands and the likely future state of the area if current trends were to continue. It provides the basis for predicting and monitoring effects and helps to identify sustainability problems and alternative ways of dealing with them. Further detail is provided in Section 24.

## **Key sustainability issues**

**5.9** The review of plans, policies and programmes, and baseline research as described above, has enabled the identification of key sustainability issues in Staffordshire Moorlands (including environmental problems as required by the SEA Directive).

**5.10** Sustainability issues can be any problems or uncertainties which need to be understood and addressed before the Local Plan can be considered sustainable. On the basis of the issues identified, sustainability appraisal objectives have been defined which are used to test how likely the proposals in the Local Plan and alternative options are to lead to sustainable outcomes.

## **Sustainability appraisal framework**

**5.11** The Sustainability Appraisal Framework consists of sustainability objectives which provide a way in which the effects of the Local Plan can be described, analysed and compared. These objectives were developed as a result of the review of other plans and programmes and baseline, consultation responses and from the identified sustainability issues, in particular.

**5.12** Sustainability appraisal objectives are different in concept and purpose from the objectives of the Local Plan, though there is a degree of overlap. The objectives are listed in table 5.1 and form the basis of the appraisal. The full framework includes detailed "decision aiding criteria"; these criteria help to ensure that all the key issues are included in the framework.

### **5.1 Sustainability Appraisal Framework**

**5.13** The Table below sets out the SA Framework used in the appraisals. The objectives and indicators have been revised in the light of consultation responses received during the period of public consultation held on the SA Scoping Report between 13<sup>th</sup> August 2014 and 26<sup>th</sup> September 2014.

Objective	SEA Topic	Decision making criteria	Indicator
<b>SOCIAL</b>			
<b>Population, Human Health and Social Inclusiveness</b>			
1. To improve community cohesion and the quality of where people work and live.	Population and Human Health	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<ul style="list-style-type: none"> <li>Area of open space. (SMDC, Annual Monitoring Report)</li> </ul>
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	Population and Human Health	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<ul style="list-style-type: none"> <li>Job Seekers Allowance Claimant Count Aged 18 – 24 (nomisweb)</li> <li>Incidents of crime per 1,000 Population</li> <li>Fear of Crime (Office for National Statistics)</li> <li>Number of affordable houses completed</li> <li>% of new residential development completed within Towns / Large Villages/ Small Villages/ Other Rural Areas (SMDC)</li> <li>Number of school places created (School Organisation Team, SCC)</li> </ul>
3. To improve health and reduce health inequalities.	Population and Human Health	<ul style="list-style-type: none"> <li>Will it improve health or access to health facilities?</li> <li>Will it promote healthy lifestyles?</li> <li>Will it reduce health inequalities?</li> <li>Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<ul style="list-style-type: none"> <li>Life expectancy (Public Health England)</li> <li>Adult Obesity (Public Health England)</li> <li>Adult participation in sport (Sport England Active People Data)</li> </ul>
4. To minimise opportunities for crime and reduce the fear of crime.	Population and Human Health	<ul style="list-style-type: none"> <li>Will it reduce actual levels of crime?</li> <li>Will it reduce fear of crime?</li> </ul>	<ul style="list-style-type: none"> <li>Incidents of crime per 1,000 Population</li> <li>Fear of Crime (Office for National Statistics)</li> </ul>
5. To ensure adequate quality and provision of a range of house types to meet	Population and Human Health	<ul style="list-style-type: none"> <li>Will it provide an appropriate mix of housing to enable all needs to be met?</li> </ul>	<ul style="list-style-type: none"> <li>Number of affordable houses completed</li> </ul>

Objective	SEA Topic	Decision making criteria	Indicator
local needs in appropriate locations and including affordable / social /extra care housing.		<ul style="list-style-type: none"> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>	<ul style="list-style-type: none"> <li>No of years supply of deliverable housing sites (SMDC, Annual Monitoring Report)</li> <li>No of extra care units delivered (SCC)</li> </ul>
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	Population and Human Health	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<ul style="list-style-type: none"> <li>Frequency of bus service (by settlement) (Staffordshire County Council)</li> <li>% of new residential development completed within Towns / Large Villages/ Small Villages/ Other Rural Areas (SMDC)</li> </ul>
<b>ENVIRONMENTAL</b>			
<b>Climate Change, Air and Water</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	Air and Climatic Factors	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<ul style="list-style-type: none"> <li>% of new residential development completed within Towns / Large Villages/ Small Villages/ Other Rural Areas (SMDC)</li> <li>CO<sub>2</sub> total emissions (National Atmospheric Emissions Inventory)</li> <li>Amount of renewable energy generation by installed capacity and type (SMDC, Annual Monitoring Report)</li> </ul>
8. To improve air quality.	Air	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	<ul style="list-style-type: none"> <li>CO<sub>2</sub> total emissions (National Atmospheric Emissions Inventory)</li> </ul>
9. To reduce flood risk, protect and enhance water sources.	Water	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDs into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>	<ul style="list-style-type: none"> <li>Number of planning applications granted contrary to the advice of the EA in respect of flood risk.</li> <li>Number of planning applications granted contrary to the advice of the EA in respect of water quality. (Environment Agency)</li> </ul>
<b>Biodiversity, Flora and Fauna</b>			

Objective	SEA Topic	Decision making criteria	Indicator
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	Biodiversity, Flora and Fauna	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	<ul style="list-style-type: none"> <li>Area (ha) of UK priority habitats by type. (Staffordshire Ecological Record)</li> <li>% of designated sites brought into favourable condition (DEFRA)</li> <li>% of new developments incorporating ecological enhancement measures per year</li> </ul>
<b>Soil and Material Assets</b>			
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	Soil	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	<ul style="list-style-type: none"> <li>% of development built on brownfield sites (SMDC, Annual Monitoring Report)</li> <li>Area of Regionally Important Geological Sites (RIGS) (Staffordshire Ecological Record)</li> </ul>
12. To minimise the use of non-renewable resources.	Material Assets	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	<ul style="list-style-type: none"> <li>Residual household Waste (kg/hh)</li> <li>% of household waste reused, recycled or composted (recycle for Staffordshire.org)</li> </ul>
<b>Built and Cultural Heritage, Landscape and Local Distinctiveness</b>			
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	Cultural Heritage	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<ul style="list-style-type: none"> <li>Number of major development projects that affect the significance of heritage assets or historic landscape character whether in an adverse or beneficial way (SMDC, Annual Monitoring Report)</li> </ul>

Objective	SEA Topic	Decision making criteria	Indicator
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources. **Table 5.1 Objectives and indicators**

## Summary of findings

## 6 Summary of findings

**6.1** This section provides a summary of the main findings of the SA. The summary findings are set out in the following sections:

- Consideration of a "do nothing" approach.
- Housing requirement options appraisal.
- Employment land requirement options appraisal.
- Development Site options appraisal, including options for a Gypsy and Traveller site.
- Alternative development approaches for Cheadle.
- Alternative development approaches for the rural areas.
- Preferred Option Local Plan Policies appraisal.

### Do Nothing approach

**6.2** Whilst the Sustainability Appraisal has to consider a "do nothing option", local planning authorities are required to have an up to date Local Plan. The Planning and Compulsory Purchase Act 2004 and the Town and Country Planning (Local Planning) (England) Regulations 2012 set out matters that should be considered when preparing a Local Plan and prescribe their form and content. The National Planning Policy Framework describes the evidence that should be gathered in the preparation of local plans and the approach that they should adopt. In some matters therefore, the Council considers that a "do nothing" approach is not a reasonable option.

**6.3** In his report on the Examination of the Staffordshire Moorlands Core Strategy<sup>(9)</sup>, the Inspector required an early and comprehensive review of the Core Strategy for the period 2016 – 2031 and recommended rolling it forward into a single local plan combined with the proposed Site Allocations DPD. His report also identified the need for a Site Allocations DPD to include a review of the Green Belt boundaries in the vicinity of Biddulph, leading to the identification of further development opportunities. Thus not preparing a Local Plan - and not basing this on up to date assessments of housing and employment needs - were not considered to be reasonable alternatives for appraisal.

**6.4** Although the policies contained within the Core Strategy accord with the NPPF, and can still be given weight in decision making, the "do nothing" option of relying on saved Core Strategy policies could result in development which does not help to address the District's current problems. Since policies would not be updated to reflect the latest evidence, the "do nothing" approach risks a continuation of the issues identified in the Baseline Data review, such as a decline in working age population, which could stifle economic growth in the District. Thus failure to update Core Strategy policies was not considered to be a reasonable alternative for appraisal.

**6.5** There is pressure to release additional land for development. With no Local Plan in place, there is less certainty about where future development will take place and this is likely to lead to less sustainable developments and more planning appeals. A failure to select appropriate sites for development from alternatives is likely to lead to an insufficient supply of housing and employment land and could lead to sites being determined by Appeal. This would give no control over the location of development which in turn may have a negative influence on the delivery of services and facilities within the District as piecemeal development may result from having no certainty over where additional housing development would go

9 [www.staffsmoorlands.gov.uk/media/343/Inspectors-Final-Report-Core-Strategy-Examination-Jan-2014/pdf/Staff\\_Moors\\_CS\\_Exam\\_report\\_final.pdf](http://www.staffsmoorlands.gov.uk/media/343/Inspectors-Final-Report-Core-Strategy-Examination-Jan-2014/pdf/Staff_Moors_CS_Exam_report_final.pdf)

and the associated lack of certainty over the delivery of infrastructure. Thus a "do nothing" approach that failed to identify the most sustainable and deliverable development sites from a range of reasonable alternatives was not considered to be a reasonable option for appraisal.

## 6.1 Appraisal of housing requirement options

### Background

**6.6** The adopted Core Strategy covers the period 2006 - 2026. Policy SS2 (Future Provision of Development) indicates that the Council will make provision for an additional 6,000 dwellings over the plan period at an average annual development rate of 300 dwellings. The policy also states that "the Council will undertake and complete an early and comprehensive review of the Core Strategy by 2016 to cover the period 2016 - 2031 to ensure that future provision will continue to adequately meet objectively assessed needs and reflect development potential".

**6.7** Nathaniel Lichfield & Partners (NLP) produced a Strategic Housing Market Assessment (SHMA) on behalf of the Council in April 2014. The identification of Objectively Assessed Need (OAN) for housing was at the heart of the study, based on a range of housing, economic and demographic factors, trends and forecasts. The demographic data underpinning NLP's modelling work was subsequently updated by the Office for National Statistics (ONS). This new data, the 2012-based Sub National Population Projections, (SNPP) was published on 29th May 2014. NLP analysed this updated data and issued an updated report in August 2014.

**6.8** The August 2014 Housing Needs Update<sup>(10)</sup> recommended a range of housing OAN between 210 and 430 dwellings per annum. This range encompassed the Oxford Economics Job Growth projections and would allow the District to meet its demographically-driven housing needs in full.

**6.9** The 2012-based Sub-National Household Projections (SNHP) were released on 27th February 2015 and superseded the 2011-based (interim) SNHP. The 2012-based SNHP incorporate the ONS 2012-based SNPP published on 28th May 2014 and further information from the Census 2011 where available.

**6.10** Since these SNHP were released following the adoption of the Core Strategy in March 2014, NLP has undertaken further work to consider the implications of the 2012-based SNHP on the Council's OAN and a further update Report was published in July 2015.

**6.11** A revision to the July 2015 was subsequently prepared to take account of information released since Summer 2015 as well as relevant Planning inspector's Reports and High Court Judgements on approaches to defining housing OAN. The January 2016 revision also took on board new Annual Population Survey (APS) data, the 2014 Mid-Year Population Estimates (MYE) and the latest unemployment data in the PopGroup modelling.

**6.12** In order to inform plan preparation, a number of reasonable alternatives were appraised derived from this January 2016 report. A description of this is set out from paragraph 6.59.

---

10 Housing Needs Study 2012-based SNPP Update: High Peak Borough Council and Staffordshire Moorlands District Council; Nathaniel Lichfield and Partners; 15th August 2014

**6.13** A further update to the SHMA<sup>(11)</sup> was published in February 2017 when a number of scenarios were remodelled to take account of a series of changes to the evidence, including the 2014-based SNPP published in May 2016. These population projections provided the most up to date estimate of population growth over the period 2014 - 2039 at 1<sup>st</sup> February 2017. The 2017 SHMA has used the latest 2014-based SNHP to derive the baseline demographic need, which acts as the 'starting point' when determining the housing OAN. Thereafter, various assumptions, adjustments and sensitivities were applied to take account of local factors and economic aspirations.

**6.14** In order to further inform plan preparation, additional reasonable alternatives were appraised derived from the February 2017 report. A description of the further assessments is set out from paragraph 6.23.

**6.15** At the Council Assembly meeting on 8 March 2017 it was resolved to take forward into the Preferred Options Local Plan an annual housing requirement of 320 homes per year (close to the combined jobs growth scenario). The report to Council Assembly sets out the following reasons for this being the recommended preferred option. An annual requirement of 320 homes per year:

- Most closely accords with the housing policy set out in the NPPF as it fully meets demographic housing needs and helps to address the affordable housing need. It also increases the scope to provide specialist housing such as Self-Build and Custom Build.
- Supports the provision of approximately 870 additional jobs up to the year 2031. This will help to set a positive economic strategy for the District in line with Paragraph 21 of the NPPF.
- With a pro-active approach to delivery taken by the Council, is "aspirational, but realistic" when considered in the context of an historic average delivery rate of 178 homes per year.
- Is deliverable in terms of the supply of suitable housing land, the scope to release land from the Green Belt and infrastructure capacity.
- Is consistent with the requirement agreed by the Council in 2016. The majority of sites required for this level of development were not found to give rise to significant landscape or heritage impacts, including on the setting of the Peak District National Park.
- Provides a balanced range of social, economic and environmental effects as set out in the Sustainability Appraisal the most consistent with the four aims of the Corporate Plan (2015-2019) when read as a whole.

**6.16** It is appropriate to appraise the sustainability of the preferred option in greater detail, to analyse any adverse effects that are identified as being likely and where appropriate to identify mitigation measures that may be required to prevent, reduce or offset these effects. An appraisal of the preferred option was undertaken in December 2017.

## Summary of appraisal findings - preferred option

**6.17** The full SA appraisal matrices recording the detail of assessment of effects of the preferred option is provided in section 16.1. The summary of findings is set out below.

11 Staffordshire Moorlands SHMA Update; Nathaniel Lichfield & Partners; 2017

## Summary of predicted effects

**6.18** The preferred option proposes the delivery of 320 new dwellings per year. This fully meets demographic housing needs and helps address affordable housing need and as such is expected to have a direct, long-term positive effect on provision of homes to meet local needs, this includes the needs of an ageing population.

**6.19** Predicted population growth of around 8,500 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and services. This option is based on expected job growth of up to circa 870 and a labour force increase of close to 980 in the district 2014-2031. This is likely to allow for the economic potential of the district to be realised and lead to medium and long term positive impacts on the local economy and local employment.

**6.20** However development of greenfield sites outside settlement boundaries, potential loss of best and most versatile agricultural land, potential development within mineral safeguarding areas or within the proximity of heritage assets may lead to long term negative effects on biodiversity; designated and non-designated heritage assets and their settings; and landscape character and natural assets including mineral resources, although the exact effects are uncertain and it is reasonable to expect that adequate mitigation can be made.

**6.21** Similarly development may give rise to negative effects on objectives relating to climate change contributions and air quality as a result of energy consumption and emissions arising from construction and use of new dwellings and associated car journeys, however the exact effects are uncertain. The preferred option delivers development that is largely close to town and village centres, despite this there remains scope for negative effects on minimising the distance people need to travel to access key services and facilities and on limiting the opportunities for use of sustainable forms of transport. This is balanced by new development also enabling new opportunities for investment in community facilities, including Green Infrastructure and other measures that may help to support walking and cycling which may also help to reduce health inequalities, leading to possible minor positive effects on supporting health improvements.

**6.22** Overall the preferred option is considered to provide a balanced range of positive social, economic and environmental effects. A number of mitigation measures have been identified. These are as follows:

- Wider initiatives of the Council should be supported to help deliver additional affordable homes.
- Local Plan policies to ensure that:
- Good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.
- New developments are brought forward in sustainable locations, support safe walking and cycling and deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.
- New developments are well designed, creating safe places and reduced opportunities for anti-social behaviour and that high environmental design standards are supported.
- Developments include appropriate landscaping to aid removal of air pollutants.
- Developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.

- Support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources including protection and enhancement of geologically important sites.
- Support protection and enhancement for the character of towns / villages; designated and non-designated heritage and archaeological assets along with their settings.
- Support waste minimisation.
- Support sustainable economic growth, including support for tourism and the visitor economy and town and village centres.

## Selection of alternatives for appraisal - February 2017

**6.23** The Staffordshire Moorlands 2014-based SNPP and 2014-based household projections Update<sup>(12)</sup> considered that a housing OAN range of between 235 dpa and 330 dpa represented the appropriate range for the plan area. This range was considered to provide a realistic level of housing provision which will address economic growth requirements, affordable housing need, worsening market signals and the demographic challenges that are present.

**6.24** A number of (previously agreed) scenarios, based upon demographic, economic and housing trends, were updated to reflect the 2014- based data and the latest mid-year population estimates. The modelling work excluded any “policy-on” scenarios and included the addition of a scenario which seeks to meet identified affordable housing needs.

**6.25** These scenarios represented the alternatives for potential future growth within the District. They demonstrate the extent to which the population of the Staffordshire Moorlands District could change over the Plan period and how this change would be translated into households, dwellings, labour force and the number of jobs that might be supported by the local population.

**6.26** The scenarios were:

- **Scenario A: Baseline 2014 SNPP** - A scenario utilising the latest ONS 2014-based SNPP and the headship rates from the CLG 2014-based household projections. [170 dpa (with no uplifts)]
- **Scenario Aa: Sensitivity Test** – Applying the same assumptions as for Scenario A; however, starting post-2017, headship rates amongst 15-34 year olds will return half-way to the 2008-based projections by 2031. This is termed ‘partial catch-up’ [PCU]. [192 dpa (with no uplifts)]
- **Scenario Ab: Sensitivity Test** – As Aa, but incorporating the latest 2015 mid-year population estimate. [196 dpa (with no uplifts)]
- **Scenario B: Natural Change** – This scenario sets all migration to 0, assuming that there is no movement into or out of the District over the Plan period. This provides an indication of the level of housing required if only current local residents’ needs were catered for. [16 dpa (with no uplifts)]

12 Staffordshire Moorlands SHMA Update 2017; February 2017; Nathaniel Lichfield & Partners

- **Scenario C: Zero Net Migration** – A theoretical scenario whereby in and out migration (both internal and international) is balanced, meaning there is only population churn in the District and no growth from net in-migration, i.e. migrants continue to move into and out of the District, but on a one in, one out basis. [-22 dpa (with no uplifts)]
- **Scenario D: Long Term Migration Trends** – A scenario based on migration trends observed for Staffordshire Moorlands over the previous 10 years (the period 2005/06 to 2014/15). [139 dpa (with no uplifts)]
- **Scenario Da: Sensitivity Test** - applying the same assumptions as for Scenario D; incorporating PCU Headship rates. [160 dpa (with no uplifts)]
- **Scenario E: Oxford Economics Job Growth** – based on (post-Brexit) policy off job growth as forecast by Oxford Economics (October 2016), based on the net additional workforce jobs over the period 2014-2031. [279 dpa (with no uplifts)]
- **Scenario Ea: Sensitivity Test** – based on Oxford Economics job growth forecast but reduced to account for -5% out commuting. [180 dpa (with no uplifts)]
- **Scenario Eb: Sensitivity Test** – based on Oxford Economics job growth forecast but incorporating PCU headship rates. [302 dpa (with no uplifts)]
- **Scenario F: Job Stabilisation** – Constraining the number of net additional jobs over the 17-year plan period to zero, to assess the level of housing needed to maintain the current number of jobs. [259 dpa (with no uplifts)]
- **Scenario Fa: Sensitivity Test** – based on zero net job growth but incorporating PCU headship rates. [282 dpa (with no uplifts)]
- **Scenario G: Past Trends Job Growth** – Taking into account the past trends job growth for the 15-year period to 2015 derived from the Oxford Economics data (0.47% annually) this scenario assumes that this will continue over the plan period. [420 dpa (with no uplifts)]
- **Scenario Ga: Sensitivity Test** – based on Past Trends job growth but incorporating PCU headship rates. [446 dpa (with no uplifts)]
- **Scenario H: Experian Job Growth** - based on policy off job growth as forecast by Experian (December 2016), using net additional workforce jobs over the period 2014-2031. [333 dpa (with no uplifts)]
- **Scenario Ha: Sensitivity Test** – based on Experian job growth but incorporating PCU headship rates. [357 dpa (with no uplifts)]
- **Scenario I: Combined Job Growth** - based on a combination of the Oxford Economics and Experian job growth projections over the period 2014-2031. [306 dpa (with no uplifts)]
- **Scenario Ia: Sensitivity Test** – based on the previous combined job growth scenario but incorporating PCU headship rates. [329 dpa (with no uplifts)]
- **SHMA Affordable Housing Need** - based on the affordable housing needs identified in the SHMA Update February 2017. [679 / 1,309 dpa (with no uplifts)]

**6.27** The Government's Practice Guidance states that 'household projections published by the Department for Communities and Local Government should provide the starting point estimate of overall housing need'. It also states that the household projections of housing need may require adjustment to reflect factors affecting local demography and household formation rates which are not captured in past trends.

**6.28** Housing requirements must set a level of housing delivery which meets the needs associated with population and household growth, addresses the need for all types of housing including affordable and caters for housing demand<sup>(13)</sup>. Furthermore, a planned level of housing to meet OAN must respond positively to wider opportunities for growth and should take account of market signals, including affordability<sup>(14)</sup>.

**6.29** Scenarios B, C and D have produced targets that are lower than the baseline demographic projections considered the starting point for identifying objectively assessed need and on this basis have not been pursued by the Council.

**6.30** Scenarios E, Ea and Eb, Oxford Economics Job Growth and the associated sensitivity tests (allowing for a reduction in the level of net out commuting by 5% and applying PCU headship rates), have also not been considered reasonable alternatives for sustainability appraisal. Nor have scenarios H and Ha, Experian job growth and its sensitivity test. This is because whilst both forecasting houses are considered to provide credible and robust estimates of job growth, their recent estimates for the District have proved to be different. Experian has projected that the Staffordshire Moorland's economy will grow by 1,400 workforce jobs 2014-2031 - significantly higher than the Oxford Economics projections (339 over the same period) - primarily due to much stronger growth predicted by Experian in certain manufacturing sectors. It was thus considered reasonable to attach greater weight to the combined job growth scenario.

**6.31** The Baseline Scenarios (A) and Baseline plus Partial Catch Up Scenario (Aa) have contributed to NLP's recommended lower end of the OAN range based on Scenario Ab: 2014-based SNHP with mid year estimates and sensitivity for partial catch-up headship rates (235 dpa including uplifts). This scenario (Ab) is considered to represent the appropriate demographic led need for housing and would be the minimum necessary to meet the District's future housing needs to 2031 and is thus considered a reasonable alternative to assess. **(Option 1.)**

**6.32** The Job Stabilisation scenario (F) 259 dpa was the scenario previously considered to be the most appropriate for the Council to pursue (January 2016 appraisal - see below) and so the scenario has been considered as a reasonable alternative on this basis. **(Option 2.)**

**6.33** As discussed, jobs growth forecasts have been obtained from both Oxford Economics and Experian. Because of the methodological differences between the two models, the job projections derived are quite different: (Oxford Economics: job growth 2014-2031: 20pa; Experian: job growth 2014-2031: 82pa. As the detailed assumptions are not disclosed with regards to the local and regional economy, along with the adjustments made to the raw data to calculate the forecasts, it is difficult to make a robust decision concerning the comparative weight to attach to each forecast. On this basis it was considered reasonable to appraise the scenario which takes an average level of job growth across the two econometric projections. Scenario Ia, Combined job growth plus partial catch up (329 dpa) was used to

13 National Planning Policy Framework paragraph 159

14 National Planning Policy Framework paragraph 17

inform the employment-led upper end of the recommended housing OAN range; it represents the level of housing growth necessary to provide a sufficiently large labour force to support a combination of the Oxford Economics and Experian job growth forecasts for the District and is thus considered a reasonable alternative to appraise. **(Option 3.)**

**6.34** Finally, Scenario G is a past trends scenario indicating the level of housing needed should historic job growth trends continue over the plan period. For Scenario Ga, the same employment and demographic inputs were applied as for Scenario G, but with the application of the partial catch up accelerated headship rates. This test generated a housing need of 446dpa to 2031 - the highest requirement of the scenarios tested by NLP and above the recommended OAN range of 235 - 330dpa. It was included as a reasonable scenario for appraisal to help identify the likely economic, social and environmental effects of increasing the housing supply to aid the delivery of affordable homes.

**6.35** The SHMA (2014) identified a critical affordable housing OAN of 707 dpa (net) affordable housing over the next five years across the District. The December 2016 Update (February 2017) concluded that there was a net annual need of between 224 and 432 affordable dwellings, which attributing an estimated delivery rate of 33% equates to a total need of at least 679dpa and potentially as high as 1,309dpa.

**6.36** The NPPF makes clear that having identified the OAN for affordable housing, the Local Plan should meet this need subject to the constraints referred to in paragraphs 14 and 47. However paragraph 154 of the Framework also requires that Local Plans should be aspirational but realistic. NLP considered that an affordable housing OAN of at least 679dpa and potentially as high as 1,309dpa is very unlikely to be consistently achieved in the District. However the Council considered it appropriate to consider the economic, social and environmental impacts of delivering a housing requirement of 450 dpa, representing an employment led scenario giving rise to a requirement beyond the upper end of the recommended OAN range and making a very significant contribution to meeting affordable housing need.

**6.37** On this basis the SA has considered a fourth reasonable alternative housing requirement: the option of 450 dpa. **(Option 4.)**

**6.38** In summary, consideration of the scenarios set out above led to the Council considering four potential housing requirement alternatives for appraisal:

- Option 1: 235 new homes each year (2014 - 2031)
- Option 2: 260 new homes each year (2014 - 2031)
- Option 3: 330 new homes each year (2014 - 2031)
- Option 4: 450 new homes each year (2014 - 2031)

## Summary of appraisal findings February 2017

**6.39** The full SA appraisal matrices recording the detail of the appraisal of each of these options are provided in section 16. The summary of findings is set out below.

### Option 1 - Summary of significant effects

**6.40** This option proposes the delivery of 235 new dwellings per year (2014-2031). It will have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs since it represents the lower end of the recommended objectively assessed

housing need range. However being the lower end of the range, the option makes the least contribution of all options considered to addressing affordable housing need and the needs of an ageing population.

**6.41** Predicted population growth of around 2,500 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages including helping to safeguard local shops and services. However since this option provides for the lowest level of growth, these benefits would be lowest of all options considered. This option is likely to lead to a decline in the labour force of 2,141 and the loss of 1,579 jobs (2014 - 2031). This is likely to undermine economic stability in the long term and lead to a significant negative effect on business, the local economy and local employment through a lack of encouragement for investment in business and infrastructure.

**6.42** As the lowest growth option, requiring the lowest number of site allocations, by comparison with other options considered, this alternative is likely to result in minor positive effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets. The lower level of growth is also likely to minimise the negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys.

**6.43** The lower level of growth is also likely to help enable a focus of new development on small urban extensions and small sites within existing settlement boundaries resulting in minor positive effects on minimising the distance people need to travel to access key services and facilities and increasing the opportunities for use of sustainable forms of transport. However since this option proposes the lowest level of growth, it is also likely to result in the lowest level of investment in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to minor negative effects on the SA objective relating to supporting health improvements.

## **Option 2 - Summary of significant effects**

**6.44** This option proposes the delivery of 260 new dwellings per year. Since it is within the recommended, full objectively assessed housing need range, the housing requirement would have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs. This positive effect is likely to be more significant than under option 1. However being closer to the lower end of the range than options 3 and 4, the option makes less of a contribution than options 3 and 4 to addressing affordable housing need and the needs of an ageing population.

**6.45** Predicted population growth of around 6,300 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and services. Under this option, these benefits are likely to be more significant than under option 1 and less significant than under options 3 and 4. This option is expected to maintain the 2014 level of jobs in the district over the plan period. This is likely to result in a long term minor positive impact on business, the local economy and local employment. This compares favourably with the impacts on this objective likely under option 1, where significant negative impacts on SA objectives for supporting employment and economic growth are likely since housing delivery below 260dpa would potentially result in a reduction in jobs. However the positive impacts on economic growth under this option are less significant than those likely to result under options 3 and 4.

**6.46** Option 2 requires the second lowest number of site allocations of the four options considered, and consequently this alternative is likely to result in comparatively more positive effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets than options 3 and 4. Positive effects on these objectives are slightly less under this option than under option 1. The lower level of growth under option 2 compared with options 3 and 4 is also likely to minimise the negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys.

**6.47** The lower level of growth is also likely more likely under option 2 than options 3 and 4 to enable a focus of new development on small urban extensions and small sites within existing settlement boundaries resulting in minor positive effects on minimising the distance people need to travel to access key services and facilities and increasing the opportunities for use of sustainable forms of transport. Benefits under option 2 in this regard are not likely to be as great as under option 1. However since option 2 proposes the second lowest level of growth of the four options considered, it is likely to result in a lower level of investment than under options 3 and 4 in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to possible minor negative effects on the SA objective relating to supporting health improvements. These negative effects are not likely to be as significant as under option 1.

### **Option 3 - Summary of significant effects**

**6.48** This option proposes the delivery of 330 new dwellings per year. Since it is the upper end of the recommended objectively assessed housing need range, the housing requirement would have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs. This positive effect is likely to be more significant than under options 1 and 2. As the upper end of the range, the option is likely to make a significant contribution to addressing affordable housing need and the needs of an ageing population.

**6.49** Predicted population growth of around 8,500 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and services. Under this option, these benefits are likely to be more significant than under options 1 and 2, but less significant than under option 4. This option is based on expected job growth of 870 and a labour force increase of 981 in the district 2014-2031. This is likely to allow for the economic potential of the district to be realised and lead to medium and long term positive impacts on the local economy and local employment.

**6.50** Option 3 requires the second highest number of site allocations of the four options considered, and consequently this alternative is likely to result in comparatively more negative effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets than options 1 and 2. Negative effects on these objectives are slightly less under this option than under option 4. The higher level of growth under option 3 compared with options 1 and 2 is also likely to result in negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys.

**6.51** Due to the extent of sites that are likely to be allocated under this option, it is less likely than under options 1 and 2 that a high proportion of new development can be delivered close to town and village centres, resulting in negative effects on minimising the distance

people need to travel to access key services and facilities and reducing the opportunities for use of sustainable forms of transport. Negative effects under option 3 in this regard are not likely to be as great as under option 4. However since option 3 proposes the second highest level of growth of the four options considered, it is likely to result in a higher level of investment than under options 1 and 2 in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to possible minor positive effects on the SA objective relating to supporting health improvements. These positive effects are not likely to be as significant as under option 4.

#### **Option 4 - Summary of significant effects**

**6.52** This option proposes the delivery of 450 new dwellings per year. It will have a direct and significant positive effect on the SA objective to ensure provision of homes to meet local needs since it exceeds the upper end of the recommended objectively assessed housing need range. This option should make the greatest contribution of all options considered to addressing affordable housing need and the needs of an ageing population.

**6.53** Predicted population growth of around 13,700 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including helping to safeguard local shops and services. The past trends scenario provides employment growth in the district of 3,038 jobs 2014-31 (179pa) and an increase in the labour force of 3,746 2014-31 (220pa). As a result, the option is likely to have a significant positive effect on the local economy and local employment. However these predicted positive effects should be treated with caution, since the SHMA December 2016 update notes that the population growth required to underpin this job growth would primarily be achieved by inward migration as opposed to natural change. To achieve the 450dpa that would be required based on a continuation of past job growth rates would require a 6-fold increase in net population growth compared to the 2014-based SNPP and would require more than 10,000 additional migrants from elsewhere across the UK/abroad to move into the district. This is considered to be at odds with what may be reasonably expected to occur in the district.

**6.54** As the highest growth option, requiring the highest number of site allocations, by comparison with other options considered, this alternative is likely to result in significant negative effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets. The high level of housing growth is also likely to result in negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys.

**6.55** This level of new housing development is not likely to enable growth to be focused on small urban extensions and small sites within the existing settlement boundaries, which may result in increasing the distance people need to travel to access key services and facilities and makes the use of sustainable forms of transport less likely. However since this option proposes the highest level of growth, it is likely to result in the highest level of investment in community facilities, including Green Infrastructure and other measures that may help to reduce health inequalities, leading to positive effects on the SA objective relating to supporting health improvements.

### Mitigation measures proposed

**6.56** It is possible that some likely significant effects identified via the SA can be mitigated. To assist this, potential mitigation measures have been identified during the appraisal of alternative housing requirements. These recommendations have been included in the review of policies undertaken as part of Local Plan preparation.

### Recommended preferred option and options dismissed

**6.57** The table below sets out the rationale for recommending an option to take forward into the preferred options plan.

Option recommended to take forward	Rationale
Option 3: 330 dpa	<p>This option could be expected to:</p> <ul style="list-style-type: none"> <li>• Have a direct and long term positive effect on providing homes to meet local needs (more significant than under options 1 and 2).</li> <li>• Address affordable housing need and the needs of an ageing population.</li> <li>• Result in increased spending in the local economy, helping to safeguard local shops and services.</li> <li>• Support job growth and a labour force increase over the plan period, resulting in significant positive effects on the local economy.</li> <li>• Enable investment in community facilities associated with growth.</li> <li>• Offer comparatively more protection for landscape character and natural assets, biodiversity, the character of towns, villages and heritage assets and their settings when compared with option 4.</li> <li>• Minimise negative effects on climate change and air quality when compared with option 4.</li> </ul> <p>However the option makes less of a contribution than option 4 to address affordable housing need.</p> <p>Also, it is less likely than under options 1 and 2 that a high proportion of new development can be delivered close to town and village centres, increasing the distance people may need to travel to access key services and facilities (less significant than under option 4).</p>

**Table 6.1 Housing requirement option recommended for taking forward**

**6.58** The table below sets out the rationale behind those options recommended for dismissal following the appraisal.

Options proposed for dismissal	Rationale
Option 1: 235 dpa	<p>This option could be expected to:</p> <ul style="list-style-type: none"> <li>• Have a direct and long term positive effect on providing homes to meet local needs.</li> <li>• Result in increased spending in the local economy, helping to safeguard local shops and services.</li> <li>• Offer comparatively more protection for landscape character and natural assets, biodiversity, the character of towns, villages and heritage assets and their settings when compared with all other options.</li> <li>• Minimise negative effects on climate change and air quality when compared with all other options.</li> <li>• Enable a focus of new development on small urban extensions and small sites within existing settlement boundaries, helping to minimise the distance people need to travel to access key services and facilities.</li> </ul> <p>However the option makes less of a contribution than all other options to:</p> <ul style="list-style-type: none"> <li>• Addressing affordable housing need and the needs of an ageing population.</li> <li>• Increased spending in the local economy; and</li> <li>• Enabling investment in community facilities associated with growth.</li> </ul> <p>The option is likely to lead to the loss of 1,579 jobs over the plan period, resulting in significant negative effects on the local economy.</p>
Option 2: 260 dpa	<p>This option could be expected to:</p> <ul style="list-style-type: none"> <li>• Have a direct and long term positive effect on providing homes to meet local needs.</li> <li>• Result in increased spending in the local economy, helping to safeguard local shops and services (less significant than under options 3 and 4).</li> <li>• Offer comparatively more protection for landscape character and natural assets, biodiversity, the character of towns, villages and heritage assets and their settings when compared with options 3 and 4.</li> <li>• Minimise negative effects on climate change and air quality when compared with options 3 and 4.</li> <li>• Enable a focus of new development on small urban extensions and small sites within existing settlement boundaries, helping to minimise the distance people need to travel to access key services and facilities (less significant than under option 1).</li> </ul>

Options proposed for dismissal	Rationale
	<p>This option is likely to help maintain the 2014 level of jobs in the district over the plan period, resulting in a long term minor positive impact on business, the local economy and local employment.</p> <p>However the option makes less of a contribution than options 3 and 4 to:</p> <ul style="list-style-type: none"> <li>● Addressing affordable housing need and the needs of an ageing population.</li> <li>● Increased spending in the local economy; and</li> <li>● Enabling investment in community facilities associated with growth.</li> </ul>
<p>Option 4: 450 dpa</p>	<p>This option could be expected to:</p> <ul style="list-style-type: none"> <li>● Have a direct and long term positive effect on providing homes to meet local needs, including addressing affordable housing need and the needs of an ageing population.</li> <li>● Result in increased spending in the local economy, helping to safeguard local shops and services (more significant than under all other options).</li> <li>● Enable growth related investment in community facilities (more significant than under all other options).</li> </ul> <p>The option is based on employment growth in the district of 3,038 jobs over the plan period, resulting in significant positive effects on the local economy. However the population growth required to underpin this job growth would primarily be achieved by a level of inward migration that is not considered a reasonable expectation for the district.</p> <p>The option has more negative effects than all other options (that may not be reasonably mitigated) in relation to likely impact on:</p> <ul style="list-style-type: none"> <li>● Landscape character and natural assets.</li> <li>● Biodiversity.</li> <li>● Character of towns, villages and heritage assets and their settings; and</li> <li>● Climate change and air quality.</li> </ul> <p>It is less likely than under all other options that a high proportion of new development can be delivered close to town and village centres, increasing the distance people may need to travel to access key services and facilities.</p>

**Table 6.2 Housing requirement options dismissed following appraisal**

## Selection of alternatives for appraisal - January 2016

**6.59** The Staffordshire Moorlands 2012-based SNHP Update<sup>(15)</sup> tested the on-going validity of the housing OAN of 210 to 430dpa identified in the 2012-based SNPP Update (August 2014) and found that a revised range of between 250 dpa and 440 dpa represented the appropriate range for the plan area, taking into account worsening market signals, an additional allowance for affordable housing need and planning for a level of economic growth to match earlier assumptions.

**6.60** Based on past trends and the housing, economic and demographic context of Staffordshire Moorlands, the SHMA has identified a number of scenarios chosen to reflect the alternatives for future growth within the District. The scenarios demonstrate the extent to which the population of the District is likely to change over the plan period, and how this growth would be translated into households, dwellings, numbers of economically active residents and the number of jobs that might be supported.

**6.61** The scenarios were:

- **Scenario A: Updated PopGroup 2012-based SNHP** - A projection of the demographic shift based on current factors and recent trends in Staffordshire Moorlands District, aligning household growth to the 2012-based SNHP. The scenario takes account of dwelling vacancy rates in order to derive a housing need figure from the projections in household growth. [219 dpa (with uplifts)]
- **Scenario Aa: Partial Catch-Up Headship Rates** – Using the 2012-based headship rates as a starting point, it is projected that by 2033 (starting after 2017 to allow for full economic recovery) headship rates for the younger adult age groups will have caught up half of the difference between the 2012 and 2008-based SNHP headship rates. The underlying population upon which this scenario is based is the same as Scenario A, i.e. the 2012-based SNHP. [240 dpa (with uplifts)]
- **Scenario Ab: 2013 and 2014 MYE** - Using the 2013 and 2014 MYE and applying the fertility, mortality, migration and headship rates from the 2012-based household projections thereafter. [227 dpa (with uplifts)]
- **Scenario Ac: 2013 and 2014 MYEs + Partial Catch-Up Headship Rates** - As Ab, but incorporation of partial catch up headship rates on the same basis as Scenario Aa. [248 dpa (with uplifts)]
- **Scenario B: Natural Change** – In and out-migration is reduced to zero, hence growth is driven purely by natural change, or the interaction between births and deaths. [49 dpa (with uplifts)]
- **Scenario C: Zero Net Migration** – Whereby the annual international and domestic migration flows under the baseline scenario are equalised to result in a net migration of zero (i.e. an identical number of people move into the area as leave the District). [8 dpa (with uplifts)]

<sup>15</sup> Staffordshire Moorlands 2012-based SNHP Update - Implications of the 2012-based SNHP - January 2016 Revision; January 2016; Nathaniel Lichfield & Partners

- **Scenario D: Short Term Migration Trends** - Based on average gross flows of internal and international migration in Staffordshire Moorlands over the five year period 2008/09 to 2012/13 as taken from the ONS MYE Series, assuming Staffordshire Moorlands will continue to see migration at a level in line with recent trends. [111 dpa (with uplifts)]
- **Scenario E: Long Term Migration Trends** – As above, but using a ten year migration average, from 2002/03 to 2012/13, assuming Staffordshire Moorlands will continue to see migration in line with levels on average over the last decade. [165 dpa (with uplifts)]
- **Scenario F Oxford Economics Job Growth** – A ‘policy-off’ trend scenario based upon Oxford Economics local area-based econometric model. This provides potential unconstrained employment growth in Staffordshire Moorlands (+2,250 jobs 2012-2031) over the Plan period. [438 dpa (with uplift)]
- **Scenario Fa: Oxford Economics Job Growth + 5% Reduction in Out-Commuting** - This scenario applies the above assumption whilst factoring in a 5% reduction in out-commuting over the period 2012-2031. [361 dpa (with uplift)]
- **Scenario G: Policy On Job Growth Target** – A ‘Policy-on’ trend scenario based upon the Council’s realistic economic objectives whilst factoring in increased economic growth in key sectors in line with regional averages. This provides employment growth in Staffordshire Moorlands of 3,879 jobs over the course of the plan period. [520 dpa (with uplift)]
- **Scenario Ga: Policy On Job Growth Target + 5% Reduction in Out-Commuting** - This scenario applies the above assumption whilst factoring in a 5% reduction in out-commuting over the period 2012-2031. [441 dpa (with uplift)]
- **Scenario H Job Stabilisation / Past Trends Job Growth** – Assumes that there are no additional jobs created over the projection period, i.e. the number of jobs remains at the level achieved in 2012. The past trends job growth for the period 2000-2013, derived from the ONS Job density data, indicates that the long term past trends are neutral and align with the Job Stabilisation scenario, so the two have been combined. [319 dpa (with uplift)]
- **Scenario: Average Past Delivery** – Using past delivery trends (2005/06 - 2014/15) to illustrate what the market has previously delivered and project these forward over the Plan period. [195 dpa]
- **Scenario: SHMA Need** - The SHMA 2014 identified a critical need for 707 (net) affordable housing dwellings annually over the next five years in the District. [2,142 dpa]
- **Scenario: Core Strategy target** - Testing the population and economic implications of delivering the target set out in the adopted Core Strategy. [300 dpa]

**6.62** The Government’s Practice Guidance states that ‘household projections published by the Department for Communities and Local Government should provide the starting point estimate of overall housing need’. It also states that the household projections of housing need may require adjustment to reflect factors affecting local demography and household formation rates which are not captured in past trends.

**6.63** Housing requirements must set a level of housing delivery which meets the needs associated with population and household growth, addresses the need for all types of housing including affordable and caters for housing demand<sup>(16)</sup>. Furthermore, a planned level of housing to meet OAN must respond positively to wider opportunities for growth and should take account of market signals, including affordability<sup>(17)</sup>.

**6.64** Scenarios B, C, D, E and "Average past delivery" have produced targets that are lower than the baseline demographic projections considered the starting point for identifying objectively assessed need and on this basis have not been pursued by the Council.

**6.65** Scenario Fa Oxford Economics and reduced commuting has also not been considered a reasonable alternative for sustainability appraisal. This is because the scenario is based on job growth remaining the same as in Scenario F, but assumes a policy approach to attempt to reduce out-commuting and thereby reduce the number of in-migrants required to take up those job opportunities. In the absence of known policy measures, it was considered more appropriate to consider Scenario F as an option for appraisal, (see paragraph 5.17).

**6.66** The Baseline Scenario (A); the Baseline plus Partial Catch Up Scenario (Aa); including the 2013 and 2014 MYE Scenario (Ab); and including the 2013 and 2014 MYE with Partial Catch Up Scenario (Ac) are (before uplifts) closely aligned to the average past delivery figure (Scenario: Average Past Delivery). These scenarios have contributed to NLP's recommended lower end of the OAN range (250 dpa including uplifts) and this requirement is thus considered a reasonable option to assess. (Option 1.)

**6.67** The Job Stabilisation scenario (H) is broadly aligned with the Council's adopted housing requirement figure (Scenario Core Strategy target) and has been considered further on this basis. (Option 2.)

**6.68** The Council is actively seeking to promote economic growth and therefore a third reasonable alternative requirement is one that allows for an additional element of housing growth to support the creation of new jobs. The top end of the range proposed by NLP (440 dpa) enables the delivery of sufficient labour force levels to support the Oxford Economics Job Growth projections (Scenario F). Since this is intended to allow for the economic potential of Staffordshire Moorlands to be realised, it is considered a reasonable alternative to appraise. This Scenario also closely aligns with Scenario Ga. (Option 3.)

**6.69** Finally, Scenario G is a Policy On Job Growth scenario, using the job creation figures set out in the Council's Employment Land Review (ELR). It presents an objective forecast of how the District could perform in economic terms based on the nature of its economy and current expectations of future national and regional economic performance. To underpin this level of growth there would be need to be an increase in dwellings equating to a housing requirement of 473 dpa; with the 10% uplift for affordable housing this yields a requirement of 520dpa. This is the highest requirement of the scenarios tested by NLP.

**6.70** The SHMA (2014) identified a critical affordable housing OAN of 707 dpa (net) affordable housing over the next five years across the District. The NPPF makes clear that having identified the OAN for affordable housing, the Local Plan should meet this need subject to the constraints referred to in paragraphs 14 and 47. However paragraph 154 of the Framework also requires that Local Plans should be aspirational but realistic. NLP considered that delivering 707 affordable dpa at a rate of 33% overall would indicate a

16 National Planning Policy Framework paragraph 159

17 National Planning Policy Framework paragraph 17

housing requirement of 2,142 dpa. This is clearly not realistic for the District to deliver. However the Council considered it appropriate to consider the economic, social and environmental impacts of delivering a housing requirement of 520 dpa, representing an employment led scenario giving rise to a requirement beyond the upper end of the recommended OAN range and making a very significant contribution to meeting affordable housing need.

**6.71** On this basis the SA has considered a fourth reasonable alternative housing requirement: the option of 520 dpa. (Option 4.)

**6.72** In summary, consideration of the scenarios set out above led to the Council considering four potential housing requirement alternatives for appraisal:

- Option 1: 250 new homes each year (2016 - 2031)
- Option 2: 320 new homes each year (2016 - 2031)
- Option 3: 440 new homes each year (2016 - 2031)
- Option 4: 520 new homes each year (2016 - 2031)

## **Summary of appraisal findings - January 2016**

**6.73** The full SA appraisal matrices recording the detail of the appraisal of each of these options are provided in section 8. The summary of findings is set out below.

### **Option 1 - Summary of significant effects**

**6.74** This option proposes the delivery of 250 new dwellings per year. It will have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs since it represents the lower end of the recommended objectively assessed housing need range. However being the lower end of the range, the option makes the least contribution of all options considered to addressing affordable housing need and the needs of an ageing population.

**6.75** Predicted population growth of around 2,800 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages including helping to safeguard local shops and services. However since this option provides for the lowest level of growth, these benefits would be lowest of all options considered.

**6.76** This option is likely to lead to the loss of 2,075 jobs over the plan period. This is likely to result in a significant negative effect on business, the local economy and local employment through a lack of encouragement for investment in business and infrastructure.

**6.77** As the lowest growth option, requiring the lowest number of site allocations, by comparison with other options considered, this alternative is likely to result in minor positive effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets. The low level of growth is also likely to minimise the negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys.

**6.78** The low level of growth is also likely to help enable a focus of new development on small urban extensions and small sites within existing settlement boundaries resulting in minor positive effects on minimising the distance people need to travel to access key services

and facilities and increasing the opportunities for use of sustainable forms of transport. However since this option proposes the lowest level of growth, it is also likely to result in the lowest level of investment in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to minor negative effects on the SA objective relating to reducing health improvements.

## Option 2 - Summary of significant effects

**6.79** This option proposes the delivery of 320 new dwellings per year. Since it is within the recommended objectively assessed housing need range, the housing requirement would have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs. This positive effect is likely to be more significant than under option 1. However being closer to the lower end of the range than options 3 and 4, the option makes less of a contribution than options 3 and 4 to addressing affordable housing need and the needs of an ageing population.

**6.80** Predicted population growth of around 7,900 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and services. Under this option, these benefits are likely to be more significant than under option 1 and less significant than under options 3 and 4.

**6.81** This option is expected to maintain the current number of jobs in the district over the plan period. This is likely to result in a long term minor positive impact on business, the local economy and local employment. This compares favourably with the impacts on this objective likely under option 1, where significant negative impacts on SA objectives for supporting employment and economic growth are likely. However the positive impacts on economic growth under this option are less significant than those likely to result under options 3 and 4.

**6.82** Option 2 requires the second lowest number of site allocations of the four options considered, and consequently this alternative is likely to result in comparatively more positive effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets than options 3 and 4. Positive effects on these objectives are slightly less under this option than under option 1.

**6.83** The lower level of growth under option 2 compared with options 3 and 4 is also likely to minimise the negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys.

**6.84** The lower level of growth is also likely more likely under option 2 than options 3 and 4 to enable a focus of new development on small urban extensions and small sites within existing settlement boundaries resulting in minor positive effects on minimising the distance people need to travel to access key services and facilities and increasing the opportunities for use of sustainable forms of transport. Benefits under option 2 in this regard are not likely to be as great as under option 1. However since option 2 proposes the second lowest level of growth of the four options considered, it is likely to result in a lower level of investment than under options 3 and 4 in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to possible minor negative effects on the SA objective relating to reducing health improvements. These negative effects are not likely to be as significant as under option 1.

### **Option 3 - Summary of significant effects**

**6.85** This option proposes the delivery of 440 new dwellings per year. Since it is the upper end of the recommended objectively assessed housing need range, the housing requirement would have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs. This positive effect is likely to be more significant than under options 1 and 2. As the upper end of the range, the option is likely to make a significant contribution to addressing affordable housing need and the needs of an ageing population.

**6.86** Predicted population growth of around 13,400 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and services. Under this option, these benefits are likely to be more significant than under options 1 and 2, but less significant than under option 4.

**6.87** This option is based on expected job growth of 2,250 in the district over the plan period. This is likely to allow for the economic potential of the district to be realised and result in medium and long term positive impacts on the local economy and local employment.

**6.88** Option 3 requires the second highest number of site allocations of the four options considered, and consequently this alternative is likely to result in comparatively more negative effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets than options 1 and 2. Negative effects on these objectives are slightly less under this option than under option 4.

**6.89** The higher level of growth under option 3 compared with options 1 and 2 is also likely to result in negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys.

**6.90** Due to the extent of sites that are likely to be allocated under this option, it is less likely than under options 1 and 2 that a high proportion of new development can be delivered close to town and village centres, resulting in negative effects on minimising the distance people need to travel to access key services and facilities and reducing the opportunities for use of sustainable forms of transport. Negative effects under option 3 in this regard are not likely to be as great as under option 4. However since option 3 proposes the second highest level of growth of the four options considered, it is likely to result in a higher level of investment than under options 1 and 2 in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to possible minor positive effects on the SA objective relating to reducing health improvements. These positive effects are not likely to be as significant as under option 4.

### **Option 4 - Summary of significant effects**

**6.91** This option proposes the delivery of 520 new dwellings per year. It will have a direct and significant positive effect on the SA objective to ensure provision of homes to meet local needs since it exceeds the upper end of the recommended objectively assessed housing need range. This option should make the greatest contribution of all options considered to addressing affordable housing need and the needs of an ageing population.

**6.92** Predicted population growth of around 17,000 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including helping to safeguard local shops and services. This option is based on an objective forecast

of how the district could perform in economic terms based on the nature of its economy and current expectations of future national and regional economic performance and provides unconstrained employment growth in the district of 3,878 jobs over the plan period. As a result, the option is likely to have a significant positive effect on the local economy and local employment. However these predicted positive effects should be treated with caution, since the 2012-based SNHP update notes that the population growth required to underpin this job growth would primarily be achieved by inward migration as opposed to natural change. Net migration would need to increase from +7,373 to +20,645 - over 13,000 net additional in migrants to achieve the required population level (all other assumptions remaining constant). This is considered to be at odds with what may be reasonably expected to occur in the district.

**6.93** As the highest growth option, requiring the highest number of site allocations, by comparison with other options considered, this alternative is likely to result in significant negative effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets. The high level of housing growth is also likely to result in negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys.

**6.94** This level of new housing development is not likely to enable growth to be focused on small urban extensions and small sites within the existing settlement boundaries, which may result in increasing the distance people need to travel to access key services and facilities and makes the use of sustainable forms of transport less likely. However since this option proposes the highest level of growth, it is likely to result in the highest level of investment in community facilities, including Green Infrastructure and other measures that may help to reduce health inequalities, leading to positive effects on the SA objective relating to reducing health improvements.

### Mitigation measures proposed

**6.95** It is possible that some likely significant effects identified via the SA can be mitigated. To assist this, potential mitigation measures have been identified during the appraisal of alternative housing requirements. These recommendations will be included in the review of policies undertaken as part of Local Plan preparation.

### Recommended preferred option and options dismissed

**6.96** The table below sets out the rationale for recommending an option to take forward into the preferred options plan.

Option recommended to take forward	Rationale
Option 2: 320 dpa	This option could be expected to: <ul style="list-style-type: none"> <li>● Have a direct and long term positive effect on providing homes to meet local needs (more significant than under option 1);</li> <li>● Result in increased spending in the local economy, helping to safeguard local shops and services;</li> </ul>

Option recommended to take forward	Rationale
	<ul style="list-style-type: none"> <li>• Maintain the current number of jobs in the District;</li> <li>• Offer comparatively more protection for landscape character and natural assets, biodiversity, the character of towns, villages and heritage assets and their settings when compared with options 3 and 4;</li> <li>• Minimise negative effects on climate change and air quality when compared with options 3 and 4;</li> <li>• Enable a focus of new development on small urban extensions and small sites within existing settlement boundaries, helping to minimise the distance people need to travel to access key services and facilities (less significant than under option 1).</li> </ul> <p>However the option makes less of a contribution than options 3 and 4 to:</p> <ul style="list-style-type: none"> <li>• Addressing affordable housing need and the needs of an ageing population;</li> <li>• Increased spending in the local economy;</li> <li>• Supporting employment and economic growth; and</li> <li>• Enabling investment in community facilities associated with growth.</li> </ul>

**Table 6.3 Housing requirement option recommended for taking forward**

**6.97** The table below sets out the rationale behind those options recommended for dismissal following the appraisal.

Options proposed for dismissal	Rationale
Option 1: 250 dpa	<p>This option could be expected to:</p> <ul style="list-style-type: none"> <li>• Have a direct and long term positive effect on providing homes to meet local needs;</li> <li>• Result in increased spending in the local economy, helping to safeguard local shops and services;</li> <li>• Offer comparatively more protection for landscape character and natural assets, biodiversity, the character of towns, villages and heritage assets and their settings when compared with all other options;</li> <li>• Minimise negative effects on climate change and air quality when compared with all other options;</li> <li>• Enable a focus of new development on small urban extensions and small sites within existing settlement boundaries, helping to minimise the distance people need to travel to access key services and facilities.</li> </ul>

Options proposed for dismissal	Rationale
	<p>However the option makes less of a contribution than all other options to:</p> <ul style="list-style-type: none"> <li>● Addressing affordable housing need and the needs of an ageing population;</li> <li>● Increased spending in the local economy; and</li> <li>● Enabling investment in community facilities associated with growth.</li> </ul> <p>The option is likely to lead to the loss of 2,075 jobs over the plan period, resulting in significant negative effects on the local economy.</p>
Option 3: 440 dpa	<p>This option could be expected to:</p> <ul style="list-style-type: none"> <li>● Have a direct and long term positive effect on providing homes to meet local needs, including addressing affordable housing need and the needs of an ageing population;</li> <li>● Result in increased spending in the local economy, helping to safeguard local shops and services (more significant than under options 1 and 2);</li> <li>● Enable growth related investment in community facilities (less significant than under option 4).</li> </ul> <p>The option is based on expected job growth of 2,250 over the plan period, resulting in significant positive effects on the local economy.</p> <p>However the option has more negative effects than options 1 and 2 (that may not be reasonably mitigated) in relation to likely impact on:</p> <ul style="list-style-type: none"> <li>● Landscape character and natural assets;</li> <li>● Biodiversity;</li> <li>● Character of towns, villages and heritage assets and their settings; and</li> <li>● Climate change and air quality.</li> </ul> <p>It is less likely than under options 1 and 2 that a high proportion of new development can be delivered close to town and village centres, increasing the distance people may need to travel to access key services and facilities (less significant than under option 4).</p>
Option 4: 520 dpa	<p>This option could be expected to:</p> <ul style="list-style-type: none"> <li>● Have a direct and long term positive effect on providing homes to meet local needs, including addressing affordable housing need and the needs of an ageing population;</li> </ul>

Options proposed for dismissal	Rationale
	<ul style="list-style-type: none"> <li>• Result in increased spending in the local economy, helping to safeguard local shops and services (more significant than under all other options);</li> <li>• Enable growth related investment in community facilities (more significant than under all other options).</li> </ul> <p>The option is based on unconstrained job growth of 3,878 over the plan period, resulting in significant positive effects on the local economy.</p> <p>However the population growth required to underpin this job growth would primarily be achieved by inward migration and this is not considered a reasonable expectation for the district.</p> <p>The option has more negative effects than all other options (that may not be reasonably mitigated) in relation to likely impact on:</p> <ul style="list-style-type: none"> <li>• Landscape character and natural assets;</li> <li>• Biodiversity;</li> <li>• Character of towns, villages and heritage assets and their settings; and</li> <li>• Climate change and air quality.</li> </ul> <p>It is less likely than under all other options that a high proportion of new development can be delivered close to town and village centres, increasing the distance people may need to travel to access key services and facilities.</p>

**Table 6.4 Housing requirement options dismissed following appraisal**

## 6.2 Appraisal of alternative employment land requirements

### Background

**6.98** Nathaniel Lichfield & Partners (NLP) prepared an Employment Land Review for the district in July 2014. This study was updated in February 2017 to incorporate more recent data releases, to align with the updated Strategic Housing Market Assessment (SHMA) and also to reflect the changing economic context post British exit from the European Union.

**6.99** The report<sup>(18)</sup> considered a number of potential future scenarios in order to help identify requirements for B-class employment space in the district over the seventeen year period 2014-2031. The scenarios are set out in the section below.

### Selection of alternatives for appraisal

**6.100** A variety of forecasting techniques were used to identify options for employment land requirements, as follows.

18 Staffordshire Moorlands ELR Update; February 2017; Nathaniel Lichfield & Partners

- Baseline employment forecasts (labour demand) using Oxford Economics Local Market Quarterly Forecasts for October 2016; Experian's local area-based projections and a combined jobs growth scenario.
- Estimated growth in the local labour supply - and the jobs and employment space that this could be expected to support - having regard to analysis presented as part of the District's SHMA.
- Consideration of past take-up of employment space based on the Council's monitoring data and projecting forward to forecast how this might change in the future.

**6.101** The scenarios were:

- **Scenario 1: Oxford Economics** Staffordshire Moorlands Economic Forecasts (October 2016): gross employment land requirement in hectares (2014-2031): **16.89**
- **Scenario 2: Experian** job growth projections: gross employment land requirement in hectares (2014-2031): **38.06**
- **Scenario 3: Combination of job growth forecasts:** gross employment land requirement in hectares (2014-2031): **27.47**
- **Scenario 4: Past trends:** gross employment land requirement in hectares (2014-2031): **24.79**
- **Scenario 5: Job stabilisation:** gross employment land requirement in hectares (2014-2031): **16.26**
- **Scenario 6: Past take up rates:** gross employment land requirement in hectares (2014-2031): **23.98**
- **Scenario 7: Labour supply to match forecast growth of resident workforce modelled under SHMA Update 2017 Scenario A (170dpa):** gross employment land requirement in hectares (2014-2031): **12.61**
- **Scenario 8: Labour supply to match forecast growth of resident workforce modelled under SHMA Update 2017 Scenario Ab (196dpa):** gross employment land requirement in hectares (2014-2031): **12.73**

**6.102** The Housing and Economic Development Needs Assessment section of the National Planning Practice Guidance<sup>(19)</sup> advises that local authorities should develop an idea of future needs based on a range of data which is current and robust. In particular it recommends that plan-makers consider a variety of forecasting techniques.

**6.103** Two demographically derived assessments of future employment land needs have been identified (labour supply). It was considered appropriate to consider one of these further. Since Scenario Ab: (Baseline 2014 sub national population projections with sensitivity tests) was used to inform option 1 of the housing requirement alternatives - the Council dismissed Scenario 7 and took Scenario 8 forward for assessment as **Option 1** of the possible employment land requirements.

**6.104** A number of sectoral employment forecasts and projections (labour demand) have been used. Scenario 1 was underpinned by Oxford Economics forecasts (October 2016) and Scenario 2 took Experian job growth forecasts. Both forecasting houses produce credible and robust estimates of job growth at a local level. However there are methodological differences between them regarding how the various job projections are derived and this can lead to differences in the outcomes. For example the OE forecasts project a FTE job growth in the district of 288 (net) for the period 2014-2031 compared with the Experian forecast that project a FTE job growth of 1,300 (net) for the same period. The most obvious

19 <https://www.gov.uk/government/collections/planning-practice-guidance>

discrepancy between the two projections relates to the manufacturing sector. On balance, the Council considers that there is merit in dismissing scenarios 1 and 2 and taking forward for appraisal a combination of the two scenarios: scenario 3 (as **Option 4**).

**6.105** Scenario 5 (job stabilisation) assumes that the district's overall job growth will stabilise over the coming years (ie zero job growth post 2014) based on the trends outlined in scenario 1. Since job stabilisation is a scenario considered in the housing requirement options appraisal, it was considered appropriate to take forward this scenario for further appraisal as an employment land requirement option also (**Option 2**).

**6.106** Scenarios 4 and 6 (past trends and past take up rates) suggested requirements that were broadly aligned. An option based on these scenarios was taken forward for appraisal as **Option 3**.

**6.107** In summary, consideration of the scenarios set out above led to the Council considering four potential employment land requirement alternatives for appraisal:

- Option 1: 13ha (2014 - 2031)
- Option 2: 16ha (2014 - 2031)
- Option 3: 25ha (2014 - 2031)
- Option 4: 27ha (2014 - 2031)

## Summary of appraisal findings

### Option 1 - Summary of significant effects

**6.108** This option is based on labour supply projections and proposes the delivery of 13ha of employment land to 2031 (gross). This option represents the lower end of the range and as such may provide less opportunities than under all other options to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow. However it is still likely to lead to a positive effect on the local economy and local employment through helping to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term support for strengthening, modernising and diversifying the district economy.

**6.109** The labour supply scenario forecasts workforce jobs to be 35,485 in 2031 (a decline of 1,637 since 2014), of all options considered, this option is likely to lead to least overall, long-term support for encouraging a high and stable level of employment. Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and make a positive contribution to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. However this option makes the least positive contribution to this of all options considered.

**6.110** The option is considered likely to lead to negative effects on meeting housing need since the scenario projects the amount of new jobs needed to match the future working-age population and how much employment space would be needed to accommodate these jobs. The demographic scenarios identified in the emerging SHMA result in a need for 170dpa and 196dpa and housing supply at this level is not considered sufficient to meet objectively assessed need. Further negative effects are likely to result on objectives relating to climate

change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys.

**6.111** Since the option represents the lowest allocation of new employment land there is less opportunity to deliver employment close to where people live, potentially increasing the distance people need to travel to access key services and facilities and making the use of sustainable forms of transport less likely. In addition, this option offers least opportunity to address the high levels of out commuting from the district, leading to negative effects predicted for the objective to reduce the number of journeys made by car. Uncertain effects are recorded on a number of SA objectives including those relating to community cohesion, the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets as the effect will be dependent on the location of employment land allocations and the implementation of Local Plan policies.

## **Option 2 - Summary of significant effects**

**6.112** This option is based on a demand-led projection and proposes the delivery of 16ha of employment land 2014 to 2031 (gross). This job stabilisation scenario provides a lower-mid range employment land requirement option and as such may provide more opportunity than option 1, but less opportunity than under options 3 and 4 to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow. However the option is likely to lead to a positive effect on the local economy and local employment through helping to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). As lower-mid-range, this option is likely to lead to more opportunity than under option 1, but less opportunity than under options 3 and 4, to offer long-term support for strengthening, modernising and diversifying the district economy.

**6.113** The scenario assumes that the district's overall job growth will stabilise over the coming years, ie zero job growth post 2014 and the option is likely to lead to more opportunity than option 1, but less opportunity than under options 3 and 4, to offer long-term support for encouraging a high and stable level of employment. Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and make a positive contribution to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. The option makes a more positive contribution to this than option 1, but less of a positive contribution than is likely under options 3 and 4.

**6.114** The option is considered likely to lead to positive effects on meeting housing need since to ensure labour supply meets the job stabilisation forecast, higher levels of housing delivery will be required and this is likely to lead to meeting objectively assessed need. Negative effects are likely to result for objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys. Since the option is lower-mid range, there is more opportunity to deliver employment close to where people live than under option 1 but less opportunity than under options 3 and 4, influencing the distance people need to travel to access key services and facilities and impacting on the likelihood of people being enabled to use sustainable forms of transport. In addition, the option offers some opportunity to address the high levels of out commuting from the district,

leading to less significant negative effects than under option 1, but more negative impacts than under options 3 and 4 predicted for the objective to reduce the number of journeys made by car.

**6.115** Uncertain effects are recorded on a number of SA objectives including those relating to community cohesion, the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets as the effect will be dependent on the location of employment land allocations and the implementation of Local Plan policies.

### **Option 3 - Summary of significant effects**

**6.116** This option is based on demand-led projections informed by past take up rates and past trends, proposing the delivery of 25ha of employment land to 2031 (gross). This option is upper-mid range and as such may provide more opportunities than under options 1 and 2, but less opportunity than option 4 to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow. This option is likely to lead to a significantly positive effect on the local economy and local employment through helping to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). As this option is upper-mid range it may provide more opportunities than under options 1 and 2, but less opportunity than option 4 to lead to overall, long-term support for strengthening, modernising and diversifying the district economy.

**6.117** The past trends job growth scenario suggests growth in office FTE jobs (B1a) but declining FTE jobs in industrial (B1c/B2) and warehousing (B8) land use. Consideration of past take up rates suggests limited prospects for growth in the B-class employment sectors. The practical physical constraints and relative inaccessibility of certain areas and the current lack of viability of employment development schemes suggests that realistically an upsurge in large developments in the district is unlikely for the foreseeable future. However as this option is upper-mid range it may provide more opportunities than under options 1 and 2, but less opportunity than option 4 to lead to long-term support for encouraging a high and stable level of employment. Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and make a positive contribution to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. This option makes a more positive contribution to this than options 1 and 2, but less of a contribution than option 4.

**6.118** The option is also considered likely to lead to positive effects on meeting housing need. Past trends in FTE job growth over the period 2014-2031 were considered (2,609) in addition to past take up rates of employment sites in the district, reflecting market demand. To ensure labour supply is sufficient to support the net land requirement produced by this approach (around 3ha - 3.9ha to 2031) high levels of housing delivery will be required, likely to be considered sufficient to meet objectively assessed need.

**6.119** Since the option is upper-mid range, there is most opportunity to deliver employment close to where people live than under options 1 and 2, potentially reducing the distance people need to travel to access key services and facilities and making the use of sustainable forms of transport more likely, however the option offers less of a positive contribution to this than option 4. In addition, this option offers more opportunity than options 1 and 2 to address the high levels of out-commuting from the district, leading to positive effects predicted for

the objective to reduce the number of journeys made by car; although the significance is less than under option 4. However negative effects are likely to result on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys, these effects are likely to be greater than under options 1 and 2, but less significant than under option 4.

**6.120** Uncertain effects are recorded on a number of SA objectives including those relating to community cohesion, the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets as the effect will be dependent on the location of employment land allocations and the implementation of Local Plan policies.

#### **Option 4 - Summary of significant effects**

**6.121** This option is based on demand-led projections informed by Oxford Economics and Experian job growth forecasts, proposing the delivery of 27ha of employment land to 2031 (gross). This option represents the upper end of the range and as such may provide more opportunities than under all other options to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow. This option is likely to lead to a significantly positive effect on the local economy and local employment through helping to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies).

**6.122** The scenario represents a combination of Oxford Economics (OE) and Experian job growth forecasts. Whilst both projections indicate growth over the plan period, the magnitude of this varies considerably. OE suggest a net growth of +228 jobs 2014 - 2031 whilst Experian projections forecast +1,300 over the same period. A key difference between them relates to the projections for manufacture of machinery and equipment and of transport equipment with OE projections suggesting a decline of -427 FTE jobs for these two sectors and Experian projections suggesting a growth of 1,676 FTE jobs net. Given the presence of successful companies in the district specialising in these advanced manufacturing sectors, the NLP report considers there is merit in taking forward a combination of the two job growth scenarios providing a net increase of 435 B-Class FTE jobs 2014-2031 (794 FTEs in total). The report notes that allocation of this level of employment land would require policy intervention via the emerging Local Plan and close monitoring to ensure that the associated scale of job growth is realistic.

**6.123** However as it proposes the greatest allocation of new employment land of all options considered, this option has the greatest potential to lead to overall, long-term support for strengthening, modernising and diversifying the district economy and encouraging a high and stable level of employment. Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and make a positive contribution to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. This option makes the most positive contribution to this of all options considered.

**6.124** The option is also considered likely to lead to positive effects on meeting housing need. To ensure labour supply is sufficient to support the net land requirement produced by this approach (around 6.5ha 2014 to 2031) significant levels of housing delivery will be required, likely to be considered sufficient to meet objectively assessed need.

**6.125** Since the option represents the greatest allocation of new employment land there is most opportunity to deliver employment close to where people live, potentially reducing the distance people need to travel to access key services and facilities and making the use of sustainable forms of transport more likely. In addition, this option offers most opportunity to address the high levels of out-commuting from the district, leading to positive effects predicted for the objective to reduce the number of journeys made by car. However negative effects are likely to result on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys.

**6.126** Uncertain effects are recorded on a number of SA objectives including those relating to community cohesion, the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets as the effect will be dependent on the location of employment land allocations and the implementation of Local Plan policies.

**Mitigation measures proposed**

**6.127** It is possible that some likely significant effects identified via the SA can be mitigated. To assist this, potential mitigation measures have been identified during the appraisal of alternative employment land requirements. These recommendations are recorded in the appraisal tables set out in section 9 and have been included in the review of policies undertaken as part of Local Plan preparation.

**Recommended preferred option and options dismissed**

**6.128** The table below sets out the rationale for recommending an option to take forward into the preferred options plan.

Option recommended to take forward	Rationale
Option 4: 27 Ha	<p>This option could be expected to:</p> <ul style="list-style-type: none"> <li>● Provide opportunities to ensure that there is sufficient supply of employment land in the district to allow local businesses to grow (more significant than under all other options).</li> <li>● Lead to long term support for strengthening, modernising and diversifying the district economy.</li> <li>● Provide a net increase of 435 B-class FTE jobs, encouraging a high and stable level of employment.</li> <li>● Help meet previously identified needs to revitalise current poor quality stock.</li> <li>● Help address the imbalance of the portfolio in terms of the size of properties available.</li> <li>● Meet continued demand for B2 floorspace (particularly from indigenous companies).</li> </ul>

Option recommended to take forward	Rationale
	<ul style="list-style-type: none"> <li>● Provide opportunities to deliver employment close to where people live (more significant than under all other options).</li> <li>● Address the high levels of out commuting from the district (more significant than under all other options).</li> </ul> <p>Significant levels of housing delivery will be required to ensure labour supply is sufficient to support the net land requirement produced by this approach.</p> <p>Negative effects are likely to result on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys.</p>

**Table 6.5 Employment land requirement option recommended for taking forward**

**6.129** The table below sets out the rationale behind those options recommended for dismissal following the appraisal.

Options proposed for dismissal	Rationale
Option 1: 13 Ha	<p>This option could be expected to:</p> <ul style="list-style-type: none"> <li>● Provide some opportunities to ensure that there is sufficient supply of employment land in the district to allow local businesses to grow (less significant than under all other options).</li> <li>● Lead to limited long term support for strengthening, modernising and diversifying the district economy (less significant than under all other options).</li> <li>● Minor positive effect on the local economy through help to meet demand for B2 floorspace and revitalise current poor quality stock (less significant than under all other options).</li> <li>● Least opportunity to address the high levels of out commuting from the district than under all other options.</li> <li>● Least opportunity to deliver employment close to where people live than under all other options.</li> </ul> <p>Under this option, workforce jobs are forecast to be 35,485 in 2031 (a decline of 1,637 since 2014).</p> <p>Using labour supply projections as the forecast basis is unlikely to contribute towards meeting objectively assessed housing need.</p>

Options proposed for dismissal	Rationale
	<p>However whilst minor negative effects are likely to result on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys - these are less significant than under all other options.</p>
<p>Option 2: 16 Ha</p>	<p>This option could be expected to:</p> <ul style="list-style-type: none"> <li>● Provide some opportunities to ensure that there is sufficient supply of employment land in the district to allow local businesses to grow (less significant than under options 3 and 4).</li> <li>● Lead to limited long term support for strengthening, modernising and diversifying the district economy (less significant than under options 3 and 4).</li> <li>● Minor positive effect on the local economy through help to meet demand for B2 floorspace and revitalise current poor quality stock (less significant than under options 3 and 4).</li> <li>● Less opportunity to address the high levels of out commuting from the district than under options 3 and 4.</li> <li>● Less opportunity to deliver employment close to where people live than under options 3 and 4.</li> </ul> <p>Under this option job growth is forecast to stabilise (zero job growth post-2014).</p> <p>Minor negative effects are likely to result on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys - these are more significant than under option 1, but less significant than under options 3 and 4.</p>
<p>Option 3: 25 Ha</p>	<p>This option could be expected to:</p> <ul style="list-style-type: none"> <li>● Provide opportunities to ensure that there is sufficient supply of employment land in the district to allow local businesses to grow (more significant than under options 1 and 2, but less significant than under option 4).</li> <li>● Lead to long term support for strengthening, modernising and diversifying the district economy (more significant than under options 1 and 2, but less significant than under option 4).</li> <li>● Minor positive effect on the local economy through help to meet demand for B2 floorspace and revitalise current poor quality stock (more significant than under options 1 and 2, but less significant than under option 4).</li> </ul>

Options proposed for dismissal	Rationale
	<ul style="list-style-type: none"> <li>• More opportunity to address the high levels of out commuting from the district than under options 1 and 2, but less than under option 4.</li> <li>• More opportunity to deliver employment close to where people live than under options 1 and 2, but less than under option 4.</li> </ul> <p>The past trends job growth scenario suggests growth in office FTE jobs (B1a) but declining FTE jobs in industrial (B1c/B2) and warehousing (B8) land use. Consideration of past take up rates suggests limited prospects for growth in the B-class employment sectors.</p> <p>Negative effects are likely to result on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys - these are more significant than under options 1 and 2, but less significant than under option 4.</p>

**Table 6.6 Employment land requirement options dismissed following appraisal**

### 6.3 Appraisal of site options

#### Selection of alternatives for appraisal

**6.130** In March 2014, the Council adopted its Core Strategy as the strategy for the future development of the district to 2026 (excluding those parts of the district within the Peak District National Park). The Core Strategy does not identify specific sites to meet future development requirements but identifies the settlements where development may take place and the scale and nature of the development appropriate to those areas.

**6.131** The Council maintains a Strategic Housing Land Availability Assessment (SHLAA) which identifies and assesses the availability, suitability and deliverability of land as a potential housing site to meet the identified need for housing over the plan period. This evidence helps the Council understand what sites are theoretically available for housing development and was used, alongside other pieces of evidence, to identify potential alternative locations for housing to be allocated in the emerging Staffordshire Moorlands Local Plans.

**6.132** To inform the Council's future choice of site allocations through the emerging Local Plan, a range of alternative site options which could potentially be developed for housing, employment and other uses such as open space were identified and consulted on between July and September 2015. A detailed appraisal of these options is documented in section 15 of this report.

**6.133** Over 5,500 consultation responses were received to the 2015 consultation and these and the findings of the SA were used, alongside other evidence, to help determine preferred sites to be taken forward into a draft Local Plan. A first preferred site options consultation was held in April 2016.

**6.134** An Initial SA report was consulted on alongside this preferred option sites and boundaries document between 28<sup>th</sup> April and 13<sup>th</sup> June 2016. The report included details of the SA of site options and the summaries are reproduced below. In some cases the Initial SA report recommended that further information was sought concerning the sustainability effects of site allocation and the summaries below include detail of this additional evidence where appropriate. In some cases the additional evidence has contributed to the justification for the selection or rejection of sites as a preferred option. In each case rationale for site selection or dismissal as a preferred option is provided.

**6.135** Following the additional evidence and consideration of responses received to the April 2016 consultation, a second preferred options draft plan was prepared for further consultation in July 2017. The SA site summaries below include updates to the site summaries included in the Initial SA report with results of the appraisal of additional sites put forward.

**6.136** SA site summaries for 33 alternative options for the preferred location of a Gypsy and Traveller site are set out in the next section.

#### **Glossary of terms used**

**6.137** Agricultural Land Classification (**ALC**) is a basis for assessing how development proposals affect agricultural land within the planning system. The system classifies land into five grades, with Grade 3 subdivided into Subgrades 3a and 3b. The best and most versatile land (**BMV**) is defined as Grades 1, 2 and 3a by policy guidance.

**6.138** Biodiversity Alert Sites (**BAS**) are of lesser significance on a County basis than **SBI** sites (see below), because of lower intrinsic quality, smaller size or damage or disturbance. Nevertheless they collectively form a significant part of the County's nature conservation resource, and in some cases a valuable 'reserve series' for some of the Sites of Biological Importance.

**6.139** **Flood Zones** refer to the probability of river and sea flooding, ignoring the presence of defences. Zone 1: Low Probability; Zone 2: Medium Probability; Zone 3a: High Probability; Zone 3b: The Functional Floodplain.

**6.140** Habitats Regulations Assessment (**HRA**) is an assessment in accordance with the Habitats Regulations (the Conservation (Natural Habitats, &c.) Regulations 1994 as amended) to ascertain the significance of potential impacts of a plan on relevant European sites. The assessment determines whether the plan would adversely affect the integrity of such a site in terms of its nature conservation objectives. Where negative effects are identified, other options should be examined to avoid any potential for damaging effects. The sites are: Special Areas of Conservation (**SACs**) - designated under the Habitats Directive and Special Protection Areas (**SPAs**) - designated under the Wild Birds Directive.

**6.141** Sites of Biological Importance (**SBI**) are sites of local importance and contain most of the best remaining areas of semi-natural habitat in the county. The sites are selected as the result of a series of county biological and habitat surveys.

## Summary of appraisal findings - all options - with rationale for any options dismissed

### Leek

#### Leek - sites within current settlement boundary

##### LE022

**6.142** The proposed delivery of circa 16 dwellings is considered to have a positive effect. The site is also accessible to existing services and facilities which is likely to have a positive effect, as could the site's low ecological importance. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area where 20 - 60% of the land is likely to be BMV is assessed as having a negative effect, as could the site's proximity to historic assets and the inaccessibility of existing areas of employment.

**6.143** This site was taken forward as a preferred option for consultation in April 2016.

**6.144** The site comprises a small field on the south-eastern edge of Leek, west of the A523 (Ashbourne Road). The site has full planning permission for 12 dwellings, currently awaiting a Decision Notice (SMD/2016/0510).

**6.145** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has low ecological value in its potential to support protected species and the site habitats are considered to be of nature conservation value at site level only.

**6.146** The Landscape, Local Green Space & Heritage Impact Study (August 2016) considered that the site is of low landscape sensitivity. There are four Grade II Listed Buildings within the 400m buffer. The study considered that their settings do not contribute greatly to the significance of the assets and that development would be highly unlikely to adversely affect their settings.

**6.147** Initial Habitats Regulations Assessment Screening noted that new housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation.

**6.148** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

##### LE037A

**6.149** The proposed delivery of circa 28 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment. The site is also accessible to existing services and facilities which is likely to have a positive effect. However, the development of greenfield land is assessed as having a negative effect, as could the site's proximity to historic assets and the ecological importance of the site.

**6.150** Given the current SBI status of most of the site and owing to its ecological importance any future development of the site should be considered in accordance with relevant policies of the NPPF and the Core Strategy.

**6.151** This site was not taken forward as a preferred option for consultation in April 2016.

**LE045**

**6.152** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment and services and facilities within the town. However, the site's proximity to a designated asset is likely to have a significant negative effect. The development of greenfield land, grade 4 ALC is assessed as having a negative effect, as could the site's proximity to historic assets.

**6.153** The site is part of Ball Haye Green Disused Tip SBI. There is potential for visual impact on Abbey Farm (listed Grade II) and the site of Dieu-la-Cres Abbey (Scheduled Monument). County Highways has raised access difficulties.

**6.154** This site was not taken forward as a preferred option for consultation in April 2016.

**LE057**

**6.155** The proposed delivery of circa 105 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment and services and facilities within the town. However, the development of greenfield land, grade 4 ALC is assessed as having a negative effect, as could the site's proximity to historic assets and the ecological importance of the site given its relation to Ladydale Site of Biological Importance.

**6.156** The site overlays a part of the Ladydale SBI and is situated within the original parkland setting of Pickwood Hall (listed Grade II). County Highways has raised access difficulties.

**6.157** This site was not taken forward as a preferred option for consultation in April 2016.

**LE061**

**6.158** The site's proximity to existing areas of employment and services and facilities within the town is assessed as having a significant positive effect, as could the development of brownfield, urban ALC land. The proposed delivery of circa 16 houses is considered to have a positive effect. However, the site's proximity to historic assets is assessed as being a negative effect.

**6.159** Since the site is within the current Leek Town Development Boundary a development proposal could come forward at any time and consequently the site was not taken forward as a preferred option for consultation in April 2016.

**LE063**

**6.160** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect, as could the site's proximity to services, facilities and existing areas of employment. However, the site's proximity to historic assets and ecological importance of the site is likely to have a negative effect.

**6.161** Since the site is within the current Leek Town Development Boundary a development proposal could come forward at any time and consequently the site was not taken forward as a preferred option for consultation in April 2016.

**LE064**

**6.162** The site's proximity to existing areas of employment is considered to be a significant positive effect. Similarly, the site has good accessibility to services and facilities which is likely to have a positive effect. However, the site is located within flood zone 2 which is assessed as being a negative effect. The development of greenfield land is likely to have a negative effect, as could the site's proximity to historic assets and a Local Nature Reserve.

**6.163** The site is located on the north-western edge of Leek, and comprises a field of rough grassland which slopes up from commercial development on Ashbourne Road to a property on Kiln Lane. There is relevant planning history on the site with an outline application for 11 dwellings awaiting a section 106 agreement. Since the site is likely to be affected to some degree by flood risk, allocation of the site will require support of the Sequential Test and a level 2 SFRA.

**6.164** The site was taken forward as a preferred option for consultation in April 2016.

**6.165** An outline application for eleven dwellings was approved on 14th December 2016 (SMD/2013/1201). The site was not included in the July 2017 version preferred option Local Plan.

**LE070**

**6.166** The proposed delivery of circa 22 dwellings is considered to have a significant positive effect, as could the development of urban ALC brownfield land, the site's proximity to services, facilities and existing areas of employment. However, the site's proximity to historic assets and the ecological importance of the site is assessed as a negative effect.

**6.167** Since the site is within the current Leek Town Development Boundary a development proposal could come forward at any time and consequently the site was not taken forward as a preferred option for consultation in April 2016.

**LE076**

**6.168** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect, as could the site's proximity to services, facilities and existing areas of employment. However, the site's proximity to a designated asset is likely to have a significant negative effect. The development of greenfield land, grade 4 ALC is assessed as being a negative effect, as could the site's proximity to a Local Nature Reserve and the ecological importance of the site.

**6.169** The site is part of Ball Haye Green Disused Tip SBI. There is potential for impact on the setting of Fowlchurch, a former grange of Dieu-la-Cres Abbey (listed Grade II). County Highways has raised access difficulties.

**6.170** This site was not taken forward as a preferred option for consultation in April 2016.

**LE091**

**6.171** The proposed delivery of circa 150 dwellings is considered to have a significant positive effect, as could the site's proximity to services, facilities and existing areas of employment. However, the site's proximity to designated and historic assets is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as being a negative effect.

**6.172** The site overlays most of Ball Haye Green Disused Tip SBI and is in close proximity to Brough Park Fields Local Nature Reserve. There is potential for impact on the setting of Fowlchurch, a former grange of Dieu-la-Cres Abbey (listed Grade II). There is potential for visual impact on Abbey Farm (listed Grade II) and the site of Dieu-la-Cres Abbey (Scheduled Monument). County Highways has raised access difficulties.

**6.173** This site was not taken forward as a preferred option for consultation in April 2016.

#### **LE106**

**6.174** The site's proximity to services, facilities and existing areas of employment is assessed as a significant positive effect. However, the development of greenfield land, grade 4 ALC is assessed as being a negative effect. As could the site's proximity to historic assets and a Local Nature Reserve.

**6.175** Since the site is within the current Leek Town Development Boundary a development proposal could come forward at any time and consequently the site was not taken forward as a preferred option for consultation in April 2016.

#### **LE147**

**6.176** The proposed delivery of circa 25 dwellings is considered to have a significant positive effect, as could the site's proximity existing areas of employment. Similarly, the site is accessible to services and facilities which is likely to have a positive effect. However, the site's proximity to designated and historic assets is likely to have a significant negative effect. Similarly, the development of greenfield land, grade 4 ALC is assessed as being a negative effect.

**6.177** There is a listed well (Ladywell) to the south of the site and a 19th century stone structure survives (listed grade II). The site forms part of established parkland to Pickwood Hall and is part of the Ladydale SBI habitat mosaic.

**6.178** This site was not taken forward as a preferred option for consultation in April 2016.

#### **LE243**

**6.179** The proposed delivery of circa 70 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment. Similarly, the site has good accessibility to services and facilities which is likely to have a positive effect, as could the development of urban ALC brownfield land. However, the site's proximity to historic assets could have a negative effect. The site's proximity to a Local Nature Reserve is also assessed as being a negative effect.

**6.180** The site is part of Ball Haye Green Disused Tip SBI and is adjacent to Fowlchurch Farmhouse (listed Grade II). The site is currently in employment use.

**6.181** This site was not taken forward as a preferred option for consultation in April 2016.

#### **LE249**

**6.182** The proposed delivery of circa 35 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment. However, the site is partially within flood zone 3 which is likely to have a significant negative effect, as could its proximity to historic assets. Similarly, the proximity to a Local Nature Reserve is

assessed as having negative effects, as could the inaccessibility to other services and facilities. The site is indicated on the predictive map of Best and Most Versatile agricultural land as an urban / industrial area. There is potential for contamination to be present, resulting from the site's former use as a depot.

**6.183** The site is surrounded by Ladderedge Country Park to the west and south, a golf course and stream to the north with connective scrub and scattered trees, intersected by the A53 to the east. The site has a culverted watercourse flowing beneath it and is partially within flood zone 3. Allocation of the site will require support of the Sequential Test and a level 2 SFRA. Consideration should be given to planting and landscaping on the eastern boundaries in order to limit effects on views from Ladderedge Country Park. There are opportunities to contribute to the Council's Green Infrastructure strategy.

**6.184** The site was taken forward as a preferred option for consultation in April 2016, with a revised boundary to exclude areas within the flood zone.

**6.185** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at local level only. However, more information is required requiring the presence/absence of reptiles.

**6.186** There is one Grade II Listed Building within the 400m buffer. The Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) considered that setting does not extensively contribute to the significance of the asset and that development would be highly unlikely to adversely affect the setting of the asset. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity.

**6.187** Initial Habitats Regulations Assessment Screening noted that new housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation.

**6.188** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

## **LE259**

**6.189** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect, as could the site's proximity to services, facilities and existing areas of employment. However, the proximity to historic assets and a LNR are assessed as being significant negative effects. The development of greenfield land, grade 4 ALC land is assessed as being a negative effect.

**6.190** The site is part of Ball Haye Green Disused Tip SBI and is adjacent to Fowlchurch Farmhouse (listed Grade II). The site is currently used as a sports pitch.

**6.191** This site was not taken forward as a preferred option for consultation in April 2016.

## **Leek - Other Uses**

### **LE014 and LE015**

**6.192** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the accessibility of other services and facilities is likely to have a significant positive effect, as could the proposed delivery of circa 30 dwellings.

**6.193** It is understood that contamination may affect the site.

**6.194** Since the site is within the current Leek Town Development Boundary a development proposal could come forward at any time and consequently the site was not taken forward as a preferred option for consultation in April 2016.

### **LE067**

**6.195** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the accessibility of other health care services and facilities is likely to have a significant positive effect, as could the proposed delivery of circa 30 dwellings. However, the site is in proximity to historic assets and a Local Nature Reserve which is likely to have a negative effect.

**6.196** Since the site is within the current Leek Town Development Boundary a development proposal could come forward at any time and consequently the site was not taken forward as a preferred option for consultation in April 2016.

### **LE073**

**6.197** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the accessibility of other services and facilities is likely to have a significant positive effect, as could the development of brownfield, urban ALC land. However, the proximity to historic assets and a Local Nature Reserve are assessed as being negative effects.

**6.198** Has recent planning approval for 35 dwellings (SMD/2015/0523).

### **LE080, LE085, LE086 & LE252**

**6.199** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the accessibility of other services and facilities is likely to have a significant positive effect, as could the proposed delivery of circa 25 dwellings. However, the site includes two listed buildings which is likely to have a significant negative effect. The proximity of the site to a Local Nature Reserve is also likely to have a negative effect.

**6.200** Since the site is within the current Leek Town Development Boundary a development proposal could come forward at any time and consequently the site was not taken forward as a preferred option for consultation in April 2016.

**LE116**

**6.201** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the accessibility of other services and facilities is likely to have a significant positive effect, as could the proposed delivery of circa 21 dwellings and development of brownfield, urban ALC land. However, the site is in proximity to historic assets and a Local Nature Reserve which is likely to have a negative effect, as could the ecological value of the site.

**6.202** Since the site is within the current Leek Town Development Boundary a development proposal could come forward at any time and consequently the site was not taken forward as a preferred option for consultation in April 2016.

**LE150 (Newton House)**

**6.203** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the proposed delivery of circa 120 is likely to have a significant positive effect. However, the site is indicated on the predictive map of Best and Most Versatile agricultural land as partly within an area where 20 - 60% of the land is likely to be BMV and this is likely to have a significant negative effect. The site's proximity to historic assets and its ecological value is likely to have a significant negative effect.

**6.204** The site comprises existing offices, parking and surrounding land on the southern edge of Leek, east of Cheddleton Road. It is adjacent to Ladydale SBI and Ballington Wood ancient woodland. Further work is required to address potential impacts on these sites and if necessary a buffer should be required between the site and Ballington Wood / Ladydale SBI. A contribution to Green Infrastructure may be required.

**6.205** The site was taken forward as a preferred option for consultation in April 2016.

**6.206** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at district level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance, and the potential to support a population of reptiles and badgers.

**6.207** There are nine Grade II Listed Buildings within the 400m buffer. The Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) considered that there was no inter-visibility with the assets to the north of the site due to intervening vegetation and buildings. Therefore, development would be highly unlikely to adversely affect the settings of those assets. The settings of the three assets to the south of the site are not considered to contribute greatly to their significance. However, adverse effects could be reduced by stepping development back and using vegetation screening along the south-western edge of the site.

**6.208** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. Initial Habitats Regulations Assessment Screening noted that new development in Leek could increase

recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation.

**6.209** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

#### **LE219**

**6.210** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the development of brownfield, urban ALC land is likely to have a significant positive effect. However, the site's proximity to historic assets and some ecological value is likely to have a negative effect.

**6.211** The site is currently in employment use.

**6.212** This site was not taken forward as a preferred option for consultation in April 2016.

#### **LE220**

**6.213** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site has good accessibility to services and facilities and the development of brownfield, urban ALC land is likely to have a significant positive effect. However, the site's proximity to historic assets is likely to have a significant negative effect. The site's proximity to ecological importance is likely to have a negative effect.

**6.214** The site is adjacent to Big Mill (Grade II listed) and in Leek Conservation Area. It is currently in employment use.

**6.215** This site was not taken forward as a preferred option for consultation in April 2016.

#### **LE235 (Cornhill)**

**6.216** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the proposed delivery of circa 244 dwellings is considered to have a significant positive effect. The site's accessibility to services, facilities and open space is likely to have a positive effect. However, the site's partial location within a flood zone is likely to have a significant negative effect, as could its proximity to designated and historic assets. The site is indicated on the predictive map of Best and Most Versatile agricultural land as partly in an area where less than 20% of the land is likely to be BMV.

**6.217** Site comprises land to the west of existing offices south of Leek on Cheddleton Road, which includes paddocks, some tree planting and a small farmstead adjacent to the northern boundary. The site is bound by a dismantled railway to the west, beyond which Barnfields Industrial Estate is located. The site is partially within flood zone 3; allocation of the site will require support of the Sequential Test and a level 2 SFRA.

**6.218** The site was taken forward as a preferred option for consultation in April 2016, with a revised boundary to exclude areas within the flood zone.

**6.219** The ecological appraisal of the Cornhill Economic Regeneration Scheme (October 2016) considered that the main areas of ecological interest are Birchall meadow and the immediately adjoining scrub / rank grassland, the railway corridor and the watercourse running along the southern boundary of the site. These areas are considered to provide the best habitat for bats, birds, badgers and, potentially, reptiles, as well as other flora and fauna. As much site habitat will be lost under the current development proposals, it is suggested that connecting habitat should be maintained as much as possible along the southern and western boundaries of the site (the watercourse and old railway line, respectively).

**6.220** There are six Grade II Listed Buildings and one Conservation Area within the 400m buffer. The Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) considered that development would be highly unlikely to adversely affect the settings of the heritage assets due to intervening buildings and vegetation.

**6.221** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. Initial Habitats Regulations Assessment Screening noted that new housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation.

**6.222** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

## **Leek - sites outside current settlement boundary**

### **LE066**

**6.223** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site is located away from designated heritage assets and has good accessibility to services and facilities which is likely to have a positive effect. However, the ecological value of the site is likely to have a negative effect as well as the inaccessibility of existing areas of employment.

**6.224** The site forms part of the setting of Knivedon Hall (not listed) and the significance of the Hall and its estate requires further assessment. The site lies partially within an area identified as being important to the landscape setting of the settlement and the potential landscape impact of development also requires further assessment.

**6.225** The site was not taken forward as a preferred option for consultation in April 2016.

**6.226** However the site was put forward in representations made following the April 2016 public consultation. The site is located on the eastern edge of Leek, east of Mount Road. The site is previously developed, with the northern section comprising Knivedon Hall amongst woodland, and the southern half comprising a property and polytunnels / horticulture. There are no designated heritage assets within the 400m buffer.

**6.227** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of high landscape sensitivity. The study found that the site is located beyond the ridge of Mount Road, which currently screens views of Leek from the PDNP. Existing development within the site is generally screened by the trees and other vegetation both within and surrounding the site. The woodland within the site also

provides screening of existing development within Leek. It was considered that development within the site would be visually prominent and could potentially affect the setting of the PDNP.

**6.228** Initial Habitats Regulations Assessment Screening noted that new housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation. There is an opportunity for contribution to the District's Green Infrastructure Network.

**6.229** The site was proposed for inclusion in the July 2017 preferred option Local Plan, with an estimated yield of 74.

#### **LE069**

**6.230** The proposed delivery of circa 42 dwellings is considered to have a significant positive effect. Similarly, the site has low ecological value and has good accessibility to services and facilities which is likely to have a positive effect. However, the proximity of the site to historic assets is likely to have a negative effect as well as the inaccessibility of existing areas of employment.

**6.231** The potential landscape impact of development requires further assessment.

**6.232** The site was not taken forward as a preferred option for consultation in April 2016.

#### **LE102**

**6.233** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. However, the development of greenfield land where the site is indicated on the predictive map of Best and Most Versatile agricultural land as an area where 20 - 60% of the land is likely to be BMV could have a significant negative effect, as could the site's proximity to historic assets. Similarly, the site is relatively inaccessible to services, facilities and areas of existing employment, and has some ecological value which is likely to have a negative effect.

**6.234** The site lies on raised ground marking the edge of the settlement. The potential landscape impact of development requires further assessment. There is an opportunity for contribution to the District's Green Infrastructure Network.

**6.235** The site was not taken forward as a preferred option for consultation in April 2016.

**6.236** However the site was suggested in representations made during the April 2016 public consultation. The site is bounded by mature trees and is in an area not identified as being important landscape setting to settlement. Initial Habitats Regulations Assessment Screening noted that new housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation.

**6.237** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

**LE103**

**6.238** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. However, the development of greenfield, grade 3 ALC land would have a significant negative effect. Similarly, the site is relatively inaccessible to services, facilities and areas of existing employment and is adjacent to a listed building all of which is likely to have a negative effect. The site's location within flood zones 2 and 3 is also a significant negative effect.

**6.239** Due to its location within flood zones 2 and 3 the site is likely to be severely impacted by flood risk, allocation of the site will require support of the Sequential Test and a level 2 SFRA.

**6.240** The site was not taken forward as a preferred option for consultation in April 2016.

**LE127**

**6.241** The proposed delivery of circa 100 dwellings is considered to have a significant positive effect. Similarly, the site has low ecological value and has good accessibility to services and facilities which is likely to have a positive effect. However, the development of a mixed greenfield and brownfield site, where the site is indicated on the predictive map of Best and Most Versatile agricultural land as an area where less than 20% of the land is likely to be BMV, and the proximity of the site to historic assets is likely to have a negative effect as well as the inaccessibility of existing areas of employment.

**6.242** Mount Road is located to the east of Leek, on a ridge that currently screens the majority of views of the settlement from the Peak District National Park (PDNP). The site comprises a large field on the south-eastern edge of Leek, enclosed by Mount Road to the south and east. The potential landscape impact of development requires further assessment. There is an opportunity for contribution to the District's Green Infrastructure Network.

**6.243** The site was taken forward as a preferred option for consultation in April 2016.

**6.244** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance.

**6.245** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that there are five Grade II Listed Buildings within the 400m buffer. However due to the topography of the surrounding landscape as well as intervening buildings and vegetation, the report considered there would be no inter-visibility between the assets and the site and that development would be highly unlikely to adversely affect the setting of the assets.

**6.246** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of high landscape sensitivity. The study found that the site is visually prominent, and development within it may affect the setting of the PDNP. Development of LE127 was also considered to have the potential to adversely affect the existing settlement edge and landscape character, including the rural approach to Leek.

**6.247** Initial Habitats Regulations Assessment Screening noted that new housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation.

**6.248** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

#### **LE128a and LE128b**

**6.249** The proposed delivery of circa 95 dwellings is considered to have a significant positive effect. Similarly, the site has low ecological value and good accessibility to services and facilities which is likely to have a positive effect. However, the development of greenfield land, where the site is partly indicated on the predictive map of Best and Most Versatile agricultural land as an area where less than 20% of the land is likely to be BMV and the proximity of the site to historic assets is likely to have a negative effect as well as the inaccessibility of existing areas of employment.

**6.250** The sites comprise the northern (LE128a) and southern (LE128b) half of a field which slopes up from the eastern edge of Leek to Mount Road. The potential landscape impact of development requires further assessment. There is an opportunity for contribution to the District's Green Infrastructure Network.

**6.251** The northern section of the site only (LE128a) was taken forward as a preferred option for consultation in April 2016, with an estimated yield of 54. This area is indicated on the predictive map of Best and Most Versatile land as an urban / industrial area. LE128b is indicated on the predictive map of Best and Most Versatile agricultural land as within an area where less than 20% of the land is likely to be BMV.

**6.252** The Council's 2015 Phase 1 ecological survey of LE128 considered the site to have mostly low biodiversity value overall as it consists solely of species poor improved grassland with one species poor hedgerow. The subsequent extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) of LE128a considered that this area has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance. A further survey of LE128b is required.

**6.253** There is one Grade II Listed Building within the 400m buffer of LE128a and two Grade II Listed Buildings within the 400m buffer of LE128b. The sites were considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that due to the topography of the surrounding landscape as well as intervening buildings and vegetation, there would be no inter-visibility between the assets and the sites. The study considered that setting does not extensively contribute to the significance of the assets and therefore that development would be highly unlikely to adversely affect the setting of the assets.

**6.254** LE128a and b were considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that the existing settlement edge is well-defined but urban, and only at a slightly lower elevation than the site, and so is visible across it. The study considered that the sites are currently screened from the National Park by the ridge of Mount Road, the existing tree

planting on Mount Road and the woodland surrounding Knivedon Hall. Site-specific landscape mitigation measures proposed included advanced planting and landscaping on the eastern boundary, and limited building heights in the eastern half of the sites.

**6.255** Initial Habitats Regulations Assessment Screening noted that new housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation.

**6.256** Both LE128a and b were proposed for inclusion in the July 2017 preferred option Local Plan, with an estimated yield of 95.

#### **LE140**

**6.257** The proposed delivery of circa 95 dwellings is considered to have a significant positive effect. Similarly, the site has low ecological value and good accessibility to services, facilities and areas of employment which is likely to have a positive effect. However, the development of greenfield land, where the site is indicated on the predictive map of Best and Most Versatile agricultural land as an urban / industrial area and the proximity of the site to historic assets is likely to have a negative effect.

**6.258** Site comprises land sloping down from Mount Road to the settlement edge, and is enclosed by tree belts on the northern and western boundaries. There are also trees on the eastern boundary, however these are more sparse. The site lies within an area identified as being important to the landscape setting of the settlement and the potential landscape impact of development requires further assessment. There is an opportunity for contribution to the District's Green Infrastructure Network.

**6.259** The site was taken forward as a preferred option for consultation in April 2016.

**6.260** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at local level only.

**6.261** There are three Grade II Listed Buildings within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that due to the topography of the surrounding landscape as well as intervening buildings and vegetation, there would be no inter-visibility between the assets and the site and the study considered that development would be highly unlikely to adversely affect the settings of the assets.

**6.262** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that the site slopes down from Mount Road and so views from the National Park are screened by the ridge and intervening vegetation on the site boundary and on the land on the opposite side of Mount Road (including the woodland surrounding Knivedon Hall). The study suggests that site-specific landscape mitigation measures could include advanced planting and landscaping on the eastern boundary, and limited building heights in the eastern half of the site.

**6.263** Initial Habitats Regulations Assessment Screening noted that new housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation.

**6.264** The site was proposed for inclusion in the July 2017 preferred option Local Plan with an estimated yield of 70.

#### **LE142A**

**6.265** The proposed delivery of circa 140 dwellings is considered to have a significant positive effect. Similarly, the site good accessibility to services, facilities and areas of employment which is likely to have a positive effect. However, the development of greenfield land, where the site is indicated on the predictive map of Best and Most Versatile agricultural land as an urban / industrial area, the ecological value of the site and the proximity to historic assets is likely to have a negative effect.

**6.266** Site comprises land to the east of Mount Road, on the north-eastern edge of Leek. The site is visually prominent and visible from the National Park, as it is located atop of the ridge that screens views of Leek. The site lies within an area identified as being important to the landscape setting of the settlement and the potential landscape impact of development requires further assessment. There is an opportunity for contribution to the District's Green Infrastructure Network.

**6.267** The site was taken forward as a preferred option for consultation in April 2016.

**6.268** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the potential for bats roosts on the site.

**6.269** There are two Grade II Listed Buildings within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that due to the topography of the surrounding landscape as well as intervening buildings and vegetation, there would be no inter-visibility between the assets and the site and considers that development would be highly unlikely to adversely affect the setting of the assets.

**6.270** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of high landscape sensitivity. The study found that the site is visually prominent, and development within it may affect the setting of the National Park. The study considered that development of LE142a had the potential to adversely affect the existing settlement edge and landscape character, including the rural approach to Leek.

**6.271** Initial Habitats Regulations Assessment Screening noted that new housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation.

**6.272** The site was proposed for inclusion in the July 2017 preferred option Local Plan with an amended site boundary to exclude land in the ownership of Leek Land Trust, estimated yield 29.

#### **LE142B**

**6.273** The proposed delivery of circa 40 dwellings is considered to have a significant positive effect. Similarly, the site good accessibility to services, facilities and areas of employment which is likely to have a positive effect. However, the development of greenfield land, where the site is indicated on the predictive map of Best and Most Versatile agricultural land as an urban / industrial area, the ecological value of the site and the proximity to historic assets is likely to have a negative effect.

**6.274** The site comprises an existing farmstead and paddocks, and the access track which extends north to Thorncliffe Road. The site lies within an area identified as being important to the landscape setting of the settlement and the potential landscape impact of development requires further assessment. There is an opportunity for contribution to the District's Green Infrastructure Network.

**6.275** The site was taken forward as a preferred option for consultation in April 2016.

**6.276** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance.

**6.277** There is one Grade II Listed Building within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that due to the topography of the surrounding landscape as well as intervening buildings and vegetation, there would be no inter-visibility between the asset and the site and development would be highly unlikely to adversely affect the setting of the asset.

**6.278** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of high landscape sensitivity. The study found that while existing development within the site does not contribute to a well-defined settlement edge, the existing development is located within the areas of the site with the lowest visual prominence and development across the entire site would likely be visible from the National Park and could affect its setting. The study found that the site is visually prominent and development may adversely affect landscape character, including the rural approach to Leek.

**6.279** Initial Habitats Regulations Assessment Screening noted that new housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation.

**6.280** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

### **LE143**

**6.281** The proposed delivery of circa 190 dwellings is considered to have a significant positive effect. However, the development of greenfield, grade 4 ALC land, the proximity to historic assets is likely to have a negative effect as could the relative inaccessibility to services, facilities and areas of existing employment.

**6.282** The site is in open countryside and forms part of the setting of the 16th century Edge End Farm (listed Grade II); the significance of the designated heritage asset and potential landscape impact of development, including on the Peak District National Park, require further assessment.

**6.283** The site was not taken forward as a preferred option for consultation in April 2016.

### **LE143A**

**6.284** The proposed delivery of circa 135 dwellings is considered to have a significant positive effect. However, the site's proximity to historic assets is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land, the proximity to historic assets is likely to have a negative effect as could the relative inaccessibility to services, facilities and areas of existing employment.

**6.285** The potential landscape impact of development, including on the Peak District National Park, requires further assessment.

**6.286** The site was not taken forward as a preferred option for consultation in April 2016.

### **LE253**

**6.287** The proposed delivery of circa 15 dwellings is considered to have a positive effect, as could the site's proximity to areas of existing employment. However, the site's proximity to historic assets is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land and the proximity to historic assets are likely to have a negative effect, as could the relative inaccessibility to services and facilities and the ecological value of the site.

**6.288** The site was not taken forward as a preferred option for consultation in April 2016.

### **Broad Area EM2 Leekbrook**

**6.289** The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. The site's accessibility to open space is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities and the site is located within a flood zone which is likely to have a significant negative effect. The development of greenfield land where the site is indicated on the predictive map of Best and Most Versatile agricultural land as an area where 20 - 60% of the land is likely to be BMV is assessed as being a negative effect, as could the site's proximity to historic assets and a partial SBI designation.

**6.290** The site is likely to be affected to some degree by flood risk; allocation of the site will require the support of the Sequential Test and a level 2 SFRA. The site lies in a valley with an existing industrial estate adjacent to the west. It comprises grassland, adjacent to a stream on the northern boundary, which gradually slopes up to woodland on the southern

boundary. The majority of the site is designated as part of Twinney Wood and Grassland Site of Biological Importance and is within 400m of Grade II \* listed Fynneylane Farm. Further heritage and ecological impact assessment work is required.

**6.291** The site was taken forward as a preferred option for consultation in April 2016, with a revised boundary to exclude areas within the flood zone.

**6.292** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that whilst a large proportion of the site has already been designated as part of the Twinney Wood and Grassland SBI, the remaining part of the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance.

**6.293** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that due to the topography of the surrounding landscape and the dense screening of vegetation, there was no inter-visibility between the site and the heritage asset. Despite this, the site is part of the setting of the asset. The study found that the setting contributes to the significance of the heritage asset and it would be likely that development of the site would adversely affect its setting. Affects may be reduced if development was kept in the western half of the site so as to not infringe on the setting of the asset; an appropriate mitigation strategy should be required.

**6.294** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that while the site is large and open, as it is enclosed by woodland and located at the bottom of a valley, it is considered to have low visual prominence. Further, the character of the site is affected by the adjacent industrial development, which is visually prominent from within the site.

**6.295** Initial Habitats Regulations Assessment Screening noted that new development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation.

**6.296** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

## **Leek - Additional Sites**

### **ADD01 (East of Horsecroft Farm)**

**6.297** The proposed delivery of circa 15 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. The site's accessibility to areas of open space is considered to have a positive effect. However, the site's proximity to designated and historic assets is likely to have a negative effect, as could the development of greenfield land where the site is indicated on the predictive map of Best and Most Versatile agricultural land as partly within an area where 20 - 60% of the land is likely to be BMV, and the inaccessibility of services and facilities.

**6.298** The site comprises a fenced section of a field sloping down from the northeastern edge of Leek, to the north-west of Churnet View Middle School. The site was taken forward as a preferred option for consultation in April 2016.

**6.299** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that species recorded on site are common and widespread both at a county and national level and it is considered unlikely that the site is important in maintaining any populations of notable or protected species. The majority of the site consists of improved grassland, this habitat is common and widespread both locally and throughout the UK and, as such, is considered to be of importance to nature conservation at site level only.

**6.300** There are two Grade II Listed Buildings within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that due to the topography and intervening buildings, development would be highly unlikely to adversely affect the assets. Outside of the 400m buffer, there is a Scheduled Monument to the north-west of the site. Due to the open topography, development could adversely affect its setting. Mitigation including the use of vegetation screening may reduce effects.

**6.301** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of high landscape sensitivity. The study found that the site is semi-enclosed by vegetation on the settlement edge, however is open to the north-west. This allows long distance views and inter-visibility between the site and higher ground across the valley to the north-west. Currently the settlement edge is well-defined and vegetated, with views of existing development generally screened. In addition the settlement edge is currently located on a ridge, with development not extending beyond this ridge, however the site is located below this ridge. The study considered that development of the site would be visually prominent, and would encroach on the countryside by extending beyond this ridge. In addition the study noted that there would be no clear limit to development if the site were developed, potentially compromising the surrounding sensitive countryside.

**6.302** Initial Habitats Regulations Assessment Screening noted that new housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation.

**6.303** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

#### **ADD09 (Leekbrook) (employment land allocation)**

**6.304** The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. The site's accessibility to open space is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities which is likely to have a significant negative effect. The development of greenfield land where the site is indicated on the predictive map of Best and Most Versatile agricultural land as an area where 20 - 60% of the land is likely to be BMV is assessed as being a negative effect, as could the site's proximity to historic assets.

**6.305** The site comprises a field that slopes steeply up from Basford Lane to woodland, which encloses the site to the west and south. The site is bound by commercial development on the A520 to the north. Consideration should be given to the adjacent woodland, which is designated as an SBI and carries Tree Preservation Orders.

**6.306** The site was taken forward as a preferred option for consultation in April 2016.

**6.307** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that most of the site was comprised of improved grassland for pasture; this habitat is common and widespread both locally and throughout the UK and, as such, is considered to be of importance to nature conservation at site level only. However the hedgerow habitat on site was considered of nature conservation value at the local level. Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site significantly supported any notable protected species.

**6.308** There is one Grade II Listed Building within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that due to the intervening industrial estate, development would not adversely affect the setting of the asset.

**6.309** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that the surrounding vegetation and development which encloses the site reduces visual prominence and development of the site would fit in well with the existing pattern of surrounding industrial / commercial development. Site-specific landscape mitigation measures could include restricted development and building heights on the higher ground.

**6.310** Initial Habitats Regulations Assessment Screening noted that new development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on the Peak District Moors (South Pennine Moors Phase 1) SPA and South Pennine Moors SAC. This requires further investigation.

**6.311** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

### **Additional sites appraised following April 2016 consultation**

#### **LE154 Adams Foods**

**6.312** The proposed delivery of circa 60 dwellings is considered to have a significant positive effect, as is avoidance of the loss of best and most versatile agricultural land and the edge of town centre location. However, the site's proximity to historic assets and mature woodland is likely to have a negative effect, as is the loss of potential employment use.

**6.313** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **LE138 Land at Macclesfield Road**

**6.314** The proposed delivery of circa 25 dwellings is considered to have a significant positive effect, the site's location outside flood zones 2 or 3 is also likely to lead to positive effects. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area where over 60% of the land is likely to be BMV, could have a significant negative effect. Similarly, the site is relatively inaccessible to services, facilities and areas of existing employment. New housing development in Leek could increase recreational pressure and air pollution effects (from increased road traffic) potentially resulting in impact on European sites. Further assessment is required to identify potential for ecological or landscape impacts.

**6.315** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

## **Additional sites appraised following the July 2017 consultation**

### **LE219 Eaton House - Residential / mixed use**

**6.316** The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and the town centre with its range of services and facilities, including employment opportunities is likely to have a positive effect. As is the re-use of previously developed land and low biodiversity value of the site. However the proposed loss of all or some employment use of the site could be considered to have a negative effect on businesses and the residents of Leek as it could lead to loss of job opportunities, this is likely to have a negative effect, as is the site's proximity to heritage assets. An applicant should be required to provide an NPPF compliant heritage statement.

**6.317** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

## **Biddulph**

### **Biddulph - Sites within current development boundary**

#### **BD004**

**6.318** The development of urban ALC land on a brownfield site is likely to have a significant positive effect, as could the site's proximity to existing areas of employment. The site should deliver a quantum of housing, circa 15 dwellings which is likely to have a positive effect. The site is located within the settlement boundary and has good accessibility to the services and facilities. However, its proximity to heritage assets would have a negative effect, as would the ecological value of the site.

**6.319** Concerns expressed by the Highway Authority raise issues about the viability of developing this site independently.

**6.320** This site was not taken forward as a preferred option for consultation in April 2016.

#### **BD016**

**6.321** The site should deliver a quantum of housing, circa 20 dwellings which is likely to have a significant positive effect, as could the location of the site with regard to its proximity to services and facilities and areas of existing employment as well as the positive effect on the landscape. The site is located within the settlement boundary and has good accessibility to health care services and facilities. However, its proximity to heritage assets would have a negative effect. The site is indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial.

**6.322** The site comprises Beehive Farm and adjacent land, enclosed by Colliers Way to the west and Tunstall Road to the east. The site was taken forward as a preferred option for consultation in April 2016.

**6.323** The site is located close to and / or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces and / or the provision of links may be required together with appropriate management via contribution to the Council's Green Infrastructure Network.

**6.324** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance.

**6.325** There are seven Grade II Listed Buildings within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that the church tower was visible from the site however due to the topography of the landscape, development would be unlikely to adversely affect its setting. Due to the large road junction and intervening buildings, development would be unlikely to cause high adverse effects to the settings of the remaining designated assets.

**6.326** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the existing development within the site does not contribute to a well-defined settlement edge, and therefore development of the site could strengthen the settlement edge.

**6.327** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

## **BD055**

**6.328** The site should deliver a quantum of housing, circa 20 dwellings which is likely to have a significant positive effect, as could the development of brownfield land indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial and proximity to services and facilities. However, the site's proximity to heritage assets is assessed as a significant negative. The site is located within the settlement boundary and has good accessibility to services and facilities and areas of existing employment. However, the site's ecological value would have a negative effect.

**6.329** The site has a planning history. Application reference SMD/2015/0684 was withdrawn. Site comprises previously developed land (formerly a school) immediately west of the junction of St John's Road and Tunstall Road and within the southern part of the land enclosed by the dismantled railway and the A527. The site was taken forward as a preferred option for consultation in April 2016 as part of the Wharf Road site (Core Strategy Broad Area 4).

**6.330** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site habitats are considered to be of nature conservation value at site level only and are not eligible for possible SBI / BAS status. However, the building on site has the potential to support bats and as such, requires further assessment. The site was also noted as potentially supporting reptiles.

**6.331** There are seven Grade II Listed Buildings within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that development would be unlikely to cause high adverse effects to the settings of the assets, however, mitigation should include screening along the southern edge of the site to reduce effects.

**6.332** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that re-development of the site could improve local landscape character.

**6.333** The site was proposed for inclusion in the July 2017 preferred option Local Plan as part of the Wharf Road site (Broad Area 4).

**BD059**

**6.334** The development of urban ALC brownfield land should have a significant positive effect, as should the preservation of the landscape and the site's proximity to existing areas of employment and services and facilities. The site is located within the settlement boundary, and away from historical assets. However, the site's ecological value would have a negative effect.

**6.335** Since the site is within the current settlement boundary a development proposal could come forward at any time and consequently the site was not taken forward as a preferred option for consultation in April 2016.

**BD101 (Yarn Mill)**

**6.336** The development of brownfield land indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial should have a significant positive effect, as should the preservation of the landscape and the site's proximity to existing areas of employment and services and facilities and the delivery of circa 24 dwellings. The site is located within the settlement boundary, and away from historical assets. However, the site's ecological value could have a negative effect.

**6.337** This site was not taken forward as a preferred option for consultation in April 2016.

**6.338** The site was suggested in representations made to the public consultation held in April 2016 and proposed for inclusion in the July 2017 preferred option Local Plan. Ecological assessment is required.

**BD102 (Minster Mill)**

**6.339** The development of brownfield land indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial should have a significant positive effect, as should the preservation of the landscape and the site's proximity to existing areas of employment and services and facilities and the delivery of circa 42 dwellings. The site is located within the settlement boundary, and away from historical assets. However, the site's ecological value could have a negative effect.

**6.340** This site was not taken forward as a preferred option for consultation in April 2016.

**6.341** The site was suggested in representations made to the public consultation held in April 2016 and proposed for inclusion in the July 2017 preferred option Local Plan. Ecological assessment is required.

**BD108**

**6.342** The development of brownfield land indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial should have a significant positive effect, as should the preservation of the landscape and the site's proximity to services and facilities. However there is scope that development of this site could have significant negative effects on historical assets. Similarly, the site's ecological value would have a negative effect.

**6.343** The site comprises previously developed land within the settlement, west of Tunstall Road and north of Roaches School and is the southern-most of the sites enclosed by the dismantled railway and the A527. The site was taken forward as a preferred option for consultation in April 2016.

**6.344** The site is located close to and / or adjoining existing areas of open space and green infrastructure. Suitable enhancements of existing open spaces and / or the provision of links may be required together with appropriate management via contribution to the Council's Green Infrastructure Network.

**6.345** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance.

**6.346** There are two Grade II Listed Buildings in the site and five additional Grade II Listed Buildings within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that the site is small and development would highly likely cause substantial adverse effects to the settings of the assets in the site. To reduce effects, mitigation should include setting development back from the assets coupled with landscape master-planning to provide screening.

**6.347** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the site is set back from the road, with screening provided by the existing trees and vegetation on the road. Development within the site would not be visually prominent, and (in combination with development of the adjacent sites) could create a stronger settlement edge.

**6.348** The site was proposed for inclusion in the July 2017 preferred option Local Plan as part of the Wharf Road site (Broad Area 4).

## **Biddulph - Urban Extension**

### **BD071, BD071A, BD106 & BD156 (Core Strategy Broad Area 4)**

**6.349** The site's proximity to services, facilities and existing areas of employment and proposed delivery of circa 265 dwellings should have a significant positive effect. However there is scope that development of this site could have negative effects due to the site's ecological value and the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as an area where less than 20% of the land is likely to be BMV.

**6.350** The area has been identified as an appropriate area for housing in the adopted Core Strategy (Area 4). The potential landscape impact of development requires further assessment.

**6.351** The sites making up the Broad Area were taken forward as a preferred option for consultation in April 2016.

**6.352** Sites BD071 and BD071a are the largest of the sites enclosed by the dismantled railway and the A527. The sites comprise Knypersley View Farm and the fields surrounding it, enclosed by the dismantled railway to the west and Colliers Way to the east. The site extends south, adjacent to the railway line, to Newpool Road where the access for the farm is located. Sites BD106 and BD156 are within the south of the land enclosed by the dismantled railway and the A527 and comprise an existing property (Levens), gardens and adjacent fields within the south-west of the settlement. The sites also include the existing access track, extending east from the property to Tunstall Road. Coal outcrops are probable within the Area.

**6.353** The Council's Extended Phase 1 Habitat Survey (2014) highlights the presence of species rich hedgerows, dense willow scrub and tall ruderal vegetation which are connected to a series of other hedgerows and habitats and form an important potentially biodiverse habitat mosaic with good connectivity and making a valuable contribution to the Biddulph Corridor as set out in the District's Strategic Green Infrastructure Network.

**6.354** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the broadleaf woodland of sites BD071 & BD071A may be of ecological value and may allow for the site to gain SBI / BAS status once the vegetation has been fully recorded and that the sites offer potential to support bats, reptiles and amphibians. The study considered the habitats of sites BD106 and BD156 to be of nature conservation value at site level only and not eligible for possible SBI / BAS status. However, the building and some trees on site have the potential to support bats and as such, requires further assessment. The sites were also noted as potentially supporting reptiles.

**6.355** There are seven Grade II Listed Buildings within the 400m buffer of sites BD071 and BD071a. The sites were considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that due to topography and surrounding vegetation, development would be unlikely to cause high adverse effects to the settings of the assets. Mitigation may include screening in the south-eastern part of the sites.

**6.356** There are seven Grade II Listed Buildings within the 400m buffer of sites BD106 and BD156. The sites were considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that development would be unlikely to cause high adverse effects to the settings of the assets. To reduce effects, mitigation should include setting development back from the assets by keeping development to the west and north of the sites as well as employing screening along the eastern edges.

**6.357** The sites BD071 and BD071a were considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that the topography within the site is undulating, and so visual prominence of the site varies. The southern extent of the site is generally screened by surrounding vegetation. Visual prominence is higher in the north of the site, where the land rises up to a ridge. Site-specific landscape mitigation measures could include additional advanced planting on the ridge and western boundary.

**6.358** The sites BD106 and BD156 were considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the sites were set back from the road and well screened by intervening vegetation and existing development. It was considered that development within the sites would not be visually prominent, and (in combination with development of the adjacent sites) could create a stronger settlement edge.

**6.359** A comprehensive masterplan should be prepared for the Broad Area to take account of its ecological value, the need to maintain linear habitat connectivity along the stream, demonstrating how development is contributing to the priorities and actions proposed for the Biddulph corridor (as set out in the Green Infrastructure Strategy) including providing access to the Biddulph Valley Way; the masterplan should also address landscape and heritage impact mitigation measures and respond to the presence of any shallow mine workings.

**6.360** The overall Core Strategy Broad Area 4 was proposed for inclusion in the July 2017 preferred option Local Plan - to be known as Wharf Road.

### **Biddulph - Other uses**

#### **BD117**

**6.361** The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. However, the greenfield nature of this site (largely indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial, but partly as an area where less than 20% of the land is likely to be BMV) and its location outside of the settlement boundary, coupled with its ecological value could have a negative effect.

**6.362** This is a large site comprising fields on the southern edge of Biddulph, east of the A527 (Tunstall Road); south of Victoria Row; and north and west of Mill Hayes Road. Residential properties and a smallholding are located on the A527 and are enclosed by the site.

**6.363** The Council's Green Belt review has recommended considering this site for release from the Green Belt if exceptional circumstances are demonstrated. The potential landscape impact of development requires further assessment. There are no designated heritage assets within the 400m buffer.

**6.364** This site was taken forward as a preferred option (housing / employment mixed-use) for consultation in April 2016.

**6.365** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has some ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However, more information is required regarding the scattered trees on site in order to establish their ecological importance.

**6.366** The Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) considered the landscape sensitivity of the site to be low in the south-west, increasing to the north-east corner of the site where sensitivity was considered to be highest. The study found that the site is large and open with high visual prominence, particularly in the north and east of the site, with long distance views available from the footpath on the northern boundary. Visual prominence is lower in the south-west of the site, south of the existing properties on the A527, where the land is enclosed by trees and hedgerows. Site-specific landscape mitigation measures could include planting within and on the edges of the development, and limits on building sizes and scale.

**6.367** The site was proposed for inclusion in the July 2017 preferred option Local Plan for residential use.

#### **BD076**

**6.368** The proposed delivery of a town centre employment site is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect. There are no designated heritage assets within the 400m buffer. The site is indicated on the predictive map of Best and Most Versatile agricultural land as within an area where less than 20% of the land is likely to be BMV.

**6.369** BD076 is within the north of the land enclosed by the dismantled railway and the A527. The site comprises the northern sections of two fields, the remainder of which are located in site BD071 and BD071a to the south. The site is enclosed by the dismantled railway (Biddulph Valley Way) to the west and previously developed land (BD076a) to the north. The site is allocated for retail / employment use in the Biddulph Town Centre Area Action Plan.

**6.370** This site was taken forward with BD076A as a preferred option (employment / retail) for consultation in April 2016.

**6.371** The site has a culverted watercourse flowing beneath it which should be re-naturalised through redevelopment. It may be possible to divert the channel round the edge of the site to maximise developable space. The site is included within an area constituting potentially biodiverse habitat mosaic with good connectivity and making a valuable contribution to the Biddulph Corridor as set out in the District's Strategic Green Infrastructure Network. Coal outcrops are probable.

**6.372** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at local and site level. However, more information is required regarding the species rich hedgerow and the presence/absence of reptiles on the site.

**6.373** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that land within the site slopes up to a ridge with an approximate north - south orientation in the centre of the site. Development on the ridge within the site could be visually prominent, particularly from the countryside to the west of Biddulph. Site-specific landscape mitigation measures could include additional advanced planting on the ridge and western boundary.

**6.374** A comprehensive masterplan should be prepared for the wider area of potential allocation that the site contributes to, to take account of its ecological value, the need to maintain linear habitat connectivity, including to re-naturalise the water course, demonstrating how development is contributing to the priorities and actions proposed for the Biddulph corridor (as set out in the Green Infrastructure Strategy) including providing access to the Biddulph Valley Way; the masterplan should also address landscape impact mitigation measures and include a response to the presence of any shallow mine workings.

**6.375** The site was proposed for inclusion with BD076A as an employment / retail allocation in the July 2017 preferred option Local Plan.

**BD076A**

**6.376** The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site is located within settlement boundary and should have good access to services and facilities which is likely to also have a significant positive effect. However the site has been assessed as having ecological value which is likely to have a negative effect. The site is indicated on the predictive map of Best and Most Versatile agricultural land as within an area where less than 20% of the land is likely to be BMV.

**6.377** BD076a is the northern-most of the sites enclosed by the dismantled railway and the A527. The site comprises previously developed land, including an existing depot, on the western edge of Biddulph. The site was taken forward with BD076 as a preferred option (employment / retail) for consultation in April 2016.

**6.378** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has some ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at local level only. However, further investigation of the presence or absence of reptiles on the site is needed.

**6.379** There are no designated heritage assets within the 400m buffer. The site is included within an area constituting potentially biodiverse habitat mosaic with good connectivity and making a valuable contribution to the Biddulph Corridor as set out in the District's Strategic Green Infrastructure Network. Coal outcrops are probable. Contamination issues are possible as this site is believed to be located above an historic landfill site.

**6.380** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that existing development within the north of the site is generally screened by the vegetation that encloses it. However, views from Colliers Way are available. In addition, limited views are available through gaps in vegetation on Wharf Road and the Biddulph Valley Way. The study considered that re-development of the site could improve local landscape character.

**6.381** A comprehensive masterplan should be prepared for the wider area of potential allocation that the site contributes to, to take account of its ecological value, the need to maintain linear habitat connectivity, demonstrating how development is contributing to the priorities and actions proposed for the Biddulph corridor (as set out in the Green Infrastructure Strategy) including providing access to the Biddulph Valley Way; the masterplan should also include landscape impact mitigation measures and a response to the presence of any shallow mine workings.

**6.382** The site was proposed for inclusion with BD076 as an employment / retail allocation in the July 2017 preferred option Local Plan.

**Biddulph - Sites within existing Green Belt****BD062**

**6.383** The proposed delivery of circa 40 dwellings should have a significant positive effect. The site is also accessible to existing services, facilities and areas of employment which is likely to have a positive effect. However, the site's ecological importance due to the potential

for protected species to be present and its connection to the wider countryside are considered to have a significant negative effect. Similarly, the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial) and the site's proximity to historic assets are also assessed as having a negative effect.

**6.384** Site is located within the north of Biddulph, east of the dismantled railway line (Biddulph Valley Way), and comprises an area of rough grassland and scrub. The site is enclosed by residential development to the south and west, and a sewage treatment works to the north-east, resulting in low visual prominence.

**6.385** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the species poor semi improved grassland, scattered scrub, dense scrub, tall ruderal vegetation are common and widespread habitats both locally and nationally and are not listed as important habitats in the Staffordshire SBI guidelines. Assessment of the two trees for their potential to support roosting bats and a reptile survey are required.

**6.386** The Council's Green Belt review has recommended considering this site for release from the Green Belt if exceptional circumstances can be demonstrated. The potential landscape and ecological impacts of development require further assessment.

**6.387** This site was taken forward as a preferred option for consultation in April 2016.

**6.388** There are three Grade II Listed Buildings within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that it is enclosed by surrounding vegetation and that there is no inter-visibility between the site and the assets; development was considered highly unlikely to adversely affect the settings of the assets.

**6.389** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. Although the adjacent settlement edge is well-defined, it is urban in character to the south of the site. The study found that existing vegetation on the north-eastern site boundaries would form a vegetated settlement edge, and considered that this vegetation should be retained and strengthened where necessary.

**6.390** The site is adjacent to United Utilities water treatment works - master-planning may be required in order to mitigate the risk of odour and noise nuisance. The Council's 2015 Phase 1 habitat survey noted that the site has potential for protected species to be present due to the mosaic of habitats and habitat structure present, especially as the site is well connected to the wider countryside. Any masterplan should also demonstrate how a development scheme will address the site's potential ecological value and contribute to the priorities and actions proposed for the Biddulph strategic GI corridor (as set out in the Green Infrastructure Strategy), including by supporting public access on to the Biddulph Valley Way.

**6.391** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **BD063A**

**6.392** The proposed delivery of circa 120 dwellings should have a significant positive effect. The site is also accessible to existing services, facilities and areas of employment which is likely to have a positive effect. However, the site's ecological value is considered

to have a negative effect. Similarly, the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial) and the site's proximity to historic assets are also assessed as having a negative effect.

**6.393** The potential landscape and heritage impacts of development require further assessment.

**6.394** The Council's Green Belt review has recommended considering a smaller variant of this site for release from the Green Belt if exceptional circumstances can be demonstrated. The capacity of the site was reduced from 120 to 40 to reflect the results of the Green Belt review and this revised site was taken forward as a preferred option for consultation in April 2016.

**6.395** The site is located north of Newpool road, and comprises a single field that slopes down from the farm track on the western boundary, to the residential development which encloses the site. The site has low visual prominence due to its topography, and screening provided by the adjacent development and a hedgerow on the western boundary.

**6.396** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered the site habitats to be of nature conservation value at site level only and not eligible for possible SBI / BAS status. However two trees on site have the potential to support bats and as such, require further assessment.

**6.397** There are seven Grade II Listed Buildings within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that the site is set behind existing development and development on the site would be highly unlikely to adversely affect the settings of the heritage assets.

**6.398** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the linear development on Meadowside does not contribute to a well-defined settlement edge, and development of the site could strengthen the settlement edge, it was recommended that the hedgerow on the western boundary should be retained in order to maintain low visual prominence, and a vegetated edge.

**6.399** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **BD064**

**6.400** The site is accessible to existing services, facilities and areas of employment which is likely to have a positive effect. However, the site's ecological value is considered to have a negative effect. Similarly, the development of greenfield land, grade 4 ALC and the site's proximity to historic assets and the ecological status of the site are also assessed as having a negative effect.

**6.401** The Council's Green Belt review has not recommended that this site is suitable to consider for release from the Green Belt.

**6.402** This site was not taken forward as a preferred option for consultation in April 2016.

#### **BD067A**

**6.403** The proposed delivery of circa 120 dwellings is considered to have a significant positive effect. The site is accessible to existing services, facilities and areas of employment and located away from historic assets is likely to have a positive effect. However, the site's ecological value is considered to have a negative effect. Similarly, the development of greenfield land, grade 4 ALC is also assessed as having a negative effect.

**6.404** The site has a culverted watercourse flowing beneath it which should be re-naturalised through re-development. The Council's Green Belt review has recommended that this site is not released from the Green Belt.

**6.405** This site was not taken forward as a preferred option for consultation in April 2016.

#### **BD067B**

**6.406** The proposed delivery of circa 150 dwellings is considered to have a significant positive effect. The site is accessible to existing services, facilities and areas of employment is likely to have a positive effect. However, the site's ecological value is considered to have a negative effect. Similarly, the development of greenfield land, grade 4 ALC and the site's proximity to heritage assets is also assessed as having a negative effect.

**6.407** The site has a culverted watercourse flowing beneath it which should be re-naturalised through re-development. The Council's Green Belt review has recommended that this site is not released from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

#### **BD067C**

**6.408** The proposed delivery of circa 120 dwellings is considered to have a significant positive effect. The site is accessible to existing services, facilities and areas of employment is likely to have a positive effect. However, the site's ecological value is considered to have a negative effect. Similarly, the development of greenfield land, grade 4 ALC and the site's proximity to heritage assets is also assessed as having a negative effect.

**6.409** The Council's Green Belt review has recommended that this site is not released from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

#### **BD068**

**6.410** The proposed delivery of circa 70 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment. The site is also accessible to existing services and facilities which is likely to have a positive effect. However, the site is partly located within a flood zone which is likely to have a significant negative effect. Similarly, the ecological value is considered to have a negative effect, as could the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial) and the site's proximity to heritage assets is also assessed as having a negative effect.

**6.411** Site is located within the north of Biddulph, south of Marshgreen Road. The site comprises fields enclosed by residential development to the north, east and south; and sewage treatment works to the west. The site is likely to be affected to some degree by flood risk; allocation will require the support of the Sequential Test and a level 2 SFRA.

**6.412** The Council's Green Belt review has recommended considering this site for release from the Green Belt if exceptional circumstances can be demonstrated. The potential landscape, heritage and ecological impacts of development require further assessment.

**6.413** The site was taken forward as a preferred option for consultation in April 2016.

**6.414** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered the site habitats to be of nature conservation value at site level only and not eligible for possible SBI / BAS status. However the tree on site has the potential to support bats and as such requires further assessment. The site was also noted as potentially supporting reptiles.

**6.415** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the site is elevated above Marshgreen Road, however it is at a similar level to the adjacent residential development on Portland Drive, and has low visual prominence due to screening provided by the surrounding development and vegetation, particularly trees surrounding the sewage works. The site was considered to form a gap in development, and therefore to fit well within the existing settlement form.

**6.416** There is one Grade II\* and eight Grade II Listed Buildings, and a Registered Park and Garden which is also a Conservation Area within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that there was no public access on to the site which is elevated above Marshgreen Road, and it is at a similar level to the adjacent residential development on Portland Drive. Development would be unlikely to cause high adverse effects to the settings of the heritage assets as development would be seen in context of the existing housing estate.

**6.417** The site is adjacent to United Utilities water treatment works - master-planning may be required in order to mitigate the risk of odour and noise nuisance. Any masterplan should also demonstrate how a development scheme will address potential ecological value, contribute to the priorities and actions proposed for the Biddulph strategic GI corridor (as set out in the Green Infrastructure Strategy), including by supporting public access on to the Biddulph Valley Way and use of natural drainage to help manage surface water.

**6.418** The site boundary requires amendment to exclude land within Flood Zone 2. The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **BD069**

**6.419** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. The site is also accessible to existing employment areas which is likely to have a positive effect. However, the site's proximity to historic assets is assessed as having a significant negative effect. The development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area where 20 - 60% of the land is likely to be BMV is also assessed as having a negative effect.

**6.420** The site formerly served as the kitchen gardens to Knypersley Hall (Listed Grade II\* ). The site is currently overgrown, however important features including protected trees and remnants of the original garden wall are present. Heritage impact assessment is required.

**6.421** This site was taken forward as a preferred option for consultation in April 2016.

**6.422** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the broadleaf woodland may be of ecological value and may allow for the site to gain SBI / BAS status once the vegetation has been fully recorded. Furthermore the site offers potential to support bats, reptiles and amphibians.

**6.423** There is one Grade II\* and one Grade II Listed Building within close proximity to the site. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that the site contributes greatly to the setting of the Grade II\* as a walled garden to the hall, which in turn, contributes to the overall significance of the asset. Development on the site was considered highly likely to cause considerable adverse effects to the setting of the Grade II\* Listed Building which would impact upon its overall significance. Further assessment may be required to demonstrate that a development can be brought forward in line with planning policy.

**6.424** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that development of the site could improve local landscape character through the removal of derelict buildings, the existing metal fencing and scrub. Site-specific landscape mitigation measures could include ensuring development is sympathetic to its original use and in keeping with the character of the adjacent cottages.

**6.425** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **BD083**

**6.426** The proposed delivery of circa 40 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. The site is also accessible to existing services and facilities which is likely to have a positive effect. However, the site is partly located within a flood zone which is likely to have a significant negative effect. The development of greenfield land, grade 4 ALC and the site's proximity to heritage assets and an LNR are assessed as having a negative effect.

**6.427** The site is likely to be affected to some degree by flood risk; allocation will require the support of the Sequential Test and a level 2 SFRA. The Council's Green Belt review has recommended that this site is not released from the Green Belt.

**6.428** This site was not taken forward as a preferred option for consultation in April 2016.

#### **BD087**

**6.429** The proposed delivery of circa 25 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment. The site is also accessible to existing services and facilities which is likely to have a positive effect. However, the site is partly located within a flood zone which is likely to have a significant negative effect. The development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial) and the site's proximity to heritage assets and an LNR is likely to have a negative effect, as could the site's ecological value.

**6.430** The site comprises land to rear of linear development on the A527, to the north of the settlement. It is likely to be affected to some degree by flood risk; allocation will require the support of the Sequential Test and a level 2 SFRA. The Council's Green Belt review has recommended that the site is considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.431** This site was taken forward as a preferred option for consultation in April 2016.

**6.432** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However more information is required regarding the presence or absence of reptiles on site.

**6.433** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the site slopes down from linear development on the A527 towards Biddulph Brook (located to the west of the site), and is visible from the opposite side of the valley. However, it was considered that development within the site would be partially screened by trees along Biddulph Brook and would be viewed against the context of the existing development.

**6.434** There are three Grade II\* and 21 Grade II Listed Buildings, one Scheduled Monument, and a Registered Park and Garden which is also a Conservation Area within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that whilst the tower of the Grade II\* listed church was visible from the site - development would be highly unlikely to adversely affect the setting of the asset. Also, due to the intervening buildings and vegetation, development would be unlikely to cause high adverse effects to the understanding of the Registered Park and Garden and Conservation Area.

**6.435** The site boundary requires amendment to exclude land within the floodplain, this is likely to reduce site yield.

**6.436** The site is close to United Utilities water treatment works - master-planning may be required in order to mitigate the risk of odour and noise nuisance. Any masterplan should also demonstrate how a development scheme will contribute to the priorities and actions proposed for the Biddulph strategic GI corridor (as set out in the Green Infrastructure Strategy), including by supporting public access on to the Biddulph Valley Way and should take account of potential ecological value.

**6.437** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **BD109 and BD118**

**6.438** The proposed delivery of circa 26 dwellings is considered to have a significant positive effect. The site is also accessible to existing services, facilities and areas of existing employment as well as being located away from historic assets and a SSSI and LNR, as well as the site's low ecological value is likely to have a positive effect. However, the development of greenfield is assessed as having a negative effect.

**6.439** The Council's Green Belt review has recommended that these sites are not released from the Green Belt. These sites were not taken forward as preferred options for consultation in April 2016.

### **BD110**

**6.440** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. The site is also accessible to existing services, facilities and areas of existing employment as well as being located away from historic assets and a SSSI and LNR, as well as the site's low ecological value is likely to have a positive effect. However, the development of greenfield land is assessed as having a negative effect.

**6.441** The Council's Green Belt review has recommended that this site is not released from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

### **BD131B**

**6.442** The proposed delivery of circa 80 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment. The site is also accessible to existing services and facilities which is likely to have a positive effect. The development of greenfield land is assessed as having a negative effect, as could the site's proximity to historic assets.

**6.443** The Council's Green Belt review has recommended considering this site for release from the Green Belt if exceptional circumstances can be demonstrated. It is understood that this site is not currently available.

**6.444** This site was not taken forward as a preferred option for consultation in April 2016.

### **BD134**

**6.445** The proposed delivery of circa 40 dwellings is considered to have a significant positive effect. The site is also accessible to existing services, facilities and existing areas of employment is likely to have a positive effect, as could its distance away from historic assets. However, the development of greenfield land, grade 4 ALC is assessed as having a negative effect, as could the ecological value of the site.

**6.446** The Council's Green Belt review has recommended that this site is not released from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

### **BD138A**

**6.447** The proposed delivery of circa 90 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment. The site is also accessible to existing services and facilities is likely to have a positive effect, as could its low biodiversity value of the site. However, the development of greenfield land, grade 4 ALC is assessed as having a negative effect, as could the site's location near to historic assets.

**6.448** The site lies within the area considered as important landscape setting to settlement. The Council's Green Belt review has recommended that this site is not released from the Green Belt.

**6.449** This site was not taken forward as a preferred option for consultation in April 2016.

**BD138B**

**6.450** The proposed delivery of circa 76 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment. The site is also accessible to existing services and facilities is likely to have a positive effect. However, the development of greenfield land, grade 4 ALC is assessed as having a negative effect, as could the site's location near to historic assets and the ecological value of the site.

**6.451** The site lies within the area considered as important landscape setting to settlement. The Council's Green Belt review has recommended that this site is not released from the Green Belt.

**6.452** This site was not taken forward as a preferred option for consultation in April 2016.

**BD144**

**6.453** The proposed delivery of circa 80 dwellings is considered to have a significant positive effect. The site is also accessible to existing services, facilities and existing areas of employment is likely to have a positive effect, as could the site's distance away from historic assets. However, the development of greenfield land is assessed as having a negative effect, as could the site's ecological value.

**6.454** The Council's Green Belt review has not recommended releasing this site from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

**Biddulph - Additional sites****ADD02**

**6.455** The proposed delivery of circa 159 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. The site's location away from designated and historic assets is likely to have a positive effect. However, the site's inaccessibility to services and facilities is likely to have a negative effect, as could the development of greenfield, grade 4 ALC land.

**6.456** The Council's Green Belt review has not recommended releasing this site from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

**ADD03**

**6.457** The proposed delivery of circa 372 dwellings is considered to have a significant positive effect. The site's location away from designated assets is likely to have a positive effect, as could the site's accessibility to services, facilities and areas of existing employment. However, the site's proximity to historic assets is likely to have a significant negative effect. The development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as largely within an area where 20 - 60% of the land is likely to be BMV is considered to have a negative effect.

**6.458** This is a large site on the western edge of Biddulph, comprising agricultural land and two farmsteads (Moodystreet Farm and Hollylane) and sheds, enclosed by Akemoor Lane to the west. According to information held by the Environment Agency, this site is located above historic landfill sites.

**6.459** The Council's Green Belt review has recommended considering this site for release from the Green Belt if exceptional circumstances can be demonstrated. The potential landscape impacts of development require further assessment.

**6.460** This site was taken forward as a preferred option for consultation in April 2016.

**6.461** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the habitats on site were considered to be of nature conservation value at the site level only and are not listed as an important habitat in the Staffordshire SBI guidelines. However further surveys are recommended of the semi-natural broadleaved woodland present along the brook as this could qualify as an SBI under the Staffordshire guidelines. Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site significantly supported any notable protected species.

**6.462** There is one Grade II Listed Building within the site. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that the setting of the asset contributes to the overall significance of it and would need special regard for its preservation. It was considered that development would be highly likely to cause adverse effects to its setting and that any development should be restricted to the southern part of the site only with mitigation measures including the use of vegetation screening.

**6.463** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of high landscape sensitivity. The study found that the site is located beyond the dismantled railway (Biddulph Valley Way) which currently forms a strong, vegetated settlement edge and limit to development and that the site is inter-visible with the Green Belt to the west. It was considered that development within the site could encroach on the surrounding countryside, and adversely affect the existing settlement edge. Development of the site could potentially compromise the surrounding sensitive countryside, as there would be no clear limit to development beyond the site.

**6.464** Masterplanning should be used to demonstrate how a development scheme could be accommodated in the light of heritage and landscape impacts identified and to contribute to the priorities and actions proposed for the Biddulph strategic GI corridor (as set out in the Green Infrastructure Strategy), including by supporting public access on to the Biddulph Valley Way. A masterplan should also take account of the potential ecological value of the site.

**6.465** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **ADD04**

**6.466** The proposed delivery of circa 1,070 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. However, the site's proximity to historic assets is likely to have a significant negative effect. The development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as partly within an area where 20 - 60% of the land is likely to be BMV is assessed as having a negative effect.

**6.467** The site is adjacent to Knypersley Hall (Grade II\* Listed). The site comprises land to the west and south of Knypersley Hall, including a large, open field which slopes down from the hall in the north of the site, and more undulating land in the south of the site

containing a pond and scattered trees. The southern part of the site is adjacent to a Local Geological / Geomorphological Site (LoGS). The presence of school playing fields and other recreational features would need to be addressed. Heritage and landscape impact assessments are required.

**6.468** The Council's Green Belt review has recommended considering this site for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.469** This site was taken forward as a preferred option for consultation in April 2016.

**6.470** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the improved grassland and species-poor hedgerow habitats on site were of nature conservation value at the site level only. Species recorded on site were common and widespread both at a county and national level. However scattered mature trees in the northern area of the site, as well as pond 1, may qualify for SBI or BAS status dependent on further survey. The trees should be further assessed to determine whether they may be considered 'veteran'. Assessment is required to determine the presence or absence of bats roosts and the pond should be surveyed for newts.

**6.471** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of high landscape sensitivity. The study found that the site is separated from the settlement edge by Knypersley Hall and agricultural land to the north. It was considered that development of the site could adversely affect the existing settlement form, particularly in the southern extent of the site; and that the northern section of the site has high visual prominence, particularly when viewed from Tunstall Road.

**6.472** There is one Grade II\* and one Grade II Listed Building within close proximity to the site. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which considered that the site could not be developed without substantial heritage impacts that could not be reasonably mitigated. The study found that the site contributes greatly to the setting of the Grade II\* as a remnant of the parkland, which in turn, contributes to the overall significance of the asset. It was considered that development on the site would highly likely cause substantial adverse effects to the setting of the Grade II\* Listed Building which would impact upon its overall significance.

**6.473** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

### **Additional sites appraised following April 2016 consultation**

#### **BD143 ("Victoria Colliery"; west of Victoria Business Park)**

**6.474** The proposed delivery of circa 100 dwellings should have a significant positive effect. The site is also accessible to areas of employment which is likely to have a positive effect. However, the greenfield nature of this site and its location outside of the settlement boundary, coupled with its potential ecological value and relationship to the Biddulph Valley Way could have a negative effect. The development of land indicated on the predictive map of Best and Most Versatile agricultural land as within an area where 20 - 60% of the land is likely to be BMV is also assessed as having a negative effect.

**6.475** The Council's Green Belt review has recommended considering this site for release from the Green Belt if exceptional circumstances can be demonstrated. Landscape and heritage assessments are required.

**6.476** The site was not proposed for inclusion in the July 2017 version preferred option Local Plan.

**Land at BD116 and a small part of BD140 (Land west of BVW and east of Woodside Farm)**

**6.477** The site's proximity to services, facilities and existing areas of employment and proposed delivery of circa 170 dwellings should have a significant positive effect. However there is scope that development of this site could have negative effects due to the site's potential ecological value, its contribution to the Biddulph Valley Way and impacts on landscape character. The development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area where less than 20% of the land is likely to be BMV is assessed as having a negative effect.

**6.478** The Council's Green Belt review has recommended considering this site for release from the Green Belt if exceptional circumstances can be demonstrated. Landscape and heritage assessments are required.

**6.479** There are potential mining legacy issues as the land has previously been used for open cast mining. Masterplanning should be used to demonstrate how a development scheme could contribute to the priorities and actions proposed for the Biddulph strategic GI corridor (as set out in the Green Infrastructure Strategy), including by supporting public access on to the Biddulph Valley Way.

**6.480** The site was proposed for inclusion in the July 2017 preferred option Local Plan as part of the Wharf Road site (Broad Area 4).

**BD011 (Land at rear Meadowstile Caravan Park)**

**6.481** The proposed delivery of circa 80 dwellings should have a significant positive effect. The site is also accessible to areas of employment which is likely to have a positive effect. However, the greenfield nature of this site indicated on the predictive map of Best and Most Versatile agricultural land as within an area where 20 - 60% of the land is likely to be BMV and its location outside of the settlement boundary, coupled with its potential ecological value could have a negative effect.

**6.482** Landscape and heritage assessments are required.

**6.483** The site was not proposed for inclusion in the July 2017 version preferred option Local Plan.

**BD138c (Marsh Green Nursery)**

**6.484** The proposed delivery of circa 85 dwellings should have a significant positive effect. The site is also accessible to existing services, facilities and areas of employment which is likely to have a positive effect. However, the site's location in the wider countryside and important landscape setting to the settlement are considered to have a significant negative effect. The site is within land indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial.

**6.485** The Council's Green Belt review recommended the site could be considered for release under Exceptional Circumstances. Landscape and heritage assessments are required.

**6.486** The site was not proposed for inclusion in the July 2017 version preferred option Local Plan.

#### **BD104 (Land between Meadows Way and Tunstall Road)**

**6.487** The site should deliver a quantum of housing, circa 10 dwellings which is likely to have a significant positive effect, as could the location of the site with regard to its proximity to services and facilities and areas of existing employment as well as the positive effect on the landscape. The site is located within the settlement boundary and has good accessibility to health care services and facilities. However, its proximity to heritage assets would have a negative effect.

**6.488** This is an elevated site in a prominent location immediately adjacent to a roundabout and between the bypass and Tunstall Road. Mainly grass with some trees. The site is within 400m of seven grade II listed assets. Ecological and heritage impact assessments are required.

**6.489** The site was proposed for inclusion in the July 2017 preferred option Local Plan as part of the Wharf Road site (Broad Area 4).

### **Additional sites appraised following July 2017 consultation**

#### **Land at Coppice Wood**

**6.490** The proposed delivery of circa 4 dwellings is considered to have a positive effect. The site is also accessible to existing services, facilities and existing areas of employment and this is also likely to have a positive effect, as could its distance away from heritage assets. However, the development of greenfield land, indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be BMV, located within Green Belt and within the important landscape setting to the settlement is assessed as having a negative effect. Similarly the site is part of the linear woodland proposed as Local Green Space 18 (Braddocks Hay) and as such is part of an important wildlife corridor into the surrounding countryside and this is also likely to have a negative effect. Ecological and landscape impact assessments are required.

**6.491** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

#### **Land at Newpool Farm (west of BD063a)**

**6.492** The proposed delivery of circa 240 dwellings should have a significant positive effect. The site is also accessible to existing services, facilities and areas of employment which is likely to have positive effects. Similarly the location of the site, outside flood zones 2 and 3 and close to the open countryside and walking and cycling routes are also likely to lead to positive effects. However, the site's potential ecological value and contribution to Green Infrastructure is considered likely to have a negative effect, further ecological survey is required. Similarly, the development of greenfield land, partly indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be BMV is likely to have a negative effect, landscape impact assessment is required. The Council's Green Belt study indicated that BD063a may be suitable for release from the Green Belt if exceptional circumstances can be demonstrated. The site's proximity to historic assets are also assessed as having a negative effect, an applicant should be required to provide an NPPF compliant heritage statement.

**6.493** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

## **Cheadle**

### **Cheadle - sites within the current development boundary**

#### **CH002A**

**6.494** The proposed delivery of circa 26 dwellings is considered to have a significant positive effect, as could the site's proximity to health care services and facilities and areas of existing employment. Similarly, the site's distance away from historic assets is likely to have a positive effect. However, the site is partly within flood zone 2 and 3 which is likely to have a significant negative effect, as could the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial and the site's proximity to designated assets.

**6.495** The site comprises a small field on the eastern edge of the settlement that (in combination with CH002b to the east) forms a gap in development. The site is likely to be affected to some degree by flood risk; allocation will require the support of the Sequential Test and a level 2 SFRA. Cecilly Brook holds a strong isolated population of water voles, as a protected species their habitat must be maintained. There are no designated heritage assets within the 400m buffer.

**6.496** The site was taken forward as a preferred option for consultation in April 2016.

**6.497** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has some potential to support protected species and further surveys are also recommended for the scattered trees. The site habitats are considered to be of nature conservation value at district level. Further surveys are recommended to confirm the presence or absence of reptiles in the in the south-west area of the site due to the presence of scattered scrub and good connectivity with Cecilly Brook.

**6.498** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The site boundary requires amendment to exclude land within the floodplain. The creation of a buffer zone between the site and Cecily Brook Local Nature Reserve should be considered. There is opportunity to contribute to the Green Infrastructure Network.

**6.499** Master-planning will be required in order to manage impact on the Local Nature Reserve and to ensure impacts on biodiversity are minimised (and net gains in biodiversity provided where possible). A masterplan should also demonstrate how a development scheme could contribute to the priorities and actions proposed for the Cecilly Brook strategic GI corridor (as set out in the Green Infrastructure Strategy), including by establishing coherent ecological networks that are more resilient to current and future pressures, as well as enabling water quality improvements in line with the Water Framework Directive objectives. The potential to accommodate SuDS should be considered to both manage any residual flood risk and help deliver the water quality improvements.

**6.500** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

**CH002B**

**6.501** The proposed delivery of circa 42 dwellings is considered to have a significant positive effect, as could the site's proximity to services and facilities and areas of existing employment. Similarly, the site's distance away from historic assets is likely to have a positive effect. However, the site's proximity to a designated asset and the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial is likely to have a significant negative effect.

**6.502** The site comprises a small field containing Moor Lane Farm on the eastern edge of the settlement that (in combination with CH002a to the west) forms a gap in development. There are no designated heritage assets within the 400m buffer. This site was taken forward as a preferred option for consultation in April 2016.

**6.503** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site generally has low biodiversity but its good connectivity to a stream and surrounding habitats deem the site to be of district importance for its potential to support protected species. The site habitats are considered to be of district importance. Further surveys are recommended to confirm the presence of reptiles and assess the importance of the species-rich hedgerows.

**6.504** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. There is opportunity to contribute to the Green Infrastructure Network.

**6.505** Master-planning will be required in order to manage impact on the Local Nature Reserves and to ensure impacts on biodiversity are minimised (and net gains in biodiversity provided where possible). A masterplan should also demonstrate how a development scheme could contribute to the priorities and actions proposed for the Cecilly Brook strategic GI corridor (as set out in the Green Infrastructure Strategy), including by establishing coherent ecological networks that are more resilient to current and future pressures, as well as enabling water quality improvements in line with the Water Framework Directive objectives. The potential to accommodate SuDS should be considered to help deliver the water quality improvements.

**6.506** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

**CH003**

**6.507** The proposed delivery of circa 55 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. Similarly, the site's distance away from historic assets is likely to have a positive effect. However, the site is partly within a flood zone which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as could the site's ecological value.

**6.508** The site has been granted outline planning permission for up to 43 dwellings SMD/2014/0655.

#### CH004

**6.509** The proposed delivery of circa 45 dwellings is considered to have a significant positive effect. Similarly, the site's distance away from historic assets is likely to have a positive effect as could the accessibility to services, facilities and areas of existing employment. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial is assessed as having a significant negative effect. The ecological value of the site is likely to have a negative effect.

**6.510** A single field within the north of the settlement enclosed by residential development, north of the play area on Thorpe Rise. There are no designated heritage assets within the 400m buffer. This site was taken forward as a preferred option for consultation in April 2016.

**6.511** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site generally has low ecological value in its potential to support protected species. Most of the site habitats are considered to be of nature conservation value at local level only. However the species-rich hedgerow was assessed as being potentially meeting BAS / SBI status.

**6.512** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity.

**6.513** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

#### CH006

**6.514** The proposed delivery of circa 45 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment. Similarly, the site's distance away from historic assets is likely to have a positive effect as could the accessibility to services and facilities. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect, as could the site's partial location within a flood zone and proximity to a designated asset.

**6.515** The site is likely to be affected to some degree by flood risk. Cecilly Brook holds a strong, isolated population of water voles, as a protected species their habitat must be maintained. The site includes a farmhouse that is a possible non-designated heritage asset.

**6.516** Full planning permission has been granted for 36 dwellings SMD/2015/0050.

#### CH009

**6.517** The site's accessibility to services, facilities and areas of existing employment is considered to have a significant positive effect. Similarly, the proposed delivery of circa 16 dwellings is likely to have a positive effect. However, the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial) is assessed as having a significant negative effect, as could the site's proximity to designated assets. The site's proximity to historic assets is also likely to have a negative effect.

**6.518** The site is located to the east of Churchill Road within the north of the settlement, and comprises Orchard Farm and adjacent land. The public footpath crossing the site (Public Right of Way Cheadle 38) will need to be retained. There is opportunity to contribute to the Green Infrastructure Network. This site was taken forward as a preferred option for consultation in April 2016.

**6.519** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has potential to support protected species. Further surveys are recommended to assess the importance of the species-rich hedgerows and the potential for bat roosts.

**6.520** There are three Grade II Listed Buildings and one Conservation Area within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which considered that due to the intervening buildings as well as vegetation between the assets and the site, development would be highly unlikely to adversely affect the settings of the heritage assets.

**6.521** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity.

**6.522** Master-planning will be required in order to manage impact on the Local Nature Reserve and to ensure impacts on biodiversity are minimised (and net gains in biodiversity provided where possible). A masterplan should also demonstrate how a development scheme could contribute to the priorities and actions proposed for the Cecilly Brook strategic GI corridor (as set out in the Green Infrastructure Strategy), including by establishing coherent ecological networks that are more resilient to current and future pressures, as well as enabling water quality improvements in line with the Water Framework Directive objectives. The potential to accommodate SuDS should be considered to help deliver the water quality improvements.

**6.523** The site was not proposed for inclusion in the July 2017 version preferred option Local Plan.

### **CH013**

**6.524** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area where 20 - 60% of the land is likely to be BMV is assessed as having a negative effect, as could the ecological value of the site and its proximity to historic assets.

**6.525** An outline planning application has a resolution for approval, subject to S106 agreement (SMD/2015/0438). This site was taken forward as a preferred option for consultation in April 2016.

**6.526** The site was proposed to be carried forward into the July 2017 preferred option Local Plan with outline planning permission pending.

## CH015

**6.527** The proposed delivery of circa 32 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect, as could the development of brownfield land indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial. However, the ecological value of the site and its proximity to a LNR, candidate AQMA and historic assets is likely to have a negative effect.

**6.528** Previously developed land within the centre of the settlement, east of Leek Road. This site was taken forward as a preferred option for consultation in April 2016.

**6.529** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has potential for protected species. Further surveys are recommended to confirm the presence of roosting bats in the buildings and trees; a tree survey is also required.

**6.530** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity.

**6.531** There are 22 Grade II Listed Buildings and one Conservation Area within the 400m buffer. The site consists of previously developed land including a depot, and is adjacent to the Conservation Area and opposite two Grade II Listed Buildings. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that the present site does not contribute to the setting of the heritage assets and appropriate development could enhance the frontage with sensitive design.

**6.532** The site is located within Ground Water Source Protection Zone 2 and partially within Ground Water Source Protection Zone 1. Due to the nature of the previous use of the site there is a risk of contamination that will need to be addressed.

**6.533** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

## CH020

**6.534** The proposed delivery of circa 42 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect, as could its location away from historic assets. However, the site is partly within a flood zone which is likely to have a significant negative effect. The ecological value of the site is also likely to have a negative effect. The site is indicated on the predictive map of Best and Most Versatile agricultural land as within an area where 20 - 60% of the land is likely to be BMV.

**6.535** Previously developed land (including a residential property) and rough grassland within the west of Cheadle, north of the A521 and the Brookhouses industrial estate. There are no designated heritage assets within the 400m buffer.

**6.536** The site is likely to be affected to some degree by flood risk; allocation will require the support of the Sequential Test and a level 2 SFRA. This site was taken forward as a preferred option for consultation in April 2016 with a revised site boundary to exclude land within the floodplain.

**6.537** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that most of the site habitats are common throughout the region and not considered eligible for BAS / SBI status. However the ruderal vegetation could be eligible for BAS status subject to further work. Surveys are recommended to confirm the presence of roosting bats, reptiles and to assess the scattered trees.

**6.538** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. Due to the nature of the previous use of the site there is a risk of contamination that will need to be addressed.

**6.539** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

#### **CH024**

**6.540** The proposed delivery of circa 45 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial) and its partial location within a flood zone are assessed as having a significant negative effect. The ecological value of the site, its location near to a LNR, and its proximity to heritage assets are also assessed as negative effects.

**6.541** Site comprises a field within the north of the settlement, east of Orchard Farm, south-east of the recreation ground and west of Cecily Brook. The public footpath crossing the site (Public Right of Way Cheadle 38) will need to be retained. The site is likely to be affected to some degree by flood risk; allocation will require the support of the Sequential Test and a level 2 SFRA. Cecilly Brook holds a strong, isolated population of water voles, as a protected species their habitat must be maintained.

**6.542** This site was taken forward as a preferred option for consultation in April 2016 with a revised site boundary to exclude land within the floodplain.

**6.543** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that most of the site habitats are common throughout the region and not considered eligible for BAS / SBI status. However the ruderal vegetation is considered eligible for BAS status and further surveys are recommended to confirm the presence of reptiles. The site has potential for protected species to be present mainly due to the close proximity of the mosaic of stream habitats and good connectivity to Cecily Brook Local Nature Reserve and the wider countryside. Contribution to the emerging strategic Green Infrastructure network should be considered.

**6.544** There are three Grade II Listed Buildings and one Conservation Area within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that due to the buildings as well as vegetation between the assets and the site, it is considered that development would be highly unlikely to adversely affect the settings of the heritage assets.

**6.545** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity.

**6.546** Master-planning will be required in order to manage impact on the Local Nature Reserves and to ensure impacts on biodiversity are minimised (and net gains in biodiversity provided where possible). A masterplan should also demonstrate how a development scheme

could contribute to the priorities and actions proposed for the Cecilly Brook strategic GI corridor (as set out in the Green Infrastructure Strategy), including by establishing coherent ecological networks that are more resilient to current and future pressures, as well as enabling water quality improvements in line with the Water Framework Directive objectives. The potential to accommodate SuDS should be considered to help manage any residual flood risk and to deliver water quality improvements.

**6.547** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

#### **Urban Extension: Core Strategy Broad Area 1 - CH001**

**6.548** The proposed delivery of circa 240 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect. Similarly, the site's location away from historic assets is likely to have a positive effect. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as partly within an area where 20 - 60% of the land is likely to be BMV is assessed as having a significant negative effect.

**6.549** This is a large site located to the north of the settlement, east of Froghall Road. The site is enclosed by existing development to the north, west and south, and is open to the east. Therefore the site forms a large gap in existing development within Cheadle. The area has been identified as an appropriate area for housing in the adopted Core Strategy (Area 1). A small section to the east of the site is located in Flood Zone 3 and the site is likely to be affected to some degree by flood risk. Cecilly Brook holds a strong, isolated population of water voles, as a protected species their habitat must be maintained. The road frontage to the site affects the setting of Woodhead Yard, which is a non-designated heritage asset. A former mid-19th century historic tramline crosses the site. Landscape and heritage impact assessments are required.

**6.550** This site was taken forward as a preferred option for consultation in April 2016 with a revised site boundary to exclude land within the floodplain.

**6.551** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site generally has some ecological value in its potential to support protected species. The scattered trees are considered to be of nature conservation value at district level.

**6.552** There are no designated heritage assets within the 400m buffer. However the site has a mining legacy and the presence of disused mine shafts need to be addressed.

**6.553** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that the western extent of the site is enclosed with low visual prominence and that visual prominence increases to the east as the site becomes more open and slopes down to Cecily Brook. Site-specific landscape mitigation measures could include setting development back from the lower ground in the eastern corner of the site and advanced planting on the eastern boundary.

**6.554** The tramway route should be used to help inform a master-planning process which should also include landscape mitigation measures and respond to the presence of disused mine shafts. A master-plan should also demonstrate how the site's relationship with the Local Nature Reserves have been addressed to ensure impacts on biodiversity are minimised

(and net gains in biodiversity provided where possible). A masterplan should also demonstrate how a development scheme could contribute to the priorities and actions proposed for the Cecilly Brook strategic GI corridor (as set out in the Green Infrastructure Strategy), including by establishing coherent ecological networks that are more resilient to current and future pressures, as well as enabling water quality improvements in line with the Water Framework Directive objectives. The potential to accommodate SuDS should be considered to help manage any residual flood risk and to deliver water quality improvements.

**6.555** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

### Other uses

#### Core Strategy Broad Area EM1 (CH127)

**6.556** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the accessibility of other services and facilities and its location away from historic assets is likely to have a positive effect. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area where over 60% of the land is likely to be BMV and its partial location within a flood zone are likely to have a negative effect as could the ecological value of the site.

**6.557** The site comprises a large field south of existing industrial development, which slopes down from New Haden Road to a stream on the northern site boundary. The area has been identified as an appropriate area for employment in the adopted Core Strategy (Area EM1). A small area to the east of the site adjacent to the Brook is located in Flood Zone 2, the site is likely to be affected to some degree by flood risk. There are no designated heritage assets within the 400m buffer.

**6.558** This site was taken forward as a preferred option for consultation in April 2016 with a revised boundary to exclude areas of floodplain.

**6.559** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that most of the site habitats are common throughout the region and not considered eligible for BAS / SBI status. However the two scattered trees present could support roosting bats and be eligible for BAS status subject to further survey.

**6.560** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that the site is open, however the land continues to rise to the south, screening longer distance views from this direction. Tree planting and vegetation on the site boundaries and within adjacent land reduces visual prominence. Views of the site from the north would be seen in the context of the adjacent industrial development. Site-specific landscape mitigation measures could include additional advanced planting on the site boundaries and limiting building heights.

**6.561** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

### **Core Strategy Broad Area EM2 - CH019**

**6.562** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the low ecological value of the site, the development of brownfield land (although indicated on the predictive map of Best and Most Versatile agricultural land as partly within an area where less than 20%, and partly within an area where greater than 60% of the land is likely to be BMV) and its location away from historic assets is likely to have a positive effect.

**6.563** Previously developed site (comprising a recycling yard on disused opencast workings) on the western edge of Cheadle, behind Hillside Industrial Park off Draycott Cross Road. The area has been identified as an appropriate area for employment in the adopted Core Strategy (Area EM2). There are no designated heritage assets within the 400m buffer.

**6.564** This site was taken forward as a preferred option for consultation in April 2016.

**6.565** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site generally has low ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. Further surveys are recommended to confirm the presence or absence of Great Crested Newts in the pond present within 250m of the site.

**6.566** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the site is located at the bottom of a valley, with land rising to the south and north, and is enclosed by thick tree belts and hedgerows. The site was considered to have low visual prominence.

**6.567** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

### **CH143**

**6.568** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, its location away from historic assets is likely to have a positive effect as could its accessibility to services and facilities. However, the development of greenfield, grade 4 ALC land is likely to have a negative effect as could the ecological value of the site.

**6.569** Outline planning permission has been granted for this site, SMD/2014/0655.

### **Cheadle - Sites outside the current development boundary**

#### **CH073A**

**6.570** The proposed delivery of circa 90 dwellings is considered to have a significant positive effect, as could the accessibility to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect. The ecological value of the site and its location near to a LNR and historic assets is likely to have a negative effect.

**6.571** The site forms part of the setting of Hales Hall (Grade II\* listed) and its medieval fish pond. Landscape and heritage impact assessments are required; along with an assessment of potential impacts on Hales Hall Pool Local Nature Reserve and the District's Green Infrastructure network.

**6.572** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH073B**

**6.573** The proposed delivery of circa 114 dwellings is considered to have a significant positive effect, as could the accessibility to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect as could its location away from historic assets. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect, as could the site's proximity to designated assets.

**6.574** Landscape impact assessment is required; along with an assessment of potential impacts on Cecilly Brook LNR and the District's Green Infrastructure network.

**6.575** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH073C**

**6.576** The proposed delivery of circa 90 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect as could its location away from historic assets. However, the development of greenfield, grade 3 ALC land and proximity to designated assets is assessed as having a significant negative effect. The site's inaccessibility to areas of existing employment is likely to have a negative effect.

**6.577** Landscape impact assessment is required; along with an assessment of potential impacts on Hales Hall Pool LNR and the District's Green Infrastructure network.

**6.578** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH073D**

**6.579** The proposed delivery of circa 77 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect as could its location away from historic assets. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect. The site's location near to a LNR is likely to have a negative effect.

**6.580** The site is adjacent to ancient woodland. Landscape impact assessment is required; along with an assessment of potential impacts on Cecilly Brook LNR and the District's Green Infrastructure network.

**6.581** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH073E**

**6.582** The proposed delivery of circa 140 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect as could its location away from historic assets. However, the development of

greenfield, grade 3 ALC land is assessed as having a significant negative effect as could the remote nature of this site within the open countryside. The site's inaccessibility to areas of existing employment and proximity to designated assets is likely to have a negative effect.

**6.583** The site is adjacent to ancient woodland. Landscape impact assessment is required; along with an assessment of potential impacts on Hales Hall Pool and Cecilly Brook LNRs, as well as the District's Green Infrastructure network.

**6.584** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH075A**

**6.585** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect as could its location away from historic assets. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect, as could the site's location near to a Local Nature Reserve.

**6.586** The site lies within the area considered to form an important landscape setting to the settlement. Landscape impact assessment is required; along with an assessment of potential impacts on Cecilly Brook LNR.

**6.587** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH075B**

**6.588** The proposed delivery of circa 60 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect as could its location away from historic assets. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect, as could the site's proximity to designated assets. The site's inaccessibility to areas of existing employment is likely to have a negative effect.

**6.589** The site lies within the area considered to form an important landscape setting to the settlement. Landscape impact assessment is required; along with an assessment of potential impacts on Cecilly Brook LNR.

**6.590** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH075C**

**6.591** The proposed delivery of circa 125 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land and the site's proximity to designated assets is assessed as having a significant negative effect. The site's inaccessibility to areas of existing employment is likely to have a negative effect.

**6.592** The site lies within the area considered to form an important landscape setting to the settlement. Landscape impact assessment is required; along with an assessment of potential impacts on Cecilly Brook LNR as well as the District's Green Infrastructure network.

**6.593** This site was not taken forward as a preferred option for consultation in April 2016.

**CH075D**

**6.594** The proposed delivery of circa 45 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land and proximity to designated assets is assessed as having significant negative effects.

**6.595** The site lies within the area considered to form an important landscape setting to the settlement. Landscape impact assessment is required; along with an assessment of potential impacts on Cecilly Brook LNR as well as the District's Green Infrastructure network.

**6.596** This site was not taken forward as a preferred option for consultation in April 2016.

**CH076A**

**6.597** The proposed delivery of circa 100 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect as could the site's partial location within flood zone 2 and 3. The site's location near to designated and historic assets and the inaccessibility of areas of existing employment is likely to have a negative effect.

**6.598** Part of the site is located within a flood zone 3 area and may be subject to risk from flooding. The site lies within the area considered to form an important landscape setting to the settlement and is within 75m of Mill House (grade II\* listed). Landscape and heritage impact assessments are required; along with an assessment of potential impacts on Cecilly Brook LNR as well as the District's Green Infrastructure network.

**6.599** This site was not taken forward as a preferred option for consultation in April 2016.

**CH076B**

**6.600** The proposed delivery of circa 110 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect as could the site's partial location within flood zone 2 and 3. The site's location near to a Local Nature Reserve and historic assets is likely to have a negative effect, as could the inaccessibility of areas of existing employment.

**6.601** Part of the site is located within a flood zone 3 area and may be subject to risk from flooding. The site lies within the area considered to form an important landscape setting to the settlement and is within 400m of Mill House (grade II\* listed). Landscape and heritage impact assessments are required; along with an assessment of potential impacts on Cecilly Brook LNR as well as the District's Green Infrastructure network.

**6.602** This site was not taken forward as a preferred option for consultation in April 2016.

**CH077A**

**6.603** The proposed delivery of circa 100 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect as could the site's partial location within flood zone 2 and

3 and proximity to historic assets. Additionally, the site has ecological value and may have potential for classification as a Site of Biological Importance which has a significant negative effect. The inaccessibility of areas of existing employment is likely to have a negative effect.

**6.604** Part of the site is located within a flood zone 3 area and may be subject to risk from flooding. The site lies within the area considered to form an important landscape setting to the settlement and is adjacent to Mill House (grade II\* listed). Landscape, ecology and heritage impact assessments are required; along with an assessment of potential impacts on Cecilly Brook LNR as well as the District's Green Infrastructure network.

**6.605** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH077B**

**6.606** The proposed delivery of circa 105 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to health care services and facilities is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect as could the site's partial location within flood zone 2 and 3. Additionally, the site has ecological value and may have potential for classification as a Site of Biological Importance which has a significant negative effect. The site's location near to historic assets is likely to have a negative effect, as could the inaccessibility of areas of existing employment.

**6.607** Part of the site is located within a flood zone 3 area and may be subject to risk from flooding. The site lies within the area considered to form an important landscape setting to the settlement and forms part of the rural setting of Mill House (grade II\* listed). Landscape, ecology and heritage impact assessments are required; along with an assessment of potential impacts on Cecilly Brook LNR as well as the District's Green Infrastructure network.

**6.608** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH080**

**6.609** The proposed delivery of circa 80 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to health care services and facilities and areas of existing employment is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect as could the site's partial location within flood zone 2 and 3. The site's location near to a Local Nature Reserve and historic assets is likely to have a negative effect.

**6.610** Part of the site is located within a flood zone 3 area and may be subject to risk from flooding. The site is within 400m of Hales Hall (grade II listed). Landscape and heritage impact assessments are required; along with an assessment of potential impacts on Hales Hall Pool LNR as well as the District's Green Infrastructure network.

**6.611** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH081**

**6.612** The proposed delivery of circa 110 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. Similarly, the site's accessibility to health care services and facilities is likely to have a positive effect.

However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect as could the site's partial location within flood zone 2 and 3. The site's location near to a Local Nature Reserve and historic assets and its ecological value is likely to have a negative effect.

**6.613** Part of the site is located within a flood zone 3 area and may be subject to risk from flooding. Cecilly Brook holds a strong, isolated population of water voles, their habitat must be maintained. The site is also within 200m of Hales Hall Pool LNR and 400m of Hales Hall (grade II listed). Landscape and heritage impact assessments are required; along with an assessment of potential impacts on the Nature Reserves as well as the District's Green Infrastructure network.

**6.614** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH085A**

**6.615** The proposed delivery of circa 150 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect, as could the site's location away from historic assets. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as predominantly within an area where 20 - 60% of the land is likely to be BMV is assessed as having a significant negative effect as could part of the site's location within flood zone 2. The site's ecological value is likely to have a negative effect.

**6.616** Site comprises fields on the south-western edge of the settlement, sloping down from the settlement edge. There are no designated heritage assets within the 400m buffer. The western edge of the site is within an area of flood zone and the site is likely to be affected to some degree by flood risk. Support of the sequential test and a Level 2 SFRA are needed. A landscape impact assessment is also required.

**6.617** This site was taken forward as a preferred option for consultation in April 2016 with an amended site boundary to exclude areas of flood risk.

**6.618** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that most of the site habitats are common throughout the region and not considered eligible for BAS / SBI status. However the two scattered trees present could support roosting bats and be eligible for BAS status subject to further survey.

**6.619** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that while the site is open, long distance views are screened by the railway embankment located to the north and west of the site. Site-specific landscape mitigation measures could include limiting building heights and planting in the south west of the site.

**6.620** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

#### **CH085B**

**6.621** The proposed delivery of circa 80 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to health care services and facilities and areas of existing employment is likely to have a positive effect, as could the site's location away from historic assets. However, the development of greenfield land indicated on the

predictive map of Best and Most Versatile agricultural land as predominantly within an area where 20 - 60% of the land is likely to be BMV is assessed as having a significant negative effect as could part of the site's location within flood zone 2 and 3.

**6.622** Site comprises a field on the south-western edge of the settlement, sloping down from the settlement edge. There are no designated heritage assets within the 400m buffer. The western edge of the site is within an area of flood zone and the site is likely to be affected to some degree by flood risk. Support of the sequential test and a Level 2 SFRA are needed. A landscape impact assessment is also required.

**6.623** This site was taken forward as a preferred option for consultation in April 2016 with an amended site boundary to exclude areas of flood risk.

**6.624** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that most of the site habitats are common throughout the region and not considered eligible for BAS / SBI status. However the species-rich hedgerow has potential for BAS / SBI status subject to further survey.

**6.625** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that while the site is open, long distance views are screened by the railway embankment located to the north and west of the site. Site-specific landscape mitigation measures could include limiting building heights and planting in the west of the site.

**6.626** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

#### **CH085C**

**6.627** The proposed delivery of circa 150 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility areas of existing employment is likely to have a positive effect, as could the site's location away from historic assets. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as predominantly within an area where 20 - 60% of the land is likely to be BMV (but partly within an area where over 60% of the land is likely to be BMV) is assessed as having a significant negative effect.

**6.628** Site comprises fields to the south-west of the settlement, sloping down from the settlement edge. A landscape impact assessment is required.

**6.629** This site was taken forward as a preferred option for consultation in April 2016.

**6.630** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that most of the site habitats are common throughout the region and not considered eligible for BAS / SBI status. However the species-rich hedgerow has potential for BAS / SBI status subject to further survey.

**6.631** There is one Grade II Listed Building within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) considered that as a farm, the wider agricultural setting is considered to contribute to the overall significance of the asset. The study found that the site is part of the wider setting of the asset and therefore development would be likely to cause adverse effects. Potential mitigation measures include screening of the southern edge of the site.

**6.632** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that while the site is open, long distance views are screened by the railway embankment located to the north and west of the site. Only the north-eastern corner of the site is adjacent to the settlement edge and is otherwise separated by adjacent sites (CH085d). Site-specific landscape mitigation measures could include phased development (ensuring the site is developed following the development of adjoining sites), limiting building heights and planting in the west of the site.

**6.633** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

#### **CH085D**

**6.634** The proposed delivery of circa 115 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to health care services and facilities and areas of existing employment is likely to have a positive effect. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as predominantly within an area where 20 - 60% of the land is likely to be BMV is assessed as having a significant negative effect. The site's ecological value and proximity to historic assets are also likely to have a negative effect.

**6.635** Site comprises generally flat fields on the south-western edge of the settlement, enclosed by residential development to the east and north. Landscape and heritage impact assessments are required.

**6.636** A small part of CH093 was incorporated within CH085d at the Preferred Options stage. The whole of CH093 was considered as part of the Council's Green Belt Review. The study recommended considering the site for release from the Green Belt if exceptional circumstances can be demonstrated. The site was taken forward as a preferred option for consultation in April 2016.

**6.637** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that most of the site habitats are common throughout the region and not considered eligible for BAS / SBI status. However the species-rich hedgerow has potential for BAS / SBI status, one oak tree has bat roost potential and the scattered trees also need to be assessed. Further surveys are required.

**6.638** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that while the site is open to the west, long distance views are screened by the railway embankment located further to the west of the site and considered that the site fits well within the existing settlement pattern.

**6.639** There are two Grade II Listed Buildings within the 400m buffer; of which the site is part of the wider agricultural setting of a farm to the south. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that as a farm, the agricultural setting is considered to contribute to the overall significance of the asset. As such, development was considered likely to cause adverse effects to its setting by altering some of that agricultural landscape. Mitigation measures may include master-planning and screening of the southern edge of the site.

**6.640** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

### CH093

**6.641** The proposed delivery of circa 165 dwellings is considered to have a significant positive effect. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as predominantly within an area where 20 - 60% of the land is likely to be BMV is assessed as having a significant negative effect as could the site's partial location within flood zone 2. The site's proximity to historic assets is likely to have a negative effect, as could the inaccessibility of areas of existing employment.

**6.642** The site is likely to be affected to some degree by flood risk; support of the sequential test and a level 2 SFRA is required. Landscape and heritage impacts assessments should also be undertaken. The Council's Green Belt review has concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.643** The north east section of the site has been incorporated within site CH085d and this part of the site only has been taken forward as a preferred option for consultation in April 2016 and is proposed to be carried forward into the July 2017 preferred option Local Plan.

### CH121

**6.644** The proposed delivery of circa 38 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect, as could the site's location away from historic assets. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect. The site's ecological value and proximity to a Local Nature Reserve is likely to have a negative effect.

**6.645** Public Right of Way (Cheadle 4) runs along the access to the Cottage and should be retained. The site lies within the area considered to form an important landscape setting to the settlement. Landscape impact assessment is required; along with an assessment of potential impacts on Cecilly Brook LNR as well as the District's Green Infrastructure network.

**6.646** This site was not taken forward as a preferred option for consultation in April 2016.

### CH122

**6.647** The proposed delivery of circa 22 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect, as could the site's location away from historic assets. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect. The site's ecological value and proximity to a Local Nature Reserve is likely to have a negative effect.

**6.648** Landscape impact assessment is required; along with an assessment of potential impacts on Cecilly Brook LNR as well as the District's Green Infrastructure network.

**6.649** This site was not taken forward as a preferred option for consultation in April 2016.

### CH128

**6.650** The proposed delivery of circa 28 dwellings and accessibility to areas of existing employment is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land

as within an area where 20 - 60% of the land is likely to be BMV is assessed as having a significant negative effect. The site's proximity to historic assets is likely to have a negative effect.

**6.651** The site is overgrown land with no public access on the southern edge of Cheadle, west of the A522. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. Landscape and heritage impact assessments are required.

**6.652** This site was taken forward as a preferred option for consultation in April 2016.

**6.653** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that most of the site habitats are common throughout the region and not considered eligible for BAS / SBI status. No protected species were identified on site and the site is considered to have low ecological value.

**6.654** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the site is enclosed by development to the north and south which provides screening, reducing visual prominence.

**6.655** There are two Grade II Listed Buildings within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that the assets are well screened by vegetation and considered that due to the topography and existing vegetation, development would be unlikely to cause high adverse effects to their settings. Mitigation measures could include screening of the eastern and southern edges.

**6.656** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

#### **CH129**

**6.657** The proposed delivery of circa 120 dwellings is considered to have a significant positive effect, as could the accessibility to areas of existing employment. Similarly, the site's accessibility to services and facilities and distance away from historic assets is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect. The site's proximity to Local Nature Reserves and ecological value is likely to have a negative effect.

**6.658** Landscape impact assessment is required. In addition, the site is within 100m of Hales Hall Pool LNR and within 300m of Cecilly Brook LNR. Assessments are required of potential impacts on these Nature Reserves and the District's Green Infrastructure network.

**6.659** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH132**

**6.660** The proposed delivery of circa 130 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment and distance away from historic assets is likely to have a positive effect. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as predominantly within an area where 20 - 60% of the land is likely to be BMV is assessed

as having a significant negative effect, as could the site's partial location within flood zone 2 and 3. The site's proximity to two Local Nature Reserves and ecological value is also likely to have a negative effect.

**6.661** Site comprises a large field on the northern edge of Cheadle, which slopes down from the settlement edge to Cecily Brook. Broad Hayes Park (mobile home park) is adjacent to the north-west site boundary. Part of the site is located within a flood zone 3 area and thus is likely to be subject to risk from flooding. Cecilly Brook holds a strong, isolated population of water voles whose habitat must be maintained. The site is within 500m of Cecilly Brook and Hales Hall Pool LNRs. Assessments are required of potential impacts on these Nature Reserves and the District's Green Infrastructure network.

**6.662** This site was taken forward as a preferred option for consultation in April 2016 with a revised boundary to exclude areas of flood risk.

**6.663** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that while the site is open and visually prominent (particularly when viewed from the opposite side of the valley) the existing settlement edge is urbanised. Site-specific landscape mitigation measures could include limiting building heights, limiting development to the higher ground, and advanced planting on the southern boundary.

**6.664** There is one Grade II Listed Building within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that as a farm, the wider agricultural setting is considered to contribute to the overall significance of the asset. The site is not within the immediate setting of the asset and the study considered that development would likely be viewed as part of the existing residential to the west although development may cause adverse effects to its wider setting. Mitigation measures may include screening of the north eastern boundary.

**6.665** The findings of the Landscape, Local Green Space and Heritage Impact Study should be used to help inform a master-planning process which should also demonstrate how the site's relationship with the Local Nature Reserves has been managed to ensure impacts on biodiversity are minimised (and net gains in biodiversity provided where possible). A masterplan should also demonstrate how a development scheme could contribute to the priorities and actions proposed for the Cecilly Brook strategic GI corridor (as set out in the Green Infrastructure Strategy), including by establishing coherent ecological networks that are more resilient to current and future pressures, as well as enabling water quality improvements in line with the Water Framework Directive objectives. The potential to accommodate SuDS should be considered to help manage any residual flood risk and to deliver water quality improvements.

**6.666** The site was proposed for inclusion in the July 2017 preferred option Local Plan in conjunction with CH001 and includes land for a new Primary School.

#### **CH134A**

**6.667** The proposed delivery of circa 150 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect, as could its location away from historic assets. However, the development of greenfield, grade 3 ALC land and the remote nature of the site is assessed as having a significant negative effect, as could the site's partial location within flood zone 2 and 3.

**6.668** The site may be subject to risk from flooding. The Council's Green Belt review concluded that the site makes a significant contribution to the purposes of the Green Belt and should not be considered for release. A landscape impact assessment is required.

**6.669** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH134B**

**6.670** The proposed delivery of circa 150 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect, as could its location away from historic assets. However, the development of greenfield, grade 3 ALC land and the remote nature of the site is assessed as having a significant negative effect, as could the site's partial location within flood zone 2 and 3.

**6.671** The site may be subject to risk from flooding. The Council's Green Belt review concluded that the site makes a significant contribution to the purposes of the Green Belt and should not be considered for release. A landscape impact assessment is required.

**6.672** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH135A**

**6.673** The proposed delivery of circa 160 dwellings is considered to have a significant positive effect, as its proximity to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect, as could its location away from historic assets. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect, as could the site's partial location within flood zone 2 and 3.

**6.674** The site may be subject to risk from flooding. The Council's Green Belt review concluded that the site makes a significant contribution to the purposes of the Green Belt and should not be considered for release. A landscape impact assessment is required.

**6.675** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH135B**

**6.676** The proposed delivery of circa 110 dwellings is considered to have a significant positive effect, as its proximity to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect. The site's proximity to historic assets is likely to have a negative effect.

**6.677** The Council's Green Belt review concluded that the site makes a significant contribution to the purposes of the Green Belt and should not be considered for release. A landscape impact assessment is required.

**6.678** This site was not taken forward as a preferred option for consultation in April 2016.

### **CH135C**

**6.679** The proposed delivery of circa 130 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect, as could its location away from historic assets. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect, as could the site's partial location within flood zone 2 and 3.

**6.680** The site may be subject to risk from flooding. The Council's Green Belt review concluded that the site makes a significant contribution to the purposes of the Green Belt and should not be considered for release. A landscape impact assessment is required.

**6.681** This site was not taken forward as a preferred option for consultation in April 2016.

### **CH165**

**6.682** The proposed delivery of circa 26 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is assessed as having a significant negative effect. The site's proximity to historic assets is likely to have a negative effect.

**6.683** The Council's Green Belt review concluded that the site makes a significant contribution to the purposes of the Green Belt and should not be considered for release. The site lies within the area considered to form an important landscape setting to the settlement. A landscape impact assessment is required.

**6.684** This site was not taken forward as a preferred option for consultation in April 2016.

### **Employment sites**

#### **CH094**

**6.685** The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, site's location away from historic assets is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land and the site's ecological value is likely to have a negative effect.

**6.686** The Council's Green Belt review concluded that the site makes a contribution to the purposes of the Green Belt and should not be considered for release.

**6.687** This site was not taken forward as a preferred option for consultation in April 2016.

#### **CH136**

**6.688** The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, site's location away from historic assets is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land and the site's ecological value is likely to have a negative effect.

**6.689** The Council's Green Belt review concluded that the site could be considered for release from the Green Belt whilst retaining a Green Belt designation washed over the land.

**6.690** This site was not taken forward as a preferred option for consultation in April 2016.

#### **Additional sites**

##### **ADD05 (CH084)**

**6.691** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. However, the site's proximity to historic assets is likely to have a significant negative effect, as could the site's partial location within a flood zone. The site's proximity to designated assets and the development of greenfield, grade 4 ALC land are assessed as having negative effects.

**6.692** The site is at risk from flooding although it is understood that development is proposed on the north western section of the site to avoid areas outside flood zone 1. The site is adjacent to The Eaves and Mobberley Farm (both Grade II listed). Landscape and heritage impact assessments are required.

**6.693** This site was not taken forward as a preferred option for consultation in April 2016.

#### **Additional sites appraised following July 2017 consultation**

##### **CH146 and CH147 (Land north of Park Drive and adjacent to Bungalow Farm) - employment use**

**6.694** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site's accessibility to other services and facilities is likely to have a positive effect, as could its location away from flood zones 2 and 3. In addition the site is located within the Churnet Valley Area, considered as an area for sustainable tourism and rural regeneration. However, the development of greenfield land within Green Belt and the important landscape setting to the settlement is likely to lead to negative effects. Similarly the site is indicated on the predictive map of best and most versatile agricultural land as partly within an area where 20 - 60% of the land is likely to be bmv and partly within an area where over 60% of the land is likely, so development of this site may result in the loss of best and most versatile agricultural land. The site is within the mineral safeguarding area for bedrock sand and this is assessed as having a negative effect. An applicant should be required to provide an NPPF compliant heritage statement, ecological survey and landscape impact assessment.

**6.695** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

##### **Land at Friars Close**

**6.696** The proposed delivery of circa 5 dwellings is considered to have a positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have positive effects, as is its location outside flood zones 2 and 3. However, the development of greenfield land within the Green Belt, the important landscape setting to the settlement and within the mineral safeguarding area for bedrock sand is assessed as having negative effects. The site's proximity to heritage assets is also likely to have a negative effect. An applicant should be required to provide an NPPF compliant heritage statement. Ecological survey and landscape impact assessments are also required.

**6.697** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

#### **Three sites at Brookhouses - employment use**

- **Site 1: Land at junction of Delphouse Road and Draycott Cross Road (eastern part of CH137)**
- **Site 2: Land south west of Haden House Farm**
- **Site 3: Land south west of New Haden Road / north of Harplow Lane (north west tip of CH094 and northern part of CH125)**

**6.698** The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the sites' location away from heritage assets and floodzones 2 and 3 are likely to have positive effects. However negative effects are likely to result from the development of greenfield land where sites are indicated on the predictive map of best and most versatile agricultural land as within areas where less than or equal to 20% of the land is likely to be BMV (site 2 and part of site 3); 20-60% of the land is likely (site 1) and where greater than 60% of the land is likely to be BMV (remaining part of site 3) such that development of the sites may result in the loss of best and most versatile agricultural land. The southern part of site 2 and all of site 3 are within the mineral safeguarding area for bedrock sand and this is also likely to lead to negative effects. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area and other landscape impact. The sites lie within parcel S15 (land to the west of Cheadle, south of the A521) identified in the Council's Green Belt study as helping to maintain the western edge of Cheadle and thereby the broader separation of Cheadle from the Stoke conurbation to the west. Given the wooded nature of the sites, potential ecological value is also likely to have a negative effect.

**6.699** The sites were not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

#### **CH083 (Land east of Abbot's Hays, Cherry Lane)**

**6.700** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect, as could the site's location outside of flood zones 2 and 3. However the site is remote from the main urban area and its lack of accessibility to a range of services and facilities is likely to have a negative effect. Similarly negative effects are likely to result from the development of a greenfield site, indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be BMV, such that development of this site could result in the loss of best and most versatile land. The site also lies within the mineral safeguarding area for bedrock sand. The site's proximity to designated natural and heritage assets is likely to lead to negative effects. An applicant should be required to provide an NPPF compliant heritage statement. The site is also considered to form part of the remnant historic landscape associated with grade II\* listed Hales Hall. Landscape impact and ecological assessments are also required.

**6.701** The site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

## Larger Villages

### Alton

#### Sites (5+ dwellings) within the current development boundary

##### AL024 (only small part within development boundary)

**6.702** The proposed delivery of circa 12 dwellings is considered to have a significant positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The site's proximity to historic assets and ecological value is likely to have a negative effect.

**6.703** Landscape and heritage impact assessments are required.

**6.704** This site was not taken forward as a preferred option for consultation in April 2016.

#### Sites (5+ dwellings) outside the current development boundary

##### AL012

**6.705** The proposed delivery of circa 18 dwellings is considered to have a significant positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The site's proximity to historic assets and ecological value is likely to have a negative effect. The site is indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban / industrial.

**6.706** The site is located on the southern edge of the village, comprising an individual property (and surrounding gardens) located on the B5032, and the adjacent field to the south. Outline planning permission for 13 dwellings is pending: SMD/2014/0824.

**6.707** This site was taken forward as a preferred option for consultation in April 2016.

**6.708** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that an existing strong, vegetated settlement edge is defined by a thick hedgerow on the southern boundary of the field to the south of the site. The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has medium ecological value in its potential to support protected species. The site habitats are considered to be of nature conservation value at local and site level. However, more information is required regarding the species rich hedgerow and the potential for bat roosts in the building and trees.

**6.709** There are five Grade II Listed Buildings and one Conservation Area within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that the site was well screened with vegetation on the east, west and southern sides. The study considered that to the north, there was no inter-visibility between the site and the Conservation Area due to the intervening buildings and that development would be unlikely to cause adverse effects to their settings.

**6.710** The site was proposed to be carried forward into the July 2017 preferred option Local Plan with planning permission pending.

#### **AL019**

**6.711** The proposed delivery of circa 43 dwellings is considered to have a significant positive effect. Similarly, the site's proximity to services and facilities, albeit limited, is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and a SSSI.

**6.712** The site is within 600m of Saltersford Lane Meadows SSSI (which encompasses two species rich hay meadows) and within 400m of one scheduled monument, one grade II\* listed asset and twenty nine grade II listed assets. Landscape, ecology and heritage impact assessments are required.

**6.713** This site was not taken forward as a preferred option for consultation in April 2016.

#### **AL022**

**6.714** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's proximity to services and facilities, albeit limited, is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect, as could the proximity of the site to a SSSI. The site's proximity to historic assets is likely to have a negative effect.

**6.715** The site is within 500m of Saltersford Lane Meadows SSSI (which encompasses two species rich hay meadows) and within 400m of one scheduled monument and twenty four grade II listed assets. Landscape, ecology and heritage impact assessments are required.

**6.716** This site was not taken forward as a preferred option for consultation in April 2016.

#### **AL025**

**6.717** The proposed delivery of circa 60 dwellings is considered to have a significant positive effect. Similarly, the site's proximity to health care services and facilities is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

**6.718** The site is within 1000m of Saltersford Lane Meadows SSSI (which encompasses two species rich hay meadows) and within 400m of one scheduled monument, one grade II\* listed asset and twenty five grade II listed assets. One of the grade II listed assets - Turnditch Farmhouse is within 50m of the site. Landscape, ecology and heritage impact assessments are required.

**6.719** This site was not taken forward as a preferred option for consultation in April 2016.

#### **AL026**

**6.720** The proposed delivery of circa 43 dwellings is considered to have a significant positive effect. Similarly, the site's proximity to health care services and facilities is likely to have a positive effect. However, the site is inaccessible to areas of existing employment

which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and a SSSI.

**6.721** The site is within 1000m of Saltersford Lane Meadows SSSI (which encompasses two species rich hay meadows) and within 400m of eight grade II listed assets. Landscape, ecology and heritage impact assessments are required.

**6.722** This site was not taken forward as a preferred option for consultation in April 2016.

#### **AL027**

**6.723** The proposed delivery of circa 45 dwellings is considered to have a significant positive effect. Similarly, the site's proximity to services and facilities is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and a SSSI.

**6.724** The site is within 500m of Saltersford Lane Meadows SSSI (which encompasses two species rich hay meadows) and within 400m of two scheduled monuments, one grade I listed asset, five grade II\* listed assets and forty one grade II listed assets. Landscape, ecology and heritage impact assessments are required.

**6.725** This site was not taken forward as a preferred option for consultation in April 2016.

#### **Additional sites appraised following July 2017 consultation**

#### **AL013**

**6.726** The proposed delivery of circa 75 dwellings is considered to have a significant positive effect. Similarly, the site's proximity to health care services and facilities is likely to have a positive effect. However, the site is relatively inaccessible to areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is also assessed as having a negative effect, as is the site's proximity to natural and historic assets and potential impacts on landscape quality and the availability of non renewable resources.

**6.727** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

#### **Biddulph Moor**

##### **Sites (5+ dwellings) - within the current Green Belt**

#### **BM008**

**6.728** The proposed delivery of circa 18 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment and low ecological value is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of mixed brownfield and greenfield, grade 4 ALC land and the site's proximity to historic assets is assessed as having a negative effect.

**6.729** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. The site lies within the area considered to form an important landscape setting to the settlement and is within 400m of one grade II listed asset. Landscape and heritage impact assessments are required.

**6.730** This site was not taken forward as a preferred option for consultation in April 2016.

#### **BM013**

**6.731** The proposed delivery of circa 65 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban / industrial) is assessed as having a negative effect, as is the site's proximity to historic assets and the ecological value of the site.

**6.732** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. The site lies within the area considered to form an important landscape setting to the settlement and is within 400m of one grade II listed asset. Landscape and heritage impact assessments are required.

**6.733** Part of the site adjacent to Parklands / Hot Lane (18 dwellings) was taken forward as a preferred option for consultation in April 2016.

**6.734** The site is located on the north-eastern edge of Biddulph Moor, between Hot Lane and Rudyard Road. The site is L-shaped and comprises sections of fields. The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has some potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However more information is required regarding the potential for great crested newts and reptiles.

**6.735** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of partly low and partly medium landscape sensitivity. The study found that visual prominence of the site increases to the east, as the distance from the settlement edge increases; the site is open to the north, and long distance views are available from this direction. Site-specific landscape mitigation measures could include phased development and additional advanced planting adjacent to Hot Lane.

**6.736** There is one Grade II building within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that there was no inter-visibility between the site and asset due to the topography and intervening buildings.

**6.737** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **BM014A**

**6.738** The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield land (indicated on the

predictive map of Best and Most Versatile agricultural land as within an area likely to be urban / industrial) is assessed as having a negative effect, as is the site's proximity to historic assets and the ecological value of the site.

**6.739** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. The site lies within the area considered to form an important landscape setting to the settlement. Landscape and heritage impact assessments are required.

**6.740** Part of the site along New Street (6 dwellings) was taken forward as a preferred option for consultation in April 2016. The site comprises part of the private garden of a residential property (315 New Street) on the south-western edge of the settlement. The site is generally enclosed by development.

**6.741** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the habitats on site are of nature conservation value at the site level only. These habitats are not listed as important habitats in the Staffordshire SBI guidelines and therefore the site does not currently qualify for consideration as an SBI or as a BAS. Species recorded on site were common and widespread both at a county and national level and it is considered highly unlikely that the site supports notable protected species, although further survey for badger should be undertaken.

**6.742** There are no designated heritage assets within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that the site in isolation does not relate to the settlement pattern. Site-specific landscape mitigation measures could include phased development (ensuring the site is developed in combination with BM014b) and that proposals are accompanied by an overall landscape mitigation plan to cover all sites.

**6.743** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **BM014B**

**6.744** The proposed delivery of circa 25 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect, as could its location away from historic assets and designated assets. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban / industrial) is assessed as having a negative effect.

**6.745** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. The site lies within the area considered to form an important landscape setting to the settlement. Landscape and heritage impact assessments are required.

**6.746** Part of the site along Chapel Lane (9 dwellings) was taken forward as a preferred option for consultation in April 2016. The site comprises two small fields divided by Bankhouse Farm on Chapel Street, on the south-western edge of the settlement. There are no designated heritage assets within the 400m buffer.

**6.747** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has low potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However more information is required regarding the potential for bat roosts on the site.

**6.748** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the site is generally enclosed by development, and is within the settlement form.

**6.749** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **BM021**

**6.750** The proposed delivery of circa 7 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect, as could its location away from designated assets. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban / industrial) is assessed as having a negative effect, as is its location near to historic assets.

**6.751** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. The site lies within the area considered to form an important landscape setting to the settlement and is within 400m of one grade II listed asset. Landscape and heritage impact assessments are required.

**6.752** This site was not taken forward as a preferred option for consultation in April 2016.

#### **BM029**

**6.753** The proposed delivery of circa 12 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban / industrial) is assessed as having a negative effect, as is its location near to historic assets and the ecological value of the site.

**6.754** The site comprises a small field on the north-eastern edge of the settlement, north of Rudyard Road. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if very special circumstances can be demonstrated. The site lies within the area considered to form an important landscape setting to the settlement and is within 400m of one grade II listed building. Landscape and heritage impact assessments are required.

**6.755** The site was taken forward as a preferred option for consultation in April 2016.

**6.756** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has low potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However more information is required regarding the scattered trees on site.

**6.757** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) which notes that there was no inter-visibility between the site and listed asset due to the topography and intervening buildings.

**6.758** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that the site is not visually prominent due to screening provided by vegetation on the field boundaries, and existing properties located to the east and west of the site however it the site is separated from the settlement edge to the west by 51 Rudyard Road and BM013. Site-specific landscape mitigation measures could include phased development (ensuring site is developed in combination with BM013) and a proposal is accompanied by an overall landscape mitigation plan to cover the sites.

**6.759** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **BM030**

**6.760** The proposed delivery of circa 60 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect, as could its location away from designated assets. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is its location near to historic assets.

**6.761** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. The site lies within the area considered to form an important landscape setting to the settlement and is within 400m of one grade II listed asset. Landscape and heritage impact assessments are required.

**6.762** This site was not taken forward as a preferred option for consultation in April 2016.

#### **BM031**

**6.763** The proposed delivery of circa 60 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is its location near to historic assets and the ecological value of the site.

**6.764** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. The site lies within the area considered to form an important landscape setting to the settlement and is within 400m of one grade II listed asset. Landscape and heritage impact assessments are required.

**6.765** This site was not taken forward as a preferred option for consultation in April 2016.

### **BM032**

**6.766** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is its location near to historic assets.

**6.767** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. The site lies within the area considered to form an important landscape setting to the settlement and is within 400m of one grade II listed asset. Landscape and heritage impact assessments are required.

**6.768** This site was not taken forward as a preferred option for consultation in April 2016.

### **BM035**

**6.769** The proposed delivery of circa 35 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is its location near to historic assets.

**6.770** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. The site lies within the area considered to form an important landscape setting to the settlement and is within 400m of one grade II listed asset. Landscape and heritage impact assessments are required.

**6.771** This site was not taken forward as a preferred option for consultation in April 2016.

### **Additional sites appraised following July 2017 consultation**

#### **Land at Church Lane (including small part of BM012)**

**6.772** The proposed delivery of circa 3 dwellings is considered to have a positive effect. Similarly, the re-use of previously developed land is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a negative effect. Similarly, the development of a partly greenfield site within the important landscape setting to the settlement and potential impact on heritage assets are considered likely negative effects.

**6.773** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

### **Blythe Bridge & Forsbrook**

#### **Sites (5+ dwellings) - within the current development boundary**

##### **BB021 - residential**

**6.774** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect, as is the accessibility of the site to services and facilities and public transport. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect, as could the site's location away from historic assets. However, there is scope that the site could be designated SBI land which would have a significant negative effect, as

would the partial flood zone 2 and 3 designation of the site. Similarly, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban / industrial is assessed as having a negative effect.

**6.775** This site has also been appraised for potential employment use - see para **XXX**.

**6.776** The site is likely to be affected to some degree by flood risk and if taken forward will require the support of the Sequential Test and a Level 2 SFRA. The Council's 2014 Ecology Study considers that the site could qualify as an SBI for its floral diversity.

**6.777** This site was not taken forward as a preferred option for consultation in April 2016.

### **Sites (5+ dwellings) - outside the current development boundary**

#### **BB027/28**

**6.778** The proposed delivery of circa 27 dwellings is considered to have a significant positive effect, as is the accessibility of the site to services and facilities and public transport. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect, as could the site's location away from historic assets. However, the site is partially within flood zone 2 and 3 which is likely to have a significant negative effect. Similarly, the site is adjacent to Blythe Bridge Woods BAS which would have a negative effect, as would the development of greenfield, urban ALC land.

**6.779** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. The site is likely to be affected to some degree by flood risk and if taken forward will require the support of the Sequential Test and a Level 2 SFRA.

**6.780** This site was not taken forward as a preferred option for consultation in April 2016.

#### **BB040**

**6.781** The proposed delivery of circa 12 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect, as could the site's location away from historic assets. However, the development of greenfield, urban ALC land is assessed as having a negative effect, as is the ecological value of the site and the inaccessibility of areas of existing employment.

**6.782** Previous land use may have caused contamination; remediation and mitigation measures may be required to protect the water environment and human health. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt. The site lies within the area considered to form an important landscape setting to the settlement.

**6.783** This site was not taken forward as a preferred option for consultation in April 2016.

#### **BB041 (ADD011)**

**6.784** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect, as could the site's location away from historic assets. However, the development of greenfield land forming part of the landscape setting to the settlement

(indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban / industrial) is assessed as having a negative effect, as is the ecological value of the site and the inaccessibility of areas of existing employment.

**6.785** Site comprises fields to the north of the settlement, sloping down from Caverswell Old Road towards the settlement edge (rear of properties on Caverswell Road). The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.786** This site was taken forward as a preferred option for consultation in April 2016.

**6.787** Staffordshire Wildlife Trust has noted that two north-western fields within this site are considered to be good quality semi-improved grassland. The hedgerows are potentially diverse, with good structure and mature trees. There are two ponds on the site which could potentially support great crested newts and other amphibians such as Common Toad, further ecological surveys are required.

**6.788** There are no designated heritage assets within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the site is generally screened by existing development; vegetation (particularly the hedgerow on Caverswell Old Road); and topography, as the land continues to rise to a ridge to the north of the site, thus screening long distance views from this direction. The study considered that development of the site would fit in well within the existing settlement form, and would create a well defined, vegetated settlement edge.

**6.789** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **BB044**

**6.790** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to public transport is likely to have a positive effect. However, the site is partially within flood zone 2 and 3 which is likely to have a significant negative effect. Similarly, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban / industrial is assessed as having a negative effect, as is the ecological value of the site and the inaccessibility of areas of existing employment.

**6.791** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. The site lies within the area considered to form an important landscape setting to the settlement. The site is likely to be affected to some degree by flood risk and if taken forward will require the support of the Sequential Test and a Level 2 SFRA. The Council's Ecological Study suggested that the site's wet woodland area may be regarded as a UKBAP priority habitat.

**6.792** This site was not taken forward as a preferred option for consultation in April 2016.

**BB045**

**6.793** The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to public transport is likely to have a positive effect. The site's location away from historic assets is likely to have a positive effect. However, the development of greenfield, urban ALC land is assessed as having a negative effect, as is the ecological value of the site.

**6.794** The site lies within the area considered to form an important landscape setting to the settlement. The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.795** This site was not taken forward as a preferred option for consultation in April 2016.

**BB054**

**6.796** The proposed delivery of circa 70 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect. However, the site's partial location within a flood zone is assessed as having a significant negative effect. The development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban / industrial is assessed as having a negative effect, as is the ecological value of the site and the proximity of historic assets.

**6.797** The site comprises agricultural land surrounding Wood Grove Farm on the south eastern edge of the settlement, south-west of Draycott Old Road. The site is likely to be affected to some degree by flood risk and if taken forward will require the support of the Sequential Test and a Level 2 SFRA. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated and in the context of wider land in this location.

**6.798** This site was taken forward as a preferred option for consultation in April 2016.

**6.799** The Extended Phase 1 Habitat Survey (2015) considered that the site mainly consists of species poor improved grassland used as grazing. The remaining habitats are species poor and very common within the local area and the UK as a whole. However there are two trees present on or adjacent to the site that could support roosting bats, further survey is required.

**6.800** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of high landscape sensitivity. The study found that the site is adjacent to the end of linear development on Draycott Old Road, but is otherwise separated from the edge of the settlement by agricultural land. The study considered that site does not relate to the existing settlement form such that development would adversely affect the settlement pattern, adversely affecting the existing vegetated settlement edge and encroaching on the countryside.

**6.801** There is one Grade II Listed Building within the 400m buffer. Mitigation including screening along the northern boundary could reduce adverse effects to the setting of the asset.

**6.802** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

## **BB062**

**6.803** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect, as could the site's location away from historic assets. However, the development of greenfield, urban ALC land is assessed as having a negative effect, as is the ecological value of the site.

**6.804** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

## **BB086**

**6.805** The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect, as could the site's location away from historic assets. However, the development of greenfield, urban ALC land is assessed as having a negative effect, as is the ecological value of the site.

**6.806** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

## **BB087 - residential**

**6.807** The proposed delivery of circa 46 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the site's proximity to historic assets is likely to have a negative effect. The development of greenfield, urban ALC land is assessed as having a negative effect, as is the ecological value of the site.

**6.808** (This site has also been assessed for employment use, see para **XXX** below.)

**6.809** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. The site lies within the area considered to form an important landscape setting to the settlement. The site is likely to be affected to some degree by flood risk and if taken forward will require the support of the Sequential Test and a Level 2 SFRA.

**6.810** This site was not taken forward as a preferred option for consultation in April 2016.

## **Other uses**

### **BB021 - employment**

**6.811** The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District, as is the accessibility of the site to services and facilities and public transport. Similarly, the site's location away from historic assets is likely to have a positive effect. However, there is scope that the site could be designated SBI land which would have a significant negative effect, as would the partial flood zone 2 and 3 designation of the site. Similarly, the development of greenfield, urban ALC land is assessed as having a negative effect.

**6.812** The site is likely to be affected to some degree by flood risk and if taken forward will require the support of the Sequential Test and a Level 2 SFRA. The Council's Ecology Study considers that the site could qualify as an SBI for its floral diversity.

**6.813** This site was not taken forward as a preferred option for consultation in April 2016.

### **BB087 - employment**

**6.814** The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the site's proximity to historic assets is likely to have a significant negative effect. The development of greenfield, urban ALC land is assessed as having a negative effect, as is the ecological value of the site.

**6.815** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. The site lies within the area considered to form an important landscape setting to the settlement. The site is likely to be affected to some degree by flood risk and if taken forward will require the support of the Sequential Test and a Level 2 SFRA.

**6.816** This site was not taken forward as a preferred option for consultation in April 2016.

### **Additional sites appraised following April 2016 consultation**

#### **Blythe Vale Strategic Site (Identified in Core Strategy as Policy SS8 Blythe Bridge Regional Investment Site) - potential mixed use including residential**

**6.817** The proposed delivery of circa 300 dwellings is considered to have a significant positive effect. Similarly, the site's good strategic location (with regional significance) has scope to have a positive effect on the vitality and viability of the wider District and could encourage investment in people, jobs and infrastructure. However, the development of greenfield land, partly within the important landscape setting to the settlement, and indicated on the predictive map of Best and Most Versatile land as an area where more than 60% of the land is likely to be BMV, is assessed as having a significant negative effect, similarly the potential ecological value of the site and the effects on climate change resulting from the likelihood of the location supporting journeys made by car, are assessed as negative.

**6.818** This site is a long standing allocation, having been allocated in the Staffordshire Moorlands Local Plan which was adopted in 1998 and subsequently included as an allocation in the Staffordshire Moorlands Core Strategy, which was adopted in 2014.

**6.819** The site comprises large areas of agricultural land extending south-east from Blythe Bridge (at the junction of the A50 and A521) and located either side of the A50. The site contains some previous development, comprising residential properties and Stone House Farm on Woodlands Lane, and Woodlands farm to the south of the A50. The site is enclosed by a railway line to the south-west.

**6.820** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the improved grassland, arable, hard-standing, tall ruderal vegetation, buildings, species-poor hedgerow and scattered trees were of importance to nature conservation at the site level only. However the single length of species-rich hedgerow in the northern area of the site was considered to be of importance at the local level. There is

reasonable potential that it may qualify as an SBI or a BAS dependent on further survey. The ponds are of at least local importance to nature conservation and appear to qualify as both an SBI or a BAS. Further survey is required. Species recorded on site were common and widespread both at a county and national level and, subject to further survey, it is considered unlikely that the site significantly supports any notable protected species.

**6.821** There is one Grade II Listed Building within the 400m buffer. The Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) considered that due to the topography of the landscape, there was no inter-visibility between the site and the asset and that development would be highly unlikely to adversely affect the setting of the heritage asset.

**6.822** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium or high landscape sensitivity. The study found that the existing settlement edge to Blythe Bridge is well-defined and vegetated, with the A50 and A521 providing a strong limit to development. It was considered that development of the site could lead to coalescence between Blythe Bridge and Draycott, with physical and visual coalescence potentially arising in the northern section of the site, and visual coalescence between these two settlements arising in the southern section of the site (especially when viewed from higher ground to the south-west). Site-specific landscape mitigation measures recommended included planting within and on the edges of the development, and limits on building sizes and scale.

**6.823** The site was proposed for inclusion in the preferred options Local Plan July 2017.

### **Additional sites appraised following July 2017 consultation**

#### **Land at Uttoxeter Road**

**6.824** The proposed delivery of circa 210 dwellings is considered to have a significant positive effect, as is the accessibility of the site to services and facilities and public transport. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect, as could the site's location away from historic assets. However, the site is subject to surface water flooding which is likely to have a negative effect. Similarly, the development of a large greenfield site within the Green Belt and the mineral safeguarding area for superficial sand and gravel is likely to have a negative effect.

**6.825** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

#### **BB042 / BB043**

**6.826** The proposed delivery of circa 190 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to public transport is likely to have a positive effect. However, the site is part of the important landscape setting to settlement which is likely to have a negative effect, as is the potential impact on heritage assets. Similarly, the development of greenfield, urban ALC land within Green Belt and the mineral safeguarding area for bedrock sand is assessed as having a negative effect, as is the potential ecological value of the site and the inaccessibility of areas of existing employment.

**6.827** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

**Brown Edge****Sites (5+ dwellings) - within the current development boundary****BE003A**

**6.828** The site's proximity to the village centre could reduce the need to travel and as such have a positive effect on climate change which is likely to have a significant positive effect. The proposed delivery of circa 6 dwellings is considered to have a positive effect, as is its distance away from historic assets and low ecological value. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect.

**6.829** The site is within the Brown Edge village development boundary and could come forward at any time. This site was not taken forward as a preferred option for consultation in April 2016.

**Sites (5+ dwellings) - within the current Green Belt****BE032**

**6.830** The proposed delivery of circa 35 dwellings is considered to have a significant positive effect. Similarly, the site's low ecological value is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets.

**6.831** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt. The site has a culverted watercourse flowing beneath it which should be re-naturalised through re-development to contribute to Water Framework Directive objectives.

**6.832** This site was not taken forward as a preferred option for consultation in April 2016.

**BE041**

**6.833** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's distance away from historic assets is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. Similarly, the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban / industrial) is assessed as having a negative effect, as is the ecological value of the site.

**6.834** Site comprises a field on the southern edge of Brown Edge, enclosed by a combination of existing residential development, or trees and hedgerows. The site lies within the area considered to form an important landscape setting to the settlement. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. Development could be part of the enhancement of recreational opportunities in this location, the site bordering scrubland and well-used footpaths running southwards towards Stockton Brook.

**6.835** This site was taken forward as a preferred option for consultation in April 2016.

**6.836** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has some potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However more information is required regarding the species-rich hedgerow and the potential for roosting bats on site.

**6.837** There are no designated heritage assets within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the site slopes down from a track on the north-east boundary to Willfield Lane on the south-west boundary and considered the higher land to the north-east of the site to have higher visual prominence, with long distance views available to the south-west. The study considered that development would be viewed behind and adjacent to existing development.

**6.838** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **BE044**

**6.839** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's distance away from historic assets is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the ecological value of the site.

**6.840** The site lies within the area considered to form an important landscape setting to the settlement. The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.841** This site was not taken forward as a preferred option for consultation in April 2016.

#### **BE045**

**6.842** The proposed delivery of circa 35 dwellings is considered to have a significant positive effect. Similarly, the site's distance away from historic assets is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the ecological value of the site.

**6.843** The site lies within the area considered to form an important landscape setting to the settlement. The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.844** This site was not taken forward as a preferred option for consultation in April 2016.

**BE056**

**6.845** The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the ecological value of the site.

**6.846** The site is adjacent to farm buildings considered non-designated heritage assets. The site lies within the area considered to form an important landscape setting to the settlement. The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.847** This site was not taken forward as a preferred option for consultation in April 2016.

**BE060**

**6.848** The proposed delivery of circa 60 dwellings is considered to have a significant positive effect. Similarly, the site's distance away from designated assets is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets.

**6.849** The site lies within the area considered to form an important landscape setting to the settlement. The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.850** This site was not taken forward as a preferred option for consultation in April 2016.

**ADD06**

**6.851** The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the location away from designated assets is considered to have a positive effect. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets.

**6.852** Site adjoins BE032. The Council's Green Belt Review concluded that site BE032 could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.853** This site was not taken forward as a preferred option for consultation in April 2016.

**Additional sites appraised following the July 2017 consultation****BE035 (land south of Greenfield Close)**

**6.854** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's distance away from historic assets is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. Similarly, the

development of greenfield, grade 4 ALC land within Green Belt, important landscape setting to settlement and the mineral safeguarding area for silica sand is assessed as having a negative effect, as is the potential ecological value of the site.

**6.855** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

#### **Supermarket, 199 High Lane ST6 8QA**

**6.856** The proposed delivery of circa 3 dwellings is considered to have a positive effect. Similarly, the site's distance away from historic assets and its location within the village centre are likely to have a positive effect, as is the re-use of previously developed land. However, despite the proposed retention of retail use, the site is relatively inaccessible to other services and facilities and areas of existing employment which is likely to have a negative effect.

**6.857** This small site within the existing village boundary site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

#### **Cheddleton**

##### **Sites (5+ dwellings) - within the current development boundary**

###### **CD004**

**6.858** The proposed delivery of circa 18 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. Similarly, the site's accessibility to areas of countryside and open space is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and the ecological value of the site.

**6.859** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

###### **CD017**

**6.860** The proposed delivery of circa 29 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. Similarly, the site's accessibility to areas of countryside and open space is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the site's proximity to historic assets and the ecological value of the site is likely to have a negative effect. The site is indicated on the predictive map of Best and Most Versatile agricultural land as within an area where less than 20% of the land is likely to be BMV.

**6.861** Site comprises a residential property on Cheadle Road and the land to the rear of it, north of Bones Lane. It includes a potentially species rich hedgerow. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.862** This site was taken forward as a preferred option for consultation in April 2016.

**6.863** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has some potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However more information is required regarding the species-rich hedgerow and the potential for bats on site.

**6.864** There are three Grade II Listed Buildings within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that due to the topography as well as intervening buildings and vegetation, there was no inter-visibility between the site and the assets. The study considered that development would be highly unlikely to adversely affect the settings of the heritage assets. Outside of the 400m buffer, there are a group of Listed Buildings to the north-east of the site. The study found that development may adversely affect their settings. Mitigation including screening along the north-eastern and eastern boundaries of the site was considered likely to reduce any potential effects on the settings of these Listed Buildings.

**6.865** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the existing linear development on Cheadle Road and the development to the south of the site do not currently contribute to a well-defined settlement edge and considered that the site has low visual prominence as it is generally enclosed by development and vegetation.

**6.866** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **CD029**

**6.867** The site's proximity to areas of existing employment is considered to have a significant positive effect. Similarly, the proposed delivery of circa 8 dwellings is likely to have a positive effect, as could the site's accessibility to areas of open countryside and location away from historic assets. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's inaccessibility to services and facilities.

**6.868** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

#### **CD060/CD118 (mainly outside development boundary)**

**6.869** The proposed delivery of circa 113 dwellings is considered to have a significant positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 3 and 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and the inaccessibility of areas of existing employment.

**6.870** Site forms part of the setting of Ashcombe Park (Grade II\*). The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

## **CD069A**

**6.871** The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open countryside and low ecological value is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the site's inaccessibility to areas of existing employment is likely to have a significant negative effect. The development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area where the land is likely to be urban) is assessed as having a negative effect, as is the site's proximity to historic assets.

**6.872** Allocation of the site was considered to be unnecessary as it may be regarded as potential infill. The site was not taken forward as a preferred option for consultation in April 2016.

## **CD088**

**6.873** The proposed delivery of circa 7 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open countryside is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the site's inaccessibility to areas of existing employment is likely to have a negative effect. The site's proximity to historic assets and the ecological value of the site is likely to have a negative effect.

**6.874** Allocation of the site was considered to be unnecessary as it may be regarded as potential infill. The site was not taken forward as a preferred option for consultation in April 2016.

## **Sites (5+ dwellings) - within the current Green Belt**

### **CD002**

**6.875** The proposed delivery of circa 26 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment and open countryside, as well as the site's location away from historic assets is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area where less than 20% of the land is likely to be BMV is assessed as having a negative effect, as is the site's ecological value.

**6.876** Site comprises a small triangular field on the southern edge of the settlement. The site is enclosed by linear development on Folly Lane to the east; and a strong tree belt/hedgerow to the south-west. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.877** This site was taken forward as a preferred option for consultation in April 2016.

**6.878** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has some potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However more information is required regarding the species-rich hedgerow and bat potential on site.

**6.879** There are no designated heritage assets within the 400m buffer. The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that development within the site would have low visual prominence, and the existing vegetation on the south-western boundary would create a well defined, vegetated edge to the settlement. Site-specific landscape mitigation measures could include phased development (ensuring the site is developed in combination with the adjacent CD003).

**6.880** The site is adjacent to a watercourse with no mapped floodplain. An assessment of flood risk, including a model of the watercourse, should be undertaken at the planning application stage.

**6.881** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

### **CD003**

**6.882** The proposed delivery of circa 70 dwellings is considered to have a significant positive effect, as is the site's accessibility to areas of existing employment. Similarly, the site's accessibility to the open countryside is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area where less than 20% of the land is likely to be BMV is assessed as having a negative effect, as is the site's ecological value and location near to historic assets.

**6.883** Site comprises fields on the southern edge of the settlement. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.884** This site was taken forward as a preferred option for consultation in April 2016.

**6.885** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has some potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However more information is required regarding the bat potential on site.

**6.886** There is one Grade II Listed Building within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that due to the intervening buildings between the site and the asset, there was no inter-visibility and considered that development would be highly unlikely to adversely affect the setting of the asset.

**6.887** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the site is enclosed by residential development on Rock End Drive and Millstone Edge to the north; linear development on Folly Lane to the east; and a strong tree belt/hedgerow to the south-west. The study considered that development within the site would have relatively low visual prominence, and the existing vegetation on the southwestern boundary would create a well-defined, vegetated edge to the settlement.

**6.888** The site is adjacent to a watercourse with no mapped floodplain. An assessment of flood risk, including a model of the watercourse, should be undertaken at the planning application stage.

**6.889** The site was not proposed for inclusion in the July 2017 preferred option Local Plan.

#### **CD007**

**6.890** The proposed delivery of circa 14 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to the open countryside and areas of existing employment is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect and location near to historic assets.

**6.891** The site lies within the area considered to form an important landscape setting to the settlement. The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

#### **CD008**

**6.892** The proposed delivery of circa 23 dwellings is considered to have a significant positive effect, as is the site's accessibility to areas of existing employment. Similarly, the site's accessibility to the open countryside is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect and location near to historic assets.

**6.893** The site lies within the area considered to form an important landscape setting to the settlement. The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

#### **CD015**

**6.894** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect, as is the site's accessibility to areas of existing employment. Similarly, the site's accessibility to the open countryside is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect and location near to historic assets.

**6.895** The site lies within the area considered to form an important landscape setting to the settlement. The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

#### **CD019**

**6.896** The proposed delivery of circa 39 dwellings is considered to have a significant positive effect, as is the site's accessibility to areas of existing employment. Similarly, the site's accessibility to the open countryside is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land is assessed as having a negative effect and its location near to historic assets.

**6.897** The Council's Green Belt review recommends considering the site for release from the Green Belt if exceptional circumstances can be demonstrated. The site forms part of the setting of an historic farmstead considered a local heritage asset. This site was not taken forward as a preferred option for consultation in April 2016.

#### **CD115: residential**

**6.898** The proposed delivery of circa 104 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect. However, the inaccessibility of services and facilities and development of greenfield, grade 3 ALC land is likely to have a significant negative effect. Similarly, the sites proximity to historic assets is likely to have a negative effect.

**6.899** The site forms part of the setting of Heath House (Grade II listed). The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

#### **Other uses**

##### **CD115: alternative uses**

**6.900** The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the provision of housing provided is likely to have a significant positive effect. However, the inaccessibility of services and facilities and development of greenfield, grade 3 ALC land is likely to have a significant negative effect. Similarly, the site's proximity to historic assets is likely to have a negative effect.

**6.901** The site forms part of the setting of Heath House (Grade II listed). The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

### **Additional sites appraised following July 2017 consultation**

#### **Land at Basford Bridge - employment use**

**6.902** The development of new employment premises should have a positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. However the site is small and constrained and this will limit the extent of the positive contribution it can make. The site's location within flood zones 2 and 3 and proximity to heritage assets are likely to have negative effects. Similarly potential effects on natural assets and resources and the site's ecological value are considered likely to be negative effects.

**6.903** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

### **CD101 (Land at Cheadle Road)**

**6.904** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect on health and well-being. However, the inaccessibility of services and facilities is likely to have a negative effect. The site's proximity to historic assets, loss of visual amenity value to the settlement and the potential ecological value of the site are likely to have a negative effect.

**6.905** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

### **Land south of Caldon Canal (Field 4444, Cheadle Road)**

**6.906** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and location outside floodzones 2 and 3 is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a negative effect. Similarly, the development of greenfield, grade 4 ALC land, part of a linear corridor of natural and semi natural open space running along the canal side is assessed as having a negative effect, as is the site's proximity to heritage assets. Ecological survey is required. An applicant should be required to provide an NPPF compliant heritage statement.

**6.907** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

### **Endon**

#### **Sites (5+ dwellings) - within the current development boundary**

#### **EN128**

**6.908** The proposed delivery of circa 27 dwellings is considered to have a significant positive effect, as is the site's proximity to services and facilities. Similarly, the site's accessibility to health care and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The site's proximity to historic assets and ecological value is likely to have a negative effect. The site is indicated on the predictive map of Best and Most Versatile agricultural land as within an area where land is likely to be urban / industrial.

**6.909** Site comprises a small field of rough grassland within the settlement, which slopes down from Stoney Lane to the playing field of St Luke's primary school. It is currently identified as Visual Open Space, but was not identified for retention as such in the Council's 2008 Landscape and Settlement Character Assessment.

**6.910** This site was taken forward as a preferred option for consultation in April 2016.

**6.911** The Extended Phase 1 Habitat Survey (2015) considered that the site has fairly low biodiversity value overall, it is set within a mainly urban environment with poor connectivity to the wider countryside. However the site includes a tree with bat roosting potential and a species-rich hedgerow.

**6.912** There are three Grade II Listed Buildings and one Conservation Area within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that the site was well screened and there was no inter-visibility between the site and heritage assets. The study considered that development would be highly unlikely to adversely affect the settings of the heritage assets.

**6.913** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the site comprises a gap in development within the settlement and is enclosed by vegetation, the study considered that development would fit well within the existing settlement pattern and would have low visual prominence.

**6.914** The presence of a watercourse along the site's southern boundary suggests that flood risk assessment / modelling and early engagement with the County Council and Environment Agency should be required. The potential to accommodate SuDS should be explored along with other measures to help improve water quality in line with the Water Framework Directive objectives.

**6.915** The site was proposed for inclusion in the July 2017 preferred option Local Plan.

#### **Sites (5+ dwellings) - within the current Green Belt**

##### **EN007**

**6.916** The proposed delivery of circa 45 dwellings is considered to have a significant positive effect, as is the site's proximity to services and facilities. Similarly, the site's accessibility to health care and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect, as could its partial location within a flood zone. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

**6.917** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. This site was not taken forward as a preferred option for consultation in April 2016.

##### **EN012**

**6.918** The proposed delivery of circa 24 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area where land is likely to be urban / industrial) is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

**6.919** The site comprises an L-shaped field on the northern edge of Endon, which encloses the recreation ground at the end of Hillswood Drive. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.920** This site was taken forward as a preferred option for consultation in April 2016.

**6.921** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the habitats have limited ecological value however the site has potential to support protected species. Further surveys are required to establish the potential for bat roosts and the presence of reptiles and amphibians.

**6.922** There is one Grade II Listed Building and one Conservation Area within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that there was no inter-visibility between the site and the assets due to the topography and intervening buildings and considered that development would be highly unlikely to adversely affect their settings.

**6.923** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be partly of medium and partly high landscape sensitivity. The study found that development within the eastern section of the site would be only partially screened by surrounding vegetation but that development within the western section of the site, north of the recreation ground, would have higher visual prominence when viewed from the surrounding countryside and risked adversely affecting the existing settlement edge. Site-specific landscape mitigation measures could include additional advanced planting on the northern boundary.

**6.924** There are potential flood risk issues that will require flood risk assessment / modelling and early engagement with the County Council and Environment Agency.

**6.925** The site was not proposed for inclusion in the preferred option Local Plan July 2017.

#### **EN019**

**6.926** The proposed delivery of circa 8 dwellings is considered to have a positive effect. Similarly, the site's accessibility to services, facilities and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

**6.927** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. This site was not taken forward as a preferred option for consultation in April 2016.

#### **EN024 (residential)**

**6.928** The proposed delivery of circa 7 dwellings is considered to have a positive effect. Similarly, the site's accessibility to services, facilities and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect, as could its partial location within a flood zone. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

**6.929** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. The site lies within the area considered to form an important landscape setting to the settlement and is likely to be severely impacted by flood risk; if taken forward it will require the support of the Sequential Test and a Level 2 SFRA.

**6.930** This site was not taken forward as a preferred option for consultation in April 2016.

**EN030**

**6.931** The proposed delivery of circa 10 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land partially within flood zone 2 is assessed as having a negative effect, as is the site's proximity to historic assets.

**6.932** The site lies at the historic core of the village and is adjacent to the Conservation Area. The site is likely to be affected to some degree by flood risk and if taken forward will require the support of the Sequential Test and a Level 2 SFRA. The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.933** This site was not taken forward as a preferred option for consultation in April 2016.

**EN033**

**6.934** The proposed delivery of circa 12 dwellings is considered to have a significant positive effect, as is the accessibility of services and facilities. Similarly, the site's accessibility to health care and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area where land is likely to be urban / industrial) is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

**6.935** Site comprises a small field on the southern edge of the settlement, to the rear of properties on Post Street. The site is bound to the south by an access track to a garage / mechanics business, which encloses the site to the east. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.936** This site was taken forward as a preferred option for consultation in April 2016.

**6.937** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has some potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However more information is required regarding the potential for reptiles and amphibians.

**6.938** There is one Grade II Listed Building and one Conservation Area within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that the nature of the Conservation Area (Caldon Canal) and associated Listed Building means that setting contributes little to their overall significance. The study considered that the site was well screened along its southern boundary which limits inter-visibility between the site and the Conservation Area and found that with vegetation screening along the southern edge of the site, development would be unlikely to cause adverse effects to the setting of the Conservation Area.

**6.939** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the site is generally screened by adjacent development. It considered that views towards the site from the south are available, however found that these are partially screened by intervening vegetation and that the site sits well within the existing development form, as it does not extend beyond existing linear development on Post Lane.

**6.940** There are existing local flood risk issues that suggest flood risk assessment / modelling and early engagement with the County Council and Environment Agency should be required.

**6.941** The site was not proposed for inclusion in the preferred option Local Plan July 2017.

#### **EN079**

**6.942** The proposed delivery of circa 18 dwellings is considered to have a significant positive effect, as is the accessibility of services and facilities. Similarly, the site's accessibility to health care and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect, as could its partial location within a flood zone. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

**6.943** The site forms part of the setting of the Scheduled Monument: Audley's Moat and is likely to be severely impacted by flood risk; if the site is taken forward it will require the support of the Sequential Test and a Level 2 SFRA. The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.944** This site was not taken forward as a preferred option for consultation in April 2016.

#### **EN101**

**6.945** The proposed delivery of circa 54 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

**6.946** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. This site was not taken forward as a preferred option for consultation in April 2016.

#### **EN125**

**6.947** The proposed delivery of circa 14 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to health care and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets.

**6.948** Most of the site is owned by Endon Well Dressing Trustees and is not available for development. The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

## EN126

**6.949** The proposed delivery of circa 12 dwellings is considered to have a significant positive effect, as could its accessibility to services and facilities. Similarly, the site's accessibility to health care and open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which is likely to have a significant negative effect, as could its partial location within a flood zone. The development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area where land is likely to be urban / industrial) is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

**6.950** The site comprises a field on the southern edge of the settlement, north of the canal and adjoining the Caldon Canal Conservation Area. The site is adjacent to linear development on Post Lane but otherwise separated from the settlement edge by EN033. The site is likely to be affected to some degree by flood risk and if taken forward will require the support of the Sequential Test and a Level 2 SFRA. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.951** This site was taken forward as a preferred option for consultation in April 2016.

**6.952** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has some potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However more information is required regarding the potential for bats, reptiles and amphibians.

**6.953** There is one Grade II Listed Building and one Conservation Area within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that the nature of the Conservation Area (Caldon Canal) and associated Listed Building means that setting contributes little to their overall significance. However the study considered that due to the location of the site along the edge of the Conservation Area, mitigation should include stepping development back from the southern boundary, as well as employing vegetation screening along the southern boundary.

**6.954** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of high landscape sensitivity. The study found that the site is currently open, and an important contribution to the existing rural approach to the settlement from the south. The study considered that development within the site would be visually prominent and risked adversely affecting local landscape character and the rural approach to Endon.

**6.955** A small area to the west of the site is within flood zones 2 and 3. The site boundary should be revised to exclude this area and flood risk assessment / modelling and early engagement with the County Council and Environment Agency should be required.

**6.956** The site was not proposed for inclusion in the preferred option Local Plan July 2017.

## Other uses

### EN024 (employment)

**6.957** The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site's accessibility to areas of open countryside, services and facilities and low ecological value is likely to have a positive effect. However, the site is partially located within a flood zone which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets.

**6.958** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. The site lies within the area considered to form an important landscape setting to the settlement and is likely to be severely impacted by flood risk; if taken forward it will require the support of the Sequential Test and a Level 2 SFRA.

**6.959** This site was not taken forward as a preferred option for consultation in April 2016.

## Ipstones

### Sites (5+ dwellings) - within the current development boundary

#### IP019 (partly within development boundary)

**6.960** The proposed delivery of circa 35 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of existing employment is likely to have a positive effect. However, the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area where land is likely to be urban / industrial) is assessed as having a negative effect, as is the site's proximity to designated and historic assets and ecological value.

**6.961** Site comprises a field on the north-western settlement edge, bound by a recreation ground to the south and a cemetery to the north. This site was taken forward as a preferred option for consultation in April 2016.

**6.962** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has some potential to support protected species. The site habitats are considered to be of nature conservation value at site and local level. However more information is required regarding the potential bat roosts.

**6.963** There is one Grade II\* and 27 Grade II Listed Buildings, and one Conservation Area within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that setting is considered to contribute to the overall significance of the heritage assets, in particular the Grade II\* listed church and the Conservation Area. The study considered that development would be likely to adversely affect the setting of the church to the north of the site. These effects could be reduced by restricting development to the eastern half of the site, in line with the existing development to the north, and the use of vegetation screening along the northern boundary.

**6.964** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that the site is enclosed by a tree belt to the south, and generally screened from Church Lane by intervening development and vegetation. The study considered that the site is visually prominent when viewed from the cemetery, and from land to the west. Site-specific landscape mitigation measures could include advance tree planting on the northern and western boundaries, or limiting development to the eastern half of the site.

**6.965** ) Further investigation by the Habitats Regulations Assessment is required due to the site's proximity to a component of the Peak District Dales SAC and the potential for effects of development to result in an in-combination effect in relation to recreational pressure.

**6.966** The site was not proposed for inclusion in the preferred option Local Plan July 2017.

### **Sites (5+ dwellings) - outside the current development boundary**

#### **IP011**

**6.967** The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of existing employment is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

**6.968** The site lies at the historic core of the village. It was not taken forward as a preferred option for consultation in April 2016.

#### **IP012A**

**6.969** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of existing employment is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to historic assets and ecological value.

**6.970** The site lies at the historic core of the village. It was not taken forward as a preferred option for consultation in April 2016.

#### **IP014A**

**6.971** The proposed delivery of circa 35 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of existing employment is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the site's proximity to designated and historic assets.

**6.972** Previous land use may have caused ground contamination that through redevelopment would present a risk to the water environment and human health. The site was not taken forward as a preferred option for consultation in April 2016.

## **IP015**

**6.973** The proposed delivery of circa 22 dwellings is considered to have a significant positive effect, as is the site's proximity to areas of existing employment. Similarly, the site's accessibility to health care and open space is likely to have a positive effect. However, the site is in proximity to a designated asset, Churnet Valley SSSI which is likely to have a significant negative effect, as could the site's proximity to listed assets. The development of greenfield, grade 4 ALC land is assessed as having a negative effect.

**6.974** The site forms part of the setting for New House Farm (Grade II listed). The site was not taken forward as a preferred option for consultation in April 2016.

## **Kingsley**

### **Sites (5+ dwellings) - within the current development boundary**

#### **KG024**

**6.975** The proposed delivery of circa 12 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and the partial brownfield nature of the site is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. The site's proximity to designated and historic assets is likely to have a negative effect, as could the site's ecological value.

**6.976** The site consists of Glebe House (Grade II listed) and its historic curtilage including a medieval moated site. The site was not taken forward as a preferred option for consultation in April 2016.

#### **KG059**

**6.977** The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. Similarly, the site's proximity to historic assets and the development of greenfield, grade 3 ALC land is likely to also have a significant negative effect. The site's proximity to designated assets is likely to have a negative effect.

**6.978** The site forms part of the setting for Church Farm (Grade II listed). The site was not taken forward as a preferred option for consultation in April 2016.

### **Sites (5+ dwellings) - within the current Green Belt**

#### **KG005**

**6.979** The proposed delivery of circa 7 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. Similarly, development of greenfield, grade 3 ALC land is likely to also have a significant negative effect and the site's proximity to historic assets.

**6.980** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

#### **KG019**

**6.981** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. Similarly, development of greenfield, grade 3 ALC land is likely to also have a significant negative effect. The site's proximity to designated and historic assets is likely to have a negative effect.

**6.982** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. This site was not taken forward as a preferred option for consultation in April 2016.

#### **KG026A**

**6.983** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. Similarly, development of greenfield, grade 3 ALC land is likely to also have a significant negative effect. The site's proximity to designated and historic assets is likely to have a negative effect.

**6.984** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

#### **KG026B**

**6.985** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. Similarly, development of greenfield, grade 3 ALC land is likely to also have a significant negative effect.

**6.986** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

#### **KG030A**

**6.987** The proposed delivery of circa 25 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. Similarly, development of greenfield, grade 3 ALC land is likely to also have a significant negative effect. The site's proximity to historic assets is likely to have a negative effect.

**6.988** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

**KG031**

**6.989** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. Similarly, development of greenfield, grade 3 ALC land is likely to also have a significant negative effect. The site's proximity to historic assets is likely to have a negative effect.

**6.990** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

**KG042**

**6.991** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. Similarly, development of greenfield, grade 3 ALC land is likely to also have a significant negative effect. The site's proximity to designated and historic assets is likely to have a negative effect.

**6.992** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

**KG049A**

**6.993** The proposed delivery of circa 35 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. Similarly, development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area where 20 - 60% of the land is likely to be BMV is also likely to have a significant negative effect. The site's proximity to designated and historic assets is likely to have a negative effect.

**6.994** Site comprises the north-western half of a field at on the south-western edge of the village, bound by Cheadle Road (track) to the north-east and residential development to the north-west. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.995** This site was taken forward as a preferred option for consultation in April 2016.

**6.996** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the habitats on site were of nature conservation value at the site level only. Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site supports notable protected species, however

surveys should be undertaken to determine the presence or absence of great crested newt in ponds within 250 m of the site, for signs of badger activity and to determine the use of the site by bats.

**6.997** There are six Grade II Listed Buildings within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that the Listed Buildings are situated along the main road through the village. The study considered that although there may be some inter-visibility, development would be unlikely to cause high adverse effects to their settings.

**6.998** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of high landscape sensitivity. The study found that the site is visually prominent and extends beyond the existing settlement edge. The study considered that development of the site would encroach into the surrounding countryside and could adversely affect the existing settlement pattern and edge.

**6.999** The site was not proposed for inclusion in the preferred option Local Plan July 2017.

## **Additional sites appraised following July 2017 consultation**

### **KG032 (Land at south of the A52)**

**6.1000** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and potential contribution to the viability of Kingsley are likely to have positive effects. However the site is relatively inaccessible to services and facilities and areas of existing employment, both of which is likely to have a negative effect. Similarly, development of greenfield, grade 3 ALC land in the Green Belt and indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be best and most versatile, is likely to have a negative effect. The potential ecological value of the site and its proximity to heritage assets are also likely to have a negative effect. An applicant should be required to provide an NPPF compliant heritage statement and to undertake further ecological and landscape impact assessments.

**6.1001** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

### **Upper Tean**

#### **Sites (5+ dwellings) - within the current development boundary**

##### **UT011/014**

**6.1002** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to health care and areas of existing employment is likely to have a positive effect. However, the site is partially located within a flood zone which is likely to have a significant negative effect. The site's proximity to historic assets and ecological value is likely to have a negative effect.

**6.1003** This area covers the site of the former dye works to Tean Hall Mill. Archaeological and heritage assessment will be required. The sites are likely to be severely impacted by flood risk; if taken forward they will require the support of the Sequential Test and a Level 2 SFRA.

**6.1004** The sites were not taken forward as a preferred option for consultation in April 2016.

#### **UT019**

**6.1005** The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect as could the development of brownfield land indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban. However the site is located in proximity to historic assets which is likely to have a significant negative effect. The site's inaccessibility to areas of existing employment is likely to have a negative effect.

**6.1006** The site is an existing depot within the centre of the settlement, south of St Thomas's Road. It is within the Upper Tean Conservation Area and adjoins several properties on the High Street that are Grade II listed; a Heritage Impact Assessment will be required.

**6.1007** This site was taken forward as a preferred option for consultation in April 2016.

**6.1008** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has low potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However more information is required regarding the scattered trees on site in order to establish their ecological importance.

**6.1009** There are two Grade II\* and ten Grade II Listed Buildings within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that the site is currently used as a work yard which adversely affects the character of the Conservation Area and the Listed Buildings. The study considered that sensitive development could enhance the Conservation Area. Master-planning should be required to identify mitigation measures that could include vegetation screening along the southern boundary to reduce effects to the settings of the Listed Buildings.

**6.1010** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the site is enclosed by development on all sides, and considered that it is not visually prominent and fits within the settlement pattern. As a previously developed site, the risk of contamination should be addressed.

**6.1011** The site was proposed for inclusion in the preferred option Local Plan July 2017.

#### **Sites (5+ dwellings) - within the current Green Belt**

#### **UT012**

**6.1012** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to health care and areas of existing employment is likely to have a positive effect. However, the site is partially located within a flood zone which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect as could the site's proximity to historic assets.

**6.1013** The site is likely to be impacted by flood risk to some degree and if taken forward will require the support of the Sequential Test and a Level 2 SFRA. The site has outline planning permission for up to 67 dwellings (SMD/2015/0424).

#### **UT018**

**6.1014** The proposed delivery of circa 25 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to health care and areas of existing employment is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is likely to have a significant negative effect. The ecological value of the site is likely to have a negative effect.

**6.1015** This site was not taken forward as a preferred option for consultation in April 2016.

#### **UT021**

**6.1016** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is likely to have a significant negative effect. The ecological value of the site and its proximity to historic assets is likely to have a negative effect.

**6.1017** This site was not taken forward as a preferred option for consultation in April 2016.

#### **UT022**

**6.1018** The proposed delivery of circa 15 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is likely to have a significant negative effect, as could the site's partial location within a flood zone. The site's proximity to historic assets is likely to have a negative effect.

**6.1019** The site is likely to be affected to some degree by flood risk; if taken forward it will require the support of the Sequential Test and a Level 2 SFRA. The site was not taken forward as a preferred option for consultation in April 2016.

#### **UT023**

**6.1020** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is likely to have a significant negative effect, as could the site's partial location within a flood zone. The site's proximity to historic assets and ecological value is likely to have a negative effect.

**6.1021** This site was not taken forward as a preferred option for consultation in April 2016.

#### **UT024**

**6.1022** The proposed delivery of circa 40 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the development of greenfield, grade 3 ALC land is likely to have a significant negative effect. The site's proximity to historic assets is likely to have a negative effect.

**6.1023** This site was not taken forward as a preferred option for consultation in April 2016.

#### **UT041**

**6.1024** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of existing employment and open space is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to historic assets.

**6.1025** This site was not taken forward as a preferred option for consultation in April 2016.

### **Additional sites appraised following July 2017 consultation**

#### **Land at Uttoxeter Road, Upper Tean**

**6.1026** The proposed delivery of circa 60 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment and other services and facilities within Upper Tean. However, the development of greenfield, grade 3 ALC land indicated on Natural England's predictive map of best and most versatile agricultural land as within an area where greater than 60% of the land is likely to be BMV is likely to have a significant negative effect. Similarly the potential landscape impact, ecological value of the site and its proximity to heritage assets are all likely to have a negative effect. An applicant should be required to provide an NPPF compliant heritage statement, landscape impact and ecological appraisals.

**6.1027** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

#### **The Wentlows, 64 Cheadle Road**

**6.1028** The proposed delivery of circa 24 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to open space and health care is likely to have a positive effect, as is its location outside flood zones 2 and 3. However the site is considered to form part of Local Green Space 45 and as such its development could be expected to result in negative effects on the social and environmental quality of the village centre. Similarly the impact on green infrastructure and contribution to ecological networks is likely to lead to a negative effect. The site lies within the mineral safeguarding areas for bedrock sand and superficial sand and gravel which is also likely to have a negative effect, as is the site's proximity to heritage assets. An applicant should be required to provide an NPPF compliant heritage statement. Landscape impact and ecological surveys are also required.

**6.1029** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

## Waterhouses

### Sites (5+ dwellings) - within the current development boundary

#### WA004 (mixed use)

**6.1030** The proposed delivery of circa 36 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the site's proximity to a designated asset is likely to have a negative effect. The development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban) is likely to also have a negative effect, as could the site's proximity to historic assets and the inaccessibility of areas of existing employment.

**6.1031** The site comprises Waterhouses Enterprise Centre and the adjacent fields on the western edge of the village, north of the A523. The Council's ecological study has indicated that the northern section of the site has some semi-improved grassland which is of importance. Appropriate conservation and mitigation measures will need to be considered.

**6.1032** This site was taken forward as a preferred option for consultation in April 2016.

**6.1033** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has some potential to support protected species. The semi-improved, species-rich neutral grassland was considered to be of district importance as it is fairly uncommon within the locality. The other site habitats are considered to be of nature conservation value at site level only. However a detailed grassland vegetation survey is required.

**6.1034** There are four Grade II Listed Buildings within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that sensitive development would be highly unlikely to cause adverse effects to the settings of the assets due to the intervening buildings and vegetation. Master-planning should be required.

**6.1035** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that the site is open and located beyond the existing settlement edge, however due to the topography and vegetation within the surrounding landscape, and the existing development within Waterhouses, views of the site are limited. The study considered that development within the site would be partially visible from the National Park, however it would be viewed behind existing development in Waterhouses. Site-specific landscape mitigation measures could include additional advanced planting on the western and northern boundaries, and limited building heights and sizes. The presence of the semi-improved grassland on site will also need to be addressed.

**6.1036** Further investigation by the Habitats Regulations Assessment is required due to the site's proximity to a component of the Peak District Dales SAC and the potential for effects of development to result in an in-combination effect in relation to recreational pressure.

**6.1037** The site was proposed for inclusion in the preferred option Local Plan July 2017.

### **Sites (5+ dwellings) - outside the current development boundary**

#### **WA005**

**6.1038** The proposed delivery of circa 40 dwellings is considered to have a significant positive effect, as is the site accessibility to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the site's proximity to a designated asset is likely to have a negative effect. The development of greenfield, grade 4 ALC land is likely to also have a negative effect, as could the site's proximity to historic assets.

**6.1039** This site was not taken forward as a preferred option for consultation in April 2016.

#### **WA006**

**6.1040** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect, as is the site accessibility to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect. However, the site's proximity to a designated asset is likely to have a negative effect. The development of greenfield, grade 4 ALC land is likely to also have a negative effect, as could the site's proximity to historic assets.

**6.1041** This site was not taken forward as a preferred option for consultation in April 2016.

### **Werrington & Cellarhead**

#### **Sites (5+ dwellings) - within the current development boundary**

#### **WE018**

**6.1042** The proposed delivery of circa 24 dwellings is considered to have a significant positive effect, as is the accessibility of services and facilities. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated assets. Similarly, the site's proximity to historic assets is assessed as having a negative effect.

**6.1043** Site has planning consent for 31 dwellings (SMD/2014/0764).

#### **Sites (5+ dwellings) - within the current Green Belt**

#### **WE003**

**6.1044** The proposed delivery of circa 85 dwellings is considered to have a significant positive effect, as is the accessibility of services and facilities. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated assets. Similarly, the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban) and the site's proximity to historic assets is assessed as having a negative effect.

**6.1045** A relatively large site on the southern edge of Werrington, comprising three fields generally enclosed by development. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated and with the northern part of the site being open space to preserve its openness. The capacity of this site has been lowered from 85 to 50 dwellings to take this into account.

**6.1046** This site was taken forward as a preferred option for consultation in April 2016.

**6.1047** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered that the site has some potential to support protected species. The site habitats are considered to be of nature conservation value at site level only. However more information is required regarding the potential for bat roosts on site.

**6.1048** There is one Grade II Listed Building within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that due to the intervening buildings, there was no inter-visibility between the site and the asset. The study considered that development would be highly unlikely to adversely affect the setting of the asset.

**6.1049** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that vegetation is located on the southern boundary, however due to the sloping nature of the site, it provides limited screening. The study considered that the site forms a gap in existing development and fits well within the existing settlement pattern. Site-specific landscape mitigation measures could include planting on the south-eastern and southern boundaries. Presence of species rich hedgerows need to be addressed.

**6.1050** The site was proposed for inclusion in the preferred option Local Plan July 2017.

### **WE013**

**6.1051** The proposed delivery of circa 10 dwellings is considered to have a significant positive effect, as is the accessibility of services and facilities. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated assets. Similarly, the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban) and the site's proximity to historic assets is assessed as having a negative effect.

**6.1052** Site comprises Little Ash Farm, a single residential property, and the surrounding grounds. The site lies within the area considered to form an important landscape setting to the settlement. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1053** This site was taken forward as a preferred option for consultation in April 2016.

**6.1054** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered WE013 and WE027 together and found that the habitats on site were of nature conservation value at the site level only. Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site supports notable protected species.

**6.1055** There are two Grade II Listed Building within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that due to the intervening buildings, there was no inter-visibility between the site and the assets. The study considered that development would be highly unlikely to adversely affect the settings of the assets.

**6.1056** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that the site is located to the rear of linear development on the A52 and is enclosed by trees and hedgerows to the south, resulting in low visual prominence. Site-specific landscape mitigation measures could include planting on the south-eastern boundary.

**6.1057** The site is adjacent to a watercourse with no mapped floodplain; the flood risk to the site should be quantified. The site was not proposed for inclusion in the preferred option Local Plan July 2017.

#### **WE019**

**6.1058** The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated assets. Similarly, the development of greenfield, grade 4 ALC land and the site's proximity to historic assets is assessed as having a negative effect.

**6.1059** This allocation would extend the settlement closer to Wetley Moor SSSI such that new housing would be within 150m of the SSSI at the nearest point. The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

#### **WE027**

**6.1060** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect, as could the site's accessibility to services and facilities. Similarly, the site's to areas of open space is likely to have a positive effect. However, the site's accessibility to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated assets. Similarly, the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban) and the site's proximity to historic assets is assessed as having a negative effect.

**6.1061** Land to the rear of linear development on the A52, to the east of Ash Farm; the site lies within the area considered to form an important landscape setting to the settlement. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1062** This site was taken forward as a preferred option for consultation in April 2016.

**6.1063** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered WE013 and WE027 together and found that the habitats on site were of nature conservation value at the site level only. Species recorded on site were common and widespread both at a county and national level and it is considered unlikely that the site supports notable protected species.

**6.1064** There are two Grade II Listed Building within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that due to the intervening buildings, there was no inter-visibility between the site and the assets. The study considered that development would be highly unlikely to adversely affect the settings of the assets.

**6.1065** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found the site has low visual prominence and is generally enclosed by development and vegetation, although the vegetation on the southern boundary is more sparse.

**6.1066** The site is adjacent to a watercourse with no mapped floodplain; the flood risk to the site should be quantified. The site was not proposed for inclusion in the preferred option Local Plan July 2017.

#### **WE033**

**6.1067** The proposed delivery of circa 60 dwellings is considered to have a significant positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect. Similarly, the site's inaccessibility to services and facilities and areas of open space is likely to have a negative effect. Also, the site's ecological value is likely to have a negative effect, as could the development of greenfield, grade 4 ALC land and the site's proximity to historic assets is assessed as having a negative effect.

**6.1068** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

#### **WE040**

**6.1069** The proposed delivery of circa 7 dwellings is considered to have a positive effect, as is the accessibility to services and facilities and areas of open space. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated and historic assets. Similarly, the development of greenfield, grade 4 ALC land is likely to have a negative effect.

**6.1070** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. The site lies within the area considered to form an important landscape setting to the settlement and the allocation would extend the settlement closer to Wetley Moor SSSI such that new housing would be within 150m of the SSSI at the nearest point.

**6.1071** This site was not taken forward as a preferred option for consultation in April 2016.

#### **WE041**

**6.1072** The proposed delivery of circa 22 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated and historic assets. Similarly, the development of greenfield, grade 4 ALC land is likely to have a negative effect.

**6.1073** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. The site lies within the area considered to form an important landscape setting to the settlement and the allocation would extend the settlement closer to Wetley Moor SSSI such that new housing would be within 150m of the SSSI at the nearest point.

**6.1074** This site was not taken forward as a preferred option for consultation in April 2016.

#### **WE052**

**6.1075** The proposed delivery of circa 25 dwellings is considered to have a significant positive effect, as is the site's accessibility to services and facilities. Similarly, the site's accessibility to open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect. The site's proximity to designated and historic assets is likely to have a negative effect, as could the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban).

**6.1076** A relatively large site on the southern edge of Werrington, comprising three fields generally enclosed by development except for the southern edge which is open. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1077** This site was taken forward as a preferred option for consultation in April 2016.

**6.1078** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered the site habitats to be of nature conservation value at site level only and not eligible for possible SBI / BAS status. However the five trees on site have the potential to support bats and as such require further assessment.

**6.1079** There is one Grade II Listed Building within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that due to the intervening buildings, there was no inter-visibility between the site and the asset. The study considered that development would be highly unlikely to adversely affect the setting of the asset.

**6.1080** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found vegetation is located on the southern boundary, however due to the sloping nature of the site it provides limited screening. The study considered that the site forms a gap in existing development and fits well within the existing settlement pattern. Site-specific landscape mitigation measures could include planting on the south-eastern and southern boundaries.

**6.1081** The site was proposed for inclusion in the preferred option Local Plan July 2017.

#### **WE053**

**6.1082** The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to historic assets. The site's proximity to designated assets is likely to have a negative effect, as could the development of greenfield, grade 4 ALC land.

**6.1083** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

#### **WE069**

**6.1084** The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to services and facilities and areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to historic assets. The site's proximity to designated assets is likely to have a negative effect, as could the development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban).

**6.1085** The site is a small field on the southern edge of Werrington, north-east of Square Meadow Farm and enclosed by linear development on the A52 to the east and west. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1086** This site was taken forward as a preferred option for consultation in April 2016.

**6.1087** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered the site habitats to be of nature conservation value at site level only and not eligible for possible SBI / BAS status. The site has limited ecological value and is unlikely to support any protected species other than foraging bats, birds and badgers. However the 5 trees on site require further assessment.

**6.1088** There is one Grade II Listed Building within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that due to the intervening buildings, there was no inter-visibility between the site and the asset. The study considered that development would be highly unlikely to adversely affect the setting of the asset.

**6.1089** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found the site is bound to the north by the A52, with a thick hedgerow on the northern boundary generally screening views from the road. The study considered the site to have low visual prominence, including when viewed from the south as screening is provided by intervening vegetation and development.

**6.1090** The site was not proposed for inclusion in the preferred option Local Plan July 2017.

#### **WE070**

**6.1091** The proposed delivery of circa 12 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect. The site's proximity to designated and historic assets is likely to have a negative effect, as could the development of greenfield, grade 4 ALC land.

**6.1092** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. The site lies within the area considered to form an important landscape setting to the settlement. It is noted that the land owner has stated that the site is not available for development.

**6.1093** This site was not taken forward as a preferred option for consultation in April 2016.

#### **Other uses**

##### **WE001**

**6.1094** The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site's low ecological value is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the proximity to historic assets and distance away from services and facilities and areas of open space.

**6.1095** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. This site was not taken forward as a preferred option for consultation in April 2016.

##### **WE002**

**6.1096** The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. However, the remote nature of the site is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as having a negative effect, as is the proximity to historic assets, ecological value and distance away from services and facilities and areas of open space.

**6.1097** It was not considered that the site was required to meet the District's rural employment land needs. This site was not taken forward as a preferred option for consultation in April 2016.

#### **Additional sites appraised June 2017**

##### **WE042 / WE043 (Land off Tregaron Court/Langton Court)**

**6.1098** The proposed delivery of circa 105 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated assets. Similarly, the development of greenfield land with the potential for loss of best and most versatile agricultural land and the site's proximity to historic assets is assessed as having a negative effect.

**6.1099** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated. This site was not taken forward as a preferred option for consultation in July 2017.

**Additional sites appraised following July 2017 consultation****WE064**

**6.1100** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. Similarly, the development of an open countryside greenfield, grade 4 ALC land within the Green Belt and the mineral safeguarding area for bedrock sand and silica sand is assessed as having a negative effect, as is the proximity to historic assets. The site is within 100m from a candidate AQMA, there is potential for negative impact on air quality.

**6.1101** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

**Wetley Rocks****Suitable sites (5+ dwellings) - within the current development boundary****WR002**

**6.1102** The proposed delivery of circa 29 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and low ecological importance of the site is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect, as could the site's proximity to designated and historic assets. The development of greenfield, grade 4 ALC land is likely to have a negative effect.

**6.1103** The site lies within the area considered to form an important landscape setting to the settlement. It was not considered necessary to include the site as an allocation in the Plan since it lies within the existing development boundary. Part of the site has existing permission for residential development.

**6.1104** This site was not taken forward as a preferred option for consultation in April 2016.

**WR015 (small part of site only is within development boundary)**

**6.1105** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and low ecological value of the site is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. The development of greenfield land (indicated on the predictive map of Best and Most Versatile agricultural land as within an area likely to be urban) is likely to have a negative effect, as could the site's proximity to historic assets.

**6.1106** Site comprises a field within the north-east of the settlement, located to the rear of linear development on the A520 and south of Mill Lane. The site lies within the area considered to form an important landscape setting to the settlement. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1107** This site was taken forward as a preferred option for consultation in April 2016.

**6.1108** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered the site habitats to be of nature conservation value at local level only, although they have some potential to support protected species such as Badger, Brown hare, Hedgehog and foraging bats.

**6.1109** There are three Grade II Listed Buildings within the 400m buffer. The Landscape, Local Green Space and Heritage Impact Study (August 2016) found that development would have the potential to adversely affect the setting of the church to the north-west of the site. The study considered that a mitigation strategy including the use of vegetation screening along the north-west and southern boundaries of the site would reduce effects to the heritage assets.

**6.1110** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of low landscape sensitivity. The study found that the site is enclosed by Mill Lane to the north, linear development on the A520 to the south as well as development to the west, resulting in relatively low visual prominence. The study considered that the site fits well within the existing settlement form as it forms a gap in development on Mill Lane.

**6.1111** There are local issues with surface water flooding, including a poor quality culvert downstream under Leek Road, early engagement with the Environment Agency and County Council flood team should be required.

**6.1112** The site was not proposed for inclusion in the preferred option Local Plan July 2017.

#### **Sites (5+ dwellings) - within the current Green Belt**

##### **WR005**

**6.1113** The proposed delivery of circa 13 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to historic assets and ecological value.

**6.1114** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

##### **WR014A**

**6.1115** The proposed delivery of circa 12 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment and services and facilities which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to historic assets and ecological value.

**6.1116** The site lies within the area considered to form an important landscape setting to the settlement. The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

### **Additional sites appraised following July 2017 consultation**

#### **Land to the rear of SMD/2016/0609 (Land at Leek Road)**

**6.1117** The proposed delivery of circa 25 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and the village centre of Wetley Rocks is likely to have a positive effect. However, the site is relatively inaccessible to wider services and facilities, including areas of existing employment, which is likely to have a negative effect, as could the site's proximity to heritage assets. The development of greenfield land in the green belt, forming part of the important landscape setting to the settlement, and indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be best and most versatile, is likely to have a negative effect. An applicant should be required to provide an NPPF compliant heritage statement, as well as landscape impact and ecological assessments.

**6.1118** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

#### **WR024 (Playing field between Randles Lane and Leek Road)**

**6.1119** The proposed delivery of circa 25 dwellings is considered to have a significant positive effect. Similarly, the site's location outside of flood zones 2 and 3 and its potential to make a contribution to the viability of the village of Wetley Rocks are considered to be positive effects. However development of the site would result in the loss of a playing field and children's play space and the associated loss of amenity and impact on health is likely to have a significant negative effect. Similarly the site's inaccessibility to areas of existing employment and other services and facilities is likely to have a significant negative effect. The development of a greenfield site in the green belt and within the important landscape setting to the settlement and mineral safeguarding area for silica sand is likely to result in negative effects, as could the site's proximity to heritage assets and potential ecological value. An applicant should be required to provide an NPPF compliant heritage statement, as well as landscape impact and ecological assessments.

**6.1120** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

### **Smaller Villages**

#### **Bagnall**

##### **Sites (5+ dwellings) - within the current Green Belt**

#### **BG008**

**6.1121** The proposed delivery of circa 10 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However,

the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land and the ecological value of the site is likely to also have a negative effect.

**6.1122** This site is in Bagnall Conservation Area and the impact of development on the historic settlement form requires further consideration. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1123** Bagnall is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed in to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **BG014**

**6.1124** The proposed delivery of circa 10 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land and the ecological value of the site is likely to also have a negative effect.

**6.1125** The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.1126** Bagnall is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **BG015**

**6.1127** The proposed delivery of circa 10 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land and the ecological value of the site is likely to also have a negative effect.

**6.1128** The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.1129** Bagnall is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

**Blackshaw Moor****Sites (5+ dwellings) - within the draft infill boundary****BL006**

**6.1130** The proposed delivery of circa 12 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land and the ecological value of the site is likely to have a negative effect.

**6.1131** Blackshaw Moor is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

**BL007**

**6.1132** The site's accessibility to areas of existing employment is considered to have a significant positive effect. The proposed delivery of 7 dwellings is likely to have a positive effect, as could the site's accessibility to areas of open space. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect.

**6.1133** Blackshaw Moor is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

**OC050 Former Anzio Camp**

**6.1134** The potential delivery of some housing and extra care units is considered to have a positive effect, as could the site's accessibility to areas of open space and possible contribution to investment in tourism. However the site is inaccessible to services and facilities which is likely to have a significant negative effect, as is the potential impact on landscape character and the setting of the Peak District National Park. Similarly the proximity to an SBI is likely to lead to negative effects.

**Caverswall****Sites (5+ dwellings) - within the infill boundary****CV005**

**6.1135** The proposed delivery of circa 10 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing

employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land and the site's proximity to historic assets. The ecological value of the site is likely to have a negative effect.

**6.1136** This site is in the Conservation Area and the impact of development on the historic settlement form requires further consideration.

**6.1137** Caverswall is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

### **Sites (5+ dwellings) - within the current Green Belt**

#### **CV004**

**6.1138** The proposed delivery of circa 8 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and low ecological value of the site is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land and the site's proximity to historic assets.

**6.1139** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1140** Caverswall is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **CV006**

**6.1141** The proposed delivery of circa 8 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land and the site's proximity to historic assets. The ecological value of the site is likely to have a negative effect.

**6.1142** This site is in the Conservation Area and the impact of development on the historic settlement form requires further consideration. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1143** Caverswall is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new

homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

## **Cookshill**

### **Sites (5+ dwellings) - within the current Green Belt**

#### **CL004**

**6.1144** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and location away from historic assets is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land. The ecological value of the site is likely to have a negative effect.

**6.1145** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1146** Cookshill is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **CL007**

**6.1147** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land. The ecological value of the site and its proximity to historic assets is likely to have a negative effect.

**6.1148** The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.1149** Cookshill is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

## Checkley

### Sites (5+ dwellings) - outside the infill boundary

#### CK007

**6.1150** The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and low ecological value is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land. The site's proximity to historic assets is likely to have a negative effect.

**6.1151** Checkley is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### CK008

**6.1152** The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and low ecological value is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land. The site's proximity to historic assets is likely to have a negative effect.

**6.1153** Checkley is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

## Dilhorne

### Sites (5+ dwellings) - within the Green Belt

#### DH004

**6.1154** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and distance from designated assets is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land is likely to have a negative effect.

**6.1155** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1156** Dilhorne is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **DH013**

**6.1157** The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and distance from designated assets is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land is likely to have a negative effect.

**6.1158** The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.1159** Dilhorne is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **DH018**

**6.1160** The proposed delivery of circa 7 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's ecological value.

**6.1161** The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.1162** Dilhorne is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **DH026**

**6.1163** The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's ecological value and proximity to historic assets.

**6.1164** The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.1165** Dilhorne is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

### **Draycott**

#### **Sites (5+ dwellings) - within the current Green Belt**

##### **DC003**

**6.1166** The proposed delivery of circa 10 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect, as could the site's proximity to historic assets and development of greenfield, grade 3 ALC land. The site's ecological value is likely to have a negative effect.

**6.1167** The site is adjacent to the Old Rectory (Grade II listed), a heritage impact assessment will be required. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1168** Draycott is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

### **Foxt**

#### **Sites (5+ dwellings) - outside the draft infill boundary**

##### **FO008**

**6.1169** The site has good accessibility to areas of existing employment which is likely to have a significant positive effect. Similarly, the proposed delivery of circa 8 dwellings is considered to have a positive effect, as could the site's accessibility to areas of open space. However, the site is inaccessible to services and facilities and is in proximity to designated assets, both of which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to historic assets.

**6.1170** Foxt is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes.

Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

## Hollington

### Potentially suitable sites (5+ dwellings) - outside the draft Infill Boundary

#### HO002

**6.1171** The proposed delivery of circa 7 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and location away from designated assets is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land is likely to have a negative effect.

**6.1172** The site is located in a sensitive area close to Hollington House (Grade II listed), a heritage impact assessment will be required.

**6.1173** Hollington is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### HO003

**6.1174** The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and location away from designated assets is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment, both of which is likely to have a significant negative effect, as could the site's proximity to historic assets. The development of greenfield, grade 4 ALC land is likely to have a negative effect.

**6.1175** The site is located in a sensitive area close to Hollington House (Grade II listed), a heritage impact assessment will be required.

**6.1176** Hollington is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

## Hulme

### Sites (5+ dwellings) - within the current Green Belt

#### HU002

**6.1177** The proposed delivery of circa 5 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space, areas of existing employment and location away from historic assets is likely to have a positive effect, as could the development of brownfield land. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to designated assets.

**6.1178** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1179** Hulme is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

## Kingsley Holt

### Sites (5+ dwellings) - within the infill boundary

#### KH018

**6.1180** The proposed delivery of circa 8 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and areas of existing employment is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to designated assets. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to historic assets.

**6.1181** Kingsley Holt is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

### Sites (5+ dwellings) - outside the infill boundary

#### KH009

**6.1182** The proposed delivery of circa 9 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space and areas of existing employment is likely to have a positive effect, as could its location away from historic assets and the development of brownfield land. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to designated assets.

**6.1183** Kingsley Holt is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **ADD007**

**6.1184** The proposed delivery of circa 52 dwellings is considered to have a significant positive effect. The site's accessibility to areas of existing employment is considered to have a positive effect. However, the site's inaccessibility to services and facilities is likely to have a significant negative effect. Similarly, the site's proximity to designated and historic assets is likely to have a negative effect, as could the development of greenfield, grade 4 ALC land.

**6.1185** Kingsley Holt is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **Leekbrook**

##### **Sites (5+ dwellings) - within the infill boundary**

#### **LB006**

**6.1186** The site's accessibility to areas of existing employment is likely to have a significant positive effect. Similarly, the proposed delivery of circa 6 dwellings is considered to have a positive effect, as could the site's accessibility to areas of open space and its location away from designated and historic assets. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect.

**6.1187** Leekbrook is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

##### **Sites (5+ dwellings) - outside the infill boundary**

#### **LB011**

**6.1188** The site's accessibility to areas of existing employment is likely to have a significant positive effect. Similarly, the proposed delivery of circa 6 dwellings is considered to have a positive effect, as could the site's accessibility to areas of open space and its location away from designated and historic assets. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect.

**6.1189** Leekbrook is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes.

#### **LB012**

**6.1190** The site's accessibility to areas of existing employment is likely to have a significant positive effect. Similarly, the proposed delivery of circa 6 dwellings is considered to have a positive effect, as could the site's accessibility to areas of open space and its location away from designated and historic assets. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect.

**6.1191** Leekbrook is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **Longsdon**

##### **Sites (5+ dwellings) - (partly) within the draft infill boundary (and partly in Green Belt)**

#### **LO002**

**6.1192** The proposed delivery of circa 10 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to designated and historic assets.

**6.1193** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1194** Longsdon is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **LO007**

**6.1195** The proposed delivery of circa 5 dwellings is considered to have a positive effect, as could the site's accessibility to areas of open space. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to designated and historic assets.

**6.1196** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1197** Longsdon is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

### **Sites (5+ dwellings) - (mostly) within the current Green Belt**

#### **LO021**

**6.1198** The proposed delivery of circa 13 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is likely to have a negative effect, as could the site's proximity to designated and historic assets.

**6.1199** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1200** Longsdon is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

### **Lower Tean**

#### **Sites (5+ dwellings) - outside the infill boundary**

#### **LT001**

**6.1201** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land and proximity to historic assets. The site's proximity to designated assets and the inaccessibility of areas of existing employment are likely to have a negative effect.

**6.1202** The site adjoins Willowgate (Grade II listed), a heritage impact assessment will be required.

**6.1203** Lower Tean is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

## **LT002**

**6.1204** The proposed delivery of circa 6 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the development of greenfield, grade 3 ALC land and proximity to historic assets. The site's proximity to designated assets and the inaccessibility of existing employment are likely to have a negative effect.

**6.1205** The site is located close to the historic core of the village and there are listed buildings adjacent to the site. Heritage impact assessment will be required.

**6.1206** Lower Tean is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

## **Oakamoor**

### **Sites (5+ dwellings) - (access point) within infill boundary**

#### **OA026**

**6.1207** The proposed delivery of circa 11 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to designated and historic assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1208** Oakamoor is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

### **Sites (5+ dwellings) - outside infill boundary**

#### **OA016**

**6.1209** The proposed delivery of circa 9 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to designated and historic assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1210** Oakamoor is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new

homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

### **OA030**

**6.1211** The proposed delivery of circa 23 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to designated and historic assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1212** The site lies within the area considered to form an important landscape setting to the settlement. Oakamoor is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

### **OA31**

**6.1213** The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to designated and historic assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1214** The site lies within the area considered to form an important landscape setting to the settlement. Oakamoor is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

## **Rudyard**

### **Sites (5+ dwellings) - within current Green Belt**

#### **RU016**

**6.1215** The proposed delivery of circa 13 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and location away from historic assets are likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to designated assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1216** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1217** Rudyard is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **RU020**

**6.1218** The proposed delivery of circa 14 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to historic assets, the ecological value of the site and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1219** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1220** Rudyard is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **Rushton Spencer**

##### **Sites (5+ dwellings) - within infill boundary**

#### **RS005**

**6.1221** The proposed delivery of circa 7 dwellings is considered to have a positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to historic assets, the ecological value of the site and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1222** Rushton Spencer is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

##### **Sites (5+ dwellings) - within current Green Belt**

#### **RS009**

**6.1223** The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing

employment which are likely to have a significant negative effect. The site's proximity to historic assets, the ecological value of the site and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1224** The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.1225** Rushton Spencer is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **Potentially suitable sites (5+ dwellings) - outside infill boundary**

##### **RS007**

**6.1226** The proposed delivery of circa 26 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to historic assets, the ecological importance of the site and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1227** Rushton Spencer is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

##### **RS015**

**6.1228** The proposed delivery of circa 12 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to historic assets, the ecological value of the site and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1229** Rushton Spencer is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

## Stockton Brook

### Sites (5+ dwellings) - within the current Green Belt

#### SB014

**6.1230** The proposed delivery of circa 10 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and location away from historic assets are likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's ecological importance and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1231** The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1232** Stockton Brook is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes.

#### SB016

**6.1233** The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to historic assets, ecological value and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1234** The site adjoins Caldon Canal Conservation Area and four listed buildings are within 100m; a heritage impact assessment will be required. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.

**6.1235** Stockton Brook is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### ADD08

**6.1236** The proposed delivery of circa 40 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and location away from designated assets are likely to have a positive effect. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to historic assets and ecological value are likely to have a negative effect.

**6.1237** The Council's Green Belt review did not recommend considering the site for release from the Green Belt.

**6.1238** Stockton Brook is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

## **Whiston**

### **Sites (5+ dwellings) - outside the infill boundary**

#### **WH002**

**6.1239** The proposed delivery of circa 10 dwellings and proximity to areas of existing employment is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect, as could the site's proximity to designated and historic assets.

**6.1240** Previous land use may have caused contamination of the ground and redevelopment may pose a risk to the water environment - a risk assessment is required. Whiston Brook is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **WH009A**

**6.1241** The proposed delivery of circa 15 dwellings and proximity to areas of existing employment is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect. The site's proximity to designated and historic assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1242** Whiston Brook is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **WH015**

**6.1243** The site's proximity to areas of existing employment is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and the proposed delivery of circa 6 dwellings are likely to have a positive effect. However, the site is inaccessible to services and facilities is likely to have a significant negative effect. The site's proximity to designated and historic assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1244** Whiston Brook is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **WH016**

**6.1245** The site's proximity to areas of existing employment is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and the proposed delivery of circa 6 dwellings are likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect. The site's proximity to designated and historic assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1246** Whiston Brook is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **WH018**

**6.1247** The site's proximity to areas of existing employment is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and the proposed delivery of circa 5 dwellings are likely to have a positive effect. However, the site is inaccessible to services and facilities which is likely to have a significant negative effect. The site's proximity to designated and historic assets and the development of greenfield, grade 4 ALC land are likely to have a negative effect.

**6.1248** Whiston Brook is defined in the Core Strategy as a smaller village. In line with the proposed development approach no site allocations were proposed as preferred options for consultation in April 2016. An infill boundary was proposed to accommodate delivery of new homes. Similarly no site allocations were proposed as preferred options for consultation in July 2017, however the infill boundary proposal was replaced by a criteria based approach to support sustainable infill development.

#### **Other Areas**

##### **Sites (5+ dwellings) - within current Green Belt**

##### **OC003 (south of Hulme)**

**6.1249** The development of brownfield, grade 4 ALC land is considered to have a positive effect, as could the site's accessibility to areas of open space and the proposed delivery of circa 6 dwellings. However, the site is inaccessible to services and facilities and areas of existing employment which are likely to have a significant negative effect. The site's proximity to designated and historic assets are likely to have a negative effect.

**6.1250** The Council's Green Belt review did not recommend considering the site for release from the Green Belt. This site was not taken forward as a preferred option for consultation in April 2016.

## **Sites (5+ dwellings) - outside infill boundary**

### **OC001 (Bolton Copperworks, Froghall) - mixed use**

**6.1251** The proposed delivery of a mixed use development including the potential for housing, employment, leisure and tourist-related retail and accommodation is considered to have a significant positive effect, as could the site's accessibility to areas of open space and possible contribution to investment in tourism. Re-development of a previously developed site, now under-used, is also considered to have positive effects. However the site is inaccessible to services and facilities which is likely to have a significant negative effect, as is the potential impact on landscape character and heritage assets. Similarly the proximity to a SSSI and SBI and proposals for development on land in Flood Zones 2 and 3 are likely to lead to negative effects.

**6.1252** This is a major developed area identified in the Core Strategy and a key opportunity site identified in the Churnet Valley Masterplan. The site is a former copper works, with existing industrial development in the centre of the site adjacent to Froghall Road and the A52, and hard-standing where previous development stood in the north and south of the site.

**6.1253** The Extended Phase 1 Habitat Surveys and Local Wildlife Site Assessment (May 2017) considered the majority of the site to be made up of habitats of conservation value at site level only (i.e. hard standing and buildings, scattered trees and scrub, tall ruderal vegetation and amenity grassland). Although relatively small in area, the river Churnet and its tributary were found to be prominent habitat features of the site and to provide excellent connectivity with the surrounding landscape to the north-east, south-east and north-west. For this reason the river habitat was considered to be of importance to conservation at the local level. Similarly, the broad-leaved semi-natural woodland running alongside the Caldon Canal is an important connecting feature with the surrounding landscape and was also considered to be of importance to conservation at the local level. Species recorded on site were common and widespread both at a county and national level. Nevertheless the site has potential to support a number of notable protected species; pond surveys are required for great crested newts; along with surveys for bat roosts, badger and reptiles; whilst otter, water vole and white-clawed crayfish should be surveyed for along the lengths of both watercourses.

**6.1254** The site was considered by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) to be of medium landscape sensitivity. The study found that the site has low visual prominence as it is located at the bottom of a wooded valley. Views of the site are available from the adjacent roads, and from sections of the Caldon Canal. Site-specific landscape mitigation measures could include planting and landscaping adjacent to the canal and roads, and parameters set for building heights.

**6.1255** There is one Grade II Listed Building within the site boundary and an additional five Listed Buildings in the 400m buffer. A Conservation Area is adjacent to the northern boundary of the site. The Landscape, Local Green Space and Heritage Impact Study (August 2016) considered that the canal has a close association with the industrial and natural landscape and its setting contributes to its significance. Despite this the study concludes

that appropriate development can be mitigated through the setting back of development boundaries from the Listed Building and Conservation Area and through conservation of the Listed Building. Any proposed design and the mitigation strategy should incorporate solutions to protect and enhance the non-designated heritage assets and the wider historic landscape character as well as the designated heritage assets. Any proposals for the site should be supported by a robust cultural heritage assessment incorporating all aspects of the historic environment.

**6.1256** There is an opportunity for contribution to the District's Green Infrastructure Network. The site was proposed for inclusion in the preferred option Local Plan July 2017.

#### **OC055 (Blythe Park, Cresswell) - employment use**

**6.1257** The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site is located away from designated and historic assets. However, the site is inaccessible to services and facilities, is partially within a flood zone which are both assessed to have a significant negative effect. The development of greenfield, grade 4 ALC land is considered to have a negative effect.

**6.1258** Site has outline permission (SMD/2014/0576) for up to 168 dwellings and up to 33,480sqm of Use Class B1, B2 and B8 floorspace.

#### **6.3.1 Gypsy and Traveller site options**

##### **TR001: Land south of Uttoxeter Road, Blythe Bridge (BB021)**

**6.1259** The site has the potential to bring forward a minimum of 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect, as is the accessibility of the site to services and facilities and public transport. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect, as could the site's location away from historic assets. The development of this approx 1ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However, there is scope that the site could be designated SBI land which would have a significant negative effect and there may be some remaining flood risk which is also likely to have a negative effect.

**6.1260** This site was not taken forward as a preferred option for consultation in April 2016.

##### **TR002: Land at 459 Uttoxeter Road, Blythe Bridge (BB087)**

**6.1261** The site has the potential to bring forward a minimum of 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect as is the use of a plot currently given to hard-standing. The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However, the site's proximity to historic assets is likely to have a negative effect.

**6.1262** This site was taken forward as a preferred option for consultation in April 2016.

**TR003: Chandni Cottage / Roadhouse cafe, Draycott Road, Blythe Bridge**

**6.1263** The site has the potential to bring forward approximately 6 pitches and make a contribution towards meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect as is the use of a previously developed plot, although it may entail the loss of an existing building. The development of this approx 0.1ha site is considered sufficient to provide for adequate on site facilities for parking, storage, play and residential amenity. However the potential displacement of a business and the site's proximity to historic assets are likely to have negative effects.

**6.1264** This site was not taken forward as a preferred option for consultation in April 2016.

**TR004: Disused premises north of Knights of Cheadle / south of A T Moss, off The Green / Dilhorne Road, Cheadle (CH020)**

**6.1265** The site has the potential to bring forward 6 - 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect, as is the site's proximity to areas of existing employment. Similarly, the site's accessibility to services and facilities is likely to have a positive effect, as could its location away from historic assets. The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However, the site is partly within a flood zone which is likely to have a significant negative effect. The potential ecological value of the site is also likely to have a negative effect.

**6.1266** This site was not taken forward as a preferred option for consultation in April 2016.

**TR005: Checkley Rose Cottage**

**6.1267** The site has the potential to bring forward 3 pitches and contribute to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. Similarly, the site's accessibility to services and facilities is likely to have a positive effect, as could its location away from historic assets. However the development of this approx 0.08ha site is not considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity and this is likely to have a significant negative effect.

**6.1268** This site was not taken forward as a preferred option for consultation in April 2016.

**TR006: Cresswell former Railway Station**

**6.1269** The site has the potential to bring forward 6 - 8 pitches (although this may be reduced following consideration of set off distances from the railway line and roads) and contribute to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. Similarly, the site's accessibility to services and facilities, and in particular to areas of existing employment, is likely to have a positive effect. The development of this approx 0.25ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity however as the site runs adjacent to the regularly used Stoke to Derby railway line, on-site sound attenuation measures may be required. The site's proximity to historic assets is likely to have a negative effect.

**6.1270** This site was not taken forward as a preferred option for consultation in April 2016.

**TR007: Fole Dairy, Uttoxeter Road, Fole**

**6.1271** The site has the potential to bring forward a minimum of 8 pitches meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. The development of this approx 2ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However the southern edge of the site is in flood zone 3 and the site is likely to be affected to some degree by flood risk, this is likely to have a significant negative effect. Similarly the site's inaccessibility to services and facilities, including areas of existing employment, is also likely to have a negative effect, as is the site's proximity to historic assets.

**6.1272** This site was not taken forward as a preferred option for consultation in April 2016.

**TR008: Farm buildings / land west of 75 Uttoxeter Road , Blythe Bridge**

**6.1273** The site has the potential to bring forward a minimum of 8 pitches meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. The development of this approx 0.7ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The accessibility of the site to services and facilities, including areas of existing employment and public transport is likely to have a positive effect. However the location of this greenfield site within the Green Belt requires further assessment to identify any impact on landscape character.

**6.1274** This site was not taken forward as a preferred option for consultation in April 2016.

**TR009: Crown Inn premises, Tean Road, Mobberley, Cheadle**

**6.1275** The site has the potential to bring forward 3 - 4 pitches, making a contribution to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The accessibility of the site to services and facilities, including areas of existing employment and public transport is likely to have a positive effect. However the development of this approx 0.16ha site is not considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity.

**6.1276** This site was not taken forward as a preferred option for consultation in April 2016.

**TR010: Waggon and Horses Pub premises, Leek Road, Kingsley Moor**

**6.1277** The site has the potential to bring forward 6 - 8 pitches, making a contribution to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.2ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However the location of this brownfield site within the Green Belt requires further assessment to identify any impact on landscape character. Similarly the site's inaccessibility to services and facilities, including areas of existing employment, is also likely to have a negative effect.

**6.1278** This site was not taken forward as a preferred option for consultation in April 2016.

**TR011: Land adjacent "Rocklands", 92 Draycott Road, Upper Tean**

**6.1279** The site has the potential to bring forward a minimum of 8 pitches, meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. The development of this approx 1.2ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. Whilst the site is within 1km of a village centre with some facilities and this is considered to have a positive effect, a lack of access to public transport and the site's inaccessibility to areas of existing employment are likely to have a negative effect. A small area at the northern boundary of the site is in flood zone 3 and the site is likely to be affected to some degree by flood risk, this is likely to have a significant negative effect.

**6.1280** This site was not taken forward as a preferred option for consultation in April 2016.

**TR012: Parcel opposite Richmoorhill Farm, Kingsley Road, Cellarhead**

**6.1281** The site has the potential to bring forward a minimum of 8 pitches, meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. The development of this approx 0.7ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However the site's inaccessibility to services and facilities, including areas of existing employment is likely to have a negative effect. The site's proximity to heritage assets and the presence of mature trees are also likely to have a negative effect. In addition, the location of this greenfield site within the Green Belt requires further assessment to identify any impact on landscape character.

**6.1282** This site was not taken forward as a preferred option for consultation in April 2016.

**TR013: Mobberley Works - northern area, Tean Road, Cheadle**

**6.1283** The site has the potential to bring forward 6 - 8 pitches, contributing towards meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site's accessibility to an area of existing employment is likely to have a positive effect. However part of the site to the west is within flood zone 3 and the site is likely to be affected to some degree by flood risk and this is likely to have a significant negative effect. Also the site's inaccessibility to services and facilities is likely to have a negative effect, as is the presence of mature trees. In addition, the location of this greenfield site within the Green Belt requires further assessment to identify any impact on landscape character.

**6.1284** This site was not taken forward as a preferred option for consultation in April 2016.

**TR014: Field west of "Bank View", Draycott Road, Upper Tean**

**6.1285** The site has the potential to bring forward 6 - 8 pitches, contributing towards meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.7ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However the site's inaccessibility to services and facilities (including to areas of existing employment) and isolation from the public transport network is likely to have a negative effect. In addition, the location of this greenfield site within an area considered to

be classified as Grade 3 Agricultural Land and where development may lead to prominent intrusion into the countryside, requires further assessment to identify any impact on landscape character and the loss of best and most versatile agricultural land.

**6.1286** This site was not taken forward as a preferred option for consultation in April 2016.

**TR015: Parcel north of Quabbs Lane, off Forsbrook - Cheadle Road**

**6.1287** The site has the potential to bring forward around 6 pitches, contributing towards meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.2ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity, particularly if the number of pitches delivered is managed accordingly. However the site's inaccessibility to services and facilities (including to areas of existing employment) and isolation from the public transport network is likely to have a negative effect. In addition, the location of this mixed greenfield / brownfield site in the Green Belt requires further assessment to identify any impact on landscape character.

**6.1288** This site was not taken forward as a preferred option for consultation in April 2016.

**TR016: Former Timber Yard off Draycott Cross Road, Cheadle**

**6.1289** The site has the potential to bring forward 6 - 8 pitches, contributing towards meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.3ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is close to an area of existing employment and its development is not expected to result in the loss of best and most versatile agricultural land, and these are likely to have positive effects. However the site's inaccessibility to services and facilities and isolation from the public transport network are likely to have a significant negative effect. Development for pitches would lead to the loss of employment land and this is also likely to have a negative effect. In addition, the location of this brownfield site in the Green Belt requires further assessment to identify any impact on landscape character.

**6.1290** This site was not taken forward as a preferred option for consultation in April 2016.

**TR017: Land north west of 113 Leek Road, Cheadle**

**6.1291** The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. The development of this approx 0.8ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is reasonably close to Cheadle facilities and an area of existing employment and this is likely to have a positive effect. However the site's development could result in the loss of best and most versatile agricultural land and this is likely to result in a negative effect. In addition, the location of this greenfield site in the Green Belt requires further assessment to identify any impact on landscape character.

**6.1292** This site was not taken forward as a preferred option for consultation in April 2016.

**TR018: "The Ark", agricultural building and land off Cheadle Road, Boundary**

**6.1293** The site has the potential to bring forward 6 - 8 pitches and contribute to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.4ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. There are no known biodiversity or heritage constraints and this is also considered to have a positive effect. However the site's relative inaccessibility to services and facilities, including areas of existing employment opportunities is likely to result in a negative effect. In addition, the location of this greenfield site in the Green Belt requires further assessment to identify any impact on landscape character.

**6.1294** This site was not taken forward as a preferred option for consultation in April 2016.

**TR019: Land at ARB Treecare, A521 / Draycott Cross Road, Cheadle**

**6.1295** The site has the potential to bring forward a minimum of 8 pitches, meeting the identified housing needs of the Gypsy and Traveller communities, and this is considered to have a significant positive effect. The development of this approx 2.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. There are no known biodiversity or heritage constraints (although there are some mature trees on site) and this is also considered to have a positive effect. However the eastern portion of the site is in flood zone 2 / 3 and the site is likely to be affected to some degree by flood risk, this is likely to have a significant negative effect. In addition, the location of this largely greenfield site in the Green Belt requires further assessment to identify any impact on landscape character.

**6.1296** This site was not taken forward as a preferred option for consultation in April 2016.

**TR020: Land between "Serendipity" and Bank House Farm, Leek Road, nr Weston Coyney**

**6.1297** The site has the potential to bring forward 6 - 8 pitches and contribute to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.4ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. There are no known biodiversity or heritage constraints and this is also considered to have a positive effect, although the site is within 300m of a woodland Site of Biological Importance and further work is needed to identify any potential impacts and mitigation measures. The site's relative inaccessibility to services and facilities, including areas of existing employment opportunities is likely to result in a negative effect. In addition, the location of this greenfield site in the Green Belt requires further assessment to identify any impact on landscape character.

**6.1298** This site was not taken forward as a preferred option for consultation in April 2016.

**TR021: Land south of Draycott Cross Road industrial estate / north of Commonsides Nurseries, Cheadle**

**6.1299** The site has the potential to bring forward 6 - 8 pitches and contribute to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.7ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential

amenity. The site is close to an area of existing employment opportunity and this is also considered to have a positive effect. There are no known biodiversity or heritage constraints, although the site has a number of mature trees and is within 100m of a Biodiversity Alert Site, so further work is needed to identify any potential impacts and mitigation measures. The site's inaccessibility to services and facilities including public transport, is likely to result in a significant negative effect. In addition, the location of this greenfield site in the Green Belt requires further assessment to identify any impact on landscape character.

**6.1300** This site was not taken forward as a preferred option for consultation in April 2016.

**TR022: Between Hands Farm and "The Mount" Petrol Station, off Leek Road, Cellarhead**

**6.1301** The site has the potential to bring forward 6 - 8 pitches and contribute to meeting the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.5ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. There are no known biodiversity or heritage constraints and this is also considered to have a positive effect. However the site's relative inaccessibility to services and facilities, including areas of existing employment opportunities is likely to result in a negative effect. In addition, the location of this greenfield site in the Green Belt requires further assessment to identify any impact on landscape character.

**6.1302** This site was not taken forward as a preferred option for consultation in April 2016.

**TR023: Land at Anzio Camp, Buxton Road, Blackshaw Moor**

**6.1303** The site has the potential to bring forward a minimum of 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. The development of this approx 1.25ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. However the site is in close proximity to a heritage asset and an SBI, further assessment is required to identify any effects and possible mitigation measures. The site's inaccessibility to services and facilities, including areas of existing employment opportunities is likely to result in significant negative effects.

**6.1304** The site has permission for the erection of extra care housing, live work units, ancillary social centre and facilities building plus change of use to holiday park, under SMD/2014/0683.

**6.1305** This site was not taken forward as a preferred option for consultation in April 2016.

**TR024: Land and buildings at the New Inn, Leek Road, Longsdon**

**6.1306** Site granted approval for residential development SMD/2012/0669

**TR025: Land at Northern Countryside Works Depot, Salters Lane, Werrington**

**6.1307** The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.4ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. It is in close proximity to Werrington centre which has a range of services/facilities access to bus services which is a positive impact There are no known heritage or biodiversity constraints and but

some of the buildings on the site may have potential to support nesting birds the impact on these is therefore neutral although the exact impact is unknown. The site is a mix of brownfield and greenfield and is not in agricultural use. It is in the Green Belt and would not lead to a loss of agricultural land. The location of this site in the Green Belt requires further assessment to identify any impact on landscape character.

**6.1308** This site was not taken forward as a preferred option for consultation in April 2016.

**TR026: Land at Kniveden Hall, Mount Road, Leek**

**6.1309** This is a large site which has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approximately 2.584ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. It is in close proximity to Leek which has a range of services/facilities employment access to bus services which is a positive impact. There are known biodiversity constraints which have a negative impact although the exact effect is uncertain. The site is brownfield and is not in agricultural use and would not lead to a loss of agricultural land.

**6.1310** This site was not taken forward as a preferred option for consultation in April 2016.

**TR027: Land/buildings of former Meadows Special School, Tunstead Road Knypersley**

**6.1311** The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.4ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. It is in close proximity to Biddulph centre which has a range of services/facilities employment access to bus services which is a positive impact. It has some biodiversity potential although the exact effects are uncertain. There are also listed buildings close to the site both of which lead to a negative impact.

**6.1312** This site was not taken forward as a preferred option for consultation in April 2016.

**TR028: Land adjacent (west off) Draycott Moor College, Draycott Old Road, Draycott in the Moors**

**6.1313** This is a small site which has the potential to bring forward some pitches but not all the pitches required to meet the identified needs of the Gypsy and Traveller communities and this is considered to have a negative effect. It is approximately 1.5km from Blythe Bridge which has a range of services/facilities employment access to bus services which is a neutral impact. There are no known biodiversity or heritage constraints, and the site are not in agricultural use would not lead to a loss of agricultural land.

**6.1314** This site was not taken forward as a preferred option for consultation in April 2016.

**TR029: Land between 11 Whiston Eaves Lane and children's play area, Whiston**

**6.1315** The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.8ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. There are some services/facilities in Whiston with a larger range of services/facilities in the nearby centres

at Froghall, Oakamoor and Kingsley between 2-3.7km. Access to employment nearby is limited. There is a limited bus service. Overall this has been assessed as having a neutral impact. There are no known biodiversity constraints.

**6.1316** This site was not taken forward as a preferred option for consultation in April 2016.

**TR030: Land east of Leek High School Playing fields, off Mount Road, Leek**

**6.1317** This is a large site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 3.1ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is relatively close to Leek with a range of services /facilities access to public transport and employment opportunities and this is assessed as a positive impact. There are no known heritage or biodiversity constraints.

**6.1318** This site was not taken forward as a preferred option for consultation in April 2016.

**TR031: Ladderedge SCC Depot, Ladderedge, Leek**

**6.1319** The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 1ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is relatively close to Leek with a range of services /facilities access to public transport and employment opportunities and this is assessed as a positive impact. There are no known heritage or biodiversity constraints on the site but it is next to the Country Park which has biodiversity value.

**6.1320** This site was not taken forward as a preferred option for consultation in April 2016.

**TR032: Land off Brooklands Way, Leekbrook**

**6.1321** This is a large site which has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 8.13ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is some distance from to Leek/Cheddleton and services/facilities and employment opportunities, there is a bus but not in close proximity to the site. This is considered to have a negative impact. It has biodiversity importance most of it being within a SBI. In addition, the location of this greenfield site requires further assessment to identify any impact on landscape character.

**6.1322** This site was not taken forward as a preferred option for consultation in April 2016.

**TR033: Triangular field by Old Quarry Works, Uttoxeter Road, Blythe Bridge**

**6.1323** The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a positive effect. The development of this approx 0.44ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity. The site is close to Blythe Bridge which has a range of services/facilities including a train station. This

is considered to have a positive impact. There are no known biodiversity constraints. In addition, the location of this greenfield site in the Green Belt requires further assessment to identify any impact on landscape character.

**6.1324** This site was not taken forward as a preferred option for consultation in April 2016.

### **Additional sites appraised following July 2017 consultation**

#### **"The Acres", Windycote Lane, Dilhorne**

**6.1325** The site has the potential to bring forward 8 pitches and meet the identified housing needs of the Gypsy and Traveller communities and this is considered to have a significant positive effect. The development of this approx 0.8ha site is considered large enough to provide for adequate on site facilities for parking, storage, play and residential amenity and this is also considered a positive effect. However the site is remote from a range of services and facilities including the public transport network and this is considered to have a negative effect. Similarly the proximity to heritage assets and location of the site, indicated on Natural England's predictive map of best and most versatile agricultural land as having "moderate" (20-60% area bmv) likelihood of resulting in the loss of best and most versatile agricultural land are considered likely to lead to negative effects. Ecological survey is required. In addition, the location of this greenfield site in the Green Belt requires further assessment to identify any impact on landscape character.

**6.1326** This site was not proposed to be taken forward as part of the Local Plan published for representations in February 2018.

## **6.4 Appraisal of alternative development approaches for Cheadle**

### **Background**

**6.1327** Cheadle is the district's smallest town, located 10 miles south east of Leek and 10 miles west of the north Staffordshire conurbation. Cheadle has suffered from under-investment and a poor infrastructure and its town centre has declined in recent years, although a successful Heritage Economic Regeneration Scheme has led to some improvements. Whilst the town has some notable buildings, including St. Giles' RC Church, one of the finest works of the celebrated Victorian architect A W Pugin, the majority of its houses have been built since the First World War. Cheadle is only 4 miles from the A50 Stoke to Derby road that links the M1 and M6 motorways.

**6.1328** The adopted Core Strategy sets out Cheadle's role in the District as a significant service centre and market town with scope to be enhanced and strengthened. The identified priorities for the town are to expand its housing market area and range of community provision; creating further employment growth and increasing the diversity of employment opportunities; expanding its retailing centre; and improving environmental quality and accessibility. The Council's Development Capacity Study indicates scope to accommodate further growth that will address issues of under-investment and under-performance, contribute to achieving a more sustainable settlement and help meet the needs of the District.

**6.1329** The strategy for Cheadle set out in the adopted Core Strategy is based on taking a comprehensive view of the expansion of the town and programming ahead for the phased release of land and related infrastructure improvements. The Core Strategy notes that this will take the form of urban extensions involving housing and employment development with related leisure and community facilities as part of an overall regeneration and growth strategy.

## Selection of alternatives for appraisal - April 2016

**6.1330** In identifying sites for inclusion in the Local Plan: Preferred Options Sites and Boundaries (April 2016), a number of reasonable alternative development approaches were considered for Cheadle, in line with the strategy set out above. In the first instance these were:

- Option 1: Northern Focus
- Option 2: South western focus
- Option 3: Scattered approach

**6.1331 Option 1: Northern focus** proposes growth centred on extending Cheadle to the north. This option proposes including the following housing sites within the preferred options (sites and boundaries) Local Plan:

Sites within development boundary	Potential yield (Number new homes)
CH001	240
CH004	45
CH006	36
CH009	16
CH024	45
CH015	32
CH002A	26
CH002B	42
CH013	50
CH020	42
Other potential sites	
CH073B	114
CH132	80
CH081	110
CH080	80
CH129	120

**Table 6.7 Proposed sites comprising Northern Focus**

**6.1332 Option 2: South Western focus** proposes growth centred on extending Cheadle to the south west. This option proposes including the following housing sites within the preferred options (sites and boundaries) Local Plan:

Sites within development boundary	Potential yield (Number new homes)
CH001	240
CH004	45
CH006	36
CH009	16
CH024	45
CH015	32
CH002A	26
CH002B	42
CH013	50
CH020	42
Other potential sites	
CH085A	150
CH085B	80
CH085C	150
CH085D	115
CH093	165
CH128	28

**Table 6.8 Proposed sites comprising South Western Focus**

**6.1333 Option 3: Scattered approach** proposes a spread of growth based on a number of small scale extensions to the periphery of Cheadle. This option proposes including the following housing sites within the preferred options (sites and boundaries) Local Plan:

Sites within development boundary	Potential yield (Number new homes)
CH001	240
CH004	45
CH006	36
CH009	16
CH024	45
CH015	32

Sites within development boundary	Potential yield (Number new homes)
CH002A	26
CH002B	42
CH013	50
CH020	42
Other potential sites	
CH132	80
CH128	28
CH075A	50
CH075B	60
CH075C	125
CH081	110
CH085A	75
CH085D	50

Table 6.9 Proposed sites comprising Scattered Approach

## Summary of appraisal findings - April 2016

**6.1334** The full SA appraisal matrices recording the detail of the appraisal of each of these options are provided in section 18. The summary of findings is set out below.

### Option 1 - Summary of significant effects

**6.1335** Sites comprising the option "northern focus" are located both within and outside the existing settlement boundary. The sites are a range of sizes, four are large enough to yield over 100 homes each, a further three are each expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community.

**6.1336** A further positive effect of the option is the opportunity it provides for the delivery of a new school. A new school in the north of Cheadle could be expected to ease some pressure on peak time journeys to the existing schools that are concentrated in the south west of the town. This is likely to result in positive effects on the town centre and may help support opportunities for investment in culture and tourism with positive effects on the local economy.

**6.1337** All the sites comprising this option could deliver development within 500m of a bus stop and all but three sites are within 1,200m of the town centre with its wide range of key services and facilities. This is likely to result in positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of the town centre,

providing support for walking and cycling and reducing the need to travel by car. However sites CH080, CH081 and CH132 are more than 1,200m away from the town centre, so this option could result in existing services and facilities being inaccessible for residents of some new developments.

**6.1338** There is potential for the cumulative impacts of development to result in the disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated. The option includes sites CH002a and CH024 which border Cecilly Brook Local Nature Reserve (LNR), one of the most important sites for water voles (a protected species) in Staffordshire. In addition, sites CH002b, CH006 and CH009 are within 100m of the Reserve. CH129 is within 100m of Hales Hall Pool LNR. Sites CH073b and CH081 are within 200m of one of these Local Nature Reserves.

**6.1339** This option is also likely to result in the development of sites subject to risk from flooding, the option includes sites CH002a, CH006, CH020, CH080, CH081 and CH132 all of which are partly located within a flood zone 3 area.

**6.1340** Dependent on proposal specific information, there is scope that the cumulative impact of development under this option may result in harm or loss to the significance of designated heritage assets. Sites CH009, CH013, CH015, CH024, CH080 and CH081 are within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset.

**6.1341** Likely negative effects on landscape character have also been identified, sites CH073B, CH080, CH081, CH129 and CH132 are all greenfield sites outside the current development boundary, however none are within the area identified as "important landscape setting to settlement".

**6.1342** The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.

## **Option 2 - Summary of significant effects**

**6.1343** Sites comprising the option "south western focus" are located both within and outside the existing settlement boundary. The sites are a range of sizes, five are large enough to yield over 100 homes each, a further two are expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community.

**6.1344** A further positive effect of the option is the opportunity it provides for the delivery of a southern link road to help relieve traffic congestion in the town centre. However focusing new development where there is an existing cluster of schools may exacerbate congestion at peak times from concentrating journeys to school into one area of town. Unless the new journeys to school are mainly made on foot, this may result in negative effects on the town centre. All of the sites comprising this option could deliver development within 500m of a bus stop and all but two are within 1,200m of the town centre with its wide range of key services and facilities. This is likely to result in positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of the town centre, providing support for walking and cycling and reducing the need to travel by car. However

sites CH093 and CH128 are more than 1,200m away from the town centre, so this option could result in existing services and facilities being inaccessible for residents of some new developments.

**6.1345** There is potential for the cumulative impacts of development to result in the disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated. The option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles (a protected species) in Staffordshire. In addition, sites CH002B, CH006 and CH009 are within 100m of the Reserve.

**6.1346** This option is also likely to result in the development of sites subject to risk from flooding, the option includes sites CH002A, CH006, CH020 and CH085B all of which are partly located within a flood zone 3 area; and sites CH085A and CH093 that are partly within flood zone 2.

**6.1347** Dependent on proposal specific information, the cumulative impact of development under this option may result in harm or loss to the significance of designated heritage assets. Sites CH009, CH013, CH015, CH024, CH085C, CH085D, CH093 and CH128 are within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset.

**6.1348** Likely negative effects on landscape character have also been identified; sites CH085A, B, C and D, CH093 and CH128 are all greenfield sites outside the current development boundary, however none are within the area identified as "important landscape setting to settlement". Sites CH093 and CH128 have been recommended as appropriate to consider for release from the Green Belt under exceptional circumstances.

**6.1349** The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.

### **Option 3 - Summary of significant effects**

**6.1350** Sites comprising the option "scattered approach" are located both within and outside the existing settlement boundary. The sites are a range of sizes, three are large enough to yield over 100 homes each, a further six are each expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community.

**6.1351** A further positive effect of the option is the opportunity it provides for the delivery of a new school. A new school in the north of Cheadle could be expected to ease some pressure on peak time journeys to the existing schools that are concentrated in the south west of the town. However this option also includes some sites comprising a small scale extension to the south west, where there is an existing cluster of schools and this may contribute to "school run congestion" issues in this part of the town. All of the sites comprising this option could deliver development within 500m of a bus stop and all but three are within 1,200m of the town centre with its wide range of key services and facilities. This is likely to result in positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of the town centre, providing support for walking and cycling

and reducing the need to travel by car. However sites CH081, CH128 and CH132 are more than 1,200m away from the town centre, so this option could result in existing services and facilities being inaccessible for residents of some new developments.

**6.1352** There is potential for the cumulative impacts of development to result in the disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated. The option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles (a protected species) in Staffordshire. In addition, sites CH002B, CH006 and CH009 are within 100m of the Reserve.

**6.1353** This option is also likely to result in the development of sites subject to risk from flooding, the option includes sites CH002A, CH006, CH020, CH81 and CH132 all of which are partly located within a flood zone 3 area; and site CH085A that is partly within flood zone 2.

**6.1354** Dependent on proposal specific information, the cumulative impact of development under this option may result in harm or loss to the significance of designated heritage assets. Sites CH009, CH013, CH015, CH024, CH075C, CH081, CH085D, and CH128 are within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset.

**6.1355** Likely negative effects on landscape character have also been identified; sites CH075A, B and C, CH081, CH085A and D, CH128 and CH132 are all greenfield sites outside the current development boundary; sites CH075A, B and C lie in the area identified as "important landscape setting to settlement, where impacts may be most significant. Site CH128 has been recommended as appropriate to consider for release from the Green Belt under exceptional circumstances.

**6.1356** The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments

### **Mitigation measures proposed**

**6.1357** It is possible that likely significant effects identified via the SA can be mitigated. To assist this, the following measures have been identified during the appraisal of alternative development approaches. These recommendations will be included in the review of policies undertaken as part of Local Plan preparation.

**6.1358** Local Plan policies should help to ensure that:

- Good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.
- The needs of all members of the community can be addressed by helping to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.
- New developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.
- New developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.

- Developments include appropriate landscaping to aid removal of air pollutants and provide support for the Cheadle Transport Package.
- New developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.
- Impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible.
- Geologically important sites are afforded protection and enhancement.
- Support is provided for waste minimisation.
- The character of towns / villages; heritage and archaeological assets along with their settings are protected and enhanced.
- The character and appearance of the landscape including historic landscape and other natural assets and resources are protected and enhanced.
- Support is given to sustainable economic growth; tourism and the visitor economy; and the vitality and viability of town and village centres.

### Recommended preferred option and options dismissed - April 2016

Options proposed for dismissal	Rationale
Option 1: Northern focus	<p>The option could be expected to:</p> <ul style="list-style-type: none"> <li>• Make a significant contribution to meeting the housing needs of the whole community;</li> <li>• Provide opportunity for delivering a new school in the north of the town where educational facilities are currently lacking; and</li> <li>• Deliver new development within 500m of a bus stop and largely within 1,200m of the town centre, providing good access to services and facilities.</li> </ul> <p>However the the cumulative impacts of development could result in:</p> <ul style="list-style-type: none"> <li>• Disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated;</li> <li>• Harm or loss to the significance of designated heritage assets that could not be reasonably mitigated; and</li> <li>• An increase in the risk of flooding.</li> </ul> <p>The option would not be expected to help deliver the southern link road.</p>
Option 2: South western focus	<p>The option could be expected to:</p> <ul style="list-style-type: none"> <li>• Make a significant contribution to meeting the housing needs of the whole community;</li> <li>• Provide opportunity to deliver the southern link road; and</li> <li>• Deliver new development within 500m of a bus stop and largely within 1,200m of the town centre, providing good access to services and facilities.</li> </ul>

Options proposed for dismissal	Rationale
	<p>However the the cumulative impacts of development could result in:</p> <ul style="list-style-type: none"> <li>• Additional town centre congestion from focusing journeys to school in one part of the town;</li> <li>• Disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated (the effects are less significant than under option 1);</li> <li>• Harm or loss to the significance of designated heritage assets that could not be reasonably mitigated;</li> <li>• Requirement to consider release of sites from the Green Belt; and</li> <li>• An increase in the risk of flooding (the effects are less significant than under option 1).</li> </ul> <p>The option would not be expected to help spread location of key sites (such as a new school) to the north of the town.</p>
Option 3: Scattered approach	<p>The option could be expected to:</p> <ul style="list-style-type: none"> <li>• Make a significant contribution to meeting the housing needs of the whole community;</li> <li>• Provide opportunity for delivering a new school in the north of the town where educational facilities are currently lacking; and</li> <li>• Deliver new development within 500m of a bus stop and largely within 1,200m of the town centre, providing good access to services and facilities.</li> </ul> <p>However the the cumulative impacts of development could result in:</p> <ul style="list-style-type: none"> <li>• Town centre congestion from journeys to school arising from small scale extension to the south west where existing schools are located;</li> <li>• Disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated (the effects are less significant than under option 1);</li> <li>• Harm or loss to the significance of designated heritage assets that could not be reasonably mitigated;</li> <li>• Negative impact on the landscape setting to the settlement;</li> <li>• Requirement to consider release of a site from the Green Belt; and</li> <li>• An increase in the risk of flooding (the effects are less significant than under option 1).</li> </ul> <p>The option would not be expected to help deliver the southern link road.</p>

Table 6.10 Development approach options dismissed following appraisal

**6.1359** Following further work undertaken since April 2016, a fourth alternative development approach was identified and considered, designed to build on the strengths of the three options previously proposed, whilst minimising the cumulative impacts of development identified in each case.

**6.1360 Option 4: North-South clusters with small sites scattered through the town** proposes two clusters of growth, one to the north and one to the south of Cheadle, with a number of small sites scattered across the town. This option proposes including the following housing sites within the preferred options Local Plan (July 2017):

Sites within development boundary	Potential yield (Number new homes)
Core Strategy Area 1: CH001	240
CH002A	26
CH002B	35
CH004	45
CH013	51
CH015	32
CH020	42
CH024	45
Other potential sites	
CH132 (with CH001 and school)	80
CH085A	120
CH085B	70
CH085C	125
CH085D	95
CH128	20

**Table 6.11 Proposed sites comprising North-South clusters with scattered small sites**

## Summary of appraisal findings - July 2017

**6.1361** The full SA appraisal matrix recording the detail of the appraisal of this fourth option is provided in section 9. The summary of findings is set out below.

### Option 4 - Summary of significant effects

**6.1362** Sites comprising the option "north-south clusters with small sites scattered through the town" are located both within and outside the existing settlement boundary. The sites are a range of sizes, three are large enough to yield over 100 homes each, a further four

are expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community.

**6.1363** The option provides opportunity for the delivery of a southern link road to help relieve traffic congestion in the town centre, if required. In addition, enabling a cluster of new development to the south where there are existing school sites whilst also providing land for a new school to the north of the town, is expected to spread journeys to school and help to avoid exacerbating congestion at peak times and this is likely to lead to positive effects on the town centre.

**6.1364** All of the sites comprising this option could deliver development within 500m of a bus stop and all but two are within 800m of the town centre with its wide range of key services and facilities. This is likely to result in further positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of the town centre, providing support for walking and cycling and reducing the need to travel by car. However sites CH128 and CH132 are more than 1,200m away from the town centre, so this option could also result in existing services and facilities being less accessible for residents of some new developments.

**6.1365** This option (in comparison with other previous options) minimises potential for the cumulative impacts of development to result in the disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated. Whilst the option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, sites CH006 and CH009 (within 100m of the Reserve) are not identified as preferred options.

**6.1366** This option is also less likely than previous options considered to result in the development of sites subject to risk from flooding. The option includes sites CH002A, CH020, CH085A and CH85B but small areas of flood zones 2 or 3 at the edge of each site have been excluded from the boundary of each proposed allocation.

**6.1367** Dependent on proposal specific information, the cumulative impact of development under this option may lead to harm or loss to the significance of designated heritage assets or their settings. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Potential negative effects on landscape character have also been identified; sites CH085A, B, C and D, CH128 and CH132 are all greenfield sites outside the current development boundary, however none are within the area identified as "important landscape setting to settlement". Appropriate mitigation measures have been identified by the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016). The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.

## Recommended preferred option - July 2017

Option recommended to take forward	Rationale
<p>Option 4: North-south clusters with small sites scattered through the town</p>	<p>The option could be expected to:</p> <ul style="list-style-type: none"> <li>• Make a significant contribution to meeting the housing needs of the whole community;</li> <li>• Provide opportunity for delivering a new school in the north of the town where educational facilities are currently lacking;</li> <li>• Help avoid additional town centre congestion by spreading journeys to school across both the northern and southern areas of the town;</li> <li>• Provide opportunity to deliver the southern link road if required;</li> <li>• Deliver new development within 500m of a bus stop and largely within 1,200m of the town centre, providing good access to services and facilities;</li> </ul> <p>However the the cumulative impacts of development could result in:</p> <ul style="list-style-type: none"> <li>• An increase in the risk of flooding (the effects are less significant than under all other options identified).</li> <li>• Disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated (the effects are less significant than all other options identified) however it is recommended that strategic development site policies require master-planning growth that may impact on the Cecilly Brook Local Nature Reserve in order to manage impact on the LNR and enable achievement of Water Framework Directive objectives;</li> <li>• Negative effects on landscape character (however reasonable mitigation measures have been identified);</li> <li>• Harm or loss to the significance of designated heritage assets (however reasonable mitigation measures have been identified); and</li> <li>• Requirement to consider Green Belt release if exceptional circumstances can be demonstrated.</li> </ul>

**Table 6.12 Development approach option recommended to be taken forward**

### Mitigation measures proposed

**6.1368** Local Plan policies for strategic development sites in Cheadle should require:

- Mitigation measures identified in the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016).
- Master-planning growth that may impact on the Cecilly Brook Local Nature Reserve in order to manage impact on the Green Infrastructure Network and the LNR to ensure that Local Plan policy requirements can be met for minimising impacts on biodiversity (and providing net gains in biodiversity where possible); and establishing coherent ecological networks that are more resilient to current and future pressures; as well as

enabling water quality improvements in line with the Water Framework Directive objectives.

## 6.5 Appraisal of alternative development approaches for the rural areas

### Background

**6.1369** Policy SS3 of the adopted Core Strategy sets out the broad spatial distribution of housing and employment development across the District. The approach has informed the selection of Preferred Option development sites in the emerging Local Plan.

**6.1370** The development approach is one that focuses development on the three market towns of Leek, Cheadle and Biddulph and the larger villages but allows for limited development of other settlements to meet local needs and targets areas in need of regeneration. The proposed development approach facilitates the growth of towns and larger villages, helps to meet needs in other rural areas and assists in bringing forward regeneration opportunities.

	Housing	Employment
Leek	30%	30%
Biddulph	20%	20%
Cheadle	22%	20%
Rural Areas	28%	30%

**Table 6.13 Core Strategy Policy SS3 - Distribution of Development**

**6.1371** Policy SS6 of the adopted Core Strategy defines the Rural Areas as:

- Larger villages
- Smaller villages
- Other rural areas

**6.1372** Core Strategy Policy SS6a defines the Larger Villages as; Alton, Biddulph Moor, Blythe Bridge & Forsbrook, Brown Edge, Cheddleton, Endon, Ipstones, Kingsley, Upper Tean, Waterhouses, Werrington & Cellarhead and Wetley Rocks.

**6.1373** Core Strategy Policy SS6b defines the Smaller Villages as; Bagnall, Blackshaw Moor, Boundary, Bradnop, Caverswall, Checkley, Consall, Cookshill, Cotton, Dilhorne, Draycott, Foxt, Froghall, Heaton, Hollington, Hulme, Kingsley Holt, Leekbrook, Longsdon, Lower Tean, Meerbrook, Oakamoor, Rudyard, Rushton Spencer, Stanley, Stockton Brook, Swinscoe, Whiston and Winkhill.

**6.1374** Core Strategy SS6c defines the other rural areas as being those locations outside of the Larger and Smaller Villages.

**6.1375** Core Strategy Policy SS8 supports the development of a Regional Investment Site for high quality, regional scale employment development at Blythe Vale. Given that this site is intended to serve a regional need, it is considered independently of the employment land requirement for the District. It is proposed to take this site forward into the Local Plan as it may have a role to play in supporting the emerging Northern Gateway regeneration initiative.

**6.1376** The Northern Gateway initiative spans Cheshire and North Staffordshire and seeks to maximise the regeneration benefits of HS2 related investment in the vicinity of Crewe.

### **Constraints to development in the Rural Areas**

**6.1377** A third of the district lies inside the Peak Park - the Peak District National Park Authority represents the special interests of this Park. Of the remainder of the Moorlands, around 30% is designated as Green Belt.

**6.1378** The NPPF specifies that the Green Belt is of great importance in order to prevent urban sprawl by keeping land permanently open; the essential characteristics of Green Belts are their openness and their permanence. The NPPF is clear that "once established, Green Belt boundaries should only be altered in exceptional circumstances, through the preparation or review of a Local Plan" (NPPF, Paragraph 83). However the NPPF is equally clear that "Local Plans should meet objectively assessed needs...unless specific policies...indicate development should be restricted" (NPPF, Paragraph 14).

**6.1379** In this context, Policy SS5b of the adopted Core Strategy committed the District Council to undertake a comprehensive review of the Green Belt around Biddulph in order to determine the scope for development sites to help meet requirements. Accordingly, a Green Belt Review of the whole District was completed in November 2015 in order to provide a comprehensive review. The review considered the scope to release land from the Green Belt by appraising sites against the five purposes of the Green Belt as set out in the NPPF. The study concluded that generally the extent of the Green Belt should be retained. However, several areas were identified as suitable for release from the Green Belt in exceptional circumstances, including in Biddulph, Cheadle, Blythe Bridge and Forsbrook, Endon, Cheddleton and clusters elsewhere in the District.

**6.1380** The Local Plan Preferred Options Sites and Boundaries (2016) therefore sought to amend the Green Belt boundary in some locations in order to facilitate development.

**6.1381** In response to feedback from the 2016 Preferred Options Sites and Boundaries consultation, additional sites in the Green Belt were assessed in September 2016 using the same methodology as the November 2015 report. This update identified additional sites that might be suitable for release - subject to exceptional circumstances - in Werrington, Cheddleton, Biddulph, Biddulph Moor and Endon.

**6.1382** The Housing White Paper published in February 2017 reaffirmed the Government's commitment to protecting and maintaining the Green Belt, setting out Government proposals to amend the NPPF to make clear that Green Belt boundaries should only be amended when it can be demonstrated that all other reasonable options have been fully examined for meeting an authority's identified development requirements.

**6.1383** The February 2017 White Paper sought to specify what counts as exceptional circumstances for Green Belt release and stated that local planning authorities would need to rule out the following options before permitting Green Belt development:

- making effective use of suitable brownfield sites and the opportunities offered by estate regeneration;
- the potential offered by land which is currently underused, including surplus public sector land where appropriate;
- optimising the proposed density of development; and
- exploring whether other authorities can help to meet some of the identified development requirement.

**6.1384** Further to this, where land is removed from the Green Belt, the White Paper proposed that local policies should require the impact to be offset by compensatory improvements to the environmental quality or accessibility of remaining Green Belt land.

**6.1385** The preferred option at April 2016 was re-examined in the light of the requirement proposed in the White Paper for authorities to examine fully all other reasonable options before amending Green Belt boundaries. It was considered that options other than Green Belt release were available to the Council in order to meet housing need. A decision broadly to preserve the Green Belt in line with national planning policy meant that housing land must be looked for elsewhere.

**6.1386** An alternative approach to meeting housing need was set out in the emerging Local Plan in July 2017. This alternative approach relied on redirecting a small percentage of growth to the towns accompanied by a strategic site release in the rural areas.

**6.1387** Representations made during consultation on the Preferred Options Local Plan published for consultation in July 2017 highlighted that the revised approach amended the spatial distribution of housing as acknowledged in the committee report to Council Assembly 19<sup>th</sup> July 2017.

**6.1388** As part of ongoing plan preparation the Council identified and appraised a number of alternative options for delivering growth in rural areas. An SA of these alternative options was carried out in December 2017 in order to ensure that the Local Plan published for representations in February 2018 was based on a development approach for the rural areas found to be the most sustainable when considered against reasonable alternatives.

### **Selection of alternatives for appraisal - December 2017**

**6.1389** Four reasonable alternative development approaches for the rural areas were considered. These were:

1. Preferred Option 2016: Green Belt release.
2. Countryside release.
3. Growth redirected to towns
4. Strategic site release

**6.1390 Option 1 - (Preferred Option 2016): Green Belt release** proposes to distribute growth in rural areas according to the spatial strategy across a range of small sites in larger villages, facilitated by green belt release and a windfall allowance in order to accommodate the scale and distribution of growth set in policy SS3 of the SMDC Core Strategy.

**6.1391 Option 2 - Countryside release** proposes to distribute growth in rural areas across a range of sites through small extensions into the countryside around both larger and smaller villages, identifying a windfall allowance, but restricting green belt release in order to accommodate the scale and distribution of growth set in policy SS3 of the SMDC Core Strategy.

**6.1392 Option 3 - Growth redirected to towns** proposes to reduce the distribution of development to the rural areas to that which can be accommodated via small housing sites in larger villages and a windfall allowance, restricting green belt release and increasing the distribution of development to the towns.

**6.1393 Option 4 - Strategic site release** proposes to accommodate the scale and distribution of growth set in Core Strategy policy SS3 by identifying a strategic site to consolidate growth in the rural areas and by identifying further small sites in larger villages, and a windfall allowance, whilst restricting Green Belt release.

## Summary of appraisal findings

**6.1394** The full SA appraisal matrices recording the detail of the appraisal findings are set out in section 19 of this report. The summary of findings is set out below.

### Option 1 - Summary of significant effects

**6.1395** Sites comprising the April 2016 preferred option (green belt release) are a range of sizes, seven are expected to yield 50 or more homes and this is expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community. This is likely to result in positive effects on a number of village centres and may help support opportunities for investment in culture and tourism with positive effects on the local economy. Sites comprising this option could deliver development within 500m of a bus stop and or within the proximity of a number of village centres with some key services and facilities. This is likely to result in positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of village centres, providing support for walking and cycling and reducing the need to travel by car.

**6.1396** However this option relies on a number of small or medium sized allocations in the larger villages mainly outside the existing settlement boundaries and this is likely to lead to negative effects on the District's ecological and GI networks. Larger villages with potential allocations include Ipstones and Waterhouses risking potential effects on European sites arising from recreational pressure. Dependent on proposal specific information, there is scope that this option may lead to the deterioration of the settings of designated or non-designated heritage assets, applicants should be required to provide an NPPF compliant heritage statement. Likely negative effects on landscape character have also been identified, this option is likely to include sites that fall within the important landscape setting to settlement" and sites assessed as being of some landscape sensitivity, however site-specific landscape mitigation measures may be available. The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.

**6.1397** This option relies on green belt release. The government has proposed a requirement on authorities to examine fully all other reasonable options before amending green belt.

### **Option 2 - Summary of significant effects**

**6.1398** Sites comprising the countryside release option are expected to be small settlement extensions, in keeping with the scale of the villages, and consequently few are expected to yield 50 or more homes, potentially restricting the delivery of the full range of types and tenures of new homes, although this option is still expected to make a positive contribution to meeting the housing needs of the community. This is likely to result in positive effects on a number of village centres and may help support opportunities for investment in culture and tourism with positive effects on the local economy.

**6.1399** Whilst some sites comprising this option could deliver development within 500m of a bus stop and or within the proximity of a larger village centre with some key services and facilities, the smaller villages tend to be remote from the public transport network and from the main towns and this is likely to result in negative effects on: access to jobs, services and facilities including healthcare (which in turn is likely to detract from equality of opportunity). Similarly there is likely to be negative effects resulting from the option being unlikely to support residents travelling to key destinations by walking or cycling.

**6.1400** This option relies on countryside release around larger and smaller villages not constrained by Green Belt and this is likely to lead to negative effects on the District's ecological and GI networks. Villages with potential allocations include Ipstones, Waterhouses, Blackshaw Moor, Heaton, Meerbrook, Swinscoe and Winkhill, risking potential effects on European sites arising from recreational pressure. Dependent on proposal specific information, there is scope that this option may lead to the deterioration of the settings of designated or non-designated heritage assets, applicants should be required to provide an NPPF compliant heritage statement. Likely negative effects on landscape character have also been identified, this option is likely to include sites contributing to the setting of the Peak District National Park, or that fall within the important landscape setting to settlement" and sites assessed as being of some landscape sensitivity, however site-specific landscape mitigation measures may be available. The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.

### **Option 3 - summary of significant effects**

**6.1401** Sites comprising the option "growth redirected to towns" are expected to be a range of sizes, some are expected to yield 100 or more homes, potentially enabling the delivery of a wide range of types and tenures of new homes, consequently this option is expected to make a significant positive contribution to meeting the housing needs of the community. This is likely to result in further positive effects on a number of larger village centres as well as the towns and may help support opportunities for investment in culture and tourism with positive effects on the local economy.

**6.1402** Sites comprising this option are expected deliver development generally within 500m of a bus stop and or within the proximity of a larger village or town centre with some key services and facilities and this is likely to result in positive effects on: access to jobs and

other services and facilities including healthcare (which in turn is likely to support equality of opportunity). Similarly there is likely to be positive effects resulting from the option being likely to support residents travelling to key destinations by walking or cycling.

**6.1403** However this option relies on reducing the distribution of development to the rural areas and increasing the distribution to the towns, limiting Green Belt release and this is likely to lead to significant negative effects on the District's ecological and GI networks, with additional growth directed to the east of Cheadle, potentially in proximity to the Cecilly Brook corridor. Larger villages with potential allocations include Ipstones and Waterhouses, with further growth expected to be directed to the east of Leek, risking potential effects on European sites arising from recreational pressure. Dependent on proposal specific information, there is scope that this option may lead to the deterioration of the settings of designated or non-designated heritage assets, applicants should be required to provide an NPPF compliant heritage statement. As growth is being distributed principally to those larger villages and towns not constrained by Green Belt there is likely to be a disproportionate impact of growth on the character of these settlements, Leek and Cheadle in particular. Likely negative effects on landscape character have also been identified, this option is likely to include sites contributing to the setting of the Peak District National Park, or that fall within the important landscape setting to settlement" and sites assessed as being of some landscape sensitivity, (including sites to the east of Leek) however site-specific landscape mitigation measures may be available. The option has also been assessed as likely to result in minor negative effects arising from potential traffic increases in or near to areas of existing poor air quality.

#### **Option 4 - Summary of significant effects**

**6.1404** By consolidating growth in the rural areas into a large strategic site, this option may be expected to help enable the delivery of a range of types and tenures of new homes, making a significant contribution to meeting the needs of the whole community. The option could also make a significant contribution to the delivery of affordable homes. This is likely to result in positive effects on a number of settlement centres and may help support opportunities for investment in infrastructure, including in culture and tourism, with positive effects on the local economy. Consolidating growth may also have positive effects on the local economy through helping to bring forward regeneration opportunities. The identified strategic site at Blythe Bridge would deliver development in proximity to the District's only railway station. Blythe Bridge is on the Crewe - Stoke - Derby line and this is likely to result in a positive effect on supporting the use of public transport. Blythe Bridge has a range of facilities and services including schools, play facilities, community library and general store and this is likely to result in positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of town and village centres, providing support for public transport, walking and cycling and reducing the need to travel by car.

**6.1405** Consolidation of growth in the rural areas within a strategic site helps to avoid reliance on a number of small or medium sized allocations in the larger villages and this is likely to help mitigate predicted effects on the District's ecological and GI networks and reduce the impact of disturbance of habitats by development. It will also help avoid the need to allocate sites in larger villages such as Ipstones, close to the national park and to European sites, helping reduce the risk of potential effects on such sites arising from recreational pressure. However dependent on proposal specific information, there is scope that this option may lead to the deterioration of the settings of designated or non-designated heritage assets, applicants should be required to provide an NPPF compliant heritage statement. In addition, the option identifies a large development site in the rural areas and this risks leading to a

negative effect on the character and appearance of Blythe Bridge. Likely negative effects on landscape character have also been identified, this identified strategic site falls within the "important landscape setting to settlement" and some sites required for this option may be assessed as being of some landscape sensitivity, however site-specific landscape mitigation measures may be available. The option has also been assessed as likely to result in negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.

### Recommended preferred option and options dismissed

Proposed for dismissal	Rationale
<p>Option 1: (Preferred Option 2016) Green Belt release</p>	<p>The option could be expected to:</p> <ul style="list-style-type: none"> <li>● Maintain the distribution of development set out in the Core Strategy.</li> <li>● Enable an appropriate scale of development in the rural areas to support sustainable communities.</li> </ul> <p>However the cumulative impacts of development could result in:</p> <ul style="list-style-type: none"> <li>● Disturbance of habitats (and their connectedness) that could not be reasonably mitigated.</li> <li>● An increase in the risk of likely significant effects on European sites arising from increased recreational pressure.</li> <li>● Deterioration of the settings of designated or non-designated heritage assets that could not be reasonably mitigated.</li> <li>● Loss of landscape character and / or impact on the setting of the peak district national park and settlements in the District that could not be reasonably mitigated.</li> </ul> <p>The option relies on the allocation of a large number of small sites in the rural areas with associated risks that:</p> <ul style="list-style-type: none"> <li>● Opportunities to invest in infrastructure are reduced.</li> <li>● Housing needs are not met if a proportion of small sites fail to come forward as expected.</li> <li>● Exceptional circumstances test cannot be met resulting in the approach not being compliant with NPPF Green Belt policy.</li> </ul>
<p>Option 2: Countryside release</p>	<p>The option requires the growth of smaller villages and this is contrary to the spatial strategy / settlement hierarchy. The option could be expected to:</p> <ul style="list-style-type: none"> <li>● Maintain the distribution of development set out in the Core Strategy.</li> <li>● Restrict Green Belt release in line with the NPPF / White Paper.</li> <li>● Enable an appropriate scale of development in the rural areas to support sustainable communities.</li> </ul> <p>However the cumulative impacts of development could result in:</p> <ul style="list-style-type: none"> <li>● Disturbance of habitats (and their connectedness) that could not be reasonably mitigated.</li> </ul>

Proposed for dismissal	Rationale
	<ul style="list-style-type: none"> <li>• An increase in the risk of likely significant effects on European sites arising from increased recreational pressure.</li> <li>• Deterioration of the settings of designated or non-designated heritage assets that could not be reasonably mitigated.</li> <li>• Loss of landscape character and / or impact on the setting of the peak district national park and settlements in the District that could not be reasonably mitigated.</li> </ul> <p>The option relies on the allocation of a large number of small sites in the rural areas with associated risks that:</p> <ul style="list-style-type: none"> <li>• Development is delivered in locations without infrastructure / services to support it.</li> <li>• Opportunities to invest in infrastructure are reduced.</li> <li>• Housing needs are not met if a proportion of small sites fail to come forward as expected.</li> </ul>
<p>Option 3: Growth redirected to towns</p>	<p>The option amends the distribution of development set out in the Core Strategy.</p> <p>The option could be expected to:</p> <ul style="list-style-type: none"> <li>• Reflect the settlement hierarchy (avoiding growth in smaller villages).</li> <li>• Restrict Green Belt release in line with the NPPF / White Paper.</li> </ul> <p>However the cumulative impacts of development could result in:</p> <ul style="list-style-type: none"> <li>• Disturbance of habitats (and their connectedness) that could not be reasonably mitigated.</li> <li>• An increase in the risk of likely significant effects on European sites arising from increased recreational pressure.</li> <li>• Deterioration of the settings of designated or non-designated heritage assets that could not be reasonably mitigated.</li> <li>• Loss of landscape character and / or impact on the setting of the peak district national park and settlements in the District that could not be reasonably mitigated.</li> </ul> <p>The option relies on reduced distribution of development to the rural areas with associated risks that:</p> <ul style="list-style-type: none"> <li>• reduced investment in services and facilities in the rural areas results.</li> <li>• an uneven distribution of development is delivered with growth focused on the three towns.</li> <li>• there is an increase in car travel as the focus of growth and investment in the towns draws people into Leek, Cheadle and Biddulph from the surrounding settlements.</li> </ul>
<p>Option 4: Strategic site release</p>	<p>The option could be expected to:</p> <ul style="list-style-type: none"> <li>• Maintain the distribution of development set out in the Core Strategy.</li> <li>• Restrict Green Belt release in line with the NPPF / White Paper.</li> </ul>

Proposed for dismissal	Rationale
	<ul style="list-style-type: none"> <li>• Enable an appropriate scale of development in the rural areas to support sustainable communities.</li> <li>• Consolidate development sites in the rural areas to improve deliverability and support regeneration opportunities and infrastructure improvements.</li> <li>• Deliver housing outside the Green Belt in a sustainable and accessible location.</li> </ul> <p>However the cumulative impacts of development could result in:</p> <ul style="list-style-type: none"> <li>• negative impacts on the character and appearance of the rural area where the strategic site is located.</li> <li>• Deterioration of the settings of designated or non-designated heritage assets that could not be reasonably mitigated.</li> <li>• Loss of landscape character and / or impact on the setting of the peak district national park and settlements in the District that could not be reasonably mitigated.</li> </ul> <p>The option relies on the allocation of a large site in the rural areas with associated risk that:</p> <ul style="list-style-type: none"> <li>• The allocation is not consistent with the spatial strategy / settlement hierarchy.</li> </ul>

**Table 6.14 Development approach options dismissed following appraisal**

**6.1406** The alternatives identified above were dismissed according to the rationale identified in the table above. However elements of options 3 and 4 were identified as offering sustainable development benefits. A fifth option - a hybrid of options 3 and 4 was identified as Option 5 (preferred option July 2017).

**6.1407 Option 5 (Preferred Option July 2017) - Growth redirected to towns accompanied by strategic site release** proposes to reduce the Rural Areas' share of the District's housing requirement from 28% to 25% in order to reflect the constrained supply of suitable sites. Increase Cheadle's share of the District's housing requirement from 22% to 25% to reflect the availability of suitable development sites outside of the Green Belt. Identify a strategic site to consolidate growth in the rural areas, identify further sites in larger villages, and a windfall allowance, restricting Green Belt release.

#### **Preferred option July 2017 - summary of significant effects**

**6.1408** Increasing Cheadle's share of the District's housing requirement and reducing the proportion of growth allocated to a strategic site in the rural areas is expected to help enable the delivery of a range of types and tenures of new homes, making a significant contribution to meeting the needs of the whole community. The option could also make a significant contribution to the delivery of affordable homes. This is likely to result in positive effects on a number of settlement centres and may help support opportunities for investment in infrastructure, including in culture and tourism, with positive effects on the local economy. Consolidating growth may also have positive effects on the local economy through helping to bring forward regeneration opportunities. The identified strategic site at Blythe Bridge would deliver development in proximity to the District's only railway station. Blythe Bridge is

on the Crewe - Stoke - Derby line and this is likely to result in a positive effect on supporting the use of public transport. Blythe Bridge has a range of facilities and services including a GP Surgery, schools, play facilities, community library and general store and this is likely to result in positive effects on improving access to services and facilities (which in turn is likely to advance equality of opportunity). Under this Option, Cheadle's share of the District's housing requirement is increased and this together with consolidation of growth in the rural areas to a well connected site is expected to help improve accessibility to jobs.

**6.1409** Consolidation of growth in the rural areas within a strategic site helps to avoid reliance on a number of small or medium sized allocations in the larger villages and this is likely to help mitigate predicted effects on the District's ecological and GI networks and reduce the impact of disturbance of habitats by development. It will also help avoid the need to allocate sites in larger villages such as Ipstones, close to the national park and to European sites, helping reduce the risk of potential effects on such sites arising from recreational pressure. However dependent on proposal specific information, there is scope that this option may lead to the deterioration of the settings of designated or non-designated heritage assets, applicants should be required to provide an NPPF compliant heritage statement. In comparison with option 4, this option reduces the proportion of growth allocated to a strategic site in the rural areas and this is expected to help mitigate the risk of leading to a negative effect on the character and appearance of Blythe Bridge. Likely negative effects on landscape character have also been identified, the identified strategic site falls within the "important landscape setting to settlement" and some sites required for this option may be assessed as being of some landscape sensitivity, however site-specific landscape mitigation measures may be available. The option has also been assessed as likely to result in negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.

Option recommended to be taken forward	Rationale
<p>Option 5:(Preferred Option July 2017) Growth redirected to towns accompanied by strategic site release</p>	<p>The option amends the distribution of development set out in the Core Strategy but enables the Council to meet its objectively assessed need for housing in line with the principles in the spatial strategy and to reduce the amount of land that will be required to be removed from Green Belt.</p> <p>The option could be expected to:</p> <ul style="list-style-type: none"> <li>● Restrict Green Belt release in line with the NPPF / White Paper.</li> <li>● Be more closely aligned with the spatial strategy than option 4.</li> <li>● Better recognise the needs of both urban and rural areas than option 3.</li> <li>● Consolidate development sites in the rural areas to improve deliverability and support regeneration opportunities and infrastructure improvements.</li> <li>● Deliver housing outside the Green Belt in a sustainable and accessible location.</li> <li>● Enable development to be focused where it could achieve high levels of affordable housing.</li> </ul> <p>However the cumulative impacts of development could result in:</p>

Option recommended to be taken forward	Rationale
	<ul style="list-style-type: none"> <li>• negative impacts on the character and appearance of the rural area where the strategic site is located.</li> <li>• Deterioration of the settings of designated or non-designated heritage assets that could not be reasonably mitigated.</li> <li>• Loss of landscape character and / or impact on the setting of the peak district national park and settlements in the District that could not be reasonably mitigated.</li> </ul>

**Table 6.15 Development approach option recommended to take forward**

### Mitigation measures proposed

**6.1410** It is possible that likely significant effects identified via the SA can be mitigated. To assist this, the following measures have been identified during the appraisal of alternative development approaches and fed into the Local Plan preparation process. Local Plan policies should help to ensure that:

- Good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.
- The needs of all members of the community can be addressed by helping to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.
- New developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.
- New developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.
- Developments include appropriate landscaping to aid removal of air pollutants.
- New developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.
- Impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible.
- Geologically important sites are afforded protection and enhancement.
- Support is provided for waste minimisation.
- The character of towns / villages; heritage and archaeological assets along with their settings are protected and enhanced.
- The character and appearance of the landscape including historic landscape and other natural assets and resources are protected and enhanced.
- Support is given to sustainable economic growth; tourism and the visitor economy; and the vitality and viability of town and village centres.

## 6.6 Appraisal of preferred option policies

### Selection of alternatives

**6.1411** The Staffordshire Moorlands Core Strategy was adopted in March 2014. The Core Strategy contains a suite of existing policies consistent with the NPPF. However since adoption a number of new or emerging planning policies and regulations of relevance have been introduced. These include:

- The Housing and Planning Act 2016
- Self-Build and Custom House Building Act 2015 and associated Regulations (2016)
- The Town and Country Planning (Brownfield Land Register) Regulations 2017
- Town and Country Planning (Permission in Principle) Order 2017
- Neighbourhood Planning Act 2017
- Housing White paper published February 2017

**6.1412** Existing core strategy policies have thus been reviewed as part of the Local Plan preparation process and updated where the evidence base or national planning policy context requires it. For this reason, alternative approaches to delivering policy objectives have not been appraised, the Core Strategy policy has been taken as the most appropriate policy option in the first instance. However the policies, updated as required, have been considered the preferred approach and appraised to identify likely significant effects. Mitigation measures have been identified where appropriate.

**6.1413** The following text summarises the outcomes of policy appraisal work carried out between December 2016 and February 2017 and was used to help inform the revision of preferred option policies for preparation of the Local Plan Preferred Options July 2017. The text and policy numbers thus refer to the policy options as at December 2016.

### Strategic Policies

**6.1414 Policy SS1 Development Principles** expects development to contribute positively to the social, economic and environmental improvement of the District in partnership with other agencies and services. All proposals for development will be considered in the context of the District-wide spatial strategy. Significant positive effects include the likelihood of improvements to the social and environmental quality of the neighbourhood and improved access to jobs, services and facilities. Policy intent is to secure a mix of types and tenures of quality, affordable homes, including starter homes and this could make a significant contribution to meeting the needs of the whole community. Further positive effects are likely to result from the intentions to maintain the distinctive character of the District's towns and villages and their settings; to protect and enhance the natural and historic environment of the District and to create sustainable, self-sufficient settlements encouraging a strong, prosperous and diverse economy. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:

**6.1415 Mitigation:** The policy could make reference to enhancement of the District's GI network and to the needs of older people, including for extra care provision. The policy should seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy. The location of identified areas of poor air quality should be a factor in considering preferred locations for new development and the delivery

of significant soft landscape features should be required to help maximise the removal of air pollutants where necessary. The Policy could refer to strengthening links between rural areas and towns by sustainable forms of transport.

**6.1416 Policy SS2 Presumption in favour of Sustainable Development** sets out how the Council will work with applicants to facilitate development that improves the economic, social and environmental conditions of Staffordshire Moorlands. Significant positive effects were identified. Since the Policy reflects the presumption in favour of sustainable development set out in the NPPF, no mitigation measures were identified.

**6.1417 Policy SS3 Future Provision and Distribution of Development** sets out that provision will be made for 6,080 additional dwellings in the plan area during the period 2012 to 2031. Provision will also be made for at least 35 hectares of additional employment land between 2011 and 2031 and for new retail, transport, recreational, community and tourism facilities and services to meet the identified needs of settlements. Significant positive effects include the likelihood of improvements to the social and environmental quality of the neighbourhood and improved access to jobs, services and facilities. Meeting objectively assessed housing need could make a significant contribution to meeting the needs of the whole community. Provision of new homes will help to enhance the vitality and viability of the District's towns and villages. Lower housing targets would have less of a positive impact on vitality and viability. Provision of new homes and employment land to meet identified need could facilitate the delivery of new employment opportunities or residential development in close proximity to existing employment provision. A lack of new homes to accommodate growth may limit economic development through a fall in the labour force. No mitigation measures were identified.

**6.1418 Policy SS4 Strategic Housing Development** manages the release of housing land in order to deliver the level and distribution of development set out in other policies. Significant positive effects include helping to meet the housing needs of the whole community through enabling the Plan's objectively assessed housing need to be delivered. Provision of new homes will also help to enhance the vitality and viability of the District's towns and villages. Lower housing targets would have less of a positive impact on vitality and viability and a lack of new homes may limit economic development through a fall in the labour force. No mitigation measures were identified.

**6.1419 Policy SS5 Towns** identifies Leek, Biddulph and Cheadle as towns, with these settlements accommodating the major proportion of the District's housing, employment and retail needs. Significant positive effects include helping to enhance the vitality and viability of the District's towns through strengthening their role as service centres.

**6.1420 Mitigation:** Whilst no significant negative effects were predicted, the appraisal notes that the Policy might be improved by including a reference to helping strengthen links between rural areas and towns, including by sustainable forms of transport, to help sustain a vibrant rural economy also.

**6.1421 Policy SS6 Leek Area Strategy** seeks to consolidate the role of Leek as the principal service centre and a market town and to support its regeneration. Policy intent is to increase the range of available and affordable house types, especially for first time buyers and older people and this is likely to make a significant contribution to meeting the housing needs of the whole community. Further positive effects are likely to result from the intentions to create employment growth and increase the diversity of employment opportunities; strengthen the role of Leek as a principal service and retailing centre for the District and to

promote Leek's special character and heritage. Significant positive effects also include the likelihood of improvements to the social and environmental quality of neighbourhoods and improved access to jobs, services and facilities. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:

**6.1422 Mitigation:** The policy should refer to the District's GI Strategy and to strengthening links between rural areas and the town by sustainable forms of transport. The policy should seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy. The policy should also refer to taking opportunities to enhance the character and appearance of the landscape, including the historic landscape, paying particular attention to the quality of the urban / rural interface.

**6.1423 Policy SS7 Biddulph Area Strategy** seeks to enhance the role of Biddulph as a significant service centre and a market town and to support its regeneration. Policy intent is to increase the range of available and affordable house types, especially for first time buyers, families and older people and this is likely to make a significant contribution to meeting the housing needs of the whole community. Further positive effects are likely to result from the intentions to create employment growth and increase the diversity of employment opportunities; strengthen the role of Biddulph as a significant service and retailing centre for the District and to improve the image and identity of Biddulph and strengthen its role as a visitor destination. Significant positive effects also include the likelihood of improvements to the social and environmental quality of neighbourhoods and improved access to jobs, services and facilities. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:

**6.1424 Mitigation:** The policy should refer to the District's GI Strategy, in particular to supporting measures to encourage walking and cycling, improving and creating pedestrian and cycle links in the town and to increasing access into the countryside by foot, cycling and horse riding. The policy should seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy. The policy should also refer to taking opportunities to enhance the character and appearance of the landscape, including the historic landscape, paying particular attention to the quality of the urban / rural interface and to increasing tourist opportunities for visitors.

**6.1425 Policy SS8 Cheadle Area Strategy** seeks to expand the role of Cheadle as a significant service centre and a market town. Policy intent is to increase the range of available and affordable house types, especially for first time buyers and families and this is likely to make a significant contribution to meeting the housing needs of the whole community. Further positive effects are likely to result from the intentions to create employment growth and increase the diversity of employment opportunities; expand the role of Cheadle as a significant service and retailing centre for the District and to improve environmental quality and accessibility. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:

**6.1426 Mitigation:** The policy should refer to the District's GI Strategy and to meeting the needs of older people, including with extra care housing. The policy should seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy. The policy should also refer to taking opportunities to enhance the character and appearance of the landscape, including the historic landscape, paying particular attention to the quality of the urban / rural interface and to increasing tourist opportunities for visitors.

**6.1427 Policy SS9 Rural Areas** establishes a development requirement for the rural areas defined as larger villages, smaller villages and other rural areas and ensures that development in the rural areas reflects the spatial strategy. Positive effects are noted as follows. The policy categorises villages based on their population, services, facilities and capacity for development and this is likely to contribute to maintaining and strengthening local distinctiveness and sense of place. The policy also seeks to deliver the employment land necessary to provide sufficient local employment opportunities in the villages and to enhance and diversify employment provision at existing employment sites in the rural areas and this is likely to facilitate the delivery of new employment opportunities. Whilst no significant negative effects were predicted, a policy improvement was identified as follows:

**6.1428 Mitigation:** Option 2 for the policy should make clear that "local" infrastructure includes social infrastructure.

**6.1429 Policy SS10 Larger Villages Area Strategy** identifies the larger villages and seeks to retain and enhance their role as rural service centres, providing for the bulk of the local housing needs of the rural areas and also for limited employment needs of a scale and type appropriate to each settlement having regard to local needs, infrastructure capacity and character. Policy intent is to increase the range of available and affordable house types, especially for first time buyers and families and this is likely to make a significant contribution to meeting housing needs. Further positive effects are likely to result from the intentions to enable small scale new employment development and improve the use of existing employment areas; retain and enhance the role of rural areas as rural service centres and to ensure that new development reflects and enhances each village's special character and heritage. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:

**6.1430 Mitigation:** The policy should support environmental enhancements, including the improvement and creation of Local Green Spaces. It should refer to the District's GI Strategy and improving pedestrian and cycle links through the villages and to surrounding towns and villages and into the countryside, as well as to meeting the needs of older people, including with extra care housing. The policy could refer to taking opportunities to enhance the character and appearance of the landscape, including the historic landscape, paying particular attention to the edge of settlements.

**6.1431 Policy SS11 Smaller Villages Area Strategy** identifies the smaller villages and seeks to ensure these settlements provide only for appropriate development which enhances community vitality or meets a social or economic need of the settlement and its hinterland. Policy intent is to enable new housing development which meets a need, including affordable housing, and this is likely to make a positive contribution to meeting housing needs. Further positive effects are likely to result from the intentions to enable small scale new employment development including live-work units; protect and enable services and facilities which are essential to sustain rural living and to ensure that new development does not undermine the character and life of the settlement. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:

**6.1432 Mitigation:** The policy should support environmental enhancements, including the improvement and creation of Local Green Spaces. It should refer to the District's GI Strategy and improving pedestrian and cycle links through the villages and to surrounding towns and villages and into the countryside, as well as to meeting the needs of older people, including with extra care housing. Policy should seek to ensure that new development reflects and

enhances each village's special character and heritage. The policy could also refer to taking opportunities to enhance the character and appearance of the landscape, including the historic landscape, paying particular attention to the edge of settlements.

**6.1433 Policy SS12 Other Rural Areas Strategy** identifies the other rural areas as comprising the countryside and the green belt outside settlement boundaries and including those small settlements and dispersed developments not identified in policies SS10 and SS11. Policy intent is that these areas will provide only for development which has an essential need to be located in the countryside, supports rural diversification, contributes to sustainability of the rural areas, promotes sustainable tourism or enhances the countryside. Significant positive effects include enhancing and conserving the quality of the countryside, including recognising and conserving the special quality of the landscape in the Peak District National Park, and limiting uses which generate a substantial number of regular trips in areas that are not well served by public transport - as this is likely to help to reduce the number of journeys made by car. Further positive effects are likely to result from encouraging measures which protect and enhance the biodiversity and geological resources, as well as the heritage of the district. Also, from measures to sustain the rural economy and enhance tourist opportunities. Whilst no significant negative effects were predicted, a policy improvement was identified as follows:

**6.1434 Mitigation:** The policy should refer to the District's GI Strategy and improving pedestrian and cycle links, including into the countryside, as well as improving opportunities for related leisure activities such as horse riding.

**6.1435 Policy SS13 Churnet Valley Strategy** manages development according to the aims of the strategy for the Churnet Valley and the Churnet Valley Masterplan SPD. Policy intent is enable the Churnet Valley to provide a strong focus for sustainable rural regeneration across the district and this may help to advance equality of opportunity as well as to enhance the vitality and viability of the area's towns and villages. Further positive effects for health and for reducing the need for car use are likely to result from the intentions to enhance and develop links to strategic footpaths, cycle and horse riding routes and to improve connectivity and accessibility to and within the Churnet Valley by all forms of sustainable transport. In addition support for measures to protect and enhance the biodiversity, landscape character and heritage assets of the valley are all likely to lead to additional positive effects. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:

**6.1436 Mitigation:** Policy should require the protection of notable geological and geomorphological features and should seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy.

**6.1437 Policy SS14 Northern Gateway Opportunity Site** supports the development of a Regional Investment Site for high quality employment development at this location and in line with the Northern Gateway. This is a large site (the northern area is approximately 19 ha and the southern area is approximately 29 ha) on the south-eastern outskirts of Blythe Bridge. The A50 runs through the middle of the site from the north-west to the south-east. The site as a whole is extensively surrounded by farm land to the east, south and west and by housing and built environment to the north. However, it is effectively isolated from the wider landscape because it is encircled by major roads (the A50 and A521) to the north and east, Cresswell Lane to the south and the Crewe to Derby railway line to the west. The river Blithe runs adjacent to the railway line further to the west. The majority of the site consists of uniform, improved grassland used for pasture. This habitat is common and widespread

both locally and throughout the UK. Policy intent is to deliver high quality employment development and this is likely to encourage investment in businesses, people and infrastructure leading to a strengthened and more diversified economy, as well as facilitating the delivery of new employment opportunities. Further positive effects for minimising disadvantages are likely as a result of the site serving a regional need for employment and potentially other community requirements as this may help to advance equality of opportunity and address community need. However potentially significant negative effects on climate change were predicted as the proposal could significantly increase the need to travel by less sustainable forms of transport, increasing road traffic and congestion. Also the site is partially located within a mineral consultation area - bedrock sand. A number of policy improvements were identified as follows:

**6.1438 Mitigation:** The policy should require measures to improve connectivity and accessibility to the site by sustainable transport means having regard to the GI strategy. The policy should also seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy and should support measures to enhance, protect and interpret landscape character. In addition, appropriate consultation will need take place to ensure sand resources are safeguarded from unnecessary sterilisation by non-mineral development.

**6.1439 Policy SS15 Planning Obligations and Community Infrastructure Levy** provides clarity regarding the Council's approach to developer contributions. The policy could enable the provision of new, or the significant enhancement of existing, community facilities and services and this is likely to make a positive contribution towards community cohesion and the quality of where people work and live. Further positive effects on health and the supply of new homes to meet need were identified, as developer contributions may help to ensure the delivery of an appropriate quantity and quality of open space, sport and recreation facilities and an increase in the supply of affordable homes. No policy improvements were identified.

## Sustainable Development Policies

**6.1440 Policy SD1 Sustainable Use of Resources** sets out a range of measures in relation to the sustainable use of resources and measures to address climate change. These include encouragement to be given to development on previously developed land and a requirement for major developments to demonstrate that consideration has been given to energy efficiency, water conservation, sourcing of construction materials, site orientation and integration of micro-renewables. Significant positive effects on minimising contributions to climate change are predicted to arise from the policy requirement that all development should adapt to climate change and the encouragement for re-use of construction or construction waste materials. Further positive effects are likely to result from the support for development that is located to minimise energy needs as this is likely to result in the location of development in proximity to existing services and facilities. Whilst no significant negative effects were predicted, a policy improvement was identified as follows:

**6.1441 Mitigation:** Policy should clarify that any remediation of brownfield land should pay particular attention to the need to identify, conserve and enhance biodiversity resources.

**6.1442 Policy SD2 Renewable / low-carbon energy** gives support to new renewable energy development whilst recognising that the siting and design of all stand-alone renewables installations requires careful consideration to protect the natural and built environment and other amenities. Significant positive effects on minimising contributions to climate change

are predicted to arise from the policy intent to meet part of the District's future energy demand through renewable or low-carbon energy sources. Whilst no significant negative effects were predicted, a policy improvement was identified as follows:

**6.1443 Mitigation:** The policy should clarify that impacts on the landscape includes the historic landscape and other natural assets and resources.

**6.1444 Policy SD3 Sustainability Measures in Development** supports a number of measures which can improve the sustainability of new or existing development, including exceeding thermal efficiency or water conservation standards, contributing to District Heating networks or the installation of micro-renewables. Significant positive effects on minimising contributions to climate change are predicted to arise from the policy intent to support further carbon- or water-saving measures. No significant negative effects were predicted however a policy improvement was identified as follows:

**6.1445 Mitigation:** The policy should require all new residential and commercial development where car parking / garaging is proposed to install a facility to permit the recharge of an electrical battery-powered vehicle.

**6.1446 Policy SD4 Pollution** seeks to ensure that the effects of pollution (air, land, noise, water, light) are avoided or mitigated. Significant positive effects on improving air quality and soil and land resources are predicted to result. No significant negative effects were predicted.

**6.1447 Policy SD5 Flood Risk** establishes flood control measures. Significant positive effects on reducing flood risk are predicted to result. Whilst no significant negative effects were predicted, a policy improvement was identified as follows:

**6.1448 Mitigation:** When considering planning applications the Council should also have regard to the Local Flood Risk Management Strategy; the Policy might also include that where a watercourse is present on a development site, it should be retained or restored into a natural state and enhanced where possible.

## Economy and Employment Policies

**6.1449 Policy E1 New Employment Development** will ensure that there is a choice of sustainably located employment sites, attractive to developers and operators and appropriate to market needs. In order to ensure that the local workforce and businesses benefit from new development, the policy also proposes local labour agreements where appropriate to contribute towards training programmes and employment support and access schemes. Significant positive effects on advancing equality of opportunity; safeguarding the vitality of towns and sustaining a vibrant rural economy are predicted to result. Further positive effects on sustainable economic growth, diversification of the economy and high and stable level of employment were identified. There is potential for negative effects on contribution to climate change arising from policy support for new business developments, as this is likely to result in greater energy use.

**6.1450 Policy E2 Employment Allocations** ensures allocation of sufficient employment land to support the housing requirement. Significant positive effects on advancing equality of opportunity and safeguarding the vitality of towns are predicted to result. Further positive effects on sustainable economic growth, diversification of the economy and high and stable

level of employment were identified. There is potential for negative effects on contribution to climate change arising from the allocation of sites for new business developments, as this is likely to result in greater energy use.

**6.1451 Policy E3 Existing Employment Areas** seeks to retain existing employment sites where appropriate. Significant positive effects on reducing the number of journeys made by car and advancing equality of opportunity are likely to result from the policy intent to help retain employment sites well served by the public transport network and to support mixed use developments. Further positive effects on sustainable economic growth, diversification of the economy, high and stable level of employment and safeguarding the vitality of towns were identified. There is potential for negative effects on contribution to climate change arising from new business development, as this is likely to result in greater energy use.

**6.1452 Policy E4 Tourism and Cultural Development** supports the development of the tourist industry with new development proposals to be assessed according to the extent to which they support the local economy and promote the distinctive character and quality of the District. Significant positive effects on encouraging sustainable tourism, cultural heritage and local distinctiveness are likely to result from this. Further positive effects on reducing the number of journeys made by car and advancing equality of opportunity, sustainable economic growth, diversification of the economy, high and stable level of employment and safeguarding the vitality of towns were identified. There is potential for negative effects on contribution to climate change arising from new development, as this is likely to result in greater energy use.

**6.1453 Policy E5 Rural Economy** aims to support the rural economy, enable appropriate rural economic diversification and meet the needs of rural communities whilst seeking to protect the countryside from inappropriate development. Significant positive effects on advancing equality of opportunity are likely to result from support for the rural economy. Further positive effects on reducing the number of journeys made by car and sustainable economic growth, diversification of the economy, and high and stable level of employment were identified. There is potential for negative effects on contribution to climate change arising from new development, as this is likely to result in greater energy use.

**6.1454 Mitigation:** Policy should amend the definition of appropriate development to include avoidance of harm to local landscape character or appearance, including the historic landscape; as well as to non-designated historic assets.

## Housing Policies

**6.1455 Policy H1 New Housing Development** seeks to ensure that an appropriate range of sizes, types and tenures of housing is provided, supporting the provision of flexible accommodation delivered in accordance with the nationally described space standard and to meet accessibility standards set out in the Optional Requirement M4(2) of building regulations. Significant positive effects on ensuring the supply new homes meet local needs including affordable / social / extra care are likely to result from enabling the Plan's objectively assessed housing need to be delivered. Further positive effects on enhancing the vitality and viability of the District's towns and villages and supporting stable levels of employment were identified. There is potential for negative effects on contribution to climate change arising from new development, as this is likely to result in greater energy use. No mitigation measures were identified.

**6.1456 Policy H2 Housing Allocations** identifies sites as suitable for housing development in order to meet the housing target set out in Policy SS3. Significant positive effects on ensuring the supply of new homes to meet local needs are likely to result from site allocations. Further positive effects on enhancing the vitality and viability of the District's towns and villages and supporting stable levels of employment were also identified. Further detail relating to any predicted impacts on biodiversity, landscape or townscape character is provided in the specific sites appraisals. There is potential for negative effects on contribution to climate change arising from supply of land for new development, as this is likely to result in greater energy use. No mitigation measures were identified.

**6.1457 Policy H3 Affordable Housing** identifies thresholds for an affordable housing target of 33% in towns and the larger villages; in or on the edge of smaller villages, small schemes for 100% affordable housing will be permitted on suitable rural exception sites; the policy also sets a starter homes target. Significant positive effects on ensuring the supply of new homes to meet local needs are likely to result from provision of affordable housing. Further positive effects on enhancing the vitality and viability of the District's towns and villages and supporting stable levels of employment were also identified. There is potential for negative effects on contribution to climate change arising from new development, as this is likely to result in greater energy use. No mitigation measures were identified.

**6.1458 Policy H4 Rural Housing** recognises that the re-use of rural buildings for commercial purposes is preferable to that of residential uses and establishes criteria for re-use, the policy also recognises the need to safeguard rural buildings considered to be of particular merit in terms of their contribution to local character or heritage and the need to deliver affordable homes. Positive effects on ensuring the supply of new homes to meet local needs are likely to result from provision of affordable housing, provision of rural housing is also likely to benefit the development of sustainable communities and community cohesion. Further positive effects on helping sustain the rural economy were identified from helping to meet rural housing need. There is potential for negative effects on contribution to climate change arising from new development, as this is likely to result in greater energy use; and from a likely increased use of private transport. Policy improvements were identified as follows:

**6.1459 Mitigation:** Policy should require housing to remain affordable for successive occupiers in perpetuity and include a requirement for sites to be adequately served by existing services and facilities.

**6.1460 Policy H5 Gypsy and Traveller Sites and Sites for Travelling Showpeople** sets out the criteria for determination of applications for gypsy and traveller sites or for making future site allocations. Significant positive effects on meeting identified housing need is likely to result from the policy intent to meet the needs of the gypsy, traveller and travelling show people community. Access to accommodation and local services and facilities is likely to lead to further positive impacts on health and well-being for gypsies and travellers and establishing the considerations that will be taken into account for determining applications or future allocations is likely to lead to positive effects on helping ensure community safety and local environmental quality.

## **Town Centres and Retailing Policies**

**6.1461 Policy TCR1 Development in the Town Centres** seeks to maintain the vitality and viability of town centres by supporting measures that lead to the enhancement and regeneration of the shopping and town centre environment, promoting their tourism potential

and maintaining local distinctiveness by supporting proposals that help to retain and attract independent retailers. Significant positive effects were predicted for Improving access to jobs, services and facilities. Further positive effects were identified for maintaining the vitality and viability of the towns, protecting the towns as service centres, promoting sustainable economic growth and diversification of the economy and on supporting high and stable levels of employment.

**6.1462 Mitigation:** Whilst no significant negative effects were predicted, the appraisal notes that the Policy might be improved by including a reference to helping strengthen links between rural areas and towns, including by sustainable forms of transport, in order to help sustain a vibrant rural economy also. The policy should encourage proposals that deliver high quality public spaces and require active ground floor frontages to be maintained and created within town centres with appropriate town centre uses.

**6.1463 Policy TCR2 Primary Shopping Frontages** safeguards the retail function at the heart of town centres. Significant positive effects were predicted for maintaining the vitality and viability of the towns, protecting the towns as service centres, promoting sustainable economic growth and supporting high and stable levels of employment. Further positive effects were identified for tourism as vibrant shopping areas are likely to support the visitor economy. No significant negative effects were predicted although it is likely that new development will result in increased energy use and greenhouse gas emissions.

**6.1464 Policy TCR3 Retailing and other Town Centre uses outside Town Centres** provides support for local shopping facilities. Significant positive effects were predicted for maintaining the vitality and viability of smaller, local centres, promoting sustainable economic growth and supporting high and stable levels of employment. Further positive effects were identified for improving access to jobs, services and facilities (including by non-car journeys) and tourism, as appropriate support for retailing and other town centre uses outside town centres is likely to result in support for the visitor economy. No significant negative effects were predicted although it is likely that new development will result in increased energy use and greenhouse gas emissions.

## Design and Conservation Policies

**6.1465 Policy DC1 Design Considerations** includes measures to promote locally distinctive, creative and sensitive design solutions to delivering new development, including incorporating sustainable construction techniques and design concepts to reduce the impact of development. Significant positive effects include the likelihood of improvements to the social and environmental quality of neighbourhoods and positive impacts on health and well-being. The policy seeks to promote the maintenance, enhancement, restoration and re-creation of biodiversity and geological heritage where appropriate and this could make a significant contribution to the protection of natural assets, although the significance of effect is dependent on implementation of the policy. Further positive effects are likely to result from the policy intent to deliver well designed development and high quality built environment and public realm as this is likely to lead to investment in business, people and infrastructure, resulting in a strengthened and more diversified economy, more vibrant town and village centres and sustained levels of employment. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:

**6.1466 Mitigation:** Policy should include a requirement for developments to be well integrated for car, pedestrian and cycle use as well as other sustainable transport links. It should also seek to mitigate the impacts of climate change through supporting delivery of

renewable and low carbon forms of energy and include a requirement for the creation of healthy environments (to address potential impacts of air pollution). The Policy should require development that secures the effective use of resources, including making best use of existing buildings, and that retains the distinctive character of the landscape (including historic landscape) with any change managed positively.

**6.1467 Policy DC2 The Historic Environment** seeks to ensure that sites and areas of particular heritage value are safeguarded for the future and where possible enhanced, both for their own heritage merits and as part of wider heritage led regeneration proposals. Significant positive effects include protection and enhancement of the character of towns and villages, as well as heritage assets and their settings and the character of historic landscapes. Further positive effects are likely to result from the policy intent to safeguard the District's historic environment as heritage led regeneration schemes may lead to investment in business, people and infrastructure, resulting in a strengthened and more diversified economy, more vibrant town and village centres and sustained levels of local employment. No significant negative effects were predicted.

**6.1468 Policy DC3 Landscape and Settlement Setting** seeks to protect and where possible enhance local landscape and the setting of settlements. Significant positive effects include protecting the distinctive character of towns and villages and the character of character / appearance of local landscapes, including historic landscapes and other natural assets. Further positive effects included support for the District's tourism attraction and help to maintain the visitor economy. Whilst no significant negative effects were predicted, a policy improvement was identified as follows:

**6.1469 Mitigation:** Policy should require that development maintains the biodiversity qualities of any natural or man-made features within the landscape, such as trees, woodlands, hedgerows, walls, watercourses or ponds and that development supports ecological networks in accordance with the GI strategy.

**6.1470 Policy DC4 Local Green Spaces** seeks to protect those green spaces that are of particular importance to communities. Significant positive effects include benefiting the social and environmental quality of neighbourhoods and protecting the distinctive character of towns and villages. Further positive effects included support for the District's tourism attraction and help to maintain the visitor economy. No significant negative effects were predicted.

## Sustainable Communities Policies

**6.1471 Policy C1 Creating Sustainable Communities** supports proposals which protect, retain or enhance existing community facilities in towns and villages and includes measures to resist proposals that involve the loss of local facilities. There is a requirement to incorporate the infrastructure required as a result of any scheme or to make provision for financial contributions. Significant positive effects for community cohesion, neighbourhood quality and access to services are anticipated from the policy intent to ensure that new development contributes to the creation of safe, livable and mixed communities with good access to jobs and key services including recreation facilities. Further positive effects are likely to arise from new community facilities, particularly in smaller villages and other rural areas contributing to the viability of communities. Creation of sustainable communities is likely to lead to improvements in health and well-being in the long term. No significant negative effects were predicted however a policy improvement was identified as follows.

**6.1472 Mitigation:** Policy should clarify that community infrastructure includes health services.

**6.1473 Policy C2 Sport, Recreation and Open Space** provides continued protection from development for existing areas identified for recreational land and buildings including school playing fields and amenity space and supports the provision of new sport, recreation and open space facilities consistent with guidance in the Council's SPD. Significant positive effects for health and well-being and creating and maintaining high quality local neighbourhoods are anticipated and this is also likely to lead to positive effects on townscape quality, helping to maintain the visitor economy. Further positive effects are likely to arise from new recreation facilities, particularly in smaller villages and other rural areas contributing to the viability of communities. Provision of new facilities is also likely to have positive effects on improving access to services in the long term. No significant negative effects were predicted however a policy improvement was identified as follows:

**6.1474 Mitigation:** Policy should require new sport, recreation and open space facilities to be accessible by a choice of means of transport.

**6.1475 Policy C3 Green Infrastructure** is supported by a Green Infrastructure strategy and recognises that the District's wide range of existing and potential green infrastructure assets will benefit from a strategic approach ensuring that adequate protection is given to key features; areas are identified where new linkages and assets need to be created and guidance and management is provided for development that may impact on such areas. Significant positive effects on a wide range of SA objectives were identified, including for health and well-being; creating and maintaining high quality local neighbourhoods and improving connectivity to a range of facilities via helping to establish or improve green travel links. Further positive effects on biodiversity and geodiversity are likely to arise from support for the creation of new wildlife habitats; enhancement of existing sites and creating links between them. Use of green infrastructure for effective flood risk and waterways management is likely to result in positive effects on water quality and climate change adaptation. Development of a high quality and multi-functional GI network that attracts visitors and provides recreation opportunities is also likely to have positive effects on sustainable economic growth and diversification of the economy. No significant negative effects were predicted however policy improvements were identified as follows:

**6.1476 Mitigation:** Policy should require support for improving green travel links to existing and new services and facilities, as well as formal and informal recreation opportunities, and should refer to support for the development of ecological networks in line with the GI strategy. The Policy should also explicitly include geodiversity as a green infrastructure asset.

**6.1477 Policy NE1 Biodiversity and Geological Resources** establishes a range of measures to protect and enhance biodiversity and geological resources. Significant positive effects on a wide range of SA objectives were identified, including for health and well-being; creating and maintaining high quality local neighbourhoods and biodiversity and geodiversity. Further positive effects are likely to arise from the contribution of habitat protection to effective flood risk and waterways management and climate change adaptation. No significant negative effects were predicted however policy improvements were identified as follows:

**6.1478 Mitigation:** Because of their importance to the landscape of the Staffordshire Moorlands, the plan should include a specific policy to protect trees, woodlands and hedgerows from loss or deterioration, to ensure the protection of these natural assets outside designated sites. The Biodiversity Opportunity Map should be published alongside the plan.

**6.1479 Policy T1 Development and Sustainable Transport** supports development which reduces reliance on the private car for journeys, reduces the need to travel generally and helps to deliver more sustainable settlement patterns. Significant positive effects on a wide range of SA objectives were identified, including for health and well-being; creating and maintaining high quality local neighbourhoods; reducing the need to travel by car and increasing access to a range of services and facilities. Further positive effects are likely to arise from reducing the need to travel generally including in relation to air quality, help to support healthy, inclusive and sustainable communities and supporting the visitor economy. No significant negative effects were predicted.

**6.1480 Policy T2 Other Sustainable Transport Measures** supports measures which promote better accessibility, creates safer roads, reduces the impact of traffic or facilitates highway improvements. Significant positive effects on a wide range of SA objectives were identified, including for health and well-being; creating and maintaining high quality local neighbourhoods; reducing the need to travel by car and increasing access to a range of services and facilities. Further positive effects are likely to arise from seeking improvements to the existing road, bus and rail networks generally, including in relation to air quality, help to support healthy, inclusive and sustainable communities and supporting the visitor economy. No significant negative effects were predicted.

### **How the SA informed preparation of the Preferred Option Plan July 2017**

**6.1481** Preparation of the Preferred Option Plan (July 2017) took into account the findings of the appraisals described above. Section 8.3 of this report sets out where changes to policies were made as a result of the SA.

### **Screening of proposed changes to Preferred Options Policies - January 2018**

**6.1482** Minor changes to most of the Preferred Option policies were suggested during preparation of the Submission version Local Plan. These amendments were in most cases proposed to aid clarity, to respond to a consultation response, or to take account of latest evidence and guidance.

**6.1483** In January 2018, proposed changes to preferred option policies were screened to identify if any changes would result in modifying the intent or approach of a Policy such that a re-appraisal of that Policy by the SA was required. An account of this is given in section 21 of this report.

**6.1484** The screening of changes proposed to Preferred Options Policies undertaken to help inform preparation of the Submission version Local Plan (February 2018) has not identified a requirement for further SA. In a number of cases, proposed changes are expected to lead to enhanced positive effects for a number of SA Objectives.

## Cumulative Effects

## 7 Cumulative Effects

**7.1** The SEA Directive requires that the assessment of effects should include “secondary, cumulative, synergistic, short, medium and long-term permanent and temporary effects” (SEA Directive Annex I). The emerging Staffordshire Moorlands Local Plan sets out the spatial principles and overarching criteria that will be applied to development within the plan area over the plan period until 2031. In many instances, given the strategic level of the Plan, it is difficult to be precise about when and in what form the effects will arise, and how one effect might relate to another.

**7.2** However, it is possible to draw some broad conclusions about the nature of the effects that the SA has identified:

**7.3** Most of the effects will be permanent, in that the Plan aims to deliver development that will last the time. There will inevitably be some temporary and short or medium term effects, particularly during construction, which will vary depending on the nature, scale and form of development, and the specific conditions that will apply during the construction process. Typical effects during construction will include amenity impacts such as noise, traffic generation, dust (air quality), and visual impact. There could also possibly be effects on soils and water resources/quality, although it would normally be possible to mitigate against the most significant effects arising.

**7.4** The effects which have been identified in the appraisal of the development strategy and policies, both positive and negative, are likely to increase over time, as the policies in the Plan are rolled out and implemented. For example, the delivery of housing will be phased over the Plan period. This also means that increasing amounts of affordable housing would become available over the same period. Any changes to settlement character, including impacts such as on landscape and townscape, will increase as development is delivered, depending upon the quality of the development delivered.

**7.5** The policies within the Plan are assessed for their individual impacts, but there may be collective effects which occur as a result of the policies being implemented in combination. These impacts may be greater than the sum of implementing individual policies.

**7.6** The key areas which were identified as having potential cumulative impacts were:

**7.7** Climate change - this is related to an increase in population, leading to increasing levels of energy consumption and traffic generation. The provision of energy efficient buildings, accessible services and support for non-car modal journeys also impact on this issue. Climate change in turn can impact on health, flooding and biodiversity.

**7.8** Maintaining biodiversity and landscape character can cumulatively impact on health, soil and water quality, opportunities for leisure and recreation, economic growth and the preservation of the character of local communities. In particular, due to the presence of a number of water bodies in areas of proposed growth, Local Plan policies need to mitigate any cumulative implications of new development on local Water Framework Directive compliance and ensure that watercourses do not deteriorate in status, and are retained at, or returned to, their most natural possible condition.

**7.9** The table below represents a summary of how the emerging Plan's set of options perform cumulatively against the SA objectives.

SA Objective	Cumulative Effects	Mitigation
1. To improve community cohesion and the quality of where people work and live.	The policies and proposals in the plan provide a strategic approach to delivering options for supporting and delivering high quality development, leisure, recreation and open space in the district, together with new homes and opportunities for new jobs. The delivery of these options will require partnership working within the Council and with other external organisations.	Ensure appropriate community engagement and consultation through the application of policies in the Local Plan and the delivery of new schemes and developments.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	The plan directs new facilities towards appropriate locations in terms of the settlement hierarchy. Facilities are also protected from inappropriate redevelopment for alternative uses. Many of the options have good existing links with the main towns and larger villages and sustainable transport links. Some of the proposals in themselves present opportunities for new and improved sustainable transport links. Cumulatively these aspects of the Local Plan will help to advance equality of opportunity and reduce social exclusion.	Provide measures to include access to facilities through sustainable modes of transport where relevant.  Ensure that specific development proposals and schemes are informed by the needs of the local community through consultation and partnership working.
3. To improve health and reduce health inequalities.	The plan provides policies and proposals to support increased access for residents and visitors to open space, green infrastructure and sport and recreation facilities. Cumulatively these will have benefits for health and fitness within the district through increased opportunity for physical activity and connecting with the natural environment with associated mental health benefits. However increased levels of traffic associated with new developments may lead to an increase in transport related air pollution such as nitrogen dioxide and particulates which may exacerbate health problems such as asthma.	Ensure that developments in areas where nitrogen dioxide levels do not meet air quality objectives are required to provide an air quality assessment.
4. To minimise opportunities for crime and reduce the fear of crime.	Opportunities will arise through the design of development schemes and public space to address environmental improvements in the interests of improved public safety and security.	Consider specific issues of safety and security through implementing relevant design measures.

SA Objective	Cumulative Effects	Mitigation
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social / extra care housing.</p>	<p>The policies and proposals in the plan will enable the housing needs of the district to be met to 2031. Policies and options are designed to meet the need for market and affordable housing and the level of housing growth required to support potential employment growth.</p>	<p>Ensure that development proposals meet the assessed housing needs of the district as identified in the 2014 Strategic Housing Market Assessment.</p>
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<p>The policies and proposals in the plan support improvements to the strategic network of sustainable transport links. The plan also directs new development towards accessible locations in accordance with the spatial strategy. Options are well associated with settlements and where possible link well with sustainable transport routes. Cumulatively these aspects of the Local Plan will help to strengthen links between rural areas and towns and maximise access via sustainable means of transport.</p>	<p>Ensure new developments maximise opportunities to improve access via sustainable modes of transport and contribute to the district's green infrastructure strategy.</p>
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<p>The policies and proposals in the plan support a planned increase in population that is likely to lead to increasing levels of energy consumption and traffic generation with associated negative impacts on climate change. This will need to be mitigated through existing proposed Local Plan policies. The plan includes policies for improving sustainable transport links within the district which will support a modal shift and an associated reduction in transport related greenhouse gas emissions. The plan also protects green infrastructure in the district that provides an existing carbon sink.</p>	<p>Encourage energy efficiency within development schemes.</p> <p>Maximise opportunities for greening and planting within new development schemes.</p> <p>Promote sustainable modes of transport.</p>
<p>8. To improve air quality.</p>	<p>Increased levels of traffic associated with new developments may lead to an increase in transport related air pollution. The plan includes policies for improving sustainable transport links within the district which will support a modal shift</p>	<p>Use of travel plans for new developments to promote sustainable modes of transport.</p>

SA Objective	Cumulative Effects	Mitigation
	and an associated reduction in transport related air pollution.	
9. To reduce flood risk, protect and enhance water sources.	Whilst policies and proposals direct development to areas of lowest flood risk, some development site options are close to areas of flood zones 2 and 3 and flood risk assessments will need to be carried out. Some development site options are close to water courses and as part of the EU Water Framework Directive (WFD) the Local Plan must help ensure such water bodies meet a required status by 2026. Local Plan policies need to mitigate any implications of new development on local WFD compliance and ensure that watercourses do not deteriorate in status, and are retained at, or returned to, their most natural possible condition.	<p>Promote the use of sustainable drainage solutions within schemes.</p> <p>Contribute to addressing the priority issues for the Dove catchment partnership as set out in the December 2015 update to the Humber River Basin District Management Plan.</p>
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	New development proposed within this plan includes options on both greenfield and brownfield land. Whilst the ecological value of site options has been considered in assessment of site options, there may be a cumulative impact of proposals on maintaining biodiversity. The plan recognises the importance of protecting and enhancing the district's natural resources for the benefit of biodiversity and the character and amenity of the area. An associated Habitats Regulations Assessment has tested the plan's policies and proposals on European sites with associated recommendations made for mitigation measures where appropriate. Local Plan policies require consideration of the impact of new development on ecology which should help to conserve biodiversity.	Require ecological surveys and appropriate mitigation for schemes within known areas of potential biodiversity interest.
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and	New development proposed within this plan includes options on both greenfield and brownfield land. Whilst the impact of site options on soil and land resources has been considered in assessment of site options, there may be a cumulative	Direct development away from best and most versatile agricultural land.

SA Objective	Cumulative Effects	Mitigation
enhance geological resources.	impact of proposals on the availability of best and most versatile agricultural land. The plan recognises the importance of protection and enhancement of geological resources.	
12. To minimise the use of non-renewable resources.	The plan directs new development in accordance with the spatial strategy to appropriate locations and provides opportunities for the re-use of previously developed land where appropriate.	Require sustainable construction methods in new schemes, such as waste minimisation, water and energy efficiency.
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	The plan recognises the need to consider the impact of new development on the character of towns and villages as well as heritage and archaeological assets along with their settings.	Require proposals to include appropriate assessment of their impact on designated and non-designated heritage assets and their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	The plan recognises the need to consider the impact of new development on the character and appearance of the landscape including historic landscape and other natural assets and resources.	Require proposals to include appropriate assessment of their impact on landscape character including the historic landscape.
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	The policies and proposals support enhancement of existing facilities for sustainable tourism and cultural heritage and the provision of new facilities in sustainable locations to serve the local community.	Ensure that proposals contribute to maintaining local distinctiveness.
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	The policies and proposals in the plan support and promote the rural economy, as well as the sustainable development of the three main towns.	Ensure support for the rural economy.
17. To strengthen, modernise and	The plan provides policies and options that support and promote the sustainable	Ensure support for local businesses and those

SA Objective	Cumulative Effects	Mitigation
diversify the District economy, and promote sustainable economic growth	economic growth of the district. Cumulatively these policies will help raise the profile of the district as a destination and an attractive place to live, work and invest.	seeking to locate to the district.
18. To encourage and support a high and stable level of employment	The policies and options in the plan will support existing and new employment opportunities within the district.	New developments should include a commitment to provide employment opportunities for local residents.

**Table 7.1 Cumulative performance of proposed options against SA Objectives**

### Interactions with other Relevant Plans And Projects (Inter-Plan Effects)

**7.10** In considering the effects of the Local Plan with other plans and projects, priority has been given to key documents that affect planning and development in the District and its neighbouring authorities. The aim of the analysis of inter-plan effects was to identify how other plans and key projects may affect the sustainability of Staffordshire Moorlands as a District.

**7.11** Table 7.2 below summarises key inter-plan cumulative effects.

Plans, programmes or projects	Significant combined effects of Staffordshire Moorlands Local Plan Strategy with other plans, projects or policies
Neighbouring Local Plans (Cheshire East: Macclesfield and Congleton; Newcastle-under-Lyme; Stoke-on-Trent; Stafford; East Staffordshire; High Peak; Derbyshire Dales; Peak District National Park)	<b>Negative</b>
	<ul style="list-style-type: none"> <li>Increased pressures on Green Belt, open/green space and biodiversity assets from recreation, disturbance and direct development.</li> <li>Overall growth in greenhouse gas emissions from a growth in traffic/transport and emissions from the built environment.</li> <li>Potential for a negative cumulative effect on air quality and water through increased atmospheric emissions, water abstraction and water pollution (surface water runoff and consented discharges).</li> <li>These effects along with increased levels of disturbance (recreational activity) have the potential for cumulative negative effects on biodiversity.</li> <li>Increase overall in coverage of impermeable services, with potential contributions to flood risk in the long term.</li> </ul>
Local Transport Plan	<b>Positive</b>

Plans, programmes or projects	Significant combined effects of Staffordshire Moorlands Local Plan Strategy with other plans, projects or policies
	<ul style="list-style-type: none"> <li>• Incremental improvements to sustainable transport networks, including walking and cycling.</li> <li>• Reduced congestion, improvements to key roads and junctions.</li> </ul>
Neighbourhood Plans (Biddulph; Brown Edge; Checkley; Draycott-in-the-Moors; Forsbrook; Leek; Leekfrith; Rushton)	<p><b>Positive</b></p> <p>Neighbourhood plans must be in general conformity with the strategic policies of the Local Plan. There is the potential therefore for Neighbourhood Plans to contribute to the significant positive and negative cumulative effects identified for the Local Plan. There is also the potential for Neighbourhood Plans to enhance positive effects as well as reduce the negative effects as they can reflect the local environmental conditions and sustainability issues for that area.</p>

**Table 7.2 Inter-plan cumulative effects**

## Summary of Plan effects

## 8 Summary of Plan effects

**8.1** Whole plan sustainability impacts have been considered.

**8.2** The Plan can be seen to offer significant positive impacts associated with the provision of new homes, both in the allocation of a mix of housing sites across the District, and also in the inclusion of appropriate housing related policies that seek sustainable development in sustainable locations.

**8.3** The combined impacts of the proposals set out in the Plan are however likely to lead to losses in greenfield land, both in and around the main towns and other sustainable settlements. Some green belt release is also proposed. This can be considered inevitable given the scale of growth required and considering the diminishing amount of land that is previously developed. It should be noted that a strong emphasis on maximising the use of brownfield land is clear throughout the plan, for example the allocation of the mill sites in Biddulph. The plan also includes measures to address any impacts on landscape character.

**8.4** The Plan can be seen to offer significant positive impacts associated with employment and economic development, both in the allocation and safeguarding of employment land across the District, and also in the inclusion of appropriate employment related policies that seek sustainable development in sustainable locations. The Plan's policies and allocations can also be seen to promote and ensure the viability of town and village centres, with secondary cumulative positive implications on tourism and heritage.

**8.5** The Plan will ensure good accessibility and significant improvements to infrastructure through a series of general and site specific policies.

**8.6** Sustainable travel is a key principle of the plan and is reflected in the distribution of growth and the Plan's allocations. There is an emphasis on the main towns as a location for development, with the development potential of brownfield land maximised, green belt release minimised and allocations made in the rural areas to help ensure that the needs of urban and rural areas can be met.

**8.7** Accessibility by sustainable transport means is supported. Walking and cycling is promoted through the proximity of growth to existing employment opportunities and other key services and facilities, as well as further ensured through development management policy to help provide green infrastructure network improvements. This is likely to result in secondary cumulative positive impacts on health improvements.

**8.8** The Plan seeks to protect and enhance the significant heritage assets of the District. Impacts have been limited through the selection of site allocations. Although it is expected that any remaining identified impacts can be mitigated, there is less certainty whether the enhancement of assets can be sought on a plan-wide level. Despite this however, some important benefits can be sought through application of development management and strategic development site policies.

**8.9** Similarly the Plan seeks to conserve and enhance biodiversity and other natural assets. Whilst overall impacts of the plan have been limited through the selection of site allocations and further mitigation is available through application of policy, there is again less certainty whether the enhancement of assets can be sought on a plan-wide level.

**8.10** The Plan as a whole can be considered to have uncertain impacts on air and water quality. Policy proposals exist to minimise these impacts. Regarding air quality, it should be considered that the Plan's focus on supporting use of sustainable transport will assist in minimising effects, as will the proposed focus of development in and around the towns and sustainable settlements and promotion of the District's GI strategy.

**8.11** With regard to other climate change factors, whilst the Plan seeks to ensure energy efficiency, the impacts of growth and associated travel can be expected to make a contribution to climate change.

**8.12** The inclusion of relevant policy considerations and the allocation of sites in flood zone one means that the Plan is not expected to result in an increase in flood risk.

### 8.1 Summary of significant sustainability effects

#### The SEA Directive requires

- an environmental report to include ... "the likely significant effects on the environment of implementing the plan or programme, and reasonable alternatives ..."
- "an outline of the reasons for selecting the alternatives dealt with and a description of how the assessment was undertaken including any difficulties ... encountered in compiling the required information"
- "the measures envisaged to prevent, reduce and as fully as possible offset any significant adverse effects on the environment of implementing the plan or programme".

**8.13** With reference to the requirements of the SEA Directive outlined above, options / alternatives have been appraised and their likely significant effects "identified, described and evaluated" as described in the previous sections. The appraisals included an explanation of why different options were selected and the possible measures envisaged to prevent, reduce and as fully as possible offset any significant adverse effects.

**8.14** A summary of significant effects and mitigation measures is provided below.

Policy	Potential significant sustainability effects	Mitigation
SS1 Development Principles	Significant positive effects include the likelihood of improvements to the social and environmental quality of the neighbourhood and improved access to jobs, services and facilities. Policy intent is to secure a mix of types and tenures of quality, affordable homes, including starter homes and this could make a significant contribution to meeting the needs of the whole community. Further positive effects are likely to result from the intentions to maintain the distinctive character of the District's towns and villages and their settings; to protect and enhance the natural	Use of Policies DC1 and SD3 to ensure high quality design and energy efficiency of new homes.

Policy	Potential significant sustainability effects	Mitigation
	and historic environment of the District and to create sustainable, self-sufficient settlements encouraging a strong, prosperous and diverse economy.	
SS1a Presumption in favour of Sustainable Development	Primary effect is positive, reflecting the presumption in favour of sustainable development in the NPPF.	None identified.
SS2 Settlement Hierarchy	Primary effect is positive: to deliver appropriate scale development within settlements, providing good access to services and facilities.	Beneficial effects maximised by provision of clarity around the approach to development in the rural areas.
SS3 Future Provision and Distribution of Development	Significant positive effects include the likelihood of improvements to the social and environmental quality of the neighbourhood and improved access to jobs, services and facilities. Meeting objectively assessed housing need could make a significant contribution to meeting the needs of the whole community. Provision of new homes will help to enhance the vitality and viability of the District's towns and villages. However there will be some loss of greenfield land to development. Other negative effects include an expected increase in traffic and associated air quality impacts and an increase in energy use from new homes and new journeys generated.	Spatial strategy and strategic approach to development, focusing development in and around main towns and sustainable settlements in the rural areas.  Use of Policies DC1 and SD3 to ensure high quality design and energy efficiency of new homes.
SS4 Strategic Housing and Employment Land Supply	Primary effect is positive: to meet identified housing requirement and deliver economic growth; contributing to the viability of town and village centres. Associated effects of an increase in energy use and use of the road network.	Use of other policies to ensure that new development is located in areas suitable for development.  Use of Policies DC1 and SD3 to ensure high quality design and energy efficiency of new development.

Policy	Potential significant sustainability effects	Mitigation
SS5 Leek Area Strategy	<p>Policy seeks to promote sustainable growth and to strengthen Leek's role as the principal town in the District. Positive effects are likely to result from the intentions to create employment growth and increase the diversity of employment opportunities. Significant positive effects also include the likelihood of improvements to the social and environmental quality of neighbourhoods and improved access to jobs, services and facilities. However negative effects are risked on landscape character and heritage assets. Improvements to access and car parking may increase the number of journeys made by car.</p>	<p>Use of Policy DC3 to enhance local landscape and the setting of the settlement where appropriate.</p> <p>Use of Policy DC2 to conserve heritage assets in a manner appropriate to their significance. Use of Policy C3 to protect and develop Green Infrastructure.</p>
SS6 Biddulph Area Strategy	<p>Policy seeks to promote sustainable growth, with improved connections to the rest of the District. This is expected to result in a significant contribution to meeting the housing needs of the whole community. Further positive effects are likely to result from the intentions to create employment growth and increase the diversity of employment opportunities; strengthen the role of Biddulph as a significant service and retailing centre for the District and to improve the image and identity of Biddulph and strengthen its role as a visitor destination. Significant positive effects also include the likelihood of improvements to the social and environmental quality of neighbourhoods and improved access to jobs, services and facilities. However there may be negative effects arising from the impact of development on countryside and other natural and built assets.</p>	<p>Use of Policy DC3 to enhance local landscape and the setting of the settlement where appropriate.</p> <p>Use of Policy DC2 to conserve heritage assets in a manner appropriate to their significance. Use of Policy C3 to protect and develop Green Infrastructure.</p>
SS7 Cheadle Area Strategy	<p>Policy seeks to promote sustainable growth and this is expected to make a significant contribution to meeting the housing needs of the whole community. Further positive effects are likely to result from the intentions to create employment growth and increase the diversity of employment opportunities; expand the role of Cheadle as a</p>	<p>Use of Policy DC3 to enhance local landscape and the setting of the settlement where appropriate.</p> <p>Use of Policy DC2 to conserve heritage assets in a manner appropriate to their significance. Use</p>

Policy	Potential significant sustainability effects	Mitigation
	<p>significant service and retailing centre for the District and to improve environmental quality and accessibility. Positive effects were identified for economic growth and town centre development. However potential negative effects are identified from the impact of housing growth on landscape character and other natural and built assets.</p>	<p>of Policy C3 to protect and develop Green Infrastructure.</p>
<p>SS8 Larger Villages Area Strategy</p>	<p>Policy identifies the larger villages and seeks to retain and enhance their role as rural service centres. Significant positive effects include meeting housing needs and the positive impacts on the economy from enabling small scale new employment development, improving the use of existing employment areas; retaining and enhancing the role of rural areas as rural service centres and ensuring that new development reflects and enhances each village's special character and heritage.</p>	<p>Use of Policy DC3 to enhance local landscape and the setting of the settlement where appropriate.</p> <p>Use of Policy DC2 to conserve heritage assets in a manner appropriate to their significance. Use of Policy C3 to protect and develop Green Infrastructure.</p>
<p>SS9 Smaller Villages Area Strategy</p>	<p>Policy intent is to enable new housing development which meets a need, including affordable housing, and this is likely to make a positive contribution to meeting housing needs. Further positive effects are likely to result from the intentions to enable small scale new employment development including live-work units; protect and enable services and facilities which are essential to sustain rural living and to ensure that new development does not undermine the character and life of the settlement.</p>	<p>Use of Policy DC3 to enhance local landscape and the setting of the settlement where appropriate.</p> <p>Use of Policy DC2 to conserve heritage assets in a manner appropriate to their significance. Use of Policy C3 to protect and develop Green Infrastructure.</p>
<p>SS10 Other Rural Areas Strategy</p>	<p>Significant positive effects include enhancing and conserving the quality of the countryside, including recognising and conserving the special quality of the landscape in the Peak District National Park, and limiting uses which generate a substantial number of regular trips in areas that are not well served by public transport - as this is likely to help to reduce the number of journeys made by car. Further positive effects are likely to result from</p>	<p>Use of Policy DC3 to enhance local landscape and the setting of the settlement where appropriate.</p> <p>Use of Policy DC2 to conserve heritage assets in a manner appropriate to their significance. Use</p>

Policy	Potential significant sustainability effects	Mitigation
	encouraging measures which protect and enhance the biodiversity and geological resources, as well as the heritage of the district. Also, from measures to sustain the rural economy and enhance tourist opportunities.	of Policy C3 to protect and develop Green Infrastructure.
SS11 Churnet Valley Strategy	Significant positive effects are expected to result from providing a focus for sustainable rural regeneration across the district as this may help to advance equality of opportunity as well as to enhance the vitality and viability of the area's towns and villages. Further positive effects for health and for reducing the need for car use are likely to result from the intentions to enhance and develop links to strategic footpaths, cycle and horse riding routes and to improve connectivity and accessibility to and within the Churnet Valley by all forms of sustainable transport. In addition support for measures to protect and enhance the biodiversity, landscape character and heritage assets of the valley are all likely to lead to additional positive effects.	None identified.
SS12 Planning Obligations and Community Infrastructure Levy	The Policy is expected to support the provision of new, or the significant enhancement of existing, community facilities and services and this is likely to make a positive contribution towards community cohesion and the quality of where people work and live. Further positive effects on health and the supply of new homes to meet need were identified, as developer contributions may help to ensure the delivery of an appropriate quantity and quality of open space, sport and recreation facilities and an increase in the supply of affordable homes.	None identified.
SD1 Sustainable Use of Resources	Significant positive effects on minimising contributions to climate change are predicted to arise from the requirement that all development should adapt to climate change and the encouragement for re-use of construction or construction waste materials. Further positive effects are likely to result from the support for development that is	None identified.

Policy	Potential significant sustainability effects	Mitigation
	located to minimise energy needs as this is likely to result in the location of development in proximity to existing services and facilities.	
SD2 Renewable / low Carbon Energy	Significant positive effects on minimising contributions to climate change are predicted to arise from the policy intent to meet part of the District's future energy demand through renewable or low-carbon energy sources.	None identified.
SD3 Sustainability Measures in Development	Significant positive effects on minimising contributions to climate change are predicted to arise from the policy intent to support further carbon- or water-saving measures.	None identified.
SD4 Pollution	Significant positive effects on improving air quality and soil and land resources are predicted to result.	None identified.
SD5 Flood Risk	Significant positive effects on reducing flood risk are predicted to result.	None identified.
E1 New Employment Development	Significant positive effects on advancing equality of opportunity; safeguarding the vitality of towns and sustaining a vibrant rural economy are predicted to result. Further positive effects on sustainable economic growth, diversification of the economy and high and stable level of employment were identified. There is potential for negative effects on contribution to climate change arising from policy support for new business developments, as this is likely to result in greater energy use.	Use of SD3 and DC1 to help deliver development with high environmental performance.  Use of DC3 to ensure development responds to local landscape character.
E2 Employment Allocations	Significant positive effects on advancing equality of opportunity and safeguarding the vitality of towns are predicted to result. Further positive effects on sustainable economic growth, diversification of the economy and high and stable level of employment were identified. There is potential for negative effects on contribution to climate change arising from the allocation of sites for new business developments, as this is likely to result in greater energy use.	Use of Policies including DC1, DC3 and NE1 to ensure delivery of high quality development.  Use of SD3 and DC1 to help deliver development with high environmental performance.

Policy	Potential significant sustainability effects	Mitigation
E3 Existing Employment Areas, Premises and Allocations	Significant positive effects on reducing the number of journeys made by car and advancing equality of opportunity are likely to result from the policy intent to help retain employment sites well served by the public transport network and to support mixed use developments. Further positive effects on sustainable economic growth, diversification of the economy, high and stable level of employment and safeguarding the vitality of towns were identified.	Use of Policies including DC1, DC3 and NE1 to ensure delivery of high quality development.
E4 Tourism and Cultural Development	Significant positive effects on encouraging sustainable tourism, cultural heritage and local distinctiveness are likely to result from this. Further positive effects on reducing the number of journeys made by car and advancing equality of opportunity, sustainable economic growth, diversification of the economy, high and stable level of employment and safeguarding the vitality of towns were identified. There is potential for negative effects on contribution to climate change arising from new development, as this is likely to result in greater energy use.	Use of Policies including DC1, DC3 and NE1 to ensure delivery of high quality development.  Use of SD3 and DC1 to help deliver development with high environmental performance.
H1 New Housing Development	Significant positive effects on ensuring the supply new homes meet local needs including affordable / social / extra care are likely to result from enabling the Plan's objectively assessed housing need to be delivered. Further positive effects on enhancing the vitality and viability of the District's towns and villages and supporting stable levels of employment. There is potential for negative effects arising from the impact of provision of new homes on local landscape character, townscapes, biodiversity and the road network.	Use of other policies in the Plan to manage delivery of appropriate development.
H2 Housing Allocations	Significant positive effects on ensuring the supply of new homes to meet local needs are likely to result from site allocations. Further positive effects on enhancing the vitality and viability of the District's towns and villages and supporting stable levels of employment. There is potential for negative effects arising	Mitigation measures included via other policies in the Plan concerning location and design of new development, as well as site specific requirements in Strategic Development Site Policies.

Policy	Potential significant sustainability effects	Mitigation
	from the impact of provision of new homes on local landscape character, townscapes, biodiversity and the road network.	
H3 Affordable Housing	Significant positive effects on ensuring the supply of new homes to meet local needs. Further positive effects on enhancing the vitality and viability of the District's towns and villages and supporting stable levels of employment.	None identified.
H4 Gypsy and Traveller Sites and Sites for Travelling Showpeople	Significant positive effects on meeting identified housing need. Access to accommodation and local services and facilities is likely to lead to further positive impacts on health and well-being for gypsies and travellers and establishing the considerations that will be taken into account for determining applications or future allocations is likely to lead to positive effects on helping ensure community safety and local environmental quality.	Mitigation measures related to location are included within the Policy, additional mitigation provided via other policies in the Plan.
TCR1 Development in the Town Centres	Significant positive effects for Improving access to jobs, services and facilities. Further positive effects for maintaining the vitality and viability of the towns, protecting the towns as service centres, promoting sustainable economic growth and diversification of the economy and supporting high and stable levels of employment.	Mitigation in policy requires town centre developments to be accessible by public transport, walking and cycling.
TCR2 Primary Shopping Frontages	Significant positive effects for maintaining the vitality and viability of the towns, protecting the towns as service centres, promoting sustainable economic growth and supporting high and stable levels of employment. Further positive effects for tourism as vibrant shopping areas are likely to support the visitor economy.	None identified.
TCR3 Retailing and other Town Centre uses outside Town Centres	Significant positive effects for maintaining the vitality and viability of smaller, local centres, promoting sustainable economic growth and supporting high and stable levels of employment. Further positive effects for improving access to jobs, services and facilities (including by non-car journeys) and tourism.	None identified.

Policy	Potential significant sustainability effects	Mitigation
DC1 Design Considerations	Significant positive effects include the likelihood of improvements to the social and environmental quality of neighbourhoods and positive impacts on health and well-being. Further positive effects from delivery of well designed development and high quality built environment and public realm as this is likely to lead to investment in business, people and infrastructure, resulting in a strengthened and more diversified economy, more vibrant town and village centres and sustained levels of employment.	Beneficial effects maximised through requiring contribution to local distinctiveness and sense of place.
DC2 The Historic Environment	Significant positive effects include protection and enhancement of the character of towns and villages, as well as heritage assets and their settings and the character of historic landscapes. Further positive effects from safeguarding the District's historic environment as heritage led regeneration schemes may lead to investment in business, people and infrastructure, resulting in a strengthened and more diversified economy, more vibrant town and village centres and sustained levels of local employment.	Beneficial effects maximised through reference to non-designated heritage assets. Mitigation measures identified in the Council's Landscape, Local Green Space and Heritage Impact Study.
DC3 Landscape and Settlement Setting	Significant positive effects include protecting the distinctive character of towns and villages and the character of character / appearance of local landscapes, including historic landscapes and other natural assets. Further positive effects include support for the District's tourism attraction and help to maintain the visitor economy.	Beneficial effects maximised through protecting the landscape setting of the National Park.  Landscape mitigation measures identified in the Council's Landscape, Local Green Space and Heritage Impact Study.
DC4 Local Green Space	Significant positive effects include benefiting the social and environmental quality of neighbourhoods and protecting the distinctive character of towns and villages.	None identified.
C1 Creating Sustainable Communities	Significant positive effects for community cohesion, neighbourhood quality and access to services from ensuring that new development contributes to the creation of safe, liveable and mixed communities with	Beneficial effects of retaining or providing infrastructure maximised by

Policy	Potential significant sustainability effects	Mitigation
	good access to jobs and key services including recreation facilities. Further positive effects from new community facilities, particularly in smaller villages and other rural areas contributing to the viability of communities. Creation of sustainable communities is likely to lead to improvements in health and well-being in the long term.	requiring development proposals to incorporate high quality locally distinctive design.
C2 Sport, Recreation and Open Space	Significant positive effects for health and well-being and creating and maintaining high quality local neighbourhoods leading to positive effects on townscape quality, helping to maintain the visitor economy. Further positive effects from new recreation facilities, particularly in smaller villages and other rural areas contributing to the viability of communities.	None identified.
C3 Green Infrastrucure	Significant positive effects on a wide range of SA objectives including for health and well-being; creating and maintaining high quality local neighbourhoods and improving connectivity to a range of facilities via helping to establish or improve green travel links.	Beneficial effects maximised through ensuring GI helps mitigate effects of climate change.
NE1 Biodiversity and Geological Resources	Significant positive effects on a wide range of SA objectives including for health and well-being; creating and maintaining high quality local neighbourhoods and biodiversity and geodiversity.	Beneficial effects maximised through requirement for net gain in biodiversity where appropriate and biodiversity enhancement measures to be guided by the Staffordshire Moorlands Biodiversity opportunity Map.
NE2 Trees, Woodland and Hedgerows	Positive effects on landscape character and biodiversity.	Beneficial effects maximised through requirement to increase canopy cover.
T1 Development and Sustainable Transport	Significant positive effects on a wide range of SA objectives were identified, including for health and well-being; creating and maintaining high quality local neighbourhoods; reducing the need to travel by car and increasing access to a range of services and facilities.	None identified.

Policy	Potential significant sustainability effects	Mitigation
T2 Other Sustainable Transport Measures	Significant positive effects on a wide range of SA objectives including for health and well-being; creating and maintaining high quality local neighbourhoods; reducing the need to travel by car and increasing access to a range of services and facilities.	No mitigation identified.
DSL1 Land at Horsecroft Farm, Leek (ADD01)	The proposed delivery of circa 15 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. The site's accessibility to areas of open space is considered to have a positive effect. However, the site's proximity to designated and historic assets is likely to have a negative effect, as could the development of greenfield land where the site is indicated on the predictive map of Best and Most Versatile agricultural land as partly within an area where 20 - 60% of the land is likely to be BMV, and the inaccessibility of services and facilities.	Mitigation measures relating to flood risk assessment, heritage and ecological impacts  identified within Policy. Beneficial effects maximised through allocation for a mix of uses including education.
DSL2 Land at The Mount, Leek (LE066, LE128a&b, LE140, LE142a&b)	The proposed delivery of circa 317 dwellings is considered to have a significant positive effect, similarly the location's good accessibility to services and facilities. However, the development of greenfield land where the location is partly indicated on the predictive map of Best and Most Versatile agricultural land as an area where less than 20% of the land is likely to be BMV, its landscape sensitivity the ecological value of the site and the proximity to historic assets are likely to have negative effects.	Policy requires landscape heritage and visual impact mitigation measures and assessments.
DSL3 Land at Newton House, Leek (LE150)	The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the proposed delivery of circa 179 dwellings is likely to have a significant positive effect. However, the site is indicated on the predictive map of Best and Most Versatile agricultural land as partly within an area where 20 - 60% of the land is likely to be BMV and this is likely to have a	Mitigation measures in the policy include requirements for a wildlife buffer along the eastern edge of the site. The Council's  Landscape, Local Green Space and Heritage Impact Study (August 2016) considered that

Policy	Potential significant sustainability effects	Mitigation
	negative effect, as would the site's proximity to historic assets and its potential ecological value.	there was no inter-visibility with the heritage assets to the north of the site due to intervening vegetation and buildings.
DSL4 Cornhill East, Leek (LE235)	The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the proposed delivery of circa 50 dwellings is considered to have a significant positive effect as is the site's access accessibility to services, facilities and open space. However, the site's proximity to designated and historic assets is likely to have a negative effect. The site is indicated on the predictive map of Best and Most Versatile agricultural land as partly in an area where less than 20% of the land is likely to be BMV.	Policy requires development to take account of ecological constraints and in the event of proposals affecting Birchall Meadow BAS, appropriate compensation measures are required. The Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) considered that development would be highly unlikely to adversely affect the settings of the heritage assets due to intervening buildings and vegetation.
DSB1 Wharf Road Strategic Development Area (BD055, BD071, BD071a, BD106, BD156, BD076, BD076a, BD108, BD016, BD104)	The area's proximity to services, facilities and existing areas of employment and proposed delivery of circa 588 dwellings as part of a mixed use scheme should have a significant positive effect. However there is scope for negative effects due to the area's potential ecological value and development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land partly within an area where less than 20% of the land is likely to be BMV. Landscape sensitivity across the site varies, most of the site has medium landscape sensitivity. The area includes a number of heritage assets and there is a mining legacy as well as potential for some contamination A watercourse runs through the middle of the site.	Mitigation measures in the policy include requirement for a landscaping plan and mitigation of heritage impact as well as comprehensive masterplanning to address other impacts identified.

Policy	Potential significant sustainability effects	Mitigation
DSB2 Biddulph Mills (BD101 and BD102)	The development of brownfield land should have a significant positive effect, as should the sites' proximity to existing areas of employment, services and facilities and the delivery of circa 57 dwellings. The sites are located within the settlement boundary and away from heritage assets. Sites are within a groundwater source protection zone.	Policy requires a site specific FRA. Beneficial effects maximised through requirement for improved pedestrian and cycle linkages to the Biddulph Valley Way.
DSB3 Tunstall Road Strategic Development Area (BD117)	A mixed use development of new employment premises and circa 80 dwellings should have a significant positive effect, including on the vitality and viability of the District. However, the greenfield nature of this site (largely indicated on the predictive map of Best and Most Versatile agricultural land as urban / industrial, but partly as an area where less than 20% of the land is likely to be BMV) and its high landscape sensitivity, coupled with its potential ecological value and mining legacy could have negative effects.	Policy requires development to be subject to comprehensive masterplanning to address ecological and landscape impacts. Beneficial effects maximised through requirement for inclusion of GI.
DSC1 Cheadle North Strategic Development Area (CH001 CH132)	The proposed delivery of circa 320 dwellings is considered to have a significant positive effect, as does the area's accessibility to services, facilities and areas of existing employment. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as partly within an area where 20 - 60% of the land is likely to be BMV is assessed as having a significant negative effect. The site's proximity to two Local Nature Reserves and potential ecological value is also likely to have a negative effect.	Policy requires development to be subject to a comprehensive masterplan to include mitigation measures identified in the Council's Landscape, Local Green Space and Heritage Impact Study and managing impacts on the LNR and GI Network.
DSC2 Cecilly Brook Strategic Development Area (CH002a&b CH024)	The proposed delivery of circa 106 dwellings is considered to have a significant positive effect, as is the area's proximity to health care and other key services and facilities, including existing employment. However whilst the area may be considered to have low biodiversity value, it has good connectivity to a stream and surrounding habitats and may support protected species.	Policy requires development to be subject to a comprehensive masterplan to include managing impacts on the LNR and GI Network. Beneficial effects maximised through requirement for establishing coherent ecological networks and

Policy	Potential significant sustainability effects	Mitigation
		enabling water quality improvements in line with WFD objectives.
DSC3 Mobberley Strategic Development Area (CH085a,b,c&d CH128)	The proposed delivery of circa 430 dwellings is considered to have a significant positive effect as is the area's accessibility to services, facilities and areas of existing employment. However, the development of greenfield land indicated on the predictive map of Best and Most Versatile agricultural land as predominantly within an area where 20 - 60% of the land is likely to be BMV (but partly within an area where over 60% of the land is likely to be BMV) is assessed as having a significant negative effect as could the area's landscape sensitivity and potential ecological value. There may be adverse effects on the setting of heritage assets arising from altering the agricultural landscape.	Policy requires development to be subject to comprehensive masterplanning to include mitigation measures identified in the Council's Landscape, Local Green Space and Heritage Impact Study. Beneficial effects maximised through requirement to address priorities and actions identified in the GI Strategy.
DSC4 Land North of New Haden Road (EM1)	The allocation of 4.27ha of employment land should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment. Similarly, the accessibility of other services and facilities is likely to have a positive effect. However, the development of greenfield land considered to be of medium landscape sensitivity and indicated on the predictive map of Best and Most Versatile agricultural land as within an area where over 60% of the land is likely to be BMV, is likely to have a negative effect. Most of the site is within a Coal Authority High Risk area.	Mitigation measures included in the Policy require development to include measures identified in the Council's Landscape, Local Green Space and Heritage Impact Study and to include detailed investigation work in relation to mining legacy.
DSR1 Blythe Vale (Core Strategy Policy SS8 Blythe Bridge  Regional Investment Site)	Allocation of circa 48.5ha for mixed use including employment and residential development of approximately 300 homes is considered to have a significant positive effect. Similarly, the site's good strategic location (with regional significance) has scope to have a positive effect on the vitality and viability of the wider District and could encourage investment in people, jobs and infrastructure. However, the development of greenfield land, partly within the important landscape setting to the settlement, with	Mitigation measures included in the Policy require development to have regard to the Council's Landscape, Local Green Space and Heritage Impact Study and to the findings of the Local Wildlife Assessment and GI strategy. Beneficial effects maximised

Policy	Potential significant sustainability effects	Mitigation
	medium-high landscape sensitivity and indicated on the predictive map of Best and Most Versatile land as an area where more than 60% of the land is likely to be BMV, is assessed as having a significant negative effect. Part of the site is within groundwater source protection zones 1 and 2; there is a culvert on site and known flooding hotspots nearby.	through preparation of a masterplan including sustainable transport, rail and road links to and from the site to Blythe Bridge and the surrounding area.
DSR2 Land east of Brooklands Way, Leekbrook (Broad Area Leek EM2)	The allocation of circa 5.42ha of employment land should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. However, the site is relatively inaccessible to other key services and facilities and the development of greenfield land, indicated on the predictive map of Best and Most Versatile agricultural land as an area where 20 - 60% of the land is likely to be BMV, is assessed as having a negative effect, as is the site's proximity to historic assets and its ecological value. The site lies within Twinney Wood and grassland SBI. The north of the site is bounded by the Leek Brook.	The policy requires any scheme to demonstrate ecological compensation and management measures as well as other landscape, flood risk and heritage impact mitigation measures.
DSR3 Land west of Basford Lane, Leekbrook (ADD009)	The allocation of approximately 0.8ha of employment land should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. However, the site is relatively inaccessible to services and facilities which is likely to have a significant negative effect. The development of greenfield land considered to be of medium landscape sensitivity and indicated on the predictive map of Best and Most Versatile agricultural land as an area where 20 - 60% of the land is likely to be BMV is also assessed as a negative effect, as is the site's ecological value.	The Policy requires development to take account of the Council's Landscape, Local Green Space and Heritage Impact Study and the findings of the Local Wildlife Site Assessment.
DSR4 Land off Ash Bank Road,	The proposed delivery of circa 75 dwellings is considered to have a significant positive effect, as is the accessibility of a range of key services and facilities. However, the site is	The Policy requires development to take account of the Council's Landscape, Local Green

Policy	Potential significant sustainability effects	Mitigation
Werrington (WE003 WE052)	relatively remote from areas of existing employment which would have a negative effect, as would the site's medium landscape sensitivity, its proximity to heritage assets and potential to support protected species.	Space and Heritage Impact Study and the findings of the Local Wildlife Site Assessment.

**Table 8.1 Summary of significant effects and mitigation measures**

**8.15** The Sustainability Appraisal of the Local Plan has appraised the effects of the housing and employment land requirements, development approaches in Cheadle and the rural areas, individual policies and site allocations, as well as the overall effect of the plan, including cumulative and incremental effects. The SA has found that the Local Plan addresses key sustainability issues and will make a significant positive contribution to sustainability in the District through meeting housing, employment and community needs, enhancing accessibility and encouraging high quality design.

**8.16** The key negative effects identified relate to the environmental impact of increased housing, employment and infrastructure development. Throughout the process the SA has sought to make further recommendations to assist the Council in mitigating any negative effects whilst enhancing the positive opportunities that development provides for the District.

**8.17** Sustainability Appraisal is an iterative and on-going process that has been undertaken at each stage of the Local Plan, both during the internal production and external consultation of the document, helping to influence its development. The issues identified in the Initial and Draft SAs have led to additional mitigation measures for sites proposed and the tightening of policies to create appropriate conditions for sustainable development. The SA has also influenced the selection of sites included in the Local Plan.

**8.18** The Appraisal process found that on the whole, the mitigation provided through the Local Plan policies would address identified potential significant effects.

## 8.2 Mitigation

### Mitigating adverse effects and maximising beneficial effects

**8.19** The SA Report must include measures to prevent, reduce or offset significant adverse effects of implementing the plans. In the Sustainability Appraisal, mitigation refers to any approach which is aimed at avoiding, preventing, reducing or compensating for significant adverse impacts on the sustainability objectives. In addition, the concept of mitigation covers broader issues such as the enhancement of positive effects where relevant.

**8.20** Mitigation should be put forward using a hierarchy approach, with the emphasis being on the avoidance of adverse effects as an initial approach. Where this is not appropriate, methods to reduce the scale or importance of the effect should be examined.

**8.21** Mitigation has taken a variety of forms, including:

- Refining options, in order to improve the likelihood of positive effects and to minimise adverse effects. This has mainly been the re-wording of policies or additions to text. It has also included the requirement of some policies to mitigate against the negative impacts of others. For example, Policies SD5 Flood Risk and Policy DC3 Landscape

and Settlement Setting provide mitigation measures for a number of the other policies, in particular those supporting growth.

- Technical measures to be applied during implementation (e.g. design principles).
- Contingency arrangements for dealing with possible adverse effects, for example a requirement in Policy DSC2 (Cecilly Brook Strategic Development Area) to prepare a master-plan that considers the impact that growth may have on the Cecilly Brook Local Nature Reserve in order to ensure that Local Plan policy requirements can be met for minimising impacts on biodiversity (and providing net gains in biodiversity where possible); establishing coherent ecological networks that are more resilient to current and future pressures; and enabling water quality improvements in line with the Water Framework Directive objectives.

**8.22** Detailed mitigation for the Local Plan is set out in full in the appraisal results for the Policies and Site Options contained in the appendices to this report and described in the appraisal summaries in section 6.

### 8.3 Changes made to the Plan as a result of the SA

**8.23** Sustainability Appraisal is an iterative and on-going process that has been undertaken at each stage of the Local Plan, helping to influence its development.

**8.24** Specific changes made to Plan policies as a result of the SA include the following:

- SS1 Development principles: Policy amended to support development which secures high quality sustainable environments, efficient and effective use of resources and contributes effectively to tackling climate change and reduced carbon emissions.
- SS5 Leek Area Strategy: Policy amended to include a reference to the District's GI Strategy.
- SS6 Biddulph Area Strategy: Policy amended to include a reference to the District's GI Strategy.
- SS7 Cheadle Area Strategy: Policy amended to include a reference to the District's GI Strategy.
- SS8 Larger Villages Areas Strategy: Inclusion of a new bullet point at Point 4 to support the implementation of the GI Strategy and Local Green Spaces.
- SS9 Smaller Villages Areas Strategy: Inclusion of a new bullet point at Point 1 to support the implementation of the GI Strategy and Local Green Spaces.
- SD5 Flood Risk: Policy amended to clarify that where a watercourse is present on a development site, it should be retained or restored into a natural state and enhanced where possible.
- DC1 Design Considerations: Additional bullet point (8) added to include a requirement for developments to be well integrated for car, pedestrian and cycle use as well as other sustainable transport links.
- DC3 Landscape and Settlement Setting: Additional bullet point (3) added to include support for development which maintains the biodiversity qualities of any natural or man-made features within the landscape, such as trees, woodlands, hedgerows, walls, watercourses or ponds.
- NE2 Trees, Woodland and Hedgerows: This is a new policy included in the Plan as a result of feedback from the SA.
- DSC1 Cheadle North Strategic Development Area: Inclusion of the bullet point requiring a master plan to consider how to manage the impact of growth on the Cecilly Brook Local Nature Reserve and Green Infrastructure Network to ensure that Local Plan policy

requirements can be met for minimising impacts on biodiversity (and providing net gains in biodiversity where possible); and establishing coherent ecological networks that are more resilient to current and future pressures; as well as enabling water quality improvements in line with the Water Framework Directive objectives.

- DSC2 Cecilly Brook Strategic Development Area: Inclusion of the bullet point requiring a master plan to consider how to manage the impact of growth on the Cecilly Brook Local Nature Reserve and Green Infrastructure Network to ensure that Local Plan policy requirements can be met for minimising impacts on biodiversity (and providing net gains in biodiversity where possible); and establishing coherent ecological networks that are more resilient to current and future pressures; as well as enabling water quality improvements in line with the Water Framework Directive objectives.

## HRA and EqIA

## 9 HRA and EqIA

### 9.1 Introduction

**9.1** In addition to Sustainability Appraisal, the emerging Local Plan has been subject to Habitats Regulations Assessment and an Equality Impact Assessment.

### 9.2 Habitats Regulations Assessment - methodology

**9.2** European Directive 92/43/EEC on the Conservation of Natural Habitats and of Wild Fauna and Flora (the Habitats Directive) requires a Habitats Regulations Assessment (HRA) to be undertaken on the Local Plan. In the UK, the Habitats Directive is implemented through the Conservation of Habitats and Species Regulations 2010 (the “Habitats Regulations”).

**9.3** The HRA assesses any impacts of the Local Plan against the conservation objectives of sites of European importance for nature conservation in, and outside the plan area, to ascertain whether it would adversely affect the integrity of any sites concerned. These sites, often just referred to as European sites, include Special Areas of Conservation (SACs) and Special Protection Areas (SPAs).

**9.4** Staffordshire Moorlands District Council appointed consultants ClearLead Consulting Limited to undertake the HRA requirements for the emerging Staffordshire Moorlands Local Plan. It is important that the sustainability appraisal takes account of HRA findings in order that consideration can be given to mitigating any adverse effects.

**9.5** In March 2016 the District Council commissioned an initial HRA screening exercise for the Local Plan. The purpose of screening is to determine whether the plan's policies and proposals could result in likely significant effects on the conservation objectives of any European site. A first screening of the preferred option policies took place in November 2016 to help inform plan preparation. An updated HRA screening of the preferred option policies (to take account of changes since November 2016) was undertaken between 27<sup>th</sup> June and 29<sup>th</sup> June 2017. The proposed preferred option development site allocations were screened between 15<sup>th</sup> and 27<sup>th</sup> June 2017.

**9.6** ClearLead Consulting used the existing HRA report of the adopted Core Strategy and further work on the screening assessment of policies and proposals in the Staffordshire Moorlands emerging Local Plan to prepare a draft Habitats Regulations Assessment report for the Preferred Options Local Plan July 2017. The report can be viewed at:

[https://www.staffs Moorlands.gov.uk/media/2343/Habitats-Regulations-Assessment-Staffordshire-Moorlands-Local-Plan---Preferred-Options-July-2017/pdf/Staffs\\_Moorlands\\_HRA\\_Report\\_July\\_2017\\_low\\_res.pdf](https://www.staffs Moorlands.gov.uk/media/2343/Habitats-Regulations-Assessment-Staffordshire-Moorlands-Local-Plan---Preferred-Options-July-2017/pdf/Staffs_Moorlands_HRA_Report_July_2017_low_res.pdf)

**9.7** Consultation on the 2017 HRA Report took place alongside consultation on the draft SA Report and the Staffordshire Moorlands Local Plan - preferred options July 2017.

**9.8** Further HRA work was undertaken between December 2017 and January 2018 to provide an In Combination Effects assessment in relation to traffic and air quality. In addition changes to Preferred Option Policies were screened in order to identify any likely significant effects.

**9.9** As a result of this additional work, an updated HRA Report has been published alongside the publication of the Submission version of the Staffordshire Moorlands Local Plan in February 2018.

### **9.3 Habitats Regulations Assessment - Summary of findings**

**9.10** HRA screening of the Local Plan Preferred Options policies in December 2016 and June 2017 identified a number of Likely Significant Effects (LSEs) in relation to the following:

- Effects from increased water demand on the South Pennine Moors Phase 1 Special Protection Area (SPA) and Special Area of Conservation (SAC) and Peak District Dales SAC;
- Effects from increased traffic on air quality on the South Pennine Moors Phase 1 SPA and SAC and Peak District Dales SAC;
- Increased recreational pressure on the South Pennine Moors Phase 1 SPA and SAC and Peak District Dales SAC; and
- Urban effects on the South Pennine Moors Phase 1 SPA and SAC and Peak District Dales SAC.

**9.11** The Appropriate Assessment stage of HRA was undertaken to evaluate the potential for the 'screened in' Local Plan policies to result in adverse effects on the European sites as listed above.

**9.12** In June 2017, the HRA was able to conclude that the Local Plan Preferred Options will not result in any adverse effects on the European sites in relation to water demand, and increased recreational pressure both alone and in combination with growth in neighbouring areas.

**9.13** Potential adverse effects in relation to urban effects were identified. On the basis of the precautionary principle, it was concluded that the proposed allocation at Waterhouses (WA004) could result in an adverse effect on the Peak District Dales SAC due to the risk of pollution arising from construction activities.

**9.14** The HRA identified that Policies SS8 and SS9 Larger and Smaller Villages Area Strategies (as drafted June 2017) could potentially result in adverse effects on the Peak District Dales SAC, Peak District Moors (South Pennine Moors Phase 1) SPA and the South Pennine Moors SAC if development occurred within 500m of these European sites. These policies (as drafted at June 2017) could also result in an adverse effect on the Peak District Moors (South Pennine Moors Phase 1) SPA if development occurred on land which is functionally linked to the SPA.

**9.15** The following mitigation was put forward to the policy authors at Staffordshire Moorlands District Council in order to avoid the potential adverse effects identified in relation to the proposed allocation at Waterhouses (WA004) and draft policies SS8 Larger Villages Area Strategy and SS9 Smaller Villages Area Strategy from occurring:

**9.16** In order to avoid adverse effects on European sites from occurring as a result of the proposed allocation at Waterhouses (WA004), it was recommended that the following text should be added to the first bullet of Local Plan Policy NE1 Biodiversity and Geological Resources:

**9.17** *“Any development with a potential to adversely affect a European site/s through construction activities should ensure that Ciria construction guidelines are followed including environmental good practice on control of dust and water pollution.”*

**9.18** In order to avoid adverse effects on European sites from occurring as a result of Policy SS8 Larger Villages Area Strategy and Policy SS9 Smaller Villages Area Strategy, it was recommended that wording similar to that included in Local Plan Policy SS10 Other Rural Areas Strategy was added to both policies SS8 and SS9, as follows:

**9.19** *“Any development proposal that might have the potential to affect a European or Ramsar Site must itself be subject to appropriate assessment.”*

**9.20** The policy wording set out above and recommended to the Council in an HRA advice note dated 29 June 2017 was added to the relevant policies (as included in the Local Preferred Options July 2017) and the HRA was therefore able to conclude that the proposed allocation at Waterhouses (WA004), Policy SS8 Larger Villages Area Strategy and Policy SS9 Smaller Villages Area Strategy will not result in any adverse effects on European sites in relation to urban effects.

**9.21** Following completion of the cumulative traffic assessment at the end of 2017 and screening of the modifications put forward prior to the Submission of the Local Plan in January 2018, the HRA was able to reach a conclusion with regards to potential air quality effects.

**9.22** The traffic assessment considered the allocation sites in Leek included within policies Policy H2 – Housing Allocations and Policy E2 – Employment Allocations, combined with growth in neighbouring areas. The traffic assessment found that an estimated additional 444 vehicles will use the A53 between Leek and Buxton (two-way flow) over an average day, with all of the proposed development in place. Assuming the same proportion of HGVs are generated from the development as currently use the A53 between Leek and Buxton (10.1%) then there will be an additional 44 HGVs. Speed limits will remain the same on the road and therefore it is assumed that daily average speed will remain the same.

**9.23** As these are well below the DMRB threshold of:

- Daily traffic flows will change by 1000 Average Annual Daily Traffic (AADT) or more;
- HGV flows change by 200 AADT or more; and
- Daily average speed will change by 10 km/h or more;

**9.24** it is considered reasonable to assume that an additional 180 homes in Leek from windfall development included in Policy SS4 - Strategic Housing & Employment Land Supply, which are not included within the traffic assessment, are unlikely to result in any adverse effects on European sites resulting from air pollution from traffic.

**9.25** Therefore, it is concluded that windfall developments are unlikely to result in any adverse effects on European sites resulting from air pollution from traffic.

**9.26** With the above-mentioned mitigation in place within the Local Plan, it is concluded that the Submission Local Plan will not result in adverse effects on European sites, both alone and in combination with growth in neighbouring areas.

## 9.4 Equality Impact Assessment - methodology

**9.27** The National Planning Policy Framework (NPPF) (paragraph 70) requires local planning authorities to deliver the social, recreational and cultural facilities and services the community needs. It is considered that the EqIA can help inform this process by understanding the needs of different community groups and how planning policies and decisions can affect them.

### Consultation and establishing community needs

**9.28** In April 2016 the Council adopted a Statement of Community Involvement (SCI) which sets out how the Council will involve local people, businesses and other stakeholders in the preparation of planning policy documents and sets out the approach to consulting people over planning applications, with a commitment to promoting equal opportunities. The SCI is available at the link below:

<https://www.staffs Moorlands.gov.uk/article/1165/Statement-of-Community-Involvement-SCI>

**9.29** The Council adopted its Core Strategy in March 2014. The SA of the Core Strategy can be read at the link below and includes an Equality Impact Assessment of the plan's policies and proposals. The assessment concluded that the adopted Core Strategy will have positive benefits for all through improved access to housing for all groups, and particularly for older, younger and residents with disabilities. It will also have positive benefits for all, and in particular older, younger and residents with disabilities, through improved access to services and facilities in the towns and larger villages. It will also have positive benefits in particular for children/younger people through improved access to play and sports facilities.

[https://www.staffs Moorlands.gov.uk/media/341/Core-Strategy-Sustainability-Appraisal-Report-March-2014/pdf/Core\\_Strategy\\_Sustainability\\_Appraisal\\_Report\\_March\\_2014.pdf](https://www.staffs Moorlands.gov.uk/media/341/Core-Strategy-Sustainability-Appraisal-Report-March-2014/pdf/Core_Strategy_Sustainability_Appraisal_Report_March_2014.pdf)

**9.30** In 2016 Staffordshire Moorlands District Council commissioned consultants Engaging Communities to speak to people about their experiences and needs in relation to the Council's responsibilities under the Equality Duty<sup>(20)</sup> This was a qualitative research project meaning that there were a small number of participants and the findings whilst not statistically analysed, have been analysed by themes.

**9.31** Focus groups were used in the first instance to gain insight from members of the protected characteristic groups. The advantage of using focus groups is that it provides an opportunity to explore the attitudes, feelings, beliefs, experiences and reactions of participants in ways that are not feasible with other methods.

**9.32** In addition to this, semi-structured interviews were carried out with some participants dependent on their preference. The informal atmosphere of a semi-structured interview can encourage openness from participants and also offer the researcher flexibility to adjust the questions and change direction as the interview progresses.

**9.33** There was a focus on five protected characteristic groups: race, religion, disability, sexual orientation and gender reassignment. There was a reluctance amongst two groups in particular, namely race and religion to take part in the research and this means that the findings are more influenced by the other characteristics.

20 Respecting All: the experiences of five protected characteristic groups under the Equality Duty; Engaging Communities; November 2016

**9.34** Building on the EqIA undertaken for the Core Strategy and the work of consultants Engaging Communities, a full EqIA of the Staffordshire Moorlands Local Plan was carried out. A summary of needs / issues was collated for each of the protected characteristic groups. The community needs identified were used as the main criteria for assessing the potential impact of the emerging Local Plan policies and proposals as described below.

**9.35** In order to address the key equality impacts identified, the Local Plan should:

1. **Housing** - Deliver future housing according to the diversity of local needs, including new homes that are affordable and adaptable as well as extra care housing where needed.
2. **Employment** - Provide access to employment opportunities, from all sectors of the economy and located close to where people live.
3. **Community Safety** - Deliver safe and inclusive communities.
4. **Access to Facilities** - Ensure appropriate levels of community infrastructure, including facilities for health and recreation, that are well located and readily accessible.

**9.36** In January 2018 a further assessment was carried out to screen policy amendments proposed as part of the preparation of the Submission Version Local Plan (February 2018).

### **9.5 Equality Impact Assessment - Summary of findings**

**9.37** The full text can of the Equalities Impact Assessment for the Local Plan can be read on the Council's web-site. Its main findings have been summarised below.

**9.38** Following the January 2018 screening assessment, it was considered that the proposed policy amendments made as part of preparation of the Submission Version Local Plan (February 2018) were unlikely to create any negative equality impacts. Indeed in some cases additional positive benefits were identified.

**9.39** Overall, the assessment demonstrates that the Local Plan has addressed the key issues raised by different communities:

- Delivering future housing according to the diversity of local needs, including new homes that are affordable and adaptable as well as extra care housing where needed.
- Providing access to employment opportunities, from all sectors of the economy and located close to where people live.
- Delivering safe and inclusive communities.
- Ensuring appropriate levels of community infrastructure, including facilities for health and recreation, that are well located and readily accessible.

## Monitoring Proposals

## 10 Monitoring Proposals

**10.1** This section makes recommendations for the approach to monitoring the sustainability effects of implementing the Staffordshire Moorlands Local Plan.

What the Directive requires:

"Member States shall monitor the significant environmental effects of the implementation of plans or programmes in order, *inter alia*, to identify at an early stage unforeseen adverse effects, and to be able to undertake appropriate remedial action." (Article 10.1)

The Environmental Report should provide information on "a description of the measures envisaged concerning monitoring" (Annex I (i)).

**10.2** The SEA Directive requires monitoring of the significant environmental effects of implementing the plan. SA monitoring will cover the significant economic and social effects, as well as the environmental ones.

**10.3** The table below sets out proposed measures for monitoring the sustainability effects of implementing the preferred options for the Local Plan. The monitoring measures proposed are linked to the SA process, including the objectives, targets and indicators developed for the SA Framework, the baseline information and key sustainability issues, the likely significant effects expected, and the mitigation measures proposed.

**10.4** The monitoring measures proposed focus on the significant sustainability effects that may give rise to irreversible damage (with a view to identifying trends before such damage is caused) and the significant effects where there is uncertainty in the SA and where monitoring would enable preventative or mitigation measures to be taken.

**10.5** The policies and objectives of the Local Plan will be delivered in the context of the Development Plan as a whole, and the wider policy framework which sits alongside the planning system. For this reason, monitoring the sustainability effects of implementing the Local Plan will be conducted as part of the overall approach to monitoring the sustainability effects of implementing this and other Planning Documents. Progress will be reported through the Annual Monitoring Report.

**10.6** Wherever possible, existing monitoring arrangements, including information collected by outside bodies, have been suggested as a source of indicators.

**10.7** The statutory environmental consultees and other stakeholders have already made important contributions as part of this SA, particularly in terms of developing the baseline information and SA Framework. As part of the consultation process relating to this SA report, consultees are invited to make specific comment on the monitoring proposals for the sustainability effects of implementing the Local Plan. In particular to agree the sustainability effects to be monitored and the information to be collected, including by whom and when.

What needs to be monitored?	What sort of information is required?	Indicators	Source of information
Effects on the economy	Success of small businesses. Vitality of town centres.	<ul style="list-style-type: none"> <li>• Employment land supply.</li> <li>• Retail vacancy rates.</li> </ul>	Local Planning Authority. Inter Departmental Business Register, available from ONS at local authority level.
Effects on diversity and abundance of flora and fauna and geological interests	Trends relating to the management and condition of SSSIs and Local Wildlife Sites. Protection of priority habitats and species and geological interests on undesignated sites, both brownfield and greenfield.	<ul style="list-style-type: none"> <li>• Area (ha) of SSSIs and Local Wildlife Sites lost to development requiring planning permission.</li> </ul>	Staffordshire Wildlife Trust. Local Planning Authority.
Effects on climate change	Location of housing and employment development. Amount of renewable energy produced in area. Carbon dioxide emissions. Incorporation of sustainable design features in new development.	<ul style="list-style-type: none"> <li>• Total carbon dioxide emissions.</li> <li>• Amount of renewable energy generation by installed capacity and type.</li> </ul>	Defra publication of local CO <sub>2</sub> emissions every Autumn. <a href="http://www.defra.gov.uk/environment/statistics/globalatmos/galocalghg.htm">http://www.defra.gov.uk/environment/statistics/globalatmos/galocalghg.htm</a> Local Planning Authority. Staffordshire County Council
Effects on landscape and townscape quality	Impact of development of landscape and townscape character. Development on greenfield sites.	<ul style="list-style-type: none"> <li>• % or areas of historic buildings, sites and areas including locally listed assets affected, whether in</li> </ul>	Historic England. Local Planning Authority.

What needs to be monitored?	What sort of information is required?	Indicators	Source of information
		<ul style="list-style-type: none"> <li>an adverse or beneficial way.</li> <li>% of new and converted dwellings built on previously developed land.</li> </ul>	
Control of flood risk	Location of new development in relation to flood zones.	<ul style="list-style-type: none"> <li>Number of planning applications granted contrary to the advice of the Environment Agency in respect of flood risk.</li> </ul>	Environment Agency
Accessibility of jobs, services and facilities	Access to services for all, including young and older people and those living in rural or remote settlements.	<ul style="list-style-type: none"> <li>New indicator to be developed in consultation with Staffordshire County Council</li> </ul>	Staffordshire County Council
Effects on deprived areas and disadvantaged groups	Local concerns relating to anti-social behaviour. Health inequalities. Community cohesion.	<ul style="list-style-type: none"> <li>Premature (persons under 75 years) all cause standardised mortality ratios.</li> <li>Domestic burglaries per 1,000 households</li> </ul>	ONS Crime Survey for England and Wales

What needs to be monitored?	What sort of information is required?	Indicators	Source of information
Housing which meets local needs	Availability of affordable housing. Housing types, tenures and sizes that meet housing need.	Number of affordable housing completions.	Strategic housing team

**Table 10.1 Proposals for monitoring the sustainability effects of implementing the Staffordshire Moorlands Local Plan**

## Testing Local Plan objectives against the SA Framework

## 11 Testing Local Plan objectives against the SA Framework

**11.1** It is important that the objectives of the Local Plan are in accordance with sustainability principles. They have therefore been tested for compatibility with the SA objectives using the matrix below. As can be seen from the table, none of the Local Plan objectives have been identified as being incompatible with the sustainability objectives of the SA.

**11.2** In the table below, the SA Objectives are as follows:

### Population, Human Health and Social Inclusiveness

- SA1: To improve community cohesion and the quality of where people work and live.
- SA2: To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.
- SA3: To improve health and reduce health inequalities.
- SA4: To minimise opportunities for crime and reduce the fear of crime.
- SA5: To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social / extra care housing.
- SA6: To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.

### Climate Change, Air and Water

- SA7: To minimise contributions to climate change and consider climate change adaptation.
- SA8: To improve air quality.
- SA9: To reduce flood risk, protect and enhance water sources.

### Biodiversity, flora and fauna

- SA10: To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs

### Soil and material assets

- SA11: To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.
- SA12: To minimise the use of non-renewable resources.

### Built and Cultural Heritage, Landscape and Local Distinctiveness

- SA13: To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.
- SA14: To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.
- SA15: To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.

### Employment, Economic Development and Regeneration

- SA16: To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy.

- SA17: To strengthen, modernise and diversify the District economy, and promote sustainable economic growth.
- SA18: To encourage and support a high and stable level of employment.

**11.3** Local Plan objectives are:

- SO1: To make provision for the overall land-use requirements for the District, consistent with national policy and evidence.
- SO2: To create a District where development minimises its impact on the environment, helps to mitigate and adapt to the adverse effects of climate change and makes efficient use of resources.
- SO3: To develop and diversify in a sustainable manner the District's economy and meet local employment needs in the towns and villages.
- SO4: To provide new housing that is affordable, desirable, well-designed and meets the needs of residents of the Moorlands.
- SO5: To ensure the long-term vitality and viability of the three market towns of Leek, Biddulph and Cheadle.
- SO6: To maintain and promote sustainable regenerated rural areas and communities with access to employment opportunities, housing and services for all.
- SO7: To support and enhance the tourism, cultural, recreation and leisure opportunities for the District's residents and visitors.
- SO8: To promote local distinctiveness by means of good design and the conservation, protection and enhancement of historic, environmental and cultural assets throughout the District.
- SO9: To conserve and improve the character and distinctiveness of the countryside and its landscape, heritage, biodiversity and geological resources.
- SO10: To deliver sustainable, inclusive, healthy and safe communities.
- SO11: To reduce the need to travel or make it safer and easier to travel by more sustainable forms of transport.

SA Topics	Social inclusiveness	Health and well-being	Homes for everyone	Transport and accessibility	Climate change and air quality	Water resources and flood risk	Biodiversity and GI	Soil and material assets	Built and cultural heritage	Landscape and local distinctiveness	Employment and economic development

## Quality Assurance Checklist

## 12 Quality Assurance Checklist

**12.1** The Quality Assurance checklist below has been used to ensure that the requirements of the SEA Directive have been met and fully integrated into the parts of the sustainability appraisal process covered in this document. The Quality Assurance checklist covers both the technical and procedural steps of the sustainability appraisal process. It has been drawn from Appendix 9 of the 2005 ODPM document: A Practical Guide to the Strategic Environmental Assessment Directive, updated with requirements set out in the National Planning Policy Framework.

Quality Assurance	Relevant section
<b>Objectives and context</b>	
The plan or programme's purpose and objectives are made clear.	These are set out in the non-technical summary and in section 11: Testing Local Plan objectives against the SA Framework.
Sustainability / environmental issues and constraints, including international and EC environmental protection objectives are considered in developing objectives and targets	SA Scoping Report identified key sustainability issues - these informed development of the SA objectives. See Section 5 of this report. Also Section 23 of this report sets out a review of relevant plans, programmes and policy objectives updated from the SA Scoping Report.
SA / SEA objectives, where used, are clearly set out and linked to indicators and targets where appropriate.	SA objectives are clearly set out in the Scoping Report and linked to indicators and targets where appropriate. Also see Section 5 of this report.
Links with other related plans, programmes and explained and policies are identified and explained.	These links are set out in the SA Scoping Report, see section 5. Section 23 of this report sets out a review of relevant plans, programmes and policy objectives updated from the SA Scoping Report.
Conflicts that exist between SA/SEA objectives, between SA/SEA and plan objectives, and between SA/SEA and other plan objectives are identified and described.	Section 11 of this report describes testing Local Plan objectives against the SA Framework.
<b>Scoping</b>	
Consultation bodies are consulted in appropriate ways and at appropriate times on the content and scope of the Environmental Report.	SA Scoping Report was consulted on as part of preparation of the emerging Local Plan. Details are provided in Section 14: Consultation.
The assessment focuses on the significant issues.	Key sustainability issues were identified in the Scoping Report and described in Section 5 of this report. Issues are also identified in

Quality Assurance	Relevant section
<b>Objectives and context</b>	
	table 10.1 of section 10 of this report. The key sustainability issues informed development of the SA objectives.
Technical, procedural and other difficulties encountered are discussed; assumptions and uncertainties are made explicit.	Difficulties in collecting data alongside other risks and uncertainties are set out in section 4 of this report.
Reasons are given for eliminating issues from further consideration.	None of the key issues identified were subsequently eliminated - all were considered to remain relevant.
<b>Alternatives</b>	
Realistic alternatives are considered for key issues, and the reasons for choosing them are documented.	The SA has appraised all reasonable alternatives considered through the plan making process. Details are set out in section 6 of this report. The reasons for the selection or rejection of alternatives are also set out in this section of the report.
Alternatives include 'do minimum' and/or 'business as usual' scenarios wherever relevant.	A "do nothing" alternative is discussed in section 6 of this report.
The sustainability/environmental effects (both adverse and beneficial) of each alternative are identified and compared.	All reasonable alternatives considered through the plan making process have been appraised against the SA Framework. The positive and negative effects of each option are identified and compared. Details of appraisals are set out in sections 15 - 21 of this report.
Inconsistencies between the alternatives and other relevant plans, programmes or policies are identified and explained.	No inconsistencies between the alternatives and other relevant plans or policies were identified. The implications of other plans and programmes are set out in the Scoping Report and are summarised and updated in section 23 of this report.
Reasons are given for selection or elimination of alternatives.	The reasons for the selection or rejection of alternatives are set out in section 6 of the report.
<b>Baseline information</b>	

Quality Assurance	Relevant section
<b>Objectives and context</b>	
The relevant aspects of the current state of the area (including economic, social and environmental aspects) and their likely evolution without the plan have been described.	The current state of the area is set out in the Scoping Report. The likely evolution of the baseline information without the plan is set out in section 6 of this report.
The characteristics of areas likely to be significantly affected are described, including areas wider than the physical boundary of the plan area where it is likely to be affected by the plan.	The characteristics of areas likely to be significantly affected are set out in the Scoping Report.
Difficulties such as deficiencies in information or methods are explained.	Difficulties in collecting data alongside other risks and uncertainties are set out in section 4 of this report.
<b>Prediction and evaluation of likely significant environmental effects</b>	
Effects identified include the types listed in the Directive (biodiversity, population, human health, fauna, flora, soil, water, air, climate factors, material assets, cultural heritage and landscape), as relevant; other likely environmental / sustainability effects are also covered, as appropriate.	Each of the options, preferred policies and options for site allocation were assessed against the SA Framework which covers the scope of effects listed in the Directive. The SA Framework is set out in section 5 and is linked to SEA topics.
Both positive and negative effects are considered, and the duration of effects (short, medium or long-term), and temporary/permanent effects are addressed	The likely significant effects of options are identified in tables set out in the appendices to this report. Positive and negative effects are considered, and the duration of effects (short, medium or long-term), and temporary / permanent effects are addressed.
Likely secondary, cumulative and synergistic effects are identified where practicable	The likely secondary, cumulative and synergistic effects are identified and set out in section 7 of this report.
Inter-relationships between effects are considered where practicable.	Where relevant inter-relationships between effects are identified and set out in section 7 of this report.
The prediction and evaluation of effects makes use of relevant accepted standards, regulations, and thresholds.	The prediction and evaluation of effects is via the SA Framework which is linked to quantitative indicators.
Methods used to evaluate the effects are described.	The appraisal methodology is explained in section 4 of this report.
<b>Mitigation measures</b>	

Quality Assurance	Relevant section
<b>Objectives and context</b>	
Measures envisaged to prevent, reduce and offset any significant adverse effects of implementing the plan or programme are indicated.	Measures envisaged to prevent, reduce and offset any significant adverse effects are identified in section 6 of this report.
Issues to be taken into account in project issues consents are identified.	Appraisal of site options identifies where necessary any issue to be taken into account in project consents. This is set out in appendices to this report.
<b>The Environmental Report</b>	
Is clear and concise in its layout and presentation.	The report presents the findings of the Sustainability Appraisal in a clear and concise format.
Uses simple, clear language and avoids or explains technical terms.	Clear language is used wherever possible. Technical terms are explained.
Uses maps and other illustrations where appropriate.	Maps are included at section 22.
Explains the methodology used.	The appraisal methodology is explained in section 4 of this report.
Explains who was consulted and what methods of consultation were used.	Who was consulted and what methods of consultation were used is described in section 14 of this report.
Identifies sources of information, including expert judgement and matters of opinion.	Sources of information are described in the Scoping Report and throughout this report.
Contains a non-technical summary covering the overall approach to the SA/SEA, the objectives of the plan, the main options considered, and any changes to the plan resulting from the SEA.	A non-technical summary is included at the start of this report.
<b>Consultation</b>	
The SA/SEA is consulted on as an integral part of the plan-making process.	Details of consultations have been set out in section 14 of this report.
Consultation Bodies and the public likely to be affected by, or having an interest in, the plan or programme are consulted in ways and at times which give them an early and effective opportunity within appropriate time frames to express their opinions on the draft plan and Environmental Report.	Details of consultations have been set out in section 14 of this report.

Quality Assurance	Relevant section
<b>Objectives and context</b>	
<b>Decision-making and information on the decision</b>	
The environmental report and the opinions of those consulted are taken into account in finalising and adopting the plan or programme.	The findings of the SA and consultation responses have influenced the development of the Local Plan. The consultation responses received through the SA process and how SA findings have been taken into account are presented in Section 14.
An explanation is given of how they have been taken into account.	The consultation responses received through the SA process and how SA findings have been taken into account are presented in Section 14 of this report.
Reasons are given for choosing the plan or programme as adopted, in the light of other reasonable alternatives considered.	The reasons for the selection or rejection of alternatives are set out in section 6 of the report.
<b>Monitoring measures</b>	
Measures proposed for monitoring are clear, practicable and linked to the indicators and objectives used in the SEA.	Proposed measures to monitor significant effects are provided in Section 10 of this Report and are clearly linked to SA Objectives.
Monitoring is used, where appropriate, during implementation of the plan or programme to make good deficiencies in baseline information in the SEA.	This will be an ongoing process after adoption of the Local Plan through the Council's Monitoring Review.
Monitoring enables unforeseen adverse effects to be identified at an early stage. (These effects may include predictions which prove to be incorrect.)	Monitoring measures will be part of the ongoing process after adoption of the Local Plan through the Council's Monitoring Review.
Proposals are made for action in response to significant adverse effects.	Proposed measures to monitor significant effects are provided in Section 10 of this report and are clearly linked to SA Objectives.
<b>National Planning Policy Framework</b>	
Para 165. A sustainability appraisal...should be an integral part of the plan preparation process, and should consider all the likely significant effects on the environment, economic and social factors.	Ongoing, the SA has been an integral part of the plan-making process, helping to inform the development and selection of alternatives as well as the development of preferred policy approaches and the selection of options for site allocation.

Quality Assurance	Relevant section
<b>Objectives and context</b>	
Para 167. Assessments should be proportionate, and should not repeat policy assessment that has already been undertaken.	Ongoing, the SA of the Local Plan is proportionate and does not repeat assessment that has been undertaken already.
Para 167. Wherever possible the Local Planning Authority should consider how the preparation of any assessment will contribute to the plan's evidence base.	The SA is presented as part of the evidence base.
Para 167. The process should be started early in the plan-making process and key stakeholders should be consulted in identifying the issues that the assessment must cover.	The SA process began in 2014 with consultation on the SA Scoping Report.

**Table 12.1 Quality Assurance checklist**

## Next steps

### **13 Next steps**

**13.1** This Sustainability Appraisal Report will be updated as required following consideration of any comments made.

**13.2** A final sustainability appraisal report will be prepared to accompany submission of the Local Plan to the Planning Inspectorate for examination on behalf of the Secretary of State.

## Consultation

## 14 Consultation

**14.1** Consultation with the public, stakeholders and the SEA bodies on the SA Scoping, Initial and draft SA reports has been carried out alongside consultation on the emerging Local Plan as described in Table 4.2.

**14.2** The following sections give details of the consultation undertaken, responses received and the action taken as a consequence.

### 14.1 SA Scoping Report August 2014

**14.3** The SA Scoping Report was consulted on for six weeks between 13<sup>th</sup> August 2014 and 26<sup>th</sup> September 2014. Seven organisations made comments and these are summarised in the table below.

**14.4** Where possible comments have been taken on board during the preparation of the SA Report. Details of the responses received and the Council's actions in the light of responses is set out in the table below.

Organisation	Summary of Response	Action
Staffordshire Police	Welcomes that ' <b>crime</b> ' has been identified as a sustainability issue and that there is a recognition within the local authority that 'New developments need to create safe public and private environments and include 'designing out crime' initiatives' and that objective (No.4) 'To minimise opportunities for crime and reduce the fear of crime' is proposed to reflect this. Seeking to fulfil this objective helps satisfy the obligation within Section 17 of the Crime and Disorder Act 1998 placed on all local authorities 'to exercise their functions with due regard to their likely effects on crime and disorder, and to do all they reasonably can to prevent crime and disorder'.	Support noted.
Staffordshire Police	With regard to the local authority's recognition for the need to include ' <b>designing-out crime</b> initiatives', the local authority could do no better than embrace Secured by Design and require all new developments to be built and accredited to Secured by Design.	Core Strategy Policy DC1 – Design Considerations states that new development should incorporate 'designing-out crime initiatives'. Add reference to Plans, Policies and Programmes list in Appendix 1.
English Heritage	<b>Mitigation measures</b> are mentioned throughout the document, how will any mitigation measures be included within the Local Plan? Consider inserting a statement to set out how this will be dealt with. We would encourage mitigation measures to be incorporated within the Local Plan itself, in policy wording and justification text.	Agree. Include reference in the scoping report to clarify that mitigation measures will be incorporated within the Local Plan, in policy wording and justification text.
Environment Agency	<b>Flood Risk:</b> The ability of the WFD waterbodies to meet their required status by 2027 could be affected by growth. The ability of the existing sewerage infrastructure and water environment to accommodate the proposed levels of growth should be reflected within this section.	Agree. Include this within the sustainability issues.
Environment Agency	<b>Objective 9:</b> summarises the SA objectives identified for the plan. Although we welcome Point 9 (to reduce flood risk and protect water resources) we recommend that Point 7 (to minimise contributions to climate change) is expanded to also include climate change adaptation, as there are other climate change impacts that should be considered within the plan.	Accepted. Amend Objective 7 to reflect to include reference to climate change adaptation.

Organisation	Summary of Response	Action
Environment Agency	<p>We have reviewed <b>Appendix 1</b> and welcome the inclusion of the EU Water Framework Directive (WFD) and corresponding Humber River Basin Management Plan (RBMP).</p> <p>Suggest including the following.</p> <ul style="list-style-type: none"> <li>• River Trent Catchment Flood Management Plan (CFMP) 2010 produced by the Environment Agency - these give an overview of the flood risks across different catchments and ensure that works/development affecting flooding are coordinated between all parties.</li> <li>• Staffordshire Preliminary Flood Risk Assessment (PFRA) (2011) - The Preliminary Flood Risk Assessments (PFRAs) provide a high level summary of significant flood risk from surface water, ordinary watercourses and groundwater through collection of information on past (historic) and future (potential) floods. They are a requirement of the Flood Risk Regulation 2009 and must be produced every 6 years.</li> <li>• Shropshire and Staffordshire Local Flood Risk Management Strategy (2014) - currently out for consultation - This Local Flood Risk Management Strategy (LFRMS) offers an opportunity for Staffordshire County Council (as Lead Local Flood Authority) to formalise their longer term vision and shape individual priorities that deliver the greatest benefit to the people, property and environment of Staffordshire.</li> </ul>	Comments noted. Agreed that the other documents can be referenced in Appendix 1.
Environment Agency	<p>We have reviewed <b>Appendix 2</b> and note that there is no reference to baseline data relating to the WFD waterbodies that flow through your district. The ability of these waterbodies to meet their required status by 2027 could be hindered by growth, and it should be ensured that the plan is able to mitigate for this risk and ensure that watercourses are retained at or returned to their most natural possible condition. Please see the attached spreadsheet and map which shows the waterbodies affecting your district, their current status and their required future status.</p>	Noted. SA to be updated accordingly.
Environment Agency	<p>Under the housing and employment sections we note section 5 (flood risk) and the criteria of <b>classifying developments</b> 1-4 according to their location in relation to the floodplain. We note that Floodzone 3b is not specified here. In line with Table 2 of the NPPG residential and employment development is not considered appropriate within this zone, therefore sites at this level of risk should be thinned out as part of the SHLAA process and not be further considered as allocations. In light of this, we find exclusion of a reference to FZ3b acceptable.</p>	Noted. Site assessment methodology reviewed.
Environment Agency	<p>We also welcome the inclusion of <b>criteria 9</b> (physical infrastructure including sewerage and water provision). We note this alludes to findings of the Development Capacity Study, which summarises a number of infrastructure requirements under the red amber green system. We recommend that sewerage infrastructure is singled out under its own criteria, in order to highlight the site's potential impact on the pollution of the water environment. Development in locations where there is the availability of public main foul sewer should be considered in preference to those where connection is not feasible, as it is these sites that will pose the greatest risk of pollution of the water environment as any treated effluent will discharge directly into the water environment (either groundwater or rivers). Data for this would be provided by a WCS if the Development Capacity Study does not provide this level of detail.</p>	Noted. Site assessment methodology reviewed.
Environment Agency	<p><b>Criteria 11 assesses contamination.</b> We welcome the high scoring of contaminated sites, as these provide unique opportunities for the remediation of any underlying contamination and therefore protection and improvement of the water environment (as required under WFD).</p>	Noted. Site assessment methodology reviewed.
Environment Agency	<p>With regards to the <b>criteria for gypsy and traveller sites</b>, we draw your attention to Table 2 of the NPPG that states that such a land use is not</p>	Noted. Site assessment methodology reviewed.

Organisation	Summary of Response	Action
	suitable for sites within Flood Zone 3, and only suitable in Flood Zone 2 in exceptional circumstances. Sites affected by Flood Zone 3 (3a or 3b) should therefore be thinned out prior to consideration by sustainability appraisal as being contrary to national policy. The scoring criteria should therefore be reconsidered in light of the high vulnerability of this land use.	
Natural England	<b>Soil and Agricultural Land:</b> No mention if an assessment has been undertaken to determine the quality of soil and agricultural land. Digital ALC data is available from Natural England and sufficient site specific data should be available to inform decision making.	Add section referring to Soil and Agricultural Land.
Natural England	<b>Landscape:</b> Pleased the landscape section has highlighted that District adjoins the PDNP. Suggest the baseline incorporates the South West Peak, White Peak and Potteries and Churnet Valley National Character Areas (NCAs) which fall within the Staffordshire Moorlands. NCA profiles provide an invaluable resource for understanding wider landscape context, and highlighting opportunities for enhancement of the natural environment.	Agree. Add reference to these in the baseline information and Plans, Policies and Programmes list in Appendix 1.
Natural England	<b>Access and Recreation:</b> Access to the countryside is not included as a topic. NE encourages any proposal to incorporate measures to help encourage people to access the countryside for quiet enjoyment. Relevant aspects of local authority green infrastructure strategies should be incorporated where appropriate. The SA should also consider Green Infrastructure.	Agree that Access to the Countryside could be included as a topic. Green Infrastructure is considered within Objective 10 but could also be considered within Objectives 1 and 6.
Natural England	Insert a reference to the historic environment within the ' <b>cumulative impacts</b> ' section on page 15/16 and assess what impacts could arise for the historic environment.	Accepted. Add reference to historic environment within this section.
Natural England	<b>Objective 6:</b> NE are pleased that there is an objective to encourage sustainable links between rural areas and towns. However strongly recommends that that an objective is included which seeks to protect and improve access to the natural environment.	Consider that this can be considered within Objective 6 by adding a question under decision making criteria within Appendix 3.
Natural England	<b>Objective 10:</b> The Moorlands has a number of internationally designated nature conservation sites and locally protected sites. There should therefore be an objective to test the plan's policies and proposals on European sites and SSSIs.	Agreed. Amend Objective 10 to reflect this.
Natural England	<b>Objective 11:</b> This could be improved to be more specific to protecting the best and most versatile agricultural land.	Agreed. Amend Objective 11 to reflect this.
Natural England	<b>Objective 14:</b> This could be strengthened by making reference to protected sites and could incorporate links to the NCA objectives.	Agreed. Add a question under decision making criteria within Appendix 3 making reference to protected sites and natural environment.
Natural England	Suggest that <b>Biodiversity 2010</b> and neighbouring local plans could be considered in the SA context.	Add references to Plans, Policies and Programmes list in Appendix 1.

Organisation	Summary of Response	Action
Natural England	The <b>baseline data</b> should consider the presence of Protected species and Priority species (including Annex1 birds and regularly occurring migratory birds). Site allocations within the local plan could affect habitats that support either domestic or European Protected Species. Areas that are known to be wildlife habitats or corridors should be highlighted and scoped into the SEA to be considered.	Noted.
Natural England	We have highlighted above data that could further inform the <b>baseline</b> in relation to protected species, soils, landscape and access to nature.	Comments noted.
Natural England	<b>Objective 10:</b> 'Will it help to deliver the findings of the Appropriate Assessment?' It is not clear what this indicator is setting out to achieve. An Appropriate Assessment is a stage within the Habitat Regulation process to assess whether a plan or project is likely to have adverse impacts on a European site. Complying with the Appropriate Assessment is therefore a requirements under the Habitat Directive. Natural England recommends an indicator that would encourage benefits to the natural environment for example;  "% of new developments incorporating ecological enhancement measures per year".	Agreed that this is a requirement under the Habitat Directive. Amend Appendix 3 to reflect comments and add suggested indicator.
Natural England	Natural England is concerned that the <b>site appraisal</b> process does not give sufficient weight to the natural environment, in particular designated sites. The SA states that European designated sites (also commonly referred to as Natura 2000 sites), fall within your Authority boundary. European sites are afforded protection under the Conservation of Habitats and Species Regulations 2010, as amended (the 'Habitats Regulations'). In considering European sites of interest, Natural England advises that you, as a competent authority under the provisions of the Habitats Regulations, should have regard for any potential impacts that a plan or project may have. The Conservation objectives for each European site explain how the site should be restored and/or maintained and may be helpful in assessing what, if any, potential impacts a plan or project may have.  European sites are also notified at national level as Sites of Special Scientific Interest (SSSI). Natural England notes that criteria 4 'protected land' is split into two themes 'green belt' and 'nature conservation sites' Natural England is concerned that Green Belt is given greater weighting in terms of scoring than Nature Conservation sites. This could lead to pressure being created to allocate sites for housing within or adjacent to international / national designated sites and therefore have the potential to affect their interest features. It is also important to be aware that housing development can have indirect impacts on protected sites for e.g. a housing site adjacent to a designated could have impacts on its interest features via recreational disturbance and 'urban edge' effects etc. In line with the NPPF paragraph 113 , distinctions should be made between the hierarchy of international , national and local sites. This therefore need to be reflected in the assessment criteria when scoring potential development sites again designated sites.	Site appraisal methodology reviewed.
Historic England	<b>Landscape:</b> Information from the historic character assessment could be included here.	Agree. Add separate paragraph into landscape section regarding this.
Historic England	<b>Historic Assets:</b> Request amending 'historic assets' to read 'heritage assets'. We would encourage including some additional information in this section, such as referencing the HER, numbers of assets (designated and non-designated assets), the availability of conservation area appraisals and management plans as examples.	Agree. Amend title and add additional information as suggested.
Historic England	<b>Objectives 13 &amp; 14.</b> We support the inclusion of specific objectives within the SEA for the historic environment considering both buildings and	Objective 13 refers to the setting of heritage

Organisation	Summary of Response	Action
	landscape. Include reference to the need to protect, conserve and enhance the significance of heritage assets, which includes their setting. Ensure that the objective relates to both designated and non-designated assets.	assets. An amendment can be made to the question under decision making criteria within Appendix 3 to refer to non-designated assets.
Historic England	<b>Objective 15:</b> Consider using the term heritage. The section title references 'local distinctiveness', we would encourage including this term within the objective.	Agreed. Add references to heritage and local distinctiveness.
Historic England	Include <b>monitoring indicators</b> that reflect the historic environment. The English Heritage SEA guidance, link included below, includes monitoring examples that may be useful.	Accepted.
Historic England	Support the reference to conservation area appraisals, historic environment characterisation, landscape and settlement character appraisals. Also encourage the inclusion of the Historic Environment Record, Heritage Legislation and National Planning Policy Guidance.	Support noted.
Historic England	<b>Appendix 2</b> amend 'historic assets' to read 'heritage assets' and 'historic Parks and Gardens' to read 'Registered Parks and Gardens'. Include information from the Historic Environment Record on a wider range of issues including archaeology and non-designated assets. Reference other historic environment evidence base such as conservation area appraisals and management plans within this section. Consider including a reference to locally important listings, if applicable.	Noted. SA will be updated accordingly.
Historic England	Page 29 on <b>site assessments</b> consider how an assessment of the impacts/harm to the historic environment, as a result of development/site allocations, could be included within this process. Any potential sites for allocation would have to undergo a heritage impact assessment.	SA methodology reviewed and assessment commissioned.
Historic England	Appendix 4 regarding <b>site assessment criteria</b> scores highly where development is not within or adjacent to heritage assets such as conservation areas. However, if development is appropriate and takes account of the historic environment then it is possible for development to protect, conserve and/or enhance heritage assets. The NPPF states that sustainable development within a conservation area could better reveal its significance.	SA methodology reviewed.
Historic England	Within Appendix 4 and between the different uses – housing/employment/travellers sites there are different criteria that are applied; this should be a consistent approach. Consider this approach during the <b>site assessment</b> process. The important issue is to consider what impacts/harm to the historic environment could result from development and how they can be avoided/ mitigated. A heritage impact assessment would be a beneficial tool.	SA methodology reviewed and assessment commissioned.
Historic England	Sources at the end of the <b>assessment criteria</b> should reference historic environment sources such as the HER and other documents of relevance.	Noted.
Staffordshire County Council	The three Extensive Urban Survey (EUS) for Alton, Cheadle and Leek should be included within Chapter 2 paragraph 2.4 under the heading "Historic Assets" alongside the reference to the Historic Environment Character Assessment (HECA). The EUS also considers the impacts of change on the historic environment of the District's three medieval towns in greater detail than that provided within the HECA. The emerging English Heritage and SCC guidance on the sustainable reuse of historic farm buildings and sympathetic new build on historic farmstead complexes is a county-wide guidance document which has particular resonance in the Staffordshire Moorlands. This guidance lays a methodology for the preliminary assessment of historic farm buildings/complexes by applicants and for discussion with local planning officers. The aim of this approach is to enable early discussion and the development of appropriate and sustainable proposals which promote the conservation of historic farm	Noted.

Organisation	Summary of Response	Action
	<p>complexes through their sustainable reuse and the deployment of appropriate new build to reflect the area and the site's inherent historic character. The section on 'Historic Assets' considers (in sentence 2) the range of heritage assets, many of which are statutorily protected including '...buildings, gardens and structures'; this sentence must also include reference to archaeological remains (such as the Scheduled Bury Bank hillfort'). This section should also recognise that the unique character of heritage assets may comprise a range of individual elements, for example Alton Castle is a Grade I Listed Building, but is also a Scheduled Monument which also incorporates medieval earthworks, structural remains and below ground archaeological remains within its bounds. The castle also represents an important landscape feature.</p> <p>The majority of heritage assets are not however statutorily protected and instead receive consideration as part of the planning process. The nature of below ground archaeological remains means that their presence and significance is often not fully understood before they are encountered. As such there is the potential for non-scheduled nationally important remains to be present. Sustainability in this context requires early discussions (and in some circumstances investigations) where development may impact upon such sensitive remains to develop appropriate strategies to ensure the conservation and enhancement of such remains.</p>	
Staffordshire County Council	<p>There are errors in the Biodiversity, Flora and Fauna section in 2.4. Geodiversity should be added. Nationally designated sites are not referenced. It should be made clear that the data from Defra for area of designated sites in favourable condition relates only to SSSIs. Staffordshire Wildlife Trust may be able to supply data on local sites. This will show a much lower proportion of local sites in favourable condition than SSSIs. Condition of designated habitats is therefore an issue, associated with agricultural practices and economy. This section is limited to designated sites. Reference to ecological connectivity, in line with Natural Environment White Paper and the NPPF is required. An issue in Moorlands, as elsewhere, is addressing fragmentation of habitats and facilitating and encouraging improvements in habitat connectivity. Reference to biodiversity opportunity mapping would be relevant here and to the Churnet Valley Living Landscapes Project which includes objectives for enhancing ecological connectivity. Moorlands includes a significant survival of species-rich grassland – one of the most threatened and declining habitats nationally – while the Churnet Valley supports a significant area of ancient woodland and the district supports important moorland habitats - this could be recognised including the role these surviving habitats play in attracting visitors.</p>	Noted. SA will be updated accordingly.
Staffordshire County Council	<p>Should be an objective to deliver more <b>extra care units</b> in line with the Flexicare Strategy. SCC keep a database which could be used for monitoring purposes.</p>	Agree. Add extracare into Objective 5 and include a monitoring indicator.
Staffordshire County Council	<p>Support <b>monitoring of SA 13</b> but what is the indicator measuring, total number, condition, number of designated heritage assets considered 'at risk'?</p>	Noted.
Staffordshire County Council	<p><b>Biodiversity, Flora and Fauna:</b> Reference to Appropriate Assessment may not be required – if this is not fully met a proposal/site should be refused. Legal requirements mean that this cannot be balanced against other objectives/criteria. If it is included the objective should be that impacts on Europa 2000 sites are fully avoided. Reference to meeting/contributing to objectives of the Water Framework Directive should be made. Reference to contributing to Staffordshire Biodiversity Action Plan objectives would be welcomed. Thought could be given to an indicator of contribution to ecological connectivity. Connectivity mapping can be carried out for some habitats.</p>	Noted and SA will be updated accordingly.

Organisation	Summary of Response	Action
Staffordshire County Council	SA 3. <b>Access to natural green space</b> could be added as an indicator. There is much evidence that this is an indicator for physical and mental health.	Noted and SA will be updated accordingly.
Staffordshire County Council	There is no mention of <b>Veteran or Ancient trees</b> within the documentation. These are highlighted in the NPPF and therefore should be reflected in local documentation. This is a difficult asset, in that they are often not recorded, however due to their cultural and ecological importance, once lost cannot be replaced. An indicator would be through data collection and safeguarding through the Planning Process. <b>Soil and Material Assets.</b> A better indicator for geological sites would be condition rather than area.	Noted and SA will be updated accordingly.
Staffordshire County Council	<b>Objective 2</b> covers access to education and minimising distance to travel. However, we feel that this does not take into account the capacity of nearby schools or the potential for new sites to provide additional facilities. Therefore, the indicators should be updated to include the number of school places created and the distance of new housing to school sites. The School Organisation Team at the County can provide data annually on new school places created for monitoring purposes.	Noted and SA will be updated accordingly.
Staffordshire County Council	<b>Appendix 1</b> should also include the following policies and documents relating to Cultural Heritage. Under International/European Context the relevancy of the European Landscape Convention (2000), Florence and the Convention for the Protection of the Archaeological Heritage of Europe (1992), Valletta should be considered. Under Local/Sub-Regional Context the three Extensive Urban Surveys (EUS), for Alton, Cheadle and Leek, should be included. This appendix should also identify the emerging EH/SCC guidance concerning the sustainable reuse of historic farmsteads. While a county-wide document, this does have particular relevant to the Staffordshire Moorlands where many important early farm buildings and complexes survive.	Noted and SA will be updated accordingly.
Staffordshire County Council	<b>International:</b> The EU Green Infrastructure Strategy should be referred to: EU-wide strategy on Green Infrastructure: Enhancing Europe's Natural Capital. The EU Water Framework Directive should be listed. <b>National:</b> The UK Biodiversity Strategy: Biodiversity 2020: A strategy for England's wildlife and ecosystem services should be cited. The White Paper on the Natural Environment: The Natural Choice- Securing the Value of Nature should be cited. The Conservation of Habitats and Species Regulations 2010 and the Natural Environment and Rural Communities Act 2006 should be referenced. Reference to the Wildlife and Countryside Act is incorrect. This should read The Wildlife and Countryside Act 1981 (as amended).	Noted and SA will be updated accordingly.
Staffordshire County Council	<b>European context:</b> The European Landscape Convention (Florence 2002): Landscape is an important part of the quality of life for people everywhere: in urban areas and in the countryside. It sets, as part of its principle aims, the promotion of landscape protection, management and planning, to be implemented through; recognising landscapes in law as an essential component of peoples surroundings, to establish and implement landscape policies aimed at landscape protection, management and planning, and to integrate landscape into regional and town planning policies as well as any other policies with possible direct or indirect impact on landscape. It advocates a landscape character approach to informing planning decisions. <b>Local / Sub Regional:</b> Planning For Landscape Change: Supplementary Planning Guidance to the Staffordshire and Stoke on Trent Structure Plan 1996-2011 or its successor document. Incorporates landscape character assessment for Staffordshire and provides guidance on protection, management and planning of Staffordshire's Landscapes. This document is currently being reviewed and updated.	Noted and SA will be updated accordingly.
Staffordshire County Council	Consider that further emphasis needs to be placed on extracare (flexicare) housing for elderly in the <b>baseline information</b> . Raft of data available from the Flexicare Strategy.	Noted and SA will be updated accordingly.

Organisation	Summary of Response	Action
Staffordshire County Council	In <b>Appendix 2</b> the three Extensive Urban Surveys (EUS) for Alton, Cheadle and Leek should be included within Column 2 under the heading "Historic Assets". The Staffordshire Historic Environment Character Assessment (2010), which is included in the list, deliberately excluded an assessment on the historic character and heritage assets of the built areas of these three settlements because they would be considered in greater detail by the EUS project. The EUS project is now complete and the reports for Alton (February 2013), Cheadle (June 2012) and Leek (December 2011) can be found on the Staffordshire County Council website. Column 2 "Historic Assets" should also include reference to non-designated heritage assets (monuments, buildings (which includes the non-designated traditional farmsteads which are the subject of the guidance mentioned above) and landscapes). Under column 1 "Historic Assets" reference should also be made to the Staffordshire Historic Environment Record (HER), which is held by Staffordshire County Council.	Noted and SA will be updated accordingly.
Staffordshire County Council	The data for biodiversity is limited to designated sites, Data is held by Staffordshire Ecological Record on habitats and species of principal importance for biodiversity. Quantified habitat areas could be cited as could the number of species recorded in the District. The Biodiversity Opportunity Mapping should be cited. It should be made clear that the data from Defra for area of designated sites in favourable condition relates only to SSSIs. Staffordshire Wildlife Trust may be able to supply data on local sites. It is not clear whether all ancient woodland is captured through SSSI datasets, this is available through the Inventory of Ancient semi Natural Woodland and this is not referenced in Appendix 2, which may result in some fragmented areas of woodland not being captured in this piece of work. It is common place to set parameters that will prevent the loss of ASNW, therefore without the baseline; there is a missed opportunity to use this commonly used target. Planning For Landscape Change: Supplementary Planning Guidance to the Staffordshire and Stoke on Trent Structure Plan 1996-2011 or its successor document. This provides landscape character assessment and guidance on protecting and managing landscapes.	Noted and SA will be updated accordingly.
Staffordshire County Council	<b>Appendix 4</b> does not appear to take into account the results of either the Staffordshire Historic Environment Character Assessment or the Extensive Urban Survey.	SA methodology reviewed.
Staffordshire County Council	Protected land: B) Nature Conservation Site/ TPO should refer to SAC, SPA, SSSI and habitats of principal importance. Could, for <b>residential allocations</b> , accessible natural green space within 300 metres be included as a positive in line with Natural England targets?	SA methodology reviewed.
Staffordshire County Council	The <b>site appraisal criteria</b> set out the capacity of social infrastructure as a theme, which includes education stating sites should not have an adverse impact. However, it is not clear how the appraisal scores sites that can have a positive impact, for example by providing land for new school provision if required. We therefore suggest that this should be factored into appraisal criteria as it likely that new school sites will be needed in the District to cater for new housing growth.	SA methodology reviewed.
United Utilities	<b>Objective 7:</b> support objective regarding climate change.	Comment noted.
United Utilities	<b>Objective 9:</b> support objective regarding water.	Comment noted.

Table 14.1 Summary of consultation responses and action taken

## 14.2 Initial SA Report April 2016

**14.5** The Initial SA Report was consulted on alongside the Staffordshire Moorlands Local Plan Preferred Options Sites and Boundaries April 2016.

**14.6** Consultation arrangements included:

- Direct correspondence with SEA bodies.
- Over 5,000 e-mails and 8,000 postcards sent to consultees on the Staffordshire Moorlands consultation database.
- A dedicated web-page on the Staffordshire Moorlands web-site.
- Promotion of the Local Plan consultation and drop in sessions through social media.
- Press notices and releases in local papers.
- Postcards delivered to all residents within SMDC – 48,000 and all Businesses in SMDC – 3,000.
- Site notice at each proposed site allocation within the Local Plan.
- Consultation material available in key public locations.
- Public meetings and drop-in sessions.

**14.7** A total of 45 representations were received from 16 respondents. Summaries of the representations are reproduced here. The full text of representations can be read at the link:

**14.8** [http://staffsmoorlands-consult.limehouse.co.uk/portal/site\\_allocations/initial\\_sa\\_report](http://staffsmoorlands-consult.limehouse.co.uk/portal/site_allocations/initial_sa_report)

**14.9** Responses received to the April 2016 consultation have been incorporated into the SA report, or have been used to amend the approach taken to the appraisal wherever possible.

Question	Consultee	Response Summary (with response reference)	Action
1. Do you support the overall approach taken to the appraisal of options?	Individual	ISA1: No.	Noted
	Individual	ISA3: Generally supports most of the appraisal and supports the need for more houses. Support for brownfield site development in Cheddleton alongside CD017.	Noted
	Individual	ISA5: No. Objection to appraisal for EN128. Adding 27 homes will not have a positive effect on emissions and traffic. There are flood risk issues. Building on this land cannot be 'overall' positive.	Noted
	Individual	ISA8: No. The council have made it impossible to comment on site allocations in some rural areas.	All representations are welcomed.
	Individual	ISA14: In Cheddleton there are brownfield and infill sites that have been rejected or not considered whilst green belt sites with direct impact on other housing developments and local ecology have been identified in preference.	Site suggestions are welcomed. The SA is part of a wider evidence base supporting site allocations.
	Individual	ISA18: No. Existing brown field sites should be used first. Already there are too many empty sites that should be developed first.	The Council is required to meet its housing needs to 2031; as there are not enough brownfield sites to achieve this, both brownfield and green field site options are being considered.
	Individual	ISA22: Looks fine to me. However, would propose we try to reinstate dilapidated houses as part of new stock.	Noted
	Individual	ISA29: Sustainable development is about balancing the social, economic and environmental needs of	Assessments use the SA Framework agreed at Scoping

Question	Consultee	Response Summary (with response reference)	Action
		an area. The assessments give more weight to economic development than the other elements. The appraisal is not balanced and will only lead to ultimate harm in our district.	Stage to ensure that all elements of sustainability are properly addressed.
	Draycott Parish Council	ISA32: No. The Parish Council does not support the overall approach taken to the appraisal of options. Many of the development options are considered to focus on a small area of the Staffordshire Moorlands - Draycott parish and the neighbouring council at Checkley. No consideration has been given to the knock on effects of development in our parish to neighbouring villages such as Hilderstone and Fulford.	The preferred options Local Plan proposes a pattern of development in line with the spatial strategy set out in the adopted Core Strategy.
	Individual	ISA33: There is an over-riding need for employment opportunities in Leek to support an increase in inhabitants! There are 'brown' sites in the Leek Town boundary and surrounding areas which are NOT included but which are far more suitable!	The Council is required to meet its housing needs to 2031; as there are not enough brownfield sites in Leek to achieve this, both brownfield and green field site options are being considered.
	Natural England	ISA38: Generally yes, though we offer the following comments in order to allow the council to reflect on whether a consistent approach to SA has been achieved at this stage in the process. Eg SA relating to soils, agricultural land classification (ALC) and best and most versatile land appears to err on the side of caution i.e. in this consultation the presence of ALC grade 3 and 4 appear to be taken as an indication that potentially significant environmental effects could arise. Also the methodology in terms of landscape and landscape character impacts may benefit from clarification. A number of the SA judgements appear to acknowledge potential effects on landscape character and in the context of the wider National Character Area (NCA). However despite the ongoing landscape and heritage impact assessment work (the outcome of which is not yet known) the SA score attributed is in some cases 0 (neutral) rather than 'i' denoting the need for further information.	The assessment of potential effects on soils and agricultural land has been re-visited. The Natural England Likelihood of BMV dataset has been used to reappraise preferred option sites against this element of the SA Framework to provide additional detail. SA Objective 14 is to protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources. Hence the appraisal narrative reflects assessment against the various elements of this which includes opportunities to safeguard protected sites and historic landscapes as well as landscape character - and an "overall" judgement is recorded. However the July 2017 SA report provides details of where further information has been provided or may still be required in the site summaries in section 5.
	Historic England	ISA44: The revisions in relation to our earlier comments are noted and welcomed, and SA Objectives 13, 14 and 15 in relation to 'cultural heritage' are welcomed. Any remaining references to 'undesigned' assets should be amended to 'non-designated' throughout the document. Site appraisals include uncertain and negative impacts on heritage assets / historic environment but do not offer further information. In addition, 400m has been used as a benchmark for proximity to Listed Buildings. It is not clear how or why this particular distance has been used as a benchmark since the setting of a heritage asset can be impacted upon at longer distances.	Remaining references to 'undesigned' assets have been amended in the July 2017 SA report. This version of the report has been updated to provide feedback from the Council's Landscape, Local Green Space & Heritage Impact Study (August 2016) in the site summaries set out in section 5. The heritage assessment followed the methodology presented in Historic England Advice Note 3 'The Historic Environment and Site Allocations in Local Plans' (2015).

Question	Consultee	Response Summary (with response reference)	Action
			The search area was taken as an area of approximately 400m radius from the site boundary to identify designated heritage assets that may be directly or indirectly affected by the proposed allocation. At discretion, assets of high importance beyond this distance were included.
2. Have we correctly identified the main significant effects and potential mitigation measures?	Individual	ISA9: Definitely NOT. Objection to planning approval SMD/2014/0576 for Blythe Park, Cresswell (OC055). Planning officer warned about sustainability issues, flooding and contamination.	Noted
	Individual	ISA15: Objection to CD002 and CD003 on highways grounds.	Noted
	Individual	ISA19: No. Sites LE127, LE128A, LE142A, LE142B are along a small country road popular with pedestrians. Existing traffic levels are dangerous.	Noted. Reflected in assessment against SA Objective 1.
	Individual	ISA23: Looks fine, would prefer Leek employment site to be kept separate.	Noted
	Individual	ISA30: In some cases significant effects have been identified but they have not changed the overall result. In Biddulph, the Phase 1 Habitat Survey identified a number of important wildlife corridors and potential Species Rich Farmland Sites, but non of this information has influenced the consideration of site allocations, or reduced housing numbers on certain sites. I can see no evidence that ecological information provided has been given equal weighting alongside economic impacts in the assessments. The wildlife corridors as a minimum must be protected. In Biddulph, only a tiny proportion of allocated housing numbers are being found within the current town boundary. Where other towns / villages / areas have the space for more development within the town boundary or on brownfield land, this should be pursued first.	SA findings are only part of the evidence base supporting site allocations. The Council is consulting on a strategic green infrastructure network and draft policies in the preferred options Local Plan to protect biodiversity and green infrastructure. The site allocations proposed in July 2017 reflect support for brownfield sites within Biddulph.
	Draycott Parish Council	ISA32: No - expanding Blythe Business Park can only exacerbate many of our local problems with lack of infrastructure and roads. Blythe Business Park is known to be a flood zone. There are potential issues with contamination of the site due to previous occupation and owners.	Noted, site has planning consent
	Individual	ISA34: No! Urban sprawl into the beauty spots of Leek is not the answer! Leek needs protection of its historic nature and especially not to sprawl out towards its defining boundary as it opens towards the National Park - This is Leek's biggest "selling point" for Tourism!	SA of development site options includes consideration of significant effects on heritage assets, landscape character and tourism, including opportunity for mitigation measures.
	Natural England	ISA39: Soils and landscape themes need further attention. Up to date information on local wildlife sites (Sites of Biological Interest and Biodiversity Alert Sites in Staffordshire) should be referenced when carrying out the SA.	Please see response to ISA38. The site appraisal summaries set out in section 5 have been updated to include feedback from the Council's 2017 ecology study that considered the scope for 'local wildlife site' (SBI) designation for (any elements of)

Question	Consultee	Response Summary (with response reference)	Action
			preferred option sites against Staffordshire Wildlife Trust criteria.
	Environment Agency	ISA45: Impacts on water quality need to be assessed, particularly the cumulative impact to ensure the relevant Water Framework Directive (WFD) waterbodies do not deteriorate in status and listed measures in the River Basin Management Plan (RBMP) are taken into account.	
3. Do you wish to make a comment on the appraisal of one or more specific housing target option(s)?	Individual	ISA6: Objection to assessments for RU016 and RU020. Rudyard is a popular tourist destination. This will not be enhanced by building on the greenbelt surrounding the village. These sites will be clearly visible from the approaches to the village, and the popular paths used by tourists, namely the feeder and railway track approaching Rudyard from Leek.	Noted, no action required with respect to appraisal of housing target options.
	Individual	ISA7: Objection to site BB041. Sewer and drainage infrastructure cannot cope with the existing housing. Caverwall Old Road and surrounding roads cannot cope with the existing volume of traffic.	Noted, no action required with respect to appraisal of housing target options.
	Individual	ISA10: 168 houses passed in Cresswell are not included on Site Allocations plan yet they were passed alongside the OC055 employment development.	Noted, no action required with respect to appraisal of housing target options.
	Individual	ISA20: LE140 is part of the High School and adjacent to the last newly built houses, the construction of which has led to increased flooding. The bottom playing field is now very boggy and unusable.	Noted, no action required with respect to appraisal of housing target options.
	Individual	ISA24: None at present.	Noted
	Draycott Parish Council	ISA32: Why did our parish area which originally looked at a possible 12 homes in Draycott change to 168 houses in Cresswell? We know that the Cresswell planning application has now been approved but local opinion and council comments were largely ignored.	Noted. But no action required with respect to appraisal of housing target options.
	Individual	ISA35: LE142a, LE142b, LE140, LE128a and LE127. It is unnecessary to extend the town boundary into farmland as there are still many available brownfield sites locally. There is a much greater need for jobs / employment in the town. The town gateway, especially from the National Park, Buxton Road A53, needs rigorous protection from urban sprawl in order to maintain the 'Queen of The Moorlands' identity. The Mount Road is a popular place for walking, cycling, horse-riding and general enjoyment for health and wellbeing. The Special Landscape Area and environs ought to receive the highest priority in its protection. The designation recognises that it is 'special' in nature and cannot be replaced once lost or damaged.	The appraisal of development site options considers impacts on economic development, landscape character, health and well-being, including opportunities for mitigation. However SA findings are only part of the evidence base supporting site allocations.
	Natural England	ISA40: In the case of the 3 strategic options for Cheadle no clear conclusion appears to have been reached (see answer to Q5 below).	As the Council continues to build its evidence base, the July 2017 SA report includes identification of a preferred approach.

Question	Consultee	Response Summary (with response reference)	Action
4. Do you wish to make a comment on the appraisal of one or more specific site allocation(s)?	Individual	ISA2: Owns a brownfield plot alongside CD017 and CD019, the development of which would enable more houses to be built in this area. Should not develop green belt land before brownfield land.	Site suggestion noted.
	Individual	ISA 4: There should be no building on CD002 and CD003 green belt land before brownfield sites are used. Puts forward an available brownfield plot to complement the usage of CD017.	Site suggestion noted.
	Individual	ISA11: Objection to OC055 expansion of Blythe Park Industrial Estate, Cresswell.	Noted, site has planning consent.
	Individual	ISA16: CD002 and CD003 are Green belt areas, with established trees and minor waterways. Further ecological surveys are required. The appraisal for CD003 and CD015 is exactly the same, other than the number of properties to be developed. It is therefore not clear why this site has not been chosen over CD003 given fewer objections and less deviation from the village boundary.	SA findings are only part of the evidence base supporting site allocations.
	Individual	ISA21: The Mount area should be kept as a beautiful, natural and accessible area for all the townspeople of Leek.	Noted
	Individual	ISA25: With regards to gypsy and traveller sites. Consider small sites spread throughout the district is best. Not one super-site.	Noted, appraisals have been carried out for all site options.
	Draycott Parish Council	ISA32: Objection to OC055 - far too big a development when the current site is not near capacity, plus the road structures are not in place to accept additional transport. Every road leaving Draycott parish area suffers from pinch points with no viable way to change that fact.	Noted; site has planning consent.
	Individual	ISA36: LE142a, LE142b, LE140, LE128a and LE127. There are a number of 'brown' sites within the town which could be very effectively used for housing development. The proposal to build almost 400 houses off the junction of the A53 as it joins Thorncliffe Road and The Mount Road is a major intrusion into public amenity and is unsupported in terms of additional infrastructure required such as roads, sewers, schools etc.	The Council is required to meet its housing needs to 2031; as there are not enough brownfield sites to achieve this, both brownfield and green field site options are being considered. Infrastructure requirements will be addressed by the emerging Local Plan.
	Natural England	ISA41: Please see our response to the Cheadle options (answer to Q5) below.	Noted
5. Do you wish to make a comment on the appraisal of one or more alternative development approaches for Cheadle?	Individual	ISA12: 168 houses in Cresswell not included.	Permissions are included in the housing supply figures.
	Individual	ISA26: With regards to infrastructure. I will leave it to the experts, other than I feel access to road nodes and any associated reduction in the speed limits need to be considered carefully.	Noted
	JMW Planning Limited	ISA28: The south-western option should play a major role in providing the housing that the Council is committed to in the Core Strategy and the owners of sites CH085a-d and CH093 are committed to helping the Council achieve that. These sites are well positioned in relation to existing facilities in the town and for the most part could be reached by a	Please see preferred options Local Plan for details of proposed site allocations and strategy in relation to green belt release. Support for south western development approach for Cheadle noted.

Question	Consultee	Response Summary (with response reference)	Action
		means of transport other than the private motor vehicle. CH093 should come out of the Green Belt given the findings of the Council's study. This is a site that could be developed quickly to provide a mix of housing.	
	Natural England	ISA42: No clear conclusion is presented regarding the 3 broad options presented (Table 5.6 appears to dismiss all 3). We note that certain environmental assets like the Cecilly Brook Local Nature Reserve (LNR) and its population of water voles appear to be under threat irrespective of which option is chosen. The appraisal would benefit from a clearer narrative in terms of how impacts upon this environmental asset have been assessed. This appraisal outcome highlights the value of early and pro-active consideration of the management options for the LNR and the 'master-planning' of new housing and associated development in Cheadle. Scope may exist for a green infrastructure led project that is designed to 'fit' within the wider development of the town.	These recommendations have been included in updated site summaries included in the July 2017 SA report and can be taken forward through the strategic development site policies included in the preferred option Local Plan. A Strategic GI network report has also been prepared to help guide development site policies and inform the SA.
6. Does this Initial SA Report, together with the SA Scoping Report provide sufficient information at this stage to ensure that an appropriate SA can be carried out of the emerging Staffordshire Moorlands Local Plan?	Individual	ISA13: No. Objection to site OC055. Red listed species ignored. Flood risk assessment not appropriate. Grade II listed building (St Mary's church) not considered; issues with road infrastructure and sustainability.	Noted, site has planning consent.
	Individual	ISA17: It is unclear why certain plots are considered as preferable over others. Eg CD003 vs CD015. The document is vague and does not provide detail about ecological surveys. Many negative effects have been identified for CD003 whilst the appraisal for CD015 seems more positive. CD015 also demonstrates infill which is preferable and adjoins another brownfield site which is left undeveloped currently.	SA findings are only part of the evidence base supporting site allocations. Further evidence with respect to ecological surveys is included in the July 2017 SA report.
	Individual	ISA27: Leek Town boundary looks fine.	Noted
	Individual	ISA31: NO - SMDC is missing a key part of the evidence base referenced in the Core Strategy. A Green Infrastructure Strategy is required to ensure that the wildlife corridors within the District are identified and protected as Visual Open Space.	The Council is consulting on a strategic green infrastructure network and associated draft policies in the preferred options Local Plan.
	Draycott Parish Council	ISA32: No it does not. The scope of the Local Plan may be reasonably documented but really would benefit from local input. The council considers that a Local Plan is required for broad planning ideals but SMDC should then consider the needs and observations of Neighbourhood Plans. Local action group and Draycott Parish Council actively opposed the Blythe Park / Cresswell application and yet it still was passed. Now this local area is expected to pick up the problems that will be associated with this awful planning decision. Neighbourhood Planning processes need to be considered with the Scoping Report.	Noted. SMDC is supporting the preparation of Neighbourhood Plans, each of which will consider issues of sustainability.
	Individual	ISA37: Look at brownfield sites for housing.	The Council is required to meet its housing needs to 2031; as there are not enough brownfield sites in Leek to achieve this, both

Question	Consultee	Response Summary (with response reference)	Action
			brownfield and green field site options are being considered.
	Natural England	ISA43: Yes, subject to our comments being considered and acted on.	Noted.

**Table 14.2 Responses received to consultation on Initial SA Report April 2016**

### 14.3 Draft SA Report July 2017

**14.10** A draft SA report was consulted on alongside the Staffordshire Moorlands Preferred Options Local Plan (July 2017) for an eight week period between Monday 31<sup>st</sup> July and Friday 22<sup>nd</sup> September.

**14.11** Consultation arrangements included:

- Direct correspondence with SEA bodies.
- Approximately 5,000 e-mails and 8,000 postcards sent to consultees on the Staffordshire Moorlands consultation database.
- A dedicated web-page on the Staffordshire Moorlands web-site.
- Promotion of the Local Plan consultation and drop in sessions through social media.
- Press notices and releases in local papers.
- Postcards delivered to all residents within SMDC – 48,000 and all Businesses in SMDC – 3,000.
- Site notice at each proposed site allocation within the Local Plan.
- Consultation material available in key public locations.
- Public meetings and drop-in sessions.

**14.12** A total of 65 representations were received from 23 respondents. Summaries of the representations are reproduced here. The full text of representations can be read at the link:

[http://staffsmoorlands-consult.objective.co.uk/portal/local\\_plan/sa\\_report\\_july17](http://staffsmoorlands-consult.objective.co.uk/portal/local_plan/sa_report_july17)

**14.13** Responses received to the July 2017 consultation have been incorporated into the SA report, or have been used to amend the approach taken to the appraisal wherever possible.

Question	Consultee	Response Summary (with response reference)	Action
1. Do you support the overall approach taken to the appraisal of options?	Individual	DSA2: Identify and mitigate any adverse effects on the quality of our countryside by avoiding the building of huge numbers of houses - this element I strongly support.	The Council is required to meet its objectively assessed housing need. There is not enough brownfield land or sites or infill sites in settlements to meet the District's proposed housing requirements so green field sites need to be included. Any new development taking place will be subject to design policies contained within the new Local Plan.

Question	Consultee	Response Summary (with response reference)	Action
	Individual	DSA12: The approach seems fine but some of the conclusions are contentious.	Noted. Conclusions are supported by setting out any assumptions made.
	Individual	DSA17: Yes, all options should be appraised in the light of local and national agendas. However, the objectives and criteria presented as questions to consider in this Appraisal report do not seem to have been adhered to in the proposals of the preferred Options Local report.	The findings of the Sustainability Appraisal report have been used to help inform the preparation of the emerging Local Plan.
	Individual	DSA18: No, the options for Cheadle are too heavily weighted towards the west where there has already been extensive development. The map indicates green space to the west of Team Road which is not open to the public as the areas are school playing fields. The option to protect a small patch of land along Glebe Road is pointless as who would want to use this in the summer apart from walking a dog.	The SA identifies Option 4 as the preferred development approach for Cheadle: north - south clusters with small sites scattered through the town. The illustration of school playing fields as open space on a map does not indicate public access, but shows protection under Core Strategy policy for open space. The Council's evidence base supports the proposed designation of grassland to the north east of Glebe Road as a Local Green Space.
	Individual	DSA28: No. I do not support the approach to the Traveller Sites appraisals.	Noted. See responses to DSA29 and DSA30.
	Individual	DSA41: No. Not enough priority on protecting the Peak Park Gateways to Leek especially A53 Buxton Road approach and area.	In its appraisals, the SA considers the findings of the Council's Landscape, Local Green Space and Heritage Impact Study (August 2016) that has made recommendations concerning potential impact on the setting of the Peak District National Park.
	Individual	DSA36: No. Your plan does Cheadle no favours we have been through this so many times - you do not listen this plan is overkill to the southwest and north east why do we have to keep telling you the same thing?	Residents' views have been sought as part of the consultation. The Council must balance this evidence against all the other evidence relating to sites and reach a decision on whether or not to include them as development sites in the Local Plan.
	Individual	DSA49: I object. The housing allocation should have been divided in smaller groups around the town. 400 houses and 300 hundred houses in two sites is not good planning and puts too much pressure on the two areas of South West and North East in all the town can't cope with another 2500 vehicles we can't cope with what we have got.	Four reasonable alternative development approaches were considered for Cheadle, in line with the strategy set out in the Core Strategy. The SA identifies Option 4 as the preferred approach: north - south clusters with small sites scattered through the town. The Cheadle Town Centre Phase 2 Study (2017) identifies the likely impacts of the housing and employment Preferred Options sites on the surrounding highway network and recommends a package of mitigation measures.

Question	Consultee	Response Summary (with response reference)	Action
	Historic England	DSA53: We welcome the many references to Historic England's previous comments and how the Council has taken these recommendations on board and incorporated the amendments into the SA. We are further supportive of the detailed assessment of the planning policies against the SA objectives. We welcome the inclusion of the maps and how they detail listed buildings and conservation areas as this has been useful in flagging which sites may have a potential impact for heritage and where we do not have any concerns. However, we would request that all heritage assets are plotted to ensure that we have all of the appropriate information. Additionally, it would benefit from highlighting locally designated heritage assets for further information.	Support for addressing Historic England's previous comments and for inclusion of the maps showing designated heritage assets and conservation areas is noted. Whilst we appreciate the value of the District's wealth of non-designated heritage assets for local communities and sense of place, unfortunately the Council does not have the resources to identify all of these on GIS. However the Council currently records two heritage assets on the Local Heritage Register: Pickwood Recreation Ground, Leek and the Holly Bush Inn, Brown Edge and these will be included in the SA of sites where appropriate.
	Staffordshire County Council	DSA58: It is noted that following the previous consultation in July 2016 that the Landscape, Local Green Space & Heritage Impact Study (August 2016) has been completed and the results of this work have been incorporated into the Sustainability Appraisal Report of Preferred Options Local Plan (SAR). SA Objective 13 Built and Cultural Heritage, Landscape and Local Distinctiveness for the preferred options is welcomed and the assessment criteria makes clear that development should ensure the continued protection and enhancement of both designated and non-designated heritage assets and their settings which is welcomed.	Support for SA Objective 13 and the assessment criteria noted.
2. Have we correctly identified the main significant effects and potential mitigation measures?	Individual	DSA1: 5500 public comments in 2015, 8600 in 2016. If the response to these comments is accurate then the methodology is good.	Noted.
	Individual	DSA19: No again for Cheadle there has been no thought of developing land opposite the JCB factory on Leek Road. There has also been no thought of developing any land to the North just over developed land to the West adding to urban sprawl.	The SA report records detail of the appraisal of over forty sites in Cheadle considered to be reasonable alternatives for the location of delivering new homes. The sites comprise a mix of those within and outside the settlement boundary.
	Individual	DSA29: No. You have not placed enough emphasis on the effects traveller sites can have on the community in which they are provided. In particular the effects on vulnerable people. Tax payers money should not be used to provide land and facilities to those who choose to wander the lengths and breadths of this country. They like everyone else should provide all the funds for their own land and facilities.	Under SA Objective 1. (To improve community cohesion and the quality of where people work and live) the appraisal has considered whether a site size and location is sufficient to provide a buffer and screening. National planning policy for travellers sites includes the requirement for local planning authorities to work collaboratively to develop fair and effective strategies to meet need through the identification of land for sites.
	Individual	DSA42: In Leek housing development has been 'dumped' on the eastern edges of THE MOUNT despite the availability of many more suitable sites	The SA has appraised a large number of site options in Leek and findings of the appraisals have

Question	Consultee	Response Summary (with response reference)	Action
		less destructive to the character of Leek as 'Queen of The Moorlands'. Where THE MOUNT is included care should be taken to retain the historic character and to remain below the ridge-line. Care should be taken to avoid destroying the setting of the Town and its relationship with the Peak Park Boundary. Too much priority has been placed on 'greenbelt' despite the fact that many of these alternative sites are not particularly scenic. The Peak National Park acts as a 'greenbelt' protection to the north / north east of Leek and the area between Leek and the Peak Park boundary should continue to be protected. The removal of the title 'Special Landscape Area' by the planning department in NO WAY downgrades the vital role it plays. This is not the side of Leek in which 'Urban Sprawl' should take place!	been used in preparation of the emerging Local Plan. Local Plan Policy DSL2 Land at the Mount, Leek - requires development to provide mitigation measures including those identified in the Council's Landscape, local Green Space and Heritage Impact Study.
	Individual	DSA50: We have been begging you to reconsider building on the east side of Leek Road which is closer to the town centre. A strip of housing could go from the east side of Leek road up to Froghall Road. A road could be built to carry traffic from the North East allowing traffic to go to / from JCB and the Potteries without therefore easing the present problem of Froghall / Leek road junction. I am aware that this area is Green Belt but the Green Belt is strangling Cheadle into making bad planning decisions. Housing in this area would bring a better equal spread town and improve the traffic problems.	Four reasonable alternative development approaches were considered for Cheadle, in line with the strategy set out in the Core Strategy. The SA identifies Option 4 as the preferred approach: north - south clusters with small sites scattered through the town.
3 - Do you wish to make a comment on the appraisal of one or more Local Plan policy option(s)?	Individual	DSA3: Yes take account of Council Tax payers views as well as responding to National and Local guidelines.	Residents' views have been sought as part of the consultation. The Council must balance this evidence against all the other evidence relating to sites and reach a decision on whether or not to include them as development sites in the Local Plan.
	Individual	DSA20: No, the traffic survey has no data over the summer months when there is increased traffic congestion due to people visiting Alton Towers. Also any new school will be built to the north east which would cause further issues of residents having to travel through the town at peak times.	The location of the school is intended to spread provision to the rest of the town. Currently, schools are clustered further to the south which exacerbates traffic problems at peak periods. The Cheadle Town Centre Phase 2 Study (2017) identifies the likely impacts of the housing and employment Preferred Options sites on the surrounding highway network and recommends a package of mitigation measures.
	Individual	DSA43: Site 142b off Thorncliffe Road is outside the Development Boundary and is situated in a prominent position on the Leek A53 North gateway to the Town Centre. The site does not have an access from Thorncliffe Road and it is therefore 'unsustainable' for development. Development would require upgrading of the roads and junction which would be visually and traffic intrusive. The proposed new Town Boundary Line has been 'bent' to accommodate the inclusion of Site 142b . The	Detail of the appraisal of site LE142b is set out in table 12.33 from page 439-443 of the July 2017 SA report. A summary is provided on page 107. Appraisal against the SA Framework has identified a number of potential positive and negative effects as well as issues requiring further investigation. Appraisal of all site

Question	Consultee	Response Summary (with response reference)	Action
		site is a very long-standing local amenity as a 'Livery Yard' within easy access of the town. Loss of this facility would be detrimental to recreational opportunities. The site is also historically an established Caravan Club and would be a significant tourism Loss. There are ecological issues reported on the 142b Site Appraisal. There is a multiple TPO on the site and bats are known to be nesting in the trees. There is a conflict in the approach given to Site Appraisals, Site 142b having been given undue positive comments despite the Appraisal containing few positives. The negative effects of development of site 142b are significantly greater than other available options.	options against the SA Framework is designed to help ensure consistency. The Council must balance this evidence against all the other evidence relating to sites and reach a decision on whether or not to include them as development sites in the Local Plan.
4 - Do you wish to make a comment on the appraisal of one or more housing or employment requirement option(s)?	Individual	DSA4: Yes. Listen to Council Tax payers as well as guidance from central government and SMDC Officers many of whom pay no Council Tax to SMDC.	Residents' views have been sought as part of the consultation. The Council must balance this evidence against all the other evidence relating to sites and reach a decision on whether or not to include them as development sites in the Local Plan.
	Individual	DSA30: No. You have not placed enough emphasis on the effects traveller sites can have on the community in which they are provided. In particular the effects on vulnerable people. Tax payers money should not be used to provide land and facilities to those who choose to wander the lengths and breadths of this country. They should provide all the funds for their own land and facilities.	See response to DSA29.
	Individual	DSA44: Employment is more urgently necessary than housing. Site LE142b off Thorncliffe Road is outside the Development Boundary and is situated in a prominent position on the Leek A53 North gateway to the Town Centre. The site does not have an access from Thorncliffe Road and it is therefore 'unsustainable' for development. Development would require upgrading of the roads and junction which would be visually and traffic intrusive. The proposed new Town Boundary Line has been 'bent' to accommodate the inclusion of LE142b . The site is a very long-standing local amenity as a 'Livery Yard' within easy access of the town. Loss of this facility would be detrimental to recreational opportunities. The site is also historically an established Caravan Club and would be a significant tourism loss. There are ecological issues reported on the 142b Site Appraisal. There is a multiple TPO on the site and bats are known to be nesting in the trees. There is a conflict in the approach given to Site Appraisals, LE142b having been given undue positive comments despite the Appraisal containing few positives. The negative effects of development of site 142b are significantly greater than other available options.	The SA has considered four alternative employment land requirements drawn from a number of potential future scenarios in order to help identify requirements for B-class employment space in the district over the seventeen year period 2014-2031. Also see response to DSA43.
	Individual	DSA51: Site option BE041 - there appear to be inconsistent and unfounded appraisal findings. Assessment against SA Objectives 1, 2, 8, 10, 11, 12, 14, 17 and 18 in Table 12.149 are recorded as negative, neutral or uncertain. The development	The SA considered a number of positive effects were likely to result from taking forward this site option, including from the delivery of new homes and the site's access to

Question	Consultee	Response Summary (with response reference)	Action
		<p>of this greenfield site within the village would make a positive contribution towards community cohesion and neighbourhood quality by the introduction of much needed family homes. Ecology and other studies indicate assessments should be revised. Releasing this site would not impact on agricultural land. The potential economic growth will provide support to a dwindling local economy. It is unreasonable that employment should be expected within 1500m of such areas. Employment opportunities are within acceptable sustainable limits. The summary of overall likely significant effects should also be revised. This site has a high potential to meet all of the SA Objectives and can have a positive effect on the LP. Offers to the Parish to assist with the neighbourhood plan have been met with silence.</p>	<p>open space and its distance away from historic assets. Also its positive effect on the village and its location away from areas of flood risk. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is considered likely to have a negative effect. The Council's Green Belt Review concluded that the site could be considered for release from the Green Belt if exceptional circumstances can be demonstrated.</p>
	Knights LLP	<p>DSA62: There has been no justification as to why 320 dwellings per annum compared to 330 dwellings per annum has been made or assessed within the supporting sustainability appraisal.</p>	<p>The SA is prepared alongside the emerging Local Plan. The report to Council Assembly 8 March 2017 sets out the reasons behind the recommendation that an annual housing requirement of 320 homes per year should be taken forward into the Preferred Options Local Plan. In February 2017, the SA considered four options for an annual requirement of new homes per year (2014 - 2031): Option 1: 235; Option 2: 260; Option 3: 330; Option 4: 450. This follows the appraisal in January 2016 of options as follows: options for number of new homes each year (2016 - 2031): Option 1: 250; Option 2: 320; Option 3: 440; Option 4: 520. However since the preferred annual requirement of 320 homes pa has not been subject to recent appraisal, this will be undertaken to inform the submission version of the plan.</p>
	Harlequin Development Strategies (Crewe) Ltd	<p>DSA64: There has been no justification as to why 320 dwellings per annum compared to 330 dwellings per annum has been made or assessed within the supporting sustainability appraisal.</p>	<p>Please see response to DSA62.</p>
5 - Do you wish to make a comment on the appraisal of one or more proposed development site option(s)?	Individual	<p>DSA5: Yes don't bespoil our beautiful countryside at the expense of building development and check your data re housing requirements for the future.</p>	<p>Please see response to DSA2.</p>
	Individual	<p>DSA11: Sites on Mount Road: LE128, LE140 and LE 066. The proposal to build here is unacceptable as the Mount is an important open space close to the town centre and is a very popular route for walking, jogging and cycling. A head count taken on Sun 8th May 2016 between 0700 and 2000 counted a total of 217 people using the road for recreation. A similar survey on 7th September 2017 showed a total of 163 persons. If the developments proceed then Mount Road would be widened and become a busy estate road and by-pass between</p>	<p>The SA has appraised a large number of site options in Leek and findings of the appraisals have been used in preparation of the emerging Local Plan. Local Plan Policy DSL2 Land at the Mount, Leek - requires development to provide mitigation measures identified in the Council's Landscape, local Green Space and Heritage Impact Study.</p>

Question	Consultee	Response Summary (with response reference)	Action
		the Ashbourne and Buxton Roads. There are more suitable alternative sites on the western side of Leek.	
	Individual	DSA15: SA Objective on CD017 Table 12.155 page 998 item 13 refers to the site being within 400m of 4 grade 11 listed assets. Could you clarify which assets this refers to please?	The assessment of site CD017 notes the proximity of the site to a number of grade II listed assets. These are: Heath House farmhouse; Milepost on Cheadle Road; Cottage approx. 100m north of Felthouse Lane; Lodge to Ascombe Park; Ashcombe Park; Garden walls 50m south west of Ashcombe Park; Tunnel connecting stables and Ashcombe Park; Basin to centre of walled garden at Ashcombe Park.
	Individual	DSA16: Site option EN128, Endon. The following have not been addressed: Will it minimise impacts on existing traffic congestion; support the use of public transport; support safe walking and cycling; protect and improve access to the natural environment and support Green Infrastructure? The Environment Agency commented: The ability of the WFD waterbodies to meet their required status by 2027 could be affected by growth. The ability of the existing sewerage infrastructure and water environment to accommodate the proposed levels of growth should be reflected within this section. Is new development directed towards areas of least flood risk; will it reduce risk of flooding and encourage water efficiency and demand management? (These considerations should be taken into account when planning developments) Source: SMDC Sustainability Report July 2017	The site appraisal for EN128 recorded in Table 12.169 from pages 1056 - 1060 in the SA report July 2017 notes that the site is within 400m of the village centre, 800m of a GP surgery, as well as being adjacent to an area of open space and within 500m of a bus stop, which overall was considered likely to reduce the need to travel by car within the village and facilitate access to the natural environment. As the site is located in flood zone 1 it can be considered that the site would not be subject to risk from flooding. An Infrastructure Delivery Plan is being prepared which will identify the infrastructure necessary to support the Local Plan proposals. Local Plan Policy will require that, wherever possible, development will promote the reduction of flood risk by the use of sustainable drainage techniques, as well as taking opportunities to contribute to wider Council objectives such as its emerging Green infrastructure strategy.
	Individual	DSA21: Again in Cheadle the development plan is weighted towards the west with one of the main employers to the north.	The SA identifies Option 4 as the preferred development approach for Cheadle: north - south clusters with small sites scattered through the town.
	Individual	DSA34: BG008, BG014, BG015. Disagree with the positive assessments. SA Obj. 5: Costs of providing access and services into these sites mitigate against the possibility of any housing being "affordable". Obj. 6 and 7 refer to additional housing leading to less car travel, however since there are no village facilities it is necessary to drive. Whilst sites are within 500m of a bus stop there is a very limited service. Obj. 9: Building over green land would increase flood risk. The provision of sewerage and drainage requirements would be	The appraisal of these sites notes that proposed delivery of new homes is likely to have a significant positive effect, as could the sites' accessibility to areas of existing employment. Similarly, the sites' accessibility to areas of open space is likely to have a positive effect. However, the sites are considered to be inaccessible to services and facilities which is

Question	Consultee	Response Summary (with response reference)	Action
		<p>constrained technically and compromise the profitability of a site. Obj. 10: The assertion that these sites are poorly connected to other bio-diverse sites is incorrect. Obj. 14: Development would have landscape impact. Obj. 16: Bagnall just has a village hall and a pub. Development would not improve facilities. Item 18: Economic: Housing will not have a positive effect on employment but result in the additional residents travelling out of the village by car. Item 14: This is a historic village with many old buildings of great character. A modern estate will have a detrimental effect. Summary conclusions should also be revised. Albeit these sites are not included as preferred options, the SA should be amended to inform any future reconsideration.</p>	<p>likely to have a significant negative effect, as could the sites' proximity to historic assets. The development of greenfield, grade 4 ALC land and the potential ecological value of the sites were considered to have a negative effect. The Council's Green Belt review concluded that BG008 could be considered for release from the Green Belt if exceptional circumstances could be demonstrated. The review did not recommend considering BG014 or BG015 for release from the Green Belt. Bagnall is defined in the Core Strategy as a smaller village. In line with the proposed development approach, no site allocations have been proposed.</p>
	Individual	<p>DSA26: BG008, BG014 and 015: Item 4: More properties represent more opportunity for crime irrespective of design. Item 5: Costs of providing access and services mitigate against provision of "affordable" homes. Items 6 and 7: Bagnall has just a pub and is not accessible to any services, the use of vehicles is an absolute requirement. Item 9: 10 properties on greenfield sites would create a flood risk. Provision of sewerage and drainage requirements would be constrained technically and compromise the profitability of a site. Item 10: The assertion that these sites are poorly connected to other bio-diverse sites is incorrect. Item 14: Development would have landscape impact. Item 16: In Bagnall there are no shops or services beyond basic infrastructure, development would not improve services. Item 18: There are minimal employment opportunities. Summary conclusions should also be amended. Albeit these sites are not preferred options, the SA is incorrect and misleading. TR023 Anzio Camp and TR024 would be better suited to housing than to use as a gypsy and traveller site.</p>	Please see response to DSA34.
	Individual	<p>DSA45: Site LE142b off Thorncliffe Road is outside the Development Boundary and is situated in a prominent position on the Leek A53 North gateway to the Town Centre. Site 142b does NOT have an Access from Thorncliffe Road. It is therefore 'Unsustainable' for development. Development would require major upgrading of the roads and junction. The proposed new Town Boundary line has been peculiarly 'bent' to accommodate the inclusion of 142b. The site is a Livery Yard providing recreation in a sustainable horse-riding location. The site is also historically a Caravan Club and would be a tourism loss. There are also ecological issues including bats and multiple TPOs on the site. Other sites have been excluded on this basis resulting in a conflict in the approach given to Site Appraisals. Site 142b has been given undue positive comments despite the Appraisal containing few positives, the negative effects of development are significantly greater than other available options.</p>	Please see response to DSA43.

Question	Consultee	Response Summary (with response reference)	Action
	Individual	DSA35: BG008, BG014, BG015. Disagree with the positive assessments. SA Obj. 5: Costs of providing access and services into these sites mitigate against the possibility of any housing being "affordable". Obj. 6 and 7 refer to additional housing leading to less car travel, however since there are no village facilities it is necessary to drive. Whilst sites are within 500m of a bus stop there is a very limited service. Obj. 9: Building over green land would increase flood risk. The provision of sewerage and drainage requirements would be constrained technically and compromise the profitability of a site. Obj. 10: The assertion that these sites are poorly connected to other bio-diverse sites is incorrect. Obj. 14: Development would have landscape impact. Obj. 16: Bagnall just has a village hall and a pub. Development would not improve facilities. Item 18: Economic: Housing will not have a positive effect on employment but result in the additional residents travelling out of the village by car. Item 14: This is a historic village with many old buildings of great character. A modern estate will have a detrimental effect. Summary conclusions should also be revised. Albeit these sites are not included as preferred options, the SA should be amended to inform any future reconsideration.	Please see response to DSA34.
	Individual	DSA37: Sites CH085A, CHO85b CHO85C and CHO85D (Cheadle South West) are the only green space sites left you leave this area with only one field in which to walk. The whole of this area is used daily by many walkers.	Policy DSC 3 allocates land for residential development including associated public open space and requires that contributions are sought towards infrastructure, public open space, education, services and other community needs.
	Individual	DSA39: Land on the Mount in Leek should NOT be considered for development of a new school and 300+ houses. SMDC have NOT taken into consideration the amenity value of Mount Road. Sustainability, the environment and consequent quality of life of residents are the priorities. The green fields alongside Mount Road should be made green belt. Why should the town boundary be changed to allow development?	The appraisal framework includes assessment of options against the SA Objective to improve the quality of where people work and live, alongside a range of other social, environmental and economic objectives.
	Individual	DSA40: Why haven't the consultation response actions in this document been carried forward to the S.M. Local Plan? For example: 11.5 Question 4, Action: "Infrastructure requirements will be addressed by the emerging Local Plan". Why haven't the opportunities, referred to this document, been taken in the S.M. Local Plan? For example: 5.3 Appraisal of site options 5.235, 5.234, 5.251, 5.259 "There is an opportunity for contribution to the District's Green Infrastructure Network".	The SA report and Local Plan are prepared alongside one another and findings of the SA are fed into the Local Plan preparation process. Recommendations made in the July 2017 SA report may be reflected in the emerging Local Plan.
	Historic England	DSA54: We support the reference to individual sites within the SA though raise the same point as we have previously with regards to the 400m buffer and the need to ensure that setting is appropriately considered even if it is outside of the 400m buffer. We would recommend that the same detail is	Comments noted. The Heritage Assessment for the proposed site allocations followed the methodology presented in Historic England Advice Note 3 'The Historic Environment and Site

Question	Consultee	Response Summary (with response reference)	Action
		<p>provided for the proposed site allocations as it has been for the planning policies and that any mitigation measures for the historic environment are included within the Plan.</p>	<p>Allocations in Local Plans'. The search area was taken as an area of approximately 400m radius from the site boundary to identify designated heritage assets that may be directly or indirectly affected by the proposed allocation. At discretion, assets of high importance beyond this distance were included. The approach taken for appraisal of site options and preferred option policies was agreed at the SA scoping stage. The nature of predicted effects can be identified in more detail for policies than site options, where a number of effects and mitigation measures are dependent on proposal specific information.</p>
	Individual	<p>DSA56: Site BE032 There are a number of conclusions based on inaccurate or outdated assumptions and my client objects to the overall assessment for this site. Assessment should address not only the original site proposed as BE032 but also the additional 12+ acres of land offered to the Council for community recreational use in the event that permission were to be granted for housing on BE032. This would lead to a positive effect on Obj.1. SO2: the SAR notes that Brown Edge has insufficient services and facilities. Allowing for sustainable growth would help address this. SO5: BE032 (as extended) can accommodate up to 59 dwellings, supporting the positive assessment. SO8: uncertain impact is recorded. Development would include bespoke landscaping. SO 11: Site is greenfield, but not BMV, leading to minor negative impacts. SO13 should have a neutral impact. In the light of pre-application discussions and significant community benefits offered it is surprising that BE032 has been discounted along with all other sites proposed for Brown Edge. This does not comply with NPPF requirements to meet need.</p>	<p>It is considered appropriate for the SA to consider definitive and not contingent site boundaries. The revised assessments suggested in the event of a scheme being approved are noted. It is further noted that the Council's Green Belt review concluded that the site could be considered for release from Green Belt if exceptional circumstances could be demonstrated. The Local Plan proposes 6,080 dwellings for the period 2012-2031 which is expected to meet the projected household increase for the District over this period.</p>
	Staffordshire County Council	<p>DSA59: OC001 (Bolton Copperworks, Froghall) was identified in our July 2016 response as being of particular historic and archaeological sensitivity. Paragraphs 5.1203 and 5.1204 of the SAR summarise the findings of the LLGSHIS and notes that appropriate development can be mitigated through the protection of the Listed Building and Conservation Area. However concerns raised in July 2016 re non-designated heritage assets and archaeological remains are not addressed. Solutions to protect and enhance the non-designated heritage assets and the wider historic landscape character as well as the designated heritage assets should be included. Proposals should be supported by a cultural heritage assessment incorporating all aspects of the historic environment. Other preferred options also did not consider potential impacts on non-designated heritage assets. Within Chapter 12 where impacts to the designated heritage</p>	<p>SA will be updated to reflect continuing concerns raised regarding Bolton Copperworks and future appraisal matrices revised to include reference to Heritage Statements where effects at this stage are uncertain.</p>

Question	Consultee	Response Summary (with response reference)	Action
		resource were identified for each preferred option (SA Objective 13) in general the conclusions tended to suggest that the exact effects at this stage are uncertain. In these instances applicants should be encouraged to undertake a Heritage Statement in support of any application (NPPF, s.128). Where more complex remains or larger developments are being considered, then a full Historic Environment Desk-Based Assessment should be prepared.	
	Individual	DSA31: All the proposed traveller sites in the vicinity of Blythe Bridge are far too close to the village. You have not placed enough emphasis on the effects traveller sites can have on the community in which they are provided. Tax payers money should not be used to provide land and facilities for gypsies and travellers. They should provide all the funds for their own land and facilities.	Please see response to DSA29.
	Knights LLP	DSA61: Respondent objects to the release of part of the Regional Investment Site at Blythe Vale for housing. Policy DSR1 has not been robustly justified by the evidence base or properly assessed against all other reasonable alternatives through an SA.	Noted. This site has been appraised for mixed use development and the findings of the appraisal published in the July 2017 SA. This site is considered to represent a unique opportunity to help meet the District's objectively assessed housing need in line with the principles of the spatial strategy and to reduce the amount of land that will be required to be removed from Green Belt. The Council is not aware of any alternative available sites that are of this scale or status. However an SA will be undertaken of the reasonable alternative development approaches identified by the Council for the rural areas.
	Harlequin Development Strategies (Crewe) Ltd	DSA63: The sustainability appraisal does not assess the release of the Regional Investment Site at Blythe Vale for housing, nor is such a proposal fully considered against all other reasonable alternatives. The NPPF requires a sustainability appraisal to be an integral part of the plan preparation process, and to consider all the likely effects on the environment, economic and social factors (paragraph 165). This has not been undertaken, which is surprising given the proposed very material shift in the direction of this policy, and hence the council is failing in its legal duty, leading to an unsound policy.	Please see response to DSA61.
	Hill Dickinson for Fradley Estates	DSA65: Objection to appraisal of sites WE003 and WE052 at 12.4.3. Also to Fradley Estate's site off Langton Court / Tregaron Court (WE042 and WE043) at 12.8.3. Revised assessment would support the allocation of FE's site in substitution for WE003 and WE052. Map 17.14 contains errors relating to showing the Fradley Estates site within	In undertaking all site option appraisals, assessments were made against the SA Framework and using published definitions of significance to help inform assessments and to help ensure assessments were consistent and transparent. These definitions are

Question	Consultee	Response Summary (with response reference)	Action
		"Important landscape setting to settlement" and should be amended in line with the representations made to the GI Strategy.	set out in Table 3.5 of the SA report and show the rationale under-pinning judgements made on the significance of identified effects. The area identified as "important landscape setting to settlement" is based on the Council's current evidence. If this evidence should be updated, the map will be amended accordingly.
Question 6 - Do you wish to make a comment on the appraisal of alternative development approaches for Cheadle?	Individual	DSA6: Listen to the powerful and informed voice of Cheadle residents.	Noted.
	Individual	DSA22: The option for Cheadle is again weighted towards the west when there have been previous reviews in the past by the Government Inspector who decided that this was not a suitable option, yet the Council have wasted time and tax payers money adding this site again.	Please see response to DSA18.
	Individual	DSA33: It would have been interesting to see an appraisal of the development site policies but in general the owners of the Mobberley Farm Strategic Development Site are supportive of the document. Table 16.9 discussing SS8 relating to Cheadle has been noted. Care needs to be taken to ensure that the development of this site, which will be a logical extension of the town into an area historically allocated for housing, remains viable and is not overburdened with too many development requirements. The essentials are to build dwellings to meet the identified need and to provide a road which will both serve the development and any wider transportation objectives identified by the County Council. There is scope for taking both sites CH093 and CH 128 out of the Green Belt as part of a comprehensive development and that should have been considered more favourably at the very least as an option should housing elsewhere in and around the town fail to materialise.	Support noted. Development site policies have not been appraised at this stage as they represent a re-statement of proposed Local Plan policy as they relate to site specific issues and the plan policies have themselves been subject to appraisal. However the development site policies will be considered as part of the appraisal of overall plan effects at the next stage of SA.
	Individual	DSA38: Many times the areas of CH135b and CH135c have been suggested by Cheadle residents. There is a row of houses protruding into the Greenbelt. The land behind these houses is ideal for building on. We have over the years been told "No building on Green Belt" but this area is closer to the town centre than Cheadle South West. This 'Green Belt' was meant to protect towns and villages but it appears to strangle Cheadle rather than help it.	Noted.
	Staffordshire County Council	DSA60: It is not clear whether the assessment for Cheadle has utilised the results of the LLGSHIS as it is not mentioned in the references beneath each table. A review of each table suggests that only the impacts upon designated heritage assets have been considered. The mitigation measures to protect all elements of the historic environment through local plan policies is welcomed.	The Council's Landscape, Local Green Space and Heritage Impact Study was not available at the time of appraisal of alternative development approaches for Cheadle. Please also see response to DSA53. Support for mitigation measures noted.

Question	Consultee	Response Summary (with response reference)	Action
7 - Do you wish to make a comment on the monitoring proposals, in particular the sustainability effects to be monitored and the information to be collected, including by whom and when?	Individual	DSA7: I note that housing is at the bottom of the list and in its correct place. Sustainability, the environment and consequent quality of life of residents are the priorities.	Comment noted.
	Individual	DSA23: The options for Cheadle are going to cause a large amount of congestion at peak times and any relief road to the west of the town is a white elephant as this will not take any vehicles away from the town. I can only think of one reason for this and that would be so that JCB can put a road in at the back of the factory to prevent their vehicle being slowed down by having to go through the town	Comment noted.
8 Do you wish to make any other comments about this SA Report?	Individual	DSA8: The local population take great pride in the beauty of our landscape. Sybil Ralph has frequently referred to the need to preserve our special landscape for future generations. These sentiments should be the cornerstone of this document.	Comment noted.
	Natural England	DSA13: Natural England has reviewed the Sustainability Appraisal and considers that it follows accepted guidance and methodologies and provides a thorough assessment of the potential environmental impacts of the Plan. We acknowledge that Natural England's interests have been covered throughout the appraisal of alternative development options. We are pleased to note that our comments made at the scoping stage of the SA have been addressed and the changes incorporated into the document.	Support for the methodology used is noted as well as the acknowledgement that a thorough assessment of potential impacts of the Plan is provided and that Natural England's interests have been covered including by reflection of previous comments.
	Individual	DSA27: BG008, BG014 and 015: Item 4: Should be negative as more properties represent more opportunity for crime irrespective of good design. Item 5: High cost of access and services mitigates against providing "affordable" homes. Items 6 and 7: It is incorrect to state that development could reduce the need to travel: Bagnall has no shops or services, so the use of vehicles is an absolute requirement. Item 9: Building 10 properties on each greenfield site would be a flood risk. Additional sewerage and other drainage requirements would be constrained technically and compromise the profitability of a site. Item 10: The assertion that these sites are poorly connected to other bio-diverse sites is incorrect. Item 14: There would be landscape impact Item 16: Bagnall has no shops or services beyond basic infrastructure, development would not improve facilities. Item 18: sites are within 500m of limited employment. Summary Conclusions also need to be revised accordingly. Albeit these sites are not included as preferred options, the SA is incorrect and misleading.	Please see response to DSA34.
	Individual	DSA46: I would echo the comments of others here that 'The local population take great pride in the beauty of our landscape. Sybil Ralph has	Comment noted.

Question	Consultee	Response Summary (with response reference)	Action
		frequently referred to the need to preserve our special landscape for future generations. These sentiments should be the cornerstone of this document.' Greater respect for the views of the local community should be more evident!	
	Historic England	DSA55: Again, we would welcome a meeting with Staffordshire Moorlands Council and the SA could form part of this wider discussion.	Historic England's comments on the SA have formed part of the continuing dialogue between the organisation and the Council.
9 - Does this July 2017 draft SA Report, together with the SA Scoping Report, provide sufficient information at this stage to ensure that an appropriate SA is carried out of the emerging Staffordshire Moorlands Local Plan?	Individual	DSA9: It would be far more effective to reduce this document in size by 80% so that residents would have a fair chance of digesting the information and providing informed responses.	It is recognised that the SA document is large, in particular with a large number of appraisal matrices in the appendices. The final version of the SA will include a non-technical summary.
	Individual	DSA32: In relation to traveller sites the assessment is too glib and very much understates the 'cons' of their provision when related to the 'pros' which are very much over egged.	Please see response to DSA29.
	Individual	DSA47: I echo the other comment that this document is extremely complex and NOT user-friendly!!!	Please see response to DSA9.
	Environment Agency	DSA57: Thank you for consulting the Environment Agency on your Sustainability Appraisal (SA) the above Local Plan. We are the main Agency providing advice on improving resilience and adaptation to the effects of climate change, with particular regard on flood risk, water resources, water quality and aquatic biodiversity. We strive to make a positive contribution through our Statutory Consultee role and we hope you will find our comments useful. We have reviewed Section 5 - Summary of findings - which provides a summary of the main findings of the SA and are satisfied with the content of this section of the SA/SEA. We trust that our comments are useful to you in taking forward the Sustainability Appraisal and Local Plan. Please do not hesitate to contact me should you wish to discuss any aspect of this letter.	Support for Section 5 - summary of findings noted.
10 - Do you wish to make a comment on either or both of the supporting documents: the Habitats Regulations Assessment report of the Staffordshire Moorlands preferred option Local Plan July 2017, or the Equality	Individual	DSA10: The fact that these docs are too cumbersome to be included in the Draft SA report is evidence that the docs are far too wordy and not conducive to genuine public participation. In the same way that this response mechanism is inappropriate for many residents. And emailed or written responses present even greater logistical challenges. Reduce word numbers, use bullet points, keep it simple and residents will participate. Not necessarily immediately because learning in such matters does not take place at the flick of a switch, but eventually. That's if SMDC truly want public participation.	The supporting documents (Habitats Regulations Assessment) and Equality Impact Assessment are stand-alone assessments that have been used to help inform the sustainability appraisal. Comments on the need for plain English noted. The final draft SA will include a non-technical summary.
	Natural England	DSA14: Natural England has reviewed the Habitat Regulations Assessment for Local Plan Preferred Options (July 2017). We note that the	Natural England's acknowledgement of the Habitats Regulations Assessment findings

Question	Consultee	Response Summary (with response reference)	Action
Impact Assessment report of the emerging Local Plan at this stage? Both these reports are available alongside this draft SA Report.		recommendations that it makes concerning the mitigation for potential LSEs have been incorporated within the wording of the plan i.e. into policies SS8 Larger Villages Area Strategy, SS9 Smaller Villages Area Strategy and NE1 Biodiversity and Geological Resources (specifically to avoid adverse effects on European sites from occurring as a result of the proposed allocation site at Waterhouses WA004). We also acknowledge that the assessment concludes at this stage that the Local Plan alone will not result in an adverse effect on the integrity of any of the European sites as a result of any traffic increases. Natural England previously advised that an in-combination effects assessment would be required and we note that this is currently being undertaken and the HRA Report will be updated to accompany the next iteration of the Local Plan.	to date and their incorporation within the text of the emerging Local Plan is noted.
	Individual	DSA24: The land to the west of Cheadle that is listed for potential development is a real community asset. It is used by a large number of residents for recreation. There is also a charity currently carrying out works to the disused railway line so that it can be used as a community asset. The fields and local woods are home to a wide variety of wild life. This development would also increase the amount of surface water going into the local stream which has the potential of causing flooding to Breach Lane and the Tean area which has been flooded in the past.	Policy DSC3 requires development to be subject to comprehensive master planning to include ecological assessment and flood risk assessment, as well as the provision of public open space.
	Individual	DSA41: The Supporting Documents are VOLUMINOUS and NOT Public Friendly and Extremely Difficult to Navigate! No wonder people are NOT ABLE to ENGAGE with this Consultation!	Please see response to DSA9.
	Individual	DSA48: Too Complicated!	Please see response to DSA9.
	Individual	DSA36: No.	Noted.
	Individual	DSA49: No.	Noted.
	Derbyshire County Council	DSA52: It is welcomed that recognition has been given to the fact that the impact of housing alone, and in combination, could potentially have an effect on European sites. Furthermore it is welcomed that this has been investigated and that mitigation measures have been incorporated into the Local Plan policies to prevent harm. There do not appear to be any issues likely to emerge from the Preferred Options which would have any material impacts upon roads in Derbyshire.	Support for the Habitats Regulations Assessment noted.

Question	Consultee	Response Summary (with response reference)	Action
	Individual	<p>DSA25: The land to the west of Cheadle that is listed for potential development is a real community asset. It is used by a large number of residents for recreation. There is also a charity currently carrying out works to the disused railway line so that it can be used as a community asset. The fields and local woods are home to a wide variety of wild life. This development would also increase the amount of surface water going into the local stream which has the potential of causing flooding to Breach Lane and the Tean area which has been flooded in the past.</p>	Please see response to DSA24.

**Table 14.3 Responses received to consultation on Draft SA Report July 2017**

## Appraisal of site options

## 15 Appraisal of site options

**15.1** As set out in the Sustainability Appraisal Scoping Report August 2014, each potential site is assessed against the Council's SA Objectives. The SA Framework is reproduced in section 4 of this report and includes the decision making criteria used in carrying out the appraisal of proposals against each of the SA objectives. The definitions of significance used in the appraisals is set out in table 3.5 (in the appraisal methodology section of this report). The findings of the site appraisals are recorded in a series of tables below, with an appraisal summary.

**15.2** Where the assessment refers to the findings of the HRA Report, this is the 2014 Report of the Core Strategy. A separate HRA of the Local Plan has been commissioned and its findings will be published separately.

**15.3** In some cases it is not considered possible to spatially assess against an objective. Where impact on an objective depends less on the nature or location of a site, and more on the implementation of Local Plan or other policies, a neutral, or "dependent on implementation" assessment is recorded.

**15.4** It should be noted that none of the criteria, or the assessment of the sustainability appraisal against these criteria, necessarily prohibits a site from being allocated or being taken forward as a preferred option.

15.1 Leek

Sites (10+ dwellings) – within the Development Boundary

LE022

SA Objective	Assessment Criteria - Does the site (LE022),...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site is located within the settlement boundary, albeit on the south east edge. The development of greenfield land adjacent to the open countryside has the scope to reduce the quality of Green Infrastructure of the Town. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located on the edge of the settlement boundary and is within 800m of the town centre and the wide range of key services and facilities that could serve prospective residents of the site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, on the edge of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. Similarly, the site is within 1,200m of a GP surgery. It should be noted that the site is in proximity to Leek Moorlands Hospital. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall,</p>	+

SA Objective	Assessment Criteria - Does the site (LE022)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>this site has been assessed as having a positive effect on this Objective.</p> <p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 16 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 800m of the town centre of Leek and a 1,200m from a GP surgery and adjacent to the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (LE022)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise emissions of airborne pollutants?</li> <li>Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Deliver development directed towards areas of least flood risk?</li> <li>Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 1,500m from Brough Park Fields (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of the species poor grassland area but has some fairly biodiverse areas connected by hedgerows to the south and north. Therefore the site is deemed to have low ecological importance. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Help safeguard the best and most versatile agricultural land?</li> <li>Deliver development that helps to minimise the loss of greenfield land?</li> <li>Offer opportunities to reduce land contamination / instability?</li> <li>Deliver development that helps reduce the amount of derelict land?</li> <li>Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However the land has also been assessed as urban ALC land so development of this site could not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site (LE022)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non- assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 50m of two grade II listed assets and 400m of two more grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.	0
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with good access to the town centre of Leek has scope to have a positive effect on the vitality and viability of Leek and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (LE022)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is not within 1,000m to existing areas of employment within the town or District and, as such, could fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 16 dwellings is considered to have a positive effect. The site is also accessible to existing services and facilities which is likely to have a positive effect, as could the site's low ecological importance. However, the development of greenfield land is assessed as having a negative effect, as could the site's proximity to historic assets and the inaccessibility of existing areas of employment.</p>			

**Table 15.1**

<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Make a positive contribution towards community cohesion?</li> <li>Offer opportunity to improve neighbourhood quality?</li> <li>Offer opportunity to provide open space and support Green Infrastructure?</li> <li>Risk unacceptable light and noise pollution?</li> <li>Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	This site is within the existing village boundary of Leek but not within the Draft New Town Boundary for Leek. There is scope, due to the size of this site, that it could enable the enhancement of existing facilities and services within the town and also improve the social and environmental quality of the neighbourhood. Overall, this site has been assessed as having a neutral effect on this Objective.	0
2. To advance equality of opportunity between all persons and eliminate	<ul style="list-style-type: none"> <li>Deliver development that is likely to help remove or minimise any disadvantages suffered by people due</li> </ul>	The site is located on the edge of the settlement boundary and it is within 800m of the town centre and the wide range of key services and	+

SA Objective	Assessment Criteria - Does the site(LE045)...?	Commentary on likely nature of effects of site allocation	Overall assessment
social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	facilities that can be found here that would serve prospective residents of the site. Overall, this site has been assessed as having a positive effect on this Objective.	
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	The location of this site, on the edge of the settlement boundary, should provide residents with good access to the open countryside and adjacent to an area of designated open space and help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 50 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 800m of the town centre of Leek and a GP surgery and adjacent to the open countryside this should reduce the need to travel within the town. However, the site is relatively inaccessible at present, although the sites is linked to a number of other sites which could provide access. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site(LE045)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site borders Brough Park Fields (LNR), a County Site of Biological Interest for its grassland areas. It could be considered that the development of this site could lead to short-term disturbances of this habitat and possibly long term also. This could therefore have an adverse effect on the District's Green infrastructure network. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
11. To safeguard the best and most versatile agricultural land; improve	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> </ul>	As noted, this site has been assessed as being on greenfield land. However the land has also been assessed as grade 4 ALC land so	-

SA Objective	Assessment Criteria - Does the site(LE045)...?	Commentary on likely nature of effects of site allocation	Overall assessment
soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	development of this site could not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is in proximity to one grade II listed assets and within 400m of a further grade II listed asset. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. It should be noted that the site is within 400m of Dieu La Cres Abbey which has been placed on the Heritage at Risk register by Historic England. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.	0
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration	0

<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>although its location adjacent to Brough Park Fields (LNR) could detract from this. Overall, this site has been assessed as having a neutral effect on this Objective.</p> <p>The proposed development of a residential site with good access to the town centre of Leek has scope to have a positive effect on the vitality and viability of Leek and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	<p>The site is within 500m of existing areas of employment within the town or District and, as such, could provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<b>Summary of overall assessment and likely significant effects:</b>			
<p>The proposed delivery of circa 50 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment and services and facilities within the town. However, the site's proximity to a designated asset is likely to have a significant negative effect. The development of greenfield land, grade 4 ALC is assessed as having a negative effect, as could the site's proximity to historic assets.</p>

<p>of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to minimise emissions of airborne pollutants?</li> <li>Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>Deliver development directed towards areas of least flood risk?</li> <li>Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> </ul>	<p>The site is within 500m of Cecilly Brook (LNR), the nearest designated asset. It could be considered that development of this site could possibly have an effect on this site, however these could be limited. The Ecological Study (2015) notes that the site has low biodiversity value overall, is set within an urban environment with little connectivity</p>	0

SA Objective	Assessment Criteria - Does the site(LE061)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>to the wider countryside which lowers the biodiversity of the area considerably, so therefore is considered to have low ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>The site has been assessed as being a brownfield site, similarly it is classified as urban ALC land. As such, the development of this site could avoid the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>The development of this brownfield site could enable the re-use of existing buildings within the town centre. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 50m of four grade II listed assets and within 100m of 20 grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. It should be noted that the site is within 400m of Leek Conservation Area which has been placed on the Heritage at Risk register by Historic England. Overall, the site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> </ul>	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National</p>	+

SA Objective	Assessment Criteria - Does the site(LE061)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site with good access to the town centre of Leek has scope to have a positive effect on the vitality and viability of Leek and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	<p>The site is within 500m of existing areas of employment within the town or District and, as such, could provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<b>Summary of overall assessment and likely significant effects:</b>			

SA Objective	Assessment Criteria - Does the site(LE061)...?	Commentary on likely nature of effects of site allocation	Overall assessment

The site's proximity to existing areas of employment and services and facilities within the town is assessed as having a significant positive effect, as could the development of brownfield, urban ALC land. The proposed delivery of circa 16 houses is considered to have a positive effect. However, the site's proximity to historic assets is assessed as being a negative effect.

**Table 15.5**

**LE063**

SA Objective	Assessment Criteria - Does the site(LE063)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	As the site is located within the town centre of Leek it could be considered that the redevelopment of this mixed greenfield and brownfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	Given the town centre location of this site, it can be considered that the site would be in proximity to a wide range of key services and facilities. It should be noted that the site is in proximity to Leek First School. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> </ul>	The site is within 800m of a GP surgery and could have good access to the open countryside as the site is in proximity to the settlement boundary and the open countryside. It could be considered that the	+

SA Objective	Assessment Criteria - Does the site(LE063)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>development of this site for could have a positive effect on health. It should be noted that the site is in proximity to Leek Moorlands Hospital. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 30 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>The town centre location of this site means that it is within 500m of a number of bus stops as well as a range of other key services and facilities. However, there is scope that the site could increase the need to travel by less sustainable forms of transport, however this is uncertain. Overall, the site has been assessed as having a positive effect on this objective.</p>	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site(LE063)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>		
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site is within 1,000m of Brough Park Fields (LNR), the nearest designated asset. It could be considered that development of this site could possibly have an effect on this site, however these could be limited. The Ecological Study (2015) notes that the site itself has buildings with bat potential, broadleaved woodland, dense scrub and tall ruderal vegetation which are connected to semi-natural broadleaved woodland and running water habitats, which form an important potentially biodiverse mosaic culminating in the site being attributed regional ecological importance. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> </ul>	As noted, this site has been assessed as being on greenfield and brownfield land. However the land has also been assessed as urban ALC land so development of this site could not result in the loss of best and most versatile land. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site(LE063)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>		
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 150m of two grade II listed assets within the town centre of Leek. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. It should be noted that the site is within 400m of Leek Conservation Area which has been placed on the Heritage at Risk register by Historic England. Overall, the site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.	0
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	+

9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	Part of the site is located within flood zone 2 and an area which highlights that communities are at risk from fluvial flooding as noted in the SFRA. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a negative effect on this objective.	-

SA Objective	Assessment Criteria - Does the site(LE064) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 750m from Cecilly Brook (LNR), the nearest designated asset. It could be considered that development of this site could possibly have an effect on this site, however these could be limited. The Ecological Study (2015) notes that the site has fairly low biodiversity overall, with fairly poor connectivity to more biodiverse habitats therefore is attributed low ecological importance. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However the land has also been assessed as urban ALC land so development of this site could not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 400m of three grade II listed assets and a scheduled monument, Brindley's Mill. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?

SA Objective	Assessment Criteria - Does the site(LE064) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site with access to the town centre of Leek has scope to have a positive effect on the vitality and viability of Leek and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	<p>The site is within 500m of existing areas of employment within the town or District and, as such, could provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<b>Summary of overall assessment and likely significant effects:</b>			

SA Objective	Assessment Criteria - Does the site(LE064) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<p>The site's proximity to existing areas of employment is considered to be a significant positive effect. Similarly, the site has good accessibility to services and facilities which is likely to have a positive effect. However, the site is located within flood zone 2 which is assessed as being a negative effect. The development of greenfield land is likely to have a negative effect, as could the site's proximity to historic assets and a Local Nature Reserve.</p>		

**Table 15.7**

**LE070**

SA Objective	Assessment Criteria - Does the site(LE070)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>• Make a positive contribution towards community cohesion?</li> <li>• Offer opportunity to improve neighbourhood quality?</li> <li>• Offer opportunity to provide open space and support Green Infrastructure?</li> <li>• Risk unacceptable light and noise pollution?</li> <li>• Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>As the site is located within the town settlement boundary of Leek it could be considered that the redevelopment of this brownfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>• Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>• Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located toward the edge of town, it is still within 800m of the town centre and the wide range of key services and facilities that can be found here that could serve prospective residents of the site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>• Help improve health or access to health facilities?</li> <li>• Help promote healthy lifestyles?</li> </ul>	<p>The location of this site should provide residents with good access to the nearby open space and countryside which should help to support</p>	+

SA Objective	Assessment Criteria - Does the site(LE070)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>healthy lifestyles. Similarly, the site is within 800m of a GP surgery. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 22 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 800m of the town centre of Leek and a GP surgery and near to the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site(LE070)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 800m away from Brough Park Fields (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall and is deemed to have low ecological importance overall while being set within an urban environment with little connectivity to the wider countryside. The site is attributed distinct ecological importance as there is potential for buildings and a tree to support roosting bats. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>The site has been assessed as being a brownfield site, similarly it is classified as urban ALC land. As such, the development of this site could avoid the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site(LE070)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	The development of this brownfield site could enable the re-use of existing buildings within the town centre. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.	+
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 400m of three grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. <p>landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration although its location near to Brough Park Fields (LNR) could detract from this. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site with access to the town centre of Leek has scope to have a positive effect on the vitality and viability of Leek and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	<p>The site is within 500m of existing areas of employment within the town or District and, as such, could provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p><b>Summary of overall assessment and likely significant effects:</b></p>			

SA Objective	Assessment Criteria - Does the site(LE076)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		The proposed delivery of circa 50 dwellings is considered to have a significant positive effect, as could the site's proximity to services, facilities and existing areas of employment. However, the site's proximity to a designated asset is likely to have a significant negative effect. The development of greenfield land, grade 4 ALC is assessed as being a negative effect, as could the site's proximity to a Local Nature Reserve and the ecological importance of the site.	

**Table 15.9**

**LE091**

SA Objective	Assessment Criteria - Does the site(LE091)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	This site is within the existing village boundary of Leek but not within the Draft New Town Boundary for Leek. There is scope, due to the size of this site, that it could enable the enhancement of existing facilities and services within the town and also improve the social and environmental quality of the neighbourhood. Overall, this site has been assessed as having a neutral effect on this Objective.	0
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	The site is located on the edge of the settlement boundary and is within 800m of the town centre and the wide range of key services and facilities that can be found here that could serve prospective residents of the site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> </ul>	The location of this site, on the edge of the settlement boundary, should provide residents with good access to the open countryside and	+

SA Objective	Assessment Criteria - Does the site(LE091)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>adjacent to an area of open space should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 150 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 800m of the town centre of Leek and a GP surgery and adjacent to the open countryside this should reduce the need to travel within the town. However, the site is relatively inaccessible at present, although access could be provided through other allocated sites. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site(LE091)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>		
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site is within 100m of Brough Park Fields (LNR), the nearest designated asset, and, as such, is considered that development could have an effect on this asset, at least a short term disturbance of this habitat, if not long term. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> </ul>	As noted, this site has been assessed as being on greenfield land. However the land has also been assessed as grade 4 ALC land so development of this site could not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site(LE091)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>		
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 50m of one grade II listed assets and 400m of a further three grade II listed assets and a scheduled monument. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. It should be noted that the site is within 400m of Dieu La Cres Abbey which has been placed on the Heritage at Risk register by Historic England. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.	--/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	<p>The site is within 500m of existing areas of employment within the town or District and, as such, could provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p><b>Summary of overall assessment and likely significant effects:</b></p>			

SA Objective	Assessment Criteria - Does the site(LE106)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		The site's proximity to services, facilities and existing areas of employment is assessed as a significant positive effect. However, the development of greenfield land, grade 4 ALC is assessed as being a negative effect. As could the site's proximity to historic assets and a Local Nature Reserve.	

**Table 15.11**

**LE147**

SA Objective	Assessment Criteria - Does the site(LE147)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>This site is within the settlement boundary of Leek, albeit on the edge. There is scope, due to the size of this site, that it could enable the enhancement of existing facilities and services within the town and also improve the social and environmental quality of the neighbourhood. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located on the edge of the settlement boundary and is within 800m of the town centre and the wide range of key services and facilities that can be found here that could serve prospective residents of the site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> </ul>	<p>The location of this site, on the edge of the settlement boundary, should provide residents with good access to the open countryside and adjacent to an area of open space should help to support healthy</p>	+

SA Objective	Assessment Criteria - Does the site(LE147)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>lifestyles. Similarly, the site is within 800m of a GP surgery. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 25 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 800m of the town centre of Leek and a GP surgery and adjacent to the open countryside this should reduce the need to travel within the town. However, the site has limited access to the transport network at present. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site(LE147)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 1,000m from Brough Park Fields (LNR), the nearest designated asset, and, as such, is considered that development could have no effect on this asset. The Ecological Study (2015) notes that the site is very significantly and completely within Ladydale SBI. It has potential protected species present due to the intricate habitat mosaic present on the site and it is well connected to more biodiverse habitats and the wider countryside. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	--/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>The site has been assessed as being a greenfield site. However, the land has also been assessed as grade 4 ALC land so development of this site could note result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site(LE147)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, the site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 100m of three grade II listed assets, including the Lady O'Th'Dale on the southern edge of the site. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. It should be noted that the site is within 400m of Leek Conservation Area which has been placed on the Heritage at Risk register by Historic England. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration although its location adjacent to the open countryside could detract from this. Overall, this site has been assessed as having a neutral effect on this Objective.	0
<b>ECONOMIC</b>			

SA Objective	Assessment Criteria - Does the site(LE147)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with access to the town centre of Leek has scope to have a positive effect on the vitality and viability of Leek and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District and, as such, could provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 25 dwellings is considered to have a significant positive effect, as could the site's proximity existing areas of employment. Similarly, the site is accessible to services and facilities which is likely to have a positive effect. However, the site's proximity to designated and historic assets is likely to have a significant negative effect. Similarly, the development of greenfield land, grade 4 ALC is assessed as being a negative effect.</p>

<p><b>Summary of overall assessment and likely significant effects:</b></p>			

SA Objective	Assessment Criteria - Does the site(LE243)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		The proposed delivery of circa 70 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment. Similarly, the site has good accessibility to services and facilities which is likely to have a positive effect, as could the development of urban ALC brownfield land. However, the site's proximity to historic assets could have a negative effect. The site's proximity to a Local Nature Reserve is also assessed as being a negative effect.	

**Table 15.13**

**LE249**

SA Objective	Assessment Criteria - Does the site(LE249)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	As the site is located within the town settlement boundary of Leek it could be considered that the redevelopment of this brownfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	The site is located on the edge of the settlement boundary and is more than 2,000m away from the town centre which could result in existing services and facilities being inaccessible and the needs of prospective residents not being addressed. Overall, this site has been assessed as having a negative effect on this Objective.	-
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> </ul>	The location of this site, on the edge of the settlement boundary, should provide residents with good access to the open countryside and help	0

SA Objective	Assessment Criteria - Does the site(LE249)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Help to reduce health inequalities?</li> <li>Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>to support healthy lifestyles. However, the site is in excess of 1,200m of a GP surgery. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Deliver development that reduces actual levels of crime?</li> <li>Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 35 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is further than 2,000m of the town centre of Leek, which could be expected to increase the need to travel within the town. However, it is adjacent to the open countryside. Similarly, the site is near to the A523 which has a number of bus stops and services serving it. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Similarly, the site is more than 2,000m of the town centre and could increase the need to travel. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site(LE249)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>Part of the site is located within flood zone 3 and an area which highlights that communities are at risk from fluvial flooding as noted in the SFRA. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant negative effect on this objective.</p>	--
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site borders Ladderedge Country Park (LNR), an area of unimproved grassland meadows which supports a variety of habitats and vegetation communities. It could be considered that development of this site could lead to short-term disturbances of this habitat and possibly long term also. This could therefore have an adverse effect on the District's Green Infrastructure network. The Ecological Study (2015) notes that the site has very low biodiversity value overall, however as the site is adjacent to Ladderedge Country Park the site's edge habitats and hence the site as a whole are considered to have some ecological importance. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on brownfield land. However the land has also been assessed as grade 4 ALC land so development of this site could not result in the loss of best and most versatile land. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site(LE249)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>The development of this brownfield site could enable the re-use of existing buildings within the town centre. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is close to, if not bordering, a grade II listed asset. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of this historical heritage assets and its setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	--/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration although its location adjacent to Ladderedge Country Park (LNR) could detract from this. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ECONOMIC</b>			

SA Objective	Assessment Criteria - Does the site(LE249)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Leek and the wider District, however the Leek town centre is not easily accessible from the site which may reduce the effect on this objective. Overall, this has been assessed as having a neutral effect on this Objective.	0
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District, notably Barnfields Industrial Park, and, as such, could provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<b>Summary of overall assessment and likely significant effects:</b>			
The proposed delivery of circa 35 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment. However, the site is partially within flood zone 3 which is likely to have a significant negative effect, as could its proximity to historic assets. Similarly, the proximity a Local Nature Reserve is assessed as being negative effects, as could the inaccessibility of services and facilities.

LE073

SA Objective	Assessment Criteria - Does the site(LE073)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>As the site is located within the town centre of Leek it could be considered that the redevelopment of this brownfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>Given the town centre location of this site, it can be considered that the site would be in proximity to a wide range of key services and facilities. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The site is within 800m of a GP surgery and a number of areas of open space within the town. The development of this site for employment purposes should also have a positive effect on health. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site(LE073)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	This site has been proposed for employment uses with regards to this assessment. Therefore the development would provide no housing. Overall, this site has been assessed as having a neutral effect on this Objective.	0
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 800m of the town centre of Leek and a GP surgery and adjacent to the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	1/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The	+

**LE014 & LE015**

SA Objective	Assessment Criteria - Does the site(LE014 & LE015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Make a positive contribution towards community cohesion?</li> <li>Offer opportunity to improve neighbourhood quality?</li> <li>Offer opportunity to provide open space and support Green Infrastructure?</li> <li>Risk unacceptable light and noise pollution?</li> <li>Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	It can be considered that this site may have a positive effect on the District's GI network given the adjacent area of Open Space and the mixed brownfield and greenfield nature of the site at present. Overall, the site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social	<ul style="list-style-type: none"> <li>Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender</li> </ul>	The site could be in proximity to a number of key facilities and services located within Leek town centre which could provide for any prospective residents. Similar, the mixed use nature of the site may also provide	++

SA Objective	Assessment Criteria - Does the site(LE014 & LE015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>new services and facilities on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>Help improve health or access to health facilities?</li> <li>Help promote healthy lifestyles?</li> <li>Help to reduce health inequalities?</li> <li>Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The site is within 1,200m of a GP Surgery and adjacent to an area of open space. This should support healthy lifestyles and well-being for residents and support recreational activity and access to such facilities. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>Deliver development that reduces actual levels of crime?</li> <li>Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 30 dwellings, and therefore also provide a quantum of affordable housing on site. It is acknowledged that the site is proposed as mixed use which may reduce the quantum of housing delivered by this site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 800m of the town centre of Leek, within 1,200m of a GP surgery and adjacent to an area of open space this should reduce the need to travel within the town. Similarly, the site is located off of Newcastle Road which has a number of bus stops and services. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			

SA Objective	Assessment Criteria - Does the site(LE014 & LE015)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. <p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 750m away from Brough Park Fields (LNR) and, as such, is considered to have no effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall, though as there is 1 building present on site that could potentially support roosting bats the site is afforded ecological importance. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being both brownfield and greenfield land. As such, the effect of development of this site against this objective would be mixed. Overall, the site has been assessed as having a neutral effect on this objective.</p>	0
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of a brownfield and greenfield site could have a mixed effect on this objective due to the loss of existing buildings but also the scope for use of sustainable materials. Overall, this objective has been assessed as having a neutral effect on this Objective.</p>	0

SA Objective	Assessment Criteria - Does the site(LE067)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 400m of one grade II* listed asset and seven grade II listed assets. It is considered that the development of this site could affect the setting of these assets. It should be noted that the site is within 400m of Leek Conservation Area which has been placed on the Heritage at Risk register by Historic England. Overall, this site has been assessed as having a negative effect on this Objective with scope, however the exact effects are uncertain.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact upon the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>Given the proposed employment use of this site and its location, there is scope that the site could support opportunities for investment in culture and tourism and should have a positive effect on the local economy. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of an employment site within the town centre has the scope to have a positive effect on the vitality and viability of Leek and the wider District, as new employment could be expected to increase footfall in the nearby town centre. Overall, this site has been assessed as having a significant positive effect on this objective.</p>	++
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Leek as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site(LE067)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District and, as such, could provide sufficient accessible employment opportunities for prospective residents as well as new employment provision on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<b>Summary of overall assessment and likely significant effects:</b>			

Table 15.18

**LE080, LE085, LE086 & LE252**

SA Objective	Assessment Criteria - Does the site(LE080, LE085, LE086 & LE252)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Make a positive contribution towards community cohesion?</li> <li>Offer opportunity to improve neighbourhood quality?</li> <li>Offer opportunity to provide open space and support Green Infrastructure?</li> <li>Risk unacceptable light and noise pollution?</li> <li>Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	As the site is located within the town centre of Leek it could be considered that the redevelopment of this brownfield and greenfield site could help to improve the social and environmental quality of the town centre, especially given the mixed use nature of proposed development. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social	<ul style="list-style-type: none"> <li>Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender</li> </ul>	Given the town centre location of this site, it can be considered that the site would be in proximity to a wide range of key services and facilities. It should be noted that the site is in proximity to Leek First	++

SA Objective	Assessment Criteria - Does the site(LE080, LE085, LE086 & LE252)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>School. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The site is within 800m of a GP surgery, however there is limited access to nearby areas of open space within the town. The development of this site for both employment and residential purposes should also have a positive effect on health. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 25 dwellings and could not contribute to the housing need of the District. It is acknowledged that the site is proposed as mixed use which may reduce the quantum of housing delivered by this site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>The town centre location of this site means that it is within 500m of a number of bus stops as well as a range of other services and facilities. As noted previously, it does have good access to a wide range of services and facilities within the town centre. Overall, the site has been assessed as having a positive effect on this objective.</p>	+

SA Objective	Assessment Criteria - Does the site(LE080, LE085, LE086 & LE252)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 500m away from Brough Park Fields (LNR) and, as such, is considered to have no effect on this asset. The redevelopment of the brownfield aspect of site could be expected to have an effect on biodiversity in the short term, however there could be no long term effects. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall with the main interest focused on the potential for the 6 buildings to support roosting bats, therefore the site is given ecological importance. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed</p>	-/?

SA Objective	Assessment Criteria - Does the site(LE080, LE085, LE086 & LE252)...?	Commentary on likely nature of effects of site allocation	Overall assessment
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>as having a negative effect on this Objective, however the exact effects are uncertain.</p> <p>As noted, this site has been assessed as being both brownfield and greenfield land, similarly it is urban ALC. As such, the effect of development of this site against this objective would be mixed. Overall, the site has been assessed as having a neutral effect on this objective.</p>	0
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of a brownfield and greenfield site could have a mixed effect on this objective due to the loss of existing buildings but also the scope for use of sustainable materials. Overall, this objective has been assessed as having a neutral effect on this Objective.</p>	0
13. Although dependent on specific proposal information, there is scope that development of this site could lead to the deterioration of cultural and historic heritage assets and their settings. It should be noted that the site is within 400m of Leek Conservation Area which has been placed on the Heritage at Risk register by Historic England. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact upon the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site(LE080, LE085, LE086 & LE252)...?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	Given the proposed employment use of this site and its location, there is scope that the site could support opportunities for investment in culture and tourism and should have a positive effect on the local economy. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of an employment site within the town centre has the scope to have a positive effect on the vitality and viability of Leek and the wider District, as new employment could be expected to increase footfall in the nearby town centre. Overall, this site has been assessed as having a significant positive effect on this objective.	++
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Leek as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.	++
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District and, as such, could provide sufficient accessible employment opportunities for prospective residents as well as new employment provision on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<b>Summary of overall assessment and likely significant effects:</b>			
The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the accessibility of other services and facilities is likely to have a significant positive effect, as could the proposed delivery of circa 25 dwellings. However, the site includes two listed buildings which is likely to have a significant negative effect. The proximity of the site to a Local Nature Reserve which is likely to have a negative effect.

Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>

SA Objective	Assessment Criteria - Does the site(LE116)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 400m of three scheduled ancient monuments, one grade I listed asset, one grade II* listed asset and seventy seven grade II listed assets. It is considered that the development of this site could affect the setting of these assets. It should be noted that the site is within 400m of Leek Conservation Area which has been placed on the Heritage at Risk register by Historic England. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact upon the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>Given the proposed employment use of this site and its location, there is scope that the site could support opportunities for investment in culture and tourism and should have a positive effect on the local economy. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of an employment site within the town centre has the scope to have a positive effect on the vitality and viability of Leek and the wider District, as new employment could be expected to increase footfall in the nearby town centre. Overall, this site has been assessed as having a significant positive effect on this objective.</p>	<p>++</p>
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Leek as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.</p>	<p>++</p>

SA Objective	Assessment Criteria - Does the site(LE116)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District, notably Barnfields Industrial Estate, and, as such, could provide sufficient accessible employment opportunities for prospective residents as well as new employment provision on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the accessibility of other services and facilities is likely to have a significant positive effect, as could the proposed delivery of circa 21 dwellings and development of brownfield, urban ALC land. However, the site is in proximity to historic assets and a Local Nature Reserve which is likely to have a negative effect, as could the ecological value of the site.</p>			

**Table 15.20**

**LE150**

SA Objective	Assessment Criteria - Does the site(LE150)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Make a positive contribution towards community cohesion?</li> <li>Offer opportunity to improve neighbourhood quality?</li> <li>Offer opportunity to provide open space and support Green Infrastructure?</li> <li>Risk unacceptable light and noise pollution?</li> <li>Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The site is located on the edge of the town boundary in the southern side of Leek along the A520. It is considered that given the size of the site, there is scope that, through developer contributions, development of the site could lead to an enhancement of existing, and possibly new, facilities and services. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all	<ul style="list-style-type: none"> <li>Deliver development that is likely to help remove or minimise any disadvantages suffered by</li> </ul>	The out of town location of this site means that the key services and facilities could be more than 800m away from the site. However, there	+

SA Objective	Assessment Criteria - Does the site(LE150)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<p>people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</p> <ul style="list-style-type: none"> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>is scope that, due to the size of The site, some services and facilities may be provided on site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The site is within 1,200m of a GP surgery has good access to open space and is adjacent to woodland and the open countryside. This is expected to support healthy lifestyles within the District and especially for those residents and workers on the site. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 120 dwellings, and therefore also provide a quantum of affordable housing on site. It is acknowledged that the site is proposed as mixed use which may reduce the quantum of housing delivered by this site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p>++</p>
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>The out of town centre location of this site means that access to sustainable forms of transport are limited, however there are bus stops nearby on the A520. The site is in proximity to a public right of way to the east of the site which should encourage walking and cycling within the District by workers and residents of the site. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>

SA Objective	Assessment Criteria - Does the site(LE150)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 1,250m from Ladderedge County Park (LNR) and, as such, is considered to have no effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of area but has had badger field signs recorded in one area, and is adjacent to a large area of semi-natural broadleaved woodland, Ladydale SBI and rough grassland to the south. Therefore the site is given ecological value as the site abuts Ladydale SBI / Ballington Wood. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?

SA Objective	Assessment Criteria - Does the site(LE150)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>The site could result in the loss of greenfield land through development of the site. Similarly, the land is classified as grade 3 ALC land so it could result in the loss of the best and most versatile agricultural land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>Whilst this site could not result in the re-use of existing buildings, there is scope that development could use sustainable materials but also increase demand for local resources. Overall, this site has been assessed as having a neutral effect upon this Objective.</p>	<p>0</p>
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 400m of five grade II listed assets. Development of the site has the scope to lead to the deterioration of these assets, although this is uncertain until proposal specific information is available. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, the greenfield nature of the site and how it borders natural woodland and open country side on its west side, there is scope that development of this site could have an adverse effect on landscape character. Proposal specific information is required to assess the impact upon the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>

SA Objective	Assessment Criteria - Does the site(LE150)...?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	Given the proposed employment use of this site and its location, there is scope that the site could support opportunities for investment in culture and tourism and should have a positive effect on the local economy. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The scale of development proposed by this site, circa 120 dwellings on a mixed use site, has the scope to significantly enhance the vitality and viability of the District's towns, notably Leek. This should also help to safeguard and improve shops and services. Overall, this site has been assessed as having a significant positive effect upon this Objective.	++
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	As noted previously, given the scale of this site the scale of economic development through construction and also employment uses thereafter have the scope to encourage investment in businesses, people and infrastructure (through developer contributions) which could be expected to have a significant positive impact upon the local economy. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District and, as such, could provide sufficient accessible employment opportunities for prospective residents as well as new employment provision on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<b>Summary of overall assessment and likely significant effects:</b>			
The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the proposed delivery of circa 120 is likely to have a significant positive effect. However, the development of greenfield, grade 3 ALC land is likely to have a significant negative effect. The site's proximity to historic assets and ecological value is likely to have a significant negative effect.			

**Table 15.21**

LE219

SA Objective	Assessment Criteria - Does the site(LE219)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>As the site is located on the edge of the town centre of Leek it could be considered that the redevelopment of this mixed brownfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>Given the edge of town centre location of this site, it can be considered that the site would be in relatively proximity to a wide range of key services and facilities. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The site is within 800m of a GP surgery and a number of areas of open space within the town. The mixed use development of this should also have a positive effect on health, as would the nearby open space area to the east of the site. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>Given the proposed employment use of this site and its location, there is scope that the site could support opportunities for investment in culture and tourism and should have a positive effect on the local economy. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of an employment site within the town centre has the scope to have a positive effect on the vitality and viability of Leek and the wider District, as new employment could be expected to increase footfall in the nearby town centre. Overall, this site has been assessed as having a significant positive effect on this objective.</p>	++
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Leek as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site(LE219)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District and, as such, could provide sufficient accessible employment opportunities for prospective residents as well as new employment provision on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the development of brownfield, urban ALC land is likely to have a significant positive effect. However, the site's proximity to historic assets and some ecological importance is likely to have a negative effect.</p>			

**Table 15.22**

**LE220**

SA Objective	Assessment Criteria - Does the site(LE220)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Make a positive contribution towards community cohesion?</li> <li>Offer opportunity to improve neighbourhood quality?</li> <li>Offer opportunity to provide open space and support Green Infrastructure?</li> <li>Risk unacceptable light and noise pollution?</li> <li>Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	As the site is located on the edge of the town centre of Leek it could be considered that the redevelopment of this brownfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social	<ul style="list-style-type: none"> <li>Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership,</li> </ul>	Given the edge of town centre location of this site, the site would be in relatively proximity to a wide range of key services and facilities. Overall, this site has been assessed as having a significant positive effect on this Objective.	++

SA Objective	Assessment Criteria - Does the site(LE220)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>		
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The site is within 800m of a GP surgery, however there is limited access to nearby areas of open space within the town. The development of this site for both employment and residential purposes should also have a positive effect on health. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 10 dwellings and could not significantly contribute to housing need in the District. It is acknowledged that the site is proposed as mixed use which may reduce the quantum of housing delivered by this site. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>The town centre location of this site means that it is within 500m of a number of bus stops as well as a range of other services and facilities. As noted previously, it does have good access to a wide range of services and facilities within the town centre. Overall, the site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<b>ENVIRONMENTAL</b>			

SA Objective	Assessment Criteria - Does the site(LE220)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p>++</p>
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	<p>!/?</p>
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is within 500m Brough Park Fields (LNR) and, as such, there is scope that this site could have an effect upon its setting, albeit limited. The Ecological Study (2015) notes that the site has very low biodiversity value overall with extremely poor connectivity to the wider countryside and is set within an urban environment with no vegetative habitats present on site. The site is however afforded ecological importance due to potential for the building to support roosting bats. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>11. To safeguard the best and most versatile agricultural</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> </ul>	<p>The site has been assessed as being a brownfield site, similarly it is classified as urban ALC land. As such, the development of this site</p>	<p>++</p>

SA Objective	Assessment Criteria - Does the site(LE220)...?	Commentary on likely nature of effects of site allocation	Overall assessment
land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>could avoid the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>The development of this brownfield site could enable the re-use of existing buildings within the town centre. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 50m of two grade II listed assets and within 400m of four scheduled ancient monuments. The site is in proximity to a number of listed buildings including one grade II* listed building and fifty four grade II listed buildings. The Big Mill and the Front Boundary Wall of The Big. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the historical heritage assets and its setting. It should be noted that the site is within 400m of Leek Conservation Area which has been placed on the Heritage at Risk register by Historic England. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	--/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact upon the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site(LE220)...?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	Given the proposed employment use of this site and its location, there is scope that the site could support opportunities for investment in culture and tourism and should have a positive effect on the local economy. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of an employment site within the town centre has the scope to have a positive effect on the vitality and viability of Leek and the wider District, as new employment could be expected to increase footfall in the nearby town centre. Overall, this site has been assessed as having a significant positive effect on this objective.	++
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Leek as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.	++
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District and, as such, could provide sufficient accessible employment opportunities for prospective residents as well as new employment provision on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<b>Summary of overall assessment and likely significant effects:</b>			
The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site has good accessibility to services and facilities and the development of brownfield, urban ALC land is likely to have a significant positive effect. However, the site's proximity to historic assets is likely to have a significant negative effect. The site's proximity to ecological importance is likely to have a negative effect.

	<ul style="list-style-type: none"> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	<p>employment provision on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the proposed delivery of circa 244 dwellings is considered to have a significant positive effect. The site's accessibility to services, facilities and open space is likely to have a positive effect. However, the site's partial location within a flood zone is likely to have a significant negative effect, as could its proximity to designated and historic assets.</p>			

**Table 15.24**

15.1.2 Sites outside current development boundary

LE066

SA Objective	Assessment Criteria - Does the site(LE066)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site is outside of the settlement boundary of Leek and separate from the town of Leek when considered independently, however other there could be linkages through other allocated sites. The development of this site, a mixed brownfield and greenfield site that is set within the open countryside could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>As noted, the site is outside of the settlement boundary of Leek and is remote from the town. The site would be within 800m of a wide range of services and facilities but not within 400m of the town centre of Leek. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, outside the edge of the settlement boundary, should provide residents with good access to the open countryside and adjacent to an area of open space which should help to support healthy lifestyles. Similarly, the site is within 1,200m of a GP surgery. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through,</p>	+

SA Objective	Assessment Criteria - Does the site(LE066)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p> <p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 50 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 800m of the town centre of Leek and 1,200m of a GP surgery and within the open countryside which should reduce the need to travel within the town as the site is within 500m of a bus stop. However, the site has limited access to the transport network at present. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	1/?

SA Objective	Assessment Criteria - Does the site(LE066)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is more than 1,250m from Brough Park Fields (LNR), the nearest designated asset, and, as such, is considered that development could have no effect on this asset. The Ecological Study (2015) notes that the site consists mainly of common habitats, mixed planted woodland, buildings, amenity grassland and associated gardens, allotments and amenity grassland and the site is fairly isolated with little connectivity to the wider countryside, apart from being located 20m away from LE140. The woodland and habitat mosaic as well as the buildings that could potentially support roosting bats and therefore the whole site has been attributed some ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on mixed greenfield and greenfield land. However the land has also been assessed as grade 4 ALC land so development of this site could not result in the loss of best and most versatile land. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> </ul>	<p>The development of this mixed greenfield and brownfield site could enable the re-use of existing buildings within the town centre.</p>	<p>+</p>

SA Objective	Assessment Criteria - Does the site(LE066)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Offer opportunities to maximise the re-use of existing buildings?</li> <li>Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and undesignated assets) along with their settings?</li> <li>Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is more than 400m from a listed asset, the nearest asset is circa 450m away from the site to the north west. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of heritage assets. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration although its location adjacent to the open countryside could detract from this. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site with access to the town centre of Leek has scope to have a positive effect on the vitality and viability of Leek and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site(LE066)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is over 1,000m to existing areas of employment within the town or District and, as such, could fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site is located away from designated heritage assets and has good accessibility to services and facilities which is likely to have a positive effect. However, the ecological value of the site is likely to have a negative effect as well as the inaccessibility of existing areas of employment.</p>

Overall, this site has been assessed as having a neutral effect on this Objective.</p>	
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, on the border of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. However, the site is in excess of 1,200m of a GP surgery. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 20 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p>++</p>
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is further than 1,200m of the town centre of Leek, which could be expected to increase the need to travel within the town. However, it is adjacent to the open countryside. Similarly, the site is near to the A523 which has a number of bus stops and services serving it. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>

SA Objective	Assessment Criteria - Does the site(LE102)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Similarly, the site is more than 1,200m of the town centre and could increase the need to travel. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. However, the SFRA indicates that it is in an area which suggests communities may be at risk from fluvial flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is more than 750m from Brough Park Fields (LNR), the nearest designated asset, and, as such, is considered that development could have no effect on this asset. The Ecological Study (2015) notes that the site itself has mostly low biodiversity value overall in terms of area as it consists solely of species poor improved grassland with adjacent semi-natural broadleaved woodland. The site is considered to have ecological importance due to the presence of tree with bat roosting potential and the adjacent broadleaved woodland. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?

SA Objective	Assessment Criteria - Does the site(LE102)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. Similarly, the land has also been assessed as grade 3 ALC land, so development of this site could result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and undesignated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is adjacent to one grade II listed asset. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of this historical heritage asset and its setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>

SA Objective	Assessment Criteria - Does the site(LE102)...?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration although its location adjacent to the open countryside could detract from this. Overall, this site has been assessed as having a neutral effect on this Objective.	0
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Leek and the wider District, however the Leek town centre is not easily accessible from the site which may reduce the effect on this objective. Overall, this has been assessed as having a neutral effect on this Objective.	0
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is over 1,000m to existing areas of employment within the town or District and, as such, could fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. However, the development of greenfield, grade 3 ALC land could have a significant negative effect, as could the site's proximity to historic assets. Similarly, the site is relatively inaccessible to services, facilities and areas of existing employment, has some ecological value which is likely to have a negative effect.</p>

<p>land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>development of this site could not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and undesignated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 400m of five grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural</p>	<p>0</p>

SA Objective	Assessment Criteria - Does the site (LE127)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		regeneration although its location adjacent to the open countryside could detract from this. Overall, this site has been assessed as having a neutral effect on this Objective.	
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with access to the town centre of Leek has scope to have a positive effect on the vitality and viability of Leek and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is over 1,000m to existing areas of employment within the town or District and, as such, could fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
<b>Summary of overall assessment and likely significant effects:</b>			
The proposed delivery of circa 100 dwellings is considered to have a significant positive effect. Similarly, the site has low ecological value and has good accessibility to services and facilities which is likely to have a positive effect. However, the development of mixed greenfield and brownfield, grade 4 ALC land and the proximity of the site to historic assets is likely to have a negative effect as well as the inaccessibility of existing areas of employment.

Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site is more than 1,000m from Brough Park Fields (LNR), the nearest designated asset, and, as such, is considered that development could have no effect on this asset. The Ecological Study (2015) notes that the site itself has mostly low biodiversity value overall in terms of area as it consists solely of species poor improved grassland with one species poor hedgerow. Therefore the site has been deemed to have low ecological importance. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> </ul>	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site could not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (LE140)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>		
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and undesignated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 400m of three grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.	0
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider District. Similarly, the increased population of both the town and the District may have a positive effect also. The site is located within the Churnet Valley Area as an area of sustainable tourism and rural regeneration although its location adjacent to the open countryside could detract from this. Overall, the site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (LE140)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with access to the town centre of Leek has scope to have a positive effect on the vitality and viability of Leek and the wider District, as new residents could be expected to increase football. Overall, this site has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, the site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 1,000m of existing areas of employment within the town and, as such, could provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>Summary of overall assessment and likely significant effects:</b>			
The proposed delivery of circa 95 dwellings is considered to have a significant positive effect. Similarly, the site has low ecological value and good accessibility to services, facilities and areas of employment which is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land and the proximity of the site to historic assets is likely to have a negative effect.

SA Objective	Assessment Criteria - Does the site (LE142A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site is outside of the settlement boundary of Leek. The development of this site, a greenfield site that is set within the open countryside could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>As noted, the site is outside of the settlement boundary of Leek. The site would be within 800m of a wide range of services and facilities but not within 400m of the town centre of Leek. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, outside the edge of the settlement boundary, should provide residents with good access to the open country side which should help to support healthy lifestyles. Similarly, the site is within 1,200m of a GP surgery. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 140 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this</p>	++

SA Objective	Assessment Criteria - Does the site (LE142A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	site has been assessed as having a significant positive effect on this Objective.	
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 800m of the town centre of Leek and 1,200m of a GP surgery and within the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and undesignated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 400m of one grade II listed asset. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.	0
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider District. Similarly, the increased population of both the town and the District may have a positive effect also. The site is located within the Churnet Valley Area as an area of sustainable tourism and rural regeneration although its location adjacent to the open countryside could detract from this. Overall, the site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (LE142B)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with access to the town centre of Leek has scope to have a positive effect on the vitality and viability of Leek and the wider District, as new residents could be expected to increase football. Overall, this site has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, the site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is within 1,000m of existing areas of employment within the town and, as such, could provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>Summary of overall assessment and likely significant effects:</b>			
The proposed delivery of circa 40 dwellings is considered to have a significant positive effect. Similarly, the site good accessibility to services, facilities and areas of employment which is likely to have a positive effect. However, the development of greenfield, grade 4 ALC land, the ecological value of the site and the proximity to historic assets is likely to have a negative effect.			

**Table 15.33**

**LE143**

SA Objective	Assessment Criteria - Does the site (LE143)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			

SA Objective	Assessment Criteria - Does the site (LE143)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site is outside of the settlement boundary of Leek. The development of this site, a greenfield site that is set within the open countryside could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>As noted, the site is outside of the settlement boundary of Leek and is remote from the town. The site would be within 1,200m of a wide range of services and facilities and the town centre of Leek, however this may not effectively serve the needs of prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, on the edge of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. However, the site is in excess of 1,200m of a GP surgery and is in proximity to one of the most deprived LSOAs in the District, Leek North, which is in the 20% most deprived nationally. It should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a neutral effect on this Objective, with scope for negative effects.</p>	0
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (LE143)...?	Commentary on likely nature of effects of site allocation	Overall assessment
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 190 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 1,200m of the town centre of Leek and a GP surgery and within the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 1,200m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective..	+

SA Objective	Assessment Criteria - Does the site (LE143)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Offer opportunities to encourage water efficiency and demand management?</li> </ul>		
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is more than 1,250m from Brough Park Fields (LNR), the nearest designated asset, and, as such, is considered that development could have no effect on this asset. This site has not been subject to an ecology survey, so the exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>Help safeguard the best and most versatile agricultural land?</li> <li>Deliver development that helps to minimise the loss of greenfield land?</li> <li>Offer opportunities to reduce land contamination / instability?</li> <li>Deliver development that helps reduce the amount of derelict land?</li> <li>Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site could not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to reduce waste generation?</li> <li>Offer opportunities to maximise the re-use of existing buildings?</li> <li>Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. <b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	regeneration although its location adjacent to the open countryside could detract from this. Overall, the site has been assessed as having a neutral effect on this Objective.  The proposed development of a residential site with access to the town centre of Leek has scope to have a positive effect on the vitality and viability of Leek and the wider District, as new residents could be expected to increase footfall. Overall, this site has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, the site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is not within 1,000m of existing areas of employment within the town and, as such, could fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
<b>Summary of overall assessment and likely significant effects:</b>			
The proposed delivery of circa 135 dwellings is considered to have a significant positive effect. However, the site's proximity to historic assets is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land, the proximity to historic assets is likely to have a negative effect as could the relative inaccessibility to services, facilities and areas of existing employment.			

**Table 15.35**

**LE253**

SA Objective	Assessment Criteria - Does the site (LE253)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site is outside of the settlement boundary of Leek. The development of this site, a greenfield site that is set within the open countryside could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located on the edge of the settlement boundary and is more than 2,000m away from the town centre which could result in existing services and facilities being inaccessible and the needs of prospective residents not being addressed. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, on the edge of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. However, the site is in excess of 2,000m of a GP surgery and it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site (LE253)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 15 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is further than 2,000m of the town centre of Leek, which could be expected to increase the need to travel within the town. However, it is adjacent to the open countryside. Similarly, the site is near to the A523 which has a number of bus stops and services serving it. Overall, this site has been assessed as having a negative effect on this Objective.	-
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Overall, this site has been assessed as having a negative effect on this Objective.	-
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

SA Objective	Assessment Criteria - Does the site (LE253)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage; however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is more than 1,500m from Brough Park Fields (LNR), the nearest designated asset, and, as such, is considered that development could have no effect on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of area and is unlikely to support many European and UK protected species. The species rich hedgerow elevates the site's ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site could not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0

SA Objective	Assessment Criteria - Does the site (LE253)...?	Commentary on likely nature of effects of site allocation	Overall assessment
13. To protect and enhance the character of towns /villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and undesignated assets) along with their settings?</li> <li>Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 50m of one grade II listed asset and within 400m of another grade II listed asset. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	--/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider District. Similarly, the increased population of both the town and the District may have a positive effect also. The site is located within the Churnet Valley Area as an area of sustainable tourism and rural regeneration although its location adjacent to the open countryside could detract from this. Overall, the site has been assessed as having a neutral effect on this Objective.</p>	0
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Leek and the wider District, however the Leek town centre is not easily accessible from the site which may reduce the effect on this objective. Overall, this has been assessed as having a neutral effect on this Objective</p>	0

SA Objective	Assessment Criteria - Does the site (LE253)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m of local employment provision and, as such, could provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 15 dwellings is considered to have a positive effect, as could the site's proximity to areas of existing employment. However, the site's proximity to historic assets is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land, the proximity to historic assets is likely to have a negative effect as could the relative inaccessibility to services and facilities and the ecological value of the site.</p>

	villages and maintain and strengthen local distinctiveness and sense of place?		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site would be within 1,000m from Combes Valley SSSI and could increase external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed employment use of this site provides scope for the development of this site to have a positive effect on investment in culture and tourism within the town and wider district, however this is dependent on proposal specific information. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of an employment site within the town centre has the scope to have a positive effect on the vitality and viability of Leekbrook and the wider District, as new employment could be expected to increase footfall in the nearby town centre. Overall, this site has been assessed as having a significant positive effect on this objective.	++
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Leekbrook as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.	++
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is proximity to areas of existing local employment provision as well as new employment provision generated by this site. Overall, this site has been assessed as having a significant positive effect on this objective.	++

SA Objective	Assessment Criteria - Does the site (EM2)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. The site's accessibility to open space is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities and the site is located within a flood zone which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is assessed as being a negative effect, as could the site's proximity to historic assets and a partial SBI designation.</p>			

**Table 15.37**

**ADD01**

SA Objective	Assessment Criteria - Does the site (ADD01)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site is outside of the settlement boundary of Leek. The development of this site, a greenfield site that is set within the open countryside could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located on the edge of the settlement boundary and is more than 2,000m away from the town centre which could result in existing services and facilities being inaccessible and the needs of prospective residents not being addressed. However, it should be noted that the site is adjacent to Churnet View Middle School. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site (ADD01)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, on the edge of the settlement boundary, should provide residents with good access to the open countryside and adjacent to an area of open space should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the location and size of this site, it is considered that the site could accommodate circa 25 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 800m of the town centre of Leek and a GP surgery and adjacent to the open countryside this should reduce the need to travel within the town. However, the site has limited access to the transport network at present. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (ADD01)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>		
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site is within 500m of Brough Park Fields (LNR), the nearest designated asset, and, as such, is considered that development could have an effect on this asset, at least a short term disturbance of this habitat, if not long term. This site has not been subject to an ecology survey, so the exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> </ul>	As noted, this site has been assessed as being on greenfield land. However the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (ADD01)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>		
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	As per the previous objective, the development of this site could not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and undesignated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 400m of a two grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site would avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			

SA Objective	Assessment Criteria - Does the site (ADD01)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with access to the town centre of Leek has scope to have a positive effect on the vitality and viability of Leek and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this could be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District and, as such, could provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 15 dwellings is considered to have a significant positive effect, as could the site's proximity to areas of existing employment. The site's accessibility to areas of open space is considered to have a positive effect. However, the site's proximity to designated and historic assets is likely to have a negative effect, as could the development of greenfield land, grade 4 ALC and the inaccessibility of services and facilities.</p>

<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site is located within the settlement boundary, albeit on the north west edge, the redevelopment of this brownfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>Whilst the site is located on the edge of the settlement boundary, it is within 1,200m of the town centre and the wide range of key services and facilities that can be found here that could serve prospective residents of the site. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, on the edge of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. Similarly, the site is within 1,200m of a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to</p>	+

SA Objective	Assessment Criteria - Does the site (BD004) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
		worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 15 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 1,200m of the town centre of Biddulph and a GP surgery and adjacent to the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 1,200m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (BD004) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 1,250m from both Gannister Quarry SSSI and Biddulph Valley Way (Whitemoor) (LNR), the nearest designated assets, and, as such, is considered to have no effect on these assets. The Ecological Study (2015) notes that the site has potential for protected species to be present due to the mosaic of habitats and habitat structure present, especially as the site is well connected to the wider countryside and on this basis the site is deemed to have ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>The site has been assessed as being a brownfield site, similarly it is classified as urban ALC land. As such, the development of this site would avoid the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (BD004) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	The development of this brownfield site could enable the re-use of existing buildings within the town centre. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.	+
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 400m of one grade II listed asset. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The development of urban ALC land on a brownfield site is likely to have a significant positive effect, as could the site's proximity to existing areas of employment. The site should deliver a quantum of housing, circa 15 dwellings which is likely to have a positive effect. The site is located within the settlement boundary and has good accessibility to the services and facilities. However, its proximity to heritage assets would have a negative effect, as would the ecological value of the site.</p>			

**Table 15.39**

**BD016**

SA Objective	Assessment Criteria - Does the site (BD016) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Make a positive contribution towards community cohesion?</li> <li>Offer opportunity to improve neighbourhood quality?</li> <li>Offer opportunity to provide open space and support Green Infrastructure?</li> </ul>	The site is located within the settlement boundary and the redevelopment of this mixed brownfield and greenfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (BD016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Risk unacceptable light and noise pollution?</li> <li>Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>		
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>Given the town centre location of this site, it can be considered that the site would be in proximity to a wide range of key services and facilities. For example, the site is in proximity to James Bateman Junior High School and Krypersley High School. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p>++</p>
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>Help improve health or access to health facilities?</li> <li>Help promote healthy lifestyles?</li> <li>Help to reduce health inequalities?</li> <li>Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to the nearby open space and countryside which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. However, it should be noted that this site is adjacent to one of the most deprived LSOAs in Staffordshire Moors, Biddulph East, which is in the most deprived 20% in England. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>Deliver development that reduces actual levels of crime?</li> <li>Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social / extra care housing.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 20 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p>++</p>

SA Objective	Assessment Criteria - Does the site (BD016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 800m of the town centre of Biddulph and a GP surgery and near to the open countryside this should reduce the need to travel within the town. Similarly, the site is located near to a number of bus stops. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> </ul>	<p>The site is over 2,000m from Roe Park Woods SSSI, the nearest designated asset and, as such, is considered to have no effect on</p>	+/?

SA Objective	Assessment Criteria - Does the site (BD016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>these assets. The Ecological Study (2015) notes that the site has been attributed a low ecological value in its potential to support protected species as the habitats are species poor and poorly connected to other more biodiverse habitats. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>The site has been assessed as being a brownfield and greenfield site, similarly it is classified as urban ALC land. As such, the development of this site would avoid the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>The development of this brownfield and greenfield site could enable the re-use of existing buildings within the town centre. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 400m of seven grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
14. To protect and enhance the character and appearance of the landscape including historic	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location</p>	++

SA Objective	Assessment Criteria - Does the site (BD016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	of the site, it is considered that there would be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a significant positive effect on this Objective.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with good access to the town centre of Biddulph has scope to have a positive effect on the vitality and viability of Biddulph and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<b>Summary of overall assessment and likely significant effects:</b>			

SA Objective	Assessment Criteria - Does the site (BD016)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<p>The site should deliver a quantum of housing, circa 20 dwellings which is likely to have a significant positive effect, as could the location of the site with regard to its proximity to services and facilities and areas of existing employment as well as the positive effect on the landscape. The site is located within the settlement boundary and has good accessibility to health care services and facilities. However, its proximity to heritage assets would have a negative effect.</p>		

**Table 15.40**

**BD055**

SA Objective	Assessment Criteria - Does the site (BD055)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site is located within the settlement boundary and the redevelopment of this brownfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>Given the town centre location of this site, it can be considered that the site would be in proximity to a wide range of key services and facilities. For example, the site is in proximity to James Bateman Junior High School and Knypersley High School. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (BD055)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to the nearby open space and countryside which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery and is adjacent to national route 55, part of the national cycle network. However, it should be noted that this site is adjacent to one of the most deprived LSOAs in Staffordshire Moors, Biddulph East, which is in the most deprived 20% in England. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p style="text-align: center;">+</p>
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p style="text-align: center;">+</p>
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 20 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p style="text-align: center;">++</p>
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 800m of the town centre of Biddulph and a GP surgery and near to the open countryside this should reduce the need to travel within the town. 5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 12 dwellings and therefore would not provide a significant quantum of housing to meet identified need. Overall, this site has been assessed as having a neutral effect on this Objective.	0
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 400m of the town centre of Biddulph and a GP surgery and a number of bus stops but does not have an area of open space or countryside in proximity. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+

SA Objective	Assessment Criteria - Does the site (BD059)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>contribute to the objectives of the Water Framework Directive?</li> <li>Offer opportunities to encourage water efficiency and demand management?</li> </ul>		
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 2,250m from Roe Park Woods SSSI, the nearest designated asset and, as such, is considered to have no effect on these assets. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall, is set within an urban environment with little connectivity to the wider countryside. However as the buildings could potentially support roosting bats the site is given ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Help safeguard the best and most versatile agricultural land?</li> <li>Deliver development that helps to minimise the loss of greenfield land?</li> <li>Offer opportunities to reduce land contamination / instability?</li> <li>Deliver development that helps reduce the amount of derelict land?</li> <li>Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>The site has been assessed as being a brownfield, similarly it is classified as urban ALC land. As such, the development of this site would avoid the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Offer opportunities to reduce waste generation?</li> <li>Offer opportunities to maximise the re-use of existing buildings?</li> <li>Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>The development of this brownfield site could enable the re-use of existing buildings within the town centre. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Offer opportunities to protect and reinforce the character and appearance of the district's towns</li> </ul>	<p>The nearest historical asset is circa 550m south west from the site. Given the distance of the site from this asset, there is limited scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?

SA Objective	Assessment Criteria - Does the site (BD059)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<p>and villages and maintain and strengthen local distinctiveness and sense of place?</p> <ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site with good access to the town centre of Biddulph has scope to have a positive effect on the vitality and viability of Biddulph and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	<p>The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (BD059)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>Summary of overall assessment and likely significant effects:</b>			
The development of urban ALC brownfield land should have a significant positive effect, as should the preservation of the landscape and the site's proximity to existing areas of employment and services and facilities. The site is located within the settlement boundary, and away from historical assets. However, the site's ecological value would have a negative effect.			

**Table 15.42**

**BD101**

SA Objective	Assessment Criteria - Does the site (BD101)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The site is located within the settlement boundary and the redevelopment of this brownfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	Given the town centre location of this site, it can be considered that the site would be in proximity to a wide range of key services and facilities. For example, the site is in proximity to Biddulph Valley Leisure Centre and Kingsfield First School. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> </ul>	The location of this site should provide residents with good access to the nearby open space and countryside which should help to	+

SA Objective	Assessment Criteria - Does the site (BD101)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Help promote healthy lifestyles?</li> <li>Help to reduce health inequalities?</li> <li>Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>support healthy lifestyles. Similarly, the site is within 400m of a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Deliver development that reduces actual levels of crime?</li> <li>Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 24 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 400m of the town centre of Biddulph and a GP surgery and there are a small number of open space areas in proximity of varying types. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (BD101)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>AAs the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 1,750m from Gannister Quarry SSSI, the nearest designated asset and, as such, is considered to have no effect on these assets. The Ecological Study (2015) notes that the site has low ecological importance overall but the presence of buildings with potential to support roosting bats warrants the site being attributed some ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>The site has been assessed as being a brownfield, similarly it is classified as urban ALC land. As such, the development of this site would avoid the loss of best and most versatile agricultural land. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p>++</p>

SA Objective	Assessment Criteria - Does the site (BD102)...?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with good access to the town centre of Biddulph has scope to have a positive effect on the vitality and viability of Biddulph and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<b>Summary of overall assessment and likely significant effects:</b>			
The development of urban ALC brownfield land should have a significant positive effect, as should the preservation of the landscape and the site's proximity to existing areas of employment and services and facilities and the delivery of circa 42 dwellings. The site is located within the settlement boundary, and away from historical assets. However, the site's ecological value would have a negative effect.			

**Table 15.44**

**BD108**

SA Objective	Assessment Criteria - Does the site (BD108)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>As the site is located within the town settlement boundary of Biddulph it could be considered that the redevelopment of this brownfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>Given the town centre location of this site, it can be considered that the site would be in proximity to a wide range of key services and facilities. For example, the site is in proximity to James Bateman Junior High School and Knypersley High School. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to the nearby open space and countryside which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery and is adjacent to national route 55, part of the national cycle network. However, it should be noted that this site is adjacent to one of the most deprived LSOAs in Staffordshire Moors, Biddulph East, which is in the most deprived 20% in England. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (BD108)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 12 dwellings and therefore would not provide a significant quantum of housing to meet identified need. Overall, this site has been assessed as having a neutral effect on this Objective.	0
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 800m of the town centre of Biddulph and a GP surgery and near to the open countryside this should reduce the need to travel within the town. Similarly, the site is located near to a number of bus stops. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	1/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The	+

SA Objective	Assessment Criteria - Does the site (BD108)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 2,250m from Roe Park Woods SSSI, the nearest designated asset and, as such, is considered to have no effect on these assets. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall, is set within a fairly urban environment with relatively good connectivity to the wider countryside. Nevertheless, as the site has good connectivity to other more biodiverse habitats, suitable reptile habitat and potential to support roosting bats the site is deemed as having ecological importance. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>Help safeguard the best and most versatile agricultural land?</li> <li>Deliver development that helps to minimise the loss of greenfield land?</li> <li>Offer opportunities to reduce land contamination / instability?</li> <li>Deliver development that helps reduce the amount of derelict land?</li> <li>Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>The site has been assessed as being a brownfield, similarly it is classified as urban ALC land. As such, the development of this site would avoid the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p>++</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to reduce waste generation?</li> <li>Offer opportunities to maximise the re-use of existing buildings?</li> <li>Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>The development of this brownfield site could enable the re-use of existing buildings within the town centre. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. This site is also within a Minerals Consultation Area and development of this site would preclude any extraction of the minerals below. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>

SA Objective	Assessment Criteria - Does the site (BD108)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>Both on the site and within 50m of it are six grade II listed assets and one more grade II listed assets within 400m. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p>++</p>
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. SA Objective	Assessment Criteria - Does the site (BD071, BD071A, BD106 & BD156)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The site's proximity to services, facilities and existing areas of employment and proposed delivery of circa 265 dwellings should have a significant positive effect. However there is scope that development of this site could have negative effects due to the site's ecological importance and the development of greenfield land.</p>			

**Table 15.46**

15.2.2 Other uses

BD117

SA Objective	Assessment Criteria - Does the site (BD117)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site is located outside of the existing town boundary and also outside of the draft new town boundary. The development of greenfield land within the open countryside could reduce the quality of the Green Infrastructure of the Town. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>As noted, the site is located outside of the settlement boundary on the south east edge of Biddulph. The site is more than 1,200m away from the town centre which could result in existing services and facilities being inaccessible. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The sites location would provide good access to areas of open space and the countryside which could help to support healthy lifestyles. However, the site is more than 1,200m from a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0

SA Objective	Assessment Criteria - Does the site (BD117)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	This site has been proposed for employment uses with regards to this assessment. Therefore the development would provide no housing. Overall, this site has been assessed as having a neutral effect on this Objective.	0
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted, the site is more than 1,200m from the town centre of Biddulph and a GP surgery this could be expected to increase the need to travel. However, the site is near to the open country side and an area of open space and a number of bus stops. Similarly, the development of this site may lead to the provision of additional public transport services. Overall, this site has been assessed as having a neutral effect on this Objective.	0
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is more than 1,200m from the town centre and could increase the need to travel. Overall, this site has been assessed as having a negative effect on this Objective.	-
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

SA Objective	Assessment Criteria - Does the site (BD117)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 1,500m from Whitfield Valley (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. The Ecological Study (2015) notes that the site has very low biodiversity value overall, however as there are two trees with bat roosting potential and species rich hedgerows, on this basis the site has been attributed ecological value. The HIRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>

SA Objective	Assessment Criteria - Does the site (BD117)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is more than 400m away from any historical heritage asset, the nearest asset is grade II* listed Knypersley Hall which is circa 650m to the north of the site. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed employment use of this site provides scope for the development of this site to have a positive effect on investment in culture and tourism within the town and wider district, however this is dependent on proposal specific information. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of an employment site within the town centre has the scope to have a positive effect on the vitality and viability of Biddulph and the wider District, as new employment could be expected to increase footfall in the nearby town centre. Overall, this site has been assessed as having a significant positive effect on this objective.</p>	++
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Biddulph as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (BD117)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is proximity to areas of existing local employment provision as well as new employment provision generated by this site. Overall, this site has been assessed as having a significant positive effect on this objective.	++
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. However, the greenfield nature of this site and its location outside of the settlement boundary, coupled with its ecological value could have a negative effect.</p>			

**Table 15.47**

**BD076**

SA Objective	Assessment Criteria - Does the site (BD076)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Make a positive contribution towards community cohesion?</li> <li>Offer opportunity to improve neighbourhood quality?</li> <li>Offer opportunity to provide open space and support Green Infrastructure?</li> <li>Risk unacceptable light and noise pollution?</li> <li>Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The site is located within the settlement boundary and the redevelopment of this mixed brownfield and greenfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (BD076)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>Given the town centre location of this site, it can be considered that the site would be in proximity to a wide range of key services and facilities. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide employees with good access to the nearby open space and countryside which should help to support healthy lifestyles. Similarly, the site is within 400m of a GP surgery and is adjacent to national route 55, part of the national cycle network. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. 17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Biddulph as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.	++
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is proximity to areas of existing local employment provision as well as new employment provision generated by this site. Overall, this site has been assessed as having a significant positive effect on this objective.	++
<b>Summary of overall assessment and likely significant effects:</b>			

SA Objective	Assessment Criteria - Does the site (BD076)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		The proposed delivery of a town centre employment site is considered to have a significant positive effect. Similarly, the site's accessibility to services, facilities and areas of existing employment is likely to have a positive effect.	

**Table 15.48**

**BD076A**

SA Objective	Assessment Criteria - Does the site (BD076A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The site is located within the settlement boundary and the redevelopment of this mixed brownfield and greenfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	Given the town centre location of this site, it can be considered that the site would be in proximity to a wide range of key services and facilities and may provide additional services and facilities. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> </ul>	The location of this site should provide residents and employees with good access to nearby open space and countryside which should help to support healthy lifestyles. Similarly, the site is within 400m of a GP	+

SA Objective	Assessment Criteria - Does the site (BD076A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>surgery and is adjacent to national route 55, part of the national cycle network. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 55 dwellings and therefore also provide a quantum of affordable housing on site. It is acknowledged that the site is proposed as mixed use which may reduce the quantum of housing delivered by this site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 400m of the town centre of Biddulph and a GP surgery and is near to the open countryside which should reduce the need to travel within the town. Similarly, the site is located near to a number of bus stops. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the town centre and could be expected to reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (BD076A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise emissions of airborne pollutants?</li> <li>Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Deliver development directed towards areas of least flood risk?</li> <li>Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Offer opportunities to encourage water efficiency and demand management?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site is over 1,500m from Roe Park Woods SSSI, the nearest designated asset and, as such, is considered to have no effect on this asset. The Ecological Study (2015) notes that the site is connected to a hedgerow and other potentially biodiverse habitats, and forms part of an important potentially biodiverse mosaic, therefore the site is attributed ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Help safeguard the best and most versatile agricultural land?</li> <li>Deliver development that helps to minimise the loss of greenfield land?</li> <li>Offer opportunities to reduce land contamination / instability?</li> <li>Deliver development that helps reduce the amount of derelict land?</li> <li>Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	The site has been assessed as being a mixed brownfield and greenfield site, similarly it is classified as urban ALC land. As such, the development of this site would avoid the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a neutral effect on this Objective.	0
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Offer opportunities to reduce waste generation?</li> </ul>	The development of this brownfield and greenfield site could enable the re-use of existing buildings. Dependent on proposal specific	0

SA Objective	Assessment Criteria - Does the site (BD076A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Offer opportunities to maximise the re-use of existing buildings?</li> <li>Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>information, there is scope that development could incorporate sustainable materials. This site is also within a Minerals Consultation Area and development of this site would preclude any extraction of the minerals below. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is circa 450m away from a historical heritage asset. Although dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed mixed use of this site provides scope for the development of this site to have a positive effect on investment in culture and tourism within the town and wider district, however this is dependent on proposal specific information. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a mixed use site within the town centre has the scope to have a positive effect on the vitality and viability of Biddulph and the wider District, as new employment could be expected to increase footfall in the nearby town centre. Overall, this site has been assessed as having a significant positive effect on this objective.</p>	++

SA Objective	Assessment Criteria - Does the site (BD076A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site and the proposed mixed use, and associated employment, of the site could be considered to have a positive effect on businesses and the residents of Biddulph as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.	++
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is proximity to areas of existing local employment provision as well as new employment provision generated by this site. Overall, this site has been assessed as having a significant positive effect on this objective.	++
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site is located within settlement boundary and should have good access to services and facilities which is likely to also have a significant positive effect. However the site has been assessed as having ecological value which is likely to have a negative effect.</p>			

**Table 15.49**

### 15.2.3 Sites within Green Belt

#### BD062

SA Objective	Assessment Criteria - Does the site (BD062)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The site borders the settlement boundary of Biddulph but is outside of the boundary. The development of this site, a greenfield site that is set within the open countryside, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	As noted, the site is outside of the settlement boundary of Biddulph. The site would be within 800m of a wide range of services and facilities but not within 400m of the town centre of Biddulph. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.	+
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	The location of this site, on the border of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. Similarly, the site is within 1,200m of a GP surgery and is adjacent to national route 55, part of the national cycle network. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (BD062)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 40 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 800m of the town centre of Biddulph and 1,200m of a GP surgery and within the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	1/?

The	+

SA Objective	Assessment Criteria - Does the site (BD062)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is more than 1,000m from Biddulph Valley Way (Whitemoor) (LNR), the nearest designated asset, and, as such, is considered that development could have no effect on this asset. The Ecological Study (2015) notes that the site has potential for protected species to be present due to the mosaic of habitats and habitat structure present, especially as the site is well connected to the wider countryside. The site is deemed to have ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>

SA Objective	Assessment Criteria - Does the site (BD062)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 400m of grade I Biddulph Grange Gardens, one grade II* listed asset, the Church of St. Lawrence and Coffin Lids and Benches on South Side, and seven grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Biddulph and the wider District. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0

SA Objective	Assessment Criteria - Does the site (BD062)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m of local employment provision and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 40 dwellings should have a significant positive effect. The site is also accessible to existing services, facilities and areas of employment which is likely to have a positive effect. However, the site's ecological importance due to the potential for protected species to be present and its connection to the wider countryside are considered to have a significant negative effect. Similarly, the development of greenfield land, grade 4 ALC and the site's proximity to historic assets are also assessed as having a negative effect.</p>

<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Make a positive contribution towards community cohesion?</li> <li>Offer opportunity to improve neighbourhood quality?</li> <li>Offer opportunity to provide open space and support Green Infrastructure?</li> <li>Risk unacceptable light and noise pollution?</li> <li>Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The site borders the settlement boundary of Biddulph but is outside of the boundary. The development of this site, a greenfield site that is set within the open countryside, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership,</li> </ul>	As noted, the site is outside of the settlement boundary of Biddulph. The site would be within 800m of a wide range of services and facilities. For example, the site is in proximity to James Bateman Junior High School and Knypersley High School. Similarly, given the size of development proposed there is scope that additional key services and	+

SA Objective	Assessment Criteria - Does the site (BD063A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>facilities could be brought forward through developer contributions. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, on the border of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. Similarly, the site is within 1,200m of a GP surgery and is adjacent to national route 55, part of the national cycle network. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 120 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 800m of the town centre of Biddulph and a GP surgery and near to the open countryside this should reduce the need to travel within the town. Similarly, the site is located near to a number of bus stops. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			

SA Objective	Assessment Criteria - Does the site (BD063A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 2,000m from Roe Park Woods SSSI, the nearest designated asset, and, as such, is considered to have no effect on these assets. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of the species poor grassland area but has some fairly biodiverse areas connected by hedgerows to the south and north; the site is attributed ecological value due to the presence of trees with bat roosting potential. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as both grade 3 &amp; 4 ALC</p>	-/?

SA Objective	Assessment Criteria - Does the site (BD063A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>land so development of this site Could not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. This site is also within a Minerals Consultation Area and development of this site would preclude any extraction of the minerals below. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 400m of seven grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these historical heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>

SA Objective	Assessment Criteria - Does the site (BD063A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Biddulph and the wider District. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m of local employment provision and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 120 dwellings should have a significant positive effect. The site is also accessible to existing services, facilities and areas of employment which is likely to have a positive effect. However, the site's ecological value is considered to have a negative effect. Similarly, the development of greenfield land, grade 3/4 ALC and the site's proximity to historic assets are also assessed as having a negative effect.</p>			

**Table 15.51**

BD064		Assessment Criteria - Does the site (BD064)...?	Commentary on likely nature of effects of site allocation	Overall assessment
SA Objective	SOCIAL			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site borders the settlement boundary of Biddulph but is outside of the boundary. The development of this site, a greenfield site that is set within the open countryside, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-	
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>Whilst the site is located on the outside of the settlement boundary, it is within 1,200m of the town centre and the wide range of key services and facilities that can be found here that could serve prospective residents of the site. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+	
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, outside of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. Similarly, the site is within 1,200m of a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help</p>	+	

SA Objective	Assessment Criteria - Does the site (BD064)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 12 dwellings and therefore would not provide any affordable homes. Overall, this site has been assessed as having a neutral effect on this Objective.	0
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 1,200m of the town centre of Biddulph and a GP surgery and adjacent to the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 1,200m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise emissions of airborne pollutants?</li> <li>Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. The Ecological Study (2015) notes that the site has little potential to support protected species, although the site is fairly well connected to the wider countryside the surrounding habitats appear of low biodiversity value as well. However, the presence of nine trees with potential to support roosting bats warrants the site being considered to have ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>

SA Objective	Assessment Criteria - Does the site (BD067A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is more than 400m from any historical heritage assets, the nearest designated asset is grade I listed Biddulph Grange Garden which is circa 650m to the north of the site. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of this, or other, historical heritage assets. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	<p>+/?</p>
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>

SA Objective	Assessment Criteria - Does the site (BD067A)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p style="text-align: center;">+</p>
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site with good access to the town centre of Biddulph has scope to have a positive effect on the vitality and viability of Biddulph and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	<p style="text-align: center;">+</p>
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p style="text-align: center;">0</p>
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	<p>The site is within 1,000m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p style="text-align: center;">+</p>
<p><b>Summary of overall assessment and likely significant effects:</b></p>			
<p>The proposed delivery of circa 120 dwellings is considered to have a significant positive effect. The site is accessible to existing services, facilities and areas of employment and located away from historic assets is likely to have a positive effect. However, the site's ecological value is considered to have a negative effect. Similarly, the development of greenfield land, grade 4 ALC is also assessed as having a negative effect.</p>			

**Table 15.53**

**BD067B**

SA Objective	Assessment Criteria - Does the site (BD067B)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site borders the settlement boundary of Biddulph but is outside of the boundary. The development of this site, a greenfield site that is set within the open countryside, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>Whilst the site is located on the outside of the settlement boundary, it is within 1,200m of the town centre and the wide range of key services and facilities that can be found here that could serve prospective residents of the site. For example, the site is in proximity to Oxhey First School. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, outside of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. However, the site is more than 1,200m from a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help</p>	+

SA Objective	Assessment Criteria - Does the site (BD067B)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 150 dwellings and therefore would not provide any affordable homes. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 1,200m of the town centre of Biddulph and adjacent to the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 1,200m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	1/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate	+

SA Objective	Assessment Criteria - Does the site (BD067B)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	
<p>10. To identify, conserve and enhance biodiversity and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 1,750m from Biddulph Valley Way (Whitemoor) (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. The Ecological Study (2015) notes that apart from roosting bats the site has little potential to support protected species and poorly connected to the wider countryside, though the four trees with bat potential increases the ecological value of the site. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>

SA Objective	Assessment Criteria - Does the site (BD067C)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with good access to the town centre of Biddulph has scope to have a positive effect on the vitality and viability of Biddulph and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 1,000m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>Summary of overall assessment and likely significant effects:</b>			
The proposed delivery of circa 120 dwellings is considered to have a significant positive effect. The site is accessible to existing services, facilities and areas of employment is likely to have a positive effect. However, the site's ecological value is considered to have a negative effect. Similarly, the development of greenfield land, grade 4 ALC and the site's proximity to heritage assets is also assessed as having a negative effect.

<b>SOCIAL</b>			
SA Objective	Assessment Criteria - Does the site (BD068)...?	Commentary on likely nature of effects of site allocation	Overall assessment

SA Objective	Assessment Criteria - Does the site (BD068)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site borders the settlement boundary of Biddulph but is outside of the boundary. The development of this site, a greenfield site that is set within the open countryside, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>As noted, the site is outside of the settlement boundary of Biddulph. The site would be within 800m of a wide range of services and facilities but not within 400m of the town centre of Biddulph. For example, the site is in proximity to Woodhouse Middle School. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, on the border of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. Similarly, the site is within 1,200m of a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 70 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site</p>	++

SA Objective	Assessment Criteria - Does the site (BD068)...?	Commentary on likely nature of effects of site allocation	Overall assessment
locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>	has been assessed as having a significant positive effect on this Objective.	
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 800m of the town centre of Biddulph and 1,200m of a GP surgery and within the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise emissions of airborne pollutants?</li> <li>Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Deliver development directed towards areas of least flood risk?</li> <li>Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Offer opportunities to encourage water efficiency and demand management?</li> </ul>	Part of the site is located within a flood zone 2 and 3 area and, as such, it can be considered that the site would be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant negative effect on this objective.	--

SA Objective	Assessment Criteria - Does the site (BD068)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is more than 1,000m from Biddulph Valley Way (Whitemoor) (LNR), the nearest designated asset, and, as such, is considered that development could have no effect on this asset. The Ecological Study (2015) notes that the site has been deemed to have ecological importance due to the presence of trees with bat roosting potential, potential reptile populations and good connectivity to other biodiverse habitats. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 400m of grade I Biddulph Grange Gardens, one grade II* listed asset, the Church of St. Lawrence and Coffin Lids and Benches on South Side, and seven grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?

17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 1,000m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>Summary of overall assessment and likely significant effects:</b>			
The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. The site is also accessible to existing employment areas which is likely to have a positive effect. However, the site's proximity to historic assets is assessed as having a significant negative effect. The development of greenfield land is also assessed as having a negative effect.			

**Table 15.57**

**BD083**

SA Objective	Assessment Criteria - Does the site (BD083)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site borders the settlement boundary of Biddulph but is outside of the boundary. The development of this site, a greenfield site that is set within the open countryside, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>As noted, the site is outside of the settlement boundary of Biddulph. The site would be within 800m of a wide range of services and facilities and is adjacent to national route 55, part of the national cycle network. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, on the border of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. However, the site is more than 1,200m from a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (BD083)...?	Commentary on likely nature of effects of site allocation	Overall assessment
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 40 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 1,200m of the town centre of Biddulph but more than 1,200m from a GP surgery. The site is within the open countryside which should increase access to the towns Green Infrastructure. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a neutral effect on this Objective.	0
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 1,200m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise emissions of airborne pollutants?</li> <li>Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Deliver development directed towards areas of least flood risk?</li> <li>Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> </ul>	Part of the site is located within a flood zone 3 area and, as such, it can be considered that the site would be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant negative effect on this objective.	--

SA Objective	Assessment Criteria - Does the site (BD083)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Offer opportunities to encourage water efficiency and demand management?</li> </ul>		
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site is within 1,000m of Biddulph Valley Way (Whitemoor) (LNR), the nearest designated asset, and, as such, is considered that development could have an effect, albeit limited, on this asset. The Ecological Study (2015) notes that the site has mostly low biodiversity value overall in terms of the species poor grassland area but has some fairly biodiverse areas to the south and west. The site is directly adjacent to a housing estate to the east but is directly connected to more diverse habitats to the south and west and further connections to the north with a small copse and species poor hedgerow. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Help safeguard the best and most versatile agricultural land?</li> <li>Deliver development that helps to minimise the loss of greenfield land?</li> <li>Offer opportunities to reduce land contamination / instability?</li> <li>Deliver development that helps reduce the amount of derelict land?</li> <li>Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.	-
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Offer opportunities to reduce waste generation?</li> <li>Offer opportunities to maximise the re-use of existing buildings?</li> <li>Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and	<ul style="list-style-type: none"> <li>Deliver development that helps ensure the continued protection and enhancement of cultural and historic</li> </ul>	The site is within 400m of grade I Biddulph Grange Gardens, one grade II* listed asset, the Church of St. Lawrence and Coffin Lids and Benches	-/?

SA Objective	Assessment Criteria - Does the site (BD083)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>heritage assets (designated and non-designated assets) along with their settings?</li> <li>Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>on South Side, a scheduled monument and seven grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Biddulph and the wider District. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> </ul>	<p>The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment</p>	++

Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>As noted, the site is located outside of the settlement boundary on the south east edge of Biddulph. The site is more than 1,200m away from the town centre which could result in existing services and facilities being inaccessible. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The sites location would provide good access to areas of open space and the countryside which could help to support healthy lifestyles. However, the site is more than 1,200m from a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 26 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (BD109 & BD118)...?	Commentary on likely nature of effects of site allocation	Overall assessment
locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>		
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted, the site is more than 1,200m from the town centre of Biddulph and a GP surgery this could be expected to increase the need to travel. However, the site is near to the open country side and an area of open space and a number of bus stops. Similarly, the development of this site may lead to the provision of additional public transport services. Overall, this site has been assessed as having a neutral effect on this Objective.	0
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is more than 1,200m from the town centre and could increase the need to travel. Overall, this site has been assessed as having a negative effect on this Objective.	-
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+

SA Objective	Assessment Criteria - Does the site (BD109 & BD118)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 2.500m from both Roe Park Woods SSSI and Whitfield Valley (LNR), the nearest designated assets, and, as such, is considered to have no effect on these assets. The Ecological Study (2015) notes that the site has low potential to support protected species as the habitats are species poor and poorly connected to other more biodiverse habitats, and therefore is given a low ecological importance. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	<p>+/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as both urban ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. This site is also within a Minerals Consultation Area and development of this site would preclude any extraction of the minerals below. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is more than 400m away from any historical heritage asset, the nearest asset is grade II listed which is circa 650m to the north east of the site. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	<p>+/?</p>

SA Objective	Assessment Criteria - Does the site (BD109 & BD118)...?	Commentary on likely nature of effects of site allocation	Overall assessment
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.	0
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Biddulph and the wider District. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m of local employment provision and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>Summary of overall assessment and likely significant effects:</b>			

SA Objective	Assessment Criteria - Does the site (BD109 & BD118)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		The proposed delivery of circa 26 dwellings is considered to have a significant positive effect. The site is also accessible to existing services, facilities and areas of existing employment as well as being located away from historic assets and a SSSI and LNR, as well as the site's low ecological value is likely to have a positive effect. However, the development of greenfield is assessed as having a negative effect.	

**Table 15.60**

**BD110**

SA Objective	Assessment Criteria - Does the site (BD110)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The site borders the settlement boundary of Biddulph but is outside of the boundary. The development of this site, a greenfield site that is set within the open countryside, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	Whilst the site is located on the outside of the settlement boundary, it is within 1,200m of the town centre and the wide range of key services and facilities that can be found here that could serve prospective residents of the site. For example, the site is in proximity to Oxhey First School. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.	+
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> </ul>	The location of this site, outside of the settlement boundary, should provide residents with good access to the open countryside and help	0

SA Objective	Assessment Criteria - Does the site (BD110)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Help to reduce health inequalities?</li> <li>Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>to support healthy lifestyles. However, the site is more than 1,200m from a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Deliver development that reduces actual levels of crime?</li> <li>Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 50 dwellings, and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 1,200m of the town centre of Biddulph and adjacent to the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

6. To strengthen links between rural areas and towns by sustainable forms	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> </ul>	<p>As noted previously, the site is within 1,200m of the town centre of Biddulph and a GP surgery and adjacent to the open countryside</p>	+

SA Objective	Assessment Criteria - Does the site (BD131B)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 1,200m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to minimise emissions of airborne pollutants?</li> <li>Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>Deliver development directed towards areas of least flood risk?</li> <li>Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>Part of the site is located within a flood zone 3 area and, as such, it can be considered that the site would be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a significant negative effect on this objective.</p>	--
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> </ul>	<p>The site is more than 2,250m from Marshes Hill Common (LNR), the nearest designated asset, and, as such, is considered that development could have no effect on this asset. This site has not been subject to an ecology survey, so the exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted</p>	0

SA Objective	Assessment Criteria - Does the site (BD131B)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>from this site. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However the land has also been assessed as urban ALC land so development of this site would not result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 400m of grade II* Knypersley Hall and one grade II listed asset, Stables, Coach Houses including Coachman's Cottage and Lodge North of Knypersley Hall. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National</p>	0

SA Objective	Assessment Criteria - Does the site (BD131B)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a neutral effect on this Objective.	0
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Biddulph and the wider District. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<b>Summary of overall assessment and likely significant effects:</b>			
The proposed delivery of circa 80 dwellings is considered to have a significant positive effect, as could the site's proximity to existing areas of employment. The site is also accessible to existing services and facilities which is likely to have a positive effect. The development of greenfield land is assessed as having a negative effect, as could the site's proximity to historic assets.			

Table 15.62

**BD134**

SA Objective	Assessment Criteria - Does the site (BD134)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site borders the settlement boundary of Biddulph but is outside of the boundary. The development of this site, a greenfield site that is set within the open countryside, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>Whilst the site is located on the outside of the settlement boundary, it is within 1,200m of the town centre and the wide range of key services and facilities that can be found here that could serve prospective residents of the site. For example, the site is in proximity to Oxhey First School. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, outside of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. However, the site is more than 1,200m from a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
