	<ul style="list-style-type: none"> <li>Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is within 1,000m of Biddulph Valley Way (Whitemoor) (LNR), the nearest designated asset, and, as such, is considered that development is likely to have limited effect on this asset. Ecological assessment is required. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.</p>	0/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>Help safeguard the best and most versatile agricultural land?</li> <li>Deliver development that helps to minimise the loss of greenfield land?</li> <li>Offer opportunities to reduce land contamination / instability?</li> <li>Deliver development that helps reduce the amount of derelict land?</li> <li>Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been indicated on Natural England's predictive map of Best and Most Versatile land as being predictive "urban" land so development of this site may not result in the loss of best and most versatile land. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to reduce waste generation?</li> <li>Offer opportunities to maximise the re-use of existing buildings?</li> <li>Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Offer opportunities to protect and reinforce the character and appearance of the district's towns and</li> </ul>	<p>The site is within 700m of one grade II* listed asset, the Church of St. Lawrence and Coffin Lids and Benches and three grade II listed assets. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of these heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.</p>	0/?

SA Objective	Assessment Criteria - Does the site (BD138c)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<p>villages and maintain and strengthen local distinctiveness and sense of place?</p>		
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site within the important landscape setting to the settlement, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Biddulph and the wider District. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	<p>The site is within 600m of local employment provision and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p><b>Summary of overall assessment and likely significant effects:</b></p>			

SA Objective	Assessment Criteria - Does the site (BD138c)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	The proposed delivery of circa 85 dwellings should have a significant positive effect. The site is also accessible to existing services, facilities and areas of employment which is likely to have a positive effect. However, the site's location in the wider countryside and important landscape setting to the settlement are considered to have a significant negative effect.		

**Table 15.319**

**BD104 (Land between Meadows Way and Tunstall Road)**

SA Objective	Assessment Criteria - Does the site (BD104)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The site is located within the settlement boundary and the redevelopment of this greenfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.	+
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	Given the town centre location of this site, it can be considered that the site would be in proximity to a wide range of key services and facilities. For example, the site is in proximity to James Bateman Junior High School and Knypersley High School. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a significant positive effect on this Objective.	++

SA Objective	Assessment Criteria - Does the site (BD104)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to the nearby open space and countryside which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. However, it should be noted that this site is adjacent to one of the most deprived LSOAs in Staffordshire Moors, Biddulph East, which is in the most deprived 20% in England. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 10 dwellings and also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 800m of the town centre of Biddulph and a GP surgery and near to the open countryside this should reduce the need to travel within the town. Similarly, the site is located near to a number of bus stops. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 400m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (BD104)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>		
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding however there is some known surface water flooding on site. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site is over 2,000m from Roe Park Woods SSSI, the nearest designated asset and, as such, is considered to have no effect on these assets. No site specific ecological study has been undertaken. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> </ul>	The site has been assessed as being a greenfield site, However, the land has also been indicated on Natural England's predictive map of Best and Most Versatile land as being predictive "urban" land so development of this site may not result in the loss of best and most versatile land.. As such, the development of this site would avoid the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (BD104)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>		
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	The development of this brownfield and greenfield site could enable the re-use of existing buildings within the town centre. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.	+
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 400m of seven grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site would avoid development within 1,000m of protected sites and would reduce external pressures on these sites. Given the location of the site, it is considered that there would be limited effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			

SA Objective	Assessment Criteria - Does the site (BD104)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with good access to the town centre of Biddulph has scope to have a positive effect on the vitality and viability of Biddulph and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The site should deliver a quantum of housing, circa 20 dwellings which is likely to have a significant positive effect, as could the location of the site with regard to its proximity to services and facilities and areas of existing employment as well as the positive effect on the landscape. The site is located within the settlement boundary and has good accessibility to health care services and facilities. However, its proximity to heritage assets would have a negative effect.</p>

15.8.3 Villages

Blackshaw Moor

OC050 Anzio Camp

SA Objective	Assessment Criteria - Does the site (OC050)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The development of this site, a brownfield site that is outside of the proposed infill boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located 1km south of the village, but has insufficient services and facilities to meet the needs of the community. It should be noted that Blackshaw Moor does not have a secondary school. The nearest service centre is Leek, 2 miles to the south. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Blackshaw Moor does not have a GP surgery. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (OC050)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on Core Strategy Policy SS6c, it is considered that the site could accommodate some dwellings and extra care facilities. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within open countryside with no services in close proximity. Overall, this site has been assessed as having a negative effect on this Objective.	-
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

SA Objective	Assessment Criteria - Does the site (OC050)...?	Commentary on likely nature of effects of site allocation	Overall assessment
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site is more than 1,250m from Thorncliffe Moor SSSI, the nearest designated asset, and, as such, is not considered to have an effect on this asset. The site is adjacent to an SBI to the north east. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	As noted, this site has been assessed as being on brownfield land and development of this site is not likely result in the loss of best and most versatile land. Overall, this site has been assessed as having a positive effect on this Objective.	+
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	There is scope to enable the re-use of existing buildings or that the development could use sustainable materials or increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic</li> </ul>	The site is within 400m of a grade II listed asset (milepost). Dependent on proposal specific information, there is limited scope	+/?

SA Objective	Assessment Criteria - Does the site (OC050)...?	Commentary on likely nature of effects of site allocation	Overall assessment
heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>heritage assets (designated and non-designated assets) along with their settings?</li> <li>Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	that development of this site could lead to the deterioration of this heritage asset and its setting. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site would be more than 1,250m of Thorncliffe Moor SSSI and would not increase external pressures on these sites. Given the location of the site, it is considered that effects on landscape character and the setting of the Peak District National Park are likely. Proposal specific information is required to assess the impact on the South West Peak National Character Area. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	A mixed use of this site in line with Core Strategy policy may support investment in culture and tourism. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed mixed use development of a site close to the village centre of Blackshaw Moor has scope to have a positive effect on the vitality and viability of Blackshaw Moor and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (OC050)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	Mixed use development may support some employment opportunities. Overall, this site has been assessed as having a positive effect on this Objective.	+
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of some housing and extra care units is considered to have a positive effect, as could the site's accessibility to areas of open space and possible contribution to investment in tourism. However the site is inaccessible to services and facilities which is likely to have a significant negative effect, as is the potential impact on landscape character and the setting of the Peak District National Park. Similarly the proximity to an SBI is likely to lead to negative effects.</p>			

### Blythe Bridge and Forsbrook

#### Northern Gateway Opportunity Site (Identified in Core Strategy as Policy SS8 Blythe Bridge Regional Investment Site) - potential mixed use including residential

SA Objective	Assessment Criteria - Does the site (Northern Gateway Opportunity Site)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	Large scale opportunity site located on greenfield land either side of the A50 to the south of Blythe Bridge and inside the settlement boundary. Development could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective	-

SA Objective	Assessment Criteria - Does the site (Northern Gateway Opportunity Site)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located on the edge of the village, it is around 1,000m of the village centre and the range of services and facilities that can be found here that could serve prospective residents or users of the site. Depending on site specific proposals, a mixed use scheme might deliver improved access to jobs and services for existing and new residents. It should be noted that the current supply of educational and community services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 1,000m of a GP surgery. There is opportunity for the site to contribute to the development of green infrastructure to support health and well-being. It should be noted that the current supply of health care services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on initial masterplan proposals for this site, it is considered that the site could accommodate circa 360 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 1,000m of the village centre of Blythe Bridge and Forsbrook as well as being adjacent to areas of open space. Whilst the site is within 500m of a bus stop and 1,200m of a train station, allocation is not likely to contribute to helping minimise an increase in car journeys. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site (Northern Gateway Opportunity Site)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 1,000m of the village centre and the nearest main service centre is Cheadle 5 miles away. The location of the site is likely to encourage journeys being made by car. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>The western boundary of the site is adjacent to a flood zone 2 and 3 area and, as such, it may be considered that the site would need to address risk from flooding. The development of a greenfield site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to an increased water demand within the District. Overall, this site has been assessed as having a neutral effect on this objective, however the exact effects are uncertain.</p>	0/?
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is more than 4,000m from Coyney Woods (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. There are a number of ponds and mature trees on site. Ecological assessment is required. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been indicated on Natural England's predictive map of Best and Most Versatile land as having a "High" (over 60% area bmv) of being predictive BMV land so development of</p>	--

SA Objective	Assessment Criteria - Does the site (Northern Gateway Opportunity Site)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>this site may result in the loss of best and most versatile land. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>There is one designated heritage asset (Grade II listed) within 500m of the site. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of this heritage asset and its setting. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.</p>	0/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would be more than 4,000m of Coyney Woods (LNR). Given the location of the site, it is considered that there could be effects on landscape character. The northern part of the site is within the important landscape setting to settlement. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential and mixed use of this site provides scope for investment in culture and tourism within the district and the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ECONOMIC</b>			

SA Objective	Assessment Criteria - Does the site (Northern Gateway Opportunity Site)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential and mixed use site with a good strategic location considered to have regional significance has scope to have a positive effect on the vitality and viability of the wider District. Overall, this has been assessed as having a significant positive effect on this Objective.	++
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure and is considered an excellent employment location for premium uses. Overall, this site has been assessed as having a positive effect on this Objective.	+
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	This is a large site with good access to the strategic road network with opportunity to provide both new homes and employment opportunities, including for premium uses. Overall, this site has been assessed as having a positive effect on this Objective.	+
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 360 dwellings is considered to have a significant positive effect. Similarly, the site's good strategic location (with regional significance) has scope to have a positive effect on the vitality and viability of the wider District and could encourage investment in people, jobs and infrastructure. However, the development of greenfield land, partly within the important landscape setting to the settlement, and indicated on the predictive map of Best and Most Versatile land as an area where more than 60% of the land is likely to be BMV, is assessed as having a significant negative effect, similarly the potential ecological value of the site and the effects on climate change resulting from the likelihood of the location supporting journeys made by car are assessed as negative.</p>

<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>Deliver development directed towards areas of least flood risk?</li> <li>Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>The masterplan shows development on land in Flood Zones 2 and 3. It also shows a diversion of Black Brook and the breaking out of the brook from its existing culvert. Site remediation and potential ground water contamination need to be addressed. The development could be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a significant negative effect on this objective. There will need to be a creative approach to flood risk potentially locating car parking, employment</p>	--

SA Objective	Assessment Criteria - Does the site (OC001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>and visitor attractions within the flood zones to make most effective use of available land.</p> <p>The site is adjacent to Churnet Valley SSSI (including ancient woodland) the nearest designated asset, and potential effects on this asset need to be considered. The site is also adjacent to Harston Hill SBI Froghall Wharf to the north east. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on brownfield land and development of this site is not likely result in the loss of best and most versatile land. However whilst the scale and nature of contamination on the site resulting from its previous use remains uncertain, it is considered to be a high risk in some areas. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>There is scope to enable the re-use of existing buildings or that the development could use sustainable materials or increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>There is one Grade II Listed Building within the site boundary and an additional five Listed Buildings in the 400m buffer. The Caldon Canal Conservation Area is adjacent to the northern boundary of the site. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these heritage assets and their settings. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>

SA Objective	Assessment Criteria - Does the site (OC001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site is located within the Churnet Valley, a high quality natural environment. There are areas of woodland and tree belts within the site, particularly in the south. Given the location of the site, it is considered that effects on landscape character are likely. Proposal specific information is required to assess the significance of any impact and identify any mitigation measures. Overall, this site has been assessed as having a significant negative effect on this Objective however the exact effects are uncertain.</p>	<p>--/?</p>
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>A mixed use of this site in line with Core Strategy policy may support investment in culture and tourism. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed mixed use development of a site close to the village centre of Froghall has scope to have a positive effect on the vitality and viability of the rural economy and the wider District, as new residents and visitors could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure, including through the delivery of new employment, leisure and tourist-related retail and accommodation facilities. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	<p>Mixed use development may support some new employment opportunities. The existing Thomas Bolton operation on site should be safeguarded. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p><b>Summary of overall assessment and likely significant effects:</b></p>			

SA Objective	Assessment Criteria - Does the site (OC001)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		<p>The proposed delivery of a mixed use development including the potential for housing, employment, leisure and tourist-related retail and accommodation is considered to have a significant positive effect, as could the site's accessibility to areas of open space and possible contribution to investment in tourism. Re-development of a previously developed site, now under-used, is also considered to have positive effects. However the site is inaccessible to services and facilities which is likely to have a significant negative effect, as is the potential impact on landscape character and heritage assets. Similarly the proximity to a SSSI and SBI and proposals for development on land in Flood Zones 2 and 3 are likely to lead to negative effects.</p>	

**Werrington and Cellarhead**

**WE042 WE043: Land off Tregaron Court/Langton Court**

SA Objective	Assessment Criteria - Does the site (WE042/WE043) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The development of this site, a greenfield site that is set outside of the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located within 800m of the village centre and the range of services and facilities that can be found here that could serve prospective residents of the site. It should be noted that the current supply of educational services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (WE042/WE043) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. It should be noted that the current supply of health care services and facilities currently falls short of demand and the situation is likely to worsen in the future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 105 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 800m of the village centre of Werrington and Cellarhead and a GP surgery as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (WE042/WVE043) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>		
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site is within 500m from Wetley Moor SSSI, the nearest designated asset, and, as such, is considered to have an effect on this asset. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. Ecological survey is required.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> </ul>	As noted, this site has been assessed as being on greenfield land. However, the land has also been indicated on Natural England's predictive map of Best and Most Versatile land as having a "moderate" likelihood (20- 60% area bmv) of being predictive BMV land so development of this site may result in the loss of best and most versatile	-

SA Objective	Assessment Criteria - Does the site (WE042/WE043) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	land. Overall, this site has been assessed as having a negative effect on this Objective.	
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 100m of the grade II listed asset Ash Hall. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of this historical heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site would be within 500m of Wetley Moor SSSI and would increase external pressures on this sites. The site is within the area considered to be important landscape setting to the settlement. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			

SA Objective	Assessment Criteria - Does the site (WE042/WE043) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with good access to the village centre of Werrington and Cellarhead has scope to have a positive effect on the vitality and viability of Werrington and Cellarhead and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<b>Summary of overall assessment and likely significant effects:</b>			
The proposed delivery of circa 105 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to services and facilities and areas of open space is likely to have a positive effect. However, the site is inaccessible to areas of existing employment which would have a significant negative effect, as would the site's proximity to designated assets. Similarly, the development of greenfield land with the potential for loss of best and most versatile agricultural land and the site's proximity to historic assets is assessed as having a negative effect.			

Table 15.322

## **15.9 Additional site appraisals December 2017**

15.9.1 Leek

LE219 (Eaton House, Buxton Road) - Residential / Mixed use

SA Objective	Assessment Criteria - Does the site(LE219)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>As the site is located on the edge of the town centre of Leek it could be considered that the redevelopment of this mixed brownfield site could help to improve the social and environmental quality of the town centre. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>Given the edge of town centre location of this site, it can be considered that the site would be in relative proximity to a wide range of key services and facilities. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The site is within 800m of a GP surgery and a number of areas of open space within the town, including Birch Gardens Park. The residential or mixed use development of this should have a positive effect on health. However, it should be noted that the supply of health care services and facilities is currently adequate but is expected to be outstripped by future demand which may require additional investment through, for example, developer contributions. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site(LEZ19)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development could include aspects of good design which could help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 10 dwellings as part of a mixed use scheme or 15 dwellings for residential use only and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>The town centre location of this site means that it is within 500m of a number of bus stops as well as a range of other services and facilities. It could be considered that the site could have a positive effect on walking and cycling given the proximity of open space to the site. Overall, the site has been assessed as having a positive effect on this objective.</p>	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?

SA Objective	Assessment Criteria - Does the site(LE219)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site could not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 500m away from Brough Park Fields (LNR) and, as such, is considered to have no effect on this asset. The Ecological Study (2015) notes that the site has very low biodiversity value overall with extremely poor connectivity to the wider countryside, is set within an urban environment and only has one tree and species poor amenity grassland with no connectivity to the wider countryside. However, the tree and building have some potential to support roosting bats therefore the site is attributed some ecological value. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	<p>+/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>The site has been assessed as being a brownfield site, similarly it is classified as urban ALC land. As such, the development of this site could avoid the loss of best and most versatile agricultural land. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	<p>++</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>The development of this brownfield site could enable the re-use of existing buildings within the town centre. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>

SA Objective	Assessment Criteria - Does the site(LEZ19)...?	Commentary on likely nature of effects of site allocation	Overall assessment
13. To protect and enhance the character of towns /villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 400m of one grade II* listed asset and 10 grade II listed assets. It is considered that the development of this site could affect the setting of these assets. It should be noted that the site is within 400m of Leek Conservation Area which has previously been placed on the Heritage at Risk register by Historic England. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site could avoid development within 1,000m of protected sites and could reduce external pressures on these sites. Given the location of the site, it is considered that there could be limited effects on landscape character. Proposal specific information is required to assess the impact upon the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>Given the proposed residential or mixed use of this site and its location, there is scope that the site could support opportunities for investment in culture and tourism and should have a positive effect on the local economy. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed loss of an employment site within the town centre has the scope to have an effect on the vitality and viability of Leek and the wider District, as new residents could be expected to increase footfall in the nearby town centre, however employment opportunities may be lost. Overall, this site has been assessed as having a neutral effect on this objective although exact effects are uncertain.</p>	0/?
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site and the proposed loss of all or some employment use of the site could be considered to have a negative effect on businesses and the residents of Leek as it could lead to loss of job opportunities. Overall, this has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Does the site(LE219)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is within 500m of existing areas of employment within the town or District and, as such, could provide sufficient accessible employment opportunities for prospective residents as well as potentially new employment provision on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 15 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and the town centre with its range of services and facilities, including employment opportunities is likely to have a positive effect. As is the re-use of previously developed land and low biodiversity value of the site. However the proposed loss of all or some employment use of the site could be considered to have a negative effect on businesses and the residents of Leek as it could lead to loss of job opportunities, this is likely to have a negative effect, as is the site's proximity to heritage assets. An applicant should be required to provide an NPPF compliant heritage statement.</p>			

**Table 15.323**

15.9.2 Biddulph

Land at Coppice Wood

SA Objective	Assessment Criteria - Does the site (Land at Coppice Wood)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site borders the settlement boundary of Biddulph but is outside of the boundary. The development of this site, a greenfield site that is part of linear woodland, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>Whilst the site is located on the outside of the settlement boundary, it is within 1,500m of the town centre and the wide range of key services and facilities that can be found here that could serve prospective residents of the site. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, outside of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. However, the site is more than 1,200m from a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0

SA Objective	Assessment Criteria - Does the site (Land at Coppice Wood)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Deliver development that reduces actual levels of crime?</li> <li>Deliver development that helps to reduce fear of crime?</li> </ul>	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on comments from the site promoters, it is considered that the site could accommodate circa 4 dwellings and is unlikely to provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.	+
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 1,500m of the town centre of Biddulph and adjacent to the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 1,500m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise emissions of airborne pollutants?</li> <li>Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

SA Objective	Assessment Criteria - Does the site (Land at Coppice Wood)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	<p>+</p>
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is over 2,250m from Biddulph Valley Way (Whitemoor) (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. The site includes mature trees some of which have TPOs. It is part of the linear woodland proposed as Local Green Space 18 (Braddocks Hay) and as such is part of an important wildlife corridor into the surrounding countryside. Ecological survey is required. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain.</p>	<p>--/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. The land is indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be BMV and so development of this site may result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site may not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>

SA Objective	Assessment Criteria - Does the site (Land at Coppice Wood)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is more than 400m from any known heritage assets, the nearest designated asset is grade I listed Biddulph Grange Garden which is circa 2000m to the north of the site. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of this, or other, heritage assets. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressure on such sites. However given the location of the site, within Green Belt and the important landscape setting to the settlement, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site with good access to the town centre of Biddulph has scope to have a positive effect on the vitality and viability of Biddulph and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0

SA Objective	Assessment Criteria - Does the site (Land at Coppice Wood)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 1,000m of existing areas of employment within the town or District and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 4 dwellings is considered to have a positive effect. The site is also accessible to existing services, facilities and existing areas of employment and this is also likely to have a positive effect, as could its distance away from heritage assets. However, the development of greenfield land, indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be BMV, located within Green Belt and within the important landscape setting to the settlement is assessed as having a negative effect. Similarly the site is part of the linear woodland proposed as Local Green Space 18 (Braddocks Hay) and as such is part of an important wildlife corridor into the surrounding countryside and this is also likely to have a negative effect. Ecological and landscape impact assessments are required.</p>			

**Table 15.324**

**Land at Newpool Farm (west of BD063a)**

SA Objective	Assessment Criteria - Does the site (Land west of BD063a)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Make a positive contribution towards community cohesion?</li> <li>Offer opportunity to improve neighbourhood quality?</li> <li>Offer opportunity to provide open space and support Green Infrastructure?</li> <li>Risk unacceptable light and noise pollution?</li> <li>Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The site borders the settlement boundary of Biddulph but is outside of the boundary. The development of this site, a greenfield site that is set within the open countryside, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (Land west of BD063a)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>As noted, the site is outside of the settlement boundary of Biddulph. The site would be within 800m of a wide range of services and facilities. For example, the site is in proximity to James Bateman Junior High School and Knypersley High School. Similarly, given the size of development proposed there is scope that additional key services and facilities could be brought forward through developer contributions. It should be noted that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site, on the border of the settlement boundary, should provide residents with good access to the open countryside and help to support healthy lifestyles. Similarly, the site is within 1,200m of a GP surgery, adjacent to national route 55, part of the national cycle network and within 500m of the Biddulph Valley Way. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on a density of 30dph, it is considered that the site including BD063a could accommodate circa 240 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> </ul>	<p>As noted previously, the site is within 800m of the town centre of Biddulph and a GP surgery and this should reduce the need to travel within the town. Similarly, the site is located near to a number of bus stops and within 500m of the Biddulph Valley Way. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (Land west of BD063a)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the site is within 800m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site is over 2,000m from Roe Park Woods SSSI, the nearest designated asset, and, as such, is considered to have no effect on this asset. The Ecological Study (2015) of BD063a notes that the site has mostly low biodiversity value overall in terms of the species poor grassland area but has some fairly biodiverse areas connected by hedgerows to the south and north; the site is attributed some ecological value due to the presence of trees with bat roosting potential. The HRA	-/?

SA Objective	Assessment Criteria - Does the site (Land west of BD063a)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. Further ecological survey is required.</p> <p>As noted, this site has been assessed as being on greenfield (agricultural) land. However, the land is also indicated on the predictive map of best and most versatile agricultural land as partly urban to the east and to the west as within an area where 20-60% of the land is likely to be BMV, so development of this site may result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 700m of seven grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these heritage assets and their settings. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. An applicant should be required to provide an NPPF compliant heritage statement.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> </ul>	<p>The site would avoid development within 1,000m of protected sites and would reduce external pressure on such sites. Given the location of the site on the edge of settlement within the Green Belt, it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries</p>	-/?

SA Objective	Assessment Criteria - Does the site (Land west of BD063a)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective although exact effects are uncertain. Landscape impact assessment is required.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site has scope to have a positive effect on the vitality and viability of Biddulph and the wider District. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m of local employment provision and, as such, would provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 240 dwellings should have a significant positive effect. The site is also accessible to existing services, facilities and areas of employment which is likely to have positive effects. Similarly the location of the site, outside flood zones 2 and 3 and close to the open countryside and walking and cycling routes are also likely to lead to positive effects. However, the site's potential ecological value and contribution to Green Infrastructure is considered likely to have a negative effect, further ecological survey is required. Similarly, the development of greenfield land, partly indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be BMV is likely</p>			

SA Objective	Assessment Criteria - Does the site (Land west of BD063a)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	to have a negative effect, landscape impact assessment is required. The Council's Green Belt study indicated that BD063a may be suitable for release from the Green Belt if exceptional circumstances can be demonstrated. The site's proximity to historic assets are also assessed as having a negative effect, an applicant should be required to provide an NPPF compliant heritage statement.

CH146 and CH147 Land north of Park Drive and adjacent to Bungalow Farm - employment use

SA Objective	Assessment Criteria - Does the site (CH146 and 147)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The site is located outside of the settlement boundary within the open countryside. The development of this site, a greenfield site, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-?
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located within 1,200m of the town centre and the wide range of key services and facilities that can be found here that could serve prospective employees and visitors of the site. It should be noted that the supply of community facilities and services is currently adequate but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide employees with good access to the open countryside and help to support healthy lifestyles. Similarly, the site is within 1,200m of a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (CH146 and 147)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	This site has been proposed for employment uses with regards to this assessment. Therefore the development would provide no housing. Overall, this site has been assessed as having a neutral effect on this Objective.	0
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 1,200m of the town centre of Cheadle and within to the open countryside which should reduce the need to travel within the town. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 1,200m of the town centre and could reduce the need to travel. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

SA Objective	Assessment Criteria - Does the site (CH146 and 147)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>The site is located outside flood zone 2 or 3 areas and, as such, it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is within 1000m of Cecilly Brook (LNR), the nearest designated asset, but is not considered to have an effect on this asset. This site has not been subject to an ecology survey, so the exact effects are uncertain. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a neutral effect on this Objective, although the exact effects are uncertain.</p>	0/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. Similarly, the land has also been indicated on the predictive map of best and most versatile agricultural land as partly within an area where 20 - 60% of the land is likely to be bmv and partly within an area where over 60% of the land is likely, so development of this site may result in the loss of best and most versatile agricultural land. The site is within the mineral safeguarding area for bedrock sand. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic</li> </ul>	<p>The site is within 500m of two grade II listed assets. Dependent on proposal specific information, there is scope that development of this</p>	-/?

SA Objective	Assessment Criteria - Does the site (CH146 and 147)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>heritage assets (designated and non-designated assets) along with their settings?</li> <li>Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>site could lead to the deterioration of the setting of these heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. An applicant should be required to provide an NPPF compliant heritage statement.</p>	
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>Given the location of the site, on the edge of the town within Green Belt and the important landscape setting to the settlement, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective, although the exact effects are uncertain. Landscape impact assessment is required. The Council's Green Belt review considers the site as included within parcel S13 (land to the north west of Cheadle, south west of the A522 and is considered by the study to contribute to the openness of the land in a relatively accessible location as well as being part of the setting for Cheadle.</p>	-/?
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed employment use of this site provides scope for the development of this site to have a positive effect upon investment in culture and tourism within the town and wider district, however this is dependent on proposal specific information. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of an employment site with access to the town centre has the scope to have a positive effect on the vitality and viability of Cheadle and the wider District, as new employment could be expected to increase footfall in the nearby town centre. Overall, this site has been assessed as having a positive effect on this objective.</p>	+

SA Objective	Assessment Criteria - Does the site (CH146 and 147)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site and the proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Cheadle as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.	++
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is proximity to areas of existing local employment provision as well as new employment provision generated by this site. Overall, this site has been assessed as having a significant positive effect on this objective.	++
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The development of new employment premises should have a significant positive effect upon the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the site's accessibility to other services and facilities is likely to have a positive effect, as could its location away from flood zones 2 and 3. In addition the site is located within the Churnet Valley Area, considered as an area for sustainable tourism and rural regeneration. However, the development of greenfield land within Green Belt and the important landscape setting to the settlement is likely to lead to negative effects. Similarly the site is indicated on the predictive map of best and most versatile agricultural land as partly within an area where 20 - 60% of the land is likely to be brm and partly within an area where over 60% of the land is likely, so development of this site may result in the loss of best and most versatile agricultural land. The site is within the mineral safeguarding area for bedrock sand and this is assessed as having a negative effect. An applicant should be required to provide an NPPF compliant heritage statement, ecological survey and landscape impact assessment.</p>			

**Table 15.326**

**Land at Friars Close**

SA Objective	Assessment Criteria - Does the site (Land at Friars Close)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Make a positive contribution towards community cohesion?</li> <li>Offer opportunity to improve neighbourhood quality?</li> </ul>	The site is located outside of the settlement boundary within the open countryside. The development of this site, a greenfield site, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-

SA Objective	Assessment Criteria - Does the site (Land at Friars Close)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>		
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is within 500m of the town centre and the wide range of key services and facilities that can be found here that could serve prospective residents of the site. It should be noted that the supply of community facilities and services is currently adequate but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to the open countryside and areas of open space which should help to support healthy lifestyles. Similarly, the site is within 500m of a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on representations promoting this site, it is considered that the site could accommodate circa 5 dwellings and therefore it is unlikely also to provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>6. To strengthen links between rural areas and towns by sustainable forms</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> </ul>	<p>As noted previously, the site is within 500m of the town centre of Cheadle and a GP surgery and adjacent to an area of open space</p>	+

However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, the sites have been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>		<p>This sites have been proposed for employment use with regards to this assessment. Therefore the developments would provide no housing. Overall, the sites have been assessed as having a neutral effect on this Objective.</p>	0
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>		<p>As noted, the sites are more than 1,200m from the town centre of Cheadle and a GP surgery and this could be expected to increase the need to travel. However, the sites are near to the open country side and an area of open space and a number of bus stops. Similarly, the development of sites may lead to the provision of additional public transport services. Overall, these sites have been assessed as having a neutral effect on this Objective.</p>	0
<b>ENVIRONMENTAL</b>				

SA Objective	Assessment Criteria - Do the sites (Three sites at Brookhouses)....?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of these sites could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However, the sites are more than 1,200m from the town centre and could increase the need to travel. Overall, the sites have been assessed as having a negative effect on this Objective.</p>	-
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, these sites have been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the sites are located outside of a flood zone 2 or 3 area it can be considered that the sites would not be subject to risk from flooding. The development of these sites could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, these sites have been assessed as having a positive effect on this objective.</p>	+
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The sites are over 1,750m from Whitfield Valley (LNR), the nearest designated asset, and, as such, are considered to have no effect on this asset. Sites 1 and 2 are wooded, site 3 has trees and hedgerow and thus all could be expected to have ecological value. The HRA notes that no direct impacts upon the SPA are predicted from these sites. Overall, the sites have been assessed as having a significant negative effect on this Objective, however the exact effects are uncertain. Ecological survey is required.</p>	--/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> </ul>	<p>As noted, the sites have been assessed as being on greenfield land. However the sites are indicated on the predictive map of best and most versatile agricultural land as within areas where less than or equal to 20% of the land is likely to be BMV (site 2 and part of site 3); 20-60% of the land is likely (site 1) and where greater than 60% of</p>	-

SA Objective	Assessment Criteria - Do the sites (Three sites at Brookhouses)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>the land is likely to be BMV (remaining part of site 3) and so development of the sites may result in the loss of best and most versatile agricultural land. The southern part of site 2 and all of site 3 are within the mineral safeguarding area for bedrock sand. Overall, the sites have been assessed as having a negative effect on this Objective.</p>	
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of these sites may not enable the re-use or loss of existing buildings, although site 1 includes a depot building. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, these sites have been assessed as having a neutral effect on this Objective.</p>	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The sites are more than 1,000m away from any known heritage asset. Dependent on proposal specific information, there is limited scope that development of the sites could lead to the deterioration of the setting of a heritage asset. Overall, these sites have been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The sites would avoid development within 1,000m of protected sites and would reduce external pressures on such sites. Given the location of the sites, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. The sites lie within parcel S15 (land to the west of Cheadle, south of the A521) identified in the Council's Green Belt study as helping to maintain the western edge of Cheadle and thereby the broader separation of Cheadle from the Stoke conurbation to the west. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

SA Objective	Assessment Criteria - Do the sites (Three sites at Brookhouses)....?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed employment use of the sites provide scope for development to have a positive effect on investment in culture and tourism within the town and wider district, however this is dependent on proposal specific information. Overall, the sites have been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of employment sites on the edge of the town has the scope to have a positive effect on the vitality and viability of Cheadle and the wider District, as new employment could be expected to increase footfall in the nearby town centre. Overall, this site has been assessed as having a significant positive effect on this objective.	++
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of these sites and the proposed employment use of the sites could be considered to have a positive effect on businesses and the residents of Cheadle as it could strengthen and diversify the economy. Overall, this has been assessed as having a significant positive effect on this Objective.	++
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is proximity to areas of existing local employment provision as well as new employment provision generated by the sites. Overall, these sites has been assessed as having a significant positive effect on this objective.	++
<b>Summary of overall assessment and likely significant effects:</b>			
The development of new employment premises should have a significant positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. Similarly, the sites' location away from heritage assets and floodzones 2 and 3 are likely to have positive effects. However negative effects are likely to result from the development of greenfield land where sites are indicated on the predictive map of best and most versatile agricultural land as within areas where less than or equal to 20% of the land is likely to be BMV (site 2 and part of site 3); 20-60% of the land is likely (site 1) and where greater than 60% of the land is likely to be BMV (remaining part of site 3) such that development of the sites may result in the loss of best and most versatile agricultural land. The southern part of site 2 and all of site 3 are within the mineral safeguarding area for bedrock sand and this is also likely to lead to negative effects. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area and other			

SA Objective	Assessment Criteria - Do the sites (Three sites at Brookhouses)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	landscapes impact. The sites lie within parcel S15 (land to the west of Cheadle, south of the A521) identified in the Council's Green Belt study as helping to maintain the western edge of Cheadle and thereby the broader separation of Cheadle from the Stoke conurbation to the west. Given the wooded nature of the sites, potential ecological value is also likely to have a negative effect.

**CH083 (Land east of Abbot's Haye, Cherry Lane)**

SA Objective	Assessment Criteria - Does the site (CH083)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The site is located on the outside of the settlement boundary within the open countryside. The development of this site, a greenfield site, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	As noted, the site is located on the outside of the settlement boundary to the north east of Cheadle. The site is around 1,500m away from the town centre which could result in existing services and facilities being inaccessible. It should be noted that the supply of community facilities and services is currently adequate but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a neutral effect on this Objective.	0
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> </ul>	The location of this site should provide residents with good access to the open countryside and areas of open space which should help to	0

SA Objective	Assessment Criteria - Does the site (CH083)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Help to reduce health inequalities?</li> <li>Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>support healthy lifestyles. Similarly, the site is around 1,500m of a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Deliver development that reduces actual levels of crime?</li> <li>Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 20 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is around 1,500m of the town centre of Chedale and a GP surgery and adjacent to an area of open space. However the site is remote from the main urban area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Similarly, the site is around 1,500m from the town centre and could increase the need to travel. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-

8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>The site is located outside of a flood zone 2 or 3 area and, as such, it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is within 400m of Hales Hall Pool (LNR), the nearest designated asset. It could be considered that development of this site could lead to short-term disturbances of this habitat and possibly long term also. The site is also around 1,000m of ancient woodland at Hawksmoor nature reserve. This could therefore have an adverse effect on the District's Green Infrastructure network. The site is surrounded by mature trees and has potential for some ecological value. Ecological survey is required. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. The land has also been indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be BMV, so development of this site could result in the loss of best and most versatile land. The site lies within the mineral safeguarding area for bedrock sand. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?

SA Objective	Assessment Criteria - Does the site (CH083)...?	Commentary on likely nature of effects of site allocation	Overall assessment
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 200m of three grade II listed heritage assets and one grade II* asset: Hales Hall. Although dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these heritage assets. Overall, this site has been assessed as having a neutral effect on this Objective. An applicant should be required to provide an NPPF compliant heritage statement.	0
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site would deliver development within the proximity of protected sites and may increase external pressures on these sites. Given the remote location of the site it is considered that there would be scope for effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area and other landscape impact. The site is considered to form part of the remnant historic landscape associated with Hales Hall. Overall, this site has been assessed as having a significant negative effect on this Objective, although the exact effects are uncertain. Landscape impact assessment is required.	--/?
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the town and wider district. However, the increased population of both the town and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			

SA Objective	Assessment Criteria - Does the site (CH083)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site close to Cheadle has scope to have a positive effect on the vitality and viability of Cheadle and the wider District, however there is not good access to the town centre and this may limit the extent to which it may be expected that new residents could increase footfall. Overall, this has been assessed as having a neutral effect on this Objective.	0
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is within 1000m of existing areas of employment within the town and, as such, would provide some accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 20 dwellings is considered to have a significant positive effect, as could the site's location outside of flood zones 2 and 3. However the site is remote from the main urban area and its lack of accessibility to a range of services and facilities is likely to have a negative effect. Similarly negative effects are likely to result from the development of this greenfield site, indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be BMV, such that development of this site could result in the loss of best and most versatile land. The site also lies within the mineral safeguarding area for bedrock sand. The site's proximity to designated natural and heritage assets is likely to lead to negative effects. An applicant should be required to provide an NPPF compliant heritage statement. The site is also considered to form part of the remnant historic landscape associated with grade I* listed Hales Hall. Landscape impact and ecological assessments are required.</p>

Alton

AL013: Land off Cedarhill

SA Objective	Assessment Criteria - Does the site (AL013)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The development of this site, a greenfield site that is set outside of the village boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located on the outside of the village boundary, but is within 800m of the village centre and the range of services and facilities that can be found here that could serve prospective residents of the site. It should be noted that Alton does not have a secondary school and that the current supply of educational services and facilities is currently adequate but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 800m of a GP surgery. It should be noted that the current supply of health care services and facilities is currently adequate but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (AL013)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 75 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 800m of the village centre of Alton and a GP surgery as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.	+
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

SA Objective	Assessment Criteria - Does the site (AL013)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is within 1,000m of Castle Wood SBI, the nearest designated asset, and, as such, is considered to have an effect on this asset. There are mature trees on site. An ecological study would be required. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 under the Agricultural Land Classification system, so development of this site is not likely to result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. The site lies within the Mineral Safeguarding Areas for bedrock sand and building stone. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>13. To protect and enhance the character of towns / villages and other</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic</li> </ul>	<p>The site is within 500m of eight grade II listed assets. Dependent on proposal specific information, there is scope that development of this</p>	-/?

SA Objective	Assessment Criteria - Does the site (AL013)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>heritage assets (designated and non-designated assets) along with their settings?</li> <li>Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>site could lead to the deterioration of heritage assets and their settings. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. An applicant should be required to provide an NPPF compliant heritage statement.</p>	
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would be within 1,000m of Castle Wood SBI and could increase external pressures on the site. Given the location of the site within an area identified in the Landscape and Settlement Character Assessment as being important to the setting of the settlement, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective, however a landscape impact study should be required.</p>	-
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site with good access to the village centre of Alton has scope to have a positive effect on the vitality and viability of Alton and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0

SA Objective	Assessment Criteria - Does the site (AL013)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 75 dwellings is considered to have a significant positive effect. Similarly, the site's proximity to health care services and facilities is likely to have a positive effect. However, the site is relatively inaccessible to areas of existing employment which is likely to have a significant negative effect. The development of greenfield, grade 4 ALC land is also assessed as having a negative effect, as is the site's proximity to natural and historic assets and potential impacts on landscape quality and the availability of non renewable resources.</p>			

**Table 15.330**

**Biddulph Moor**

**Land at Church Lane (includes small part of BM012)**

SA Objective	Assessment Criteria - Does the site (Land at Church Lane) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Make a positive contribution towards community cohesion?</li> <li>Offer opportunity to improve neighbourhood quality?</li> <li>Offer opportunity to provide open space and support Green Infrastructure?</li> <li>Risk unacceptable light and noise pollution?</li> <li>Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The development of this site, predominantly previously developed (brownfield) land within the village boundary and partially greenfield in the Green Belt outside the village could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a neutral effect on this Objective.	0
<b>SOCIAL</b>			

SA Objective	Assessment Criteria - Does the site (Land at Church Lane) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located on the edge of the village, partially within the village boundary. It is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Biddulph Moor does not have a secondary school and that education facilities and services within the town have adequate supply at present but it is expected to be outstripped by future demand. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Biddulph Moor does not have a GP surgery. It should be noted that supply for health care services and facilities currently falls short of demand and this is expected to worsen in the future without additional investment. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on representation LPPO2555, it is considered that the site could accommodate circa 3 dwellings and therefore may not provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 400m of the village centre of Biddulph Moor as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

**Blythe Bridge**

**Land at Uttoxeter Road**

SA Objective	Assessment Criteria - Does the site (Land at Uttoxeter Road)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		<b>SOCIAL</b>	

SA Objective	Assessment Criteria - Does the site (Land at Uttoxeter Road)...?	Commentary on likely nature of effects of site allocation	Overall assessment
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The development of this site, a large greenfield site that is located outside of the village boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective</p>	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located close to the A50 from Staffordshire Moorlands District boundary to Stoke on Trent. It is over 1,500m of the village centre and the range of services and facilities that can be found here that could serve prospective residents of the site. It should be noted that the current supply of educational and community services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 1,500m of a GP surgery. It should be noted that the current supply of health care services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> </ul>	<p>Based on a density of 30 dph, it is considered that the site could accommodate circa 210 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (Land at Uttoxeter Road)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>locations and including affordable / social /extra care housing.</p> <p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 1500m of the village centre of Blythe Bridge and Forsbrook as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop and 1500m of Blythe Bridge train station. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 1500m of a railway station and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>The site is located outside of a flood zone 2 or 3 area and it can be considered that the site would not be subject to risk from flooding. However there are known surface water flooding issues at the site and the development of a greenfield site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to an increased water demand within the District. Overall, this site has been assessed as having a negative effect on this objective, however the exact effects are uncertain.</p>	-/?

SA Objective	Assessment Criteria - Does the site (Land at Uttoxeter Road)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is more than 2,000m from Coyney Woods (LNR), the nearest designated asset, and, as such, is considered likely to have no effect on this asset. There are semi-mature and mature trees on site, an ecological survey would be required. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>Help safeguard the best and most versatile agricultural land?</li> <li>Deliver development that helps to minimise the loss of greenfield land?</li> <li>Offer opportunities to reduce land contamination / instability?</li> <li>Deliver development that helps reduce the amount of derelict land?</li> <li>Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land within the Green Belt. However, the land has also been assessed as grade 4 ALC land so development of this site is not likely to result in the loss of best and most versatile land. The site is within the mineral safeguarding area for superficial sand and gravel. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to reduce waste generation?</li> <li>Offer opportunities to maximise the re-use of existing buildings?</li> <li>Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is more than 400m from a listed asset. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of these historical heritage assets. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
<p>14. To protect and enhance the character and appearance of the landscape including historic</p>	<ul style="list-style-type: none"> <li>Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> </ul>	<p>The site would be more than 3,000m of Coyney Woods (LNR). Given the location of the site, it is considered that there could be effects on</p>	0

SA Objective	Assessment Criteria - Does the site (Land at Uttoxeter Road)...?	Commentary on likely nature of effects of site allocation	Overall assessment
landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with good access to the village centre of Blythe Bridge and Forsbrook has scope to have a positive effect on the vitality and viability of Blythe Bridge and Forsbrook and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is within 500m to an existing area of employment within the village or wider area and, as such, could provide accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>Summary of overall assessment and likely significant effects:</b>			

SA Objective	Assessment Criteria - Does the site (Land at Uttoxeter Road)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	The proposed delivery of circa 210 dwellings is considered to have a significant positive effect, as is the accessibility of the site to services and facilities and public transport. Similarly, the site's accessibility to areas of existing employment is likely to have a positive effect, as could the site's location away from historic assets. However, the site is subject to surface water flooding which is likely to have a negative effect. Similarly, the development of a large greenfield site within the Green Belt and the mineral safeguarding area for superficial sand and gravel is likely to have a negative effect.		

Table 15.332

**BB042 / BB043**

SA Objective	Assessment Criteria - Does the site (BB042 / BB043)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The development of this site, a large greenfield site that is located outside of the village boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	The site is located on the edge of the village, it is within 1,200m of the village centre and the range of services and facilities that can be found here that could serve prospective residents of the site. It should be noted that the current supply of educational and community services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (BB042 / BB043)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 1,200m of a GP surgery. It should be noted that the current supply of health care services and facilities is currently exceeding demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 190 dwellings. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 1,200m of the village centre of Blythe Bridge and Forsbrook as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop and 2,000m of a train station. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 1,200m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (BB042 / BB043)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>		
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	The site is located outside flood zone 2 and 3 areas and, as such, it can be considered that the site would be not be subject to risk from flooding. The development of a greenfield site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to an increased water demand within the District. Overall, this site has been assessed as having a neutral effect on this objective, however the exact effects are uncertain.	0/?
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site is more than 3,000m from Coyney Woods (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. There are mature trees and hedgerows on site, ecological survey is required. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> </ul>	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as urban ALC land so development of this site would not result in the loss of best and most versatile agricultural land. However the site is within the mineral safeguarding area for bedrock sand. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (BB042 / BB043)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>		
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns /villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 400m of a grade II listed asset (Cashheath Farmhouse). Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of this heritage asset. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. An applicant should be required to provide an NPPF compliant heritage statement.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site would be more than 3,000m of Coyney Woods (LNR). Given the location of the site, within the important landscape setting to settlement, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective.	-
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>

Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of designated heritage assets. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.</p>	+/?
<p>14. To protect and enhance the character and appearance of the landscape including historic</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> </ul>	<p>The site would be more than 1,250m from Marshes Hill Common (LNR). Given the location of the site within the important landscape</p>	-

SA Objective	Assessment Criteria - Does the site (BE035)...?	Commentary on likely nature of effects of site allocation	Overall assessment
landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>setting to settlement, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site with good access to the village centre of Brown Edge has scope to have a positive effect on the vitality and viability of Brown Edge and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	<p>The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
<p><b>Summary of overall assessment and likely significant effects:</b></p>			

SA Objective	Assessment Criteria - Does the site (BE035)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. Similarly, the site's distance away from historic assets is likely to have a positive effect. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. Similarly, the development of greenfield, grade 4 ALC land within Green Belt, important landscape setting to settlement and the mineral safeguarding area for silica sand is assessed as having a negative effect, as is the potential ecological value of the site.	

Table 15.334

**Supermarket, 199 High Lane ST6 8QA**

SA Objective	Assessment Criteria - Does the site (199 High Lane)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The development of this site, previously developed land that is at the centre of the village, could be expected to have an effect on environmental quality. Dependant on proposal specific information. Overall, this site has been assessed as having a neutral effect on this Objective, although exact effects are uncertain.	0/?
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	The site is located within the village centre. The proposal is considered to include retention of existing retail use. It should be noted that Brown Edge does not have a secondary school but supply of educational and community services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (199 High Lane)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Brown Edge does not have a GP surgery and that the GP surgery serving the settlement currently has adequate supply but is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on an assessment of site potential and density of 30dph, it is considered that the site could accommodate circa 3 dwellings and is therefore unlikely to provide a quantum of affordable housing on site. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within the village centre of Brown Edge which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>

SA Objective	Assessment Criteria - Does the site (199 High Lane)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>		
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of a brownfield site could help to avoid reduction of natural drainage. However the development could be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site is more than 1,250m from Marshes Hill Common (LNR), the nearest designated asset, and, as such, is considered to have no effect on this asset. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a positive effect on this Objective, however the precise effects are uncertain.	+/?
11. To safeguard the best and most versatile agricultural land and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> </ul>	As noted, this site has been assessed as being on previously developed land so development would not result in the loss of best and most versatile agricultural land. The site lies within the mineral safeguarding area for silica sand. Overall, this site has been assessed as having a positive effect on this Objective.	+

SA Objective	Assessment Criteria - Does the site (199 High Lane)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>		
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	As per the previous objective, the development of this site could enable the re-use or loss of existing buildings. There is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns /villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is more than 400m from a listed asset. Dependent on proposal specific information, there is limited scope that development of this site could lead to the deterioration of the setting of designated heritage assets. Overall, this site has been assessed as having a positive effect on this Objective, however the exact effects are uncertain.	+/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site would be more than 1,250m from Marshes Hill Common (LNR). Given the location of the site within the village it is considered unlikely that there could be effects on landscape character. Overall, this site has been assessed as having a positive effect on this Objective.	+
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential and retail use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population and retention of retail may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			

SA Objective	Assessment Criteria - Does the site (199 High Lane)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site retaining existing retail use within the village centre of Brown Edge has scope to have a positive effect on the vitality and viability of Brown Edge and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 3 dwellings is considered to have a positive effect. Similarly, the site's distance away from historic assets and its location within the village centre are likely to have a positive effect, as is the re-use of previously developed land. However, despite the proposed retention of retail use, the site is relatively inaccessible to other services and facilities and areas of existing employment which is likely to have a negative effect.</p>

<b>SOCIAL</b>			

SA Objective	Assessment Criteria -Does the site (Land at Basford Bridge)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The development of this site, a greenfield site within the village boundary could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located on the edge of the village, it is within 1000m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Cheddleton does not have a secondary school but supply of educational and community services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide employees with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Cheddleton does not have a GP surgery and that the GP surgery serving the settlement currently has adequate supply but is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> </ul>	<p>This site has been proposed for employment uses with regards to this assessment. Therefore the development would provide no housing. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>

SA Objective	Assessment Criteria -Does the site (Land at Basford Bridge)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>		
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 1000m of the village centre of Cheddleton which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within the village boundary and 1000m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to minimise emissions of airborne pollutants?</li> <li>Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>Deliver development directed towards areas of least flood risk?</li> <li>Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>The site is located within flood zones 2 and 3 areas and it can be considered that the site would be subject to risk from flooding. The site is also adjacent to the River Churnet. The development of a greenfield site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a significant negative effect on this objective.</p>	--

SA Objective	Assessment Criteria -Does the site (Land at Basford Bridge)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>• Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>• Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>• Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is more than 1,500m from Churnet Valley SSSI, the nearest designated asset, and, as such, is considered to have no effect on this asset. However the site is within 500m of Basford Green (west of) SBI, ecological survey is required. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>• Help safeguard the best and most versatile agricultural land?</li> <li>• Deliver development that helps to minimise the loss of greenfield land?</li> <li>• Offer opportunities to reduce land contamination / instability?</li> <li>• Deliver development that helps reduce the amount of derelict land?</li> <li>• Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC (urban) land, so development of this site is not likely to result in the loss of best and most versatile land. The site lies within the mineral safeguarding area for bedrock sand. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	<p>-/?</p>
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>• Offer opportunities to reduce waste generation?</li> <li>• Offer opportunities to maximise the re-use of existing buildings?</li> <li>• Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>The development of this greenfield site could not enable the re-use of existing buildings. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	<p>0</p>
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>• Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>• Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is adjacent to the grade II listed Basford Bridge and the Caldon Canal Conservation Area. It is also within 300m of two further grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. An applicant should be required to provide an NPPF compliant heritage statement.</p>	<p>-/?</p>
<p>14. To protect and enhance the character and appearance of the landscape including historic</p>	<ul style="list-style-type: none"> <li>• Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> </ul>	<p>The site would be more within 1,500m from Churnet Valley SSSI. Given the location of the site, considered appropriate as a Local Green</p>	<p>-</p>

SA Objective	Assessment Criteria -Does the site (Land at Basford Bridge)...?	Commentary on likely nature of effects of site allocation	Overall assessment
landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	Space, it is considered that there could be effects on natural assets and resources. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed employment use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of an employment site within the village boundary has the scope to have a positive effect on the vitality and viability of Cheddleton as new employment could be expected to increase footfall in the nearby village centre. Overall, this site has been assessed as having a positive effect on this objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The proposed employment use of the site could be considered to have a positive effect on businesses and the residents of Cheddleton as it could strengthen and diversify the economy. Overall, this has been assessed as having a positive effect on this Objective.	+
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is in proximity to areas of existing local employment provision (Churnetside Business Park) as well as scope for new employment provision generated by this site. Overall, this site has been assessed as having a positive effect on this objective.	+
<b>Summary of overall assessment and likely significant effects:</b>			

SA Objective	Assessment Criteria -Does the site (Land at Basford Bridge)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	The development of new employment premises should have a positive effect on the vitality and viability of the District, strengthen economic growth and support a higher level of employment within the District. However the site is small and constrained and this will limit the extent of the positive contribution it can make. The site's location within flood zones 2 and 3 and proximity to heritage assets are likely to have negative effects. Similarly potential effects on natural assets and resources and the site's ecological value are considered likely to be negative effects.		

**Table 15.336**

**CD101 (Land at Cheadle Road)**

SA Objective	Assessment Criteria - Does the site (CD101)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The development of this site, a meadow in the centre of the settlement considered to meet the criteria for a Local Green Space, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	The site is located within the village, and within 500m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Cheddleton does not have a secondary school but supply of educational and community services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a negative effect on this Objective.	-
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> </ul>	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles.	+

SA Objective	Assessment Criteria - Does the site (CD104)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Help to reduce health inequalities?</li> <li>Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>It should be noted that Cheddleton does not have a GP surgery and that the GP surgery serving the settlement currently has adequate supply but is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Deliver development that reduces actual levels of crime?</li> <li>Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 30 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 400m of the village centre of Cheddleton which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (CD101)...?	Commentary on likely nature of effects of site allocation	Overall assessment
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of a greenfield site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is more than 2,250m from Churnet Valley SSSI, the nearest designated asset, and, as such, is considered to have no effect on this asset. Wildlife value is expected in the hedgerows. Ecological survey is required. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land, so development of this site would not result in the loss of best and most versatile land. The site lies within the mineral safeguarding area for bedrock sand. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> </ul>	<p>The development of this greenfield site would not enable the re-use of existing buildings. Dependent on proposal specific information,</p>	0

SA Objective	Assessment Criteria - Does the site (CD104)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>Offer opportunities to maximise the re-use of existing buildings?</li> <li>Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 400m from one scheduled monument and eight grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. An applicant should be required to provide an NPPF compliant heritage statement.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Deliver development that maximises re-use of brownfield land?</li> <li>Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would be more within 2,250m from Churnet Valley SSSI. Given the location of the site, it is considered that there could be limited effects on landscape character. However the site has been considered to meet the criteria for a Local Green Space and is considered to have visual amenity value. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site with good access to the village centre of Cheddleton has scope to have a positive effect on the vitality and viability of Cheddleton and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (CD101)...?	Commentary on likely nature of effects of site allocation	Overall assessment
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is over 1,000m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a negative effect on this Objective.	-
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space is likely to have a positive effect on health and well-being. However, the inaccessibility of services and facilities is likely to have a negative effect. The site's proximity to historic assets, loss of visual amenity value to the settlement and the potential ecological value of the site are likely to have a negative effect.</p>			

Table 15.337

**Land south of Caldon Canal (Field 4444, Cheadle Road)**

SA Objective	Assessment Criteria - Does the site (south of Caldon Canal)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Make a positive contribution towards community cohesion?</li> <li>Offer opportunity to improve neighbourhood quality?</li> <li>Offer opportunity to provide open space and support Green Infrastructure?</li> </ul>	The development of this site, a greenfield site that is inside the village boundary could be expected to have an effect on Green Infrastructure, ecological networks and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (south of Caldon Canal)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>		
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	The site is located on the edge of the village, it is within 800m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Cheddleton does not have a secondary school but supply of educational and community services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a negative effect on this Objective.	-
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Cheddleton does not have a GP surgery and that the GP surgery serving the settlement currently has adequate supply but is expected to be outstripped by future demand. Overall, this site has been assessed as having a positive effect on this Objective.	+
4. SA Objective	Assessment Criteria - Does the site (south of Caidon Canal)...?	Commentary on likely nature of effects of site allocation	Overall assessment
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with good access to the village centre of Cheddleton has scope to have a positive effect on the vitality and viability of Cheddleton and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is close to existing areas of employment within the village or District and, as such, would provide some accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a neutral effect on this Objective.	0
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 30 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and location outside floodzones 2 and 3 is likely to have a positive effect. However, the inaccessibility of services and facilities is likely to have a negative effect. Similarly, the development of greenfield, grade 4 ALC land, part of a linear corridor of natural and semi natural open space running along the canal side is assessed as having a negative effect, as is the site's proximity to heritage assets. Ecological survey is required. An applicant should be required to provide an NPPF compliant heritage statement.</p>			

**Table 15.338**

**Kingsley**

**KG032 (Land at south of the A52)**

SA Objective	Assessment Criteria - Does the site (KG032)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The development of this site, a greenfield site that is outside of the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located outside of the village, it is within 800m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Kingsley does not have a secondary school but that the current supply of educational services and facilities exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Kingsley does not have a GP surgery and, accordingly, the current supply of health care services and facilities is falls short of demand and the situation is expected to worsen in the future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+

SA Objective	Assessment Criteria - Does the site (KG032)...?	Commentary on likely nature of effects of site allocation	Overall assessment
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Deliver development that reduces actual levels of crime?</li> <li>Deliver development that helps to reduce fear of crime?</li> </ul>	This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>	Based on representations promoting this site, it is considered that the site could accommodate circa 50 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	As noted previously, the site is within 800m of the village centre of Kingsley as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ENVIRONMENTAL</b>			
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 800m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a neutral effect on this Objective.	0
8. To improve air quality.	<ul style="list-style-type: none"> <li>Offer opportunities to minimise emissions of airborne pollutants?</li> <li>Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?

SA Objective	Assessment Criteria - Does the site (KG032)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. However a wooded watercourse forms the southern boundary of the site. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is within 1,000m from Chumet Valley SSSI, the nearest designated assets, and, as such, is not considered to have an effect on this asset. This site has been subject to an initial ecology survey provided with representations promoting the site. The site is a single arable field with trees and hedgerows, a stream and a number of nearby ponds. The exact effects on biodiversity and protected species are uncertain, further ecological survey work will be required. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land in the Green Belt. However, the land has also been assessed as grade 3 ALC land, indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be best and most versatile, so development of this site may result in the loss of best and most versatile land. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0

SA Objective	Assessment Criteria - Does the site (KG032)...?	Commentary on likely nature of effects of site allocation	Overall assessment
13. To protect and enhance the character of towns /villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 500m of three grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these heritage assets and their settings. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. An applicant should be required to provide an NPPF compliant heritage statement.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site would be within 1,000m of Churnet Valley SSSI and may not increase external pressure on this site. Given the location of the site, a greenfield site in the Green Belt on the edge of the settlement, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective, although exact effects are uncertain. Landscape impact assessment is required.	-/?
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Similarly, the site is located within the Churnet Valley Area as an area for sustainable tourism and rural regeneration. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with good access to the village centre of Kingsley has scope to have a positive effect on the vitality and viability of Kingsley and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (KG032)...?	Commentary on likely nature of effects of site allocation	Overall assessment
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is over 1,500m from existing areas of employment within the village or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 50 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and potential contribution to the viability of Kingsley are likely to have positive effects. However, the site is relatively inaccessible to services and facilities and areas of existing employment, both of which is likely to have a negative effect. Similarly, development of greenfield, grade 3 ALC land in the Green Belt and indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be best and most versatile, is likely to have a negative effect. The potential ecological value of the site and its proximity to heritage assets are also likely to have a negative effect. An applicant should be required to provide an NPPF compliant heritage statement and to undertake further ecological and landscape impact assessments.</p>

<b>Summary of overall assessment and likely significant effects:</b>			

SA Objective	Assessment Criteria - Does the site (Land at Uttoxeter Road)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	The proposed delivery of circa 60 dwellings is considered to have a significant positive effect, as could the site's accessibility to areas of existing employment and other services and facilities within Upper Tean. However, the development of greenfield, grade 3 ALC land indicated on Natural England's predictive map of best and most versatile agricultural land as having a "high" (greater than 60% area bmv) likelihood is likely to have a significant negative effect. Similarly the potential landscape impact, ecological value of the site and its proximity to heritage assets are all likely to have a negative effect. An applicant should be required to provide an NPPF compliant heritage statement, landscape impact and ecological appraisals.		

**Table 15.340**

**The Wentlows, 64 Cheadle Road**

SA Objective	Assessment Criteria - Does the site (The Wentlows) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The development of this site, a greenfield site outside the settlement boundary, proposed as part of Local Green Space 45, could reduce the social and environmental quality of the village centre. Loss of green space within the village is likely to have an effect on green infrastructure. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	The site is located on the edge of the village and is within 500m of the village centre and the limited range of services and facilities that can be found here that could serve prospective residents of the site. It should be noted that Upper Tean does not have a secondary school but that the current supply of educational services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a neutral effect on this Objective.	0

SA Objective	Assessment Criteria - Does the site (The Wentlows) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>3. To improve health and reduce health inequalities.</p> <ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. Similarly, the site is within 500m of a GP surgery. It should be noted that the current supply of health care services and facilities currently falls short of demand and the situation is expected to worsen in the future. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on a density of 30dph, it is considered that the site could accommodate circa 24 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 500m of the village centre of Upper Tean and a GP surgery as well as being adjacent to an area of open space which should reduce the need to travel within the village. However the site is within 500m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0

SA Objective	Assessment Criteria - Does the site (The Wentlows) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>		
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.	i/?
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	The site is located outside a flood zone 2 or 3 area and, as such, it can be considered that the site would not be subject to risk from flooding. The development of this site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. Overall, this site has been assessed as having a positive effect on this objective.	+
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	The site is within 2,500m from Cecilly Brook (LNR), the nearest designated asset, and, as such, is not considered to have an effect on this asset. An ecological survey would be required. Some impact on green infrastructure including ecological networks may be expected. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.	-/?
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> </ul>	As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site would not result in the loss of best and most versatile agricultural land. The site lies within the mineral safeguarding areas for bedrock sand and superficial sand and gravel. Overall, this site has been assessed as having a negative effect on this Objective.	-

SA Objective	Assessment Criteria - Does the site (The Wentlows) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>		
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	The development of this greenfield site would not enable the re-use of existing buildings. Dependent on proposal specific information, there is scope that development could incorporate sustainable materials. Overall, this site has been assessed as having a neutral effect on this Objective.	0
13. To protect and enhance the character of towns /villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	The site is within 500m of ten grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of the setting of these heritage assets. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. An applicant should be required to provide an NPPF compliant heritage statement.	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	The site would be within 2,500m of Cecilly Brook (LNR) and is not expected to increase external pressures on this site. Given the location of the site, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Needwood & South Derbyshire Claylands National Character Area. Overall, this site has been assessed as having a neutral effect on this Objective, although the exact effects are uncertain. Landscape impact assessment is required.	0/?
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.	+
<b>ECONOMIC</b>			

SA Objective	Assessment Criteria - Does the site (The Wentlows) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with good access to the village centre of Upper Tean has scope to have a positive effect on the vitality and viability of Upper Tean and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	The site is over 1,500m of existing areas of employment within the village or District and, as such, would fail to provide accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a neutral effect on this Objective.	0
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 24 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to open space and health care is likely to have a positive effect, as is its location outside flood zones 2 and 3. However the site is considered to form part of Local Green Space 45 and as such its development could be expected to result in negative effects on the social and environmental quality of the village centre. Similarly the impact on green infrastructure and contribution to ecological networks is likely to lead to a negative effect. The site lies within the mineral safeguarding areas for bedrock sand and superficial sand and gravel which is also likely to have a negative effect, as is the site's proximity to heritage assets. An applicant should be required to provide an NPPF compliant heritage statement. Landscape impact and ecological surveys are also required.</p>

## Werrington and Cellarhead

### Cellarhead: WE064

SA Objective	Assessment Criteria - Does the site (WE064) ...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			

SA Objective	Assessment Criteria - Does the site (WE064)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The development of this site, a greenfield site that is set outside of the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located in the edge of the village boundary and is more than 2,000m from the village centre and the range of services and facilities that can be found here that could serve prospective residents of the site. It should be noted that the current supply of educational services and facilities currently exceeds demand and is expected to do so for the foreseeable future. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. However, the site is more than 2,000m from a GP surgery. It should be noted that the current supply of health care services and facilities currently falls short of demand and the situation is likely to worsen in the future. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 20 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++

SA Objective	Assessment Criteria - Does the site (WE064)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>		
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is more than 2,000m from the village centre of Werrington and Cellarhead and a GP surgery, but is adjacent to an area of open space. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. <p><b>Summary of overall assessment and likely significant effects:</b></p>			

SA Objective	Assessment Criteria - Does the site (WE064)...?	Commentary on likely nature of effects of site allocation	Overall assessment
		The proposed delivery of circa 20 dwellings is considered to have a significant positive effect. However, the site is relatively inaccessible to services and facilities and areas of existing employment which is likely to have a significant negative effect. Similarly, the development of an open countryside greenfield, grade 4 ALC land within the Green Belt and the mineral safeguarding area for bedrock sand and silica sand is assessed as having a negative effect, as is the proximity to historic assets. The site is within 100m from a candidate AQMA, there is potential for negative impact on air quality.	

Table 15.342

### Wetley Rocks

#### Land to the rear of SMD/2016/0609 (Land at Leek Road)

SA Objective	Assessment Criteria - Does the site (Further land at Leek Road)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	The development of this site, a greenfield site that is outside of the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a negative effect on this Objective.	-
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage</li> </ul>	The site is located on the edge of the village, it is within 400m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Wetley Rocks does not have a secondary school. Overall, this site has been assessed as having a significant negative effect on this Objective.	--

SA Objective	Assessment Criteria - Does the site (Further land at Leek Road)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>		
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with good access to areas of open space which should help to support healthy lifestyles. It should be noted that Wetley Rocks does not have a GP surgery. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social / extra care housing.	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>● Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>Based on a density of 30dph it is considered that the site could accommodate circa 25 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this site has been assessed as having a significant positive effect on this Objective.</p>	++
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>● Support the use of public transport?</li> <li>● Support safe walking and cycling?</li> <li>● Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 400m of the village centre of Wetley Rocks as well as being adjacent to an area of open space which should reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			

SA Objective	Assessment Criteria - Does the site (Further land at Leek Road)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>● Offer opportunities to increase energy efficiency?</li> <li>● Offer opportunities to increase the use of renewable energy?</li> <li>● Deliver development in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 400m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to minimise emissions of airborne pollutants?</li> <li>● Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>● Deliver development directed towards areas of least flood risk?</li> <li>● Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>● Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of a greenfield site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is more than 1,750m from Churnet Valley SSSI, the nearest designated asset, and, as such, is not considered to have an effect on this asset. Ecological assessment is required. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a neutral effect on this Objective, however the exact effects are uncertain.</p>	0/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 3 ALC land, indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be best and most versatile, so development of this site could result in the loss of best and most versatile agricultural land. The site lies within the</p>	-

SA Objective	Assessment Criteria - Does the site (Further land at Leek Road)...?	Commentary on likely nature of effects of site allocation	Overall assessment
	<ul style="list-style-type: none"> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>mineral safeguarding area of silica sand. Overall, this site has been assessed as having a negative effect on this Objective.</p>	
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 50m from one grade II listed asset and 400m from three grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these heritage assets and their setting. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. An applicant should be required to provide an NPPF compliant heritage statement.</p>	-/?
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>The site would be within 1,750m of Churnet Valley SSSI and as such would not be expected to increase external pressure on the site. Given the location of the site within the green belt and important landscape setting to the settlement, it is considered that there could be effects on landscape character. Landscape impact assessment is required. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ECONOMIC</b>			

SA Objective	Assessment Criteria - Does the site (Further land at Leek Road)...?	Commentary on likely nature of effects of site allocation	Overall assessment
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Deliver development that helps to safeguard shops and services in existing centres?</li> <li>Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	The proposed development of a residential site with good access to the village centre of Wetley Rocks has scope to have a positive effect on the vitality and viability of Wetley Rocks and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.	+
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.	0
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Help meet the employment needs of local people?</li> <li>Help increase economic activity levels?</li> <li>Improve physical accessibility to jobs?</li> <li>Support higher income levels for local residents?</li> </ul>	The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.	--
<p><b>Summary of overall assessment and likely significant effects:</b></p> <p>The proposed delivery of circa 25 dwellings is considered to have a significant positive effect. Similarly, the site's accessibility to areas of open space and the village centre of Wetley Rocks is likely to have a positive effect. However, the site is relatively inaccessible to wider services and facilities, including areas of existing employment, which is likely to have a negative effect, as could the site's proximity to heritage assets. The development of greenfield land in the green belt, forming part of the important landscape setting to the settlement, and indicated on the predictive map of best and most versatile agricultural land as within an area where 20-60% of the land is likely to be best and most versatile, is likely to have a negative effect. An applicant should be required to provide an NPPF compliant heritage statement, as well as landscape impact and ecological assessments.</p>			

Table 15.343

**WR024 (Playing field between Randles Lane / Leek Road)**

SA Objective	Assessment Criteria - Does the site (WR024)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<b>SOCIAL</b>			

SA Objective	Assessment Criteria - Does the site (WR024)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>1. To improve community cohesion and the quality of where people work and live.</p>	<ul style="list-style-type: none"> <li>● Make a positive contribution towards community cohesion?</li> <li>● Offer opportunity to improve neighbourhood quality?</li> <li>● Offer opportunity to provide open space and support Green Infrastructure?</li> <li>● Risk unacceptable light and noise pollution?</li> <li>● Offer opportunity to ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	<p>The development of this site, a greenfield site used as playing fields, including with children's play equipment, outside the settlement boundary, could be expected to have an effect on Green Infrastructure and environmental quality. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	<p>--</p>
<p>2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.</p>	<ul style="list-style-type: none"> <li>● Deliver development that is likely to help remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>● Help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	<p>The site is located on the edge of the village, it is within 300m of the village centre but has insufficient services and facilities to meet the needs of the community. It should be noted that Wetley Rocks does not have a secondary school. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>3. To improve health and reduce health inequalities.</p>	<ul style="list-style-type: none"> <li>● Help improve health or access to health facilities?</li> <li>● Help promote healthy lifestyles?</li> <li>● Help to reduce health inequalities?</li> <li>● Offer opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	<p>The location of this site should provide residents with access to alternative areas of open space which should help to support healthy lifestyles, however development here would result in the loss of playing fields and children's play space. It should be noted that Wetley Rocks does not have a GP surgery. Overall, this site has been assessed as having a negative effect on this Objective.</p>	<p>-</p>
<p>4. To minimise opportunities for crime and reduce the fear of crime.</p>	<ul style="list-style-type: none"> <li>● Deliver development that reduces actual levels of crime?</li> <li>● Deliver development that helps to reduce fear of crime?</li> </ul>	<p>This site is difficult to assess against this objective without proposal specific information. However, it can be considered that new development would include aspects of good design which would help to minimise crime and the fear of crime. Overall, this site has been assessed as having a positive effect on this Objective.</p>	<p>+</p>
<p>5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to provide an appropriate mix of housing to enable all needs to be met?</li> </ul>	<p>Based on the SHLAA (2015) assessment of this site, it is considered that the site could accommodate circa 25 dwellings and therefore also provide a quantum of affordable housing on site. Overall, this</p>	<p>++</p>

SA Objective	Assessment Criteria - Does the site (WR024)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>locations and including affordable / social /extra care housing.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to enable people to meet their needs within their existing communities?</li> <li>Offer opportunities to ensure that people can afford their housing?</li> </ul>	<p>site has been assessed as having a significant positive effect on this Objective.</p>	
<p>6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to minimise impacts on existing traffic congestion?</li> <li>Support the use of public transport?</li> <li>Support safe walking and cycling?</li> <li>Offer opportunities to protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	<p>As noted previously, the site is within 300m of the village centre of Wetley Rocks which may reduce the need to travel within the village. Similarly, the site is within 500m of a bus stop. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ENVIRONMENTAL</b>			
<p>7. To minimise contributions to climate change and consider climate change adaptation.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to reduce emissions of greenhouse gases, particularly CO<sub>2</sub>?</li> <li>Offer opportunities to increase energy efficiency?</li> <li>Offer opportunities to increase the use of renewable energy?</li> <li>Deliver development is in an accessible location in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	<p>The development of this site could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However the site is within 300m of the village centre and could reduce the need to travel. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>8. To improve air quality.</p>	<ul style="list-style-type: none"> <li>Offer opportunities to minimise emissions of airborne pollutants?</li> <li>Offer opportunities to remove air pollutants (e.g. by trees)?</li> </ul>	<p>The outcome of this assessment could be dependent on implementation and site specific detail. Overall, this site has been assessed as having an uncertain effect on this Objective.</p>	i/?
<p>9. To reduce flood risk, protect and enhance water sources.</p>	<ul style="list-style-type: none"> <li>Deliver development directed towards areas of least flood risk?</li> <li>Offer opportunities to reduce risk of flooding e.g. by integration of mitigation measures such as SuDs?</li> <li>Offer opportunities to protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Offer opportunities to encourage water efficiency and demand management?</li> </ul>	<p>As the site is located outside of a flood zone 2 or 3 area it can be considered that the site would not be subject to risk from flooding. The development of a greenfield site could lead to an increase in wastewater and reduction of natural drainage, however SuDs could be used to mitigate against this. The development could also be expected to lead to increased water demand within the District. Overall, this site has been assessed as having a positive effect on this objective.</p>	+

SA Objective	Assessment Criteria - Does the site (WR024)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs</p>	<ul style="list-style-type: none"> <li>● Enable protection of the district's sites of ecological and nature conservation importance, including the integrity of European sites?</li> <li>● Deliver development that will help to support meeting Staffordshire Biodiversity Action Plan objectives?</li> <li>● Offer opportunities to help deliver networks of biodiversity and green infrastructure?</li> </ul>	<p>The site is within 1,750m from Churnet Valley SSSI, the nearest designated asset, and, as such, is not considered to have an effect on this asset. The site includes mature trees, some with TPOs. Ecological survey is required. The HRA notes that no direct impacts upon the SPA are predicted from this site. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain.</p>	-/?
<p>11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.</p>	<ul style="list-style-type: none"> <li>● Help safeguard the best and most versatile agricultural land?</li> <li>● Deliver development that helps to minimise the loss of greenfield land?</li> <li>● Offer opportunities to reduce land contamination / instability?</li> <li>● Deliver development that helps reduce the amount of derelict land?</li> <li>● Offer opportunities to protect notable geological and geomorphological features?</li> </ul>	<p>As noted, this site has been assessed as being on greenfield land. However, the land has also been assessed as grade 4 ALC land so development of this site may not result in the loss of best and most versatile land. The site lies within the mineral safeguarding area for silica sand. It is also within the important landscaping area for settlement. Overall, this site has been assessed as having a negative effect on this Objective.</p>	-
<p>12. To minimise the use of non-renewable resources.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to reduce waste generation?</li> <li>● Offer opportunities to maximise the re-use of existing buildings?</li> <li>● Offer opportunities to increase the use of building materials from sustainable sources?</li> </ul>	<p>As per the previous objective, the development of this site would not enable the re-use or loss of existing buildings. However, there is scope that development could use sustainable materials and increase the demand for local resources. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>● Offer opportunities to protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	<p>The site is within 400m from three grade II listed assets. Dependent on proposal specific information, there is scope that development of this site could lead to the deterioration of these heritage assets and their settings. Overall, this site has been assessed as having a negative effect on this Objective, however the exact effects are uncertain. An applicant should be required to provide an NPPF compliant heritage statement.</p>	-/?
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> </ul>	<p>The site would be within 1,750m of Churnet Valley SSSI however it is considered that development is not likely to increase external</p>	-/?

SA Objective	Assessment Criteria - Does the site (WR024)...?	Commentary on likely nature of effects of site allocation	Overall assessment
<p>and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>● Deliver development that maximises re-use of brownfield land?</li> <li>● Offer opportunities to safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	<p>pressure on the site. Given the location of the site, within green belt and the important landscape setting to the settlement, it is considered that there could be effects on landscape character. Proposal specific information is required to assess the impact on the Potteries and Churnet Valley National Character Area. Overall, this site has been assessed as having a negative effect on this Objective, although the precise effects are uncertain.</p>	
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p>	<ul style="list-style-type: none"> <li>● Offer opportunities to support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Offer opportunities to help support tourism and the visitor economy?</li> </ul>	<p>The proposed residential use of this site limits the effect that it can have on investment in culture and tourism within the village and wider district. However, the increased population of both the village and District may have a positive effect. Overall, this site has been assessed as having a positive effect on this Objective.</p>	+
<b>ECONOMIC</b>			
<p>16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy</p>	<ul style="list-style-type: none"> <li>● Deliver development that helps to safeguard shops and services in existing centres?</li> <li>● Deliver development that helps to safeguard and improve the retail, leisure and service provision?</li> </ul>	<p>The proposed development of a residential site with good access to the village centre of Wetley Rocks has scope to have a positive effect on the vitality and viability of Wetley Rocks and the wider District, as new residents could be expected to increase footfall. Overall, this has been assessed as having a positive effect on this Objective.</p>	+
<p>17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth</p>	<ul style="list-style-type: none"> <li>● Help provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Help provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	<p>The development of this site could encourage investment in people and infrastructure through developer contributions although this would be limited. However, the extent of this effect is uncertain. Overall, this site has been assessed as having a neutral effect on this Objective.</p>	0
<p>18. To encourage and support a high and stable level of employment</p>	<ul style="list-style-type: none"> <li>● Help meet the employment needs of local people?</li> <li>● Help increase economic activity levels?</li> <li>● Improve physical accessibility to jobs?</li> <li>● Support higher income levels for local residents?</li> </ul>	<p>The site is over 1,500m to existing areas of employment within the town or District and, as such, would fail to provide sufficient accessible employment opportunities for prospective residents. Overall, this site has been assessed as having a significant negative effect on this Objective.</p>	--
<p><b>Summary of overall assessment and likely significant effects:</b></p>			
<p>The proposed delivery of circa 25 dwellings is considered to have a significant positive effect. Similarly, the site's location outside of flood zones 2 and 3 and its potential to make a contribution to the viability of the village of Wetley Rocks are considered to be positive effects. However development of the site would result in the loss of a playing field and children's play space and the associated loss of amenity and impact on health is likely to have a significant negative effect. Similarly the site's inaccessibility to areas of existing employment and other services and</p>			

SA Objective	Assessment Criteria - Does the site (WR024)...?	Commentary on likely nature of effects of site allocation	Overall assessment

facilities is likely to have a significant negative effect. The development of a greenfield site in the green belt and within the important landscape setting to the settlement and mineral safeguarding area for silica sand is likely to result in negative effects, as could the site's proximity to heritage assets and potential ecological value. An applicant should be required to provide an NPPF compliant heritage statement, as well as landscape impact and ecological assessments.

**Table 15.344**

## Appraisal of alternative housing requirement options

## 16 Appraisal of alternative housing requirement options

**16.1** The matrices below set out the likely significant effects on sustainability of the alternative options considered by the Council for a housing requirement. The assessments are based on the methodology proposed and consulted on in the SA Scoping Report and use the SA Framework also developed through consultation as part of the SA Scoping stage.

**16.2** As part of the SA appraisal of options, consideration has been given to effects on sustainability over time (in the short, medium and long term) along with any cumulative impacts of implementing each option and possible mitigation measures where appropriate.

**16.3** In comparing options with one another, consideration has also been given to the geographical scale of effect, whether any identified effects would be permanent or temporary, reversible or irreversible and the assumptions made, or justification for the assessment recorded.

**16.4** Definitions of significance are provided in Section 3 Appraisal Methodology.

### Scoring of options

Score	
++	The requirement will have a very positive impact on the sustainability objective
+	The requirement will have a slightly positive impact on the sustainability objective
0	The requirement will have a negligible or neutral impact on the sustainability objective. A recorded neutral effect does not necessarily mean that there will be no effect at the project level, but shows that at this strategic level there are no identifiable effects.
-	The requirement will have a slightly negative impact on the sustainability objective
--	The requirement will have a very negative impact on the sustainability objective
i	The outcome could be dependent on implementation, or more detail is required to make an assessment
?	The impact of an issue cannot be predicted at this stage

**Table 16.1 Scoring of options**

**16.5** Different components within an option may generate varying impacts. This is indicated by "/".

**Key to Table**

- ST: Short term = 0 - 5 years
- MT: Medium term = 5 - 10 years
- LT: Long term = over 10 years

February 2017 Alternatives appraisal  
Housing Requirement Option 1

SA Objective		Option 1: 235 new homes each year				Justification; cumulative effects / mitigation measures	
		Decision making criteria		Time-frame			Nature of effect; Comments
		ST	MT	LT	SOCIAL		
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	?	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. There is a balance between loss of countryside as a result of development and provision of new, accessible open space as part of new developments. This requirement may offer the least opportunity for associated benefits such as new or enhanced community facilities to be delivered as a result of new development.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall housing requirement. <b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</p>
	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion /</li> </ul>	?	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the least housing growth of the four options considered and thus the least opportunity to improve accessibility to key services and facilities. Despite this, lower levels of housing growth will enable a focus of growth</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are brought forward in sustainable locations.</p>
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.							

Option 1: 235 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>● belief, sex and sexual orientation? Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>				on small urban extensions and small sites within the existing settlement boundary which is likely to help minimise the distance people need to travel.	
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Will it improve health or access to health facilities?</li> <li>● Will it promote healthy lifestyles?</li> <li>● Will it reduce health inequalities?</li> <li>● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	?/-	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the least housing growth of the four options considered and thus the least opportunity to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be a deterioration in health through lack of investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Will it reduce actual levels of crime?</li> <li>● Will it reduce fear of crime?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>

Option 1: 235 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>	+	+	+	<p>This option represents the lower end of the recommended OAN range <b>(1)</b> and by meeting the full demographically-assessed need for housing in the District will have a direct, long-term, positive effect on this SA objective. The requirement is expected to enable the delivery of a range of housing types and tenures, making a contribution to meeting community needs. However the impact of this option on the SA objective is less significant than under all other options. This option is likely to make the least contribution to addressing the needs of an ageing population or ensuring that problems of affordability can be satisfactorily addressed, risking adverse outcomes for older people and those who still need to access the housing market.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Household projections suggest a considerable growth in the number of older people. The SHMA <b>(2)</b> identified a critical affordable housing need. Objectively assessed housing need for the District is between 235dpa and 330dpa. This option will meet the objectively assessed housing need of the plan area but fails fully to address affordable housing need, or offer maximum opportunity for investment in meeting the housing needs of older people. <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.</p>
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	?/+	?/+	?/+	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this requirement could have a positive effect on minimising the impact of new development on existing traffic congestion and could offer support for the use of sustainable forms of transport through delivering most new development close to town and village centres. The option could support priorities and provisions identified in the SMDC integrated transport strategy <b>(3)</b>, including the proposed Local Transport Packages for Leek, Cheddle and Biddulph.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for sustainable transport. <b>Mitigation measures:</b> Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.</p>
<b>ENVIRONMENTAL</b>						

Option 1: 235 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	-	-	<p>There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is likely to result in the smallest overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. <b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	?	?	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option represents the lowest level of growth, it is likely to give rise to the lowest level of new emissions of airborne pollutants associated with additional car journeys. In the long-term there is some potential for development to be delivered within 500m of an identified area of poor air quality.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)<sup>(4)</sup>. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.</p>
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk.</p>

Option 1: 235 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>				<p>the SFRA<sup>(5)</sup> confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This option requires the least peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus poses the lowest risk of all options to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.</p>	<p><b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	?	?/+	?/++	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest level of growth, this option is likely to provide most overall, long-term protection for biodiversity and natural networks. There will however be the lowest level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes. Given it will lead to the lowest recreational and other urbanising pressures on the closest European sites, of all options considered, this option is also likely to afford most protection for the integrity of European sites. However the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including potentially requiring Green Belt release and potentially sites within the zone of influence of European designated sites. <b>Mitigation measures:</b> Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.</p>

Option 1: 235 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest level of growth, this option is likely to provide most overall, long-term protection for the best and most versatile agricultural land.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. <b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and</li> </ul>	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However with the lowest level of growth proposed, of all options considered, this option is most likely to result in protection of cultural and historic heritage assets (designated and non-designated) along with their settings.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. <b>Mitigation</b></p>

Option 1: 235 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	strengthen local distinctiveness and sense of place?					<p><b>measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	?	?/+	?/++	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study<sup>(6)</sup> offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA<sup>(7)</sup> identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. With the lowest level of growth proposed, of all options considered, this option is the most likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and other natural assets and resources.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. With the lowest level of growth proposed, of all options considered, this option is the least likely to result in a long-term, adverse impact on local distinctiveness, potentially leading to an associated long-term positive impact on tourism and the visitor economy. However, this is</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor</p>

Option 1: 235 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					balanced by the option also providing the least opportunity for investment in culture and tourism that could result in long-term negative effects on the local economy.	economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.
<b>ECONOMIC</b>						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	+	+	Under this option, the population of the district is projected to increase by 2,567 from 2014 to 2031. The population growth predicted arises from high levels of net in-migration which counteracts a significant decrease in population expected from natural change resulting in an excess of deaths over births. The increase in spending in the local economy this is likely to generate should result in benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. Although since this option provides for the lowest level of growth, the benefits would be lowest of all options considered.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Residents of new developments will support their local retail, leisure and service provision. <b>Mitigation measures:</b> Local Plan policies to support town and village centres.
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	-	--	--	This option is likely to lead to a decline in the labour force of 2,141 (2014-2031) and job losses of 1,579 over the same period. This is likely to result in a significant negative effect on business, the local economy and local employment through a lack of encouragement for investment in business and infrastructure.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> A local labour supply will help to deliver economic growth across the plan area. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.

Option 1: 235 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	-	--	--	It is projected that the number of people aged over 65 in the District will increase by 39% by 2031. The oldest age groups (75-84 and 85+) would see the most substantial increases of 69% and 134% respectively <sup>(8)</sup> . Under this option, the ageing profile of the population is likely to contribute to a declining labour force and job losses which could undermine economic stability in the long term. The option is likely to have a negative effect on the local economy and local employment.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
<p><b>Summary of significant effects:</b></p> <p>This option proposes the delivery of 235 new dwellings per year (2014-2031). It will have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs since it represents the lower end of the recommended objectively assessed housing need range. However being the lower end of the range, the option makes the least contribution of all options considered to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 2,500 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages including helping to safeguard local shops and services. However since this option provides for the lowest level of growth, these benefits would be lowest of all options considered. This option is likely to lead to a decline in the labour force of 2,141 and the loss of 1,579 jobs (2014 - 2031). This is likely to undermine economic stability in the long term and lead to a significant negative effect on business, the local economy and local employment through a lack of encouragement for investment in business and infrastructure. As the lowest growth option, requiring the lowest number of site allocations, by comparison with other options considered, this alternative is likely to result in minor positive effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets. The lower level of growth is also likely to minimise the negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. The lower level of growth is also likely to help enable a focus of new development on small urban extensions and small sites within existing settlement boundaries resulting in minor positive effects on minimising the distance people need to travel to access key services and facilities and increasing the opportunities for use of sustainable forms of transport. However since this option proposes the lowest level of growth, it is also likely to result in the lowest level of investment in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to minor negative effects on the SA objective relating to supporting health improvements.</p>

		ST	MT	LT		
3. To improve health and reduce health inequalities.	<p>need to travel to access education, employment, shopping and other key services and facilities.</p> <ul style="list-style-type: none"> <li>Will it improve health or access to health facilities?</li> <li>Will it promote healthy lifestyles?</li> <li>Will it reduce health inequalities?</li> <li>Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	?	?/-	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under option 1, but less growth than proposed under options 3 or 4 and thus some opportunity to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be a deterioration in health through lack of investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Will it reduce actual levels of crime?</li> <li>Will it reduce fear of crime?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime.  <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>
5. To ensure adequate quality and provision of a range of house types to meet local needs in	<ul style="list-style-type: none"> <li>Will it provide an appropriate mix of housing to enable all needs to be met?</li> </ul>	+	+	++	<p>This option represents the job stabilisation scenario<sup>(1)</sup> and is mid-way within the full objectively assessed needs range. By meeting the full assessed need for housing in the District, this option will have a direct, long-term, positive effect</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Household projections suggest a considerable growth in the number of older people. The SHMA<sup>(2)</sup> identified a critical affordable</p>

February 2017 Option 2: 260 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>				<p>on the SA objective. The requirement is expected to enable the delivery of a range of housing types and tenures, making a contribution to meeting community needs. While the impact of this option on the SA objective is greater than that under option 1, it is less significant than under options 3 and 4. Whilst this option is likely to contribute to addressing the needs of an ageing population and ensuring that problems of affordability can be addressed, there is a greater risk of adverse outcomes for older people and those who still need to access the housing market than under options 3 and 4.</p>	<p>housing need. Objectively assessed housing need for the District is between 235dpa and 330dpa. This option will meet the objectively assessed housing need of the plan area but fails fully to address affordable housing need, or offer maximum opportunity for investment in meeting the housing needs of older people. <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.</p>
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	?/+	?/+	?/++	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement could have a long-term positive effect on minimising the impact of new development on existing traffic congestion and could offer support for the use of sustainable forms of transport through delivering new development close to town and village centres. The option could support priorities and provisions identified in the SMDC integrated transport strategy <b>(3)</b>, including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for sustainable transport. <b>Mitigation measures:</b> Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.</p>

**ENVIRONMENTAL**

February 2017 Option 2: 260 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	-	--	<p>There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in a lower overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys. In the long-term there is likely to be a more significant negative impact than under option 1 since this proposes lower growth.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions.  <b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	?	?/-	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to give rise to lower levels of new emissions of airborne pollutants associated with additional car journeys. In the medium and long-term there is likely to be a more significant negative impact than under option 1 and some potential for development to be delivered within 500m of an identified area of poor air quality.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520), Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)<sup>(4)</sup>. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, there is a risk that air quality may deteriorate in areas of existing low quality. <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.</p>
9. To reduce flood risk, protect and	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b></p>

February 2017 Option 2: 260 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
enhance water sources.	<ul style="list-style-type: none"> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>				<p>on the location of development and the implementation of Local Plan policies. However the SFRA (5) confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. Since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in less peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus result in less risk of surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration. Although in the long-term there is likely to be a more significant negative impact than under option 1.</p>	<p>Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	?	?/+	?/+	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However, since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to provide overall, long-term protection for biodiversity and natural networks. However in comparison with options 3 and 4, there is likely to be a lower level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes. Given that in comparison with options 3 and 4, this requirement is likely to lead to lower recreational and other urbanising pressures on the</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including sites potentially requiring Green Belt release or within the zone of influence of European designated sites. <b>Mitigation measures:</b> Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.</p>

February 2017 Option 2: 260 new homes each year

SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
villages and other heritage and archaeological assets along with their settings.	<p>cultural and historic heritage assets (designated and non-designated assets) along with their settings?</p> <ul style="list-style-type: none"> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>				implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in protection of cultural and historic heritage assets (designated and non-designated) along with their settings. Positive impacts are not as significant as under option 1.	protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	?	?/+	?/+	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study<sup>(6)</sup> offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA<sup>(7)</sup> identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. Since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and other natural assets and</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>

February 2017 Option 2: 260 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					resources. Positive impacts are not as significant as under option 1.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is less likely to result in a long-term, adverse impact on local distinctiveness, and this may lead to a long-term positive impact on tourism and the visitor economy. The significance is less than under option 1. The positive impacts are balanced by the requirement also providing less opportunity than under options 3 and 4 for investment in culture and tourism and this may result in long-term negative effects on the local economy.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>
<b>ECONOMIC</b>						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	+	++	<p>This option assumes that the number of jobs in the District remains at its 2014 level over the plan period and since there is an ageing population, there would be a need for growth in the labour force, in-migration and ultimately housing of 259dpa to 2031. Creating a labour force large enough to support job stabilisation would result in a population increase of 6,339 (2014-31). The increase in spending in the local economy this is likely to generate should result in benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. Although since this option proposes a lower level of growth</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Residents of new developments will support their local retail, leisure and service provision.  <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>

February 2017 Option 2: 260 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	+	+	+	<p>than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in less significant benefits. Benefits would be more significant than under option 1.</p> <p>This option represents the level at which the District's economy would stabilise, ie there would be zero job growth 2014 - 2031. This is likely to result in a minor positive effect on business, the local economy and local employment.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Helping to stem the decline of working age residents in the District would achieve a more balanced population structure and reduce potential future economic difficulties and the demands of services associated with an ageing population and a more limited supply of labour. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	0	0	+	<p>Whilst this option is to maintain the 2014 level of jobs in the District over the plan period, a fall in the labour force of 127 is predicted. This is likely to lead to a long term minor positive impact on the local economy and local employment.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
<p><b>Summary of significant effects:</b></p> <p>This option proposes the delivery of 260 new dwellings per year. Since it is within the recommended, full objectively assessed housing need range, the housing requirement would have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs. This positive effect is likely to be more significant than under option 1. However being closer to the lower end of the range than options 3 and 4, the option makes less of a contribution than options 3 and 4 to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 6,300 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and services. Under this option, these benefits are likely to be more significant than under option 1 and less significant than under options 3 and 4. This</p>						

SA Objective	February 2017 Option 2: 260 new homes each year				Justification; cumulative effects / mitigation measures	
	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
					<p>option is expected to maintain the 2014 level of jobs in the district over the plan period. This is likely to result in a long term minor positive impact on business, the local economy and local employment. This compares favourably with the impacts on this objective likely under option 1, where significant negative impacts on SA objectives for supporting employment and economic growth are likely since housing delivery below 260dpa would potentially result in a reduction in jobs. However the positive impacts on economic growth under this option are less significant than those likely to result under options 3 and 4. Option 2 requires the second lowest number of site allocations of the four options considered, and consequently this alternative is likely to result in comparatively more positive effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets than options 3 and 4. Positive effects on these objectives are slightly less under this option than under option 1. The lower level of growth under option 2 compared with options 3 and 4 is also likely to minimise the negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. The lower level of growth is also likely more likely under option 2 than options 3 and 4 to enable a focus of new development on small urban extensions and small sites within existing settlement boundaries resulting in minor positive effects on minimising the distance people need to travel to access key services and facilities and increasing the opportunities for use of sustainable forms of transport. Benefits under option 2 in this regard are not likely to be as great as under option 1. However since option 2 proposes the second lowest level of growth of the four options considered, it is likely to result in a lower level of investment than under options 3 and 4 in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to possible minor negative effects on the SA objective relating to supporting health improvements. These negative effects are not likely to be as significant as under option 1.</p>

		ST	MT	LT		
	need to travel to access education, employment, shopping and other key services and facilities.				increase the distance that some people would need to travel in order to access key services and facilities.	
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>Will it improve health or access to health facilities?</li> <li>Will it promote healthy lifestyles?</li> <li>Will it reduce health inequalities?</li> <li>Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under options 1 and 2 (but less growth than proposed under option 4) and consequently there is opportunity to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be an indirectly positive effect on health through enabling investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Will it reduce actual levels of crime?</li> <li>Will it reduce fear of crime?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime.  <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate	<ul style="list-style-type: none"> <li>Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>Will it enable people to meet their needs within</li> </ul>	+	++	++	This option represents the level of housing growth necessary to provide a sufficiently large labour force to support the average level of job growth projected by two forecasting houses: Oxford Economics and Experian <sup>(1)</sup> . This option represents the upper end of	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Household projections suggest a considerable growth in the number of older people. The SHMA<sup>(2)</sup> identified a critical</p>

February 2017 Option 3: 330 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>				<p>the objectively assessed housing need range. By meeting the full assessed need for housing in the District, this option will have a direct, medium and long-term, positive effect on the SA objective. The requirement is expected to enable the delivery of a range of housing types and tenures, making a significant contribution to meeting community needs. While the impact of this option on the SA objective is greater than that under options 1 and 2, it is less significant than under option 4. As the upper end of the OAN range, this option is likely to make a significant contribution to addressing the needs of an ageing population and ensuring that problems of affordability can be addressed.</p>	<p>affordable housing need. Objectively assessed housing need for the District is between 235dpa and 330dpa. This option will meet the objectively assessed housing need of the plan area and address both affordable housing need and the housing needs of older people. <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.</p>
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	?	?	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement could have a long-term negative effect on minimising the impact of new development on existing traffic congestion. Due to the extent of sites that are likely to be allocated under this option, it is less likely than under options 1 and 2 that a high proportion of new development can be delivered close to town and village centres, possibly resulting in a lower use of sustainable forms of transport. The option is likely to support priorities and provisions identified in the SMDC integrated transport strategy (3), including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for sustainable transport. <b>Mitigation measures:</b> Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.</p>

ENVIRONMENTAL

SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	--	--	<p>There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement is likely to result in a higher overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys. Impacts are likely to be less significant than under option 4.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions.  <b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	?	?/-	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement is likely to give rise to higher levels of new emissions of airborne pollutants associated with additional car journeys. In the medium and long-term there is likely to be a more significant negative impact than under options 1 and 2 and some potential for development to be delivered within 500m of an identified area of poor air quality. Impacts are likely to be less significant than under option 4.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent) (4). The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, there is a risk that air quality may deteriorate in areas of existing low quality. <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.</p>
9. To reduce flood risk, protect and	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b></p>

February 2017 Option 3: 330 new homes each year					
SA Objective	Decision making criteria	Time-frame		Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT		
enhance water sources.	<ul style="list-style-type: none"> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>				Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	?	?/-	?/-	<p>location of development and the implementation of Local Plan policies. However the SFRA (5) confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. Since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement is likely to result in more peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus result in more risk of surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration. Although in the long-term there is likely to be a less significant impact than under option 4.</p> <p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. Since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is less likely to provide long-term protection for biodiversity and natural networks. However in comparison with options 1 and 2, there is likely to be a higher level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes (but less opportunity than under option 4). Given that in comparison with options 1 and 2, this requirement is likely to lead to increased recreational and other urbanising pressures on the closest European sites,</p> <p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including sites potentially requiring Green Belt release or within the zone of influence of European designated sites. <b>Mitigation measures:</b> Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.</p>

February 2017 Option 3: 330 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					the option is also less likely to afford long-term protection for the integrity of European sites. Whilst such negative impacts are not as significant as under option 4, the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.	
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>● Will it safeguard the best and most versatile agricultural land?</li> <li>● Will it minimise the loss of greenfield land?</li> <li>● Will it reduce land contamination / instability?</li> <li>● Will it reduce the amount of derelict land?</li> <li>● Will it protect notable geological and geomorphological features?</li> </ul>	?	?	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is less likely to provide overall, long-term protection for the best and most versatile agricultural land. However negative impacts are not as significant as under option 4.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>● Will it reduce waste generation?</li> <li>● Will it maximise the re-use of existing buildings?</li> <li>● Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. <b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>
13. To protect and enhance the character of towns / villages and other	<ul style="list-style-type: none"> <li>● Will it ensure the continued protection and enhancement of cultural and historic</li> </ul>	?	?	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological</p>

February 2017 Option 3: 330 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
heritage and archaeological assets along with their settings.	<p>heritage assets (designated and non-designated assets) along with their settings?</p> <ul style="list-style-type: none"> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>				higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is likely to result in less protection of cultural and historic heritage assets (designated and non-designated) along with their settings. Negative impacts are not as significant as under option 4.	assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	?	?	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study (6) offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA (7) identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. Since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is less likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and other natural assets and resources. Negative impacts are not as significant as under option 4.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>

February 2017 Option 3: 330 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is more likely to result in a long-term, adverse impact on local distinctiveness, and this may lead to a long-term negative impact on tourism and the visitor economy. The significance is less than under option 4. The negative impacts are balanced by the requirement also providing more opportunity than under options 1 and 2 for investment in culture and tourism and this may result in medium term positive effects on the local economy.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>
<b>ECONOMIC</b>						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	++	++	<p>This option combines the job growth projected by Oxford Economics and Experian and incorporates partial catch up headship rates. It represents the "unconstrained" potential of the area based on its existing business base, mix of sectors and inherent economic qualities. There would need to be significant in-migration needed to support an increase in the size of the labour force sufficient to support the forecast job growth. This would equate to population growth of 8,471, household growth of 5,376 and a dwelling need of 329pa. The increase in spending in the local economy this would generate is likely to result in benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. Since this option proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Residents of new developments will support their local retail, leisure and service provision. <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>

February 2017 Option 3: 330 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					considered (with the exception of the highest growth option 4) this requirement is likely to result in significant benefits for the economies of existing centres. Benefits however are likely to be less significant than under option 4.	
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	+	+	++	This option is based on modelled job growth of an additional 870 jobs (794 FTEs) in the District 2014-2031 (51 annually). Although this seems modest, it is set within the context of a decline in jobs forecast under the 2014-based SNPP baseline. Job growth (while modest) is likely to result in long-term positive effects on business, the local economy and local employment.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Helping to reverse the decline of working age residents in the District would achieve a more balanced population structure and reduce potential future economic difficulties and the demand of services associated with an ageing population and a more limited supply of labour. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	+	+	++	This option represents the level of housing growth necessary to provide a sufficiently large labour force to support an average of the Oxford Economics and Experian job growth forecasts for the District 2014-2031: a labour force increase of 981. This is likely to allow for the economic potential of the district to be realised and result in medium and long term positive impacts on the local economy and local employment.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
<p><b>Summary of significant effects:</b></p> <p>This option proposes the delivery of 330 new dwellings per year. Since it is the upper end of the recommended objectively assessed housing need range, the housing requirement would have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs. This positive effect is likely to be more significant than under options 1 and 2. As the upper end of the range, the option is likely to make a significant contribution to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 8,500 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and</p>						

SA Objective	February 2017 Option 3: 330 new homes each year				Justification; cumulative effects / mitigation measures
	Decision making criteria	Time-frame		Nature of effect; Comments	
		ST	MT		
					<p>services. Under this option, these benefits are likely to be more significant than under options 1 and 2, but less significant than under option 4. This option is based on expected job growth of 870 and a labour force increase of 981 in the district 2014-2031. This is likely to allow for the economic potential of the district to be realised and lead to medium and long term positive impacts on the local economy and local employment. Option 3 requires the second highest number of site allocations of the four options considered, and consequently this alternative is likely to result in comparatively more negative effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets than options 1 and 2. Negative effects on these objectives are slightly less under this option than under option 4. The higher level of growth under option 3 compared with options 1 and 2 is also likely to result in negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. Due to the extent of sites that are likely to be allocated under this option, it is less likely than under options 1 and 2 that a high proportion of new development can be delivered close to town and village centres, resulting in negative effects on minimising the distance people need to travel to access key services and facilities and reducing the opportunities for use of sustainable forms of transport. Negative effects under option 3 in this regard are not likely to be as great as under option 4. However since option 3 proposes the second highest level of growth of the four options considered, it is likely to result in a higher level of investment than under options 1 and 2 in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to possible minor positive effects on the SA objective relating to supporting health improvements. These positive effects are not likely to be as significant as under option 4.</p>

February 2017 Housing requirement Option 4

Option 4: 450 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
<b>SOCIAL</b>						
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	?	?	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. There is a balance between loss of countryside as a result of development and provision of new, accessible open space as part of new developments. This requirement is likely to offer the most opportunity for associated benefits such as new or enhanced community facilities to be delivered as a result of new development.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall housing requirement. <b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</p>
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>Will it help to minimise the distance people</li> </ul>	?	?	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the highest level of housing growth of the four options considered and thus the greatest opportunity to improve accessibility to key services and facilities through delivering more investment into the rural areas. However, this level of new housing development is not likely to enable growth to be focused on small urban extensions and small sites within the existing settlement boundaries, which may result in increasing the distance people need to travel.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are brought forward in sustainable locations.</p>

Option 4: 450 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	need to travel to access education, employment, shopping and other key services and facilities.					
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Will it improve health or access to health facilities?</li> <li>● Will it promote healthy lifestyles?</li> <li>● Will it reduce health inequalities?</li> <li>● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	?	?	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the highest level of housing growth of the four options considered and thus present the most opportunities to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be an improvement in health through increased investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Will it reduce actual levels of crime?</li> <li>● Will it reduce fear of crime?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations	<ul style="list-style-type: none"> <li>● Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Will it enable people to meet their needs within</li> </ul>	++	++	++	This option exceeds the upper end of the recommended OAN range <sup>(1)</sup> and by meeting the full, objectively assessed need for housing in the District, it will have a direct, long-term, positive effect on this SA objective. The requirement is expected to enable the delivery of a range of	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Household projections suggest a considerable growth in the number of older people. The SHMA <sup>(2)</sup> identified a critical affordable housing need. Objectively assessed housing need for the</p>

Option 4: 450 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>			LT	housing types and tenures, making a significant contribution to meeting community needs. The impact of this option on the SA objective is more significant than under all other options. This option is likely to make the most contribution to addressing the needs of an ageing population and ensuring that problems of affordability can be satisfactorily addressed, improving outcomes for older people and those who still need to access the housing market.	District is between 235dpa and 300dpa. This option will meet the objectively assessed housing need of the plan area and will go further than any other option considered towards addressing affordable housing need and offering opportunities for investment in meeting the housing needs of older people. <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	?/-	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this requirement is likely to have a negative effect on minimising the impact of new development on existing traffic congestion. Due to the number of site allocations that would be required, it is likely that some new development would be delivered remote from town and village centres, making the use of sustainable forms of transport less likely. The option could support priorities and provisions identified in the SMDC integrated transport strategy (3), including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for walking and cycling initiatives. <b>Mitigation measures:</b> Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.
<b>ENVIRONMENTAL</b>						
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> </ul>	--	--	--	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is likely to result in the greatest overall increase in carbon emissions from the energy	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car

Option 4: 450 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>				consumption and emissions arising from construction and use of new development and associated car journeys.	<p>journeys is likely to increase energy use and associated greenhouse gas emissions.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	?	?/-	--	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option represents the highest level of housing growth, it is likely to give rise to the highest level of new emissions of airborne pollutants associated with additional car journeys. In the medium-term there is potential for development to be delivered within 500m of an identified area of poor air quality.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)<sup>(4)</sup>. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.</p>
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the SFRA<sup>(5)</sup> confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas</p>

Option 4: 450 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>				located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This option requires the most peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus poses the greatest risk of all options to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.	of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	?/-	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the highest level of housing growth, of all options considered, this option is likely to provide least overall, long-term protection for biodiversity and natural networks. There will however be the greatest level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes. Given it will lead to the highest recreational and other urbanising pressures on the closest European sites, of all options considered, this option is also likely to afford least protection for the integrity of European sites. However the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including potentially requiring Green Belt release and potentially sites within the zone of influence of European designated sites. <b>Mitigation measures:</b> Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.</p>
11. To safeguard the best and most versatile agricultural land; improve soil and land resources;	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> </ul>	?/-	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for the best and most versatile agricultural land and</p>

Option 4: 450 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>				as it proposes the highest level of housing growth of all options considered, this option is likely to provide least overall, long-term protection for the best and most versatile agricultural land.	geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. <b>Mitigation measures:</b> Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	?/-	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However with the highest level of housing growth proposed, of all options considered, this option is least likely to result in protection of cultural and historic heritage assets (designated and non-designated) along with their settings.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.

Option 4: 450 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	?/-	?/-	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study (6) offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA (7) identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. With the highest level of housing growth proposed, of all options considered, this option is the least likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and other natural assets and resources.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. With the highest level of housing growth proposed, of all options considered, this option is the most likely to result in a long-term, adverse impact on local distinctiveness, potentially leading to an associated long-term negative impact on tourism and the visitor economy. However, this is balanced by the option also providing the most opportunity for investment in culture and tourism that could result in long-term positive effects on the local economy.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. <b>Mitigation measures:</b> Local</p>

Option 4: 450 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
<b>ECONOMIC</b>						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	++	++	++	<p>This option uses the scenario based on past trends job growth but incorporating partial catch up headship rates. Modelling the level of housing needed were historic job growth trends set to continue over the plan period indicates there would need to be an increase in the population of 13,697 in the district 2014-31. The increase in spending in the local economy this is likely to generate should result in significant benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. However these benefits should be treated with caution since the SHMA December 2016 update notes that the population growth would primarily be achieved by very significant levels of net inward migration counteracting natural change and this is likely to require a step change in migration above the level that may be achievable in the district.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Residents of new developments will support their local retail, leisure and service provision. To achieve the 450dpa that would be required based on a continuation of past job growth rates would require a 6-fold increase in net population growth compared to the 2014-based SNPP and would require more than 10,000 additional migrants from elsewhere across the UK/abroad to move into the district. <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	++	++	++	<p>This projection estimates that there could be an increase in the labour force of 3,746 2014-31 (220pa). This is likely to result in a significant positive effect on business, the local economy and local employment. However these benefits should be treated with caution since SHMA December 2016 update notes that the population growth would primarily be achieved by very significant levels of net inward migration counteracting natural change and this is likely to require a step change</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> A local labour supply will help to deliver economic growth across the plan area. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>

Option 4: 450 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	++	++	++	in migration above the level that may be achievable in the district.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
<p><b>Summary of significant effects:</b></p> <p>This option proposes the delivery of 450 new dwellings per year. It will have a direct and significant positive effect on the SA objective to ensure provision of homes to meet local needs since it exceeds the upper end of the recommended objectively assessed housing need range. This option should make the greatest contribution of all options considered to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 13,700 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including helping to safeguard local shops and services. The past trends scenario provides employment growth in the district of 3,038 jobs 2014-31 (179pa) and an increase in the labour force of 3,746 2014-31 (220pa). As a result, the option is likely to have a significant positive effect on the local economy and local employment. However, these predicted positive effects should be treated with caution, since the SHMA December 2016 update notes that the population growth required to underpin this job growth would primarily be achieved by inward migration as opposed to natural change. To achieve the 450dpa that would be required based on a continuation of past job growth rates would require a 6-fold increase in net population growth compared to the 2014-based SNPP and would require more than 10,000 additional migrants from elsewhere across the UK/abroad to move into the district.</p>						

SA Objective	Option 4: 450 new homes each year				Justification; cumulative effects / mitigation measures	
	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
	<p>may result in increasing the distance people need to travel to access key services and facilities and makes the use of sustainable forms of transport less likely. However since this option proposes the highest level of growth, it is likely to result in the highest level of investment in community facilities, including Green Infrastructure and other measures that may help to reduce health inequalities, leading to positive effects on the SA objective relating to supporting health improvements.</p>

		ST	MT	LT		
	<ul style="list-style-type: none"> <li>and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>				associated benefits such as new or enhanced community facilities to be delivered as a result of new development.	Infrastructure are delivered as part of new housing development.
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the least housing growth of the four options considered and thus the least opportunity to improve accessibility to key services and facilities. Despite this, lower levels of housing growth will enable a focus of growth on small urban extensions and small sites within the existing settlement boundary which is likely to help minimise the distance people need to travel.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are brought forward in sustainable locations.</p>
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>Will it improve health or access to health facilities?</li> <li>Will it promote healthy lifestyles?</li> </ul>	?/-	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the least housing growth of the four options considered and thus the least	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and</p>

January 2016 Option 1: 250 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it reduce health inequalities?</li> <li>Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>				<p>opportunity to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be a deterioration in health through lack of investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.</p>	<p>cycling. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Will it reduce actual levels of crime?</li> <li>Will it reduce fear of crime?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>	+	+	+	<p>This option represents the lower end of the recommended OAN range (1) and by meeting the full demographically-assessed need for housing in the District will have a direct, long-term, positive effect on this SA objective. The requirement is expected to enable the delivery of a range of housing types and tenures, making a contribution to meeting community needs. However the impact of this option on the SA objective is less significant than under all other options. This option is likely to make the least contribution to addressing the needs of an ageing population or ensuring that problems of affordability can be satisfactorily addressed, risking adverse outcomes for older people and those who still need to access the housing market.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Household projections suggest a considerable growth in the number of older people. The SHMA (2) identified a critical affordable housing need. Objectively assessed housing need for the District is between 250dpa and 440dpa. This option will meet the objectively assessed housing need of the plan area but fails fully to address affordable housing need, or offer maximum opportunity for investment in meeting the housing needs of older people. <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.</p>

January 2016 Option 1: 250 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	?/+	?/+	?/+	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this requirement could have a positive effect on minimising the impact of new development on existing traffic congestion and could offer support for the use of sustainable forms of transport through delivering most new development close to town and village centres. The option could support priorities and provisions identified in the SMDC integrated transport strategy <sup>(3)</sup>, including the proposed Local Transport Packages for Leek, Cheddle and Biddulph.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for sustainable transport. <b>Mitigation measures:</b> Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.</p>
<b>ENVIRONMENTAL</b>						
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	-	-	<p>There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is likely to result in the smallest overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. <b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>

January 2016 Option 1: 250 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	?	?	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option represents the lowest level of growth, it is likely to give rise to the lowest level of new emissions of airborne pollutants associated with additional car journeys. In the long-term there is some potential for development to be delivered within 500m of an identified area of poor air quality.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent) <b>(4)</b>. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.</p>
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the SFRA <b>(5)</b> confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This option requires the least peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus poses the lowest risk of all options to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>

January 2016 Option 1: 250 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest level of growth, this option is likely to provide most overall, long-term protection for biodiversity and natural networks. There will however be the lowest level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes. Given it will lead to the lowest recreational and other urbanising pressures on the closest European sites, of all options considered, this option is also likely to afford most protection for the integrity of European sites. However the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including potentially requiring Green Belt release and potentially sites within the zone of influence of European designated sites. <b>Mitigation measures:</b> Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.</p>
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest level of growth, this option is likely to provide most overall, long-term protection for the best and most versatile agricultural land.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>

January 2016 Option 1: 250 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible.</p> <p><b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However with the lowest level of growth proposed, of all options considered, this option is most likely to result in protection of cultural and historic heritage assets (designated and non-designated) along with their settings.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>
14. To protect and enhance the character and appearance of the landscape including historic landscape assets and other natural resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and</li> </ul>	?	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study <sup>(6)</sup> offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. <b>Mitigation measures:</b></p>

January 2016 Option 1: 250 new homes each year					
SA Objective	Decision making criteria	Time-frame		Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT		
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>● Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>● Does it help support tourism and the visitor economy?</li> </ul>	?	?	?	<p>Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p> <p>and in sympathy with the setting of a particular settlement. The HEA (7) identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. With the lowest level of growth proposed, of all options considered, this option is the most likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and other natural assets and resources.</p> <p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. With the lowest level of growth proposed, of all options considered, this option is the least likely to result in a long-term, adverse impact on local distinctiveness, potentially leading to an associated long-term positive impact on tourism and the visitor economy. However, this is balanced by the option also providing the least opportunity for investment in culture and tourism that could result in long-term negative effects on the local economy.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>
<b>ECONOMIC</b>					

January 2016 Option 1: 250 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	+	+	Under this option, the population of the district is projected to increase by 2,882 to 2031. The population growth predicted arises from high levels of in-migration counteracted by natural change resulting from an excess of deaths over births. The increase in spending in the local economy this is likely to generate should result in benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. Although since this option provides for the lowest level of growth, the benefits would be lowest of all options considered.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Residents of new developments will support their local retail, leisure and service provision. <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	-	--	--	This option is likely to lead to the loss of 2,075 jobs over the plan period. This is likely to result in a significant negative effect on business, the local economy and local employment through a lack of encouragement for investment in business and infrastructure.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> A local labour supply will help to deliver economic growth across the plan area. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	-	--	--	It is projected that the number of people aged over 65 in the District will increase by 39% by 2031. The oldest age groups (75-84 and 85+) would see the most substantial increases of 69% and 134% respectively. Under this option, the ageing profile of the population is likely to result in a reduction in the labour force, with the working age population expected to decline by 4,058 by 2031. Taking into account overall economic activity rates of individual age groups, this option	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>

SA Objective	January 2016 Option 1: 250 new homes each year					Justification; cumulative effects / mitigation measures
	Decision making criteria	Time-frame			Nature of effect; Comments	
		ST	MT	LT		
					indicates that the labour force would decline by 2,075 over the plan period. The option is likely to have a negative effect on the local economy and local employment.	
<p><b>Summary of significant effects:</b></p> <p>This option proposes the delivery of 250 new dwellings per year. It will have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs since it represents the lower end of the recommended objectively assessed housing need range. However being the lower end of the range, the option makes the least contribution of all options considered to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 2,800 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages including helping to safeguard local shops and services. However since this option provides for the lowest level of growth, these benefits would be lowest of all options considered. This option is likely to lead to the loss of 2,075 jobs over the plan period. This is likely to result in a significant negative effect on business, the local economy and local employment through a lack of encouragement for investment in business and infrastructure. As the lowest growth option, requiring the lowest number of site allocations, by comparison with other options considered, this alternative is likely to result in minor positive effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets. The low level of growth is also likely to minimise the negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. The low level of growth is also likely to help enable a focus of new development on small urban extensions and small sites within existing settlement boundaries resulting in minor positive effects on minimising the distance people need to travel to access key services and facilities and increasing the opportunities for use of sustainable forms of transport. However since this option proposes the lowest level of growth, it is also likely to result in the lowest level of investment in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to minor negative effects on the SA objective relating to supporting health improvements.</p>

January 2016 Housing Requirement Option 2

SA Objective		January 2016 Option 2: 320 new homes each year					Justification; cumulative effects / mitigation measures
		Decision making criteria		Time-frame			
		ST	MT	LT	SOCIAL		
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	?	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. There is a balance between loss of countryside as a result of development and provision of new, accessible open space as part of new developments. This requirement may offer fewer opportunities than options 3 and 4 for achieving associated benefits of investment, such as new or enhanced community facilities, but there would be more opportunities than under option 1.</p> <p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall housing requirement. <b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</p>	
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>Will it help to minimise the distance people</li> </ul>	?	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under option 1, but less growth than proposed under options 3 or 4 and thus some opportunity to improve accessibility to key services and facilities. Lower levels of housing growth may enable a focus of growth on small urban extensions and small sites within the existing settlement boundary which is likely to help minimise the distance people need to travel.</p> <p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are brought forward in sustainable locations.</p>	

January 2016 Option 2: 320 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
3. To improve health and reduce health inequalities.	<p>need to travel to access education, employment, shopping and other key services and facilities.</p> <ul style="list-style-type: none"> <li>● Will it improve health or access to health facilities?</li> <li>● Will it promote healthy lifestyles?</li> <li>● Will it reduce health inequalities?</li> <li>● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	?	?/-	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under option 1, but less growth than proposed under options 3 or 4 and thus some opportunity to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be a deterioration in health through lack of investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Will it reduce actual levels of crime?</li> <li>● Will it reduce fear of crime?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime.  <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>
5. To ensure adequate quality and provision of a range of house types to meet local needs in	<ul style="list-style-type: none"> <li>● Will it provide an appropriate mix of housing to enable all needs to be met?</li> </ul>	+	+	++	<p>This option represents the job stabilisation / past trends job growth scenario (1). It is also broadly aligned with the requirement identified in the adopted Core Strategy (300dpa). By meeting the full assessed need for housing in the District, this</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Household projections suggest a considerable growth in the number of older people. The SHMA (2) identified a critical affordable</p>

January 2016 Option 2: 320 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>				option will have a direct, long-term, positive effect on the SA objective. The requirement is expected to enable the delivery of a range of housing types and tenures, making a contribution to meeting community needs. While the impact of this option on the SA objective is greater than that under option 1, it is less significant than under options 3 and 4. Whilst this option is likely to contribute to addressing the needs of an ageing population and ensuring that problems of affordability can be addressed, there is a greater risk of adverse outcomes for older people and those who still need to access the housing market than under options 3 and 4.	housing need. Objectively assessed housing need for the District is between 250dpa and 440dpa. This option will meet the objectively assessed housing need of the plan area but fails fully to address affordable housing need, or offer maximum opportunity for investment in meeting the housing needs of older people. <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	?/+	?/+	?/++	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement could have a long-term positive effect on minimising the impact of new development on existing traffic congestion and could offer support for the use of sustainable forms of transport through delivering new development close to town and village centres. The option could support priorities and provisions identified in the SMDC integrated transport strategy <b>(3)</b> , including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for sustainable transport. <b>Mitigation measures:</b> Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.
<b>ENVIRONMENTAL</b>						

January 2016 Option 2: 320 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	-	--	<p>There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in a lower overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys. In the long-term there is likely to be a more significant negative impact than under option 1 since this proposes lower growth.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions.  <b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	?	?/-	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to give rise to lower levels of new emissions of airborne pollutants associated with additional car journeys. In the medium and long-term there is likely to be a more significant negative impact than under option 1 and some potential for development to be delivered within 500m of an identified area of poor air quality.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Identified areas of poor air quality include the Ceilrhead junction (between the A52 and A520); Bail Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)<sup>(4)</sup>. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, there is a risk that air quality may deteriorate in areas of existing low quality. <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.</p>
9. To reduce flood risk, protect and	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b></p>

January 2016 Option 2: 320 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
enhance water sources.	<ul style="list-style-type: none"> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>				<p>on the location of development and the implementation of Local Plan policies. However the SFRAs (5) confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. Since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in less peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus result in less risk of surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration. Although in the long-term there is likely to be a more significant negative impact than under option 1.</p>	<p>Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	?	?/+	?/+	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However, since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to provide overall, long-term protection for biodiversity and natural networks. However in comparison with options 3 and 4, there is likely to be a lower level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes. Given that in comparison with options 3 and 4, this requirement is likely to lead to lower recreational and other urbanising pressures on the</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including sites potentially requiring Green Belt release or within the zone of influence of European designated sites. <b>Mitigation measures:</b> Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.</p>

January 2016 Option 2: 320 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	?	?/+	?/+	<p>closest European sites, the option is also likely to afford long-term protection for the integrity of European sites. Whilst positive impacts are not as significant as under option 1, the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.</p> <p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to provide overall, long-term protection for the best and most versatile agricultural land. However positive impacts are not as significant as under option 1.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. <b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>
13. To protect and enhance the character of towns /	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of</li> </ul>	?	?/+	?/+	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide</p>

		ST	MT	LT		
villages and other heritage and archaeological assets along with their settings.	<p>cultural and historic heritage assets (designated and non-designated assets) along with their settings?</p> <ul style="list-style-type: none"> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>				implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in protection of cultural and historic heritage assets (designated and non-designated) along with their settings. Positive impacts are not as significant as under option 1.	protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study <sup>(6)</sup> offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA <sup>(7)</sup> identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. Since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and other natural assets and	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>

January 2016 Option 2: 320 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	?	?	?	resources. Positive impacts are not as significant as under option 1.	
					There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a lower level of growth than under options 3 and 4, in comparison with other alternatives considered, this requirement is less likely to result in a long-term, adverse impact on local distinctiveness, and this may lead to a long-term positive impact on tourism and the visitor economy. The significance is less than under option 1. The positive impacts are balanced by the requirement also providing less opportunity than under options 3 and 4 for investment in culture and tourism and this may result in long-term negative effects on the local economy.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>
<b>ECONOMIC</b>						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	+	++	This option assumes that the number of jobs in the District remains at its current (2012) level over the plan period and since there is an ageing population, there would be a need for growth in the labour force, in-migration and ultimately housing. Creating a labour force large enough to support jobs would result in a population increase of 7,901. The increase in spending in the local economy this is likely to generate should result in benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. Although since this option proposes a lower level of growth than under options 3 and 4, in comparison with	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Residents of new developments will support their local retail, leisure and service provision.  <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>

January 2016 Option 2: 320 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	+	+	+	<p>other alternatives considered, this requirement is likely to result in less significant benefits. Benefits would be more significant than under option 1.</p> <p>This option is likely to lead to zero additional jobs (or a marginal increase from the 10% uplift for affordable housing) and is expected to help stem the decline of working age residents in the District. This is likely to result in a minor positive effect on business, the local economy and local employment.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Helping to stem the decline of working age residents in the District would achieve a more balanced population structure and reduce potential future economic difficulties and the demands of services associated with an ageing population and a more limited supply of labour. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	0	0	+	<p>This option is expected to maintain the current number of jobs in the District. This is likely to result in a long term minor positive impact on the local economy and local employment.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
<p><b>Summary of significant effects:</b></p> <p>This option proposes the delivery of 320 new dwellings per year. Since it is within the recommended objectively assessed housing need range, the housing requirement would have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs. This positive effect is likely to be more significant than under option 1. However being closer to the lower end of the range than options 3 and 4, the option makes less of a contribution than options 3 and 4 to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 7,900 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and services. Under this option, these benefits are likely to be more significant than under option 1 and less significant than under options 3 and 4. This option is expected to maintain the current number of jobs in the district over the plan period. This is likely to result in a long term minor positive impact on business, the local economy and</p>						

SA Objective	January 2016 Option 2: 320 new homes each year				Justification; cumulative effects / mitigation measures	
	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
					<p>local employment. This compares favourably with the impacts on this objective likely under option 1, where significant negative impacts on SA objectives for supporting employment and economic growth are likely. However the positive impacts on economic growth under this option are less significant than those likely to result under options 3 and 4. Option 2 requires the second lowest number of site allocations of the four options considered, and consequently this alternative is likely to result in comparatively more positive effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets than options 3 and 4. Positive effects on these objectives are slightly less under this option than under option 1. The lower level of growth under option 2 compared with options 3 and 4 is also likely to minimise the negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. The lower level of growth is also likely more likely under option 2 than options 3 and 4 to enable a focus of new development on small urban extensions and small sites within existing settlement boundaries resulting in minor positive effects on minimising the distance people need to travel to access key services and facilities and increasing the opportunities for use of sustainable forms of transport. Benefits under option 2 in this regard are not likely to be as great as under option 1. However since option 2 proposes the second lowest level of growth of the four options considered, it is likely to result in a lower level of investment than under options 3 and 4 in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to possible minor negative effects on the SA objective relating to supporting health improvements. These negative effects are not likely to be as significant as under option 1.</p>

January 2016 Housing Requirement Option 3

SA Objective		January 2016 Option 3: 440 new homes each year					Justification; cumulative effects / mitigation measures
		Decision making criteria		Time-frame		Nature of effect; Comments	
		ST	MT	LT	<b>SOCIAL</b>		
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	?	?/+	?/+			
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>Will it help to minimise the distance people</li> </ul>	?	?/+	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under options 1 and 2 (but less growth than proposed under option 4) and consequently there is opportunity to improve accessibility to key services and facilities through delivering more investment into the rural areas. However under this option it is less likely than under options 1 and 2 that the focus of growth could be delivered as small urban extensions and small sites within existing settlement boundaries and this may	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are brought forward in sustainable locations.</p>	

January 2016 Option 3: 440 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
3. To improve health and reduce health inequalities.	<p>need to travel to access education, employment, shopping and other key services and facilities.</p> <ul style="list-style-type: none"> <li>Will it improve health or access to health facilities?</li> <li>Will it promote healthy lifestyles?</li> <li>Will it reduce health inequalities?</li> <li>Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	?	?/+	?/+	increase the distance that some people would need to travel in order to access key services and facilities.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Will it reduce actual levels of crime?</li> <li>Will it reduce fear of crime?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver more growth than under options 1 and 2 (but less growth than proposed under option 4) and consequently there is opportunity to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be an indirectly positive effect on health through enabling investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime.  <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>
5. To ensure adequate quality and provision of a range of house types to meet local needs in	<ul style="list-style-type: none"> <li>Will it provide an appropriate mix of housing to enable all needs to be met?</li> </ul>	+	++	++	This option represents the Oxford Economics Job Growth scenario (1). This option represents to upper end of the objectively assessed housing need range. By meeting the full assessed need for housing in the District, this option will have a direct, medium and	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Household projections suggest a considerable growth in the number of older people. The SHMA (2) identified a critical</p>

January 2016 Option 3: 440 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>			LT	long-term, positive effect on the SA objective. The requirement is expected to enable the delivery of a range of housing types and tenures, making a significant contribution to meeting community needs. While the impact of this option on the SA objective is greater than that under options 1 and 2, it is less significant than under option 4. As the upper end of the OAN range, this option is likely to make a significant contribution to addressing the needs of an ageing population and ensuring that problems of affordability can be addressed.	affordable housing need. Objectively assessed housing need for the District is between 250dpa and 440dpa. This option will meet the objectively assessed housing need of the plan area and address both affordable housing need and the housing needs of older people. <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	?	?	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement could have a long-term negative effect on minimising the impact of new development on existing traffic congestion. Due to the extent of sites that are likely to be allocated under this option, it is less likely than under options 1 and 2 that a high proportion of new development can be delivered close to town and village centres, possibly resulting in a lower use of sustainable forms of transport. The option is likely to support priorities and provisions identified in the SMDC integrated transport strategy <b>(3)</b> , including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for sustainable transport. <b>Mitigation measures:</b> Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.

ENVIRONMENTAL

January 2016 Option 3: 440 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	--	--	<p>There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement is likely to result in a higher overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys. Impacts are likely to be less significant than under option 4.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions.  <b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	?	?/-	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement is likely to give rise to higher levels of new emissions of airborne pollutants associated with additional car journeys. In the medium and long-term there is likely to be a more significant negative impact than under options 1 and 2 and some potential for development to be delivered within 500m of an identified area of poor air quality. Impacts are likely to be less significant than under option 4.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)<sup>(4)</sup>.                      The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, there is a risk that air quality may deteriorate in areas of existing low quality. <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.</p>
9. To reduce flood risk, protect and	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b></p>

January 2016 Option 3: 440 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
enhance water sources.	<ul style="list-style-type: none"> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>				<p>on the location of development and the implementation of Local Plan policies. However the SFRA (5) confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. Since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered, this requirement is likely to result in more peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus result in more risk of surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration. Although in the long-term there is likely to be a less significant impact than under option 4.</p>	<p>Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	?	?/-	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. Since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is less likely to provide long-term protection for biodiversity and natural networks. However in comparison with options 1 and 2, there is likely to be a higher level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes (but less opportunity than under option 4). Given that in comparison with options 1 and 2, this requirement is likely to lead to increased recreational and other urbanising</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including sites potentially requiring Green Belt release or within the zone of influence of European designated sites. <b>Mitigation measures:</b> Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.</p>

January 2016 Option 3: 440 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	?	?	?/-	<p>pressures on the closest European sites, the option is also less likely to afford long-term protection for the integrity of European sites. Whilst such negative impacts are not as significant as under option 4, the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.</p> <p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is less likely to provide overall, long-term protection for the best and most versatile agricultural land. However negative impacts are not as significant as under option 4.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. <b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>
13. To protect and enhance the character of towns /	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of</li> </ul>	?	?	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide</p>

		ST	MT	LT		
villages and other heritage and archaeological assets along with their settings.	<p>cultural and historic heritage assets (designated and non-designated assets) along with their settings?</p> <ul style="list-style-type: none"> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>				<p>implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is likely to result in less protection of cultural and historic heritage assets (designated and non-designated) along with their settings. Negative impacts are not as significant as under option 4.</p>	<p>protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>
<p>14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	?	?	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study<sup>(6)</sup> offers guidance to help ensure new developments required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA<sup>(7)</sup> identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. Since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is less likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>

January 2016 Option 3: 440 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	?	?	?	<p>other natural assets and resources. Negative impacts are not as significant as under option 4.</p> <p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However since it proposes a higher level of growth than under options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is more likely to result in a long-term, adverse impact on local distinctiveness, and this may lead to a long-term negative impact on tourism and the visitor economy. The significance is less than under option 4. The negative impacts are balanced by the requirement also providing more opportunity than under options 1 and 2 for investment in culture and tourism and this may result in medium term positive effects on the local economy.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy.  <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>
<b>ECONOMIC</b>						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	++	++	<p>This option uses Oxford Economics projections of future employment growth in the district. It represents the "unconstrained" potential of the area based on its existing business base, mix of sectors and inherent economic qualities. To support the increase in jobs projected by the model, the total population would need to grow by 13,393 over the plan period. The increase in spending in the local economy this would generate is likely to result in benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. Since this option proposes a higher level of growth than under</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Residents of new developments will support their local retail, leisure and service provision. <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>

January 2016 Option 3: 440 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	+	+	++	<p>options 1 and 2, in comparison with other alternatives considered (with the exception of the highest growth option 4) this requirement is likely to result in significant benefits for the economies of existing centres. Benefits however are likely to be less significant than under option 4.</p> <p>This option is based on modelled job growth of an additional 2,250 jobs over the plan period. This is likely to result in long-term positive effects on business, the local economy and local employment.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Helping to reverse the decline of working age residents in the District would achieve a more balanced population structure and reduce potential future economic difficulties and the demand of services associated with an ageing population and a more limited supply of labour. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	+	+	++	<p>This option is expected to deliver sufficient labour force levels to support the Oxford Economics job growth projections, a labour force increase of 1,549. This is likely to allow for the economic potential of the district to be realised and result in medium and long term positive impacts on the local economy and local employment.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
<p><b>Summary of significant effects:</b></p> <p>This option proposes the delivery of 440 new dwellings per year. Since it is the upper end of the recommended objectively assessed housing need range, the housing requirement would have a direct, long-term positive effect on the SA objective to ensure provision of homes to meet local needs. This positive effect is likely to be more significant than under options 1 and 2. As the upper end of the range, the option is likely to make a significant contribution to addressing affordable housing need and the needs of an ageing population. Predicted population</p>						

SA Objective	January 2016 Option 3: 440 new homes each year				Justification; cumulative effects / mitigation measures
	Decision making criteria	Time-frame		Nature of effect; Comments	
		ST	MT		
					<p>growth of around 13,400 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and services. Under this option, these benefits are likely to be more significant than under options 1 and 2, but less significant than under option 4. This option is based on expected job growth of 2,250 in the district over the plan period. This is likely to allow for the economic potential of the district to be realised and result in medium and long term positive impacts on the local economy and local employment. Option 3 requires the second highest number of site allocations of the four options considered, and consequently this alternative is likely to result in comparatively more negative effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets than options 1 and 2. Negative effects on these objectives are slightly less under this option than under option 4. The higher level of growth under option 3 compared with options 1 and 2 is also likely to result in negative effects on objectives relating to climate change contributions and air quality that are likely to be allocated under this option, it is less likely than under options arising from construction and use of new dwellings and associated car journeys. Due to the extent of sites that are likely to be allocated under this option, it is less likely than under options 1 and 2 that a high proportion of new development can be delivered close to town and village centres, resulting in negative effects on minimising the distance people need to travel to access key services and facilities and reducing the opportunities for use of sustainable forms of transport. Negative effects under option 3 in this regard are not likely to be as great as under option 4. However since option 3 proposes the second highest level of growth of the four options considered, it is likely to result in a higher level of investment than under options 1 and 2 in community facilities, including Green Infrastructure and other measures that help to reduce health inequalities, leading to possible minor positive effects on the SA objective relating to supporting health improvements. These positive effects are not likely to be as significant as under option 4.</p>

January 2016 Housing requirement option 4

SA Objective		January 2016 Option 4: 520 new homes each year					Justification; cumulative effects / mitigation measures
		Decision making criteria		Time-frame		Nature of effect; Comments	
		ST	MT	LT	<b>SOCIAL</b>		
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	?	?	?/+			
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>Will it help to minimise the distance people</li> </ul>	?	?	?/+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the highest level of housing growth of the four options considered and thus the greatest opportunity to improve accessibility to key services and facilities through delivering more investment into the rural areas. However, this level of new housing development is not likely to enable growth to be focused on small urban extensions and small sites within the existing settlement boundaries, which may result in increasing the distance people need to travel.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are brought forward in sustainable locations.</p>	

January 2016 Option 4: 520 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Will it improve health or access to health facilities?</li> <li>● Will it promote healthy lifestyles?</li> <li>● Will it reduce health inequalities?</li> <li>● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	?	?	?/+	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this option will deliver the highest level of housing growth of the four options considered and thus present the most opportunities to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be an improvement in health through increased investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Investment in new infrastructure keeps pace with growth. More housing growth offers more opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling.  <b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Will it reduce actual levels of crime?</li> <li>● Will it reduce fear of crime?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime.  <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations	<ul style="list-style-type: none"> <li>● Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Will it enable people to meet their needs within</li> </ul>	++	++	++	<p>This option exceeds the upper end of the recommended OAN range<sup>(1)</sup> and by meeting the full, objectively assessed need for housing in the District, it will have a direct, long-term, positive effect on this SA objective. The requirement is expected to enable the delivery of a range of</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Household projections suggest a considerable growth in the number of older people. The SHMA<sup>(2)</sup> identified a critical affordable housing need. Objectively assessed housing</p>

January 2016 Option 4: 520 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>				housing types and tenures, making a significant contribution to meeting community needs. The impact of this option on the SA objective is more significant than under all other options. This option is likely to make the most contribution to addressing the needs of an ageing population and ensuring that problems of affordability can be satisfactorily addressed, improving outcomes for older people and those who still need to access the housing market.	need for the District is between 250dpa and 440dpa. This option will meet the objectively assessed housing need of the plan area and will go further than any other option considered towards addressing affordable housing need and offering opportunities for investment in meeting the housing needs of older people. <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	?/-	?/--	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However this requirement is likely to have a negative effect on minimising the impact of new development on existing traffic congestion. Due to the number of site allocations that would be required, it is likely that some new development would be delivered remote from town and village centres, making the use of sustainable forms of transport less likely. The option could support priorities and provisions identified in the SMDC integrated transport strategy (3), including the proposed Local Transport Packages for Leek, Cheadle and Biddulph.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for walking and cycling initiatives. <b>Mitigation measures:</b> Local Plan policies to ensure that developments are brought forward in sustainable locations; support safe walking and cycling and improve access to the natural environment.
<b>ENVIRONMENTAL</b>						
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> </ul>	--	--	--	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is likely to result in the greatest overall increase in carbon emissions from the energy	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car

January 2016 Option 4: 520 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>			LT	consumption and emissions arising from construction and use of new development and associated car journeys.	journeys is likely to increase energy use and associated greenhouse gas emissions. <b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	?	?/-	--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option represents the highest level of housing growth, it is likely to give rise to the highest level of new emissions of airborne pollutants associated with additional car journeys. In the medium-term there is potential for development to be delivered within 500m of an identified area of poor air quality.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent) <sup>(4)</sup> . The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the SFRA <sup>(5)</sup> confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas

January 2016 Option 4: 520 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>				located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This option requires the most peripheral development proposed on agricultural (greenfield) land on the outskirts of settlements, and thus poses the greatest risk of all options to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.	of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	?/-	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the highest level of housing growth, of all options considered, this option is likely to provide least overall, long-term protection for biodiversity and natural networks. There will however be the greatest level of new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes. Given it will lead to the highest recreational and other urbanising pressures on the closest European sites, of all options considered, this option is also likely to afford least protection for the integrity of European sites. However the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including potentially requiring Green Belt release and potentially sites within the zone of influence of European designated sites.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.</p>
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> </ul>	?/-	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the highest level of housing growth of all options considered, this option is likely to	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater</p>

		ST	MT	LT		
enhance geological resources.	<ul style="list-style-type: none"> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>				provide least overall, long-term protection for the best and most versatile agricultural land.	the need to allocate agricultural (greenfield) sites. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. <b>Mitigation measures:</b> Local Plan policies to support waste minimisation.
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	?/-	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However with the highest level of housing growth proposed, of all options considered, this option is least likely to result in protection of cultural and historic heritage assets (designated and non-designated) along with their settings.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns /

January 2016 Option 4: 520 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
14. To protect and enhance the character and appearance of the landscape including historic landscape assets and other natural resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	?/-	?/-	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study<sup>(6)</sup> offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA<sup>(7)</sup> identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. With the highest level of housing growth proposed, of all options considered, this option is the least likely to result in the protection of the character and appearance of the landscape, including historic landscapes, and other natural assets and resources.</p>	<p>villages; heritage and archaeological assets along with their settings.</p> <p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. With the highest level of housing growth proposed, of all options considered, this option is the most likely to result in a long-term, adverse impact on local distinctiveness, potentially leading to an associated long-term negative impact on tourism and the visitor economy. However, this is balanced by the option also providing the most opportunity for investment</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most</p>

		ST	MT	LT		
					in culture and tourism that could result in long-term positive effects on the local economy.	opportunities for investment that may support tourism and the visitor economy. <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.
<b>ECONOMIC</b>						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	++	++	++	<p>This option uses the scenario based on job creation figures set out in the Council's ELR(8). To underpin a level of job growth based on projecting increasing growth in targeted industrial sectors in line with regional averages there would need to be an increase in the population of 17,202 in the district over the plan period. The increase in spending in the local economy this is likely to generate should result in significant benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. However these benefits should be treated with caution since the 2012-based SNHP update notes that the population growth would primarily be achieved by inward migration as opposed to natural change and this would require a step change in migration above the level that is likely to be achievable in the district.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Residents of new developments will support their local retail, leisure and service provision.  <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or</li> </ul>	++	++	++	<p>This option is based on an objective forecast of how the district could perform in economic terms based on the nature of its economy and current expectations of future national and regional economic performance. This projection estimates that there could be a total (net additional) job growth of around 3,878 over the plan period. This is likely to result in a significant positive effect on business, the local economy and local employment. However these benefits should be</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> A local labour supply will help to deliver economic growth across the plan area.  <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>

January 2016 Option 4: 520 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
18. To encourage and support a high and stable level of employment	<p>displacement of existing businesses?</p> <ul style="list-style-type: none"> <li>● Will it meet the employment needs of local people?</li> <li>● Will it increase economic activity levels?</li> <li>● Will it improve physical accessibility to jobs?</li> <li>● Will it support higher income levels for local residents?</li> </ul>	++	++	++	<p>treated with caution since the 2012-based SNHP update notes that the population growth required to underpin this job growth would primarily be achieved by inward migration as opposed to natural change and this would require a step change in migration above the level that is likely to be achievable in the district.</p> <p>This option is based on a scenario factoring in increased economic growth in the key sectors in line with the regional average and provides unconstrained employment growth in the district of 3,878 jobs over the course of the plan period. The option is likely to have a significant positive effect on the local economy and local employment. However these benefits should be treated with caution since the 2012-based SNHP update notes that the population growth required to underpin this job growth would primarily be achieved by inward migration as opposed to natural change. Net migration would need to increase from +7,373 to +20,645 - over 13,000 net additional in migrants to achieve the required population level (all other assumptions remaining constant). This is considered to be at odds with what may be reasonably expected to occur in the district.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy.  <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
<p><b>Summary of significant effects:</b></p> <p>This option proposes the delivery of 520 new dwellings per year. It will have a direct and significant positive effect on the SA objective to ensure provision of homes to meet local needs since it exceeds the upper end of the recommended objectively assessed housing need range. This option should make the greatest contribution of all options considered to addressing affordable housing need and the needs of an ageing population. Predicted population growth of around 17,000 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including helping to safeguard local shops and services. This option is based on an objective forecast of how the district could perform in economic terms based on the nature of its economy and current expectations of future national and regional economic performance and provides unconstrained employment growth in the district of 3,878 jobs over the plan period. As a result, the option is likely to have a significant positive effect on the local economy and local employment. However these predicted positive effects should be treated with caution, since the 2012-based SNHP update notes that the population growth required to underpin this job growth would primarily be achieved by inward</p>						

January 2016 Option 4: 520 new homes each year					
SA Objective	Decision making criteria	Time-frame			Justification; cumulative effects / mitigation measures
		ST	MT	LT	
					<p>migration as opposed to natural change. Net migration would need to increase from +7,373 to +20,645 - over 13,000 net additional in migrants to achieve the required population level (all other assumptions remaining constant). This is considered to be at odds with what may be reasonably expected to occur in the district. As the highest growth option, requiring the highest number of site allocations, by comparison with other options considered, this alternative is likely to result in significant negative effects on SA objectives relating to the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets. The high level of housing growth is also likely to result in negative effects on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new dwellings and associated car journeys. This level of new housing development is not likely to enable growth to be focused on small urban extensions and small sites within the existing settlement boundaries, which may result in increasing the distance people need to travel to access key services and facilities and makes the use of sustainable forms of transport less likely. However since this option proposes the highest level of growth, it is likely to result in the highest level of investment in community facilities, including Green Infrastructure and other measures that may help to reduce health inequalities, leading to positive effects on the SA objective relating to supporting health improvements.</p>

### 16.1 Appraisal of the preferred option

#### Assessment of effects of the preferred option annual housing requirement of 320 homes per year

SA Objective		Preferred Option: 320 new homes each year				Justification; cumulative effects / mitigation measures
		Decision making criteria		Time-frame		
		ST	MT	LT	<b>SOCIAL</b>	
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	?	?/+	+	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The preferred option offers a balance between loss of countryside as a result of new development and provision of new, accessible open space as part of new developments. Well designed developments offer an opportunity to improve neighbourhood quality in some circumstances. Overall the preferred option has been assessed as having a positive effect on this Objective in the long term.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall housing requirement.  <b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</p>
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief,</li> </ul>	?	?/+	+	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the preferred option fully meets demographic need and helps to address affordable housing need and consequently there is opportunity to improve accessibility to key services and facilities through delivering new homes in accessible locations as well as enabling investment into both the towns and</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are brought forward in sustainable locations.</p>

Preferred Option: 320 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>sex and sexual orientation? Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>				the rural areas. Overall the preferred option has been assessed as having a positive effect on this Objective in the long term.	
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>Will it improve health or access to health facilities?</li> <li>Will it promote healthy lifestyles?</li> <li>Will it reduce health inequalities?</li> <li>Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	?	?/+	+	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the preferred option fully meets demographic housing needs and consequently there is opportunity to improve health infrastructure, including opportunities for walking and cycling. In the long term there could be an indirectly positive effect on health through enabling investment in health-care, leisure and physical recreational facilities. There is a balance between loss of countryside as a result of development and provision of improved opportunities to access the countryside as part of new developments. Overall the preferred option has been assessed as having a positive effect on this Objective in the long term.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Investment in new infrastructure keeps pace with growth. Housing growth offers opportunities to invest in new health-care facilities, including new or improved opportunities for walking and cycling.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Will it reduce actual levels of crime?</li> <li>Will it reduce fear of crime?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>

Preferred Option: 320 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>	+	++	++	<p>The preferred option fully meets demographic housing needs and helps to address the affordable housing need. It also offers scope to provide specialist housing such as Self-Build and Custom Build. The preferred option is close to the level of housing growth necessary to provide a sufficiently large labour force to support the average level of job growth projected by two forecasting houses: Oxford Economics and Experian<sup>(1)</sup>. The preferred option is "aspirational, but realistic" given the pro-active approach to delivery taken by the Council and in the context of an historic average delivery rate of 178 homes per year. The preferred option is expected to enable the delivery of a range of housing types and tenures, making a significant contribution to meeting community needs. It is also likely to make a significant contribution to addressing the needs of an ageing population and ensuring that problems of affordability can be addressed. Overall the preferred option has been assessed as having a significant positive effect on this objective in the medium and long-term.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Household projections suggest a considerable growth in the number of older people. The SHMA<sup>(2)</sup> identified a critical affordable housing need. Objectively assessed housing need for the District is between 235dpa and 330dpa. The preferred option will meet the objectively assessed housing need of the plan area and help to address both affordable housing need and the housing needs of older people.  <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.</p>
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	?	?/-	-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However growth is likely to lead to a negative effect on minimising the impact of new development on existing traffic congestion. Dependent on the location of new development, not all new homes may be delivered close to town and village centres, and this may lead to an increase in car use over walking and cycling. However the preferred option is likely to support priorities and provisions identified in the SMDC integrated transport strategy<sup>(3)</sup>,</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Lower levels of growth are likely to generate fewer new car journeys, resulting in less impact on existing congestion. Lower levels of growth will maximise the proportion of new development delivered close to existing centres, facilitating use of sustainable forms of transport. Higher levels of growth will allow most investment in support for sustainable transport. <b>Mitigation measures:</b> Local Plan policies to ensure that developments are brought forward in</p>

Preferred Option: 320 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					including the proposed Local Transport Packages for Leek, Cheadle and Biddulph. Growth may also be used to help deliver Green Infrastructure. Overall the preferred option has been assessed as having a negative effect on this Objective in the long term.	sustainable locations; support safe walking and cycling and improve access to the natural environment.
<b>ENVIRONMENTAL</b>						
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	--	--	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However the preferred option is likely to result in an overall increase in carbon emissions from energy consumption and emissions arising from construction and use of new development and associated car journeys. Overall the preferred option has been assessed as having a significant negative effect on this Objective in the long term.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	?	?/-	?/-	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the preferred option is likely to lead to new emissions of airborne pollutants associated with additional car journeys. There is scope for development to be delivered within 500m of an identified area of poor air quality. However new technology, reduction in diesel use and soft landscaping may help to mitigate effects. Overall the preferred option has been assessed as having	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)<sup>(4)</sup>. The total increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, there is a risk that air quality may deteriorate</p>

Preferred Option: 320 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>	0/?	0/?	0/?	<p>a negative effect on this Objective in the medium and long term, although the exact effects are uncertain.</p> <p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the SFRA (5) confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. The preferred option is likely to result in development on green field sites and potentially an increase in wastewater and reduction of natural drainage, however SuDS could be used to mitigate against this. Development could also be expected to lead to increased water demand within the District. Overall the preferred option has been assessed as having a neutral effect on this Objective, although the exact effects are uncertain.</p>	<p>in areas of existing low quality. <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development - at whatever overall scale - will be permitted only where schemes meet development plan requirements for management of flood risk. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire</li> </ul>	?	?/0	?/0	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The preferred option provides scope for long-term protection of biodiversity and natural networks through new investment and associated opportunities to deliver biodiversity enhancement or the extension of GI networks as part of schemes. However the preferred option may also lead to increased</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the higher the level of growth, the greater the need to allocate sites in the countryside, on the periphery of settlements, including sites potentially requiring Green Belt release or within the</p>

SA Objective		Preferred Option: 320 new homes each year						
		Decision making criteria		Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT	ST	MT		
	<ul style="list-style-type: none"> <li>Biodiversity Action Plan objectives? Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>						recreational and other urbanising pressures on the closest European sites, although the HRA of the Local Plan will ensure that Local Plan policies and allocations will not result in adverse effects on European designated sites. Overall the preferred option has been assessed as having a neutral effect on this Objective, although the exact effects are uncertain.	zone of influence of European designated sites. <b>Mitigation measures:</b> Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	?	?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the preferred option may result in some loss of best and most versatile agricultural land. It may also lead to non-mineral development taking place in Minerals Safeguarding Areas and thus to the unnecessary sterilisation of minerals. Overall the preferred option has been assessed as having a negative effect on this Objective in the long term, although the exact effects are uncertain.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for the best and most versatile agricultural land and geological resources, but the higher the level of growth, the greater the need to allocate agricultural (greenfield) sites. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. Overall the preferred option has been assessed as having a neutral effect on this Objective in the long term, although the exact effects are uncertain.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. <b>Mitigation measures:</b> Local Plan policies to support waste minimisation.

Preferred Option: 320 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	?	?	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The majority of sites required for this level of development were not found to give rise to significant heritage impacts<sup>(6)</sup>. However the preferred option may lead to some impact on cultural and historic heritage assets (designated and non-designated) along with their settings. Applicants should be required to provide NPPF compliant heritage statements. Overall the preferred option has been assessed as having a negative effect on this Objective in the long term, although the exact effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of altering the character of settlements and resulting in deterioration of cultural and historic heritage assets (designated and non-designated assets) or their settings that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	?	?	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study<sup>(7)</sup> offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA<sup>(8)</sup> identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. The preferred option may result in some impact on the character and appearance of the landscape, including historic landscapes, and other natural</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However the higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>

Preferred Option: 320 new homes each year

		ST	MT	LT		
					assets and resources. However the majority of sites required for this level of development were not found to give rise to significant landscape impacts, including on the setting of the Peak District National Park <sup>(9)</sup> . Overall the preferred option has been assessed as having a negative effect on this Objective in the long term, although the exact effects are uncertain.	
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	?	?	?/0	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the preferred option may lead to a long-term impact on local distinctiveness and there is scope for this to result in a long-term negative impact on tourism and the visitor economy. However the preferred option will enable investment in culture and tourism and this may result in medium term positive effects on the local economy. Overall the preferred option has been assessed as having a neutral effect on this Objective, although the exact effects are uncertain.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> The higher the level of growth, the greater the number of site allocations that will be made, increasing the risk of congestion and an adverse effect on the character and appearance of landscapes, towns and villages that together may detract from the further development of local distinctiveness and could result in long-term negative impacts on tourism and the visitor economy. Counter to this, higher levels of growth provide the most opportunities for investment that may support tourism and the visitor economy. <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>
<b>ECONOMIC</b>						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	++	++	The preferred option is close to the combined jobs growth scenario. It represents the "unconstrained" potential of the area based on its existing business base, mix of sectors and inherent economic qualities. There would need to be significant in-migration needed to support an increase in the size of the labour force sufficient to support the	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Residents of new developments will support their local retail, leisure and service provision. <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>

Preferred Option: 320 new homes each year						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					forecast job growth. The increase in spending in the local economy this would generate is likely to result in benefits to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. The preferred option is likely to result in significant benefits for the economies of existing centres. Overall the preferred option has been assessed as having a significant positive effect on this Objective in the long term.	
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	+	+	++	The preferred option supports the provision of around 870 additional jobs up to the year 2031. This is the total workforce jobs supported under the combined jobs growth plus partial catch up scenario. Although at 320dpa the preferred option is likely to support the delivery of slightly fewer jobs than if the full scenario housing figure was met (329). Whilst this may seem modest, it is set within the context of a decline in jobs forecast under the 2014-based SNPP baseline. Job growth is likely to result in long-term positive effects on business, the local economy and local employment. Overall the preferred option has been assessed as having a significant positive effect on this Objective in the long term.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Helping to reverse the decline of working age residents in the District would achieve a more balanced population structure and reduce potential future economic difficulties and the demand of services associated with an ageing population and a more limited supply of labour. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> </ul>	+	+	++	The preferred option fully meets demographic need and provides a sufficiently large labour force close to supporting an average of the Oxford Economics and Experian job growth forecasts for the District 2014-2031; a labour force increase of just under 980. This is likely to allow for the economic potential of the district to be realised and result in medium	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Whilst there is not a direct causal relationship between job growth and housing needs, the two are nevertheless fundamentally related. Ensuring a sufficient supply of homes within easy access of</p>

SA Objective	Preferred Option: 320 new homes each year					Justification; cumulative effects / mitigation measures
	Decision making criteria	Time-frame			Nature of effect; Comments	
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>				and long term positive impacts on the local economy and local employment. Overall the preferred option has been assessed as having a significant positive effect on this Objective in the long term.	employment is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.
<p><b>Summary of significant effects:</b></p> <p>The preferred option proposes the delivery of 320 new dwellings per year. This fully meets demographic housing needs and helps address affordable housing need and as such is expected to have a direct, long-term positive effect on provision of homes to meet local needs, this includes the needs of an ageing population. Predicted population growth of around 8,500 is likely to increase spending in the local economy resulting in positive benefits for the District's towns and villages, including help to safeguard local shops and services. This option is based on expected job growth of up to circa 870 and a labour force increase of close to 980 in the district 2014-2031. This is likely to allow for the economic potential of the district to be realised and lead to medium and long term positive impacts on the local economy and local employment. However development of greenfield sites outside settlement boundaries, potential loss of best and most versatile agricultural land, potential development within mineral safeguarding areas or within the proximity of heritage assets may lead to long term negative effects on biodiversity; designated and non-designated heritage assets and their settings; and landscape character and natural assets including mineral resources, although the exact effects are uncertain and it is reasonable to expect adequate mitigation. Similarly development may give rise to negative effects on objectives relating to climate change contributions and air quality as a result of energy consumption and emissions arising from construction and use of new dwellings and associated car journeys, however the exact effects are uncertain. The preferred option delivers development that is largely close to town and village centres, despite this there remains scope for negative effects on minimising the distance people need to travel to access key services and facilities and on limiting the opportunities for use of sustainable forms of transport. This is balanced by new development also enabling new opportunities for investment in community facilities, including Green Infrastructure and other measures that may help to support walking and cycling which may also help to reduce health inequalities, leading to possible minor positive effects on supporting health improvements. Overall the preferred option is considered to provide a balanced range of positive social, economic and environmental effects. A number of mitigation measures have been identified.</p> <p><b>Mitigation measures:</b></p> <ul style="list-style-type: none"> <li>Wider initiatives of the Council should be supported to help deliver additional affordable homes.</li> <li>Local Plan policies to ensure that:</li> <li>Good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</li> <li>New developments are brought forward in sustainable locations, support safe walking and cycling and deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</li> <li>New developments are well designed, creating safe places and reduced opportunities for anti-social behaviour and that high environmental design standards are supported.</li> <li>Developments include appropriate landscaping to aid removal of air pollutants.</li> <li>Developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</li> <li>Support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources including protection and enhancement of geologically important sites.</li> </ul>

Appraisal of alternative options for an employment land requirement

## 17 Appraisal of alternative options for an employment land requirement

### February 2017 Option 1: 13 hectares

SA Objective		Option 1: 13 hectares to 2031 (gross)					Justification; cumulative effects / mitigation measures
		Decision making criteria		Time-frame		Nature of effect; Comments	
		ST	MT	LT	SOCIAL		
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	?	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Community cohesion and local environmental quality are more dependent on design and location of new development than on the overall employment land requirement. <b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new employment development.</p>	
	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>Will it help to minimise the distance people need to travel to access education, employment, shopping and</li> </ul>	?	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies. This option represents the lower end of the range and as such may provide less opportunities than under all other options to allocate employment space across the district and thus help to minimise the distance people may need to travel to access jobs.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs. <b>Mitigation measures:</b> Local Plan policies to ensure that new employment developments are brought forward in sustainable locations.</p>	
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.							

Option 1: 13 hectares to 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	other key services and facilities.					
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>Will it improve health or access to health facilities?</li> <li>Will it promote healthy lifestyles?</li> <li>Will it reduce health inequalities?</li> <li>Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies. However this option represents the lower end of the range and as such may provide less opportunities than under all other options to allocate employment space across the district and thus deliver associated opportunities to increase take up of sustainable transport choices and support improvements to healthy travel networks.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> The more hectares of employment land allocated, the more opportunities are provided for increasing healthy travel networks. <b>Mitigation measures:</b> Local Plan policies to ensure that new employment developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Will it reduce actual levels of crime?</li> <li>Will it reduce fear of crime?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime. <b>Mitigation measures:</b> Local Plan policies to ensure that new employment developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>	
5. To ensure adequate quality and provision of a range of house types to meet local needs in	<ul style="list-style-type: none"> <li>Will it provide an appropriate mix of housing to enable all needs to be met?</li> </ul>	-	-	-	<p>In contrast to the other scenarios, this approach (labour supply) focuses on the future supply of labour rather than the demand for labour. The scenario projects the amount of new jobs needed</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Whilst there may not be a direct causal link</p>

Option 1: 13 hectares to 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>				to match the future working-age population and how much employment space would be needed to accommodate these jobs. The demographic scenarios identified in the emerging SHMA result in a need for 1700pa and 196dpa. Overall the labour supply scenario is considered likely to lead to negative effects on this SA objective.	between housing and employment land requirements, there is nevertheless a need to ensure that the two dovetail together to avoid any unsustainable outcomes. <b>Mitigation measures:</b> The Local Plan may need to set out a strong policy intervention to ensure that the housing implications of the preferred employment land requirement are addressed.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	?/-	?/-	?/--	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The district has high levels of out commuting to Stoke-on-Trent, East Staffordshire and Newcastle-under-Lyme. This option represents the lower end of the range and as such may provide less opportunities than under all other options to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Reducing out commuting will help to reduce the number of journeys made by car overall. <b>Mitigation measures:</b> Local Plan policies to ensure that employment developments are brought forward in sustainable locations and support safe walking and cycling.
<b>ENVIRONMENTAL</b>						
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> </ul>	-	-	-	There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is likely to lead to the lowest overall increase in carbon emissions from the	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if employment developments are built to high environmental performance standards and

Option 1: 13 hectares to 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>				energy consumption and emissions arising from construction and use of new development and associated car journeys.	<p>delivered in sustainable locations, the total increase in employment opportunity and related car journeys is likely to increase green use and associated greenhouse gas emissions.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	?	?/-	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option represents the lowest end of the employment land requirement range, it is likely to lead to the lowest level of new emissions of airborne pollutants associated with additional car journeys. In the long-term there is potential for development to be delivered within 500m of an identified area of poor air quality.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent) <sup>(1)</sup>.</p> <p>The allocation of new employment land and car journeys from increased local employment opportunities is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate</p>

Option 1: 13 hectares to 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the SFRA<sup>(2)</sup> confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This option requires the least allocation of employment land, and thus poses the lowest risk of all options to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.</p>	<p>landscaping to aid removal of air pollutants.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development will be permitted only where schemes meet development plan requirements for management of flood risk. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance. <b>Mitigation measures:</b> Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.</p>

Option 1: 13 hectares to 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to most overall, long-term protection for geological resources.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for geological resources including the best and most versatile agricultural land. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. <b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to most overall, long-term protection for the character of settlements along with heritage assets and their settings.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>

Option 1: 13 hectares to 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study<sup>(3)</sup> offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA<sup>(4)</sup> identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to most overall, long-term protection for landscape character and other natural assets.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term support for sustainable tourism.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> A thriving district with a robust cultural and visitor economy will require sufficient supply of local employment land. <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>

**ECONOMIC**

Option 1: 13 hectares to 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	+	+	Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and a positive contribution being made to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term support for the vitality and viability of the district's towns and villages.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Employees of expanding and incoming businesses will support their local retail, leisure and service provision. <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	+	+	++	<p>This option would help to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term support for strengthening, modernising and diversifying the district economy.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> A local supply of employment land will help to deliver economic growth across the plan area. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	+	+	-	<p>The labour supply scenario forecasts workforce jobs to be 35,485 in 2031 (a decline of 1,637 since 2014). As it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term support for encouraging a high and stable level of employment.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Ensuring a sufficient supply of employment land is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
<b>Summary of significant effects:</b>						

SA Objective	Option 1: 13 hectares to 2031 (gross)				Justification; cumulative effects / mitigation measures	
	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
	<p>This option is based on labour supply projections and proposes the delivery of 13ha of employment land to 2031 (gross). This option represents the lower end of the range and as such may provide less opportunities than under all other options to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow. However it is still likely to lead to a positive effect on the local economy and local employment through helping to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). However as it proposes the lowest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term support for strengthening, modernising and diversifying the district economy. The labour supply scenario forecasts workforce jobs to be 35,485 in 2031 (a decline of 1,637 since 2014), of all options considered, this option is likely to lead to least overall, long-term support for encouraging a high and stable level of employment. Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and make a positive contribution to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. However this option makes the least positive contribution to this of all options considered. The option is considered likely to lead to negative effects on meeting housing need since the scenario projects the amount of new jobs needed to match the future working-age population and how much employment space would be needed to accommodate these jobs. The demographic scenarios identified in the emerging SHMA result in a need for 170dpa and 196dpa and housing supply at this level is not considered sufficient to meet objectively assessed need. Further negative effects are likely to result on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys. Since the option represents the lowest allocation of new employment land there is less opportunity to deliver employment close to where people live, potentially increasing the distance people need to travel to access key services and facilities and making the use of sustainable forms of transport less likely. In addition, this option offers least opportunity to address the high levels of out commuting from the district, leading to negative effects predicted for the objective to reduce the number of journeys made by car. Uncertain effects are recorded on a number of SA objectives including those relating to community cohesion, the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets as the effect will be dependent on the location of employment land allocations and the implementation of Local Plan policies.</p>

	other key services and facilities.					
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Will it improve health or access to health facilities?</li> <li>● Will it promote healthy lifestyles?</li> <li>● Will it reduce health inequalities?</li> <li>● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of employment land allocations and the implementation of Local Plan policies. However this option is lower-mid range and as such may provide more opportunity than option 1, but less opportunity than under options 3 and 4 to allocate employment space across the district and thus deliver associated opportunities to increase take up of sustainable transport choices and support improvements to healthy travel networks.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> The more hectares of employment land allocated, the more opportunities are provided for increasing healthy travel networks. <b>Mitigation measures:</b> Local Plan policies to ensure that new employment developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Will it reduce actual levels of crime?</li> <li>● Will it reduce fear of crime?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the implementation of relevant Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime. <b>Mitigation measures:</b> Local Plan policies to ensure that new employment developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Will it enable people to meet their needs within their existing communities?</li> <li>● Will it ensure that people can afford their housing?</li> </ul>	+	+	++	<p>This option is based on demand-led projections. For this scenario it has been assumed that the district's overall job growth will stabilise over the coming years (ie zero job growth post 2014). To ensure labour supply to meet the job stabilisation forecasts, higher levels of housing delivery will be required. Overall the demand-led projections</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Whilst there may not be a direct causal link between housing and employment land requirements, there is nevertheless a need to ensure that the two dovetail together to avoid any unsustainable outcomes. <b>Mitigation measures:</b> The Local Plan may need to set out a strong policy intervention</p>

Option 2: 16 hectares 2014 - 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	?/+	?/+	?/++	<p>are considered likely to lead to positive effects on this SA objective, particularly in the long term.</p> <p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The district has high levels of out commuting to Stoke-on-Trent, East Staffordshire and Newcastle-under-Lyme. This option is lower-mid range and as such may provide more opportunity than option 1, but less opportunity than under options 3 and 4 to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow.</p>	<p>to ensure that the housing implications of the preferred employment land requirement are addressed.</p> <p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Reducing out commuting will help to reduce the number of journeys made by car overall. <b>Mitigation measures:</b> Local Plan policies to ensure that employment developments are brought forward in sustainable locations and support safe walking and cycling.</p>
<b>ENVIRONMENTAL</b>						
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	-	--	<p>There is some uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of developments and the implementation of Local Plan policies. However this option is lower-mid range and as such is likely to lead to more impacts than option 1, but less than under options 3 and 4, in terms of overall increase in carbon emissions from the energy consumption and emissions arising from construction and use of new development and associated car journeys.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if employment developments are built to high environmental performance standards and delivered in sustainable locations, the total increase in employment opportunity and related car journeys is likely to increase energy use and associated greenhouse gas emissions.  <b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>

Option 2: 16 hectares 2014 - 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	?	?/-	?/-	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option is lower-mid the employment land requirement range, it is likely to lead to more impacts than option 1, but fewer impacts than under options 3 and 4 in relation to new emissions of airborne pollutants associated with additional car journeys. In the long-term there is potential for development to be delivered within 500m of an identified area of poor air quality.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Identified areas of poor air quality include the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)<sup>(1)</sup>. The allocation of new employment land and car journeys from increased local employment opportunities is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.</p>
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the SFFRA<sup>(2)</sup> confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This options is lower-mid range, and thus poses more risk than option 1, but less risk than under options 3 and 4 to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development will be permitted only where schemes meet development plan requirements for management of flood risk.  <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>

Option 2: 16 hectares 2014 - 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance. <b>Mitigation measures:</b> Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.</p>
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option is lower-mid range, it is likely to lead to less opportunity than option 1, but more opportunity than under options 3 and 4, to offer long-term protection for geological resources.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for geological resources including the best and most versatile agricultural land. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. <b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>

Option 2: 16 hectares 2014 - 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option is lower-mid range, it is likely to lead to less opportunity than option 1, but more opportunity than under options 3 and 4, to offer long-term protection for the character of settlements along with heritage assets and their settings.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study<sup>(3)</sup> offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA<sup>(4)</sup> identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. However as this option is lower-mid range, it is likely to lead to less opportunity than option 1, but more opportunity than under options 3 and 4, to offer long-term protection for landscape character and other natural assets.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>

Option 2: 16 hectares 2014 - 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as this option is lower-mid range, it is likely to lead to more opportunity than option 1, but less opportunity than under options 3 and 4, to offer long-term support for sustainable tourism.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> A thriving district with a robust cultural and visitor economy will require sufficient supply of local employment land.  <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>
<b>ECONOMIC</b>						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	+	++	Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and a positive contribution being made to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. However as this option is lower-mid range, it is likely to lead to more opportunity than option 1, but less opportunity than under options 3 and 4, to offer long-term support for the vitality and viability of the district's towns and villages.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Employees of expanding and incoming businesses will support their local retail, leisure and service provision. <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	+	+	++	This option would help to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). However as this option is lower-mid range, it is likely to lead to more opportunity than option 1, but less opportunity than under options 3 and 4, to offer long-term support for strengthening, modernising and diversifying the district economy.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> A local supply of employment land will help to deliver economic growth across the plan area. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>

Option 2: 16 hectares 2014 - 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Will it meet the employment needs of local people?</li> <li>● Will it increase economic activity levels?</li> <li>● Will it improve physical accessibility to jobs?</li> <li>● Will it support higher income levels for local residents?</li> </ul>	+	+	+	<p>For this scenario it has been assumed that the district's overall job growth will stabilise over the coming years, ie zero job growth post 2014. To maintain an overall zero job growth it is assumed that B-class job growth will reduce by 433 to 2031. This option is lower-mid range and is likely to lead to more opportunity than option 1, but less opportunity than under options 3 and 4, to offer long-term support for encouraging a high and stable level of employment.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Ensuring a sufficient supply of employment land is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
<p><b>Summary of significant effects:</b></p> <p>This option is based on a demand-led projection and proposes the delivery of 16ha of employment land 2014 to 2031 (gross). This job stabilisation scenario provides a lower-mid range employment land requirement option and as such may provide more opportunity than option 1, but less opportunity than under options 3 and 4 to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow. However the option is likely to lead to a positive effect on the local economy and local employment through helping to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). As lower-mid-range, this option is likely to lead to more opportunity than under option 1, but less opportunity than under options 3 and 4, to offer long-term support for strengthening, modernising and diversifying the district economy. The scenario assumes that the district's overall job growth will stabilise over the coming years, ie zero job growth post 2014 and the option is likely to lead to more opportunity than option 1, but less opportunity than under options 3 and 4, to offer long-term support for encouraging a high and stable level of employment. Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and make a positive contribution to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. The option makes a more positive contribution to this than option 1, but less of a positive contribution than is likely under options 3 and 4. The option is considered likely to lead to positive effects on meeting housing need since to ensure labour supply meets the job stabilisation forecast, higher levels of housing delivery will be required and this is likely to lead to meeting objectively assessed need. Negative effects are likely to result for objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys. Since the option is lower-mid range, there is more opportunity to deliver employment and facilities to where people live than under option 1 but less opportunity than under options 3 and 4, influencing the distance people need to travel to access key services and facilities and impacting on the likelihood of people being enabled to use sustainable forms of transport. In addition, the option offers some opportunity to address the high levels of out commuting from the district, leading to less significant negative effects than under option 1, but more negative impacts than under options 3 and 4 predicted for the objective to reduce the number of journeys made by car. Uncertain effects are recorded on a number of SA objectives including those relating to community cohesion, the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets as the effect will be dependent on the location of employment land allocations and the implementation of Local Plan policies.</p>

<b>ECONOMIC</b>						

Option 3: 25 hectares 2014 to 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	++	++	Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and a positive contribution being made to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. This option is upper-mid range and as such may lead to higher impacts than under options 1 and 2 but less impact than option 4 in relation to overall, long-term support for the vitality and viability of the district's towns and villages.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Employees of expanding and incoming businesses will support their local retail, leisure and service provision.  <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	+	++	++	This option would help to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). However this option is upper-mid range and as such may lead to higher impacts than under options 1 and 2 but less impact than option 4 in relation to overall, long-term support for strengthening, modernising and diversifying the district economy.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> A local supply of employment land will help to deliver economic growth across the plan area. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	+	+	++	The past trends job growth scenario suggests growth in office FTE jobs (B1a) but declining FTE jobs in industrial (B1c/B2) and warehousing (B8) land use. Consideration of past take up rates suggests limited prospects for growth in the B-class employment sectors. The practical physical constraints and relative inaccessibility of certain areas and the current lack of viability of employment development schemes suggests that realistically an upsurge in large developments in the district is unlikely for the foreseeable future. However this option	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Ensuring a sufficient supply of employment land is a central element of an efficiently functioning economy.  <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>

Option 3: 25 hectares 2014 to 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					is upper-mid range and as such may lead to higher impacts than under options 1 and 2 but less impact than option 4 in relation to overall, long-term support for encouraging a high and stable level of employment.	
<p><b>Summary of significant effects:</b></p> <p>This option is based on demand-led projections informed by past take up rates and past trends, proposing the delivery of 25ha of employment land to 2031 (gross). This option is upper-mid range and as such may provide more opportunities than under options 1 and 2, but less opportunity than option 4 to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow. This option is likely to lead to a significantly positive effect on the local economy and local employment through helping to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). As this option is upper-mid range it may provide more opportunities than under options 1 and 2, but less opportunity than option 4 to lead to overall, long-term support for strengthening, modernising and diversifying the district economy. The past trends job growth scenario suggests growth in office FTE jobs (B1a) but declining FTE jobs in industrial (B1c/B2) and warehousing (B8) land use. Consideration of past take up rates suggests limited prospects for growth in the B-class employment sectors. The practical physical constraints and relative inaccessibility of certain areas and the current lack of viability of employment development schemes suggests that realistically an upsurge in large developments in the district is unlikely for the foreseeable future. However as this option is upper-mid range it may provide more opportunities than under options 1 and 2, but less opportunity than option 4 to lead to long-term support for encouraging a high and stable level of employment. Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and make a positive contribution to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. This option makes a more positive contribution to this than options 1 and 2, but less of a contribution than option 4. The option is also considered likely to lead to positive effects on meeting housing need. Past trends in FTE job growth over the period 2014-2031 were considered (2,609) in addition to past take up rates of employment sites in the district, reflecting market demand. To ensure labour supply is sufficient to support the net land requirement produced by this approach (around 3ha - 3.9ha to 2031) high levels of housing delivery will be required, likely to be considered sufficient to meet objectively assessed need. Since the option is upper-mid range, there is most opportunity to deliver employment close to where people live than under options 1 and 2, potentially reducing the distance people need to travel to access key services and facilities and making the use of sustainable forms of transport more likely, however the option offers less of a positive contribution to this than option 4. In addition, this option offers more opportunity than options 1 and 2 to address the high levels of out-commuting from the district, leading to positive effects predicted for the objective to reduce the number of journeys made by car; although the significance is less than under option 4. However negative effects are likely to result on objectives relating to climate change contributions and air quality that are associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys, these effects are likely to be greater than under options 1 and 2, but less significant than under option 4. Uncertain effects are recorded on a number of SA objectives including those relating to community cohesion, the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets as the effect will be dependent on the location of employment land allocations and the implementation of Local Plan policies.</p>

9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However the SFRA<sup>(2)</sup> confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1, with only a few sites partially within Flood Zone 2 or 3. This option requires the greatest allocation of employment land, and thus poses the highest risk of all options to increase surface water flood risk within towns or villages and further downstream as a result of increased surface water runoff and reduced infiltration.</p>	<p>landscaping to aid removal of air pollutants.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development will be permitted only where schemes meet development plan requirements for management of flood risk. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance. <b>Mitigation measures:</b> Local Plan policies to ensure conservation and enhancement of biodiversity and that any development proposal is not permitted to have an adverse effect on the integrity of a European site.</p>

Option 4: 27 hectares 2014 to 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the greatest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term protection for geological resources.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for geological resources including the best and most versatile agricultural land. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. <b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	?	?	?	There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the greatest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term protection for the character of settlements along with heritage assets and their settings.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>

Option 4: 27 hectares 2014 to 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. The Landscape and Settlement Character Assessment Study<sup>(3)</sup> offers guidance to help ensure new development required in the District takes place in locations that are compatible with the unique quality of the Staffordshire Moorlands landscape and in sympathy with the setting of a particular settlement. The HEA<sup>(4)</sup> identified that (within each of the study areas) historic character had been retained and that beyond the present extent of the built areas, a dispersed settlement pattern was still predominant. However as it proposes the greatest allocation of new employment land of all options considered, this option is likely to lead to least overall, long-term protection for landscape character and other natural assets.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of the effect and level of significance as this will be dependent on the location of development and the implementation of Local Plan policies. However as it proposes the greatest allocation of new employment land of all options considered, this option is likely to lead to most overall, long-term support for sustainable tourism.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> A thriving district with a robust cultural and visitor economy will require sufficient supply of local employment land. <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>

**ECONOMIC**

Option 4: 27 hectares 2014 to 2031 (gross)						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	++	++	Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and a positive contribution being made to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. As it proposes the greatest allocation of new employment land of all options considered, this option is likely to lead to most overall, long-term support for the vitality and viability of the district's towns and villages.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Employees of expanding and incoming businesses will support their local retail, leisure and service provision. <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	++	++	++	<p>This option would help to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). However as it proposes the greatest allocation of new employment land of all options considered, this option is likely to lead to most overall, long-term support for strengthening, modernising and diversifying the district economy.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> A local supply of employment land will help to deliver economic growth across the plan area. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	++	++	++	<p>This scenario represents a combination of Oxford Economics and Experian job growth forecasts. Whilst both projections indicate growth over the plan period, the projected scales vary considerably. OE suggest a net growth of +228 jobs 2014 - 2031 whilst Experian projections forecast +1,300 over the same period. A key difference between them relates to the projections for manufacture of machinery and equipment and of transport equipment with OE projections suggesting a decline of -427 FTE jobs for these two sectors and Experian projections suggesting a growth of 1,676 FTE jobs net. Given the presence of successful companies in the district</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Ensuring a sufficient supply of employment land is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>

SA Objective	Option 4: 27 hectares 2014 to 2031 (gross)				Justification; cumulative effects / mitigation measures	
	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
					<p>specialising in these advanced manufacturing sectors, the NLP report considers there is merit in taking forward a combination of the two job growth scenarios providing a net increase of 435 B-Class FTE jobs 2014-2031 (794 FTEs in total). The report notes that allocation of this level of employment land would require policy intervention and close monitoring to ensure that the associated scale of job growth is realistic. However as it proposes the greatest allocation of new employment land of all options considered, this option has the potential to lead to most overall, long-term support for encouraging a high and stable level of employment.</p>	
<p><b>Summary of significant effects:</b></p> <p>This option is based on demand-led projections informed by Oxford Economics and Experian job growth forecasts, proposing the delivery of 27ha of employment land to 2031 (gross). This option represents the upper end of the range and as such may provide more opportunities than under all other options to ensure that there is sufficient local supply of employment land in the district for its businesses to expand and grow. This option is likely to lead to a significantly positive effect on the local economy and local employment through helping to meet previously identified needs to revitalise current poor quality stock; help address the imbalance of the portfolio in terms of the size of properties available and meet continued demand for B2 floorspace (particularly from indigenous companies). The scenario represents a combination of Oxford Economics (OE) and Experian job growth forecasts. Whilst both projections indicate growth over the plan period, the magnitude of this varies considerably. OE suggest a net growth of +228 jobs 2014 - 2031 whilst Experian projections forecast +1,300 over the same period. A key difference between them relates to the projections for manufacture of machinery and equipment and of transport equipment with OE projections suggesting a decline of -427 FTE jobs for these two sectors and Experian projections suggesting a growth of 1,676 FTE jobs net. Given the presence of successful companies in the district specialising in these advanced manufacturing sectors, the NLP report considers there is merit in taking forward a combination of the two job growth scenarios providing a net increase of 435 B-Class FTE jobs 2014-2031 (794 FTEs in total). The report notes that allocation of this level of employment land would require policy intervention via the emerging Local Plan and close monitoring to ensure that the associated scale of job growth is realistic. However as it proposes the greatest allocation of new employment land of all options considered, this option has the greatest potential to lead to overall, long-term support for strengthening, modernising and diversifying the district economy and encouraging a high and stable level of employment. Ensuring a sufficient supply of employment land is likely to enable local businesses to expand and make a positive contribution to the vitality and viability of the District's towns and villages, contributing to the safeguarding and improvement of shops and services. This option makes the most positive contribution to this of all options considered. The option is also considered likely to lead to positive effects on meeting housing need. To ensure labour supply is sufficient to support the net land requirement produced by this approach (around 6.5ha 2014 to 2031) significant levels of housing delivery will be required, likely to be considered sufficient to meet objectively assessed need. Since the option represents the greatest allocation of new employment land there is most opportunity to deliver employment close to where people live, potentially reducing the distance people need to travel to access key services and facilities and making the use of sustainable forms of transport more likely. In addition, this option offers most opportunity to address the high levels of out-commuting from the district, leading to positive effects predicted for the objective to reduce the number of journeys made by car. However negative effects are likely to result on objectives relating to climate change contributions and air quality that are</p>						

SA Objective		Option 4: 27 hectares 2014 to 2031 (gross)				Justification; cumulative effects / mitigation measures
		Decision making criteria		Time-frame		
		ST	MT	LT		
		<p>associated with energy consumption and emissions arising from construction and use of new employment space and associated car journeys. Uncertain effects are recorded on a number of SA objectives including those relating to community cohesion, the protection of biodiversity; the character of towns, villages and heritage assets and their settings; and landscape character and natural assets as the effect will be dependent on the location of employment land allocations and the implementation of Local Plan policies.</p>

Appraisal of alternative development approaches for Cheadle

## 18 Appraisal of alternative development approaches for Cheadle

**18.1** The matrices below set out the likely significant effects on sustainability of the three alternative options considered by the Council for a development approach for Cheadle. The assessments are based on the methodology proposed and consulted on in the SA Scoping Report and use the SA Framework also developed through consultation as part of the SA Scoping stage.

**18.2** As part of the SA appraisal of options, consideration has been given to effects on sustainability over time (in the short, medium and long term) along with any cumulative impacts of implementing each option and possible mitigation measures where appropriate.

**18.3** In comparing options with one another, consideration has also been given to the geographical scale of effect, whether any identified effects would be permanent or temporary, reversible or irreversible and the assumptions made, or justification for the assessment recorded.

**18.4** Definitions of significance are provided in Section 3 Appraisal Methodology.

**18.5** Scoring of options is as set out in Table 8.1.

### Option 1: Northern Focus

SA Objective	Option 1: Northern Focus						Justification; cumulative effects / mitigation measures
	Decision making criteria	Time-frame			Nature of effect; Comments		
		ST	MT	LT			
<b>SOCIAL</b>							
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> </ul>	+/-	+/-	+/-	Development of the sites comprising the "northern focus" include sites both within and outside the existing settlement boundary. The option could enable the delivery of a new school, and this is likely to result in positive effects on this objective. However sites CH002A, CH002B, CH006, CH009, CH024 and CH129 are within 100m of Cecilly Brook LNR or Hales Hall Pool LNR; sites CH73B and CH081 are within 200m of Cecilly Brook LNR		<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Community cohesion and local environmental quality are dependent on the design and tenure mix, as well as the location of new development. <b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</p>

Option 1 : Northern Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>				<p>and Hales Hall Pool LNR respectively and it is considered that this is likely to result in a negative effect arising from the potential for adverse impacts on the District's GI network. Overall the assessment against this objective is considered to be mixed and uncertain as in addition it will be partly dependent on the implementation of Local Plan policies.</p>	
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	+	++	++	<p>This option could enable the delivery of new development in good proximity to a wide range of services and facilities. Sites CH009, CH013 and CH015 are within 400m of the town centre: sites CH001, CH002A, CH002B, CH006, CH020, CH024 and CH073B are within 800m of the centre. Sites CH004 and CH129 are within 1,200m of the town centre. Of this option, only sites CH080, CH081 and CH132 are more than 1,200m from the centre. This is likely to result in very positive effects on improving access to jobs, services and facilities which could be expected to contribute to the advancement of equality of opportunity.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. <b>Mitigation measures:</b> Local Plan policies to help ensure that the needs of all members of the community can be addressed by helping to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</p>
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>Will it improve health or access to health facilities?</li> <li>Will it promote healthy lifestyles?</li> <li>Will it reduce health inequalities?</li> <li>Will it provide opportunities to participate in leisure and recreational</li> </ul>	+	+	++	<p>This option could enable the delivery of new development in proximity to a range of healthcare facilities (eg within 1,200m from a GP surgery and open space). Development on the edge of settlement may offer opportunities to enable improved recreational access to the countryside. Overall this option has been assessed as having a positive effect on this objective in the medium and long term.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Delivering new homes in proximity to existing healthcare services and open space will have a positive effect on health. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel</p>

Option 1 : Northern Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	activities including access to the countryside?					networks, including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Will it reduce actual levels of crime?</li> <li>Will it reduce fear of crime?</li> </ul>	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime.  <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>	+	++	++	The sites comprising the northern focus option are a range of sizes, four are large enough to yield over 100 homes each, a further three are each expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the needs of the whole community. This option has been assessed as having a very positive effect on this objective in the medium and long term.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Larger sites offer the most potential to deliver a range of types and tenures of new homes. <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.</p>
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	+	+	++	All the sites comprising this option could deliver development within 500m of a bus stop and this is likely to result in a positive effect from supporting the use of public transport. Ten of the fifteen sites making up the option are within the settlement boundary and all but one (CH004) are within 800m of the town centre, this could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Five sites are outside the existing	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development delivered close to existing services and facilities will help to reduce the number of journeys made by car. <b>Mitigation measures:</b> Local Plan policies to ensure that developments support safe walking and cycling and improve access to the natural environment.</p>

Option 1: Northern Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					settlement boundary, two within 1,200m of the centre and three sites (CH080, CH081 and CH132) over 1,200m from the centre and its services and facilities. Overall this option has been assessed as having a long term positive effect on this objective.	
<b>ENVIRONMENTAL</b>						
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	-	-	Development of the sites comprising this option could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. All the sites comprising this option could deliver development within 500m of a bus stop. Ten of the fifteen sites making up the option are within the settlement boundary and all but one of these are within 800m of the town centre, this could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Five sites are outside the existing settlement boundary, two within 1,200m of the centre and three sites (CH080, CH081 and CH132) over 1,200m from the centre and its services and facilities. Whilst this may help to reduce the need to travel by car, overall this option has been assessed as having a negative effect on this objective.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions.  <b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	-	-	--	This option includes site CH015 which is an edge of town centre site within 100m of a candidate Air Quality Management Area. This	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> The main areas identified in the District as being of poor air quality are the Cellarhead junction (between the A52 and A520); Ball</p>

Option 1 : Northern Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Is new development directed towards areas of least flood risk?</li> <li>● Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>● Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Will it encourage water efficiency and demand management?</li> </ul>	--	--	--	option has been assessed as having a negative effect on this objective.	<p>Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)<sup>(1)</sup>. The increase in number of dwellings and car journeys across Cheadle is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality. <b>Mitigation measures</b>: Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants and provide support for the Cheadle Transport Package<sup>(2)</sup>.</p> <p><b>Geographical scale</b>: Local Plan area;  <b>Effects</b>: Permanent; <b>Assumptions made</b>: Development will be permitted only where schemes meet development plan requirements for management of flood risk.  <b>Mitigation measures</b>: Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>

Option 1: Northern Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	--	--	--	This option includes sites CH002a and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles in Staffordshire (water voles are a protected species). In addition sites CH002b, CH006 and CH009 are within 100m of the Reserve. CH129 is within 100m of Hales Hall Pool LNR. Sites CH073b and CH081 are within 200m of one of these Reserves. There is potential for development to result in disturbance of habitats, either singly or in combination with other sites. A number of these sites have the potential to support protected species <sup>(3)</sup> due to the proximity of the mosaic of stream habitats and presence of species rich hedgerows. Overall this option has been assessed as having a significant negative effect on this objective.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the cumulative impact of the development of a number of sites which border, or are in close proximity to, a Local Nature Reserve pose risks of disturbance that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible.</p>
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	--	--	--	This option includes sites CH001, CH002A, CH002B, CH004, CH006, CH009, CH024, CH073B, CH080, CH081 CH129 and CH132 that are assessed as Agricultural Land Classification (ALC) Grade 3 land, so the proposal could result in the loss of best and most versatile agricultural land.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Further work is required to establish the quality of agricultural land at site specific level and the proportion of Grade 3 land classified as Grade 3a. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> </ul>	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the</p>

		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>				<p>dependent on the implementation of Local Plan policies.</p>	<p>re-use of existing buildings wherever possible. <b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	-	-	--	<p>This option includes sites CH009, CH013, CH015, CH024, CH080 and CH081 that are assessed as sites within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Dependent on proposal specific information, there is scope that this option could lead to the deterioration of the setting of designated heritage assets. This option has been assessed as having an overall negative effect on this objective although the exact nature of effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk of development resulting in harm or loss to the significance of a designated heritage asset that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment</li> </ul>	-	-	--	<p>This option includes a number of greenfield sites outside the current development boundary: CH073B, CH080, CH081, CH129 and CH132 that are assessed as having potential for effects on landscape character if developed, although the exact nature of effects are uncertain as they are dependent on proposal specific information. It should be noted that none of the above sites fall within the area identified as "important landscape setting to settlement"<sup>(4)</sup>. Overall this option has been assessed as having a negative effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However options that include a number of sites that contribute to the current landscape setting to the settlement increases the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character</p>

Option 1 : Northern Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	identified in the NCA profiles?					and appearance of the landscape including historic landscape and other natural assets and resources.
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	+	+	+	This option envisages locating the focus of growth to the north of the town. Delivery of a new school in the north of Cheadle could be expected to ease some pressure on peak time journeys to school that are currently concentrated in the south west of the town and this may help support opportunities for investment in culture and tourism that could result in positive effects on the local economy.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Proposals that have a positive effect on the town centre are likely to result in support for tourism and the visitor economy. <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>
<b>ECONOMIC</b>						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	+	+	The majority of sites comprising this option are located within 1,200m of the town centre and the wide range of key services and facilities that can be found here. Sites CH080, CH081 and CH132 are more than 1,200m away from the town centre which could result in existing services and facilities being inaccessible for new residents of developments here. Overall the proposal has been assessed as having a minor positive effect on this objective.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Development of residential sites with good access to the town centre is likely to result in a positive effect on the vitality and viability of Cheadle as residents of new developments could be expected to support their local retail, leisure and service provision. <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or</li> </ul>	0	0	0	Developments of the sites comprising this option could encourage investment in people and infrastructure through developer contributions although this would be limited. This proposal has been assessed as having a neutral effect on this objective.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> A local labour supply will help to deliver economic growth across the plan area. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>

Option 1 : Northern Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
18. To encourage and support a high and stable level of employment	minimise the loss or displacement of existing businesses?  Will it meet the employment needs of local people? Will it increase economic activity levels? Will it improve physical accessibility to jobs? Will it support higher income levels for local residents?	+	+	+	The proposal could facilitate residential development within 30 minutes travel time of existing employment provision. This proposal has been assessed as having a positive effect on this objective.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.
<b>Summary of significant effects:</b>  Sites comprising the option "northern focus" are located both within and outside the existing settlement boundary. The sites are a range of sizes, four are large enough to yield over 100 homes each, a further three are each expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community. A further positive effect of the option is the opportunity it provides for the delivery of a new school. A new school in the north of Cheadle could be expected to ease some pressure on peak time journeys to the existing schools that are concentrated in the south west of the town. This is likely to result in positive effects on the town centre and may help support opportunities for investment in culture and tourism with positive effects on the local economy. All the sites comprising this option could deliver development within 500m of a bus stop and all but three sites are within 1,200m of the town centre with its wide range of key services and facilities. This is likely to result in positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of the town centre, providing support for walking and cycling and reducing the need to travel by car. However sites CH080, CH081 and CH132 are more than 1,200m away from the town centre, so this option could result in existing services and facilities being inaccessible for residents of some new developments. There is potential for the cumulative impacts of development to result in the disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated. The option includes sites CH002a and CH024 which border Cecilly Brook Local Nature Reserve (LNR), one of the most important sites for water voles (a protected species) in Staffordshire. In addition, sites CH002b, CH006 and CH009 are within 100m of the Reserve. CH129 is within 100m of Hales Hall Pool LNR. Sites CH073b and CH081 are within 200m of one of these Local Nature Reserves. This option is also likely to result in the development of sites subject to risk from flooding, the option includes sites CH002a, CH006, CH020, CH080, CH081 and CH132 all of which are partly located within a flood zone 3 area. Dependent on proposal specific information, there is scope that the cumulative impact of development under this option may result in harm or loss to the significance of designated heritage assets. Sites CH009, CH013, CH015, CH024, CH080 and CH081 are within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Likely negative effects on landscape character have also been identified, sites

**Option 2: South-Western focus**

Option 2: South-Western Focus					
SA Objective	Decision making criteria	Time-frame		Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT		
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> </ul>	+/-	+/-	+/-	<p>Development of the sites comprising the "south-western focus" include sites both within and outside the existing settlement boundary. The option could help support the delivery of a southern link road between A522 Tean Road and A521 Delphouse Road, which could result in positive effects on this objective. However sites CH002A, CH002B, CH006, CH009 and CH024 are within 100m of Cecily Brook LNR and it is considered that this is likely to result in a negative effect arising from the potential for</p> <p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Community cohesion and local environmental quality are dependent on the design and tenure mix, as well as the location of new development. <b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</p>
<b>SOCIAL</b>					

Option 2: South-Western Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>				adverse impacts on the District's GI network. Overall the assessment against this objective is considered to be mixed and uncertain as in addition it will be partly dependent on the implementation of Local Plan policies.	
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	+	++	++	This option could enable the delivery of new development in good proximity to a wide range of services and facilities. Sites CH009, CH013 and CH015 are within 400m of the town centre; sites CH001, CH002A, CH002B, CH006, CH020 and CH024 are within 800m of the centre. Sites CH004 and sites CH085A, B, C and D are within 1,200m of the town centre. Of this option, only sites CH093 and CH128 are more than 1,200m from the centre. This is likely to result in very positive effects on improving access to jobs, services and facilities which could be expected to contribute to the advancement of equality of opportunity.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. <b>Mitigation measures:</b> Local Plan policies to help ensure that the needs of all members of the community can be addressed by helping to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</p>
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>Will it improve health or access to health facilities?</li> <li>Will it promote healthy lifestyles?</li> <li>Will it reduce health inequalities?</li> <li>Will it provide opportunities to participate in leisure and</li> </ul>	+	+	++	This option could enable the delivery of new development in proximity to a range of healthcare facilities (eg within 1,200m from a GP surgery and open space). Development on the edge of settlement may offer opportunities to enable improved recreational access to the countryside. Overall this option has been assessed as having a positive effect on this objective in the medium and long term.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Delivering new homes in proximity to existing healthcare services and open space will have a positive effect on health. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks,</p>

Option 2: South-Western Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	recreational activities including access to the countryside?					including increased opportunities for access to the countryside.
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Will it reduce actual levels of crime?</li> <li>● Will it reduce fear of crime?</li> </ul>	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Will it enable people to meet their needs within their existing communities?</li> <li>● Will it ensure that people can afford their housing?</li> </ul>	+	++	++	<p>The sites comprising the south-western focus option are a range of sizes, five are large enough to yield over 100 homes each, a further two are expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the needs of the whole community. This option has been assessed as having a very positive effect on this objective in the medium and long term.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Larger sites offer the most potential to deliver a range of types and tenures of new homes. <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.</p>
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Will it minimise impacts on existing traffic congestion?</li> <li>● Will it support the use of public transport?</li> <li>● Will it support safe walking and cycling?</li> <li>● Will it protect and improve access to the natural environment and</li> </ul>	+	+	++	<p>All the sites comprising this option could deliver development within 500m of a bus stop and this is likely to result in a positive effect from supporting the use of public transport. Ten of the sixteen sites making up the option are within the settlement boundary (and all but one within 800m from the town centre) which could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Six sites are outside the existing</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Development delivered close to existing services and facilities will help to reduce the number of journeys made by car. <b>Mitigation measures:</b> Local Plan policies to ensure that developments support safe walking and cycling and improve access to the natural environment.</p>

Option 2: South-Western Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	support Green Infrastructure?				settlement boundary, four of these within 1,200m of services and facilities and two - CH093 and CH128 - more than 1,200m. Overall this option has been assessed as having a long term positive effect on this objective.	
<b>ENVIRONMENTAL</b>						
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	-	-	Development of the sites comprising this option could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. All of the sites comprising this option could deliver development within 500m of a bus stop. Ten of the sixteen sites making up the option are within the settlement boundary (and all but one of these within 800m from the town centre) which could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Six sites are outside the existing settlement boundary, four of these within 1,200m of services and facilities and two - CH093 and CH128 - more than 1,200m. Whilst this may help reduce the need to travel by car, overall this option has been assessed as having a negative effect on this objective.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	-	-	--	This option includes site CH015 which is an edge of town centre site within 100m of a candidate Air Quality Management Area. This option has been assessed as having a negative effect on this objective.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> The main areas identified in the District as being of poor air quality are the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a</p>

Option 2: South-Western Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Is new development directed towards areas of least flood risk?</li> <li>● Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>● Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>● Will it encourage water efficiency and demand management?</li> </ul>	-	--	--	<p>This option includes sites CH002A, CH006, CH020 and CH85B all of which are partly located within a flood zone 3 area. Also sites CH085A and CH093 that are partly within flood zone 2. It can be considered that this option is likely to result in the development of sites subject to risk from flooding. Development of sites could be expected to lead to an increase in wastewater and reduction of natural drainage. Mitigation measures are possible however. Overall this option has been assessed as having a significant negative effect on this objective.</p>	<p>primary link road from Stoke on Trent<sup>(1)</sup>. The increase in number of dwellings and car journeys across Cheadle is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants and provide support for the Cheadle Transport Package<sup>(2)</sup>.</p> <p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development will be permitted only where schemes meet development plan requirements for management of flood risk.  <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>
10. To identify, conserve and enhance biodiversity resources and to test	<ul style="list-style-type: none"> <li>● Will it protect and promote effective management of the district's sites of</li> </ul>	-	--	--	<p>This option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles in Staffordshire (water voles are a</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of</p>

Option 2: South-Western Focus

		ST	MT	LT		
the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>				protected species). In addition sites CH002b, CH006 and CH009 are within 100m of the Reserve. There is potential for development to result in disturbance of habitats, either singly or in combination with other sites. A number of these sites have the potential to support protected species <sup>(3)</sup> due to the proximity of the mosaic of stream habitats and presence of species rich hedgerows. Overall this option has been assessed as having a significant negative effect on this objective.	ecological and nature conservation importance, but the cumulative impact of the development of a number of sites which border, or are in close proximity to, a Local Nature Reserve pose risks of disturbance that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible.
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	--	--	--	This option includes sites CH001, CH002A, CH002B, CH004, CH006, CH009, CH024, CH085A, B, C and D, CH093 and CH128 that are assessed as Agricultural Land Classification (ALC) Grade 3 land, so the proposal could result in the loss of best and most versatile agricultural land.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Further work is required to establish the quality of agricultural land at site specific level and the proportion of Grade 3 land classified as Grade 3a. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. <b>Mitigation measures:</b> Local Plan policies to support waste minimisation.

Option 2: South-Western Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	-	-	--	<p>This option includes sites CH009, CH013, CH015, CH024, CH085C, CH085D, CH093 and CH128 that are assessed as sites within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Dependent on proposal specific information, this option could lead to the deterioration of the setting of designated heritage assets. This option has been assessed as having an overall negative effect on this objective although the exact nature of effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk that the cumulative impact of development may result in harm or loss to the significance of designated heritage assets that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	-	-	--	<p>This option includes a number of greenfield sites outside the current development boundary: CH085A, B, C and D, CH093 and CH128 that are assessed as having potential for effects on landscape character if developed, although the exact nature of effects are uncertain as they are dependent on proposal specific information. It should be noted that none of the above sites fall within the area identified as "important landscape setting to settlement"<sup>(4)</sup>. The overall impact of development of site CH093 on the purposes of the Green Belt was assessed as moderate and of site CH128 as limited<sup>(5)</sup>; with the report recommendation that the Council consider both sites for Green Belt release under exceptional circumstances. Overall this option has been assessed as having a negative effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However options that include a number of sites that contribute to the current landscape setting to the settlement increases the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>

Option 2: South-Western Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	0	0	-	<p>This option envisages locating the focus of growth to the south west of the town, close to existing school sites. If this resulted in more journeys to school being made on foot, this could lead to positive effects. However if additional journeys to key sites such as schools are principally made by car, focusing development around the existing cluster of schools may exacerbate congestion at peak times due to the concentration of journeys to school into one area of the town. This may have a neutral or long-term negative effect on the further development of sustainable tourism and local distinctiveness.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Proposals that have a positive effect on the town centre are likely to result in support for tourism and the visitor economy.  <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>
<b>ECONOMIC</b>						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	+	+	<p>The County Council assessment of travelling conditions in Cheadle notes that there are significant delays along Leek Road and Froghall Road (in bound) that can be related to capacity constraints at the Leek Road / High Street / Tape Street junction between 8am and 9am<sup>(6)</sup>. However, over the majority of Cheadle's road network journey times are considered to be reliable and delays relatively modest. A further transport study<sup>(7)</sup> was commissioned to assess impacts of additional housing and employment land provision on the highway network. Whilst the study predicted that the impacts of planned new development would still enable the overall network in Cheadle to generally remain operating within capacity, a number of further actions were recommended. In addition the County Council has proposed a study to consider the potential impacts on town centre traffic levels of a southern link road between A522 Tean Road</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development of residential sites with good access to the town centre is likely to result in a positive effect on the vitality and viability of Cheadle as residents of new developments could be expected to support their local retail, leisure and service provision. <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>

Option 2: South-Western Focus						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					and A521 Delphouse Road. Sites comprising this option may provide the opportunity to deliver a southern link road. The majority of sites comprising this option are located within 1,200m of the town centre and the wide range of key services and facilities that can be found here. Only sites CH093 and CH128 are more than 1,200m away from the town centre which could result in existing services and facilities being inaccessible for new residents of developments here. Overall the proposal has been assessed as having a minor positive effect on this objective.	
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>● Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>● Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	0	0	0	Developments of the sites comprising this option could encourage investment in people and infrastructure through developer contributions. This proposal has been assessed as having a neutral effect on this objective.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> A local labour supply will help to deliver economic growth across the plan area.  <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>● Will it meet the employment needs of local people?</li> <li>● Will it increase economic activity levels?</li> <li>● Will it improve physical accessibility to jobs?</li> <li>● Will it support higher income levels for local residents?</li> </ul>	+	+	+	The proposal could facilitate residential development within 30 minutes travel time of existing employment provision. This proposal has been assessed as having a positive effect on this objective.	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>

SA Objective	Option 2: South-Western Focus				Justification; cumulative effects / mitigation measures
	Decision making criteria	Time-frame		Nature of effect; Comments	
		ST	MT		
<p><b>Summary of significant effects:</b></p> <p>Sites comprising the option "south western focus" are located both within and outside the existing settlement boundary. The sites are a range of sizes, five are large enough to yield over 100 homes each, a further two are expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community. A further positive effect of the option is the opportunity it provides for the delivery of a southern link road to help relieve traffic congestion in the town centre. However focusing new development where there is an existing cluster of schools may exacerbate congestion at peak times from concentrating journeys to school into one area of town. Unless the new journeys to school are mainly made on foot, this may result in negative effects on the town centre. All of the sites comprising this option could deliver development within 500m of a bus stop and all but two are within 1,200m of the town centre with its wide range of key services and facilities. This is likely to result in positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of the town centre, providing support for walking and cycling and reducing the need to travel by car. However sites CH093 and CH128 are more than 1,200m away from the town centre, so this option could result in existing services and facilities being inaccessible for residents of some new developments. There is potential for the cumulative impacts of development to result in the disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated. The option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles (a protected species) in Staffordshire. In addition, sites CH002B, CH006 and CH009 are within 100m of the Reserve. This option is also likely to result in the development of sites subject to risk from flooding, the option includes sites CH002A, CH006, CH020 and CH085B all of which are partly located within a flood zone 3 area; and sites CH085A and CH093 that are partly within flood zone 2. Dependent on proposal specific information, the cumulative impact of development under this option may result in harm or loss to the significance of designated heritage assets. Sites CH009, CH013, CH015, CH024, CH085C, CH085D, CH093 and CH128 are within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Likely negative effects on landscape character have also been identified; sites CH085A, B, C and D, CH093 and CH128 are all greenfield sites outside the current development boundary, however none are within the area identified as "important landscape setting to settlement". Sites CH093 and CH128 have been recommended as appropriate to consider for release from the Green Belt under exceptional circumstances. The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.</p>					

**Table 18.2 Assessment Table for Option 2: South-Western Focus**

### Option 3: Scattered approach

SA Objective		Option 3: Scattered approach					Justification; cumulative effects / mitigation measures
		Decision making criteria		Time-frame		Nature of effect; Comments	
		ST	MT	LT			
<b>SOCIAL</b>							
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	+/-	+/-	+/-	+/-	<p>Development of the sites comprising the "scattered approach" include sites both within and outside the existing settlement boundary. Through the inclusion of site CH132, the option could enable the delivery of a new school and this is likely to result in positive effects on this objective. However sites CH002A, CH002B, CH006, CH009 and CH024 are within 100m of Cecilly Brook LNR and it is considered that this is likely to result in a negative effect arising from the potential for adverse impacts on the District's GI network. Overall the assessment against this objective is considered to be mixed and uncertain as in addition it will be partly dependent on the implementation of Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Community cohesion and local environmental quality are dependent on the design and tenure mix, as well as the location of new development. <b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</p>
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>Will it help to minimise the distance people need to travel to access education, employment, shopping and</li> </ul>	+	++	++	++	<p>This option could enable the delivery of new development in good proximity to a wide range of services and facilities. Sites CH009, CH013 and CH015 are within 400m of the town centre; sites CH001, CH002A, CH002B, CH006, CH020 and CH024 are within 800m of the centre. Sites CH004, CH075A, B and C, 85A and 85D are within 1,200m of the town centre. Of this option, only sites CH081, CH128 and CH132 are more than 1,200m from the centre. This is likely to result in very positive effects on improving access to jobs, services and facilities which could be</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. <b>Mitigation measures:</b> Local Plan policies to help ensure that the needs of all members of the community can be addressed by helping to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</p>

Option 3: Scattered approach						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	other key services and facilities.				expected to contribute to the advancement of equality of opportunity.	
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>Will it improve health or access to health facilities?</li> <li>Will it promote healthy lifestyles?</li> <li>Will it reduce health inequalities?</li> <li>Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	+	+	++	This option could enable the delivery of new development in proximity to a range of healthcare facilities (eg within 1,200m from a GP surgery and open space). Development on the edge of settlement may offer opportunities to enable improved recreational access to the countryside. Overall this option has been assessed as having a positive effect on this objective in the medium and long term.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Delivering new homes in proximity to existing healthcare services and open space will have a positive effect on health. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Will it reduce actual levels of crime?</li> <li>Will it reduce fear of crime?</li> </ul>	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>	+	++	++	The sites comprising the scattered approach option are a range of sizes, three are large enough to yield over 100 homes each, a further six are each expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the needs of the whole community. This option has been assessed as having a very positive effect on this objective in the medium and long term.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Larger sites offer the most potential to deliver a range of types and tenures of new homes. <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.</p>

Option 3: Scattered approach						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	+	+	++	<p>All the sites comprising this option could deliver development within 500m of a bus stop and this is likely to result in a positive effect from supporting the use of public transport. Ten of the eighteen sites making up the option are within the settlement boundary (and all but one within 800m from the town centre) which could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Eight sites are outside the existing settlement boundary, five of these are within 1,200m of services and facilities and three - CH081, CH128 and CH132 - more than 1,200m. Overall this option has been assessed as having a long term positive effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development delivered close to existing services and facilities will help to reduce the number of journeys made by car. <b>Mitigation measures:</b> Local Plan policies to ensure that developments support safe walking and cycling and improve access to the natural environment.</p>
<b>ENVIRONMENTAL</b>						
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	-	-	<p>Development of the sites comprising this option could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. All of the sites comprising this option could deliver development within 500m of a bus stop. Ten of the eighteen sites making up the option are within the settlement boundary (and all but one of these within 800m from the town centre) which could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Eight sites are outside the existing settlement boundary, five of these within 1,200m of</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. <b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>

Option 3: Scattered approach						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					services and facilities and three - CH081, CH128 and CH132 - more than 1,200m. Whilst this may help reduce the need to travel by car, overall this option has been assessed as having a negative effect on this objective.	
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	-	-	--	This option includes site CH015 which is an edge of town centre site within 100m of a candidate Air Quality Management Area. This option has been assessed as having a negative effect on this objective.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> The main areas identified in the District as being of poor air quality are the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)<sup>(1)</sup>. The increase in number of dwellings and car journeys across Cheadle is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants and provide support for the Cheadle Transport Package<sup>(2)</sup>.</p>
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water</li> </ul>	-	--	--	This option includes sites CH002A, CH006, CH020, CH081 and CH132 all of which are partly located within a flood zone 3 area. Also site CH085A is partly within flood zone 2. It can be considered that this option is likely to result in the development of sites subject to risk from flooding. Development of sites could be expected to lead to an increase in wastewater and reduction of natural drainage. Mitigation measures are possible however. Overall this option has been	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development will be permitted only where schemes meet development plan requirements for management of flood risk. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>

Option 3: Scattered approach						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>				assessed as having a significant negative effect on this objective.	
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	-	--	--	This option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles in Staffordshire (water voles are a protected species). In addition sites CH002B, CH006 and CH009 are within 100m of the Reserve and sites CH075A, B and C are within 200-400m. There is potential for development to result in disturbance of habitats, either singly or in combination with other sites. A number of these sites have the potential to support protected species <sup>3</sup> due to the proximity of the mosaic of stream habitats and presence of species rich hedgerows. Overall this option has been assessed as having a significant negative effect on this objective.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the cumulative impact of the development of a number of sites which border, or are in close proximity to, a Local Nature Reserve pose risks of disturbance that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible.</p>
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> </ul>	--	--	--	This option includes sites CH001, CH002A, CH002B, CH004, CH006, CH009, CH024, CH075A, B and C, CH081, CH085A and D, CH128 and CH132 that are assessed as Agricultural Land Classification (ALC) Grade 3 land, so the proposal could result in the loss of best and most versatile agricultural land.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Further work is required to establish the quality of agricultural land at site specific level and the proportion of Grade 3 land classified as Grade 3a. <b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>

Option 3: Scattered approach						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>					
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible.</p> <p><b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	-	-	--	<p>This option includes sites CH009, CH013, CH015, CH024, CH075C, CH081, CH085D and CH128 that are assessed as sites within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Dependent on proposal specific information, this option could lead to the deterioration of the setting of designated heritage assets. This option has been assessed as having an overall negative effect on this objective although the exact nature of effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk that the cumulative impact of development may result in harm or loss to the significance of designated heritage assets that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>
14. To protect and enhance the character and appearance of the landscape including historic landscape and	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> </ul>	--	--	--	<p>This option includes a number of greenfield sites outside the current development boundary: CH075A, B and C, CH081, CH085A and D, CH128 and CH132 that are</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for</p>

		ST	MT	LT		
					development of sustainable tourism and local distinctiveness.	
<b>ECONOMIC</b>						
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Will it safeguard shops and services in existing centres?</li> <li>● Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	+	+	<p>The County Council assessment of travelling conditions in Cheadle notes that there are significant delays along Leek Road and Froghall Road (in bound) that can be related to capacity constraints at the Leek Road / High Street / Tape Street junction between 8am and 9am<sup>(6)</sup>. However, over the majority of Cheadle's road network journey times are considered to be reliable and delays relatively modest. A further transport study<sup>(7)</sup> was commissioned to assess impacts of additional housing and employment land provision on the highway network. Whilst the study predicted that the impacts of planned new development would still enable the overall network in Cheadle to generally remain operating within capacity, a number of further actions were recommended. In addition the County Council has proposed a study to consider the potential impacts on town centre traffic levels of a southern link road between A522 Tean Road and A521 Delphouse Road. Although the option includes sites CH128 and CH085A and D, this may be insufficient development in this part of the town to provide opportunity to deliver a southern link road.</p> <p>The majority of sites comprising this option are located within 1,200m of the town centre and the wide range of key services and facilities that can be found here. Only sites CH081, CH128 and CH132 are more than 1,200m away from the town centre which</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development of residential sites with good access to the town centre is likely to result in a positive effect on the vitality and viability of Cheadle as residents of new developments could be expected to support their local retail, leisure and service provision. <b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>

Option 3: Scattered approach						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
					could result in existing services and facilities being inaccessible for new residents of developments here. Overall the proposal has been assessed as having a minor positive effect on this objective.	
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	0	0	0	Developments of the sites comprising this option could encourage investment in people and infrastructure through developer contributions. This proposal has been assessed as having a neutral effect on this objective.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> A local labour supply will help to deliver economic growth across the plan area. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	+	+	+	The proposal could facilitate residential development within 30 minutes travel time of existing employment provision. This proposal has been assessed as having a positive effect on this objective.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.
<b>Summary of significant effects:</b>						
<p>Sites comprising the option "scattered approach" are located both within and outside the existing settlement boundary. The sites are a range of sizes, three are large enough to yield over 100 homes each, a further six are each expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community. A further positive effect of the option is the opportunity it provides for the delivery of a new school. A new school in the north of Cheadle could be expected to ease some pressure on peak time journeys to the existing schools that are concentrated in the south west of the town. However this option also includes some sites comprising a small scale extension to the south west, where there is an existing cluster of schools and this may contribute to "school run congestion" issues in this part of the town. All of the sites comprising this option could deliver development within 500m of a bus stop and all but three are within 1,200m of the town centre with its wide range of key services and facilities. This is likely to result in positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of the town centre, providing support for walking and cycling and reducing the need to travel by car. However sites</p>						

SA Objective	Option 3: Scattered approach					Justification; cumulative effects / mitigation measures
	Decision making criteria	Time-frame			Nature of effect; Comments	
		ST	MT	LT		
	<p>CH081, CH128 and CH132 are more than 1,200m away from the town centre, so this option could result in existing services and facilities being inaccessible for residents of some new developments. There is potential for the cumulative impacts of development to result in the disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated. The option includes sites CH002A and CH024 which border Cecily Brook Local Nature Reserve, one of the most important sites for water voles (a protected species) in Staffordshire. In addition, sites CH002B, CH006 and CH009 are within 100m of the Reserve. This option is also likely to result in the development of sites subject to risk from flooding, the option includes sites CH002A, CH006, CH020, CH81 and CH132 all of which are partly located within a flood zone 3 area; and site CH085A that is partly within flood zone 2. Dependent on proposal specific information, the cumulative impact of development under this option may result in harm or loss to the significance of designated heritage assets. Sites CH009, CH013, CH015, CH024, CH075C, CH081, CH085D, and CH128 are within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade I listed asset. Likely negative effects on landscape character have also been identified; sites CH075A, B and C, CH081, CH085A and D, CH128 and CH132 are all greenfield sites outside the current development boundary; sites CH075A, B and C lie in the area identified as "important landscape setting to settlement, where impacts may be most significant. Site CH128 has been recommended as appropriate to consider for release from the Green Belt under exceptional circumstances. The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.</p>

## Additional option appraised July 2017

### Option 4: North-South clusters with small sites scattered through town

SA Objective		Option 4: North-South clusters with small sites scattered through town				Justification; cumulative effects / mitigation measures
		Decision making criteria		Time-frame		
		ST	MT	LT		
<b>SOCIAL</b>						
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	+/?	+/?	+/?	Development of the sites comprising a north-south focus with small sites scattered through town include sites both within and outside the existing settlement boundary. The option could help support the delivery of a southern link road between A522 Tean Road and A521 Delphouse Road, which could result in positive effects on this objective. However sites CH002A, CH002B and CH024 are within 100m of Cecilly Brook LNR and it is considered that this is likely to result in a negative effect arising from the potential for adverse impacts on the District's GI network. However this option does not include two sites (CH006 and CH009) which were also within 100m of the LNR which may help to reduce potential for cumulative impacts. Overall the assessment against this objective is considered to be uncertain as it will be partly dependent on the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Community cohesion and local environmental quality are dependent on the design and tenure mix, as well as the location of new development. <b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</p>
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity,</li> </ul>	+	++	++	This option could enable the delivery of new development in good proximity to a wide range of services and facilities. Sites CH013 and CH015 are within 400m of the town centre; sites CH001, CH002A, CH002B, CH020 and CH024 are within 800m of the centre. Sites CH004 and sites CH085A, B, C and D are within 1,200m of the town centre. Of this option, only sites CH132 and CH128 are more than 1,200m from the	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities. <b>Mitigation measures:</b> Local Plan policies to help ensure that the needs of all members of the community can be addressed by helping to</p>

Option 4: North-South clusters with small sites scattered through town						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>● race, religion / belief, sex and sexual orientation? Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>			LT	centre. This is likely to result in very positive effects on improving access to jobs, services and facilities which could be expected to contribute to the advancement of equality of opportunity.	minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Will it improve health or access to health facilities?</li> <li>● Will it promote healthy lifestyles?</li> <li>● Will it reduce health inequalities?</li> <li>● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	0	+	++	<p>This option could enable the delivery of new development in proximity to a range of healthcare facilities (eg within 1,200m from a GP surgery and open space). Development on the edge of settlement may offer opportunities to enable improved recreational access to the countryside. Overall this option has been assessed as having a positive effect on this objective in the medium and long term.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Delivering new homes in proximity to existing healthcare services and open space will have a positive effect on health.  <b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Will it reduce actual levels of crime?</li> <li>● Will it reduce fear of crime?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>
5. To ensure adequate quality and provision of a range	<ul style="list-style-type: none"> <li>● Will it provide an appropriate mix of</li> </ul>	+	++	++	<p>The sites comprising the north-south cluster option are a range of sizes, three are large enough to yield over 100 homes each, a further</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Larger sites offer the most potential to</p>

Option 4: North-South clusters with small sites scattered through town						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>housing to enable all needs to be met?</li> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>				four are expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the needs of the whole community. This option has been assessed as having a very positive effect on this objective in the medium and long term.	deliver a range of types and tenures of new homes. <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	+	+	++	All the sites comprising this option could deliver development within 500m of a bus stop and this is likely to result in a positive effect from supporting the use of public transport. Eight of the fourteen sites making up the option are within the settlement boundary (and all but two within 800m from the town centre) which could be expected to support the delivery of new development in close proximity to a wide range of services and facilities, helping to support the use of walking and cycling. Overall this option has been assessed as having a long term positive effect on this objective.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development delivered close to existing services and facilities will help to reduce the number of journeys made by car. <b>Mitigation measures:</b> Local Plan policies to ensure that developments support safe walking and cycling and improve access to the natural environment.
<b>ENVIRONMENTAL</b>						
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need</li> </ul>	-	-	-	Development of the sites comprising this option could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. All of the sites comprising this option could deliver development within 500m of a bus stop. Eight of the fourteen sites making up the option are within the settlement boundary (and all but two of these within 800m from the town centre) which could be expected to support the delivery of new development in close proximity to a wide range	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions. <b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that

Option 4: North-South clusters with small sites scattered through town						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	for car use and / or encourage sustainable forms of transport?			LT	of services and facilities, helping to support the use of walking and cycling. Whilst this may help reduce the need to travel by car, overall this option has been assessed as having a negative effect on this objective.	developments are brought forward in accessible locations that support the use of sustainable forms of transport.
8. To improve air quality.	<ul style="list-style-type: none"> <li>● Will it minimise emissions of airborne pollutants?</li> <li>● Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	-	-	--	This option includes site CH015 which is an edge of town centre site within 100m of a candidate Air Quality Management Area. This option has been assessed as having a negative effect on this objective.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> The main areas identified in the District as being of poor air quality are the Cellarhead junction (between the A52 and A520), Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)<sup>(1)</sup>. The increase in number of dwellings and car journeys across Cheadle is likely to increase emission of airborne pollutants. There is a risk that air quality may deteriorate in areas of existing low quality.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants and provide support for the Cheadle Transport Package<sup>(2)</sup>.</p>
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>● Is new development directed towards areas of least flood risk?</li> <li>● Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> </ul>	-/?	-/?	-/?	This option includes sites CH002A, CH020, CH085A and CH85B where small areas of flood zones 2 or 3 at the edge of each site have been excluded from the boundary of each proposed allocation (these areas could however form part of open space / surface water mitigation). However it can be considered that this option is likely to result in the development of sites subject to some remaining risk from flooding. Development of sites could be expected to lead	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Development will be permitted only where schemes meet development plan requirements for management of flood risk.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>

Option 4: North-South clusters with small sites scattered through town						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>				to an increase in wastewater and reduction of natural drainage. Mitigation measures are possible however. Overall this option has been assessed as having an uncertain effect on this objective.	
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	-	--	--	This option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles in Staffordshire (water voles are a protected species). In addition site CH002B is within 100m of the Reserve. There is potential for development to result in disturbance of habitats, either singly or in combination with other sites. Sites have the potential to support protected species due to the proximity of the mosaic of stream habitats and presence of species rich hedgerows. Overall this option has been assessed as having a significant negative effect on this objective.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the cumulative impact of the development of a number of sites which border, or are in close proximity to, a Local Nature Reserve pose risks of disturbance that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible.</p>
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> </ul>	-	-	-	This option includes sites CH001, CH013, CH020, CH0132, CH085A, B, C and D and CH128 indicated on the predictive map of Best and Most Versatile (BMV) agricultural land as partly or wholly within an area where 20 - 60% of the land is likely to be BMV; whilst parts of sites CH085A, B and C are indicated on the predictive map of Best and Most Versatile agricultural land as within an area where over 60% of the land is likely to	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the cumulative impact of the development of a number of sites which border, or are in close proximity to, a Local Nature Reserve pose risks of disturbance that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible.</p>

Option 4: North-South clusters with small sites scattered through town						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>			LT	be BMV and overall this is likely to have a negative effect.	
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible. <b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	-/?	-/?	-/?	<p>This option includes sites CH013, CH015, CH024, CH085C, CH085D and CH128 that are assessed as sites within 400m of one or more grade II listed assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Dependent on proposal specific information, this option could lead to the deterioration of the setting of designated heritage assets. This option has been assessed as having an overall negative effect on this objective although the exact nature of effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk that the cumulative impact of development may result in harm or loss to the significance of designated heritage assets that could not be reasonably mitigated. <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>

Option 4: North-South clusters with small sites scattered through town						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	-/?	-/?	-/?	<p>This option includes a number of greenfield sites outside the current development boundary: CH085A, B, C and D, CH128 and CH132 that are assessed as having potential for effects on landscape character if developed, although the exact nature of effects are uncertain as they are dependent on proposal specific information. It should be noted that none of the above sites fall within the area identified as "important landscape setting to settlement"<sup>(4)</sup>. The overall impact of development of site CH128 on the purposes of the Green Belt was assessed as limited<sup>(5)</sup>; with the report recommendation that the Council consider the site for Green Belt release under exceptional circumstances. Overall this option has been assessed as having an uncertain negative effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However options that include a number of sites that contribute to the current landscape setting to the settlement increases the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated.  <b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	+	+	++	<p>This option envisages locating two main clusters of development, one to the north and one to the south of the town, providing some development close to existing school sites in the south and delivering land for the provision of a new school in the north. This may result in more journeys to school being made on foot, which is likely to lead to positive effects. Avoiding focusing development around the existing cluster of schools and enabling delivery of a new school to the north, may avoid exacerbating congestion at peak times due to the existing concentration of journeys to school into one area of the town. This may help support opportunities for investment in culture and tourism that are likely to lead to long-term positive effects on sustainable tourism and local distinctiveness.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Proposals that have a positive effect on the town centre are likely to result in support for tourism and the visitor economy.  <b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>
<b>ECONOMIC</b>						

Option 4: North-South clusters with small sites scattered through town						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>● Will it safeguard shops and services in existing centres?</li> <li>● Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	+	+	<p>The County Council assessment of travelling conditions in Cheadle notes that there are significant delays along Leek Road and Froghall Road (in bound) that can be related to capacity constraints at the Leek Road / High Street / Tape Street junction between 8am and 9am<sup>(6)</sup>. However, over the majority of Cheadle's road network journey times are considered to be reliable and delays relatively modest. A further transport study<sup>(7)</sup> was commissioned to assess impacts of additional housing and employment land provision on the highway network. Whilst the study predicted that the impacts of planned new development would still enable the overall network in Cheadle to generally remain operating within capacity, a number of further actions were recommended. This study was updated in April 2017<sup>(8)</sup> and provides a package of mitigation measures. In addition the County Council has proposed a study to consider the potential impacts on town centre traffic levels of a southern link road between A522 Tean Road and A521 Delphouse Road. Sites comprising this option may provide the opportunity to deliver a southern link road. The majority of sites comprising this option are located within 1,200m of the town centre and the wide range of key services and facilities that can be found here. Only sites CH132 and CH128 are more than 1,200m away from the town centre which could result in existing services and facilities being inaccessible for new residents of developments here. Overall the proposal has been assessed as having a minor positive effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Development of residential sites with good access to the town centre is likely to result in a positive effect on the vitality and viability of Cheadle as residents of new developments could be expected to support their local retail, leisure and service provision. <b>Mitigation measures:</b> Local Plan policies to support town and village centres. Developers of strategic sites should be required to liaise with SCC and bus operators through the planning process to ensure developments have good access to public transport provision.</p>
17. To strengthen, modernise and	<ul style="list-style-type: none"> <li>● Will it provide a balanced portfolio of employment</li> </ul>	0	0	0	<p>Developments of the sites comprising this option could encourage investment in people and</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b></p>

Option 4: North-South clusters with small sites scattered through town						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>land in sustainable locations? Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>				<p>infrastructure through developer contributions. This proposal has been assessed as having a neutral effect on this objective.</p>	<p>A local labour supply will help to deliver economic growth across the plan area.  <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	+	+	+	<p>The proposal could facilitate residential development within 30 minutes travel time of existing employment provision. This proposal has been assessed as having a positive effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent; <b>Assumptions made:</b> Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
<p><b>Summary of significant effects:</b></p> <p>Sites comprising the option "north-south clusters with small scattered sites" are located both within and outside the existing settlement boundary. The sites are a range of sizes, three are large enough to yield over 100 homes each, a further four are expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community. A further positive effect of the option is the opportunity it provides for the delivery of a southern link road to help relieve traffic congestion in the town centre. In addition, enabling a cluster of new development to the south where there are existing school sites whilst also providing land for a new school to the north of the town is expected to spread journeys to school and help to avoid exacerbating congestion at peak times and this is likely to lead to positive effects on the town centre. All of the sites comprising this option could deliver development within 500m of a bus stop and all but two are within 800m of the town centre with its wide range of key services and facilities. This is likely to result in further positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of the town centre, providing support for walking and cycling and reducing the need to travel by car. However sites CH128 and CH132 are more than 1,200m away from the town centre, so this option could also result in existing services and facilities being less accessible for residents of some new developments. This option (in comparison with other options) minimises potential for the cumulative impacts of development to result in the disturbance of habitats (and their connectedness) and of protected species that could not be reasonably mitigated. Whilst the option includes sites CH002A and CH024 which border Cecilly Brook Local Nature Reserve, one of the most important sites for water voles (a protected species) in Staffordshire, sites CH006 and CH009 (within 100m of the Reserve) are not identified as preferred options. This option is also less likely than previous options to result in the development of sites subject to risk from flooding - the option includes sites CH002A, CH020, CH085A and CH85B where small areas of flood</p>						

SA Objective	Option 4: North-South clusters with small sites scattered through town				Justification; cumulative effects / mitigation measures
	Decision making criteria	Time-frame		Nature of effect; Comments	
		ST	MT		
zones 2 or 3 at the edge of each site have been excluded from the boundary of each proposed allocation. Dependent on proposal specific information, the cumulative impact of development under this option may result in harm or loss to the significance of designated heritage assets. Site CH015 is within 400m of 24 grade II listed assets; CH013 is within 400m of 38 grade II listed assets and one grade 1 listed asset. Likely negative effects on landscape character have also been identified; sites CH085A, B, C and D, CH128 and CH132 are all greenfield sites outside the current development boundary, however none are within the area identified as "important landscape setting to settlement". The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.

Appraisal of alternative development approaches for the rural areas

## 19 Appraisal of alternative development approaches for the rural areas

**19.1** The matrices below set out the likely significant effects on sustainability of the four alternative options considered by the Council for a development approach for the rural areas. The assessments are based on the methodology proposed and consulted on in the SA Scoping Report and use the SA Framework also developed through consultation as part of the SA Scoping stage.

**19.2** As part of the SA appraisal of options, consideration has been given to effects on sustainability over time (in the short, medium and long term) along with any cumulative impacts of implementing each option and possible mitigation measures where appropriate.

**19.3** In comparing options with one another, consideration has also been given to the geographical scale of effect, whether any identified effects would be permanent or temporary, reversible or irreversible and the assumptions made, or justification for the assessment recorded.

**19.4** Definitions of significance are provided in Section 3 Appraisal Methodology. Scoring of options is as set out in Table 8.1.

### Option 1: Preferred Option April 2016: Green Belt release

SA Objective	Option 1: PO 2016: Green Belt release					Justification; cumulative effects / mitigation measures
	Decision making criteria	Time-frame			Nature of effect; Comments	
		ST	MT	LT		
<b>SOCIAL</b>						
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> </ul>	+/?	+/?	+/?	<p>This option relies on the allocation of a number of new housing allocations in the larger villages. Since the rural areas are largely constrained by Green Belt, the majority of sites allocated require Green Belt release. Allocations include sites both within and outside the existing settlement boundaries. This may lead to negative effects on the District's GI network. However allocations in a broad range of larger villages could enable the enhancement of existing community facilities and services for a wider range of settlements. In addition effects will be partly dependent on the implementation</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Community cohesion and local environmental quality are dependent on the design and tenure mix, as well as the location of new development.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</p>

Option 1: PO 2016: Green Belt release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>				of Local Plan policies. Overall, this option has been assessed as having a positive effect on this Objective, although the exact effects are uncertain.	
2. To advance equality of opportunity between all persons and eliminate social exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</li> <li>Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>	+	+	++	<p>Since this option relies on the allocation of sites in a range of larger villages, it is expected to enable the delivery of new development in good proximity to some services and facilities. This is likely to result in positive effects on improving access to jobs, services and facilities which could be expected to contribute to the advancement of equality of opportunity.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities.</p> <p><b>Mitigation measures:</b> Local Plan policies to help ensure that the needs of all members of the community can be addressed by helping to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</p>
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>Will it improve health or access to health facilities?</li> <li>Will it promote healthy lifestyles?</li> <li>Will it reduce health inequalities?</li> <li>Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	+	+	++	<p>This option could enable the delivery of new development in proximity to a healthcare facility (eg within 1,200m of a GP surgery and open space). Development on the edge of settlement may offer opportunities to enable improved recreational access to the countryside. Overall this option has been assessed as having a positive effect on this objective, particularly in the long term.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Delivering new homes in proximity to existing healthcare services and open space will have a positive effect on health.</p>

Option 1 : PO 2016: Green Belt release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>Will it reduce actual levels of crime?</li> <li>Will it reduce fear of crime?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.</p> <p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent;  <b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime.  <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>	<p><b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>	+	++	++	<p>The allocations comprising the green belt release option are a range of sizes, with seven expected to yield 50 or more homes. This could be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the needs of the whole community. The option could also make a significant contribution to the delivery of affordable homes. This option has been assessed as having a very positive effect on this objective in the medium and long term.</p> <p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent;  <b>Assumptions made:</b> Larger sites offer the most potential to deliver a range of types and tenures of new homes.  <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.</p>	

Option 1: PO 2016: Green Belt release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	+	+	++	<p>Some of the sites comprising this option could deliver development within 500m of a bus stop and this is likely to result in a positive effect on supporting the use of public transport. Sites could be expected to support the delivery of new development in proximity to some services and facilities, helping to support the use of walking and cycling. Overall this option has been assessed as having a long term positive effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Allocations of small and medium sites in a number of larger villages will support development close to some existing services and facilities and help to reduce the number of journeys made by car.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that developments support safe walking and cycling and improve access to the natural environment.</p>
<b>ENVIRONMENTAL</b>						
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	-	-	<p>Development of the sites comprising this option could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Some of the sites comprising this option could deliver development within 500m of a bus stop. The option could be expected to support the delivery of new development in proximity to some services and facilities, helping to support the use of walking and cycling. Whilst this may help to reduce the need to travel by car, overall this option has been assessed as having a negative effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>

Option 1 : PO 2016: Green Belt release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	0	0	0	<p>This option has been assessed as having a neutral effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> The main areas identified in the District as being of poor air quality are the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)</p> <p>(1)</p> <p>. Whilst the increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, development in the rural areas carries a lower risk that air quality may deteriorate in areas of existing low quality.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.</p>	
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water</li> </ul>	0	0	0	<p>The SFRA <sup>(2)</sup> confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1. However development of sites could be expected to lead to an increase in wastewater and reduction of natural drainage, although SuDs could be</p> <p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Development will be permitted only where schemes meet development plan requirements for management of flood risk.</p>	

Option 1: PO 2016: Green Belt release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>				used to mitigate against this. Development could also be expected to lead to increased water demand within the District. Overall this option has been assessed as having a neutral effect on this objective.	<p><b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	-	-	--	<p>This option relies on a number of small or medium sized allocations in the larger villages, mainly outside the settlement boundaries. There is potential for development to result in disturbance of habitats, however mitigation measures are likely to be available. An impact on the District's ecological and GI networks is likely. Larger villages with potential allocations include Ipstones and Waterhouses, both are close to a component of the Peak District Dales SAC and there is potential for effects of development to result in an In-Combination Effect in relation to recreational pressure. Overall this option has been assessed as having a negative effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the cumulative impact of the development of a number of sites pose risks of disturbance that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible. Implementation of measures recommended in the HRA of the Local Plan to ensure no adverse impacts on European sites.</p>
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> </ul>	-/?	-/?	-/?	<p>This option may include allocation of sites that are assessed as Agricultural Land Classification (ALC) Grade 3 land, so the proposal could result in the loss of best and most versatile agricultural land. This option may also include allocation of sites that are assessed as being within Mineral Safeguarding Areas, so the proposal may</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Allocations will be mainly greenfield sites on the edge of settlements.</p>

Option 1: PO 2016: Green Belt release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>				<p>lead to the loss of mineral resources. Overall this option has been assessed as having a negative effect on this objective, although the exact effects are uncertain.</p>	<p><b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible.</p> <p><b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	-/?	-/?	-/?	<p>This option may include sites that are assessed as within 400m of one or more grade II listed assets</p> <p><b>(4)</b></p> <ul style="list-style-type: none"> <li>Dependent on proposal specific information, there is scope that this option could lead to the deterioration of the setting of designated or non-designated heritage assets.</li> <li>Applicants should be required to provide an NPPF compliant heritage statement. This option has been assessed as having an overall negative effect on this objective although the exact nature of effects are uncertain.</li> </ul>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk of development resulting in harm or loss to the significance of a designated heritage asset that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>

Option 1: PO 2016: Green Belt release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	-/?	-/?	-/?	<p>This option relies on Green Belt release. The Government has proposed a requirement on authorities to examine fully all other reasonable options before amending Green Belt</p> <p>Boundaries. This option is likely to include sites that fall within the area identified as "important landscape setting to settlement"<sup>(5)</sup>. This option is also likely to include sites assessed as being of some landscape sensitivity <sup>(6)</sup>, and are likely to risk an effect on local landscape character or the setting of the Peak District National Park, however site-specific landscape mitigation measures may be available. Overall this option has been assessed as having a negative effect on this objective, although exact effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However options that include a number of sites that contribute to the current landscape setting to the settlement increases the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	+	+	+	<p>This option relies on delivery of a number of small and medium sized sites across a range of larger villages and this may help support opportunities for investment in culture and tourism that could result in positive effects on the local economy.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Proposals that have a positive effect on a range of village centres are likely to result in support for tourism and the visitor economy.</p> <p><b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>
<b>ECONOMIC</b>						

Option 1 : PO 2016: Green Belt release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	+	+	<p>This option relies on delivery of a number of small and medium sized sites across a range of larger villages and this may help support existing services and facilities. Overall the proposal has been assessed as having a minor positive effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Development of residential sites with access to a range of village centres is likely to result in a positive effect on the vitality and viability of rural areas as residents of new developments could be expected to support their local retail, leisure and other service provision.</p> <p><b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	0	0	0	<p>Development of sites could encourage investment in people and infrastructure through developer contributions although this would be limited. This proposal has been assessed as having a neutral effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> A local labour supply will help to deliver economic growth across the plan area.</p> <p><b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> </ul>	+	+	+	<p>The proposal could facilitate residential development within 30 minutes travel time of existing employment provision. This proposal has been assessed as having a positive effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p>

Option 1: PO 2016: Green Belt release					
SA Objective	Decision making criteria	Time-frame		Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT		
	<ul style="list-style-type: none"> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>				<p><b>Assumptions made:</b> Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy.</p> <p><b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
<p><b>Summary of significant effects:</b></p> <p>Sites comprising the April 2016 preferred option (green belt release) are a range of sizes, seven are expected to yield 50 or more homes and this is expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the housing needs of the whole community. This is likely to result in positive effects on a number of village centres and may help support opportunities for investment in culture and tourism with positive effects on the local economy. Sites comprising this option could deliver development within 500m of a bus stop and or within the proximity of a number of village centres with some key services and facilities. This is likely to result in positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of village centres, providing support for walking and cycling and reducing the need to travel by car.</p> <p>However this option relies on a number of small or medium sized allocations in the larger villages mainly outside the existing settlement boundaries and this is likely to lead to negative effects on the District's ecological and GI networks. Larger villages with potential allocations include Ipstones and Waterhouses risking potential effects on European sites arising from recreational pressure. Dependent on proposal specific information, there is scope that this option may lead to the deterioration of the settings of designated or non-designated heritage assets, applicants should be required to provide an NPPF compliant heritage statement. Likely negative effects on landscape character have also been identified, this option is likely to include sites that fall within the important landscape setting to settlement" and sites assessed as being of some landscape sensitivity, however site-specific landscape mitigation measures may be available. The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.</p> <p>This option relies on green belt release. The government has proposed a requirement on authorities to examine fully all other reasonable options before amending green belt.</p>

### Option 2: Countryside release

SA Objective	Option 2: Countryside release				Justification; cumulative effects / mitigation measures	
	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
<b>SOCIAL</b>						
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	+/?	+/?	+/?	<p>This option relies on the identification of a number of new housing allocations in the larger and smaller villages that are not constrained by Green Belt. The option requires settlement extensions into the countryside and this may lead to negative effects on the District's GI network.</p> <p>However allocations in a range of larger and smaller villages could enable the enhancement of existing community facilities and services for a range of settlements. In addition effects will be partly dependent on the implementation of Local Plan policies. Overall this option has been assessed as having a positive effect on this Objective, although the exact effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Community cohesion and local environmental quality are dependent on the design and tenure mix, as well as the location of new development.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</p>
2. To advance equality of opportunity between all persons and eliminate social	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity,</li> </ul>	-	-	--	<p>Since this option relies on the allocation of sites in larger and smaller villages, it is expected that some new development will be delivered in locations that are relatively remote from existing services and facilities. This is likely to result in negative effects on improving access to jobs, services and facilities which could be expected to detract from the advancement of equality of opportunity in the long term.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities.</p>

SA Objective		Option 2: Countryside release					Justification; cumulative effects / mitigation measures
		Decision making criteria	Time-frame			Nature of effect; Comments	
ST	MT		LT				
exclusion by improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● race, religion / belief, sex and sexual orientation?</li> <li>● Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>						<p><b>Mitigation measures:</b> Local Plan policies to help ensure that the needs of all members of the community can be addressed by helping to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</p>
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Will it improve health or access to health facilities?</li> <li>● Will it promote healthy lifestyles?</li> <li>● Will it reduce health inequalities?</li> <li>● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	0	0	0	<p>This option could enable the delivery of new development in settlements without infrastructure and services and that are in locations in excess of 1,200m from a GP surgery or other healthcare facility. However development on the edge of settlement may offer opportunities for improved recreational access to the countryside. Overall this option has been assessed as having a neutral effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Delivering new homes in proximity to existing healthcare services and open space will have a positive effect on health.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>	
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Will it reduce actual levels of crime?</li> <li>● Will it reduce fear of crime?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p>	

SA Objective		Option 2: Countryside release				Justification; cumulative effects / mitigation measures
Decision making criteria	Time-frame			Nature of effect; Comments		
	ST	MT	LT			
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>	+	+	+	<p>The allocations comprising the countryside release option are likely to be a range of sizes, but only a small number would be expected to yield 50 or more homes due to the need to rely on smaller villages to supply appropriate sites. This could be expected to restrict the delivery of types and tenures, potentially reducing the contribution to meeting the needs of the whole community. However the option could make a contribution to the delivery of affordable homes. There may be an issue of deliverability arising from the need to rely on the allocation of a large number of smaller sites. This option has been assessed as having a positive effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Larger sites offer the most potential to deliver a range of types and tenures of new homes. Relying on a large number of small sites coming forward poses more risk to delivery than a smaller number of larger sites.</p> <p><b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.</p>
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	0	-	-	<p>Some of the sites comprising this option could deliver development within 500m of a bus stop and this is likely to result in a positive effect on supporting the use of public transport. However the smaller villages tend to be more remote from the public transport network. Sites could be expected to support the delivery of new development in proximity to some services and facilities, helping to support the use of walking and cycling, however those sites in the smaller villages are likely to lead to comparatively more car use. Overall this option has been assessed as having a long term negative effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Allocation of sites in larger and smaller villages will restrict development delivered close to some existing services and facilities and the number of journeys made by car is likely to be comparatively greater. <b>Mitigation measures:</b> Local Plan policies to ensure that developments support safe walking and cycling and improve access to the natural environment.</p>
<b>ENVIRONMENTAL</b>						

SA Objective		Option 2: Countryside release				Justification; cumulative effects / mitigation measures
		Decision making criteria		Time-frame		
		ST	MT	LT		
7. To minimise contributions to climate change and consider climate change adaptation.		<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	-	--	<p>Development of the sites comprising this option could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. Some of the sites comprising this option could deliver development within 500m of a bus stop. However the option could be expected to deliver some new development in locations remote from existing services and facilities, restricting the likelihood of residents travelling to key destinations by walking or cycling. Overall this option has been assessed as having a negative effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>
8. To improve air quality.		<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	0	0	0	<p>This option has been assessed as having a neutral effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> The main areas identified in the District as being of poor air quality are the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macciesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)</p> <p>(1)</p> <p>. Whilst the increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, development in the rural</p>

SA Objective		Option 2: Countryside release					Justification; cumulative effects / mitigation measures	
		Decision making criteria		Time-frame				Nature of effect; Comments
		ST	MT	LT				
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>	0	0	0	<p>The SFRA <sup>(2)</sup> confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1. However development of sites could be expected to lead to an increase in wastewater and reduction of natural drainage, although SuDs could be used to mitigate against this. Development could also be expected to lead to increased water demand within the District. Overall this option has been assessed as having a neutral effect on this objective.</p>			<p>areas carries a lower risk that air quality may deteriorate in areas of existing low quality. <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Development will be permitted only where schemes meet development plan requirements for management of flood risk. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> </ul>	--	--	--	<p>This option relies on countryside release around those larger and smaller villages not constrained by Green Belt. Consequently there is potential for development to result in disturbance of habitats, however mitigation measures are likely to be available. An impact on the District's ecological and GI networks is likely. Larger villages not constrained by Green Belt include Ipstones and Waterhouses,</p>			<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the cumulative impact of the development of a number of sites pose risks of disturbance that could not be reasonably mitigated.</p>

SA Objective		Option 2: Countryside release				Justification; cumulative effects / mitigation measures
		Decision making criteria		Nature of effect; Comments		
		Time-frame				
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>				both are close to a component of the Peak District Dales SAC and there is potential for effects of development to result in an In-Combination Effect in relation to recreational pressure (3). Similarly those smaller villages not constrained by Green Belt include Blackshaw Moor, Heaton, Meerbrook, Swinscoe and Winkhill, all of which are close to the Peak District National Park and to the European sites. Overall this option has been assessed as having a significant negative effect on this objective.	<p><b>Mitigation measures:</b> Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible. Implementation of measures recommended in the HRA of the Local Plan to ensure no adverse impacts on European sites.</p>
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	-/?	-/?	-/?	This option may include allocation of sites that are assessed as Agricultural Land Classification (ALC) Grade 3 land, so the proposal could result in the loss of best and most versatile agricultural land. This option may also include allocation of sites that are assessed as being within Mineral Safeguarding Areas, so the proposal may lead to the loss of mineral resources. Overall this option has been assessed as having a negative effect on this objective, although the exact effects are uncertain.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Allocations will be mainly greenfield sites on the edge of settlements.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible.</p>

Option 2: Countryside release					Justification; cumulative effects / mitigation measures	
SA Objective	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	-/?	-/?	-/?	<p>This option may include sites that are assessed as within 400m of one or more grade II listed assets (4)</p> <p>. Dependent on proposal specific information, there is scope that this option could lead to the deterioration of the setting of designated or non-designated heritage assets. Applicants should be required to provide an NPPF compliant heritage statement. As growth is being distributed to those villages not constrained by Green Belt there is likely to be a disproportionate impact of growth on the character of these settlements, the smaller villages in particular.</p> <p>Overall this option has been assessed as having a negative effect on this objective, although the exact nature of effects are uncertain.</p>	<p><b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk of development resulting in harm or loss to the significance of a designated heritage asset that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> </ul>	-/?	-/?	-/?	<p>This option relies on countryside release. This option is likely to include sites that fall within the area identified as "important landscape setting to settlement"(5). This option is also likely to include sites assessed as being of some landscape sensitivity (6), and are likely to risk an effect on local landscape character or the setting of the Peak District National Park,</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However options that include a number of sites that</p>

Option 2: Countryside release

		ST	MT	LT	
					residents of new developments could be expected to support their local retail, leisure and other service provision.  <b>Mitigation measures:</b> Local Plan policies to support town and village centres.
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	0	0	0	<p>the future viability of these settlements. Overall the proposal has been assessed as having a minor positive effect on this objective.</p> <p>Development of sites could encourage investment in people and infrastructure through developer contributions although this would be limited. This proposal has been assessed as having a neutral effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> A local labour supply will help to deliver economic growth across the plan area. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	+	+	+	<p>The proposal could facilitate residential development within 30 minutes travel time of existing employment provision. This proposal has been assessed as having a positive effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy. <b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
<b>Summary of significant effects:</b>					

SA Objective	Option 2: Countryside release				Justification; cumulative effects / mitigation measures	
	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
	<p>Sites comprising the countryside release option are expected to be small settlement extensions, in keeping with the scale of the villages, and consequently few are expected to yield 50 or more homes, potentially restricting the delivery of the full range of types and tenures of new homes, although this option is still expected to make a positive contribution to meeting the housing needs of the community. This is likely to result in positive effects on a number of village centres and may help support opportunities for investment in culture and tourism with positive effects on the local economy.</p> <p>Whilst some sites comprising this option could deliver development within 500m of a bus stop and or within the proximity of a larger village centre with some key services and facilities, the smaller villages tend to be remote from the public transport network and from the main towns and this is likely to result in negative effects on: access to jobs, services and facilities including healthcare (which in turn is likely to detract from equality of opportunity). Similarly there is likely to be negative effects resulting from the option being unlikely to support residents travelling to key destinations by walking or cycling.</p> <p>This option relies on countryside release around larger and smaller villages not constrained by Green Belt and this is likely to lead to negative effects on the District's ecological and GI networks. Villages with potential allocations include Ipstones, Waterhouses, Blackshaw Moor, Heaton, Meerbrook, Swinscoe and Winkhill, risking potential effects on European sites arising from recreational pressure. Dependent on proposal specific information, there is scope that this option may lead to the deterioration of the settings of designated or non-designated heritage assets, applicants should be required to provide an NPPF compliant heritage statement. Likely negative effects on landscape character have also been identified, this option is likely to include sites contributing to the setting of the Peak District National Park, or that fall within the important landscape setting to settlement" and sites assessed as being of some landscape sensitivity, however site-specific landscape mitigation measures may be available. The option has also been assessed as likely to result in minor negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.</p>

### Option 3: Growth re-directed to towns

SA Objective	Option 3: Growth re-directed to towns					Justification; cumulative effects / mitigation measures
	Decision making criteria	Time-frame			Nature of effect; Comments	
		ST	MT	LT		
<b>SOCIAL</b>						
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	+/?	+/?	+/?	<p>This option relies on the identification of a number of new housing allocations in those larger villages that are not constrained by Green Belt and increasing the share of growth distributed to Leek and Chedale (avoiding further green belt release in Biddulph). The option requires settlement extensions into the countryside and this may lead to negative effects on the District's GI network.</p> <p>However allocations in some larger villages and additional growth directed to Leek and Chedale could enable the enhancement of existing community facilities and services for these settlements. In addition effects will be partly dependent on the implementation of Local Plan policies. Overall this option has been assessed as having a positive effect on this Objective, although the exact effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Community cohesion and local environmental quality are dependent on the design and tenure mix, as well as the location of new development.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</p>
2. To advance equality of opportunity between all persons and eliminate social	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability,</li> </ul>	+	+	++	<p>Since this option relies on the allocation of sites in some larger villages and the towns, it is expected that new development will be delivered in proximity to existing services and facilities, helping to minimise the distance that people need to travel in order to access key services. This is likely to result in positive effects on improving access to jobs, services</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities.</p>

Option 3: Growth re-directed to towns					Justification; cumulative effects / mitigation measures	
SA Objective	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
exclusion by improving access to jobs, services and facilities.	<p>gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion / belief, sex and sexual orientation?</p> <p>● Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</p>				and facilities which could be expected to contribute to the advancement of equality of opportunity in the long term.	<p><b>Mitigation measures:</b> Local Plan policies to help ensure that the needs of all members of the community can be addressed by helping to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</p>
3. To improve health and reduce health inequalities.	<p>● Will it improve health or access to health facilities?</p> <p>● Will it promote healthy lifestyles?</p> <p>● Will it reduce health inequalities?</p> <p>● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</p>	+	+	++	<p>This option could enable the delivery of new development in settlements within 1,200m of a GP surgery or other healthcare facility. Also offer opportunities for improved recreational access to the countryside. Overall this option has been assessed as having a positive effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Delivering new homes in proximity to existing healthcare services and open space will have a positive effect on health.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<p>● Will it reduce actual levels of crime?</p> <p>● Will it reduce fear of crime?</p>	?	?	?	<p>There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime. <b>Mitigation measures:</b></p>

Option 3: Growth re-directed to towns					Justification; cumulative effects / mitigation measures
SA Objective	Decision making criteria	Time-frame			
		ST	MT	LT	
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>Will it enable people to meet their needs within their existing communities?</li> <li>Will it ensure that people can afford their housing?</li> </ul>	+	++	++	<p>Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Larger sites offer the most potential to deliver a range of types and tenures of new homes. Relying on a large number of small sites coming forward poses more risk to delivery than a smaller number of larger sites.</p> <p><b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.</p>
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>Will it minimise impacts on existing traffic congestion?</li> <li>Will it support the use of public transport?</li> <li>Will it support safe walking and cycling?</li> <li>Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	0	+	++	<p>Sites comprising this option could deliver development within 500m of a bus stop and this is likely to result in a positive effect on supporting the use of public transport. Since under this option growth would be focused on some larger villages and the towns, sites could be expected to support the delivery of new development in proximity to a range of key services and facilities, helping to support the use of walking and cycling. Overall this option has been assessed as having a long term positive effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Allocation of sites in larger villages and towns will direct development to locations close to existing services and facilities and this will lead to an increase in the opportunities to make journeys to key destinations without using a car. <b>Mitigation measures:</b> Local Plan policies to ensure that developments support safe walking and cycling and improve access to the natural environment.</p>

SA Objective		Option 3: Growth re-directed to towns				Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		Decision making criteria		Time-frame			
		ST	MT	LT			
<b>ENVIRONMENTAL</b>							
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	-	-	Development of the sites comprising this option could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. However sites comprising this option could deliver development within 500m of a bus stop, helping to encourage use of sustainable forms of transport. Overall this option has been assessed as having a negative effect on this objective.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>	
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	-/?	-/?	-/?	Since under this option growth would be focused on some larger villages and the towns of Cheadle and Leek, there is a risk that traffic may be increased in or near to areas of existing poor air quality. This option has been assessed as having a negative effect on this objective, although the exact effects are uncertain.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> The main areas identified in the District as being of poor air quality are the Cellarhead junction (between the A52 and A520); Ball Haye Street; Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street; Leek (a primary link road from Stoke on Trent)</p> <p>(1)</p>	

Option 3: Growth re-directed to towns						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>	0	0	0	<p>The SFRA <sup>(2)</sup> confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1. However development of sites could be expected to lead to an increase in wastewater and reduction of natural drainage, although SuDS could be used to mitigate against this. Development could also be expected to lead to increased water demand within the District. Overall this option has been assessed as having a neutral effect on this objective.</p>	<p>The increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, air quality may deteriorate in areas of existing low quality. <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Development will be permitted only where schemes meet development plan requirements for management of flood risk. <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> </ul>	--	--	--	<p>This option relies on redirecting growth from the rural areas to those towns not constrained by Green Belt. This is likely to result in increased growth to the east of both Leek and</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the cumulative</p>

Option 3: Growth re-directed to towns						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>				<p>Cheadle, with potential impacts on Cecilly Brook LNR and green corridor, and the risk of increased recreational impacts on the European sites to the east of Leek. There is potential for development to result in disturbance of local habitats, however mitigation measures are likely to be available. An impact on the District's ecological and GI networks is likely. Larger villages not constrained by Green Belt include Ipstones and Waterhouses,</p> <p>both are close to a component of the Peak District Dales SAC and there is potential for effects of development to result in an In-Combination Effect in relation to recreational pressure<sup>(3)</sup>. Overall this option has been assessed as having a significant negative effect on this objective.</p>	<p>impact of the development of a number of sites pose risks of disturbance that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible. Implementation of measures recommended in the HRA of the Local Plan to ensure no adverse impacts on European sites.</p>
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	-/?	-/?	-/?	<p>This option may include allocation of sites that are assessed as Agricultural Land Classification (ALC) Grade 3 land, so the proposal could result in the loss of best and most versatile agricultural land. This option may also include allocation of sites that are assessed as being within Mineral Safeguarding Areas, so the proposal may lead to the loss of mineral resources. Overall this option has been assessed as having a negative effect on this objective, although the exact effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Allocations will be mainly greenfield sites on the edge of settlements.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>

Option 3: Growth re-directed to towns						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible.</p> <p><b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk of development resulting in harm or loss to the significance of a designated heritage asset that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	-/?	-/?	-/?	<p>This option may include sites that are assessed as within 400m of one or more grade II listed assets</p> <p><b>(4)</b></p> <p>Dependent on proposal specific information, there is scope that this option could lead to the deterioration of the setting of designated or non-designated heritage assets. Applicants should be required to provide an NPPF compliant heritage statement. As growth is being distributed principally to those larger villages and towns not constrained by Green Belt there is likely to be a disproportionate impact of growth on the character of these settlements, Leek and Cheadle in particular.</p> <p>Overall this option has been assessed as having a negative effect on this objective, although the exact effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk of development resulting in harm or loss to the significance of a designated heritage asset that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>

Option 3: Growth re-directed to towns						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	--/?	--/?	--/?	<p>This option will require some countryside release. The option may include sites that fall within the area identified as "important landscape setting to settlement"<sup>(5)</sup>. This option is also likely to include sites assessed as being of some landscape sensitivity <sup>(6)</sup>, including sites to the east of Leek, and are likely to risk an effect on local landscape character or the setting of the Peak District National Park, however site-specific landscape mitigation measures may be available. Overall this option has been assessed as having a significant negative effect on this objective, although exact effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However options that include a number of sites that contribute to the current landscape setting of the settlement, or contribute to the setting of the national park, increases the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	+	+	+	<p>This option relies on delivery of a number of sites across some larger villages and the towns (in particular those not constrained by Green Belt) and this may help support opportunities for investment in culture and tourism that could result in positive effects on the local economy.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Proposals that have a positive effect on a range of village and town centres are likely to result in support for tourism and the visitor economy.</p> <p><b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>
<b>ECONOMIC</b>						

Option 3: Growth re-directed to towns					Justification; cumulative effects / mitigation measures
SA Objective	Decision making criteria	Time-frame			
		ST	MT	LT	
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	0	0	0	<p>This option relies on delivery of a number of small sites in larger villages, with growth redirected to towns not constrained by Green Belt and this may help support existing services and facilities in the towns. However by reducing the share of growth distributed to the rural areas, the option may result in a more uneven distribution of development across the District, with growth focused on the three towns and this may restrict the future vitality of the rural areas. Overall the proposal has been assessed as having a neutral effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Development of residential sites with access to a settlement centre is likely to result in a positive effect on the vitality and viability of a town or village as residents of new developments could be expected to support their local retail, leisure and other service provision.</p> <p><b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	0	0	0	<p>Development of sites could encourage investment in people and infrastructure through developer contributions although this would be limited. This proposal has been assessed as having a neutral effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> A local labour supply will help to deliver economic growth across the plan area.</p> <p><b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> </ul>	+	++	++	<p>By focusing growth on the towns, the proposal is likely to facilitate residential development within 30 minutes travel time of existing employment provision. This proposal has been assessed as having a significant positive effect on this objective, in the medium and long term.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy.</p>

SA Objective	Option 3: Growth re-directed to towns				Justification; cumulative effects / mitigation measures	
	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>				<p><b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>	
<p><b>Summary of significant effects:</b></p> <p>Sites comprising the option "growth redirected to towns" are expected to be a range of sizes, some are expected to yield 100 or more homes, potentially enabling the delivery of a wide range of types and tenures of new homes, consequently this option is expected to make a significant positive contribution to meeting the housing needs of the community. This is likely to result in further positive effects on a number of larger village centres as well as the towns and may help support opportunities for investment in culture and tourism with positive effects on the local economy.</p> <p>Sites comprising this option are expected deliver development generally within 500m of a bus stop and or within the proximity of a larger village or town centre with some key services and facilities and this is likely to result in positive effects on: access to jobs and other services and facilities including healthcare (which in turn is likely to support equality of opportunity). Similarly there is likely to be positive effects resulting from the option being likely to support residents travelling to key destinations by walking or cycling.</p> <p>However this option relies on reducing the distribution of development to the rural areas and increasing the distribution to the towns, limiting Green Belt release and this is likely to lead to significant negative effects on the District's ecological and GI networks, with additional growth directed to the east of Cheadle, potentially in proximity to the Cecilly Brook corridor. Larger villages with potential allocations include Ipstones and Waterhouses, with further growth expected to be directed to the east of Leek, risking potential effects on European sites arising from recreational pressure. Dependent on proposal specific information, there is scope that this option may lead to the deterioration of the settings of designated or non-designated heritage assets, applicants should be required to provide an NPPF compliant heritage statement. As growth is being distributed principally to those larger villages and towns not constrained by Green Belt there is likely to be a disproportionate impact of growth on the character of these settlements, Leek and Cheadle in particular. Likely negative effects on landscape character have also been identified, this option is likely to include sites contributing to the setting of the Peak District National Park, or that fall within the "important landscape setting to settlement" and sites assessed as being of some landscape sensitivity, (including sites to the east of Leek) however site-specific landscape mitigation measures may be available. The option has also been assessed as likely to result in minor negative effects arising from potential traffic increases in or near to areas of existing poor air quality and other effects of increased car travel as the focus of growth and investment in the towns draws people into the towns from the surrounding settlements.</p>

6. Landscape, Local Green Space and Heritage Impact Study, August 2016; Wardell Armstrong

### Option 4: Strategic Site release

SA Objective	Option 4: Strategic Site release				Justification; cumulative effects / mitigation measures	
	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
<b>SOCIAL</b>						
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	+/?	+/?	+/?	<p>This option relies on the allocation of a strategic site in the rural areas to consolidate growth outside the towns, restricting both Green Belt release and extensions into the countryside. By minimising countryside release this may help to mitigate any negative effects of development on the District's GI network. Allocation of smaller sites in some larger villages could enable the enhancement of any existing community facilities and services. In addition effects will be partly dependent on the implementation of Local Plan policies. Overall, this option has been assessed as having a positive effect on this Objective, although the exact effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Community cohesion and local environmental quality are dependent on the design and tenure mix, as well as the location of new development.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</p>
2. To advance equality of opportunity between all persons and eliminate social exclusion by	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity,</li> </ul>	+	+	++	<p>Since this option relies on the allocation of a strategic site to consolidate growth in the rural areas, it is expected to support infrastructure improvements supporting delivery of the site. This is likely to result in positive effects on improving access to jobs, services and facilities which could be expected to contribute to the advancement of equality of opportunity locally. However consolidating growth is likely to mean that some settlements</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities.</p>

Option 4: Strategic Site release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● race, religion / belief, sex and sexual orientation?</li> <li>● Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>				receive a lower share of growth, leading to a loss of any associated investment in some rural areas.	<p><b>Mitigation measures:</b> Local Plan policies to help ensure that the needs of all members of the community can be addressed by helping to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</p>
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Will it improve health or access to health facilities?</li> <li>● Will it promote healthy lifestyles?</li> <li>● Will it reduce health inequalities?</li> <li>● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	+	+	++	<p>The identified strategic site is located within Blythe Bridge which has a GP surgery and opticians. This option could enable the delivery of new development in proximity to healthcare facilities and open space. Development on the edge of settlements may offer opportunities to enable improved recreational access to the countryside. Overall this option has been assessed as having a positive effect on this objective, particularly in the long term.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Delivering new homes in proximity to existing healthcare services and open space will have a positive effect on health.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Will it reduce actual levels of crime?</li> <li>● Will it reduce fear of crime?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area;</p> <p><b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime.</p>

Option 4: Strategic Site release					Justification; cumulative effects / mitigation measures	
SA Objective	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Will it enable people to meet their needs within their existing communities?</li> <li>● Will it ensure that people can afford their housing?</li> </ul>	+	++	++	<p><b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p> <p><b>Geographical scale:</b> Local Plan area;  <b>Effects:</b> Permanent;  <b>Assumptions made:</b> Larger sites offer the most potential to deliver a range of types and tenures of new homes. Allocation of a single large site is more likely to deliver housing numbers than reliance on bringing forward a large number of smaller sites.  <b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.</p>	
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Will it minimise impacts on existing traffic congestion?</li> <li>● Will it support the use of public transport?</li> <li>● Will it support safe walking and cycling?</li> <li>● Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	+	++	++	<p>The identified strategic site at Blythe Bridge would deliver development in proximity to the District's only railway station. Blythe Bridge is on the Crewe - Stoke - Derby line and this is likely to result in a positive effect on supporting the use of public transport. Blythe Bridge has a range of facilities and services including schools, play facilities, community library and general store, helping to support the use of walking and cycling. This option is thus likely to lead to more positive effects than other options relying on delivering growth across a range of settlements with fewer</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;  <b>Assumptions made:</b> Allocation of a strategic site close to a railway station and existing services and facilities will help to reduce the number of journeys made by car.  <b>Mitigation measures:</b> Local Plan policies to ensure that developments support safe walking and cycling and improve access to the natural environment.</p>	

Option 4: Strategic Site release					Justification; cumulative effects / mitigation measures

		ST	MT	LT	
					facilities and services. Overall this option has been assessed as having a long term positive effect on this objective.
<b>ENVIRONMENTAL</b>					
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	-	-	<p>Development of the sites comprising this option could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. The identified strategic site is within 1,500m of Blythe Bridge railway station. The option could also be expected to support the delivery of new development in proximity to existing services and facilities, helping to support the use of walking and cycling as well as public transport. Whilst this may help to reduce the need to travel by car, overall this option has been assessed as having a negative effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	0	0	0	<p>This option has been assessed as having a neutral effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> The main areas identified in the District as being of poor air quality are the Cellarhead junction (between the A52 and A520); Ball Haye Street, Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)</p>

Option 4: Strategic Site release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
						(1) . Whilst the increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, development in the rural areas carries a lower risk that air quality may deteriorate in areas of existing low quality.  <b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>	0	0	0	The SFRA (2) confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1. However development of sites could be expected to lead to an increase in wastewater and reduction of natural drainage, although SuDs could be used to mitigate against this. Development could also be expected to lead to increased water demand within the District. Overall this option has been assessed as having a neutral effect on this objective.	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;  <b>Assumptions made:</b> Development will be permitted only where schemes meet development plan requirements for management of flood risk.  <b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.
10. To identify, conserve and enhance biodiversity	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of</li> </ul>	0	0	0	This option relies on consolidating growth in the rural areas within a single strategic site, reducing the total number of allocations to be	<b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;

Option 4: Strategic Site release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>ecological and nature conservation importance? Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>				<p>made in the rural areas overall. This may help to mitigate the potential for development to result in disturbance of habitats. However some impact on the District's ecological and GI networks remains likely.</p> <p>Consolidation into a strategic site is also expected to allow avoiding allocations in villages such as Ipstones that are close to a component of the Peak District Dales SAC and where development presents opportunities for effects from increased recreational pressure. Overall this option has been assessed as having a neutral effect on this objective.</p>	<p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the cumulative impact of the development of a number of sites pose risks of disturbance that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible. Implementation of measures recommended in the HRA of the Local Plan to ensure no adverse impacts on European sites.</p>
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	-/?	-/?	-/?	<p>The identified strategic site at Blythe Vale is indicated on the predictive map of Best and Most Versatile land as an area where more than 60% of the land is likely to be BMV, so the option could result in the loss of best and most versatile agricultural land. This option may also include allocation of sites that are assessed as being within Mineral Safeguarding Areas, so the proposal may lead to the loss of mineral resources. Overall this option has been assessed as having a significant negative effect on this objective, although the exact effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Allocations will be mainly greenfield sites on the edge of settlements.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p>

Option 4: Strategic Site release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>					<p><b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible.</p> <p><b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	-/?	-/?	-/?	<p>The identified strategic site at Blythe Vale has one Grade II Listed Building within the 400m buffer. It is considered that due to the topography of the landscape, there is no inter-visibility between the site and the asset and that development would be highly unlikely to adversely affect the setting of the heritage asset. (4) However dependent on proposal specific information, there is scope that other allocations under this option could lead to the deterioration of the setting of designated or non-designated heritage assets. Applicants should be required to provide an NPPF compliant heritage statement. The option identifies a large development site in the rural areas and this risks leading to a negative effect on the character and appearance of Blythe Vale. Overall this option has been assessed as having a negative effect on this objective although the exact nature of effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk of development resulting in harm or loss to the significance of a designated heritage asset that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>
14. To protect and enhance the character and appearance of the	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain</li> </ul>	-/?	-/?	-/?	<p>The identified strategic site at Blythe Vale lies partly within the important landscape setting to the settlement. Option 4: Strategic Site release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
<p>landscape including historic landscape and other natural assets and resources.</p> <ul style="list-style-type: none"> <li>and strengthen local distinctiveness? Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>					<p>also likely to include sites assessed as being of some landscape sensitivity (6), and are likely to risk an effect on local landscape character or the setting of the Peak District National Park, however site-specific landscape mitigation measures may be available. Overall this option has been assessed as having a negative effect on this objective, although exact effects are uncertain.</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However options that include a number of sites that contribute to the current landscape setting to the settlement increases the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>	
<p>15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.</p> <ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness? Does it help support tourism and the visitor economy?</li> </ul>	+	+	+	<p>This option relies on delivery of a strategic site in place of a number of small sites across a number of villages and this may help support opportunities for infrastructure investment, including in culture and tourism that could result in positive effects on the local economy.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Consolidating growth into a single site may support infrastructure improvements that could benefit tourism and the visitor economy.</p> <p><b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>	
<b>ECONOMIC</b>						

Option 4: Strategic Site release					Justification; cumulative effects / mitigation measures
SA Objective	Decision making criteria	Time-frame			
		ST	MT	LT	
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	+	+	<p>This option relies on delivery of a strategic site in the rural areas and this may help bring forward regeneration opportunities. Overall the proposal has been assessed as having a positive effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Development of residential sites with access to a town or village centre is likely to result in a positive effect on the vitality and viability of settlements as residents of new developments could be expected to support their local retail, leisure and other service provision.</p> <p><b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	0	0	0	<p>Development of sites could encourage investment in people and infrastructure through developer contributions although this would be limited. This proposal has been assessed as having a neutral effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> A local labour supply will help to deliver economic growth across the plan area.</p> <p><b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>	+	+	+	<p>The proposal could facilitate residential development within 30 minutes travel time of existing employment provision. This proposal has been assessed as having a positive effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy.</p> <p><b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>

SA Objective	Option 4: Strategic Site release				Justification; cumulative effects / mitigation measures	
	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
<p><b>Summary of significant effects:</b></p> <p>By consolidating growth in the rural areas into a large strategic site, this option may be expected to help enable the delivery of a range of types and tenures of new homes, making a significant contribution to meeting the needs of the whole community. The option could also make a significant contribution to the delivery of affordable homes. This is likely to result in positive effects on a number of settlement centres and may help support opportunities for investment in infrastructure, including in culture and tourism, with positive effects on the local economy. Consolidating growth may also have positive effects on the local economy through helping to bring forward regeneration opportunities. The identified strategic site at Blythe Bridge would deliver development in proximity to the District's only railway station. Blythe Bridge is on the Crewe - Stoke - Derby line and this is likely to result in a positive effect on supporting the use of public transport. Blythe Bridge has a range of facilities and services including schools, play facilities, community library and general store and this is likely to result in positive effects on: improving access to jobs, services and facilities (which in turn is likely to advance equality of opportunity), improving access to health care, helping to safeguard the vitality and viability of town and village centres, providing support for public transport, walking and cycling and reducing the need to travel by car.</p> <p>Consolidation of growth in the rural areas within a strategic site helps to avoid reliance on a number of small or medium sized allocations in the larger villages and this is likely to help mitigate predicted effects on the District's ecological and GI networks and reduce the impact of disturbance of habitats by development. It will also help avoid the need to allocate sites in larger villages such as Ipstones, close to the national park and to European sites, helping reduce the risk of potential effects on such sites arising from recreational pressure. However dependent on proposal specific information, there is scope that this option may lead to the deterioration of the settings of designated or non-designated heritage assets, applicants should be required to provide an NPPF compliant heritage statement. In addition, the option identifies a large development site in the rural areas and this risks leading to a negative effect on the character and appearance of Blythe Bridge. Likely negative effects on landscape character have also been identified, this identified strategic site falls within the "important landscape setting to settlement" and some sites required for this option may be assessed as being of some landscape sensitivity, however site-specific landscape mitigation measures may be available. The option has also been assessed as likely to result in negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.</p>						

**Table 19.4 Assessment Table for Option 4: Strategic site release**

Preferred Option July 2017: Growth redirected to towns accompanied by strategic site release

Option 4: Strategic Site release					Justification; cumulative effects / mitigation measures	
SA Objective	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
<b>SOCIAL</b>						
1. To improve community cohesion and the quality of where people work and live.	<ul style="list-style-type: none"> <li>Will it make a positive contribution towards community cohesion?</li> <li>Will it improve neighbourhood quality?</li> <li>Will it ensure that there is adequate open space and support Green Infrastructure?</li> <li>Will it minimise light and noise pollution?</li> <li>Will it ensure that occupiers of buildings and spaces have sufficient natural light and appropriate levels of privacy?</li> </ul>	+/?	+/?	+/?	<p>This option relies on redirecting a small percentage of the share of development for the rural areas to the towns, reducing the proportion of growth allocated to a strategic site in the rural areas whilst still consolidating growth in the rural areas. Through consolidation the option restricts both Green Belt release and extensions into the countryside and this may help to mitigate any negative effects of development on the District's GI network. Allocation of smaller sites in some larger villages could enable the enhancement of any existing community facilities and services. In addition effects will be partly dependent on the implementation of Local Plan policies. Overall, this option has been assessed as having a positive effect on this Objective, although the exact effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Community cohesion and local environmental quality are dependent on the design and tenure mix, as well as the location of new development.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that good standards of amenity and open space and Green Infrastructure are delivered as part of new housing development.</p>
2. To advance equality of opportunity between all persons and eliminate social exclusion by	<ul style="list-style-type: none"> <li>Will it remove or minimise any disadvantages suffered by people due to their age, disability, gender reassignment, marriage / civil partnership, pregnancy / maternity, race, religion /</li> </ul>	+	+	++	<p>Since this option relies on the allocation of a strategic site to consolidate growth in the rural areas, it is expected to support infrastructure improvements supporting delivery of the site. This is likely to result in positive effects on improving access to jobs, services and facilities which could be expected to contribute to the advancement of equality of opportunity locally. However consolidating growth is likely to mean that some settlements receive a lower share of</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Equality of opportunity for all persons will be improved by any measure that has the effect of improving overall accessibility to jobs, services and facilities.</p>

Option 4: Strategic Site release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
improving access to jobs, services and facilities.	<ul style="list-style-type: none"> <li>● belief, sex and sexual orientation?</li> <li>● Will it help to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</li> </ul>				growth, leading to a loss of any associated investment in some rural areas. This option proposes to increase Cheadle's share of growth from 22% to 25% and this may help to minimise the distance people need to travel. Overall, this option has been assessed as having a positive effect on this Objective.	<p><b>Mitigation measures:</b> Local Plan policies to help ensure that the needs of all members of the community can be addressed by helping to minimise the distance people need to travel to access education, employment, shopping and other key services and facilities.</p>
3. To improve health and reduce health inequalities.	<ul style="list-style-type: none"> <li>● Will it improve health or access to health facilities?</li> <li>● Will it promote healthy lifestyles?</li> <li>● Will it reduce health inequalities?</li> <li>● Will it provide opportunities to participate in leisure and recreational activities including access to the countryside?</li> </ul>	+	+	++	<p>The identified strategic site is located within Blythe Bridge which has a GP surgery and opticians. This option could enable the delivery of new development in proximity to healthcare facilities and open space. Development on the edge of settlements may offer opportunities to enable improved recreational access to the countryside. Overall this option has been assessed as having a positive effect on this objective, particularly in the long term.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Delivering new homes in proximity to existing healthcare services and open space will have a positive effect on health.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that new developments deliver opportunities to increase take up of sustainable transport choices and improvements to healthy travel networks, including increased opportunities for access to the countryside.</p>
4. To minimise opportunities for crime and reduce the fear of crime.	<ul style="list-style-type: none"> <li>● Will it reduce actual levels of crime?</li> <li>● Will it reduce fear of crime?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Good design will help minimise opportunities for crime and reduce the fear of crime.</p>

Option 4: Strategic Site release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
5. To ensure adequate quality and provision of a range of house types to meet local needs in appropriate locations and including affordable / social /extra care housing.	<ul style="list-style-type: none"> <li>● Will it provide an appropriate mix of housing to enable all needs to be met?</li> <li>● Will it enable people to meet their needs within their existing communities?</li> <li>● Will it ensure that people can afford their housing?</li> </ul>	+	++	++	<p>Identification of a strategic site within which to consolidate growth in the rural areas may be expected to help with deliverability. It could also be expected to help enable the delivery of a range of types and tenures, making a significant contribution to meeting the needs of the whole community. The option could also make a significant contribution to the delivery of affordable homes. This option has been assessed as having a very positive effect on this objective in the medium and long term.</p>	<p><b>Mitigation measures:</b> Local Plan policies to ensure that new developments are well designed, creating safe places and reducing opportunities for anti-social behaviour.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Larger sites offer the most potential to deliver a range of types and tenures of new homes. Allocation of a single large site is more likely to deliver housing numbers than reliance on bringing forward a large number of smaller sites.</p> <p><b>Mitigation measures:</b> Wider initiatives of the Council should be supported to help deliver additional affordable homes.</p>
6. To strengthen links between rural areas and towns by sustainable forms of transport and reduce the number of journeys made by car.	<ul style="list-style-type: none"> <li>● Will it minimise impacts on existing traffic congestion?</li> <li>● Will it support the use of public transport?</li> <li>● Will it support safe walking and cycling?</li> <li>● Will it protect and improve access to the natural environment and support Green Infrastructure?</li> </ul>	+	++	++	<p>The identified strategic site at Blythe Bridge would deliver development in proximity to the District's only railway station. Blythe Bridge is on the Crewe - Stoke - Derby line and this is likely to result in a positive effect on supporting the use of public transport. Blythe Bridge has a range of facilities and services including schools, play facilities, community library and general store, helping to support the use of walking and cycling. This option is thus likely to lead to more positive effects than other options relying on delivering growth across a range of settlements with fewer facilities and</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent; <b>Assumptions made:</b> Allocation of a strategic site close to a railway station and existing services and facilities will help to reduce the number of journeys made by car. <b>Mitigation measures:</b> Local Plan policies to ensure that developments support safe walking and cycling and improve access to the natural environment.</p>

Option 4: Strategic Site release					Justification; cumulative effects / mitigation measures

		ST	MT	LT	
					services. Overall this option has been assessed as having a long term positive effect on this objective.
<b>ENVIRONMENTAL</b>					
7. To minimise contributions to climate change and consider climate change adaptation.	<ul style="list-style-type: none"> <li>Will it reduce emissions of greenhouse gases particularly CO<sub>2</sub>?</li> <li>Will it increase energy efficiency?</li> <li>Will it increase the use of renewable energy?</li> <li>Will it ensure new development is in accessible locations in order to reduce the need for car use and / or encourage sustainable forms of transport?</li> </ul>	-	-	-	<p>Development of the sites comprising this option could lead to an increase in greenhouse gas emissions and energy consumption during both construction and occupation. The identified strategic site is within 1,500m of Blythe Bridge railway station. The option could also be expected to support the delivery of new development in proximity to existing services and facilities, helping to support the use of walking and cycling as well as public transport. Whilst this may help to reduce the need to travel by car, overall this option has been assessed as having a negative effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Even if individual properties are built to high environmental performance standards and delivered in sustainable locations, the total increase in number of dwellings and car journeys is likely to increase energy use and associated greenhouse gas emissions.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that high environmental design standards are supported and that developments are brought forward in accessible locations that support the use of sustainable forms of transport.</p>
8. To improve air quality.	<ul style="list-style-type: none"> <li>Will it minimise emissions of airborne pollutants?</li> <li>Will it maximise the removal of air pollutants (e.g. by trees)?</li> </ul>	0	0	0	<p>This option proposes to increase Cheadle's share of growth from 22% to 25% and whilst this may help to minimise the distance people need to travel to access key destinations, it may contribute to increased growth in or near to areas of existing poor air quality. Overall, this option has been assessed as having a neutral effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> The main areas identified in the District as being of poor air quality are the Cellarhead junction (between the A52 and A520); Ball Haye Street; Leek (a primary link road from Leek A53 to the A523 Macclesfield and Buxton Road) and Broad Street, Leek (a primary link road from Stoke on Trent)</p>

Option 4: Strategic Site release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
9. To reduce flood risk, protect and enhance water sources.	<ul style="list-style-type: none"> <li>Is new development directed towards areas of least flood risk?</li> <li>Will it reduce risk of flooding eg by encouraging the integration of mitigation measures such as SuDS into new development?</li> <li>Will it protect, maintain and improve the quality of water resources and help contribute to the objectives of the Water Framework Directive?</li> <li>Will it encourage water efficiency and demand management?</li> </ul>	0	0	0	<p>The SFRA <sup>(2)</sup> confirms that there are few locations in which development would significantly increase fluvial flood risk elsewhere, due to the majority of potentially suitable sites for development being located within Flood Zone 1. However development of sites could be expected to lead to an increase in wastewater and reduction of natural drainage, although SuDs could be used to mitigate against this. Development could also be expected to lead to increased water demand within the District. Overall this option has been assessed as having a neutral effect on this objective.</p>	<p><b>(1)</b></p> <p>. Whilst the increase in number of dwellings and car journeys is likely to increase emission of airborne pollutants, development in the rural areas carries a lower risk that air quality may deteriorate in areas of existing low quality.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that developments include appropriate landscaping to aid removal of air pollutants.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Development will be permitted only where schemes meet development plan requirements for management of flood risk.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure that new developments are directed towards areas of least flood risk and incorporate SuDS wherever possible.</p>

Option 4: Strategic Site release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
10. To identify, conserve and enhance biodiversity resources and to test the plan's policies and proposals on European Sites and SSSIs	<ul style="list-style-type: none"> <li>Will it protect and promote effective management of the district's sites of ecological and nature conservation importance?</li> <li>Will it help contribute to Staffordshire Biodiversity Action Plan objectives?</li> <li>Will it help deliver networks of biodiversity and green infrastructure?</li> </ul>	0	0	0	<p>This option relies on reducing the rural areas' share of the housing requirement and consolidating growth in the rural areas within a single strategic site, reducing the total number of allocations to be made in the rural areas overall. This may help to mitigate the potential for development to result in disturbance of habitats. However some impact on the District's ecological and GI networks remains likely.</p> <p>Consolidation into a strategic site is also expected to allow avoiding allocations in villages such as Ipstones that are close to a component of the Peak District Dales SAC and where development presents opportunities for effects from increased recreational pressure<sup>(3)</sup>. Overall this option has been assessed as having a neutral effect on this objective.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for biodiversity and for sites of ecological and nature conservation importance, but the cumulative impact of the development of a number of sites pose risks of disturbance that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure impacts on biodiversity are minimised and proposals provide net gains in biodiversity where possible. Implementation of measures recommended in the HRA of the Local Plan to ensure no adverse impacts on European sites.</p>
11. To safeguard the best and most versatile agricultural land; improve soil and land resources; and protect and enhance geological resources.	<ul style="list-style-type: none"> <li>Will it safeguard the best and most versatile agricultural land?</li> <li>Will it minimise the loss of greenfield land?</li> <li>Will it reduce land contamination / instability?</li> <li>Will it reduce the amount of derelict land?</li> <li>Will it protect notable geological and geomorphological features?</li> </ul>	-/?	-/?	-/?	<p>The identified strategic site at Blythe Vale is indicated on the predictive map of Best and Most Versatile land as an area where more than 60% of the land is likely to be BMV, so the option could result in the loss of best and most versatile agricultural land. This option may also include allocation of sites that are assessed as being within Mineral Safeguarding Areas, so the proposal may lead to the loss of mineral resources. Overall this option has been assessed as having a significant negative effect on this objective, although the exact effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Allocations will be mainly greenfield sites on the edge of settlements.</p> <p><b>Mitigation measures:</b> Local Plan policies to ensure protection and enhancement of geologically important sites.</p>

Option 4: Strategic Site release

		ST	MT	LT		
12. To minimise the use of non-renewable resources.	<ul style="list-style-type: none"> <li>Will it reduce waste generation?</li> <li>Will it maximise the re-use of existing buildings?</li> <li>Will it increase the use of building materials from sustainable sources?</li> </ul>	?	?	?	<p>There is uncertainty as to the nature of effect and level of significance as this will be dependent on the implementation of Local Plan policies.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will encourage the re-use of existing buildings wherever possible.</p> <p><b>Mitigation measures:</b> Local Plan policies to support waste minimisation.</p>
13. To protect and enhance the character of towns / villages and other heritage and archaeological assets along with their settings.	<ul style="list-style-type: none"> <li>Will it ensure the continued protection and enhancement of cultural and historic heritage assets (designated and non-designated assets) along with their settings?</li> <li>Will it protect and reinforce the character and appearance of the district's towns and villages and maintain and strengthen local distinctiveness and sense of place?</li> </ul>	-/?	-/?	-/?	<p>The identified strategic site at Blythe Vale has one Grade II Listed Building within the 400m buffer. It is considered that due to the topography of the landscape, there is no inter-visibility between the site and the asset and that development would be highly unlikely to adversely affect the setting of the heritage asset. (4) However dependent on proposal specific information, there is scope that other allocations under this option could lead to the deterioration of the setting of designated or non-designated heritage assets. Applicants should be required to provide an NPPF compliant heritage statement. The option reduces the proportion of growth allocated to a strategic site in the rural areas in comparison with option 4 and thus helps mitigate the identified risk of leading to a negative effect on the character and appearance of Blythe Vale. Overall this option has been assessed as having a negative effect on this objective although the exact nature of effects are uncertain.</p>	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for heritage and archaeological assets along with their settings. However options that include a number of sites in close proximity to designated heritage assets increases the risk of development resulting in harm or loss to the significance of a designated heritage asset that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to support protection and enhancement for the character of towns / villages; heritage and archaeological assets along with their settings.</p>

Option 4: Strategic Site release						
SA Objective	Decision making criteria	Time-frame			Nature of effect; Comments	Justification; cumulative effects / mitigation measures
		ST	MT	LT		
14. To protect and enhance the character and appearance of the landscape including historic landscape and other natural assets and resources.	<ul style="list-style-type: none"> <li>Will it protect and enhance the character of the landscape and maintain and strengthen local distinctiveness?</li> <li>Will it promote development on brownfield land?</li> <li>Will it safeguard protected sites and provide opportunities for the enhancement of the natural environment identified in the NCA profiles?</li> </ul>	-/?	-/?	-/?	The identified strategic site at Blythe Vale lies partly within the important landscape setting to the settlement. This option is also likely to include sites assessed as being of some landscape sensitivity, and are likely to risk an effect on local landscape character or the setting of the Peak District National Park, however site-specific landscape mitigation measures may be available. Overall this option has been assessed as having a negative effect on this objective, although exact effects are uncertain.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Policies in the Local Plan will provide protection for landscape character and natural assets. However options that include a number of sites that contribute to the current landscape setting to the settlement increases the risk of resulting in an adverse effect on the character of landscapes, including historic landscapes, that could not be reasonably mitigated.</p> <p><b>Mitigation measures:</b> Local Plan policies to support protection and enhancement of the character and appearance of the landscape including historic landscape and other natural assets and resources.</p>
15. To encourage further development of sustainable tourism, cultural heritage and local distinctiveness.	<ul style="list-style-type: none"> <li>Will it support the development of a vibrant cultural economy and local distinctiveness?</li> <li>Does it help support tourism and the visitor economy?</li> </ul>	+	+	+	This option relies on delivery of a strategic site in place of a number of small sites across a number of villages and this may help support opportunities for infrastructure investment, including in culture and tourism that could result in positive effects on the local economy.	<p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Consolidating growth into a single site may support infrastructure improvements that could benefit tourism and the visitor economy.</p> <p><b>Mitigation measures:</b> Local Plan policies to support tourism and the visitor economy.</p>
<b>ECONOMIC</b>						

Option 4: Strategic Site release					Justification; cumulative effects / mitigation measures
SA Objective	Decision making criteria	Time-frame			
		ST	MT	LT	
16. To safeguard the vitality and viability of the District's towns and villages, and create and sustain a vibrant rural economy	<ul style="list-style-type: none"> <li>Will it safeguard shops and services in existing centres?</li> <li>Will it safeguard and improve the retail, leisure and service provision?</li> </ul>	+	+	+	<p>This option relies on delivery of a strategic site in the rural areas and this may help bring forward regeneration opportunities. Overall the proposal has been assessed as having a positive effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Development of residential sites with access to a town or village centre is likely to result in a positive effect on the vitality and viability of settlements as residents of new developments could be expected to support their local retail, leisure and other service provision.</p> <p><b>Mitigation measures:</b> Local Plan policies to support town and village centres.</p>
17. To strengthen, modernise and diversify the District economy, and promote sustainable economic growth	<ul style="list-style-type: none"> <li>Will it provide a balanced portfolio of employment land in sustainable locations?</li> <li>Will it provide opportunities for the creation of new businesses and/or minimise the loss or displacement of existing businesses?</li> </ul>	0	0	0	<p>Development of sites could encourage investment in people and infrastructure through developer contributions although this would be limited. This proposal has been assessed as having a neutral effect on this objective.</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> A local labour supply will help to deliver economic growth across the plan area.</p> <p><b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>
18. To encourage and support a high and stable level of employment	<ul style="list-style-type: none"> <li>Will it meet the employment needs of local people?</li> </ul>	+	+	+	<p>Under this option Cheadle's share of the District's housing requirement is increased and this together with consolidation of growth in the rural areas to a well connected site could facilitate residential development within 30 minutes travel time of existing employment</p> <p><b>Geographical scale:</b> Local Plan area; <b>Effects:</b> Permanent;</p> <p><b>Assumptions made:</b> Ensuring a sufficient supply of homes within easy access of employment is a central element of an efficiently functioning economy.</p>

SA Objective	Option 4: Strategic Site release				Justification; cumulative effects / mitigation measures	
	Decision making criteria	Time-frame				Nature of effect; Comments
		ST	MT	LT		
	<ul style="list-style-type: none"> <li>Will it increase economic activity levels?</li> <li>Will it improve physical accessibility to jobs?</li> <li>Will it support higher income levels for local residents?</li> </ul>				<p>provision. Overall this option has been assessed as having a positive effect on this objective.</p> <p><b>Mitigation measures:</b> Local Plan policies to support sustainable economic growth.</p>	
<p><b>Summary of significant effects:</b></p> <p>Increasing Cheshire's share of the District's housing requirement and reducing the proportion of growth allocated to a strategic site in the rural areas is expected to help enable the delivery of a range of types and tenures of new homes, making a significant contribution to meeting the needs of the whole community. The option could also make a significant contribution to the delivery of affordable homes. This is likely to result in positive effects on a number of settlement centres and may help support opportunities for investment in infrastructure, including in culture and tourism, with positive effects on the local economy. Consolidating growth may also have positive effects on the local economy through helping to bring forward regeneration opportunities. The identified strategic site at Blythe Bridge would deliver development in proximity to the District's only railway station. Blythe Bridge is on the Crewe - Stoke - Derby line and this is likely to result in a positive effect on supporting the use of public transport. Blythe Bridge has a range of facilities and services including a GP Surgery, schools, play facilities, community library and general store and this is likely to result in positive effects on improving access to services and facilities (which in turn is likely to advance equality of opportunity). Under this Option, Cheshire's share of the District's housing requirement is increased and this together with consolidation of growth in the rural areas to a well connected site is expected to help improve accessibility to jobs.</p> <p>Consolidation of growth in the rural areas within a strategic site helps to avoid reliance on a number of small or medium sized allocations in the larger villages and this is likely to help mitigate predicted effects on the District's ecological and GI networks and reduce the impact of disturbance of habitats by development. It will also help avoid the need to allocate sites in larger villages such as Ipstones, close to the national park and to European sites, helping reduce the risk of potential effects on such sites arising from recreational pressure. However dependent on proposal specific information, there is scope that this option may lead to the deterioration of the settings of designated or non-designated heritage assets, applicants should be required to provide an NPPF compliant heritage statement. In comparison with option 4, this option reduces the proportion of growth allocated to a strategic site in the rural areas and this is expected to help mitigate the risk of leading to a negative effect on the character and appearance of Blythe Bridge. Likely negative effects on landscape character have also been identified, the identified strategic site falls within the "important landscape setting to settlement" and some sites required for this option may be assessed as being of some landscape sensitivity, however site-specific landscape mitigation measures may be available. The option has also been assessed as likely to result in negative effects in relation to loss of best and most versatile agricultural land, air quality and greenhouse gas emissions and energy consumption arising from construction and occupation of new developments.</p>

## Appraisal of preferred option policies

## 20 Appraisal of preferred option policies

**20.1** The methodology used to appraise policies in the Local Plan was drawn from that set out in the SA Scoping report and based on the SA Framework. These appraisals were carried out on initial policy drafts in November and December 2016.

### Scoring of options

Score	
++	The allocation will have a very positive impact on the sustainability objective
+	The allocation will have a slightly positive impact on the sustainability objective
0	The allocation will have a negligible or neutral impact on the sustainability objective. A recorded neutral effect does not necessarily mean that there will be no effect at the project level, but shows that at this strategic level there are no identifiable effects.
-	The allocation will have a slightly negative impact on the sustainability objective
--	The allocation will have a very negative impact on the sustainability objective
i	The outcome could be dependent on implementation, or more detail is required to make an assessment
?	The impact of an issue cannot be predicted at this stage

**Table 20.1 Scoring of options**

**20.2** Different components within an option may generate varying impacts. This is indicated by "/".

### Key to Table

<p>from development for other uses;</p> <p>Provision of relevant employment skills, training and support to help retain and develop a local workforce;</p> <p>Maintaining the vitality and viability of the towns and protection of the towns as service centres;</p> <p>Measures to encourage people to shop in the area;</p> <p>Enhancement of local distinctiveness;</p> <p>Protection of the retail function in the heart of the town centres.</p>						

SA Framework		Preferred Option Policy: SS1 Development Principles				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
	Nature of Effect	ST	MT	LT	Justification for assessment	
<p><b>Summary of significant effects of policy:</b>                      Policy SS1 Development Principles expects development to contribute positively to the social, economic and environmental improvement of the District in partnership with other agencies and services. All proposals for development will be considered in the context of the District-wide spatial strategy. Significant positive effects include the likelihood of improvements to the social and environmental quality of the neighbourhood and improved access to jobs, services and facilities. Policy intent is to secure a mix of types and tenures of quality, affordable homes, including starter homes and this could make a significant contribution to meeting the needs of the whole community. Further positive effects are likely to result from the intentions to maintain the distinctive character of the District's towns and villages and their settings; to protect and enhance the natural and historic environment of the District and to create sustainable, self-sufficient settlements encouraging a strong, prosperous and diverse economy. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:</p> <p><b>Mitigation:</b> The policy could make reference to enhancement of the District's GI network and to the needs of older people, including for extra care provision. The policy should seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy. The location of identified areas of poor air quality should be a factor in considering preferred locations for new development and the delivery of significant soft landscape features should be required to help maximise the removal of air pollutants where necessary. The Policy could refer to strengthening links between rural areas and towns by sustainable forms of transport.</p>

Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation
		Nature of Effect	ST	MT	LT
<p>retain and develop a local workforce;</p> <p>Maintaining the vitality and viability of the towns and protection of the towns as service centres;</p> <p>Measures to encourage people to shop in the area;</p> <p>Enhancement of local distinctiveness;</p> <p>Protection of the retail function in the heart of the town centres.</p>					
<p><b>Summary of significant effects of policy:</b>                      Policy SS8 Cheadle Area Strategy seeks to expand the role of Cheadle as a significant service centre and a market town. Policy intent is to increase the range of available and affordable house types, especially for first time buyers and families and this is likely to make a significant contribution to meeting the housing needs of the whole community. Further positive effects are likely to result from the intentions to create employment growth and increase the diversity of employment opportunities; expand the role of Cheadle as a significant service and retailing centre for the District and to improve environmental quality and accessibility. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:</p>					

SA Framework		SS8 Cheadle Area Strategy				
Summary of Baseline Situation	SA Objective	Predicted Effects		Assumptions and mitigation		
		Nature of Effect	ST	MT	LT	Justification for assessment
<p><b>Mitigation:</b> The policy should refer to the District's GI Strategy and to meeting the needs of older people, including with extra care housing. The policy should seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy. The policy should also refer to taking opportunities to enhance the character and appearance of the landscape, including the historic landscape, paying particular attention to the quality of the urban / rural interface and to increasing tourist opportunities for visitors.</p>						

**Table 20.9 Assessment Table for Preferred Option Policy SS8 Cheadle Area Strategy**

**Preferred Option Policy SS9 Rural Areas**

SA Framework		SS9 Rural Areas				
Summary of Baseline Situation	SA Objective	Predicted Effects		Assumptions and mitigation		
		Nature of Effect	ST	MT	LT	Justification for assessment
<p><b>Social:</b> Need to address: Implications of an increasingly ageing population; Meeting identified housing need, including the need for affordable homes and provision of an appropriate mix of house types and tenures;</p>	1 Community cohesion and neighbourhood quality	Under option 2, policy requires that local infrastructure can meet the additional requirements arising from the development and this is likely to support improvements to the social and environmental quality of neighbourhoods.	+	+	++	<p><b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale</b> of effect: Rural areas <b>Temporary / Permanent:</b> Permanent <b>Assumptions made:</b> Design principles enforced at planning application stage will implement policy intentions. <b>Mitigation:</b> Option 2 for the policy should make clear that "local" infrastructure includes social infrastructure.</p>
	2 Improving access to jobs, services and facilities	The policy could ensure that new development is located in proximity to some services and facilities and this is likely to lead to positive effects.	+	+	+	<p><b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale</b> of effect: Rural areas <b>Temporary / Permanent:</b> Permanent <b>Assumptions made:</b> Principles enforced at planning application stage will implement policy intentions.</p>
	3 Improve health and reduce health inequalities	The policy could ensure that new development is located in proximity to a healthcare facility and this is likely to lead to positive effects.	+	+	+	<p><b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale</b> of effect: Rural areas <b>Temporary / Permanent:</b> Permanent <b>Assumptions made:</b> Appropriate proposals come forward in the plan period. <b>Mitigation:</b> The policy should refer to the District's GI Strategy.</p>

SA Framework		SS9 Rural Areas				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
Reducing health inequalities; Opportunities to improve the health of older people through appropriate housing and access to community facilities and services; Quantity, quality and accessibility of sports and recreation facilities, including open space; Any shortfall in school places; Creation of accessible and safe public and private environments; Modal shift away from journeys by car.	4 Minimise opportunities for crime and reduce fear of crime	This will be managed through other policies in the Local Plan.	0	0	0	Likelihood/certainty of effect occurring: Likely Geographical scale of effect: Rural areas Permanent: Permanent Assumptions made: Design principles enforced at planning application stage will implement policy intentions.
	5 Ensure supply new homes to meet local needs including affordable / social / extra care	Policy intent is to enable development in the rural areas to reflect the spatial strategy and this is likely to make a significant contribution to meeting the needs of the whole community.	++	++	++	Likelihood/certainty of effect occurring: Likely Geographical scale of effect: Rural areas Permanent: Permanent Assumptions made: Suitable, deliverable housing sites come forward within the plan period and principles enforced at planning application stage will implement policy intentions.
	6 Reduce number of journeys made by car	This will be managed by other policies in the Local Plan	i	i	i	Likelihood/certainty of effect occurring: Likely Geographical scale of effect: Rural areas Permanent: Permanent Assumptions made: Spatial strategy and the proposed development approach will help make sure aims and objectives of the Local Plan are met through an appropriate balance of development.

		Nature of Effect	ST	MT	LT	Justification for assessment
<p>Enhancement of local distinctiveness;</p> <p>Protection of the retail function in the heart of the town centres.</p>						
<p><b>Summary of significant effects of policy:</b>                      Policy SS10 Larger Villages Area Strategy identifies the larger villages and seeks to retain and enhance their role as rural service centres, providing for the bulk of the local housing needs of the rural areas and also for limited employment needs of a scale and type appropriate to each settlement having regard to local needs, infrastructure capacity and character. Policy intent is to increase the range of available and affordable house types, especially for first time buyers and families and this is likely to make a significant contribution to meeting housing needs. Further positive effects are likely to result from the intentions to enable small scale new employment development and improve the use of existing employment areas; retain and enhance the role of rural areas as rural service centres and to ensure that new development reflects and enhances each village's special character and heritage. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:</p> <p><b>Mitigation:</b> The policy should support environmental enhancements, including the improvement and creation of Local Green Spaces. It should refer to the District's GI Strategy and improving pedestrian and cycle links through the villages and to surrounding towns and villages and into the countryside, as well as to meeting the needs of older people, including with extra care housing. Policy could refer to taking opportunities to enhance the character and appearance of the landscape, including the historic landscape, paying particular attention to the edge of settlements.</p>						

Table 20.11 Assessment Table for Preferred Option Policy SS10 Larger Villages Area Strategy

Preferred Option Policy SS11 Smaller Villages Area Strategy

SA Framework		SS11 Smaller Villages Area Strategy				
Summary of Baseline Situation	SA Objective	Predicted Effects		Assumptions and mitigation		
		Nature of Effect	ST	MT	LT	Justification for assessment
<p><b>Social:</b></p> <p>Need to address:</p> <p>Implications of an increasingly ageing population;</p> <p>Meeting identified housing need, including the need for affordable homes and provision of an appropriate mix of house types and tenures;</p> <p>Reducing health inequalities;</p> <p>Opportunities to improve the health of older people through appropriate housing and access to community facilities and services;</p>	1	Policy seeks to protect and enable services and facilities which are essential to sustain rural living.	+	+	++	<p><b>Likelihood/certainty</b> of effect occurring: Likely</p> <p><b>Geographical scale</b> of effect: Smaller villages</p> <p><b>Temporary / Permanent:</b> Permanent</p> <p><b>Assumptions made:</b> Design principles enforced at planning application stage will implement policy intentions.</p> <p><b>Mitigation:</b> The policy should support environmental enhancements, including the improvement and creation of Local Green Spaces.</p>
	2	Smaller villages have a more limited role as service centres; the proposed strategy seeks to allow an appropriate level of sensitive development which enhances community vitality and this is likely to lead to positive effects.	+	+	+	<p><b>Likelihood/certainty</b> of effect occurring: Likely</p> <p><b>Geographical scale</b> of effect: Smaller villages</p> <p><b>Temporary / Permanent:</b> Permanent</p> <p><b>Assumptions made:</b> Principles enforced at planning application stage will implement policy intentions.</p>
	3	This will be managed by other policies in the Local Plan. Health maybe addressed by improving access to facilities in surrounding market towns and supporting measures that encourage walking and cycling.	0	0	0	<p><b>Likelihood/certainty</b> of effect occurring: Likely</p> <p><b>Geographical scale</b> of effect: Smaller villages</p> <p><b>Temporary / Permanent:</b> Permanent</p> <p><b>Assumptions made:</b> Appropriate proposals come forward in the plan period.</p> <p><b>Mitigation:</b> The policy should refer to the District's GI Strategy and improving pedestrian and cycle links through the villages and to surrounding towns and villages and into the countryside.</p>
	4	This will be managed through other policies in the Local Plan.	0	0	0	<p><b>Likelihood/certainty</b> of effect occurring: Likely</p> <p><b>Geographical scale</b> of effect: Smaller villages</p> <p><b>Temporary / Permanent:</b> Permanent</p> <p><b>Assumptions made:</b> Design principles enforced at planning application stage will implement policy intentions.</p>

SA Framework		SS11 Smaller Villages Area Strategy

		Nature of Effect	ST	MT	LT	Justification for assessment
<p><b>Summary of significant effects of policy:</b>                      Policy SS12 Other Rural Areas Strategy identifies the other rural areas as comprising the countryside and the green belt outside settlement boundaries and including those small settlements and dispersed developments not identified in policies SS10 and SS11. Policy intent is that these areas will provide only for development which has an essential need to be located in the countryside, supports rural diversification, contributes to sustainability of the rural areas, promotes sustainable tourism or enhances the countryside. Significant positive effects include enhancing and conserving the quality of the countryside, including recognising and conserving the special quality of the landscape in the Peak District National Park and limiting uses which generate a substantial number of regular trips in areas that are not well served by public transport - as this is likely to help to reduce the number of journeys made by car. Further positive effects are likely to result from encouraging measures which protect and enhance the biodiversity and geological resources, as well as the heritage of the district. Also, from measures to sustain the rural economy and enhance tourist opportunities. Whilst no significant negative effects were predicted, a policy improvement was identified as follows:</p> <p><b>Mitigation:</b> The policy should refer to the District's GI Strategy and improving pedestrian and cycle links, including into the countryside, as well as improving opportunities for related leisure activities such as horse riding.</p>

Measures to encourage people to shop in the area;	Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.					
Enhancement of local distinctiveness;						
Protection of the retail function in the heart of the town centres.						
<p><b>Summary of significant effects of policy:</b>                      Policy SS13 Churnet Valley Strategy manages development according to the aims of the strategy for the Churnet Valley and the Churnet Valley Masterplan SPD. Policy intent is enable the Churnet Valley to provide a strong focus for sustainable rural regeneration across the district and this may help to advance equality of opportunity as well as to enhance the vitality and viability of the area's towns and villages. Further positive effects for health and for reducing the need for car use are likely to result from the intentions to enhance and develop links to strategic footpaths, cycle and horse riding routes and to improve connectivity and accessibility to and within the Churnet Valley by all forms of sustainable transport. In addition support for measures to protect and enhance the biodiversity, landscape character and heritage assets of the valley are all likely to lead to additional positive effects. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:</p> <p><b>Mitigation:</b> The policy should refer to the District's GI Strategy and to meeting the needs of older people, including with extra care housing. The policy should seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy. The policy should also refer to taking opportunities to enhance the character and appearance of the landscape, including the historic landscape, paying particular attention to the quality of the urban / rural interface and to increasing tourist opportunities for visitors.</p>						

Table 20.14 Assessment Table for Preferred Option Policy SS13 Churnet Valley Strategy

Preferred Option Policy SS14 Northern Gateway Opportunity Site

Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation Justification for assessment
		Nature of Effect	ST	MT	
Safeguarding good quality employment sites from development for other uses;	Provision of relevant employment skills, training and support to help retain and develop a local workforce;				
Maintaining the vitality and viability of the towns and protection of the towns as service centres;					
Measures to encourage people to shop in the area;					
Enhancement of local distinctiveness;					
Protection of the retail function in the heart of the town centres.					

SA Framework		SS14 Northern Gateway Opportunity Site			
Summary of Baseline Situation	SA Objective	Predicted Effects		Assumptions and mitigation	
		Nature of Effect	ST	MT	LT
<p><b>Summary of significant effects of policy:</b>                      Policy SS14 Northern Gateway Opportunity Site supports the development of a Regional Investment Site for high quality employment development at this location and in line with the Northern Gateway. This is a large site (the northern area is approximately 19.28 ha and the southern area is approximately 29.3 ha) on the south-eastern outskirts of Blythe Bridge. The A50 runs through the middle of the site from the north-west to the south-east. The site as a whole is extensively surrounded by farm land to the east, south and west and by housing and built environment to the north. However, it is effectively isolated from the wider landscape because it is encircled by major roads (the A50 and A521) to the north and east, Cresswell Lane to the south and the Crewe to Derby railway line to the west. The river Blithe runs adjacent to the railway line further to the west. The majority of the site consists of uniform, improved grassland used for pasture. This habitat is common and widespread both locally and throughout the UK. Policy intent is to deliver high quality employment development and this is likely to encourage investment in businesses, people and infrastructure leading to a strengthened and more diversified economy, and facilitating the delivery of new employment opportunities. Further positive effects for minimising disadvantages are likely as a result of the site serving a regional need for employment and potentially other community requirements as this may help to advance equality of opportunity and address community need. However potentially significant negative effects on climate change were predicted as the proposal could significantly increase the need to travel by less sustainable forms of transport, increasing road traffic and congestion. Also the site is partially located within a mineral consultation area - bedrock sand. A number of policy improvements were identified as follows:</p> <p><b>Mitigation:</b> The policy should require measures to improve connectivity and accessibility to the site by sustainable transport means having regard to the GI strategy. The policy should also seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy and should support measures to enhance, protect and interpret landscape character. In addition, appropriate consultation will need take place to ensure sand resources are safeguarded from unnecessary sterilisation by non-mineral development.</p>

		Nature of Effect	ST	MT	LT	Justification for assessment
<p>Enhancement of local distinctiveness;</p> <p>Protection of the retail function in the heart of the town centres.</p>						
<p><b>Summary of significant effects of policy:</b>                      Policy SS15 Planning Obligations and Community Infrastructure Levy provides clarity regarding the Council's approach to developer contributions. The policy could enable the provision of new, or the significant enhancement of existing, community facilities and services and this is likely to make a positive contribution towards community cohesion and the quality of where people work and live. Further positive effects on health and the supply of new homes to meet need were identified, as developer contributions may help to ensure the delivery of an appropriate quantity and quality of open space, sport and recreation facilities and an increase in the supply of affordable homes. No policy improvements were identified.</p>						

**Table 20.16 Assessment Table for Preferred Option Policy SS15 Planning Obligations and Community Infrastructure Levy**

## **20.2 Development Management Policies**

## 20.2.1 Sustainable Development

### Preferred Option Policy SD1 Sustainable Use of Resources

SA Framework		Preferred Option Policy: SD1 Sustainable Use of Resources				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
<p><b>Social:</b></p> <p>Need to address:</p> <p>Implications of an increasingly ageing population;</p> <p>Meeting identified housing need, including the need for affordable homes and provision of an appropriate mix of house types and tenures;</p> <p>Reducing health inequalities;</p> <p>Opportunities to improve the health of older people through appropriate</p>	1	Community cohesion and neighbourhood quality	0	+	++	Likelihood/certainty of effect occurring: Likely Geographical scale of effect: Local Plan area Temporary / Permanent: Permanent Assumptions made: Design principles enforced at planning application stage will implement policy intentions.
	2	Improving access to jobs, services and facilities	+	+	++	Likelihood/certainty of effect occurring: Likely Geographical scale of effect: Local Plan area Temporary / Permanent: Permanent Assumptions made: Principles enforced at planning application stage will implement policy intentions.
	3	Improve health and reduce health inequalities	0	0	0	Likelihood/certainty of effect occurring: Uncertain Geographical scale of effect: Local Plan area Temporary / Permanent: Permanent Assumptions made: Any impacts on health will be managed through the planning application process and using other policies in this Local Plan.
	4	Minimise opportunities for crime and reduce fear of crime	0	0	0	Likelihood/certainty of effect occurring: Likely Geographical scale of effect: Local Plan area Temporary / Permanent: Permanent Assumptions made: Any impacts on crime will be managed through the planning application process and using other policies in this Local Plan.
	5		0	0	0	Likelihood/certainty of effect occurring: Likely Geographical scale of effect: Local Plan area Temporary / Permanent: Permanent Assumptions made: Any impacts

SA Framework		Preferred Option Policy: SD1 Sustainable Use of Resources

Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
<p><b>Economic</b></p> <p>Need to address</p> <p>Meeting local employment needs to achieve self-sufficient communities;</p> <p>Initiatives to encourage further employment development and retention / expansion of existing businesses;</p> <p>Diversification of the economic base to improve employment opportunities;</p> <p>Safeguarding good quality employment sites from development for other uses;</p> <p>Provision of relevant employment skills, training and support to help</p>	16	Policy gives encouragement to development on previously developed land in sustainable locations and this could lead to enhancing the vitality and viability of the District's towns and villages.	+	+	++	Likelihood/certainty of effect occurring: Likely <b>Geographical scale of effect:</b> Local Plan area <b>Temporary / Permanent Assumptions made:</b> Principles enforced at planning application stage will implement policy intentions.
	17	Sustainable economic growth and diversification of the economy	0	0	0	Likelihood/certainty of effect occurring: Likely <b>Geographical scale of effect:</b> Local Plan area <b>Temporary / Permanent Assumptions made:</b> Any impacts on economic growth will be managed through the planning application process and using other policies in this Local Plan.
	18	High and stable level of employment	0	0	0	Likelihood/certainty of effect occurring: Uncertain <b>Geographical scale of effect:</b> Local Plan area <b>Temporary / Permanent Assumptions made:</b> Any impacts on economic growth will be managed through the planning application process and using other policies in this Local Plan.

SA Framework		Preferred Option Policy: SD1 Sustainable Use of Resources				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
<p>retain and develop a local workforce;</p> <p>Maintaining the vitality and viability of the towns and protection of the towns as service centres;</p> <p>Measures to encourage people to shop in the area;</p> <p>Enhancement of local distinctiveness;</p> <p>Protection of the retail function in the heart of the town centres.</p>						
<p><b>Summary of significant effects of policy:</b>                      Policy SD1 Sustainable Use of Resources sets out a range of measures in relation to the sustainable use of resources and measures to address climate change. These include encouragement to be given to development on previously developed land and a requirement for major developments to demonstrate consideration given to energy efficiency, water conservation, sourcing of construction materials, site orientation and integration of micro-renewables. Significant positive effects on minimising contributions to climate change are predicted to arise from the policy requirement that all development should adapt to climate change and encouragement for the re-use of construction or construction waste materials. Further positive effects are likely to result from the support for development that is located to minimise energy needs as this is likely to result in the location of development in proximity to existing services and facilities.                      Whilst no significant negative effects were predicted, a policy improvement was identified as follows:</p>						

SA Framework		Preferred Option Policy: SD1 Sustainable Use of Resources			
Summary of Baseline Situation	SA Objective	Predicted Effects		Assumptions and mitigation	
	Nature of Effect	ST	MT	LT	Justification for assessment
<p><b>Mitigation:</b> Policy should clarify that any remediation of brownfield land should pay particular attention to the need to identify, conserve and enhance biodiversity resources.</p>

Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
<b>Economic</b> Need to address Meeting local employment needs to achieve self-sufficient communities; Initiatives to encourage further employment development and retention / expansion of existing businesses; Diversification of the economic base to improve employment opportunities; Safeguarding good quality employment sites from development for other uses;	Encourage sustainable tourism, cultural heritage and local distinctiveness					tourism and the cultural economy will be managed through the planning application process and using other policies in this Local Plan.
	16 Safeguard vitality of towns and sustain vibrant rural economy	This objective will be addressed by other policies in the Local Plan.	0	0	0	<b>Likelihood/certainty of effect occurring: Likely Geographical scale of effect: Local Plan area Temporary / Permanent Permanent Assumptions made:</b> Any impacts on the vitality and viability of towns and villages will be managed through the planning application process and using other policies in this Local Plan.
	17 Sustainable economic growth and diversification of the economy	This will be addressed through other policies in the Local Plan.	0	0	0	<b>Likelihood/certainty of effect occurring: Likely Geographical scale of effect: Local Plan area Temporary / Permanent Permanent Assumptions made:</b> Any impacts on economic growth will be managed through the planning application process and using other policies in this Local Plan.
18 High and stable level of employment	This will be addressed through other policies in the Local Plan.	0	0	0	<b>Likelihood/certainty of effect occurring: Uncertain Geographical scale of effect: Local Plan area Temporary / Permanent Permanent Assumptions made:</b> Any impacts on economic growth will be managed through the planning application process and using other policies in this Local Plan.	

SA Framework		Preferred Option Policy: SD3 Sustainability Measures in Development				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
<p>Provision of relevant employment skills, training and support to help retain and develop a local workforce;</p> <p>Maintaining the vitality and viability of the towns and protection of the towns as service centres;</p> <p>Measures to encourage people to shop in the area;</p> <p>Enhancement of local distinctiveness;</p> <p>Protection of the retail function in the heart of the town centres.</p>						
<p><b>Summary of significant effects of policy:</b>  <b>Policy SD3 Sustainability Measures in Development</b> supports a number of measures which can improve the sustainability of new or existing development, including exceeding thermal efficiency or water conservation standards, contributing to District Heating networks or the installation of micro-renewables. Significant positive effects on minimising contributions to climate change are predicted to arise from the policy intent to support further carbon- or water-saving measures. No significant negative effects were predicted however a policy improvement was identified as follows:</p>						

SA Framework		Preferred Option Policy: SD3 Sustainability Measures in Development			
Summary of Baseline Situation	SA Objective	Predicted Effects		Assumptions and mitigation	
	Nature of Effect	ST	MT	LT	Justification for assessment
<p><b>Mitigation:</b> All new residential and commercial development where car parking / garaging is proposed should be required to install a facility to permit the recharge of an electrical battery-powered vehicle.</p>

	14 Protect and enhance character / appearance of landscape including historic landscape and other natural assets	This objective will be addressed by other policies in the Local Plan. In exceptional circumstances developments outside the settlement boundary may be supported where a rural location can be justified.	0	0	0	<b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale of effect:</b> Local Plan area <b>Temporary / Permanent Assumptions made:</b> Any impacts on landscape character and natural assets will be managed through the planning application process and using other policies in this Local Plan.
	15 Encourage sustainable tourism, cultural heritage and local distinctiveness	This objective will be addressed by other policies in the Local Plan.	0	0	0	<b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale of effect:</b> Local Plan area <b>Temporary / Permanent Assumptions made:</b> Any impacts on sustainable tourism and the cultural economy will be managed through the planning application process and using other policies in this Local Plan.
<b>Economic</b> Need to address	16 Safeguard vitality of towns and sustain vibrant rural economy	Policy will help ensure that there is a choice of sustainably located employment sites and this is likely to lead to significant enhancement of the vitality and viability of the District's towns	++	++	++	<b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale of effect:</b> Local Plan area <b>Temporary / Permanent Assumptions made:</b> Principles enforced at planning application stage will implement policy intentions.

SA Framework		Preferred Option Policy: E1 New Employment Development				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
Meeting local employment needs to achieve self-sufficient communities;  Initiatives to encourage further employment development and retention / expansion of existing businesses;  Diversification of the economic base to improve employment opportunities;	17  Sustainable economic growth and diversification of the economy	and villages, contributing to the safeguarding and improvement of shops and services.  Policy supports proposals that help to maintain or enhance an appropriate range of employment premises and sites across the District and this is likely to encourage investment leading to a strengthened and more diversified economy.	++	++	++	<b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent</b> : Permanent <b>Assumptions made</b> : Principles enforced at planning application stage will implement policy intentions.
	18  High and stable level of employment	Policy proposes local labour agreements where appropriate to contribute towards training programmes and employment support and access schemes and this is likely to contribute to meeting the employment needs of local people.	+	++	++	<b>Likelihood/certainty</b> of effect occurring: Uncertain <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent</b> : Permanent <b>Assumptions made</b> : Principles enforced at planning application stage will implement policy intentions.
Safeguarding good quality employment sites from development for other uses;  Provision of relevant employment skills, training and support to help retain and develop a local workforce;						

SA Framework		Preferred Option Policy: E1 New Employment Development				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
<p>Maintaining the vitality and viability of the towns and protection of the towns as service centres;</p> <p>Measures to encourage people to shop in the area;</p> <p>Enhancement of local distinctiveness;</p> <p>Protection of the retail function in the heart of the town centres.</p>						
<p><b>Summary of significant effects of policy:</b>  <b>Policy E1 New Employment Development</b> will ensure that there is a choice of sustainably located employment sites, attractive to developers and operators and appropriate to market needs. In order to ensure that the local workforce and businesses benefit from new development, the policy also proposes local labour agreements where appropriate to contribute towards training programmes and employment support and access schemes. Significant positive effects on advancing equality of opportunity; safeguarding the vitality of towns and sustaining a vibrant rural economy are predicted to result. Further positive effects on sustainable economic growth, diversification of the economy and high and stable level of employment were identified. There is potential for negative effects on contribution to climate change arising from policy support for new business developments, as this is likely to result in greater energy use.</p>						

**Table 20.22 Assessment Table for Preferred Option Policy E1 New Employment Development**

## Preferred Option Policy E2 Employment Allocations

SA Framework		Preferred Option Policy: E2 Employment Allocations				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
<b>Social:</b> Need to address: Implications of an increasingly ageing population; Meeting identified housing need, including the need for affordable homes and provision of an appropriate mix of house types and tenures; Reducing health inequalities; Opportunities to improve the health of older people through appropriate housing and access to community facilities and services;	1 Community cohesion and neighbourhood quality	This objective will be addressed by other policies in the Local Plan.	0	0	0	<b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent:</b> Permanent <b>Assumptions made:</b> Any impacts on community cohesion will be managed through the planning application process and using other policies in this Local Plan.
	2 Improving access to jobs, services and facilities	Policy intent is to help maintain or enhance an appropriate range of employment premises and sites across the District in terms of scale, location and type and this is likely to lead to significant positive effects on advancing equality of opportunity.	+	+	++	<b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent:</b> Permanent <b>Assumptions made:</b> Principles enforced at planning application stage will implement policy intentions.
	3 Improve health and reduce health inequalities	This objective will be addressed by other policies in the Local Plan.	0	0	0	<b>Likelihood/certainty</b> of effect occurring: Uncertain <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent:</b> Permanent <b>Assumptions made:</b> Any impacts on health will be managed through the planning application process and using other policies in this Local Plan.
	4 Minimise opportunities for crime and reduce fear of crime	This objective will be addressed by other policies in the Local Plan.	0	0	0	<b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent:</b> Permanent <b>Assumptions made:</b> Any impacts on crime will be managed through the planning application process and using other policies in this Local Plan.
	5 Ensure supply new homes to meet local needs including affordable / social / extra care	This objective will be addressed by other policies in the Local Plan.	0	0	0	<b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent:</b> Permanent <b>Assumptions made:</b> Any impacts on meeting housing needs will be managed through the planning application process and using other policies in this Local Plan.

SA Framework		Preferred Option Policy: E2 Employment Allocations				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
Quantity, quality and accessibility of sports and recreation facilities, including open space; Any shortfall in school places; Creation of accessible and safe public and private environments; Modal shift away from journeys by car; Measures that reduce the need to travel; Accessibility for those without a car is maintained and improved.	6 Reduce number of journeys made by car	Policy intent is to help ensure that there is a choice of sustainably located employment sites and this is likely to help reduce the number of journeys made by car.	+	+	++	<b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent</b> : Permanent <b>Assumptions made</b> : Principles enforced at planning application stage will implement policy intentions.
<b>Environmental</b> Need to address:	7 Minimise contributions to climate change, consider climate change adaptation	This policy supports new business developments which is likely to result in greater energy use.	-	-	-	<b>Likelihood/certainty</b> of effect occurring: Uncertain <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent</b> : Permanent <b>Assumptions made</b> : Any impacts on climate change will be managed through the planning application process and using other policies in this Local Plan.

SA Framework		Preferred Option Policy: E2 Employment Allocations				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
Climate change as a key sustainability issue; Use of areas in flood zone 1 and away from sources of risk; Support for the re-use of construction or construction waste materials; Retention of the distinctive character of the landscape with any change managed positively; Requirement to carry out an Appropriate Assessment of land use plans affecting Natura 2000 sites (HRA); Scope for protecting and enhancing	8 Improve air quality	Policy supports business developments on existing sites and on the edge of town centres. Impact uncertain but this objective will be addressed by other policies in the Local Plan.	i/-	i/-	i/-	<b>Likelihood/certainty</b> of effect occurring: Uncertain <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent: Permanent Assumptions made:</b> No Air Quality Management Areas have been declared in the district. Any impacts on air quality will be managed through the planning application process and using other policies in this Local Plan.
	9 Reduce flood risk, protect and enhance water sources	All new development will address flood risk mitigation / adaptation.	i	i	i	<b>Likelihood/certainty</b> of effect occurring: Uncertain <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent: Permanent Assumptions made:</b> The impact of new development on flood risk will be managed through the planning application process and using other policies in this Local Plan.
	10 Conserve and enhance biodiversity	This objective will be addressed by other policies in the Local Plan.	0	0	0	<b>Likelihood/certainty</b> of effect occurring: Uncertain <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent: Permanent Assumptions made:</b> Any impacts on biodiversity will be managed through the planning application process and using other policies in this Local Plan.
	11 Safeguard geological resources including the best and most versatile agricultural land	This objective will be addressed by other policies in the Local Plan.	0	0	0	<b>Likelihood/certainty</b> of effect occurring: Uncertain <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent: Permanent Assumptions made:</b> Any impacts on geological resources will be managed through the planning application process and using other policies in this Local Plan.
	12 Minimise the use of non-renewable resources	This objective will be addressed by other policies in the Local Plan.	0	0	0	<b>Likelihood/certainty</b> of effect occurring: Uncertain <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent: Permanent Assumptions made:</b> Any impacts on non-renewable resources will be managed through the planning application process and using other policies in this Local Plan.

Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
support to help retain and develop a local workforce;	Maintaining the vitality and viability of the towns and protection of the towns as service centres;					
Measures to encourage people to shop in the area;						
Enhancement of local distinctiveness;						
Protection of the retail function in the heart of the town centres.						
<p><b>Summary of significant effects of policy:</b>  <b>Policy E4 Tourism and Cultural Development</b> supports the development of the tourist industry with new development proposals to be assessed according to the extent to which they support the local economy and promote the distinctive character and quality of the District. Significant positive effects on encouraging sustainable tourism, cultural heritage and local distinctiveness are likely to result from this. Further positive effects on reducing the number of journeys made by car and advancing equality of opportunity, sustainable economic growth, diversification of the economy, high and stable level of employment and safeguarding the vitality of towns were identified. There is potential for negative effects on contribution to climate change arising from new development, as this is likely to result in greater energy use.</p>

<p>Maintaining the vitality and viability of the towns and protection of the towns as service centres;</p> <p>Measures to encourage people to shop in the area;</p> <p>Enhancement of local distinctiveness</p> <p>Protection of the retail function in the heart of the town centres.</p>					
<p><b>Summary of significant effects of policy:</b>  <b>Policy H2 Housing Allocations</b> identifies sites as suitable for housing development in order to meet the housing target set out in Policy SS3. Significant positive effects on ensuring the supply of new homes to meet local needs are likely to result from site allocations. Further positive effects on enhancing the vitality and viability of the District's towns and villages and supporting stable levels of employment were also identified. Further detail relating to any predicted impacts on biodiversity, landscape or townscape character is provided in the specific sites appraisals. There is potential for negative effects on contribution to climate change arising from supply of land for new development, as this is likely to result in greater energy use. No mitigation measures were identified.</p>

<p>Maintaining the vitality and viability of the towns and protection of the towns as service centres;</p> <p>Measures to encourage people to shop in the area;</p> <p>Enhancement of local distinctiveness;</p> <p>Protection of the retail function in the heart of the town centres.</p>					
<p><b>Summary of significant effects of policy:</b>  <b>Policy H4 Rural Housing</b> recognises that the re-use of rural buildings for commercial purposes is preferable to that of residential uses and establishes criteria for re-use, the policy also recognises the need to safeguard rural buildings considered to be of particular merit in terms of their contribution to local character or heritage and the need to deliver affordable homes. Positive effects on ensuring the supply of new homes to meet local needs are likely to result from provision of affordable housing, provision of rural housing is also likely to benefit the development of sustainable communities and community cohesion. Further positive effects on helping sustain the rural economy were identified from helping to meet rural housing need. There is potential for negative effects on contribution to climate change arising from new development, as this is likely to result in greater energy use; and from a likely increased use of private transport. Policy improvements were identified as follows:</p> <p><b>Mitigation:</b> Policy should require housing to remain affordable for successive occupiers in perpetuity and include a requirement for sites to be adequately served by existing services and facilities.</p>

Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
Maintaining the vitality and viability of the towns and protection of the towns as service centres;	Measures to encourage people to shop in the area;					
Enhancement of local distinctiveness;						
Protection of the retail function in the heart of the town centres.						
<p><b>Summary of significant effects of policy:</b>  <b>Policy H5 Gypsy and Traveller Sites and Sites for Travelling Showpeople</b> sets out the criteria for determination of applications for gypsy and traveller sites or for making future site allocations. Significant positive effects on meeting identified housing need is likely to result from the policy intent to meet the needs of the gypsy, traveller and travelling show people community. Access to accommodation and local services and facilities is likely to lead to further positive impacts on health and well-being for gypsies and travellers and establishing the considerations that will be taken into account for determining applications or future allocations is likely to lead to positive effects on helping ensure community safety and local environmental quality.</p>

Meeting local employment needs to achieve self-sufficient communities; Initiatives to encourage further employment development and retention / expansion of existing businesses; Diversification of the economic base to improve employment opportunities; Safeguarding good quality employment sites from development for other uses; Provision of relevant employment skills, training and support to help retain and develop a local workforce;	17 Sustainable economic growth and diversification of the economy	Policy supports development in the town centres and this is likely to lead to significant positive effects.	+	++	++	Likelihood/certainty of effect occurring: Likely Geographical scale of effect: Local Plan area Temporary / Permanent: <b>Assumptions made:</b> Principles enforced at planning application stage will deliver policy objectives.
	18 High and stable level of employment	Policy supports development in the town centres and this is likely to lead to significant positive effects.	+	+	++	Likelihood/certainty of effect occurring: Likely Geographical scale of effect: Local Plan area Temporary / Permanent: <b>Assumptions made:</b> Principles enforced at planning application stage will deliver policy objectives.

SA Framework		TCR1 Development in the Town Centres				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
<p>Maintaining the vitality and viability of the towns and protection of the towns as service centres;</p> <p>Measures to encourage people to shop in the area;</p> <p>Enhancement of local distinctiveness;</p> <p>Protection of the retail function in the heart of the town centres.</p>						
<p><b>Summary of significant effects of policy:</b>  <b>Policy TCR1 Development in the Town Centres</b> seeks to maintain the vitality and viability of town centres by supporting measures that lead to the enhancement and regeneration of the shopping and town centre environment, promoting their tourism potential and maintaining local distinctiveness by supporting proposals that help to retain and attract independent retailers. Significant positive effects were predicted for Improving access to jobs, services and facilities. Further positive effects were identified for maintaining the vitality and viability of the towns, protecting the towns as service centres, promoting sustainable economic growth and diversification of the economy and on supporting high and stable levels of employment.</p> <p><b>Mitigation:</b> Whilst no significant negative effects were predicted, the appraisal notes that the Policy might be improved by including a reference to helping strengthen links between rural areas and towns, including by sustainable forms of transport, in order to help sustain a vibrant rural economy also. The policy should encourage proposals that deliver high quality public spaces and require active ground floor frontages to be maintained and created within town centres with appropriate town centre uses.</p>

Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.					
<p><b>Summary of significant effects of policy:</b>  <b>Policy TCR3 Retailing and other Town Centre uses outside Town Centres</b> provides support for local shopping facilities. Significant positive effects were predicted for maintaining the vitality and viability of smaller, local centres, promoting sustainable economic growth and supporting high and stable levels of employment. Further positive effects were identified for improving access to jobs, services and facilities (including by non-car journeys) and tourism, as appropriate support for retailing and other town centre uses outside town centres is likely to result in support for the visitor economy. No significant negative effects were predicted although it is likely that new development will result in increased energy use and greenhouse gas emissions.</p>

SA Framework		DC1 Design Considerations				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
Safeguarding good quality employment sites from development for other uses;						
Provision of relevant employment skills, training and support to help retain and develop a local workforce;						
Maintaining the vitality and viability of the towns and protection of the towns as service centres;						
Measures to encourage people to shop in the area;						
Enhancement of local distinctiveness;						
Protection of the retail function in the heart of the town centres.						

SA Framework		DC1 Design Considerations			
Summary of Baseline Situation	SA Objective	Predicted Effects		Assumptions and mitigation	
		Nature of Effect	ST	MT	LT
<p><b>Summary of significant effects of policy:</b>  <b>Policy DC1 Design Considerations</b> includes measures to promote locally distinctive, creative and sensitive design solutions to delivering new development, including incorporating sustainable construction techniques and design concepts to reduce the impact of development. Significant positive effects include the likelihood of improvements to the social and environmental quality of neighbourhoods and positive impacts on health and well-being. The policy seeks to promote the maintenance, enhancement, restoration and re-creation of biodiversity and geological heritage where appropriate and this could make a significant contribution to the protection of natural assets, although the significance of effect is dependent on implementation of the policy. Further positive effects are likely to result from the policy intent to deliver well designed development and high quality built environment and public realm as this is likely to lead to investment in business, people and infrastructure, resulting in a strengthened and more diversified economy, more vibrant town and village centres and sustained levels of employment. Whilst no significant negative effects were predicted, a number of policy improvements were identified as follows:</p> <p><b>Mitigation:</b> Policy should include a requirement for developments to be well integrated for car, pedestrian and cycle use as well as other sustainable transport links. It should also seek to mitigate the impacts of climate change through supporting delivery of renewable and low carbon forms of energy and include a requirement for the creation of healthy environments (to address potential impacts of air pollution). The Policy should require development that secures the effective use of resources, including making best use of existing buildings, and that retains the distinctive character of the landscape (including historic landscape) with any change managed positively.</p>

Meeting local employment needs to achieve self-sufficient communities; Initiatives to encourage further employment and retention / expansion of existing businesses; Diversification of the economic base to improve employment opportunities; Safeguarding good quality employment sites from development for other uses; Provision of relevant employment skills, training and support to help retain and develop a local workforce;	17 Sustainable economic growth and diversification of the economy	Overall the effect has been assessed as neutral.	0	0	0	Likelihood/certainty of effect occurring: Likely Geographical scale of effect: Local Plan area Temporary / Permanent: Permanent Assumptions made: Any impacts on the local economy will be managed through the planning application process and using other policies in this Local Plan.
	18 High and stable level of employment	Overall the effect has been assessed as neutral.	0	0	0	Likelihood/certainty of effect occurring: Uncertain Geographical scale of effect: Local Plan area Temporary / Permanent: Permanent Assumptions made: Any impacts on local employment will be managed through the planning application process and using other policies in this Local Plan.

SA Framework		C1 Creating Sustainable Communities				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
Maintaining the vitality and viability of the towns and protection of the towns as service centres;						
Measures to encourage people to shop in the area;						
Enhancement of local distinctiveness;						
Protection of the retail function in the heart of the town centres.						
<p><b>Summary of significant effects of policy:</b>  <b>Policy C1 Creating Sustainable Communities</b> supports proposals which protect, retain or enhance existing community facilities in towns and villages and includes measures to resist proposals that involve the loss of local facilities. There is a requirement to incorporate the infrastructure required as a result of any scheme or to make provision for financial contributions. Significant positive effects for community cohesion, neighbourhood quality and access to services are anticipated from the policy intent to ensure that new development contributes to the creation of safe, livable and mixed communities with good access to jobs and key services including recreation facilities. Further positive effects are likely to arise from new community facilities, particularly in smaller villages and other rural areas contributing to the viability of communities. Creation of sustainable communities is likely to lead to improvements in health and well-being in the long term. No significant negative effects were predicted however a policy improvement was identified as follows.</p> <p><b>Mitigation:</b> Policy should clarify that community infrastructure includes health services.</p>

SA Framework		C2 Sport, Recreation and Open Space				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
Maintaining the vitality and viability of the towns and protection of the towns as service centres;	Measures to encourage people to shop in the area;	Enhancement of local distinctiveness;	Protection of the retail function in the heart of the town centres.			
<p><b>Summary of significant effects of policy:</b>  <b>Policy C2 Sport, Recreation and Open Space</b> provides continued protection from development for existing areas identified for recreational land and buildings including school playing fields and amenity space and supports the provision of new sport, recreation and open space facilities consistent with guidance in the Council's SPD. Significant positive effects for health and well-being and creating and maintaining high quality local neighbourhoods are anticipated and this is also likely to lead to positive effects on townscape quality, helping to maintain the visitor economy. Further positive effects are likely to arise from new recreation facilities, particularly in smaller villages and other rural areas contributing to the viability of communities. Provision of new facilities is also likely to have positive effects on improving access to services in the long term. No significant negative effects were predicted however a policy improvement was identified as follows:</p>		<p><b>Mitigation:</b> Policy should require new sport, recreation and open space facilities to be accessible by a choice of means of transport.</p>

<p>support to help retain and develop a local workforce;</p> <p>Maintaining the vitality and viability of the towns and protection of the towns as service centres;</p> <p>Measures to encourage people to shop in the area;</p> <p>Enhancement of local distinctiveness;</p> <p>Protection of the retail function in the heart of the town centres.</p>						
<p><b>Summary of significant effects of policy:</b>  <b>Policy C3 Green Infrastructure</b> is supported by a Green Infrastructure strategy and recognises that the District's wide range of existing and potential green infrastructure assets will benefit from a strategic approach ensuring that adequate protection is given to key features; areas are identified where new linkages and assets need to be created and guidance and management is provided for development that may impact on such areas. Significant positive effects on a wide range of SA objectives were identified, including for health and well-being; creating and maintaining high quality local neighbourhoods and improving connectivity to a range of facilities via helping to establish or improve green travel links. Further positive effects on biodiversity and geodiversity are likely to arise from support for the creation of new wildlife habitats; enhancement of existing sites and creating links between them. Use of green infrastructure for effective flood risk and waterways management is likely to result in positive effects on water quality and climate change adaptation. Development of a high quality and multi-functional GI network that attracts visitors and provides recreation opportunities is also likely to have positive effects on sustainable economic growth and diversification of the economy. No significant negative effects were predicted however policy improvements were identified as follows:</p>						

SA Framework		C3 Green Infrastructure				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
<p><b>Mitigation:</b> Policy should require support for improving green travel links to existing and new services and facilities, as well as formal and informal recreation opportunities, and should refer to support for the development of ecological networks in line with the GI strategy. The Policy should also explicitly include geodiversity as a green infrastructure asset.</p>

<p>Initiatives to encourage further employment development and retention / expansion of existing businesses;</p> <p>Diversification of the economic base to improve employment opportunities;</p> <p>Safeguarding good quality employment sites from development for other uses;</p> <p>Provision of relevant employment skills, training and support to help retain and develop a local workforce;</p> <p>Maintaining the vitality and viability of the towns and protection of the towns as service centres;</p>	<p>Sustainable economic growth and diversification of the economy</p> <p>18</p> <p>High and stable level of employment</p>	<p>Overall the effect has been assessed as neutral.</p>	0	0	0	<p><b>Likelihood/certainty</b> of effect occurring: Uncertain</p> <p><b>Geographical scale</b> of effect: Local Plan area</p> <p><b>Temporary / Permanent Assumptions made:</b> Protection of biodiversity will help support the tourism industry.</p>

SA Framework		NE1 Biodiversity and Geological Resources				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
Measures to encourage people to shop in the area;	Enhancement of local distinctiveness;	Protection of the retail function in the heart of the town centres.				
<p><b>Summary of significant effects of policy:</b>  <b>Policy NE1 Biodiversity and Geological Resources</b> establishes a range of measures to protect and enhance biodiversity and geological resources. Significant positive effects on a wide range of SA objectives were identified, including for health and well-being; creating and maintaining high quality local neighbourhoods and biodiversity and geodiversity. Further positive effects are likely to arise from the contribution of habitat protection to effective flood risk and waterways management and climate change adaptation. No significant negative effects were predicted however policy improvements were identified as follows:</p> <p><b>Mitigation:</b> Because of their importance to the landscape of the Staffordshire Moorlands, the plan should include a specific policy to protect trees, woodlands and hedgerows from loss or deterioration, to ensure the protection of these natural assets outside designated sites. The Biodiversity Opportunity Map should be published alongside the plan.</p>

Measures to encourage people to shop in the area;	Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.					
Enhancement of local distinctiveness;						
Protection of the retail function in the heart of the town centres.						
<p><b>Summary of significant effects of policy:</b>  <b>Policy T2 Other Sustainable Transport Measures</b> supports measures which promote better accessibility, creates safer roads, reduces the impact of traffic or facilitates highway improvements. Significant positive effects on a wide range of SA objectives were identified, including for health and well-being; creating and maintaining high quality local neighbourhoods; reducing the need to travel by car and increasing access to a range of services and facilities. Further positive effects are likely to arise from seeking improvements to the existing road, bus and rail networks generally, including in relation to air quality, help to support healthy, inclusive and sustainable communities and supporting the visitor economy. No significant negative effects were predicted.</p>						

**Table 20.44 Assessment Table for Preferred Option Policy T2 Other Sustainable Transport Measures**

### **20.3 New policy proposed for July 2017**

**20.3** Following the findings of the SA of preferred option policies undertaken between December 2016 and February 2017, Policy NE2 Trees, Woodlands and Hedgerows was included in the Preferred Options Local Plan July 2017. The policy was appraised in January 2018 as part of the preparation of the Submission version Local Plan. The appraisal is set out below.

Preferred Option Policy NE2 Trees, Woodland and Hedgerows

SA Framework		NE2 Trees, Woodland and Hedgerows					
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation		
		Nature of Effect	ST	MT	LT	Justification for assessment	
<p><b>Social:</b></p> <p>Need to address:</p> <p>Implications of an increasingly ageing population;</p> <p>Meeting identified housing need, including the need for affordable homes and provision of an appropriate mix of house types and tenures;</p> <p>Reducing health inequalities;</p> <p>Opportunities to improve the health of older people through appropriate housing and access to community facilities and services;</p>	1	Community cohesion and neighbourhood quality	Policy will support protection of trees, woodland and hedgerows and this is likely to make a positive contribution towards creating and maintaining high quality local neighbourhoods and supporting community cohesion through enhancing the setting of neighbourhoods.	+	+	++	Likelihood/certainty of effect occurring: Likely <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent Assumptions made:</b> Principles enforced at planning application stage will implement policy intentions.
	2	Improving access to jobs, services and facilities	This SA Objective will be addressed through other policies in the Local Plan.	0	0	0	Likelihood/certainty of effect occurring: Likely <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent Assumptions made:</b> Any impacts on access will be managed through the planning application process and using other policies in this Local Plan.
	3	Improve health and reduce health inequalities	Supporting opportunities to retain existing woodlands and hedgerows is likely to contribute to well-being in the long term.	0	0	+	Likelihood/certainty of effect occurring: Likely <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent Assumptions made:</b> Principles enforced at planning application stage will implement policy intentions.
	4	Minimise opportunities for crime and reduce fear of crime	This SA Objective will be addressed through other policies in the Local Plan.	0	0	0	Likelihood/certainty of effect occurring: Likely <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent Assumptions made:</b> Any impacts on crime will be managed through the planning application process and using other policies in this Local Plan.
	5	Ensure supply new homes to meet local needs including affordable / social / extra care	This SA Objective will be addressed through other policies in the Local Plan.	0	0	0	Likelihood/certainty of effect occurring: Likely <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent Assumptions made:</b> Any impacts on housing supply will be managed through the planning application process and using other policies in this Local Plan.

SA Framework		NE2 Trees, Woodland and Hedgerows				
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation	
		Nature of Effect	ST	MT	LT	Justification for assessment
Quantity, quality and accessibility of sports and recreation facilities, including open space;	6 Reduce number of journeys made by car	This SA Objective will be addressed through other policies in the Local Plan.	0	0	0	<b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent</b> : Permanent <b>Assumptions made</b> : Any impacts on modes of transport will be managed through the planning application process and using other policies in this Local Plan.
Any shortfall in school places;						
Creation of accessible and safe public and private environments;						
Modal shift away from journeys by car;						
Measures that reduce the need to travel;						
Accessibility for those without a car is maintained and improved.						
<b>Environmental</b> Need to address:	7 Minimise contributions to climate change, consider climate change adaptation	Retention of trees and increasing planting can make a positive contribution to climate change adaptation.	+	+	++	<b>Likelihood/certainty</b> of effect occurring: Likely <b>Geographical scale</b> of effect: Local Plan area <b>Temporary / Permanent</b> : Permanent <b>Assumptions made</b> : Principles enforced at planning application stage will implement policy intentions.

SA Framework		NE2 Trees, Woodland and Hedgerows					
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation		
		Nature of Effect	ST	MT	LT	Justification for assessment	
<p>Climate change as a key sustainability issue;</p> <p>Use of areas in flood zone 1 and away from sources of risk;</p> <p>Support for the re-use of construction or construction waste materials;</p> <p>Retention of the distinctive character of the landscape with any change managed positively;</p> <p>Requirement to carry out an Appropriate Assessment of land use plans affecting Natura 2000 sites (HRA);</p> <p>Scope for protecting and enhancing habitats of importance for nature</p>	8	Improve air quality	Protecting trees and woodland is likely to lead to positive impacts on air quality.	+	+	+	Likelihood/certainty of effect occurring: Uncertain Geographical scale of effect: Local Plan area <b>Temporary / Permanent: Permanent Assumptions made:</b> No Air Quality Management Areas have been declared in the district.
	9	Reduce flood risk, protect and enhance water sources	Protecting trees and woodland is likely to lead to positive impacts on effective flood risk and waterways management.	+	++	++	Likelihood/certainty of effect occurring: Uncertain Geographical scale of effect: Local Plan area <b>Temporary / Permanent: Permanent Assumptions made:</b> The impact of new development on flood risk will be managed through the planning application process and using other policies in this Local Plan.
	10	Conserve and enhance biodiversity	Policy intent is to protect existing trees, woodlands and hedgerows, in particular ancient woodland, veteran trees and species-rich hedgerows.	++	++	++	Likelihood/certainty of effect occurring: Uncertain Geographical scale of effect: Local Plan area <b>Temporary / Permanent: Permanent Assumptions made:</b> Principles enforced at planning application stage will implement policy intentions.
	11	Safeguard geological resources including the best and most versatile agricultural land	This SA Objective will be addressed through other policies in the Local Plan.	0	0	0	Likelihood/certainty of effect occurring: Uncertain Geographical scale of effect: Local Plan area <b>Temporary / Permanent: Permanent Assumptions made:</b> Principles enforced at planning application stage will implement policy intentions.
	12	Minimise the use of non-renewable resources	This SA Objective will be addressed through other policies in the Local Plan.	0	0	0	Likelihood/certainty of effect occurring: Uncertain Geographical scale of effect: Local Plan area <b>Temporary / Permanent: Permanent Assumptions made:</b> Any impacts on non-renewable resources will be managed through the planning application process and using other policies in this Local Plan.

SA Framework		NE2 Trees, Woodland and Hedgerows			
Summary of Baseline Situation	SA Objective	Predicted Effects			Assumptions and mitigation
		Nature of Effect	ST	MT	LT
Measures to encourage people to shop in the area; Enhancement of local distinctiveness; Protection of the retail function in the heart of the town centres.					
<p><b>Summary of significant effects of policy:</b>  <b>Policy NE2 Trees, Woodland and Hedgerows</b> establishes a range of measures to protect trees and hedgerows, in particular ancient woodland, veteran trees and ancient or species-rich hedgerows from loss or deterioration. Significant positive effects on a wide range of SA objectives were identified, including for health and well-being; creating and maintaining high quality local neighbourhoods and biodiversity. Further positive effects are likely to arise from the contribution of habitat protection to effective flood risk and waterways management and climate change adaptation.</p> <p><b>Mitigation:</b> None identified.</p>					

**Table 20.45 Assessment Table for Preferred Option Policy NE2 Trees, Woodland and Hedgerows**

## Screening of Changes to Preferred Option Policies

## 21 Screening of Changes to Preferred Option Policies

**21.1** Minor changes to the Preferred Option policies have been suggested for the text of most policies during preparation of the Submission version Local Plan. These amendments have in the most cases been proposed to aid clarity or to respond to a consultation response, or to take account of latest evidence and guidance.

**21.2** In January 2018, proposed changes to preferred option policies were screened to identify if any changes resulted in modifying the intent or approach of a Policy such that a re-appraisal of that Policy by the SA was required.

**21.3** The proposed changes to Policies are set out in the table below, along with the screening finding.

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
Visions	<ul style="list-style-type: none"> <li>Add the following text to the end of 4th paragraph: <u>The implementation of a Playing Pitch and Built Facilities Strategy will seek to provide and enhance formal sports facilities (indoor and outdoor).</u> (Sport England)</li> <li>Amend the 5th paragraph to read: The needs of all sectors..." could helpfully be amended to read "through provision of recreational, <u>sport</u> and community facilities". (Sport England)</li> <li>Add sentence to end of 5<sup>th</sup> paragraph: <u>Encouragement of physical activity and active travel throughout the District and across all age groups will improve health and wellbeing.</u></li> <li>Add '<u>sport</u>' into the visions for Leek, Biddulph, Cheadle and the Rural Areas. (Sport England)</li> <li>Add 'whilst providing recreational opportunities <u>and improvements to health and wellbeing</u>' into the visions for Leek, Biddulph, Cheadle and the Rural Areas.</li> <li>Add additional wording to the end of paragraph 4: 'The wealth of biological and geological resources will continue to be protected, conserved and enhanced where appropriate and net gains and improvements to biodiversity will be made.'</li> </ul> <p>Make reference to heritage within all the visions.</p>	<p>No further SA required.</p> <p>(Insertion of references to sport, physical activity and active travel may lead to positive benefits for health and well-being in the long term.)</p>
Aims and objectives	Agree to amend SO7 as follows: 'To support protect, provide and enhance the tourism, cultural, sport and recreation.....' (Sport England)	No further SA required.
Development approach	No changes proposed.	N/a

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
SS1 - Development Principles	<ul style="list-style-type: none"> <li>• Amend text to include specific reference to the Peak District National Park in recognition of its significance for the District.</li> <li>• Amend bullet point to refer to refer to creating opportunities to support activity and health through good design.</li> </ul>	No further SA required.
SS1a - Presumption in Favour of Sustainable Development	No changes proposed.	N/a
SS2 - Settlement Hierarchy	No changes proposed.	N/a
SS3 - Future Provision and Distribution of Development	Amend text to confirm that the development requirements are expressed as a minimum.	No further SA required.
SS4 - Strategic Housing & Employment Land Supply	<ul style="list-style-type: none"> <li>• Update the 'New Allocations' figures for Leek / Biddulph / Rural Areas to reflect new housing capacity at:               <ol style="list-style-type: none"> <li>1. The Mount Leek (DSL2) (increase of 28)</li> <li>2. Land north of Macclesfield Road, Leek (LE102) (increase of 5)</li> <li>3. Tunstall Rd Biddulph (DSB3) (increase of 5)</li> <li>4. Land at corner of Brookfield Avenue / Stoney Lane, Endon (EN128) (increase of 2)</li> </ol> </li> <li>• Amend SS4 text to clarify that the housing requirements given for Neighbourhood Plan areas do not always necessitate the allocation of development sites. Instead, particularly where the housing requirement is low, general conformity with the strategic policies of the Local Plan could be demonstrated through the provision of policies in the Neighbourhood Plan that would facilitate the provision of the housing requirement through windfall.</li> <li>• Amend policy to clarify that neighbourhood plan requirements are net figures and provide additional information in respect of employment land provision within neighbourhood areas as requested.</li> </ul>	No further SA required.

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
	<ul style="list-style-type: none"> <li>• Include reference in the supporting text to the Blythe Vale employment allocation being in addition to the District's requirement (Stafford BC)</li> <li>• Add residual employment land requirements table, as per residual housing requirements table</li> </ul>	
SS5 - Leek Area Strategy	<ul style="list-style-type: none"> <li>• Point 4, bullet 4 - include reference to active design as requested (Sport England)</li> <li>• Make specific reference to heritage assets in point 4 (Historic England)</li> <li>• Amend Part 2 bullet (3) to "<i>Supporting the development of the employment site allocations (as identified on the Leek and Leekbrook Policies Maps)</i>" in response to Wainhomes rep querying why Leekbrook is categorised as a smaller village.</li> </ul>	No further SA required.
SS6 - Biddulph Area Strategy	<ul style="list-style-type: none"> <li>• Point 4, bullet 4 - include reference to active design as requested (Sport England)</li> <li>• Make specific reference to heritage assets in point 4 (Historic England)</li> </ul>	No further SA required.
SS7 - Cheadle Area Strategy	<ul style="list-style-type: none"> <li>• Amend typographical error - Reference to Policy SDC2 should be deleted and replaced by Policy DSC3</li> <li>• Make specific reference to historic environment and heritage assets</li> </ul>	No further SA required.
SS8 - Larger Villages Strategy	<ul style="list-style-type: none"> <li>• Make specific reference to historic environment and heritage assets</li> </ul>	No further SA required.
SS9 - Smaller Villages Strategy	<ul style="list-style-type: none"> <li>• Make specific reference to historic environment and heritage assets</li> <li>• SS9 (bullet 2) text to be amended to clarify that development does not have to meet a specific identified "need".</li> </ul>	No further SA required.
SS10 – Other Rural Areas Strategy	<ul style="list-style-type: none"> <li>• Amend policy to refer to need for proposals to have regard to the canal and conservation (Canal and Rivers Trust)</li> <li>• Amend Part 1 bullet to: "Allowing rural exceptions housing (in accordance with Policies H1 and H3)" – consequential amendment to reflect affordable housing policy.</li> <li>• The term 'Local Need' will be removed from Part 1 bullet point 5 to be consistent with other changes to this policy where this term has been removed. The revised bullet point would read: "<i>Allowing community facilities where that need cannot be met in a settlement within the hierarchy. In such</i></li> </ul>	No further SA required.

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
	<p><i>cases the development should be in a sustainable location close to an existing serviced settlement.</i>" (Rushton Parish Council)</p> <ul style="list-style-type: none"> <li>Insert H1 part 5 d) regarding extensions in the rural area.</li> </ul>	
SS11 - Churnet Valley Strategy	<ul style="list-style-type: none"> <li>With reference to heritage assets, re-word first sentence beginning "any development should be..." to provide clarity of intention. (Historic England)</li> </ul>	No further SA required.
SS12 - Planning Obligations & CIL	No changes proposed	N/a
SD1 - Sustainable Use of Resources	<p>With agreement from Natural England, adding a bullet which:</p> <ul style="list-style-type: none"> <li>states that areas of lower quality agricultural land should be used for development in preference to Best Most Versatile agricultural land</li> <li>states that development should also aim to minimise "soil disturbance" and to retain ecological connectivity as far as possible</li> </ul>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for soil and other geological resources.</p>
SD2 - Renewable / Low-Carbon Energy	No changes proposed	N/a
SD3 - Sustainability Measures in Development	No changes proposed	N/a
SD4 - Pollution	<p>Following feedback from EA, UU, STW + LLFA, policy expanded to:</p> <ul style="list-style-type: none"> <li>title references "water quality" not just pollution</li> <li>require developers to have regard to the actions and objectives of all relevant Catchment Flood Management Plans in striving to protect and improve the quality of relevant water bodies [i.e. the <u>Water Framework Directive</u>]</li> <li>require development within <u>Groundwater Source Protection Zones (SPZs)</u> to demonstrate how site layout has sought to mitigate potential pollution to public water supply. A quantitative and qualitative risk assessment and groundwater protection mitigation strategy may be required.</li> </ul>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for flood risk and water quality.</p>
SD5 - Flood Risk	Following feedback from EA, UU, STW +LLFA, policy <b>substantially amended</b> (expanded) to:	No further SA required.

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
	<ul style="list-style-type: none"> <li>• require for any site, the developer to demonstrate how the site layout locates the most vulnerable parts of the development in the areas of lowest flood risk</li> <li>• Where a watercourse is present on a development site, applicants will be expected to take opportunities to <u>undertake river restoration</u> and enhance natural river corridors (WFD); and the Council will encourage and promote implementation of natural flood risk management measures</li> <li>• The culverting of any watercourse will not normally be permitted, and development should wherever possible <u>remove any existing culverts</u></li> <li>• In all cases applicants to demonstrate how their proposals <b>manage surface water run-off</b> sustainably (according to hierarchy). Approved development proposals will be expected to be supplemented by appropriate maintenance and management regimes On larger sites involving phased development and/or involving multiple landowners the Council will encourage coordinated, holistic drainage strategies across the whole site over time</li> <li>• In all cases the Council will work with developers stakeholders and landowners to encourage and promote implementation of natural flood management measures which will contribute to flood risk reduction</li> </ul>	Proposed changes may lead to enhanced positive effects for flood risk and water quality.
E1 - New Employment Development	<ul style="list-style-type: none"> <li>• Existing reference to giving priority to commercial re-use of rural buildings over residential use, to be removed, to more closely align with NPPF; but retain support for commercial conversion</li> <li>• Amendment to clarify that policy in relation to new development outside development boundaries, means new-build development (i.e. as building conversions have separate reference in policy)</li> </ul>	No further SA required.
E2 - Employment Allocations	<p>Following Wainhomes rep etc:</p> <ul style="list-style-type: none"> <li>• Employment allocation LEEK EM2 to also be included in table 8.1 'Leek (including Leekbrook)'</li> <li>• Also identify proposed mixed use allocation Waterhouses WA004 by inserting new table 8.4 for rural areas, and make consequential amendments to policy text</li> </ul>	No further SA required.

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
	<ul style="list-style-type: none"> <li>• Clarification of WA004 employment area site size in table 8.4</li> <li>• Amend WA004 site description to “land at Waterhouses Enterprise Centre”</li> <li>• Be consistent throughout policy in identifying sites as ‘mixed use’</li> </ul> <p>Amend the size of the employment part of BD117 from 4.74 to 4.99 to reflect larger site size.</p>	
E3 - Existing Employment Areas, Premises and Allocations	No changes proposed	N/a
E4 - Tourism and Cultural Development	<p>Policy significantly re-written to:</p> <ul style="list-style-type: none"> <li>• Remove requirement to demonstrate tourism need, or benefits to economy</li> <li>• Put “cultural” development on the same par with tourist development</li> <li>• Removal of limitation for new-build tourism to be conversions only</li> </ul>	No further SA required.
H1 - New Housing	<ul style="list-style-type: none"> <li>• Part 3a) Add reference to the SHMA or successor document (Agent/s)</li> <li>• Part 3a) Remove reference that it should ‘meet a genuine and proven housing need and demand’. (SCC and Agent)</li> <li>• Part 3d) Add that this will determined on case-by-case basis (Agent/s)</li> <li>• Part 4b) Add ‘and character’ (DM Meeting)</li> <li>• Part 4b) Amend ‘add’ to ‘extend’ (DM Meeting)</li> <li>• Part 4c) Delete bullet 1 as this is covered elsewhere in Plan (Agent)</li> <li>• Part 4c) Delete bullet 2 – as above (Internal change)</li> <li>• Part 4c) Move bullet 3 regarding Green Belt to the end of the Policy (Agent/s)</li> <li>• Part 5d) Extensions – moved to Policy SS10 (DM Meeting)</li> <li>• Part 5e) Conversions – remove ‘non-residential’ (Agent/s)</li> <li>• Part 5f) Addition of ‘previously developed land’ bullet (Agent/s)</li> <li>• Part 5g) Addition of ‘subdivision’ bullet (Agent/s)</li> </ul>	No further SA required.

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
	<ul style="list-style-type: none"> <li>Policy H1 to be amended to provide in principle support for the sub-division of rural dwellings provided they are not in isolated locations. (Agent)</li> <li>Move reference to Green Belt to end of Policy (Agent/s)</li> <li>Refer to 'green/active travel' (Sport England)</li> </ul>	
H2 - Housing Allocations	<ul style="list-style-type: none"> <li>In the case of allocations comprised of multiple SHLAA sites, add housing capacity for each SHLAA site.</li> <li>Policy DSB1 row in table to list "BDNEW" site, and also specify that the area on the east of the bypass (BD104, BD016) is also included in allocation</li> <li>Update the 'The number of dwellings' column figures for Leek/Biddulph/ Rural Areas tables to reflect new housing capacity at:  The Mount Leek (DSL2) [increase in LE140 &amp;LE128 yields]  Land north of Macclesfield Road, Leek (LE102)  Tunstall Rd Biddulph (DSB3)  Land at corner of Brookfield Avenue / Stoney Lane, Endon (EN128).</li> <li>Amend WA004 site description in rural table to "land at Waterhouses Enterprise Centre"</li> <li>Amend Werrington site policy in rural table to 'DSR 4' (not DSR 2)</li> </ul>	No further SA required.
H3 - Affordable Housing	No amendments proposed	N/a
H4 - Gypsy and Traveller Sites and Sites for Travelling Showpeople	<p>Following reps by NFGLG and Historic England, amend policy:</p> <ul style="list-style-type: none"> <li><b>Remove</b> "<i>in order to meet the identified needs of the District</i>" from first para, because the criteria would be used to assess applications irrespective of whether "need" has been identified (to accord with PPTS);</li> <li>Split the bullet for natural- and heritage considerations into two, as the NPPF tests are different:</li> </ul>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for heritage assets.</p>

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
	<ul style="list-style-type: none"> <li>the word “significantly” added to natural bullet to explain that natural value must not be “significantly harmed”;</li> <li>and a new bullet for heritage explaining that heritage harm would need to be justified against NPPF policy</li> </ul>	
TCR1 - Development in the Town Centres	No amendments proposed	N/a
TCR2 - Primary Shopping Frontages	No amendments proposed	N/a
TCR3 - Retailing and other town centre uses outside town centres	No amendments proposed	N/a
DC1 - Design considerations	<ul style="list-style-type: none"> <li>Point 3 – Replace ‘Active Design’ with capital letters as it is the name of a specific piece of guidance. (Sport England)</li> <li>Amend Point 3 to read ‘create .... attractive, <b>active</b>, functional ‘..’ (Sport England)</li> <li>Amend Point 5 to read ‘creation of healthy <b>active</b> environments’. (Sport England)</li> <li>Add ‘height’ into part 2 of the policy (Historic England)</li> <li>New bullet 11 – (New residential and commercial development should) “<i>be served by high speed broadband (&gt;30mbps) unless it can be demonstrated through consultation with Next Generation Access Network providers that this would not be possible, practical or economically viable. In all circumstances during construction of the site sufficient and suitable ducting should be provided within the site and to the property to facilitate ease of installation at a future date.</i>” (Staffordshire County Council)</li> </ul>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for reducing the need to travel as access to services online and working from home should be made easier in the long term.)</p>
DC2 - The Historic Environment	<p>All the amendments below made to address comments from Historic England:</p> <ul style="list-style-type: none"> <li>Delete first paragraph and replace with the following wording: “<i>The Council will conserve and where possible enhance heritage assets in a manner appropriate to their significance. This will take into account the desirability of maintaining and enhancing their significance and will ensure that development proposals contribute positively</i></li> </ul>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for heritage assets.</p>

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
	<p><i>to the character of the built and historic environment.”</i></p> <ul style="list-style-type: none"> <li>• Include new second paragraph to read: <i>“Particular protection will be given to designated heritage assets and their settings using NPPF policy”.</i></li> <li>• Include a new third paragraph to read: <i>“Applications directly or indirectly affecting non-designated heritage assets will be informed by the scale of any harm or loss and the significance of the heritage asset.”</i></li> <li>• Include a re-written fourth paragraph to read: <i>“All applications affecting designated heritage assets and applications likely to lead to significant harm on non-designated heritage assets will require the submission of a heritage statement. Where development affects archaeology, both designated and undesignated, the Council requires reference to the Historic Environment Record and (as appropriate) desk based assessment, field surveys and trench evaluation by a qualified professional.”</i></li> <li>• Include a new fifth paragraph to read: <i>“Where the loss of significance is unavoidable, recording should take place and this should be added to the Historic Environment Record, held by Staffordshire County Council. “</i></li> <li>• Include a new sixth paragraph to read: <i>“Development proposals which would result in the reuse of buildings at risk in line with NPPF policy will be welcomed by the Council.</i></li> <li>• Number the paragraphs to the policy for easy reference (for consistency and ease of use)</li> </ul>	
DC3 -Landscape & Settlement Setting	<ul style="list-style-type: none"> <li>• New bullet 4 <i>“Supporting identification and implementation of natural flood management measures that will contribute towards delivering a reduction in local and catchment-wide flood risk and impacts of climate change and other multiple benefits”.</i> (Environment Agency)</li> </ul> <p>(NB existing bullet 4 retained - becomes 5; and 5 becomes 6).</p>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for flood risk and water quality.</p>
DC4 - Local Green Space	No amendments proposed	N/a
C1 - Community Facilities	Add bullet which supports proposals encouraging use of electrical battery powered vehicles. (Resident/Agent)	No further SA required.

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
		Proposed changes may lead to enhanced positive effects for climate change.
C2 - Sport, Recreation and Open Space	<ul style="list-style-type: none"> <li>• Reference Indoor Sports. (Sport England)</li> <li>• Reference updated Open Space Study, Playing Pitch Strategy and Indoor Sports Facility Assessment. (Sport England)</li> <li>• Take out reference to minimum standards (Sport England)</li> <li>• Add part 1c) to reflect wording of NPPF i.e. <i>any loss of provision would be replaced by equivalent or better provision in terms of quantity and quality in a suitable location.</i> (Sport England)</li> <li>• Part 3 add reference to the ‘creation of artificial grass pitches’. (Sport England)</li> <li>• Part 3 add ‘do not have an unacceptable impact on existing neighbours’. (Sport England)</li> <li>• Add sentence to state that ‘The Council will encourage securing community access to schools to maximise the use of existing sports provision outside of the school day and the co-location of community infrastructure wherever possible.’ (Sport England)</li> </ul>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for health and well-being.</p>
C3 - Green Infrastructure	No amendments proposed	N/a
NE1 - Biodiversity & Geological Resources	<p>Natural England rep suggested amended 5th bullet to more closely align with NPPF. Following internal discussion of Natural England wording, and taking on board all comments, <u>1<sup>st</sup> para</u>, and <u>5<sup>th</sup> bullet</u> amended as follows:</p> <p><b>Biodiversity and Geological Resources</b></p> <p><i>The biodiversity and geological resources of the District and neighbouring areas will be conserved and enhanced by positive management and strict control of development (and having regard to Council <u>relevant ecological evidence</u>) by:</i></p> <ul style="list-style-type: none"> <li>• <i>5. Ensuring all development seeks to deliver a net gain in biodiversity proportionate to the size and scale of the development. In circumstances where adverse impacts are demonstrated to be unavoidable, developers will be required to ensure</i></li> </ul>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for biodiversity and natural assets.</p>

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
	<p><i>that impacts are appropriately mitigated, with suitable compensation measures towards loss of habitat used only as a last resort where there is no alternative. Where any mitigation and compensation measures are required, they should be appropriately scheduled and managed according to the nature, size and scale of the development so as to minimise impacts that may disturb protected or important habitats and species."</i></p> <ul style="list-style-type: none"> <li>• And other consequential amendments to policy</li> </ul> <p>The above amendments:</p> <ul style="list-style-type: none"> <li>• remove reference to geodiversity gain;</li> <li>• amend 'Council evidence' to 'evidence'</li> <li>• makes allowance for scheme scale (ie might be impractical to expect biodiversity gain/mitigation/compensation in very small schemes)</li> <li>• use of 'appropriate', 'suitable' as caveats</li> <li>• the last sentence responds to the issue of whether on-site compensation should be planted first, and to prevent its damage during development.</li> </ul>	
NE2 - Trees, Woodlands & Hedgerows	<p>Following internal comments; Policy to be amended:</p> <ul style="list-style-type: none"> <li>• Changing the protection of "mature" trees, to "healthy" ones, as young trees should be protected too</li> <li>• Replacement of 2:1 tree replacement concept with a more generalised "increase canopy cover" requirement</li> <li>• Insertion of "<i>Where it is not possible to secure this new or replacement tree planting within the site, the Council will work with applicants to ascertain if a suitable site(s) can be found off-site for replacement planting in the locality</i>" regarding replacement of lost tree cover.</li> </ul>	<p>This Policy was included as a result of the findings of the SA of preferred option policies. An appraisal assessment of the policy as included in the July 2017 Local Plan is provided below.</p> <p>No further SA required of proposed changes for the submission version.</p> <p>Proposed changes may lead to enhanced positive</p>

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
		effects for biodiversity and natural assets.
T1 -Development and Sustainable Transport	<p>Following SCC Highways response:</p> <ul style="list-style-type: none"> <li>• Reference to “Local Transport Plan” changed to “Integrated Transport Strategy” in 1<sup>st</sup> para</li> <li>• Add new bullet under development requirements to reference contributions for junction improvements, traffic management and highway infrastructure</li> <li>• Under part (4) facilitating walking and cycling, additional text that applicants should also consider how their schemes can enhance the existing path network in line with the <a href="#">Staffordshire County Council Rights of Way Improvement Plan</a> and also give consideration to the protection of <u>non-definitive</u> public footpath routes, not just definitive routes.</li> </ul> <p>[SCC also request reference to “school transport provision” under development requirements for public transport]</p>	No further SA required.
T2 - Other Sustainable Transport Measures	<p>Following SCC Highways response:</p> <ul style="list-style-type: none"> <li>• Reference to “Local Transport Plan” removed</li> <li>• Part 1 (new road schemes) removed [as it promotes unidentified new roads and strategic infrastructure improvements that are not supported by evidence and hence are not required to deliver the Local Plan]</li> <li>• to broaden scope of Part (5) support for access routes ‘to ‘public transport’ rather than just interchanges.</li> </ul>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for reducing the number of journeys made by car.</p>
<b>ALL STRATEGIC DEVELOPMENT SITE POLICIES</b>	<ul style="list-style-type: none"> <li>• Add reference to landscape &amp; visual impact mitigation measures and assessments where appropriate.</li> <li>• Add reference to surveys &amp; actions recommended by various ecological surveys &amp; measures for protection &amp; enhancement as appropriate.</li> <li>• to include an additional bullet point stating “address priorities and actions identified in the Council’s Green Infrastructure Strategy” (all site policies except DSB2)</li> </ul>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for a range of SA objectives.</p>

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
	<ul style="list-style-type: none"> <li>textual consistencies (refer to "Policy H3" ; refer to "Green Infrastructure Strategy" etc)</li> <li>all applicable site policies which contain generic contributions bullet to be amended as follows: <i>"make appropriate contributions towards infrastructure, public open space, education, services and other community needs including sports facilities, as required"</i> following a Sport England rep requiring schemes to ensure contributions sports facilities are provided.</li> </ul>	
DSL1 – Land at Horsecroft Farm	<p>SCC advise "There will need to be discussion between the Education Authority, school, landowner and the District Council going forward to agree [educational] requirements and update policy accordingly in the Plan."</p> <p>Discussions about site layout and amount of land required for education on this mixed use site, are still ongoing. There may therefore be a need to update the part of the policy covering educational contributions in future....</p>	N/a
DSL2 – Land at The Mount	<p>Policy to refer to higher housing yield, and decreased area required for First School, because:</p> <ul style="list-style-type: none"> <li>SCC rep clarifies that smaller land take required for First School, increasing LE140 housing capacity; and</li> <li>Recalculated yield across wider LE128 to same density as LE128A.</li> </ul> <p>See also Policies H2, SS4.</p>	No further SA required.
DSL3 – Newton House	<p>Following rep from Sport England that tennis courts on site not acknowledged, amend first bullet to the "standard" contributions bullet to:</p> <p><i>"make appropriate contributions towards infrastructure, public open space, education, services and other community needs including sports facilities, as required;"</i></p>	No further SA required.
DSL4 – Cornhill East	<p>Amendment to bullet 1 <i>"provide for any transport infrastructure improvements having regard to the Churnet Valley Masterplan; and demonstrate acceptable access arrangement to the site which must not be directly served off Sandon Street"</i> following SCC response concerning access arrangements.</p>	No further SA required.

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
DSB1 – Wharf Road	<ul style="list-style-type: none"> <li>• Add a new second bullet to read: “creation of a new settlement edge along the south-western boundary of the part of the site on the west side of the Biddulph Valley Way to prevent urban sprawl over the longer term”. (public comment to reflect evidence in Green Belt Review)</li> <li>• Amend bullet 8 regarding ecology to read: “Surveys and actions recommended by the Extended Phase 1 Habitat Survey and Local Wildlife Assessment <u>and include measures for protection and enhancement of site biodiversity and protection of any geodiversity as well as</u> avoiding negative impacts on the nearby Biodiversity Alert Site.” (Natural England)</li> </ul>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for biodiversity and landscape / townscape character.</p>
DSB2 – Biddulph Mills	No amendments proposed (aside from any standardised responses referred to above).	N/a
DSB3 – Tunstall Road	<p>Include the properties opposite the junction with Victoria Business Park within the allocation to provide better junction arrangements (they are currently excluded). (Staffordshire County Council)</p> <p>Policy to refer to higher housing yield; and proposals map to be amended accordingly. See also Policies H2, SS4.</p>	No further SA required.
DSC1 – Cheadle North	<ul style="list-style-type: none"> <li>• Amend policy to state that the new County Primary School <u>and community playing pitches</u> will amount to approximately 2ha. (SCC)</li> <li>• Amend bullet 3 regarding landscaping to read: “<i>Provision of a landscaping plan including submission of landscape and visual impact assessments to address recommendations set out in the Council’s Landscape, Local Green Space and Heritage Impact Study.</i>” (SCC)</li> <li>• Add bullet to read: <i>A detailed assessment of the significance of the heritage asset and how it may be affected, in addition to mitigation measures set out in the Council’s Landscape, Local Green Space and Heritage Impact Study</i> (Heritage England)</li> <li>• Amend final bullet to say that ‘<i>Public footpaths crossing the site will need to be retained and....</i>’ (Resident)</li> <li>• Policy DSC1 8th bullet to be amended to read : A site specific flood risk assessment which should determine the level of risk from river flooding as well as the management of surface water taking</li> </ul>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for health and well-being.</p>

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
	account of climate change and early discussions with the Lead Local Flood Authority (EA)	
DSC2 – Cecilly Brook	<ul style="list-style-type: none"> <li>• Amend bullet regarding landscaping to read: <i>“Provision of a landscaping plan including submission of landscape and visual impact assessments to address recommendations set out in the Council’s Landscape, Local Green Space and Heritage Impact Study.”</i> (SCC)</li> <li>• Add bullet to read: <i>A detailed assessment of the significance of the heritage asset and how it may be affected, in addition to mitigation measures set out in the Council’s Landscape, Local Green Space and Heritage Impact Study</i> (Heritage England)</li> <li>• Add to 6th bullet to state that <i>‘The FRA should determine the risk of flooding from both watercourses. It should be ensured that the development does not encroach into the floodplain area and that at least 8m undeveloped easement/buffer strip is maintained adjacent to Cecilly Brook’</i> (Environment Agency)</li> </ul>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for green infrastructure and heritage assets.</p>
DSC3 – Mobberley Farm	<ul style="list-style-type: none"> <li>• Amend 2nd bullet to state that <i>‘Construction of development access roads along the safeguarded route for a potential future link road of a sufficient design standard to facilitate a link road’</i>. (SCC)</li> <li>• Amend bullet regarding landscaping to read: <i>“Provision of a landscaping plan including submission of landscape and visual impact assessments to address recommendations set out in the Council’s Landscape, Local Green Space and Heritage Impact Study.”</i> (SCC)</li> <li>• Add bullet to read: <i>A detailed assessment of the significance of the heritage asset and how it may be affected, in addition to mitigation measures set out in the Council’s Landscape, Local Green Space and Heritage Impact Study</i> (Heritage England)</li> <li>• Add to 8th bullet <i>‘The FRA should determine the level of flood risk. It should be ensured that the development does not encroach into the floodplain and that at least 8m undeveloped easement/buffer strip is maintained adjacent to the river.’</i> (Environment Agency)</li> </ul>	<p>No further SA required.</p> <p>Proposed changes may lead to enhanced positive effects for green infrastructure and heritage assets.</p>
DSC4 – Land north of New Haden Road	Following EA request, wording to be amended to refer to need to submit FRA, and requirement for early discussion with EA and Lead Local Flood Authority	No further SA required.

Local Plan Policy	Change Proposed	Screening finding- Likely Significant Effects identified?
DSR1 – Blythe Vale	<ul style="list-style-type: none"> <li>Amend 3rd bullet to state Transport Assessment “to include an analysis of the site and it’s traffic impacts on the surrounding road network including the A50 and potential mitigation measures, and early engagement with the Highways England” (Highways England / Stafford Borough Council).</li> <li>Amend 7th bullet to include reference to early engagement with the Environment Agency and Network Rail (Environment Agency)</li> <li>Amend 9th bullet “to include the provision of suitable crossing facilities to enable access on foot and bicycle to the existing schools in Blythe Bridge” (Staffordshire County Council)</li> </ul>	No further SA required.  Proposed changes may lead to enhanced positive effects for reducing the number of journeys made by car.
DSR2 – Brooklands Way, Leekbrook	Following EA request, wording to be amended to refer to need to submit FRA, and requirement for early discussion with EA and Lead Local Flood Authority	No further SA required.
DSR3 – Basford Lane, Leekbrook	Following EA request, wording to be amended to refer to need to submit FRA, and requirement for early discussion with EA and Lead Local Flood Authority	No further SA required.
DSR4 – Ash Bank Road	No amendments proposed (aside from any standardised responses referred to above).	N/a
Appendix 7 Housing Trajectory	Changes to site yields referenced under Policies H2 & SS4, to be incorporated into trajectory.	N/a
Appendix 8 Parking Standards	Sentence at end of first paragraph to Appendix 8 Parking Standards to be added following SCC Highways re: “...on a case by case basis. <u>Note in the case of garage parking, minimum internal dimensions of the garage must be 3m x 6m:</u>	No further SA required.
Appendix 10 Local Green Spaces	Additional descriptive text to be added next to site 21(Cecilly Brook Corridor) following queries regarding its extent.	N/a

**Table 21.1 Screening of changes proposed to Preferred Option Policies**

### Policy NE2 - Trees, Woodland and Hedgerows

**21.4** This policy was inserted into the Preferred Options Local Plan following the SA of Preferred Option Policies and was not originally assessed. The summary below summarises the findings of the assessment of the policy as worded in the Preferred Options Local Plan (July 2017). The full appraisal is documented in section 20.3. The table above shows an assessment of the changes made to the policy in the Submission Version Local Plan (February 2018).

**21.5** Policy NE2 Trees, Woodland and Hedgerows establishes a range of measures to protect trees and hedgerows, in particular ancient woodland, veteran trees and ancient or species-rich hedgerows from loss or deterioration. Significant positive effects on a wide range of SA objectives were identified, including for health and well-being; creating and

maintaining high quality local neighbourhoods and biodiversity. Further positive effects are likely to arise from the contribution of habitat protection to effective flood risk and waterways management and climate change adaptation.

## Conclusion

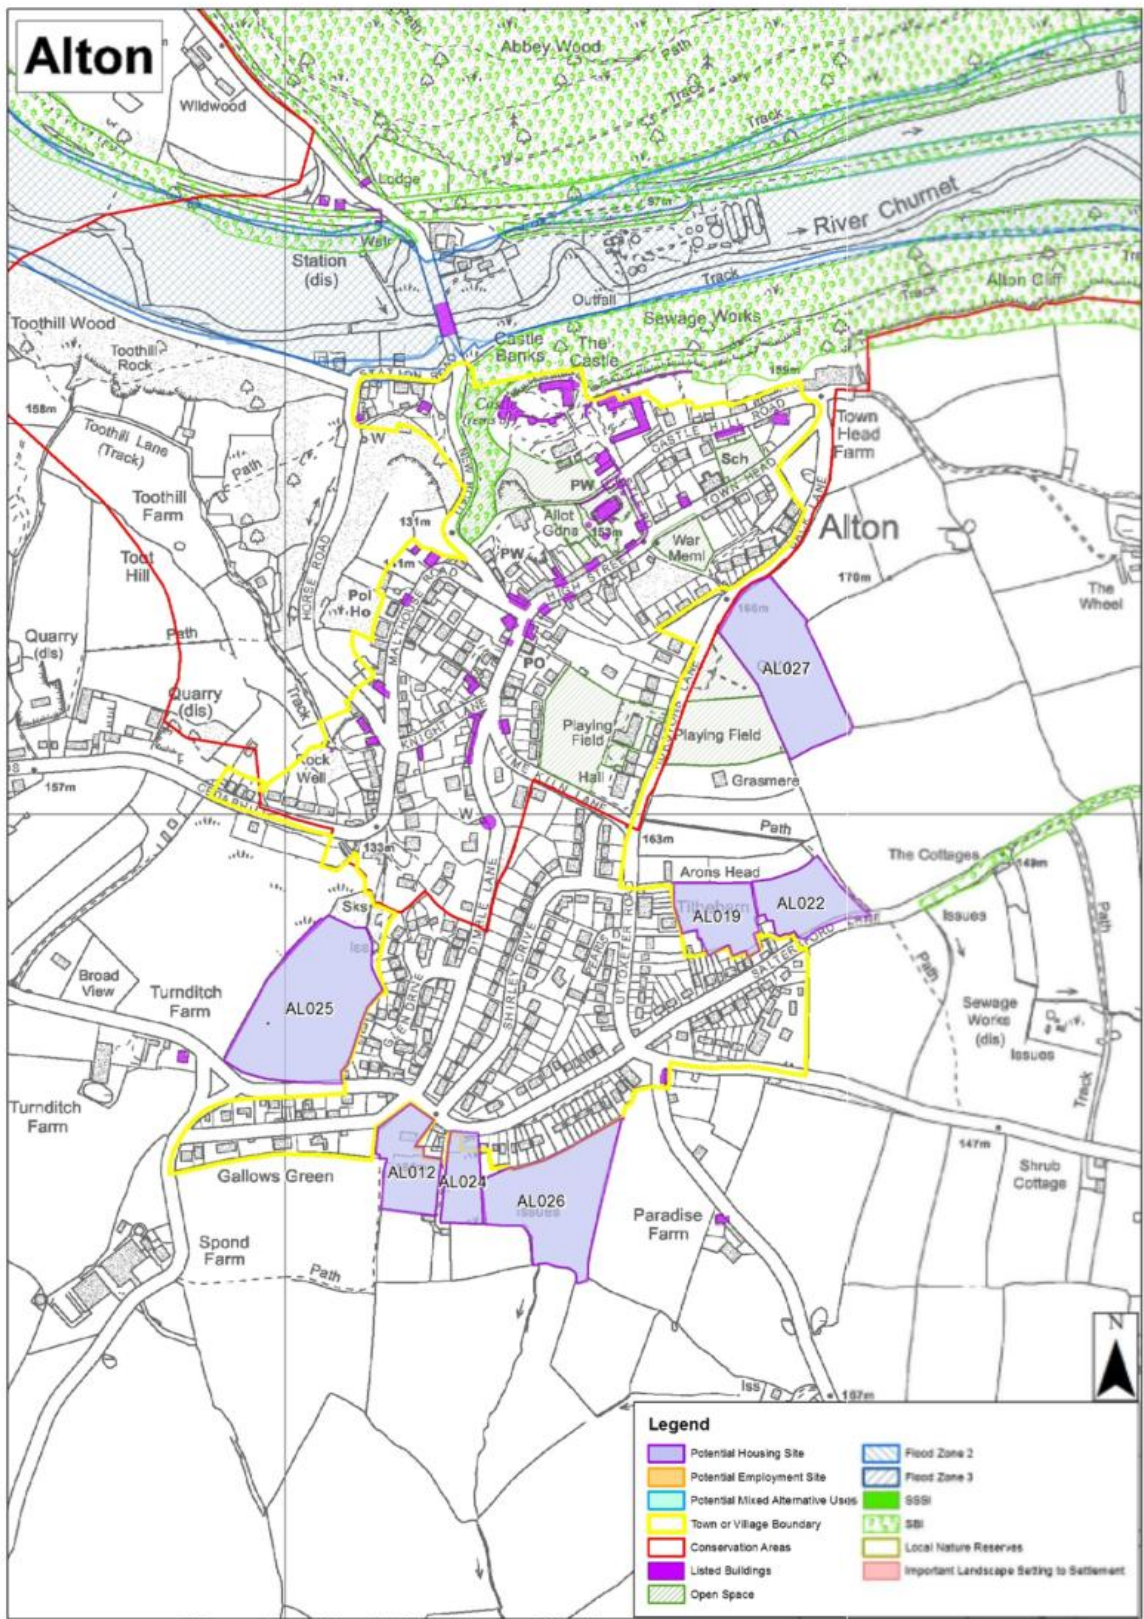

**21.6** The screening of changes proposed to Preferred Options Policies undertaken to help inform preparation of the Submission version Local Plan (February 2018) has not identified a requirement for further SA. In a number of cases, proposed changes are expected to lead to enhanced positive effects for a number of SA Objectives.

Site Appraisals - Constraints maps

Review of relevant plans, programmes and policy objectives

## 23 Review of relevant plans, programmes and policy objectives

Plans, Policies and Programmes
<p><b>International / European Context</b></p>
<p><u>The Johannesburg Declaration on Sustainable Development 2002</u></p> <p>Key commitments from the declaration are: Sustainable production and consumption, renewable energy &amp; energy efficiency, produce chemicals in ways that do not lead to significant adverse effects on human health and the environment and develop integrated water resources management and water efficiency plans. These elements are reflected in SA objectives 7, 8, 9, 10, 11 and 12.</p>
<p><u>The Rio Declaration on Sustainable Development</u></p> <p>Set out the Precautionary Principle: 'Where there are threats of serious or irreversible damage, lack of full scientific certainty shall not be used as a reason for postponing cost-effective measures to prevent environmental degradation. This is reflected in SA Objectives 7, 8, 9, 10, 11 and 12.</p>
<p><u>Strategic Environmental Assessment SEA Directive 2001/42/EC</u></p> <p>Ensure that environmental consequences of certain plans and programmes are identified and assessed during their preparation and before their adoption. See scoping report and subsequent SA reports.</p>
<p><u>The UNECE Convention on Access to Information, Public Participation in Decision Making and Access to Justice for Environmental Matter (The Aarhus Convention)</u></p> <p>This Convention stated that everyone has the right to receive environmental information that is held by public organisations and public authorities are obliged to actively disseminate environmental information in their possession. The publication of each report produced for the SA process addresses this implication.</p>
<p><u>EU Water Framework Directive 2000/60/EC</u></p> <p>The Water Framework Directive, which came into force in 2000, established an integrated approach to the protection, improvement and sustainable use of Europe's rivers, lakes, estuaries, coastal waters and groundwater. The Directive sets objectives to protect particular uses of the water environment from the effects of pollution and to protect the water environment itself from especially dangerous chemical substances. The new objectives are broader ecological objectives, designed to protect and, where necessary, restore the structure and function of aquatic ecosystems themselves, and thereby safeguard the sustainable use of water resources. One of the requirements is that all watercourses should be of 'good' status, and in order to do this, whole catchments are to be considered. The Directive therefore introduces a river basin management planning system which will be the key mechanism for ensuring the integrated management of: groundwater; rivers; canals; lakes; reservoirs; estuaries and other brackish waters; coastal waters; and the water needs of terrestrial ecosystems that depend on groundwater, such as wetlands. The planning system is seen to provide the decision-making framework when setting environmental objectives, providing new opportunities for anyone to become actively involved in shaping the management of river basin districts and their neighbouring river catchments.</p> <p>The Staffordshire Moorlands district lies within the Humber river basin and has a number of rivers and tributaries affecting the following: River Blithe, Churnet, Dane, Dove, Hamps, Manifold and Tean.</p>
<p><u>The European Communities Directive 92/43/EEC on the Conservation of Natural and Semi-Natural Habitats and of Wild Fauna and Flora - The Habitats Directive.</u></p> <p>The EU Habitats Directive is the cornerstone of Europe's nature conservation policy. The Directive takes into account endangered species and habitats on a European scale, and therefore not all of the species are relevant to the habitats and conditions expected to be found in the UK. Animals covered by European legislation include species of bat, newt, frog, butterfly and otter. Plants covered by European legislation include orchid, fern and marshwort. The Habitats Directive also designates areas as Special Areas of Conservation (SAC), due to the presence of protected species. There are two SACs in close proximity to the Staffordshire Moorlands ch are located very close to the border. These will be considered within a HRA assessment.</p>

<b>Plans, Policies and Programmes</b>
<b>International / European Context</b>
<p><u>The Wild Birds Directive 2009/147/EC</u></p> <p>The aim of the Directive is to prevent or avoid the destruction and pollution of bird habitats (of certain identified species) and designates Special Protection Areas (SPAs). There is 1 SPA within the Staffordshire Moorlands, Peak District Moors Phase 1 which provides an important breeding ground. This will be considered within a HRA assessment.</p>
<p><u>The European Landscape Convention (Florence, 2000)</u></p> <p>The European Landscape Convention introduced a Europe-wide concept centring on the quality of landscape protection, management and planning and covering the entire territory, not just outstanding landscapes. Through its ground-breaking approach and its broader scope, it complements the Council of Europe's and UNESCO's heritage conventions. This is reflected in SA Objective 14.</p>
<p><u>The EU Strategy on Green Infrastructure</u></p> <p>There is a need to develop, preserve and enhance healthy green infrastructure to help stop the loss of biodiversity and enable ecosystems to deliver their many services to people and nature. The greater the scale, coherence and connectivity of the green infrastructure network, the greater its benefits. The EU Strategy on green infrastructure outlines how to deploy such a network and encourages action at all levels. This is reflected in SA Objective 10.</p>
<p><u>EU Directive 2009/28/EC</u></p> <p>Promotion of the use of energy from renewable sources - the UK has committed to sourcing 15% of its total energy from renewable sources by 2020. Further to Article 4, the UK Government published its National Renewable Energy Action Plan, which sets out how this could be achieved in the context of other UK obligations (such as Climate Change Act 2008). This aim is addressed by SA Objective 7.</p>
<p><u>The Air Quality Framework Directive 1996 (Directive 96/62/EC on ambient air quality assessment and management)</u></p> <p>Avoid, prevent and reduce harmful effects of ambient air pollution on human health and the environment.</p> <p>This is reflected in SA Objective 8.</p>
<p><u>2010 Biodiversity Target</u></p> <p>Endorsed by the World Summit on Sustainable Development and the United National General Assembly at the 2005 World Summit, the Conference of the Parties (COP) identified a framework and indicators for assessing progress towards and communicating the 2010 Biodiversity Target at the global level. Parties were invited to establish their own targets and identify indicators within this flexible framework. This aim is addressed by SA Objective 10.</p>
<p><u>The Waste Framework Directive 2008 (Directive 2008/98/EC on waste)</u></p> <p>Prevention or reduction of waste production and its harmfulness and encouraging the recovery of waste by means of recycling, reuse or reclamation. Encouraging the recovery or disposal of waste without endangering human health and without using processes that could harm the environment.</p> <p>This is reflected in SA Objective 12.</p>
<p><u>The Floods Directive 2007 (Directive 2007/60/EC on the assessment and management of flood risks)</u></p> <p>Establish a framework for the assessment and management of flood risks, aiming at the reduction of the adverse consequences for human health, the environment, cultural heritage and economic activity associated with floods. Preliminary Flood Risk Assessments to be completed by December 2011. Flood Hazard Maps and Flood Risk Maps to be completed by December 2013. Flood Risk Management Plans to be completed by December 2015.</p>

<b>Plans, Policies and Programmes</b>
<b>International / European Context</b>
This is reflected in SA Objective 9.

**Review of relevant international plans, programmes and policy objectives**

<b>Plans, Policies and Programmes</b>
<b>National and Regional Context</b>
<p><u>UK Sustainable Development Strategy "Securing the Future" (2005)</u></p> <p>This document sets out 5 key aims</p> <ul style="list-style-type: none"> <li>(1) Living within environmental limits; respecting the limits of the planet's environment, resources and biodiversity.</li> <li>(2) Ensuring a strong, healthy and just society, which meets the diverse needs of existing and future communities.</li> <li>(3) Achieving a strong, stable and sustainable economy.</li> <li>(4) Using sound science responsibly, ensuring sound evidence supports policies.</li> <li>(5) Promoting good governance.</li> </ul> <p>The document sets out many indicators to measure sustainable development - many of which have been incorporated into the SA Framework.</p>
<p><u>Climate Change Act 2008</u></p> <p>Introduced a statutory target of reducing carbon emissions by 80% by 2050 below 1990 levels, with an interim target of 34% by 2020. This is addressed in SA Objective 7.</p>
<p><u>UK Low Carbon Transition Plan (LCTP) - National Policy for Climate and Energy (2009)</u></p> <p>This document sets out how the government intended meeting its binding carbon targets, 80% by 2050 below 1990 levels (an interim target set at 34% by 2020). The LCTP also set individual carbon targets for the major UK government departments, which were in turn expected to produce their own individual plans. The LCTP set out how sectors including, power, homes, workplace, transport and farming can address working towards a lower carbon future. In terms of the workplace it aimed to cut emissions 13% on 2008 levels by 2020; to save around 500m tonnes of carbon dioxide a year across the EU by 2020, create 1.2m jobs in the low-carbon industry and invest approximately £120m in offshore wind, and an additional £60m in marine energy. This is addressed in SA Objective 7.</p>
<p><u>The Energy Act 2008</u></p> <p>Introduced powers for Feed-In Tariff (FiT) and the Renewable Heat Incentive (RHI) aimed at driving an increase in renewable energy capacity. These are operational from April 2010 and April 2011 respectively. This is addressed in SA Objective 7.</p>
<p><u>The Carbon Plan 2011</u></p> <p>This sets out how the UK will achieve decarbonisation required under the Climate Change Act, in the context of UK energy policy. This is addressed in SA Objective 7.</p>
<p><u>The Localism Act 2011</u></p>

<b>Plans, Policies and Programmes</b>
<b>National and Regional Context</b>
<p>The Localism Act is intended to shift power from central government back into the hands of individuals, communities and councils.</p> <p>Key provisions of the Localism Act are:</p> <p>Duty to Co-operate: this requires local authorities and other public bodies to work together on planning issues;</p> <p>Neighbourhood Planning: which allows communities to prepare their own plans which - if found sound, and supported by a majority referendum vote - would become part of the statutory Local Plan;</p> <p>Community Right to Build: which allows communities to bring forward development proposals in line with minimum criteria;</p> <p>Reforming the Community Infrastructure Levy (CIL); Reforming the way Local Plans are made.</p> <p>This is addressed in the publication of each SA report.</p>
<p><u>Housing and Planning Act (2016)</u></p> <p>Sets out measures to support the delivery of the Government's commitment to deliver new homes. The Act is made up of nine parts: New homes in England, Rogue landlords and property agents in England, Recovering abandoned premises in England, Social housing in England, Housing, estate agents and rent charges: other changes, Planning in England, Compulsory purchase etc, Public Authority land, and General.</p> <p>The Act introduces a requirement for Councils to guarantee the provision of Starter Homes on all "reasonably sized" sites and granted the Government powers to make sure that Councils have Local Plans in place by 2017. It also paved the way for planning permission in principle to be given to sites allocated in a brownfield register, Local or Neighbourhood Plan.</p>
<p><u>National Planning Policy Framework (2012)</u></p> <p>This came into effect in March 2012 and is designed to stimulate and expedite delivery of assessed development needs whilst keeping vital environmental protections. It focuses upon a 'presumption in favour of sustainable development' and is intended to streamline and simplify the planning system.</p> <p>In terms of the presumption in favour of sustainable development the NPPF defines three key strands. These are:</p> <ul style="list-style-type: none"> <li>● An economic role: contributing to building a strong, responsive and competitive economy, by ensuring that sufficient land of the right type is available in the right places and at the right time to support growth and innovation; and by identifying and coordinating development requirements, including the provision of infrastructure;</li> <li>● A social role: supporting strong, vibrant and healthy communities, by providing the supply of housing required to meet the needs of present and future generations; and by creating a high quality built environment, with accessible local services that reflect the community's needs and support its health, social and cultural well-being;</li> <li>● An environmental role: contributing to protecting and enhancing our natural, built and historic environment; and, as part of this, helping to improve biodiversity, use natural resources prudently, minimise waste and pollution, and mitigate and adapt to climate change including moving to a low carbon economy.</li> </ul> <p>This is addressed in the publication of each SA report.</p>
<p><u>National Planning Practice Guidance (2014)</u></p> <p>The Planning Practice Guidance describes what sustainability appraisal is and how it relates to strategic environmental assessment. Some of the key features include; a significant degree of protection for the Green Belt; how local authorities should act on flood risk assessments, detailed methodology as to how objectively assessed housing need should be</p>

<b>Plans, Policies and Programmes</b>
<b>National and Regional Context</b>
<p>calculated; need for providing adequate infrastructure in Local Plans; and the re-use of empty and under-used buildings. Note also, that additional guidance regarding renewable energy policy, originally published in July 2013, was amalgamated into this document.</p> <p>This is addressed in the publication of each SA report.</p>
<p><u>River Basin Management Plans - Humber River Basin District and North West River Basin District</u></p> <p>The plans are about the pressures facing the water environment and the actions that will address them. They have been prepared under the EU Water Framework Directive, and focus on the protection, improvement and sustainable use of the water environment. These are reflected in SA Objective 9.</p>
<p><u>River Trent Catchment Flood Management Plan (CFMP) 2010</u></p> <p>Produced by the Environment Agency these give an overview of the flood risks across different catchments and ensure that works/development affecting flooding are coordinated between all parties. This is reflected in SA Objective 9.</p>
<p><u>Staffordshire Preliminary Flood Risk Assessment (PFRA) (2011)</u></p> <p>The Preliminary Flood Risk Assessments (PFRAs) provide a high level summary of significant flood risk from surface water, ordinary watercourses and groundwater through collection of information on past (historic) and future (potential) floods. They are a requirement of the Flood Risk Regulation 2009 and must be produced every 6 years. This is reflected in SA Objective 9.</p>
<p><u>Shropshire and Staffordshire Local Flood Risk Management Strategy (2015)</u></p> <p>This Local Flood Risk Management Strategy (LFRMS) offers an opportunity for Staffordshire County Council (as Lead Local Flood Authority) to formalise their longer term vision and shape individual priorities that deliver the greatest benefit to the people, property and environment of Staffordshire. This is reflected in SA Objective 9.</p>
<p><u>The Wildlife and Countryside Act 1981(as amended)</u></p> <p>The Wildlife and Countryside Act 1981 consolidates and amends existing national legislation to implement the Convention on the Conservation of European Wildlife and Natural Habitats (Bern Convention) and Council Directive 79/409/EEC on the conservation of wild birds (Birds Directive) in Great Britain (NB Council Directive 79/409/EEC has now been replaced by Directive 2009/147/EC of the European Parliament and of the Council of 30 November 2009 on the conservation of wild birds (codified version)). This is reflected in SA Objective 10.</p>
<p><u>The Conservation of Habitats and Species Regulations 2010</u></p> <p>The Regulations provide for the designation and protection of 'European sites', the protection of 'European protected species', and the adaptation of planning and other controls for the protection of European Sites. This is reflected in SA Objective 10.</p>
<p><u>National Character Area (NCA) Profiles 2014</u></p> <p>Produced by Natural England, these profiles provide an invaluable resource for understanding wider landscape context, and highlighting opportunities for enhancement of the natural environment. There are 3 areas which fall within the Staffordshire Moorlands: South West Peak, White Peak and Potteries and Churnet Valley. This is reflected in SA Objective 14.</p>
<p><u>'Planning for Landscape Change' Supplementary Planning Guidance</u></p>

<b>Plans, Policies and Programmes</b>
<b>National and Regional Context</b>
<p>County wide supplementary planning guidance prepared to help inform the planning process and based on an assessment of the Staffordshire landscape, sub-dividing the landscape into areas of similar character, or Landscape Character Types. This is reflected in SA Objective 14.</p>
<p><u>Natural Environment and Rural Communities (NERC) Act 2006</u></p> <p>Designed to help achieve a rich and diverse natural environment and thriving rural communities through modernised and simplified arrangements for delivering Government policy. The Act implements key elements of the Government's Rural Strategy that was published in July 2004. This is reflected in SA Objective 10.</p>
<p><u>Nearby Nature Report 2010</u></p> <p>Produced by Natural England, it sets out standards for Accessible Natural Greenspace Standard (ANGSt). ANGSt recommends that everyone, wherever they live, should have accessible natural greenspace:</p> <ul style="list-style-type: none"> <li>of at least 2 hectares in size, no more than 300 metres (5 minutes walk) from home;</li> <li>at least one accessible 20 hectare site within two kilometre of home;</li> <li>one accessible 100 hectare site within five kilometres of home; and</li> <li>one accessible 500 hectare site within ten kilometres of home; plus a minimum of one hectare of statutory Local Nature Reserves per thousand population.</li> </ul> <p>This is reflected in SA Objectives 1 and 3.</p>
<p><u>Biodiversity 2020: A strategy for England's wildlife and ecosystem services</u></p> <p>New biodiversity strategy for England that builds on the Natural Environment White Paper and provides a comprehensive picture of how the UK is implementing its international and EU commitments. It sets out the strategic direction for biodiversity policy for the next decade on land (including rivers and lakes) and at sea.</p> <p>The mission for this strategy for the next decade is to halt overall biodiversity loss, support healthy well-functioning ecosystems and establish coherent ecological networks, with more and better places for nature for the benefit of wildlife and people. This is reflected in SA Objective 10.</p>
<p><u>Safeguarding our Soils: A Strategy for England, 2009</u></p> <p>Sets out a strategy to make sure that:</p> <ul style="list-style-type: none"> <li>• agricultural soils will be better managed and threats to them will be addressed;</li> <li>• soils will play a greater role in the fight against climate change and in helping us to manage its impacts;</li> <li>• soils in urban areas will be valued during development, and construction practices will ensure vital soil functions can be maintained; and</li> <li>• pollution of our soils is prevented, and our historic legacy of contaminated land is being dealt with.</li> </ul> <p>This is reflected in SA Objective 11.</p>
<p><u>Planning (Listed Buildings and Conservation Areas) Act 1990</u></p> <p>Act relates to special controls in respect of buildings and areas of special architectural or historic interest. This is reflected in SA Objective 13.</p>

<b>Plans, Policies and Programmes</b>
<p><b>National and Regional Context</b></p>
<p><u>Staffordshire Historic Environment Record (HER)</u></p> <p>A database of over 21,000 archaeological sites and monuments, historic buildings and historic landscapes across the county. This is reflected in SA Objective 13.</p>
<p><u>Staffordshire Historic Farmsteads Guidance</u></p> <p>Staffordshire County Council in conjunction with Historic England have produced guidance to help inform and achieve the sustainable development of historic farmsteads in Staffordshire, including their conservation and enhancement. This is reflected in SA Objective 13.</p>
<p><u>Staffordshire Extensive Urban Survey Project</u></p> <p>The Staffordshire Extensive Urban Survey (EUS) project forms part of a national programme of Extensive Urban Surveys initiated and supported by Historic England. The project covers towns of medieval origin within Staffordshire (including Alton, Cheadle and Leek) and intends to increase and synthesise our knowledge and understanding of the heritage assets that contribute to the development and character of these towns. This is reflected in SA Objective 13.</p>
<p><u>The Plan for Growth and supporting Ministerial Statement (2011)</u></p> <p>Sets out the Government's plan to put the UK on a path to sustainable, long term economic growth. This goal is underpinned by the policy objective of achieving strong, sustainable and balanced growth that is more evenly shared across the country and between industries. This includes supporting job creation to introducing a powerful presumption in favour of sustainable development, while retaining existing controls on Green Belt land, and ensuring all planning applications and appeals are processed in 12 months.</p>
<p><u>Local Growth White Paper October 2010</u></p> <p>This Paper set out the Governments approach to supporting economic growth in the regions. At the same time they also announced approval for an initial 24 Local Enterprise Partnership bid proposals (business and Local Authority partnerships for driving local economic growth). A Regional Growth Fund of £1.4 Billion over three years would be used to support economic growth in the regions. Following on from this was the formation of Local Enterprise Partnerships (LEPs). These followed on from the Government announcement that that Regional Development Agencies (RDAs) would be replaced with a new business support structure: LEP's bringing local councils and businesses closer together in order to boost enterprise and create jobs. This is reflected in SA objectives 16, 17 and 18.</p>
<p><u>Safer Places: The Planning System and Crime Prevention (2004)</u></p> <p>The document provides guidance on how to create well-designed, sustainable places that do not fail people, and stand the test of time. This is reflected in SA Objective 4.</p>
<p><u>Lifetime Homes, Lifetime Neighbourhoods</u></p> <p>A National Strategy for Housing in an Ageing Society (2008), and Lifetime Homes Standards: These were designed to help prevent many health issues which arise through unsuitable housing and environments for older people. This is reflected in SA Objective 5.</p>
<p><u>Our Natural Health Service (July 2009)</u></p> <p>A study by Natural England stating the provision of new and improved parks, woodlands and other green spaces is essential to improve the health of people today and in the future. It aims to increase the number of households that are within 5 minutes walk of an area of green space of at least 2 hectares and to be able to signpost patients to an approved health walk or outdoor activity programme. This is reflected in SA Objectives 1 and 3.</p>

<b>Plans, Policies and Programmes</b>
<b>National and Regional Context</b>
<p><u>Spatial Planning for Health (November 2010)</u></p> <p>This was produced to promote the contribution of well planned developments in achieving long term health and aligning planning and health. This is reflected in SA Objective 3.</p>
<p><u>The Growth and Infrastructure Act 2013</u></p> <p>This makes provision for the facilitation and control of development. For example it limits the powers LPAs have to request supporting information with planning applications; and allows applicants to apply to have affordable housing requirements lifted. This is reflected in SA Objective 5.</p>

**Review of relevant national and regional plans, programmes and policy objectives**

<b>Plans, Policies and Programmes</b>
<b>Local / Sub-Regional Context</b>
<p><u>Staffordshire Moorlands Strategic Housing Market Assessment (SHMA) (Nathaniel Lichfield and Partners, 2014, updated 2017)</u></p> <p>The latest SHMA identifies objectively assessed need (OAN) for housing in the Staffordshire Moorlands based upon a range of housing, economic and demographic factors, trends and forecasts. The analysis recommends a requirement of between 235-330 new dwellings per annum and an annual affordable housing need of up to 432 . This is reflected in SA Objective 5.</p>
<p><u>Staffordshire Flexicare Housing Strategy (2010 - 2015)</u></p> <p>The strategy sets a framework which shapes and supports development across Staffordshire. This is reflected in SA Objectives 2, 3 and 5.</p>
<p><u>Gypsy and Traveller Accommodation Needs Assessment</u></p> <p>A North Staffordshire Assessment of Gypsy and Traveller Accommodation Needs was undertaken in 2007. A revised Gypsy and Traveller and Travelling Showperson Accommodation Assessment has been undertaken for the Staffordshire Moorlands and neighbouring authorities. The final report was produced in October 2015. This is reflected in SA Objective 5.</p>
<p><u>Atkins Employment Land Study (2006, updated 2008)</u></p> <p>This study provides a review of commercial property and existing employment land across the District and identifies future business needs and employment forecasts over the next 15 years, with a view to identifying a portfolio of future sites suitable for employment use. An Employer Skills Needs Survey was also undertaken in 2007. This is reflected in SA Objectives 17 and 18.</p>
<p><u>NLP Employment Land Requirement Study (2014, updated 2017)</u></p> <p>This provides an updated employment land review for the District in line with the expectations of the NPPF. Results will be fed into the 2016 Local Plan. This is reflected in SA Objectives 17 and 18.</p>
<p><u>Staffordshire Moorlands Tourism Study 2011</u></p> <p>This provides an appraisal of the role and impact of the visitor economy, and the opportunities for its economic growth across the District and in particular in the Churnet Valley corridor. This is reflected in SA Objective 15.</p>

<b>Plans, Policies and Programmes</b>
<b>Local / Sub-Regional Context</b>
<p><u>Retail Study (2008 and 2013) updates</u></p> <p>The study focuses on future qualitative and quantitative capacity for convenience and comparison retailing across the district. This is reflected in SA Objectives 2 and 16.</p>
<p><u>Staffordshire Local Transport Plan 3 (LTP3) 2011 - 2026</u></p> <p>The LTP3 is produced by Staffordshire County Council and considers: car based travel, walking, cycling, freight, rail and public transport, as well as the management and maintenance of local roads, road safety, and accessibility initiatives including public transport across the County. This is reflected in SA Objective 6.</p>
<p><u>Staffordshire Moorlands District Integrated Transport Strategy 2011 - 2026</u></p> <p>An integrated Transport Strategy has been developed for the district to help prioritise the County Council's expenditure on transport improvements and secure potential resources including developer contributions. This is reflected in SA Objective 6.</p>
<p><u>Development Capacity Study (2008/9, updated 2010/11)</u></p> <p>Stage 1 examines the level and capacity of existing infrastructure services and facilities (including social and physical infrastructure) and accessibility. Stage 2 assesses the viability of development sites. Stage 3 appraises the potential impact of changes to the affordable housing targets. This is reflected in SA Objectives 2, 3, 5, 6 and 7.</p>
<p><u>Green Belt Review</u></p> <p>The Green Belt review study has been produced as part of the Local Plan evidence base for us to review the Green belt across the District. The study was undertaken by Amec Foster Wheeler in November 2015, with additional sites assessed in September 2016 and April 2017.</p>
<p><u>Landscape and Settlement Character Appraisal (2008)</u></p> <p>This document provides an assessment of the character of the landscape and key settlements. A subsequent detailed assessment was undertaken in 2011 of the Churnet Valley. This is reflected in SA Objective 14.</p>
<p><u>Historic Environment Character Assessment (HEA) (2010)</u></p> <p>The HEA aims to establish the potential for the historic environment of the identified project areas to absorb new development and housing in particular. This is reflected in SA Objective 14.</p>
<p><u>Conservation Areas and Appraisals</u></p> <p>There are 14 Conservation Areas which derive their special qualities from the buildings, their traditional details, materials, scale and form. There are also 7 Conservation Area appraisals which define and record the special architectural and historic interest of the area. These are reflected in SA Objective 13.</p>
<p><u>Landscape, Local Green Space and Heritage Impact Study</u></p> <p>This study was undertaken by Wardell Armstrong in 2016. The aim was to assess the landscape sensitivity of proposed development site allocations; assess the potential heritage impacts of proposed development allocations and review the existing Visual Open Space designations to consider sites against Local Green Space criteria.</p>
<p><u>Open Space, Sport and Recreation Facility Assessment (2009, updated 2017)</u></p>

<b>Plans, Policies and Programmes</b>
<b>Local / Sub-Regional Context</b>
An assessment of open space, sport and recreation facilities across the district. This is reflected in SA Objectives 1, 2 and 3.
<u>Ecological Surveys</u>
Undertaken in 2010 and 2011 providing an ecological assessment of potential development areas for Leek, Biddulph and Cheadle. An extended Phase 1 Habitat Survey for a number of potential site options was produced by Lockwood Hall Associates in 2015. In 2016, the Council commissioned ECUS Ltd to undertake a number of Phase I ecological surveys for potential development sites in the District followed by 'Local Wildlife Site' assessments of all preferred options sites. This is reflected in SA Objective 10.
<u>Green Infrastructure Strategy</u>
A network of strategic green infrastructure has been identified. The strategy seeks to create functional and physical connectivity between green spaces, as well as to identify opportunities to provide additional green routes and ecological networks.
<u>Staffordshire Biodiversity Action Plan SBAP</u>
The SBAP has been in place since 1998 in order to co-ordinate conservation efforts in delivering the UK BAP targets at a more local level. Staffordshire Moorlands Biodiversity Opportunity Map Zones have also been produced by Staffordshire Wildlife Trust. This is reflected in SA Objective 10.
<u>Staffordshire Moorlands Strategic Flood Risk Assessment (2008, updated 2015)</u>
This provides an assessment of the extent and nature of the risk of flooding across the District. The Level 1 Strategic Flood Risk Assessment (SFRA) assesses and maps all forms of flood risk from groundwater, surface water, sewer and river sources. This also takes into account future climate change predictions. This is reflected in SA Objective 9.
<u>Staffordshire County Wide Renewable / Low Carbon Energy Study (2010)</u>
This document considers the technical potential, viability and the deliverability of various renewable and low carbon options. This is reflected in SA Objective 7.
<u>Biddulph Town Centre Area Action Plan (adopted 2007)</u>
The Biddulph Town Centre Area Action Plan sets out the statutory planning policy for Biddulph town centre and focusses upon the delivery of regeneration in Biddulph town centre. This is reflected in SA Objectives 1, 2, 3, 4, 6, 13, 16, 17 and 18.
<u>Leek Town Centre Masterplan</u>
Adopted in 2014, the Masterplan is a comprehensive plan for the town centre which will provide a framework for future development. This is reflected in SA Objectives 1, 2, 3, 4, 5, 6, 13, 14, 15, 16, 17 and 18.
<u>Cheadle Town Centre Masterplan</u>
Adopted in 2014, the Masterplan aims to identify job opportunities, redevelop vacant and underused land and property and increase spend in Cheadle. This is reflected in SA Objectives 1, 2, 3, 4, 5, 6, 13, 14, 15, 16, 17 and 18.
<u>Churnet Valley Masterplan</u>

<b>Plans, Policies and Programmes</b>
<b>Local / Sub-Regional Context</b>
<p>The Churnet Valley is identified in the Core Strategy as a sustainable tourism area - Policy SS7. Adopted in 2014, the Masterplan will have a major influence on future planning decisions affecting the area and on other initiatives and strategies. This is reflected in SA Objectives 1, 2, 6, 10, 13, 14, 15, 16, 17 and 18.</p>
<p><u>Staffordshire Moorlands Wind Turbine Landscape Sensitivity Study (2015).</u></p> <p>This study augments current landscape character assessments and assesses the appropriateness in landscape / visual impact terms of new, and additional turbines, across a range of heights / numbers across the District's landscape character areas. This is reflected in SA Objectives 7 and 14.</p>
<p><u>Neighbouring Local Plans and accompanying Sustainability Appraisals</u></p> <p>Peak District National Park Authority - Core Strategy adopted 2011</p> <p>Stafford Borough Council - Local Plan adopted 2014</p> <p>East Stafford Borough Council - Local Plan 2012 - 2031</p> <p>Cheshire East Council - Local Plan adopted 2017</p> <p>Stoke-on-Trent and Newcastle-under-Lyme Councils - Joint Core Strategy adopted 2009</p>

**Review of relevant local plans, programmes and policy objectives**

## Summary of baseline data

## 24 Summary of baseline data

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
Population (ONS, Census 2011 and Interim 2011 – based Subnational Population Projections)	Staffordshire Moorlands: 97,106 Leek: 20,768 (21.4%) Biddulph: 19,892 (20.5%) Cheadle: 12,165 (12.5%) Rural Areas - Outside of the Towns: 44,281 (45.6%)	Proportion of population under 14 (2011) ● UK: 17.7% ● Staffordshire Moorlands: 15.3% ● Leek: 16% ● Biddulph: 16% ● Cheadle: 15.6% ● Rural Areas: 14.4%	<b>SOCIAL</b> Increase in population between 2001 and 2011 from 94,489 to 97,106. Both Biddulph and Leek's population has increased but Cheadle's has stagnated. In 2011, 21% of the population was 65 and over compared with 17% in 2001. Between 2001 and 2011 there has been a decrease in the percentage of the population that are aged 0-14 years old from 17% in 2001 to 15% in 2011. Between 2011 and 2021 the number of people aged 65 or over in the Staffordshire Moorlands is predicted to increase by 5.3% from 20.8% to 26.1%.	Increasingly ageing population will have major implications for housing and the working population in the District. Need to address implications of higher than average older population particularly in the rural areas.	
		Proportion of population over 65 and over ● England: 16.4% ● Staffordshire Moorlands: 21% ● Leek: 19.7% ● Biddulph: 20.6% ● Cheadle: 20.1% ● Rural Areas: 22%			

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
General Health	Staffordshire Moorlands Average: Smoking in pregnancy – 12.1 (local value) Starting breast feeding – 62.4 (local value) Excess weight adults – 65.7 (local value) People diagnosed with diabetes – 7.5 (local value)	England Average Smoking in pregnancy – 11.4 Starting breast feeding – 74.3 Excess weight adults – 64.6 People diagnosed with diabetes – 6.4	Of the 31 indicators in the 2016 health profile, 10 were better than the England average, most were similar to the average whilst the indicators identified (left) were worse than the national average.	There is a mixed picture for health across the district. The overall health of the people of Staffordshire Moorlands has improved over the past decade, with people living longer and fewer people dying from major illnesses, such as cancer, heart and respiratory diseases, thus increasing population size many of whom are living longer with a long term condition.	Need to improve the health of older people through housing and access to community facilities and services. Need to co-ordinate Council strategies and those of partners, to alleviate health inequalities particularly in mental health and children and families, and addressing worklessness and skills.
Life expectancy and causes of death (Public Health England, Staffordshire Moorlands Health Profile Sept 2016)	Staffordshire Moorlands Life expectancy – Males 80.1 years Life expectancy – Females 83.1 years Smoking related deaths – 253.6 (local value) Early deaths: heart disease and stroke – 65.1 (local value) Early deaths: cancer – 127.2 (local value) Road injuries and deaths: 29.8 (local value)	England Average Life expectancy – males 79.9 years Life expectancy – females 83.2 years Smoking related deaths – 274.8 Early deaths: heart disease and stroke – 75.7 Early deaths: cancer – 141.5 Road injuries and deaths: 39.3	Men in Staffordshire Moorlands have a higher life expectancy compared to the England average. This is not the case for women.	However there are high levels of inequality across the wards of Staffordshire Moorlands with Leek North and Biddulph East having particularly high levels of premature mortality.	

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
Ward health indicator matrix illustration based on 2012 (SCC)	Staffordshire Moorlands Life expectancy males – 78.4 Life expectancy females – 82.3 Premature mortality rate from all causes (per 100,000 under 75) – 266 Teenage Pregnancy rate per 1,000 girls aged 15-17 - 34 Childhood overweight and obesity (reception) – 27.3%	Wards Life expectancy males Leek North - 75.3 Life expectancy females Leek North - 79.0 Biddulph East – 80.1 Cheadle West – 80.3 Premature mortality rate from all causes (per 100,000 under 75) Leek North – 421 Biddulph East – 366 Teenage Pregnancy rate per 1,000 girls aged 15-17 Leek North – 65 Childhood overweight and obesity (reception) Leek North – 30.6% Biddulph East – 33.2%	Leek North and Biddulph East have particularly high levels of premature mortality.		
Adult participation in sport (1 x 30 min session a week)	2005/2006 (APS1) 31.7% 2007/2008 (APS2) 30.2% 2008/2009 (APS3) 31.9%	2015/2016 (APS 10) Staffordshire: 36.2% West Midlands: 34.7%	The levels of participation in sport in the district have remained largely steady since 2005.		Need to ensure that provision meets the needs of the population in terms of quality and accessibility

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
(Sport England Active People Survey Oct 2015 - Sep 2016)	2009/2010 (APS4) 29.8% 2010/2011 (APS5) 27.2% 2011/2012 (APS6) 32.4% 2012/2013 (APS6/7) 32.1% 2013/14 (APS8) 33.2% 2014/15 (APS9) 34.0% 2015/16 (APS10) 35.4%	National: 36.1%	The 2016 district levels are similar to the west midlands but slightly lower than the county and national average.		Where deficiencies are identified new provision or contributions towards provision or qualitative improvements should be made by developers.  Where necessary allocate new sites.
Pupil numbers (SCC, Education)	Admissions into Reception have increased over the last 10 yrs from an average of 964 for the 5 year period from 2004/05 - 2008/09 to an average of 1,010 for the period 2009/10 to 2013/14. Numbers are projected to increase further to an average of 1,055 over the next four years.  The number of pupils on roll in Year 7 at secondary/high schools within the district as a whole has fallen over the last ten years from an average of 1,297 for the 5 year period from 2004/05 to 2008/09, to an average of 1,252 between 2009/10 to 2013/14. Projections indicate that pupil numbers will increase over the next ten years and will be on average 1,302 pupils.  Any residential development proposed in the District will increase these numbers further.			There has been an increase in pupil numbers, particularly at primary school phase due to increased births within the district. As a result additional school places have been provided, and Staffordshire County Council is continuing to work with schools to identify where additional school places can be provided to address the existing shortfall of school places.  Any large scale development within the 3 main areas of Cheadle, Leek and Biddulph, whether on a single site, or several smaller sites, will likely necessitate a new primary school to be located within the development site(s).  This increase in pupil numbers will impact on Middle and High Schools over the next 5 years and beyond and additional middle and secondary school phase places will be necessary.	Need to identify potential new school locations necessitated by the level of development proposed for the 3 main areas of Cheadle, Biddulph and Leek. Land to be allocated within residential development site allocations to ensure that the education impact can be mitigated by new development.  Need to identify requirement for additional facilities and services / provisions that may be gained through developer contributions.

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
Households (ONS, Census 2011)	Staffordshire Moorlands: 41,772 Leek: 9,326 (22.3%) Biddulph: 8,528 (20.4%) Cheadle: 5,150 (12.3) Rural Areas: 18,768 (44.9)	Percentage change since 2001 Census: Total number of households in the Staffordshire Moorlands has risen by a slightly slower rate over the last 10 years 7.1% (2001-2011) compared to 7.36% the previous 10 years (1991-2001).	Growth in the number of households is likely to continue. Growth has remained stable in Leek but declined slightly in Cheadle and Biddulph. The rural areas have seen a slight increase in growth compared to other areas.	Any residential development in Staffordshire Moorlands will increase pupil numbers further and may necessitate education contributions to provide additional school places. Staffordshire County Council does not have sufficient resources to construct buildings and other infrastructure to keep pace with the rate of new development. Developers will be expected to provide the necessary education contributions and where applicable new schools to mitigate the impact of their development.	Need to ensure that new housing meets local needs.
Crime (ONS, 2016)	36.2 crimes per 1,000 population in Staffordshire Moorlands (2014/2015)	45.2 crimes per 1,000 population in Staffordshire (2014/2015)	Current long term trends are stable.	Staffordshire Moorlands is getting safer and has the lowest crime rates in Staffordshire.	Need to ensure that new developments create accessible and safe public and private environments and include 'designing out crime' initiatives.
Fear of Crime (ONS, 2016)	Crime risk 3.6%; fear of crime 6% in Staffordshire Moorlands (2014/2015)	Staffordshire crime risk: 4.5% National crime risk: 6.7% (2014/15)	Residents generally feel safe and 63% state that the level of crime is one of the most important factors in making somewhere a good place to live.	Despite continuing improvements in the rate of crime, fear of crime remains an issue.	

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
Housing Land (Core Strategy, 2014) (Emerging Local Plan, 2018)	Core Strategy identifies requirement for 6,000 new dwellings (2006-2026) Local Plan for 6080 additional dwellings 2012 - 2031	At 31 March 2017, 679 dwellings have been completed and 1442 are committed with planning permission. PDNP allowance is 100, leaving a net residual requirement of 3859 dwellings (2017-2031).	Over the 4 years 2009 - 2014 the delivery of new homes dropped significantly. After a boost in the supply in 2014/15, rates of delivery dropped off again in 2015/16. In 2015/16 the Council had a 1.87 year supply.	Managing a 5 year supply of deliverable land continues to be a key issue particularly as the number of annual completions has reduced.	The review of the Core Strategy for the period 2016-2031 allows for consideration of the latest SHMA data.
(Staffordshire Moorlands Strategic Housing Market Assessment (SHMA) 2014, updated 2017)	SHMA February 2017 identifies objectively assessed need (OAN) for the District within the range 235 - 330 new dwellings per annum.				
New housing completions (net)	2006-2007 - 260	Local Plan Target 320 per annum			
(SMDC, Annual Monitoring Report 2015/16)	2007-2008 - 261 2008-2009 - 236 2009-2010 - 185 2010-2011 - 110 2011-2012 - 58 2012-2013 - 96 2013-2014 - 78 2014 -2015 - 278 2015-2016 - 99				
Average House Price (UK House Price Index, November 2017)	Staffordshire Moorlands - £178,086	England - £243,339 Staffordshire - £186,572	Staffordshire Moorlands 2001 - £83,149 Annual price change of a property in England: +5.3% since November 2016.	House prices increased significantly 2013 - 2014, but have since levelled off.	Need to ensure that new housing meets local needs e.g. affordable and elderly. Reducing the threshold could achieve greater numbers of affordable housing to meet identified need but could have

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
Affordable Housing (SMDC, Annual Monitoring Report 2015/16)	The updated SHMA (February 2017) concluded that there was a net annual need of between 224 and 432 affordable dwellings, which attributing an estimated delivery rate of 33% equates to a total need of at least 679dpa and potentially as high as 1,309dpa.	365 affordable dwellings completed 2000-2013. Ascent Housing (SMDC and Harvest Housing Group) secured HCA funding for 400 affordable homes. Between 1 <sup>st</sup> April 2015 and 31 <sup>st</sup> March 2016 19 affordable homes were built: Biddulph: 7 units Cheadle: 0 units Leek: 12 units Rural areas: 0 units	The District Council's SPG on Housing for Local People and Affordable Housing requires 33% of housing of 15 dwellings or more to be affordable.	Core Strategy Policy H2 requires that sites that in the towns of 15+ dwellings need to provide target of 33% affordable housing. In the villages sites of 5+ dwellings need to provide a target of 33% affordable housing. This threshold is consistent with current evidence of viability. It is proposed to carry this policy through to the Local Plan.	This has been reviewed as part of the 2016 Local Plan. Need to explore specifically allocating sites for affordable housing, particularly in the villages.
House types: Detached Semi-detached Terrace Flat / Apartment Other (ONS, Census 2011)	Staffordshire Moorlands - 40.5 % Staffordshire Moorlands - 37.9 % Staffordshire Moorlands - 16.3 % Staffordshire Moorlands - 5.1 % Staffordshire Moorlands - 0.2%	West Midlands- 23.8% England - 22.4% West Midlands - 37.2% England - 31.2% West Midlands- 22.9% England - 24.5% West Midlands- 15.5% England - 21.2% West Midlands- 0.6% England - 0.7%	There is a much higher percentage of detached dwellings compared to the West Midlands and England. There is a much lower percentage of smaller properties such as terraced houses and flats / apartments compared with the West Midlands and England.		Need to ensure an appropriate mix of house types within development schemes.

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
Tenure	Staffordshire Moorlands	West Midlands – 64.9%	There is a much higher percentage of dwellings that are owner occupied compared to the West Midlands and England.	The limited supply of housing in the Staffordshire Moorlands and high demand has led to high prices and rents.	Need for greater choice of housing tenure.
Owner Occupied	– 79.7%	England – 63.3%			
Shared Ownership	Staffordshire Moorlands	West Midlands – 0.7%			
Social Rented	– 0.3%	England – 0.8%	There is a much lower percentage of social rented / private rented / shared ownership properties compared with the West Midlands and England.		Local Plan Policy H3 seeks 60% of all affordable housing to be social affordable rented with the remaining 40% being intermediate / starter homes.
Private Rented	Staffordshire Moorlands	West Midlands – 19%			
Other	– 8.9%	England – 17.7%			
(ONS, Census 2011)	Staffordshire Moorlands	West Midlands – 14%			
	– 9.8%	England – 16.8%			
	Staffordshire Moorlands	West Midlands – 1.4%			
	– 1.3%	England – 1.3%			
Recreation (SMDC, Annual Monitoring Report 2015-16)	Shortfalls exist in Biddulph, Leek and the rural area for facilities for children. - Shortfalls exist in Biddulph, Cheadle, Leek and the rural area for facilities for young people. - Shortfalls exist in Biddulph and Cheadle for outdoor sports facilities.		A number of improvements have been made to existing facilities at their Moorlands Leisure Centre hub in Cheadle and Birchall Playing Fields, Leek. Improved sports facilities are planned in Biddulph.	Need to address shortfall in play areas and outdoor recreation facilities in Moorlands Leisure Centre hub in Cheadle and Birchall Playing Fields, Leek. Need for qualitative enhancements to a number of existing amenity greenspace sites.	New housing developments to provide adequate on-site open space and/or developer contributions for improvements to existing recreational facilities and open space. Consider the need for new open space allocations.
Travel to Work Car / van use for travel to work (driving or passenger)	Staffordshire Moorlands 78.7%	West Midlands – 71.1% England – 62%	Car ownership has increased in the Staffordshire Moorlands, (2001, 73%).	High incidence of car use	Need to encourage modal shift away from car through other organisations e.g. SCC & public transport companies Need to encourage travel plans within and outside planning process and car sharing
(ONS, Census 2011)					

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
Bus service frequencies in District (SCC, 2013)	Settlements with a frequent service (hourly or better): <ul style="list-style-type: none"> <li>• Biddulph</li> <li>• Biddulph Moor</li> <li>• Blythe Bridge</li> <li>• Brown Edge</li> <li>• Cheadle</li> <li>• Cheddleton</li> <li>• Endon</li> <li>• Kingsley</li> <li>• Leek</li> <li>• Upper Tean</li> <li>• Werrington &amp; Cellarhead</li> <li>• Wetley Rocks</li> </ul> Settlements with a less frequent service: <ul style="list-style-type: none"> <li>• Alton</li> <li>• Ipstones</li> <li>• Waterhouses</li> </ul>			Infrequent services, especially in rural areas	Need to support various public transport initiatives through the work of partners e.g. County Council  Need to promote bus service promotion through planning process e.g. travel plans

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
Modal split of non car modes: all work journeys (ONS, Census 2011)	Staffordshire Moorlands Bus/taxi: 2.5% Rail/Tram: 0.8% Motorbike/scooter: 0.5% Cycling: 0.1% Walking: 9.2%		Significant increase in walking to work since 2001 (0.56%) but decline in all other modes since 2001	Lack of services to many rural areas County funding may only be forthcoming for those routes likely to be viable/profitable Low use of these modes compared to car use	Need to encourage modal shift away from car through the work of partner organisations e.g. SCC Need to encourage travel plans within and outside planning process
Rail facilities within District	Station located at Blythe Bridge			Lack of rail facilities in District. Moorlands and City Railway have reopened one of the protected lines from Cheddleton to Cauldon Lowe and hope to eventually open the line from Stoke to Leek.	Need to ensure policy protection for disused, or proposed rail routes. Need to seek improvements (through the planning process or elsewhere) for improved rail facilities and services.
Homeworking Work mainly at or from home (ONS, Census 2011)	6.75% of all employed residents of District	4.8% - West Midlands 5.3% - England	Since 2001 this figure has declined for the Staffordshire Moorlands (11.3%).	Overall home-working is higher than elsewhere in the West Midlands and England. Need to improve broadband access in the District particularly in the remoter areas.	Need to support continued growth of home-working, as it reduces need to travel.
Council public parking provision in District (SMDC Parking Section)	Leek: 759 Biddulph: 137 Cheadle: 453 Other: 154	Parking provision is considered within the Biddulph Town Centre Area Action Plan and the Town Centre Masterplans for Leek and Cheadle.	Sainsbury's site in Biddulph provides 379 parking spaces in the town centre.	Without adequate parking there is a danger that people will choose to travel to other centres, which will affect the vitality and viability of the town centres	Need to improve car parking in the town centres i.e. better signage and environmental improvements. Need to improve / facilitate access by public transport to reduce the reliance on cars.

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
Car ownership in District (ONS, Census 2011)	85.2% of households have at least 1 car or van	75.3% - West Midlands 74.2% - England	Since 2001 this has increased for the District 2001 - 83.1%.	High ownership may be one factor in high car use for e.g. commuting.	Need to enable and encourage travel without use of car and provide local employment opportunities. Need to ensure that accessibility for those without a car is maintained and improved.
<b>ENVIRONMENT</b>					
CO <sub>2</sub> Total Emissions (National Atmospheric Emissions Inventory, 2005 - 2015)	Staffordshire Moorlands kt CO <sub>2</sub> 2005: 814.3 2015: 645.3	Staffordshire: 4,710.7 kt (2015) Stoke-on-Trent: 1386.1 kt (2015)	Overall emissions have reduced slightly over the last 5 years but the contribution from 'Large Industrial Installations' has remained relatively stable.	In the Staffordshire Moorlands a significant amount of this is created by large industrial installations. This is largely due to having a cement works in the District. Cement production involves a chemical process that results in CO <sub>2</sub> being released.	Need to consider climate change as one of the sustainability issues to be addressed.
Flood Risk Staffordshire Moorlands Level 1 SFRA (2008)	A Level 1 Strategic Flood Risk Assessment (SFRA) was undertaken in 2008. Areas of low, medium and high risk have been mapped. This includes information on flooding from rivers, surface water, ground water, artificial water bodies and sewers.	This provides the basis for the Sequential Test for the Technical Guidance from the NPPF to be applied.		Environment Agency floodmaps have been improved as a result of remodeling work on the River Churnet. New development may have implications on surface water drainage and increased risk of flooding.	Make use of areas in Flood Zone 1 and away from sources of risk before locating development in areas at higher risk. Some potential sites may need a Level 2 Flood Risk Assessment (SFRA).
Water Quality Water Framework Directive Waterbodies (Environment Agency, 2014)	In 2009 the Environment Agency published their River Basin Management Plan for the Humber River Basin District. The Dove catchment, within the Humber River Basin District, includes the River Dove, Churnet Manifold and Hamps, covering much of the Staffordshire Moorlands District. Within the Dove catchment, only 12 out of 37 river water bodies are artificial or heavily modified as a consequence of	The EU Water Framework Directive requires all countries in the EU to achieve at least 'good' status for all water bodies by 2015. Reason for derogation from achieving this where appropriate SMDC is detailed in the note at the end of this section. In these cases target is to achieve good status by 2027.		Key actions for the Dove Catchment include: Improve sewerage treatment works to reduce the levels of nutrients including phosphate to ensure no adverse impact on the Special Area of Conservation. Target pollution prevention campaigns around industrial areas in the lower reaches of the Dove catchment.	The ability of waterbodies to meet their required status by 2027 could be hindered by growth. Flood risk management activities are expected to have a significant impact on the ability of the UK to comply with the requirements of the WFD, as flood protection can involve substantial alteration to the natural properties of a river.
Staffordshire Moorlands Level 1 SFRA (2008)					

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
Renewable Energy SMDC, Annual Monitoring Report Dec 2013)	development, flood risk management, navigation and water supply. As a result, 68% of the assessed water bodies within the Dove catchment are regarded as having an ecological status of at least "good". Two had an ecological classification of poor in 2009: R Manifold / Dove from R Hamps to R Churnet and Leekbrook from source to R Churnet. Details are provided in a note at the end of this section.  The council has granted permission for over 40 separate renewables installations which amount to almost 21 megawatts of installed capacity.  The vast majority of these are not yet installed.	Support for schemes originated in PPS1 (Sustainable Development) and PPS22 (Renewable Energy). Support continued in 2012 NPPF.  Energy Act 2008 introduced financial incentives (Feed-in Tariff and Renewable Heat Incentive).  Permitted development rights have been broadened in relation to micro-renewables.	Growing number of renewables applications however each scheme must be assessed on its own merits. Since 2010 only 15 out of 33 schemes have been approved.	Investigate sources of poor water quality in waterbodies due to physical chemistry determinands; the impact of abstractions and into the source and control of nitrates within the catchment.  Continue to tackle diffuse pollution across the Dove and Churnet catchment with continued use of the England Catchment Sensitive Farming Delivery Initiative.  Most renewables sites are likely to be in rural, Greenfield and often elevated locations. For this reason proposals raise visual or landscape character impact implications.	Local Plan should ensure that watercourses are retained at, or returned to, their most natural possible condition.  Need to apply existing policy consistently.  Written Ministerial Statement 18 June 2015 set out new considerations to be applied to proposed wind energy development.
Waste Recycle for Staffordshire.org)	SMDC total household waste 2012/13: 39,675.67 tonnes.  Total recycling: 22,685.82 tonnes; recycling rate: 57.2%  Total organic waste: 13,320.24 tonnes; rate composted / treated: 33.6%	The Staffordshire Moorlands has one of the lowest amount of residual household waste in Staffordshire and the second highest percentage of household waste that is reused, recycled or composted.	These amounts / percentages for the district have remained stable.	Need to maintain and improve residual household waste and higher levels of reuse and recycling.	Need to encourage the re-use of construction or construction waste materials, especially those sourced locally (i.e. minerals available on site as appropriate).  Where possible integration of on-site waste management facilities.

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
Landscape Landscape, Local Green Space and Heritage Impact Study (2016) Landscape and Settlement Character Assessment (2008)	The Councils Landscape and Settlement Character Assessment assesses the character of the landscape, settlement setting and a review of visual open space designations. The North Staffordshire Green Belt surrounds settlements in the western half of the District.	The Government attaches great importance to Green Belts and states that boundaries should only be altered in exceptional circumstances. (NPPF, 2012).	The green belt in Staffordshire Moorlands District has been subject to only minor change since the adopted 1998 Local Plan.	Close to Stoke-on-Trent, the green belt is particularly vulnerable.	Balance the need for reviewing the green belt boundary with the development needs of individual settlements.  Ensure that the distinctive character of the landscape is retained and change is managed positively.
Designated sites (Natural England & Staffordshire Ecological Record)	Special Areas of Conservation (SACs) : 2 sites Peak District Dales SAC (1.2km from planning authority boundary) South Pennine Moors SAC (0.01km from planning authority boundary) Special Protection Area (SPAs): 1 site Peak District Moors (South Pennine Moors Phase 1) (0.01km from planning authority boundary) Special Site of Scientific Interest (SSSI): 23 (5094 ha) Regionally Important Geological Sites (RIGS): 33 (56 hectares) Local Nature Reserves: 7 sites (56 ha) County Sites of Biological Importance 249 (2094 ha)	There are no sites within the District boundary but a number within 15 km of it, with the South Pennine Moors SAC being extremely close, approximately 0.01km from the boundary and the Peak District Dales SAC is just over a kilometre away.	The number of sites have increased over time.	The Staffordshire Moorlands has a significant number of internationally designated sites and locally protected sites.  Main threat to limestone grasslands of the Peak District Dales SAC is from inappropriate grazing management. Proposed developments have the potential to interfere with drainage patterns within the site. The impact of dust from quarrying needs to be assessed.  Main threat to South Pennine Moors SAC is the impact of atmospheric pollution on the site. The quality of flora of woodlands, bogs and heaths has suffered from poor air quality. Aim is to try and ensure continued improvements in air quality to allow affected species to recolonise if they can. Access management has been a key issue for the area. Management of key pressures (grazing and burning) in order to maintain ecosystems is being carried out.	Ensure that appropriate assessment is carried out on all land use plans affecting Natura 2000 sites (SACs and SPAs).  Need to continue to work with partner organisations who notify and manage sites designated under the biodiversity legislation.

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
	County Biodiversity Alert Sites: 90 (304 hectares)			Main threat to Peak District Moors (South Pennine Moors Phase 1) SPA is due to historic air pollution, high grazing pressure and wildfire burns, many habitats are sub-optimal (in vegetation terms). Habitat erosion or fire, combined with disturbance of breeding birds can have significant impacts.	
Area of Designated Sites (above) brought into favourable condition (Natural England)	Percentage area SSSI Condition Favourable or unfavourable recovering: Bath Pasture 9ha: 100% Brown End Quarry 1.7ha: 100% Caldon Dales 10ha: 100% Caldron Low 0.8ha: 100% Cauldon Railway Cutting 2.2ha: 100% Churnet Valley 347ha: 99.75% Colshaw Pastures 3.26ha: 100% Combes Valley 113ha: 100% Dimmings Dale and The Ranger 23ha: 100% Ecton Copper Mines 99ha: 100% Froghall Meadow and Pastures 11ha: 100% Hamps and Manifold Valleys 1,009.83ha: 94.87%	Biodiversity 2020 sets out actions to increase the proportion of Sites of Special Scientific Interest (SSSIs) in favourable condition.	By 2020 target is for better wildlife habitats with 90% of priority habitats in favourable or recovering condition and at least 50% of SSSIs in favourable condition, while maintaining at least 95% in favourable or recovering condition.	Need to continue to carry out management work of its SSSIs, and support management of partner organisations.  Need to consider scope of acquiring contributions through planning process, for the management of existing habitats, or for the purposes of creating new ones.	

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
<p>Priority habitats and protected species</p> <p>SMDC Green Infrastructure Strategy 2017</p>	<p>Huime Quarry 40.7ha: 100%</p> <p>Leek Moors 3,970.84ha: 85.99%</p> <p>Moss Carr 8.47ha: 100%</p> <p>Rue Hill 15.53ha: 95.65%</p> <p>Saltersford Lane Meadows 4ha: 100%</p> <p>Swineholes Wood &amp; Black Heath 46.2ha: 100%</p> <p>Thorncliffe Moor 57.59ha: 100%</p> <p>Wetley Moor 69.47ha: 100%</p> <p>Whiston Eaves 10.44ha: 67.47%</p>	<p>Local Biodiversity Action Plans (such as the Staffordshire Biodiversity Action Plan) identify local priorities for biodiversity conservation and work to deliver agreed actions and targets for priority habitats and species and locally important wildlife and sites.</p>	<p>There is a trend towards fragmentation and isolation of habitats. Working at a landscape level, or ecosystems approach, the Staffordshire Biodiversity Action Plan (SBAP) focuses conservation efforts on the areas within the county that will result in the greatest benefit for ecological networks, habitats and species.</p>	<p>Managing priority habitats will support the habitat needs for many of the priority species associated with the area. Ancient and semi-natural woodland are important for their bird assemblages including redstart, pied flycatcher and wood warbler and wet woodland and scrub are important for willow tit. Woodland is also important for invertebrates including the argem &amp; sable moth. Priority habitat moorland and grassland mosaics support the priority bird species curlew, snipe and lapwing and the priority habitat of rivers and streams can support water voles, another priority species for conservation action. Cecilly Brook, Cheadle holds a strong, isolated population of water voles.</p>	<p>There is a need to protect and maintain natural and semi-natural habitats of nature conservation value outside of statutory designated sites to sustain the variety of important habitats and the species within the county and the District.</p> <p>The Local Plan should also be supported by a Green Infrastructure Strategy to help ensure better ecological connectivity of habitats.</p>

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
<p>Irreplaceable natural habitats</p> <p>State of Staffordshire's Nature 2016 Technical Report, Staffordshire Wildlife Trust</p> <p>SMDC Green Infrastructure Strategy 2017</p>	<p>The Churnet Valley area supports examples of nationally important grassland types.</p> <p>Known distribution of irreplaceable natural habitat across the District is mapped in the Council's GI strategy.</p> <p>Woodland cover exceeds 3,000ha in the Churnet Valley, a large proportion of which is of ancient origin.</p> <p>Woodland birds such as redstart, pied flycatcher and wood warbler, and invertebrates including the argent &amp; sable moth are found throughout.</p>		<p>Many of the woodland bird species found in Staffordshire are showing national declines. Lesser-spotted woodpecker, willow tit, tree pipit and wood warbler have all shown strong longterm declines of more than 50%, whilst redstart and pied flycatcher have shown moderate long-term declines of 25% to 50%. Willow tit is the UKs fastest declining resident bird. Meanwhile woodland butterflies declined 55% in England between 1990 and 2014.</p>	<p>Trees and woodland classed as "ancient" or "veteran" are irreplaceable. Ancient woodland takes hundreds of years to establish and is considered important for its wildlife, soils, recreation, cultural value, history and contribution to landscapes.</p> <p>"Veteran trees" are trees which, because of their age, size or condition are of cultural, historical, landscape and nature conservation value. They can be found as individuals or groups within ancient wood pastures, historic parkland, hedgerows, orchards, parks or other areas.</p>	<p>Local Plan should enable the protection, connection and enhancement of irreplaceable natural habitats, particularly ancient woodlands and veteran trees.</p>
<p>Heritage Assets</p> <p>(SMDC, Regeneration)</p>	<p>The District contains just under 1,000 Listed buildings and structures, 16 Conservation Areas (as at September 2016) and a number of scheduled monuments. (SMDC, Annual Monitoring Report Dec 2013)				will decrease as there are less opportunities and greenfield sites are developed to meet housing need.	developed sites before greenfield sites however the current lack of a 5 year housing supply could be an issue.
<b>ECONOMIC</b>					
Employment Land Requirement Study, Update 2017	The emerging Local Plan identifies the provision of 27 hectares of employment land in the District.	Threats to the economy from competition from surrounding areas and the loss of existing employment sites due to closures, restructuring and pressure from other uses, particularly housing.	A review of the existing employment land situation and future employment land requirement has been undertaken.	Lack of good quality modern premises and smaller sized units available for immediate take up.  Recent downturn in the national economy is a threat to growth and continuation of existing businesses and ability to attract new firms.	Need to strengthen the District's role within the sub-region.  Need to meet local employment needs in order to achieve self-sufficient communities.  Need to allocate additional employment sites.
Business Structure (nomis official labour market statistics 2017)	UK Business Counts (2017) SMDC: Micro (0 to 9): 3,850 Small (10 to 49): 280 Med (50 to 249): 30 Large (250+): 5 Total: 4,165	Staffordshire is shown to have lower business start up rates than regional and national averages. The business start-up rate has declined significantly in Staffordshire which is similar to the regional and national trends.	The number of VAT registered businesses in the Staffordshire Moorlands have declined since 2007 (3,650).  Business registrations in the Staffordshire Moorlands have also declined since 2007 (280).	Except for Newcastle-under-Lyme Borough, enterprise rates in the Staffordshire Moorlands are the lowest in Staffordshire.	Need to adopt initiatives to encourage further employment development and retention/expansion of existing businesses.
Out-of-Work Benefits Claimant Count (Nomisweb, Dec 2017)	Staffordshire Moorlands Number of claimants – 530 Claimant Rate – 0.9%	West Midlands Claimant Rate – 2.4% Great Britain Claimant Rate – 1.9%		The claimant count is much lower than the West Midlands and the Great Britain count. However there are wards within the district where rates are much higher (such as Biddulph East and Leek North).	Need to diversify the economic base to improve employment opportunities within the Staffordshire Moorlands District.
Employment Development	The amount of employment land lost to non-employment uses varies from year to year. 2012-2013 this was 372m <sup>2</sup> .			There is concern for the loss of small employment sites to residential use.	Need to safeguard good quality employment sites from the development of other uses.

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
(SMDC, Annual Monitoring Report Dec 2013)					
Labour Supply (Nomisweb, 2017)	Economically active Oct 2016 – Sep 2017 Staffordshire Moorlands: Economically active: 51,000 (80.5%) In employment: 49,500 (78.0%) Employees: 42,400 (68.3%) Self-employed: 7,100 (9.7%) Unemployed: 1,700 (3.3%)	Economically active Oct 2016 – Sep 2017 West Midlands: Economically active: 76.2% In employment: 72.0% Employees: 62.3% Self-employed: 9.5% Unemployed: 5.4% Great Britain: Economically active: 78.1% In employment: 74.5% Employees: 63.6 % Self-employed: 10.6 % Unemployed: 4.5%	Economic activity in the District has increased since 2012/13 when 41,300 people were in employment (66.5%). Unemployment in 2012/13 was higher at 2,500 (5.6%).	Economic activity has increased in the Staffordshire Moorlands. The percentage in employment (78%) is higher than in the West Midlands (72%) and Great Britain (74.5%).	Need to diversify the economic base to further improve employment opportunities for residents.
Earnings by place of residence (Nomisweb, 2017)	Staffordshire Moorlands Gross weekly pay (pounds): Full-time workers: 515.9 Male full-time workers: 547.2	West Midlands Gross weekly pay (£): Full-time workers: 517.4 Male full-time workers: 561.3	The level of workplace-based pay (for people working in the District) has been steadily increasing but still remains some way below that of the West Midlands and Great Britain.	Economic activity has increased in the Staffordshire Moorlands. The percentage in employment (78%) is greater than in the West Midlands (72%) and Great Britain (74.5%).	Need to diversify the economic base to further improve employment opportunities for residents.

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
	Female full-time workers: 476.3	Female full-time workers: 454.7 Great Britain Gross weekly pay (£): Full-time workers: 552.7		A high proportion of those residents in the Staffordshire Moorlands who are economically active but not in employment do not want a job or are retired.	
	Male full-time workers: 594.2 Female full-time workers: 494.4	Male full-time workers: 594.2 Female full-time workers: 494.4			
Earnings by place of work (Nomisweb, 2017)	Staffordshire Moorlands Gross weekly pay (pounds): Full-time workers: 483.3 Male full-time workers: 543.4 Female full-time workers: 364.7	West Midlands Gross weekly pay (pounds): Full-time workers: 514.9 Male full-time workers: 562.0 Female full-time workers: 451.4 Great Britain Gross weekly pay (pounds): Full-time workers: 552.3 Male full-time workers: 594.1 Female full-time workers: 494.0			
% of pupils achieving 5 or more GCSEs A* to C grades	Staffordshire Moorlands 84.9% (2012)	Staffordshire 83.5% (2012) West Midlands 85.5%	Staffordshire Moorlands 63.8% (2005)	The results have increased significantly since 2005 and are higher than the Staffordshire and national average.	Ensure the provision of relevant employment skills, training and support to retain and develop local workforce.

(Department of Education, 2013)		(2012) England 81.8% (2012)			
Employment by Occupation Nomisweb, 2017	<p>Oct 2016 – Sep 2017</p> <p>Managerial, professional and technical (Groups 1-3)</p> <p>Staffordshire Moorlands – 22,700 (45.9%)</p> <p>Administrative, secretarial and skilled trades (Groups 4-5)</p> <p>Staffordshire Moorlands – 8,800 (17.8%)</p> <p>Caring, leisure, sales and other services (Groups 6-7)</p> <p>Staffordshire Moorlands – 5,400 (10.9%)</p> <p>Plant/machine operatives and elementary occupations (Groups 8-9)</p> <p>Staffordshire Moorlands – 12,600 (25.4%)</p>	<p>Oct 2016 – Sep 2017</p> <p>Managerial, professional and technical (Groups 1-3)</p> <p>West Midlands – 41.4%</p> <p>Great Britain – 45.6%</p> <p>Administrative, secretarial and skilled trades (Groups 4-5)</p> <p>West Midlands – 21.5%</p> <p>Great Britain – 20.7%</p> <p>Caring, leisure, sales and other services (Groups 6-7)</p> <p>West Midlands – 16.7%</p> <p>Great Britain – 16.7%</p> <p>Plant/machine operatives and elementary occupations (Groups 8-9)</p> <p>West Midlands – 20.4%</p> <p>Great Britain – 16.9%</p>		<p>The District has a higher percentage of people working in Groups 1-3 than in the West Midlands and is broadly similar with the level for Great Britain. It has a lower percentage of people working in Groups 4-7 than in the West Midlands and Great Britain and a higher percentage in Groups 8-9.</p>	<p>Need to identify and improve training opportunities in the District.</p>

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
Town Centre Health  (Source: SMDC 2017)	Vacancy rates (%): Biddulph 15.8% Cheadle 13.6% Leek 7.9%	Average for district is now higher than both UK and West Midlands rates which are 9.6% and 10.0% respectively (July 2017) – but Leek remains stronger than other locations / above average.	Numbers of vacant shops have increased in all three towns (2016 to 2017) despite good levels of new occupation (e.g. 24 new in Leek; 8 new in Cheadle; 5 in Biddulph) – which means that despite new openings including national chains such as Peacocks & Argos – more have closed than opened.  Charity shop occupation has remained static in all three towns & remains low with a district average of just 4.1%	Leek has a lower vacancy rate than the West Midlands and UK average.  All 3 towns have an individual character and are not dominated by national retailers.	Need to maintain the vitality and viability of the towns.  Need to enhance local distinctiveness.  Need to protect the retail function in the heart of the town centres.
Retail  Retail Study, GVA 2013, partial update 2017)	Functioning shopping high streets in Leek, Biddulph and Cheadle.  Town Centre and Retailing Policies set out in emerging Local Plan.	Hanley, Stoke-on-Trent – 6-10 miles  Manchester - 30 miles  Some surrounding villages have small-scale facilities	The vitality and viability of town centres has been challenged by the economic climate and changing shopping habits with the increased use of online shopping at the expense of the high street.	All 3 town centres are considered to be displaying signs of vitality and viability according to the retail study.  The success of town centres may be undermined by competition from online shopping.	Need to protect the towns as service centres.  Need to continue to improve the environment to attract retailers and shoppers to the town centres.  Need to promote additional local employment to help encourage people to shop in the area.  There is a need to support further food retail development in Biddulph.  No additional comparison floorspace currently needed in any of the towns – review of comparison floorspace allocation in Biddulph AAP is recommended in Retail Study.

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
<p>Food Retail (Data Source: Retail Study, 2013)</p>	<p>% of residents that use local food stores for their main food shopping: Leek Leek catchment: 95.9% Leek South catchment: 51.1% Leek Peripheral Catchment: 42.1% Cheadle. Cheadle: 64.7% Outer Cheadle catchment: 27.7% Biddulph Biddulph Catchment : 54.5%</p>		<p>The overall main food market share which Leek secures from its respective catchment zones has significantly increased since 2006. The retention levels for the immediate Leek catchment area are particularly high with extremely limited expenditure leakage to alternative centres and stores. The conversion of the former Somerfield store to Morrison's in Cheadle has significantly increased main food expenditure retention in the town from both its immediate and outer catchments. The Asda store (former Netto) performs a minor main food shopping role.  The opening of the new Sainsbury's store has had a significant impact on convenience provision within Biddulph Town Centre with three previous (top-up orientated) stores having subsequently closed. The Sainsbury's store has also generated a positive increase in the town centre main food market share (c. 40% increase since 2006).</p>	<p>Whilst the new Sainsbury's store has addressed the significant quantitative and qualitative deficiencies in the convenience retail offer in Biddulph, the town still only retains c. 55% of main food spend arising within its tightly drawn catchment. There remains significant outflow of main food expenditure to mainstream and deep discount foodstores in Congleton and the wider Stoke-on-Trent conurbation (Tunstall, Kidsgrove etc.).</p>	<p>Further comparison floorspace may be needed in Leek if the units on the Sainsburys site are not developed.  Retail Study has identified a qualitative need for a sustainably located discount food store (c. 1,000 m<sup>2</sup> net sales) in Biddulph so as to provide additional competition and choice for local residents due to the closure of the other food stores in the town.</p>

Indicator	Quantified data	Comparators and targets	Trend	Issues identified	Actions / issues for Local Plan / SA
<p>Non-Food Retail (Data Source: Retail Study, 2013)</p>	<p>% of those residents living in the Leek Catchment using local stores for their comparison goods shopping (by type):</p> <ul style="list-style-type: none"> <li>a) Personal Goods – 66.2%</li> <li>b) Small Domestic Appliances – 82.3%</li> <li>c) CDs / DVDs – 21.4%</li> <li>d) Books &amp; Stationary – 87.8%</li> <li>e) Glassware / Tableware – 67.6%</li> <li>f) Medical Goods – 87%</li> <li>g) Recreational Goods – 54.8%</li> <li>h) Bulky Goods – 48.4%</li> </ul> <p>Leek South Catchment:</p> <ul style="list-style-type: none"> <li>a) 12.5%</li> <li>b) 27.4%</li> <li>c) 6.9%</li> <li>d) 36.2%</li> <li>e) 20.7%</li> <li>f) 37%</li> <li>g) 19.1%</li> <li>h) 11.5%</li> </ul>		<p>The overall comparison market share (non-bulky and bulky combined) retained by Leek town centre from its immediate catchment is c. 55%; this is relatively positive given the limitations of the existing comparison retail offer and competition from Stoke-on-Trent.</p> <p>In terms of future strategy for Cheadle, the retail study identifies limited quantitative need for new comparison retail in Cheadle over the emerging Local Plan period.</p>	<p>If the comparison retail floorspace forming part of the Sainsburys scheme in Leek does not come forward for development, further retail warehousing provision is likely to be needed in Leek.</p> <p>There is now a lower demand for comparison goods floor space in Biddulph than set out in the AAP.</p>	<p>Need to update the study for the plan period post 2018 to investigate whether any further capacity needs arise.</p> <p>The Retail Study recommends that the Council re-visits its AAP allocation on the west side of Biddulph Bypass and considers alternative uses for the site.</p>
