

**Notes**  
 Map shows Severn Trent Water (ST) DG5 data at a 5 digit postcode scale. The DG5 register does not indicate areas or properties at risk of future flooding. It simply indicates areas reported to ST that have experienced flooding during the last 10 year period as a result of insufficient hydraulic capacity in the sewer network. It is important to note that maintenance work may have been undertaken by ST since the flooding incident(s) occurred. More detailed information should be requested from ST for site specific FRAs.
